Plaintiffs' allegations are summarized as follows. Kim is a financial advisor and licensed insurance broker that specializes in estate planning. She is a senior partner with Signature. FAC, ¶ 4. Citadel is a law firm, and Hale is the attorney responsible for Citadel's practice of law. Id. at ¶ 6. In 2019, Kim and Hales offered and provided estate planning services to Plaintiffs' father, Herbert Joseph Simmons ("Decedent"). Decedent signed off on an estate plan on June 20, 2019. Id. at ¶ 35. However, **[*3]** "the terms of the purported 2019 estate plan were inherently problematic, demonstrated ethical breaches, and below with [sic] the standard of care." Id. at ¶ 39. For example, the terms differed substantially from Decedent's previous 2012 trust, such that Plaintiffs were disinherited; neither Hales nor anyone at Citadel advised Decedent concerning the terms of the 2019 trust; and Kim advised Decedent to sign the trust without counsel or explanation. Id. at ¶¶ 36-37, 40-45. Jordan is currently challenging the purported 2019 trust in probate court. Id. at ¶¶ 47-48.

On June 18, 2021, Signature and Kim (collectively, "Signature Defendants") filed a demurrer to the FAC and motion to strike. Plaintiffs filed oppositions on September 15, 2021. Signature Defendants have not filed replies.

On June 21, 2021, Citadel and Hales (collectively, "Citadel Defendants") filed a demurrer to the FAC. Plaintiffs filed an opposition on September 15, 2021, and Citadel Defendants filed a reply on September 21, 2021.

The Court considers the moving, opposing, and reply papers and rules as follows.

Meet and Confer Efforts

Before filing a demurrer, the demurring party is required to meet and confer in person or telephonically **[*4]** with the party who filed the pleading demurred to for the purposes of determining whether an agreement can be reached through a filing of an amended pleading that would resolve the objections to be raised in the demurrer. *CCP § 430.41*. A demurring party shall file a declaration concerning the meet and confer. Id., *(a)(3)*.) "Any determination by the court that the meet and confer process was insufficient shall not be grounds to overrule or sustain a demurrer." Id., *(a)(4)*.

Similarly, before filing a motion to strike, the moving party is required to meet and confer with the party who filed the pleading that is subject to the motion to strike for the purposes of determining whether an agreement can be reached through a filing of an amended pleading that would resolve the objections to be raised in the motion to strike. *CCP § 435.5 (a)*. A moving party shall file a declaration concerning the meet and confer. Id., *(a)(3)*.

The Court finds that Defendants have satisfied the meet and confer requirement. Thomas Decl. ¶¶ 2-7, Exh. A-B [Signature Defendants]; Samani Decl., ¶ 2 [Citadel Defendants].

Requests for Judicial Notice

Signature Defendants

Signature Defendants request judicial notice of (1) Plaintiffs' Complaint in this action; (2) the **[*5]** Court's order sustaining Defendants' demurrer to the Complaint; (3) Plaintiffs' FAC; and (4) Jordan's Petition for Instructions to Confirm Validity of 2012 Trust and Invalidity of Revocation thereof, filed on November 14, 2019 in probate court (Case No. 19STPB10782) ("Jordan's Probate Petition"). RJN, Exh. 1-4.

The Court GRANTS the request, but not as to any hearsay. *Evid. Code § 452(d)*.

Citadel Defendants

Citadel Defendants request judicial notice of (1) Jordan's Probate Petition; (2) the Petition to Transfer Title to the Real and Personal Property Held in the Name of Herbert Joseph Simons to Sharon Louise Alfers, Surviving Trustee of the Simons Alfers Family Trust, Dated June 20, 2019, Pursuant to Probate Code § 850, filed on October 8, 2019 in the matter styled In re the Matter of the Simons-Alfers Family Trust, Dated June 20, 2019 (Case No. 19STPB09591); (3) the Case Summary for the matter styled In the Matter of The Herbert Joseph Simons Living Trust, Dated October 16, 2012 (Case No.19STPB10782); (4) the Case Summary for Case No. 19STPB09591; and (5) the Court's order sustaining Defendants' demurrer to the Complaint in this action. RJN, Exh. 1-5

The Court GRANTS the request, but not as to any hearsay. *Evid. Code § 452(d)*.

Legal Standards **[*6]**

Demurrer

A demurrer tests the sufficiency of the pleading at issue as a matter of law. *City of Chula Vista v. County of San Diego (1994) 23 Cal.App.4th 1713, 1719*. A demurrer may be sustained where the complaint fails to state facts sufficient to constitute a cause of action. *CCP § 430.10(e)*. The ultimate facts alleged in the complaint must be deemed true, as well as all facts that may be implied or inferred from those expressly alleged. *Marshall v. Gibson, Dunn & Crutcher (1995) 37 Cal.App.4th 1397, 1403*; see also *Shields v. County of San Diego (1984) 155 Cal.App.3d 103, 133* ("On demurrer, pleadings are read liberally and allegations contained therein are assumed to be true.") However, the Court does not assume the truth of allegations expressing conclusions of law or allegations contradicted by the exhibits to the complaint or by matters of which judicial notice may be taken. *Vance v. Villa Park Mobilehome Estates (1995) 36 Cal.App.4th 698, 709*.

If the demurrer is sustained, plaintiff "has the burden of proving the possibility of cure by amendment." *Czajkowski v. Haskell & White, LLP (2012) 208 Cal.App.4th 166, 173* (citing *Grinzi v. San Diego Hospice Corp. (2004) 120 Cal.App.4th 72, 78-79*.) Leave to amend must be allowed where there is a reasonable possibility of successfully stating a cause of action. *Schulz v. Neovi Data Corp. (2007) 152 Cal.App.4th 86, 92*.

Motion to Strike

The court may, upon a motion, or at any time in its discretion, and upon terms it deems proper, strike any irrelevant, false, or improper matter inserted in any pleading. *CCP § 436(a)*. The court may also strike all or any part of any pleading not drawn or filed in conformity with the laws of **[*7]** this state, a court rule, or an order of the court. *CCP § 436(b)*.

Signature Defendants' Demurrer

Signature Defendants demur to the first, second, third, and fourth causes of action on grounds that they fail to state facts sufficient.

Scope of Leave to Amend (Third COA: Tortious Interference with Contract; Fourth COA: Tortious Interference with Prospective Economic Advantage)

Signature Defendants demur to the third and fourth causes of action on grounds that Plaintiffs did not have leave of court to allege these new causes of action.

"Generally, where a court grants leave to amend after sustaining a demurrer, the scope of permissible amendment is limited to the cause(s) of action to which the demurrer has been sustained. …" (Edmon & Karnow, Cal. Practice Guide: Civil Procedure Before Trial (The Rutter Group 2016) ¶ 6:635.5; see *Harris v. Wachovia Mortgage, FSB (2010) 185 Cal.App.4th 1018, 1023*.)

The general rule does not apply if the new cause of action directly responds to the court's reason for sustaining the earlier demurrer. See *Patrick v. Alacer Corp. (2008) 167 Cal.App.4th 995, 1015*; see also *Rope v. Auto-Chlor System of Washington, Inc. (2013) 220 Cal.App.4th 635, 654* (overruled by statute on other grounds)

In its April 29, 2021 order sustaining Defendants' demurrer, the Court found that Plaintiffs had not alleged any duty owed to them by Defendants. The Court then granted Plaintiffs leave **[*8]** to amend to properly allege duty. April 29, 2021 Order.

Plaintiffs concede and the Court agrees that these are new claims. However, these claims are based on the same general set of facts. Compare Compl., ¶¶ 10-48 with FAC, ¶¶ 10-48. Additionally, the gist of them continues to be that Defendants disrupted the benefits to Plaintiffs under the 2012 trust, and Defendants acted negligently and engaged in the unauthorized practice of law. Compare Compl., ¶¶ 49-66 with FAC, ¶¶ 61-73.

Accordingly, the Court finds that these new causes of action attempt to address the defects noted in the Court's April 29, 2021 order.

The Court OVERRULES the demurrer on this ground.

First COA: Unfair Business Practices

Signature Defendants demur on grounds that (1) Plaintiffs lack standing, as previously held by the Court in its April 29, 2021 order, because they were not clients; (2) Plaintiffs do not have a private cause of action to assert unauthorized practice of law; and (3) Plaintiffs fail to allege an injury-in-fact because their expected future inheritance is conjectural.

"The [Unfair Competition Law] prohibits, and provides civil remedies for, unfair competition, which it defines as 'any unlawful, unfair **[*9]** or fraudulent business act or practice.'" *Daniels v. Select Portfolio Servicing, Inc. (2016) 246*

Cal.App.4th 1150, 1186 (quoting Kwikset Corp. v. Superior Court (2011) 51 Cal.4th 310, 320). "A plaintiff may pursue a UCL action in order to obtain either (1) injunctive relief, the primary form of relief available under the UCL, or (2) restitution as may be necessary to restore to any person in interest any money or property, real or personal, which may have been acquired by means of such unfair competition." Ibid (quoting Jenkins v. JP Morgan Chase Bank (2013) 216 Cal.App.4th 497, 520 (disapproved on other grounds) (emphasis in original; internal quotations omitted).

"An unlawful business practice or act is an act or practice, committed pursuant to business activity, that is at the same time forbidden by law." Klein v. Earth Elements, Inc. (1997) 59 Cal.App.4th 965, 969.) "A business practice is unfair within the meaning of the UCL if it violates established public policy or if it is immoral, unethical, oppressive or unscrupulous and causes injury to consumers which outweighs its benefits." McKell v. Washington Mutual, Inc. (2006) 142 Cal.App.4th 1457, 1473.) When the UCL claim is brought against a competitor, the "unfair" prong of the statute "means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." **[*10]** Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 187.) "[A]ny finding of unfairness to competitors under section 17200 [must] be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." Id. at 186-187. Lastly, "[a] fraudulent business practice under section 17200 'is not based upon proof of the common law tort of deceit or deception, but is instead premised on whether the public is likely to be deceived.'" Pastoria v. Nationwide Ins. (2003) 112 Cal.App.4th 1490, 1498. Stated another way, "[i]n order to state a cause of action under the fraud prong of [section 17200] a plaintiff need not show that he or others were actually deceived or confused by the conduct or business practice in question." Ibid.

Plaintiffs allege as follows.

"Defendants have engaged in unfair business practices under Business & Professions Code, section 17200, et seq., because they have entered into a joint enterprise for the unauthorized practice of law and deception of clients who think they are engaging legitimate legal services. Defendants' business practices as stated herein are unlawful, unfair, or fraudulent.

As a result of Defendants' unfair business practices Plaintiffs lost their inheritance and supportive funds from their father Herbert, which funds should be paid by Defendants as restitution."

FAC, ¶¶ 53-54.

The first issue is whether Plaintiffs have standing. As discussed **[*11]** below, the answer is no.

[P]rivate standing is limited to any person who has suffered injury in fact and has lost money or property as a result of unfair competition [Citation.] The intent of this change was to confine standing to those actually injured by a defendant's business practices and to curtail the prior practice of filing suits on behalf of clients who have not used the defendant's product or service, viewed the defendant's advertising, or had any other business dealing with the defendant…. [Citation.]

While the voters clearly intended to restrict UCL standing, they just as plainly preserved standing for those who had had business dealings with a defendant and had lost money or property as a result of the defendant's unfair business practices. [Citation.]"

Clayworth v. Pfizer, Inc. (2010) 49 Cal.4th 758, 788 (internal quotations and citations omitted).

Here, Plaintiffs did not use Signature Defendants' services; rather, Decedent did.

Thus, Plaintiffs do not have standing to sue Signature Defendants for unlawful business practices

The Court need not address the parties' remaining arguments.

The Court SUSTAINS the demurrer to this cause of action without leave to amend. Plaintiffs were previously granted leave to amend; they failed **[*12]** to cure the defects noted in the Complaint; and in opposition, Plaintiffs have not shown a reasonable possibility of stating a successful claim.

Second COA: Unauthorized Practice of Law

Signature Defendants demur on grounds that (1) there is no private, civil cause of action for the unauthorized practice of law; (2) Plaintiffs lack standing because they were not Signature Defendants' clients; (3) and Plaintiffs' allegations do not support a claim that Signature Defendants engaged in the unauthorized practice of law.

Business and Professions Code section 6125 states that "[n]o person shall practice law in California unless the person is an active licensee of the State Bar." *Section 6125* "does not create any private causes of action against someone who is practicing law without a license." 76 Ops.Cal.Atty.Gen. 193 (1993) at *1[2]; See also *Ross v. Creel Printing & Publishing Co. (2002) 100 Cal.App.4th 736, 746* (There is no independent cause of action for the breach of a disciplinary rule"). However, "a violation of *section 6125* may form the basis for a cause of action under some other statute or legal theory." Ops.Cal.Atty.Gen, supra, at *1. For example, "[a] private cause of action based on a violation of *section 6125* has been recognized where negligent work by the unlicensed practitioner has caused a private party to suffer loss." Id. at *2; see *Biakanja v. Irving (1958) 49 Cal.2d 647*.

In opposition, **[*13]** it appears that Plaintiffs argue that Signature Defendants owed them a duty as intended beneficiaries of legal services. (Opp., 8:4-17.)

Attorney "[l]iability to testamentary beneficiaries not in privity is not, however, automatic." *Bucquet v. Livingston (1976) 57 Cal.App.3d 914, 921*. Whether an attorney owes a duty to a nonclient beneficiary "is a matter of policy and involves the balancing of various factors." *Lucas v. Hamm (1961) 56 Cal.2d 583, 588*.

"[T]he testator's intent to benefit the plaintiff is a prerequisite to the imposition of a duty on the attorney to the plaintiff." *Paul v. Patton (2015) 235 Cal.App.4th 1088, 1098*. Liability to a third party will not be imposed "where there is a substantial question about whether the third party was in fact the decedent's intended beneficiary, or where it appears that a rule imposing liability might interfere with the attorney's ethical duties to his client or impose an undue burden on the profession." *Boranian v. Clark (2004) 123 Cal.App.4th 1012*. Where a doubt exists as to whether the plaintiff was the decedent's intended beneficiary, no duty exists. Id.

Here, Plaintiffs have not alleged Decedent's unambiguous intent to benefit Plaintiffs through the 2019 estate plan. See FAC, ¶ 48; Signature Defendants' RJN, Exh. 4. As there is a question about whether Plaintiffs were in fact Decedent's intended beneficiaries, Signature **[*14]** Defendants cannot be held accountable to Plaintiffs. *Chang v. Lederman (2009) 172 Cal.App.4th 67, 82* ("when the claim…is that a will or trust, although properly executed and free of other legal defects, did not accurately express the testator's intent, no duty or liability to the nonclient potential beneficiary has been recognized"); *Boranian, supra, 123 Cal.App.4th at 1019* (the primary duty is owed to the testator-client, and the attorney's paramount obligation is to serve and carry out the intention of the testator").

Thus, Plaintiffs do not have standing to sue Signature Defendants for the unauthorized practice of law.

The Court need not address the parties' remaining arguments.

The Court SUSTAINS the demurrer to this cause of action without leave to amend. Plaintiffs were previously granted leave to amend; they failed to cure the defects noted in the Complaint; and in opposition, Plaintiffs have not shown a reasonable possibility of stating a successful claim.

Third COA: Tortious Interference with Contract

Signature Defendants demur on grounds that (1) the 2019 trust is not a contract; (2) even if it was a contract, Plaintiffs lack standing to sue Signature Defendants; (3) Decedent's testamentary intent caused the disruption of the 2012 trust, not Signature Defendants' **[*15]** conduct; and (4) the cause of action is not recognized in the context of expected inheritance.

"The elements of an action for tortious interference are (1) a valid contract between plaintiff and a third party; (2) defendant's knowledge of this contract; (3) defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; (4) actual breach or disruption of the contractual relationship; and (5) resulting damage." *Hahn v. Diaz-Barba (2011) 194 Cal.App.4th 1177, 1196* (internal quotations and citation omitted).

Plaintiffs allege as follows. The 2012 trust is a contract. FAC, ¶¶ 63-64. Signature Defendants knew of the 2012 trust, and they intentionally acted to disrupt Plaintiffs' benefits under the trust by engaging in the unauthorized practice of law. FAC, ¶¶ 64-65. As a result, Plaintiffs were damaged. FAC, ¶¶ 66-67.

The first issue is whether Plaintiffs may base their cause of action on a trust to which they are beneficiaries. As discussed below, the answer is no.

"The rules governing the respective rights of action of trustees and beneficiaries of express trusts are not the same as those generally applicable to promisees and third party beneficiaries. (4 Witkin, Cal.Procedure, Pleading, supra, § 117, **[*16]** at p. 153.) The California Supreme Court has stated that "Section 1559 of the Civil Code, providing that a contract made expressly for the benefit of a third person may be enforced by him at any time before the parties thereto rescind it, has no application to [a] case where a trust has been created in favor of such third person. Such trust is governed by the provisions of the code with reference to trusts." (*National Bank v. Exchange Nat. Bank (1921) 186 Cal. 172, 180, 199 P. 1*.)"

Saks v. Damon Raike & Co. (1992) 7 Cal.App.4th 419, 430-431; See also *Estate of Giraldin (2012) 55 Cal.4th 1058, 1066* (a "beneficiaries' interest in [property of the settlor] is merely potential and can evaporate in a moment at the whim of the [settlor]" (internal quotations and citations omitted)).

Though Plaintiffs do not seek to enforce the 2012 trust, the Court finds Saks and Estate of Giraldin instructive. Plaintiffs are allegedly beneficiaries under the 2012 trust. Their recovery under their cause of action depends on the validity of the 2012 trust. As of now, it is unknown whether the 2012 trust is valid, as that issue is being litigated in a concurrent probate action. FAC, ¶ 48; Signature Defendants' RJN, Exh. 4. This Court declines to determine whether the 2012 trust is valid. *Saks, supra, 7 Cal.App.4th at 431* ("The Probate Code clearly manifests the Legislature's intent to vest the exclusive subject matter jurisdiction **[*17]** for all proceedings concerning the internal affairs of trusts in the probate department, and establishes the specific remedies and procedures for trust beneficiaries").

Accordingly, the Court finds that Plaintiffs have not shown the existence of a valid contract.

The Court need not address the parties' remaining arguments.

The Court SUSTAINS the demurrer to this cause of action. In an abundance of caution, the Court grants Plaintiffs 20 days' leave to amend.

Fourth COA: Tortious Interference with Prospective Economic Advantage

Signature Defendants demur on grounds that (1) Plaintiffs should have alleged intentional interference with expected inheritance ("IIEI"); (2) Plaintiffs' claim for IIEI fails because Plaintiffs failed to allege any independent wrongful conduct, among other things; (3) Plaintiffs have an adequate remedy in probate court; and (4) Plaintiffs' claim for tortious interference with prospective economic advantage fails because Plaintiffs have not alleged proximate cause, among other things.

The elements of¿intentional¿interference with prospective¿business¿advantage are (1) economic relationship between the plaintiff and third party, (2) probability of future economic benefit **[*18]** to the plaintiff, 3) defendant's knowledge of the relationship, (4) defendant's intentional acts designed to disrupt the relationship, (5) defendant engaged in an independently wrongful act in disrupting the relationship beyond just inducing disruption of economic advantage, (6) actual disruption of the relationship; and (7) economic harm to the plaintiff caused by the acts.¿Sole Energy Co. v.¿Petrominerals¿Corp.¿(2005) 128¿Cal.App. 4th 212, 241.)¿"'[A]n act is independently wrongful if it is unlawful, that is, if it is proscribed by some constitutional, statutory, regulatory, common law, or other determinable legal standard.'¿[Citation.]" *Edwards v. Arthur Andersen LLP¿(2008) 44 Cal.4th 937, 944*.

For the same reasons discussed above, the Court finds that Plaintiffs have not shown the existence of an economic relationship. *Saks, supra, 7 Cal.App.4th at 431*; *Estate of Giraldin, supra, 55 Cal.4th at 1066*.

It appears that Plaintiffs seek relief for Signature Defendants' purported interference with Plaintiffs' expected inheritance under the 2012 trust.

The elements for intentional interference with expectation of inheritance are: "(1) an expectation of receiving an inheritance; (2) intentional interference with that expectancy by a third party; (3) the interference was independently wrongful or tortious; (4) there was a reasonable certainty that, but for the interference, the plaintiff would **[*19]** have received the inheritance; and (5) damages.

[Citation.] Most states prohibit an interference action when the plaintiff already has an adequate probate remedy. [Citation.] *Beckwith v. Dahl (2012) 205 Cal.App.4th 1039, 1050* (internal citations omitted).

Plaintiffs allege as follows.

"Defendants knew of the 2012 trust because, at a minimum, it was provided to Kim and

Hales and Citadel are in privity with Kim and Signature as to the services provided to Herbert. Defendants knew that the 2012 trust provided probable future economic benefits or advantages to Plaintiffs because they had the trust instrument, and knew that if the 2012 trust was revoked or replaced that Plaintiffs' probable future economic benefits or advantages under the instrument would be lost in whole or in part.

Defendants acted negligently and negligently per se by engaging in the unauthorized practice of law and aiding and abetting the unauthorized practice of law in preparing the new purported trust in 2019 and, as to Kim and Signature, advising Herbert to execute a revocation of the 2012 trust."

FAC, ¶¶ 70-71.

Plaintiffs' cause of action is premised on Signature Defendants' purported unauthorized practice of law. As discussed above, Plaintiffs have failed to establish **[*20]** that cause of action. Additionally, it appears that Plaintiffs have an adequate probate remedy. If Plaintiffs are successful in the concurrent probate action, then Plaintiffs' inheritance under the 2012 trust will be restored.

Accordingly, the Court finds that Plaintiffs have not stated facts sufficient to state a claim.

The Court need not address the parties' remaining arguments.

The Court SUSTAINS the demurrer to this cause of action. In an abundance of caution, the Court grants Plaintiffs 20 days' leave to amend.

Signature Defendants' Motion to Strike

Signature Defendants move to strike allegations of exemplary damages against Signature Defendants on grounds that the allegations are factually insufficient to state a claim for punitive damages.

In light of the Court's ruling on Signature Defendants' demurrer, the Court DENIES the motion to strike as moot.

Citadel Defendants' Demurrer

Citadel Defendants demur to the first, second, third, and fourth causes of action on grounds that they fail to state facts sufficient.

First COA: Unfair Business Practices

Citadel Defendants demur to this cause of action on grounds that (1) Citadel Defendants owed Plaintiffs no duty; and (2) Plaintiffs lack standing **[*21]** to pursue their claim.

For the same reasons discussed in its ruling on Signature Defendants' demurrer, the Court finds that Plaintiffs lack standing to bring for their claim against Citadel Defendants. *Clayworth v. Pfizer, Inc. (2010) 49 Cal.4th 758, 788*.

The Court need not address the parties' remaining arguments.

The Court SUSTAINS the demurrer to this cause of action without leave to amend. Plaintiffs were previously granted leave to amend; they failed to cure the defects noted in the Complaint; and in opposition, Plaintiffs have not shown a reasonable possibility of stating a successful claim.

Second COA: Unauthorized Practice of Law

Citadel Defendants demur to this cause of action on grounds that (1) Hales in an active licensee of the State Bar; (2) *Business & Professions Code section 6127* is not applicable to Citadel; and (3) Plaintiffs lack standing to pursue a claim under this section.

In opposition, Plaintiffs argue that Citadel Defendants are liable under the theory of "aiding and abetting."

"Liability may … be imposed on one who aids and abets the commission of an intentional tort if the person (a) knows the other's conduct constitutes a breach of duty and gives substantial assistance or encouragement to the other to so act or (b) gives substantial assistance to the other **[*22]** in accomplishing a tortious result and the person's own conduct, separately considered, constitutes a breach of duty to the third person." [Citation.]' [Citation.]" *Austin B. v. Escondido Union School District (2007) 149 Cal.App.4th 860, 879*.) However, "[m]ere knowledge that a tort is being committed and the failure to prevent it does not constitute aiding and abetting. [Citation.] 'As a general rule, one owes no duty to control the conduct of another …' [Citation.]" *Fiol v. Doellstedt (1996) 50 Cal.App.4th 1318, 1326*.

As discussed in the ruling on Signature Defendants' demurrer, Plaintiffs have not alleged a duty. *Paul v. Patton (2015) 235 Cal.App.4th 1088, 1098*; *Boranian v. Clark (2004) 123 Cal.App.4th 1012*.

In opposition, Plaintiffs also argue that the claim concerns Defendants' criminal conduct, not Decedents' intent.

The Court disagrees. The gist of Plaintiffs' action is that Defendants interfered with Plaintiffs' inheritance under the 2012 trust. Such interference is actionable if it contradicts Decedents' true intent. In other words, there is no liability if Defendants executed the 2019 trust under Decedents' instructions. See *Barefoot v. Jennings (2020) 8 Cal.5th 822, 826* ("The primary duty of a court in construing a trust is to give effect to the settlor's intentions").

Thus, Plaintiffs' cause of action fails.

The Court need not address the parties' remaining arguments.

The Court SUSTAINS the demurrer to this cause of action without leave **[*23]** to amend. Plaintiffs were previously granted leave to amend; they failed to cure the defects noted in the Complaint; and in opposition, Plaintiffs have not shown a reasonable possibility of stating a successful claim.

Third COA: Tortious Interference with Contract; Fourth COA: Tortious Interference with Prospective Economic Advantage

Citadel Defendants demur to these causes of action on grounds that (1) Plaintiffs' causes of action are really for IIEI; (2) Plaintiffs' IIEI claim fails because Plaintiffs have a possible remedy in probate court; (3) Citadel Defendants are not strangers to the to the purported contract or relationship; (4) Plaintiffs have not alleged an independently wrongful act; and (5) Plaintiffs cannot allege resulting damages.

For the same reasons discussed in its ruling on Signature Defendants' demurrer, the Court finds that Plaintiffs' causes of action for tortious interference with contract and tortious interference with prospective economic advantage fail. *Saks v. Damon Raike & Co. (1992) 7 Cal.App.4th 419, 430-431*; See also Estate of Giraldin (2012) 55 Cal.4th 1058, 1066

As discussed in that ruling, it appears that Plaintiffs seek relief for Signature Defendants' purported interference with Plaintiffs' expected inheritance **[*24]** under the 2012 trust.

For the same reasons discussed in that ruling, and contrary to Plaintiffs' arguments, the Court finds that Plaintiffs' cause of action for IIEI fails. *Beckwith v. Dahl (2012) 205 Cal.App.4th 1039, 1050*.

Accordingly, the Court finds that Plaintiffs have not stated facts sufficient to state a claim.

The Court need not address the parties' remaining arguments.

The Court SUSTAINS the demurrer to this cause of action. In an abundance of caution, the Court grants Plaintiffs 20 days' leave to amend.

Conclusion

The Court SUSTAINS Defendants' demurrers to the first and second causes of action without leave to amend.

The Court SUSTAINS Defendants' demurrer to the third and fourth causes of action with 20 days' leave to amend.

The Court DENIES Signature Defendants' motion to strike as moot.

[1] The Court refers to the parties' first names for clarity and means no disrespect.

[2] Although an official interpretation of statute by the Attorney General is not controlling, it is entitled to great respect. *Thorning v. Hollister School Dist. (1992) 11 Cal.App.4th 1598, 1604*; *Napa Valley Educators' Assn. v. Napa Valley Unified School Dist. (1987) 194 Cal.App.3d 243, 251*; *Lucas v. Board of Trustees (1971) 18 Cal.App.3d 988, 991-92*.

Notice is waived.

Stromberg v. Qualcomm Inc.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN1[] **Sherman Act, Claims**

Sections 1 and *2* of the Sherman Act are particularly important to the preservation of economic freedom and the United States' free-enterprise system. *Section 1* prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States. *15 U.S.C.S. § 1*. *Section 2* also makes it illegal to monopolize any part of the trade or commerce among the several States. *15 U.S.C.S. § 2*. Direct purchasers—meaning those who buy the relevant product directly from the alleged antitrust violator—can bring antitrust suits for treble damages under the Sherman Act. *15 U.S.C.S. § 15*. But the United States Supreme Court has long held that indirect purchasers—meaning those who purchase the relevant product through middlemen—are barred from seeking damages for alleged Sherman Act violations.

Torts > Business Torts > Unfair Business Practices > Remedies

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN2[] **Remedies, Damages**

California's Cartwright Act, though modeled after the Sherman Act, permits indirect purchasers to bring antitrust claims and recover treble damages. Cal. Bus. & Prof. Code § 16700 et seq.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Torts > Business Torts > Unfair Business Practices > Elements

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN3[] State Regulation, Claims

California's Unfair Competition Law (UCL), Cal. Bus. & Prof. Code § 17200 et seq., generally prohibits any unlawful, unfair or fraudulent conduct. § 17200. The UCL borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Special Proceedings > Class Actions > Appellate Review

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

HN4[] Standards of Review, Abuse of Discretion

The appellate court reviews the district court's class certification rulings for abuse of discretion and review for clear error any findings of fact the district court relied upon in its certification order. A district court abuses its discretion where it commits an error of law, relies on an improper factor, omits a substantial factor, or engages in a clear error of judgment in weighing the correct mix of factors. A district court's choice of law determination is reviewed de novo, but its underlying factual findings are reviewed for clear error.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN5[] Prerequisites for Class Action, Adequacy of Representation

Fed. R. Civ. P. 23 governs class certification. The party seeking class certification has the burden of affirmatively demonstrating that the class meets the requirements of Rule 23. As a threshold matter, a class must first meet the four requirements of Rule 23(a): (1) numerosity, (2) commonality, (3) typicality, and (4) adequacy of representation.

In addition to *Rule 23(a)*'s requirements, the class must meet the requirements of at least one of the three different types of classes set forth in *Rule 23(b)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN6[] **Prerequisites for Class Action, Maintainability**

Under *Fed. R. Civ. P. 23(b)(3)*, a court must find that the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. This inquiry focuses on the relationship between the common and individual issues' and tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN7[] **Class Actions, Certification of Classes**

Fed. R. Civ. P. 23(b)(2) requires that the party opposing the class has acted or refused to act on grounds that apply generally to the class, so that final injunctive relief or corresponding declaratory relief is appropriate respecting the class as a whole. *Rule 23(b)(2)* requirements are unquestionably satisfied when members of a putative class seek uniform injunctive or declaratory relief from policies or practices that are generally applicable to the class as a whole.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN8[] **Class Actions, Certification of Classes**

Understanding which law will apply before making a predominance determination for purposes of class certification is important when there are variations in applicable state law. Variances in state law can overwhelm common issues and preclude predominance for a single nationwide class. To determine which laws will apply and consequently whether *Fed. R. Civ. P. 23(b)(3)* predominance can be met, courts must conduct a choice of law analysis.

Civil Procedure > Special Proceedings > Class Actions

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Significant Relationships

HN9[] Special Proceedings, Class Actions

When state claims are brought, federal courts apply the choice of law rules of the forum state. Under California's choice of law rules, the class action proponent bears the initial burden to show that application of California law is constitutional on the basis that California has significant contact or significant aggregation of contacts' to the claims of each class member. Once the class action proponent makes this showing, the burden shifts to the other side to demonstrate that foreign law, rather than California law, should apply to class claims.

Civil Procedure > Special Proceedings > Class Actions

Torts > Procedural Matters > Conflict of Law > Governmental Interests

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Governmental Interests

HN10[] Special Proceedings, Class Actions

California law cannot apply to class claims if the interests of other states outweigh California's interest. To make this determination, courts use California's three-step governmental interest test. First, the court determines whether the relevant law of each of the potentially affected jurisdictions with regard to the particular issue in question is the same or different. Second, if there is a difference, the court examines each jurisdiction's interest in the application of its own law under the circumstances of the particular case to determine whether a true conflict exists. Finally, if the court finds that there is a true conflict, it carefully evaluates and compares the nature and strength of the interest of each jurisdiction in the application of its own law to determine which state's interest would be more impaired if its policy were subordinated to the policy of the other state, and then ultimately applies the law of the state whose interest would be the more impaired if its law were not applied.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Governmental Interests

HN11[] Choice of Law, Governmental Interests

Federalism provides that each State may make its own reasoned judgment about what conduct is permitted or proscribed within its borders. Every state has an interest in having its law applied to its resident claimants. Thus, states may permissibly differ on the extent to which they will tolerate a degree of lessened protection for consumers to create a more favorable business climate for the companies that the state seeks to attract to do business in the state. Likewise, each state has an interest in balancing the products and prices offered to consumers with the legal protections afforded to them as well as an interest in being able to assure individuals and commercial entities operating within its territory that applicable limitations on liability set forth in the jurisdiction's law will be available to those individuals and businesses in the event they are faced with litigation in the future.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Significant Relationships

Torts > Procedural Matters > Conflict of Law > Place of Injury

HN12[] Choice of Law, Significant Relationships

California recognizes that with respect to regulating or affecting conduct within its borders, the place of the wrong has the predominant interest and the place of the wrong is said to be the state where the last event necessary to make the actor liable occurred.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN13[] **Sherman Act, Claims**

The antitrust laws, including the Sherman Act, were enacted for the protection of competition, and actual or alleged harms to customers and consumers outside the relevant markets are beyond the scope of ***antitrust law***.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN14[] **Remedies, Damages**

The Illinois Brick Court listed three reasons for barring indirect-purchaser suits: (1) facilitating more effective enforcement of antitrust laws; (2) avoiding complicated damages calculations; and (3) eliminating duplicative damages against antitrust defendants.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Choice of Law

Governments > Courts > Authority to Adjudicate

HN15[] **Federal & State Interrelationships, Choice of Law**

Federalism forbids a court from evaluating their underlying wisdom or inserting the court's own preference into choice of law analysis.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Antitrust & Trade Law > Regulated Practices > Private Actions > Remedies

HN16[] **Remedies, Damages**

The California Supreme Court has explained that the Cartwright Act weighs the goal of deterring antitrust violations over concerns that plaintiffs may receive a windfall.

Constitutional Law > Congressional Duties & Powers > Commerce Clause > Dormant Commerce Clause

HN17[] **Commerce Clause, Dormant Commerce Clause**

The relevant state interest is not confined to protecting only a resident company from excessive liability. Rather, a state's adherence to Illinois Brick may reflect a policy decision calibrating liability to foster commerce in the state. Thus, non-repealer states have an interest in furthering that policy by shielding out-of-state businesses from what the state may consider to be excessive litigation through applying its law to transactions within its borders.

Torts > Procedural Matters > Conflict of Law > Place of Injury

HN18[] **Conflict of Law, Place of Injury**

The place of the wrong is the state where the last event necessary to make the actor liable occurred.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Governmental Interests

HN19[] **Choice of Law, Governmental Interests**

The place of the wrong, while not always controlling, remains a relevant consideration in California's governmental interest test. With respect to regulating or affecting conduct within its borders, the place of the wrong has the predominant interest.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN20[] **Class Actions, Certification of Classes**

Merits questions may be considered to the extent—but only to the extent—that they are relevant to determining whether the *Fed. R. Civ. P. 23* prerequisites for class certification are satisfied.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN21[] **Class Actions, Certification of Classes**

A class's ability to meet *Fed. R. Civ. P. 23(b)(2)* requirements does not require an examination of the viability or bases of the class members' claims for relief.

Summary:

SUMMARY[**]

Antitrust / Class Certification

The panel vacated the district court's order certifying a nationwide indirect purchaser class in an antitrust multi-district litigation seeking injunctive and monetary relief under *§§ 1* and *2 of the Sherman Act* and California law against Qualcomm Incorporated, and remanded for reconsideration of the plaintiffs' claims given *FTC v. Qualcomm Inc., 969 F.3d 974 (9th Cir. 2020)* (holding that Qualcomm's modem chip licensing practices did not violate the

[**] This summary constitutes no part of the opinion of the court. It has been prepared by court staff for the convenience of the reader.

Sherman Act, and there was nothing to be enjoined because its exclusive dealing agreements with Apple did not substantially foreclose competition and were terminated years ago).

The plaintiffs, consumers who bought cellphones, alleged that Qualcomm maintained a monopoly in modem chips, harming consumers because the amount attributable to an allegedly excessive royalty was passed through the distribution chain to consumers in the form of higher prices or reduced quality in cellphones. The district court certified **[**2]** a damages class under *Fed. R. Civ. P. 23(b)(3)* and an injunctive relief class under *Rule 23(b)(2)*.

Vacating the *Rule 23(b)(3)* class certification order, the panel held that the class was erroneously certified under a faulty choice of law analysis because differences in relevant state laws swamped predominance. The panel held that California's choice of law rules precluded the district court's certification of the nationwide *Rule 23(b)(3)* class because other states' laws, beyond California's Cartwright Act, should apply. As a result, common issues of law did not predominate in the class as certified.

The panel vacated the *Rule 23(b)(2)* class certification order in light of *FTC v. Qualcomm*.

The panel instructed that on remand, the district court should address in the first instance the effect of *FTC v. Qualcomm* on class certification, particularly on the classes' ability to meet the threshold requirements of *Rule 23(a)* as well as the viability of plaintiffs' claims to move forward.

Judges: Before: Eugene E. Siler* , Jay S. Bybee, and Ryan D. Nelson, Circuit Judges. Opinion by Judge R. Nelson.

Opinion by: Ryan D. Nelson

Opinion

[*1063] R. NELSON, Circuit Judge:

Qualcomm Incorporated seeks interlocutory review of the district court's order certifying a nationwide class of up to 250 million class members in an antitrust multi-district litigation raising claims under the Sherman Act and California state law. Because the district court erred in its choice of law analysis and in light of *FTC v. Qualcomm Inc., 969 F.3d 974 (9th Cir. 2020)*, we vacate the class certification order. On remand, the district court should reconsider the viability of Plaintiffs' **[**6]** claims given *FTC v. Qualcomm*.

I

A

With its principal place of business in California, Qualcomm is a global leader in cellular technology. Over the years, Qualcomm has contributed notable technological innovations to modern cellular communication standards and holds thousands of cellular patents.

Some of Qualcomm's patents are standard essential patents ("SEPs") covering technology that international standard-setting organizations ("SSOs") incorporated into cellular communication standards, such as 3G CDMA or 4G LTE. SSOs "are global collaborations of industry participants that establish technical specifications to ensure that products from different manufacturers are compatible with each other." *FTC v. Qualcomm, 969 F.3d at 982-83* (internal quotation marks and citations omitted). Manufacturers and suppliers must use technology covered in Qualcomm's SEPs if they want to practice 3G CDMA or 4G LTE standards. Thus, a manufacturer or supplier wanting to comply with 3G CDMA or 4G LTE standards will infringe on Qualcomm's SEPs unless they license those SEPs.

Before incorporating patented technology into a standard, SSOs require that patent holders commit to license their SEPs on fair, reasonable, and non-discriminatory ("FRAND") **[**7]** terms. FRAND commitments safeguard against abuses like "patent holdup," through which a SEP holder demands excessive royalties from suppliers and manufacturers of standard-compliant products and services. *See* *Microsoft Corp. v. Motorola, Inc., 696 F.3d 872, 876 (9th Cir. 2012)* (citation omitted).

Qualcomm licenses its cellular patent portfolio, including its SEPs, to original equipment manufacturers ("OEMs") with products, like cellphones, that incorporate Qualcomm's patented technologies. Though Qualcomm licenses its patents at the level of completed cellphone devices, it does not license its patents at the level of any given

* The Honorable Eugene E. Siler Jr., Senior United States Circuit Judge of the United States Court of Appeals for the Sixth Circuit, sitting by designation.

cellphone component. When Qualcomm licenses its patents, it receives a royalty that is typically 5% of the device's wholesale net selling price.

Besides licensing technology, Qualcomm also designs and sells semiconductor devices known as modem chips ("chips") to OEMs. Chips enable cellphones to connect with cellular networks as well as provide other functions. Qualcomm is the leading supplier of CDMA and premium LTE chips worldwide.

B

In a separate action brought in January 2017, the Federal Trade Commission ("FTC") sued Qualcomm, alleging that **[*1064]** Qualcomm engaged in unfair methods of competition in violation of the Federal Trade Commission **[**8]** Act ("FTCA") and the Sherman Act. Afterward, many follow-on consumer antitrust class actions were filed against Qualcomm, generally alleging that Qualcomm's conduct violated federal and state antitrust and consumer protection laws based on similar claims of anti-competitive conduct. The Judicial Panel on Multidistrict Litigation centralized these consumer class actions as a consolidated class action in the United States District Court for the Northern District of California before the same judge presiding over the separate FTC action.

Plaintiffs in this multidistrict litigation are consumers who bought cellphones and allege that Qualcomm maintained a monopoly in chips by: (1) engaging in a "no-license-no-chips" policy by which Qualcomm sold chips only to OEMs that paid above-FRAND royalty rates to license Qualcomm's SEPs; (2) refusing to license its SEPs to rival chip suppliers; and (3) entering into exclusive dealing arrangements with Apple that prevented rival chip suppliers from competing with Qualcomm to supply Apple's chip demand. Plaintiffs contend these practices harmed consumers because the amount attributable to the allegedly excessive royalty—the amount above the FRAND royalty—was **[**9]** passed through the distribution chain to consumers in the form of higher prices or reduced quality in cellphones.

Plaintiffs seek injunctive and monetary relief against Qualcomm, asserting violations of Sections 1 and 2 of the Sherman Act as well as California's Cartwright Act and Unfair Competition Law ("UCL").

HN1[] Sections 1 and 2 of the Sherman Act are "particularly 'important to the preservation of economic freedom and our free-enterprise system.'" *FTC v. Qualcomm, 969 F.3d at 988* (quoting *United States v. Topco Assocs., Inc., 405 U.S. 596, 610, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*). Section 1 prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." 15 U.S.C. § 1. Section 2 also makes it illegal to "monopolize any part of the trade or commerce among the several States." *Id.* § 2. Direct purchasers—meaning those who buy the relevant product directly from the alleged antitrust violator—can bring antitrust suits for treble damages under the Sherman Act. *See id.* § 15. But the Supreme Court has long held that indirect purchasers—meaning those who purchase the relevant product through middlemen—are barred from seeking damages for alleged Sherman Act violations. *See* *Ill. Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. Here, Plaintiffs are "indirect purchasers who are two or more steps removed from [Qualcomm] in a distribution chain" and thus cannot seek damages **[**10]** for the alleged Sherman Act violations. *See* *Apple Inc. v. Pepper, 139 S. Ct. 1514, 1520, 203 L. Ed. 2d 802 (2019)* (emphasis omitted).

After the Supreme Court's *Illinois Brick* decision, many states enacted *Illinois Brick* repealer laws, authorizing indirect purchasers to bring antitrust damages suits under state laws. For instance, **HN2**[] California's Cartwright Act, though modeled after the Sherman Act, permits indirect purchasers to bring antitrust claims and recover treble damages. *Cal. Bus. & Prof. Code § 16700 et seq.* Currently, thirty-five states and the District of Columbia effectively repealed *Illinois Brick* (known as "repealer states") in one form or another, but fifteen states have not (known as "non-repealer states"). *See* Practical Law Antitrust, *State Illinois Brick Repealer Laws Chart*, Westlaw, https://bit.ly/3foROqr.

[*1065] **HN3**[] In addition to the Sherman Act and California's Cartwright Act, Plaintiffs brought a claim under California's UCL, *Cal. Bus. & Prof. Code § 17200 et seq.*, which generally prohibits any "unlawful, unfair or fraudulent" conduct. *Id.* § 17200. Plaintiffs' UCL claim is based on the Sherman and Cartwright Act violations. *See* *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 539-40 (Cal.*

1999) (explaining that the UCL "borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable" (internal quotation marks and citation omitted)). **[**11]** Because neither party identified any material difference between the federal and state claims beyond the availability of damages, the district court generally treated Plaintiffs' state law claims together with the federal claims.

C

Plaintiffs sought certification under *Federal Rule of Civil Procedure 23* ("*Rule 23*") for an indirect purchaser class comprising "[a]ll natural persons and entities in the United States who purchased, paid for, and/or provided reimbursement for some or all of the purchase price for all UMTS, CDMA (including CDMAone and cdma2000) and/or LTE cellular phones . . . for their own use and not for resale from February 11, 2001 . . . ." This class would number between 232.8 and 250 million people, and the lower bound on damages to the consumer class was estimated as $4.84 billion. Opposing class certification, Qualcomm argued that (1) Plaintiffs provided no model that could prove antitrust impact using common evidence on a class-wide basis; (2) the proposed class's size and heterogeneity violated due process, was unmanageable, and therefore not superior; and (3) indirect purchasers in non-repealer states lack standing to seek antitrust damages.

The district court certified Plaintiffs' class under *Rule 23(b)(2)* and *(b)(3)*. Because **[**12]** the Cartwright Act mirrors federal ***antitrust law***, Plaintiffs' UCL claim is premised at least in part upon the Sherman and Cartwright Act violations, and the parties did not identify any material differences between the federal and state claims, the district court treated Plaintiffs' federal and state law claims together when certifying the class. After concluding that the proposed class satisfied the requirements of *Rule 23(a)*, the district court held that the proposed class satisfied *Rule 23(b)(3)*'s predominance and superiority requirements. As to predominance, the district court concluded that common questions predominate overall and as to the elements of the federal antitrust claim—particularly, as to antitrust violation, antitrust impact, and damages.

The district court also concluded that Plaintiffs can seek damages on behalf of the entire nationwide class under the Cartwright Act. In so concluding, the district court applied California's choice of law rules and determined that California has sufficient contacts with the claims of each class member. The district court then applied California's three-step governmental interest test to determine whether other state law, besides California law, should apply. **[**13]** Applying that test, the district court first concluded that non-repealer states' antitrust laws were materially different from California's Cartwright Act on the issue of damages recovery. The district court then determined that California has an interest in applying its law to this case because Qualcomm is a California business and the Cartwright Act (by allowing damages recovery) benefits consumers. But, according to the district court, non-repealer states have no interest in applying their laws here because non-repealer laws disadvantage resident consumers and are not intended to protect out-of-state businesses. **[*1066]** As a result, the district court held that California's Cartwright Act applied to the nationwide class, allowing the consumer class to sue for antitrust damages under *Rule 23(b)(3)*.

Besides certifying the class under *Rule 23(b)(3)*, the district court certified a *Rule 23(b)(2)* injunctive relief class. According to the district court, the class satisfied *23(b)(2)*'s requirements because Qualcomm's allegedly anticompetitive conduct—*i.e.*, the practices to be enjoined—are generally applicable to the whole class.

Qualcomm seeks interlocutory review under *Rule 23(f)* of the district court's class certification order. On appeal, Qualcomm challenges **[**14]** the district court's finding of *Rule 23(b)(3)* predominance, arguing that antitrust impact cannot be shown by common evidence, the class improperly includes millions of iPhone purchasers suffering no antitrust impact, and California law cannot apply to the nationwide class. Qualcomm also argues that the class is unmanageable and not a superior method of adjudicating the claims as required by *Rule 23(b)(3)* and that the class failed to meet *Rule 23(b)(2)*'s requirements for injunctive relief.

After this case was submitted, this court issued its opinion in *FTC v. Qualcomm, 969 F.3d 974*. We directed the parties to file supplemental briefs addressing the effect of that decision, if any, on this case. Qualcomm urges us to remand to the district court with instructions to dismiss because *FTC v. Qualcomm* means that Plaintiffs lack any viable foundation for their claims. Plaintiffs argue that *FTC v. Qualcomm* does not affect this *Rule 23(f)* interlocutory appeal and that the impact, if any, of *FTC v. Qualcomm* on Plaintiffs' claims requires further development before this court can weigh in.

II

HN4[] We review the district court's class certification rulings for abuse of discretion and "review for clear error any findings of fact the district court relied upon in its certification **[**15]** order." *Senne v. Kan. City Royals Baseball Corp., 934 F.3d 918, 926 (9th Cir. 2019)*. "A district court abuses its discretion where it commits an error of law, relies on an improper factor, omits a substantial factor, or engages in a clear error of judgment in weighing the correct mix of factors." *Id.* (citing *Stockwell v. City & Cnty. of San Francisco, 749 F.3d 1107, 1113 (9th Cir. 2014)*). A district court's choice of law determination is reviewed de novo, but its underlying factual findings are reviewed for clear error. *Zinser v. Accufix Rsch. Inst., Inc., 253 F.3d 1180, 1187 (9th Cir. 2001)*, *amended* *273 F.3d 1266 (9th Cir. 2001)*.

III

HN5[] *Rule 23* governs class certification. "The party seeking class certification has the burden of affirmatively demonstrating that the class meets the requirements of *[Rule] 23*." *Mazza v. Am. Honda Motor Co., 666 F.3d 581, 588 (9th Cir. 2012)* (citing *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*). As a threshold matter, a class must first meet the four requirements of *Rule 23(a)*: (1) numerosity, (2) commonality, (3) typicality, and (4) adequacy of representation. *Senne, 934 F.3d at 927*. In addition to *Rule 23(a)*'s requirements, the class must meet the requirements of at least one of the "three different types of classes" set forth in *Rule 23(b)*. *Id.* (quoting *Leyva v. Medline Indus., Inc., 716 F.3d 510, 512 (9th Cir. 2013)*). On appeal, Qualcomm does not contest that Plaintiffs met *Rule 23(a)*'s requirements; rather, it contests class certification under *Rule 23(b)(3)* and *(b)(2)*. **[*1067]** **HN6**[] Under *Rule 23(b)(3)*, a court must find that "the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available **[**16]** methods for fairly and efficiently adjudicating the controversy." This "inquiry focuses on 'the relationship between the common and individual issues' and 'tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation.'" *Vinole v. Countrywide Home Loans, Inc., 571 F.3d 935, 944 (9th Cir. 2009)* (quoting *Hanlon v. Chrysler Corp., 150 F.3d 1011, 1022 (9th Cir. 1998)*).

HN7[] *Rule 23(b)(2)*, however, requires that "the party opposing the class has acted or refused to act on grounds that apply generally to the class, so that final injunctive relief or corresponding declaratory relief is appropriate respecting the class as a whole." *Rule 23(b)(2)* "requirements are unquestionably satisfied when members of a putative class seek uniform injunctive or declaratory relief from policies or practices that are generally applicable to the class as a whole." *Parsons v. Ryan, 754 F.3d 657, 688 (9th Cir. 2014)* (citing *Rodriguez v. Hayes, 591 F.3d 1105, 1125 (9th Cir. 2010)*).

Qualcomm asserts that the class did not meet the requirements of *Rule 23(b)(2)* and *(b)(3)*. Even though Qualcomm raises various *23(b)(3)* predominance arguments on appeal, we hold that the *23(b)(3)* class was erroneously certified under a faulty choice of law analysis because differences in relevant state laws swamp predominance. Therefore, we vacate the *23(b)(3)* class certification order. We also vacate the *23(b)(2)* class certification order in light of *FTC v. Qualcomm*. On remand, the district court should **[**17]** address in the first instance the effect of *FTC v. Qualcomm* on certification, particularly on the *23(b)(3)* and *(b)(2)* classes' ability to meet the threshold requirements of *Rule 23(a)* as well as the viability of Plaintiffs' claims to move forward. [1]

A

After considering Qualcomm's various arguments, we hold that most fundamentally the district court failed to properly analyze California's choice of law rules to determine the applicable state laws. When properly analyzed,

[1] Because we vacate and remand the *23(b)(2)* class so the district court can reconsider certification given *FTC v. Qualcomm*, we need not reach Qualcomm's argument that the 23(b)(2) class failed to meet the *Rule 23(b)(2)* cohesiveness requirement, which—as Qualcomm later concedes in its reply brief—we rejected in *Senne, 934 F.3d 918*.

California's choice of law rules preclude the district court's certification of the 23(b)(3) class because the laws of other states—beyond California's Cartwright Act—should apply. As a result, common issues of law do not predominate in the class as currently certified.

HN8[] "Understanding which law will apply before making a predominance determination is important when there are variations in applicable state law." *Zinser, 253 F.3d at 1189*. "[V]ariances in state law [can] overwhelm common issues and preclude predominance for a single nationwide class." *Mazza, 666 F.3d at 596*. To determine which laws will apply and consequently whether *23(b)(3)* predominance can be met, courts must conduct a choice of law analysis.

HN9[] When state claims are brought, federal courts apply the choice of law rules **[**18]** of the forum state—here, California. *See Klaxon Co. v. Stentor Elec. Mfg. Co., 313 U.S. 487, 496, 61 S. Ct. 1020, 85 L. Ed. 1477 (1941)*. Under California's choice of law rules, the class action proponent bears the initial burden to show that application of California law is constitutional **[*1068]** on the basis that California has "'significant contact or significant aggregation of contacts' to the claims of each class member." *Mazza, 666 F.3d at 589-90* (quoting *Wash. Mut. Bank v. Superior Court, 24 Cal. 4th 906, 103 Cal. Rptr. 2d 320, 15 P.3d 1071, 1081 (Cal. 2001)* (citations omitted)). "Once the class action proponent makes this showing, the burden shifts to the other side to demonstrate 'that foreign law, rather than California law, should apply to class claims.'" *Mazza, 666 F.3d at 590* (quoting *Wash. Mut. Bank, 15 P.3d at 1081*).

HN10[] California law cannot apply to the class claims if the interests of other states outweigh California's interest. *Mazza, 666 F.3d at 590*. To make this determination, courts use California's three-step governmental interest test. *Id.* "First, the court determines whether the relevant law of each of the potentially affected jurisdictions with regard to the particular issue in question is the same or different." *Chen v. Los Angeles Truck Ctrs., LLC, 7 Cal. 5th 862, 249 Cal. Rptr. 3d 594, 444 P.3d 727, 730 (Cal. 2019)* (citations omitted). "Second, if there is a difference, the court examines each jurisdiction's interest in the application of its own law under the circumstances of the particular case to determine whether a true conflict exists." *Id. at 730-31* (citations omitted). Finally, **[**19]** "if the court finds that there is a true conflict, it carefully evaluates and compares the nature and strength of the interest of each jurisdiction in the application of its own law to determine which state's interest would be more impaired if its policy were subordinated to the policy of the other state, and then ultimately applies the law of the state whose interest would be the more impaired if its law were not applied." *Id. at 731* (internal quotation marks and citations omitted).

As an initial matter, the district court correctly concluded that California has a constitutionally sufficient aggregation of contacts to the claims of each class member. Qualcomm's principal place of business is in California; the class includes residents of California as well as indirect purchasers who bought cellphones in California; and Qualcomm made business decisions and negotiated licenses related to its allegedly anticompetitive conduct in California. *See Mazza, 666 F.3d at 590* (citing *Clothesrigger, Inc. v. GTE Corp., 191 Cal. App. 3d 605, 236 Cal. Rptr. 605, 612-13 (Ct. App. 1987)*). Qualcomm does not dispute there are sufficient contacts in California. Instead, it argues that the district court misapplied the three-step governmental interest test in making its predominance determination. We agree.

1

There is no dispute that **[**20]** material differences exist between California's Cartwright Act and the antitrust laws of other states. Non-repealer states do not allow indirect purchasers to bring antitrust damages suits, while repealer states—like California—do. *See supra* Section I.B. This difference is material because it "will spell the difference between the success and failure of a claim." *Mazza, 666 F.3d at 591*. But the district court erred in its analysis at the first step because it overlooked variations in the antitrust laws of *Illinois Brick*-repealer states. Even among the repealer states, there are significant variations in the scope of repealer laws. For instance, state repealer laws vary as to the type of law the repeal applies to; [2] who can **[*1069]** sue for damages; [3] and the amount or type of damages indirect purchasers can recover. [4] Thus, the district court failed to "determine[] . . . the relevant law of each of the potentially affected jurisdictions," as required under California's governmental interest test. *Mazza, 666 F.3d at 590* (citation omitted).

2

The district court also erroneously concluded that "while California has an interest in applying its law, other states have no interest in applying their laws to the current dispute." *In re Qualcomm Antitrust Litig., 328 F.R.D. 280, 313 (N.D. Cal. 2018)*. True, as **[**21]** the district court noted, California has an interest in applying its law to regulate and deter Qualcomm (a resident California corporation) from allegedly unlawful business activities in California. But other states, including non-repealer states, have an interest in how their markets are managed and how best to enforce antitrust violations and regulate commerce in their states.

This court has not yet addressed California choice of law analysis in the antitrust context. *Cf. AT & T Mobility LLC v. AU Optronics Corp., 707 F.3d 1106 (9th Cir. 2013)* (addressing only the constitutional limits of choice of law analysis in an antitrust case, not California choice of law rules themselves). But we have addressed California choice of law rules in the tort context, *Mazza, 666 F.3d 581*, and labor context, *Senne, 934 F.3d 918*.

Turning to the tort context in *Mazza*, Honda, a California corporation, appealed the district court's certification of a nationwide 23(b)(3) class of consumers who alleged misrepresentation in connection with their purchase of certain vehicles. *666 F.3d at 587*. This court held that the district court abused its discretion in certifying a class under California law containing class members who purchased or leased vehicles in different jurisdictions with materially different consumer protection laws. **[**22]** *Id. at 590*. In so doing, we turned to California's governmental interest test. *Id. at 590-94*.

First, we concluded that California law materially differed from some of the laws of the forty-three other jurisdictions. *Id. at 591*.

Second, because the vehicle sales at issue took place in forty-four different jurisdictions, we held that each state has a strong interest in applying its own consumer protection laws to those transactions. *Id. at 592*. ***HN11***[] We explained that federalism provides that "each State may make its own reasoned judgment about what conduct is permitted or proscribed within its borders." *Id. at 591* (quoting *State Farm Mut. Auto. Ins. Co. v. Campbell, 538 U.S. 408, 422, 123 S. Ct. 1513, 155 L. Ed. 2d 585 (2003)*). "[E]very state has an interest in having its law applied to its resident **[*1070]** claimants." *Mazza, 666 F.3d at 592* (alteration in original) (citation omitted). We thus concluded that "states may permissibly differ on the extent to which they will tolerate a degree of lessened protection for consumers to create a more favorable business climate for the companies that the state seeks to attract to do business in the state." *Id.* Likewise, each state has an interest in balancing the products and prices offered to

[2] Florida, Massachusetts, Missouri, and New Hampshire limit the repeal to consumer protection statutes. *See Mack v. Bristol-Myers Squibb Co., 673 So. 2d 100, 108 (Fla. Dist. Ct. App. 1996)*; *Ciardi v. F. Hoffmann-La Roche, Ltd., 436 Mass. 53, 762 N.E.2d 303, 312 (Mass. 2002)*; *In re Lithium Ion Batteries Antitrust Litig., No. 13-MD-2420 YGR, 2014 U.S. Dist. LEXIS 141358, 2014 WL 4955377, at *19 (N.D. Cal. Oct. 2, 2014)* (quoting *Gibbons v. J. Nuckolls, Inc., 216 S.W.3d 667, 669 (Mo. 2007)*); *LaChance v. U.S. Smokeless Tobacco Co., 156 N.H. 88, 931 A.2d 571, 582 (N.H. 2007)*.

[3] Though Illinois allows indirect purchaser recovery, it precludes class actions brought by indirect purchasers. *740 Ill. Comp. Stat. Ann. 10/7*. And, as another example, Alaska, Arkansas, Colorado, and Idaho limit indirect purchaser claims to suits brought by the state attorney general. *See Alaska Stat. Ann. § 45.50.577(i)*; *Ark. Code Ann. § 4-75-315(b)*; *Colo. Rev. Stat. Ann. § 6-4-111(2)*; *Idaho Code Ann. § 48-108(2)*.

[4] For instance, Hawaii only permits indirect purchaser suits for compensatory damages. *Haw. Rev. Stat. Ann. § 480-13(a)(1)*. Minnesota, New York, Rhode Island, South Dakota, and Vermont either encourage or require that courts take steps necessary to avoid duplicative recovery. *Minn. Stat. Ann. § 325D.57*; *N.Y. Gen. Bus. Law § 340(6)*; *6 R.I. Gen. Laws § 6-36-7(d)*; *S.D. Codified Laws § 37-1-33*; *Vt. Stat. Ann. tit. 9 § 2465(b)*.

consumers with the legal protections afforded to them as well as an interest in "being able to assure individuals and commercial entities operating **[**23]** within its territory that applicable limitations on liability set forth in the jurisdiction's law will be available to those individuals and businesses in the event they are faced with litigation in the future." *Id. at 592-93* (quoting *McCann v. Foster Wheeler LLC, 48 Cal. 4th 68, 105 Cal. Rptr. 3d 378, 225 P.3d 516, 534 (Cal. 2010)*).

Third, we held that the district court did not adequately recognize that each foreign state has an interest in applying its law to transactions within its borders and that foreign states would be impaired in their ability to calibrate liability to foster commerce if California law were applied to the entire class. *Mazza, 666 F.3d at 593*. The district court improperly elevated state interest in consumer protection to a superordinate level while giving too little weight to each state's interest in promoting business—the exact type of outcome the *Class Action Fairness Act of 2005* ("CAFA") intended to avoid. *Id.* (citing Findings, *CAFA § 2(a)(4), Pub. L. 109-2, 119 Stat. 4, 5 (2005)*). CAFA's key purpose was to correct the problem of "false federalism" in which courts faced with interstate class actions dictate the substantive law of other states by applying their own laws to other states. *Mazza, 666 F.3d at 593* (quoting S. Rep. No. 109-14, at 61 (2005), 2005 U.S.C.C.A.N. 3, 57).

HN12[] In *Mazza*, we explained California recognizes that "with respect to regulating or affecting conduct within its borders, **[**24]** the place of the wrong has the predominant interest" and the "place of the wrong" is said "to be the state where the last event necessary to make the actor liable occurred." *666 F.3d at 593* (internal quotation marks and citations omitted). We noted that "the last events necessary for liability as to the foreign class members—communication of the advertisements to the claimants and their reliance thereon in purchasing vehicles—took place in the various foreign states, not in California." *Id. at 594*. Thus, the foreign states had a strong interest in applying their laws to transactions between their citizens and corporations doing business within their state. *Id.* Further, California's interest in applying its law to residents of foreign states was attenuated. *Id.* California did not need to apply its law to acts taking place in other states where vehicles were purchased or leased to achieve its interest in regulating those who do business within its state. *Id.* As a result, the *Mazza* court vacated the class certification order, concluding that "each class member's consumer protection claim should be governed by the consumer protection laws of the jurisdiction in which the transaction took place." *Id.*

In the labor **[**25]** context in *Senne*, minor league baseball players brought a class action alleging wage and hour violations under the *Fair Labor Standards Act ("FLSA")* and California, Arizona, and Florida law. *934 F.3d at 925*. As relevant here, the district court certified a California class under *Rule 23(b)(3)* but denied certification for the proposed Arizona and Florida *23(b)(3)* classes. *Id. at 926*. On appeal, we used California's three-step governmental interest test to determine which laws should apply to the proposed classes. *Id. at 928*. We first held that California **[*1071]** law should apply to the 23(b)(3) California class for work performed in California. *Id. at 930-31*.

We also reversed the district court's determination that choice of law considerations defeated predominance and adequacy requirements for the proposed Arizona and Florida *23(b)(3)* classes. *Id. at 933*. We held that Arizona law should govern the Arizona class for work performed in Arizona, and Florida law should govern the Florida class for work performed in Florida. *Id. at 937*. In so holding, we relied on the California choice of law principle, often used in tort actions, that a state ordinarily has the predominant interest in regulating conduct within its own borders. *Id. at 936-37* (citing *Mazza, 666 F.3d at 591-92*; *State Farm, 538 U.S. at 422*; *McCann, 225 P.3d at 534*). Arizona and Florida wage and hour laws, when applied to work performed in-state, promotes the states' **[**26]** chosen balance between protecting workers and fostering a hospitable business environment within their states. *Senne, 934 F.3d at 937*.

Though this court has not addressed California's choice of law rules in the antitrust context, we recently outlined important antitrust principles in *FTC v. Qualcomm, 969 F.3d 974*. There, the FTC sued Qualcomm alleging violations of *Section 5 of the FTCA*, *15 U.S.C. § 45 et seq.*, and *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*. *Id. at 986*. According to the FTC, Qualcomm violated these statutes by engaging in anticompetitive conduct—the same conduct complained of by Plaintiffs here—namely that Qualcomm: (1) engaged in a "no-license-no-chips" policy by which Qualcomm sold chips only to OEMs that paid above-FRAND royalty rates to license Qualcomm's SEPs; (2) refused to license its SEPs to rival chip suppliers; and (3) entered into exclusive dealing arrangements with Apple that prevented rival chip suppliers from competing with Qualcomm to supply Apple's chip demand. *See id. at 984-86*. After a ten-day bench trial, the district court ordered a permanent, worldwide injunction prohibiting Qualcomm's core business practices and concluded that "Qualcomm's licensing practices are an unreasonable restraint of trade under *§ 1* of the Sherman Act and exclusionary conduct under *§ 2* of the Sherman Act." **[**27]** *Id. at 986-87* (quoting *FTC v. Qualcomm Inc., 411 F. Supp. 3d 658, 812 (N.D. Cal. 2019)*).

On appeal, this court reversed the district court and vacated its injunction. *FTC v. Qualcomm, 969 F.3d at 1005*. We held that Qualcomm's licensing practices did not violate the Sherman Act, and the exclusive dealing agreements with Apple did not substantially foreclose competition and were terminated years ago; thus, "there is nothing to be enjoined." *Id.* We explained that (1) "Qualcomm's practice of licensing its SEPs exclusively at the OEM level does not amount to anticompetitive conduct in violation of *§ 2*, as Qualcomm is under no antitrust duty to license rival chip suppliers," and "[t]o the extent Qualcomm has breached any of its FRAND commitments, a conclusion we need not and do not reach, the remedy for such a breach lies in contract and patent law;" (2) "Qualcomm's patent-licensing royalties and 'no license, no chips' policy do not impose an anticompetitive surcharge on rivals' modem chip sales;" rather, "these aspects of Qualcomm's business model are 'chip-supplier neutral' and do not undermine competition in the relevant antitrust markets;" and (3) "Qualcomm's 2011 and 2013 agreements with Apple have not had the actual or practical effect of substantially foreclosing competition in the CDMA modem **[**28]** chip market." *Id.* ***HN13***[] Underlying much of this court's holding in *FTC v. Qualcomm* is the principle that "the antitrust laws, including the Sherman Act, were enacted for the protection of competition," and "actual or **[*1072]** alleged harms to customers and consumers outside the relevant markets are beyond the scope of ***antitrust law***." [5] *Id. at 993* (cleaned up) (internal quotation marks and citations omitted).

Here, we have an antitrust case and examine the relevant state interests considering antitrust principles. Given those principles, there is no basis for concluding that only California has an interest. Non-repealer states' *Illinois Brick* laws are designed to regulate antitrust enforcement by allocating recoverable antitrust damages in a way those states think best promotes market competition. In other words, the relevant interests are not simply about the benefit or harm to resident consumers or liability to resident antitrust defendants; rather the relevant interests are about harm to the competitive process and in-state business activity.

HN14[] As the Supreme Court explained in *Apple, 139 S. Ct. at 1524*, "[t]he *Illinois Brick* Court listed three reasons for barring indirect-purchaser suits: (1) facilitating more effective enforcement **[**29]** of antitrust laws; (2) avoiding complicated damages calculations; and (3) eliminating duplicative damages against antitrust defendants." These reasons underlie non-repealer states' interests in having their laws apply here.

Allowing non-repealer states to apply their laws to class members purchasing cellphones in-state furthers those states' determinations of how to "facilitat[e] more effective enforcement of antitrust laws." *See id.* The decision to bar indirect purchaser damages recovery is a policy choice regarding how a state wants antitrust laws to be enforced within its borders so competition and business can be best promoted in the state. Non-repealer laws reflect the state calculation that antitrust enforcement is best served by having indirect purchasers realize the benefit of antitrust enforcement outside of court processes. For instance, even if barred from suing for antitrust damages, indirect purchasers in non-repealer states can realize the benefit of antitrust enforcement when direct purchasers recover antitrust damages and factor that recovery into their pricing and business activity in-state, which can then be passed through to consumers in the market.

Applying non-repealer **[**30]** laws to in-state cellphone purchases would also further state interests in reducing the risk that transactions within their borders expose businesses to excessive and "complicated" antitrust litigation with "duplicative damages" recovery. *Id.* By lowering this risk, non-repealer states can attract more business in-state from entities like Qualcomm (and those who do business with Qualcomm) by creating a more favorable business

---

[5] We recognize that the relevant market was "the market for CDMA modem chips and the market for premium LTE modem chips," not the "much larger market of cellular services generally." *FTC v. Qualcomm, 989 F.3d at 992* (internal quotation marks and citation omitted). Nevertheless, the point remains that antitrust differs from tort law because antitrust is designed to protect competition rather than protect the actual plaintiffs or defendants.

environment. Non-repealer laws can be understood as choosing to run the risk of under-deterring antitrust violators over overcompensating plaintiffs and complicating antitrust enforcement; meanwhile repealer laws, like the Cartwright Act, take the opposite approach. [6] ***HN15***[] While the district court may disagree with non-repealer states' chosen priorities, federalism forbids a court from "evaluating their underlying **[*1073]** wisdom" or inserting the court's own preference into choice of law analysis. *Mazza, 666 F.3d at 593*. Because non-repealer states have a clear interest in applying their laws to class members who purchased cellphones in their state, the district court erred in concluding that only California has an interest.

To the extent that, for choice of law purposes, this antitrust case can be **[**31]** understood as a "tort-like suit[]," *AT&T Mobility, 707 F.3d at 1112*, the district court still erred in concluding non-repealer states have no interest under *Mazza*.

According to the district court, non-repealer laws are designed to protect only in-state businesses from excessive antitrust liability and thus non-repealer states have no interest here because the sole defendant is an out-of-state business. ***HN17***[] Under *Mazza*, however, the relevant state interest is not confined to protecting only a resident company from excessive liability. *666 F.3d at 593*. Rather, a state's adherence to *Illinois Brick* may reflect a policy decision "calibrat[ing] liability to foster commerce" in the state. *Id.* Thus, non-repealer states have an interest in furthering that policy by "shielding out-of-state businesses from what the state may consider to be excessive litigation" through "applying its law to transactions within its borders." *Id. at 592-93*.

The district court also reasoned that non-repealer states have no interest because the indirect purchaser bar does not "benefit" their residents. In doing so, the district court distinguished non-repealer states' interests at issue (disadvantaging residents by barring damages) from those foreign state interests recognized **[**32]** in *Mazza* (benefitting residents by imposing liability on out-of-state businesses). *Id. at 591-93*. But that reasoning ignores that residents can still benefit from their state's non-repealer laws, which "calibrate liability" to benefit in-state commerce, leading to "increase in commerce and jobs" and avoiding "higher prices for consumers or a decrease in product availability." *See id. at 592-93*.

Even though it grounded most of its choice of law analysis in the tort context, the district court failed to evaluate state interests as the "place of the wrong." *Id. at 593* (quoting *Hernandez v. Burger, 102 Cal. App. 3d 795, 162 Cal. Rptr. 564, 568 (Ct. App. 1980)*). ***HN18***[] The place of the wrong is "the state where the last event necessary to make the actor liable occurred." *Mazza, 666 F.3d at 593* (citations omitted). In the *Mazza* class action—where purchasers claimed Honda misrepresented information while marketing vehicles—the last events necessary for liability were the "communication of the advertisements to the claimants and their reliance thereon in purchasing vehicles." *Id. at 594*. In other words, the place of wrong was "the jurisdiction in which the transaction took place." *Id.* Here, the nationwide class consists of downstream consumers—individuals who bought cellphones from various retailers located throughout the fifty states. The last **[**33]** events giving rise to liability would be the consumer's purchase of the cellphone, and thus the "place of wrong" would be the state where the consumer bought the cellphone. In most instances for non-California residents, this would have occurred outside of California.

HN19[] The place of the wrong, while not always controlling, "remains a relevant consideration" in California's governmental interest test. *Hernandez, 162 Cal. Rptr. at 568*. "[W]ith respect to regulating or affecting conduct within its borders, the place of the wrong has the predominant interest." *Mazza, 666 F.3d at 593* (quoting *Hernandez, 162 Cal. Rptr. at 568*). Here, *Illinois Brick* laws regulate antitrust enforcement to affect conduct consistent with the state's interest in promoting commerce. **[*1074]** In other words, even under the tort choice of law principles, non-repealer states have a strong interest in applying their state laws to Plaintiffs' claims. Regardless of whether the district court approaches step two under antitrust or tort principles, it erred by dismissing non-repealer states' interest in applying their laws to in-state cellphone purchases.

---

[6] ***HN16***[] The California Supreme Court has explained that the Cartwright Act weighs "[t]he goal of deterring antitrust violations" over "concerns that [plaintiffs] may receive a windfall." *Clayworth v. Pfizer, Inc., 49 Cal. 4th 758, 111 Cal. Rptr. 3d 666, 233 P.3d 1066, 1081-83 (Cal. 2010)*.

3

Because it held that only California had an interest, the district court failed to determine which states' interests would be more impaired if their policies were **[**34]** subordinated to another state's law, as required under the third step of the governmental interest test. This was error.

As discussed above, non-repealer states have a strong interest in applying their laws to those consumers who bought cellphones in-state. Likewise, California's interest is attenuated where its law is applied to consumers purchasing cellphones in non-repealer states. By applying California law to the nationwide class of indirect purchasers, the district court improperly impaired non-repealer state policy by allowing California to set antitrust enforcement policy for the entire country. This is the "false federalism" that CAFA intended to correct. *See* *Mazza, 666 F.3d at 593* (citing Findings, *CAFA § 2(a)(4)*; *Pub. L. No. 109-2, 119 Stat. 4, 5 (2005)* (noting that courts "making judgments that impose their view of the law on other States and bind the rights of the residents of those States" is an "abuse[ ]" of class actions)). Here, more than one state's law should apply to the 23(b)(3) class. *Mazza, 666 F.3d at 594* (noting the "false premise that one state's law must be chosen to apply to all 44 jurisdictions"). The non-repealer laws should control those purchases occurring in non-repealer states and class members with purchases in non-repealer states should be carved **[**35]** out of the 23(b)(3) class. Even among the repealer states, the various state laws are hardly uniform. Thus, it is not clear that a single class of all repealer state Plaintiffs could be certified under *Rule 23(b)(3)*. That said, the district court should reach that question in the first instance after reconducting its choice of law analysis starting at step one. We thus vacate and remand the *23(b)(3)* class on choice of law grounds.

B

As for the 23(b)(2) class, the district court did not specify which claims that class would be entitled to pursue for injunctive relief. But the identified variations in state law regarding when indirect purchasers can sue for antitrust damages are not implicated in the 23(b)(2) class. Nonetheless, we also vacate the 23(b)(2) class so that on remand the district court can reconsider certification of the entire class given this court's *FTC v. Qualcomm* decision, particularly in light of the threshold requirements of *Rule 23(a)*.

Qualcomm argues that *FTC v. Qualcomm* requires that we remand with instructions to dismiss. According to Qualcomm, that decision bars Plaintiffs from showing, based on their liability theories, that Qualcomm's conduct harmed competition in the relevant markets. But **[**36]** *FTC v. Qualcomm*'s effect remains unclear because neither party adequately addressed the central focus of our *Rule 23(f)* review—that is, how the decision affects the class's ability to meet *Rule 23*'s certification requirements.

This case and *FTC v. Qualcomm* have overlapping facts and claims, and many of our conclusions in *FTC v. Qualcomm* were conclusions of law. Thus, *FTC v. Qualcomm* likely has preclusive effect on many issues raised by Plaintiffs in this case. Ultimately, however, we are not reviewing a motion to dismiss or motion for summary judgment. Rather, our jurisdiction **[*1075]** in this interlocutory appeal is limited to class certification under *Rule 23(f)*. [7] ***HN20***[] "Merits questions may be considered to the extent—but only to the extent—that they are relevant to determining whether the *Rule 23* prerequisites for class certification are satisfied." *Amgen Inc. v. Conn. Ret. Plans & Tr. Funds, 568 U.S. 455, 133 S. Ct. 1184, 1194-95, 185 L. Ed. 2d 308 (2013)*.

In their supplemental briefs, the parties narrowly focused on *FTC v. Qualcomm*'s effect on the class's ability to meet *Rule 23(b)(3)*'s predominance requirement. But before we can address *FTC v. Qualcomm*'s effect on *Rule 23(b)(3)*

---

[7] This distinction commands the scope of our review. *See, e.g.*, *Tyson Foods, Inc. v. Bouaphakeo, 577 U.S. 442, 457, 136 S. Ct. 1036, 194 L. Ed. 2d 124 (2016)* ("When, as here, 'the concern about the proposed class is not that it exhibits some fatal dissimilarity but, rather, a fatal similarity—[an alleged] failure of proof as to an element of the plaintiffs' cause of action—courts should engage that question as a matter of summary judgment, not class certification.'" (quoting Richard A. Nagareda, *Class Certification in the Age of Aggregate Proof*, *84 N.Y.U. L. Rev. 97, 107 (2009)*)).

requirements, we must determine what state law or laws will apply to the 23(b)(3) class. That analysis ultimately must await **[**37]** the district court's new choice of law analysis on remand. *See supra* Section III.A.

Moreover, neither party addressed whether *FTC v. Qualcomm* affects Plaintiffs' ability to meet other class certification requirements, like *Rule 23(a)(2)*'s commonality requirement. *See* *Dukes, 564 U.S. at 352, 359* (concluding that "proof of commonality necessarily overlaps with respondents' merits contention" and that the employee class could not be certified because it failed to meet *Rule 23(a)(2)*'s commonality requirement by not offering significant proof that the employer operated under a general policy of discrimination); *Senne, 934 F.3d at 927* ("Class certification is proper only if the trial court has concluded, after a 'rigorous analysis,' that *Rule 23(a)* has been satisfied." (citations omitted)). Likewise, neither party fully addressed the effect of *FTC v. Qualcomm* on the 23(b)(2) class. Qualcomm mentioned that the 23(b)(2) class could not be certified after *FTC v. Qualcomm* because the Apple agreements were terminated years ago and the remaining ongoing conduct was held not to be anticompetitive. ***HN21***[] But we have held that the class's ability to meet *Rule 23(b)(2)* requirements "does not require an examination of the viability or bases of the class members' claims for relief." *See* *Parsons, 754 F.3d at 688* (citations omitted). **[**38]** Thus, *FTC v. Qualcomm*'s effect on *23(b)(2)* certification requirements remains another open question to be considered on remand.

We concluded in *FTC v. Qualcomm* that Qualcomm's SEP licensing practices, the same practices complained of here, are lawful and not anticompetitive. *969 F.3d at 1005*. Because Plaintiffs' arguments in this case overlap with those brought in *FTC v. Qualcomm*, there would have to be some extraordinary difference for Plaintiffs' claims here to not fail as a matter of law—for instance, differences between Sherman Act claims brought by the government versus private parties, differences between Sherman Act analysis and other state laws that might apply, or difference in Plaintiffs' ability to meet their burden of proof under the rule of reason. *See id.*

* * *

While *FTC v. Qualcomm* may well warrant dismissal of Plaintiffs' claims, that issue is not presently before us on interlocutory appeal. Thus, we vacate the 23(b)(2) class and remand with instructions for the district court to reconsider certification of the entire class given *FTC v. Qualcomm*. If the district court determines that *FTC* ***[*1076]*** *v. Qualcomm* defeats the class on *Rule 23(a)* grounds—a threshold requirement before turning to *Rule 23(b)*—that would eliminate **[**39]** the need to reconduct the choice of law analysis for the 23(b)(3) class. *See supra* Section II.A. If the class meets *Rule 23(a)*'s requirements, then the district court should determine the effect of *FTC v. Qualcomm* on the 23(b)(2) class and, after it has reconducted its choice of law analysis and determined what state law applies to the class, the effect on the 23(b)(3) class.

VACATED AND REMANDED.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Clayton Act > Defenses

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN1[] **Sherman Act, Defenses**

A federal antitrust claim shall be forever barred unless commenced within four years after the cause of action accrued. 15 U.S.C.S. § 15b. The same four year statute of limitations applies to claims brought under Virginia's state ***antitrust law***. Va. Code Ann. § 59.1-9.14. The four year statute of limitations period begins to run when the cause of action accrues, which generally begins when a defendant commits an act that causes economic harm to a plaintiff. In other words, discovery of the injury, not discovery of the other elements of a claim, is what starts the clock.

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN2[] **International Aspects, Commerce With Foreign Nations**

The Sherman Act is a federal antitrust statute that prohibits activities that restrict interstate commerce and competition in the marketplace. It provides that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations is declared to be illegal. 15 U.S.C.S. § 1.

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

International Law > Authority to Regulate > Anticompetitive Activities

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN3[] **International Aspects, Commerce With Foreign Nations**

The Sherman Act is limited somewhat by the Foreign Trade Antitrust Improvements Act of 1982, which excludes from the Sherman Act's reach much anticompetitive conduct that causes only foreign injury. It does so by setting forth a general rule stating that the Sherman Act shall not apply to conduct involving trade or commerce with foreign nations. It then creates exceptions to the general rule, applicable where (roughly speaking) the conduct significantly harms imports, domestic commerce, or American exporters. So, generally, the Sherman Act does not reach foreign antitrust injuries. However, the U.S. may still have jurisdiction over an antitrust claim regarding foreign commerce where one of two exceptions applies: (1) the domestic effects exception or (2) the import exception.

Antitrust & Trade Law > Sherman Act > Claims

International Law > Authority to Regulate > Anticompetitive Activities

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

HN4[] **Sherman Act, Claims**

The domestic effects exception to the foreign commerce antitrust exception applies when anticompetitive conduct: (1) has a direct, substantial, and reasonably foreseeable effect on domestic commerce, and (2) such effect gives rise to a Sherman Act claim. This exception does not apply when a claim rests solely on foreign harm. The domestic effect of any anti-competitive conduct must be direct, substantial, and reasonably foreseeable. 15 U.S.C.S. § 6a. The Seventh Circuit has explained: Just as tort law cuts off recovery for those whose injuries are too remote from the cause of an injury, so does the Foreign Trade Antitrust Improvements Act of 1982 (FTAIA) exclude from the Sherman Act foreign activities that are too remote from the ultimate effects on U.S. domestic or import commerce.

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

International Law > Authority to Regulate > Anticompetitive Activities

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

HN5[] **International Aspects, Commerce With Foreign Nations**

The import exception to the general rule abrogating the Sherman Act's applicability to foreign commerce states that the Sherman Act applies to a defendant's conduct abroad that constitutes, includes, or has as a necessary consequence the movement of goods into this country. Notably, conduct does not involve import commerce if it has no direct or immediate consequence for domestic markets and is intended merely to have a domestic impact in the future. Nothing in the text of the Foreign Trade Antitrust Improvements Act of 1982 (FTAIA) otherwise suggests intent-based analysis.

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

International Law > Authority to Regulate > Anticompetitive Activities

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN6[] **International Aspects, Commerce With Foreign Nations**

The Foreign Trade Antitrust Improvements Act of 1982 (FTAIA) cuts off recovery for foreign activities that are too remote from the ultimate effects on U.S. domestic or import commerce. As the Fourth Circuit has stated, the antitrust laws were not intended as a vehicle for converting business tort claims into antitrust causes of action.

International Law > ... > Sovereign Immunity > Foreign Sovereign Immunities Act > Construction & Interpretation

International Law > ... > Exceptions > Commercial Activities > Nexus With Cause of Action

International Law > ... > Exceptions > Commercial Activities > Substantial Contacts

International Law > ... > Exceptions > Commercial Activities > Direct Effects

International Law > ... > Foreign Sovereign Immunities Act > Jurisdiction > Subject Matter Jurisdiction

HN7[] **Foreign Sovereign Immunities Act, Construction & Interpretation**

The Foreign Sovereign Immunities Act (FSIA) provides that federal courts have original jurisdiction over all claims against a foreign state in which the state is not entitled to sovereign immunity. 28 U.S.C.S. § 1330(a). However, a foreign state shall not be immune from the jurisdiction of courts of the United States in any case in which the action is based upon a commercial activity carried on in the United States by the foreign state. 28 U.S.C.S. § 1605(a)(2). This has been referred to as the commercial activity exception to the FSIA.

International Law > ... > Sovereign Immunity > Foreign Sovereign Immunities Act > Burdens of Proof

International Law > ... > Exceptions > Commercial Activities > Nexus With Cause of Action

International Law > ... > Exceptions > Commercial Activities > Substantial Contacts

International Law > ... > Sovereign Immunity > Foreign Sovereign Immunities Act > Construction & Interpretation

International Law > ... > Exceptions > Commercial Activities > Direct Effects

HN8[] **Foreign Sovereign Immunities Act, Burdens of Proof**

The commercial activity exception to the Foreign Sovereign Immunities Act (FSIA) has been tailored by the Supreme Court. The Court has held that where the conduct constituting the gravamen of the plaintiffs suit occurs abroad, the commercial activity exception to the FSIA does not apply. The Court does not apply an element by element analysis, but instead zeroes in on the core of the plaintiffs suit to identify the conduct that the suit was based upon. The Court has explained that "based upon" means those elements of a claim that, if proven, would entitle plaintiff to relief under his theory of the case. It requires more than a mere connection with-or relation to-the commercial activity.

International Law > ... > Sovereign Immunity > Foreign Sovereign Immunities Act > Construction & Interpretation

International Law > ... > Exceptions > Commercial Activities > Nexus With Cause of Action

International Law > ... > Exceptions > Commercial Activities > Substantial Contacts

HN9[] **Foreign Sovereign Immunities Act, Construction & Interpretation**

The Supreme Court has limited the commercial activity exception to the Foreign Sovereign Immunities Act (FSIA) to those cases in which a state exercises only those powers that can be exercised by private citizens. Where a state exercises powers that are particular only to sovereigns, the commercial activity exception does not apply. The commercial activity exception concerns the type of actions engaged in by the government, rather than their purpose. 28 U.S.C.S. § 1603(d).

International Law > ... > Sovereign Immunity > Foreign Sovereign Immunities Act > Construction & Interpretation

HN10[] **Foreign Sovereign Immunities Act, Construction & Interpretation**

A foreign sovereign engages in commercial activity only when it exercises those powers that can also be exercised by private citizens, and not when it employs powers that are particular to sovereigns.

International Law > ... > Sovereign Immunity > Foreign Sovereign Immunities Act > Construction & Interpretation

International Law > ... > Foreign Sovereign Immunities Act > Exceptions > Expropriation

International Law > Foreign & International Immunity > Sovereign Immunity > Waivers

HN11[] **Foreign Sovereign Immunities Act, Construction & Interpretation**

The expropriation exception under the Foreign Sovereign Immunities Act (FSIA), 28 U.S.C.S. § 1605(a)(3), waives foreign sovereign immunity in cases asserting that rights in property were taken in violation of international law.

International Law > ... > Exceptions > Commercial Activities > Nexus With Cause of Action

HN12[] **Commercial Activities, Nexus With Cause of Action**

Commercial activity occurs in the United States if there is a substantial contact between the commercial activity and the United States.

International Law > ... > Sovereign Immunity > Foreign Sovereign Immunities Act > Burdens of Proof

International Law > ... > Exceptions > Commercial Activities > Nexus With Cause of Action

International Law > ... > Exceptions > Commercial Activities > Substantial Contacts

International Law > ... > Sovereign Immunity > Foreign Sovereign Immunities Act > Construction & Interpretation

International Law > ... > Exceptions > Commercial Activities > Direct Effects

HN13[] **Foreign Sovereign Immunities Act, Burdens of Proof**

Supreme Court case law is clear: where the conduct constituting the gravamen of the plaintiff's suit occurs abroad, the commercial activity exception to the Foreign Sovereign Immunities Act (FSIA) does not apply. The Supreme Court does not apply an element by element analysis, but instead zeroes in on the core of the plaintiff's suit to identify the conduct that the suit was based upon. The Supreme Court has also explained that "based upon" means those elements of a claim that, if proven, would entitle plaintiff to relief under his theory of the case. It requires more than a mere connection with-or relation to-the commercial activity. Finally, the commercial activity exception to the FSIA is limited to those cases in which a state exercises only those powers that can be exercised by private citizens. Where a state exercises powers that are particular only to sovereigns, the commercial activity exception does not apply.

Opinion

ORDER

This matter comes before the Court on Defendant Lockheed Martin Corporation's Motion to Dismiss Plaintiffs' Amended Complaint, Dkt. 58, and on Defendant Airbus Defense Space and SAS's Motion to Dismiss Plaintiffs' Amended Complaint, Dkt. 66. The matter has been fully briefed, and the Court held a hearing on Wednesday, September 22, 2021. **[*2]** Based on the following analysis, both Motions to Dismiss are **GRANTED**.

I. BACKGROUND

A. The Parties

Plaintiff Blenheim Capital is a company based in Guernsey. Blenheim is an experienced broker in structuring offset agreements for defense trade transactions. Plaintiff Blenheim Holdings is the 100% owner of Blenheim Capital. Dkt. 53 at 7.

Defendant Lockheed Martin is a Maryland corporation. Lockheed is a global security and aerospace company serving both U.S. and international customers with defense, civil, and commercial products and services. It is one of the largest companies in the world. Dkt. 53 at 7.

Defendant Airbus Defense and Space SAS ("Airbus France") is a French company. It is a division of Airbus SE, a global leader in the defense and space industry. Dkt. 53 at 8.

Defendant Republic of South Korea ("South Korea") is a foreign sovereign state. Defendant Defense Acquisition Program Administration ("DAPA") is an executive agency of the South Korean government within the Ministry of National Defense. Dkt. 53 at 8. South Korea is a member of the Hague Convention and has not yet been served in this lawsuit.

B. Statement of Facts

In a Foreign Military Sale ("FMS"), a domestic producer sells **[*3]** military goods to a foreign government, using the U.S. Department of Defense ("DoD") as an intermediary. Often, as part of an FMS transaction, the foreign purchaser will require the domestic partner to provide the foreign government with an "offset." In an offset transaction, the domestic producer is required to directly provide the foreign purchaser with goods or services that partially "offset" the foreign government's procurement expenditures. Dkt. 76-1 at 23. Prior to the events at issue in this case, Plaintiff Blenheim had amassed significant experience in the field of offset agreements, having structured offset solutions for more than twenty multinational corporations, which satisfied approximately $18.5 billion in offset obligations. Dkt. 76-1 at 23.

In the 1990's, Lockheed developed the F-35 fighter jet. In 2011, South Korea announced an intent to enhance its stealth-fighter capabilities, and Lockheed thus had an opportunity to sell, via the FMS process, a fleet of F-35s to South Korea. Dkt. 76-1 at 24-25.

Lockheed engaged Blenheim to develop an offset offer - titled "Project Archer." In Project Archer, Blenheim developed an offset transaction whereby Lockheed Martin Overseas **[*4]** Corporation ("LMOC") would provide South Korea with a military satellite. LMOC would provide $150 million to Blenheim, which Blenheim would then use, in combination with financing, to procure three satellites. One of these satellites would be provided to South Korea to satisfy Lockheed's F-35 offset obligation. Blenheim would own the remaining two commercial satellites, and would sell their bandwidth for use in secure government communications. Dkt. 76-1 at 24. Blenheim expected this arrangement to result in excess of $500 million in profits. Dkt. 76-1 at 92.

Blenheim then conducted a bidding process to identify the optimal original equipment manufacturer ("OEM") partner for Project Archer. Ultimately, Blenheim selected Airbus England, an affiliate of Airbus SAS, as the OEM for Project Archer. On November 22, 2013, South Korea accepted Lockheed's bid, which included the Project Archer offset offer, to provide South Korea's new fighter jets. Dkt. 76-1 at 25. LMOC and Airbus England both signed contracts obligating them to participate in Project Archer. Dkt. 76-1 at 25.

Ultimately, Lockheed and Airbus SAS decided to cut Blenheim out of the deal. Dkt. 76-1 at 26. South Korea also began **[*5]** to pressure the Defendants into a direct-procurement, on the basis that it would accelerate receipt of the military satellite, and to offer inducements to Lockheed. Dkt. 76-1 at 29. On October 6, 2016, LMOC provided Blenheim with a purported "formal notice... of the immediate termination" of the contract ("the IBA") for cause. Dkt. 76-1 at 29. Lockheed, Airbus France, and South Korea proceeded with the military satellite procurement and worked to obtain the necessary approvals and permits from the Defense Security Cooperation Agency, the Federal Aviation Administration, and other government agencies to do so. Lockheed paid Airbus for the satellite and South Korea credited billions of dollars to Lockheed's offset obligation. Dkt. 53 at 43.

As Plaintiff Blenheim writes, "In the end, Lockheed, Airbus SAS, and South Korea all achieved their goals: Lockheed, at no additional cost to itself, offset its obligations to South Korea and kept a competitor out the market; Airbus SAS kept its sale of the military satellite and kept a competitor out of the market; and South Korea received its military satellite. Only Blenheim, the party that spent years of effort and significant resources on Project **[*6]** Archer, was left with nothing." Dkt. 76-1 at 30.

II. LEGAL STANDARD

In its Amended Complaint, Dkt. 53, Plaintiff Blenheim asserts two bases for subject matter jurisdiction pursuant to a federal question. First, Plaintiff Blenheim asserts that this Court has subject matter jurisdiction over claims against Defendants Lockheed and Airbus because Plaintiffs' claims for violations of *15 U.S.C. § 1* - the Sherman Act - arise under federal law. Dkt. 53 at 8. Second, Plaintiff Blenheim asserts that this Court has subject matter jurisdiction over claims against South Korea and South Korea's Defense Acquisition Program Administration (DAPA) pursuant to the Foreign Sovereign Immunities Act ("FSIA"). *Id.* Each of these bases for subject matter jurisdiction is addressed in turn.[1]

A. Plaintiffs' Antitrust Claim

Plaintiff Blenheim fails to adequately assert an antitrust claim for two reasons. First, the antitrust claim falls outside the four year statute of limitations period and, second, the antitrust claim is barred by the Foreign Trade Antitrust Improvements Act ("FTAIA").

---

[1] Defendant Lockheed Martin Corporation's Motion to Dismiss, Dkt. 58, argues that this Court lacks subject matter jurisdiction under the Foreign Sovereign Immunity Act. Defendant Airbus SAS's Motion to Dismiss, Dkt. 66, argues that this Court lacks subject matter jurisdiction under the Sherman Act. Each Defendant adopts the other's arguments on these fronts.

1. Statute of Limitations on Plaintiffs' Antitrust Claim

HN1[] A federal antitrust claim "shall be forever barred unless commenced within four years after the cause **[*7]** of action accrued." *15 U.S.C. § 15b*. The same four year statute of limitations applies to claims brought under Virginia's state ***antitrust law***. *Va. Code Ann. § 59.1-9.14*.

The four year statute of limitations period begins to run when the cause of action accrues, which "generally [begins] when a defendant commits an act that causes economic harm to a plaintiff." *GO Comput., Inc. v. Microsoft Corp., 508 F.3d 170, 177 (4th Cir. 2007)* (citing *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*. In other words, "... discovery of the injury, not discovery of the other elements of a claim, is what starts the clock." *Rotella v. Wood, 528 U.S. 549, 555, 120 S. Ct. 1075, 145 L. Ed. 2d 1047 (2000)*.

At the latest, Blenheim was aware of its alleged injury by October 6, 2016. This is the date on which Lockheed "provided Blenheim with a purported 'formal notice... of the immediate termination' of the IBA for cause," Dkt. 53 at 42, thereby causing economic injury to Blenheim.

Plaintiff Blenheim first filed its antitrust claim in the Amended Complaint on May 21, 2021. Dkt. 53. More than four years transpired between October 6, 2016 and May 21, 2021. Even Plaintiff Blenheim's original Complaint, Dkt. 1, which was filed on December 31, 2020 and which notably did not state an antitrust claim, also falls outside the four year statute of limitations period. Therefore, Blenheim is barred from bringing its antitrust claim under both federal and **[*8]** Virginia state law.

2. Plaintiffs' Substantive Antitrust Claim

In addition to being barred by the four year statute of limitations period on its antitrust claim, Plaintiff Blenheim fails to sufficiently allege an antitrust claim.

a. Legal Standard

Plaintiff Blenheim alleges antitrust violations against Defendants Lockheed and Airbus under *15 U.S.C. § 1* - the Sherman Act. ***HN2***[] The Sherman Act is a federal antitrust statute that prohibits activities that restrict interstate commerce and competition in the marketplace. It provides that "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations is declared to be illegal." *15 U.S.C. § 1*.

HN3[] The Sherman Act is limited somewhat by the Foreign Trade Antitrust Improvements Act of 1982, which "excludes from the Sherman Act's reach much anticompetitive conduct that causes only foreign injury. It does so by setting forth a general rule stating that the Sherman Act 'shall not apply to conduct involving trade or commerce ... with foreign nations.' It then creates exceptions to the general rule, applicable where (roughly speaking) the conduct significantly harms imports, domestic commerce, or American exporters." *F. Hoffmann-La Roche Ltd. v. Empagran S.A., 542 U.S. 155, 158, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004)* (internal citations omitted). So, generally, the Sherman Act does not reach foreign **[*9]** antitrust injuries. However, the U.S. may still have jurisdiction over an antitrust claim regarding foreign commerce where one of two exceptions applies: (1) the domestic effects exception or (2) the import exception.

HN4[] First, the domestic effects exception applies when anticompetitive conduct: "(1) has a 'direct, substantial, and reasonably foreseeable effect' on domestic commerce, and (2) 'such effect gives rise to a [Sherman Act] claim.'" *Id. at 159*. This exception does not apply when a claim rests solely on foreign harm. For example, in *F. Hoffman-La Roche Ltd v. Empagran S.A.*, the Supreme Court considered a price-fixing scheme that resulted in higher vitamin prices both in the United States and internationally. The Court explained that an international purchaser who suffered from higher prices was barred from bringing a Sherman Act claim under the FTAIA, while a

U.S. purchaser suffering the same harm could bring such a claim. *Id.* The Court signaled a hesitancy to apply American antitrust laws and remedies to a foreign plaintiff for conduct that occurred abroad, particularly when the foreign injury was deemed independent of any potential domestic injury. *Id. at 165*. The domestic effect of any anti-competitive conduct must **[*10]** be "direct, substantial, and reasonably foreseeable." *15 U.S.C. § 6a*. The Seventh Circuit has explained, "Just as tort law cuts off recovery for those whose injuries are too remote from the cause of an injury, so does the FTAIA exclude from the Sherman Act foreign activities that are too remote from the ultimate effects on U.S. domestic or import commerce." *Minn-Chem, Inc. v. Agrium, Inc., 683 F.3d 845, 857 (7th Cir. 2012)* (cleaned up).

HN5[] Second, the import exception to the general rule abrogating the Sherman Act's applicability to foreign commerce states that "the Sherman Act applies to a defendant's conduct abroad that constitutes, includes, or has as a necessary consequence the movement of goods into this country." *Biocad JSC v. F. Hoffman-La Roche, 942 F.3d 88, 96 (2d Cir. 2019)*. Notably, "[c]onduct does not 'involve' import commerce if it has no direct or immediate consequence for domestic markets and is intended merely to have a domestic impact in the future. Nothing in the text of the FTAIA otherwise suggests intent-based analysis." *Id. at 97*.

Plaintiffs' antitrust claims are barred under the Foreign Trade Antitrust Improvements Act as Defendants' conduct meets neither the domestic effects exception nor the imports exception to the FTAIA. Plaintiffs' claim is too remote and too speculative to be considered an antitrust violation.

b. Discussion

In Plaintiffs' Amended **[*11]** Complaint, Plaintiffs color a number of Defendants' behaviors as anticompetitive. For example, Plaintiffs state that "Multiple Lockheed executives repeatedly expressed concern about the competitive impact of the transaction, including that through Project Archer, Lockheed was essentially funding a new competitor for Lockheed's own satellite division, LM Space." Dkt. 53 at 27. Plaintiffs further allege that, "Like the Lockheed officials... various Airbus officials grew concerned that Blenheim would become a competitor with Airbus France and its affiliates in the market for the sale and leasing of satellite capacity. It expressed such concerns on multiple occasions, including at a 2015 dinner attended by senior executives of Airbus France and Airbus England... An Airbus England official who was friendly to Blenheim, and supportive of Project Archer, told Blenheim's CEO to 'watch your back' because Airbus France officials were concerned with the competitive impact of providing the satellites to Blenheim." Dkt. 53 at 30.

More specifically, Plaintiffs allege an antitrust violation, stating that they "suffered an injury from a conspiracy that reduced output and eliminated a nascent competitor **[*12]** in the market for the sale of commercial satellite capacity, including but not limited to the X and Ka band satellite capacity in the region covered by MYGOVSAT." Dkt. 76-1 at 38. Plaintiffs allege that Defendant Airbus was a competitor and consumer in the market of selling or leasing capacity in X and Ka bands. Dkt. 76-1 at 39.

Defendants counter that Plaintiffs' antitrust claims are barred by the FTAIA. Defendants note that the Sherman Act protects against conspiracies to unreasonably restrain trade in the market, not the ending of a business relationship. Dkt. 67 at 33; *see* *Oksanen v. Page Mem'l Hosp., 945 F.2d 696, 711 (4th Cir. 1991)*. Defendants note in particular that Plaintiffs' claims meet neither the import exception nor the domestic effects exception of the FTAIA. Defendants are correct in this assertion. Plaintiffs' claim is too remote and speculative to be properly considered an antitrust violation.

First, Defendants note that Plaintiffs' claims do not meet the import exception, as the purported market that Plaintiffs describe is entirely foreign. In Defendants' words: "Blenheim did not import anything to the United States; instead, Blenheim, based in Guernsey, contracted with a French and American company to build a satellite for South Korea." **[*13]** Blenheim alleges no conduct involving imports to the U.S. Dkt. 67 at 36.

Second, Defendants note that Plaintiffs' claims do not meet the domestic effects exception. Defendants note that Plaintiffs' plan to sell satellite capacity to Malaysia never extended beyond negotiations, and that there was never any effect on U.S. commerce. Dkt. 67 at 37. In Defendants' words: "The mere possibility that Blenheim eventually may have sold satellites to Malaysia, contracted with an unnamed satellite communications provider to use Malaysia's orbital positions, and participated in a constellation that could cover part of the U.S. 'is too remote and speculative' to fall within the purview of FTAIA." Dkt. 67 at 37.

Plaintiff Blenheim counters that, "Defendants base their argument on a misstatement of Blenheim's allegations... Instead, Blenheim alleges it intended to use Malaysia's orbital positions to lease and sell *satellite capacity* to other *third parties*... Moreover, Blenheim's allegations make clear that it was planning to combine coverage with another satellite provider to provide *global coverage*... This shows Blenheim would have been in the business of providing certain kinds of satellite capacity **[*14]** on a global basis, including in the United States - making the FTAIA inapplicable." Dkt. 76-1 at 49 (emphasis in original).

Ultimately, Plaintiff Blenheim's allegations here fail to meet either the import exception or the domestic effects exception of the FTAIA. They do not allege an "import." No good was ever imported into the United States. The fact that Plaintiffs intended to sell satellite capacity that might reach the United States does not suffice. *See* *Biocad JSC v. F. Hoffman-La Roche, 942 F.3d 88, 97 (2d Cir. 2019)*. Nor do Plaintiffs allege any "direct, substantial and reasonably foreseeable effect" as required under *15 U.S.C. § 6a*. Their claim is speculative, as Plaintiffs never actually provided satellite coverage. Even if they did, it is hard to fathom how such coverage could be considered a "direct" and "substantial" influence on United States commerce. ***HN6***[] The FTAIA cuts off recovery for "foreign activities that are too remote from the ultimate effects on U.S. domestic or import commerce." *Minn-Chem, Inc. v. Agrium, Inc., 683 F.3d 845, 857 (7th Cir. 2012)* (cleaned up). As the Fourth Circuit has stated, "... the antitrust laws were not intended... as a vehicle for converting business tort claims into antitrust causes of action." *Oksanen v. Page Mem? Hosp., 945 F.2d 696, 711 (4th Cir. 1991)*. Here, Plaintiff Blenheim attempts to convert a business tort claim into an antitrust claim, **[*15]** but cannot do so.

B. Plaintiffs' Foreign Sovereign Immunities Act Claim

Plaintiffs fail to state a claim under the Foreign Sovereign Immunities Act ("FSIA"). The sale at issue in this case is a sovereign-to-sovereign transaction and does not fit the FSIA's "commercial activity" exception.

1. Legal Standard

HN7[] The Foreign Sovereign Immunities Act provides that federal courts have original jurisdiction over all claims against a foreign state in which the state is not entitled to sovereign immunity. *28 U.S.C. § 1330(a)*. However, "[a] foreign state shall *not* be immune from the jurisdiction of courts of the United States in any case ... in which the action is based upon a *commercial activity* carried on in the United States by the foreign state..." *28 U.S.C. § 1605(a)(2)* (emphasis added). This has been referred to as the "commercial activity" exception to the FSIA.

HN8[] The "commercial activity" exception to the FSIA has been tailored by the Supreme Court. The Court has held that where the conduct constituting the *gravamen* of the plaintiffs suit occurs abroad, the "commercial activity" exception to the FSIA does *not* apply. *OBB Personenverkehr AG v. Sachs, 577 U.S. 27, 136 S.Ct. 390, 193 L. Ed. 2d 269 (2015)*. The Court does not apply an element by element analysis, but instead zeroes in on the core of the plaintiffs suit to **[*16]** identify the conduct that the suit was "based upon." *Id.* The Court has explained that "based upon" means those elements of a claim that, if proven, would entitle plaintiff to relief under his theory of the case. It requires more than a mere connection with - or relation to - the commercial activity. *See* *Saudi Arabia v. Nelson, 507 U.S. 349, 113 S. Ct. 1471, 123 L. Ed. 2d 47 (1993)*.

HN9[] The Supreme Court has also limited the "commercial activity" exception to the FSIA to those cases in which a state exercises only those powers that can be exercised by private citizens. Where a state exercises powers that are particular only to sovereigns, the commercial activity exception does not apply. *Id. See also* *Republic of Argentina v. Weltover, Inc., 504 U.S. 607, 112 S. Ct. 2160, 119 L. Ed. 2d 394 (1992)* (explaining that when a foreign sovereign acts in the manner of a private player within a market, the actions are "commercial" within the meaning of the FSIA). The "commercial activity" exception concerns the *type* of actions engaged in by the government, rather than their purpose. *See* 28 U.S.C. § 1603(d); Republic of Argentina v. Weltover, Inc., 504 U.S. 607, 614, 112 S. Ct. 2160, 119 L. Ed. 2d 394 (1992).

2. Discussion

In this case, Plaintiffs assert that their claims against Defendant South Korea and South Korea's Defense Acquisition Program Administration (DAPA) are based on South Korea's commercial activity within the United States. Specifically, Plaintiffs allege that the funds that **[*17]** South Korea and DAPA provided to the U.S. Department of Defense for the purchase of a military satellite were passed to Lockheed, as the prime contractor, and then directly to Airbus; and that Blenheim was cut out of the deal. Dkt. 53.

In the Motion to Dismiss, Defendants counter that the "commercial activity" exception to the FSIA does not apply here. Defendants note, first, that the conduct alleged by Plaintiffs is not "commercial activity," and, second, the action is not "based on" commercial activity as the conduct alleged does not constitute the gravamen of the suit. Dkt. 59. Each of these assertions is considered in turn, below.

HN10[] First, Defendants note — correctly — that a foreign sovereign engages in "commercial activity" only when it exercises "those powers that can also be exercised by private citizens," and not when it employs powers that are particular to sovereigns. *See* France.com, Inc. v. French Republic, 992 F.3d 248, 252 (4th Cir. 2021). Defendants note that the Pentagon's Foreign Military Sales ("FMS") transactions alleged by Plaintiffs are exclusively between the U.S. government and a foreign government — here, South Korea. Private citizens in the marketplace could not participate in this transaction. Further, there was no privity of contract **[*18]** between the contractor and the foreign sovereign. *See* Dkt. 59.

Second, Defendants note that, even if South Korea's involvement in the FMS program could be deemed "commercial activity," Plaintiff Blenheim's claims against South Korea are not *"based upon"* that activity because they do not form the gravamen of Plaintiffs' suit for tortious interference of contract. Dkt, 59 at 23. "Based upon" means those claims that, if proven, would entitle Plaintiff to relief. *See* Saudi Arabia v. Nelson, 507 U.S. 349, 113 S. Ct. 1471, 123 L. Ed. 2d 47 (1993). Here, the gravamen of Plaintiffs' claims is the tortious interference with contract by Defendants. The government-to-government FMS transaction does not form the basis of Plaintiffs' claims. *See* Dkt. 77.

Plaintiffs counter with two compelling - although nonbinding and distinguishable-cases defining "commercial activity": Simon v. Republic of Hungary, 443 F.Supp.3d 88 (D.D.C. 2020) and BAE Systems Technology v. Republic of Korea's Defense Acquisition Program Administration, 2016 U.S. Dist. LEXIS 146593, 2016 WL 6167914 (D. Md. 2016). Plaintiffs argue that both Simon and *BAE* hold that FMS transactions constitute "commercial activity" under the FSIA, and the types of military equipment sold in those cases are subject to the same or similar "FMS-only" restrictions as those referred to by Defendants. Dkt. 76-1 at 33. Plaintiffs further note that the offset transaction was not government-to-government, as the satellite offset never called for **[*19]** the satellite to be transferred to or from the U.S. government. Dkt. 76-1 at 33.

These cases are both nonbinding and distinguishable. In Simon, the United States District Court for the District of Columbia considered a class action brought by fourteen Hungarian Jewish survivors of the Hungarian Holocaust against the Republic of Hungary and the Hungarian state-owned railway (MAV) arising from Defendants' participation in and perpetration of the Holocaust. Plaintiffs sought restitution for property that was seized from them as part of Hungary's broader effort to eradicate the Jewish people. Simon v. Republic of Hungary, 443 F.Supp.3d 88, 92-94 (D.D.C. 2020). On remand, the Court held that the Plaintiffs' complaint "sufficiently alleges, in claims asserting genocidal takings of property from Hungarian Jews between 1941 and 1945, that each defendant, Hungary and MAV, commingled that expropriated property in the country's treasury and thereby continue to possess such property to sustain their commercial activities, including Hungary's debt offerings and military purchases in the United States..." Id. at 116. The Court further noted that Hungary and the railway engaged in commercial activity in the United States as required to satisfy the commercial-activity nexus element **[*20]** of the expropriation exception to sovereign immunity under the FSIA. *Id. at 109-110*. The present case has a starkly different factual background; moreover, the present case does not deal with the "expropriation exception" to sovereign immunity, as is at issue in *Simon*. ***HN11***[] As the Court in *Simon* notes, "the FSIA's expropriation exception, *28 U.S.C. § 1605(a)(3)*, 'waives foreign sovereign immunity in cases asserting that 'rights in property [were] taken in violation of international *law ...'"* *Id. at 99*. The Court held, specifically, that "Plaintiffs' allegations regarding Hungary's bond offerings and military equipment purchases are sufficient to meet the commercial activity prong of the expropriation exception. "*Id. at 107*. Moreover, as Defendants note,*" Simon* did not involve an FMS-Only transaction with equipment that is *not* available for purchase by private entities, as was the case here with the procurement of F-35 aircraft. *Simon* is therefore also distinguishable." Dkt. 77 at 9.

BAE Systems Technology v. Republic of Korea's Defense Acquisition Program Administration, 2016 U.S. Dist. LEXIS 146593, 2016 WL 6167914 (D. Md. 2016), is similarly non-binding and distinguishable. That case involved a contract dispute between BAE Systems and the Republic of Korea and its Defense Acquisition Program Administration (DAPA). The Court held that, "[at] its 'core,' this case is about whether or not South Korea has **[*21]** a viable breach of contract claim against BAE for its failure pay DAPA $43,250,000 due to the contractor's asserted failure to prevent the U.S. Government from increasing the price of the F-16 fleet upgrades that were the subject of an underlying FMS contract." *Id. 2016 U.S. Dist. LEXIS 146593, [WL] at *6*. ***HN12***[] The Court held that "commercial activity occurs 'in the United States' if there is a 'substantial contact' between the commercial activity and the United States." *Id. 2016 U.S. Dist. LEXIS 146593, [WL] at *5*. Unlike in *BAE*, in the present case, the commercial activity at issue is not the gravamen of Plaintiffs' suit; there is no "substantial contact" between the commercial activity and the United States. Moreover, as Defendants note, *BAE* does not actually hold that the FMS transaction was a commercial activity, and is therefore inapposite. Dkt. 77 at 9.

Ultimately, this Court is compelled to follow the precedent set by the U.S. Supreme Court. ***HN13***[] That case law is clear: where the conduct constituting the *gravamen* of the plaintiff's suit occurs abroad, the "commercial activity" exception to the FSIA does *not* apply. *See* *OBB Personenverkehr AG v. Sachs, 577 U.S. 27, 136 S.Ct. 390, 193 L. Ed. 2d 269 (2015)*. The Supreme Court does not apply an element by element analysis, but instead zeroes in on the core of the plaintiff's suit to identify the conduct that the suit **[*22]** was "based upon." *Id.* The Supreme Court has also explained that "based upon" means those elements of a claim that, if proven, would entitle plaintiff to relief under his theory of the case. It requires more than a mere connection with - or relation to - the commercial activity. *Saudi Arabia v. Nelson, 507 U.S. 349, 113 S. Ct. 1471, 123 L. Ed. 2d 47 (1993)*. Finally, the "commercial activity" exception to the FSIA is limited to those cases in which a state exercises only those powers that can be exercised by private citizens. Where a state exercises powers that are particular only to sovereigns, the commercial activity exception does not apply. *Id. See also* *Republic of Argentina v. Weltover, 504 U.S. 607, 112 S. Ct. 2160, 119 L. Ed. 2d 394 (1992)*.

Following the law as set forth by the Supreme Court, this Court finds that the transaction at issue here does not meet the "commercial activity" exception of the FSIA. The transaction was sovereign-to-sovereign, South Korea could not purchase the F-35 fighter jets through a direct commercial sale. Additionally, Plaintiff Blenheim fails to show that its claims are "based upon" the conduct alleged by South Korea. The "gravamen" of Blenheim's suit is tortious interference with contract between Lockheed and Airbus — not the commercial activity by South Korea.

III. CONCLUSION

As Plaintiff Blenheim has failed to allege **[*23]** an antitrust claim or a claim under the Foreign Sovereign Immunities Act, this Court lacks subject matter jurisdiction to hear this case. Therefore, Defendant Lockheed Martin Corporation's Motion to Dismiss Plaintiffs' Amended Complaint, Dkt, 58, and Defendant Airbus Defense Space and SAS's Motion to Dismiss Plaintiffs' Amended Complaint, Dkt. 66 are both hereby **GRANTED**. The Amended Complaint, Dkt. 53, is **DISMISSED**.

It is **SO ORDERED**.

Opinion by: Kimberly J. Mueller

Opinion

ORDER

Plaintiffs Four in One Company, Inc., Bruce Foods Corporation, Cliffstar Corporation and Diversified Foods & Seasonings, Inc. are food product manufacturers that purchased processed tomato products from defendants, SK Foods L.P., Ingomar Packing Company, Los Gatos Tomato Products, Scott Salyer, Stuart Woolf and Greg Pruett. Consolidated Compl. ¶¶ 1-2, 9-12, ECF No. 113. Plaintiffs move **[*9]** for *cy pres* distribution of the remaining class funds, $8,766.85, to the Institute for Consumer Antitrust Studies at Loyola University Chicago School of Law (ICAS/Loyola) and dismissal of the action. Mem. In Support of *Cy Pres* Disbursement (Mem.), ECF No. 136.

Defendants did not file an opposition, and the court submitted the matter without a hearing. For the following reasons, the motion **is granted**.

I. BACKROUND

In 2009, another judge of this court issued an order consolidating the four above captioned cases. Consolidation Order (March 12, 2009), ECF No. 88. Plaintiffs then filed a consolidated complaint alleging defendants violated federal antitrust laws by conspiring to raise and fix the prices of a variety of processed tomato products. Consolidated Compl. ¶¶ 1-2. In January 2014, the court granted provisional certification of the settlement class and preliminarily approved class settlement. *See* Order (Jan. 2, 2014) at 1, ECF No. 222. Eight months later, the court granted plaintiffs' motion for final approval of the class settlement as to defendants Ingomar, Pruett, Woolf and Los Gatos. Order (Aug. 18, 2014), ECF No. 239. The class has received all funds from those settlements and **[*10]** the court entered final judgement against them. *Id.*

The actions against SK Foods, L.P. and Scott Salyer remained pending due to an ongoing bankruptcy action in the United States Bankruptcy Court for the Eastern District of California. Mem. at 2-3; *see also* Not. of Filing Bankruptcy, ECF No. 102. On November 20, 2020 the Chapter 11 Trustee for SK Foods filed a motion for approval of a distribution of unclaimed funds after the final distribution and entry of a final decree and closure of the bankruptcy case, which the Bankruptcy Court granted on December 30, 2020. Atty. Arthur N. Bailey, Jr. Decl. ¶ 5, ECF No. 314. Before closure of the bankruptcy case, in April 2015, class members began to receive pro rata shares from the distribution of these defendants' funds culminating recently with the final distribution in January 2021. *Id.* ¶ 6. Even more recently, plaintiffs were advised that $8,766.85 in uncashed checks remained in the class funds account. *Id.* ¶ 7.

Plaintiffs now move to resolve the pending claims against remaining defendants SK Foods, L. P, and Scott Salyer given the completion of the distribution of the class funds and termination of the bankruptcy action. Mem. at 3. Plaintiffs **[*11]** move to disburse the remaining funds to their proposed *cy pres* designee, ICAS. Mem. at 3-4. Additionally, plaintiffs move to dismiss the actions against remaining defendants, SK Foods, L.P. and Scott Salyer. Mem. at 1. Defendants do not oppose the motions.

II. LEGAL STANDARD

When a class action settlement results in unclaimed funds, the alternatives available are *cy pres* distribution, escheat to the government, or reversion to the defendants or the identified class members. *Six Mexican Workers v. Ariz. Citrus Growers, 904 F2d 1301, 1307 n.4 (9th Cir. 1990)* (also noting a fourth option is the pro rata distribution of the funds to located class members). "*Cy pres* provides a mechanism for distributing unclaimed funds to the next best class of beneficiaries." *In re Easysaver Rewards Litig., 906 F.3d 747, 760 (9th Cir. 2018)* (internal citations omitted). Where, as here, the original settlement did not provide for the *cy pres* designee, nothing appears to prevent the plaintiffs moving for such a designee in a separate motion.

"Not just any worthy" recipient will qualify, however. *Dennis v. Kellogg Co., 697 F.3d 858, 865 (9th Cir. 2012)*. There must be a "driving nexus between the plaintiff class and the *cy pres* beneficiary." *Id.* The *cy pres* distribution must "(1) address the objectives of the underlying statutes, (2) target the plaintiff class, or (3) provide reasonable certainty that any member **[*12]** will be benefitted." *Nachshin v. AOL, LLC, 663 F.3d 1034, 1040 (9th Cir. 2011)*.

III. ANALYSIS

The court finds that ICAS/Loyola's advocacy efforts align with the nature of the plaintiffs' lawsuit and the consumer protection objectives of the Sherman Act, *15 U.S.C. § 1*. Plaintiffs alleged defendants violated *Section 1* of the Sherman Act by conspiring "to fix prices, allocate customers, and rig bids for Processed Tomato Products, including tomato paste and diced tomatoes." Consolidated Compl. ¶ 87; *see* *15 U.S.C. § 1* ("Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal."). Plaintiffs propose ICAS/Loyola as *cy pres* designee "because of its work on behalf of consumers in the area of ***antitrust law*** to protect the rights of individuals from the types of predatory behavior underlying the lawsuit." Mem. at 4. ICAS/Loyola is a "non-sectarian charitable organization" and "non-partisan, independent academic center that advocates for a more just, competitive, and consumer-friendly economy." Bailey Decl. ¶¶ 9-10.

Silent class members' interests will reasonably be benefitted by the distribution to ICAS/Loyola. Plaintiffs argue that ICAS/Loyola reflects the **[*13]** interests of the silent class members because "it has a nationwide reach sufficient to justify receipt of the *cy pres* award." Mem. at 5. The court agrees. ICAS/Loyola works on behalf of people such as the "[c]lass members in this case, who were consumers of commodities that were the subject of price-fixing agreements subject to antitrust liability." Bailey Decl. ¶ 9. University programs may be appropriate designees when the focus of the program aligns with the interests of a nationwide class. *See* *In re Easysaver Rewards Litigation, 906 F.3d at 761-62* (a university program focused on internet security and data privacy was an appropriate *cy pres* designee because its research would have far-reaching impact for a nationwide class injured by the mishandling of personal information). Likewise, ICAS/Loyola's research on creating a more just economy will benefit the silent, nationwide class impacted by alleged price fixing. Therefore, the organization is an appropriate *cy pres* designee due to the nexus between the class interests and the designee's interest.

Plaintiffs also request dismissal of the action against the remaining defendants, SK Foods, L.P. and Scott Salyer, under *Federal Rule Civil Procedure 41(a)(2)*. Mem. at 1. Given the conclusion of the bankruptcy proceedings against **[*14]** these defendants, the court grants this motion.

IV. CONCLUSION

The **motions are granted** as follows:

(1) The court grants the disbursement of the remaining class funds in the amount of $8,766.85 to the appropriate *cy pres* designee, the Institute for Consumer Antitrust Studies at Loyola University Chicago School of Law.

(2) The court dismisses on the merits and with prejudice the remaining causes of action against SK Foods, L.P. and Scott Salyer.

This order resolves ECF No. 313. This case is closed.

IT IS SO ORDERED.

DATED: September 30, 2021.

/s/ Kimberly J. Mueller

Opinion by: GEORGE B. DANIELS

Opinion

MEMORANDUM DECISION AND ORDER

GEORGE B. DANIELS, United States District Judge:

Defendants (1) Bank of America Corporation, (2) Bank of America, N.A.; (3) Barclays plc; (4) Barclays Bank plc ("Barclays"); (5) Cooperatieve Rabobank U.A. (f/k/a Cooperatieve Centrale Raiffeisen-Boerenleenbank B.A.); (6) Lloyds Banking Group plc; (7) Lloyds Bank plc; (8) Merrill Lynch International ("MLI"), (9) NatWest Markets plc (f/k/a The Royal Bank of Scotland plc) ("RES"), (10) NatWest Group plc (f/k/a The Royal Bank of Scotland Group plc), (11) NatWest Markets Securities Japan Ltd. (f/k/a RBS Securities Japan Limited), (12) Société Generale, (13) UBS AG ("UBS"), (14) UBS Securities Japan Co. Ltd., (15) NEX International Limited, (16) ICAP Europe Ltd., and (17) TP ICAP plc (collectively, "Defendants") move to dismiss Plaintiffs'[1] Second Amended Class Action Complaint ("Second Amended Complaint" or "SAC") (ECF No. 489) for lack of subject matter jurisdiction pursuant to *Federal*

[1] As detailed in the SAC, "Plaintiffs" include (1) Fund Liquidation Holdings LLC ("FLH") as assignee and successor-in-interest to Sonterra Capital Master Fund, Ltd., (2) Hayman Capital Master Fund, L.P. ("HCMF"), (3) Japan Macro Opportunities Master Fund, L.P. ("JMOF"), and (4) California State Teachers' Retirement System ("CalSTRS").

Rule of Civil Procedure ("FRCP") 12(b)(1), for lack of personal jurisdiction pursuant to FRCP 12(b)(2), and for failure to state a claim pursuant to FRCP 12(b)(6). (Not. Of Defs.' Mots. to Dismiss the SAC, (ECF No. 505).)[2]

Plaintiffs allege that from January **[*5]** 1, 2006 to June 30, 2011, Defendants conspired to fix prices and restrain trade in Yen LIBOR (the London Interbank Offered Rate for the Japanese Yen), and prices of Yen-LIBOR-based derivatives. (SAC ¶ 1.) Plaintiffs bring claims under the *Sherman Act, 15 U.S.C. § 1, et seq,* the *Racketeer Influenced and Corrupt Organizations Act ("RICO")*, *18 U.S.C. §§ 1961-1968*, and state law. *Id.*

Defendants' motion to dismiss Plaintiff Sonterra Capital Master Fund, Ltd. and Plaintiff Fund Liquidation Holding LLC ("FLH") for lack of subject matter jurisdiction is GRANTED. Defendants' motion to dismiss Plaintiffs Hayman Capital Master Fund, L.P., Japan Macro Opportunities Master Fund, L.P. (together, the "Hayman Funds") and California State Teachers' Retirement System ("CalSTRS"), for lack of subject matter jurisdiction is DENIED.

Defendants' motion to dismiss count one of the SAC for failure to state a claim is GRANTED as to all Defendants except RBS, Société Générale, UBS. Defendants motion to dismiss counts two and three of the SAC against all Defendants is GRANTED.

Defendants' motion to dismiss for lack of personal jurisdiction over RBS is GRANTED. This Court declines to exercise supplemental jurisdiction over Plaintiffs' remaining state law claims as to all Defendants except those claims by Plaintiff CalSTRS against **[*6]** Société Générale and UBS.

I. LEGAL STANDARDS

A. *Rule 12(b)(I)* Lack of Subject Matter Jurisdiction.

The proper procedural route to challenge standing is a motion under *Rule 12(b)(1)*. *All. For Envtl. Renewal, Inc. v. Pyramid Crossgates Co., 436 F.3d 82, 88 n.6 (2d Cir. 2006)*. "[O]nce the Defendants' motion to dismiss for lack of jurisdiction under *[Rule] 12(b)(1)* put[s] the Plaintiffs' Article III standing in issue, the District Court has leeway as to the procedure it wishes to follow." *All, For Envtl. Renewal, Inc. v. Pyramid Crossgates Co., 436 F.3d 82, 87-88 (2d Cir. 2006)* (citing *Gibbs v. Buck, 307 U.S. 66, 71-72, 59 S. Ct. 725, 83 L. Ed. 1111 (1939)*).

In deciding a motion to dismiss "pursuant to *Rule 12(b)(1)*, . . . the Court must accept as true all material factual allegations in the complaint, but should refrain from drawing any inferences in favor of the party asserting jurisdiction." *People United for Children, Inc. v. City of New York, 108 F. Supp. 2d 275, 283 (S.D.N.Y. 2000)* (citing *Atlantic Mut. Ins. Co. v. Balfour Maclaine Int'l Ltd., 968 F.2d 196, 198 (2d Cir. 1992)*). "[U]nder *Rule 12(b)(1)*, [a court is] permitted to rely on non-conclusory, non-hearsay statements outside the pleadings . . . . " *M.E.S., Inc. v. Snell, 712 F.3d 666, 671 (2d Cir. 2013)*. The party invoking the benefit of federal jurisdiction bears the burden of establishing the existence of that jurisdiction. *Sharkey v. Quarantillo, 541 F.3d 75, 82-83 (2d Cir. 2008)* (internal citation omitted). Accordingly, "jurisdiction must be shown affirmatively, and that showing is not made by drawing from the pleadings inferences favorable to the party asserting it." *APWU v. Potter, 343 F.3d 619, 623 (2d Cir. 2003)* (quoting *Shipping Fin. Servs. Corp. v. Drakos, 140 F.3d 129, 131 (2d Cir. 1998)* (internal quotation marks omitted)).

Whether a plaintiff has standing relates to whether he is entitled to have a court decide the merits of a dispute. *See Rajamin v. Deutsche Bank Nat'l Trust Co., 757 F.3d 79, 84 (2d Cir. 2014)*. To **[*7]** have Article III standing, a plaintiff must show that (1) he has suffered an actual or imminent injury in fact, which is concrete and particularized; (2) there is a causal connection between the injury and the defendant's actions; and (3) it is likely that a favorable decision in the case will redress the injury. *See Lujan v, Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*.

[2] Given the lengthy procedural history and factual background, the Court assumes familiarity and only repeats the most salient aspects thereof to the instant motion.

B. *Rule 12(b)(2)* Lack of Personal Jurisdiction.

To survive a motion to dismiss for lack of personal jurisdiction under *Rule 12(b)(2)*, the plaintiff has the burden of making a *prima facie* showing that personal jurisdiction over the defendant exists. *Licci ex rel. Licci v. Lebanese Canadian Bank, SAL, 673 F.3d 50, 59 (2d Cir. 2012)*; *BWP Media USA Inc. v. Hollywood Fan Sites, LLC, 69 F. Supp. 3d 342, 349 (S.D.N.Y. 2014)* (plaintiff bears the burden of establishing personal jurisdiction on a motion to dismiss for lack of personal jurisdiction). In assessing personal jurisdiction on a *Rule 12(b)(2)* motion, the court is neither required to "draw argumentative inferences in the plaintiffs favor," *Robinson v. Overseas Military Sales Corp., 21 F.3d 502, 507 (2d Cir. 1994)* (citation omitted), nor must it "accept as true a legal conclusion couched as a factual allegation." *Jazini v. Nissan Motor Co., Ltd, 148 F.3d 181, 185 (2d Cir. 1998)* (citation omitted).

C. *Rule 12(b)(6)* Failure to State a Claim

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). The plaintiff must demonstrate "more than a sheer possibility that a defendant **[*8]** has acted unlawfully"; stating a facially plausible claim requires the plaintiff to plead facts that enable the court "to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* The factual allegations pled must therefore "be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555* (citation omitted). A district court must first review a plaintiffs complaint to identify allegations that, "because they are no more than conclusions, are not entitled to the assumption of truth." *Iqbal, 556 U.S. at 679*. The court then considers whether the plaintiffs remaining well-pleaded factual allegations, assumed to be true, "plausibly give rise to an entitlement to relief." *Id.; see also Targum v. Citrin Cooperman & Co., No. 12 Civ. 6909 (SAS), 2013 U.S. Dist. LEXIS 164585, 2013 WL 6087400, at *3 (S.D.N. Y. Nov. 19, 2013)*. In deciding the *12(b)(6)* motion, the court must also draw all reasonable inferences in the non-moving party's favor. *See N.J. Carpenters Health Fund v. Royal Bank of Scot. Gip., PLC, 709 F.3d 109, 119-20 (2d Cir. 2013)*.

II. DEFENDANTS' MOTION TO DISMISS FOR LACK OF SUBJECT MATTER JURISDICTION IS GRANTED IN PART

A. Sonterra Lack Subject Matter Jurisdiction Because FLH is not a Real Party in Interest

Defendants first contend that, at the time the complaint was filed in this action, Sonterra "lacked Article III standing" because it was a dissolved entity. (Mem. of Law in Supp. of Defs.' Mot. to Dismiss **[*9]** the Second Am. Class Action Compl. for Lack of Subject Matter Jurisdiction and Failure to State a Claim ("Defs.' Br."), ECF No. 525, at 9-11.) Since the case was a legal nullity, Defendants argue, Plaintiffs cannot create subject matter jurisdiction by substituting FLH as plaintiff. *(Id.* at 13-14.)

In *Fund Liquidation Holdings LLC v. Bank of Am. Corp. ("SIBOR")*, the Second Circuit addressed whether Sonterra, also an original named plaintiff in that case, lacked Article III standing because of its pre-suit dissolution. *991 F.3d 370 (2d Cir. 2021)*. The Court held that, since Sonterra "did not legally exist" pursuant to Cayman Island law, it "lacked standing to sue" at the time it filed suit. *SIBOR, 991 F.3d at 384*. The same holding applies here. However, that alone does not warrant dismissal.

The *SIBOR* court held that Sonterra's defect in Article III standing could easily be resolved "so long as a party with standing to prosecute the specific claim in question exists at the time the pleading is filed." *Id. at 386*. The court explained that if FLH "(the real party in interest) is not named in the complaint, then it must ratify, join, or be substituted into the action within a reasonable time." *Id.* It is only when "the real party in interest either fails to materialize **[*10]** or lacks standing itself should the case be dismissed for want of subject-matter jurisdiction." Id. at 386.[3] If Sonterra effectively assigned its claims to FLH, there would be no Article III standing issue in this case.

Here, in the Asset Purchase Agreement dated August 3, 2021 ("APA"), Sonterra assigned, to Fund Liquidation Holdings, LLC, "all of [its] right, title and interest in all of the Assets," which are defined, in relevant part, as "all of [Sonterra's] right, title and interest in and to any and all Recovery Rights. . . ." (Exhibit A, ECF No. 527-1, Art. I § 1.1, Art. II.) "Recovery Rights" are defined as "all monetary, legal and other rights held by or accruing to [Sonterra] in respect of [any] Claim." *(id.* Art. II.) As relevant here, one subdivision of "Claims" is "Future Claims," which is defined as:

> any and all claims of [Sonterra] . related to the ownership of, or any transaction in, any Traded Securities . . . as to which no Case has been filed as of the date hereof, including, without limitation. any and all of the following: (i) any future class action lawsuit . . . or other lawsuits . . . (ii) any other future claims. . . .

First, Defendants contend that the APA did not effectively convey **[*11]** the "right to initiate or prosecute this lawsuit," because such a right must be express and the APA only transferred "the right to recover proceeds in connection with certain claims pre-dating the transfer or brought by other parties." (Defs.' Br. at 16; Reply Mem. of Law in Supp. of Defs.' Mot. to Dismiss the Second Am. Class Action Compl, ("Defs.' Reply"), ECF No. 547, at 10-11.) The APA, however, is not so limited. It assigns all of Sonterra's right, title and interest in all claims relating to its "ownership of, or any transaction in, any Traded Securities," necessarily including the right to initiate or prosecute those claims. The cases Defendants rely upon are inapposite. *See, e.g.,* *Cortlandt St. Recovery Corp. v. Deutsche Bank AG, London Branch, No. 12 Civ. 9351 (JPO), 2013 U.S. Dist. LEXIS 100741, 2013 WL 3762882, at *2 (S.D.N.Y. July 18, 2013)* (finding assignment insufficient where it did not indicate "what was assigned" or that "legal title to the claims at issue" was conveyed). Accordingly, Sonterra effectively assigned the right to initiate and prosecute a lawsuit pertaining to the claims conveyed.

Second, Defendants argue that the APA fails to assign Sonterra's antitrust and RICO claims because the APA does not contain a specific or unambiguous general assignment. (Defs.' Br. at 17-18.) "To effect a transfer of the right to bring an **[*12]** antitrust [or RICO] claim, the transferee must expressly assign the right to bring that cause of action, either by making specific reference to the [] claim or by making an unambiguous assignment of causes of action in a manner that would clearly encompass the antitrust [or RICO] claim," *DNAML Ply, Ltd. v. Apple Inc., No. 13 Civ. 6516 (DLC), 2015 U.S. Dist. LEXIS 168245, 2015 WL 9077075, at *3 (S.D.N.Y. Dec. 16, 2015)*. Here, the APA makes a general unambiguous assignment of Sonterra's antitrust and RICO claims. Indeed, Sonterra assigned "any and all claims .. related to the ownership of, or any transaction in, any Traded Securities," including claims that can be brought in "any future class action lawsuit," The cases Defendants cite support rather than conflict with this conclusion. *See* *Lerman v. Joyce Int'l, Inc., 10 F.3d 106, 112 (3d Cir. 1993)* (finding assignment sufficient to convey RICO claim where it referred to "legal causes of action or claims" by expressly assigning entity's "causes of action, [] claims and demands of whatsoever nature"); *DNAML, 2015 U.S. Dist. LEXIS 168245, 2015 WL 9077075, at *5* (finding assignment insufficient to convey antitrust claims where it only assigned entity's "business and assets" but made no reference to "claims of any kind"). The APA, like the assignment in *Lerman* and unlike that in *DNAML*, refers to legal claims,

Defendants' reliance on *Sonterra Cap. Master Fund, Lid. v. Barclays Bank PLC* ***[*13]*** *("GBP LIBOR")* and *Fund Liquidation Holdings LLC v. Citibank, N.A. ("SIBOR I")*, is misplaced. In each case, the court held that a conveyance of claims relating to future "securities class action lawsuit[s]" was insufficient to convey antitrust claims because such language evidenced an intention to convey causes of action "arising out of the securities laws" and could not be understood to "encompass antitrust claims." *GBP LIBOR, 403 F. Supp. 3d 257, 265 (S.D.N.Y. 2019)*; *SIBOR I*, 399 F. Supp, 3d 94, 103 (S.D.N.Y, 2019), *vacated and remanded sub nom.* *Fund Liquidation Holdings LLC v. Bank*

[3] Defendants also contend that Sonterra lacked standing because it assigned its claims prior to suit. *(Id.* at 11.) The Second Circuit, similarly, rejected this argument, reasoning that Sonterra's pre-suit assignment of its claims to FLH "does not pose a constitutional roadblock" to Article III standing. *SIBOR, 991 F.3d at 382*.

of Am. Corp., 991 F.3d 370 (2d Cir. 2021). Contrastingly, the APA in the present case conveys claims relating to "any future class action lawsuit" which can be understood as encompassing antitrust claims.[4]

Finally, Defendants contend that, even if the APA conveyed Sontena's antitrust and RICO claims, it did not convey such claims relating to FX derivatives. (Defs. Br, at 18.) On this point, Defendants are correct. The APA limits the claims assigned to only those relating to Sonterra's "ownership of, or any transaction in, any Traded Securities." (APA, at 3.) The APA defines "Traded Securities" as all "Securities," which "means any debt and/or equity securities of any kind, type or nature, including, without limitation, stock, bonds, options, puts, calls, swaps and **[*14]** similar instruments or rights." *(Id.* at 4.) While "Securities" is explicitly defined in the APA, the lower case "securities" is not and signifies that the parties intended this term to be interpreted using its plain meaning, which does not include FX derivatives. *See* Contant v. Bank of Am. Corp., No. 17 Civ. 3139 (LOS), 2018 U.S. Dist. LEXIS 183586, 2018 WL 5292126, at *9 (S.D.N.Y. Oct. 25, 2018) ("[A]lthough FX instruments are analogous to securities in some respects, Plaintiffs do not have recourse under federal securities . . . laws."). Thus, the APA only assigns those claims relating to Sonterra's ownership or transaction in securities. While Plaintiff is correct, the definition of "Securities" encompasses a wide variety of financial instruments, it encompasses securities and securities-adjacent instruments.

Plaintiffs further contend that the plain meaning of "securities" does not matter because the parties included FX transactions in the "Trade Data" provided by Sonterra, which evidences the parties' clear intent to include FX transactions in the definition of "Traded Securities." (Pls.' Opp'n at 16.) As Plaintiffs admit, however, the language of the APA is unambiguous and, thus, does not present a circumstance that would require this Court to look beyond the four corners of the agreement. The term "Traded **[*15]** Securities," as defined by the APA, makes clear that Sonterra only assigned its claims relating to its ownership or transaction in securities or securities adjacent instruments. Indeed, the definitions of "Traded Securities" and "Securities" make no reference or provide any other indication that either of terms should be interpreted with reference to any "Trade Data." On the other hand, the APA defines "Trade Data" as all "relevant information . . . relating to" transactions in securities and securities-adjacent instruments. (APA, Art. 11.) This definition further confirms the parties' intent to convey claims relating to securities. The Notices of Assignment attached as exhibits to the APA also confirm such an intent. It states that Sonterra assigned its rights in "any claims related to . . . securities of any kind, type or nature." (*Id.* at Ex. B.) Accordingly, the APA did not assign the claims at issue here to FLH.[5] Thus, FLH is not a real party in interest and Rule 17 does not permit its joinder in this action.

Thus, Defendants motion to dismiss Sonterra and FLH for lack of subject matter jurisdiction is granted.

B. Hayman Funds' Substitution [*16] Stands.

---

[4] Defendants also cite GBP LIBOR and SIBOR I in support of their contention that the APA does not convey RICO claims. (Defs.' Br. at 18 n.19.) For the reasons explained, these cases are inapposite.

[5] Contrary to Plaintiffs' contention, *SIBOR* does not "fully support[]" FLH's substitution for Sonterra. (Letter, dated March 23, 2021, ECF No. 555.) In *Sibor*, the Second Circuit referenced the district court's preliminary determination regarding Sonterra's assignment to FLH. SIBOR, 991 F.3d at 392 (citing FrontPoint Asian Event Driven Fund, L.P. v. Citibank, N.A. ("SIBOR I"), No. 16 Civ. 5263 (AKH), 2018 U.S. Dist. LEXIS 171999, 2018 WL 4830087, at *11-12 (S.D.N.Y. Oct. 4, 2018) (granting leave to amend the complaint after concluding that "[t]he documents 'appear' to show a full assignment")). The district court, however, did not fully address whether the APA effectively assigned the claims there because it dismissed Sonterra after finding it was not an efficient enforcer. *Fund Liquidation Holdings LLC v. Citibank NA.*, 399 F. Supp, 3d 94, 99 (S.D.N.Y. 2019), *vacated and remanded sub nom.* Fund Liquidation Holdings LLC v. Bank of Am. Corp., 991 F.3d 370 (2d Cir. 2021) (explaining that in *SIBOR I*, the court granted leave to amend and instructed Plaintiffs to "show how they got their assignment" and give an "interpretation"); *see also id.* at 104 (declining to address whether the effectivity of Sonterra's assignment because the court dismissed Sonterra's claims).

Defendants contend that because the original named Plaintiffs, Sonterra and Hayman Capital, did not have Article III standing, "this Court always lacked subject matter jurisdiction" and the Hayman Funds' substitution cannot "confer subject matter jurisdiction." (Defs.' Br. at 15.) The Hayman Funds, the real parties in interest existing at the time this suit was filed, sought to be substituted into this action filed by Hayman Capital, the investment advisor that brought this action on the funds' behalf. In accordance with *SIBOR*, Hayman Funds' substitution avoids dismissal of this case even though the original plaintiffs lacked Article III standing. Indeed, as the Second Circuit explained, "if we can alter the party in whose name a case must be prosecuted without offending Article III, it stands to reason that failing to initially name the correct party is not itself a constitutional problem," *SIBOR, 991 F.3d at 388*. Accordingly, the Hayman Funds were properly substituted under *Rule 17* and their "joinder . . . relates back to the 'original[ ] commence[ment]' of the suit," which is "consistent with the directive that standing must exist at the case's inception." *Id. at 389*.[6] Therefore, Defendants' motion to dismiss for lack of subject matter jurisdiction **[*17]** over Hayman Funds' claims is denied.[7]

III. DEFENDANTS' MOTION TO DISMISS PLAINTIFFS' ANTITRUST CLAIM IS GRANTED IN PART

The SAC asserts that the Defendants conspired with each other to make false Yen LIBOR submissions in violation of *Section 1* of the Sherman Act. Defendants argue that this claim should be dismissed because (i) Plaintiffs lack antitrust standing because they are not efficient enforcers, (ii) the claim is barred by the *Foreign Trade Antitrust Improvements Act of 1982 ("FTAIA"), 15 U.S.C. § 6a*, and (iii) Plaintiffs fail to plausibly allege an antirust conspiracy. (Defs.' Br. at 28.)

A. Antitrust Standing.

To have standing to sue for an antitrust violation, a plaintiff must be an efficient enforcer which requires courts to consider: (1) the "directness or indirectness of the asserted injury," through evaluation of the "chain of causation" linking [plaintiffs] asserted injury and the Banks' alleged price-fixing; (2) the "existence of more direct victims of the alleged conspiracy"; (3) the extent to which [plaintiff's] damages claim is "highly speculative"; and (4) the importance of avoiding "either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages **[*18]** on the other." *Gelboim v. Bank of Am. Corp, 823 F.3d 759, 778 (2d Cir. 2016)* (quoting *Associated Gen. Contractors of Calif., Inc. v. Calif. State Council of Carpenters, 459 U.S. 519, 540-45, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*). "The efficient enforcer factors reflect a 'concern about whether the putative plaintiff is a proper party to perform the office of a private attorney general and thereby vindicate the public interest in antitrust enforcement.'" *Gelboim, 823 F.3d at 780*, "This test is not mechanical, and 'the weight to be given the various factors will necessarily vary with the circumstances of particular cases.'" *Sonterra Cap. Master Fund Ltd. v. Credit Suisse Grp. AG ("CHF LIBOR"), 277 F. Supp. 3d 521, 558 (S.D.N.Y. 2017)* (quoting *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 443 (2d Cir, 2005)*. Additionally, "[i]t is common ground that the judicial remedy cannot encompass every conceivable harm that can be traced to alleged wrongdoing." *In re LIBOR-Based Fin. Instruments Antitrust Litig. ("LIBOR VI"), No. 11 MDL 2262 (NRB), 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *15 (S.D.N.Y. Dec. 20, 2016)* (citation omitted).

i. Directness of Causation of the Injury

"The first factor addresses the 'directness or indirectness of the asserted injury,' which 'requires evaluation of the chain of causation linking [plaintiff's] asserted injury and the [defendants'] alleged price-fixing.'" *Sonterra Cap.*

---

[6] Defendants' contention that relation back is inapplicable because the present antitrust claim does not arise out of the conduct, transaction or occurrence of the original pleading is rejected. (Defs.' Br. at 23 n.26.)

[7] Given the Second Circuit's decision in *SIBOR*, this Court's reasoning regarding the Hayman Funds applies with equal weight to Plaintiff CalSTRS. Accordingly, Defendants' motion to dismiss CalSTRS for lack of subject matter jurisdiction is denied.

Master Fund, Ltd. v. Barclays Bank PLC ("GBP LIBOR"), 366 F. Supp. 3d 516, 532-33 (S.D.N.Y. 2018) (quoting Gelboim, 823 F.3d at 778). Defendants are correct that there is an attenuated chain of causation between Defendants' conduct and Plaintiffs' injuries. (Defs.' Br. at 29-30.) Consequently, this factor weighs against a finding of efficient enforcer status for Plaintiffs. Further, this factor weights heavily against CalSTRS's umbrella standing for its transactions with non-defendants. **[*19]** [8]

In *Gelboim* expressed concern over 'umbrella standing' which is asserted when "a plaintiff is injured by dealing with a non-defendant by virtue of a defendant's raising of prices in the market as a whole." GBP LIBOR, 366 F. Supp. 3d at 533 (citing Gelboim, 823 F.3d at 778). Such plaintiffs vastly extend the scope of antitrust liability. Sullivan, 2017 U.S. Dist. LEXIS 25756, 2017 WL 685570, at *16. This concern is present here if plaintiffs are permitted to proceed on transactions entered with non-defendants. Gelboim, 823 F.3d at 779. Thus, while a plaintiff's status as a direct purchaser is not a requirement for antitrust standing, "'whether [p]laintiffs dealt directly or indirectly with [d]efendants, as well as the scope or the relevant market, are both relevant to the issue of causation,'" GBP LIBOR, 366 F. Supp. 3d at 533 (citing Gelboim, 823 F.3d at 778). In line with courts in this district, this Court draws "a line between plaintiffs who transacted directly with defendants and those who did not" because "the 'independent decision' of contracting parties to incorporate [Yen] LIBOR 'breaks the chain of causation between defendants' actions and a plaintiff's injury.'" Id. at 533 (quoting Sullivan, 2017 WL 685570, at *17, 2017 U.S. Dist. LEXIS 25756).

Plaintiffs contend that *Apple Inc. v. Pepper* forecloses "the invocation of the *Illinois Brick* 'indirect purchaser' doctrine." (Pls.' Br. at 30,); **[*20]** 139 S. Ct. 1514, 1520, 203 L. Ed. 2d 802 (2019). Plaintiffs misread that case. There, the Supreme Court upheld the *Illinois Brick* bright line rule and held that plaintiffs, as direct purchasers of Apple, were permitted to proceed with their antitrust claim. *Id* Here, CalSTRS's transaction with Barclays Capital Inc., a non-defendant, presents the same concerns outlined above regarding umbrella standing. It is not a direct purchaser of a Defendant. Plaintiff's attempt to employ the "single enterprise" liability discussed in Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 771, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984) fails. Under *Copperweld*, coordinated activity of related entities permits viewing the entities as a single enterprise. *Id.* Plaintiffs' complaint, however, is devoid of any allegation of coordinated activity. *See* In re LIBOR-Based Fin. Instruments Antitrust Litig., No. 11 MDL 2262 (NRB), 2019 U.S. Dist. LEXIS 49700, 2019 WL 1331830, at *38 (S.D.N.Y. Mar. 25, 2019) ("The independent decision of Panel Banks' subsidiaries and affiliates to sell LIBOR-based financial instruments did not further the plausibly pled conspiracy, the main objective of which was achieved when Panel Banks submitted allegedly suppressed LIBOR submissions.").

This factor weighs against antitrust standing for CalSTRS's claim pertaining to its transactions with non-defendants. Moreover, this factor weighs less strongly against Plaintiffs' standing to pursue its claims pertaining to transactions **[*21]** with Defendants.

ii. Existence of More Direct Victims

Under this second factor, whether Plaintiff is a consumer or competitor is not dispositive. "Like the plaintiffs in *Gelboium*, 'one peculiar feature of this case is that remote victims (who acquired LIBOR-based instruments from any of thousands of non-defendant banks) would be injured to the same extent and in the same way as direct customers of the Banks.'" GBP LIBOR, 366 F. Supp. 3d at 546 (quoting Gelboim, 823 F.3d at 779). Thus, in this efficient enforcer analysis, this factor is given diminished weight.

---

[8] Defendants' reliance on *Laydon* is misplaced. There, the chain of causation was further attenuated by plaintiff's failure to "point to any direct, clearly traceable means by which Defendants' alleged manipulation of one benchmark led to a loss to him on contracts linked to an entirely separate benchmark." Laydon v. Mizuho Bank, Ltd., No. 12 Civ. 3419, 2014 U.S. Dist. LEXIS 46368, 2014 WL 1280464, at *9 (S.D.N.Y. Mar. 28, 2014). Likewise, *7 W. 57th Street Realty Co. v. Citigroup, Inc.* is inapposite because the bonds at issue there "were not actually tied to LIBOR" whereas here, Plaintiffs have alleged that Yen LIBOR is incorporated implicitly into their transactions through a complex formula involving a number of other causal factors. 771 F. App'x 498 (2d Cir. 2019). While these vaguely defined links present a hurdle for Plaintiffs to overcome regarding causation, this hurdle presents more of an issue for umbrella standing than for those claims against Defendants that Plaintiffs directly transacted with.

iii. Speculative Damages

"'[H]ighly speculative damages is a sign that a given plaintiff is an inefficient engine of enforcement.'" *GBP LIBOR, 366 F. Supp. 3d at 546* (quoting *Gelboim, 823 F.3d at 779*). "While 'some degree of uncertainty stems from the nature of **antitrust law**' and is permitted, plaintiffs must be able to allege that they could arrive at a just and reasonable estimate of damages." *Id.* (citation omitted). As Judge Broderick explained in *GBP LIBOR*, "'[a]s with most antitrust cases, to establish damages, [p]laintiffs will have to offer a reliable 'but-for' world. At a minimum, that 'but-for' world will require [p]laintiffs to establish (1) what an alternative Fix Price would have been absent collusion, and (2) the behavior of [Defendants] **[*22]** absent a Fix Price affected by collusion.'" *GBP LIBOR, 366 F. Supp. 3d at 546* (citation omitted). In evaluating whether damages are unduly speculative in price-fixing cases, considerations include (1) the extent to which the damages claim is conclusory in nature; (2) whether the injury is "so far down the chain of causation from defendants' actions that it would be impossible to untangle the impact of the fixed price from the impact of intervening market decisions," which relates to the causation factor; (3) whether external market factors affected the "relationship between the fixed price and the price that the plaintiffs ultimately paid;" and (4) whether "the non-fixed components of a transaction were heavily negotiated between the parties in relation to the fixed component." *GBP LIBOR, 366 F. Supp. 3d at 546* (quoting *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *17-18*).

As noted by other courts in this district, highly negotiated interest rate swaps likely absorb the effects of Yen LIBOR suppression and the negotiated components of FX forwards render the effect of Yen LIBOR manipulation speculative. *See* *GBP LIBOR, 366 F. Supp. 3d at 547*; *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *18*. This factor weighs against antitrust standing for CalSTRS's claim pertaining to its transactions with non-defendants. It weighs less strongly against Plaintiffs' standing to pursue its claims **[*23]** pertaining to transactions with Defendants.

iv. Duplicative Recovery and Complex Apportionment

"The final factor 'reflects a strong interest in keeping the scope of complex antitrust trials within judicially manageable limits.'" *GBP LIBOR, 366 F. Supp. 3d at 548* (quoting *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *23*). "It traditionally concerns the prospect of different groups of plaintiffs attempting to recover for the same exact injury." *Id.* (citation omitted). The conduct at issue here was the subject of numerous government and regulatory investigations and proceedings many of which appear to be ongoing, There is nothing before this Court demonstrating that any of the Plaintiffs have received payments as a result of those proceedings and there are various ways to protect against duplicate recoveries or apportionment issues in this action.

Thus, the Hayman Funds and CalSTRS are efficient enforcers and have antitrust standing to pursue an antitrust claim against those Defendants with whom they have transacted. CalSTRS lacks standing to pursue its antitrust claim involving transactions with non-defendants. Thus, that claim is dismissed.

B. Antitrust Conspiracy.[9]

The Plaintiffs plausibly allege antitrust claims against RBS, UBS, and Société Générale. "'In order to **[*24]** establish a conspiracy in violation of *§ 1* . . . proof of joint or concerted action is required; proof of unilateral action does not suffice.'" *CHF LIBOR, 277 F. Supp. 3d at 552* (quoting *Anderson News, L.L.C. v. Am. Media, Inc., 680 F.3d 162, 183 (2d Cir. 2012)*). "'Price-fixing conspiracies concentrate the power to set prices among the conspirators, including the power to control the market and to fix arbitrary and unreasonable prices.'" *GBP LIBOR, 366 F. Supp.*

---

[9] In light of this Court's findings above regarding antitrust standing, this Court only examines whether Plaintiffs have sufficiently pleaded an antitrust conspiracy with regard to the following Defendants: RBS Plc, Société Générale, UBS AG, Merrill Lynch International, and Barclays Bank Plc.

3d at 549-50 (quoting Sullivan, 2017 U.S. Dist. LEXIS 25756, 2017 WL 685570, at *23). "To allege a conspiracy sufficient to survive a motion to dismiss, a plaintiff must 'allege enough facts to support the inference that a conspiracy actually existed,' which can be done in two ways." CHF LIBOR, 277 F. Supp. 3d at 552 (quoting Mayor & City Council of Baltimore, Md. v. Citigroup, Inc., 709 F.3d 129, 136 (2d Cir. 2013)).

"'First, a plaintiff may, of course, assert direct evidence that the defendants entered into an agreement in violation of the antitrust laws.' But because 'this type of 'smoking gun' can be hard to come by, especially at the pleading stage,' a complaint may instead 'present circumstantial facts supporting the inference that a conspiracy existed.'" CHF LIBOR, 277 F. Supp. 3d at 552 (citation omitted). "The line separating conspiracy from parallelism is indistinct, but may be crossed with allegations of interdependent conduct, accompanied by circumstantial evidence and plus factors. These plus factors include: (1) a common motive to conspire; (2) evidence that shows that **[*25]** the parallel acts were against the apparent individual economic self-interest of the alleged conspirators; and (3) evidence of a high level of interfirm communications." GBP LIBOR, 277 F. Supp. 3d at 552 (quoting Gelboim, 823 F.3d at 781). "'Collusion within a bank will not support a claim pursuant to section 1 of the Sherman Act." CHF LIBOR, 277 F. Supp. 3d at 552 (quoting LIBOR IV, 2016 U.S. Dist. LEXIS 175929, 2015 WL 4634541, at *39).

Moreover, "'the plaintiff need not show that its allegations suggesting an agreement are more likely than not true or that they rule out the possibility of independent action, as would be required at later litigation stages such as a defense motion for summary judgment, or a trial.'" CHF LIBOR, 277 F. Supp. 3d at 553 (quoting Anderson News, L.L.C. v. Am. Media, Inc., 680 F.3d 162, 184 (2d Cir. 2012)). "Instead, '[b]ecause plausibility is a standard lower than probability, a given set of actions may well be subject to diverging interpretations, each of which is plausible,' and the 'choice between two plausible inferences that may be drawn from factual allegations is not a choice to be made by the court on a Rule 12(b)(6) motion.'" CHF LIBOR, 277 F. Supp. 3d at 553 (quoting Anderson News, L.L.C., 680 F.3d at 184-85).

Plaintiffs plausibly allege an antitrust conspiracy to manipulate Yen LIBOR submissions and rates against Defendants RBS, UBS, and Société Générale.[10] Plaintiffs allege, in the form of regulatory findings, settlements and communications, that on multiple occasions these three Defendants participated **[*26]** in the manipulation of Yen LIBOR and inter-defendant collusion. (*See, e.g.*, Exhibit B-4, ECF No. 488-12, at 13 n.15 (CFTC finding regarding UBS and RBS's collusion to "manipulate[Yen LIBOR] rate"); SAC ¶ 5 (allegation that UBS self-reported manipulation of Yen-LIBOR-based derivative prices to the DOJ); *id.* ¶ 16 (alleging that Société Générale admitted in a CFTC settlement to Yen LIBOR manipulation); SAC ¶¶ 5, 13, 276, 524, 530-31, 605-06, 753-56, 762, 794-97, 847, 969.)

Defendants contend that Plaintiffs' conspiracy allegations fail because they are nothing more than actions by a discrete set of individuals that do not plausibly allege a "conspiracy spanning six years and involving 18 Defendants." (Defs.' Br. at 34.) Plaintiffs' allegations, however, sufficiently plead allegations demonstrating the

---

[10] It is worth noting that the antitrust conspiracy as alleged—a sweeping, long running conspiracy to "make false submissions to the BBA designed to artificially suppress, inflate, maintain, or otherwise alter Yen-LIBOR"—is simply implausible when viewed as a whole. As Judge Stein explained, and as suggested in *Gelboim*, "it is harder to infer a conspiracy from individual acts of trader-based manipulation because large financial institutions are both buyers and sellers of derivative products, and thus any changes may well offset each other. But assuming that an upward or downward shift would provide a net increase in profit to a particular bank, one would need to further assume that the same shift would benefit each member of the conspiracy. Unless the banks are similarly situated in this respect, there would be no evident common motive to conspire. This particularly undermines the inference of a conspiracy when the simpler explanation is that the banks may have been independently engaging in intra-defendant manipulation by submitting false [Yen] LIBOR quotes through requests from their own traders to those in the same bank who submit the quote to the BBA." Sonterra Cap. Master Fund Ltd. v. Credit Suisse Grp. AG, 277 F. Supp. 3d 521, 555 (S.D.N.Y. 2017) ("*CHF LIBOR*"). The SAC offers no explanation why conspiracy, as alleged, would be plausible. Consequently, Plaintiffs may not "shoehorn each" Defendant into the conspiracy absent Defendant specific allegations of collusion. Alaska Dep't of Revenue, Treasury Div. v. Manku, No. 20-1759-CV, 2021 U.S. App. LEXIS 21219, 2021 WL 3027170, at *4 (2d Cir. July 19, 2021) ("*SSA Bonds*") (noting Plaintiffs' failure "to link each of the defendants individually to specific acts of anticompetitive conduct in furtherance of the conspiracy.")

conspiracy extended beyond "a discrete set of individuals." Even so, as explained, at this stage of the proceeding, it is not necessary to choose "between two plausible inferences that may be drawn from factual allegations." CHF LIBOR, 277 F. Supp. 3d at 553 (quoting Anderson News, L.L.C., 680 F.3d at 184-85). Moreover, issues regarding the conspiracy's scope can be raised at a later stage. Accordingly, Defendants' motion to dismiss Plaintiffs **[*27]** antitrust claim against UBS, RBS and Société Générale (the "Remaining Defendants") is denied.[11]

Plaintiffs do not plausibly allege that Merrill Lynch International participated in an antitrust conspiracy. Contrary to Plaintiffs' contention, "each defendant is entitled to know how he is alleged to have conspired, with whom and for what purpose. Mere generalizations as to any particular defendant—or even defendants as a group—are insufficient." CHF LIBOR, 277 F. Supp. 3d at 553 (quoting In re Zinc Antitrust Litig., 155 F.Supp.3d 337, 384 (S.D.N.Y. 2016). Plaintiffs refer this Court to only two paragraphs pertaining to MLI in its over 400-page SAC, neither of which indicate that any individual at MIA participated in any way in the conspiracy. The allegation that a trader agreed to participate in one TIBOR/LIBOR trade does not indicate an involvement in a lengthy conspiracy to manipulate Yen LIBOR. Accordingly, Plaintiffs' antitrust claim against Merrill Lynch is dismissed.

Moreover, Plaintiffs fail to plausibly plead Barclays Bank Plc's involvement in the alleged conspiracy. Sonterra Cap. Master Fund, Ltd v. Barclays Bank PLC, 366 F. Supp. 3d 516, 559 (S.D.N.Y. 2018) ("*GBP LIBOR*") (citing Concord Assocs., L.P. v. Entm't Props. Tr., No. 12 Civ. 1667(ER), 2013 U.S. Dist. LEXIS 186964, 2014 WL 1396524, at *24 (S.D.N.Y. Apr. 9, 2014) ("Group pleading, by which allegations are made against families of affiliated entities[,] is simply insufficient to withstand review on a motion to dismiss."); In re Digital Music Antitrust Litig, 812 F.Supp.2d 390, 417 (S.D.N.Y. 2011) (allegations **[*28]** of "direct involvement of the Parent Companies by way of generic references to 'defendants'" were insufficient)). Consequently, Plaintiffs' antirust claim against Barclays Bank Pic is likewise dismissed.

C. FTAIA.

"The FTAIA 'lays down a general rule placing all (non-import) activity involving foreign commerce outside the Sherman Act's reach.'" CHF LIBOR, 277 F. Supp. 3d at 568-69 (quoting *F.* Hoffmann-La Roche Ltd, v. Empagran S.A., 542 U.S. 155, 162, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004)). "'It then brings such conduct back within the Sherman Act's reach provided that the conduct both (1) sufficiently affects American commerce, *i.e.*, it has a direct, substantial, and reasonably foreseeable effect on American domestic, import, or (certain) export commerce, and (2) has an effect of a kind that ***antitrust law*** considers harmful, *i.e.*, the 'effect' must 'give rise to a [Sherman Act] claim.'" CHF LIBOR, 277 F. Supp. 3d at 568-69 (quoting Empagran S.A., 542 U.S. at 162). "'[F]oreign anticompetitive conduct can have a statutorily required 'direct, substantial, and reasonably foreseeable effect' on U.S. domestic or import commerce even if the effect does not follow as an immediate consequence of the defendant's conduct, so long as there is a reasonably proximate causal nexus between the conduct and the effect.'" Id. at 569 (quoting Lotes Co., Ltd v. Hon Hai Precision Industry Co., 753 F.3d 395, 398 (2d Cir. 2014) (citation omitted)). "Tn adopting the FTAIA, Congress expressly endorsed **[*29]** an extraterritorial application of the Sherman Act.'" Id. at 569 (quoting Sullivan, 2017 U.S. Dist. LEXIS 25756, 2017 WL 685570, at *22).

Defendants contend that the FTAIA bars Plaintiffs' antitrust claim because the conduct at issue here is entirely foreign conduct lacking a causal nexus to any domestic effect. (Defs.' Br. at 37.) Defendants heavily rely on this Court's decision in Laydon, in which the CEA and RICO claims there were dismissed as impermissibly extraterritorial. (Defs.' Br. at 38 (citing Laydon v. Mizuho Bank, Ltd., 2020 U.S. Dist. LEXIS 155979, 2020 WL

[11] Contrary to Defendants' contention, *SSA Bonds* does not lead to a dismissal of Plaintiffs' entire antitrust claim. There, the Second Circuit, affirmed the dismissal of an antitrust claim where plaintiffs alleged a "single, unitary super-desk" conspiracy involving "more than twenty entities . . . conspiring every day, nearly all day" in a "decentralized, opaque, and frenetic" secondary market for U.S. dollar-denominated supranational, sovereign, and agency bonds. While this Court questioned the plausibility of Plaintiffs' conspiracy as to *all* Defendants, unlike plaintiffs in *SSA Bonds*, Plaintiffs have sufficiently alleged collusion on a smaller scale and have not "explicitly refused to plead . . . a narrower antitrust conspiracy." SSA Bonds, 2021 U.S. App. LEXIS 21219, 2021 WL 3027170, at *2, *4.

5077186, at *2 (S.D.N.Y. Aug. 27, 2020) (*Laydon V*)).) That decision regarding the CEA and RICO claims in that case, does not inform the decision this Court must make here regarding the applicability of the FTAIA to Plaintiffs' antitrust claims, Indeed, unlike the claims in that case, the FTAIA does not bar Plaintiffs' antitrust claim here. Defendants' alleged manipulation of Yen LIBOR had a foreseeable effect on the Yen-LIBOR-based derivatives sold in the U.S. Contrary to Defendants' contention, the focus is not the Defendants' conduct but the effect in the U.S. and this Court follows the many decisions that have declined to invoke the FTAIA to bar antitrust claims relating to benchmark manipulation. CHF LIBOR, 277 F. Supp. 3d 521, 569 (S.D.N.Y. 2017) (noting the numerous decisions on this issue); *see also id.* ("There can be no serious dispute **[*30]** that the manipulation of a benchmark that is globally disseminated and serves as a pricing component of derivatives sold widely in the United States, as plaintiffs have plausibly alleged, would have a foreseeable effect within the United States."). Accordingly, Plaintiffs' antitrust claim is not barred by the FTAIA.

IV. DEFENDANTS' MOTION TO DISMISS PLAINTIFFS' RICO CLAIMS IS GRANTED

Defendants contend that Plaintiffs' RICO claims predicated on wire fraud seek an impermissible "extraterritorial application of the RICO statute." (Defs.' Br. at 41.) "The Supreme Court in *RJR Nabisco, Inc. v. European Community*, established that private claims under RICO must overcome a presumption against extraterritoriality." GBP LIBOR, 366 F. Supp. 3d at 555 (*citing* RJR Nabisco, Inc. v. European Cmty., 579 U.S. 325, 136 S.Ct. 2090, 2100-02, 195 L.Ed.2d 476 (2016)). "A private plaintiff seeking extraterritorial application of RICO is subject to considerations that do not apply to criminal prosecutions under the statute,[12] and must specifically allege a domestic injury." GBP LIBOR, 366 F. Supp. 3d at 555 (citing RJR, 136 S. Ct. at 2106). "[T]he wire fraud statute does not have extraterritorial application and may not serve as a predicate act for a RICO claim premised on foreign-based activities." Sullivan v, Barclays PLC, No. 13 Civ. 2811 (PKC), 2017 U.S. Dist. LEXIS 25756, 2017 WL 685570, at *33 (S.D.N.Y. Feb. 21, 2017). Accordingly, Plaintiffs must allege that the wire fraud was domestic in nature.

Here, Plaintiffs rely on (1) the use of "U.S. wires to send fraudulent trade confirmations . . . to U.S. counterparties," (2) receipt of funds from Plaintiffs through U.S. wires and employment of traders in the U.S. who traded in Yen-LIBOR-based derivatives in the U.S., (3) sending communications through the U.S., and (4) the activities of Thompson Reuters in connection with its services to publish the LIBOR fixes. (Pl.'s Op'n at 48-49.) Yet, those contacts have consistently been rejected as providing only a "minimal nexus to the United States. . . ." CHF LIBOR, 277 F. Supp. 3d at 581 (collecting cases). Plaintiffs' allegations regarding domestic conduct are almost entirely similar to those rejected in *Laydon*. As in *Laydon*, Plaintiffs' RICO claim is "based on the alleged actions of foreign and international institutions that submitted false information to the BBA." Laydon v. Mizuho Bank, Ltd., No. 12 Civ. 3419 (GBD), 2015 U.S. Dist. LEXIS 44126, 2015 WL 1515487, at *9 (S.D.N.Y. Mar. 31, 2015). As Judge Stein explained:

> [D]efendants are based abroad, their allegedly manipulated quotes were submitted from abroad to a banking association located abroad, and the [Yen] LIBOR rate at issue is the [Yen] LIBOR rate for a foreign currency. That the alleged goal of the conspiracy was to increase worldwide profits, including profits **[*32]** generated in the United States, cannot render "domestic" a scheme that was otherwise centered abroad. Nor can the fact that the [Yen] LIBOR fixes were distributed worldwide, including into the United States, or that defendants carried out their manipulation from abroad through servers that happened to route their communications in the United States. The Supreme Court doggedly underscored this point when it wrote that "the presumption against extraterritorial application would be a craven watchdog indeed if it retreated to its kennel whenever some domestic activity is involved in the case."

---

[12] Accordingly, Plaintiffs' reliance on various criminal cases to contend that their claims are not extraterritorial is misplaced, as this Court previously held in *Laydon. Laydon* ***[*31]*** *v. Mizuho Bank, Ltd.*, No. 12 Civ. 3419 (GBD), ECF No. 491, at 3 n.3 (S.D.N.Y. July 24, 2015) ("To be within the domestic reach of the wire fraud statute, is not the same as overcoming the presumption against extraterritoriality in the RICO context.") (internal quotation marks omitted).

CHF LIBOR, 277 F. Supp. 3d at 582 (citing Morrison v. Nat'l Austl. Bank Ltd., 561 U.S. 247, 266, 130 S. Ct. 2869, 177 L. Ed. 2d 535 (2010)). Accordingly, Plaintiffs' RICO claims are dismissed.[13]

V. DEFENDANTS' MOTION TO DISMISS PLAINTIFFS' UNJUST ENRICHMENTCLAIM IS DENIED

As an initial matter, in light of this Court dismissal of Plaintiffs' federal claims against all Defendants other than RBS Plc, Société Générale, and UBS AG (the "Dismissed Defendants"), this Court declines to exercise supplemental jurisdiction over Plaintiffs' state law claims against the Dismissed Defendants.

As explained above, Plaintiffs have adequately pleaded the involvement of the Remaining Defendants in the alleged conspiracy. Defendants' contend that Plaintiff **[*33]** CalSTRS's unjust enrichment claim against the Remaining Defendants can only be raised in the absence of an actual agreement. (Defs.' Br. at 49-50.) "A plaintiff may proceed on the 'quasi-contract theory of unjust enrichment' only 'where the contract does not cover the dispute in issue.'" Dermis v. JP Morgan Chase & Co., 345 F. Supp. 3d 122, 193-94 (S.D.N.Y. 2018), adhered to on denial of reconsideration, No. 16 Civ. 6496 (LAK), 2018 U.S. Dist. LEXIS 215167, 2018 WL 6985207 (S.D.N.Y. Dec. 20, 2018). The SAC does not allege any information regarding the terms of CALSTRS's contracts with the Remaining Defendants. Plaintiff, however, contends that Defendants' "misconduct extended well beyond the terms of any underlying agreement." (Pls.' Opp'n at 52.) Since neither party has provided this Court with the relevant contractual terms, this Court cannot resolve this issue at this stage. Defendants' motion to dismiss Plaintiff CalSTRS's unjust enrichment claim against the Remaining Defendants is denied.

VI. DEFENDANTS' MOTION TO DISMISS PLAINTIFFS' BREACH OF THE IMPLIED COVENANT OF GOOD FAITH AND FAIR DEALING CLAIM ISGRANTED IN PART

This Court declines to exercise supplemental jurisdiction over Plaintiffs' implied covenant of good faith and fair dealing claim against Bank of America, Merrill Lynch, and Barclays. Thus, Defendants' motion to dismiss is granted.

[*34] Plaintiff CalSTRS asserts a claim for breach of the implied covenant of good faith and fair dealing against the Remaining Defendants.[14] "To state a claim for breach of contract, a plaintiff must allege: (1) the existence of a contract; (2) a breach of that contract; and (3) damages resulting from the breach." LIBOR IV, 2015 U.S. Dist. LEXIS 107225, 2015 WL 4634541, at *67 (citing Nat 'l Mkt. Share, Inc. v. Sterling Natl Bank, 392 F.3d 520, 525 (2d Cir.2004)). "'A covenant of good faith and fair dealing in the course of contract performance' is '[i]mplicit in all contracts,' and thus a breach of this implied covenant constitutes a breach of the contract." LIBOR IV, 2015 U.S. Dist. LEXIS 107225, 2015 WL 4634541, at *67 (citations omitted). "Specifically, implied in every contract is a promise that 'neither party shall do anything which will have the effect of destroying or injuring the right of the other party to receive the fruits of the contract.'" LIBOR IV, 2015 U.S. Dist. LEXIS 107225, 2015 WL 4634541, at *67 (citation omitted). CalSTRS has plausibly alleged that in allegedly manipulating Yen LIBOR, the Remaining Defendants interfered with its rights to enjoy maximum returns permitted "by market forces." Dennis v. JPMorgan Chase & Co., 345 F. Supp. 3d 122, 192 (S.D.N.Y. 2018). Defendants' remaining arguments are rejected for the reasons discussed above. Accordingly, Defendants' motion to dismiss CalSTRS's claim is denied.

VII. DEFENDANTS' MOTIONS TO DISMISS FOR LACK OF PERSONALJURISDICTION IS GRANTED IN PART

Defendants move to dismiss for lack of personal jurisdiction. In light of the conclusions reached above, this Court will only determine whether the SAC adequately alleges personal jurisdiction over the Remaining Defendants.

---

[13] Consequently, this Court need not address Defendants remaining arguments regarding these claims.

[14] The SAC does not allege which law governs CalSTRS's contracts with these Defendants but both patties cite New York law in their briefs.

"To make out a prima facie case of personal jurisdiction . . . plaintiffs must establish a statutory basis for personal jurisdiction and that the exercise of personal jurisdiction [ ] comport[s] with constitutional due process principles." Allianz Glob. Invs. GmbH v. Bank of Am, Corp., No. 18 Civ. 10364 (LGS) (SA), 2021 U.S. Dist. LEXIS 140918, 2021 WL 3192814, at *2 (S.D.N.Y. July 28, 2021).

Since Plaintiffs' claim arises under the Sherman Act, the "appropriate forum to consider for purposes of the minimum contacts analysis is the entire United States." *Id.* "'[S]everal courts in this district addressing federal claims with national service of process—including claims based on alleged LIBOR manipulation—have applied the 'national contacts' test.'" GBP LIBOR, 366 F. Supp. 3d at 562 (collecting **[*35]** cases).

There are two forms of personal jurisdiction, specific and general but only specific jurisdiction is claimed here. "'[S]pecific jurisdiction exists when a State exercises personal jurisdiction over a defendant in a suit arising out of or related to the defendant's contacts with the forum.'" In re Mexican Gov't Bonds Antitrust Litig., 18 Civ. 2830 (JPO), 2020 U.S. Dist. LEXIS 224534, 2020 WL 7046837, at *2 (S.D.N.Y. Nov. 30, 2020) (quoting Metro. Life Ins. Co. v. Robertson-Ceco Corp., 84 F.3d 560, 567-68 (2d Cir. 1996); Ford Motor Co. v. Montana Eighth Jud. Dist. Ct., 141 S. Ct. 1017, 1025, 209 L. Ed. 2d 225 (2021). "[T]here must be 'an affiliation between the forum and the underlying controversy, principally, [an] activity or an occurrence that takes place in the forum State and is therefore subject to the State's regulation.'" Id. at 1025 (quoting Bristol-Myers Squibb Co. v. Superior Ct. of Cal., San Francisco Cty., 137 S. Ct. 1773, 1780, 198 L. Ed. 2d 395 (2017)).

A court's authority to exercise specific personal jurisdiction over a defendant "depends on the defendant having such 'contacts' with the forum State that 'the maintenance of the suit' is 'reasonable, in the context of our federal system of government,' and 'does not offend traditional notions of fair play and substantial justice.'" *Id.* (quoting Int'l Shoe Co. v. Washington, 326 U.S. 310, 316-17, 66 S. Ct. 154, 90 L. Ed. 95 (1945)). The due process analysis consists of two discrete components; "the 'minimum contacts' inquiry and the 'reasonableness' inquiry." Waldman v. Palestine Liberation Org., 835 F.3d 317, 331 (2d Cir. 2016); Chloe v. Queen Bee of Beverly Hills, LLC, 616 F.3d 158, 164 (2d Cir. 2010).

Under the minimum contacts inquiry, the court "must determine whether the defendant has sufficient minimum contacts with the forum . . . to justify the court's exercise of personal **[*36]** jurisdiction." *Id.* (citing Int'l Shoe, 326 U.S. at 316). The defendant "must take 'some act by which [it] purposefully avails itself of the privilege of conducting activities within the forum State.'" Ford Motor Co., 141 S. Ct. at 1024-25 (quoting Hanson v. Denckla, 357 U.S. 235, 253, 78 S. Ct. 1228, 2 L. Ed. 2d 1283 (1958)). "The contacts must be the defendant's own choice and not 'random, isolated, or fortuitous.'" *Id.* (citing Keeton v. Hustler Magazine, Inc., 465 U.S. 770, 774, 104 S. Ct. 1473, 79 L. Ed. 2d 790 (1984)). A foreign defendant may also be subject to specific jurisdiction if "relevant conduct took place entirely outside the forum but that contact had in-forum effects harmful to the plaintiff." GBP LIBOR, 366 F. Supp. 3d at 562. It is not enough that effects be foreseeable. *Id.*

Once the court is satisfied that a defendant has sufficient contacts with the forum to justify the court's exercise of personal jurisdiction, "whether it is reasonable to exercise personal jurisdiction under the circumstances of the particular case." Chloe, 616 F.3d at 164 (quoting Int'l Shoe, 326 U.S. at 316). If the court determines that a defendant lacks the requisite contacts, it need not consider the second prong of the due process test. *See* Metro. Life Ins. Co. v. Robertson-Ceco Corp., 84 F.3d 560, 568-69 (2d Cir. 1996) (quoting Donatelli v. Nat'l Hockey League, 893 F.2d 459, 465 (1st Cir. 1990)). "A plaintiff asserting specific personal jurisdiction 'must establish the court's jurisdiction with respect to *each* claim asserted.'" GBP LIBOR, 366 F. Supp. 3d at 562 (Sunward Elecs., Inc. v. McDonald, 362 F.3d 17, 24 (2d Cir. 2004)).

A. RBS is Dismissed for Lack of Personal Jurisdiction.

Defendants contend that Plaintiffs fail to sufficiently allege **[*37]** facts satisfying the venue provision of Section 12. (Mem. of Law in Supp. of the Foreign Bank Defs.' Mot. to Dismiss the Second Am. Class Action Compl. for Lack of Personal Jurisdiction ("Defs.' PJ Br."), ECF No. 513, at 36.) To satisfy the venue provision, the SAC must sufficiently allege that RBS "transacts] business" in the Southern District of New York. *See* *Dennis v. JPMorgan Chase & Co., 345 F. Supp. 3d 122, 198-99 (S.D.N.Y. 2018)* ("transact business" refers "to the practical, everyday business or commercial concept of doing business or carrying on business of any substantial character.") (internal quotation marks omitted). Plaintiffs fail to allege that RBS conducts business in this District of a substantial character. Accordingly, Plaintiff CalSTRS antitrust claim against RBS is dismissed, Likewise, Plaintiff CalSTRS's remaining state law claim against RBS is dismissed as this Court declines to exercise supplemental jurisdiction over that claim.[15]

B. Plaintiffs Sufficiently Allege Jurisdiction Against UBS and Socicte Generate.[16]

UBS and Societe Generate are each entities incorporated and headquartered abroad. *See* Decl. of Richard G. McCarty, ECF No. 521 If 8 (RBS headquartered and incorporated in the United Kingdom); Decl. of Dominique Bourrinet, ECF No. 522 ¶ 2 (Societe **[*38]** Generate incorporated and headquartered in France); Decl. of John Connors, ECF No. 523 ¶ 3 (UBS incorporated and headquartered in Switzerland). Plaintiff alleges that each Defendant traded with Plaintiff in the allegedly manipulated product and trade the same product with other U.S. parties. (SAC ¶¶ 156-60, 242.) Notably, both Defendants have U.S. trading desks or offices/branches where traders arrange and execute Yen-LIBOR-based derivatives. (SAC ¶¶ 5, 153-154, 197-198.) Each contact has a sufficient nexus to the conspiracy alleged here: conspiracy to manipulate Yen LIBOR in order to unlawfully profit or limit liabilities.

UBS and Societe Generate purposefully availed themselves of the forum and have failed to present a compelling case demonstrating that the exercise of jurisdiction here would be unreasonable and not comport with due process.

Finally, even if Defendants are correct that jurisdiction over the state law claims are only proper in California or Texas, this Court will exercise pendent personal jurisdiction since personal jurisdiction has been established regarding the Sherman Act claims. *GBP LIBOR, 366 F. Supp. 3d at 566* ("Having found that Plaintiffs have made a *prima facie* showing" of personal jurisdiction **[*39]** over the "Sherman Act claims" and "that the Sherman Act claims have a 'nucleus of pertinent facts in common' with the unjust enrichment claim, it is appropriate to exercise pendent personal jurisdiction.").

VIII. CONCLUSION

Defendants' motion to dismiss all claims by Plaintiffs Sonterra Capital Master Fund, Ltd. and Fund Liquidation Holding LLC for lack of subject matter jurisdiction is GRANTED. Defendants' motion to dismiss Plaintiffs Hayman Funds and CalSTRS for lack of subject matter jurisdiction is DENIED.

Defendants' motion to dismiss count one of the SAC failure to state a claim is GRANTED as to all Defendants except RBS, Société Générale and UBS. Defendants motion to dismiss counts two and three of the SAC against all Defendants is GRANTED.

---

[15] Contrary to Plaintiffs' contention, "jurisdiction lies only in cases in which the venue provision of *Section 12*, not the general venue statute, is satisfied." *Dennis v. JPMorgan Chase & Co., 345 F. Supp. 3d 122, 198 (S.D.N.Y. 2018)*. Indeed, "the operative language for purposes of personal jurisdiction is found in the second half of the statute - that is, the service provision, which states that 'all process in such cases may be served in the district of which it is an inhabitant, or wherever it may be found.' The Second Circuit has construed 'in such cases' in accordance with its plain language." Id. (citation omitted). Thus, the general venue statute is inapplicable.

[16] Defendants' contention that Plaintiffs' claims are time barred and thus, warrant dismissal, is rejected. (Defs.' Br. at 19.) The SAC adequately alleges that Plaintiff CalSTRS's claims were tolled by the fraudulent concealment doctrine. Plaintiff demonstrates that Defendants concealed the existence of its cause of action, that Plaintiff remained in ignorance and Plaintiffs ignorance was not attributable to lack of diligence.

Defendants' motion to dismiss for lack of personal jurisdiction over RBS is GRANTED. Defendants' motion to dismiss for lack of personal jurisdiction over Société Générale and UBS is DENIED.

This Court declines to exercise supplemental jurisdiction over Plaintiffs' state law claims except those claims by Plaintiff CalSTRS against Société Générale and UBS.

Plaintiffs' request for jurisdictional discovery is DENIED.

The Clerk of Clerk is instructed **[*40]** to close ECF No. 505 accordingly.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

A complaint should be dismissed under Fed. R. Civ. P. 12(b)(6) only where it appears that the facts alleged fail to state a plausible claim for relief. Fed. R. Civ. P. 12(b)(6). The plaintiff need only give the defendant fair notice of the plaintiff's claim and the grounds upon which it rests. Fed. R. Civ. P. 8(a). In ruling on a motion to dismiss, the court must accept the facts alleged in the complaint as true and construe them in the light most favorable to the plaintiff.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

A claim is plausible where the plaintiff alleges factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. A plaintiff is not required to provide detailed factual allegations to survive dismissal, but the obligation to provide the grounds' of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. The plausibility standard requires that a plaintiff allege sufficient facts to raise a reasonable expectation that discovery will reveal evidence that supports the plaintiff's claim. A complaint may survive a motion to dismiss for failure to state a claim even if it is improbable that a plaintiff would be able to prove those facts and even if the possibility of recovery is extremely remote and unlikely.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN3[] **Remedies, Damages**

A private plaintiff seeking damages under the antitrust laws must establish standing to sue. Antitrust standing requires more than the injury in fact and the case or controversy required by Article III of the Constitution. The doctrine of antitrust standing reflects prudential concerns and is designed to avoid burdening the courts with speculative or remote claims. Antitrust standing is best understood in a general sense as a search for the proper plaintiff to enforce the antitrust laws.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN4[] **Clayton Act, Claims**

A private plaintiff may bring a federal antitrust action through Section Four of the Clayton Act, 15 U.S.C.S. § 15(a), which creates a private right of action for any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor, and shall recover threefold the damages by him sustained. To recover treble damages under § 4 of the Clayton Act, a plaintiff must establish both that it has antitrust standing and that the defendant violated the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN5[] **Standing, Clayton Act**

To determine whether a plaintiff has antitrust standing, courts in the Eleventh Circuit employ a two-prong test. Under this test, a plaintiff must establish that (1) it has suffered an antitrust injury and (2) it is an efficient enforcer of the antitrust laws. Under the second prong to determine whether the plaintiff is an efficient enforcer, courts consider the following factors: (1) the directness or indirectness of the asserted injury; (2) the remoteness of the injury; (3) whether other potential plaintiffs were better suited to vindicate the harm; (4) whether the damages were highly speculative; (5) the extent which the apportionment of damages was highly complex and would risk duplicative recoveries; and (6) whether the plaintiff would be able to efficiently and effectively enforce the judgment.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN6[] **Standing, Requirements**

Whether a plaintiff has antitrust standing under the two-prong injury and efficient enforcer test also involves consideration of causation, i.e., the nexus between the antitrust violation and the plaintiff's harm, as well as an assessment of whether the harm alleged is of the type for which Congress provides a remedy. Plainly relevant to a determination of whether a plaintiff suffered antitrust injury is the issue of preparedness to enter the market. (Thus, if plaintiff is deemed unprepared it has failed to establish one of the prerequisites of a private cause of action under the ***antitrust law***—a causal relationship between the antitrust violation alleged and the injury sustained) (cleaned up), (discussing preparedness requirement and explaining that in order to meet the second prong, the plaintiff must prove the existence of a competitor willing and able to enter the relevant market, but for the exclusionary conduct of the incumbent monopolist).

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN7[] **Private Actions, Sherman Act**

On the issue of preparedness, the Eleventh Circuit has explained that, in cases where a plaintiff seeks to recover for an antitrust injury that allegedly arises from the frustrated expansion of one's business into a new market, there are significant requirements for establishing an entitlement to recovery, Specifically, a plaintiff must demonstrate (1) an intention to enter the business and (2) a showing of preparedness to enter the business.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN8[] **Standing, Requirements**

While an antitrust plaintiff must establish intention and preparedness, it need not have an actual going business to establish private antitrust injury. Indeed, a defendant cannot benefit by the application of the standing doctrine from the fact that it is able to prevent the plaintiff from becoming a consumer of its product. As long as the plaintiff made a reasonable attempt to enter the market, Eleventh Circuit case law recognizes that the plaintiff has standing to contest antitrust violations which create barriers to that market. In the case of nascent competitors, the preparedness requirement allows courts to balance important concerns. A plaintiff who never entered a particular market but would have if not for an antitrust violation can undoubtedly challenge an antitrust violation in court. On the other hand, an overly permissive standing doctrine would allow mere bystanders who lack particularized injury to benefit from another party's antitrust violation.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN9[] **Standing, Requirements**

In evaluating whether an antitrust plaintiff has shown that it is prepared to enter the business, courts have considered: (1) the ability of the plaintiff to finance the business and to purchase the necessary facilities and equipment; (2) the consummation of contracts by the plaintiff; (3) affirmative action by the plaintiff to enter the business; and (4) the background and experience of the plaintiff in the prospective business.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN10[] **Standing, Requirements**

The degree to which a business must take affirmative steps is mitigated by the impact of the antitrust violation, which the court assumes to have occurred when analyzing standing. Thus, nascent competitors need not pay a courtroom entrance fee in the form of an expenditure of substantial resources in a clearly futile competitive gesture.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN11[] **Sherman Act, Claims**

Section 1 of the Sherman Act prohibits every contract, combination in the form of a trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states. 15 U.S.C.S. § 1. The phrase "restraint of trade" is best read to mean undue restraint. Accordingly, § 1 is understood to outlaw only unreasonable restraints.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN12[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Under 15 U.S.C.S. § 1, a small group of restraints are unreasonable per se because they always or almost always tend to restrict competition and decrease output. Restraints that are not unreasonable per se are judged under the rule of reason. The rule of reason requires courts to conduct a fact-specific assessment of market power and market structure to assess the restraint's actual effect on competition. In making this fact-specific assessment, the goal is to distinguish between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN13[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

To determine whether a restraint violates the rule of reason under 15 U.S.C.S. § 1, courts conduct a three-step, burden-shifting analysis. The plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market. If a plaintiff makes this showing, the burden shifts to the defendant to establish a procompetitive rationale for the restraint. If the defendant makes this showing, the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN14[] **Sherman Act, Claims**

On the first step in the analysis of whether a restraint violates the rule of reason under 15 U.S.C.S. § 1, in alleging the anticompetitive effect of the defendant's conduct, an antitrust plaintiff must show harm to competition rather than to competitors. In other words, the anticompetitive effects are measured by their impact on the market rather than by their impact on competitors. The purpose of the Sherman Act is not to protect businesses from the working of the market; it is to protect the public from the failure of the market. The law directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly tends to destroy competition itself. It does so not out of solicitude for private concerns but out of concern for the public interest.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN15[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

To show an anticompetitive effect on the market, a plaintiff may either prove that the defendants' behavior had an actual detrimental effect on competition, or that the behavior had the potential for genuine adverse effects on competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN16[] **Attempts to Monopolize, Elements**

A plaintiff can show anticompetitive effects on the market by direct evidence, such as reduced output, increased prices, or decreased quality in the relevant market, or through indirect evidence, for example, proof of market power plus some evidence that the challenged restraint harms competition.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN17[] **Relevant Market, Geographic Market Definition**

In bringing claims under 15 U.S.C.S. § 1, a plaintiff must define both (1) a geographic market and (2) a production market. Although the parameters of a given market are questions of fact antitrust plaintiffs still must present enough information in their complaint to plausibly suggest the contours of the relevant geographic and product markets.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN18[] **Relevant Market, Product Market Definition**

Defining a relevant product market is primarily a process of describing those groups of producers which, because of the similarity of their products, have the ability—actual or potential—to take significant amounts of business away from each other.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN19[] **Relevant Market, Geographic Market Definition**

A product market consists of products that have reasonable interchangeability for the purposes for which they are produced. A relevant product market can exist as a distinct subset of a larger product market. However, if customers view the products as substitutes, the products are part of the same market. Defining the relevant submarket is a fact-intensive endeavor, and courts consider a variety of factors, including industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. In light of this fact-intensive endeavor, a dismissal of an antitrust claim for failure to adequately plead the relevant market can be problematic.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN20[] Relevant Market, Product Market Definition

In antitrust cases, defining the relevant market is a highly fact-intensive endeavor, and the proper market definition can sometimes be determined only after a factual inquiry into the commercial realities faced by consumers.

Business & Corporate Law > ... > Management Duties & Liabilities > Causes of Action > Tortious Interference With Business Relations

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > ... > Contracts > Intentional Interference > Elements

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN21[] Causes of Action, Tortious Interference With Business Relations

To state a claim for tortious interference with contract or business relations, a plaintiff must show: (1) improper action or wrongful conduct by the defendant without privilege; (2) that the defendant acted purposely and with malice with the intent to injure; (3) that the defendant induced a breach of contractual obligations or caused a party or third parties to discontinue or fail to enter into an anticipated business relationship with the plaintiff; and (4) the defendant's tortious conduct proximately caused damage to the plaintiff.

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > ... > Contracts > Intentional Interference > Elements

HN22[] Intentional Interference, Elements

Under the first element for a tortious interference claim, acting without privilege means that the defendant was an intermeddler or stranger to the business relationship at issue. A defendant is not a stranger to the contract just because it is not a party to the contract. For example, where the alleged intermeddler is the agent for one of the parties and the meddling acts were done within the scope of agency duties, the agent is not a stranger to the contract. Third-party beneficiaries, whether intended or not, are not strangers to the contract.

Torts > ... > Contracts > Intentional Interference > Defenses

HN23[] Intentional Interference, Defenses

Where a defendant is an essential entity to another contract, he cannot be liable for tortious interference.

Contracts Law > Third Parties > Beneficiaries > Claims & Enforcement

Torts > ... > Contracts > Intentional Interference > Defenses

Contracts Law > ... > Beneficiaries > Types of Third Party Beneficiaries > Incidental Beneficiaries

Contracts Law > ... > Beneficiaries > Types of Third Party Beneficiaries > Intended Beneficiaries

HN24[] **Beneficiaries, Claims & Enforcement**

To qualify as an unintended third-party beneficiary, who cannot be sued for tortious interference, an individual or entity must have a legitimate and direct economic interest in the contract at issue. Put another way, if an entity does not have a legitimate and direct economic interest, it can be sued, absent other barriers. Further, a defendant does not become an unintended third-party beneficiary of a contract simply because he might receive some incidental benefit from performance of the agreement. Likewise, a fact pattern involving multiple contracts with related entities does not necessarily mean that those contracts are interwoven such that any involved party is immune from liability for tortious interference.

Torts > ... > Contracts > Intentional Interference > Defenses

HN25[] **Intentional Interference, Defenses**

Georgia Courts have acknowledged that tortious interference claims can be brought against competitors who are not otherwise deprived of stranger status for some other reason.

Opinion

[*1337] **ORDER**

The story alleged in this antitrust case is one of David and Goliath. Plaintiff Lucasys Inc. **[**3]** ("Lucasys"), an up-and-coming, eager-to-innovate competitor, alleges that Defendant PowerPlan, Inc. ("PowerPlan") violated antitrust laws when it used its monopoly power in a primary software market to harm potential competitors and competition in a secondary, dependent consulting market with the aim of precluding those competitors from entering the primary market and competing with PowerPlan. As alleged, when PowerPlan learns of competitors (like Lucasys) seeking to step out of the secondary market into the primary software one, it squashes that competition by *inter alia* reaching out to customers and leveraging its monopoly power to coerce customers to stop working with the competitor (such as Lucasys). According to Lucasys, these anticompetitive actions (1) ensure that no nascent competitor will ever be able to grow to compete with PowerPlan in the primary software market and (2) harm consumers in all markets by stifling innovation, depriving consumers of their choice of product or service provider, reducing the output of current or prospective technology and software products, and increasing prices.

Defendant PowerPlan moves to dismiss Lucasys' antitrust claims and tortious interference **[**4]** claims under state law. [Doc. 18.] Because the Complaint's allegations are sufficient at this stage to support the asserted antitrust violations and state law tortious interference claims, PowerPlan's Motion is **DENIED**.

I. Background

The Parties, Industry, and Markets

Defendant PowerPlan is the leading provider of utility management software for investor-owned rate-regulated utilities around the country. (Compl. ¶ 6.) Plaintiff Lucasys is a small start-up tax consulting and software development company that provides data consulting and deferred tax solutions to rate-regulated utilities. (*Id.* ¶ 5.)

In 1994, PowerPlan developed software specially built for the industry of rate-regulated utilities that allows utilities to store, access, analyze, and compute their data in connection with industry-specific operational, accounting, regulatory, and tax needs. (*Id.* ¶¶ 7, 11.) PowerPlan's software is a single centralized database with different "modules" and "suites" that perform different functions, for example, related to computing income tax or property tax, or assisting with lease accounting or "rate case management." (*Id.* ¶¶ 9, 10.) The software is industry-specific in that much of these functions **[**5]** revolve around certain fixed assets unique to the industry of rate-regulated utilities. (*Id.* ¶ 7.)

After PowerPlan created this software in 1994, utility after utility bought in. By the late 2000s, PowerPlan had acquired its only competitor and was thus the only company offering a full suite of utility management software. (*Id.* ¶ 11.) Today, 99 percent of utilities use PowerPlan's software—indeed, large utilities *must* use PowerPlan's software because of the scale and complexity of their data. (*Id.* ¶ 12.)

According to the Complaint, PowerPlan, sitting atop this throne of monopoly power in the Utility Management Software Market ("Utility Software Market"), stopped innovating or updating its software to meet customers' needs. (*Id.* ¶ 13.) One alleged significant problem with PowerPlan's **[*1338]** software is that it is built on an outdated coding language. (*Id.* ¶ 14.) For this reason, the customer utilities' data, housed in the PowerPlan software, cannot simply be exported to make calculations elsewhere. (*Id.* ¶ 23.) And because there are no alternative products, customers are forced to continue to purchase the PowerPlan software. (*Id.*) Moreover, the Utility Software Market has high barriers to entry **[**6]** in that it would require both significant capital and ongoing access to consumer data (which is housed in PowerPlan's software). (*Id.* ¶¶ 106, 69.) Customers also face extremely high switching costs because their data is locked into PowerPlan software and any change would involve significant implementation costs, disruptions/risks to business and accounting processes, employee retraining, audit concerns, and regulatory concerns and risks. (*Id.* ¶ 70.)

Over time, utility customers discovered that PowerPlan's software was not able to meet their needs and therefore began hiring consultants to fill the gaps by writing custom code extensions, providing data-consulting services, integrating their PowerPlan data with other applications to accomplish tasks the PowerPlan software could not, and other band-aid solutions. (*Id.* ¶ 15.) By the early 2010s, a market for these supplemental services existed; now, utilities typically pay hundreds of thousands or even millions of dollars every 3-5 years for these supplemental services. (*Id.* ¶¶ 16-17.) Currently, there are about ten companies competing in this Supplemental Management Service Market ("Supplemental Market"), including Lucasys and PowerPlan. **[**7]** (*Id.* ¶ 79.) As alleged, PowerPlan is largely content with the *status quo* of the Supplemental Market, even though it lacks a monopoly in this market, because (1) PowerPlan takes in additional revenue by providing services in this secondary market and (2) the availability of this market reduces pressure to invest substantial money into updating its obsolete utility management software. (*Id.* ¶ 18.)

Lucasys also alleges, in addition or in the alternative, a third "separate or sub-market" specifically related to "deferred tax solutions" for utilities (the "Deferred Tax Market"). (*Id.* ¶ 81.) Lucasys alleges that this is a market for consulting services and technology solutions to assist utility customers with cleansing and remediating their data to allow them to calculate tax positions associated with changes in the tax code at scale. (*Id.*) Only three firms compete in this sub-market—Lucasys, PowerPlan, and a firm called Regulated Capital Consultants. (*Id.* ¶ 82.) This market/sub-market arose after the passage of a 2017 tax law that reduced the tax rate for utilities. (*Id.* ¶ 21.) Because rate-regulated utilities must share beneficial tax changes with the public ratepayers based on complicated **[**8]** state and federal regulations, often varying by jurisdiction, each utility requires services to evaluate its data in light of the tax changes and the relevant regulatory requirements to determine rates. (*Id.* ¶¶ 22-23.)

Lucasys Enters the Scene

Lucasys was founded in 2018 by three former PowerPlan employees — who left PowerPlan in 2013, 2014, and 2015 and worked elsewhere before founding Lucasys. (*Id.* ¶ 28.) The founders' goal in establishing Lucasys was to provide services and software related to deferred tax as well as long-term software and technology to replace consulting services. (*Id.*) Currently, Lucasys provides both consulting services and technological solutions, and expects to develop Software-As-A-Service ("SAAS") tools to automate certain processes and reduce the need for manual data assessment in both the Supplemental Services Market and the Deferred Tax Market. (*Id.* ¶ 29.) So far, Lucasys has created three technological products: (1) a **[*1339]** cloud-based software for tax computations; (2) a business automation tool to automatically transmit data between sources; and (3) a toolkit with several applications for calculations and data-related tasks. (*Id.* ¶ 30.) Lucasys plans to build **[**9]** on these technological innovations to compete more broadly with PowerPlan in the Utility Software Market and ultimately provide an alternative full-suite product. (*Id.* ¶ 31.)

PowerPlan's Anticompetitive Acts

As alleged, after learning that Lucasys was not only offering consulting services but also software and technological products, PowerPlan sought to eliminate the threat posed by Lucasys' technological innovation. PowerPlan learned about Lucasys when both companies were bidding on a contract with American Electric Power Service Corporation ("AEP"). AEP offered a contract for a company to build a full software suite around taxes—one that would have replaced or expanded upon PowerPlan's existing tax suites. (*Id.* ¶ 35, 53.) When PowerPlan discovered that AEP had awarded the contract to Lucasys, it sought to intimidate both Lucasys and AEP with threatened legal action related to trade secret violations. (*Id.* ¶ 38-42.)

First, PowerPlan sent a demand letter to Lucasys claiming that Lucasys had misappropriated unspecified trade secrets. (*Id.* ¶ 38.) PowerPlan also demanded that Lucasys not only cease-and-desist efforts to design, develop, market, and sell software but also cease-and-desist **[**10]** consulting for all PowerPlan customers *unless* it stopped creating new software. (*Id.* ¶ 41.) Lucasys alleges that these claims were made in bad faith and solely as an attempt to block Lucasys from offering or providing services to utility customers because Lucasys, in developing technological and software tools, is a competitive threat to PowerPlan's monopoly. (*Id.* ¶ 40.) Providing a carrot to accompany the stick, PowerPlan also proposed to Lucasys an allegedly unlawful market-allocation agreement under which PowerPlan would "be open" to Lucasys competing with it for consulting services as long as it discontinued its software development. (*Id.* ¶ 42.)

In addition to contacting Lucasys, PowerPlan also directly contacted AEP, the utility that had awarded the software development contract to Lucasys. In letters send to AEP, PowerPlan stated that

> It is PowerPlan's understanding that Lucasys has been developing software **that directly competes with our software**, and recently started marketing and **seeking to sell that software to our customer base**. As I am sure you can understand, to protect our trade secrets and other intellectual property, we cannot permit Lucasys to have access to our confidential **[**11]** and proprietary software through our customers **while Lucasys simultaneously develops, markets, and sells the same kind of software to the same customer base in direct competition with us**. This creates an intolerable risk for us—and you—that Lucasys may continue or begin to misuse or misappropriate our confidential information and trade secrets and unfairly use them to develop, market, and sell its competing software.

(Doc. 18-3, December 2019 Letter; *see also*, Compl. ¶ 54) (emphasis added.) Later, PowerPlan sent a second letter to AEP, reiterating that

> Lucasys offers ... **software solutions that compete with PowerPlan software**. To protect our intellectual property, including trade secrets, we cannot permit our customers to provide Lucasys with access to our proprietary software and associated confidential information while Lucasys is simultaneously developing, marketing, and selling competitive software to those same customers...

[*1340] (Doc. 18-2, July 2020 Letter; Compl. ¶ 54) (emphasis added.) In the Complaint, Lucasys asserts that, not only are these allegations of trade secret violations entirely unfounded, but that neither Lucasys nor any other third party *can* obtain proprietary information **[**12]** simply by accessing customer data through PowerPlan's software (where the data is housed). (Compl. ¶ 54.)[1] As a result of PowerPlan's letters, AEP narrowed the scope of its contract with Lucasys to services only, rather than the development of software products. (*Id.*)

Lucasys alleges that PowerPlan similarly coerced other customers, including Liberty Utilities and NextEra, to terminate its contracts with Lucasys, including one contract that involved the implementation of Lucasys Copilot product, discussed *supra*. (*Id.* ¶¶ 47-51.) Lucasys also asserts that PowerPlan has engaged in similar tactics — asserting baseless trade secrets claims to squelch nascent competition — with other competitors in the past that have threatened its monopoly on software. For example, PowerPlan also sought to restrain Regulated Capital Consultants ("RCC") because PowerPlan saw RCC's custom code editing as a threat. (*Id.* ¶¶ 44, 61.) In addition, the Complaint alleges that PowerPlan directly and/or implicitly threatens to cancel software license agreements or withhold software support from customers who work with Lucasys or other technology-providing competitors. (*Id.* ¶ 56.) According to Plaintiff, PowerPlan intends **[**13]** to send letters to all of its customers telling them not to do business with Lucasys. (*Id.* ¶ 58.)

As alleged, not only has Lucasys lost out on contracts, but it has been blocked from building business relationships with other utilities because of PowerPlan's actions. This foreclosure has inhibited Lucasys' ability to obtain important data reflecting customer's needs, develop that data to accomplish business objectives, and raise revenue—all of which will allow it to create new software to better compete with PowerPlan's. (*Id.* ¶ 60.) Because of the high barriers to entry and high switching costs, the most likely avenue for competition with PowerPlan's software is through the Supplemental Market; however, if any potential software competitor is squashed before it can grow, no company will ever be able to compete with PowerPlan's software monopoly. (*Id.* ¶ 62.)

---

[1] As noted above, the Complaint alleges that some data cannot simply be extracted from the PowerPlan software because the software is so obsolete and uses an old coding language. (Compl. ¶ 23.)

Resultant Harm

According to Lucasys, PowerPlan's anticompetitive action — aimed at perpetuating its monopoly — has harmed competition in the Utility Software Market by (1) precluding any company from entering that market and competing with it and (2) quelling innovation, thereby keeping utility customers "in the technology of the dark **[**14]** ages of the 1990s for their utility management needs." (*Id.* ¶¶ 84, 88, 89.) PowerPlan's conduct has also harmed competition in the Supplemental and Deferred Tax Markets by allegedly (1) reducing choices available to utility customers by blocking any software component in the aftermarket; (2) raising prices in the markets because software components would allow for automation, which is cheaper than continuing to use manual labor; (3) decreasing the quality of products in the markets; and (4) generally reducing outputs in these markets. (*Id.* ¶ 85, 88.)

Asserted Claims

Based on the above allegations, Plaintiff alleges five counts of antitrust violations under *Sections 1* and *2* of the *Sherman Act*, *15 U.S.C §§ 1-2*. Counts I and II are brought under *Section 2* for unlawfully **[*1341]** maintaining a monopoly through negative tying and refusal to supply customers with their own data if they work with Lucasys. Counts III, IV, and V are brought under *Section 1* for unlawful agreements to restrain trade via negative tying, a concerted refusal to deal with Lucasys, and *de facto* exclusive dealing provisions in contracts with utilities. Count VI alleges a violation of the Georgia Fair Business Practices Act. Counts VII and VIII allege claims for tortious interference **[**15]** with contract and business, respectively. Finally, Counts IX and X allege claims of defamation *per se* and defamation.

Lucasys seeks treble damages as to the antitrust claims, actual damages for the state law claims, and permanent injunctive relief.

II. Legal Standard

HN1[] A complaint should be dismissed under *Rule 12(b)(6)* only where it appears that the facts alleged fail to state a "plausible" claim for relief. *Bell Atlantic v. Twombly, 550 U.S. 544, 555-556, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*; *Fed. R. Civ. P. 12(b)(6)*. The plaintiff need only give the defendant fair notice of the plaintiff's claim and the grounds upon which it rests. *See* *Erickson v. Pardus, 551 U.S. 89, 93, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)* (citing *Bell Atlantic v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*); *Fed. R. Civ. P. 8(a)*. In ruling on a motion to dismiss, the court must accept the facts alleged in the complaint as true and construe them in the light most favorable to the plaintiff. *See* *Hill v. White, 321 F.3d 1334, 1335 (11th Cir. 2003)*.

HN2[] A claim is plausible where the plaintiff alleges factual content that "allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. A plaintiff is not required to provide "detailed factual allegations" to survive dismissal, but the "obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555*. The plausibility standard **[**16]** requires that a plaintiff allege sufficient facts "to raise a reasonable expectation that discovery will reveal evidence" that supports the plaintiff's claim. *Id. at 556*. A complaint may survive a motion to dismiss for failure to state a claim even if it is "improbable" that a plaintiff would be able to prove those facts and even if the possibility of recovery is extremely "remote and unlikely." *Id.*

III. Discussion

A. Antitrust Standing Regarding the Utility Software Market

PowerPlan first argues that Lucasys cannot maintain any antitrust claims related to the Utility Software Market because it lacks standing to bring claims based on conduct in this market. (Motion to Dismiss Brief ("Mot."), Doc. 18-1 at 10-13.)

HN3[] "A private plaintiff seeking damages under the antitrust laws must establish standing to sue." *Sunbeam Tel. Corp. v. Nielsen Media Research, Inc., 711 F.3d 1264, 170 (11th Cir. 2013)* (quoting *Fla. Seed. Co., Inc. v. Monsanto Co., 105 F.3d 1372, 1374 (11th Cir. 1997)*). "Antitrust standing requires more than the 'injury in fact' and the 'case or controversy' required by Article III of the Constitution." *Fla. Seed Co., 105 F.3d at 1374* (citing *Todorov v. DHC Healthcare Auth., 921 F.2d 1438, 1448 (11th Cir. 1991)*). "The doctrine of antitrust standing reflects prudential concerns and is designed to avoid burdening the courts with speculative or remote claims." *Sunbeam, 711 F.3d at 1270* (citing *Associated Gen. Contractors of Cal., Inc. v. **[*1342]** Cal. State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*). "Antitrust standing is best understood in a general sense as a search for the proper plaintiff to enforce the **[**17]** antitrust laws." *Todorov, 921 F.2d at 1448*.

HN4[] A private plaintiff may bring a federal antitrust action through Section Four of the Clayton Act, *15 U.S.C. § 15(a)*, which creates a private right of action for "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor ..., and shall recover threefold the damages by him sustained." *Sunbeam, 711 F.3d at 1270* (citing *15 U.S.C. § 15(a)*); *see also, Palmyra Park Hosp. Inc. v. Phoebe Putney Memorial Hosp., 604 F.3d 1291, 1298 (11th Cir. 2010)*. To recover treble damages under *§ 4* of the Clayton Act, a plaintiff must establish both that it has antitrust standing and that the defendant violated the antitrust laws. *Sunbeam, 711 F.3d at 1271* (citing *Levine v. Cen. Fl. Med. Affiliates, 72 F.3d 1538, 1545 (11th Cir. 1996)*).

HN5[] To determine whether a plaintiff has antitrust standing, courts in the Eleventh Circuit employ a two-prong test. *Sunbeam, 711 F.3d at 1271*; *Palmyra Park Hosp., 604 F.3d at 1299*. Under this test, a plaintiff must establish that (1) it has suffered an antitrust injury and (2) it is an "efficient enforcer" of the antitrust laws. *Sunbeam, 711 F.3d at 1271*; *Palmyra Park Hosp., 604 F.3d at 1299* ("We employ a two-prong test for antitrust standing under *§ 4* of the Clayton Act: first, the plaintiff must have alleged an antitrust injury; and second, the plaintiff must be an efficient enforcer of the antitrust laws."); *Florida Seed Co., 105 F.3d at 1374*. Under the second prong to determine whether the plaintiff is an "efficient enforcer," courts consider the following factors:

> (1) the directness or indirectness of the asserted **[**18]** injury; (2) the remoteness of the injury; (3) whether other potential plaintiffs were better suited to vindicate the harm; (4) whether the damages were highly speculative; (5) the extent which the apportionment of damages was highly complex and would risk duplicative recoveries; and (6) whether the plaintiff would be able to efficiently and effectively enforce the judgment.

Sunbeam, 711 F.3d at 1271 (citing *Associated Gen. Contractors, 103 S.Ct. at 908-912*; *Todorov, 921 F.2d at 1451-52*.)

HN6[] Whether a plaintiff has antitrust standing under the two-prong test also involves consideration of causation, *i.e.*, the nexus between the antitrust violation and the plaintiff's harm, as well as an assessment of whether the harm alleged is of the type for which Congress provides a remedy. *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 110 n.5, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*; *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* ("Plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful."). "[P]lainly relevant to a determination of whether" a plaintiff suffered antitrust injury is the issue of preparedness to enter the market. *Cable Holdings of Ga., Inc. v. Home Video, Inc., 825 F.2d 1559, 1651 (11th Cir. 1987)* ("Thus, if [plaintiff] is deemed unprepared it has failed to establish one of the prerequisites of a private cause of action under the ***antitrust law***—a causal relationship between the antitrust **[**19]** violation alleged and the injury sustained") (cleaned up); *see also, Sunbeam, 711 F.3d at 1272-73* (discussing preparedness requirement and explaining that "in order to meet the second prong, the plaintiff must prove the existence of a competitor willing and able to enter the relevant market, but for the **[*1343]** exclusionary conduct of the incumbent monopolist").

HN7[] On this issue of preparedness, the Eleventh Circuit has explained that, in cases where a plaintiff "seeks to recover for an antitrust injury that allegedly arises from the frustrated expansion of one's business into a new market, there are significant requirements for establishing an entitlement to recovery," Cable Holdings, 825 F.2d at 1562. Specifically, a plaintiff must demonstrate "(1) an intention to enter the business and (2) a showing of preparedness to enter the business." *Id.* (citing Hayes v. Solomon, 597 F.2d 958, 973 (5th Cir. 1979), *cert. denied*, *444 U.S. 1078 (1980)*[2]; Heatransfer Copr. v. Volkswagenwerk, A.G., 553 F.2d 964, 988 n.20 (5th Cir. 1977), *cert. denied*, *434 U.S. 1087 (1978)*; Midwestern Waffles, Inc. v. Waffle House, Inc., 734 F.2d 705, 723 (11th Cir. 1984)); *see also,* Sanger Ins. Agency v. HUB Intern., Ltd., 802 F.3d 732, 738 (5th Cir. 2013). Absent a showing of both intention and preparedness to enter the business, "it cannot fairly be concluded that the antitrust violation was the cause of the failure to expand." Cable Holdings, 825 F.2d at 1562; *see also,* Gas Utilities Co. of Ala. v. S. Nat. Gas Co., 996 F.2d 282, 283 (11th Cir. 1993) ("The law clearly requires a showing of an intention and preparedness to enter the business to give a plaintiff a cause of action for being foreclosed from the market."). **[**20]**

HN8[] While an antitrust plaintiff must establish intention and preparedness, it "need not have an actual going business to establish private antitrust injury." Hayes, 597 F.2d at 973. ("Recovery can be had for a wrongfully frustrated attempt to enter a business."); Thompson v. Metropolitan Multi-List, Inc., 934 F.2d 1566, 1572 (11th Cir. 1991) ("Our circuit has recognized, in a related context, that an attempt to enter a market coupled with a showing of preparedness is sufficient to establish an injury in fact, which is one of the bases of standing.") Indeed,

> a defendant cannot benefit by the application of the standing doctrine from the fact that it is able to prevent the plaintiff from becoming a consumer of its product. As long as the plaintiff made a reasonable attempt to enter the market, our Circuit's case law recognizes that the plaintiff has standing to contest antitrust violations which create barriers to that market.

Thompson, 934 F.2d at 1572 (assessing preparedness where plaintiff sought to become consumer, rather than competitor, in monopolized market). In the case of "nascent competitors," the preparedness requirement allows courts to balance important concerns:

> [o]n the one hand, a plaintiff who never entered a particular market but would have if not for an antitrust violation can undoubtedly **[**21]** challenge an antitrust violation in court. In fact, such firms may become prime targets for antitrust violations, because "early exclusion may be far cheaper than ruining or disciplining a recent entrant who has become established." Areeda & Hovencamp, ***ANTITRUST LAW***, ¶ 349a, at 258 (4th ed. 2014). Too restrictive a view of standing would immunize incumbents from antitrust scrutiny when they only aim their efforts at new entrants (who may pose the primary threat to monopolists). On the other hand, an overly permissive standing doctrine would allow mere bystanders who lack particularized injury **[*1344]** to benefit from another party's antitrust violation.

Sanger, supra, 802 F.3d at 737.

HN9[] In evaluating whether an antitrust plaintiff has shown that it is prepared to enter the business, courts have considered: (1) the ability of the plaintiff to finance the business and to purchase the necessary facilities and equipment; (2) the consummation of contracts by the plaintiff; (3) affirmative action by the plaintiff to enter the business; and (4) the background and experience of the plaintiff in the prospective business. Hayes, 597 F.2d at 973 (citing Martin v. Phillips Petroleum Co., 365 F.2d 629, 633-34 (5th Cir. 1966)).

In the present case, PowerPlan argues that Lucasys fails to plead that it was prepared to enter the Utility **[**22]** Management Software Market, primarily because Lucasys does not allege that it has a substitute software product to sell in this market. (Mot. at 12) ("In the absence of a concrete product to sell in the alleged UMS Market, Lucasys is fundamentally unprepared to enter the market, and lacks standing to assert its monopolization claims in the UMS Market.")

Countering, Plaintiff Lucasys points out that PlowerPlan cites no authority holding, *or even suggesting*, that an antitrust plaintiff must have a complete substitute product to have antitrust standing. (Pl. Resp. at 10) (also citing

---

[2] In *Bonner v. City of Prichard*, 661 F.2d 1206, 1209 (11th Cir. 1981) (*en banc*), the Eleventh Circuit adopted as binding precedent all decisions of the former Fifth Circuit handed down prior to October 1, 1981.

Thompson, 934 F.2d at 1572) ("As long as the plaintiff made a reasonable attempt to enter the market, our Circuit's case law recognizes that the plaintiff has standing to contest antitrust violations which create barriers to that market); Martin, 365 F.2d at 633 ("There are numerous decisions stating that one need not have an actual going business to obtain standing, but an attempt to enter a business is sufficient.")). Further, Plaintiff Lucasys relies on the antitrust principle that "[i]mperfect substitutes create competitive pressures within markets," and that Lucasys' nascent software substitutes inspired PowerPlan's attempts to squish the threat of **[**23]** any entity seeking to compete in the software arena. (Pl. Resp. at 12-13) (citing Phillip E. Areeda (late) & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶ 756b6 (4th ed. 2020 Cum. Supp. 2013-2019) ("[T]he availability of the imperfect substitute tends to put a ceiling on the monopolist's price.")

In its Complaint, Lucasys acknowledges that it has "not yet developed a software product that could be fully substituted for PowerPlan's Utility Management Software." (Compl. ¶ 43.) However, Lucasys has taken affirmative action in developing various types of software and technology that "fills in gaps" where PowerPlan's software is deficient (*id.*). For example, Lucasys has developed cloud-based software that "makes deferred tax computations based on the 2018 federal tax changes as applied to a customer's data"—a task that PowerPlan's PowerTax software cannot accomplish. (*Id.* ¶ 30a.) Lucasys has also developed a business process automation tool called Copilot that allows customers to configure steps between different data sources which, because it is automated, will save hundreds of thousands of dollars a year since it does not rely on the performance **[**24]** of manual tasks. (*Id.* ¶ 30b.) Further, Lucasys has developed a toolkit that contains applications that allow a customer utility to calculate lease payments, conduct audit computations, and complete other data-related tasks in an automated way. (*Id.* ¶ 30c.)

Lucasys alleges that, absent PowerPlan's anticompetitive conduct, it will be able to begin competing more broadly with PowerPlan in the Utility Software Market, build more software solutions, and eventually create a replacement for PowerPlan's overall utility management software suite. **[*1345]** (*Id.* ¶ 31.) As a plan for expansion, Lucasys asserts that it has and will continue to create new software in the context of specific contracts with individual customers (utilities), earn revenue from those contracts, use that revenue to further develop the software solutions, and then deploy those solutions more broadly in the Utility Software Market. (*Id.* ¶¶ 32, 60.)[3]

As an example, Lucasys cites a situation in which a utility, American Electric Power Service Corporation ("AEP"), sought proposals for technological development and consulting services for a full software suite around deferred taxes that would have replaced and expanded upon **[**25]** PowerTax, one of PowerPlan's existing software suites. (*Id.* ¶¶ 35, 36.) Both PowerPlan and Lucasys submitted bids and AEP ultimately awarded the contract to Lucasys. (*Id.* ¶¶ 36, 53.) After learning that Lucasys was developing its own software and thus entering the software development market, PowerPlan coerced AEP to cancel its contract with Lucasys, citing trade secrets concerns. Specifically, as discussed above, PowerPlan sent AEP a demand letter, stating *inter alia* that

> To protect our intellectual property, including trade secrets, we cannot permit our customers to provide Lucasys with access to our proprietary software and associated confidential information **while Lucasys is simultaneously developing, marketing, and selling competitive software to those same customers**.

(July 17, 2020 Letter to AEP, Doc. 18-2) (emphasis added.) Of note, Lucasys alleges that it cannot obtain any proprietary information simply by accessing customer data through PowerPlan software. (Compl. ¶ 54.)[4] Ultimately,

---

[3] Lucasys further alleges that software competition "in the Supplemental Management Services Market is the most likely route for a potential competitor in the Utility Management Software market to achieve sufficient scale to threaten PowerPlan's monopoly. Thus, Powerplan's *modus operandi* of allowing consulting competition in the Supplemental Management Services market but thwarting through anticompetitive conduct all software competition in that market, effectively protects its monopoly" in the Utility Software Market. (Compl. ¶ 62.)

[4] Also relevant, as noted in the above Factual Background, Lucasys alleges that PowerPlan's software that houses customers' data is based on an outdated coding language and therefore customer data cannot simply be exported to make calculations elsewhere. (Compl. ¶ 23.) Lucasys alleges that it needs access to its customers' data in order to design and develop solutions to meet customers' needs and also to provide consulting services. (*Id.* ¶ 60.)

AEP, citing legal concerns, narrowed the scope of its contract with Lucasys so that the agreement was for the provision of *services only*, not the development of new tax software, which would have **[**26]** competed with PowerPlan's tax suites. (*Id.*)

The Complaint also alleges that Lucasys' founders have backgrounds and experience in the relevant market, specifically stating that: Lucasys was founded in 2018 by three employees who previously worked for PowerPlan but left in 2013, 2014 and 2015; each founder worked for other employers (after PowerPlan) where they obtained additional experience in software development, business consulting, and tax advising; and Lucasys provides subject matter expertise to utility customers to help with data issues. (Compl. ¶ 27.) Currently, Lucasys is actively competing in the Supplemental Services Market, providing consulting services to utilities in need of services to supplement the alleged deficiencies of PowerPlan's software. (*Id.* ¶¶ 79, 47, 50.) Lucasys is also one of three companies currently competing in the Deferred Tax Market. (*Id.* ¶ 82.)

[*1346] Accordingly, the allegations in the Complaint establish that: Lucasys' founders had the background and experience necessary to compete in the Utility Software Market; Lucasys had already taken affirmative steps to enter the market by developing relevant software and tools; Lucasys had consummated at least one **[**27]** contract with AEP for the development of additional software to compete with or replace PowerPlan's current tax suites and another contract with Liberty Utilities to implement its Copilot technology; and Lucasys had a plan to finance its continued development of new technology and expansion—therefore meeting all of the preparedness factors. *Hayes, 597 F.2d at 973*; *Martin, 365 F.2d at 633-34*.

In *Sanger, supra, 802 F.3d 732 (5th Cir. 2013)*, the plaintiff company (Sanger) was attempting to enter the market of selling/brokering veterinary professional liability insurance but was blocked by the defendant company, which had a near monopoly in the market. *Id. at 734-35*. In particular, Sanger argued that, upon learning of its plans to enter the market, the defendant monopoly reached out to underwriters (The Hartford, Travelers, Zurich) and to veterinary associations considering endorsing Sanger, and sought to influence those actors not to work with Sanger. *Id. at 736*. There, the defendant company made the same argument that PowerPlan makes here—that the plaintiff was not prepared to enter the market. In finding that Sanger had standing (at the summary judgment stage), the Fifth Circuit explained that Sanger had taken affirmative steps, including marketing its services to members of the Texas Equine Veterinary **[**28]** Association; setting up an office and staff; conducting discussions internally with veterinarians, insurance companies, brokers, and consultants; and even making some minor sales before it was blocked. *Id. at 739-40*.

The Fifth Circuit further explained that "*[t]he degree to which a business must take affirmative steps is mitigated by the impact of the antitrust violation*, which we assume to have occurred when analyzing standing. ***HN10***[] Thus, nascent competitors need not 'pay a courtroom entrance fee in the form of an expenditure of substantial resources in a clearly futile competitive gesture.'" *Id.* (citing *Fleer Corp. v. Topps Chewing Gum, Inc., 415 F.Supp. 176, 180 (E.D. Pa. 1976)* (emphasis added)). Thus, the *Sanger* Court found it "critical" that the obstacles to full entry flowed from the alleged anticompetitive conduct itself rather than unrelated reasons. *Id. at 740*. ("Without access to insurers, and to the rates and coverage options offered by those insurers, it would have been futile to take those steps.")

Here, the same reasoning applies. Lucasys took affirmative steps to enter the software market by creating three technological products (including cloud-based software), marketing and selling their products to consumers, and winning contract bids to develop more software. More than in **[**29]** *Sanger*, even, Lucasys' founders had significant experience in the business. Critically, like in *Sanger*, Lucasys' inability to grow was a direct result of PowerPlan's anticompetitive actions, which the Court assumes to be true for purposes of a standing analysis. *See Sanger, 802 F.3d at 738* (citing *Gas Util. Co. of Ala., 996 F.2d at 283 (11th Cir. 1993)*). Absent PowerPlan's actions, Lucasys would have retained the contract with AEP to develop new software, would have implemented its Copilot technology into NextEra's systems, and would have had access to the customers, their data, and additional revenue, all necessary to expand their technological operations. *Sanger, 802 F.3d at 740* ("Absent the exclusive dealing arrangement that Sanger contends prevented it from brokering policies, a factfinder could **[*1347]** conclude that Sanger was prepared to enter at least the Texas market").

Considering the allegations in the Complaint and in light of the authority above, the Court concludes that Lucasys has sufficiently pled that it was prepared to enter the Utility Software Market absent PowerPlan's anticompetitive conduct. *Sanger, 802 F.3d at 740*; *Hayes, 597 F.2d at 973*; *Martin, 365 F.2d at 633-34*; *Thompson, 934 F.2d at 1572*.[5] Accordingly, the portion of PowerPlan's motion to dismiss for lack of preparedness and standing is **DENIED**.

B. Injury to Competition in the Supplemental Market and Deferred Tax Market

In **[**30]** its second argument for dismissal, PowerPlan contends that Lucasys fails to allege plausible injury *to competition* in the Supplemental and Deferred Tax Markets, as opposed to just injury *to Lucasys*. (Mot. at 14-19.) As a result, PowerPlan seeks dismissal of Counts III, IV, and V for failure to allege harm to competition in these markets. (*Id.* at 19.)[6]

Counts III, IV, and V assert claims under *Section One* of the Sherman Act. In particular, Count III alleges that PowerPlan engaged in "negative tying," when it conditioned customers' purchases of its main utility management software on an agreement not to purchase/use products in the Supplemental and Deferred Tax Markets that are provided by PowerPlan's perceived competitors. (Compl. ¶ 114.) In Count IV, Lucasys alleges a "refusal to deal" claim, asserting that PowerPlan coerced customers — such as AEP, NextEra, and Liberty Utilities — into agreeing not to do business with Lucasys. (*Id.* ¶ 120.) In Count V, Lucasys alleges that PowerPlan engaged in *de facto* exclusive dealing by preventing customers from releasing their own data to third-party vendors, like Lucasys, without PowerPlan's permission. (*Id.* ¶ 126.)[7]

"*Section 1* ***HN11***[] of the Sherman Act prohibits '[e]very contract, **[**31]** combination in the form of a trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states." *Ohio v. American Express Co., 138 S.Ct. 2274, 2283, 201 L. Ed. 2d 678 (2018)* (citing *15 U.S.C. § 1*). The phrase "restraint of trade" is best read to mean "undue restraint." *Id.* Accordingly, *§ 1* is understood to outlaw only unreasonable restraints. *Id.*

HN12[] Under *§ 1*, "[a] small group of restraints are unreasonable *per se* because they always or almost always tend to restrict competition and decrease output." *Id. at 2283* (cleaned up); *see also, Spanish Broadcasting Sys. of Fla., Inc. v. Clean Channel Communications, Inc., 376 F.3d 1065, 1069 (11th Cir. 2004)* (noting that "some restraints on trade remain illegal *per se*, such as certain agreements to fix prices . . ."). "Restraints that are not unreasonable **[*1348]** *per se* are judged under the 'rule of reason.'" *American Express Co., 138 S.Ct. at 2284*. "The rule of reason requires courts to conduct a *fact-specific* assessment of 'market power and market structure ... to assess the [restraint]'s actual effect' on competition." *Id.* (citing *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*) (emphasis added); *see also, Spanish Broadcasting, 376 F.3d at 1071* (explaining that most Section One claims that assert a prohibited contract that unlawfully restrains trade require the factfinder to "decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, **[**32]** its conditions before and after the restraint was imposed, and the restraint's history, nature, and effect.") (citing *State Oil v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*).

---

[5] The Court notes that all of PowerPlan's cited cases, in which courts found a lack of preparedness, were before the court on summary judgment. PowerPlan's dearth of authority arising at the motion to dismiss stage only reinforces the Court's finding at this juncture.

[6] In its Motion to Dismiss, PowerPlan argues that Lucasys fails to allege injury to competition in the Deferred Tax Market in Section 3 of its brief. (Mot. at 22.) As reasoned *infra*, however, the Court finds that Plaintiff has adequately pled the contours of the Deferred Tax Market and therefore addresses issues of whether Plaintiff has sufficiently pled harm to competition in both markets together.

[7] PowerPlan does not argue that Lucasys fails to allege harm to competition in the Utility Software Market or argue for dismissal of Counts I and II on that basis. Counts I and II assert *§ 2* violations for unlawful maintenance of a monopoly. Accordingly, the Court does not assess those claims here or the issue of harm to competition in the Utility Software Market.

In making this fact-specific assessment, "[t]he goal is to 'distinguis[h] between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest.'" *American Express Co., 138 S.Ct. at 2284* (quoting *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*).

HN13[] To determine whether a restraint violates the rule of reason under *§ 1*, courts conduct a three-step, burden-shifting analysis. *Id.* The plaintiff "has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market." *Id.* If a plaintiff makes this showing, the burden shifts to the defendant to establish a procompetitive rationale for the restraint. *Id.* If the defendant makes this showing, "the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means." *Id.*

HN14[] On the first step, "[i]n alleging the anticompetitive effect of the defendant's conduct, an antitrust plaintiff must show harm to competition rather than to competitors." *Spanish Broadcasting, 376 F.3d at 1071* (citation omitted). In other words, **[**33]** the anticompetitive effects "are measured by their impact on the market rather than by their impact on competitors." *Id; see also, Nat'l Collegiate Athletic Assoc. v. Alston, 141 S.Ct. 2141, 2159 (2021)* ("The 'statutory policy' of the Act is one of competition and it 'precludes inquiry into the question of whether competition is good or bad.'"). It is well-recognized that

> The purpose of the [Sherman] Act is not to protect businesses from the working of the market; it is to protect the public from the failure of the market. The law directs itself not against conduct which is competitive, even severely so, but against conduct which unfairly tends to destroy competition itself. It does so not out of solicitude for private concerns but out of concern for the public interest.

Spanish Broadcasting, 376 F.3d at 1069.

HN15[] To show this anticompetitive effect on the market, a plaintiff "may either prove that the defendants' behavior had an actual detrimental effect on competition, or that the behavior *had the potential* for genuine adverse effects on competition." *Id. at 1072*. (citing *Levine, 72 F.3d at 1551*) (emphasis added).

HN16[] A plaintiff can show anticompetitive effects on the market by direct evidence, "such as reduced output, increased prices, or decreased quality in the relevant market," *American Express Co., 138 S.Ct. at 2284*, or through indirect evidence, for example, "proof **[**34]** of market power plus **[*1349]** some evidence that the challenged restraint harms competition." *Id.; McWane, Inc. v. F.T.C., 783 F.3d 814, 827, 835 (11th Cir. 2015)* (explaining that exclusive dealing arrangements can harm competition by allowing a defendant to "increase prices, restrict output, reduce quality, slow innovation, or otherwise harm consumers" and also noting examples of "indirect evidence" including "the degree of rivals' exclusion, the duration of the exclusive deals, and the existence of alternative channels of distribution"); *Impax Laboratories, Inc. v. F.T.C., 994 F.3d 484, 492 (5th Cir. 2021)* ("Anticompetitive effects are those that harm consumers. Think increased prices, decreased output, or lower quality goods. Eliminating potential competition is, by definition, anticompetitive."); *1-800 Contacts, Inc. v. F.T.C., 1 F.4th 102, 118 (2d Cir. 2021)* (noting that anticompetitive harm may include "evidence of retarded innovation, or other manifestations of harm to consumer welfare") (internal citation omitted).

In the present case, PowerPlan argues that the Complaint does not allege plausible injury to competition in the Supplemental Market because it only alleges injury to Lucasys and any other allegations of harm to the Supplemental Market are "pure speculation." (Mot. at 14-19.)

In connection with harm to competition in the Supplemental and Deferred Tax Markets, the Complaint **[**35]** alleges that PowerPlan's anticompetitive conduct harms competition in these markets by:

- depriving utility customers of a choice in obtaining necessary services (*id.* ¶ 85);
- motivating customers to hire PowerPlan for supplemental services to avoid the risk that the customer's chosen service provider will be denied access to the customer's data (*id.*);

• imposing a Hobson's Choice on customers that excludes competitors and reduces output of new products and services, which in turn raises prices for customers (*id.*);

• coercing customers to terminate or reduce the scope of contracts with their chosen providers and are thus forcing them to accept lower quality services (*id.* ¶ 86);

• threatening customers to obtain fewer solutions from Lucasys and others, which decreases output (*id.* ¶ 87);

• reducing choices available to customers because it blocks Lucasys or others from establishing a software/technological component to that Supplemental Market (*id.* ¶ 88);

• raising prices because allowing a technological or software component in the Supplemental Market (like Lucasys' Copilot program) would be cheaper than consulting labor (*id.*);

• decreasing the quality of products and services in the Supplemental **[**36]** Market because innovative software or automation tools would improve performance (*id.*);

• generally reducing quality by keeping "utility customers in the technological dark ages" by squelching competitive innovation (*id.*);

• raising operating costs and reducing efficiency in the Supplemental and Deferred Tax Markets, which gets passed on to end-consumer ratepayers (*id.* ¶ 89).

In addition, Lucasys has supported these allegations with specific incidents. For example, Lucasys alleges that PowerPlan's actions limited output when PowerPlan coerced AEP into cancelling its contract with Lucasys to create new software and again when PowerPlan blocked NextEra's **[*1350]** implementation of Lucasys' innovative Copilot product. (Compl. ¶¶ 47, 54.) Without PowerPlan's intervention, new technology would have been available to customers seeking supplemental services. Relatedly, Lucasys alleges that Liberty Utilities has expressed concerns that, because of PowerPlan's interference, it was deprived of its choice of the most efficient, cost-effective provider in the market. (*Id.* ¶ 51.) On top of this, Lucasys alleges that PowerPlan engaged in similar tactics with other competitors, for example by similarly threatening **[**37]** Regulated Capital Consultants ("RCC") with "baseless trade secret misappropriation claims" because it perceived RCC's custom code editing and extension coding service as a threat. (*Id.* ¶ 44.) Further, Lucasys alleges that PowerPlan similarly threatened another individual consultant named Doug Johnson. (*Id.*)

At this early stage, Lucasys' allegations of harm to competition in the Supplemental and Deferred Tax Markets in the form of reduced output, decreased product quality, stymied innovation, and raised prices — which are supported by specific examples — sufficiently allege anticompetitive effects in these markets. *American Express Co., 138 S.Ct. at 2284*; *See also, Lifewatch Servs. Inc. v. Highmark Inc., 902 F.3d 323, 341 (3d Cir. 2018)* (finding allegations adequate to allege harm to competition where defendant denied coverage for specific cardiac monitor supplied by plaintiff company where denial of coverage allegedly resulted in reduced quality of cardiac monitors, reduced output of more effective devices, and hindered research, development, and innovation in the market).[8]

---

[8] *See also Restore Robotics, LLC v. Intuitive Surgical, Inc., 2019 U.S. Dist. LEXIS 228084, 2019 WL 8063989, at *4 (N.D. Fla. Sept. 16, 2019)* (finding that plaintiff adequately alleged injury to competition where it alleged that tying and exclusive dealing arrangements harmed competition in the aftermarkets in general even though plaintiff was still able to "compete some" with defendant's anticompetitive conduct); *CollegeNet, Inc. v. Common Application, Inc., 355 F. Supp. 3d 926, 950 (D. Or. 2018)* (finding that plaintiff had adequately plead anticompetitive effect where, as a result of allegedly unlawful tying of products, members were coerced into agreeing not to purchase higher-quality, more innovative, or lower-priced college application processing services from rival); *Epic Games, Inc. v. Apple Inc., 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *101 (N.D. Cal. Sept. 10, 2021)* (finding that plaintiff had shown anticompetitive harm to competition by showing that Apple precluded developers from opening competing game stores, which would have increased competition and reduced prices and even improved innovation) .

Additionally, Lucasys' allegations that PowerPlan's anticompetitive conduct harmed competition by depriving customers of choice, and thereby prevented them from accessing lower-cost, higher-quality options, sufficiently **[**38]** assert harm to competition. *See* *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 528, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* ("Coercive activity that prevents its victims from making free choices between market alternatives is inherently destructive of competitive conditions . . ."); *Ross v. Bank of America, 524 F.3d 217, 223 (2d Cir. 2008)* (recognizing that one form of antitrust injury is coercive activity that prevents its victims from making free choices between market alternatives); *Glen Holly Entertainment, Inc. v. Tektronix Inc., 343 F.2d 1000, 1011 (9th Cir. 2003)* (same); *Procaps S.A. v. Patheon Inc., 141 F.Supp.3d 1246, 1275-76 (S.D. Fla. 2015)* (addressing relevant authority and acknowledging that "loss of choice can be evidence of actual adverse effects of the challenged restraint if the necessary impact on the market is demonstrated"); *In the Matter of McWane, Inc., A Corp., & Star Pipe Prod., Ltd. A. Ltd. P'ship.*, 2014-1 Trade Cas. (CCH) ¶ 78670 (MSNET Jan. **[*1351]** 30, 2014) ("McWane's exclusive dealing policy also had another adverse impact on competition: it denied its customers the ability to make meaningful choice regarding domestic fittings suppliers that the evidence shows many of them sought"), *aff'd sub. nom.* *McWane, Inc. v. F.T.C., 783 F.3d 814, 838 (11th Cir. 2015)*.

Most troubling, perhaps, are the allegations of anticompetitive effects of stymied innovation of software products and technological tools, such as Copilot, to be used in the Supplemental Market. "[A] dominant firm's restraints on the innovations of others goes to the **[**39]** heart of antitrust policy . . ." Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶ 704d (4th ed. 2015) at 234. In the context of monopolistic restraints on innovation,

> The rationales for the monopolist's position are clear enough. Innovation is capable of producing significant, unexpected, market-shifting social gains. Many monopolists enjoy their positions as a result of dramatic innovations. However, once a monopolist has acquired its position, its attitude towards innovation can become quite different. Its investment in its own technology has been made, and just as it may have dislodged older rivals from their position by innovating, so too it fears dislodgement by the nascent technology of newer or potential rivals . . . .
>
> Restraints on innovation are very likely even more harmful than traditional price cartels, which we usually consider to be the most harmful anticompetitive practice. Innovation restraints are almost certainly more harmful than a great many of the exclusionary practices that antitrust has condemned . . .

(*Id.* at 234-35.). *See also, United States v. Microsoft Corp., 253 F.3d 34, 77-78, 346 U.S. App. D.C. 330 (D.C. Cir. 2001) cert. denied, 534 U.S. 952 (2001)* (finding that Microsoft engaged in anticompetitive behavior, **[**40]** albeit under *§ 2*, when it *inter alia* threatened to stop distributing Intel products bundled with Windows products unless Intel stopped aiding other firms (Sun and Netscape) from developing Java technology that would threaten Microsoft's monopoly in operating system market).

In light of these allegations, PowerPlan's heavy reliance on *Spanish Broadcasting* is misplaced. In that case, the plaintiff did not describe how defendant's conduct could harm competition, admitted that consumer prices were *lower* than they might be absent the defendant's activities, and even alleged that it had considerably expanded its share of the market over the past few years. *376 F.3d at 1074*. Moreover, unlike the plaintiffs in *Spanish Broadcasting* who alleged only the *possibility* of limited output, Lucasys has alleged that PowerPlan's actions did in fact limit output, for example, when it coerced AEP into cancelling a contract to create new software and blocked NextEra's implementation of Lucasys' existing Copilot product. (Compl. ¶¶ 47, 54.)

PowerPlan also cites *Spanish Broadcasting* for the proposition that damage to a single competitor is rarely sufficient to establish competitive harm. But what the *Spanish Broadcasting* Court said is that "damage to a critical competitor may also damage competition in general" **[**41]** where the plaintiff "draw[s] that implication with specific factual allegations." *376 F.3d at 1072-73* (citing *Full Draw Productions v. Easton Sports, Inc., 182 F.3d 745 (10th Cir. 1999)* (discussing reduction in exhibition space at archery trade shows following elimination of sole competitor); *Caribbean Broadcasting System, Ltd. v. Cable & Wireless PLC, 148 F.3d 1080, 331 U.S. App. D.C. 226 (D.C. Cir. 1998)* (discussing allegations that defendants' monopoly on radio advertising caused consumers to pay higher prices)).

[*1352] At this juncture, Lucasys has argued that damage to it — PowerPlan's only competitor that offered software solutions in the Supplemental Market — was damage to competition in general because the blocking of new products hampered innovation, reduced output, deprived consumers of the choice of a software component in the aftermarket, and ultimately raised prices. Thus, Lucasys has supported its contention that harm to it was harm to the Supplemental and Deferred Tax Market "with specific factual allegations." *Spanish Broadcasting, 376 F.3d at 1072-73*. *See* *In the Matter of McWane, supra, 2014-1 Trade Cas. (CCH) ¶ 78670* ("[T]he evidence that McWane's exclusive dealing policy significantly impaired the access of McWane's only rival, Star, to the main channel of distribution, thereby increasing its costs and keeping it below the critical level necessary to pose a real competitive threat, is plainly sufficient to meet the standard of harm to competition set forth in the prevailing case **[**42]** law"). Further, the Court notes that Lucasys alleges that PowerPlan engaged in similar anticompetitive conduct against at least one other firm (RCC), whose custom code editing PowerPlan perceived as a threat.

Under the circumstances here, Lucasys has adequately alleged anticompetitive effect and harm to competition in the Supplemental and Deferred Tax Markets.

C. The Deferred Tax Market

PowerPlan argues that Lucasys cannot state any claims based on the Deferred Tax Market because Lucasys' market definition is insufficient as a matter of law. (Mot. at 19.) Specifically, PowerPlan asserts that Lucasys has not pled facts concerning how the public views the submarket, the extent to which there are distinct customers, distinct prices, sensitivity to price change, or the number of customers in the submarket. (*Id.* at 21.)

Lucasys contends that it has adequately alleged the contours of the Deferred Tax Market and explained why the market it alleges is relevant and economically significant, in light of the "minimal burden required" to define markets at the motion to dismiss stage. (Pl. Resp. at 16-17.)

HN17[] In bringing claims under *Section One*, a plaintiff must define both (1) a geographic market and (2) a production **[**43]** market. *Jacobs v. Tempur-Pedic Intern., Inc., 626 F.3d 1327, 1336 (11th Cir. 2010)*. "Although the parameters of a given market are questions of fact . . . antitrust plaintiffs still must present enough information in their complaint to plausibly suggest the contours of the relevant geographic and product markets." *Id.*

Here, Lucasys has alleged that the relevant geographic market is the United States. (Compl. ¶ 83.) In pleading the relevant product market for the Deferred Tax Market, Lucasys alleges

> 81. In addition, or alternatively, there is a separate or sub-market within the Supplemental Management Services Market for deferred tax solutions for utilities (the "Deferred Tax Solutions Market"). This market comprises consulting services to assist investor-owned rate-regulated utilities with cleansing and remediating their data and implementing systems that allow them to calculate tax positions associated with changes in the tax code at scale.
>
> 82. Only three firms are capable of providing these specialized services: PowerPlan, Regulated Capital Consultants, and Lucasys.

(Compl. ¶¶ 81-82)

HN18[] "Defining a relevant product market is primarily a process of describing those groups of producers which, because of the similarity of their products, have the ability—actual or **[**44]** potential—to take significant **[*1353]** amounts of business away from each other." *Duty Free Americas, Inc. v. Estee Lauder Co., Inc., 797 F.3d 1248, 1263 (11th Cir. 2015)* (*Polypore Int'l, Inc. v. F.T.C., 686 F.3d 1208, 1217 (11th Cir. 2012)*); *American Express, 138 S.Ct. at 2285* ("[T]he relevant market is defined as 'the area of effective competition.'").

HN19[] "A product market consists of products that have reasonable interchangeability for the purposes for which they are produced." *Estee Lauder, 97 F.3d at 1263* (citing *McWane, Inc. v. F.T.C., 783 F.3d 814, 828 (11th Cir. 2015)* (cleaned up)). "A relevant product market can exist as a distinct subset of a larger product market." *Jacobs, 626 F.3d at 1337*. However, "if customers view the products as substitutes, the products are part of the same market." *Id.* (citing *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1435 (9th Cir. 1995)*).

"Defining the relevant submarket is a fact-intensive endeavor," and courts consider a variety of factors, including "industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Estee Lauder Co., Inc., 797 F.3d at 1263* (citing *Polypore Int'l, 686 F.3d at 1217*). In light of this "fact-intensive" endeavor, a "dismissal of an antitrust claim for failure to adequately plead the relevant market can be problematic." *E.I. du Pont de Nemours and Co. v. Kolon Industries, Inc., 637 F.3d 435, 443 (4th Cir. 2011)* ("Because market definition is a deeply fact-intensive inquiry, courts hesitate to grant motions to dismiss for failure to plead a relevant product market.") **[**45]** (citing *Todd v. Exxon Corp., 275 F.3d 19, 199-200 (2d Cir. 2001)* (Sotomayor, J.)).

In *Jacobs, supra*, the Eleventh Circuit affirmed the district court's dismissal of the plaintiff's antitrust suit because "the complaint's allegations of the relevant product market [were] legally insufficient." *626 F.3d 1327, 1338 (11th Cir. 2010)*. In that case, the plaintiff alleged that the relevant product market was for "visco-elastic foam mattresses" which he alleged was a separate and distinct market from mattresses generally. *Id.* In explaining why the allegation was insufficient, the Eleventh Circuit noted that

> The complaint provides no factual allegations of the cross-elasticity of demand or other indications of price sensitivity that would indicate whether consumers treat visco-elastic foam mattresses differently than they do mattresses in general. Consumer preferences for visco-elastic foam mattresses versus traditional innerspring mattresses, and the costs associated with their sale, may vary widely, may vary little, or may not vary at all. Jacobs's complaint, however, gives no indication of which of these is the case. The allegations that visco-elastic foam mattresses are more expensive than traditional innerspring mattresses and that visco-elastic foam mattresses have "unique attributes" are **[**46]** similarly of little help. They do not indicate the degree to which consumers prefer visco-elastic foam mattresses to traditional mattresses because of these unique attributes and differences in price . . . . Are visco-elastic foam mattresses put to different uses (as luxury goods, such as in fine hotels and within higher income brackets) than are traditional mattresses? These types of questions, which our precedent makes clear are crucial to understanding whether a separate market exists, go unanswered in the complaint.

Id. at 1338. (further acknowledging that the plaintiff did not have a chance to undertake discovery but nevertheless had an obligation under *Twombly* to indicate that he *could* provide evidence plausibly suggesting **[*1354]** the definition of the alleged submarket).

PowerPlan relies heavily on *Jacobs* and Lucasys distinguishes it. As Lucasys points out, the plaintiff in *Jacobs* attempted to plead an artificially narrow market — visco-elastic mattresses instead of all mattresses — because, with a broader market, he likely could not establish that Tempur-Pedic had sufficient "market power." *Id. at 1340*. In addition, the visco-elastic mattresses, a product rather than a service, had obvious substitutes—other mattresses.

Here, **[**47]** Lucasys' Complaint alleges that the Deferred Tax Market includes services and products that are separate and distinct from the Supplemental Market, specifically services/products that allow utilities to configure their data to implement and assess new regulatory requirements resulting from 2017 and 2018 changes in the tax code. (Compl. ¶¶ 21-23.) Most importantly, Lucasys alleges that only three firms are capable of providing these specialized services at scale. (*Id.* ¶ 82.) Taking as true this allegation that only three potential suppliers are "capable of providing" deferred tax services, and making all reasonable inferences in Plaintiff's favor, it follows that the other seven consulting firms that provide services in the Supplemental Market are *not* capable of providing these services and therefore *do not* have the ability "to take significant amounts of [deferred tax consulting] business away from" the three providers of deferred tax services—Lucasys, PowerPlan, and RCC. *Estee Lauder Co., Inc., 797 F.3d at 1263*. Based on these allegations, it is plausible that the "peculiar characteristics," distinct services, and "specialized vendors" of the Deferred Tax Market support that it could be a "separate economic entity" from **[**48]** the Supplemental Market. *Id., 797 F.3d at 1263*.

In so finding, the Court places significant emphasis on the posture in which this issue arises. ***HN20***[] As the above authority demonstrates, defining the relevant market is a highly "fact-intensive endeavor," *Estee Lauder Co., Inc., 797 F.3d at 1263*, and the proper market definition can sometimes "be determined only after a factual inquiry into the 'commercial realities' faced by consumers." *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. The Court is also mindful that the Federal Rules allow a plaintiff to plead alternative theories of recovery, *Fed. R. Civ. P. 8(a)(3)*, which Plaintiff appears to have intentionally done with respect to its market definition. For these reasons, Plaintiff has adequately alleged a separate Deferred Tax Market. Of course, any challenge to Plaintiff's market definitions will be subject to significantly more stringent review as the case proceeds and Plaintiff will be required to provide evidence demonstrating *why* the seven other consulting firms that operate in the Supplemental Market are not capable of providing deferred tax services, that consumers see the Deferred Tax Market as separate from the Supplemental Market, and/or that it is priced differently, *etc.*[9]

D. Tortious Interference Claims

In addition to federal antitrust claims, Lucasys **[**49]** asserts a host of state law claims against PowerPlan. PowerPlan moves to dismiss only the tortious interference with contract and business claims (Counts VII and VIII) as precluded by the "stranger **[*1355]** doctrine." (Mot. at 23-25.) Responding, Lucasys argues that PowerPlan is not an essential party or third-party beneficiary to any of Lucasys' contracts with the utilities; rather, PowerPlan is a stranger to these agreements, and thus the "stranger doctrine" is no bar to Plaintiff's claims. (Pl. Resp. at 19-23.)

HN21[] To state a claim for tortious interference with contract or business relations, a plaintiff must show: (1) improper action or wrongful conduct by the defendant without privilege; (2) that the defendant acted purposely and with malice with the intent to injure; (3) that the defendant induced a breach of contractual obligations or caused a party or third parties to discontinue or fail to enter into an anticipated business relationship with the plaintiff; and (4) the defendant's tortious conduct proximately caused damage to the plaintiff. *Tribeca Homes, LLC v. Marathon Inv. Corp., 322 Ga. App. 596, 745 S.E.2d 806, 808-09 (Ga. Ct. App. 2013)*.

HN22[] Under the first element, acting "without privilege" means that "the defendant was an intermeddler or 'stranger' to the business relationship at issue." **[**50]** *ASC Constr. Equip. USA, Inc. v. City Commercial Real Estate, Inc., 303 Ga. App. 309, 693 S.E.2d 559, 564 (Ga. Ct. App. 2010)*; *see also, Cox v. City of Atlanta, 266 Ga. App. 329, 596 S.E.2d 785 (Ga. Ct. App. 2004)*. In *Atlanta Market Center Mgmt., Co. v. McLane, 269 Ga. 604, 503 S.E.2d 278, 282 (Ga. 1998)*, the Georgia Supreme Court outlined the contours of who falls into the "stranger" category (*i.e.*, those who can be sued for tortious interference) and detailed how that category of individuals or entities has narrowed over time.

A defendant "is not a stranger to the contract just because [it] is not a party to the contract . . ." *McLane, 503 S.E.2d at 282*. For example, where the alleged intermeddler is the agent for one of the parties and the meddling acts were done within the scope of agency duties, the agent is not a stranger to the contract. *Id.* (citing *Jet Air v. Nat. Union Fire Ins. Co., 189 Ga. App. 399, 375 S.E.2d 873 (Ga. Ct. App. 1988)* (where intermeddler was the underwriter for party insurance company); *Hyre v. Denise, 449 S.E.2d 120 (Ga. Ct. App. 1994)* (where intermeddler was attorney acting on behalf of party client); *Nexus Services v. Manning Tronics, 201 Ga. App. 255, 410 S.E.2d 810 (Ga. Ct. App. 1991)* (where intermeddler was corporate president of one of contracting parties)). Third-party beneficiaries, whether intended or not, are not strangers to the contract. *Id.*

The "shadow of liability was further diminished" when the Georgia Court of Appeals "reasoned that 'all parties to a comprehensive interwoven set of contracts which provided for the financing, construction, and transfer of ownership' were not strangers." *Id.* (quoting *Jefferson-Pilot Comm. Co. v. Phoenix City Broadcasting, 205 Ga. App. 57, 421 S.E.2d 295 (Ga. Ct. App. 1992)* (where purchaser of radio station was not stranger to contractual relations **[**51]** between radio station's seller and seller's lenders)). ***HN23***[] Further, where a defendant is an "essential entity" to another contract, he cannot be liable for tortious interference. *Id.* (citing *Renden v. Liberty Real*

[9] PowerPlan also argued that Lucasys failed to adequately allege harm to the Deferred Tax Market. (Mot. at 21-22.) But, as detailed in Section B., *supra*, Plaintiff has adequately pled injury to competition in this market based on allegations similar to the ones related to the Supplemental Market.

Estate, 213 Ga. App. 333, 444 S.E.2d 814 (Ga. Ct. App. 1994) (where the lessor was an "essential entity" to the subletting space by its tenants since the tenant's right to sublease was set forth in the lessor's lease)). The McLane Court embraced this over-time reduction of the "number of entities against which a claim of tortious interference can be maintained." *Id.*

HN24[] Even so, strangers still exist. To qualify as an unintended third-party beneficiary, who cannot be sued for tortious interference, an individual or entity must have a *legitimate* and *direct* economic interest in the contract at issue. Howerton v. Harbin Clinic, LLC, 333 Ga. App. 191, **[*1356]** 776 S.E.2d 288, 295 (Ga. Ct. App. 2015); Mabra v. SF, Inc., 316 Ga. App. 62, 728 S.E.2d 737 (Ga. Ct. App. 2012). Put another way, if an entity does not have a legitimate and direct economic interest, it can be sued, absent other barriers. Further, a defendant does not become an unintended third-party beneficiary of a contract simply because he might receive some incidental benefit from performance of the agreement. Howerton, 776 S.E.2d at 295.

Likewise, a fact pattern involving multiple contracts with related entities does not necessarily mean that those contracts are "interwoven" such that any involved party **[**52]** is immune from liability for tortious interference. *See* id. at 296 (where plaintiff had contract with hospital, hospital had contract with clinic, and clinic had contract with defendant, the three agreements were not "a comprehensive interwoven set of contracts" because they involved separate subject matter and each addressed issues that were separate and independent of the subjects of the other two). In assessing the relatedness of the contracts, the Howerton Court emphasized that the defendant failed to show that he had a "direct economic interest" in the plaintiff's contract that was the subject of the tortious interference allegations. *Id.*

Here, Lucasys alleges that PowerPlan acted with malice to sabotage Lucasys' contracts with various customers including NexEra, Liberty Utilities, AEP, and another unnamed customer. (Compl. ¶¶ 47-55.) As alleged, PowerPlan threatened these customers with litigation and also directly or implicitly threatened to cancel software licensing agreements if the customers continued to work with Lucasys. (*Id.* ¶ 56.) As a result, two of four of Lucasys' major utilities customers terminated their relationships with Lucasys, one reduced the scope of Lucasys contract, and one **[**53]** "remains at risk." (*Id.* ¶ 57.) Besides cancelled contracts, Lucasys has also lost out on future opportunities with other customers, which harms its ability to innovate new technology and to grow. (*Id.* ¶¶ 59-62.) The Complaint does not allege that PowerPlan was a party to any of Lucasys contracts or any facts to support that PowerPlan was an unintended beneficiary of Lucasys' contracts.

Like in Howerton, PowerPlan has identified no *direct* interest in Lucasys' contracts or business relationships with the utility customers. 776 S.E.2d at 296. That PowerPlan also has a contract with AEP to provide utility management software does not mean it had an interest in a wholly *separate* agreement between AEP and Lucasys for separate services. Howerton, 776 S.E.2d at 296. Indeed, based on the allegations in the Complaint, PowerPlan's primary interest in Lucasys' contracts or prospective business agreements with utilities was that of a competitor.[10] **HN25**[] **[*1357]** Georgia Courts have acknowledged that tortious interference claims can be brought against competitors who are not otherwise deprived of stranger status for some other reason. *See* Parks v. Multimedia Techs., Inc., 239 Ga. App. 282, 520 S.E.2d 517, 526-27 (Ga. Ct. App. 1999) (holding that competitor

---

[10] Without using this explicit language, PowerPlan argues that it had an interest in Lucasys' relationships because, under its separate contracts with customers, it has the power to protect its interest in PowerPlan confidential information. (Reply at 14-15.) But, taking the allegations in the Complaint as true at this stage, "neither Lucasys not any other customer or third party can obtain proprietary information simply by accessing customer data through PowerPlan's software." (Compl. ¶ 54.) PowerPlan's assertions of trade secret concerns were, according to the Complaint, baseless and concocted, (*id.*), and thus not *direct* or *legitimate*. For this reason, PowerPlan's reliance on CAE Inc. v. Gulfstream Aero. Corp., 2017 U.S. Dist. LEXIS 124573, at *20-23 (D. Del. Aug. 2, 2017), an unreported case cited in its reply brief, is misplaced. There, the contract at issue involved a third party's *agreement to provide* plaintiff with defendant's data. 2017 U.S. Dist. LEXIS 124573, [WL] at *3-6. Here, Lucasys' contract with AEP (or others) was not for the provision of PowerPlan's data, *i.e.*, PowerPlan's data was not the direct subject of any agreement. Instead, Lucasys' agreement with AEP was for separate services that involved accessing customer data which *indirectly* involved access to PowerPlan software (but not in a manner that would allow a third party to obtain proprietary information, *see* Compl. ¶ 54).

was indisputably a stranger to the contracts and business relationship); *Tom's Amusement Co. v. Total Vending Servs., 243 Ga. App. 294, 533 S.E.2d 413, 417 (Ga. Ct. App. 2000)* (physical precedent only) (noting **[**54]** that, even though employee, acting as agent for employer, was not stranger and thus "cannot be held liable" under a claim of tortious interference, "the competitor and its agents who assist in the interference can").

In light of PowerPlan's failure to identify a direct interest in Lucasys' contract with AEP (or other utilities), its cited authority is inapposite. In *Atlanta Fiberglass USA, LLC v. KPI, Co., 911 F. Supp. 2d 1247 (N.D. Ga. 2012)*, the plaintiff (Atlanta Fiberglass) and defendant (KPI) were part of a single supply chain agreement in which KPI agreed to manufacture products exclusively for the Atlanta Fiberglass, and Atlanta Fiberglass agreed to assist its customers in developing products to be exclusively manufactured by KPI. *Id. at 1256-57*. KPI allegedly reached out to customers, attempting to cut out the middleman (Atlanta Fiberglass). *Id.* Atlanta Fiberglass alleged that, in reaching out directly to customers, KPI (the manufacturer) both violated its contract with Atlanta Fiberglass and also tortiously interfered with the Atlanta Fiberglass's contracts with its customers. *Id.* The court found that KPI was not a stranger to the plaintiff's contracts with its customers because the contracts were interwoven, **[**55]** as evidenced by the allegation that KPI's breach of its contract with plaintiff prevented the plaintiff from fulfilling its contracts with customers. *Id. at 1257*. In that scenario, the contracts were multiple links in single supply chains, and the agreements were dependent on one another. KPI, as the exclusive manufacturer of the customers' products had a *legitimate* and *direct* interest in Atlanta Fiberglass's contracts with the customers—indeed, it was a *direct third-party beneficiary* to these contracts.

That is not the situation presently before the Court. As noted, PowerPlan has provided no direct and legitimate interest in Lucasys' contracts with AEP and other customers. Rather, Lucasys' contracts were for independent and separate services that required nothing of PowerPlan. Most importantly, PowerPlan was not a direct third-party beneficiary of Lucasys's contracts, unlike in *Atlanta Fiberglass*. Moreover, as Plaintiff points out, if PowerPlan's theory were correct — that because PowerPlan has contracts with customers for utility management software it therefore has an interest in *any* contract that its customers enter into that involves the monopoly software product — then PowerPlan would *never* be a stranger **[**56]** to the contracts its customers had with any supplemental service provider. The Court rejects this invitation to grant PowerPlan immunity to tortiously interfere with any potential competitors in a market in which it has an alleged monopoly.

Under the circumstances and based on the allegations in the Complaint, PowerPlan has not identified any facts or authority to support the conclusion that it had a direct and legitimate interest in Lucasys' contracts and business relationships with the various utilities/customers. PowerPlan's request for dismissal of the tortious interference claims is therefore **DENIED**.

[*1358] IV. Conclusion

At this stage, Lucasys has adequately alleged facts to support that: it was prepared to enter the Utility Software Market; PowerPlan's actions harmed competition in all three markets; and the Deferred Tax Market is separate and distinct from the Supplemental Market. The Complaint also supports that PowerPlan was a stranger to the contracts/business relationships with which it allegedly interfered.

Accordingly, Defendant's Motion to Dismiss [Doc. 18] is **DENIED**. It appears that the Parties have already exchanged initial disclosures and completed the joint preliminary conference. **[**57]** (*See* Docs. 23, 24, 25, 27.) The Court **ORDERS** that PowerPlan's Answer to the Complaint shall be due within 14 days of the date of this Order and discovery shall commence on that same date. The Parties are **DIRECTED** to submit a proposed joint case management scheduling order within 20 days of the date of this Order.

IT IS SO ORDERED this 30th day of September 2021.

/s/ Amy Totenberg

Honorable Amy Totenberg

Penney, Garrett **[*7]** D Blanchfield, Jr., PRO HAC VICE, Reinhardt Wendorf & Blanchfield, St. Paul, MN; Charles Robert Watkins, Guin Stokes & Evans, LLC, Chicago, IL.

Judges: Honorable Edmond E. Chang, United States District Judge. Magistrate Judge David E. Weisman.

Opinion by: Edmond E. Chang

Opinion

MEMORANDUM OPINION AND ORDER

Ten separate proposed antitrust class actions against Fair Isaac Company (FICO) are pending before this Court: *Sky Federal Credit Union vs. Fair Isaac Corporation*, 20-cv-02114; *First Choice Federal Credit Union vs. Fair Isaac Corporation*, 20-cv-02516; *Amalgamated Bank vs. Fair Isaac Corporation*, 20-cv-02533; *Alcoa Community Federal Union vs. Fair Isaac Corporation*, 20-cv-02559; *Getten Credit Company vs. Fair Isaac Corporation*, 20-cv-02651; *Kenmore NY Teachers Federal Credit Union vs. Fair Isaac Corporation*, 20-cv-02755; *City of Boston Credit Union vs. Fair Isaac Corporation*, 20-cv-03315; *Holmes County Bank and Trust Company vs. Fair Isaac Corporation*, 20-cv-03395; *Garner Properties & Management vs. Fair Isaac Corporation*, 20-cv-04575; and *Alternative Finance, Inc. et al vs. Fair Isaac Corporation*, 20-cv-03204. Having accepted reassignment of these actions, R. 48, the parties have presented various proposals on **[*8]** how best to consolidate the cases under *Federal Rule of Civil Procedure 42(a)*, and whom to appoint as interim class counsel under *Rule 23*. All ten related actions allege that FICO engaged in monopolistic behavior that caused the Plaintiffs to overpay for FICO credit scores, in violation of the

Sherman Act, *15 U.S.C. §§ 1* & *2*, and various state laws.[1] But the various Plaintiffs' attorneys wish to proceed on different legal theories of recovery for a subset of Plaintiffs and class members. This has led them to disagree over how the cases should be consolidated. R. 62, Alternative Finance Br.; R. 65, Sky Fed. Br.[2]

For the reasons discussed in this Opinion, the Court grants the motion filed by Sky Federal Credit Union, which has the support of the Plaintiffs in eight of the ten related cases (20-cv-02114, 20-cv-02516, 20-cv-02533, 20-cv-02559, 20-cv-02651, 20-cv-02755, 20-cv-03315, and 20-cv-03395). R. 64, Sky Fed. Mot. The competing motion filed by Alternative Finance and Brookfield Management is denied. R. 61, Alternative Finance Mot. Scott+Scott Attorneys at Law LLP (the firm for Sky Federal Credit Union) is appointed as Interim Class Counsel representing the direct-purchaser plaintiffs as defined by them, **[*9]** with MoloLamken LLP acting as liaison counsel. Cohen Mil-stein Sellers & Toll PLLC is appointed to represent the indirect-purchaser plaintiffs as defined by Scott+Scott.

I. Background

All ten related cases allege that FICO overcharged for credit scores. A credit score is a three-digit number that is supposed to convey the creditworthiness of a consumer, based on his or her credit history. R. 1, Compl. ¶ 1. Consumers can buy their own credit scores to monitor their own creditworthiness—the market for these scores is called the B2C market, short for business-to-consumer. *Id.* But the cases now before the Court are all concerned with the B2B, or business-to-business market, in which businesses buy consumers' credit scores to assess the risk of extending credit or engaging in transactions with those consumers. *Id.* ¶¶ 1-2.[3] FICO has allegedly maintained a 90% monopoly over the B2B credit-score market for many years. *Id.* ¶ 2. According to most of the Plaintiffs, FICO has had help maintaining its monopoly from the three major credit bureaus: TransUnion, Equifax, and Experian. *Id.* ¶ 5.[4] These credit bureaus allegedly acted as FICO's agents and co-conspirators in negotiating sales of credit scores **[*10]** to businesses in all 50 states, all on terms that favor FICO. *Id.*

There will be time enough later to delve into the details of FICO's allegedly monopolistic behavior and alleged conspiracy with the credit bureaus. For purposes of the consolidation motions, what matters are the different types of Plaintiffs in the ten related cases. Although they are all B2B credit-score purchasers, the details of their interactions with FICO differ in important ways.

The first category of Plaintiffs includes entities like Amalgamated Bank, which says it bought FICO scores directly from FICO as well as from credit bureaus. R. 1, 20-cv-2533, Compl. ¶ 14. Amalgamated Bank's complaint seeks to represent a class of B2B FICO-score consumers that includes "[a]ll B2B Purchasers residing in the United States that directly purchased a FICO Score from Fair Isaac ... = during the Class Period." *Id.* ¶ 86. Sky Federal's Complaint proposes the same class. Compl. ¶ 86. The Court will call this category of Plaintiffs that bought credit scores directly from FICO, "FICO-Direct Purchasers."

The second category of Plaintiffs includes Sky Federal and all other entities that allege that they bought credit scores from **[*11]** FICO through agreements with FICO *and the credit bureaus*. Compl. ¶¶ 14, 55-59. The full definition of Sky Federal's proposed class includes this second category of businesses: "All B2B Purchasers residing in the United States that directly purchased a FICO Score from Fair Isaac *and/or a Credit Bureau* during

---

1 The Court has subject matter jurisdiction over Sherman Act and Clayton Act claims under *28 U.S.C. § 1331*, and supplemental jurisdiction over the state law claims under *28 U.S.C. § 1367*.

2 Citations to the record are noted as R. __, followed by the docket number, with a page or paragraph number if applicable. Unless otherwise noted, docket citations are to the docket in *Sky Federal Credit Union vs. Fair Isaac Company*, 1:20-cv-02114.

3 There is no need to review the factual allegations in all ten related cases—the overlap is considerable—but a representative sample will show the different types of claims and theories they present.

4 *See also* R. 1, 20-cv-02516, Compl. ¶ 5; R. 1, 20-cv-02533, Compl ¶ 5; R. 1, 20-cv-02559, Compl. ¶¶ 3-5; R. 1, 20-cv-2561, Compl. ¶¶ 2, 15; R. 1, 20-cv-2755, Compl. ¶¶ 4, 8; R. 1, 20-cv-03315, Compl. ¶¶ 4-7; R. 1, 20-cv-03395, Compl. ¶¶ 4-7.

the Class Period." Comp. ¶ 86 (emphasis added). The Court will call these entities, which bought FICO scores through the credit bureaus, "Credit Bureau Purchasers." Remember that Sky Federal and seven other Plaintiffs allege that the credit bureaus engaged in a conspiracy with FICO that helped maintain FICO's monopoly. *Id.* ¶ 5 (see also, footnote 4).

The third and final group of Plaintiffs includes those that bought FICO scores not from FICO or a credit bureau, but from an intermediary company. This group includes, for example, Brookfield Management Services, a co-plaintiff in *Alternative Finance, Inc. et al v. Fair Isaac Company*, 20-cv-03204. Brookfield Management Services is a property management company that buys FICO scores from a tenant-screening service, which has bought them from the credit bureaus. R. 1, 20-cv-03204, Compl. ¶ 4. Garner Properties & Management, which filed **[*12]** its own related lawsuit, is a similar business. R. 1, 20-cv-04575, Compl. ¶ 6.[5] Alternative Finance seeks to represent a class "consisting of all end-user business-customers that indirectly purchased a FICO Score in the Business Market for credit scores for use and not for resale from January 1, 2006 through the present in a Repealer Jurisdiction." *Alternative Finance* Compl. at 1. (More later on "repealer jurisdictions.") This would include Brookfield, Garner, and any other company that bought a FICO score from a company that is not FICO or a credit bureau. The Court will call these the Indirect Purchasers.

But Alternative Finance believes its class also encompasses the second category of Plaintiffs described above: those who bought FICO scores from one of the three credit bureaus. R. 62, Alternative Finance Brief in Support of Motion to Consolidate, 1-3. According to Alternative Finance, a credit bureau is a direct purchaser of a FICO score, but anyone who buys a credit score from a credit bureau is an indirect purchaser. *Id.* This, of course, contradicts Sky Federal's claim that FICO and the credit bureaus are acting in a conspiracy.

So Sky Federal's counsel and Alternative Finance's **[*13]** counsel have filed separate motions to consolidate the actions in this case, through which they are vying for the right to represent a presumably dominant share of the proposed classes of plaintiffs: the Credit Bureau Purchasers. Sky Federal's counsel, Scott+Scott, wishes to represent "Direct Purchasers," while Alternative Finance's counsel, Cohen Milstein, wishes to represent "Indirect Purchasers" of credit scores. Each side believes the Credit Bureau Purchasers fall in its domain. Neither seems to object to the other firm taking charge of the undisputed plaintiffs on either end of the spectrum (the Indirect Purchasers for Cohen Milstein, and the FICO-Direct Purchasers for Scott+Scott). The questions now before the Court are: in what configuration should the ten related cases be consolidated, and who should take the lead on representing the Credit Bureau Purchasers?

II. Standard of Review

A. *Rule 42(a)*: Consolidation

Federal Rule of Civil Procedure 42(a) grants federal district courts the authority and discretion to consolidate related actions for greater efficiency. The Rule states: "If actions before the court involve a common question of law or fact, the court may: (1) join for hearing or trial any or all matters at issue in the **[*14]** actions; (2) consolidate the actions; or (3) issue any other orders to avoid unnecessary cost or delay." *FED. R. CIV. P. 42(a)*. Courts should consolidate related actions when possible to promote judicial economy, as long as the consolidation does not unduly prejudice any party. *Ikerd v. Lapworth, 435 F.2d 197, 204 (7th Cir.1970)*; *United States v. Knauer, 149 F.2d 519, 520 (7th Cir. 1945)*.

B. *Rule 23(g)*: Class Counsel

---

[5] Garner Properties & Management is the only Plaintiff to take no position on the motions to consolidate filed before the Court. R. 62, Alt. Finance Br. at 2 (FN 2). Garner does not intend to apply for the lead counsel position and supports Cohen Milstein as the lead counsel for indirect-purchaser plaintiffs. *Id.*

In a proposed class action, a federal court may assign interim class counsel even before taking up the motion for class certification. *Fed. R. Civ. P. 23(g)(1)*, *(3)*. In deciding whom to appoint as class counsel, the court must consider the following factors that show counsel's likely competency to handle the case:

> (i) the work counsel has done in identifying or investigating potential claims in the action;
> (ii) counsel's experience in handling class actions, other complex litigation, and the types of claims asserted in the action;
> (iii) counsel's knowledge of the applicable law; and
> (iv) the resources that counsel will commit to representing the class.

Fed. R. Civ. P. 23(g)(1)(A). The Court can also consider any other factors related to "counsel's ability to fairly and adequately represent the interests of the class." *Fed. R. Civ. P. 23(g)(1)(B)*. Among these miscellaneous factors, courts have routinely recognized, over the past decade, the value of a legal team that is diverse across axes of **[*15]** gender, race, and other aspects of identity. *See, e.g., City of Providence, Rhode Island v. AbbVie Inc., 2020 U.S. Dist. LEXIS 189472, 2020 WL 6049139, at *6 (S.D.N.Y. Oct. 13, 2020)*.

III. Analysis

Before examining the consolidation and class-counsel proposals, it makes sense to further explain the significance of categorizing plaintiff classes as indirect or direct purchasers. Plaintiffs who win on violations of federal antitrust laws are entitled to recover treble damages under the Clayton Act. *15 U.S.C. § 15*. But the Supreme Court ruled in the canonical *Illinois Brick* case that only *direct purchasers*— those who purchased goods or services directly from the alleged antitrust-violator at a monopoly price—may recover under federal ***antitrust law***. *Illinois Brick Co. v. Illinois, 431 U.S. 720, 746, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. When a conspiracy is afoot, the first purchaser outside the conspiracy is considered a direct purchaser. *Marion Healthcare, LLC v. Becton Dickinson & Co., 952 F.3d 832, 839 (7th Cir. 2020)*. Indirect purchasers—those who would have to show that the direct purchaser passed on the monopoly pricing to the next purchaser, through every link in the alleged supply chain—are out of luck under this rule. *Illinois Brick, 431 U.S. at 735*.

But the antitrust laws of some states permit indirect purchasers to recover damages, effectively "repealing" *Illinois Brick*'s prohibition for plaintiffs who assert state law claims. The parties to this case call those states "Repealer Jurisdictions." Alternative Finance **[*16]** reports that the Repealer Jurisdictions are Arizona, California, District of Columbia, Florida, Illinois, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin. R. 1, 20-cv-3204, Compl. ¶ 91. This leaves over 20 states and territories in which no indirect purchasers can recover any damages for antitrust violations.

In any antitrust case, an indirect purchaser and a direct purchaser are trying to prove different things, which might or might not put them at odds. The direct purchaser needs to show only that it paid the alleged antitrust-violator monopoly prices. Under *Illinois Brick*, a direct purchaser can recover treble damages for violations of federal ***antitrust law*** *regardless* of whether it passed on the monopoly prices to downstream consumers. *Illinois Brick, 431 U.S. at 746-47*. An indirect purchaser bringing claims under state law in a Repealer Jurisdiction, by contrast, *must* show that the monopoly prices were passed on to it to recover any damages. *Supreme Auto Transp., LLC v. Arcelor Mittal USA, Inc., 902 F.3d 735, 743-44 (7th Cir. 2018)*. But if an indirect purchaser can do that, an important damages multiplier **[*17]** can be the result: indirect purchasers in Repealer Jurisdictions can recover damages under state law even if direct purchasers also recover damages under the Clayton Act, leading to multiple liability for the defendants. *California v. ARC Am. Corp., 490 U.S. 93, 105, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)* ("Ordinarily, state causes of action are not pre-empted solely because they impose liability over and above that authorized by federal law, and no clear purpose of Congress indicates that we should decide otherwise in this case") (cleaned up).[6] Proving passed-on damages is necessary for the indirect purchaser, but unnecessary—though also not inherently harmful—to the direct purchaser.

Categorizing the Credit Bureau Plaintiffs as indirect versus direct purchasers thus has significant consequences for their ability to recover damages through this litigation, as well as for litigation strategy. The Court prefers not to decide at this stage, without thorough adversarial briefing, whether the Credit Bureau Purchasers are indirect or direct purchasers. Scott+Scott, with the support of counsel in eight of the ten cases before the Court, proposes to argue that they are direct purchasers. Sky Fed. Br. Even though Cohen Milstein disagrees with this position, **[*18]** they appear to accept that the argument must at least be permitted to proceed to the motion-to-dismiss stage. R. 77, Alternative Finance Reply at 1. The question for the Court is how best to organize the case to proceed efficiently, without prejudice to the parties.

A. Consolidation

On consideration of the current record and pleadings, the most sensible and efficient path forward is to appoint Scott+Scott as Interim Class Counsel representing the FICO-Direct Purchasers and *exclusively* representing the Credit Bureau Purchasers: this will be the consolidated Direct Purchaser Action. Cohen Milstein is appointed as Interim Class Counsel representing the (undisputed) Indirect Purchasers only. Scott+Scott is prepared to argue that the Credit Bureau Purchasers are direct purchasers by virtue of the alleged conspiracy between FICO and the credit bureaus, and thus entitled to treble damages under the Clayton Act if FICO violated the Sherman Act. Sky Fed. Br. at 5. They have also pleaded claims under various state antitrust and unfair practices statutes. Compl. ¶¶ 148-51. If their Sherman Act claims on behalf of the Credit Bureau Purchasers fail, then they are prepared to argue in the alternative **[*19]** for recovery under state laws. Sky Fed. Br. at 5; R. 73, Sky Fed. Resp. at 7. Cohen Milstein, by contrast, believes that the Credit Bureau Purchasers are indirect purchasers, and thus not entitled to recover treble damages under federal law. Alt. Finance Br. at 2. They would not pursue treble damages under federal law for Credit Bureau Purchasers, which would prejudice those plaintiffs. Again, at this stage the Court is not saying which law firm is right. But the Credit Bureau Purchasers are entitled to be represented by the more aggressive counsel that will pursue all potentially viable claims on their behalf.

The Court appreciates Cohen Milstein's attempt at a compromise proposal in its reply brief, which suggested that both teams of counsel should proceed as representatives of the Credit Bureau Purchasers, pleading and briefing their theories until one emerges victorious. Alternative Finance Reply at 1. But that would have been inefficient and unwieldy. Cohen Milstein appears to be confident that a motion to dismiss would quickly resolve the issue with the Credit Bureau Purchasers, leaving only one class counsel (in their prediction, Cohen Milstein) representing the Credit Bureau **[*20]** Purchasers. *Id.* at 1-2. But what if Scott+Scott's theory survives a motion to dismiss? That would *not* mean that the alternative arguments under state laws can be abandoned. Many a claim has survived a dismissal motion only to fall at summary judgment or be defeated a trial. Would both teams of attorneys continue to represent the same disputed class of plaintiffs, possibly for years, coordinating discovery and presenting duplicative arguments to the Court? That cannot be the solution to the problem.

The double-Complaint strategy is also unnecessary because Scott+Scott can make the same arguments Cohen Milstein would have made on behalf of the Credit Bureau Purchasers—in the alternative. The Court does not share Cohen Milstein's concern over possible conflicts in that approach. Alternative Finance Reply at 3-4. Attorneys routinely plead in the alternative and zealously argue multiple theories in search of the best possible outcome for their clients. Nor do the possible outcomes from a motion to dismiss generate immediate cause for concern. It is not clear that, if the Credit Bureau Purchasers are found to be indirect purchasers, then this would create a conflict of interest for Scott+Scott **[*21]** with the FICO-Direct purchasers. Cohen Milstein argues that Scott+Scott will be put in an untenable position because "indirect purchasers like Alternative Finance would need to prove the credit bureaus passed FICO's overcharges on, but the undisputed direct purchasers like Amalgamated Bank have no incentive to

[6] This opinion uses (cleaned up) to indicate that internal quotation marks, alterations, and citations have been omitted from quotations. *See* Jack Metzler, *Cleaning Up Quotations*, 18 Journal of Appellate Practice and Process 143 (2017).

do so." Alternative Finance Reply at 6. But this is not really a conflict—it just means that the Scott+Scott team would have to make multiple arguments at once, as lawyers often do. It bears repeating that plaintiffs recovering under federal law can recover treble damages *even if* they passed on the monopoly pricing. So, it does not harm the direct-purchaser plaintiffs if *other* plaintiffs show that the pricing was passed on.[7] If Sky Federal's federal claims for the Credit Bureau Purchasers *do* survive a motion to dismiss, then the Court does not see why Scott+Scott must choose between the two competing theories, as Cohen Mil-stein predicts. Alternative Finance Reply at 9. For all the reasons just discussed, they can simply continue preparing the case with multiple theories, even up through a trial.[8]

All of that being said, if it becomes clear later that Scott+Scott **[*22]** cannot effectively represent all the plaintiffs and classes encompassed by the FICO-Direct Purchasers and Credit Bureau Purchasers, the Court can and will address the problem then. Scott+Scott has assembled a team of experienced attorneys from outside its firm to serve as a steering committee for this litigation if necessary. Sky Fed. Br. at 13-14. They have already mapped out possible scenarios, including various subclasses and groups, which might require different appointed counsel. *Id.* at 12-14. They appear to be taking any possible future conflicts with appropriate seriousness.

As for FICO's proposal that all of the Plaintiffs be forced to fall into step behind one interim class counsel and one consolidated complaint, the Court rejects it. R. 74, FICO Br. For the reasons discussed above, it makes sense to separate out the indirect-purchaser plaintiffs from the direct-purchaser plaintiffs in these related actions. The Court notes that this does appear to be standard practice in this District and others, as proffered by all of the moving Plaintiffs. Alternative Finance Br. at 11; Sky Fed. Br. at 5. This belies the notion that it would be a special burden on FICO to face two separate **[*23]** consolidated complaints on behalf of two proposed classes. FICO Br. at 6. To the extent that FICO was simply seeking to avoid a situation where competing theories are before the Court in separate Complaints, its wish is granted: that was Cohen Milstein's proposal, and the Court has rejected it.

B. Class Counsel

The Court agrees that Scott+Scott is qualified to act as Interim Lead Counsel for the direct-purchaser plaintiffs, with MoloLamken serving as Liaison Counsel. Sky Fed. Br. at 9. Both law firms have been involved in this litigation since its early days and have the expertise and experience needed to represent the proposed class. The Court notes Scott+Scott's track record of successful complex antitrust litigation, as well as MoloLamken's sterling reputation and local presence. *Id.* 10-11. The Court also appreciates that counsel has already thought ahead to possible subclasses and is prepared to propose a Plaintiffs' Steering Committee to handle those developments if they become reality; the committee would consist of additional qualified attorneys who could step in to take on more responsibility if necessary. *Id.* 12-14. Although there might be some small loss in efficiency due to **[*24]** involving additional law firms, Scott+Scott and MoloLamken have already demonstrated that they can effectively lead and coordinate with other attorneys, by bringing together counsel from eight of the ten related actions to support their motion for consolidation and appointment of interim class counsel. Finally, the Court agrees that it is in the class's best interest to have a diverse legal team at its disposal, and that Scott+Scott and MoloLamken can provide such a team. *Id.* 14-15.

---

[7] Also, Scott+Scott is not seeking to represent the credit bureaus (see Compl. ¶ 87); and the Credit Bureau Purchasers are only trying to show that the *credit bureaus* passed on costs, not, as far as the Court knows, that any FICO-Direct plaintiffs or class members passed on any costs.

[8] Meanwhile, there is a potential conflict in Cohen Milstein's proposed class, between undisputed Indirect Purchasers, and the disputed Credit Bureau Purchasers. According to Alternative Finance's own Complaint, Brookfield Management purchased FICO scores from agencies that purchased them from the credit bureaus—in other words, from a Credit Bureau Purchaser. R. 1, 20-cv-03204, Compl. ¶ 4. It is true that Cohen Milstein proposes to represent only end-users, not resellers. Alternative Finance Reply at 8. But they also acknowledge that some entities could be end-users for some purchases and resellers for other purchases. *Id.* The Court is not convinced that Cohen Milstein's plan would necessarily have avoided any possible intra-class conflicts.

Cohen Milstein is likewise eminently qualified to represent the indirect purchaser plaintiffs. The firm has a long history of success in class action litigation, including antitrust class actions. Alternative Finance Br. at 14-15.

IV. Conclusion

For the reasons discussed above, Sky Federal's Motion to Consolidate and for the Appointment of Interim Class Counsel, R. 64, is granted. Alternative Finance's competing motion, R. 61, is denied. Scott+Scott is appointed as Interim Class Counsel representing the Direct Purchaser Plaintiffs, including both the FICO-Direct Purchasers and the Credit Bureau Purchasers, with the understanding that Scott+Scott will continue to pursue alternative theories in case its federal **[*25]** claims for the Credit Bureau Purchasers fail. Scott+Scott is directed to file a consolidated complaint on behalf of all Direct Purchaser Plaintiffs by October 21, 2021. Cohen Milstein is appointed to represent the Indirect Purchasers, including Garner Properties & Management and Brookfield Management Company and others like them. The respective Interim Class Counsel and FICO shall confer and propose an answer or *Rule 12* motion schedule. The parties shall file, on the docket in 20-cv-2114, a status report on October 28, 2021. The Court sets a tracking status hearing for November 5, 2021, at 8:30 a.m., but to track the case only (no appearance is required). Instead, the Court will review the status report before that date.

2021 NCBC LEXIS 86 *; 2021 NCBC Order 21

VENTION, INC., Plaintiff, v. JB HAMLET, LLC d/b/a VBC MANUFACTURING, a/k/a VOLUMETRIC BUILDING COMPANIES, a/k/a VOLUMETRIC COMPANIES-MANUFACTURING, Defendant.

Notice: This document is designated an Order of Significance by the North Carolina Business Court. Orders of Significance are not published as Business Court opinions but may be cited and relied upon.

Core Terms

designation, Counterclaims, complex business, mandatory, deceptive trade practices, anti trust law, Notice, unfair, breach of contract, material issue, pleaded, invoke

Judges: [*1] Louis A. Bledsoe, III, Chief Business Court Judge.

Order by: Louis A. Bledsoe, III

Order

ORDER ON DESIGNATION

1. **THIS MATTER** is before the Court pursuant to the Determination Order issued on 30 September 2021 by the Honorable Paul Newby, Chief Justice of the Supreme Court of North Carolina, directing the undersigned to determine whether this action is properly designated as a mandatory complex business case in accord with *N.C.G.S. § 7A-45.4(a)* (the "Determination Order").

2. Plaintiff filed the Complaint initiating this action in Richmond County Superior Court on 14 July 2021, asserting claims against Defendant for breach of contract and quantum meruit. (*See* Compl. ¶¶ 59-70.) Defendant filed its Motion to Dismiss, Affirmative Defenses, Answer and Counterclaims (the "Counterclaims") on 29 September 2021, asserting counterclaims against Plaintiff for breach of contract and unfair and deceptive trade practices under *N.C.G.S. § 75-1.1*. (*See* Mot. Dismiss, Affirmative Defenses, Answer & Countercls. ¶¶ 31-45 [hereinafter "Countercls."].) That same day, Defendant filed a Notice of Designation ("NOD"), contending that Vention, Inc. v. JB Hamlet, LLC, 2021 NCBC Order 21. designation is proper under *N.C.G.S. § 7A-45.4(a)(3)*. (Notice Designation 1 [hereinafter "NOD"].)

3. "For **[*2]** a case to be certified as a mandatory complex business case, the pleading upon which designation is based must raise a material issue that falls within one of the categories specified in *section 7A-45.4*." *Composite Fabrics of Am., LLC v. Edge Structural Composites, Inc., 2016 NCBC LEXIS 11, at *25 (N.C. Super. Ct. Feb. 5, 2016)*. Here, designation is based upon the Counterclaims. *Id. at *19* ("[A] party may use its counterclaim as the basis for a notice of designation.").

4. In support of designation under this section, Defendant argues that "Defendant's counterclaim pleads a claim under Chapter 75 of the North Carolina General Statutes and prohibited by *N.C. Gen. Stat. § 74-1.1* [sic], specifically, a claim of an unfair and deceptive trade practice by Plaintiff."[1] (NOD 3.) Designation under *section 7A-45.4(a)(3)*, however, is proper only if the action involves a material issue related to "[d]isputes involving ***antitrust law***, including disputes arising under Chapter 75 of the General Statutes *that do not arise solely under G.S. 75-1.1* or *Article 2 of Chapter 75 of the General Statutes*." *N.C.G.S. § 7A-45.4(a)(3)* (emphasis added). As pleaded, Defendant's unfair and deceptive trade practice counterclaim arises solely under *section 75-1.1* and does not otherwise invoke state or federal ***antitrust law***. (*See* Countercls. ¶¶ 31-45.) As a result, designation under *section 7A-45.4(a)(3)* is improper. *See, e.g., Pinsight Tech., Inc. v. Driven Brands, Inc., 2020 NCBC LEXIS 23, at *4, 2020 NCBC Order 9 (N.C. Super. Ct. Feb. 20, 2020)* (holding that (a)(3) designation was improper where plaintiff "has not alleged trade **[*3]** secret misappropriation, a Chapter 75 claim other than one under *section 75-1.1*, or otherwise invoked state or federal ***antitrust law***").

5. Based on the foregoing, the Court determines that this action shall not proceed as a mandatory complex business case under *N.C.G.S. § 7A-45.4(a)* and thus shall not be assigned to a Special Superior Court Judge for Complex Business Cases.

6. Consistent with the Determination Order, the Court hereby advises the Senior Resident Superior Court Judge of Judicial District 16A that this action is not properly designated as a mandatory complex business case so that the action may be treated as any other civil action, wherein the parties may pursue designation as a *Rule 2.1* exceptional case with the Senior Resident Judge.

SO ORDERED, this the 1st day of October, 2021.

/s/ Louis A. Bledsoe, III

Louis A. Bledsoe, III

Chief Business Court Judge

End of Document

[1] The Court notes that Defendant's reference to "*N.C. Gen. Stat. § 74-1.1*," both in the NOD and the Counterclaims, (*see* NOD 3; Countercls. ¶ 43), appears to be a typo.

Judges: DONALD M. MIDDLEBROOKS, UNITED STATES DISTRICT JUDGE.

Opinion by: DONALD M. MIDDLEBROOKS

Opinion

ORDER GRANTING SUMMARY [*2] JUDGMENT

THIS CAUSE comes before the Court upon Defendants' Motion for Summary Judgment. (DE 52). The Motion is fully briefed. (DE 61; DE 68). For the reasons set forth below, the Motion is granted.

BACKGROUND

On October 12, 2020, Plaintiff Maralago Cay Homeowners Association, Inc., a mobile homeowners association, filed this action in state court. (DE 1-1). It was removed to this Court on January 11, 2021. (DE 1). Plaintiff brings this action "in its representative capacity on behalf of itself, and more than 1,000 current and former mobile homeowners in the Maralago Cay Mobile Home Park." (DE 15 at 3). Defendants include three business entities that own and operate the mobile home park (MHC Operating Limited Partnership, Equity LifeStyle Properties, Inc., and MHC Maralago Cay, LLC) and seven current and former agents of those entities (Eric Zimmerman, Stanley Martin, Sydney Morris, Rene Scott, Beverly Sagehorn, Bertha Rodriguez, Milagros Rivera). Collectively these Parties will be referred to throughout this Order as the "Park Defendants." Plaintiff also names, attorney J. Allen Bobo, and the law firm of Lutz, Bobo & Telfair, P.A. (collectively, the "Law Firm Defendants"). (*Id.* at ¶¶ **[*3]** 8-17, 20-21).

This is the second putative class action Plaintiff has filed against these Defendants alleging substantively the same wrongful conduct. Plaintiff's grievances, which begin with Defendants' purchase of the Park in 1997 and span through today, focus on the alleged harms caused by the use of "illegal" lot rental agreements ("LTAs"), fraudulent lot rental prices, diversion of lot resales, discrimination against elderly mobile homeowners, and reduction or elimination of services. Plaintiff, along with four individual mobile homeowners, brought a federal lawsuit against all twelve of these Defendants in 2019 alleging violations of, among other statutes, RICO, the Florida Deceptive and Unfair Trade Practices Act, the Americans With Disabilities Act, and the Florida Mobile Home Act, which governs the landlord-tenant relationship between mobile homeowners and park operators. That case was pending before District Judge Singhal. On a motion to dismiss, Judge Singhal dismissed the entire action without prejudice as a shotgun pleading, and he also ruled on Defendants' failure to state a claim arguments in an effort to narrow the issues for purposes of an anticipated amended complaint. **[*4]** That order is set forth in a published opinion: *Drummond v. Zimmerman, 454 F. Supp. 3d 1210 (S.D. Fla. 2019)*. But instead of amending the complaint, Plaintiffs voluntarily dismissed that action in June 2020 and brought the instant action four months later in October 2020. (DE 1-1; 55-2 at 103-04). In this action, Plaintiff attempts to repurpose its previously-pled factual allegations into this new antitrust claim.

The Amended Complaint contains one claim for violations of the *Florida Antitrust Act ("FAA")*. (*Id.* at ¶¶ 61-74).[1] In this claim, Plaintiff alleges violations of *§ 542.18*, the provision barring restraints of trade, and *§ 542.19*, the provision barring monopolies. Plaintiff alleges that Defendants "conspired to eliminate discounting of lot rental amount[s] by ensuring that all park owners charged the same minimum price and used the same terms." (*Id.* at ¶ 65). Plaintiff seeks compensatory damages and injunctive relief. (*Id.* at 27-28). On March 10, 2021, Plaintiff stipulated that the pecuniary relief sought is limited to the allegedly unreasonable rent increases in the 48-month period prior to filing this action in October 2020. (DE 22-3).

Defendants allegedly "entered into a continuing agreement, understanding, and conspiracy to raise, fix, maintain, or/or **[*5]** impose mobile home lot rental prices" by imposing on Plaintiff and its members an "illegal" standardized LTA. (DE 15 at ¶¶ 64-65). Plaintiff thus characterize the alleged antitrust misconduct as a price-fixing conspiracy. (*See id.*). Plaintiff further maintains that "[t]his conspiracy, combination, or concert of action resulted in higher mobile home lot rental prices . . . than would have existed in a competitive market." (*Id.* at ¶ 2). Plaintiff also alleges that Defendants—the Park and its employees and lawyers—"furthered and effectuated" the conspiracy through actions such as engaging in secret meetings regarding "each other's" lot rental amounts, setting a price floor to quote prospective mobile homeowners, imposing "fraudulent" lot rental amounts, frustrating Plaintiff's right of first refusal to purchase the Park, diversion of lot resales, concealment of contaminated water, and elimination of services. (*Id.* at ¶ 72). Defendants raise several grounds for summary judgment. (*See* DE 52).

LEGAL STANDARD

[1] Plaintiff also included in its original complaint a claim under the ADA, which it removed in its Amended Complaint. (DE 1-1; DE 15).

"The court shall grant summary judgment if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A disputed **[*6]** fact is "material" if it "might affect the outcome of the suit under the governing law." *Talavera v. Shah, 638 F.3d 303, 308, 395 U.S. App. D.C. 7 (D.C. Cir. 2011)* (quoting *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*). A dispute over a material fact is "genuine" if it could lead a reasonable jury to return a verdict in favor of the nonmoving party. *See* *Scott v. Harris, 550 U.S. 372, 380, 127 S. Ct. 1769, 167 L. Ed. 2d 686 (2007)*. "Credibility determinations, the weighing of the evidence, and the drawing of legitimate inferences from the facts are jury functions, not those of a judge at summary judgment. Thus, [the court] do[es] not determine the truth of the matter, but instead decide[s] only whether there is a genuine issue for trial." *Barnett v. PA Consulting Grp., Inc., 715 F.3d 354, 358, 404 U.S. App. D.C. 439 (D.C. Cir. 2013)* (quoting *Pardo-Kronemann v. Donovan, 601 F.3d 599, 604, 390 U.S. App. D.C. 178 (D.C. Cir. 2010)*).

Under the summary judgment standard, the moving party bears the "initial responsibility of informing the district court of the basis for [its] motion, and identifying those portions of the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits which [it] believe[s] demonstrate the absence of a genuine issue of material fact." *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. In response, the nonmoving party must "go beyond the pleadings and by [its] own affidavits, or depositions, answers to interrogatories, and admissions on file, 'designate' specific facts showing that there is a genuine issue for trial." *Id. at 324* (internal citations **[*7]** omitted). If the non-moving party fails to "establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial[,]" summary judgment is warranted. *Id. at 322*. The party moving for summary judgment bears the burden of establishing that there is insufficient evidence to support the non-moving party's case. *Id. at 325*. Moreover, "[t]he court must view all evidence in the light most favorable to the non-movant and must resolve all reasonable doubts about the facts in favor of the non-movant." *United of Omaha Life Ins. Co. v. Sun Life Ins. Co. of Am., 894 F.2d 1555, 1557-58 (11th Cir. 1990)* (citation omitted).

DISCUSSION

I. Standing

Defendants argue that Plaintiff lacks standing to bring "this action challenging rents or rent increases," because the Florida Mobile Home Act ("FMHA"), under which Plaintiff claims representational capacity, limits HOA standing with respect to rent increases. (DE 52 at 11). *Section 723.037 of the FHMA* states: "The homeowners association shall have no standing to challenge the increase in lot rental amount, reduction in services or utilities, or change of rules and regulations unless a majority of the affected homeowners agree, in writing, to such representation." *Fla. Stat. § 723.037(1)*. However, this action is being brought under Florida ***antitrust law***, not under **[*8]** the FMHA to challenge rent increases. Plaintiff also invoked in its complaint *Florida Rule of Civil Procedure 1.221*, which confers on HOAs standing to sue "concerning matters of common interests to the members." (DE 15 at ¶ 4); *see also* *Fla. R. Civ. P. 1.221*. Therefore, I find that *§ 723.037* does not deprive Plaintiff of standing in this FAA action. *See* *Malco Indus. v. Featherock Homeowners Ass'n, 854 So. 2d 755, 757 (Fla. 2nd DCA 2003)* (holding that *Rule 1.221* controlled, not *§ 723.037*, in a dispute over the interpretation of a mediation agreement where the mediation pertained to rent increases). Summary judgment is denied on the issue of standing.[2]

II. Res Judicata and Claim Splitting

[2] I note that Defendants raise only this narrow standing issue premised on the above-cited provision of the FMHA. In their Reply brief, Defendants seem to suggest that they raised lack of Article III standing in their initial Motion for Summary Judgment. (DE 68 at 1). However, Defendants' initial motion contains no legal argument for lack of Article III standing, nor does it cite to any law on Article III standing. My ruling on the standing issue here is therefore confined to only the standing argument Defendants actually raised and briefed.

Defendants argue that this action is precluded by res judicata and claim splitting. For the reasons set forth below, I agree that res judicata bars this action as to the Law Firm Defendants; however as to the Park Defendants, I do not find that either doctrine is applicable.

Throughout this Order, I will refer to the present case as "Maralago II." The prior action which was pending before Judge Singhal (*Drummond v. Zimmerman*, Case No. 19-CV-81532-AHS) will be referred to as "Maralago I." Maralago I was brought by the same HOA Plaintiff as Maralago II and names the same list of Defendants. *454 F. Supp. 3d at 1214*. Whereas Maralago II involves only the HOA Plaintiff, Maralago I additionally named **[*9]** four other plaintiffs who were individual mobile homeowners.

In Maralago I, Plaintiff and the homeowners brought the following claims: violation of state and federal RICO (Counts I—IV); violation of the *Florida Deceptive and Unfair Trade Practices Act ("FDUTPA")* (Count V); violation of the *Americans with Disabilities Act ("ADA")* (Count VI); violation of the *Florida Mobile Home Act ("FMLA")* (Count VII); the exploitation of individuals over the age of 65 (Count VIII); and race and national origin discrimination (Count VIIII). *Id at 1214-15*.

a. Res Judicata

The doctrine of res judicata bars a later action "litigating claims that were or could have been litigated in a prior action between the parties." *Lobo v. Celebrity Cruises, Inc. 704 F.3d 882, 892 (11th Cir. 2013)* For res judicata to apply: (1) "both cases must involve the same parties or their privies;" (2) "both cases must involve the same causes of action;" (3) "there must have been a final judgment on the merits;" and (4) "the prior decision must have been rendered by a court of competent jurisdiction." *Id.* (citing *In re Piper Aircraft Corp., 244 F.3d 1289, 1296 (11th Cir. 2001)*). The first three elements are at issue; I will address each in turn.

With respect to the first element, Maralago I and Maralago II involve the same parties and I reject Plaintiffs argument to the contrary. All twelve Defendants in Maralago II were **[*10]** also defendants in Maralago I.[3] (Maralago I Compl. at ¶¶ 3-14; DE 1-1 at ¶¶ 8-12).[4] Both actions were brought by the HOA representing itself and a putative class of over 1,000 current and former mobile homeowner members. (Maralago I Compl. at ¶ 2; DE 1-1 at ¶ 4). Therefore, Plaintiff's argument that the two actions involve different parties because Maralago I "was filed primarily by individual plaintiffs (and the HOA only as to the ADA claim)" lacks merit. (DE 61 at 1). All claims except the ADA claim were brought by all plaintiffs, including the HOA. *Drummond, 454 F. Supp. 3d at 1217*; *see generally* Maralago I Compl.

Second, the "same cause of action" element is met because res judicata bars not only the specific legal theories raised in the first action, but also "all legal theories and claims arising out of the same operative nucleus of fact" or "based upon the same factual predicate." *TVPX ARS, Inc. v. Genworth Life & Annuity Ins. Co., 959 F.3d 1318, 1325 (11th Cir. 2020)* (internal citations omitted). Whether two cases arise from the same nucleus of fact "centers on whether the primary right and duty are the same." *Id.* (internal citation omitted); *see also* *N.A.A.C.P. v. Hunt, 891 F.2d 1555, 1561 (11th Cir. 1990)* (barring a second action despite that the plaintiffs sought relief under different legal theories, because both involved the same factual predicate **[*11]** of the placement of a confederate flag on a state capitol—the same wrongful act—and both sought to vindicate the right to be free from discrimination—the same right). Additionally, full relief must have been available in the first action. *Maldonado v. U.S. Atty. Gen., 664 F.3d 1369, 1377 (11th Cir. 2011)*.

Here, both cases are predicated on the same lengthy list of wrongs. A comparison of the factual allegations in the two complaints reveals a near total overlap, including: the "illegal" sale of the Park in 1997 and frustration of Plaintiff's right of first removal (Maralago 1 Compl. at ¶¶ 27-32; DE 1-1 at ¶¶ 26-30); another "illegal" transfer in

[3] In Maralago II, Plaintiff added an additional defendant which it has since dismissed. (DE 40).

[4] I note that Defendants attached the Maralago I complaint as an exhibit to the Declaration of J. Allen Bobo. (DE 55-1). For the sake of clarity, I will cite to the Maralago I complaint directly instead of the page numbers in the exhibit.

2003 (Maralago I Compl. at ¶¶ 33-36; DE 1-1 at ¶¶ 31-34); imposition of an "illegal" proposed standardized LTA (Maralago I Compl. at ¶¶ 50-59; DE 1-1 at ¶¶ 37-45); diversion of resales of mobile home lots (Maralago I Compl. at 85; DE 1-1 at ¶¶ 52); alleged concealment of contaminated water (Maralago I Compl. at ¶¶ 64-65; DE 1-1 at ¶¶ 53-54); alleged rejection of Plaintiff's lot rental comparisons (Maralago I Compl. at ¶¶ 60-61; DE 1-1 at ¶¶ 58); and reduction or elimination of services (Maralago I Compl. at ¶¶ 64-65; DE 1-1 at ¶¶ 69-77). Whereas Plaintiff argues in Maralago II that these wrongs contribute **[*12]** to alleged antitrust misconduct, in Maralago I Plaintiff framed this scheme as a fraudulent one in violation of RICO (*e.g.*, Maralago I Compl. at ¶ 107) and deceptive practices under FDUTPA (*id* at ¶¶ 140-41), among other claims. Additionally, a majority of the factual allegations appear verbatim or nearly so. *See Lobo, 704 F.3d at 893* (finding that verbatim allegations of the facts in the first and later actions "satisfies the same cause of action requirement"). Plaintiff's claim that "no common set of facts" exists is therefore plainly contradicted by the record. (DE 61 at 2).

Plaintiff's next argument, that the standardized LTA presents a significant factual difference and is premised on a different legal theory, is also unpersuasive.[5] Plaintiff's new theory is that the standardized LTA is illegal because it operates as a price fixing mechanism by setting a minimum price and terms for lot rentals. Plaintiff largely repurposed the previously-pled allegations to fit this new theory. *E.g., compare* DE 1-1 at ¶ 37 ("[the Defendants] *extorted* [Plaintiff] to adopt an illegal standardized lot rental agreement"), *with* Maralago I Compl. at ¶ 39 ("[the Defendants] *fraudulently compelled* [Plaintiff] to execute an illegal **[*13]** long term rental agreement"). And although Plaintiff did add some facts in the Maralago II Complaint that speak more directly to antitrust, these are not significant enough factual distinctions to warrant a finding that the cases are not effectively the "same cause of action" for res judicata purposes.[6] The facts and legal theories in the first and second action need not be identical. Res judicata operates to bar claims that *could have been brought* in the first action, and Plaintiff could have brought the antitrust claim previously.

Importantly, all of the facts underlying Maralago II arose prior to Maralago I. *Cf. Lucky Brand Dungarees, Inc. v. Marcel Fashions Grp., Inc., 140 S. Ct. 1589, 1596, 206 L. Ed. 2d 893 (2020* ("Claim preclusion generally 'does not bar claims that are predicated on events that postdate the filing of the initial complaint.' (internal citations omitted)); *see also Trustmark Ins. Co. v. ESLU, Inc., 299 F.3d 1265, 1270 (11th Cir. 2002)* ("A series of breaches of the same contract, all occurring before filing suit, should be brought in that suit."). Indeed, Maralago I squarely raised the issue of "illegal" LTAs, including the standardized LTA specifically at issue in Maralago II.[7] (Maralago I Compl. at ¶¶ 50-59). And no legal barriers prevented Plaintiff from bringing its antitrust claim in Maralago I. *See Maldonado, 664 F.3d at 1377* (finding that a later claim **[*14]** did not arise from the same nucleus of operative fact because the later claim involved a new legal theory made available by a statutory change after the first action). Therefore, I find that the antitrust claim in Maralago II arises from the same cause of action as the claims in Maralago I.

Third, the finality requirement is met, but only as to the Law Firm Defendants. In Maralago I, Judge Singhal conducted an analysis of whether the Complaint stated a claim under *Rule 12(b)(6)*, and as to the Law Firm Defendants, he concluded that it did not, and he dismissed all claims as to those defendants with prejudice. *Drummond, 454 F. Supp. 3d at 1222*. A *12(b)(6)* dismissal for failure to state a claim is typically a final judgment on the merits for res judicata purposes, even where the court does not state whether the dismissal is with or without prejudice, unless the court specifies otherwise. *Hunt, 891 F.2d at 1560* (quoting *Federated Dep't Stores v. Moitie, 452 U.S. 394, 399 n. 3, 101 S. Ct. 2424, 69 L. Ed. 2d 103 (1981)* (*and citing Fed. R. Civ. P. 41(b)*). A dismissal

---

[5] Plaintiff does not explicitly raise this argument for res judicata purposes but does with respect to claim splitting. Given the doctrinal overlap between res judicata and claim splitting, I will address this argument here.

[6] For example, the 4-5% annual lot rental increase since 2016 (DE 1-1 at ¶ 58) and the alleged efforts to implement the "state-wide adoption of the LTA by other [unnamed] mobile home park owners" (*id*. at ¶ 46).

[7] Plaintiff also argues that the Maralago I court "struck the LTA and all references of the LTA from the Complaint before entering" the dismissal order (DE 61 at 1), seemingly finding it relevant that this issue was not litigated at the motion to dismiss stage. However, whether an issue was actually litigated is relevant to issue preclusion, not claim preclusion. *See Sellers v. Nationwide Mut. Fire Ins. Co., 968 F.3d 1267 (11th Cir. 2020)*.

without prejudice, however, is generally not an adjudication on the merits. Hughes v. Lott, 350 F.3d 1157, 1161 (11th Cir. 2013). As all claims against the Law Firm Defendants were dismissed *with* prejudice, Maralago I has preclusive effect as to those defendants.

With respect to the Park Defendants, the analysis is not as straightforward. Judge Singhal dismissed the **[*15]** entire complaint as a shotgun pleading. Id at 1217. With respect to that basis for dismissal he granted leave to amend. He also ruled on Defendants' failure to state a claim arguments under Rule 12(b)(6) so as to narrow the issues for an amended complaint.[8] *Id.* In doing so, he dismissed the FDUTPA claim *with* prejudice (id at 1220), and he dismissed the RICO claim *without* prejudice and with leave to amend (id. at 1222). Then, instead of amending, Plaintiffs moved to voluntarily dismiss the entire action, and Judge Singhal granted that request. (DE 55-2 at 103-04).

While a Rule 12(b)(6) dismissal typically indicates finality, Hunt, 891 F. 2d at 1560, dismissal without prejudice and with leave to amend cuts the other way. *See* Hughes, 350 F.3d at 1161 (holding that the dismissal without prejudice of an *in forma pauperis* complaint was not a final adjudication on the merits and did not bar the plaintiff from re-filing his claim). Further, a voluntary dismissal generally is not a final judgment on the merits. Sealey v. Branch Banking & Tr. Co., 693 Fed. Appx. 830, 834 (11th Cir. 2017) (citing Fed. R. Civ. P. 41(a)(1)(B)). While the FDUTPA claim was dismissed with prejudice and arises from the same cause of action as Maralago II, I cannot ignore the fact that the other claims predicated on the common facts, including the four RICO claims, were dismissed *without* prejudice, with leave **[*16]** to amend, and were subsequently voluntarily dismissed. Therefore, I find that res judicata does not bar this antitrust claim as to the Park Defendants.

b. Claim Splitting

Neither does claim splitting bar this action. "The claim-splitting doctrine: (1) 'requires a plaintiff to assert all of its causes of action arising from a common set of facts in one lawsuit,' and (2) applies where a second suit has been filed before the first suit has reached a final judgment." Kennedy v. Floridian Hotel, Inc., 998 F.3d 1221 (11th Cir. 2021) *(quoting* Vanover v. NCO Fin. Servs., 857 F.3d 833, 840, 841 n. 3 (11th Cir. 2017). The Parties disagree on the operative date of "final judgment" in Maralago I. Defendants argue that final judgment had not been entered in Maralago I as of the filing of this Motion in August 2021 because the Maralago I court reserved jurisdiction to adjudicate attorneys' fees, and an order of final judgment was forthcoming. (DE 52 at 9). Plaintiff suggests that the Order on Motion to Dismiss is the relevant final judgment. (DE 61 at 2). I agree that the April 2020 Order on Motion to Dismiss constitutes the date of final judgment for claim splitting purposes.

Defendants' summary of the applicable law is accurately stated but misapplied. Claim splitting is analyzed as "an aspect of res judicata." Vanover, 857 F.3d at 841. Defendants are correct **[*17]** that the inquiry involves asking "whether the first suit, assuming it were final, would preclude the second suit." (DE 52 at 12). However, I need not engage in hypotheticals about the potential preclusive effect of a final judgment in the prior case, because I already analyzed that question under res judicata and found that the Maralago I dismissal is not preclusive as to the Park Defendants, but is preclusive as to the Law Firm Defendants. The facts of this case demonstrate the inapplicability of claim splitting once res judicata comes into play, i.e., claim splitting no longer applies once the first action reaches a final judgment capable of being analyzed to assess its effect as either a merits determination or not. The fact that Judge Singhal retained jurisdiction to resolve attorneys' fees is irrelevant, as that was a collateral issue capable of resolution after the merits of the case. *See* Budinich v. Becton Dickinson & Co., 486 U.S. 196, 200, 108 S. Ct. 1717, 100 L. Ed. 2d 178 (1988) ("[I]t [is] indisputable that a claim for attorney's fees is not part of the merits of

---

[8] Plaintiff argues that the Maralago I court did not intend for the overall dismissal to operate as an adjudication on the merits, because in footnote 3 the court "expressly declined to address the Defendants' argument that Plaintiff failed to state a claim upon which relief can be granted." (DE 61 2). That is not so. The Maralago I court declined to rule on Defendants' 12(b)(6) argument *only* with respect to the ADA claim because it found that Plaintiffs lacked standing to bring that specific

the action to which the fees pertain"); *see also* *Vasconcelo v. Miami Auto Max, Inc., 981 F.3d 934 (11th Cir. 2020)*. Therefore, the claim splitting doctrine does not bar this action.

I further note that while this case falls outside the letter of this rule, Plaintiff's conduct **[*18]** with respect to these two actions seems to violate its spirit. The claim splitting doctrine requires plaintiffs to bring all related claims in a single action instead of instituting separate parallel proceedings, and seeks to avoid wasting judicial resources and inefficient resolution of cases. *Vanover, 857 F.3d at 841*. After receiving an adverse ruling from Judge Singhal, Plaintiff dismissed that action and refiled substantively the same claim under a new legal theory in state court, which Defendants removed to this Court. Judge Singhal retained jurisdiction in Maralago I to resolve attorneys' fees until August 2021, just a few months before Maralago II was set for trial. Plaintiffs successive dismissal and refiling impeded the efficient resolution of its claims.

III. Evidence of an Agreement or Conspiracy to Restrain Trade

Defendants further move for summary judgment on the restraint of trade branch of Plaintiff's antitrust claim under *§ 542.18*. (DE 62 at 13). Defendants argue that they cannot conspire with each other within the meaning of *§ 542.18* and that no record evidence exists that any Defendant engaged in a conspiracy to restrain trade. *(Id* at 14).[9] Because Plaintiff, the non-moving party, bears the burden of proof **[*19]** on this issue at trial, Defendants must only show "that there is an absence of evidence to support the nonmoving party's case." *Celotex, 477 U.S. at 325*. If the moving party satisfies that burden, the nonmoving party then must "go beyond the pleadings and . . . designate 'specific facts showing that there is a genuine issue for trial.'" *Id. at 324* (internal citation omitted). The nonmoving party must prove the existence of "evidence on which the jury could reasonably find for the plaintiff . . . [t]he mere scintilla of evidence in support of the plaintiffs position will be insufficient." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 252, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*.

Under *§ 542.18 of the FAA*, "[e]very contract, combination, or conspiracy in restraint of trade or commerce in this state is unlawful." *Fla. Stat. § 542.18*. Similarly, *section 1 of the Sherman Act* provides that [e]very contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several States . . . is declared to be illegal. *15 U.S.C. § 1*. "A *section 1* plaintiff must prove an agreement between two or more persons to restrain trade because unilateral conduct is not illegal under *section 1*." *Levine v. Cent. Fla. Med. Affiliates, Inc., 72 F.3d 1538, 1545 (11th Cir. 1996)* (citations omitted).[10]

An agreement to restrain trade can be horizontal or vertical. It is uncontested that Plaintiff has no evidence of a horizontal conspiracy—an agreement between **[*20]** Defendants and competitors. Plaintiff does not dispute the fact that while it "alleged that Defendants `exchange[d] confidential and competitively sensitive information regarding *each other's* lot rental amounts charged in their Florida Mobile Home business[,]' it does not identify the 'others' involved in the alleged conspiracy." (DE 59 at ¶ 42; DE 62 at ¶ 42). Defendants further point to an absence of any evidence of a horizontal agreement or conspiracy to restrain trade. (DE 52 at 14). Defendants also contend that Plaintiff "has not identified a single competitor that has allegedly conspired with the owner of Maralago Cay Park to fix prices." (DE 52 at 14-15). Plaintiff does not address this argument at all and makes no effort to contest it. Plaintiff therefore appears to concede that no evidence of a horizontal conspiracy exists.

The analysis then turns to a vertical conspiracy. I must first address whether Defendants are capable of engaging in concerted action, as opposed to merely unilateral action, within the meaning of a restraint of trade antitrust claim.

[9] Plaintiff initially named an additional defendant, against which Plaintiff dismissed all claims on July 31, 2021. (DE 40). Neither party argues that the dismissed defendant should presently be considered a co-conspirator; as such, I decline to reach that question and analyze only the relationships among the remaining Defendants.

[10] The Florida Antitrust Act's construction provision provides: "It is the intent of the Legislature that, in construing this chapter, due consideration and great weight be given to the interpretations of the federal courts relating to comparable federal antitrust statutes." *Fla. Stat. § 542.32*.

Defendants argue that as related entities and employees and outside counsel of those entities, they cannot conspire with **[*21]** each other or engage in concerted action, thereby rendering the alleged misconduct unilateral and not actionable. I agree. I will assess the Park Defendants (three business entities and seven individuals), and Law Firm Defendants (attorney J. Allen Bobo and his law firm, Lutz, Bobo & Telfair, PA), in turn.

Contrary to Plaintiffs argument, whether entities are distinct for purposes of a restraint of trade antitrust claim "does not turn simply on whether the parties involved are legally distinct entities." *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 191, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* (citing *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 769, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*.[11] The inquiry favors substance over form and looks to the "competitive reality" over formalistic labels. *Id. at 195-96*. "The key is whether the alleged 'contract, combination . . ., or conspiracy' is concerted action—that is, whether it joins together separate decisionmakers." *Id. at 195*. In other words, whether it joins "separate economic actors pursuing separate economic interests such that the agreement 'deprives the marketplace of independent decisionmaking.'" *Id. at 187, 195-96* (finding that the NFL, "an unincorporated association . . . [of] 32 separately owned professional football teams," is not a singular entity for *§ 1* purposes because their "corporate actions are guided . . . by 'separate corporate consciousnesses' **[*22]** and they pursue their own corporate economic interests as opposed to "the common interests of the whole" (internal citations omitted)); *see also* *Copperweld, 467 U.S. at 771* ("[C]oordinated activity of a parent and its wholly owned subsidiary are a single entity for *§ 1*" because "their objectives are common" and, "with or without a formal 'agreement,' the subsidiary acts for the benefit of the parent, its sole shareholder.").

The three entity Park Defendants have "a complete unity of interest." *See* *Copperweld, 467 U.S. at 771*. The following facts are uncontested: Defendant MHC Maralago Cay, LLC holds title to the real property comprising Maralago Cay. (DE 59 at ¶ 13; DE 62 at ¶ 13). The sole member of MHC Maralago Cay, LLC is Defendant MHC Operating Limited Partnership. *(Id)*. MHC Operating Limited Partnership has one general partner, Defendant Equity Lifestyles Properties, Inc. (DE 59 at ¶ 14; DE 62 at ¶ 14). These three entities are not independent decisionmakers pursuing separate economic interests, but rather a single enterprise with the common goal of managing the Park. Therefore, as a matter of law, the three entity Defendants cannot conspire to restrain trade.

Nor can the Park Defendants conspire to fix prices with the current or **[*23]** former employee Defendants. A corporation generally cannot conspire with its officers or employees for purposes of *§ 1*. *Copperweld, 467 U.S. at 769*; *see also* *Hackett v. Metropolitan Gen. Hosp., 422 So. 2d 986, 988 (Fla. 2nd DCA 1982)*. Intrafirm conduct can constitute concerted action only in the "rare case[]" where "the parties to the agreement act on interests separate from those of the firm itself, and the intrafirm agreements may simply be a formalistic shell for ongoing concerted action." *Id. at 201*; *Hackett, 422 So. 2d at 988 n. 2* (noting that an exception exists where "the conspiring corporate agents are alleged to have an independent personal stake in achieving the object of the conspiracy"). It is uncontested that the individual Defendants are or were employed by the Park. (DE 59 at ¶¶ 16-22; DE 62 at ¶¶ 16-22). Defendants argue that no personal stakes exist as to the Park employees and Plaintiff does not argue otherwise.

With respect to the Law Firm Defendants, the parties disagree as to whether the "personal stake" exception is met. Specifically, they dispute whether J. Allen Bobo, a Law Firm Defendant, said at a trade association meeting, "if lot rental increases were appropriately higher, . . . retiree mobile homeowners would be filing lawsuits all over the state." (DE 59 at ¶ 57; DE 62 at ¶ 57). Plaintiff argues **[*24]** that this *single* fact "adequately establishes that the Law Firm Defendants have an independent personal stake." (DE 61 at 5). Plaintiff offers no other evidence of Bobo's alleged personal stake.

---

[11] Plaintiff cites to several Supreme Court cases for the opposite proposition—that "[t]he fact that there is common ownership or control of the contracting corporations does not 'liberate them from the impact of the antitrust laws.'" (DE 61 at 5 (quoting *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 71 S. Ct. 259, 95 L. Ed. 219 (1951)* and citing *Timken Co. v. United States, 341 U.S. 593, 598, 71 S. Ct. 971, 95 L. Ed. 1199 (1951)* and *United States v. Yellow Cab Co., 332 U.S. 218 227, 67 S. Ct. 1560, 91 L. Ed. 2010 (1947)*)). Those cases have been overruled by *Copperweld* and its progeny. *See* *Copperweld, 467 U.S. at 763-65, 777*.

This factual dispute is immaterial. Even if Bobo uttered the statement at issue, that fact alone cannot establish that Bobo had a sufficiently independent economic stake in achieving the object of the conspiracy—fixing mobile home prices state-wide through imposing on the Park residents a standardized LTA. The Law Firm Defendants served as outside counsel to the Park and assisted in drafting its LTAs. (DE 55-1, Bobo Decl. at ¶¶2, 23). In restraint of trade antitrust cases, "agreements within a single firm" are treated "as independent action on the presumption that the components of the firm will act to maximize the firm's profits." *Am. Needle, 560 U.S. at 200*. Only in the "rare case[]" will that presumption not hold. *Id.* Bobo's alleged statement does not itself demonstrate that by drafting or implementing his client's LTA, Bobo was acting in his *own* economic interest, "separate from those of the firm," to maximize his *own* profits, as opposed to executing his client's wishes which may tangentially benefit him if he succeeds. **[*25]** *See id.* at 20001; *see also* *Am. Credit Card Tele. Co. v. Nat'l Pay Tele. Corp., 504 So. 2d 486, 489 (Fla. 1st DCA 1987)* (holding that outside counsel acting in that capacity, as opposed to acting on their own behalf, did not meet the personal stake exception). This case falls far short of the "rare case[]" in which intrafirm conduct can constitute concerted action for the purposes of a restraint of trade antitrust claim. *See* *Am. Needle, 560 U.S. at 200*.

In sum, I find that the Law Firm Defendants and Park Defendants cannot conspire with each other or engage in concerted action as required for a restraint of trade antitrust claim. Their alleged conduct is thus unilateral, which is not actionable under *§ 542.18*. Summary judgment is therefore granted for Defendants on the restraint of trade branch of Plaintiff's antitrust claim. I also note that even if Defendants could conspire with each other as a matter of law, Plaintiff pointed to no evidence of a conspiracy to restrain trade in response to Defendants' argument that no such evidence exists in the record. (DE 52 at 14-17; *see* DE 61).

IV. Evidence of Monopolization or Conspiracy to Monopolize

Defendants move for summary judgment on the second branch of Plaintiff's single-count antitrust claim brought under *§ 542.19*, the monopolization provision, arguing that no evidence **[*26]** exists to support this claim. (DE 52 at 17). Under *§ 542.19*, "[i]t is unlawful for any person to monopolize, attempt to monopolize, or combine or conspire with any other person or persons to monopolize any part of trade or commerce in this state." A claim of monopoly requires: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historical accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. Second, to attempt to monopolize, there must be: "(1) intent to bring about a monopoly and (2) dangerous probability of success," which is demonstrated by the defendant's degree of control of the relevant market. *Norton Tire Co. Inc. v. Tire Kingdom Co., Inc., 858 F.2d 1533, 1535 (11th Cir. 1988)*. Third, a conspiracy to monopolize requires: "(1) an agreement to restrain trade, (2) deliberately entered into with the specific intent of achieving a monopoly rather than a legitimate business purpose, (3) which could have had an anticompetitive effect, and (4) the commission of at least one overt act in furtherance of the conspiracy." *U.S. Anchor Mfg., Inc. v. Rule Indus., Inc., 7 F. 3d 986, 1001 (11th Cir. 1993)*.

Since Plaintiff, the non-moving party, bears the burden of proof on this issue at trial, Defendants need only point to an absence **[*27]** of evidence in the record before the burden shifts to Plaintiff to "go beyond the pleadings and . . . designate 'specific facts showing that there is a genuine issue for trial.'" *Celotex, 477 U.S. at 324-25*. Defendants sufficiently demonstrate a lack of evidence in the record to support any claim of monopolization, and Plaintiff fails to identify any evidence whatsoever to demonstrate a genuine issue of material fact as to any element of this claim.

The following facts are undisputed: Plaintiff has "no qualified witness who can testify to:" (1) "the possession of monopoly power in the relevant market" (DE 59 at ¶ 52; DE 62 at ¶ 52); (2) "the relevant market for antitrust purposes" (DE 59 at ¶ 53; DE 62 at ¶ 53); and (3) "the willful acquisition or maintenance of monopoly power by any Defendant." (DE 59 at ¶ 54; DE 62 at 54). Plaintiff's witness list contains no expert witnesses and four lay witnesses. (DE 38). Each of Plaintiff's four lay witnesses are mobile homeowners. (DE 59 at ¶ 26; DE 62 at ¶ 26). Additionally, the Parties agree that Plaintiff has "no expert identified to offer any analysis, test, report or opinion suggesting statistically or otherwise any evidence of a conspiracy between park owners in **[*28]** Florida to restrain trade by any means." (DE 59 at ¶ 46; DE 62 at ¶ 46). Plaintiff also "did not compile its own market study for the rent negotiations that occurred [during the relevant time period]." (DE 59 at ¶ 64; DE 62 at ¶ 64). In Response to Defendant's Motion, Plaintiff did not offer any argument or make any attempt to contest this lack of evidence. It is unclear to me whether Plaintiff has simply abandoned this aspect of its claim or whether its silence in briefing is a concession that no supporting evidence of this claim exists in the record. But either scenario requires that I grant summary judgment for Defendants on the monopolization branch of Plaintiff's antitrust claim.

V. Additional Arguments

Defendants raise two additional arguments: (1) the alleged anticompetitive activity is exempt from the FAA and (2) the application of ***antitrust law*** is precluded by the implied preclusion doctrine. (DE 52 at 19-20). As I granted summary judgment for all Defendants on Plaintiff's substantive claims under *Fla. Stat. § 542.18* and *§ 542.19*, and for the Law Firm Defendants on the additional ground of res judicata, I need not rule on these other potential grounds for summary judgment.

CONCLUSION

Accordingly, it is **[*29]** hereby **ORDERED AND ADJUDGED** that:

(1) Defendants' Motion for Summary Judgment (DE 52) is **GRANTED**.

(2) Defendants' Motion in Limine (51) is **DENIED AS MOOT**.

(3) Judgment in favor of Defendants will be entered by separate order.

SIGNED, in Chambers, at West Palm Beach, Florida this 4 day of October, 2021.

/s/ Donald M. Middlebrooks

DONALD M. MIDDLEBROOKS

UNITED STATES DISTRICT JUDGE

FINAL JUDGMENT

THIS CAUSE is before the Court pursuant to this Court's Order on Motion for Summary Judgment. (DE 75). Pursuant to *Federal Rule of Civil Procedure 58*, it is hereby **ORDERED and ADJUDGED** that:

1. Final Judgment is **ENTERED** in favor of Defendants MHC Operating Limited Partnership, Equity Lifestyle Properties, Inc., MHC Maralago Cay, LLC, Eric Zimmerman, Stanley Martin, Sydney Morris, Rene Scott, Beverly Sagehorn, Bertha Rodriguez, Milagros Rivera, J. Allen Bobo, and Lutz, Bobo & Telfair, P.A., and against Plaintiff Maralago Cay Homeowners Association, Inc., as to all claims.

2. The Clerk of Court shall **CLOSE THIS CASE**.

3. All pending motions are **DENIED AS MOOT**.

SIGNED in Chambers at West Palm Beach, Florida, this 4 day of October, 2021.

/s/ Donald M. Middlebrooks

Opinion

RECOMMENDATION OF UNITED STATES MAGISTRATE JUDGE

Magistrate Judge Scott T. Varholak

[*2] This matter is before the Court on four motions: (1) Defendant IDT Corporation's ("IDT") Motion to Dismiss ("IDT's Motion to Dismiss") [#88]; (2) Defendants Communications Distributors, LLC ("CDI") and Robert Dieter's Motion to Dismiss ("CDI's Motion to Dismiss") [#89]; (3) Plaintiffs' Motion to Dismiss CDI's Counterclaims ("Plaintiffs' Motion to Dismiss") [#98]; and (4) Plaintiffs' Motion to Strike Affirmative Defenses Nos. 1 and 6 under *Fed. R. Civ. P. 12(f)* ("Plaintiffs' Motion to Strike") [#99]. The Motions have been referred to this Court. [## 91, 101] The Court has carefully considered the Motions and related briefing, the entire case file, and the applicable case law, as well as oral argument held on September 30, 2021 [#110]. For the following reasons, the Court respectfully **RECOMMENDS** that IDT's Motion to Dismiss be **GRANTED IN PART** and **DENIED IN PART**, CDI's Motion to Dismiss be **GRANTED IN PART** and **DENIED IN PART**, Plaintiffs' Motion to Dismiss be **GRANTED IN PART** and **DENIED IN PART**, and Plaintiffs' Motion to Strike be **DENIED**.

I. BACKGROUND

Plaintiffs' Amended Complaint asserts twelve claims: (1) breach of contract against CDI,[1] IDT, and Robert Dieter [#87 at ¶¶ 144-52]; (2) tortious interference with contract against all Defendants [*id.* at ¶¶ 153-66]; (3) declaratory judgment asking the Court to declare that certain provisions of a Master Distribution Agreement (the "Agreement") entered into by IIT, Inc. ("IIT"), Abas Abdi, and CDI are unenforceable [*id.* at ¶¶ 167-72]; (4) violation of the Colorado Antitrust Act and the Sherman Antitrust Act against all Defendants [*id.* at ¶¶ 173-84]; (5) conversion against all Defendants [*id.* at ¶¶ 185-89]; (6) civil theft against CDI and **[*3]** IDT [*id.* at ¶¶ 190-95]; (7) breach of fiduciary duty against CDI and IDT [*id.* at ¶¶ 196-203]; (8) civil conspiracy against CDI and IDT [*id.* at ¶¶ 204-11]; (9) promissory estoppel against CDI and Mr. Dieter [*id.* at ¶¶ 212-17]; (10) a demand for an accounting [*id.* at ¶¶ 218-22]; (11) equal rights violation pursuant to *42 U.S.C. § 1981* against all Defendants [*id.* at ¶¶ 223-31]; and (12) unjust enrichment against all Defendants [*id.* at ¶¶ 234-38]. IDT's Motion to Dismiss seeks to dismiss all claims asserted against it. [#88] CDI's Motion to Dismiss seeks to dismiss all claims against Mr. Dieter[2] and Claims Two, Four, Seven, Eight, Nine, Eleven, and Twelve against CDI. [#89]

In addition to moving to dismiss several claims against it, CDI also filed three counterclaims against both Plaintiffs: (1) breach of contract [#90 at ¶¶ 58-64]; (2) tortious interference with contractual relationships [*id.* at ¶¶ 65-68]; and (3) defamation [*id.* at ¶¶ 69-73]. Plaintiffs have moved to dismiss all three counterclaims. [#98] Additionally, Plaintiffs have moved to strike two affirmative defenses raised by CDI: (1) Affirmative Defense One stating that one or more of Plaintiffs' claims **[*4]** fail to state facts sufficient to support a cause of action, and (2) Affirmative Defense Six stating that Plaintiffs' claims are frivolous, groundless, vexatious, and lack substantial justification as contemplated by *Federal Rule of Civil Procedure 11* and *Colo. Rev. Stat. § 13-17-102*. [#99]

---

[1] The caption to the Amended Complaint names CDI twice, first as a dissolved Colorado limited liability company and second as a Florida limited liability company. [#87] Nonetheless, the Amended Complaint treats CDI as a single entity and does not distinguish between the dissolved entity and the operating entity. [*See generally id.*]

[2] It appears from the Amended Complaint that Claims One, Two, Four, Five, Nine, Eleven, and Twelve are all asserted against Mr. Dieter. [*See generally* #87] CDI's Motion states that during conferral with Plaintiffs' counsel, Plaintiffs' counsel indicated that only Claims Two, Nine, Eleven, and Twelve were asserted against Mr. Dieter in his personal capacity. [#89 at 1] Plaintiffs' Response does not challenge this assertion. [*See generally* #100] Nonetheless, during oral argument, Plaintiffs' counsel indicated that he had not intended to concede the additional claims apparently alleged against Mr. Dieter. As a result, out of an abundance of caution, the Court will analyze whether Plaintiff has plausibly alleged Claims One, Four, and Five against Mr. Dieter.

A. Plaintiffs' Claims[3]

Plaintiff IIT is a Colorado corporation owned by Plaintiff Abdi. [#87 at ¶¶ 1-2][4] Mr. Abdi is originally from Somalia and his native language is Somali. [*Id.* at ¶ 2][5] Defendant CDI is a dissolved Colorado limited liability company and recently formed Florida limited liability company. [*Id.* at ¶ 3][6] Defendant Dieter owns and manages CDI and serves as CDI's registered agent. [*Id.* at ¶¶ 3, 5][7] Defendant IDT is a Delaware corporation. [*Id.* at ¶ 4][8]

1. The Agreement and Plaintiffs' Initial Performance

BOSS Revolution ("the Service") is a mobile telephone service developed and owned by Defendant IDT that enables immigrants to call relatives in their home country. [*Id.* at ¶ 1][9] IDT contracted with CDI to distribute the Service. [*Id.* at ¶ 10] IDT and CDI focused on generating revenue from African immigrants living in the United States who had relatives living in Africa. [*Id.* at ¶ 12] Because of Mr. Abdi's cultural connection to African retailers and **[*5]** because Mr. Abdi speaks multiple languages, IDT and CDI targeted Mr. Abdi to distribute the service. [*Id.* at ¶ 14]

IDT and CDI told Plaintiffs that they were looking for distributors who could build markets with foreign customers in the United States. [*Id.* at ¶ 15] CDI's owner, Mr. Dieter, told Mr. Abdi that IIT could "have the entire African market in Colorado and in other states" and that Mr. Abdi would be paid commissions for sales and leads. [*Id.* at ¶ 16] Mr. Dieter further told Mr. Abdi that he would be paid a commission on any sales of the Service or leads generated. [*Id.* at ¶ 17] Mr. Dieter also told Mr. Abdi that if Mr. Abdi developed leads in other states: (1) distributors would be selected for those leads, (2) Mr. Abdi would manage those distributors, and (3) Mr. Abdi would receive commissions from those sales. [*Id.* at ¶ 18]

"On or about April 6, 2012, IIT, Mr. Abdi, and CDI entered into [the Agreement] that permitted and authorized CDI to offer the 'Service' through IIT's distribution channel." [*Id.* at ¶ 20; *see also* #80-2[10]] The Agreement authorized IIT to promote, market, distribute, and sell the Service. [*Id.*] The Agreement set forth discount rates at which CDI and IDT would **[*6]** provide the Service to IIT and discount rates at which IIT could distribute the Service to retailers. [##87 at ¶ 23; 80-2 at 2-3] It also stated that CDI or IDT would pay IIT commissions on sales, provide other benefits, and provide IIT with access to sales and commissions records. [##87 at ¶¶ 24-26; 80-2 at 3-4]

In signing the Agreement, IIT acknowledged that it would not acquire proprietary or other rights in the Service. [##87 at ¶ 29; 80-2 at 4] The Agreement contained a "Non-Compete; Non-solicitation" provision stating that IIT could not engage in competitive business against CDI for a period of three years after termination of the Agreement. [##87 at ¶ 35; 80-2 at 6] Finally, the Agreement stated that CDI could only terminate the Agreement

---

[3] The facts in this Section are drawn from the allegations in Plaintiffs' Amended Complaint [#87], which must be taken as true when considering IDT's Motion to Dismiss and CDI's Motion to Dismiss. *See* *Wilson v. Montano, 715 F.3d 847, 850 n.1 (10th Cir. 2013)* (citing *Brown v. Montoya, 662 F.3d 1152, 1162 (10th Cir. 2011)*).

[4] The Complaint has two sets of Paragraphs 1-5. In this instance, the Court cites to the second set of Paragraphs 1 and 2.

[5] In this instance, the Court cites to the second Paragraph 2.

[6] In this instance, the Court cites to the second Paragraph 3.

[7] In this instance, the Court cites to the second set of Paragraphs 3 and 5.

[8] In this instance, the Court cites to the second Paragraph 4.

[9] In this instance, the Court cites to the first Paragraph 1.

[10] The Agreement was referenced as an attachment to the Amended Complaint [##87, ¶ 20; 80-2] and is therefore properly considered by the Court in evaluating both IDT's Motion to Dismiss and CDI's Motion to Dismiss. *Smith v. United States, 561 F.3d 1090, 1098 (10th Cir. 2009)* ("In evaluating a *Rule 12(b)(6)* motion to dismiss, courts may consider not only the complaint itself, but also attached exhibits . . . and documents incorporated into the complaint by reference." (citations omitted)).

upon the occurrence of: (1) IIT's insolvency or bankruptcy, (2) breach of the Agreement by IIT without a cure within fifteen days of notice, or (3) a finding by a governmental authority that the Agreement is contrary to law. [##87 at ¶ 33; 80-2 at 5] If IIT's breach caused the termination, IIT's commissions were to continue for twelve months. [*Id.*]

Mr. Abdi and IIT performed their obligations under the Agreement by creating a network of customers **[*7]** for the Service, which generated significant revenue for CDI and IDT. [#87 at ¶¶ 36-38, 42] Indeed, IIT ranked first or second on the list of CDI's distributors. [*Id.* at ¶ 48] At their peak, Mr. Abdi and IIT had over 950 retail stores in their distributor network and CDI paid IIT between $195,000 and $225,000 annually. [*Id.* at ¶ 49] IIT and Mr. Abdi expended significant resources developing their customer leads. [*Id.* at ¶¶ 39-41, 44]

2. CDI's Reduction of Distributors Generally

In approximately 2014, IDT instructed CDI to begin cutting distributors to generate additional profits for IDT and CDI.[11] [#87 at ¶¶ 2, 51] Thus, Mr. Dieter and Patricia Rumero[12] began contacting distributors seeking to amend or terminate the distributors' master distributor agreements. [*Id.* at ¶¶ 3, 52-58][13] Mr. Dieter and Ms. Rumero falsely stated that they were amending or terminating the master distributor agreements because the distributors were not producing. [*Id.* at ¶ 53] Mr. Dieter also told some of these distributors that IDT had ordered him to terminate the agreements. [*Id.* at ¶¶ 54-55]

"Near the end of 2016 and into 2017, IDT and CDI agreed to a scheme whereby they would keep (or not pay) substantial **[*8]** revenues generated by the distributors."[14] [*Id.* at ¶ 64] CDI, stating that it was acting on orders from IDT, told distributors that the master distribution agreements needed to be amended or else CDI and IDT would be forced to bar all distributors from distributing the Service through their respective retailer network. [*Id.* at ¶ 65] The only distributors targeted, however, were African or Muslim immigrants. [*Id.* at ¶ 66] These distributors were targeted "because IDT, CDI, and [Mr.] Dieter all reasoned that immigrants who were African or Muslim were stupid, had no access to legal resources, and, in any event, they would not know how to vindicate their claims in court." [*Id.* at ¶ 67]

"[Mr.] Dieter, IDT, and CDI did not take kindly when distributors challenged them on the changes to the [m]aster [d]istributor [a]greement[s]." [*Id.* at ¶ 72] For example, on one occasion, a distributor's commissions were stopped after the distributor questioned the amendment. [*Id.* at ¶ 73] "Most of the distributors, under economic pressure, caved to IDT and CDI's demands to alter the agreements without additional consideration." [*Id.* at ¶ 74]

3. CDI's Specific Actions Toward Plaintiffs

At some point,[15] CDI and **[*9]** IDT realized that Mr. Abdi and IIT had built a significant African-based retail and customer market, thereby achieving IDT's and CDI's needs. [*Id.* at ¶ 50] CDI and IDT decided they no longer

---

[11] The Court has done its best to attempt to reconstruct the exact timeline of events outlined in the Amended Complaint. The Amended Complaint is often disjointed—jumping from one timeframe to another—and it is difficult to determine when various actions were alleged to have occurred.

[12] The Amended Complaint identifies Ms. Rumero as an "employee" but does not indicate whether she was an employee of IDT or CDI. [*Id.* at ¶ 3] Given that Plaintiffs allege that Ms. Rumero "performed the bulk of the work in stealing Plaintiffs' retailers" [*id.* at ¶ 90], Plaintiffs failure to precisely identify Ms. Rumero's employer is especially troubling. It appears from CDI's counterclaims that Ms. Rumero is CDI's Sales Director. [#90 at ¶ 24]

[13] In this instance, the Court cites to the first Paragraph 3.

[14] Again, it is not clear from the Amended Complaint whether this was a new "scheme" or was merely a continuation of the actions that allegedly began in 2014. This distinction does not affect the Court's analysis.

[15] Once again, the Amended Complaint rarely provides specific dates and instead generally refers to the four-year timeframe of 2014-2018.

needed assistance from Mr. Abdi and IIT. [*Id.*] CDI and IDT thus refused to provide leads to IIT, preventing IIT from obtaining commissions. [*Id.* at ¶ 46] CDI and IDT also refused to pay commissions for leads that IIT developed or assisted in developing. [*Id.* at ¶ 47]

At some unspecified date,[16] CDI presented Mr. Abdi and IIT with a new master distributor agreement. [*Id.* at ¶ 77] When Mr. Abdi was asked to amend the Agreement, he hired a lawyer and refused to do so. [*Id.* at ¶¶ 2, 58, 80] In response, CDI threatened to terminate the Agreement. [*Id.* at ¶ 2][17] After IIT's and Mr. Abdi's attorneys intervened, however, CDI backed down. [*Id.*]

Still, "[w]hen Plaintiffs declined to enter into the new master distributor agreement, Defendants retaliated against Plaintiffs." [*Id.* at ¶ 81] "IDT, CDI, and [Mr.] Dieter[] agreed to steal Plaintiffs['] retailers from Plaintiffs' network." [*Id.* at ¶ 82] IDT and CDI told Plaintiffs' retailers that they could get a better rate than the rate provided by Plaintiffs.[18] [*Id.* **[*10]** at ¶¶ 83, 85-95] This created discontent with the retailers and required IIT to provide a different rate, causing IIT to lose money. [*Id.* at ¶ 84] CDI and IDT also stopped providing IIT a promotion code to give customers; instead, CDI and IDT provided customers promotion codes themselves—"rais[ing] questions in the [r]etailer's minds about why Plaintiffs did not provide them the promotional code."[19] [*Id.* at ¶ 101] In some instances, new accounts were set up for the retailers and the retailers' use of the Service would be billed through these new numbers, thereby depriving Plaintiffs of the commissions from those retailers. [*Id.* at ¶ 102]

On August 24, 2015[20], CDI's legal counsel sent Plaintiffs a letter alleging breach of the Agreement and giving Plaintiffs fifteen days to cure. [*Id.* at ¶¶ 104-05] The letter alleged that Plaintiffs did not use their best efforts to promote, market, and distribute the Service. [*Id.* at ¶ 104] The letter further alleged that Plaintiffs were not favorably conducting business. [*Id.* at ¶ 105]

On September 9 and 15, 2015, Plaintiffs disputed the allegation and sought clarification. [*Id.* at ¶ 106] On September 23, 2015, CDI responded and cited Plaintiffs' decline in sales as evidence of the breach. [*Id.* at ¶ 107] In that same letter, without providing specifics, CDI indicated that Plaintiffs had disparaged CDI and IDT. [*Id.* at ¶ 108] Nonetheless, the letter stated that CDI did not wish to terminate its relationship with IIT. [*Id.* at ¶ 109]

On January 11, 2016, CDI told Plaintiffs about a new INACTIVE Retailer Campaign designed to reduce the number of inadequately performing accounts; this program was not part of the Agreement. **[*11]** [*Id.* at ¶ 110] On February 3, 2016, CDI again alleged that Plaintiffs were in breach of the Agreement for failing to use their best efforts to promote the Service and disparaging CDI, IDT, and the Service. [*Id.* at ¶ 111-12] On February 16, 2016, IIT

---

[16] From the Amended Complaint, it is impossible to determine whether this incident occurred before or after CDI and IDT stopped providing leads. It is likewise impossible to determine whether this incident occurred before or after the correspondence described below.

[17] In this instance, the Court cites to the first Paragraph 2.

[18] Although the Amended Complaint alleges that both IDT and CDI were involved in these calls, the only individuals specifically identified as having made the calls are Mr. Dieter and Ms. Rumero. [*Id.* at ¶¶ 83, 85-95]

[19] It is possible, though far from clear from the Amended Complaint, that Ms. Rumero—the person who is alleged to have been primarily involved in the conversations with retailers [*id.* at ¶ 90]—may have allegedly engaged in other actions related to the retailers besides offering the retailers better rates. In Paragraph 96, Plaintiffs allege verbatim: "At times, during her visit, Ms. Rumero, acting on the orders of Defendants, would make changes to the retailers' account with the ultimate goal of changing the retailers' account number to make it appear as if there was no." [*Id.* at ¶ 96] And that is where the sentence ends. The Court is left to forever wonder why Ms. Rumero would allegedly change the retailers' account numbers. In the next two paragraphs, Plaintiffs allege that Ms. Rumero made various representations and omissions, but do not identify these representations and omissions. [*Id.* at ¶¶ 97-98] The Court does not know whether these representations or omissions were supposed to have been included in the unfinished Paragraph 96, or whether Paragraphs 97 and 98 are merely conclusory statements.

[20] The Amended Complaint refers to the date of this letter as both "August 24, 2015" and "August 24, 2014." [#87 at ¶¶ 104-105] The Court assumes, based on the dates provided in the surrounding paragraphs, that the correct year is 2015.

responded to the breach allegation, asked CDI to stop unilaterally amending the Agreement, and requested an accounting. [*Id.* at ¶¶ 113-14] CDI never provided an accounting. [*Id.* at ¶ 116]

In total, CDI removed approximately 700 retail accounts from IIT's distributor network. [*Id.* at ¶ 118] On July 18, 2018, Mr. Abdi sent a text message to an IDT employee stating that CDI was stealing IIT's business. [*Id.* at ¶ 119] On July 24, 2018, Mr. Abdi sent Mr. Dieter an email asking that CDI and IDT stop calling Plaintiffs' retailers and customers and stop creating new accounts for IIT's retail stores. [*Id.* at ¶ 120] Mr. Abdi also demanded the return of the stolen stores to IIT's network and compensation for lost commissions. [*Id.* at ¶ 121]

On October 26, 2018, CDI terminated the Agreement "as a result of IIT's multiple breaches of the same." [*Id.* at ¶ 123] CDI did not provide any specific details about the breaches. [*Id.* at ¶ 124] CDI did not provide **[*12]** fifteen days' notice for cure. [*Id.* at ¶ 127] CDI stopped paying IIT commissions in November 2018. [*Id.* at ¶ 131] On January 2, 2019, CDI sent Mr. Abdi a letter threatening to withhold post-termination commissions and including a post-termination agreement, which Mr. Abdi and IIT did not sign. [*Id.* at ¶¶ 128-29] On January 15, 2019, CDI sent another letter to Mr. Abdi and IIT stating that it was withholding payment of commissions and placing those commissions in an escrow account. [*Id.* at ¶ 130]

B. CDI's Counterclaims[21]

CDI is a distributor of the Service. [#90, ¶ 1] In addition to distributing the Service directly, CDI also contracts with independent distributors. [*Id.* at ¶ 2] On April 6, 2012, CDI and IIT entered into the Agreement. [*Id.* at ¶ 3] The Agreement provides:

> The terms and conditions of this Agreement, and all proprietary information regarding the Service and its distribution, shall be confidential between the parties, and neither shall reveal such terms, conditions or information to any third parties other than its accountants or attorneys or as required by process of law. The obligations of this confidentiality provision shall survive the expiration or any termination **[*13]** of this Agreement.

[*Id.* at ¶ 5] This provision is critical to CDI as its distributors and retailers receive different commissions based upon a number of factors, including sales volume. [*Id.* at ¶ 6]

Mr. Abdi and IIT breached this confidentiality provision on several occasions by revealing to other distributors and retailers specific commissions paid by CDI to IIT and other retailers. [*Id.* at ¶ 8] In a malicious attempt to sow discord and damage CDI, Mr. Abdi revealed to other distributors his commission structure and suggested that they demand more from CDI. [*Id.* at ¶ 9] For example, in August of 2018, Mr. Abdi revealed his commission structure to CDI's Kentucky distributor and encouraged the Kentucky distributor to demand a higher commission from CDI. [*Id.* at ¶ 10] Mr. Abdi also revealed his commission rates to retailers. [*Id.* at ¶ 11] Mr. Abdi's revelation of these rates to distributors and retailers was intended to damage, and did indeed damage, CDI. [*Id.* at ¶¶ 12-13]

Another core requirement of the Agreement is the obligation to be available and responsive to retailers. [*Id.* at ¶ 14] It required IIT and Mr. Abdi to manage accounts and review sales to set margins. [*Id.* at ¶ 16] CDI **[*14]** also required distributors, including IIT and Mr. Abdi, to align commission rates based on sales. [*Id.* at ¶ 17] As sales rates increased, so should commissions, particularly if requested by retailers. [*Id.* at ¶ 18] But, for many years, even with strong sales, Plaintiffs failed to align commissions paid to retailers with sales. [*Id.* at ¶ 19] As a result, CDI's competitors gained a competitive advantage with retailers served by IIT. [*Id.* at ¶ 20] At the same time, Mr. Abdi told retailers that he could not provide them a higher commission because the commission he received from CDI was too low, providing the retailers with fabricated commission figures. [*Id.* at ¶ 21]

---

[21] The facts in this Section are drawn from the allegations in CDI's Counterclaims [#90 at 17-22], which must be taken as true when considering Plaintiffs' Motion to Dismiss. *See* [*Wilson, 715 F.3d at 850 n.1*].

In addition to providing retailers with false commission figures, Plaintiffs also ignored retailers. [*Id.* at ¶ 23] CDI received numerous complaints from retailers that Mr. Abdi could not be reached. [*Id.*] When CDI tried to reach Mr. Abdi about the complaints, Mr. Abdi would not answer. [*Id.*] Often, Mr. Abdi's voicemail was full. [*Id.* at ¶¶ 24-25] As a result of Mr. Abdi's inattentiveness to consumers, sales of the Service at retail stores serviced by Mr. Abdi declined precipitously. [*Id.* at ¶ 28] This resulted in lost revenue **[*15]** for CDI. [*Id.* at ¶ 32]

The Agreement further provides: "Distributor shall use its best efforts to promote, market and distribute the Service to Retailers." [*Id.* at ¶ 33] On January 1, 2015, Boss Revolution instituted a program call BR Rewards that incentivized distributors to increase sales of the Service. [*Id.* at ¶ 34] All distributors, including IIT, were required to encourage retailers to sign up for the BR Rewards program. [*Id.* at ¶ 35] Ten months after the program began, over 100 retailers that IIT serviced had not signed up for the BR Rewards program. [*Id.* at ¶ 36] Similarly, Boss Revolution engaged in a marketing initiative called "Paint the Town Red." [*Id.* at ¶ 38] CDI instructed distributors such as IIT to contact their retailers to encourage participation. [*Id.* at ¶ 39] IIT refused to participate in the Paint the Town Red program, and by one year into the program not a single IIT retailer had enrolled. [*Id.* at ¶ 40]

On an ongoing basis, Mr. Abdi made racist and anti-Semitic comments about Mr. Dieter to IDT employees, CDI employees, distributors, and retailers. [*Id.* at ¶ 43] Retailers and distributors informed CDI employees that Mr. Abdi consistently emphasized Mr. Dieter's **[*16]** Jewish heritage. [*Id.* at ¶ 44] After CDI terminated IIT, Mr. Abdi told several people in the industry that the sole reason for the termination was that Mr. Dieter is Jewish and Mr. Abdi is Black and Muslim. [*Id.* at ¶ 45] Mr. Abdi also threatened to "make war" with CDI. [*Id.* at ¶ 46]

On several occasions, Mr. Abdi falsely told retailers that CDI would steal money from them. [*Id.* at ¶ 47] For example, in July 2018, Mr. Abdi called a Denver retailer and falsely claimed that CDI diverted funds from their account. [*Id.* at ¶ 48] That same month, Mr. Abdi told the owner of another Denver retailer that CDI would "take full control of his credit card." [*Id.* at ¶ 49] The next month, Mr. Abdi told the owner of an Omaha retailer that CDI would steal her residuals. [*Id.* at ¶ 50] These actions were taken to damage CDI and caused quantifiable losses. [*Id.* at ¶ 51]

CDI provided numerous notices to Plaintiffs, formally and informally, of IIT's failure to meet its contractual obligations. [*Id.* at ¶ 52] Plaintiffs were given opportunities to comply and cure the breaches, but failed to do so. [*Id.* at ¶ 53] As a result, CDI validly terminated the Agreement. [*Id.* at ¶ 56] Nonetheless, CDI paid Mr. Abdi for **[*17]** twelve months commissions. [*Id.* at ¶ 57]

II. LEGAL STANDARD

Federal Rule of Civil Procedure 12(b)(1) empowers a court to dismiss a complaint for "lack of subject-matter jurisdiction." Dismissal under *Rule 12(b)(1)* is not a judgment on the merits of a plaintiff's case, but only a determination that the court lacks authority to adjudicate the matter. *See* *Castaneda v. INS, 23 F.3d 1576, 1580 (10th Cir. 1994)* (recognizing federal courts are courts of limited jurisdiction and may only exercise jurisdiction when specifically authorized to do so). A court lacking jurisdiction "must dismiss the cause at any stage of the proceedings in which it becomes apparent that jurisdiction is lacking." *Basso v. Utah Power & Light Co., 495 F.2d 906, 909 (10th Cir. 1974)*.

Under *Federal Rule of Civil Procedure 12(b)(6)*, a court may dismiss a complaint for "failure to state a claim upon which relief can be granted." In deciding a motion under *Rule 12(b)(6)*, a court must "accept as true all well-pleaded factual allegations . . . and view these allegations in the light most favorable to the plaintiff." *Casanova v. Ulibarri, 595 F.3d 1120, 1124 (10th Cir. 2010)* (alteration in original) (quoting *Smith v. United States, 561 F.3d 1090, 1098 (10th Cir. 2009)*). Nonetheless, a plaintiff may not rely on mere labels or conclusions, "and a formulaic recitation of the elements of a cause of action will not do." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible **[*18]** on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed.*

2d 868 (2009) (quoting Twombly, 550 U.S. at 570). Plausibility refers "to the scope of the allegations in a complaint: if they are so general that they encompass a wide swath of conduct, much of it innocent, then the plaintiffs 'have not nudged their claims across the line from conceivable to plausible.'" Robbins v. Oklahoma, 519 F.3d 1242, 1247 (10th Cir. 2008) (quoting Twombly, 550 U.S. at 570). "The burden is on the plaintiff to frame a 'complaint with enough factual matter (taken as true) to suggest' that he or she is entitled to relief." *Id.* (quoting Twombly, 550 U.S. at 556). The ultimate duty of the court is to "determine whether the complaint sufficiently alleges facts supporting all the elements necessary to establish an entitlement to relief under the legal theory proposed." Forest Guardians v. Forsgren, 478 F.3d 1149, 1160 (10th Cir. 2007).

Pursuant to Federal Rule of Civil Procedure 12(f), the Court—sua sponte or on a motion made by a party—"may strike from a pleading an insufficient defense or any redundant, immaterial, impertinent, or scandalous matter." The Court "possesses considerable discretion in disposing of a Rule 12(f) motion to strike" and "[a]ny doubt about whether the challenged material is redundant, immaterial, impertinent, or scandalous should be resolved in favor of the non-moving party." 5C Charles A. Wright et al., Fed. Prac. & Proc. § 1382 (3d ed. 2019).

"[A]s a general matter, motions to **[*19]** strike under Rule 12(f) are disfavored." Broach v. Yegappan, No. 17-CV-02791-MSK-NYW, 2019 U.S. Dist. LEXIS 213651, 2019 WL 6724246, at *2 (D. Colo. Dec. 11, 2019) (quotation omitted). "[B]ecause federal judges have made it clear, in numerous opinions they have rendered in many substantive contexts, that Rule 12(f) motions to strike on any of the[ ] grounds [articulated in the text of the Rule] are not favored, often being considered purely cosmetic or 'time wasters,' there appears to be general judicial agreement, as reflected in the extensive case law on the subject, that they should be denied unless the challenged allegations have no possible relation or logical connection to the subject matter of the controversy." 5C Charles A. Wright et al., Fed. Prac. & Proc. § 1382 (3d ed. 2019) (footnotes omitted). Motions to strike thus "are usually only granted when the allegations have no bearing on the controversy and the movant can show that he has been prejudiced." Kimpton Hotel & Rest. Grp., LLC v. Monaco Inn, Inc., No. CIV.A. 07-CV-01514-W, 2008 U.S. Dist. LEXIS 5278, 2008 WL 140488, at *1 (D. Colo. Jan. 11, 2008).

III. ANALYSIS

As set forth above, Plaintiffs' Amended Complaint asserts twelve claims: (1) breach of contract against CDI, IDT, and Mr. Dieter [#87 at ¶¶ 144-52]; (2) tortious interference with contract against all Defendants [*id.* at ¶¶ 153-66]]; (3) declaratory judgment asking the Court to declare that certain provisions of the Agreement are unenforceable [*id.* at **[*20]** ¶¶ 167-72]; (4) violation of the Colorado Antitrust Act and the Sherman Antitrust Act against all Defendants [*id.* at ¶¶ 173-84]; (5) conversion against all Defendants [*id.* at ¶¶ 185-89]; (6) civil theft against CDI and IDT [*id.* at ¶¶ 190-95]; (7) breach of fiduciary duty against CDI and IDT [*id.* at ¶¶ 196-203; (8) civil conspiracy against CDI and IDT [*id.* at ¶¶ 204-11]; (9) promissory estoppel against CDI and Mr. Dieter [*id.* at ¶¶ 212-17]; (10) a demand for an accounting [*id.* at ¶¶ 218-22]; (11) equal rights violation pursuant to 42 U.S.C. § 1981 against all Defendants [*id.* at ¶¶ 223-31]; and (12) unjust enrichment against all Defendants [*id.* at ¶¶ 234-38]. IDT's Motion to Dismiss seeks to dismiss all claims asserted against it. [#88] CDI's Motion to Dismiss seeks to dismiss all claims against Mr. Dieter and Claims Two, Four, Seven, Eight, Nine, Eleven, and Twelve against CDI. [#89]

CDI has filed three counterclaims against both Plaintiffs: (1) breach of contract [#90 at ¶¶ 58-64]; (2) tortious interference with contractual relationships [*id.* at ¶¶ 65-68]; and (3) defamation [*id.* at ¶¶ 69-73]. Plaintiffs have moved to dismiss all three counterclaims. [#98] Additionally, Plaintiffs have moved to strike **[*21]** two affirmative defenses raised by CDI: (1) Affirmative Defense One stating that one or more of Plaintiffs' claims fail to state facts sufficient to support a cause of action, and (2) Affirmative Defense Six stating that Plaintiffs' claims are frivolous, groundless, vexatious, and lack substantial justification as contemplated by Federal Rule of Civil Procedure 11 and Colo. Rev. Stat. § 13-17-102. [#99]

The Court will first address IDT's Motion to Dismiss. Next, the Court will turn to CDI's Motion to Dismiss. Third, the Court will address Plaintiffs' Motion to Dismiss. Finally, the Court will address Plaintiffs' Motion to Strike.

A. IDT's Motion to Dismiss

IDT has moved to dismiss all claims against it. [#88] The Court addresses each claim in turn.

1. Claim One: Breach of Contract

Under Colorado Law, a breach of contract claim requires: (1) existence of a contract; (2) performance by the plaintiff; (3) failure to perform by the defendant; and (4) damages. *Shell v. Am. Fam. Rights Ass'n, 899 F. Supp. 2d 1035, 1058 (D. Colo. 2012)* (citing *W. Distrib. Co. v. Diodosio, 841 P.2d 1053, 1058 (Colo. 1992)*). With respect to the first element, a plaintiff "must show that the contract was properly formed," with "mutual assent to an exchange between competent parties—where an offer is made and accepted—regarding a subject matter which is certain, and for which there is legal consideration." **[*22]** *Galvin v. McCarthy, No. 07-cv-00885-PAB-BNB, 2009 U.S. Dist. LEXIS 30041, 2009 WL 890717, at *6 (D. Colo. Mar. 31, 2009)* (citing *Indus. Prods. Int'l, Inc. v. Emo Trans, Inc., 962 P.2d 983, 988 (Colo. App. 1997)*).

IDT argues that the Amended Complaint fails to allege the existence of a contract between Plaintiffs and IDT. [#88 at 7-8] The Court agrees. The Agreement itself states that it is "by and between [Mr. Abdi] and IIT . . . and [CDI]." [#80-2 at 1] And IDT is neither a signatory nor party to the contract. [*See generally Id.*]

In their response, Plaintiffs argue that a contract need not be in writing to be enforceable and that a written contract need not be signed. [#100 at 5] It is true that "common law contract principles . . . allow for the formation of contracts without the signatures of the parties bound by them." *Yaekle v. Andrews, 195 P. 3d 1101, 1107 (Colo. 2008)*. But such a principle does not negate the other requirements of contract formation. *See* *Galvin, 2009 U.S. Dist. LEXIS 30041, 2009 WL 890717, at *6*. In other words, even without IDT's signature, Plaintiffs could successfully plead that IDT was bound to the Agreement, but only by pleading other facts that plausibly allege "mutual assent . . . where an offer is made and accepted—regarding a subject matter which is certain, and for which there is legal consideration." *Id.*; *see also* *I.M.A., Inc. v. Rocky Mountain Airways, Inc., 713 P.2d 882, 888 (Colo. 1987)* (stating that the parties' agreement to establish a contract can be inferred from conduct or oral statements). **[*23]** The Complaint contains no such allegations.

Plaintiffs also argue that the Agreement "includes a number of provisions under which IDT is obligated to perform obligations owed to Plaintiffs." [#100 at 6] For example, the Agreement states that "IDT and CDI hereby authorize" IIT to promote the Service. [#80-2 at 2] Elsewhere, the Agreement states that commissions will be paid "by CDI or IDT." [*Id.* at 3] But the Amended Complaint fails to plausibly allege that IDT assented to be bound by these terms or that IDT authorized CDI to bind IDT to the Agreement.[22] The Court declines to find that the mention of IDT by name in the contract between CDI and Plaintiffs could, on its own, bind IDT to that Agreement.

Plaintiffs further argue that the Amended Complaint plausibly alleges a breach of contract claim because it "alleges that IDT performed under the Agreement by sending Plaintiffs leads, by sending Plaintiffs Point of Sale . . . materials, by requiring that Plaintiffs adhere to the confidentiality provision in the [Agreement], by providing training directly to Plaintiffs, [and] by paying Plaintiffs commissions as called for under the [Agreement]." [#100 at 6-7] But nothing in the Amended Complaint **[*24]** plausibly alleges that IDT performed these tasks because they were a party to the Agreement—as opposed to performing these tasks out of its own self-interest, such as generating additional revenue, or out of a separate obligation, such as an agreement between IDT and CDI. Thus, the fact that

[22] The Amended Complaint states: "IDT developed the Service, but IDT could not sell the service without distributors. IDT contracted with CDI and with Plaintiffs to distribute the Service." [#87 at ¶ 10] But this does not allege that IDT gave CDI permission to contract on its behalf; it alleges only that CDI's contract with IDT permitted CDI to take additional actions in order to distribute the Service. And the conclusory statement that IDT contracted with Plaintiffs is insufficient to demonstrate an actual contract where the Agreement does not include IDT as a party and the Amended Complaint fails to allege the terms of any other agreement—oral or written—between IDT and Plaintiffs.

IDT performed some of the actions listed in the Agreement does not in turn mean that IDT was a party to the Agreement.

Accordingly, this Court RECOMMENDS that Claim One be DISMISSED as to Defendant IDT for failure to allege the existence of a contract between Plaintiffs and IDT. This Court further RECOMMENDS that Claims Three and Ten be DISMISSED as to IDT. Claim Three requests a declaratory judgment invalidating the non-competition and nonsolicitation provisions of the Agreement between Plaintiffs and CDI. Because the Complaint does not sufficiently allege that Defendant IDT was a party to that, or any, contract, the Complaint does not sufficiently allege a claim regarding the provisions of that Agreement as to IDT. Similarly, Claim Ten requests an accounting, which Plaintiffs allege they are entitled to as part of the terms of the Agreement between Plaintiffs and CDI. Because this Court finds **[*25]** that Plaintiffs have not sufficiently alleged that IDT was a party to that Agreement, the Complaint fails to sufficiently allege that Plaintiffs are entitled to an accounting by IDT.[23]

2. Claim Two: Tortious Interference

Claim Two alleges both tortious interference with an existing contract and tortious interference with a prospective business relation. [#87 at ¶¶ 153-66] "Except in one respect, the elements of the[se] claims are the same; the Plaintiff must allege: (i) it had either a valid existing contract with a third party or that it expected to enter into a contract with a third party; (ii) the Defendants induced or otherwise caused the third party to breach the contract or not enter into the contractual relation; and (iii) the Defendants did so intentionally and via improper means." *Tara Woods Ltd. P'ship v. Fannie Mae, 731 F.Supp.2d 1103, 1119 (D. Colo. 2010)* (citing *Harris Grp., Inc. v. Robinson, 209 P.3d 1188, 1195-96 (Colo. App. 2009)*).

IDT argues that Plaintiffs have failed to allege either an existing or expected contract or that IDT engaged in intentional or improper interference. [#88 at 10-13] In response, Plaintiffs maintain that they had relationships with various retailers, the Agreement provided Plaintiffs an exclusive right to commissions from those retailers, and IDT acted to remove **[*26]** those retailers from Plaintiffs' distribution network. [#100 at 8-9] Because the Court agrees that the Amended Complaint does not sufficiently allege that IDT engaged in intentional and improper interference, and therefore does not sufficiently allege a tortious interference claim, the Court does not address whether Plaintiffs have sufficiently alleged a valid existing or expected contract with a third party.

Here, the Amended Complaint cites to three allegedly improper means of interference. [#87 at ¶ 163] Specifically, the Amended Complaint alleges that IDT, CDI and Mr. Dieter: (1) provided promotional discounts directly to the retailers without providing such codes to Plaintiffs, (2) opened new retail accounts for retailers in Plaintiffs' distribution network, contrary to the Agreement's terms, and (3) took leads that Plaintiffs identified and developed by telling those leads that IDT, CDI and Plaintiffs were the same. [*Id.*] The first two of these allegedly improper means of interference do not constitute improper interference, and the third is insufficiently pled.

[23] "Although an accounting is an extraordinary remedy, it may be ordered if the plaintiff is unable to determine how much, if any, money is due him or her from another." *Patterson v. BP Am. Prod. Co., 159 P.3d 634, 642 (Colo. App. 2006)*, *overruled on other grounds by* *185 P.3d 811 (Colo. 2008)* (citing *Andrikopoulos v. Broadmoor Mgmt. Co., 670 P.2d 435 (Colo. App. 1983)*). "Under Colorado law, a demand for an accounting and a refusal to comply with the demand must be pleaded and proved." *Postal Instant Press v. Jackson, 658 F. Supp. 739, 743 (D. Colo. 1987)* (citing *Am. Woodmen's Life Ins. Co. v. Supreme Camp of Am. Woodmen, 37 Colo. App. 311, 549 P.2d 423, 425 (Colo. App. 1976)*). However, exceptions to the pre-suit demand requirement apply where preclusion of the accounting claim would be unreasonable, such as where the accounting claim is ancillary to a breach of contract claim and its main purpose is to facilitate an accurate calculation of damages once the breach of contract is found. *See* *Kirzhner v. Silverstein, 09-CV-02858-CMA, 2010 U.S. Dist. LEXIS 74963, 2010 WL 2985615, at *12 (D. Colo. July 23, 2010)*; *Patterson, 159 P.3d 634 at 642*. Here, Plaintiffs' accounting claim centers on its assertion that the Agreement requires CDI and IDT to provide records regarding commissions due under the Agreement. [#87 at ¶ 219] But because Plaintiffs have not sufficiently alleged that IDT was a party to the Agreement, they are not entitled to an accounting from IDT.

Under Colorado law it is not enough for a plaintiff to allege mere interference; "[i]n order to be tortious, the interference **[*27]** must also be by improper means." *Bolsa Res., Inc. v. Martin Res., Inc., No. 11-cv-01293-MSK-KMT, 2014 U.S. Dist. LEXIS 138369, 2014 WL 4882132, at *9 (D. Colo. Aug. 28, 2014)* (citing *Amoco Oil Co. v. Ervin, 908 P.2d 493, 500 (Colo. 1995)*, *recommendation aff'd and adopted*, *2014 U.S. Dist. LEXIS 138367, 2014 WL 4980045 (Sept. 30, 2014)*. "Threats of physical violence or law suits, economic pressure, and misrepresentations qualify as improper inducements to breach contractual or business relationships." *Id.* (citing *Restatement (Second) of Torts § 767 cmt c* (1979)). But competitive self-interest, including persuading third parties to change providers, is not improper on its own. *Id.; see also Campfield v. State Farm Mut. Auto. Ins. Co., 532 F.3d 1111, 1123 (10th Cir. 2008)* (stating that competitive self-interest is not, by itself, improper, even if it harms competitors); *Amoco Oil, 908 P.2d at 502* ("[A]n actor may use persuasion . . . without engaging in wrongful means"). Thus, the mere fact that IDT attempted to remove the retailers from Plaintiffs' network—through actions such as offering the retailers better rates or discounts—does not constitute improper interference.[24] For this reason, the first two allegedly improper means of interference fail to support Plaintiffs' claim.

The third allegedly improper means of interference has been insufficiently pled. To the extent the Amended Complaint makes vague references to IDT taking improper actions—such as by misrepresenting information to Plaintiffs' retailers—the allegations are insufficient to support an intentional interference claim. **[*28]** [*See* #87 at ¶¶ 97-101] "In the context of a tortious interference claim, 'the heightened pleading standard [of *Rule 9(b)*] . . . applies to the fraudulent inducement element of the tortious interference claim.'" *Purac Am. Inc. v. Birko Corp., No. 14-cv-01669-RBJ, 2015 U.S. Dist. LEXIS 45955, 2015 WL 1598065, at *6* (quoting *Dawson v. Litton Loan Servicing, LP, No. 12-CV-01334-CMA-KMT, 2013 U.S. Dist. LEXIS 49228, 2013 WL 1283848, at *8 (D. Colo. Mar. 28, 2013)*); *see also N. Am. Catholic Educ. Programming Found., Inc. v. Cardinale, 567 F.3d 8, 14 (1st Cir. 2009)* (*Rule 9(b)* apples where "fraudulent misrepresentation is the lynchpin" of tortious interference claim). *Rule 9(b)* requires that "[i]n alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake." *Fed. R. Civ. P. 9(b)*. This heightened pleading standard requires the Complaint to "'set forth the who, what, when, where and how of the alleged fraud,' or, in other words, 'the time, place, and contents of the false representation, the identity of the party making the false statements and the consequences thereof.'" *Purac, 2015 U.S. Dist. LEXIS 45955, 2015 WL 1598065, at *6* (quoting *U.S. ex rel. Sikkenga v. Regence Bluecross Blueshield of Utah, 472 F.3d 702, 726-27 (10th Cir. 2006)*).

As applied here, the Amended Complaint alleges that Ms. Rumero made false "misrepresentations (and omissions)" to the retailers.[25] [#87 at ¶ 97] But it does not provide the time, place, or contents of those false representations or omissions. And, in any event, Ms. Rumero is a representative of CDI, not IDT. The Amended Complaint also makes reference to "CDI and IDT . . . lower[ing] the **[*29]** percentage IIT's retailers received for the Service in CDI's computer system" and attempting to convince retailers that IIT was not providing truthful information to retailers. [*Id.* at ¶ 99] But, once again, this allegation lacks sufficient information to plausibly plead improper interference—the Amended Complaint does not allege the identity of the party making the false statements or the time or place of those false statements. "Indeed, the [Amended Complaint] provide[s] little information about those statements beyond alleging their content" and is therefore insufficient to state a claim under *Rule 9(b)* for fraudulent misrepresentation leading to tortious interference. *Purac, 2015 U.S. Dist. LEXIS 45955, 2015 WL 1598065, at *6*.

---

[24] Nor does the "exclusivity" provision of the Agreement make the interference improper. Initially, the Agreement appears to disclaim any exclusivity, specifically stating that the "Agreement shall not confer upon [Plaintiffs] any type of exclusive right pertaining to the marketing and sale of the Service and CDI and IDT shall retain the right to enter into the same or similar arrangements with other entities." [#80-2 at 4] But, in any event, as detailed above, IDT was not a party to the Agreement and therefore cannot have acted improperly by failing to comply with the terms of the Agreement.

[25] As explained earlier, in Paragraph 96 of the Amended Complaint, Plaintiff alleges: "At times, during her visit, Ms. Rumero, acting on the orders of Defendants, would make changes to the retailers' account with the ultimate goal of changing the retailers' account number to make it appear as if there was no." [*Id.* at ¶ 96] But the sentence ends without explaining the changes to the retailers' accounts or how those changes were fraudulent.

Accordingly, because the Amended Complaint fails to sufficiently allege a claim for tortious interference with contract or prospective business relationship, this Court RECOMMENDS that Claim Two be DISMISSED as to IDT.

3. Claim Four: Violation of State and Federal Antitrust Laws

The Amended Complaint next asserts that IDT violated the Colorado Antitrust Act and *Section 1* of the Sherman Antitrust Act. [#87 at ¶¶ 173-84] "Because federal ***antitrust law*** principles apply to both the federal and state antitrust claims, both claims may be analyzed together." **[*30]** *Arapahoe Surgery Ctr., LLC v. CIGNA Healthcare, Inc., 80 F. Supp. 3d 1257, 1262-63 (D. Colo. 2015)*; *see also* *Colo. Rev. Stat. § 6-4-119* ("[T]he courts shall use as a guide interpretations given by the federal courts to comparable federal antitrust laws").

Section 1 of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations". *15 U.S.C. § 1*; *see also* *Colo. Rev. Stat. § 6-4-104* ("Every contract, combination in the form of a trust or otherwise, or conspiracy in restraint of trade or commerce is illegal."). "[A] person asserting a claim under *§ 1* must prove not only the existence of an agreement or conspiracy between two or more competitors to restrain trade, but also that the restraint is unreasonable." *Buccaneer Energy (USA) Inc. v. Gunnison Energy Corp., 846 F.3d 1297, 1306 (10th Cir. 2017)*. And "[b]ecause *§ 1* of the Sherman Act does not prohibit all unreasonable restraints of trade but only restraints effected by a contract, combination, or conspiracy, the crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express." *Twombly, 550 U.S. at 553* (internal citations and brackets omitted). Accordingly, the pleading stage of an antitrust claim "requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made . . . [and] to raise a reasonable expectation **[*31]** that discovery will reveal evidence of illegal agreement." *Id. at 556*. "Such an agreement is established by evidence that the conspiring parties 'had a conscious commitment to a common scheme designed to achieve an unlawful objective.'" *Arapaho Surgery Center, 80 F. Supp. 3d at 1263* (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*).

IDT argues that Plaintiffs have failed to plead a contract, combination, or conspiracy, and have failed to plausibly plead any wrongdoing by IDT. [#88 at 13-14] The Court agrees that Plaintiffs have failed to plausibly plead a violation of the antitrust laws. "Most claims under [*Section 1* of the Sherman Act] are subject to the 'rule of reason' which requires [the Court] to analyze the relevant market power of defendants and therefore require the plaintiff to allege a valid market." *Campfield v. State Farm Mut. Auto. Ins. Co., 532 F.3d 1111, 1119 (10th Cir. 2008)*. Here, Plaintiffs' Amended Complaint is devoid of any facts concerning the market definition and this failure would ordinarily require dismissal of Plaintiffs' antitrust claims. *See id.* ("Those claims brought by [plaintiff] that fall under the rule of reason must fail because of the legally inadequate market definition within his complaint.").

At oral argument, however, counsel for Plaintiffs clarified that Plaintiffs were pursuing a price fixing claim. "Horizontal price fixing . . . [is a] **[*32]** per se violation[], so [Plaintiffs'] failure to allege a relevant market is not fatal to [that] claim[]." *Id.* (quotation omitted). "Per se violations are restricted to those restraints that would always or almost always tend to restrict competition and decrease output." *Id.* (quotation omitted). "This concern is greatest when actual competitors enter agreements because cooperation among would-be competitors will deprive[] the marketplace of the independent centers of decisionmaking that competition assumes and demands, and risk anti-competitive effects." *Id.* (quotation omitted). Here, however, the Amended Complaint does not allege that CDI and IDT are competitors and, during oral argument, counsel for Plaintiffs acknowledged that CDI and IDT had a vertical arrangement.

Despite acknowledging that CDI and IDT had a vertical arrangement, during oral argument Plaintiffs' counsel nonetheless argued that the Amended Complaint's allegations were sufficient to support a per se violation. But the Tenth Circuit has recognized that, unlike horizontal arrangements between competitors, "[v]ertical arrangements . . . do not generally give rise to the same concerns and often have pro-competitive effects." **[*33]** *Id.* As a result, "[t]o support a per se violation of the Sherman Act, a complaint alleging price fixing . . . must allege conspiracy by competitors." *Id.* Because Plaintiffs' Amended Complaint fails to allege a conspiracy by competitors, Plaintiffs cannot pursue a per se violation of the antitrust laws.[26] And because the Amended Complaint does not contain any other allegations concerning other actions that might violate ***antitrust law*** by impacting competition in the market, Plaintiffs' antitrust claims fail. *Bright v. Moss Ambulance Serv., Inc., 824 F.2d 819, 824 (10th Cir. 1987)* ("Whether a practice violates the antitrust laws is determined by its effect on competition, not its effect on an individual competitor."); *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* (finding that antitrust laws are designed to protect competition, not competitors). Accordingly, this Court RECOMMENDS that Claim Four be DISMISSED as to IDT.

4. Claims Five and Six: Conversion and Civil Theft

The Complaint also asserts two related claims, for conversion and civil theft. [#87 at ¶¶ 185-95] "Conversion is any distinct, unauthorized act of dominion or ownership exercised by one person over personal property belonging to another." *Byron v. York Inv. Co., 133 Colo. 418, 296 P.2d 742, 745 (Colo. 1956)*. "[P]redicates to a successful claim for conversion are the owner's **[*34]** demand for the return of property, and the controlling party's refusal to return it." *Glenn Arms Assoc. v. Century Mortg. & Inv. Corp., 680 P.2d 1315, 1317 (Colo. App. 1984)*. "While Colorado statutes do not define 'civil theft,' Colorado courts only grant triple damages for civil theft under *§ 18-4-405* when a plaintiff has proven conduct that satisfies the statutory definition of criminal theft under *Colo. Rev. Stat. § 18-4-401*."[27] *Internet Archive v. Shell, 505 F. Supp.2d 755, 764 (D. Colo. 2007)* (citing *Itin v. Ungar, 17 P.3d 129, 133 (Colo. 2000)*). "A person commits theft under *section 18-4-401(1)* when he or she 'knowingly obtains, retains, or exercises control over anything of value of another without authorization or by threat or deception,' and acts intentionally or knowingly in ways that deprive the other person of the property permanently." *Van Rees v. Unleaded Software, Inc., 373 P.3d 603, 608, 2016 CO 51 (Colo. 2016)* (citing *§ 18-4-401(1)(a)-(d)*). The statute requires "the specific intent to permanently deprive the owner of the benefit of property." *Itin, 17 P.3d at 134*.

The Complaint alleges that IDT, CDI, and Mr. Dieter "exercised control over Plaintiffs' commissions that IDT and CDI were required to pay Plaintiffs but instead stole from Plaintiffs." [#87 at ¶ 187; *see also id.* at ¶ 193]. IDT argues that these claims fail because IDT did not contract with Plaintiffs and therefore did not owe Plaintiffs any commissions. [#88 at 15] The Court agrees.

As explained above, Plaintiffs have failed to plausibly plead that IDT was a party to the Agreement **[*35]** or any other contract with Plaintiffs. Absent such a contractual relation, Plaintiffs have failed to plausibly plead any obligation on the part of IDT to pay Plaintiffs' commissions.[28] Nor have Plaintiffs pled facts that would enable the Court to conclude that IDT "knowingly obtain[ed], retain[ed], or exercise[ed] control" over Plaintiffs' commissions in some other manner—such as by hacking into Plaintiffs' bank account and taking those commissions after they had been paid. *C.R.S. § 18-4-401(1)(a)-(d)*; *Itin, 17 P.3d at 134*.

In their response, Plaintiffs argue that their "claims for conversion and civil theft are independent of the [Agreement and] . . . the allegation is that Defendants (IDT included) stole Plaintiffs' commissions." [#100 at 14] But neither the Amended Complaint nor the response describe any actions taken by IDT to steal Plaintiffs' commissions. Rather, the Amended Complaint simply alleges that IDT failed to pay commissions that Plaintiffs believe they are owed. But if IDT did not have any obligation to pay such commissions—and as set forth herein, the Amended Complaint has

---

[26] During oral argument, Plaintiff argued that vertical arrangements could indeed support a per se violation and relied on *Budicak, Inc. v. Lansing Trade Grp., LLC* for the proposition that "a typical price-fixing claim involves collusion . . . between two levels in the same supply chain for a particular product (vertical price-fixing)." *452 F. Supp. 3d 1029, 1054 (D. Kan. 2020)*. But the *Budicak* court, too, determined that "the Court has uncovered [no cases] where a court afforded per se analysis to a price-fixing conspiracy between non-competitors." *Id.*

[27] A successful claim of civil theft entitles a plaintiff to triple damages, attorney fees and costs. *Colo. Rev. Stat. § 18-4-405*.

[28] And, in any event, a mere breach of contract will not support an action for conversion. *Byron v. York Investment Co., 133 Colo. 418, 296 P.2d 742, 745 (Colo. 1956)*.

not plausibly pled any such obligation—then IDT cannot have "stolen" the commissions it was under no obligation to pay.

Accordingly, the Court concludes **[*36]** that Plaintiffs have not plausibly pled a civil theft or conversion claim against IDT. The Court therefore RECOMMENDS that Claims Five and Six be DISMISSED as to IDT.

5. Claim Seven: Breach of Fiduciary Duty

The Complaint next asserts a claim for breach of fiduciary duty. [#87 at ¶¶ 196-203] As a prerequisite for a breach of fiduciary duty claim under Colorado law, a plaintiff must show that the defendant was "acting as a fiduciary to the plaintiff." *Oaster v. Robertson, 173 F. Supp. 3d 1150, 1179 (D. Colo. 2016)* (internal quotations omitted). "Although a fiduciary relationship typically involves a special relationship, such as an attorney-client relationship, a fiduciary duty can be created 'when one party has a high degree of control over the property or subject matter of another, or when the benefiting [sic] party places a high level of trust and confidence in the fiduciary to look out for the beneficiary's best interest.'" *Id.* (quoting *MDM Grp. Assoc., Inc. v. CX Reinsurance Co., 165 P.3d 882, 889 (Colo. App. 2007)*).

In support of this Claim, the Amended Complaint states that IDT "acted as Plaintiffs' fiduciary in preserving records, holding on commissions generated from Plaintiffs' retailers, and otherwise agreeing to allow Plaintiff[s] to provide discounted rates to [their] retailers exclusively." [#87 at ¶ 197] But, "[f]iduciary **[*37]** relationships that derive from a special relationship of trust, reliance, influence and control are distinguishable from business relationships involving parties dealing at arm's length for mutual benefits." *Accident & Injury Med. Specialists, P.C. v. Mintz, 279 P.3d 658, 663, 2012 CO 50 (Colo. 2012)*. And "[m]ost business relationships or contractual relationships . . . do not by themselves create fiduciary obligations, and fiduciary obligations should be extended reluctantly to commercial or business transactions." *Id.* (quotation omitted).

Plaintiffs have failed to plead sufficient facts to justify extending a fiduciary relationship to their business dealings with IDT. Conclusory statements that Plaintiffs "placed a high level of trust in Defendants" [#87 at ¶ 200] do not support a finding of a fiduciary relationship. Nor does the fact that "Defendants held all the records" [*id.* at ¶ 201] create a fiduciary relationship where that fact arises only from the business relationship itself. *Id.*[29]

Simply put, the Amended Complaint does not allege facts suggesting that Plaintiffs placed a "high level of trust" in IDT or that a confidential relationship existed. Nor does it allege that IDT had a high level of control over Plaintiffs' property or had assumed a duty to represent Plaintiffs' **[*38]** interests. *Oaster, 173 F. Supp. 3d at 1179*. In fact, Plaintiffs make no allegations as to any direct contact between IDT and Plaintiffs such that a "high level of trust and confidence" would reasonably flow from that relationship.[30] *Id.*

Thus, Plaintiffs have failed to plausibly plead a breach of fiduciary duty claim against IDT. Accordingly, this Court RECOMMENDS that Claim Seven be DISMISSED as to IDT.

6. Claim Eight: Civil Conspiracy

Claim Eight of the Amended Complaint asserts a civil conspiracy claim. [#87 at ¶¶ 204-11] This claim requires a plaintiff to show: "1) two or more persons; 2) an object to be accomplished; 3) a meeting of the minds on the object

---

[29] The Agreement states that CDI and IDT shall "upon request, provide [Plaintiffs] with such other records as are necessary to show the amount of [c]ommissions that [Plaintiffs] and [r]etailers within [Plaintiffs'] [n]etwork are entitled to receive under this Agreement." [#80-2 at 4]

[30] In their response, besides providing citations to the law on fiduciary relationships generally, Plaintiffs' sole statement in support of their fiduciary duty claim is that it "is related to Plaintiffs' claims for conversion and civil theft." [#100 at 13] This statement does not provide the Court any assistance in analyzing Plaintiffs' fiduciary duty claim.

or course of action; 4) an unlawful overt act; and 5) damages as the proximate result." *F.D.I.C. v. First Interstate Bank of Denver, N.A., 937 F. Supp. 1461, 1473 (D. Colo. 1996)* (citing *Jet Courier Service, Inc. v. Mulei, 771 P.2d 486, 502 (Colo. 1989)*). IDT argues that the Amended Complaint fails to sufficiently allege an overt unlawful act[31] and fails to adequately allege an agreement or conspiracy between CDI and IDT. [#88 at 16-17] The Court disagrees.

Initially, the Amended Complaint sufficiently alleges an agreement between CDI and IDT. It alleges that "IDT and CDI engaged in a scheme whereby they planned to cut out Plaintiffs from the sales process and retain Plaintiffs' clients for themselves." [#87 at ¶ 205] **[*39]** As part of that scheme, Plaintiffs allege that "IDT instructed CDI to begin cutting distributors to generate additional profits for IDT and CDI." [*Id.* at ¶ 51] The Amended Complaint then alleges that Mr. Dieter and Ms. Rumero began contacting distributors in multiple states. [*Id.* at ¶ 52] Mr. Dieter and Ms. Rumero allegedly told the distributors that IDT had asked CDI to ban the distributors from selling the Service and had given false reasons for breaking the agreements. [*Id.* at ¶ 53] The Amended Complaint then provides specific examples of these conversations. [*Id.* at ¶¶ 54-56] Finally, the Amended Complaint alleges that CDI did the same thing to Plaintiffs. [*Id.* at ¶¶ 57, 123-34] The Court finds these allegations sufficient to plausibly allege an agreement or conspiracy between CDI and IDT.

The Amended Complaint further alleges at least one unlawful overt act.[32] "[T]he elements for a civil conspiracy claim require that the underlying acts be unlawful and create an independent cause of action." *Double Oak Constr., LLC. v. Cornerstone Dev. Int'l, LLC, 97 P.3d 140, 146 (Colo. App. 2003)*. Plaintiffs allege that CDI and IDT engaged in the scheme to "terminate[] the Agreement with Plaintiff[s] and st[eal] Plaintiffs['] retailers . . . because Plaintiff is African and black" and **[*40]** in violation of *42 U.S.C. § 1981(a)*. [#87 at ¶¶ 224-228] Because—as this Court will describe in more detail below—Plaintiffs plausibly plead an equal rights violation, the Court finds the allegations sufficient at this stage of the pleadings to allege an overt unlawful act.

Thus, the Court finds that Plaintiffs have plausibly pled a civil conspiracy claim against IDT. Accordingly, this Court RECOMMENDS that the Motion be DENIED as to Claim Eight against IDT.

7. Claim Eleven: Equal Rights Violation

Claim Eleven alleges that IDT violated Plaintiffs' equal rights, in violation of *42 U.S.C. § 1981(a)*. *Section 1981* states in relevant part:

> All persons within the jurisdiction of the United States shall have the same right in every State and Territory to make and enforce contracts, to sue, be parties, give evidence, and to the full and equal benefit of all laws and proceedings for the security of persons and property as is enjoyed by white citizens, and shall be subject to like punishment, pains, penalties, taxes, licenses, and exactions of every kind, and to no other.

---

[31] Although IDT states in its Motion that the Amended Complaint does not allege any unlawful act, IDT does not elaborate on, nor provide support for, this assertion. [#88 at 17]

[32] Colorado courts have left open the possibility that a claim for civil conspiracy to a breach of contract could be pursued against a non-party to the contract, *Logixx Automation v. Lawrence Michels Fam. Tr., 56 P.3d 1224, 1232 (Colo. App. 2002)*, and courts in this district have reached conflicting results on this topic, *Ubel v. Progressive Direct Ins. Co., No. 20-cv-00204-RM-NYW, 2020 U.S. Dist. LEXIS 213414, 2020 WL 9432929, at *22 (D. Colo. Oct. 22, 2020)*, *report and recommendation adopted*, *2020 U.S. Dist. LEXIS 212329, 2020 WL 6701102 (D. Colo. Nov. 13, 2020)* (civil conspiracy claim cannot be premised upon a conspiracy to breach a contract, even against non-signatories); *McNees v. Ocwen Loan Servicing, LLC, No. 16-cv-1055-WJM-KLM, 2019 U.S. Dist. LEXIS 67830, 2019 WL 1762947, at *12 (D. Colo. Apr. 22, 2019)* (same); *Bituminous Cas. Corp. v. Hartford Cas. Ins. Co., No. 12-cv-000433-WYD-KLM, 2013 U.S. Dist. LEXIS 16096, 2013 WL 452374, at *10 (D. Colo. Feb. 6, 2013)* (civil conspiracy claim may be premised upon a conspiracy to breach a contract provided the claim is brought against a nonparty to the contract). Because IDT has not briefed this issue, and because at least one other overt act is proceeding, the Court will not reach whether civil conspiracy for breach of contract can be pursued against IDT.

42 U.S.C. § 1981(a). The statute protects the ability to contract or purchase property free from impairment "so long as the impairment **[*41]** arises from intentional discrimination." Hampton v. Dillard Dep't Stores, Inc., 247 F.3d 1091, 1106 (10th Cir. 2001). "Thus the proper focus is on whether the defendant had the intent to discriminate on the basis of race, and whether that discrimination interfered with the making or enforcing of a contract." Id. at 1106-1107.

To establish a prima facie case under Section 1981, a plaintiff must demonstrate: "(1) that the plaintiff is a member of a protected class; (2) that the defendant had the intent to discriminate on the basis of race; and (3) that the discrimination interfered with a protected activity as defined in [the statutes]." Hampton, 247 F.3d at 1102. Here, the Amended Complaint alleges that Mr. Abdi is African and black, thus satisfying the first element. [#87 at ¶ 228] The Amended Complaint further alleges that IDT, CDI, and Mr. Dieter targeted African and black distributors—including Mr. Abdi—in an attempt to amend these distributors' master distributor agreements. [*Id.* at ¶¶ 65-68] The Amended Complaint alleges that Defendants targeted these individuals because of their race; specifically, that Defendants "reasoned that immigrants who were African or Muslim were stupid." [*Id.* at ¶ 67] Thus, the Amended Complaint sufficiently alleges that IDT had the intent to discriminate on the basis of race, **[*42]** thereby satisfying the second element. Finally, the Amended Complaint alleges that the end result of this targeting was that CDI improperly canceled its contract with Plaintiff, thereby alleging the third element—interference with the protected activity of enforcing contracts.[33] *See* Reynolds v. School Dist. No. 1, Denver, Colo., 69 F.3d 1523, 1532 (10th Cir. 1995) ("Section 1981 prohibits racial discrimination in 'the making, performance, modification, and termination of contracts, and the enjoyment of all benefits, privileges, terms, and conditions of the contractual relationship.'") (quoting 42 U.S.C. § 1981); Shawl v. Dillard's Inc., 17 F. App'x 908, 910 (10th Cir. 2001) ("By its language, Section 1981 establishes four protected interests: (1) the right to make and enforce contracts; (2) the right to sue, be parties, and give evidence; (3) the right to the full and equal benefit of the laws; and (4) the right to be subjected to like pains and punishments." (quotations omitted)).

Thus, the Court finds that Plaintiffs have plausibly pled a Section 1981 claim. Accordingly, the Court respectfully RECOMMENDS that the Motion be DENIED to the extent it seeks to dismiss Claim Eleven.

8. Claim Twelve: Unjust Enrichment

Finally, in Claim Twelve Plaintiffs assert an unjust enrichment claim against IDT. [#87 at ¶¶ 234-38] "To prove unjust enrichment, a plaintiff must demonstrate that **[*43]** (1) at [his or her] expense, (2) the defendant received a benefit, (3) under circumstances that would make it unjust for the defendant to retain the benefit without paying." Oaster, 173 F.Supp.3d at 1176. IDT first argues that Plaintiffs cannot pursue an unjust enrichment claim because the Agreement covers the same subject matter. [#88 at 19] But while it is true that a plaintiff cannot succeed on an unjust enrichment claim where an express contract covers the same subject matter, courts in this District have allowed plaintiffs to pursue both alternative theories at the pleadings stage. *See* United Water & Sanitation Dist. v. Geo-Con, Inc., 488 F.Supp.3d 1052, 1058 (D. Colo. 2020); Robert W. Thomas and Anne McDonald Thomas Revocable Tr. v. Inland Pac. Colo., LLC, No. 11-cv-03333-WYD-KLM, 2012 U.S. Dist. LEXIS 82312, 2012 WL 2190852, at *4 (D. Colo. June 14, 2012).

IDT also argues that Plaintiffs have failed to allege any factual allegations suggesting that IDT received benefits under circumstances that would make it unjust for it to retain the benefit. [#88 at 19-20] The Court disagrees. The Amended Complaint generally alleges that Plaintiffs recruited numerous retailers to the Service, IDT received

---

[33] IDT argues that Plaintiffs failed to allege a specific contract that IDT interfered with and that, in any event, Plaintiffs failed to allege that IDT "possessed sufficient authority to significantly interfere with contracts between Plaintiffs and their alleged retailers, or that IDT actually exercised that authority to . . . [Plaintiffs'] detriment." [#88 at 18 (quotations omitted)] But while the Amended Complaint does rely upon the contracts with the retailers in support of Plaintiffs' Section 1981 claims, it also cites to CDI's termination of the Agreement. [#87 at ¶ 227] And the Amended Complaint does plausibly allege that IDT had the ability to influence CDI's decisions with respect to the master distribution agreements, including the Agreement at issue here. [*Id.* at ¶¶ 53-57]

payments and otherwise benefitted from those retailers' participation in the Service, and IDT for racially motivated reasons then encouraged CDI to break its Agreement with Plaintiffs, **[*44]** thereby depriving Plaintiffs of commissions to which they were entitled and transferring those commissions to IDT. [*See generally* #87] The Court concludes that such allegations plausibly allege that IDT received benefits under circumstances that would make it unjust for it to retain the benefit.

Thus, the Court concludes that Plaintiffs have plausibly alleged an unjust enrichment claim against IDT. The Court thus RECOMMENDS that IDT's Motion to Dismiss be Denied as to Claim Twelve.

9. Conclusion

For the foregoing reasons, the Court respectfully RECOMMENDS that IDT's Motion to Dismiss be GRANTED IN PART and DENIED IN PART. Specifically, the Court RECOMMENDS that IDT's Motion to Dismiss be GRANTED to the extent it seeks dismissal of Claims One, Two, Three, Four, Five, Six, Seven, and Ten but DENIED to the extent it seeks dismissal of Claims Eight, Eleven, and Twelve.

B. CDI's Motion to Dismiss

CDI's Motion to Dismiss seeks to dismiss all claims against Mr. Dieter and Claims Two, Four, Seven, Eight, Nine, Eleven, and Twelve against CDI. [#89] The Court addresses these claims in turn.

1. Claim One: Breach of Contract

As explained earlier, it appears from the Amended Complaint that Claim One was **[*45]** asserted against Mr. Dieter. [*See* #87 at ¶¶ 144-52] CDI's Motion, however, states that during conferral with Plaintiffs' counsel, Plaintiffs' counsel indicated that only Claims Two, Nine, Eleven, and Twelve were asserted against Mr. Dieter in his personal capacity. [#89 at 1] Plaintiffs' Response does not challenge this assertion. [*See generally* #100] Nonetheless, during oral argument, Plaintiffs' counsel indicated that he had not intended to concede Claim One against Mr. Dieter. As a result, despite Plaintiffs' apparent concession of Claim One against Mr. Dieter, and without any briefing by the parties, the Court will analyze whether Claim One alleges a plausible breach of contract claim against Mr. Dieter.[34]

The Agreement itself states that it is "by and between [Mr. Abdi] and IIT . . . and [CDI]." [#80-2 at 1] Although Mr. Dieter signed the contract, he did so on behalf of CDI and as CDI's managing partner. [*Id.* at 8] And in Colorado, "[i]f he has proper authorization, an individual is not liable under a contract signed by him on behalf of another when he has given notice to the third party that there is a principal for whom he acts and also notice of the name or identity of the principal." **[*46]** *Beneficial Fin. Co. of Colorado v. Bach, 665 P.2d 1034, 1036 (Colo. App. 1983)* (citing *Fink v. Montgomery Elevator Co., 161 Colo. 342, 421 P.2d 735 (1966)*). Thus, because the Amended Complaint does not allege that Mr. Dieter lacked authorization to enter into the Agreement on CDI's behalf, and because the Agreement clearly indicates that Mr. Dieter is acting on CDI's behalf, Mr. Dieter is not personally liable on the Agreement.

Thus, the Court concludes that Plaintiffs have failed to plausibly plead a breach of contract claim against Mr. Dieter.[35] Accordingly, the Court respectfully RECOMMENDS that Claim One as asserted against Mr. Dieter be DISMISSED.

---

[34] Ordinarily, the Court would not make such a sua sponte analysis. But the Court cannot fault Mr. Dieter for not briefing the merits of a claim that Plaintiffs' counsel apparently conceded was not being pursued against Mr. Dieter. As a result, and because Plaintiffs will have the opportunity to object to this Recommendation and present their arguments about the merits of this claim to Judge Moore, the Court will sua sponte address whether Plaintiffs have plausibly pled a breach of contract claim against Mr. Dieter.

2. Claim Two: Tortious Interference

As explained earlier, Claim Two alleges both tortious interference with an existing contract and tortious interference with a prospective business relation. [#87 at ¶¶ 153-66] CDI and Mr. Dieter argue that this claim is barred by the economic loss rule.[36] [#89 at 3-5] The Court agrees.

The Colorado Supreme Court has held that "a party suffering only economic loss from the breach of an express or implied contractual duty may not assert a tort claim for such a breach absent an independent duty of care under tort law." *Town of Alma*, 10 P.3d at 1264. "Two conditions must be met for the economic loss rule to apply. First, the duty must arise from a source other than the contract. Second, **[*47]** the duty must not also be a duty imposed by the contract." *Great Am. Opportunities, Inc. v. Kent, 352 F. Supp. 3d 1126, 1138 (D. Colo. 2018)*. "If the duty is also 'memorialized in the contracts, it follows that the plaintiff has not shown any duty independent of the interrelated contracts and economic loss rule bars the tort claim.'" *Id.* (quoting *BRW, Inc. v. Dufficy & Sons, Inc., 99 P.3d 66, 74 (Colo. 2004)*).

Here, Plaintiffs allege that Mr. Dieter and CDI interfered with Plaintiffs' relationships with the retailers by: (1) providing discounts to Plaintiffs' retailers without providing such codes to Plaintiffs "contrary to the terms of the Agreement" [#87 at ¶ 163.a]; (2) opening new retail accounts for retailers in Plaintiffs' distribution network and removing them from Plaintiffs' distribution network "contrary to the Agreement's terms" [*id.* at ¶ 163.b]; and (3) taking leads that Plaintiffs developed and then signing them under a CDI account number [*id.* at ¶ 163.c]. As the Amended Complaint expressly acknowledges with respect to the first two methods of interference, the duty allegedly violated arises from the terms of the Agreement. As a result, the economic loss rule prohibits Plaintiffs from relying upon the alleged breach of these duties to support their intentional interference claims. *Great Am. Opportunities, 352 F.Supp.3d at 1138*. With respect to the third method **[*48]** of interference, Plaintiffs have not identified a source independent of the Agreement that would prohibit CDI and Mr. Dieter from attempting to take leads that Plaintiffs developed and signing them to a CDI account number. Thus, once again, the economic loss rule bars such a claim.[37] *Id.*

---

[35] CDI does not separately challenge the breach of contract claim.

[36] Plaintiffs did not bother to reply to this argument. [#100]

[37] In 2019 the Colorado Supreme Court revisited the economic loss rule and the *Town of Alma* case in *Bermel v. Blueradios, Inc., 440 P.3d 1150, 2019 CO 31 (Colo. 2019)*. The *Bermel* court noted that "[o]ur previous cases have applied the economic loss rule to bar only certain common law negligence claims." *Id. at 1153*; *see also id. at 1153* ("we have applied the [economic loss] rule only to common law tort claims for negligence and negligent misrepresentation"); *id. at 1155* ("Notably, however, since adopting the economic loss rule, we have applied it only to bar common law tort claims of negligence or negligent misrepresentation."). The court went on to state in a footnote that "the economic loss rule generally should not be available to shield intentional tortfeasors from liability for misconduct that happens to also breach a contractual obligation." *Id. at 1154 n.6*. Although these statements are dicta, courts in this district have considered them alongside *Town of Alma* in determining whether intentional tort claims fall under the economic loss rule. *See Western State Bank v. Cosey, L.L.C., No. 19-cv-01155-JLK, 2019 U.S. Dist. LEXIS 190874, 2019 WL 5694271, at *4 (D. Colo. Nov. 4, 2019)* ("Western State's fraud claim alleges an intentional tort. So, under *Bermel*, the economic loss rule would not bar Western State's fraud claim."); *McWhinney Holding Co., LLLP v. Poag, No. 17-cv-02853-RBJ, 2019 U.S. Dist. LEXIS 232438, 2019 WL 9467529, at *2 (D. Colo. Dec. 6, 2019)* ("The *Bermel* footnote [Footnote No. 6] clarifies that intentional torts depend on duties independent of contract and therefore are not barred by the economic loss rule. . . . The plain language clearly indicates the [Colorado Supreme Court] does not believe intentional torts should be covered by the economic loss rule."); *In re Bloom, 622 B.R. 366, 428 (Bankr. D. Colo. 2020)* (finding that in light of *Bermel*, the "intentional tort claims . . . are simply 'outside the scope' of the economic loss rule."). However, even considering the *Bermel* dicta, this Court nonetheless concludes that the economic loss rule bars Plaintiffs' tortious interference claims against CDI. Although this claim is an intentional tort, Plaintiff does not identify actions taken by CDI that would be wrongful or improper *but for* the existence of the contract. *Compare Bermel, 440 P.3d at 1151, 1153* (tortfeasor knowingly forwarded thousands of company emails containing proprietary information to his personal email account without authorization, and was found at trial to have committed civil theft). Indeed, as noted in Section III.A.2 *supra*, competitive actions to obtain retailers are not on their own improper—except that here they allegedly violate the parties' contractual obligations. Moreover, to the degree that Plaintiffs

The Court therefore concludes that the economic loss rule bars Plaintiffs' tortious interference claims against CDI and Mr. Dieter. Accordingly, the Court RECOMMENDS that Claim Two be dismissed against those Defendants.

3. Claim Four: Violation of State and Federal Antitrust Laws

Claim Four alleges that CDI and Mr. Dieter violated the Colorado Antitrust Act and *Section 1* of the Sherman Antitrust Act. [#87 at ¶¶ 173-84] This claim fails for the reasons identified above. *See supra* Section III.A.3. Accordingly, this Court RECOMMENDS that Claim Four be DISMISSED as to CDI and Mr. Dieter.

4. Claim Five: Conversion

As with the breach of contract claim, based upon counsels' conferral and Mr. Dieter's belief that the conversion claim was not being asserted against Mr. Dieter, the parties did not brief the validity of the conversion claim against **[*49]** Mr. Dieter. Nonetheless, for the reasons articulated above, the Court will address the plausibility of the conversion claim as pled against Mr. Dieter. *See supra* n.34.

Claim Five is premised upon CDI, IDT, and Mr. Dieter's alleged conversion of Plaintiffs' commissions. [##87 at ¶ 187] But the Amended Complaint fails to plausibly allege that Mr. Dieter personally exercised dominion or control over these commissions. The Amended Complaint alleges that CDI or IDT would pay the commissions [#87 at ¶ 24] and that it was these entities that ultimately refused to pay these commissions [*id.* at ¶ 47]. Plaintiffs' conclusory statement that Mr. Dieter "exercised control over Plaintiffs' commissions" is wholly insufficient to plead a conversion claim against Mr. Dieter.

Thus, the Court concludes that Plaintiffs have failed to plausibly allege a conversion claim against Mr. Dieter. Accordingly, the Court RECOMMENDS that Claim Five be DISMISSED as to Mr. Dieter.

5. Claim Seven: Breach of Fiduciary Duty

Claim Seven asserts a claim for breach of fiduciary duty against CDI. [#87 at ¶¶ 196-203] CDI argues that this claim is barred by the economic loss rule. Colorado courts have held that the economic loss **[*50]** rule bars a breach of fiduciary duty claim when the fiduciary duties are set forth by the contractual relationship. *Casey v. Colorado Higher Educ. Ins. Benefits All. Tr., 310 P.3d 196, 202-04, 2012 COA 134M (Colo. App. 2012)*. On the other hand, Colorado courts have refused to apply the economic loss rule if the special relationship, by its very nature, automatically triggers an independent fiduciary duty of care. *Id.*; *A Good Time Rental, LLC v. First Am. Title Agency, Inc., 259 P.3d 534, 540 (Colo. App. 2011)*.

As detailed earlier, the Court does not believe that Plaintiffs plausibly alleged that IDT owed Plaintiffs a fiduciary duty. [*See supra* Section III.A.5] Plaintiffs make the same allegations against CDI and thus, for the reasons previously articulated, Plaintiffs have not plausibly pled a breach of fiduciary duty claim. But, in any event, any such fiduciary obligations could only have arisen from the duties set forth in the Agreement, and, as a result, this claim is barred by the economic loss rule. *Casey, 310 P.3d at 202-04*.

Accordingly, the Court concludes that Plaintiffs have failed to plausibly plead a breach of fiduciary duty claim against CDI that is not otherwise barred by the economic loss rule. Accordingly, the Court RECOMMENDS that Claim Seven be dismissed against CDI.[38]

---

allege that CDI engaged in fraudulent misrepresentations—which could raise a duty separate from the contractual obligations, *see* *Western State Bank, 2019 U.S. Dist. LEXIS 190874, 2019 WL 5694271, at *4*—Plaintiffs have failed to sufficiently plead their fraud claim under *Federal Rule 9(b)*. Section III.A.2., *supra*.

[38] To the extent the breach of fiduciary duty claim is alleged against Mr. Dieter, it fails for the same reasons.

6. Claim Eight: Civil Conspiracy

Claim Eight of the Amended Complaint asserts a civil conspiracy claim against CDI. [#87 at **[*51]** ¶¶ 204-11] In the Motion, CDI's only argument regarding Plaintiffs' civil conspiracy claim is that "Plaintiffs have failed to plead factual allegations sufficient to establish 'a meeting of the minds' between CDI and IDT." [#89 at 6] As explained earlier, Plaintiffs have sufficiently pled both an agreement between CDI and IDT and an unlawful overt act. Section III.A.6, *supra*. Thus, Plaintiffs have plausibly pled a civil conspiracy claim against CDI. Accordingly, the Court RECOMMENDS that the Motion be DENIED as to Claim Eight against CDI.[39]

7. Claim Nine: Promissory Estoppel

Claim Nine is a claim for promissory estoppel against CDI and Mr. Dieter. [#87 at ¶¶ 212-17] Under Colorado law, a claim for promissory estoppel has four elements: "(1) a promise; (2) that the promisor reasonably should have expected would induce action or forbearance by the promisee or a third party; (3) on which the promisee or third party reasonably and detrimentally relied; and (4) that must be enforced in order to prevent injustice." *Pinnacol Assurance v. Hoff, 375 P.3d 1214, 1221, 2016 CO 53 (Colo. 2016)*.

CDI and Mr. Dieter argue that the undisputed existence of a contract between Plaintiffs and CDI bars Plaintiffs' promissory estoppel claim. [#89 at 7-9] According to CDI and Mr. **[*52]** Dieter, promissory estoppel is "applicable only in the absence of an otherwise enforceable contract." [#89 at 8 (quoting *Scott Co. of Cal. v. MK-Ferguson Co., 832 P.2d 1000, 1003 (Colo. App. 1992)*, *overruled on other grounds* by *Lewis v. Lewis, 189 P.3d 1134, 1140 (Colo. 2008)*)]. Because "the alternative remedy of promissory estoppel is never reached when there has been mutual agreement by the parties on all essential terms of a contract," CDI and Mr. Dieter argue that Plaintiffs' promissory estoppel claims must be dismissed. [*Id.*]

While the Court agrees with the basic premise of this argument, the Court believes that the argument is premature.[40] In Colorado, "inconsistent contract and tort claims may be pled in the alternative." *Gorsuch, Ltd. v. Wells Fargo Nat'l Bank Ass'n, No. 11-cv-00970-PAB-MEH, 2013 U.S. Dist. LEXIS 174682, 2013 WL 6925132, at *3 (D. Colo. Dec. 13, 2013)* (collecting cases). And "Colorado law recognizes promissory estoppel as an alternative theory of recovery to the formation of a contract." *Carthon v. Balfour Senior Care, LLC, No. 21-cv-00007-MEH, 2021 U.S. Dist. LEXIS 132464, 2021 WL 2954685, at *3 (D. Colo. June 16, 2021)*. Courts have thus permitted, at the early stages of the proceedings, plaintiffs to pursue both a breach of contract claim and a promissory estoppel

---

[39] At oral argument, Plaintiffs' counsel conceded that Claim Eight was not brought against Mr. Dieter in his individual capacity. To the extent that it was, this Court finds that Plaintiffs have not pled facts sufficient to show that Mr. Dieter in his individual capacity—and not as the acting agent for CDI—engaged in a conspiracy with IDT. And as an agent for CDI, Mr. Dieter and CDI cannot conspire with each other. *Lockwood Grader Corp. v. Bockhaus, 129 Colo. 339, 270 P.2d 193, 196 (Colo. 1954)* (person acting on behalf of corporation cannot conspire with himself individually); *Pittman v. Larson Distrib. Co., 724 P.2d 1379, 1390 (Colo. App. 1986)* ("A corporation and its employees do not constitute the 'two or more persons' required for a civil conspiracy . . . at least if the employees are acting on behalf of the corporation and not as individuals for their individual advantage."). Accordingly, this Court RECOMMENDS that Claim Eight be DISMISSED as to Mr. Dieter.

[40] In making this argument, CDI and Mr. Dieter rely upon the assertion that "[n]o party at any point has challenged the enforceability of the [Agreement]." [#89 at 8] Though not explicitly cited in their response, to determine whether any party has questioned the enforceability of the Agreement, the Court would need to look to the answers filed by CDI, IDT, and Mr. Dieter—without referencing these answers, the Court would not know whether any party has challenged the enforceability of the Agreement. But CDI and Mr. Dieter have filed a motion to dismiss pursuant to *Rule 12(b)(6)*, not a motion for judgment on the pleadings pursuant to *Rule 12(c)*. [*See generally* #89] And while it may be possible for the Court to convert the motion into a *Rule 12(c)* Motion, *see* *Muller v. Vilsack, No. CV 13-0431 MCA/KK, 2015 U.S. Dist. LEXIS 194088, 2015 WL 13665433, at *4 (D.N.M. Mar. 30, 2015)*; *Nicks v. Brewer, No. 10-CV-1220-JAR-JPO, 2010 U.S. Dist. LEXIS 124490, 2010 WL 4868172, *2 (D. Kan. Nov. 23, 2010)*, the Court declines to do so in the absence of a request from CDI and Mr. Dieter.

claim. *Carthon, 2021 U.S. Dist. LEXIS 132464, 2021 WL 2954685, at * 3*; *BBG Holding Corp. v. K Capital, LLC, No. 20-cv-03268-MEH, 2021 U.S. Dist. LEXIS 8154, 2021 WL 147085, at *3 (D. Colo. Jan. 15, 2021)*.

CDI and Mr. Dieter nonetheless argue that dismissal is especially appropriate here because the Agreement contains an integration clause prohibiting oral amendments to the Agreement. But in Colorado, "a subsequent **[*53]** oral agreement between the parties may modify a provision of an earlier written contract, even in the face of a provision in the original contract that modifications must be in writing." *Agritrack, Inc. v. DeJohn Housemoving, Inc., 25 P.3d 1187, 1193 (Colo. 2001)*; *see also* *James H. Moore & Assocs. Realty, Inc. v. Arrowhead at Vail, 892 P.2d 367, 372 (Colo. App. 1994)* ("[G]enerally, a written contract may be modified by a later oral agreement even in the face of a specific provision in the written agreement that all modifications must be in writing." (citation omitted)). Thus, the Court cannot conclude, at this early stage of the litigation, that the existence of the Agreement bars Plaintiffs' promissory estoppel claims. Accordingly, the Court RECOMMENDS that the CDI Motion be DENIED with respect to Claim Nine.

8. Claim Eleven: Equal Rights Violation

Claim Eleven asserts an equal rights violation against CDI and Mr. Dieter pursuant to *42 U.S.C. § 1981*. [#87 at ¶¶ 223-33] CDI and Mr. Dieter move to dismiss Claim Eleven arguing that Plaintiffs have failed to provide specific factual allegations supporting actionable discrimination. [#89 at 9-10] For the reasons outlined in Section III.A.7, the Court disagrees. Accordingly, the Court respectfully RECOMMENDS that the Motion be DENIED to the extent it seeks dismissal of Claim Eleven.

9. Claim Twelve: Unjust Enrichment

Finally, **[*54]** in Claim Twelve Plaintiffs assert an unjust enrichment claim against CDI and Mr. Dieter. [#87 at ¶¶ 234-38] CDI and Mr. Dieter maintain that Plaintiffs' unjust enrichment claim should be dismissed because the Agreement "covers the same subject matter [and therefore] precludes any implied-in-law contract." [#89 at 10 (quoting *Interbank Invs., LLC v. Eagle River Water & Sanitation Dist., 77 P.3d 814, 816 (Colo. App. 2003)*] For the reasons outlined in Section III.A.8 above, the Court concludes that Plaintiffs may, at this stage, plead unjust enrichment as an alternative to their breach of contract claims. *United Water & Sanitation Dist., 488 F.Supp.3d at 1058*; *Robert W. Thomas and Anne McDonald Thomas Revocable Tr., 2012 U.S. Dist. LEXIS 82312, 2012 WL 2190852, at *4*.

Alternatively, Mr. Dieter argues that Plaintiffs have failed to plausibly allege that Mr. Dieter—as opposed to CDI—has been unjustly enriched. Plaintiffs did not respond to this argument [#100 at 15-16], and the Court agrees with Mr. Dieter:

> At most, the complaint alleges that [IDT and CDI] received a benefit at [Plaintiffs'] expense, not [Mr. Dieter] personally. There are no non-conclusory allegations in the complaint regarding what benefits [Mr. Dieter] received, and the complaint does not explain how [CDI] distributed revenues from the [retailers] it allegedly poached from [IIT]." Thus, this claim fails against [Mr. Dieter]."

DTC Energy Grp., Inc. v. Hirschfeld, 420 F. Supp. 3d 1163, 1178 (D. Colo. 2019) (internal citations omitted).

Thus, the Court concludes **[*55]** that Plaintiffs have plausibly pled an unjust enrichment claim as an alternative to their breach of contract claim against CDI, but not against Mr. Dieter. Accordingly, the Court RECOMMENDS that Claim Twelve be DISMISSED as to Mr. Dieter but that CDI's Motion to Dismiss be DENIED to the extent it seeks to dismiss Claim Twelve against CDI.

10. Conclusion

For the foregoing reasons, the Court respectfully RECOMMENDS that CDI's Motion to Dismiss be GRANTED IN PART and DENIED IN PART. Specifically, the Court RECOMMENDS that CDI's Motion to Dismiss be GRANTED to the extent it seeks dismissal of Claims One against Mr. Dieter, Claim Two against both Defendants, Claim Four against both Defendants, Claim Five against Mr. Dieter, Claim Seven against both Defendants, Claim Eight against Mr. Dieter, and Claim Twelve against Mr. Dieter. The Court RECOMMENDS that CDI's Motion to Dismiss be DENIED to the extent it seeks dismissal of Claim Eight, Claim Nine, Claim Eleven, or Claim Twelve against CDI.

C. Plaintiffs' Motion to Dismiss[41]

Plaintiffs have moved to dismiss all three counterclaims filed by CDI. [#98] Initially, Plaintiffs contend that CDI lacks standing to bring its counterclaims. [*Id.* at 5-6] **[*56]** Alternatively, Plaintiffs argue that CDI has failed to plausibly plead its tortious interference and defamation counterclaims.[42] [*Id.* at 7-11] In its response, CDI admits that it has failed to plausibly allege a tortious interference with contract cause of action, and the Court therefore RECOMMENDS that Plaintiffs' Motion to Dismiss be GRANTED to the extent it seeks to dismiss Counterclaim Two. The Court, therefore, first addresses CDI's standing, then addresses the plausibility of CDI's defamation counterclaims.

1. Standing

Plaintiffs first argue that CDI lacks standing to bring its counterclaims. [*Id.* at 5-6] "Article III of the Constitution confines the judicial power of federal courts to deciding actual 'Cases' or 'Controversies.'" *Hollingsworth v. Perry, 570 U.S. 693, 704, 133 S. Ct. 2652, 186 L. Ed. 2d 768 (2013)* (quoting *U.S. Const. art. III, § 2*). "Plaintiffs must demonstrate a personal stake in the outcome in order to assure that concrete adverseness which sharpens the presentation of issues necessary for the proper resolution of constitutional questions." *City of Los Angeles v. Lyons, 461 U.S. 95, 101, 103 S. Ct. 1660, 75 L. Ed. 2d 675 (1983)* (quotations omitted). "Plaintiffs must show they have sustained or are immediately in danger of sustaining some direct injury, and the injury or threat of injury must be real and immediate, not conjectural or hypothetical." *Faustin v. City & Cty. of Denver, 268 F.3d 942, 947 (10th Cir. 2001)*. As a result, "[t]o establish **[*57]** standing, plaintiffs must show injury in fact, a causal relationship between the injury and the challenged action of the defendant, and a likelihood that the injury will be redressed by a favorable decision." *Id.*

According to Plaintiffs, the Colorado CDI has been dissolved and "CDI failed to allege any facts as part of its counterclaims that it has continued its existence to maintain counterclaims." [#98 at 5] The entire premise of this argument, however, is that the Colorado CDI has been dissolved. But CDI's counterclaims do not reference such a dissolution and, indeed, allege that it was the entity that entered into the Agreement with Plaintiffs. [*See generally* #90 at 17-22] Thus, to the extent Plaintiffs are making a facial attack of the Counterclaims under *Rule 12(b)(1)*,[43] their facial attack fails.[44] *See* *Holt v. United States, 46 F.3d 1000, 1002 (10th Cir. 1995)* (holding that, "[i]n reviewing

---

[41] In its response, CDI states that Plaintiffs failed to confer with CDI prior to filing Plaintiffs' Motion to Dismiss, in contravention of Judge Moore's practice standards. [#105 at 1-2] In response, Plaintiffs' state that "Plaintiffs long warned [Mr.] Dieter and CDI that the[ir] counterclaims were suspect and injected in this proceeding to be tough." [#107 at 3 n. 1] It thus appears that Plaintiffs did not confer about the specific alleged deficiencies in the counterclaims or whether those deficiencies could be cured, and therefore did indeed violate Judge Moore's practice standards. Indeed, in response to Plaintiffs' Motion to Dismiss, CDI has agreed that it did not plead a plausible tortious interference cause of action and has withdrawn that counterclaim. [#105 at 5] Plaintiffs are cautioned that future failures to confer may result in sanctions.

[42] Plaintiffs' Motion to Dismiss does not bring a *Rule 12(b)(6)* challenge to CDI's breach of contract claim. [*See generally* #98]

[43] Plaintiffs' Motion to Dismiss fails to indicate whether Plaintiffs are making a facial attack to CDI's standing or whether they are asking the Court to go beyond the allegations contained in the Counterclaim and consider evidence challenging the factual basis upon which subject matter jurisdiction rests. At oral argument, counsel for Plaintiffs indicated that Plaintiffs were making a facial attack on the Court's subject matter jurisdiction.

a facial attack on the complaint [under *Rule 12(b)(1)*], a district court must accept the allegations in the complaint as true").

To the extent Plaintiffs are asking the Court to go beyond the allegations contained in the Counterclaim and consider evidence challenging the factual basis upon which subject matter jurisdiction rests, that challenge likewise fails. Simply put, Plaintiffs **[*58]** have not presented any evidence for the Court to consider. And while Plaintiffs reference "information available on the Colorado Secretary of State's website about CDI" [#98 at 5], Plaintiffs have neither submitted that "information," asked the Court to take judicial notice of that "information," or provided necessary details for the Court to be able to take judicial notice of that "information." *See Operating Eng'rs Local 101 Pension Fund v. Al Muehlberger Concrete Constr., Inc., No. 13-2050-JAR-DJW, 2013 U.S. Dist. LEXIS 138267, 2013 WL 5409116, at *2 (D. Kan. Sept. 26, 2013)* (refusing to take judicial notice of information from secretaries of state websites where the printouts were not certified as official documents and the offering party did not provide sufficient information about the authenticity of the documents).

Accordingly, to the extent Plaintiffs challenge CDI's counterclaims based upon an alleged lack of standing, the Court RECOMMENDS that Plaintiffs' Motion to Dismiss be DENIED.

2. Counterclaim Three: Defamation

Counterclaim three alleges defamation against both Plaintiffs. [#90 at ¶¶ 69-73] To state a cause of action for defamation in Colorado, a plaintiff must plausibly plead: "(1) a defamatory statement concerning another; (2) published to a third party; (3) with fault amounting to at least negligence on the part of the publisher; and (4) either **[*59]** actionability of the statement irrespective of special damages or the existence of special damages to the plaintiff caused by the publication."[45] *Williams v. Dist. Court, Second Judicial Dist., City & Cty. of Denver, 866 P.2d 908, 911 n.4 (Colo. 1993)*. Without identifying the particular element that Plaintiffs believe CDI has failed to plausibly plead, Plaintiffs generally assert that CDI has failed to plausibly plead a defamation claim. [#98 at 8-11] The Court disagrees.

The Counterclaim alleges that, after CDI terminated IIT, Mr. Abdi told several people in the industry that CDI terminated the Agreement because Mr. Dieter is Jewish and Mr. Abdi is black and Muslim. [#90 at ¶ 45] The Counterclaim further states that the real reason for terminating the Agreement was Plaintiffs' breach of the Agreement and failure to cure those breaches. [*Id.* at ¶¶ 52-56] If these allegations are true, then CDI has successfully pled the first three elements of a defamation claim: (1) a defamatory statement concerning another, (2) published to a third party, (3) with fault amounting to at least negligence on the part of Plaintiffs. *Williams, 866 P.2d at 911 n.4*. Similarly, the Counterclaim alleges that in July of 2018, Mr. Abdi called a Denver retailer and falsely claimed that CDI diverted residuals from **[*60]** the retailer's account. [*Id.* at ¶ 48] Once again, if true, these allegations plausibly plead the first three elements of a defamation claim.

As to the last element, a defamatory statement can be "either defamatory per se or defamatory per quod, depending upon the certainty of the defamatory meaning of the publication." *Gordon v. Boyles, 99 P.3d 75, 79 (Colo. App. 2004)*. If a defamatory communication is defamatory per se, damage is presumed, and a plaintiff need not plead special damages. *Id.* This arises where the defamatory meaning is apparent from the face of the publication, or if the subject matter of the publication falls into one of the traditional defamatory per se categories. *Id.* The traditional defamatory per se categories include "imputation of (1) a criminal offense; (2) a loathsome

---

[44] In their Motion to Dismiss, Plaintiffs state that they "incorporate[] the factual background in [their] First Amended Complaint. [#98 at 3] Plaintiffs fail to offer any support for the notion that this Court can consider facts alleged in the First Amended Complaint when considering a *Rule 12(b)(1)* or *Rule 12(b)(6)* challenge to CDI's counterclaims.

[45] "Oral defamation is slander while that which is written is libel." *Nguyen v. Mai Vu, No. 18-CV-01132-CMA-NRN, 2018 U.S. Dist. LEXIS 186592, 2018 WL 5622634, at *5 n.12 (D. Colo. Oct. 30, 2018)*, *report and recommendation adopted*, *2018 U.S. Dist. LEXIS 222963, 2018 WL 6603955 (D. Colo. Nov. 15, 2018)*. Here, we are dealing with oral statements, or slander.

disease; (3) a matter incompatible with the individual's business, trade, profession, or office; or (4) serious sexual misconduct." *Id.*; *see also* *Examination Bd. of Prof. Home Inspectors v. Int'l Ass'n of Certified Home Inspectors, 519 F. Supp. 3d 893, 913 (D. Colo. 2021)*.

Here, both statements identified above are defamatory on their face and also accuse CDI of matters incompatible with its business. Specifically, the first statement accuses CDI of terminating the Agreement for improper reasons and the second statement accuses CDI of improperly diverting residuals from **[*61]** the Denver retailer's account. Indeed, this second statement may even allege criminal conduct—theft—and thus fall into yet another traditional defamatory per se category. *Gordon, 99 P.3d at 79*. The Court therefore concludes that the defamation alleged constitutes defamation per se, and the Court need not evaluate whether the Third Counterclaim sufficiently alleges special damages.

Thus, the Court concludes that CDI has plausibly alleged a claim for defamation. Accordingly, the Court RECOMMENDS that Plaintiffs' Motion to Dismiss be DENIED to the extent it seeks to dismiss the Third Counterclaim.

3. Conclusion

For the foregoing reasons, the Court respectfully RECOMMENDS that Plaintiffs' Motion to Dismiss be GRANTED to the extent it seeks dismissal of Counterclaim Two but DENIED to the extent it seeks dismissal of Counterclaims One or Three.

D. Plaintiffs' Motion to Strike

Finally, the Court turns to Plaintiffs' Motion to Strike, which seeks to strike the First and Sixth Affirmative Defenses pled by Mr. Dieter and CDI. [#99] In response, CDI and Mr. Dieter have agreed to withdraw their Sixth Affirmative Defense.[46] [#104 at 3] Thus, the Court addresses only the First Affirmative Defense, failure to state facts sufficient **[*62]** to constitute a cause of action against Mr. Dieter and CDI. [#90 at 16]

Plaintiffs provide no authority for their assertion that the defense of failure to state a claim upon which relief can be granted should not be presented as an affirmative defense "because, beyond the motions to dismiss stage, [that] defense will have no impact." [#106 at 2] Indeed, Plaintiffs' assertion runs contrary to the plain language of *Rule 12(b)(6)* which states that a party "*may* assert" failure to state a claim by motion. *Fed. R. Civ. P. 12(b)(6)* (emphasis added). Indeed, "[t]he defense of failure to state a claim can be raised at any time, including at trial." *Chavez v. Thornton*, No. 05-cv-00607-REB-MEH, 2007 WL 2908293, at *1 (D. Colo. Oct. 3, 2007). And courts routinely allow parties to plead such a defense as an affirmative defense. *See, e.g.*, *id.;* *Bruner v. Midland Funding, LLC, No. CIV-16-1371-D, 2018 U.S. Dist. LEXIS 12186, 2018 WL 563183, at *3 (W.D. Okla. Jan. 25, 2018)*; *Resol. Trust Co. v. Thomas, No. CIV.A. 92-2084-GTV, 1995 U.S. Dist. LEXIS 6071, 1995 WL 261641, at *1 (D. Kan. Apr. 25, 1995)*. Indeed, on multiple occasions, counsel for Plaintiffs has himself filed answers in which he has asserted as an affirmative defense that the opposing party's complaint failed to state a claim for relief pursuant to *Rule 12(b)(6)*. *Rivard v. Gates & Rymph, Inc.*, No. 12-cv-00236-REB-KMT [#7 at 7]; *Spokas v. Am. Fam. Mut. Ins. Co.*, No. 12-cv-00380-WYD-KLM [#13 at 8]; *McIntosh v. Vida Salon, LLC*, No. 12-cv-00874-MSK-MJW [#14 at 4]. In any event, Plaintiffs **[*63]** have not demonstrated in the Motion to Strike that the first affirmative defense "ha[s] no bearing on the controversy" or that Plaintiffs "ha[ve] been prejudiced" by the inclusion of such a defense. *Kimpton Hotel & Rest. Grp., LLC, 2008 U.S. Dist. LEXIS 5278, 2008 WL 140488, at *1*. As a result, Plaintiffs have not satisfied their burden of demonstrating that the First Affirmative Defense should be stricken.

Accordingly, the Court RECOMMENDS that Plaintiffs' Motion to Strike be DENIED.

---

[46] Once again, Plaintiffs appear to have disregarded the conferral requirement prior to filing their Motion to Strike. [#104 at 2] Had Plaintiffs conferred, Mr. Dieter and CDI could have simply withdrawn their Sixth Affirmative Defense.

IV. CONCLUSION

For the foregoing reasons, the Court respectfully **RECOMMENDS** that:

(1) IDT's Motion to Dismiss [#88] be **GRANTED IN PART** and **DENIED IN PART**. Specifically, the Court **RECOMMENDS** that IDT's Motion to Dismiss be **GRANTED** to the extent it seeks dismissal of Claims One, Two, Three, Four, Five, Six, Seven, and Ten but **DENIED** to the extent it seeks dismissal of Claims Eight, Eleven, and Twelve. Because this is the second round of motions to dismiss briefing, and because Plaintiffs have had prior opportunities to cure deficiencies in their pleadings, the Court respectfully **RECOMMENDS** that Claims One, Two, Three, Four, Five, Six, Seven, and Ten as asserted against IDT be **DISMISSED WITH PREJUDICE**. *S.D. v. Lajeunesse, No. 15-CV-02404-WJM-CBS, 2017 U.S. Dist. LEXIS 8228, 2017 WL 262692, at *4 n.4 (D. Colo. Jan. 20, 2017)* ("By the time of a second amended complaint it is **[*64]** often the case that pleading deficiencies such as those evident here may be deemed irreparable, and the complaint will be dismissed with prejudice.").

(2) CDI's Motion to Dismiss [#89] be **GRANTED IN PART** and **DENIED IN PART**. Specifically, the Court **RECOMMENDS** that CDI's Motion to Dismiss be **GRANTED** to the extent it seeks dismissal of Claims One against Mr. Dieter, Claim Two against both Defendants, Claim Four against both Defendants, Claim Five against Mr. Dieter, Claim Seven against both Defendants, Claim Eight against Mr. Dieter, and Claim Twelve against Mr. Dieter. The Court **RECOMMENDS** that CDI's Motion to Dismiss be **DENIED** to the extent it seeks dismissal of Claim Eight, Claim Nine, Claim Eleven, or Claim Twelve against CDI. Because this is the second round of motions to dismiss briefing, and because Plaintiffs have had prior opportunities to cure deficiencies in their pleadings, the Court respectfully **RECOMMENDS** that Claims One, Two, Four, Five, Seven, Eight, and Twelve asserted against Mr. Dieter and Claims Two, Four, and Seven asserted against CDI be **DISMISSED WITH PREJUDICE**. *Lajeunesse, 2017 U.S. Dist. LEXIS 8228, 2017 WL 262692, at *4 n.4*.

(3) Plaintiffs' Motion to Dismiss [#98] be **GRANTED IN PART** and **DENIED IN PART**. Specifically, the Court **[*65]** **RECOMMENDS** that Plaintiffs' Motion to Dismiss be **GRANTED** to the extent it seeks to dismiss Counterclaim Two but **DENIED** to the extent it seeks to dismiss Counterclaims One and Three. Because CDI acknowledges that it cannot plausibly plead a tortious interference claim [#105 at 5], the Court respectfully **RECOMMENDS** that Claim Two be **DISMISSED WITH PREJUDICE**.

(4) Plaintiffs' Motion to Strike [#99] be **DENIED**.[47]

DATED: October 7, 2021

---

[47] Within fourteen days after service of a copy of this Recommendation, any party may serve and file written objections to the magistrate judge's proposed findings of fact, legal conclusions, and recommendations with the Clerk of the United States District Court for the District of Colorado. *28 U.S.C. § 636(b)(1)*; *Fed. R. Civ. P. 72(b)*; *Griego v. Padilla (In re Griego), 64 F.3d 580, 583 (10th Cir. 1995)*. A general objection that does not put the district court on notice of the basis for the objection will not preserve the objection for *de novo* review. "[A] party's objections to the magistrate judge's report and recommendation must be both timely and specific to preserve an issue for *de novo* review by the district court or for appellate review." *United States v. 2121 East 30th Street, 73 F.3d 1057, 1060 (10th Cir. 1996)*. Failure to make timely objections may bar *de novo* review by the district judge of the magistrate judge's proposed findings of fact, legal conclusions, **[*66]** and recommendations and will result in a waiver of the right to appeal from a judgment of the district court based on the proposed findings of fact, legal conclusions, and recommendations of the magistrate judge. *See* *Vega v. Suthers, 195 F.3d 573, 579-80 (10th Cir. 1999)* (holding that the district court's decision to review magistrate judge's recommendation *de novo* despite lack of an objection does not preclude application of "firm waiver rule"); *Int'l Surplus Lines Ins. Co. v. Wyo. Coal Refining Sys., Inc., 52 F.3d 901, 904 (10th Cir. 1995)* (finding that cross-claimant waived right to appeal certain portions of magistrate judge's order by failing to object to those portions); *Ayala v. United States, 980 F.2d 1342, 1352 (10th Cir. 1992)* (finding that plaintiffs waived their right to appeal the magistrate judge's ruling by failing to file objections). *But see, Morales-Fernandez v. INS, 418 F.3d 1116, 1122 (10th Cir. 2005)* (holding that firm waiver rule does not apply when the interests of justice require review).

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > Judgments > Summary Judgment > Burdens of Proof

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

HN1[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is warranted if the Court is satisfied that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. Fed. R. Civ. P. 56(a). A fact is material if it must be decided to resolve the substantive claim or defense to which the motion is directed. There is a genuine dispute of material fact if the evidence is such that a reasonable jury could return a verdict for the nonmoving party. The court must view the evidence presented in the light most favorable to the nonmoving party. It refrains from making credibility determinations or weighing the evidence. Real questions about credibility, gaps in the evidence, and doubts as to the sufficiency of the movant's proof will defeat a motion for summary judgment.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > Cross Motions

HN2[] **Entitlement as Matter of Law, Appropriateness**

When both parties move for summary judgment, the court must rule on each party's motion on an individual and separate basis, determining for each side whether a judgment may be entered in accordance with the Fed. R. Civ. P. 56 standard. Under the same rule, if upon review of a party's motion for summary judgment, the court, viewing the evidence in the light most favorable to the nonmoving party, enters summary judgment for the moving party, the court may properly declare the opposing party's cross-motion for summary judgment as moot.

Insurance Law > ... > Policy Interpretation > Ambiguous Terms > Construction Against Insurers

Insurance Law > Claim, Contract & Practice Issues > Policy Interpretation > Ordinary & Usual Meanings

Insurance Law > Claim, Contract & Practice Issues > Policy Interpretation > Question of Law

HN3[] **Ambiguous Terms, Construction Against Insurers**

Courts generally enforce the plain language of an insurance policy. Straightforward language in an insurance policy should be given its natural meaning. Under Pennsylvania law, an insurance contract is ambiguous where it: (1) is reasonably susceptible to different constructions, (2) is obscure in meaning through indefiniteness of expression, or (3) has a double meaning. Courts should not, however, distort the meaning of the language or resort to a strained contrivance in order to find an ambiguity. Any ambiguity in policy language should be interpreted against the insurer. Failing to define a coverage term does not mean that it is ambiguous. Parties' disagreement on the proper construction of a provision does not render it ambiguous. Whether a contract is ambiguous is a question of law for the court to decide.

Governments > Legislation > Interpretation

HN4[] **Legislation, Interpretation**

A word may be known by the company it keeps. Thus, words grouped in a list should be given related meaning. Further, that several items in a list share an attribute counsels in favor of interpreting the other items as possessing that attribute as well.

Insurance Law > ... > Policy Interpretation > Ambiguous Terms > Construction Against Insurers

Insurance Law > ... > Policy Interpretation > Ambiguous Terms > Unambiguous Terms

Insurance Law > Claim, Contract & Practice Issues > Policy Interpretation > Ordinary & Usual Meanings

Insurance Law > Claim, Contract & Practice Issues > Policy Interpretation > Plain Language

Insurance Law > ... > Policy Interpretation > Ambiguous Terms > Coverage Favored

HN5[] **Ambiguous Terms, Construction Against Insurers**

When insurance policy language is clear and unambiguous, the court must give effect to the langue of the contract. However, if the policy provision is ambiguous, the policy provision must be construed in favor of the insured and against the insurer as the drafter of the instrument. Also, the words of the insurance policy must be construed in their natural, plain and ordinary sense. Moreover, if the terms of a policy are clear, the court cannot rewrite it or give it a construction in conflict with the accepted and plain meaning of the language used.

Contracts Law > ... > Ambiguities & Contra Proferentem > Contract Ambiguities > Patent Ambiguities

HN6[] **Contract Ambiguities, Patent Ambiguities**

A contract will be found ambiguous only if it is: (1) reasonably or fairly susceptible of different constructions; (2) capable of being understood in more than one sense; (3) obscure in meaning through indefiniteness of expression; or (4) its words have a double meaning. A contract is not ambiguous if the court can determine its meaning absent a guide other than knowledge of the simple facts on which, from the nature of the language in general, its meaning depends; and a contract is not rendered ambiguous by the mere fact that the parties do not agree on the proper construction. Ambiguity in a contract must emanate from the language used in the contract rather than from one party's subjective perception of its terms. In determining whether or not there is an ambiguity, the whole contract must be considered and not an isolated part.

Contracts Law > Contract Interpretation > Ambiguities & Contra Proferentem

HN7[] **Contract Interpretation, Ambiguities & Contra Proferentem**

Ambiguity in a contract must emanate from the contractual language itself, not from any party's perception or interpretation of those terms.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN8[] **Sherman Act, Claims**

The rule that a parent and wholly owned subsidiary cannot conspire with one another for antitrust purposes recognizes that given the control a parent wields over its wholly owned subsidiary, these parties always share a unity of purpose or a common design, and thus, cannot engage in Section 1 of the Sherman Antitrust Act concerted activity.

Business & Corporate Law > ... > Corporate Existence, Powers & Purpose > Existence > Distinct & Separate Legal Entity

Torts > Vicarious Liability > Corporations > Subsidiary Corporations

HN9[] **Existence, Distinct & Separate Legal Entity**

In the context of a parent company and a wholly owned subsidiary, "wholly" means completely and entirely in an absolute and objective sense.

Insurance Law > Liability & Performance Standards > Bad Faith & Extracontractual Liability > Elements of Bad Faith

HN10[] **Bad Faith & Extracontractual Liability, Elements of Bad Faith**

A claim for statutory bad faith under 42 Pa. C.S. § 8371 requires that the insurer has acted in bad faith toward the insured.

Counsel: **[**1]** For TITHONUS PARTNERS II, LP, Plaintiff: Daniel B. McLane, LEAD ATTORNEY, Michael P. Pest, Duane Morris LLP, Pittsburgh, PA.

For CHICAGO TITLE INSURANCE COMPANY, Defendant: James A Willhite, LEAD ATTORNEY, PRO HAC VICE, Philadelphia, PA.

Judges: Hon. WILLIAM S. STICKMAN IV, UNITED STATES DISTRICT JUDGE.

Opinion by: WILLIAM S. STICKMAN IV

Opinion

[*316] **MEMORANDUM OPINION**

WILLIAM S. STICKMAN IV, United States District Judge

Plaintiff, Tithonus Partners II, LP ("Tithonus Partners"), sued Defendant, Chicago Title Insurance Company ("Chicago Title"), alleging that it breached a title insurance policy by failing to indemnify Tithonus Partners in a related action concerning a land dispute, and that Chicago Title's refusal to do so was in violation of Pennsylvania's insurance bad faith statute, *42 Pa. C.S. § 8371*. (ECF No. 21). The parties filed cross-motions for summary judgment. (ECF Nos. 27 and 28). For the following reasons, the Court holds that summary judgment is warranted in Chicago Title's favor because, as a matter of law, no coverage was owed under the insurance agreement.

I. FACTUAL BACKGROUND

In 2012, Tithonus Partners, a limited partnership, was formed with Tithonus GP II, LLC ("Tithonus GP") as the general partner and Hawthorne Assisted **[**2]** Living Partners II, LP, Richard Irwin and Loriann Putzier as the limited partners. Tithonus Partners then created three separate limited partnerships so that each limited partnership could acquire an assisted living facility. One of these partnerships was Tithonus Tyrone, LP ("Tithonus Tyrone"), which took title to an assisted living facility in Tyrone, Pennsylvania known as Colonial Courtyard at Tyrone. 0.1% of Tithonus Tyrone was owned by one general partner, Tithonus GP, and 99.9% was owned by one limited partner, Tithonus Partners. (ECF No. 33, ¶¶ 2-3, 5-7, 9; ECF No. 39, ¶¶ 2-3, 5-7, 9; ECF **[*317]** No. 30, ¶¶ 1-4, 18-19; ECF No. 35, ¶ 1-4, 18-19).

In June 2012, Tithonus Tyrone purchased three adjoining parcels of property totaling approximately 60 acres in the Tyrone Borough of Blair County, Pennsylvania. The assisted living facility was located on a portion of the insured land, and the rest of the insured land was vacant. (ECF No. 33, ¶¶ 11, 14; ECF No. 39, ¶¶ 11, 14). Tithonus Tyrone also obtained a policy of title insurance (Policy Number 120181PIT-B) from Chicago Title, dated July 2, 2012, in the amount of $3,077,000.00 (the "Policy"). (ECF No. 21-1). "Schedule A" to the Policy defined **[**3]** the "Insured" as "Tithonus Tyrone, LP, a Pennsylvania limited partnership." (ECF No. 21-1, p. 3). The "Definition of Terms" further identified the "Insured" as:

(i) The term "Insured" also includes

(A) successors to the Title of the Insured by operation of law as distinguished from purchase, including heirs, devisees, survivors, personal representatives, or next of kin;

(B) successors to an Insured by dissolution, merger, consolidation, distribution, or reorganization;

(C) successors to an Insured by conversion to another kind of Entity;

(D) a grantee of an Insured under a deed delivered without payment of actual valuable consideration conveying the Title

(1) if the stock, shares, memberships, or other equity interests of the grantee are wholly-owned by the named insured,

(2) if the owns the named Insured;

(3) if the grantee is wholly-owned by an affiliated Entity of the named Insured; provided the affiliated Entity and the named Insured are both wholly-owned by the same person or Entity, or

(4) if the grantee is a trustee or beneficiary of a trust created by a written instrument established by the Insured named in Schedule A for estate planning purposes.

(ii) With regard to (A), (B), (C), and **[**4]** (D) reserving, however, all rights and defenses as to any successor that the Company would have had against any predecessor Insured.

(ECF No. 21-1, p. 13, § 1(d)).[1] The Policy insured "against loss or damage" for "Covered Risks" subject to certain "Exclusions from Coverage," "Exceptions from Coverage Contained in Schedule B" and the "Conditions" set forth in the policy. (ECF No. 21-1, p. 2) (capitalization removed). It further stated that the "law of the jurisdiction where the Land is located" shall be applied to "interpret and enforce the terms of this policy." (ECF No. 21-1, p. 17).

In 2013, Tithonus Tyrone separated the 1-2 acre lot on which the assisted living facility sat (Lot 4) for refinancing with the U.S. Department of Housing and Urban Development ("HUD"). The purpose of the subdivision was to facilitate refinancing through HUD of Tithonus Tyrone's mortgage loan and to finance some capital improvements on the assisted living facility. To complete the financing, it was necessary for Tithonus Tyrone to convey the vacant land. Accordingly, Tithonus Tyrone **[*318]** retained title to Lot 4 and the assisted living facility, and it conveyed the 58 acres of vacant property to Tithonus Partners **[**5]** through a deed ("First Deed") dated April 24, 2014.[2] (ECF No. 21-2; ECF No. 30, ¶¶ 5, 17; ECF No. 35 ¶¶ 5, 17; ECF No. 33, ¶¶ 19-22; ECF No. 39, ¶¶ 19-22). The First Deed states, in relevant part:

THIS INDENTURE is made as of the 23rd day of April, 2014, between TITHONUS TYRONE, LP, a Pennsylvania limited partnership ("Grantor") and TITHONUS PARTNERS II, LP, a Pennsylvania limited partnership ~("Grantee").

WITNESSETH, that Grantor, as a distribution to Grantee with a value of Twenty-Two Thousand Five Hundred Dollars ($22,500), the receipt and legal sufficiency of which are hereby acknowledged, does hereby grant, bargain, sell, release, convey and confirm, unto Grantee, and Grantee's successors and assigns, all of Grantor's interest in and described in Exhibit A, attached hereto.

UNDER AND SUBJECT TO any and all easements, rights of way, leases, licenses, restrictions, reservations and grants (including, but not limited to reservations and grants of mining, coal, gas and oil rights, if any) as described in Title Insurance Policy No. 120181PIT-B, dated July 2, 2012, issued to Grantor by Chicago Title Insurance Company.

TOGETHER with all singular ways, waters, water courses, rights, liberties, **[**6]** privileges, hereditaments and appurtenances whatsoever thereunto belonging, or in anywise appertaining, and the reversions and remainders, rents, issues and profits thereof and also all the estate, right, title, interest, use, trust, property, possession, claim and demand whatsoever of Grantor, in law, equity, or otherwise, howsoever, of, in, to or out of the same.

---

[1] The Policy fails to include a further definition of the phrase "successors to an Insured by dissolution, merger, consolidation, distribution, or reorganization," set forth in § 1(d)(i)(B), or to further define the teem "wholly-owns" set forth in § 1(d)(i)(D)(2). (ECF No. 30, ¶¶ 15, 16; ECF No. 35, ¶¶ 15, 16).

[2] Tithonus Tyrone is now owned by a third-party. (ECF No. 33, ¶¶ 37, 38, 41; ECF No. 39, ¶¶ 37, 38, 41).

> TO HAVE AND TO HOLD the same to and for the use of the said Grantee, and the Grantee's successors and assigns, FOREVER.
> AND THE GRANTOR hereby covenants and agrees that Grantor will warrant SPECIALLY the property hereby conveyed.

(ECF No. 21-2, p. 2). Tithonus Partners did not obtain a new owner's policy of title insurance on the vacant land. (ECF No. 33, ¶ 25; ECF No. 39, ¶ 25). It did not speak to anyone at Chicago Title about obtaining a new owner's policy of title insurance on the vacant land identifying it as the name insured. Chicago Title did not represent to Tithonus Partners that it would be covered by the Policy issued to Tithonus Tyrone. (ECF No. 33, ¶¶ 25-28; ECF No. 39, ¶¶ 25-28).

In 2017, Tithonus Partners subdivided the 58 acres of vacant land to facilitate the sale of a small portion, Lot 5. Then, by deed dated **[**7]** January 30, 2018 ("Second Deed"), Lot 5 was sold by Tithonus Partners to Port Pizza, LLC ("Port Pizza"). (ECF No. 21-4; ECF No. 30, ¶¶ 23-24; ECF No. 35, ¶¶ 23-24; ECF No. 33, ¶¶ 34-35; ECF No. 39, ¶¶ 34-35).

On or about January 21, 2020, Port Pizza commenced an action against Tithonus Partners and four other defendants at Docket No. 2020-CN-239 in the Court of Common Pleas of Blair County, Pennsylvania, alleging that a portion of the conveyed property had not been owned by Tithonus Partners. Tithonus Partners then submitted a claim to Chicago Title on February **[*319]** 21, 2020, requesting that it fully indemnify, defend and/or resolve issues pertaining to the allegations in the Port Pizza litigation. It claimed it was an "'Insured' under the 2012 Policy through a Deed of distribution dated April 23, 2014 delivered by Tithonus Tyrone, LP."[3] (ECF No. 34, p. 270; ECF No. 33, ¶¶ 43-44; ECF No. 39, ¶¶ 43-44).

Chicago Title determined that Tithonus Partners did not qualify for coverage as an "insured" under the Policy, and it denied the claim by March 13, 2020 letter ("First Denial Letter"). Its explanation for the denial of coverage was:

> The Claimant is not an "insured" as the term is defined by the **[**8]** Policy. The Claimant is not the named insured identified in Schedule A of the Policy. The Claimant is not a successor to the Named Insured because the Claimant acquired the Property by grant. Finally, the Claimant is not a grantee of an insured under a deed delivered without payment because Claimant paid $22,500 to the Named Insured in exchange for the Property. As such, the Claimant does not qualify as an insured as defined under the Policy.

(ECF No. 21-5, p. 3).

By March 25, 2020 letter, Tithonus Partners requested reconsideration arguing that it: (1) qualified as an insured under § 1(d)(i)(B) of the Policy because it was a successor to Tithonus Tyrone's interests in the property by distribution; and/or it (2) qualified as an insured under § 1(d)(i)(D)(2) of the Policy because it never paid any consideration to Tithonus Tyrone for the distribution of the property and because Tithonus Partners wholly owned Tithonus Tyrone at the time of the grant.[4] (ECF No. 34, pp. 272-73). By April 10, 2020 letter, Chicago Title once again denied Tithonus Partners's claim, because it not an "Insured" under the Policy. (ECF No. 21-6). As to Tithonus Partners's first argument regarding coverage under **[**9]** § 1(d)(i)(B) of the Policy, Chicago Title responded:

> A distribution of the nature mentioned in the Policy occurs as part of a non-voluntary transfer by operation of law resulting from some acts such as a dissolution or merger. In this instance, there was no dissolution of the Named Insured, and the Named Insured did not merge with the Claimant. In this circumstance, the transfer of the deed evidences an agreement between the Named Insured and the Claimant to voluntarily convey the Property rather than being merely a confirmatory act memorializing a transfer that had already occurred by operation of law.

---

[3] At time of its claim, Tithonus Partners and Tithonus Tyrone had no common ownership. (ECF No. 33, ¶ 45; ECF No. 39, ¶ 45). Furthermore, Tithonus Tyrone is not a party to the Port Pizza litigation, and Tithonus Partners has not demanded that Tithonus Tyrone defend and indemnify Tithonus Partners in the litigation. (ECF No. 33, ¶ 47; ECF No. 39, ¶¶ 47, 48).

[4] Tithonus Partners was actually a 99.9% owner of Tithonus Tyrone at the time of the grant.

(ECF No. 21-6, p. 3) (internal citations omitted). As to Tithonus Partners's second argument regarding coverage under § 1(d)(i)(D)(2) of the Policy, Chicago Title responded:

> [T]he Agreement of Limited Partnership for the Named Insured states that the Named Insured is a limited partnership with [Tithonus] GP II, LLC ("[Tithonus] GP") as the general partner, and the Claimant as the limited partner. The Claimant's Agreement of Limited Partnership states that the Claimant is a limited partnership with [Tithonus] GP **[*320]** as the general partner, and Hawthorne Assisted Living Partners II, LP, Richard **[**10]** Irwin, and Loriann Putzier as limited partners. As such, it does not appear that the Named Insured is wholly owned by the Claimant, and, as a result, the Claimant does not quality as an insured as defined under the Policy.

(ECF No. 21-6, p. 3) (citations omitted).

On May 28, 2020, Tithonus Partners commenced this action in the Civil Division of the Court of Common Pleas of Allegheny County, Pennsylvania. (ECF No. 1). Chicago Title removed the case to this Court on June 26, 2020, on the basis of diversity jurisdiction, *see* *28 U.S.C. §§ 1332*, *1441*. (ECF No. 1). Both parties have sought summary judgment in their favor as to both counts. Chicago Title argues that, as a matter of law, it correctly (Count I) and reasonably (Count II) denied coverage under the Policy and refused to defend Tithonus Partners in the Port Pizza litigation. (ECF No. 32). In contrast, Tithonus Partners argues that summary judgment should be granted in its favor because, as a matter of law, it qualified as an "Insured" under the Policy (Count I), and that Chicago Title failed to conduct a reasonable investigation prior to denying its claim (Count II). (ECF Nos. 28, 29).

II. Standard Of Review

HN1[] Summary judgment is warranted if the Court is **[**11]** satisfied that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*; *see also* *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. A fact is material if it must be decided to resolve the substantive claim or defense to which the motion is directed. *See* *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. There is a genuine dispute of material fact "if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Id.* The Court must view the evidence presented in the light most favorable to the nonmoving party. *Id. at 255*. It refrains from making credibility determinations or weighing the evidence. *Id.* "[R]eal questions about credibility, gaps in the evidence, and doubts as to the sufficiency of the movant's proof' will defeat a motion for summary judgment. *El v. Se. Pa. Transp. Auth., 479 F.3d 232, 238 (3d Cir. 2007)*.

HN2[] "When both parties move for summary judgment, 'Nile court must rule on each party's motion on an individual and separate basis, determining for each side whether a judgment may be entered in accordance with the *Rule 56* standard.'" *Auto-Owners Ins. Co. v. Stevens & Ricci Inc., 835 F.3d 388, 402 (3d Cir. 2016)* (quoting 10A Charles Alan Wright Et Al., Federal Practice And Procedure § 2720 (3d ed. 2016)). Under the same rule, if upon review of a party's motion for summary judgment, the court, viewing the evidence in the light most **[**12]** favorable to the nonmoving party, enters summary judgment for the moving party, the court may properly declare the opposing party's cross-motion for summary judgment as moot. *Beenick v. LeFebvre, 684 F. App'x 200, 205-06 (3d Cir. 2017)*.

III. Analysis

The threshold issue is whether Tithonus Partners is an "Insured" party under the Policy issued by Chicago Title to Tithonus Tyrone in 2012. After a probing examination of the relevant contractual language, the Court holds that Tithonus Partners is not an "Insured." As such, no coverage is owed. Because it is not an "Insured" and is not entitled to coverage, Tithonus Partners's bad faith claim also fails.

[*321] A. COUNT I - BREACH OF CONTRACT

The parties agree that Pennsylvania law governs the Court's analysis of the Policy language. Tithonus Partners bears the burden of proving facts that bring its claim at Count I within the Policy's grant of coverage. If it meets that burden, then Chicago Title bears the burden of demonstrating that a policy exclusion excuses it from providing coverage. *State Farm Fire & Cas. Co. v. Est. of Mehlman, 589 F.3d 105, 111 (3d Cir. 2009)* (citing *Koppers Co., Inc. v. Aetna Cas. And Sur. Co., 98 F.3d 1440, 1446 (3d. Cir. 1996)* (applying Pennsylvania law)).

HN3[] Courts generally enforce the plain language of an insurance policy. *Reliance Ins. Co. v. Moessner, 121 F.3d 895, 901 (3d Cir. 1997)* ("If . . . the terms of the policy are clear and unambiguous, the general rule in Pennsylvania is to give effect **[**13]** to the plain language of the agreement." (citations omitted)). "Straightforward language in an insurance policy should be given its natural meaning." *Lawson v. Fortis Ins. Co., 301 F.3d 159, 162 (3d Cir. 2002)*. "Under Pennsylvania law, an insurance contract is ambiguous where it: '(1) is reasonably susceptible to different constructions, (2) is obscure in meaning through indefiniteness of expression, or (3) has a double meaning.' *Viera v. Life Ins. Co. of N. Am., 642 F.3d 407, 419 (3d Cir. 2011)* (quoting *Lawson, 301 F.3d at 163*). Courts should not, however, "distort the meaning of the language or resort to a strained contrivance in order to find an ambiguity." *Madison Constr. Co. v. Harleysville Mut. Ins. Co., 557 Pa. 595, 735 A.2d 100, 106 (Pa. 1999)*; *see also* *Selko v. Home Ins. Co., 139 F.3d 146, 152 n.3 (3d Cir. 1998)* (applying Pennsylvania law). Any ambiguity in policy language should be interpreted against the insurer. *McMillan v. State Mut. Life Assurance Co., 922 F.2d 1073, 1075 (3d Cir. 1990)*. Failing to define a coverage term does not mean that it is ambiguous. *Cap. Flip, LLC v. Am. Modern Select Ins. Co., 416 F. Supp. 3d 435, 439 (W.D. Pa. 2019)* (citing *Heebner v. Nationwide Ins. Enterprise, 818 F. Supp. 2d 853, 857 (E.D. Pa. 2011)*). Parties' disagreement on the proper construction of a provision does not render it ambiguous. *Trombetta v. Raymond James Fin. Servs., Inc., 2006 PA Super 229, 907 A.2d 550, 562 (Pa. Super. 2006)*. Whether a contract is ambiguous is a question of law for the court to decide. *Id. at 561-62*; *Thomas Rigging & Constr. Co., Inc. v. Contraves, Inc., 2002 PA Super 134, 798 A.2d 753, 756 (Pa. Super. 2002)*; *see also* *Allstate Prop. & Cas. Ins. Co. v. Squires, 667 F.3d 388, 391 (3d Cir. 2012)* (under Pennsylvania law, the interpretation of an insurance contract is a matter of law).

1. Tithonus Partners is not a "successor" to Tithonus Tyrone pursuant to § 1(d)(i)(B) of the Policy and, therefore, it is not an "Insured" under that clause of the Policy.

Section 1(d)(i)(B) of the Policy **[**14]** provides:

> The term "Insured" also includes (B) successors to an Insured by dissolution, merger, consolidation, ***distribution***, or reorganization[.]

(ECF No. 21-1, p. 13) (emphasis added). Tithonus Partners contends that it is a successor to Tithonus Tyrone by distribution. Tithonus Partners concedes that there was not a dissolution, merger, consolidation, or reorganization of Tithonus Tyrone. According to Tithonus Partners, the First Deed conveying the Property to it from Tithonus Tyrone expressly labels the conveyance as "a distribution to Grantee." (ECF No. 21-2, p. 2). It takes the position that "by the plain and express language of the First Deed, Tithonus Partners is a successor to the Property by distribution to Tithonus Tyrone." (ECF No. 29, p. 15). Thus, because it qualifies as **[*322]** a "successor" to Tithonus Tyrone, Tithonus Partners argues that it is clearly an "Insured" under the plain language of the Policy. (ECF No. 42, pp. 5-6; ECF No. 47, pp. 2-3).

In contrast, Chicago Title argues that Tithonus Partners has not shown that it is actually Tithonus Tyrone's successor. It contrasts the language of § 1(d)(i)(A), which references "successors to the Title of the Insured by operation of law," with **[**15]** that of § 1(d)(i)(B), which references "successors to an Insured." (ECF No. 36, p. 10). Chicago Title argues that this difference is significant and provides coverage in distinct situations. Citing to Black's Law Dictionary, it argues that being a "successor" to an entity—rather than merely to the title— "implies that the predecessor entity has ceased to exist and has been replaced for all purposes by the successor entity." (ECF No. 36, p. 10). Chicago Title contends that it is undisputed that Tithonus Tyrone still exists and that it operates an assisted living facility on the portion of the land it kept (Lot 4) from which it generates income. And, Tithonus Tyrone's portion of the land remains insured under the Policy. (ECF No. 32, pp. 10-11). Chicago Title also argues that "[e]very owner of real estate who takes title by grant has succeeded to its predecessor's title in that limited sense, but this does not make the current owner the 'successor' to the prior owner. There is a difference under the Policy between a 'successor to the title' and a 'successor to the Insured.' (ECF No. 48, pp. 3-4).

The Court holds that Tithonus Partners is not a successor to Tithonus Tyrone pursuant to § 1(d)(i)(B) **[**16]** of the Policy. In reaching its holding, the Court first examined the specific language of the clause at issue—which provides coverage to "successors to an Insured by dissolution, merger, consolidation, distribution, or reorganization." It is significant, as Chicago Title argued, that § 1(d)(i)(B) specifically references successors "to an Insured" rather than "to the Title of the Insured" referenced at § 1(d)(i)(A). The Court may not ignore the difference in language—it must give it full effect that recognizes and actualizes the difference in terminology used in each clause. The fact that the phrase "successors *to an Insured"* is modified by a list of specific events highlights that § 1(d)(i)(B) contemplates an existential alteration, if not extinction, of the original "Insured."

The Court's reading of § 1(d)(i)(B) is bolstered by the interpretive canon[5] *noscitur a sociis*, which is "literally translated as 'it is known by its associates.'" *Graham Cnty. Soil & Water Conservation Dist. v. United States ex rel. Wilson, 559 U.S. 280, 288, 130 S. Ct. 1396, 176 L. Ed. 2d 225 (2010)* (citation omitted). ***HN4***[] The canon "counsels lawyers reading statutes that 'a word may be known by the company it keeps.'" *Id.* (citation omitted). Thus, "words grouped in a list should be given related meaning." *S.D. Warren Co. v. Me. Bd. of Env't Prot., 547 U.S. 370, 378, 126 S. Ct. 1843, 164 L. Ed. 2d 625 (2006)* (citations omitted). Further, "[t]hat several items in a list share an attribute counsels **[**17]** in favor of interpreting the other items as possessing that attribute as well." *Beecham v. United States, 511 U.S. 368, 371, 114 S. Ct. 1669, 128 L. Ed. 2d 383 (1994)*. Section 1(d)(i)(B) includes "distribution" in a series of words that each refer to an event whereby a business entity is structurally changed (i.e., "merger," "consolidation," **[*323]** "reorganization") or eliminated (i.e., "dissolution"). "Distribution," as used in §1(d)(i)(B), must be read consistently with its companions. Thus, it must refer to the liquidation of an entity's assets, rather than partnership distributions made in the ordinary course of business. This reading is internally consistent with the provisions of § 1(d)(i)(B), and it also recognizes the distinction between "successors to the Title of the Insured" and "successors to an Insured." Tithonus Partners is not an "Insured" under § 1(d)(i)(B).

2. Tithonus Partners is not an "Insured" under § 1(d)(i)(D)(2) of the Policy.

Tithonus Partners also claims coverage as an "Insured" under § 1(d)(i)(D)(2) of the Policy. That subclause defines an "Insured" as:

> (D) a grantee of an Insured under a deed delivered without payment of actual valuable consideration conveying the Title
>
> * * *
>
> (2) if the grantee wholly owns the named Insured[.]

(ECF No. 21-1, p. 13). Tithonus Partners argues that the record is **[**18]** clear that it did not pay consideration for the property. (ECF No. 38, pp. 8-9). It contends that the original named "Insured," Tithonus Tyrone, should be deemed "wholly owned" by Tithonus Partners because it owned 99.9% of Tithonus Tyrone at the time of the transfer of property, and the remaining 0.1% was owned by Tithonus Partners's general partner, Tithonus GP II, LLC, which was also a general partner of Tithonus Tyrone. Tithonus Partners argues that it is impossible for a limited partnership to be 100% owned by one single entity in Pennsylvania, as it must have a general partner and a limited partner. (ECF No. 38, pp. 10-12; ECF No. 47, pp. 3-5). Tithonus Partners submits that "[t]his is as close as a Pennsylvania limited partnership can be to 'wholly owned,'" such that it effectively "wholly owned" Tithonus Tyrone at the time of the conveyance and, therefore, it was insured under § 1(d)(i)(D)(2) of the Policy. (ECF No. 47, p. 5).

---

[5] *See, e.g., Viera, 642 F.3d at 418-19* (applying a canon of statutory interpretation to interpret language in an insurance contract); *J.C. Penney Life Ins. Co. v. Pilosi, 393 F.3d 356, 365-66 (3d Cir. 2004)* (same).

Chicago Title argues that Tithonus Partners cannot be classified as an "Insured" as the grantee of Tithonus Tyrone because, even assuming no consideration was paid, it failed to meet the test set forth in § 1(d)(i)(D)(2) of the Policy- "if the grantee wholly **[**19]** owns the named Insured." (ECF No. 32, pp. 15-17). According to Chicago Title, when the claim for coverage was made, Tithonus Partners owned 0% of Tithonus Tyrone, and Tithonus Partners has admitted as much. (ECF No. 48, p. 6). Tithonus Partners is a limited partnership with four partners, none of whom were ever Tithonus Tyrone. When the original Policy was sought in 2012, Tithonus Tyrone was a limited partnership with Tithonus GP II, LLC as the general partner and Tithonus Partners as the limited partner. (ECF No. 32, pp. 15-16). It submits that "[a] conveyance from a parent corporation to a wholly owned subsidiary would qualify; but a conveyance by a partnership to only one of its two partners, as occurred here, would not." (ECF No. 32, p. 16).

The Court will first address whether to read the provisions of this subclause as referring to ownership at the time of the conveyance or at the time the insurance claim is made. Chicago Title takes the position that because § 1(d)(i)(D)(2) uses the present tense, the critical point is the ownership of the named Insured at the time the claim is made, rather than the time of conveyance. If, as Chicago Title argues, the critical date is the time the claim was **[**20]** made, then there is no question that Tithonus Partners is not an "Insured" **[*324]** because it is undisputed that, at the time, it did not own any part of Tithonus Tyrone.

The Court holds, however, that the proper point of reference is the time of the grant. The focal point of § 1(d)(i)(D) is the grant of the insured Title pursuant to "a deed delivered without payment of actual valuable consideration." This clause looks to the time of the grant. And the relevant subclause—"if the grantee wholly owns the named Insured," § 1(d)(i)(D)(2)—clearly refers to the specific event of the conveyance effectuated by "a deed *delivered* without payment," § 1(d)(i)(D) (emphasis added). Moreover, the reading espoused by Chicago Title, focusing on the time the claim was made, would allow related companies (as Tithonus Partners and Tithonus Tyrone are here) to recalibrate ownership structures prior to making a claim when, at the time of the conveyance, the "wholly owned" provision of §1(d)(i)(D) was clearly inapplicable. This would not be a sound result and is not supported by the terms of the contract. As such, the Court will, as urged by Tithonus Partners, look to the time of the conveyance.

The Court holds that there is no genuine issue of material fact that **[**21]** Tithonus Partners made no "payment of actual valuable consideration" in return for the conveyance. The critical issue, therefore, is whether Tithonus Tyrone was "wholly owned" by Tithonus Partners. Notwithstanding the fact that, as Tithonus Partners argues, it owned *almost* all of Tithonus Tyrone, 99.9%, the Court cannot hold that it *wholly* owned Tithonus Tyrone. The contract clearly and unambiguously calls for whole ownership, not nearly whole or "effectively whole" as Tithonus Partners advocates.

"Wholly owned" is not defined by the Policy, so the Court must interpret what the term means in the context of the Policy. Pennsylvania law on interpreting insurance contracts provides:

> In interpreting an insurance policy, a court must ascertain the intent of the parties as manifested by the language of the written agreement. ***HN5***[] When the policy language is clear and unambiguous, the court must give effect to the langue of the contract. However, if the policy provision is ambiguous, the policy provision must be construed in favor of the insured and against the insurer as the drafter of the instrument. Also, ***the words of the insurance policy must be construed in their natural, plain and ordinary [**22] sense***.

Riccio v. Am. Republic Ins. Co., 550 Pa. 254, 705 A.2d 422, 426 (Pa. 1997) (internal citations omitted) (emphasis added). Moreover, "[i]f the terms of a policy are clear, [the] Court cannot rewrite it or give it a construction in conflict with the accepted and plain meaning of the language used." *Treesdale, Inc. v. TIG Ins. Co., 681 F. Supp. 2d 611, 616-17 (W.D. Pa. 2009)* (quoting *Wall Rose Mut. Ins. Co. v. Manross, 2007 PA Super 395, 939 A.2d 958, 962 (Pa. Super. 2007)*).

HN6[] "[A] contract will be found ambiguous only if it is: (1) reasonably or fairly susceptible of different constructions; (2) capable of being understood in more than one sense; (3) obscure in meaning through indefiniteness of expression; or (4) its words have a double meaning." *Id. at 617* (citing *Bohler-Uddeholm Am., Inc. v. Ellwood Grp., Inc., 247 F.3d 79, 93 (3d Cir. 2001)*). Further:

> A contract is not ambiguous if the court can determine its meaning absent a guide other than "knowledge of the simple facts on which, from the nature of the language in general, its meaning depends; and a contract is not rendered ambiguous by the mere fact that the **[*325]** parties do not agree on the proper construction." "[A]mbiguity in a contract must emanate from the language used in the contract rather than from one party's subjective perception of its terms." In determining whether or not there is an ambiguity, "the whole contract must be considered and not an isolated part."

Id. (internal citations omitted).

The Court holds that the term "wholly owned" as used **[**23]** in § 1(d)(i)(D)(2) is clear and unambiguous. It is not readily susceptible to different constructions. Nor is it capable of being understood in more than one sense. It is not obscure in meaning through indefiniteness of expression and, finally, its words do not have a double meaning. Although Tithonus Partners argues that it is impossible for a limited partnership to be wholly owned, this was not specifically couched, nor does the Court construe it, as an argument that the term "wholly owned" is ambiguous. ***HN7***[] Ambiguity must emanate from the contractual language itself, not from any party's perception or interpretation of those terms. The Court cannot read into "wholly owned" an ambiguity that is not present. The term is not ambiguous.

The Court must afford the terms of § 1(d)(i)(D)(2) their natural, plain and ordinary meaning at the time of the execution of the contract. Black's Law Dictionary[6] defined "wholly" as "[n]ot partially; fully; completely." *Wholly*, BLACK'S LAW DICTIONARY 1735 (9th ed. 2009). The Random House Dictionary similarly defined "wholly" as "entirely; totally; altogether" and "to the whole amount, extent." *Wholly*, THE RANDOM HOUSE DICTIONARY OF THE ENGLISH LANGUAGE 2171 (2d ed. 1987). Finally, Webster's **[**24]** Third defined the term as "to the full or entire extent" and "to the exclusion of other things." *Wholly*, WEBSTER'S THIRD NEW INTERNATIONAL DICTIONARY OF THE ENGLISH LANGUAGE 2612 (3d ed. 1993). Here, the record shows that, at the time of the conveyance, Tithonus Partners owned 99.9% of Tithonus Tyrone. The Court therefore cannot find that it "wholly owned" Tithonus Tyrone. To do so would be to expand the plain meaning of "wholly owned" to—as advocated by Tithonus Partners—*"effectively* wholly owned." But that is not what the Policy says, and the Court does not have the authority to amend and broaden the terms of the parties' agreement.

Tithonus Partners cites to *Siegel Transfer, Inc. v. Carrier Express, Inc., 54 F.3d 1125, 1133 (3d Cir. 1995)*, as a purported example of a case where the Third Circuit has held that a rule governing "wholly owned" subsidiaries may apply where the ownership is substantial, but less than 100%. *Siegel* arose in the antitrust context and addressed whether the rule that a parent company cannot conspire with its wholly-owned subsidiary—enunciated by the Supreme Court in *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*—also applied when the parent does not quite own 100% of the subsidiary. *Siegel* cannot be read for the broad proposition that somewhat less than 100% may be construed as "wholly owned" **[**25]** in all cases and for all purposes. Rather, it must be construed and constrained by the context in which it arose ***antitrust law***. The *Copperweld* decision addressed the "fundamental question . . . [of] whether an agreement **[*326]** between a parent and its wholly owned subsidiary represents the conduct of one economic actor or two." *Siegel, 54 F.3d at 1132*. ***HN8***[] The rule that a parent and "wholly owned" subsidiary cannot conspire with one another for antitrust purposes recognizes that "given the control a parent wields over its wholly owned subsidiary, these parties always share 'a unity of purpose or a common design,' and thus, cannot engage in *Section 1* [of the *Sherman Antitrust Act*] concerted activity." *Id.* (citing *Copperweld, 467 U.S. at 771-72*). Because the focus of the *Copperweld* decision was market impact, it was not a far stretch to extend this rule to situations where a parent did not own a complete majority of the subsidiary. The effect on markets of concerted action is essentially the same. This market-based rule reflects the purpose of ***antitrust law***, the effect of companies' collaboration on markets. It cannot be read as a blanket redefinition of the term "wholly owned" to be something less. The Third Circuit simply did not hold that, as a

[6] The Court reviewed dictionaries that were contemporaneous with the execution of the contract in 2012. *See Madison Constr. Co., 735 A.2d at 108* ("Words of common usage in an insurance policy are to be construed in their natural, plain, and ordinary sense, and we may inform our understanding of these terms by considering their dictionary definitions.").

general matter, "wholly owned" as used in contracts **[**26]** and other contexts really means "effectively wholly owned" or some other looser measure.

The Court holds that it must afford the term "wholly owned" used in § 1(d)(i)(D) its ordinary and natural construction. ***HN9***[] "Wholly" means completely and entirely in an absolute and objective sense.[7] Tithonus Partners did not wholly own Tithonus Tyrone. It is not, therefore, an "Insured" under Section 1 of the Policy. Because it is not an "Insured," coverage is not owed. As such, the Court must enter judgment in favor of Chicago Title and against Tithonus Partners on the breach of contract claim.[8]

B. Count II - Insurance Bad Faith Pursuant To *42 Pa. C.S. § 8371*

HN10[] A claim for statutory bad faith under *42 Pa. C.S. § 8371* requires that "the insurer has acted in bad faith toward the insured." As explained above, Tithonus Partners was not an "Insured" under the Policy. Because **[*327]** Tithonus Partners was not an "Insured" it cannot maintain a bad faith claim against Chicago Title. *See Seasor v. Liberty Mut. Ins. Co., 941 F. Supp. 488, 491 (E.D. Pa. 1996)* ("[I]n order to bring an action for bad faith against an insurer, one must qualify as an "insured" as that term is defined in the policy."). Accordingly, summary judgment will be entered in favor of Chicago Title as to Count II.

IV. Conclusion

For the foregoing reasons of law and fact, **[**27]** the Court will grant Chicago Title's summary judgment motion (ECF No. 27) and enter judgment in its favor as to Counts I and II. Orders of Court will follow.

[7] Tithonus Partners offers a final counterpoint, asserting that "Chicago Title cannot reasonably seek to enforce a 100% 'wholly owned' exclusion" because it is "legal[ly] and factual[ly] impossib[le]" for any entity to own 100% of Tithonus Tyrone, a Pennsylvania limited partnership. (ECF No. 29, p. 18). Tithonus Partners cites *Daburlos v. Commercial Insurance Co. of Newark, New Jersey, 381 F. Supp. 393, 400 (E.D. Pa. 1974)*, for the proposition that "conditions which are impossible of performance are ineffectual and void." That case concerned a policy condition that made it "impossible for the insureds, within the literal terms of [the contract], to modify their insurance [coverage]," thereby depriving them of an express "contractual right purchased by the payment of the premium." *Id. at 402*. The court thus "disregarded" the impossible condition and held that the insureds' beneficiary, having satisfied the other conditions of coverage, had a right to collect under the policy. *Id. at 397, 401*. The purportedly impossible condition in this case, however, is of a different sort. The "wholly owned" subclause—part of a generic definition section—does not have any effect whatsoever on the coverage rights of the named Insured (Tithonus Tyrone). Nor does it operate as the sole method for third parties (like Tithonus Partners) to seek coverage rights as successors to the named Insured. Thus, while affording "wholly owned" its plain meaning may render it inapplicable in most, if not all cases, it would not cause an outright deprivation of rights at the heart of the contract, as occurred in *Daburlos*. Accordingly, the Court will not "disregard[]" the "wholly owned" requirement. *Id at 401*. And the Court cannot "rewrit[e]" the contract or interpret it to require something less than whole ownership, which would not be a "reasonable interpretation" of unambiguous policy language. *Id.*

[8] Because, as a threshold matter, Tithonus Partners is not entitled to coverage as an "Insured" under Section 1 of the Policy, the Court need not address the parties' arguments under *Section 2*.

ORDER OF COURT

AND NOW, this 8th day of October 2021, for the reasons set forth in the Memorandum Opinion filed this same day, IT IS HEREBY ORDERED that Defendant Chicago Title Insurance Company's Motion for Summary Judgment (ECF No. 27) is GRANTED. Summary judgment will be entered in favor of Chicago Title Insurance Company and against Plaintiff Tithonus Partners II, LP. Plaintiff Tithonus Partner II, LP's Motion for Summary Judgment (ECF No. 28) is DENIED.

BY THE COURT:

/s/ William S. Stickman IV

Department 40

Deputy Sheriff: None

Courtroom Assistant: M. Navarro

NATURE OF PROCEEDINGS: Hearing on Demurrer - with Motion to Strike (CCP 430.10)

The Court's tentative ruling is provided to all sides via the Court's website.

The matter is called for hearing.

1. After hearing argument, the Court rules as follows: Plaintiff Ikspan, Inc. ("Plaintiff") sues Defendants Laurent Ruben ("Laurent"), Estelle Garnier Ruben ("Estelle"), David Schottenstein ("David"), and Prive Goods, LLC ("Prive"). Plaintiff alleges that it was fraudulently induced by Defendants to relinquish its rights under an agreement relating to the exclusive distribution of Prive Revaux eyewear in 15 countries in the European Union, the United Kingdom, and Turkey (the "Territory"). The Complaint asserts causes of action for: Fraudulent Concealment

2. Constructive Fraud

3. Conspiracy to Commit Fraud

4. Breach of Fiduciary Duty

5. Self-Dealing

6. **[*2]** Constructive Trust

7. Intentional Interference With Prospective Economic Advantage

8. Unfair Competition.

Defendants Prive and David (hereinafter referred to collectively as "Defendants") demurrer as to Plaintiff's First, Third, and Eight causes of action AND to strike Punitive Damages and Attorney's Fees.

Defendants' Request for Judicial Notice as Exhibits A-B is DENIED.

Analysis

Settlement Agreement: Defendants' initial contention that the First, Third, and Eight causes action are barred by a settlement agreement between the parties is misguided.

"Fraud in the inducement … occurs when 'the promisor knows what he is signing but his consent is induced by fraud, mutual assent is present and a contract is formed, which, by reason of the fraud is voidable." (*Rosenthal v. Great Western Financial Securities Corp. (1996) 14 Cal.4th 394, 415* (quoting *Ford v. Shearson Lehman American Express, Inc. (1986) 180 Cal.App.3d 1011, 1028*).)

Here, Plaintiff alleges that it was induced by fraud to enter into a settlement agreement (the "Settlement Agreement"), which relinquished its rights to the exclusive distribution of Prive Revaux eyewear in the Territory, as it was acting on incomplete information, which was concealed by Laurent, David, and Prive. (FAC, 6, 21, 26.) To the extent that it is determined that Plaintiff was induced to enter the contract by fraud, **[*3]** the Settlement Agreement will be voidable and unenforceable.

Thus, Defendants' demurrer as to the First, Third, and Eighth causes of action based on the Settlement Agreement is OVERRULED.

Cause of Action One, Fraudulent Concealment: OVERRULED

"[T]he elements of an action for fraud and deceit based on concealment are: (1) the defendant must have concealed or suppressed a material fact, (2) the defendant must have been under a duty to disclose the fact to the plaintiff, (3) the defendant must have intentionally concealed or suppressed the fact with the intent to defraud the plaintiff, (4) the plaintiff must have been unaware of the fact and would not have acted as he did if he had known of the concealed or suppressed fact, and (5) as a result of the concealment or suppression of the fact, the plaintiff must have sustained damage." (*Blickman Turkus, LP v. MF Downtown Sunnyvale, LLC (2008) 162 Cal.App.4th 858, 868*.) In California, fraud, including negligent misrepresentation, must be pled with specificity. (*Small v. Fritz Companies, Inc. (2003) 30 Cal.4th 167, 184*.) "The particularity demands that a plaintiff plead facts which show how, when, where, to whom, and

by what means the representations were tendered." (*Cansino v. Bank of America (2014) 224 Cal.App.4th 1462, 1469*.)

Defendants contends that the alleged omissions were not material facts: that Salfio Group was in active discussions **[*4]** to acquire majority interest in Prive, that Laurent, Plaintiff's CFO, was engaged in back-channel discussions with David during the Settlement Negotiations, and that Laurent was privy to information that would have caused Plaintiff to refrain from giving up its exclusive distribution rights. (FAC, ¶ 23-26, 29.)

Here, the Court finds that the facts were material as Defendant's concealment of the same is what induced Plaintiff to enter into the Settlement Agreement. (FAC, ¶ 6, 21, 26.) Plaintiff alleges that if it had known the facts it would not have relinquished its rights. (FAC, ¶ 6, 21, 26.) Plaintiff also alleges that Laurent, David and Laurent worked in concert, so that Plaintiff could relinquish its exclusive distribution because of the significant monetary gains that would result from Plaintiff relinquishing those rights. (FAC, ¶ 29.) Plaintiff further alleges that after it relinquished its rights Prive was free to do business in the Territory, and Prive announced an exclusive European expansion with commercial giant GrandVision. (FAC, ¶ 22.) Plaintiff has alleged sufficient facts to show that Plaintiff concealed certain facts to gain Plaintiff to enter into the Settlement Agreement. **[*5]**

In addition, Defendants contend that Defendants did not owe a duty to disclose the allegedly omitted facts.

Contrary to Defendants' contention, it was under a duty to disclose. Nondisclosure or concealment may constitute actionable fraud when: (1) there is a fiduciary relationship between the parties; (2) the defendant had exclusive knowledge of material facts not known to the plaintiff; (3) the defendant actively conceals a material fact from the plaintiff; and (4) the defendant makes partial representations but also suppresses some material facts. (See *Los Angeles Memorial Coliseum Commission v. Insomniac, Inc. (2015) 233 Cal.App.4th 803, 831*.) As previously stated, had knowledge of material facts that it concealed. (See *Barnhouse v. City of Pinole (1982) 133 Cal.App.3d 171, 187* ["[t]here is a duty of disclosure, inter alia, when one party to a transaction has sole knowledge or access to material facts and knows that such facts are not known or reasonably discoverable by the other party." (Internal quotations omitted).)

Furthermore, Defendants contend that Plaintiff possessed the alleged omitted information because the knowledge is imputed through Laurent, Plaintiff's CFO, who was working in concert with Defendants. While Defendants are correct that, generally, the knowledge of an officer will be imputed to the corporation, that **[*6]** knowledge will not be imputed when an officer "collaborates with outsiders to defraud the corporation." (*Uecker v. Zentil (2016) 244 Cal.App.4th 789, 797*.) As stated above, Plaintiff has alleged that Laurent, David, and Prive worked in concert to induce Plaintiff to enter into the Settlement Agreement and was working against the interest of Plaintiff.

Moreover, Defendants contend that Plaintiff fails to allege why the failure to disclose damaged it. Here, contrary to Defendants' contention, Plaintiff has alleged that it was damaged because Defendants intentionally omitted material facts to induce Plaintiff to enter into the Settlement Agreement, knowing that if Plaintiff gave up its exclusive distribution rights it would result in significant monetary gains for Defendants. (FAC, ¶ 29.)

Lastly, the Court finds that this cause of action has been pled with the required specificity, as Plaintiff has alleged the parties who made the material omissions, what material omissions were made, and when those omissions were made. Any additional facts regarding the alleged fraud will be in the possession of defendant and will be uncovered during discovery. (See *Bradley v. Hartford Acc. & Indem. Co. (1973) 30 Cal.App.3d 818, 825*.)

Cause of Action Three, Conspiracy to Commit Fraud: OVERRULED.

"Conspiracy is not a cause **[*7]** of action, but a legal doctrine that imposes liability on persons who, although not actually committing a tort themselves, share with the immediate tortfeasors a common plan or design in its perpetration. [Citation.] By participation in a civil conspiracy, a coconspirator effectively adopts as his or her own the torts of other coconspirators within the ambit of the conspiracy. [Citation.] In this way, a coconspirator incurs tort liability co-equal with the immediate tortfeasors.

Standing alone, a conspiracy does no harm and engenders no tort liability. It must be activated by the commission of an actual tort. "'A civil conspiracy, however atrocious, does not per se give rise to a cause of action unless a civil wrong has been committed resulting in damage.'" [Citations.]

"'The elements of an action for civil conspiracy are the formation and operation of the conspiracy and damage resulting to plaintiff from an act or acts done in furtherance of the common design

In such an action the major significance of the conspiracy lies in the fact that it renders each participant in the wrongful act responsible as a joint tortfeasor for all damages ensuing from the wrong, irrespective of whether or **[*8]** not he was a direct actor and regardless of the degree of his activity.'" [Citation.]" (Applied Equipment Corp. v. Litton Saudi Arabia Ltd.

(1994) 7 Cal.4th 503, 510-511.) As stated, the Court found that Plaintiff has set forth sufficient facts to establish a cause of action for fraudulent concealment. In addition, Plaintiff has alleged that Laurent, David, and Prive acted in concert and intentionally omitted material facts from Plaintiff to induce it to enter into the Settlement Agreement because Defendants knew of the significant monetary gains that they would if Plaintiff relinquished its exclusive rights to distribution. (FAC, ¶ 6, 46-48)

Cause of Action Eight, Unfair Competition: SUSTAINED

California Business and Professions Code section 17200 prohibits "any unlawful, unfair or fraudulent business act or practice." (*Bus. & Prof. Code § 17200*; see *Clark v. Superior Court (2010) 50 Cal.4th 605, 610*.) A private party has standing to bring a UCL claim if he or she has suffered injury in fact and has lost money or property because of Defendant's unfair competition. (See Law Offices of Mathew Higbee v. Expungement Assistance Services (2013) 214

Cal.App.4th 544, 555-56.) "[A]n identifiable trifle [of injury] is enough for standing

" (*Id. at 561*.) The fraudulent prong of a UCL claim is less rigorous than common law fraud as common law fraud requires allegations **[*9]** of actual falsity and reasonable reliance while fraud under UCL does not. (See *Morgan v. AT&T Wireless Services, Inc. (2009) 177 Cal.App.4th 1235, 1256*.) To establish a fraudulent practice under the UCL, the plaintiff must show that members of the public are likely to be deceived. (See *West v. JPMorgan Chase Bank, N.A. (2013) 214 Cal.App.4th 780, 806*.) Lastly, "[a] fraudulent business practice under *section 17200* 'is not based upon proof of the common law tort of deceit or deception but is instead premised on whether the public is likely to be deceived.'" (*Pastoria v. Nationwide Ins. (2003) 112 Cal.App.4th 1490, 1498*.) Stated another way, "In order to state a cause of action under the fraud prong of [*section 17200*] a plaintiff need not show that he or others were actually deceived or confused by the conduct or business practice in question." (Id.) "A business practice is unfair within the meaning of the UCL if it violates established public policy or if it is immoral, unethical, oppressive or unscrupulous and causes injury to consumers which outweighs its benefits." (*McKell v. Washington Mutual, Inc. (2006) 142 Cal.App.4th 1457, 1473*.) When the UCL claim is brought against a competitor, the "unfair" prong of the statute "means conduct that threatens an incipient violation of an ***antitrust law*** or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." **[*10]** (*Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 187*.) "[A]ny finding of unfairness to competitors under *section 17200* [must] be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." (*Id. at 186-187*.) In commercial actions, conduct is unfair if it significantly threatens or harms competition. (See *Cel-Tech Communications, Inc, supra, 20 Cal.4th at 187*.)

Plaintiff does not allege any actionable conduct under the UCL: Plaintiff fails to allege how members of the public are likely to be deceived by Defendants' conduct. In addition, while

Plaintiff generally contends that Defendants' conduct constitutes unfair business practices, creates unfair competition, and provided Defendants an unfair advantage, there are no allegations regarding some actual or threatened impact on competition.

Motion to Strike

Attorney's Fees: GRANTED (NO LEAVE)

"[A]s a general rule, attorney fees are not recoverable as costs unless they are authorized by statute or agreement." (*People ex rel. Dept. of Corporations v. Speedee Oil Change Systems, Inc. (2007) 147 Cal.App.4th 424, 429*.) Courts may strike prayers for attorney fees where a party demonstrated no potential basis for their recovery. (*Agricultural Ins. Co. v. Superior Court (1999) 70 Cal.App.4th 385, 404*.) Defendants contends that there is no statute or contractual provision that provides for Plaintiff to recover attorney's fees, while Plaintiff fails to address this argument at all.

Punitive Damages: DENIED **[*11]**

The Court and counsel confer regarding scheduling an Informal Discovery Conference.

Informal discovery conferences are available if all counsel are present and have made prior arrangements with the Judicial Assistant.

Plaintiff is to give notice.

8. Unfair Competition.

Defendants Prive and David (hereinafter referred to collectively as "Defendants") demurrer as to Plaintiff's First, Third, and Eight causes of action AND to strike Punitive Damages and Attorney's Fees.

Request For Judicial Notice

Defendants' Request for Judicial Notice as Exhibits A-B is DENIED.

Analysis

Settlement Agreement: Defendants' initial contention that the First, Third, and Eight causes action are barred by a settlement agreement between the parties is misguided.

"Fraud in the inducement … occurs when 'the promisor knows what he is signing but his consent is induced by fraud, mutual assent is present and a contract is formed, which, by reason of the fraud is voidable." (*Rosenthal v. Great Western Financial Securities Corp. (1996) 14 Cal.4th 394, 415* (quoting *Ford v. Shearson Lehman American Express, Inc. (1986) 180 Cal.App.3d 1011, 1028*).)

Here, Plaintiff alleges that it was induced by fraud to enter into a settlement agreement (the "Settlement Agreement"), which relinquished its rights to the exclusive distribution of Prive Revaux eyewear in the Territory, as it was acting on incomplete information, which was concealed by Laurent, David, and Prive. (FAC, 6, 21, 26.) To the extent that it is determined that Plaintiff was induced to enter **[*3]** the contract by fraud, the Settlement Agreement will be voidable and unenforceable.

Thus, Defendants' demurrer as to the First, Third, and Eighth causes of action based on the Settlement Agreement is OVERRULED.

Cause of Action One, Fraudulent Concealment: OVERRULED

"[T]he elements of an action for fraud and deceit based on concealment are: (1) the defendant must have concealed or suppressed a material fact, (2) the defendant must have been under a duty to disclose the fact to the plaintiff, (3) the defendant must have intentionally concealed or suppressed the fact with the intent to defraud the plaintiff, (4) the plaintiff must have been unaware of the fact and would not have acted as he did if he had known of the concealed or suppressed fact, and (5) as a result of the concealment or suppression of the fact, the plaintiff must have sustained damage." (*Blickman Turkus, LP v. MF Downtown Sunnyvale, LLC (2008) 162 Cal.App.4th 858, 868*.) In California, fraud, including negligent misrepresentation, must be pled with specificity. (*Small v. Fritz Companies, Inc. (2003) 30 Cal.4th 167, 184*.) "The particularity demands that a plaintiff plead facts which show how, when, where, to whom, and

by what means the representations were tendered." (*Cansino v. Bank of America (2014) 224 Cal.App.4th 1462, 1469*.)

Defendants contends that the alleged omissions were not material facts: that Salfio Group **[*4]** was in active discussions to acquire majority interest in Prive, that Laurent, Plaintiff's CFO, was engaged in back-channel discussions with David during the Settlement Negotiations, and that Laurent was privy to information that would have caused Plaintiff to refrain from giving up its exclusive distribution rights. (FAC, ¶ 23-26, 29.)

Here, the Court finds that the facts were material as Defendant's concealment of the same is what induced Plaintiff to enter into the Settlement Agreement. (FAC, ¶ 6, 21, 26.) Plaintiff alleges that if it had known the facts it would not have relinquished its rights. (FAC, ¶ 6, 21, 26.) Plaintiff also alleges that Laurent, David and Laurent worked in concert, so that Plaintiff could relinquish its exclusive distribution because of the significant monetary gains that would result from Plaintiff relinquishing those rights. (FAC, ¶ 29.) Plaintiff further alleges that after it relinquished its rights Prive was free to do business in the Territory, and Prive announced an exclusive European expansion with commercial giant GrandVision. (FAC, ¶ 22.) Plaintiff has alleged sufficient facts to show that Plaintiff concealed certain facts to gain Plaintiff to enter **[*5]** into the Settlement Agreement.

In addition, Defendants contend that Defendants did not owe a duty to disclose the allegedly omitted facts.

Contrary to Defendants' contention, it was under a duty to disclose. Nondisclosure or concealment may constitute actionable fraud when: (1) there is a fiduciary relationship between the parties; (2) the defendant had exclusive knowledge of material facts not known to the plaintiff; (3) the defendant actively conceals a material fact from the plaintiff; and (4) the defendant makes partial representations but also suppresses some material facts. (See *Los Angeles Memorial Coliseum Commission v. Insomniac, Inc. (2015) 233 Cal.App.4th 803, 831*.) As previously stated, had knowledge of material facts that it concealed. (See *Barnhouse v. City of Pinole (1982) 133 Cal.App.3d 171, 187* ["[t]here is a duty of disclosure, inter alia, when one party to a transaction has sole knowledge or access to material facts and knows that such facts are not known or reasonably discoverable by the other party." (Internal quotations omitted).)

Furthermore, Defendants contend that Plaintiff possessed the alleged omitted information because the knowledge is imputed through Laurent, Plaintiff's CFO, who was working in concert with Defendants. While Defendants are correct that, generally, the knowledge of an officer will be imputed **[*6]** to the corporation, that knowledge will not be imputed when an officer "collaborates with outsiders to defraud the corporation." (*Uecker v. Zentil (2016) 244 Cal.App.4th 789, 797*.) As stated above, Plaintiff has alleged that Laurent, David, and Prive worked in concert to induce Plaintiff to enter into the Settlement Agreement and was working against the interest of Plaintiff.

Moreover, Defendants contend that Plaintiff fails to allege why the failure to disclose damaged it. Here, contrary to Defendants' contention, Plaintiff has alleged that it was damaged because Defendants intentionally omitted material facts to induce Plaintiff to enter into the Settlement Agreement, knowing that if Plaintiff gave up its exclusive distribution rights it would result in significant monetary gains for Defendants. (FAC, ¶ 29.)

Lastly, the Court finds that this cause of action has been pled with the required specificity, as Plaintiff has alleged the parties who made the material omissions, what material omissions were made, and when those omissions were made. Any additional facts regarding the alleged fraud will be in the possession of defendant and will be uncovered during discovery. (See *Bradley v. Hartford Acc. & Indem. Co. (1973) 30 Cal.App.3d 818, 825*.)

Cause of Action Three, Conspiracy to Commit Fraud: OVERRULED. **[*7]**

"Conspiracy is not a cause of action, but a legal doctrine that imposes liability on persons who, although not actually committing a tort themselves, share with the immediate tortfeasors a common plan or design in its perpetration. [Citation.] By participation in a civil conspiracy, a coconspirator effectively adopts as his or her own the torts of other coconspirators within the ambit of the conspiracy. [Citation.] In this way, a coconspirator incurs tort liability co-equal with the immediate tortfeasors.

Standing alone, a conspiracy does no harm and engenders no tort liability. It must be activated by the commission of an actual tort. '"A civil conspiracy, however atrocious, does not per se give rise to a cause of action unless a civil wrong has been committed resulting in damage."' [Citations.]

"'The elements of an action for civil conspiracy are the formation and operation of the conspiracy and damage resulting to plaintiff from an act or acts done in furtherance of the common design In such an action the major significance of the conspiracy lies in the fact that it renders each participant in the wrongful act responsible as a joint tortfeasor for all damages ensuing from the wrong, **[*8]** irrespective of whether or not he was a direct actor and regardless of the degree of his activity.'" [Citation.]" (Applied Equipment Corp. v. Litton Saudi Arabia Ltd.

(1994) 7 Cal.4th 503, 510-511.) As stated, the Court found that Plaintiff has set forth sufficient facts to establish a cause of action for fraudulent concealment. In addition, Plaintiff has alleged that Laurent, David, and Prive acted in concert and intentionally omitted material facts from Plaintiff to induce it to enter into the Settlement Agreement because Defendants knew of the significant monetary gains that they would if Plaintiff relinquished its exclusive rights to distribution. (FAC, ¶ 6, 46-48)

Cause of Action Eight, Unfair Competition: SUSTAINED

California Business and Professions Code section 17200 prohibits "any unlawful, unfair or fraudulent business act or practice." (*Bus. & Prof. Code § 17200*; see *Clark v. Superior Court (2010) 50 Cal.4th 605, 610*.) A private party has standing to bring a UCL claim if he or she has suffered injury in fact and has lost money or property because of Defendant's unfair competition. (See Law Offices of Mathew Higbee v. Expungement Assistance Services (2013) 214

Cal.App.4th 544, 555-56.) "[A]n identifiable trifle [of injury] is enough for standing

" (*Id. at 561*.) The fraudulent prong of a UCL claim is less rigorous than common law fraud as common **[*9]** law fraud requires allegations of actual falsity and reasonable reliance while fraud under UCL does not. (See *Morgan v. AT&T Wireless Services, Inc. (2009) 177 Cal.App.4th 1235, 1256*.) To establish a fraudulent practice under the UCL, the plaintiff must show that members of the public are likely to be deceived. (See *West v. JPMorgan Chase Bank, N.A. (2013) 214 Cal.App.4th 780, 806*.) Lastly, "[a] fraudulent business practice under *section 17200* 'is not based upon proof of the common law tort of deceit or deception but is instead premised on whether the public is likely to be deceived.'" (*Pastoria v. Nationwide Ins. (2003) 112 Cal.App.4th 1490, 1498*.) Stated another way, "In order to state a cause of action under the fraud prong of [*section 17200*] a plaintiff need not show that he or others were actually deceived or confused by the conduct or business practice in question." (Id.) "A business practice is unfair within the meaning of the UCL if it violates established public policy or if it is immoral, unethical, oppressive or unscrupulous and causes injury to consumers which outweighs its benefits." (*McKell v. Washington Mutual, Inc. (2006) 142 Cal.App.4th 1457, 1473*.) When the UCL claim is brought against a competitor, the "unfair" prong of the statute "means conduct that threatens an incipient violation of an ***antitrust law*** or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly **[*10]** threatens or harms competition." (*Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 187*.) "[A]ny finding of unfairness to competitors under *section 17200* [must] be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." (*Id. at 186-187*.) In commercial actions, conduct is unfair if it significantly threatens or harms competition. (See *Cel-Tech Communications, Inc, supra, 20 Cal.4th at 187*.)

Plaintiff does not allege any actionable conduct under the UCL: Plaintiff fails to allege how members of the public are likely to be deceived by Defendants' conduct. In addition, while

Plaintiff generally contends that Defendants' conduct constitutes unfair business practices, creates unfair competition, and provided Defendants an unfair advantage, there are no allegations regarding some actual or threatened impact on competition.

Motion to Strike

Attorney's Fees: GRANTED (NO LEAVE)

"[A]s a general rule, attorney fees are not recoverable as costs unless they are authorized by statute or agreement." (*People ex rel. Dept. of Corporations v. Speedee Oil Change Systems, Inc. (2007) 147 Cal.App.4th 424, 429*.) Courts may strike prayers for attorney fees where a party demonstrated no potential basis for their recovery. (*Agricultural Ins. Co. v. Superior Court (1999) 70 Cal.App.4th 385, 404*.) Defendants contends that there is no statute or contractual provision that provides for Plaintiff to recover attorney's fees, while Plaintiff fails to address this argument **[*11]** at all.

Punitive Damages: DENIED

The Court and counsel confer regarding scheduling an Informal Discovery Conference.

Informal discovery conferences are available if all counsel are present and have made prior arrangements with the Judicial Assistant.

Plaintiff is to give notice.

ORDER GRANTING IN PART AND DENYING IN PART DEFENDANT'S MOTION TO DISMISS PLAINTIFFS' THIRD AMENDED COMPLAINT

Re: Dkt. Nos. 44, 45, 46, 47, 49, 50

Defendant HP, Inc. d/b/a HP Computing and Printing Inc. ("Defendant" or "HP") moves to dismiss Plaintiffs Mobile Emergency Housing Corp. ("Mobile Emergency"), Track Rat Enterprises, Inc. d/b/a Performance Automotive & Tire Center ("Performance Automotive"), and David Justin Lynch's ("Lynch") (collectively, **[*2]** "Plaintiffs") Third Amended Complaint ("TAC") (Dkt. 42) pursuant to *Federal Rule of Civil Procedure 12(b)(1)* for lack of subject matter jurisdiction, *Rule 12(b)(6)* for failure to state a claim upon which relief can be granted, and/or move to strike Plaintiffs' requests for injunctive relief pursuant to *Rule 12(f)*. Dkt. 44. The Parties have consented to the jurisdiction of a magistrate judge. Dkts. 15, 21, 33.

Pursuant to *Civil Local Rule 7-1(b)*, the Court deems the motion to dismiss suitable for determination without oral argument. Having carefully considered the Parties' submissions, the case file, and the relevant law, and for the reasons discussed below, the Court **GRANTS IN PART AND DENIES IN PART** Defendant's motion to dismiss the TAC.

I. BACKGROUND

This discussion of the background facts is based on the allegations of Plaintiffs' TAC. Plaintiffs allege that HP transmits firmware updates without authorization to HP printers through the Internet. Dkt. 42 ¶¶ 1, 28. Plaintiffs further allege that these firmware updates act as malware, "adding, deleting or altering code, diminishing the capabilities of HP printers, and rendering the competitors' supply cartridges incompatible with HP printers." *Id.* ¶¶ 1, 24, 26. Further, while users are told that the HP printers have a **[*3]** "supply problem," HP intentionally caused the issue by sending this malware to render third-party supplies incompatible with HP products. *Id.* ¶¶ 5, 24, 26, 29, 30. Plaintiffs allege that as a result of this malware, HP printer owners are either forced to buy HP cartridges or they cannot use their printers until third parties can develop workarounds in their products. *Id.* ¶ 3. Plaintiffs also allege that "HP uses this firmware update process to conceal that it is actually collecting data on whether consumers are using HP or its competitors' cartridges" without their consent. *Id.* ¶¶ 1, 27.

Plaintiff Mobile Emergency, through its authorized representative, purchased an HP Color LaserJet Pro M254 for $238.96 on August 21, 2019 from a Staples store in New York. *Id.* ¶ 35. The printer came with an initial set of model 202 HP-brand toner supply cartridges. *Id.* ¶ 37. When those supply cartridges were exhausted, Mobile Emergency purchased a set of model 202 Greensky toner supply cartridges that were advertised to be compatible with this HP printer from Amazon.com for $52.49. *Id.* ¶ 39. Plaintiffs allege that on or around November 18, 2020, HP sent or activated a transmission to HP printers, which **[*4]** "altered the code and data" of the printer, rendering the printer incompatible with third-party toner supply cartridges, including the Greensky cartridges purchased by Mobile Emergency. *Id.* ¶ 40. HP did not notify Mobile Emergency of the transmission, and Mobile Emergency only discovered this when the authorized representative attempted to print a document, received an error message stating "[s]upply problem," and the printer ceased printing. *Id.* ¶¶ 41, 42. On December 1, 2020, Mobile Emergency purchased a black HP toner cartridge for $71.68 from Staples to replace the Greensky cartridges. *Id.* ¶ 44.

Plaintiff Performance Automotive, through its authorized representative, used rewards points to purchase an HP Color LaserJet Pro MFP M281fdw Laser Multifunction Printer from HP in November 2018. *Id.* ¶¶ 46-47. The printer came with an initial set of model 202 HP-brand toner supply cartridges. *Id.* ¶ 49. When those supply cartridges were exhausted, Performance Automotive purchased model 202 GPC Image, Linkyo, and Greensky toner cartridges for approximately $60 per set that were advertised to be compatible with this HP printer from Amazon.com. *Id.* ¶ 51. Plaintiffs allege that on or around November **[*5]** 18, 2020, HP sent or activated a transmission to HP printers, which "altered the code and data" of the printer, rendering the printer incompatible with third-party toner supply cartridges, including the GPC Image, Linkyo, and Greensky cartridges purchased by Performance Automotive. *Id.* ¶ 52. HP did not notify Performance Automotive of the transmission, and Performance Automotive only discovered the effects of the transmission when it attempted to print a document and received an error message stating "[s]upply problem." *Id.* ¶ 53. Performance Automotive's printer ceased printing and when its authorized representative checked the printer, he saw that the BIOS version had been changed. *Id.* ¶ 54. The authorized representative researched the issue and discovered that HP Had issued a "Bios Update," which caused the printer to cease working. *Id.* ¶ 55. As a result of the update, Performance Automotive's printer and supply cartridges were disabled, and it purchased a printer from a different printer manufacturer. *Id.* ¶ 56.

Plaintiff Lynch purchased an HP Color LaserJet Pro M254dw Wireless Printer for $239.25 from Best Buy on March 3, 2020. *Id.* ¶ 58. The printer came with an initial set of model **[*6]** 202 HP-brand toner supply cartridges. *Id.* ¶ 59. When those supply cartridges were exhausted, Lynch purchased a set of high-capacity model 202 toner cartridges for $215.46 from Express-Inks that were advertised to be compatible with this HP printer. *Id.* ¶ 60. In January 2021, HP sent or activated a transmission which altered the code and data of the printer, rendering the printer incompatible with third-party toner supply cartridges, including the Express-Inks cartridges purchased by Lynch. *Id.* ¶ 62. HP did not notify Lynch of the transmission, and Lynch only discovered the effects of the transmission when he attempted to print a document, his printer ceased printing, and he received an error message stating "[s]upply problem." *Id.* ¶¶ 63-65. The printer also displayed an error message stating that "[t]he indicated supplies are not communicating correctly with the printer. Try reinstalling the supplies. If the problem persists, replace the supplies to continue printing." *Id.* ¶ 66. As a result of the transmission, Lynch purchased new HP cartridges from Amazon.com to get the printer operating again. *Id.* ¶¶ 68-69.

Plaintiffs bring this action to seek damages and injunctive and other equitable **[*7]** relief as a class action on behalf of themselves and the following classes:

> Device Owner Class: All persons and entities in the United States who own a Class Printer.[1]
>
> Damages Subclass: All persons and entities in the United States who own a Class Printer that displayed a diagnostic error, such as "Supply Problem" or other similar error code, as a result of HP's transmission of a firmware update.
>
> State Consumer Subclass: All persons and entities residing in California and States with a similar consumer protection statute to *Cal. Civ. Code 1770(a)(15)*, who own a Class Printer that displayed a diagnostic error, such as "Supply Problem" or other similar error code, as a result of HP's transmission of a firmware update.

Id. ¶ 74.

II. REQUEST FOR JUDICIAL NOTICE AND INCORPORATION BY REFERENCE

A. Legal Standard

There are two doctrines that allow district courts to consider material outside the pleadings without converting a motion to dismiss into a motion for summary judgment: judicial notice under *Federal Rule of Evidence 201* and incorporation by reference. *Khoja v. Orexigen Therapeutics, Inc., 899 F.3d 988, 998 (9th Cir. 2018)*, *cert. denied sub nom. Hagan v. Khoja, — U.S. —, 139 S. Ct. 2615, 204 L. Ed. 2d 264 (2019)*. "The court may judicially notice a fact that is not subject to reasonable dispute." *Fed. R. Evid. 201(b)*. A fact is "not subject to reasonable dispute" if it "is generally known" or "can **[*8]** be accurately and readily determined from sources whose accuracy cannot reasonably be questioned." *Fed. R. Evid. 201(b)(1)-(2)*. However, "[j]ust because the document itself is susceptible to judicial notice does not mean that every assertion of fact within that document is judicially noticeable for its truth." *Khoja, 899 F.3d at 999*.

Incorporation by reference is a judicially created doctrine that allows a court to consider certain documents as though they are part of the complaint itself. *Khoja, 899 F.3d at 1002*. "The doctrine prevents plaintiffs from selecting only portions of documents that support their claims, while omitting portions of those very documents that weaken—or doom—their claims." *Id.* A defendant can seek to incorporate a document into the complaint "if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim." *U.S. v. Ritchie, 342 F.3d 903,*

---

[1] Plaintiffs allege that "[s]ubject to information learned in discovery, the Class Printers comprise HP Color LaserJet printers and all-in-one devices, in the following non-exhaustive list of products and product series: HP Color LaserJet Pro M254, HP Color LaserJet Pro MFP M280, HP Color LaserJet Pro MFP M281, and all other models affected by HP malware transmissions in the way described herein ('Class Printers')." Dkt. 42 ¶ 33.

908 (9th Cir. 2003) (citations omitted). While the "mere mention" of the existence of a document is insufficient to incorporate a document, it is proper to incorporate a document if the claim "necessarily depended" on them. Khoja, 899 F.3d at 1002.

After a defendant offers such a document, the district court can treat the document as part of the complaint, and "thus may assume that its contents are true for purposes of a motion **[*9]** to dismiss under Rule 12(b)(6)." Ritchie, 342 F.3d at 908. However, "[w]hile this is generally true, it is improper to assume the truth of an incorporated document if such assumptions only serve to dispute facts stated in a well-pleaded complaint." Khoja, 899 F.3d at 1003. Indeed, using extrinsic documents to "resolve competing theories against the complaint risks premature dismissals of plausible claims that may turn out to be valid after discovery" and it is "improper to do so only to resolve factual disputes against the plaintiff's well-pled allegations in the complaint." Id. at 998, 1014.

B. Analysis

Defendant asks the Court to take judicial notice of or incorporate by reference the following documents:

(1) The "HP Printers - Dynamic Security Enabled Printers" webpage ("Dynamic Security Page"), as it appeared on November 11, 2020 (Dkt. 45-3 Exhibit A);

(2) The "Specs" tab of the HP store page for the HP Color LaserJet Pro MFP M281fdw printer model, as it appeared on April 22, 2018 (Dkt. 45-4 Exhibit B);

(3) The "Specs" tab of the HP store page for the HP Color LaserJet Pro M254dw printer model, as it appeared on March 18, 2018 (Dkt. 45-5 Exhibit C);

(4) The "HP Color LaserJet Pro - 10.xx and Supplies Messages" webpage ("Troubleshooting Page") (Dkt. 45-6 Exhibit **[*10]** D);

(5) The online message board (Dkt. 45-7 Exhibit E); and

(6) The "What Data We Collect" section of the "HP Privacy Statement" webpage ("Privacy Statement"), as it appeared on October 30, 2018 (Dkt. 45-8 Exhibit F).

Defendant asks the Court to take judicial notice of the Dynamic Security Page (Dkt. 45-3), the store pages for the HP Color LaserJet Pro MFP M281fdw (Dkt. 45-4) and the HP Color LaserJet Pro M254dw (Dkt. 45-5), and the Privacy Statement (Dkt. 45-8), because courts in this circuit "have routinely taken judicial notice of content from the Internet Archive's Wayback Machine." Dkt. 45 at 5 (citing Parziale v. HP, Inc., No. 5:19-cv-05363-EJD, 2020 U.S. Dist. LEXIS 179738, 2020 WL 5798274, at *3 (N.D. Cal. Sept. 29, 2020) ("*Parziale II*")). Defendant also argues that at a minimum, the Court should take judicial notice that HP consumers are on notice that cartridges that do not have a HP chip or are modified may not function and even if they function for a period of time, they may cease to function, as this notice was available on the Dynamic Security Page before the firmware updates at issue were allegedly transmitted. *Id.* Further, Defendant contends that regarding the two store pages, the Court should take judicial notice of the fact that HP's notice to consumers that these printers are "[d]ynamic **[*11]** security enabled printer[s]" and that "[c]artridges using a non-HP chip may not work, and those that work today may not work in the future" was publicly available on the respective store pages before Plaintiffs purchased their printers. *Id.* Finally, Defendant argues that at a minimum, the Court should take judicial notice of the fact that at all relevant times, the Privacy Statement advised consumers that HP "automatically" "collect[s] product usage data such as . . . ink or toner brand." *Id.*

Plaintiffs oppose Defendant's request for judicial notice of each of these documents, arguing that the webpages are irrelevant and not relied upon in the TAC. Dkt. 46 at 2. Further, Plaintiffs argue that they do not allege "that they viewed these webpages or anything stated on HP's website, and thus did not have reason to view HP's webpages." *Id.* at 3. Plaintiffs argue that "[n]o Plaintiff purchased their printer on HP's website." *Id.* at 4. Plaintiffs distinguish this case from *Parziale II*, arguing that in that case, the complaint heavily referred to the store page and plaintiff alleged that he relied on the information on the store page in deciding to make his purchase. *Id.* at 3. Plaintiffs also **[*12]** argue that "[m]erely because something is 'available' online is not a basis for charging a plaintiff with notification of it." *Id.* at 3-4.

The Court finds that these webpages are publicly available pages whose accuracy cannot reasonably be questioned. The Court takes judicial notice of these webpages for the fact that Defendant made these statements, but not for the truth of those statements. The request for judicial notice of Exhibits A, B, C, and F are **GRANTED**.

Defendant asks the Court to take judicial notice of the Troubleshooting Page (Dkt. 45-6) because it is posted on a publicly available website. Dkt. 45 at 6. Additionally, Defendant contends that the Troubleshooting Page is incorporated by reference in the TAC, because Plaintiffs allege that after the error message appeared, Mobile Emergency's authorized representative "searched HP's website [to] check for a solution . . . but could find only a recommendation to replace the cartridge with an HP-branded cartridge." *Id.* (citing Dkt. 42 ¶ 43). Defendant contends that this allegation "is a clear reference to the Troubleshooting Page." *Id.* Plaintiffs argue that paragraph 43 of the TAC stating "that [the authorized representative] **[*13]** searched HP's website to check for a solution is not a clear reference to the Troubleshooting Page" and should not be considered. Dkt. 46 at 5. The Court finds that the Troubleshooting Page is publicly available, and its accuracy cannot reasonably be questioned. However, the Court finds that it is unclear whether Plaintiffs are referring to this page in its TAC and the claim does not "necessarily depen[d]" on the existence of this document. *See* *Khoja, 899 F.3d at 1002*. Accordingly, request for judicial notice of Exhibit D is **GRANTED** and the request to incorporate by reference is **DENIED**.

Finally, Defendant asks the Court to take judicial notice of the online message board (Dkt. 45-7), arguing that it is referenced repeatedly in the TAC and incorporated by reference. Dkt. 45 at 7 (citing Dkt. 42 ¶ 71, nn.13-16). The Court does not rely on this exhibit in evaluating Defendant's motion to dismiss. Accordingly, Defendant's request for judicial notice and request to incorporate by reference are **DENIED AS MOOT**.

III. MOTION TO DISMISS AND/OR STRIKE

A. Legal Standard

1. Motion to Dismiss Under *Federal Rule of Civil Procedure 12(b)(1)*

A defendant may move to dismiss an action for lack of subject matter jurisdiction under *Federal Rule of Civil Procedure 12(b)(1)*. Article III standing is a threshold requirement **[*14]** for federal court jurisdiction. *Lujan v. Defenders of Wildlife, 504 U.S. 555, 559-60, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. The party seeking standing must show that "(1) he or she has suffered an injury in fact that is concrete and particularized, and actual or imminent; (2) the injury is fairly traceable to the challenged conduct; and (3) the injury is likely to be redressed by a favorable court decision." *Salmon Spawning & Recovery Alliance v. Gutierrez, 545 F.3d 1220, 1225 (9th Cir. 2008)* (citing *Lujan, 504 U.S. at 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351*).

A party moving to dismiss under *Rule 12(b)(1)* may make a facial challenge by asserting that "the allegations contained in [the] complaint are insufficient on their face to invoke federal jurisdiction." *Safe Air for Everyone v. Meyer, 373 F.3d 1035, 1039 (9th Cir. 2004)*. The Court "must accept as true all material allegations of the complaint, and must construe the complaint in favor of the complaining party." *Warth v. Seldin, 422 U.S. 490, 501, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)*. "At the pleading stage, general factual allegations of injury resulting from the defendant's conduct may suffice, for on a motion to dismiss, we presume that general allegations embrace those specific facts that are necessary to support the claim." *Lujan, 504 U.S. at 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351* (internal quotation marks and citation omitted).

2. Motion to Dismiss Pursuant to *Federal Rule of Civil Procedure 12(b)(6)*

Under *Rule 12(b)(6)*, a district court must dismiss a complaint if it fails to state a claim upon which relief can be granted. In ruling on a motion to dismiss, the court may consider only "the complaint, materials **[*15]** incorporated into the complaint by reference, and matters of which the court may take judicial notice." *Metzler Inv. GMBH v. Corinthian Colls., Inc., 540 F.3d 1049, 1061 (9th Cir. 2008)* (citation omitted). In deciding whether the plaintiff has stated a claim, the court must assume the plaintiff's allegations are true and draw all reasonable inferences in the plaintiff's favor. *Usher v. City of L.A., 828 F.2d 556, 561 (9th Cir. 1987)*. However, the court is not required to accept as true "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)* (citation omitted).

To survive a motion to dismiss under *Rule 12(b)(6)*, the plaintiff must allege "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. This "facial plausibility" standard requires the plaintiff to allege facts that add up to "more than a sheer possibility that a defendant has acted unlawfully." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

Courts should freely give leave to amend unless the district court determines that it is clear that the complaint's deficiencies cannot be cured by amendment. *Lucas v. Dep't of Corr., 66 F.3d 245, 248 (9th Cir. 1995)*. When amendment would be futile, the court may dismiss without leave to amend. *Dumas v. Kipp, 90 F.3d 386, 393 (9th Cir. 1996)*.

B. Analysis

Plaintiffs allege that due to Defendant's unlawful conduct, Plaintiffs' printers and supply cartridges were "rendered incompatible and inoperable." Dkt. 42 ¶ 7. Further, Plaintiffs **[*16]** allege that they "would not have purchased an HP printer had they known HP was engaged in and would engage in [this] conduct." *Id.* Finally, Plaintiffs allege that as a result of HP's misconduct, they "sustained damages, including but not limited to the loss of the value of the supply cartridges they purchased that are no longer compatible with their printers, loss of time and effort to diagnose the damage to their printers and to determine what remedial measures to take, the need to purchase expensive HP supply cartridges, uncertainty in the functioning of their printers and supply cartridges, and future remedial costs." *Id.* From these allegations, Plaintiffs assert eight claims: (1) violation of the Computer Fraud and Abuse Act; (2) violation of the California Comprehensive Computer Data Access and Fraud Act; (3) violation of the California False Advertising Law; (4) violation of the California Unfair Competition Law under the fraudulent prong; (5) violation of the California Unfair Competition Law under the unfair prong; (6) violation of the California Unfair Competition Law under the unlawful prong; (7) trespass to chattels; and (8) violation of the California Consumers Legal Remedies **[*17]** Act.

Defendant asserts that Plaintiffs' data-collection claims fail because Plaintiffs do not allege that they suffered any injury as a result of Defendant's alleged data collection. Dkt. 44 at 12, 18-19. Further, Defendant asserts an overarching argument that the TAC should be dismissed, because Defendant's privacy policy advises consumers that Defendant "automatically" collects "product usage data such as . . . ink or toner brand." *Id.* Defendant also contends that it publicly discloses on its webpages that its printers are "dynamic security enabled" and that "[c]artridges using a non-HP chip may not work, and those that work today may not work in the future." *Id.* at 12-13. Defendant also asserts arguments as to why certain claims individually should be dismissed. The Court turns to the arguments below.

1. Article III Standing

"[T]he Court notes at the outset that the threshold question of whether Plaintiffs have standing and the Court has jurisdiction is distinct from the merits of Plaintiffs' claim." *Fraley v. Facebook, Inc., 830 F. Supp. 2d 785, 796 (N.D. Cal. 2011)* (quoting *Maya v. Centex Corp., 658 F.3d 1060, 1068 (9th Cir. 2011)*) (internal quotation marks omitted). "Rather, the jurisdictional question of standing precedes, and does not require, analysis of the merits." *Maya, 658 F.3d at 1068* (quoting *Equity Lifestyle Props., Inc. v. Cnty. of San Luis Obispo, 548 F.3d 1184, 1189 n.10 (9th Cir.2008)*) (internal quotation marks omitted). **[*18]** "At the same time, it is well established that the actual or threatened injury required by Article III may exist solely by virtue of statutes creating legal rights, the invasion of which creates standing." *Fraley, 830 F. Supp. 2d at 796* (citing *Warth v. Seldin, 422 U.S. 490, 500, 95 S.Ct. 2197, 45 L. Ed. 2d 343 (1975)*) (internal quotation marks omitted). Accordingly, "a plaintiff may be able to establish constitutional injury in fact by pleading violation of a right conferred by statute, so long as [he] can allege that the injury [he] suffered was specific to [him]." *Id.*

Defendant contends that Plaintiffs' data-collection claims fail due to lack of standing to the extent that they are predicated on their data collection theory. Dkt. 44 at 18. Specifically, Defendant argues that Plaintiffs' theory of injury that HP uses the data collected to punish its customers is theoretical and is not an injury in fact. *Id.* at 18-19. Without assessing the merits of Plaintiffs' claims, the Court finds that Plaintiffs allege that Defendant violated their individual rights and that they suffered injuries as a result of Defendant's conduct. *See* Dkt. 42 ¶¶ 86-157. Additionally, the Court finds that Plaintiffs' alleged injuries are "concrete and particularized." The TAC contains specific allegations describing what **[*19]** losses Plaintiffs suffered, including being forced to purchase HP-authorized cartridges, purchasing other printers, paying to dispose of their unused supplies, decreased market value of the printers, as well as money, time, and labor spent to research and fix the issues. *See id.* ¶¶ 97-99, 108-111, 121, 133, 141-42, 148, 155. "[A]s the Ninth Circuit recently reminded, 'standing analysis, which prevents a claim from being adjudicated for lack of jurisdiction, [may not] be used to disguise merits analysis, which determines whether a claim is one for which relief can be granted if factually true." *Fraley, 830 F. Supp. 2d at 800* (quoting *Catholic League for Religious and Civil Rights v. City & Cnty. of S.F., 624 F.3d 1043, 1049 (9th Cir. 2010)* (en banc)). "At this stage, the Court must presume 'that general allegations embrace those specific facts that are necessary to support the claim.'" *Id.* (citing *Lujan, 504 U.S. at 561*); *see also* *Ruiz v. Gap, Inc., 540 F. Supp. 2d 1121, 1126 (N.D. Cal. 2008)* (denying motion to dismiss for lack of standing but noting that "[s]hould it become apparent that [plaintiff's] alleged injury is in fact too speculative or hypothetical, the Court will conclude, as it must, that [plaintiff] lacks standing"). The Court finds that Plaintiffs have set forth sufficient "general factual allegations of injury resulting from the defendant's conduct" to survive a 12(b)(1) motion to dismiss. **[*20]** *See* *Lujan, 504 U.S. at 561*. Accordingly, Defendant's motion to dismiss pursuant to *Rule 12(b)(1)* is **DENIED**.

2. HP's Public Disclosures

Defendant first argues that several of Plaintiffs' claims fail to state a claim because Defendant's privacy policy advises consumers that Defendant "automatically" collects "product usage data such as . . . ink or toner brand." Dkt. 44 at 12. Defendant also contends that it publicly discloses on its webpages that its printers are "dynamic security enabled" and that "[c]artridges using a non-HP chip may not work, and those that work today may not work in the future." *Id.* at 12-13.

In the TAC, Plaintiffs allege that HP did not advise them of the unsolicited transmission that rendered their printers incompatible with third-party toner supply cartridges. Dkt. 42 ¶¶ 40-41, 52-53, 62-63. Further, Plaintiffs allege that "HP uses the firmware update process to conceal that it is actually collecting data on whether consumers are using HP or its competitors' cartridges." *Id.* ¶ 1. Additionally, in its opposition, Plaintiffs contend that no plaintiff visited any HP store page, any HP website at any relevant time, and did not rely on "any statements of HP that arguably could have put any of them on **[*21]** notice that automatic firmware updates might render a [] [p]rinter inoperable." Dkt. 47 at 14. In contrast, in *Parziale II*, the Court stated that plaintiffs were expressly notified that cartridges using a non-HP chip may not work, concluding that "Plaintiff was on notice of the potential firmware update and its effects." *Parziale II, 2020 U.S. Dist. LEXIS 179738, 2020 WL 5798274, at *7*. At the motion to dismiss stage, the Court is not prepared to find that Defendant's statements, which Plaintiffs purport that they did not view or rely on, establish an absolute bar to Plaintiffs' claims. *Usher, 828 F.2d at 561* ("On a motion to dismiss for failure to state a claim, the court must presume all factual allegations of the complaint to be true and draw all reasonable inferences in favor of the nonmoving party.") (citation omitted).

3. Computer Fraud and Abuse Act ("CFAA") Claim

The CFAA provides that "[a]ny person who suffers damages or loss by reason of a violation of this section may maintain a civil action against the violator to obtain compensatory damages and injunctive relief or other equitable relief." *18 U.S.C. § 1030(g)*. "The CFAA prohibits a number of different computer crimes, the majority of which involve accessing computers without authorization or in excess of authorization, and then **[*22]** taking specified forbidden actions, ranging from obtaining information to damaging a computer or computer data." *LVRC Holdings LLC v. Brekka, 581 F.3d 1127, 1135 (9th Cir. 2009)* (citing *18 U.S.C. §§ 1030(a)(1)-(7) (2004)*). In the TAC, Plaintiffs allege that HP violated *Sections 1030(a)(5)(A)* and *1030(a)(2)(C)*. *Section 1030(a)(5)(A)* creates liability for whomever "knowingly causes the transmission of a program, information, code, or command, and as a result of such conduct, intentionally causes damage without authorization, to a protected computer." *Section 1030(a)(2)(C)* creates liability for whomever "intentionally access a computer without authorization or exceeds authorized access, and thereby obtains . . . information from any protected computer."

a. *18 U.S.C. § 1030(a)(5)(A)*

Defendant argues that Plaintiffs' *Section 1030(a)(5)(A)* claim fails because its firmware updates do not meet the statutory definition of "damage." Dkt. 44 at 29. Specifically, Defendant contends that "Plaintiffs do not allege that the updates destroyed their printers or data on them, or made their printers less secure." *Id.* Additionally, Defendant argues that Plaintiffs fail to allege that the damage was "without authorization" as defined by the statute. *Id.* at 30. Defendant argues that Plaintiffs were also on notice that the printers are "[d]ynamic security enabled" and that "[c]artridges using a non-HP chip may not work, and **[*23]** those that work today may not work in the future." *Id.*

Section 1030(e)(8) defines "damage" as "any impairment to the integrity or availability of data, a program, a system, or information." "[D]istrict courts in the Ninth Circuit have expressly held that, under the CFAA, it is not necessary for data to be physically changed or erased to constitute damage to that data." *NovelPoster v. Javitch Canfield Group, 140 F. Supp. 3d 954, 962 (N.D. Cal. 2014)*. In the TAC, Plaintiffs allege that after the firmware update transmission, the printers and cartridges stopped printing, displayed a "[s]upply problem" error message, and the printer and supply cartridges were disabled. Dkt. 42 ¶¶ 1, 41-42, 44, 53-56, 63-67. The Court finds that this qualifies as an "impairment to the integrity or availability of . . . a system," as required to show damage under the CFAA. *See* *18 U.S.C. § 1030(e)(8)*. Further, Plaintiffs allege that Defendant knowingly transmitted the firmware update and intentionally caused damage, and Defendant did not have permission or authorization from Plaintiffs to make these updates. *See* Dkt. 42 ¶¶ 91-95. The Court finds that these allegations are sufficient at the pleading stage. *See* *San Miguel v. HP Inc., 317 F. Supp. 3d 1075, 1085-86 (N.D. Cal. 2018)* ("To the extent Plaintiffs' CFAA claim is based upon *subsection (A)*, the claim is cognizable because *subsection (A)* does not require accessing **[*24]** a computer 'without authorization.'"). Finally, as discussed in Section III.B.2., the Court declines to find at this stage that Plaintiffs were on notice that the printers are "[d]ynamic security enabled" and that "[c]artridges using a non-HP chip may not work, and those that work today may not work in the future."

i. CFAA's Loss Requirement

In order to bring a civil action under the CFAA, a person must "suffer[] damage or loss by reason of a violation" of the statute. *18 U.S.C. § 1030(g)*. Plaintiffs must allege "loss to 1 or more persons during any 1-year period . . . aggregating at least $5,000 in value." *Id.* at *§ 1030(c)(4)(A)(i)(I)*. Loss is defined as "any reasonable cost to any victim, including the cost of responding to an offense, conducting a damage assessment, and restoring the data, program, system, or information to its condition prior to the offense, and any revenue lost, cost incurred, or other consequential damages incurred because of interruption of service." *Id.* at *§ 1030(e)(11)*.

Defendant contends that Plaintiffs cannot satisfy this statutory "loss" requirement. Dkt. 44 at 31. Defendant argues that "the TAC does not plead that the alleged violation . . . resulted in any loss—much less loss of 'at least $5,000.'" *Id.* at **[*25]** 32 (emphasis omitted).

Courts have found "that the legislative history of the CFAA revealed that Congress intended to permit aggregation of damages, so long as those damages arose from the same act by a defendant." *In re Apple & AT & TM Antitrust*

Litigation, 596 F. Supp. 2d 1288, 1308 (N.D. Cal. 2008) ("The Court therefore permits Plaintiffs to aggregate their individual damages to reach the $5,000 threshold."). Plaintiffs allege that Mobile Emergency purchased its printer for $238.96 and purchased Greensky toner supply cartridges for $52.49. Dkt. 42 ¶¶ 97-98. Performance Auto purchased multiple sets of GPC Image, Linkyo, and Greenksy supply cartridges for approximately $60 per set and then purchased a printer from another manufacturer. *Id.* ¶ 97. Lynch spent $239.25 for his HP printer, bought supply toner cartridges from Express-Inks for $215.46, and then spent $493.56 to get his printer working again. *Id.* ¶¶ 97-98. Plaintiffs allege that "[t]he firmware transmission also caused loss to Plaintiffs and Class members, as they had to expend money, time, and labor to investigate and repair disabled Class Printers." *Id.* ¶ 99. Further, Plaintiffs allege that "Defendant sent this transmission to at least ten thousand (10,000) Class Printers." *Id.* ¶ 79. In sum, the Court concludes **[*26]** that Plaintiffs sufficiently plead cognizable loss of at least $5,000 in value to satisfy CFAA's loss requirement.

b. *18 U.S.C. § 1030(a)(2)(C)*

Defendant argues that Plaintiffs' *Section 1030(a)(2)(C)* claim fails because Defendant did not act "without authorization" given that Plaintiffs concede "not only that HP had permission to access their printers, but also that HP had the 'exclusive ability' to access them." Dkt. 44 at 29 (citing Dkt. 42 ¶ 4). Defendant also argues that Plaintiffs' theory is not plausible given that HP makes public disclosures regarding its practice of "automatically" collecting "product usage data such as . . . ink or toner brand." *Id.*

Here, Plaintiffs allege that "[o]n a repeated basis, HP accessed Plaintiffs' and Class members' Class Printers without their authorization or knowledge, and obtained information on the type of printer cartridge Plaintiffs and Class members were using." Dkt. 42 ¶ 90. However, Plaintiffs also allege that HP "has the exclusive ability to install firmware updates to the printers it sells that are connected to the Internet." *Id.* ¶ 4. Accordingly, this subsection is not applicable in light of Plaintiffs' allegations in the TAC regarding HP's ability to install firmware updates. *See* ***[*27]*** *San Miguel, 317 F. Supp. 3d at 1085* (finding that certain subsections of *18 U.S.C. § 1030* cannot apply because plaintiffs alleged that HP had "authorized access" and "can communicate with HP printers after it sells them by updating their firmware"). Further, "Congress enacted the CFAA in 1984 primarily to address the growing problem of computer hacking, recognizing that '[i]n intentionally trespassing into someone else's computer files, the offender obtains at the very least information as to how to break into that computer system.'" *U.S. v. Nosal, 676 F.3d 854, 858 (9th Cir. 2012)* (en banc). "The CFAA should be interpreted in a manner that 'maintains the CFAA's focus on hacking rather than turning it into a sweeping Internet-policing mandate.'" *San Miguel, 317 F. Supp. 3d at 1085* (citing *Nosal, 676 F.3d at 858*). The Court finds that Plaintiffs have not alleged facts to show that HP accessed their printers "without authorization."

Accordingly, the motion to dismiss Plaintiffs' CFAA claim is **DENIED** to the extent that the CFAA claim is based on *Section 1030(a)(5)(A)* and **GRANTED WITH LEAVE TO AMEND** to the extent that the CFAA claim is based on *Section 1030(a)(2)(C)*.

4. Comprehensive Computer Data Access and Fraud Act ("CDAFA") Claim

California Penal Code § 502 imposes liability on a person who commits certain acts that constitute a public offense. *Cal. Penal Code § 502(c)*. The relevant provision of the CDAFA provides that a person **[*28]** is liable who:

> (1) Knowingly accesses and without permission alters, damages, deletes, destroys, or otherwise uses any data, computer, computer system, or computer network in order to either (A) devise or execute any scheme or artifice to defraud, deceive, or extort, or (B) wrongfully control or obtain money, property, or data.
> (2) Knowingly accesses and without permission takes, copies, or makes use of any data from a computer, computer system, or computer network, or takes or copies any supporting documentation, whether existing or residing internal or external to a computer, computer system, or computer network.
> (3) Knowingly and without permission uses or causes to be used computer services.

> (4) Knowingly accesses and without permission adds, alters, damages, deletes, or destroys any data, computer software, or computer programs which reside or exist internal or external to a computer, computer system, or computer network.
> (5) Knowingly and without permission disrupts or causes the disruption of computer services or denies or causes the denial of computer services to an authorized user of a computer, computer system, or computer network.
> ***
>
> (7) Knowingly and without permission accesses **[*29]** or causes to be accessed any computer, computer system, or computer network.

Cal. Penal Code § 502(c)(1)-(5), *(7)*.

Defendant contends that Plaintiffs have failed to allege that HP engaged in the conduct at issue "without permission." Dkt. 44 at 33. Specifically, Defendant argues that "Plaintiffs' admission that HP had the 'exclusive ability' to access their printers 'to install firmware updates'" as well HP's public disclosures regarding its dynamic security and data collection undermines Plaintiffs' theories. *Id.* Defendant also argues that Plaintiffs fail to allege that HP's data collection of firmware updates circumvented any technical barriers. *Id.*

The Ninth Circuit has held that *§ 502* is different from CFAA. *United States v. Christensen, 828 F.3d 763, 789 (9th Cir. 2015)*. "In contrast to the CFAA, the California statute does not require unauthorized access. It merely requires knowing access." *Id.* (emphasis omitted). "Rather, whether there is liability under *§ 502* requires an analysis of the specific 'acts' that are alleged to constitute an offense and whether there was 'permission' to engage in those acts." *San Miguel, 317 F. Supp. 3d at 1087*. The Court finds that Plaintiffs' allegations that they received an allegedly false error message stating that the printer had a "supply problem" is sufficient to state a claim for **[*30]** violation of *subsection (c)(1)*. Dkt. 42 ¶¶ 1, 5, 29, 30, 41, 53, 63, 65, 107. The Court also finds that Plaintiffs' allegations that Defendant collected data regarding the type of cartridges Plaintiffs were using to operate the printers is sufficient to state a claim for violation of *subsections (c)(2)* and *(c)(3)*. *Id.* ¶¶ 1, 27, 107. The Court finds that Plaintiffs' allegations that Defendant transmitted firmware updates that disabled their printers is sufficient to state a claim for violation of *subsections (c)(4)* and *(c)(5)*. *Id.* ¶¶ 1, 2, 6, 7, 24, 26, 42, 44, 54, 56, 64, 67, 107. The Court finds that the alleged violation of *subsection (c)(7)*s fails because Plaintiffs acknowledge that HP had permission to access their printers. Accordingly, Defendant's motion to dismiss the CDAFA claim is **DENIED** to the extent it is based upon *subsections (c)(1)-(c)(5)* and **GRANTED WITHOUT LEAVE TO AMEND** to the extent it is based upon *subsection (c)(7)*. *See* *Allen v. City of Beverly Hills, 911 F.2d 367, 374 (9th Cir. 1990)* (finding that "any further amendment to the complaint would likely prove futile").

5. False Advertising Law ("FAL"), Consumers Legal Remedies Act ("CLRA"), and Unfair Competition Law ("UCL") Fraudulent Prong Claim

Plaintiffs allege that HP made false and misleading statements and material omissions regarding the compatibility of third-party ink cartridges with their printers in violation of the FAL, CLRA, and the fraudulent prong of the UCL. The FAL makes it unlawful for **[*31]** any person to "induce the public to enter into any obligation" based on a statement that is "untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading." *Cal. Bus. & Prof. Code § 17500*. "Whether an advertisement is 'misleading' must be judged by the effect it would have on a reasonable consumer." *Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1161-62* (citing *Williams v. Gerber Prods. Co., 552 F.3d 934, 938 (9th Cir. 2008)*). "A reasonable consumer is the ordinary consumer acting reasonably under the circumstances." *Id. at 1162* (internal quotation marks and citation omitted). Similarly, the CLRA, which prohibits "unfair methods of competition and unfair or deceptive acts or practices," are also governed by the "reasonable consumer test." *Cal. Civ. Code § 1770*; *In re Sony PS3 Other OS Litigation, 551 F. App'x 916, 920 (9th Cir. 2014)*. "In order to state a cause of action under the fraud prong of the UCL, a plaintiff must show that members of the public are likely to be deceived," which is also "judged by the effect it would have on a reasonable consumer." *In re iPhone Application Litig., 844 F. Supp. 2d 1040, 1073 (N.D. Cal. 2012)* (citing *Schnall v. Hertz Corp., 78 Cal. App. 4th 1144, 1167, 93 Cal. Rptr. 2d 439*

(2000)); *Davis, 691 F.3d at 1169* (quoting *Puentes v. Wells Fargo Home Mortg., Inc., 160 Cal. App. 4th 638, 72 Cal. Rptr. 3d 903, 909 (2008)*).

Defendant contends that Plaintiffs cannot pursue relief under the FAL and UCL and Lynch cannot pursue equitable relief under the CLRA because the alleged injuries can be remedied with monetary damages. Dkt. 44 at 19-21. In *Sonner v. Premier Nutrition Corp.*, the Ninth Circuit held that a plaintiff **[*32]** "must establish that she lacks an adequate remedy at law before securing equitable restitution for past harm under the UCL and CLRA." *971 F.3d 834, 844 (9th Cir. 2020)* (citations omitted). "[E]quitable relief can come in different forms - for example, injunctive relief or restitution." *Julian v. TTE Technology, Inc., No. 20-cv-02857-EMC., 2020 U.S. Dist. LEXIS 215039, 2020 WL 6743912, at *4 (N.D. Cal. Nov. 17, 2020)*. Further, "[t]he holding in *Sonner* applies only to 'equitable restitution for past harm under the UCL,' not to an injunction for future harm." *Brooks v. Thomson Reuters Corp., No. 21-cv-01418-EMC, 2021 U.S. Dist. LEXIS 154093, 2021 WL 3621837, at *10 (N.D. Cal. Aug. 16, 2021)* (citing *Sonner, 971 F.3d at 844*) (finding that "Plaintiffs are not barred from seeking equitable relief in the form of an injunction under the UCL") (emphases omitted). Plaintiffs' FAL, UCL, and CLRA claims seek equitable relief in the form of an injunction. *See* Dkt. 42 ¶¶ 124-27, 134-35, 143-44, 150-51, 165-66. Accordingly, Plaintiffs are not barred from seeking equitable relief under these claims. *See* *Brooks, 2021 U.S. Dist. LEXIS 154093, 2021 WL 3621837, at *11* (noting that "[m]ore recently, . . . other courts have declined to apply *Sonner* to bar UCL claims for injunctive relief, recognizing that the prospect of paying damages is sometimes insufficient to deter a defendant from engaging in an alleged unlawful, unfair, or fraudulent business practice") (citations omitted).

Defendant argues that the information that Plaintiffs contend HP omitted regarding the dynamic security **[*33]** and the data collection was disclosed on various HP webpages, including the store pages and the Troubleshooting Page. Dkt. 44 at 22-23. As previously discussed in Section III.B.2., at the motion to dismiss stage, the Court declines to find that Plaintiffs were on notice that Defendant "automatically" collects "product usage data such as . . . ink or toner brand" or that the printers are "[d]ynamic security enabled" and that "[c]artridges using a non-HP chip may not work, and those that work today may not work in the future."

Defendant argues that it did not have a duty to make any disclosures regarding dynamic security and that "the duty to disclose is limited to a physical product defect relating to the central function of the product or a safety defect." *Id.* at 22. Defendant also argues that Plaintiffs' claims under the FAL and fraudulent prong of the UCL based on the "supply problem" error message is not viable because members of the public are not "likely to be deceived" by the message. *Id.* at 24-25. Further, Defendant argues that the error message also cannot support a CLRA violation because the relevant provision prohibits representing that a replacement part is needed when in **[*34]** fact it is not. *Id.* Finally, Defendant contends that Plaintiffs cannot establish that the error message caused injury. *Id.* at 25.

In the TAC, Plaintiffs allege that Defendant's printers displayed a "supply problem" error message even though there was no supply problem, and it "intentionally misrepresented the cause of the printer issue, suggesting that the third-party supply cartridges were broken when, instead, the transmission simply disabled the supply cartridges that had previously functioned satisfactorily and would have continued to function but for HP's transmission of the update." Dkt 42 ¶¶ 5, 30, 41, 53, 63, 65-66. "The alleged omission, that HP intentionally used a firmware update to disable printers that were using non-HP ink cartridges, is arguably contrary to the explanations for the printer failure stated in the error messages." *San Miguel, 317 F. Supp. 3d at 1090*. At the pleading stage, the Court finds that Plaintiffs' allegations are sufficient to state fraud by omission under the FAL, CLRA, and the UCL. Accordingly, Defendant's motion to dismiss Plaintiffs' claims for fraud by false and misleading statements or omission under the FAL, CLRA, and the UCL are **DENIED**.

6. Remaining Unfair Competition Law ("UCL") [*35] Claims

The UCL creates a cause of action for business practices that are: (1) unlawful; (2) unfair, or (3) fraudulent. *Cal. Bus. & Profs. Code § 17200*. Each "prong" of the UCL provides a separate and distinct theory of liability. *Lozano v. AT & T Wireless Servs., Inc., 504 F.3d 718, 731 (9th Cir. 2007)*. Further, to have standing to pursue this claim, plaintiffs must show that they "lost money or property" because of Defendant's conduct. *Cal. Bus. & Prof. Code § 17204*; *see* *In re Facebook, Inc., Consumer Privacy User Profile Litig., 402 F. Supp. 3d 767, 804 (N.D. Cal. 2019)*.

a. Unfair Prong

"The UCL also creates a cause of action for a business practice that is 'unfair' even if not specifically proscribed by some other law." *In re iPhone Application Litig., 844 F. Supp. 2d at 1072* (citing *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal.4th 1134, 1143, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*). "The UCL does not define the term 'unfair.' In fact, the proper definition of 'unfair' conduct against consumers 'is currently in flux' among California courts." *Hodsdon v. Mars, Inc., 891 F.3d 857, 866 (9th Cir. 2018)* (quoting *Davis, 691 F.3d at 1169*). "Before *Cel-Tech*, courts held that 'unfair' conduct occurs when that practice 'offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.'" *Davis, 691 F.3d at 1169* (citing *S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 85 Cal. Rptr. 2d 301, 316 (1999)*). The balancing test in *S. Bay Chevrolet* requires the Court to "weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim." *Davis, 691 F.3d at 1169* (internal quotation marks and citation omitted). In *Cel-Tech*, the California Supreme Court established a more concrete definition **[*36]** of "unfair," defining it as "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *20 Cal. 4th at 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527*. Further, "any finding of unfairness to competitors under *section 17200* [must] be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." *Id. at 186-87*. While the *Cel-Tech* test did not apply to actions by consumers, "some courts in California have extended the *Cel-Tech* definition to consumer actions." *Davis, 691 F.3d at 1170*.

Defendant contends that Plaintiffs fail to state a plausible claim under either test. Dkt. 44 at 26. Defendant argues that under the *South Bay* test, Plaintiffs fail to plausibly allege that the conduct at issue is sufficient to state a claim. *Id.* Specifically, Defendant argues that HP's dynamic security feature benefits customers, HP disclosed the third-party cartridge compatibility issue as well as the product usage data they collect, and the alleged omissions do not "rise to the level of immoral or substantially injurious conduct." *Id.* at 26-27. Defendant also **[*37]** argues that under the *Cel-Tech* test, Plaintiffs only allege in conclusory terms that HP's conduct "offends an established public policy." *Id.*

As previously discussed in Section III.B.2., the Court declines to find that Plaintiffs were on notice that Defendant "automatically" collects "product usage data such as . . . ink or toner brand" or that the printers are "[d]ynamic security enabled" and that "[c]artridges using a non-HP chip may not work, and those that work today may not work in the future" at the pleading stage. Further, at the motion to dismiss stage, the Court cannot say that the benefits from HP's business practices of collecting product usage data and its dynamic security feature outweighs the harm. *See In re iPhone Application Litig., 844 F. Supp. 2d at 1073* ("While the benefits of Apple's conduct may ultimately outweigh the harm to consumers, this is a factual determination that cannot be made at this stage of the proceedings."). Accordingly, Defendant's motion to dismiss on the unfair prong of the UCL is **DENIED**.

b. Unlawful Prong

"The unlawful prong of the UCL prohibits anything that can properly be called a business practice and that at the same time is forbidden by law." *In re iPhone Application Litig., 844 F. Supp. 2d at 1072* (citing *Cel-Tech, 20 Cal.4th at 180*) (internal quotation marks omitted)). *Section 17200 of the Business and Professions Code* permits **[*38]** injured customers to "borrow" violations of other laws and treat them as unfair competition that is independently actionable. *Id.*

In the TAC, Plaintiffs allege that "[e]ach of HP's malicious transmissions constitutes a violation of *18 U.S.C. § 1030(a)(5)(A) of the CFAA*, *Cal. Penal Code § 502*, California's False Advertising Law, and trespass to chattels." Dkt. 42 ¶ 147. The Court has already considered the adequacy of Plaintiffs' allegations related to *18 U.S.C. § 1030(a)(5)(A) of the CFAA* (Section III.B.3), *Cal. Penal Code § 502* (Section III.B.4), and FAL (Section III.B.5). Further, the Court discusses trespass to chattels below in Section III.B.7. Accordingly, Plaintiffs' UCL claim survives to the extent it is based upon *18 U.S.C. § 1030(a)(5)(A) of the CFAA*, the remaining subsections under *Cal. Penal*

Code § 502, and the FAL. Thus, Defendant's motion to dismiss Plaintiffs' UCL claim under the unlawful prong is **DENIED**.

7. Trespass to Chattels

The California Supreme Court has held that the principles underlying the tort of trespass to chattels for "unauthorized entry" apply to allegations of digital trespass. *See* *Intel Corp. v. Hamidi, 30 Cal. 4th 1342, 1 Cal. Rptr. 3d 32, 71 P.3d 296 (2003)*. "[T]o prevail on a claim for trespass based on accessing a computer system, the plaintiff must establish: (1) defendant intentionally and without authorization interfered with plaintiff's possessory interest in the computer system; and (2) defendant's **[*39]** unauthorized use proximately resulted in damage to plaintiff." *eBay, Inc. v. Bidder's Edge, Inc., 100 F.Supp.2d 1058, 1069-70 (N.D. Cal. 2000)*.

Plaintiffs allege that HP "wrongfully, intentionally, and without authorization interfered with the ownership, possession, and use of the Class Printers and Plaintiffs' and Class members' supply cartridges" when it sent malware to the printers which disabled printers containing non-HP cartridges, rendering those cartridges and printers inoperable. Dkt. 42 ¶ 154. Additionally, Plaintiffs allege that HP also accessed the printers "without the users' knowledge or permission to obtain data on the types of cartridges being used to operate the devices." *Id.* As previously discussed in Section III.B.3.b, while Plaintiffs allege that HP acted "without authorization," Plaintiffs also allege that HP "has the exclusive ability to install firmware updates to the printers it sells that are connected to the Internet." *Id.* ¶ 4. Accordingly, this subsection is not applicable in light of Plaintiffs' allegations in the TAC regarding HP's ability to install firmware updates. Thus, Defendant's motion to dismiss Plaintiffs' trespass to chattels claim is **GRANTED WITH LEAVE TO AMEND**.

8. Plaintiffs' Request for Injunctive Relief

Defendant contends **[*40]** that Plaintiffs' request for prospective injunctive relief should be dismissed or stricken because Plaintiffs lack Article III standing to pursue this relief. Dkt. 44 at 35. Defendant argues that in the TAC, Plaintiffs allege that Performance Automotive alleges that it purchased a different printer to avoid further losses and Mobile Emergency and Lynch replaced their third-party cartridges with HP-branded cartridges. *Id.* (citing Dkt. 42 ¶¶ 44, 56, 68). Further, Defendant argues that Plaintiffs' allegations that they "would continue to use" their printers "with non-HP toner supply cartridges if given the opportunity to do so without risk of future malware transmissions from HP" is insufficient to establish Plaintiffs' standing to pursue injunctive relief. *Id.* at 35-36 (citing Dkt. 42 ¶ 7).

In the TAC, Plaintiffs consistently allege that they "would continue to use their [printers] with non-HP toner supply cartridges if given the opportunity to do so without the risk of future malware transmissions from HP." Dkt. 42 ¶¶ 7, 38, 45, 50, 57, 61, 70. Here, "the threat of a future firmware update that could further modify Plaintiffs' printers is sufficiently 'concrete and particularized' to establish **[*41]** standing." *Parziale v. HP, Inc., 445 F.Supp.3d 435, 452 (2020)* (finding that "[t]he injury is particularized because it would affect Plaintiff, as an owner of HP printers, in a personal and individual way") (internal quotation marks omitted). The Court finds that at the motion to dismiss stage, Plaintiffs have shown a sufficient likelihood that they will be wronged again in a similar way to establish standing for injunctive relief. Thus, HP's motion to dismiss or strike Plaintiffs' request for injunctive relief is **DENIED**.

IV. CONCLUSION

For the reasons stated above, the Court **DENIES** Defendant's motion to dismiss pursuant to *Rule 12(b)(1)*. Additionally, the Court **GRANTS IN PART AND DENIES IN PART** Defendant's motion to dismiss pursuant to *Rule 12(b)(6)*. Specifically, Defendant's motion to dismiss Plaintiffs' claims for violations of CFAA to the extent that the CFAA claim is based on *Section 1030(a)(5)(A)*, CDAFA to the extent it is based upon *subsections (c)(1)-(c)(5)*, FAL, CLRA, UCL, and Plaintiffs' request for injunctive relief are **DENIED**. Defendant's motion to dismiss Plaintiffs' claims against Defendant for violations of CFAA to the extent that the CFAA claim is based on *Section 1030(a)(2)(C)* and trespass to chattels are **GRANTED WITH LEAVE TO AMEND**. Defendant's motion to dismiss Plaintiffs' claim against Defendant for violation of CDAFA to the **[*42]** extent it is based upon *subsection (c)(7)* is **GRANTED WITHOUT LEAVE TO AMEND**. Additionally, Defendant's motion to strike Plaintiffs' request for injunctive relief is **DENIED**.

Plaintiffs may file an amended complaint by **October 29, 2021**. Plaintiffs may not add new causes of actions or parties without leave of the Court or stipulation of the parties pursuant to *Federal Rule of Civil Procedure 15*.

SO ORDERED.

Dated: October 15, 2021

Judges: HONORABLE CHRISTOPHER P. TUITE, United States Magistrate Judge.

Opinion by: CHRISTOPHER P. TUITE

Opinion

REPORT AND RECOMMENDATION

Before me on referral is Defendant/Counter-Plaintiff Montgomery & Newcomb, LLC's (M&N Law) motion for a preliminary injunction against Plaintiffs/Counter-Defendants Wyndham Vacation Ownership, Inc.; Wyndham Vacation Resorts, Inc.; Wyndham Resort Development Corporation; Shell Vacations, LLC; SVC-West, LLC; SVC-Americana, LLC; and SVC-Hawaii, LLC (collectively, Wyndham).[1] (Doc. 353). After careful consideration of the parties' submissions and with the benefit of a hearing on the matter, I respectfully recommend that the Court deny M&N Law's motion.

I.

Wyndham is a real estate developer that promotes, markets, and manages "timeshares," mostly as vacation properties. (Doc. 1 at 3). M&N Law is a Missouri-based law firm operated by Defendants M. Scott Montgomery and W. Todd Newcomb that specializes in timeshare "exits." (Docs. 353-8, 353-9). M&N Law's instant request for a preliminary **[*4]** injunction comes before the Court after several years of litigation between the parties, which has spanned multiple lawsuits across state and federal courts in both Florida and Missouri. To understand the basis for the parties' dispute, as well as the nature and context of M&N Law's motion, some background is necessary.[2]

Wyndham sells its timeshares to consumers, who, in return, acquire certain benefits, including—most notably—the right to use Wyndham's resorts during designated periods of time. (Doc. 1 at 3). Wyndham memorializes its

---

[1] In its operative pleading, M&N Law also names "Wyndham Destinations, Inc." as a counter-defendant. (Doc. 342 at 11). None of the Plaintiffs in this action bear that name, however, nor does the record contain a return of service for such an entity. In addition, M&N Law's instant submission does not contain any references to a "Wyndham Destinations, Inc." Accordingly, I assume for purposes of this report and recommendation that M&N Law does not seek a preliminary injunction against Wyndham Destinations, Inc.

[2] The background set forth herein is derived largely from the Court's prior Orders in this action, *see, e.g.*, (Docs. 144, 275, 336), the parties' respective pleadings and other submissions, *see, e.g.*, (Docs. 1, 342, 353, 355, 360), and decisions rendered by other courts in various related actions.

timeshare arrangements with its customers in written contracts that govern the financial aspects of the parties' relationship. *Id.* at 16. The terms of those contracts cover, among other matters, the base price of the consumers' timeshare interests, the payment of taxes and other intermittent fees associated with maintaining the properties, and, on occasion, the debt the consumers incurred in obtaining their rights and benefits under their agreements with Wyndham. *Id.*

According to M&N Law, some timeshare owners ultimately conclude that the costs associated with complying with their contractual obligations with Wyndham exceed the rewards **[*5]** of their timeshare interests. (Doc. 342 at 14). Other owners, M&N Law avers, believe that they are victims of high-pressure sales tactics employed by Wyndham (and other timeshare developers), which result in them feeling "trapped" in unreasonably priced, long-term agreements for properties they rarely use. *Id.* M&N Law further avers that when these disgruntled customers look to off load their timeshares to other parties, they learn that the market places little value on this asset. *Id.* at 15. Upon being faced with many years of spending large sums of money for vacation properties they no longer want, these customers—M&N Law alleges—look for an expeditious way to escape their legal commitments.

For its part, Wyndham contends that, to the extent its customers are dissatisfied, they can settle their grievances with Wyndham through mutually agreed-upon resolutions or through alternative product offerings. (Doc. 1 at 4). Despite these options, Wyndham asserts that a "nefarious cottage industry" has emerged to "prey[ ] upon unsuspecting timeshare owners" and to drive a wedge between Wyndham and its existing customers. *Id.* at 3, 4-7. Wyndham avers that some of the entities involved in this **[*6]** so-called "timeshare exit" business "instruct, deceive, induce, or persuade" the owners simply to stop paying the costs imposed under their timeshare contracts with Wyndham on the premise that the owners can "exit" their legal agreements by doing so. *Id.* at 3, 5. By Wyndham's account, these exit entities "demand exorbitant upfront payments" but frequently "do little or nothing on behalf of the customer[s]." *Id.* at 4.

According to Wyndham, the basic structure of this alleged scam is as follows. First, M&N Law's co-conspirators—with M&N Law's knowledge and approval—employ "various advertising methods, including online, telemarketing, direct mailing, and in-person sales presentations, to target and solicit [Wyndham's] timeshare owners to use their timeshare exit services." (Doc. 144 at 4) (citing Doc. 1 at 24-43); *see also* (Doc. 1 at 22). As part of these presentations, M&N Law's cohorts reportedly "denigrat[e] timeshare developers in general, and Wyndham in particular" by providing "distorted" and "misleading" information about the future costs associated with the owners' timeshare interests. (Doc. 1 at 40). The presentations also supposedly guarantee the owners a successful "exit" from **[*7]** their timeshare contracts but do not inform them about the potential negative consequences—namely, default and foreclosure—that may occur when they cease paying for their timeshares. (Doc. 275 at 3-4) (citing Doc. 1 at 9-22).

Once the timeshare owners remit a substantial fee to the marketers, Wyndham claims these entities share their proceeds with M&N Law (as well as with other law firms) and additionally "refer" the timeshare owners to M&N Law to "implement [the] purported 'cancellation' or 'transfer' services related to" the owners' timeshare contracts with Wyndham. (Doc. 1 at 5). M&N Law then allegedly sends dunning letters on behalf of its "clients" to Wyndham, in which it cites various defenses against the timeshare agreements in the "hop[e] that the threat of litigation will convince [Wyndham] to cancel or release the timeshare owners from their contracts." (Doc. 275 at 4) (citing Doc. 1 at 23). By Wyndham's account, M&N Law often takes no further action to aid the timeshare owners, and the owners are eventually harmed when Wyndham forecloses on the owners' timeshare interests due to their lack of payment. *Id.*; (Doc. 1 at 6). Wyndham avers that "[t]housands of customers" have **[*8]** been victimized by the actions of M&N Law's unseemly confederacy, and that these consumers have paid M&N Law and others in the exit industry as much as "tens of thousands of dollars" for what are effectively illusory services. (Doc. 1 at 44). And because the timeshare owners are no longer paying Wyndham the monies that they owe, Wyndham asserts that it loses out on the revenue associated with its timeshare contracts (which it estimates has already totaled "millions of dollars") and also suffers damage to its goodwill. *Id.* at 6, 7.

The opening salvo in the now years long litigation involving Wyndham and M&N Law occurred in the months leading up to the commencement of this lawsuit. In August 2018, M&N Law brought an action against Wyndham in Missouri state court on behalf of "dozens" of supposedly defrauded timeshare owners. (Doc. 353-8); *Kohlbeck v.*

Wyndham Vacation Resorts, Inc., 7 F.4th 729, 733 (8th Cir. 2021). Following the removal of that case, a district court in the Western District of Missouri awarded summary judgment to Wyndham, and the Eighth Circuit Court of Appeals affirmed that judgment on appeal. *Kohlbeck, 7 F.4th at 733*.

In December 2018, roughly four months after the initiation of the *Kohlbeck* action, Wyndham filed this suit in the Middle District of Florida's Orlando Division **[*9]** against M&N Law, Messrs. Montgomery and Newcomb, and multiple other Defendants, alleging that they were all engaged in the above fraudulent scheme. (Doc. 1). Based on those allegations, Wyndham asserted claims for (1) false and misleading advertising and contributory false advertising under the Lanham Act, *15 U.S.C. § 1125*; (2) tortious interference with contractual relations; (3) civil conspiracy; and (4) violations of the *Florida Deceptive and Unfair Trade Practices Act (FDUTPA), §§ 501.201-213, Fla. Stat.* (Doc. 1 at 46-70).

In response to Wyndham's commencement of this litigation, attorneys Montgomery and Newcomb filed two "separate but identical actions" in Missouri state court against Wyndham, its law firm, and its process server, asserting that this case constituted "an abuse of process." *Newcomb v. Wyndham Vacation Ownership, Inc., 999 F.3d 1134, 1135-36 (8th Cir. 2021)*. Wyndham and the other defendants in the Missouri actions removed those lawsuits to federal court, where they were dismissed at the pleading stage. *Id.* Messrs. Montgomery and Newcomb appealed those decisions, but the Eighth Circuit dismissed their challenges on jurisdictional grounds. *Id.*[3]

In the interim, M&N Law and the other Defendants also moved to dismiss the instant lawsuit for lack of personal jurisdiction or, alternatively, to **[*10]** have it transferred to the Western District of Missouri. *See* (Docs. 31, 51, 56, 67, 100). After the parties engaged in substantial jurisdictional discovery, a District Judge in the Orlando Division—the Honorable Roy B. Dalton—issued an Order in August 2019 denying the Defendants' motion. (Doc. 144). In doing so, Judge Dalton found that Wyndham had adequately alleged claims for tortious interference with contractual relations and civil conspiracy, and that Wyndham's Lanham Act and FDUTPA claims were likewise not subject to dismissal because the Defendants had failed to challenge the legal sufficiency of those causes of action. *Id.* Judge Dalton also included a directive in his Order that the case be transferred to the District's Tampa Division. *Id.*

In August 2019, shortly after that transfer was effectuated, M&N Law and several of the other Defendants filed a consolidated answer, in which they denied most of Wyndham's allegations and asserted counterclaims against Wyndham for (1) "intentional tortious interference with existing economic relationships and with prospective economic advantage;" (2) trade libel; (3) "common law unfair competition;" and (4) false advertising under the Lanham Act. (Doc. **[*11]** 149 at 42-51). Wyndham subsequently moved to strike various portions of that answer and to dismiss the above counterclaims. (Docs. 166, 167). The Court largely granted that motion in May 2020 due to a number of pleading deficiencies. (Doc. 275). In response, M&N Law and several of the related Defendants filed an amended pleading in June 2020 after retaining new counsel, in which they reiterated the same counterclaims as the ones the Court had previously dismissed. (Doc. 281).

In July 2020, M&N Law additionally moved for summary judgment on Wyndham's claim for contributory false advertising under the Lanham Act. (Doc. 295). M&N Law essentially argued in its motion that Wyndham's Lanham Act claim was legally untenable because no Circuit Court of Appeals—other than the Eleventh Circuit—had found such a cause of action to be viable. *Id.* In the alternative, M&N Law asked that the Court certify the case for an interlocutory appeal on the issue of whether the Court could ignore Eleventh Circuit precedent. *Id.*

---

[3] In addition to these legal proceedings, M&N Law commenced a state court action in Missouri in July 2019 against another ostensible timeshare developer, Bluegreen Vacations Unlimited, Inc. (Bluegreen Vacations). (Doc. 353-8). According to M&N Law, the court in that case certified a class of over 17,000 Bluegreen Vacations owners "based upon [M&N Law's] allegations that Bluegreen [Vacations] committed the illegal act of the unauthorized practice of law in connection with timeshare sales." *Id.*; Bluegreen Vacations Hldg. Corp., Annual Report (Form 10-K) (Mar. 1, 2021). More recently, Bluegreen Vacations sued M&N Law and other parties in the Southern District of Florida, alleging the same claims as Wyndham asserts here. *See Bluegreen Vacations Unlimited, Inc. v. Montgomery Law Firm, LLC*, Case No. 1:19-cv-24704-JEM (S.D. Fla.); (Doc. 353-8).

In February 2021, the Court denied M&N Law's summary judgment motion, finding that existing Eleventh Circuit case law—namely, *Duty Free Americas, Inc. v. Estée Lauder Cos., Inc., 797 F.3d 1248 (11th Cir. 2015)*—clearly and expressly authorized Wyndham's Lanham Act claim. (Doc. **[*12]** 336). The Court also denied M&N Law's interlocutory appeal request, concluding that "there [wa]s not a substantial ground for difference of opinion within the Eleventh Circuit" on the validity of Wyndham's Lanham Act claim under *Duty Free Americas*, and that "an immediate appeal . . . [would] not materially advance the termination of this litigation." *Id.* at 5.

Later that same month, the Court dismissed, in part, M&N Law's amended answer and counterclaims, again on pleading grounds, and granted M&N Law leave to file a second amended answer. (Doc. 339). M&N Law and a few of the related Defendants filed such a pleading in early March 2021. (Doc. 342). This time around, however, M&N Law abandoned its counterclaims grounded in tort (including the causes of actions the Court had previously found potentially viable) in favor of several requests for a declaratory judgment, as well as—of significance here—an antitrust counterclaim for damages and injunctive relief under the Clayton Act, *15 U.S.C. §§ 15*, *26*, based on Wyndham's purported violation of *section 1* of the Sherman Act, *15 U.S.C. § 1*.[4] (Doc. 342).

With respect to its Sherman Act counterclaim, M&N Law asserts that Wyndham's lawsuit contravenes the antitrust laws because it is a "sham pleading designed merely to oppress M&N Law **[*13]** . . . with harassing discovery[and] to put [M&N Law] out of business." *Id.* at 29. In support of this assertion, M&N Law alleges that Wyndham, joined by Bluegreen Vacations, conspired to sue M&N Law in various fora to "decrease competition in the timeshare industry" and to "increase Wyndham['s] monopoly power." *Id.* at 29, 30. As evidence of their concerted actions, M&N Law avers that Wyndham and Bluegreen Vacations share the same attorneys and utilized similar complaints with identical causes of action in their lawsuits against M&N Law in the Middle District of Florida and the Southern District of Florida, respectively. *Id.* at 26-29. In addition, M&N Law claims that Wyndham is a member of what appears to be a trade association for persons involved in the timeshare industry (known as the American Resort Development Association or ARDA), and that unidentified members of this trade association have, at some unspecified point in time, agreed to file actions against other unnamed persons supposedly engaged in timeshare exit frauds to "decrease competition among them" and to "raise all of their pricing power on timeshares." *Id.* at 30. M&N Law further asserts that it has been "directly harmed" **[*14]** by Wyndham's lawsuit and cites, as examples, that it "has had to incur exorbitant legal fees;" has had to deal with "uncertain[ty] about its ability to continue providing legal services in Missouri [and] helping timeshare interest owners;" "has suffered reputational harm and injury[ ] and . . . received fewer clients;" and has lost its "errors and omissions insurance policies" and is facing "dramatically" higher premiums. *Id.* at 31.

Wyndham promptly moved to dismiss M&N Law's second amended complaint, arguing, in pertinent part, that M&N Law "lack[ed] standing" to bring its Sherman Act counterclaim and also "failed to allege any facts to establish [the requisite] antitrust agreement[or] any anticompetitive harm in a defined market." (Doc. 346 at 14-23). That motion remains pending.

The instant preliminary injunction motion, filed by M&N Law over two-and-ahalf years after Wyndham initiated this lawsuit and almost three months after M&N Law first raised its Sherman Act counterclaim, followed. (Doc. 353). By way of that motion, M&N Law requests that the Court enter an order "(A) staying [Wyndham's] claims against M&N Law," and "(B) issuing a nationwide injunction precluding [Wyndham] (and other persons identified **[*15]** in [*Federal Rule of Civil Procedure 65(d)(2)*] from initiating any further lawsuit against M&N Law and its attorneys, in federal or state court, based on their provision of legal services to timeshare owners, until" the Court resolves the merits of M&N Law's Sherman Act counterclaim. *Id.* at 22-23. In support of this request, M&N Law attaches to its motion a number of documentary exhibits, including several hearing transcripts, orders, and affidavits from discovery and scheduling disputes in another lawsuit apparently involving a different timeshare company. (Docs. 353-2-353-7). M&N Law also includes with its motion affidavits from Messrs. Montgomery and Newcomb, in which the two attorneys reiterate M&N Law's position that this litigation is unduly burdensome and unfounded. (Docs. 353-8-353-9).

---

[4] For ease of reference, M&N Law's antitrust counterclaim under the Clayton and Sherman Acts is generally described herein as M&N Law's Sherman Act counterclaim.

Wyndham filed a response in opposition to M&N Law's preliminary injunction motion, to which M&N Law then submitted a reply. (Docs. 355, 356, 359, 360). Upon review of the parties' filings, I convened a hearing on the matter, which was attended by counsel for M&N Law and Wyndham, as well as by Messrs. Montgomery and Newcomb. (Doc. 383). Both parties presented arguments in support of their respective positions but did not seek to introduce **[*16]** any additional evidence.[5] *Id.*; M.D. Fla. R. 3.01(h).

At the same time that it filed the instant motion with this Court, M&N Law sought a nearly-identical nationwide preliminary injunction and stay of proceedings in the *Bluegreen Vacations* litigation being conducted in the Southern District of Florida. *See* Bluegreen Vacations, 2021 WL 4430366 (S.D. Fla. May 20, 2021). Following an evidentiary hearing on that motion, the court in the Southern District of Florida denied M&N Law's requests for relief in late September 2021. *Id., report and recommendation adopted*, 2021 U.S. Dist. LEXIS 183999, 2021 WL 4428211 (S.D. Fla. Sept. 27, 2021).[6] M&N Law's request for a preliminary injunction or a stay in this case is similarly now ripe for the Court's resolution.

II.

A preliminary injunction—as the Supreme Court and other courts have often emphasized—is "an extraordinary and drastic remedy." Munaf v. Geren, 553 U.S. 674, 689, 128 S. Ct. 2207, 171 L. Ed. 2d 1 (2008) (internal quotation marks and citation omitted); *see also* Winter v. Nat. Res. Def. Council, Inc., 555 U.S. 7, 24 (2008) ("A preliminary injunction is an extraordinary remedy never awarded as of right.") (citation omitted). Designed to preserve the status quo until a final decision on the merits, Univ. of Tex. v. Camenisch, 451 U.S. 390, 395, 101 S. Ct. 1830, 68 L. Ed. 2d 175 (1981), preliminary injunctions are the exception, not the rule, Four Seasons Hotels & Resorts, B.V. v. Consorcio Barr, S.A., 320 F.3d 1205, 1210 (11th Cir. 2003) (citing Texas v. Seatrain Int'l, S.A., 518 F.2d 175, 179 (5th Cir. 1975)).

To prevail on a request for a preliminary injunction, the movant must "clearly establish" that there is "(1) a substantial **[*17]** likelihood of success on the merits; (2) that irreparable injury will be suffered unless the [sought-after] injunction issues; (3) the threatened injury to the movant outweighs whatever damage the proposed injunction may cause the opposing party; and (4) if issued, the injunction would not be adverse to the public interest." Brown v. Sec'y, U.S. Dep't of Health & Hum. Servs., 2021 U.S. App. LEXIS 20795, 4 F.4th 1220, 1224 (11th Cir. 2021) (citations omitted). The movant bears the burden of persuasion as to each of these requirements. *See* Siegel v. LePore, 234 F.3d 1163, 1176 (11th Cir. 2000) (per curiam) (citations omitted); Ne. Fla. Ch. of Ass'n of Gen. Contrs. of Am. v. City of Jacksonville, 896 F.2d 1283, 1285 (11th Cir. 1990) (citations omitted). In deciding whether the movant has met its burden, "[a] district court may rely on affidavits and hearsay materials which would not be admissible evidence for a permanent injunction, if the evidence is appropriate given the character and objectives of the injunctive proceeding." Levi Strauss & Co. v. Sunrise Int'l Trading Inc., 51 F.3d 982, 985 (11th Cir. 1995) (internal quotation marks and citation omitted); *see also* Cumulus Media, Inc. v. Clear Channel Commc'ns, Inc., 304 F.3d 1167, 1171 (11th Cir. 2002) ("Preliminary injunctions are, by their nature, products of an expedited process often based upon an underdeveloped and incomplete evidentiary record.") (citation omitted). A movant's failure to establish any one of the above requirements warrants a denial of a request for a preliminary injunction irrespective of the merits of the remaining elements. Wreal, LLC v. Amazon.com, Inc., 840 F.3d 1244, 1248 (11th Cir. 2016) (noting that the failure **[*18]** to meet even one of the four prerequisites for a preliminary injunction "dooms" such a request) (citation omitted).

In the end, the decision to grant or deny a preliminary injunction rests within the district court's sound discretion and will not be overturned on appeal absent a clear abuse of that discretion. Osmose, Inc. v. Viance, LLC, 612 F.3d

[5] M&N Law did agree at the hearing, however, to withdraw the portion of its proposed preliminary injunction, which requested that Wyndham's alleged co-conspirators be barred from suing M&N Law in any state court across the United States. (Doc. 383 at 21-22).

[6] Wyndham recently filed a notice of supplemental authority advising the Court of the Southern District of Florida's ruling in the *Bluegreen Vacations* action. (Doc. 396). M&N Law did not do the same, however, even though it cited the *Bluegreen Vacations* litigation in its preliminary injunction motion. *See* (Doc. 353 at 2).

1298, 1307 (11th Cir. 2010) (citation omitted). Indeed, appellate review in this context is "exceedingly narrow" and "deferential" because "a district court often must make difficult judgments about the viability of a plaintiff's claims based on a limited record." Wreal, LLC, 840 F.3d at 1248 (citations omitted). As a result, not only does a movant face a "tough road in establishing [the] four prerequisites to obtain a preliminary injunction in the first instance, but, on appeal, [the movant] must also overcome the steep hurdles of showing that the district court clearly abused its discretion in its consideration of each of the four prerequisites." *Id.* (citation omitted).

In this case, as noted above, M&N Law premises its preliminary injunction motion on its antitrust counterclaim pursuant to section 1 of the Sherman Act, by way of sections 4 and 16 of the Clayton Act. *See* 15 U.S.C. §§ 1, 15, 26. Section 1 of the Sherman Act forbids any agreement that restrains competition. In particular, it states that "[e]very **[*19]** contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States . . . is declared to be illegal." 15 U.S.C. § 1. Notwithstanding the expansive breadth of this language, courts have long held that section 1 only prohibits conspiracies or agreements that "unreasonably" restrain interstate trade or commerce. Quality Auto Painting Ctr. of Roselle, Inc. v. State Farm Indem. Co., 917 F.3d 1249, 1260 (11th Cir. 2019) (en banc) (citing Arizona v. Maricopa Cty. Med. Soc'y, 457 U.S. 332, 343, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)).

Private parties can enforce section 1 of the Sherman Act through sections 4 and 16 of the Clayton Act and recover damages and injunctive relief under those respective provisions. *See* McGuire Oil Co. v. Mapco, Inc., 958 F.2d 1552, 1555 n.4 (11th Cir. 1992); Todorov v. DCH Healthcare Auth.,1991 U.S. App. LEXIS 1142, 921 F.2d 1438, 1444 n.10, 1448-49, 1452 (11th Cir. 1991) (citations omitted). "A private plaintiff proceeding under section 4 . . . must prove (1) [a] violation of the antitrust laws, (2) [a] cognizable injury attributable to the violation, and (3) at least the approximate amount of the damage." McGuire Oil Co., 958 F.2d at 1557-58 (citation omitted). A private plaintiff seeking recourse under section 16 must make the same showing, with the caveat that the cognizable injury requirement is somewhat relaxed under this provision. Todorov, 921 F.2d at 1452 (citations omitted). Regardless of the differences between these two statutes, a plaintiff seeking to rely on either section 4 or 16 "must still allege an injury of the type the antitrust laws were designed to prevent." Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 111, 113, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986).

A.

In this case, M&N Law has not met its burden of clearly **[*20]** establishing a substantial likelihood of success on its counterclaim under section 1 of the Sherman Act. To begin, M&N Law fails to demonstrate in its motion that this cause of action is not barred by the so-called *Noerr-Pennington* doctrine. Named after the Supreme Court's decisions in Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961), and United Mine Workers of America v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965), the *Noerr-Pennington* doctrine shields a party from antitrust liability where the party exercises its right to petition the government "by resorting to administrative and/or judicial proceedings." Andrx Pharms., Inc. v. Elan Corp., PLC, 421 F.3d 1227, 1233 (11th Cir. 2005) (citing Cal. Motor Transp. Co. v. Trucking Unlimited, 404 U.S. 508, 510, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)). This form of immunity is grounded, at least in part, on the First Amendment right to associate with others and to petition the government for the redress of grievances. *Id.; see also* Feminist Women's Health Ctr., Inc. v. Mohammad, 586 F.2d 530, 542 (5th Cir. 1979) ("[T]he First Amendment right of competitors to join in petitioning courts and administrative bodies entails the right to band together for purposes of supporting litigation."). As the Supreme Court has explained:

> [I]t would be destructive of rights of association and of petition to hold that groups with common interests may not, without violating the antitrust laws, use the channels and procedures of state and federal [ ] courts to advocate their causes and points of view respecting resolution of their business and economic interests vis-à-vis their competitors. **[*21]**

Cal. Motor Transp., 404 U.S. at 510-11.

The Eleventh Circuit has extended the *Noerr-Pennington* doctrine to encompass threats of litigation, as well as the actual commencement of a legal action. McGuire Oil Co., 958 F.2d at 1559-60. And contrary to M&N Law's suggestion in its reply (Doc. 360 at 3), the party bringing an antitrust claim must show that the *Noerr* doctrine does not apply, *see* *McGuire Oil Co., 958 F.2d at 1559 n.9, 1560* (quoting Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and their Application* § 203.4c (Supp. 1990)).

In an effort to meet its burden here, M&N Law seeks to invoke the "sham litigation" exception to the *Noerr* doctrine. *Andrx Pharms., 421 F.3d at 1233* (citing *Prof'l Real Estate Invs., Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 56, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*). That exception is directed at parties "whose activities are not genuinely aimed at procuring favorable government action" but instead are a mere pretext "to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor." *McGuire Oil Co., 958 F.2d at 1559* (internal quotation marks and citations omitted).

To fall within the ambit of the sham litigation exception, (1) the claim or lawsuit at issue must be "objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits;" and (2) "the party bringing the allegedly baseless [claim or] suit did so with **[*22]** a subjective motivation . . . to interfere directly with the business relationships of a competitor." *Andrx Pharms., 421 F.3d at 1234* (quoting *Prof'l Real Estate Invs., 508 U.S. at 60-61*) (internal quotation marks omitted). This two-prong analysis requires the party relying on *Noerr*'s sham litigation exception "to disprove the challenged lawsuit's *legal* viability before the court will entertain evidence of the suit's *economic* viability." *In re Terazosin Hydrochloride Antitrust Litig., 335 F. Supp. 2d 1336, 1357 (S.D. Fla. 2004)* (quoting *Prof'l Real Estate Invs., 508 U.S. at 61* (emphasis in original)).

The sham litigation exception's first prong is judged against a standard of probable cause and asks whether, at the time the challenged litigation was initiated, the party bringing the lawsuit had at least a "reasonable belief" that there was a chance that its claim(s) "may be held valid upon adjudication." *Prof'l Real Estate Invs., 508 U.S at 62-63, 65* (internal quotation marks and citations omitted). This standard does not require a winning claim(s), nor does it demand the support of established case law, as long as the party who filed the action can make an "objective[ ] good faith argument for the extension, modification, or reversal of existing law." *Id. at 65* (internal quotation marks and citation omitted). Courts must be mindful in this regard that "'[e]ven when the law or the facts appear questionable or unfavorable at the outset, a party **[*23]** may have an entirely reasonable ground for bringing suit.'" *Id. at 60 n.5* (citation omitted). Only if the party invoking the sham litigation exception demonstrates that the challenged legal proceeding "was objectively baseless or frivolous" need the court move to the next part of the analysis. *Id. at 61, 65*.

Under the sham litigation exception's second prong, courts must "entertain evidence" of the party's "economic motivations in bringing suit," such as whether it "was indifferent to the outcome on the merits" of its claim(s); whether any damages for its claim(s) "would be too low to justify [its] investment in the suit;" or whether it "decided to sue primarily for the benefit of collateral injuries inflicted through the use of [the] legal process." *Id. at 61, 65, 66*. In evaluating these considerations, courts must focus not on the ill will or animosity that might motivate the action but on whether the suing party sought to use the process of litigation, rather than the outcome, "as an anticompetitive weapon." *Id. at 59, 61*; *see also* *id. at 69* (Stevens, J., concurring in judgment) ("We may presume that every litigant intends harm to his adversary."). The "difficulty" of proving subjective motivation under the sham litigation's second prong "obviously **[*24]** 'places a heavy thumb on the scale' in favor of granting protection" under the *Noerr-Pennington* doctrine. *Campbell v. Penn. Sch.ham Bds. Ass'n, 972 F.3d 213, 219 (3d Cir. 2020)* (citation omitted). Ultimately, the party invoking *Noerr*'s sham litigation exception bears the burden of demonstrating that both prongs have been satisfied. *McGuire Oil Co., 958 F.2d at 1560*; *In re Terazosin, 335 F. Supp. 2d at 1356* (citation omitted); *see also* *Campbell, 972 F.3d at 221*.

M&N Law does not make such a showing with respect to Wyndham's lawsuit here. As discussed above, Wyndham asserts four claims in its complaint against M&N Law: (1) false and misleading advertising and contributory false advertising under the Lanham Act; (2) tortious interference with contractual relations; (3) civil conspiracy; and (4) a violation of the FDUTPA. (Doc. 1 at 46-70). In support of these claims, Wyndham sets forth in its complaint a lengthy and detailed recitation of averments chronicling the Defendants' reported involvement in the above-described timeshare exit scheme, which Wyndham buttresses by way of exhibits attached to its complaint, *see, e.g.*, (Docs. 1-2, 1-16, 1-19-1-24), as well as by various declarations it has submitted to the Court since the inception of the lawsuit, *see, e.g.*, (Docs. 100-3, 100-5-100-9, 377-1). This evidence alone undermines M&N Law's contention that Wyndham's lawsuit **[*25]** is objectively baseless or frivolous.

Solely by way of illustration, Exhibit 1 to Wyndham's complaint provides an organizational chart depicting M&N Law's relationship and contributions to the Defendants' purported fraud that forms the basis for Wyndham's claims. (Doc. 1-2). The declaration of attorney Mary Clapp, filed with Wyndham's response to M&N Law's motion to dismiss soon after this litigation commenced, adds greater detail to the innerworkings of the Defendants' alleged scam from the perspective of a lawyer who separated herself from the Defendants due to her concerns over the legitimacy of the Defendants' enterprise. (Doc. 100-9); *see also* (Docs. 100-7, 100-8). In another declaration, a Wyndham employee—James Ward—represents that Wyndham had "received and reviewed" 124 dunning letters from M&N Law, which demonstrates Wyndham's familiarity with M&N Law's representation of timeshare owners. (Doc. 100-6). And in still two other declarations, Jeffrey Chavez, who appears to be a former associate of the Defendants' operations, avers that he "received complaints from many . . . timeshare owners that M&N Law[, among others,] failed to provide any actual services to assist them in exiting **[*26]** their timeshare contracts." (Docs. 100-3, 100-5).

M&N Law's attempt to counter this evidence by including with its motion the affidavits of Messrs. Montgomery and Newcomb is unavailing. (Docs. 353-8, 353-9). At most, these affidavits raise a possible factual dispute as to whether Wyndham could prove some of the elements of one or more of its claims at a trial on the merits. They certainly do not make the requisite showing that Wyndham lacked a "reasonable belief" when it commenced this action that there was a chance that its claims "may be held valid upon adjudication." *Prof'l Real Estate Invs., 508 U.S. at 62-63, 65*.

M&N Law's assertion that Wyndham's lawsuit is objectively baseless or frivolous is further undermined by the fact that M&N Law's efforts throughout this litigation to attack the legal sufficiency of Wyndham's causes of action have proven futile. By way of example, in response to the Defendants' prior challenge to Wyndham's tortious interference and civil conspiracy-related allegations, the Court found that Wyndham's averments adequately stated claims upon which relief could be granted. (Doc. 144). The Court also denied M&N Law's recent motion for summary judgment on Wyndham's Lanham Act claim based on the Eleventh Circuit's **[*27]** decision in *Duty Free Americas*. (Doc. 336).[7]

Undeterred, M&N Law now asserts that Wyndham's FDUTPA claim is legally infirm as well and cites *Club Exploria, LLC v. Aaronson, Austin, P.A., 2020 U.S. Dist. LEXIS 210098, 2020 WL 6585802 (M.D. Fla. 2020)* in support of its position. (Doc. 360 at 4). Putting aside the fact that M&N Law's challenge to this FDUTPA claim pertains to only one portion of Wyndham's lawsuit, M&N Law's reliance on *Club Exploria* is misplaced. In *Club Exploria*, a timeshare exit attorney moved for summary judgment on a FDUTPA claim brought by a timeshare developer. *2020 U.S. Dist. LEXIS 210098, 2020 WL 6585802, at *1*. In addressing that motion, the court noted that "[l]awyers are not *per se* exempt from FDUTPA" and explained that whether a lawyer can be held liable under the FDUTPA for timeshare exit activity turns "on the specific conduct at issue." *2020 U.S. Dist. LEXIS 210098, [WL] at *7* (citations omitted). After analyzing the matter, the court granted the timeshare exit attorney's summary judgment motion, concluding that the timeshare developer had failed to satisfy the elements of a FDUTPA claim given the evidence presented at that stage of the case. *2020 U.S. Dist. LEXIS 210098, [WL] at *8*. Nowhere in the court's opinion, however, did it intimate, much less hold, that the timeshare developer's FDUTPA claim was "objectively baseless" from the outset. Quite the opposite. The court denied an earlier motion **[*28]** by the timeshare exit attorney to dismiss that cause of action, finding that it stated a claim upon which relief could be granted. *See Club Exploria, 2019 U.S. Dist. LEXIS 47139, 2019 WL 1297964, at *6 (M.D. Fla. Mar. 21, 2019)*. Other courts in this District have likewise determined that a lawyer's timeshare exit activity can be actionable under the FDUTPA in circumstances akin to those present in this case. *See, e.g., Wyndham Vacation Ownership, Inc. v. Clapp Business Law, LLC, 411 F. Supp. 3d 1310, 1320 (M.D. Fla. 2019)*; *Westgate Resorts, Ltd. v. Sussman, 387 F. Supp. 3d 1318, 1365 (M.D. Fla. 2019)*;

---

[7] It should be noted that the Southern District of Florida similarly rejected M&N Law's challenges to Wyndham's identical tortious interference, civil conspiracy, and Lanham Act causes of action in the *Bluegreen Vacations* case. *See Bluegreen Vacations*, Case No. 1:19-cv-24704-JEM, (Doc. 69) (S.D. Fla. Nov. 20, 2020).

Wyndham Vacation Ownership, Inc. v. Miller, 2019 U.S. Dist. LEXIS 186597, 2019 WL 5394074, at *8 (M.D. Fla. Oct. 11, 2019).

Not only does M&N Law fall well short of satisfying the first prong of the sham litigation exception, which alone is dispositive of its preliminary injunction motion, Prof'l Real Estate Invs., 508 U.S. at 65, it also does not establish the exception's second prong—namely, that Wyndham brought this action with the subjective motivation of using the litigation "as an anticompetitive weapon," id. at 61 (citation omitted). Applying the above considerations articulated by the Supreme Court in *Professional Real Estate Investors*, M&N Law does not demonstrate, for example, that Wyndham is indifferent to the outcome of this litigation, id. at 65, particularly given Wyndham's vigorous prosecution of the matter and the fact that it has promptly sought default judgments against M&N Law's delinquent co-Defendants, *see* (Docs. 290, 330). Nor does M&N Law argue, must less show, that the damages Wyndham seeks in this action are **[*29]** "too low to justify [its] investment in the suit." Prof'l Real Estate Invs., 508 U.S. at 65. Further, M&N Law's conclusory and attenuated allegations regarding Wyndham's motivations in pursuing this action do not provide the Court with an adequate factual basis upon which to conclude that Wyndham elected "to sue [M&N Law] primarily for the benefit of collateral injuries inflicted through the use of [the] legal process." *Id.; see also* Or. Nat. Res. Council v. Mohla, 944 F.2d 531, 533 (9th Cir. 1991) ("Conclusory allegations are not sufficient to strip a defendant's activities of *Noerr-Pennington* protection.") (citation omitted). M&N Law's suggestion in its motion notwithstanding, nothing in *Professional Real Estate Investors* indicates that the sham exception's subjective intent requirement can be met simply by pointing to evidence that other persons in the timeshare industry (such as members of ARDA) may have taken steps to stop other timeshare exit actors' allegedly illicit conduct. *See* Prof'l Real Estate Invs., 508 U.S. at 62-66; *see also* McGuire Oil Co., 958 F.2d at 1560 ("[I]t is axiomatic that actions taken with an anti-competitive purpose or intent remain insulated from antitrust liability under the *Noerr-Pennington* doctrine.") (citations omitted).

Because M&N Law fails to clearly establish a substantial likelihood that it can meet both prongs of the sham **[*30]** litigation exception and thus that Wyndham's Sherman Act claim is not entitled to Noerr immunity, M&N Law's motion for a preliminary injunction cannot stand. *See* Jes Props., Inc. v. USA Equestrian, Inc., 458 F.3d 1224, 1228 (11th Cir. 2006) (citing Levine v. Cent. Fla. Med. Affs., Inc., 72 F.3d 1538, 1545 (11th Cir. 1996)). Even were that not the case, M&N Law's motion suffers from a number of other defects, the first of which pertains to the issue of standing.

It is well established that a private plaintiff seeking damages or injunctive relief under the antitrust laws must show that it has standing to sue. Fla. Seed Co. v. Monsanto Co., 105 F.3d 1372, 1374 (11th Cir. 1997). Standing in an antitrust case, however, "involves more than the 'case or controversy' requirement that drives constitutional standing." Todorov, 921 F.2d at 1448 (citations omitted). Instead, a party asserting claims under the antitrust laws must prove both that it has suffered an "antitrust injury" and that it "is an efficient enforcer of the antitrust laws." Id. at 1449.

To satisfy the first element, a plaintiff must demonstrate that it has sustained an injury "the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful." Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977). In other words, a "plaintiff[ ] must plead and prove that the injury [it] ha[s] suffered derives from some anticompetitive conduct." Todorov, 921 F.2d at 1450. This showing "ensures that the plaintiff, although motivated **[*31]** by private interests, is seeking to vindicate the type of injury to the public that the antitrust laws were designed to prevent," i.e., harm to competition and consumers, not mere harm to competitors or other third parties. Sunbeam Tele. Corp. v. Nielsen Media Rsch., Inc., 711 F.3d 1264, 1271 n.16 (11th Cir. 2013) (citation omitted); *see also* Spanish Broad. Sys. of Fla., Inc. v. Clear Channel Commc'ns, Inc., 376 F.3d 1065, 1071 (11th Cir. 2004) (explaining that an "antitrust plaintiff must show harm to competition in general, rather than merely damage to an individual competitor").

As for the second element, a plaintiff must essentially demonstrate "that it is a customer or competitor in the relevant antitrust market." Fla. Seed Co., 105 F.3d at 1374 (citing Assc'd Gen. Contrs. of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 539, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)); *see also Palmyra Park Hosp., Inc. v. Phoebe Putney Mem'l Hosp., 604 F.3d 1291, 1299 (11th Cir. 2010)* (gathering nonexclusive list of factors courts sometimes employ in analyzing the second prong of antitrust standing) (citation omitted).[8] The purpose of this element is to make certain that a "particular plaintiff will efficiently vindicate the goals of the antitrust laws." Todorov, 921 F.2d at 1452.

In the end, the party bringing an antitrust claim bears the burden of demonstrating that it meets both of the above elements. Fla. Seed Co., 105 F.3d at 1374 (citations omitted). In deciding whether it has done so, courts look to the allegations contained in the operative pleading. Todorov, 921 F.3d at 1448 (citing Austin v. Blue Cross & Blue Shield of Ala., 903 F.3d 1385, 1387 (11th Cir. 1990)); *see also* Feldman v. Am. Dawn, Inc., 849 F.3d 1333, 1341 (11th Cir. 2017) (finding plaintiff lacked antitrust standing to challenge conduct not alleged in his complaint). **[*32]**

Looking to the relevant allegations here, M&N Law avers in its Sherman Act counterclaim that Wyndham and Bluegreen Vacations agreed to sue M&N Law to "decrease competition in the timeshare industry" and to "increase Wyndham['s] monopoly power." (Doc. 342 at 29). As alluded to previously, M&N Law also avers that it has been "directly harmed" by Wyndham's lawsuit because it has had to spend money to defend itself in this action; its cost of business has increased, including the price of its malpractice insurance, and "its ability to assist customers has decreased;" and it "has suffered reputational harm and injury[ ] and has received fewer clients." *Id.* at 31. In support of these assertions, M&N Law relies on Mr. Newcomb's representations in his affidavit that, among other things, he "believe[s]" his last malpractice insurance quote was as high as "maybe about $26,250.00 per year," and that he "would be shocked if [Wyndham's discovery efforts] did not cause a decline in M&N Law's business." (Doc. 353-9 at 2-3).

These conclusory and unsubstantiated allegations do not meet the first prong of the antitrust standing inquiry—namely, that M&N Law has suffered the type of harm the antitrust laws were designed **[*33]** to prevent. New Vision Eye Ctr., LLC v. Fla. Eye Inst., PA, 2010 U.S. Dist. LEXIS 163033, 2010 WL 11602458, at *2 (S.D. Fla. Mar. 23, 2010) ("A motion for preliminary injunction must be supported by evidence; a party is not entitled to preliminary injunctive relief 'solely on the basis of its naked allegations.'") (quoting Church of Scientology Flag Serv. Org. v. City of Clearwater, 777 F.2d 598, 608 (11th Cir. 1985)). There is no assertion made by M&N Law in its operative pleading, for example, that this lawsuit has actually caused a reduction in competition in Wyndham's line of business (i.e., the development and selling of timeshares) or in M&N Law's legal industry. Nor does M&N Law provide a sufficient factual basis in its operative pleading for its contention that Wyndham and Bluegreen Vacations's legal actions against M&N Law have "increase[d] [Wyndham's] monopoly power," rather than that of Bluegreen Vacations, or any other timeshare developer for that matter. Instead, M&N Law complains only of speculative harm to its business interests, which the Eleventh Circuit has rejected as insufficient to establish a cognizable antitrust injury. Spanish Broad., 376 F.3d at 1069 (citing Am. Key Corp. v. Cole Nat'l Corp., 762 F.2d 1569, 1579 n.8 (11th Cir. 1985)); Andela v. Univ. of Miami, 692 F. Supp. 2d 1356, 1375 (S.D. Fla. 2010) ("It is axiomatic that antitrust laws aim to protect competition, not competitors.").

Perhaps recognizing that its allegations do not satisfy the first prong of the standing analysis, M&N Law avers for the first time in its motion that Wyndham's "anti-competitive **[*34]** conduct is keeping timeshare prices artificially high by restricting supply." (Doc. 353 at 18). Putting aside the fact that this averment is not mentioned anywhere in M&N Law's operative pleading, *see* (Doc. 342 at 26-32), M&N Law does not explain how such conduct would harm the primary and/or secondary market(s) for timeshare interests, which—it appears—is the gist of its newly revised theory. This omission is especially notable since M&N Law makes seemingly conflicting claims in its motion about the impact of Wyndham's purportedly predatory conduct. Specifically, M&N Law asserts, on the one hand, that its customers are motivated by the low resale value of their Wyndham timeshares while, on the other hand, Wyndham's lawsuit somehow harms these same consumers by inflating Wyndham's timeshare prices. (Doc. 342 at 15). M&N Law also fails to demonstrate how its proposed relief—an injunction or a stay—would meaningfully

[8] There is Eleventh Circuit case authority that where a plaintiff seeks only injunctive relief under section 16 of the Clayton Act, the showing required to establish the second element of the standing analysis is generally "less demanding" than under section 4 of the Clayton Act. Todorov, 921 F.2d at 1452. The Court need not resolve what showing this decisional law might require of M&N Law here because, as explained below, M&N Law has not satisfied the first prong of the antitrust standing inquiry or established that it will likely prevail on the principal elements of its Sherman Act counterclaim.

advance the fiscal interests of timeshare owners, as opposed to merely the firm's economic prospects. Because M&N Law does not clearly establish a substantial likelihood that it can meet the first prong of the antitrust standing analysis, its motion for a preliminary injunction **[*35]** fails on that ground as well.[9]

In addition to the above issues, there are other reasons to doubt the merits of M&N Law's Sherman Act counterclaim, including whether it can satisfy the elements of such a cause of action. As explained at the outset, *section 1* of the Sherman Act prohibits, in pertinent part, "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. "Despite the different terminology . . . . [c]ourts use the words 'contract,' 'combination,' and 'conspiracy' interchangeably." *Tidmore Oil Co., Inc. v. BP Oil Co., 932 F.2d 1384, 1388 (11th Cir. 1991)* (citation omitted). In essence, the "common element to a 'contract, combination . . ., or conspiracy' is a requirement of concerted action" on the part of the defendants. *Procaps S.A. v. Patheon, Inc., 845 F.3d 1072, 1080 (11th Cir. 2016)* (citing *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 767-68, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*). The "crucial question" for claims predicated on *section 1* "'is whether the challenged anticompetitive conduct stems from [an] independent decision or from an agreement, tacit or express.'" *Quality Auto, 917 F.3d at 1249* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 554, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*); *Spanish Broad., 376 F.3d at 1071* ("Section [1] applies only to agreements between two or more businesses; it does not cover unilateral conduct.") (citing *Fisher v. City of Berkeley, 475 U.S. 260, 266, 106 S. Ct. 1045, 89 L. Ed. 2d 206 (1986)*).

It is well settled in this regard that "conduct that is as consistent with permissible competition as with illegal conspiracy does not, **[*36]** without more, support even an inference of conspiracy" in violation of the antitrust laws. *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 597 n.21, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* (citing *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 763-64, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*). Indeed, the Eleventh Circuit has observed that "evidence of conscious parallelism alone does not permit an inference of conspiracy unless the plaintiff either establishes that, assuming there is no conspiracy, each defendant engaging in the parallel action acted contrary to its economic self-interest, or offers other 'plus factors' tending to establish that the defendants were . . . in a collusive agreement to fix prices or otherwise restrain trade." *Quality Auto, 917 F.3d at 1261* (quoting *City of Tuscaloosa v. Harcros Chems., Inc., 158 F.3d 548, 570-71 (11th Cir. 1998)*) (internal quotation marks omitted). Plus factor evidence is evidence that "tend[s] to exclude the possibility that the [challenged parties] merely were engaged in lawful conscious parallelism." *Harcros Chems., 158 F.3d at 572*. Evidence does not cross this threshold if it would require a factfinder either to "engage in speculation and conjecture to such a degree as to render [his or her] finding a guess or mere possibility," or to base a conclusion of conspiracy on "fallacious reasoning." *Williamson Oil Co., Inc. v. Philip Morris USA, 346 F.3d 1287, 1302 (11th Cir. 2003)* (internal quotation marks and citation omitted).

As previously discussed, to bolster its claim that Wyndham and Bluegreen Vacations have illegally acted in concert in suing **[*37]** it, M&N Law notes that both entities employ the same attorneys, have used similar complaints in their respective actions against M&N Law, and have alleged identical causes of action. (Doc. 342 at 26-29). Moreover, M&N Law points out that Wyndham and Bluegreen Vacations belong to a trade association for persons involved in the timeshare industry and that some unknown members of this association have, at some unspecified time, agreed to sue certain unidentified persons committing certain timeshare exit frauds to "decrease competition among them." *Id.* at 29-30. M&N Law further contends that the trade group's goal is to "raise all of their pricing power on timeshares." *Id.*

These averments do not clearly show that M&N Law is substantially likely to establish the threshold element of "concerted" action necessary to sustain its Sherman Act counterclaim. Indeed, they appear to amount to nothing more than the type of alleged "parallel conduct" and "bare assertion of conspiracy" that the Supreme Court and the

[9] Because M&N Law does not satisfy the antitrust injury element and—as discussed below—also does not meet its burden on the merits of its Sherman Act counterclaim, the Court need not resolve whether it can establish the second element of the antitrust standing inquiry. *See* *Levine, 72 F.3d at 1545*. I note only that an evaluation of the second element can be much more involved than an assessment of the first element and would necessitate a far more extended discussion, particularly given M&N Law's apparently evolving theories behind its Sherman Act counterclaim. *See* ***Palmyra Park, 604 F.3d at 1299*** (citation omitted).

Eleventh Circuit have routinely rejected in Sherman Act cases. *See* Twombly, 550 U.S. at 556-57; Quality Auto, 917 F.3d at 1261-62 (citations omitted). Notably, M&N Law does not present sufficient facts outlining the parameters of Wyndham's supposed conspiratorial agreement **[*38]** with Bluegreen Vacations, or the nature of the illicit communications and activities—if any—in which these two timeshare entities participated with one another or other unknown members of the timeshare trade association. Despite M&N Law's suggestion to the contrary, the fact that Wyndham and Bluegreen Vacations may be members of a trade group is not enough "to exclude the possibility that [they] were engaged in lawful conscious parallelism." Harcros Chems., 158 F.3d at 572; *see also* Am. Dental Ass'n v. Cigna Corp., 605 F.3d 1283, 1295 (11th Cir. 2010) (finding it "well-settled" that the mere "participation in trade organizations provides no indication of conspiracy") (citations omitted); Parker Auto Body Inc. v. State Farm Mut. Auto. Ins. Co., 171 F. Supp. 3d 1274, 1285 (M.D. Fla. 2016) ("[P]articipation in trade associations and similar organizations provides no indication of conspiracy.") (citation omitted). The same can be said of the fact that Wyndham and Bluegreen Vacations's utilize the same law firm, since "the mere *opportunity* to conspire . . . does not tend to exclude the possibility that [the defendants] did not avail themselves of such opportunity or, conversely, that they actually did conspire." Williamson Oil Co., 346 F.3d at 1319 (emphasis added; internal quotation marks and citation omitted).[10]

The exhibits M&N Law attaches to its preliminary injunction motion do not cure this deficiency. By way of **[*39]** example, the declarations tendered by Messrs. Montgomery and Newcomb simply parrot the legally insufficient allegations recited above that underlie M&N Law's Sherman Act counterclaim. And purely because they make broad, conclusory assertions that they are the target of an alleged unlawful conspiracy does not make it so. It is equally possible that Wyndham and Bluegreen Vacations have filed actions against M&N Law because they each recognized that mitigating fraud in the timeshare industry promotes their customers' welfare, engenders consumer loyalty, and reallocates negative externalities created by timeshare exit scams.

Nor am I persuaded by the letter that Mr. Montgomery asserts he received from a timeshare trade association "trustee," in which this "trustee" represented that the trade group's "mission [in 2019 was] to eradicate timeshare exit firms." (Doc. 353-8 at 13). Not only does M&N Law neglect to explain the origins of this letter or the relationship between its drafter and the trade association, but the letter itself does not mention Wyndham or Bluegreen Vacations or reference their litigation activities. *Id.* M&N Law offers no concrete evidence demonstrating that this third **[*40]** party's claim about the association's "mission" specifically relates to Wyndham's supposed agreement to sue M&N Law in the year before the letter was even sent or to continue the litigation after the year's "mission" had ended. *See* Am. Contrs. Supply, LLC v. HD Supply Constr. Supply, Ltd., 989 F.3d 1224, 1234 (11th Cir. 2021) (observing that evidence of an illicit conspiracy must exceed equivocation and "tend to exclude the inference of independent action") (internal quotation marks and citation omitted).

M&N Law's reliance on another timeshare exit attorney's affidavit which was filed in a different case is similarly unavailing. In that declaration, the lawyer states he attended a conference sponsored by the trade association in March 2017, where he "learned that some resorts and their lawyers [were] intent upon suing all those associated with [timeshare] exits, including lawyers representing timeshare owners and exit companies." (Doc. 353-6 at 6). As with the trustee letter, the lawyer's affidavit does not reference Wyndham or Bluegreen Vacations, much less an agreement between the two entities to sue M&N Law in contravention of the antitrust laws. *See* Am. Contrs. Supply, 989 F.3d at 1234. In fact, the affidavit does not suggest any agreement at all, just that the attorney perceived some of the trade group's **[*41]** members to share a general attitude towards actors in the timeshare exit business.

In sum, based on the allegations and evidence currently before the Court, M&N Law has not made the requisite showing in support of its preliminary injunction motion that Wyndham's instant lawsuit stems from a contract, combination, or conspiracy to restrain trade or commerce in violation of the Sherman Act. This deficiency provides yet another basis for denying M&N Law's motion.

---

[10] I also note that M&N Law does not attempt to refute Wyndham's rejoinder that it and Bluegreen Vacations retained the same lawyers because of the quality of the attorneys' work and the cost-savings involved. (Doc. 355 at 10 n.4). Wyndham's other rejoinder—that the tortious conduct at issue in both lawsuits is the same—appears well-taken and likewise stands unrebutted. *Id.*

M&N Law's Sherman Act counterclaim faces additional headwinds as well. As noted previously, the Supreme Court has long recognized that the Sherman Act "outlaw[s] only *unreasonable* restraints" on trade. *Ohio v. Am. Exp. Co., 585 U.S. __, 138 S. Ct. 2274, 2283 (2018)* (emphasis added) (quoting *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*). To determine whether a given restraint rises to this level, courts "presumptively" apply a "rule of reason analysis." *Nat'l Coll. Athletic Ass'n v. Alston, 594 U.S. __, 141 S. Ct. 2141, 2151 (2021)* (citations omitted). This analysis "generally requires a court to 'conduct a fact specific assessment of market power and market structure' to assess a challenged restraint's 'actual effect on competition.'" *Id.* (quoting *Am. Exp. Co.*, 138 S. Ct. at 2284); *see also Levine, 72 F.3d at 1546* (explaining the rule of reason requires that courts "engage in a comprehensive analysis of the agreement's purpose and effect to determine whether it unreasonably restrains competition") **[*42]** (citation omitted).

To satisfy this test, a Sherman Act plaintiff must prove that (1) the defendant's challenged actions have an anticompetitive effect on the relevant market, and (2) such actions also have no pro-competitive benefit or justification. *Spanish Broad., 376 F.3d at 1071* (citing *Levine, 72 F.3d at 1551*). To establish the first prong, a plaintiff may demonstrate either that the defendant's "'behavior had an actual detrimental effect on competition, or that the behavior has the potential for genuine adverse effects on competition.'" *Id.* Actual harm in this context "is indicated by a factual connection between the alleged harmful conduct and its impact on competition in the market," as evidenced by "specific damages done to consumers in the market." *Jacobs v. Tempur-Pedic Int'l, Inc., 626 F.3d 1327, 1339 (11th Cir. 2010)* (internal quotation marks and citation omitted). Actual anticompetitive harm includes reductions in output, increases in price, or deteriorations in quality, although "consumer welfare, understood in the sense of allocative efficiency, is the animating concern of the Sherman Act." *Id.* (citations omitted).

In addition to proving an actual or potential harm to competition, a plaintiff must also delineate under the first prong the "relevant market" in which the harm occurs, as well as a causal connection between **[*43]** the defendant's presence in that market and the alleged harm. *Id.; see also Am. Exp. Co.*, 138 S. Ct. at 2285 (recognizing that "courts usually cannot properly apply the rule of reason without an accurate definition of the relevant market," since, without a known market, "there is no way to measure [the defendant's] ability to lessen or destroy competition") (internal quotation marks and citations omitted). For purposes of this analysis, the relevant market is defined as "both (1) a geographic market and (2) a product [or service] market." *Jacobs, 626 F.3d at 1336* (citation omitted). The plaintiff "must present enough information in [its operative pleading] to plausibly suggest the contours of the relevant geographic and product [or service] markets." *Id.*

Once the plaintiff satisfies its initial burden of demonstrating that the challenged restraint has a substantial anticompetitive effect, "the burden then 'shifts to the defendant to show a procompetitive rationale for the [alleged] restraint.'" *Alston*, 141 S. Ct. at 2160 (citing *Am. Exp. Co.*, 138 S. Ct. at 2284). "If the defendant can make that showing, 'the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies [touted by the defendant] could be reasonably achieved through less anticompetitive means.'" *Id.* Overall, **[*44]** the Court's use of this multi-step inquiry into the reasonableness of the defendant's conduct should involve a weighing of "all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* (internal quotation marks and citation omitted). In this regard, the Court must consider other particular information about the relevant business, as well as "the restraint's history, nature, and effect." *Id.* (internal quotation marks and citation omitted).

As M&N Law points out, the Supreme Court has concluded there are "some agreements among competitors [that] so obviously threaten to reduce output and raise prices that they might be condemned as unlawful *per se* or rejected only after a quick look." *Alston*, 141 S. Ct. at 2156 (citations omitted); *see also Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 692 (1978)* (explaining that the *per se* rule applies only to those agreements that are "so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality"). The Supreme Court has endorsed the utilization of the so-called "quick look" test in those relatively rare situations where "an observer with even a rudimentary understanding of economics could conclude **[*45]** that the arrangements in question would have an anticompetitive effect on customers and markets." *Cal. Dental Ass'n v. Fed. Trade Comm'n, 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*. In this narrow category of cases, "the great likelihood of anticompetitive effects can easily be ascertained" from the circumstances in which the agreements exist, *id.*, such "that they might be condemned . . . or rejected after only a quick look," *Alston*, 141 S. Ct. at 2156 (citations omitted).

The "quick look" test does not apply, however, "where . . . any anticompetitive effects of given restraints are far from intuitively obvious." *Cal. Dental, 526 U.S. at 759*. Indeed, the Supreme Court has warned lower courts that they must "take special care" not to deploy this type of abbreviated approach "until [they] have amassed 'considerable experience with the type of restrain[t] at issue' and 'can predict with confidence that it would be invalidated in all or almost all instances.'" *Alston*, 141 S. Ct. at 2156 (citations omitted).

Here, M&N Law contends that the Court should abandon the presumptive rule of reason analysis and instead employ the seldom used quick look test. (Doc. 353 at 16). To justify such a deviation from the norm, M&N Law argues:

> [T]he purpose of [Wyndham's] lawsuit here and lawsuits like it is to drive out of business those dedicated to helping unhappy **[*46]** timeshare owners out of their contracts. In other words, the point of this litigation is to eliminate the unhappy timeshare owner's access to resources relevant to a decision to default, so that the owner is less likely to choose to default and have his or her timeshare interests returned to the market. The litigation is patently anti-competitive because, by keeping these unwanted timeshare interests from becoming part of the available timeshare supply, the timeshare companies are artificially restricting the supply and increasing the market price of timeshares. Moreover, by reducing the risk that timeshare owners will default, [Wyndham's] litigation strategy is also artificially reducing the riskiness of its timeshare financing-backed securities and the amount it must pay investors back in the future based on the securities' coupon rate.

(Doc. 353 at 16-17) (footnote omitted).

M&N Law's argument for the application of the quick look test does not withstand scrutiny. To begin, the "parade of horribles" that M&N Law portrays as emanating from this lawsuit are not alleged anywhere in its operative pleading, which instead focuses mostly, if not entirely, on the toll this litigation has **[*47]** taken on its business interests. *See* (Doc. 342 at 26-32). Nor are some of the firm's other above assertions, like the one pertaining to financing-backed securities and the securities' coupon rate, mentioned in the supporting affidavits attached to its motion. Furthermore, M&N Law offers no factual evidence to demonstrate the veracity of these contentions and the supposedly obvious anticompetitive effects of Wyndham's lawsuit. *See* *Devs. Sur. & Indem. Co. v. Bi-Tech Constr., Inc., 964 F. Supp. 2d 1304, 1309 (S.D. Fla. 2013)* (recognizing that, in seeking a preliminary injunction, the movant must proffer "evidence [that] establishes each of the four prerequisites") (citing *Levi Strauss, 51 F.3d at 985*).

Even putting aside these infirmities, the argument raised in M&N Law's motion—not its Sherman Act counterclaim—carries with it many assumptions about the connection between Wyndham's instant litigation and the primary and/or secondary market(s) for the timeshares at issue. These assumptions include, but are not limited to, that any possible limits on consumer choice in the market for Missouri-based timeshare-specialized attorneys would influence the perceived or actual value of a particular timeshare developer's interests in the national and/or regional primary and/or secondary market(s) for timeshares; that the externalities **[*48]** created by M&N Law's allegedly deceptive practices have had no impact on timeshare prices in those markets; and that there is a demonstrable (and causal) correlation between Wyndham's lawsuit, M&N Law's provision of legal services to timeshare owners, and the price of Wyndham's timeshare-backed securities. *See* *Cal. Dental, 551 U.S. at 779-81* (explaining that the "experience of the market [must be] so clear . . . that a confident conclusion about the principal tendency of a restriction will follow from a quick (or at least quicker) look, in place of a more sedulous one").

Suffice it to say that whatever any "anticompetitive effects" might stem from this lawsuit, they "are far from intuitively obvious." *Id. at 759, 771*; *Procaps, 845 F.3d at 1084 n.3* (finding that the lack of evidence about the challenged anticompetitive conduct in a given market augured against the application of the *per se* or "quick look" approaches). And even if M&N Law has answers to all the above questions, those answers do not appear anywhere in its operative pleading or in its preliminary injunction motion and accompanying exhibits. *Procaps, 845 F.3d at 1084* (finding that a plaintiff must point to specific facts demonstrating harm to competition to meet its burden of showing actual anticompetitive effects and **[*49]** cannot rely on conclusory allegations) (citations omitted).

In sum, the averments and evidence currently before the Court do not clearly demonstrate that M&N Law is substantially likely to succeed on its assertion that even a cursory review of the circumstances surrounding this lawsuit would reveal an unreasonable restraint on trade in violation of the Sherman Act. The absence of such a showing provides an additional reason to deny M&N Law's preliminary injunction motion.

B.

While M&N Law's failure to carry its burden on the substantial likelihood of success requirement is dispositive of its preliminary injunction request, *Church v. City of Huntsville, 30 F.3d 1332, 1342 (11th Cir. 1994)*, the remaining prerequisites for such relief will be addressed here in the interest of completeness, beginning with matter of irreparable harm, *Siegel, 234 F.3d at 1176*.

Harm is deemed to be "irreparable" only if it would occur without the sought-after injunction and only if it cannot be remedied through monetary relief. *See* *Swain v. Junior, 961 F.3d 1276, 1292 (11th Cir. 2020)* (citation omitted); *Cunningham v. Adams, 808 F.2d 815, 821 (11th Cir. 1987)* (citation omitted). A delay in seeking an injunction, however, "weighs strongly against [a] finding of harm." *Malicious Women Candle Co., LLC v. Cox, 506 F. Supp. 3d 1245, 1247 (M.D. Fla. 2020)* (citing *Wreal, 840 F.3d at 1248*).

Applying these legal principles here, I find that M&N Law's alleged harm resulting from Wyndham's lawsuit—which mainly consists of litigation **[*50]** costs and business expenses the firm has already incurred—does not meet the standard of irreparability. As an initial matter, there is no indication that these costs and expenses could not be recouped through a recovery of treble damages or an award of attorneys' fees, both of which M&N Law seeks through its Sherman Act counterclaim.

More importantly, it appears that a fair amount of the harm M&N Law has purportedly suffered to this point—including damage to its reputation—is due, at least in large part, to its own delay in seeking to enjoin Wyndham's lawsuit. As explained above, Wyndham initiated this litigation in December 2018 after a number of timeshare owners, represented by M&N Law, sued Wyndham in Missouri state court. In response to Wyndham's lawsuit, M&N Law's principals made the strategic decision to spar with Wyndham in Missouri and then to contest vigorously Wyndham's efforts to advance this lawsuit, including in responding to Wyndham's discovery requests. It was not until this case had been pending for roughly two-and-a-half years that M&N Law first raised its Sherman Act counterclaim, and several more months passed before the firm sought injunctive relief. Courts in the Eleventh Circuit have **[*51]** displayed little tolerance for such dilatoriness. *See, e.g.,* *Wreal, 840 F.3d at 1248* ("A delay in seeking a preliminary injunction of even only a few months—though not necessarily fatal—militates against a finding of irreparable harm.") (citations omitted); *Roberts v. Swearingen, 2018 U.S. Dist. LEXIS 164839, 2018 WL 4620707, at *2 (M.D. Fla. Sept. 26, 2018)* (collecting case law to buttress the conclusion that a "multi-month delay in seeking injunctive relief strongly militate[d] against a finding of irreparable harm") (citations omitted); *Pippin v. Playboy Ent. Grp., Inc., 2003 U.S. Dist. LEXIS 25415, 2003 WL 21981990, at *2 (M.D. Fla. July 1, 2003)* ("Delay, or too much of it, indicates that a suit or request for injunctive relief is more about gaining an advantage (either a commercial or litigation advantage) than protecting a party from irreparable harm."); *Millennium Funding, Inc. v. 1701 Mgmt. LLC, 2021 U.S. Dist. LEXIS 153554, 2021 WL 3618227, at *10 (S.D. Fla. Aug. 16, 2021)* (recognizing that courts often deny preliminary injunctions that are delayed by more than two months and gathering authority).

Notably, M&N Law does not address the reason for its delay in its preliminary injunction motion or in its reply. Instead, when asked about the matter at the hearing, M&N Law offered only that it had to retain new counsel in June 2020. (Doc. 383 at 24-25). This explanation is insufficient. This Court and other courts all too often see such an excuse given by parties as a convenient crutch to avoid the consequences for failing to proceed **[*52]** in a timely manner, and crediting that proffered rationale here would allow M&N Law to escape any responsibility for not seeking the sought-after relief far earlier in this action. *See, e.g.,* *Tech Traders, LLC v. Insuladd Env't, Ltd., 2018 U.S. Dist. LEXIS 190514, 2018 WL 5830568, at *3 (M.D. Fla. Nov. 7, 2018)* (finding the "financial or practical difficulty" in obtaining legal counsel to facilitate litigation "[was] not an adequate excuse for [a] delay" in seeking injunctive relief); *Badillo v. Playboy Ent. Grp., Inc., 2004 U.S. Dist. LEXIS 8236, 2004 WL 1013372, at *2 (M.D. Fla. Apr. 16, 2004)* (same); *Menudo Int'l, LLC v. In Miami Prod., LLC, 2017 U.S. Dist. LEXIS 179777, 2017 WL 4919222, at *6 (S.D. Fla. Oct. 31, 2017)* (observing that if the plaintiff "was truly being irreparably harmed," it would have acted "swiftly to protect itself," including by hiring new attorneys who would have more zealously advanced its cause) (citations omitted); *cf.* *InVue Sec. Prods. Inc. v. Vanguard Prods. Grp., Inc., 2019 U.S. Dist. LEXIS 167593, 2019 WL 4671143, at *7 (M.D. Fla. July 1, 2019)* (refusing to countenance the argument that the plaintiff needed to further investigate its claim because "then the necessity of moving expeditiously . . . could be brushed away and the irreparable harm prong could be eliminated by a lawyer citing a good faith need to investigate") (internal quotation marks and citations omitted), *report and recommendation adopted*, *2019 U.S. Dist. LEXIS 167591, 2019 WL 4673755 (M.D. Fla. Aug. 15, 2019)*. Moreover, M&N Law retained its current attorney nearly a year prior to filing the instant motion and it does not provide any creditable justification for why it did not promptly seek to amend its counterclaim and pursue an **[*53]** injunction or a stay upon hiring new counsel. *See* *Wreal, 840 F.3d at 1248* (observing that a lack of speedy and urgent action to protect a plaintiff's rights "necessarily undermines a finding of irreparable harm") (citations omitted).

C.

The next requirement for a preliminary injunction—that the threatened harm to the movant outweighs whatever damage the proposed injunction may cause the opposing party—also counsels against granting M&N Law's motion. *Siegel, 234 F.3d at 1176* (citation omitted). The Eleventh Circuit has instructed that courts should exercise great care in entering a preliminary injunction before an entire case has been fully and fairly heard, so as to assure that the power of the court to require or deter action does not create unwarranted harm to the defendant or the public. *Alabama v. U.S. Army Corps of Eng'rs, 424 F.3d 1117, 1128 (11th Cir. 2005)* (citation omitted). Given the above-articulated concerns about the paucity of evidence and legal authority M&N Law has tendered to establish, *inter alia*, the sham litigation exception to the *Noerr-Pennington* doctrine, its standing to bring its Sherman Act counterclaim, the existence of an antitrust agreement between Wyndham and Bluegreen Vacations, and the alleged anticompetitive effects emanating from their challenged conduct, I cannot find that any harm **[*54]** to M&N Law from maintaining the status quo outweighs the damage the proposed preliminary injunction would cause to Wyndham. This conclusion is bolstered by the fact that this case has already been pending for nearly three years, and the dispositive motions deadline is only weeks away. Halting the litigation of Wyndham's causes of action at this late stage of the proceedings would invite more disruption to this protracted matter than is necessary given the possibility of a resolution in the reasonably near future.

D.

The next requirement for a preliminary injunction—that the movant establish that such relief would not disserve or be adverse to the public interest—also weighs against M&N Law. *Siegel, 234 F.3d at 1176* (citation omitted). While M&N Law contends that allowing Wyndham's lawsuit to continue would hinder the firm's ability to provide legal services to dissatisfied timeshare owners, there is not an adequate basis at this point to find that M&N Law has been unable to represent timeshare owners since the initiation of this suit in late 2018 due solely, or even mainly, to this litigation. M&N Law additionally has not demonstrated by way of any case law or other evidence that such a possible harm warrants **[*55]** enjoining Wyndham's litigation efforts at this juncture. *Cf.* *BE&K Constr. Co. v. N.L.R.B., 536 U.S. 516, 532, 122 S. Ct. 2390, 153 L. Ed. 2d 499 (2002)* ("[E]ven unsuccessful but reasonably based suits advance some *First Amendment* interests [because they] allow the public airing of disputed facts . . . and raise matters of public concern.") (internal quotation marks and citations omitted).

In any event, the information and exhibits presently before the Court do not support a finding that M&N Law's interest in providing timeshare-related legal services in Missouri surpasses Wyndham's interest in protecting its business and customers from allegedly deceptive practices and legal professionals. As a result, notwithstanding M&N Law's protestations to the contrary, it has not shown that the balance of harms and the public interest militate in favor of the requested preliminary injunction.

E.

The final requirement for a preliminary injunction—namely, a security bond to protect against an improvidently granted injunction—also remains unsatisfied. Such a bond is mandated by the Clayton Act, which conditions the award of a preliminary injunction "upon the execution of a proper bond," *15 U.S.C. § 26*, and by *Federal Rule of*

Civil Procedure 65, which authorizes the Court to issue a preliminary injunction "only if the movant gives security," *Fed. R. Civ. P. 65(c)*.[11]

Here, M&N Law **[*56]** maintains that it should be allowed to post, at most, a nominal bond on the theory that the sought-after injunction will have very little impact on Wyndham. (Doc. 353 at 4). Even assuming *arguendo* that the Court possesses the discretion to set a nominal bond amount or forgo a bond entirely, M&N Law's argument is unaccompanied by any legal authority or factual support, and thus falls well short of the showing necessary for the Court to authorize such relief under the circumstances presented.[12]

IV.

As noted above, M&N Law alternatively asks the Court to stay Wyndham's prosecution of its causes of action so the Court can devote all its efforts to deciding whether M&N Law will prevail on its Sherman Act counterclaim. (Doc. 353 at 21-22). This request also fails.

It is well settled that a stay represents "an intrusion into the ordinary processes of administration and judicial review." *Nken v. Holder, 556 U.S. 418, 427, 129 S. Ct. 1749, 173 L. Ed. 2d 550 (2009)* (internal quotation marks and citation omitted). As a result, the party seeking a stay bears the burden of demonstrating that the facts at issue justify such relief. *Id. at 433-34* (citations omitted).

Courts typically weigh three factors in determining whether a stay is appropriate: "(1) the stage of the litigation; (2) [any] undue prejudice **[*57]** to the nonmoving party; and (3) [the] simplification of the issues in question." *Prisua Eng'g Corp. v. Samsung Elecs. Co., Ltd., 472 F. Supp. 3d 1183, 1185 (S.D. Fla. 2020)* (citations omitted). If the court determines that a stay will damage others, the moving party must also "make out a clear case of hardship or inequity in being required to go forward." *Fidelity Land Tr. Co. v. Sec. Nat'l Mortg. Co., 905 F. Supp. 2d 1276, 1278 (M.D. Fla. 2012)* (internal quotation marks and citation omitted). The Supreme Court has cautioned, however, that a stay "is not a matter of right, even if irreparable injury might otherwise result to the [movant]." *Nken, 556 U.S. at 427* (internal quotation marks and citation omitted).

In the end, "[t]he decision whether to grant a stay is committed to the district court's sound discretion, and the court is 'given considerable leeway in the exercise of its judgment.'" *Prisua Eng'g Corp., 472 F. Supp. 3d at 1185* (citations omitted). On appeal, a district court's decision to grant or deny a stay is reviewed for an abuse of discretion. *Fed. Trade Comm'n v. Primary Grp., Inc., 713 F. App'x 805, 808 (11th Cir. 2017)* (per curiam) (citations omitted).[13]

Applying these legal principles here, it is evident that a stay is unwarranted given the considerations discussed above relative to M&N Law's request for a preliminary injunction. In addition, M&N Law fails to offer any explanation as to how a stay at this late stage would not lead to inefficiencies in adjudicating this litigation, nor does **[*58]** it provide any proposed timeline for resolving its Sherman Act counterclaim that would allow the Court to assess whether a stay could aid the Court's resolution of Wyndham's much-delayed lawsuit.

---

[11] Local Rules 6.01 and 6.02 also obligate a party to include with its motion "a precise and verified explanation of the amount and form of the required security." *M.D. Fla. R. 6.01(a)*, 6.02(a). M&N Law failed to adhere to this requirement and acknowledged at the hearing that such a failure "could be grounds alone to deny [its] motion." (Doc. 383 at 29). It orally moved, however, for the Court to excuse its noncompliance with these provisions. *Id.* The Court need not address this request given the other infirmities with M&N Law's preliminary injunction motion.

[12] In light of the deficiencies in M&N Law's motion, the Court likewise need not resolve M&N Law's bid to bind the full panoply of parties sanctioned by *Federal Rule of Civil Procedure 65*. I note only that such a request appears to be wanting given M&N Law's unsupported allegations about the other persons involved in Wyndham's alleged conspiracy, and the Eleventh Circuit's directive that an injunction be "'narrowly tailored to fit specific legal violations [so as to] not impose unnecessary burdens on lawful activity.'" *Cumulus Media, 304 F.3d at 1178* (citation omitted).

[13] Unpublished opinions are not considered binding precedent but may be cited as persuasive authority. *11th Cir. R. 36-2*.

M&N Law also does not mention, much less address, any of the above factors, except to assert that it should be awarded a stay because litigating this action will require time and cost money. (Doc. 353 at 21-22). That may be so, but time and money are inevitable concerns in any adversarial proceeding. *Garmendiz v. Capio Partners, LLC, 2017 U.S. Dist. LEXIS 122229, 2017 WL 3208621, at *2 (M.D. Fla. July 26, 2017)* ("[M]any modern courts have held that being required to defend a lawsuit does not constitute a hardship or inequity [to justify a stay of proceedings].") (citation omitted). And M&N Law does not provide the Court with actual financial numbers (or even estimates) that demonstrate "'a clear case of hardship or inequity in being required to go forward.'" *Fidelity Land Tr. Co., 905 F. Supp. 2d at 1278* (citation omitted). Further, M&N Law does not demonstrate how disposing of its Sherman Act counterclaim now—as well as resolving the likely appeal of the Court's decision on M&N Law's injunctive relief request, regardless of the outcome—will save the parties, this Court, or the Eleventh Circuit any time or resources as compared to handling each of the parties' claims **[*59]** at the summary judgment stage in the upcoming months. M&N Law's request for a stay is therefore without merit.

V.

For all these reasons, I respectfully recommend that M&N Law's motion for a preliminary injunction (Doc. 353) be denied.

Respectfully submitted this 18th day of October 2021.

/s/ Christopher P. Tuite

HONORABLE CHRISTOPHER P. TUITE

United States Magistrate Judge

Roohipour v. Blue Cross Blue Shield of Ill.

United States District Court for the Central District of California

October 21, 2021, Decided; October 21, 2021, Filed

CV 21-6434 DSF (GJSx)

Reporter

2021 U.S. Dist. LEXIS 211272 *; 2021 WL 5104383

RAMIN M. ROOHIPOUR, M.D., INC., a California corporation; and R&R SURGICAL INSTITUTE, an unincorporated association, Plaintiffs, v. BLUE CROSS BLUE SHIELD OF ILLINOIS, an Illinois Corporation; and DOES 1 through 20, inclusive, Defendants.

Subsequent History: Dismissed by, in part, Motion denied by, in part *Roohipour v. Blue Cross Blue Shield of Ill., 2022 U.S. Dist. LEXIS 32311 (C.D. Cal., Jan. 13, 2022)*

Counsel: **[*1]** Ramin M. Roohipour, M.D., Inc., a California corporation, Plaintiff, Pro se.

R&R Surgical Institute, an unincorporated association, Plaintiff, Pro se.

For Blue Cross Blue Shield of Illinois, an Illinois corporation, Defendant: Amir Shlesinger, Reed Smith LLP, Los Angeles, CA USA.

Judges: Dale S. Fischer, United States District Judge.

Opinion by: Dale S. Fischer

Opinion

Order GRANTING Motion to Dismiss (Dkt. 10)

Defendant Health Care Services Corporation (HCSC)[1] moves to dismiss Plaintiffs Ramin M. Roohipour, M.D., Inc. and R&R Surgical Institute's (collectively, Plaintiffs) claims for breach of contract, promissory estoppel, intentional and negligent misrepresentation, and violations of *California Business & Professions Code § 17200, et seq.* Dkt. 10 (Mot.). Plaintiffs oppose. Dkt. 12 (Opp'n). The Court deems these matters appropriate for decision without oral argument. See *Fed. R. Civ. P. 78*; Local Rule 7-15. For the reasons stated below, HCSC's Motion is GRANTED.

I. BACKGROUND

[1] HCSC states it was erroneously sued as Blue Cross Blue Shield of Illinois. Mot. at 6. For the purposes of this Order, the Court refers to HCSC rather than BCBS when referring to the allegations in the FAC.

Ramin M. Roohipour, M.D., Inc. is a California corporation, and R&R Surgical Institute is an unincorporated association doing business in California as an ambulatory surgery center. Dkt. 1-2 (FAC) ¶¶ 1-2. HCSC is a health care benefits company. Id. ¶ 3; Mot. at 7. Plaintiffs are out-of-network providers that do not have an express **[*2]** written contract with HCSC to be reimbursed for services based on a negotiated rate. FAC ¶ 9.

Plaintiffs allege HCSC failed to reimburse the claims of three of their patients in violation of California law.

A. Patient A

Plaintiffs allege that prior to Patient A's January 18, 2019 scheduled procedure, Plaintiffs called HCSC[2] to verify whether Patient A was eligible for coverage, as well as to determine the rate at which the plan reimbursed out-of-network claims. Id. ¶ 15. Plaintiffs spoke with an HCSC agent,[3] who "represented that Patient A was eligible for coverage; that "Patient A's plan reimburses out-of-network benefits at 60% of the Maximum Allowable rate; and that Patient A's remaining deductible and out-of-pocket amounts were $0 and $2,354, respectively." Id. Plaintiffs' billing manager "memorialized" this information in a document titled "Insurance Verification." Id.

Plaintiffs' billing manager called HCSC again on January 14, 2019, to determine whether the scheduled procedure required pre-authorization, and HCSC "advised that no authorization was needed." Plaintiffs' billing manager noted this information on a "Pre-Authorization" form. Id. ¶ 16.

Plaintiffs completed the scheduled **[*3]** procedure and subsequently submitted a $10,000 fee claim. Id. ¶¶ 17-18. HCSC sent an explanation of benefits (EOB) issuing $247.04 and leaving Patient A with an out-of-pocket responsibility of $9,752.06. Id. ¶ 18. The EOB stated the amount billed "exceeds the priced amount for this service" but did not state the "priced amount." Id. Plaintiffs appealed the adverse benefit determination, and HCSC upheld its determination. Id. ¶ 20.

HCSC then submitted a $20,000 fee claim, in response to which HCSC sent an EOB with the same explanation that the amount billed "exceeds the priced amount for this service," issuing $117.98 in payment and leaving Patient A with an out-of-pocket responsibility of $19,882.02. Id. ¶ 20. Plaintiffs appealed, but HCSC upheld the determination on the grounds that "the member's benefit office has overridden our allowance and is using their own pricing due to specific account requirements." Id. ¶ 21.

Plaintiffs scheduled a second set of procedures with Patient A for February 4, 2019. Prior to the scheduled date, Plaintiffs called HCSC to verify coverage and confirm that no pre-authorization was needed and received the same information relayed in the prior verification **[*4]** call. Id. ¶¶ 24-25. Plaintiffs' billing manager noted the information contemporaneously. Id. Following these calls, Plaintiffs completed the scheduled procedures for Patient A and submitted a $30,000 claim. Id. ¶¶ 26-27. HCSC issued payment for only $1,286.46, Plaintiffs appealed, and HCSC's response letter explained that the rates used to price or pay for services for out-of-network providers are based on those for in-network providers. Id. ¶ 28. Plaintiffs subsequently submitted a $20,000 claim, for which HCSC issued payment in the amount of $428.82. Plaintiffs appealed, and HCSC upheld its determination on the grounds that "the member's benefit office has overridden our allowance and is using their own pricing due to specific account requirements." Id. ¶¶ 29-30.

Plaintiffs allege that HCSC failed to pay the above fee claims at the "pre-service represented rate." Id. ¶ 31.

B. Patient B

---

[2] Plaintiffs did not allege the date of the first verification call for Patient A, or for several of the verification calls relating to Patients B and C.

[3] Plaintiffs alleged the names of the representatives of HCSC with whom they spoke on each call to verify benefits and pre-authorization requirements. FAC ¶¶ 15, 16, 24, 25, 33, 39, 40, 53, 54.

Plaintiffs allege HCSC failed to pay fee claims for services provided to Patient B on February 18, 2019 and April 22, 2019. For both sets of procedures, Plaintiffs allege they placed verification calls to HCSC, during which HCSC confirmed the following: (1) Patient B was eligible for coverage; (2) Patient **[*5]** B's plan reimburses out-of-network benefits at 50% of the maximum allowable rate; (3) Patient B's deductible and out-of-pocket amounts were $9,000 and $19,650 respectively in February 2019 and $3,445.91 and $14,095.91 respectively in April 2019; (4) Patient B's plan did not have a per-day max-cap for out-of-network facility fee benefits; and (5) no pre-authorization was needed for the April 2019 procedure.[4] Id. ¶¶ 32, 33, 38-40.

Following both sets of procedures, Plaintiffs submitted claims to HCSC, for which HCSC issued payment in the amount of $0. Id. ¶¶ 35, 42, 43. Plaintiffs appealed each adverse determination, and HCSC upheld its determinations. Id. ¶¶ 36, 44-50. Plaintiffs allege that the reasons for the adverse benefit determinations in the EOBs were based on criteria unknown to them, including that "the program requirements as identified by the members [sic] contract have not been fulfilled" and "that the service provided is not covered based on corporate medical policy criteria." See id. ¶¶ 35, 43.

C. Patient C

Plaintiffs allege HCSC failed to pay fee claims for procedures on Patient C scheduled for February 19, 2019. Prior to the scheduled procedures, Plaintiffs placed verification **[*6]** calls to HCSC, during which HCSC "represented that Patient C was eligible for coverage; that Patient C's plan reimburses out-of-network benefits at 60% of the Maximum Allowable rate; that Patient C's remaining deductible and out-of-pocket amounts were $1,000 and $5,900 respectively; and that Patient C's plan did not have a per-day max-cap for out-of-network facility fee benefits." Id. ¶¶ 52-53. HCSC also advised that the specific procedures to be performed on Patient C did not require pre-authorization. Id. ¶¶ 54.

Plaintiffs performed the scheduled procedures on Patient C, and subsequently submitted fee claims, for which HCSC issued only partial payment, explaining that the "program requirements as identified by the members [sic] contract have not been fulfilled." Id. ¶¶ 55-56. Plaintiffs appealed, and HCSC upheld its determination, explaining that "the member's benefit office has overridden our allowance and is using their own pricing due to specific account requirements." Id. ¶ 57. Plaintiffs contend that HCSC "concealed these 'specific account requirements'" during the prior phone calls. Id.

II. LEGAL STANDARD

Rule 12(b)(6) allows an attack on the pleadings for failure to state a claim on which **[*7]** relief can be granted. "[W]hen ruling on a defendant's motion to dismiss, a judge must accept as true all of the factual allegations contained in the complaint." *Erickson v. Pardus, 551 U.S. 89, 94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)* (per curiam). However, a court is "not bound to accept as true a legal conclusion couched as a factual allegation." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). "Nor does a complaint suffice if it tenders 'naked assertion[s]' devoid of 'further factual enhancement.'" Id. (alteration in original) (quoting *Twombly, 550 U.S. at 557*). A complaint must "state a claim to relief that is plausible on its face." *Twombly, 550 U.S. at 570*. This means that the complaint must plead "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. There must be "sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively . . . and factual allegations that are taken as true must plausibly suggest an entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation." *Starr v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011)*.

---

[4] Plaintiffs do not allege they inquired about pre-authorization requirements for the February 2019 procedure.

Ruling on a motion to dismiss will be "a context-specific task that requires the reviewing court to draw on its judicial experience and common **[*8]** sense. But where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged — but it has not 'show[n]' - 'that the pleader is entitled to relief.'" *Iqbal, 556 U.S. at 679* (alteration in original) (citation omitted) (quoting *Fed. R. Civ. P. 8(a)(2)*).

Under *Federal Rule of Civil Procedure 9(b)*, fraud claims must be pleaded with particularity. *Kearns v. Ford Motor Co., 567 F.3d 1120, 1126 (9th Cir. 2009)*. "[A] plaintiff must set forth *more* than the neutral facts necessary to identify the transaction." *In re GlenFed, Inc. Sec. Litig., 42 F.3d 1541, 1548 (9th Cir. 1994)*. Fraud allegations must "be specific enough to give defendants notice of the particular misconduct so that they can defend against the charge and not just deny that they have done anything wrong." *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1106 (9th Cir. 2003)* (citing *Bly-Magee v. California, 236 F.3d 1014, 1019 (9th Cir. 2001)* (internal punctuation omitted)).

As a general rule, leave to amend a complaint that has been dismissed should be freely granted. *Fed. R. Civ. P. 15(a)*.

III. DISCUSSION

A. Breach of Contract

Plaintiffs allege they had an oral contract with HCSC, and that HCSC breached that contract. FAC ¶¶ 60, 64.

"[T]he elements of a cause of action for breach of contract are (1) the existence of the contract, (2) plaintiff's performance or excuse for nonperformance, (3) defendant's breach, and (4) the resulting damages to the plaintiff." *Oasis W. Realty, LLC v. Goldman, 51 Cal. 4th 811, 821, 124 Cal. Rptr. 3d 256, 250 P.3d 1115 (2011)*. "The wrongful, i.e., the unjustified or unexcused, failure **[*9]** to perform a contract is a breach." 1 Witkin, Summary of Cal. Law § 872 (11th ed. 2018).

"To be enforceable under California law, a contract must be sufficiently definite for the court to ascertain the parties' obligations and to determine whether those obligations have been performed or breached." *Sateriale v. R.J. Reynolds Tobacco Co., 697 F.3d 777, 789 (9th Cir. 2012)* (internal quotation marks omitted). "The terms of a contract are reasonably certain if they provide a basis for determining the existence of a breach and for giving an appropriate remedy." *Sateriale, 697 F.3d at 789*.

Plaintiffs allege "an oral contract existed between the parties," FAC ¶ 60, and cite *California Spine & Neurosurgery Inst. v. United Healthcare Servs., Inc., No. 18-CV-2867 PSG (AFM), 2018 U.S. Dist. LEXIS 225961, 2018 WL 6074567, at *3 (C.D. Cal. June 28, 2018)* (denying motion to dismiss breach of contract claim). See Opp'n at 13. In *California Spine*, the plaintiff was an out-of-network health care provider who placed a verification call to the defendant insurance company, during which the insurance company allegedly "promised to pay 75% of the UCR rate until Patient's Max Out of Pocket ("MOOP") expense of $2,000 was met." *California Spine, 2018 U.S. Dist. LEXIS 225961, 2018 WL 6074567, at *1*. In finding the plaintiff had sufficiently alleged an oral contract, the Court stated "[t]he facts alleged include specific names and dates of the calls between Plaintiff and Defendant regarding payment for Patient's services, what the services would be, what was said, **[*10]** and by whom — including that Defendant agreed to pay a specific price: 75% of the UCR rate until Patient's MOOP expense was met, and 100% of the UCR rate afterwards." *2018 U.S. Dist. LEXIS 225961, [WL] at *4*.

Here, as in *California Spine*, Plaintiffs have alleged the names and dates of the calls to HCSC for each of the three patients, including the names of the representatives with whom Plaintiffs spoke. FAC ¶¶15, 16, 24, 25, 33, 39, 40, 53, 54. Plaintiffs alleged they called HCSC first to verify the patients were eligible for insurance benefits, and second to check if pre-authorization was required for the specific procedures. Id. Plaintiffs allege HCSC "represented" it would pay providers for services at the following rates: (1) Patient A at 60% of the max allowable rate; (2) Patient B at 50% of the max allowable rate; and (3) Patient C at 60% of the max allowable rate. FAC ¶ 67.

Plaintiffs also allege HCSC "further represented that preauthorization was not required for the proposed surgeries and that no other relevant pre-service restrictions or requirements applied." Id. ¶ 68.

However, unlike the plaintiffs in *California Spine*, Plaintiffs here do not allege HCSC made a *promise* to pay at the rates determined during the verification calls. Plaintiffs' other **[*11]** cited cases are distinguishable as well because the plaintiffs in those cases adequately alleged that the defendant "promised" or "ensured" payment at the rates discussed on verification calls. See *Out of Network Substance Use Disorder Claims, No. SACV 19-2075 JVS (DFMx), 2020 U.S. Dist. LEXIS 81195, 2020 WL 2114934, at *8 (C.D. Cal. Feb. 21, 2020)* ("Defendants, and each of them, orally promised to pay Plaintiff for the treatment provided to Defendants' insureds"); *Bristol SL Holdings, Inc. v. Cigna Health Life Ins. Co., No. SACV 19-00709 AG (ADSx), 2020 U.S. Dist. LEXIS 76342, 2020 WL 2027955, at *3 (C.D. Cal. Jan. 6, 2020)* ("[Plaintiff's] allegations go beyond a simple pre-authorization or verification and the blanket guarantee that Cigna would cover the treatment . . . [plaintiffs' assignee] was ensured the payment would be made at the previously agreed upon rate.").

While Plaintiffs need not have used the word "promise" in their allegations, they have failed to allege facts that, taken as true, allow the Court to infer that HCSC made a promise to Plaintiffs. For example, while Plaintiffs allege the existence of documents memorializing the information conveyed by representatives of HCSC on the verification calls, Plaintiffs do not allege additional details about the contents of those documents that would allow the Court to infer that HCSC agreed to be bound by the terms allegedly conveyed in the verification calls. Plaintiffs contend in their opposition brief that "the FAC alleges . . . **[*12]** that Defendant *agreed to pay* the specific price of either 60% or 50% of the Allowable rate, after each patients' deductible was met." Opp'n at 14 (emphasis added) (citing FAC ¶¶ 24-25, 39-40, 53-54). This statement is plainly inaccurate; nowhere in the cited paragraphs do Plaintiffs allege that HCSC agreed to pay or promised to pay the rates discussed in the phone calls. See FAC ¶¶ 24-25, 39-40, 53-54.

The Court finds Plaintiffs have not sufficiently alleged an oral contract was formed. The Court GRANTS HCSC's motion as to the breach of contract claim with leave to amend.

B. Promissory Estoppel

The elements of promissory estoppel under California law are "(1) a clear and unambiguous promise; (2) reliance by the party to whom the promise is made; (3) the reliance is both reasonable and foreseeable; and (4) the party asserting estoppel is injured by his reliance." *U.S. Ecology Inc. v. State of California, 129 Cal. App. 4th 887, 901, 28 Cal. Rptr. 3d 894 (2005)*.

Because Plaintiffs have not sufficiently alleged a clear and unambiguous promise, the Court GRANTS HCSC's motion as to the claim for promissory estoppel with leave to amend.

C. Intentional and Negligent Misrepresentation

The elements of a claim for intentional misrepresentation are: (1) misrepresentation, including concealment **[*13]** or nondisclosure; (2) knowledge of the falsity of the misrepresentation; (3) intent to induce reliance; (4) justifiable reliance; and (5) resulting damages. *Chapman v. Skype Inc., 220 Cal. App. 4th 217, 230-31, 162 Cal. Rptr. 3d 864 (2013)*. "The essential elements of a count for negligent misrepresentation are the same except that it does not require knowledge of falsity but instead requires a misrepresentation of fact by a person who has no reasonable grounds for believing it to be true." *Id. at 231*. Both claims are subject to the heightened pleading requirements of *Rule 9(b)*. Claims grounded in fraud, including misrepresentation, must be pleaded with particularity under *Rule 9(b)*. *Avakian v. Wells Fargo Bank, N.A., 827 F. App'x 765, 766 (9th Cir. 2020)* (holding "claims for unfair business practices, intentional misrepresentation, fraud, and negligent misrepresentation are all fraud-based claims, and must meet the heightened pleading requirements of *Rule 9(b) of the Federal Rules of Civil Procedure*.").

The Court finds Plaintiffs have failed to adequately plead misrepresentation. In support of their intentional misrepresentation claim, Plaintiffs merely recite the rates at which HCSC allegedly represented it would pay Plaintiffs for services provided to Patients A, B, and C, and then state "Defendant's representations were false." FAC ¶¶ 74-75. So too for their negligent misrepresentation claim. Id. ¶¶ 82-83. **[*14]** Plaintiffs allege HCSC misrepresented it would pay Plaintiffs the rates that HCSC conveyed during the verification calls because the resulting coverage was allegedly inconsistent with what HCSC communicated during those calls. The Court finds these bare assertions do not state with particularity the alleged falsity.

Plaintiffs' allegations lack key facts to support the claim that HCSC made a misrepresentation. For instance, Plaintiffs do not allege the amount of the maximum allowable rate, nor do they allege that they requested that information from HCSC or that HCSC provided them with an inaccurate rate, for example. Plaintiffs' opposition brief states in a footnote "[a]ccording to appeal response letters from Defendant to Plaintiffs in the present action, the 'Allowable amount' here is commensurate with the 'usual and customary' or 'UCR' rate." Opp'n at 17 n.1. Plaintiffs do not allege this in the FAC. Moreover, the FAC refers to several forms in which the information conveyed by HCSC agents on verification calls were "memorialized," but Plaintiffs do not allege the contents of those forms or what was written down. FAC ¶¶ 15, 16, 24, 25, 33, 39, 40, 53, 54. While it is true that this **[*15]** information may be sought in discovery, *Rule 9(b)* requires misrepresentation claims to be pleaded with particularity, and the FAC falls short of this requirement.

The Court GRANTS HCSC's motion as to the claims for intentional and negligent misrepresentation with leave to amend.

D. Unfair Competition

Plaintiffs' remaining claim alleges a violation of *Business & Professions Code § 17200*, which prohibits "any unlawful, unfair or fraudulent business act or practice." Plaintiffs assert that Defendant "made representations of pre-service requirements, policy terms, benefits promised thereunder, and future amounts payable," and "Defendant further engaged in unfair claims practices by failing to include adequate explanations regarding its adverse claim determinations." FAC ¶ 89. In their opposition, Plaintiffs assert that their claim is based on the "unfair" and "fraudulent" prongs of the UCL.[5] Opp'n at 21.

The UCL does not define the term "unfair," and "the proper definition of 'unfair' conduct against consumers 'is currently in flux' among California courts." *Hodsdon v. Mars, Inc., 891 F.3d 857, 866 (9th Cir. 2018)* (citing *Davis v. HSBC Bank Nev., N.A., 691 F.3d 1152, 1169 (9th Cir. 2012)*. "Before Cel-Tech, courts held that 'unfair' conduct occurs when that practice 'offends an established public policy or when the practice is immoral, unethical, oppressive, **[*16]** unscrupulous or substantially injurious to consumers.'" Id. (quoting *S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 886-887, 85 Cal. Rptr. 2d 301 (1999)* (the South Bay test).

In *Cel-Tech*, the California Supreme Court established a more concrete definition of "unfair" as "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 186-87, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. The *Cel-Tech* court further required that "any finding of unfairness to competitors under *section 17200* be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." Id.

However, the *Cel-Tech* test applied to actions by competitors, not consumers. *Id. at 187 n.12*. "[S]ome courts in California have extended the *Cel-Tech* definition to consumer actions, while others have applied the [South Bay test]." *Davis, 691 F.3d at 1169-70*. In Lozano v. AT&T Wireless Svcs., Inc., the Ninth Circuit held that, "[i]n the

[5] Defendant also asserts Plaintiffs' UCL claim should be dismissed because it is based on underlying claims that are not actionable. Mot. at 16. This argument is inapplicable because Plaintiffs did not base their UCL claim on the unlawful prong.

absence of further clarification by the California Supreme Court," courts can apply either the Cel-Tech or South Bay test. *504 F.3d 718, 736 (9th Cir. 2007)*. In the years following *Cel-Tech*, the California Supreme Court has not "addressed the question whether in actions under the UCL brought on behalf of consumers rather **[*17]** than competitors, the term 'unfair' in the UCL needs to be similarly defined in a more prescribed standard or test, and, if so, what that test should be." *Nationwide Biweekly Admin., Inc. v. Superior Ct. of Alameda Cty., 9 Cal. 5th 279, 303, 261 Cal. Rptr. 3d 713, 462 P.3d 461 (2020)* (declining to determine whether the *Cel-Tech* test applies to consumer actions).

The Court follows the California appellate courts in applying the *Cel-Tech* test. In Gregory v. Albertson's, Inc., the California Court of Appeal noted that Cel-Tech "may signal a narrower interpretation of the prohibition of unfair acts or practices in *all* unfair competition actions and provides reason for caution in relying on the broad language in earlier decisions that the court found to be 'too amorphous.'" *104 Cal. App. 4th 845, 854, 128 Cal. Rptr. 2d 389 (2002)* (emphasis added); see also *Durell v. Sharp Healthcare, 183 Cal. App. 4th 1350, 1365-66, 108 Cal. Rptr. 3d 682 (2010)* (rejecting the "vague test of unfairness" under South Bay and collecting cases applying *Cel-Tech* in consumer UCL actions).

Plaintiffs fail to meet the *Cel-Tech* test. In order for a claim to be "sufficiently 'tethered' to a legislative policy for the purposes of the unfair prong," there must be a "close nexus between the challenged act and the legislative policy." *Hodsdon, 891 F.3d at 866* (citing *Cel-Tech, 20 Cal. 4th at 187*). Plaintiffs have not identified any legislative policy Defendants have violated.

As for the fraudulent prong, for the reasons explained above, the Court finds Plaintiffs have failed **[*18]** to plead the alleged misrepresentation with particularity as required by *Rule 9(b)*.

The Court GRANTS HCSC's motion as to the UCL claim with leave to amend.

IV. CONCLUSION

The motion to dismiss is GRANTED. The FAC is dismissed with leave to amend consistent with this order. An amended complaint must be filed and served no later than November 22, 2021. Failure to file by that date will waive the right to do so. The Court does not grant leave to add new defendants or new claims. Leave to add defendants or new claims must be sought by a separate, properly noticed motion.

IT IS SO ORDERED.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[ ] **Motions to Dismiss, Failure to State Claim**

To survive a motion to dismiss pursuant to Fed. R. Civ. P. 12(b)(6), a complaint must include sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[ ] **Motions to Dismiss, Failure to State Claim**

A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Determining whether a complaint states a plausible claim for relief will be a context-specific task that requires the reviewing court to draw on its judicial experience and common sense. Put another way, the plausibility requirement calls for enough fact to raise a reasonable expectation that discovery will reveal evidence supporting the claim.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] **Complaints, Requirements for Complaint**

Although a court must accept all the factual allegations of a complaint as true, it is not bound to accept as true a legal conclusion couched as a factual allegation. The issue is not whether the plaintiff will ultimately prevail but whether the plaintiff is entitled to offer evidence to support the claims.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN4[] **Sherman Act, Claims**

There is no heightened pleading standard in antitrust cases. The Sherman Act bans every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states. 15 U.S.C.S. § 1. The crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express. Stating a § 1 claim requires a complaint with enough factual matter to suggest that an agreement was made, meaning the complaint must contain enough facts to raise a reasonable expectation that discovery will reveal evidence of illegal agreement. The ultimate existence of an agreement under ***antitrust law***, however, is a legal conclusion, not a factual allegation.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Types of Evidence > Circumstantial Evidence

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Evidence > Inferences & Presumptions > Inferences

HN5[] **Conspiracy to Monopolize, Elements**

A plaintiff's job at the pleading stage, in order to overcome a motion to dismiss, is to allege enough facts to support the inference that a conspiracy actually existed. There are two ways to do that. Plaintiffs can either assert direct evidence that the defendants entered into an agreement in violation of the antitrust laws, or present circumstantial facts supporting the inference that a conspiracy existed. By their nature, conspiracies are often difficult to prove with direct evidence. As such, cases often focus on whether indirect and circumstantial allegations are sufficient to plausibly allege a conspiracy and survive a motion to dismiss.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN6[] **Cartels & Horizontal Restraints, Price Fixing**

A horizontal agreement among competitors is commonly based on claims of parallel conduct by the alleged co-conspirators. However, an allegation of parallel conduct and a bare assertion of conspiracy will not suffice. Without more, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality. Hence, when allegations of parallel conduct are set out in order to make a 15 U.S.C.S. § 1 claim, they must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action. Post-Twombly, courts considering whether a complaint states a § 1 claim look for both parallel conduct and plus factors that, along with the parallel conduct, make it plausible to infer an agreement among competitors.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN7[] **Cartels & Horizontal Restraints, Price Fixing**

The first step in analyzing a conspiracy claim is to identify allegations of parallel conduct. However, parallel conduct does not itself establish conspiracy or a plausible inference of conspiracy. Stating a 15 U.S.C.S. § 1 claim without direct evidence requires allegations of parallel conduct placed in a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Inferences & Presumptions > Inferences

HN8[] **Sherman Act, Claims**

An inference of conspiracy will not arise when the alleged conspirators' conduct made perfect business sense, or where there are obvious alternative explanations for the facts alleged.

Business & Corporate Law > Joint Ventures > Formation

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Business & Corporate Law > Agency Relationships > Agents Distinguished > Joint Venturers

HN9[] **Joint Ventures, Formation**

Viewing the operation of a legitimate joint venture as akin to that of a single firm, modern ***antitrust law*** evaluates such joint conduct, including the creation of the joint venture itself, its business focus, its product selection, and its pricing, under the rule of reason, with the pleading requirements that standard imposes.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN10[] Cartels & Horizontal Restraints, Price Fixing

Plus factors are additional circumstances which, when viewed in conjunction with parallel acts, can serve to allow a fact-finder to infer a conspiracy. The plus factors may include: a common motive to conspire, evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, and evidence of a high level of inter-firm communications. However, something like inter-firm conduct does not automatically convert parallel conduct not suggestive of a conspiracy into a valid 15 U.S.C.S. § 1 claim; rather, plus factors must be circumstances which, when combined with parallel behavior, might permit a jury to infer the existence of an agreement.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN11[] Conspiracy to Monopolize, Elements

The plus factor of market concentration looks at the feasibility of competitors reaching and enforcing an agreement to restrain trade. The fewer the number of participants in the market, the easier to reach an agreement to restrain trade, and the easier to enforce such an agreement, thus the more plausible the inference of conspiracy.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN12[] Vertical Restraints, Price Fixing

Conscious parallelism, a common reaction of firms in a concentrated market that recognize their shared economic interests and their interdependence with respect to price and output decisions is not in and of itself unlawful.

Antitrust & Trade Law > Sherman Act > Claims

HN13[] Sherman Act, Claims

Where there are extensive communications among high-level officials at dealers with responsibilities for the products at issue and where communications occur in fora where discussion of competitive threats may naturally arise, those communications tend to be supportive of the existence of a conspiracy. That is particularly true where the communications represent a departure from the ordinary pattern of communications between defendants or where there is evidence that defendants exchanged confidential information or sought to conceal their communications.

Antitrust & Trade Law > Sherman Act > Claims

HN14[] Sherman Act, Claims

A mere showing of close relations or frequent meetings between alleged conspirators will not sustain a plaintiff's burden absent evidence which would permit the inference that the close ties led to an illegal agreement. Analysis of inter-firm communications is not mechanical, and the probative value of such evidence depends on the participants, the information exchanged, and the context, specifically, the connection between the content and the conspiracy alleged.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN15[] **Sherman Act, Claims**

It is fundamental to pleading in the post-Twombly era that before a defendant is forced to be held to account for conduct as serious as a conspiracy in restraint of trade in violation of the Sherman Act that the pleader inform the defendant what it is alleged to have done. It is not sufficient for the plaintiff to allege that a group has done something wrong unless the allegations give reason to believe that the defendant, as a member of the group, also has committed the wrong. A complaint that provides no basis to infer the culpability of the specific defendants named in the complaint fails to state a claim.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN16[] **Motions to Dismiss, Failure to State Claim**

Claims as to the motivations or actions of defendants as a general collective bloc, or generalized claims of parallel conduct, must be set aside as impermissible group pleading. An antitrust complaint that fails to connect each or any individual entity to the over-arching conspiracy cannot ordinarily survive a motion to dismiss.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Governments > Legislation > Statute of Limitations > Pleadings & Proof

Governments > Legislation > Statute of Limitations > Time Limitations

HN17[] **Motions to Dismiss, Failure to State Claim**

Although the statute of limitations is ordinarily an affirmative defense that must be raised in the answer, a statute of limitations defense may be decided on a Fed. R. Civ. P. 12(b)(6) motion if the defense appears on the face of the complaint. In the instance of a case where the discovery accrual rule is at issue, where the facts needed for determination of when a reasonable investor of ordinary intelligence would have been aware of the existence of fraud can be gleaned from the complaint and papers integral to the complaint, resolution of the issue on a motion to dismiss is appropriate.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

HN18[] **Sherman Act, Defenses**

A claim under § 1 of the Sherman Act is subject to a four-year statute of limitations that runs from the date of injury.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > Clayton Act > Defenses

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN19[] **Sherman Act, Defenses**

Antitrust law provides that, in the case of a continuing violation, say, a price-fixing conspiracy that brings about a series of unlawfully high priced sales over a period of years, each overt act that is part of the violation and injures the plaintiff, e.g., each sale to the plaintiff, starts the statutory period running again. However, the rule only applies to overt acts that are part of the violation; an overt act committed more than four years prior to the filing of the complaint whose effects were first felt outside the limitations, therefore, usually will not support a cause of action even the effects persist into the limitations period.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Boycotts

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN20[] **Horizontal Refusals to Deal, Boycotts**

In a price-fixing conspiracy, each fixed price is itself an overt act that is part of the antitrust violation, and therefore starts the statutory period as to that act. In contrast, in a group boycott conspiracy, higher prices are not the conspiracy itself but are, at most, the effects of the boycott agreement and actions.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN21[] **Sherman Act, Defenses**

In a continuing antitrust conspiracy, the general limitations rule is usually understood to mean that each time a plaintiff is injured by an act of the defendants, a cause of action accrues to him to recover the damages caused by that act and that, as to those damages, the statute of limitations runs from the commission of the act. In other words, an action by defendants within the statutory period does not bring the entire alleged conspiracy, the vast majority of which occurred outside the statutory period, into that period. Rather, it will only give rise to a cause of action (a) if the action within the statutory period itself injures the plaintiffs and (b) as to damages stemming from that action.

Antitrust & Trade Law > Sherman Act > Defenses

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Governments > Legislation > Statute of Limitations > Equitable Estoppel

Governments > Legislation > Statute of Limitations > Tolling

HN22[ ] **Sherman Act, Defenses**

A claim of fraudulent concealment must be pled with particularity. An antitrust plaintiff may prove fraudulent concealment sufficient to toll the running of the statute of limitations if he establishes: (1) that the defendant concealed from him the existence of his cause of action, (2) that he remained in ignorance of that cause of action until some point within four years of the commencement of his action, and (3) that his continuing ignorance was not attributable to lack of diligence on his part. For the first element, a plaintiff may prove the concealment element by showing either that a defendant took affirmative steps to prevent the plaintiff's discovery of his claim or injury or that the wrong itself was of such a nature as to be self-concealing.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices

HN23[ ] **Consumer Protection, Deceptive & Unfair Trade Practices**

Communications to the community at large will not generally support a finding of fraudulent concealment.

Securities Law > ... > Elements of Proof > Materiality > Puffery

HN24[ ] **Materiality, Puffery**

It is well established that general statements about reputation, integrity, and compliance with ethical norms are inactionable puffery, meaning that they are too general to cause a reasonable investor to rely upon them. If that is so, the statements are also too general for a would-be plaintiff to rely upon them in foregoing an investigation.

Governments > Legislation > Statute of Limitations > Tolling

HN25[ ] **Statute of Limitations, Tolling**

All that is necessary to cause a tolling period to cease is for there to be reason to suspect the probability of any manner of wrongdoing.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

HN26[ ] **Clayton Act, Claims**

Section 4 of the Clayton Act establishes a private right of action for violations of the federal antitrust laws, and entitles any person who is injured in his business or property by reason of anything forbidden in the antitrust laws to treble damages for those injuries. 15 U.S.C.S. § 15. A court requires a private antitrust plaintiff plausibly to allege (a) that it suffered a special kind of antirust injury, and (b) that it is a suitable plaintiff to pursue the alleged antitrust violations and thus is an efficient enforcer of the antitrust laws.

Opinion

[*407] OPINION AND ORDER

LEWIS J. LIMAN, United States District Judge:

Defendants, a group of investment banks and their affiliates[1] (collectively, **[**4]** "Defendants"), jointly move, pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, to dismiss Plaintiffs' amended consolidated class action complaint at Dkt. No. 128 (the "Complaint" or "SAC") for failure to state a claim.

For the following reasons, the motion to dismiss is granted.

BACKGROUND

The Court assumes the truth of the well-pled allegations of the Complaint and the documents incorporated therein for purposes of the motion to dismiss.

I. The Relevant Market

The Complaint relates to an alleged conspiracy in the secondary market for odd lots of corporate bonds (the "Relevant Market"). SAC ¶ 246.

[*408] Corporate bonds are debt instruments issued by corporations to raise funds for their operations; they are issued through individual offerings to one or more registered securities firms in the primary market. *Id.* ¶¶ 3, 59. The securities firms—the dealers—then trade these bonds with other dealers and investors in the secondary market. *Id.* ¶ 4. Corporate bonds are not traded on anonymous exchanges, but rather are generally traded individually with dealers in the secondary over-the-counter market. *Id.* ¶¶ 5, 65.

Within this market, corporate bonds are broken down into two categories based on the number of bonds included in the trade. **[**5]** "Round lots" consist of bond trades involving increments of 1,000 bonds, or that are greater than and divisible by $1 million in par value, while "odd lots" generally consist of bond trades involving fewer than 1,000 bonds, or that are less than $1 million in par value. *Id.* Because bonds from the same issue are fungible, odd lots of that issue can be combined into a round lot, and a round lot of that issue can be broken into odd lots. *Id.* Round-lot trades almost always involve institutional investors, whereas odd-lot trades are more likely to involve retail investors. *Id.* ¶¶ 81-85. Round-lot trades make up approximately 82% of total trading volume of corporate bonds in the United States. *Id.* ¶¶ 93, 116, 257 n.56.

In the secondary market, dealers trade in both round lots and odd lots, providing a bid price at which they are willing to purchase lots of a specific bond or an offer price at which they are willing to sell lots of a specific bond. *Id.* ¶ 6. Bid prices and offer prices are expressed as percentages of the bond's par value. *Id.* ¶ 59. The difference between

---

[1] Defendants are Bank of America Corporation, Merrill Lynch, Pierce, Fenner & Smith, Inc., and BofA Securities, Inc. (collectively, "Bank of America"); Barclays Capital Inc. ("Barclays"); Citigroup Inc., and Citigroup Global Markets Inc. (collectively, "Citigroup"); Credit Suisse Securities (USA) LCC ("Credit Suisse"); Deutsche Bank Securities Inc. ("Deutsche Bank"); The Goldman Sachs Group, Inc. and Goldman, Sachs & Co., LLC (collectively, "Goldman Sachs"); JPMorgan Chase & Co. and J.P. Morgan Securities LLC (collectively, "JPMorgan"); Morgan Stanley, Morgan Stanley & Co., LLC, and Morgan Stanley Smith Barney LLC (collectively, "Morgan Stanley"); NatWest Markets Securities Inc. ("NatWest" or "RBS"); and Wells Fargo & Co., Wells Fargo Securities LLC, and Wells Fargo Clearing Services, LLC (collectively, "Wells Fargo").

bid price and offer price—the bid-offer spread—becomes the profit dealers make on their trades. *Id.* ¶ 7. For example, a bid-offer **[**6]** spread of 99/101 means that the dealer is willing to buy a bond at 99% of the bond's par value, and is willing to sell the bond at 101% of the bond's par value; the difference would be the dealer's profit. *Id.* ¶ 59.

Defendants are a group of ten investment banks—and their affiliates—who are dealers in the secondary corporate bond market, both in round lots and odd lots; Plaintiffs are three individuals, a trust, and a pension fund who traded in the Relevant Market.

II. The Alleged Conspiracy

Plaintiffs' claim revolves around the allegation of "a conspiracy by Defendants from at least August 1, 2006 to the present . . . to restrain electronic advances in the marketplace that would have reduced transactional costs for investors in odd-lots of corporate bonds to the detriment of Defendants' trading profits." SAC ¶ 2; *see also id.* ¶ 279 ("Defendants have conspired and agreed with each other to engage in a group boycott as alleged above of certain odd-lot focused electronic trading platforms . . . that sought to increase pre-trade pricing transparency, allow all-to-all direct trading and/or anonymous trading, and/or otherwise promote pricing competition for odd-lot investors.").

Although Plaintiffs **[**7]** do not bring a claim of price-fixing in the Complaint, *see* Dkt. No. 133 at 3, their anticompetitive theory is predicated on an allegation that Defendants trade odd lots at significantly higher bid-offer spreads than they do round lots: "Defendants display remarkable parallel pricing in terms of odd-lots versus round lots. Despite the high number of odd-lot trades executed by dealers and the fact that such trades are qualitatively identical to round lot trades, Defendants demand odd-lot investors, such as Plaintiffs . . . , pay spreads that are 25% to 300% higher than [those paid by] investors trading in **[*409]** round lots of the same issue." SAC ¶ 10. Plaintiffs allege that "[n]o reasonable economic justification explains the magnitude of the pricing disparity between odd-lot and round lot trades of the same issue," and that "[i]n a truly competitive market, multiple factors, such as advances in technology that improve pre-trade price transparency and dealers' competitive desire to secure a greater share of the growing odd-lot market, suggest that Defendants should be narrowing their spreads on odd-lots toward parity with the already profitable round lot trades." *Id.* ¶ 11. This central theory—that **[**8]** there is a huge discrepancy between the bid-offer spread for round-lot trades and odd-lot trades, and that this discrepancy has no reasonable economic justification and can only be explained by anticompetitive behavior—underlies Plaintiffs' allegations of a conspiracy among Defendants.

A. The Group Boycott

Plaintiffs' central claim is that Defendants "engaged in a joint scheme to boycott electronic trading platforms with increased pricing transparency, refusing to participate in them and provide them liquidity, even though gaining market share in the growing odd-lot market through such participation would be in each Defendants' unilateral interest if they were not conspiring with one another." Dkt. No. 133 at 2. Plaintiffs allege that "E-platforms have the ability to allow Plaintiffs and the Class to trade corporate bonds with greater transparency and significantly less cost, *i.e.*, with narrower bid-offer spreads. Therefore, in order to maintain wider spreads on odd-lot trades of corporate bonds, Defendants have engaged in a pattern of parallel conduct and anticompetitive collusion to restrict competition from those electronic platforms seeking to improve odd-lot pricing for bond investors **[**9]** and seeking to compete with Defendants in this market." SAC ¶ 131. They allege that this collusive conduct included:

> punishing those participants in the bond odd-lot markets that were engaging in trading activity that had the potential to narrow the bid ask spreads; investing in and acquiring control of various electronic platforms to ensure they did not improve pricing for old-lot investors (including one platform, TradeWeb, that was co-owned by all Defendants and used repeatedly to acquire and shut down platforms that threatened to provide pre-trade pricing transparency and increase pricing competition for retail odd-lot investors); engaging in a group boycott of other retail-focused (and therefore, odd-lot focused) electronic trading platforms; punishing others who attempted to offer support or liquidity to such retail-focused electronic trading platforms; denying liquidity to

> electronic platforms that might improve price competition for retail odd-lot investors despite the potential opportunity such platforms offer to increase each Defendant's market share of odd-lot transactions; and using their market power to deny and/or delay access to essential facilities that competing retail-focused **[**10]** electronic platforms required to enter the secondary market for trading odd-lots of corporate bonds.

Id. ¶ 133. Plaintiffs' allegations that Defendants punished those who threatened their conspiracy relate to two instances. First, Plaintiffs allege that "when odd-lot traders employed by InterVest engaged in trading that Salomon Smith Barney (later acquired by Citigroup) deemed to be 'disruptive' of the market, Salomon refused to do business with those traders. None of the other Defendants stepped in to do business with the traders, instead, as one would expect in a competitive market." *Id.* ¶ 137. Second, Plaintiffs allege that from 2015-2019, **[*410]** Blackrock used competitive regional banks and brokers such as First Tennessee for odd-lot trading, including on electronic platforms like MarketAxess, because they provided narrower spreads; Morgan Stanley and Citigroup threatened to limit their business with First Tennessee to penalize them for offering these narrower spreads. *Id.* ¶¶ 138-139.

The remainder of Plaintiffs' broad group boycott allegations relate to six electronic trading platforms.

1. InterVest

In the mid-1990s, InterVest Financial Services planned to debut a new electronic trading **[**11]** system for corporate bonds with anonymous, push-button trading on Bloomberg terminals, pursuant to an agreement with Bloomberg. SAC ¶ 141. However, once this was announced, bond dealers began to complain to Bloomberg that InterVest offered a service that competed with them. *Id.* ¶ 142. Bloomberg tried to withdraw from its agreement with InterVest, but after InterVest threatened legal action, the system launched on Bloomberg terminals in December 1996. Bloomberg terminated the service about a year later "due to pressure from Defendants." *Id.* The Complaint does not include any specific allegations regarding this "pressure," who specifically applied it, and how it was applied.

2. TradeWeb

TradeWeb is an electronic platform that was founded in 1996, with initial funding by four of the defendants: Credit Suisse, Lehman Brothers (later acquired by Barclays), Saloman Smith Barney (later acquired by Citigroup), and Goldman Sachs. SAC ¶ 143. By 2004, Citigroup, Merrill Lynch, Morgan Stanley, JPMorgan, and Deutsche Bank held ownership interests in TradeWeb as well. *Id.* In 2004, Thompson Reuters purchased TradeWeb, but agreed to a joint ownership structure called "Project Fusion" that went into **[**12]** effect in January 2008, wherein Credit Suisse, Goldman Sachs, Lehman Brothers, Merrill Lynch, Morgan Stanley, JPMorgan, Deutsche Bank, and RBS would retain minority ownership stakes in TradeWeb; Citigroup joined this list in 2008 as well. *Id.* ¶¶ 150-151. According to at least one source, the trader defendants sold to Thomson Reuters because of "regulatory concerns over potential conflicts of interest and competition issues in dealer-owned networks"; the sale followed the issuance of antitrust civil investigative demands to similar electronic trading platforms. *Id.* ¶ 149.

Plaintiffs allege two separate kinds of anticompetitive behavior via TradeWeb. First, Defendants' ownership of TradeWeb allowed them to use it as a "stalking horse" to "catch and kill" other electronic platforms that threatened to increase transparency and offer better pricing to retail odd-lot investors. *Id.* ¶ 152. Second, Defendants' ownership of TradeWeb allowed them to block retail investors from the platform; "[t]o this day, in what can only be explained by Defendants' refusal to support it as a competitive platform for odd-lot trades, TradeWeb does not allow access to retail investors to trade in odd-lot corporate **[**13]** bonds, and continues to maintain a dealer-to-dealer market structure rather than all-to-all trading." *Id.*

3. BondDesk

BondDesk was a bond platform founded in 1999 that originally focused on smaller trades and investment advisors representing retail investors but was not directly open to retail investors. SAC ¶ 172. Over the next five years, BondDesk sold ownership stakes to fourteen major banks, including Goldman Sachs, Bank of America, JPMorgan, and Wells Fargo. *Id.* ¶ 173. In 2004, these fourteen banks held six out of eleven seats on the board of directors, **[*411]** including seats held by Brad Levy, who was affiliated with Goldman Sachs, and Matthew Frymier, who was affiliated with Bank of America. *Id.* ¶ 174. Plaintiffs allege that Defendants saw BondDesk's innovations as threatening to their "supracompetitive profitability," and therefore "conspired to use their positions on the BondDesk board to remove the existing management of BondDesk from their day-to-day leadership positions at the company in 2004." *Id.* ¶¶ 175-176. Levy and Frymier led this effort—which entailed pressuring the management to leave by raising false concerns about existing stock option accounting treatment, something management **[**14]** would be held responsible for—by reaching out to BondDesk's outside accounting firm and encouraging them to raise a red flag about the existing accounting treatment in exchange for referring additional clients to the firm. *Id.* ¶¶ 176-179. The firm agreed to do so, and the board, controlled by the board members affiliated with the bank owners, used this as an excuse to remove BondDesk's management; subsequently, the accounting issue was resolved without any changes to existing procedure. *Id.* ¶¶ 180-181.

In 2006, a private equity firm bought majority stake in BondDesk, which subsequently announced that it was extending its marketplace to institutional traders and portfolio managers, but not to retail investors directly. *Id.* ¶ 182. The platform became the primary bond-trading platform for retail odd-lot-sized trades for several major retail and institutional investment advisors, facilitating about a third of retail-sized trades. *Id.* ¶ 183. In 2011, BondDesk hired a new CEO who announced a plan to introduce a system for direct retail trading on BondDesk; he implemented BondWorks, which initially created workstations for advisors and brokers to access BondDesk and would "eventually" allow **[**15]** retail investors such access as well. *Id.* ¶ 184. BondDesk also partnered with another trading platform in 2011 and made this new combined service immediately available to its dealer clients but not retail investors. *Id.* ¶ 185.

Plaintiffs allege that Defendants were "threatened by these moves that would provide greater price transparency to retail odd-lots investors and allow retail investors the opportunity to trade outside of the Defendant-controlled and intermediated OTC market," and responded by using TradeWeb—which, as described above, several Defendants had minority ownership interest in—to acquire BondDesk in 2013. *Id.* ¶ 186. Plaintiffs allege that Defendants, "(via TradeWeb) . . . closed off BondDesk access for retail investors," except for indirect access. *Id.* ¶ 188. Plaintiffs never allege, however, that retail investors had direct access to BondDesk at any point prior to this acquisition. BondDesk became TradeWeb Direct, a platform open to institutional investors and dealers that allows trading in odd lots. *Id.* ¶ 187.

4. ABS/NYSE

In 1976, the New York Stock Exchange ("NYSE") introduced the Automated Bond System ("ABS"), which allowed trading in a variety of bonds, including **[**16]** corporate bonds. SAC ¶ 153. ABS failed to gain traction in the corporate bond market, however; by 2002, only 5% of corporate bonds were listed on ABS, and by 2006, only about 1% of corporate bond issues traded on ABS. *Id.* ¶ 154. In 2007, ABS was replaced by NYSE Bonds, which offered pre-trade transparency for investors on pricing. *Id.* ¶ 155. A 2014 study found that corporate bonds listed on NYSE Bonds had lower bid-offer spreads than similar bonds not listed on NYSE Bonds, and that these price effects were greatest for trades of less than $100,000. *Id.* However, NYSE Bonds also failed to gain traction **[*412]** among dealers trading in corporate bonds. *Id.* ¶ 156.

Plaintiffs allege that this was due to "(a) a concerted boycott of the platforms by Defendants, and (b) collusive efforts by Defendants to deny or delay NYSE Bonds access to the Bloomberg TOMS facility, an essential venue necessary for any newcomer seeking to participate in and compete within the corporate bond market." *Id.* ¶ 157. Although "[o]btaining access to Bloomberg TOMS should have taken a short period of time for NYSE Bonds, particularly given the significance and power of the New York Stock Exchange," it took eighteen to nineteen **[**17]** months for NYSE Bonds to obtain this access. *Id.* ¶ 162. Defendants "used their market power and value to Bloomberg as Bloomberg Terminal customers to force Bloomberg to materially delay NYSE Bonds' connection to the essential facility of Bloomberg TOMS," and "forced Bloomberg to delay NYSE Bonds' connectivity through Bloomberg TOMS by threatening to terminate or reduce their Bloomberg Terminal leases if Bloomberg failed to do so." *Id.* ¶ 163.

5. Bonds.com

Bonds.com is another company that sought to introduce an electronic trading platform. It launched a bond trading platform called BondStation in 2008 which was open to both retail and institutional investors; after three months, the company shifted its focus to the institutional segment "due to market conditions and other economic factors." *Id.* ¶ 167 (internal quotation marks omitted). Plaintiffs allege that one of these market conditions was a group boycott of the platform by dealers. *Id.* In 2010, Bonds.com stopped using BondStation and offered a new platform called BondsPro, which aimed to offer institutional investors an alternative trading system for odd-lot fixed income securities. *Id.* ¶ 168. The platform continued to allow all-to-all, **[**18]** anonymous, exchange-style trading. *Id.*

Plaintiffs allege that in 2012 and 2013, "Bonds.com sought order flow and participation on its platform from major corporate bonds dealers like Defendants," but that "[n]one of the dealers would participate with Bonds.com and the Defendants monitored and policed their conspiracy to make sure there would be no defectors." *Id.* ¶¶ 169-170. Specifically, Plaintiffs allege that Bank of America was interested in participating on BondsPro but was worried about "blowback it would suffer from other Defendants." *Id.* ¶ 170. They allege that Bank of America said that it would only participate on the platform if at least one or two other large dealers did as well. *Id.* "As a result of this group boycott," Bonds.com ran out of funding in 2013 and was sold in 2014. *Id.* ¶ 171.

6. Trading Edge

Plaintiffs allege that most electronic platforms "failed within a few years," and that even when they had success, "they were quickly acquired and shuttered by Defendant-backed platforms." *Id.* ¶¶ 191-192. As an example, Plaintiffs allege that Trading Edge, a startup trading platform that offered exchange-like electronic trading with anonymous matching on bond trades, had success **[**19]** in 1999-2000 and was subsequently acquired in 2001 by MarketAxess, an electronic trading platform that was open only to institutional investors and was founded by JPMorgan, among others. *Id.* ¶¶ 192-193. MarketAxess originally stated that it would integrate the anonymous trading with its current platform but decided to terminate the anonymous trading within seven months. *Id.* ¶ 194.

PROCEDURAL HISTORY

Plaintiffs filed a complaint against Defendants on April 21, 2020. Dkt. No. 1. On **[*413]** July 14, 2020, Plaintiffs filed an amended consolidated complaint. Dkt. No. 106. Defendants filed a joint motion to dismiss the amended consolidated complaint on September 10, 2020. Dkt. No. 116. Plaintiffs filed the second amended consolidated complaint on October 29, 2020. Dkt. No. 128. The Court denied Defendants' pending motion to dismiss the amended consolidated complaint as moot. Dkt. No. 129. Defendants filed a new joint motion to dismiss the second amended consolidated complaint on December 15, 2020. Dkt. No. 130. Plaintiffs filed their response in opposition to the motion on January 28, 2021, Dkt. No. 133, and Defendants filed their reply in further support of the motion on March 15, 2021, Dkt. No. **[**20]** 136.

LEGAL STANDARD

HN1[] To survive a motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, a complaint must include "sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 554, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*).

HN2[] "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* "Determining whether a complaint states a plausible claim for relief will . . . be a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." *Id. at 679*. Put another way, the plausibility requirement "calls for enough fact to raise a reasonable expectation that discovery will reveal evidence [supporting the claim]." *Twombly, 550 U.S. at 556*; *accord Matrixx Initiatives, Inc. v. Siracusano, 563 U.S. 27, 46, 131 S. Ct. 1309, 179 L. Ed. 2d 398 (2011)*.

HN3[] Although the Court must accept all the factual allegations of a complaint as true, it is "not bound to accept as true a legal conclusion couched as a factual allegation." *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 555*). The issue "is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims." *Walker v. Schult, 717 F.3d 119, 124 (2d Cir. 2013)* (quoting *Scheuer v. Rhodes, 416 U.S. 232, 235-36, 94 S. Ct. 1683, 40 L. Ed. 2d 90 (1974)*); *see also DiFolco v. MSNBC Cable L.L.C., 622 F.3d 104, 113 (2d Cir. 2010)* ("In ruling on a motion pursuant to *Fed. R. Civ. P. 12(b)(6)*, the duty of a court is merely to assess the **[**21]** legal feasibility of the complaint, not to assay the weight of the evidence which might be offered in support thereof." (internal quotation marks and citation omitted)).

HN4[] "There is no heightened pleading standard in antitrust cases." *In re Interest Rate Swaps Antitrust Litigation, ("IRS I"), 261 F. Supp. 3d 430, 461 (S.D.N.Y. 2017)* (citing *Concord Assocs., L.P. v. Entm't Props. Tr., 817 F.3d 46, 52 (2d Cir. 2016)*). The *Sherman Act* bans "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. "[T]he crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express." *Twombly, 550 U.S. at 553* (internal quotations, citations, and alterations omitted). Stating a *Section 1* claim "requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made," meaning the complaint must contain "enough facts to raise a reasonable expectation **[*414]** that discovery will reveal evidence of illegal agreement." *Id. at 556*. "The ultimate existence of an 'agreement' under ***antitrust law***, however, is a legal conclusion, not a factual allegation." *Mayor and City Council of Baltimore v. Citigroup, 709 F.3d 129, 134-35 (2d Cir. 2013)* (citing *Starr v. Sony BMC Music Entertainment, 592 F.3d 314, 319 n.2 (2d Cir. 2010)* ("The allegation that defendants agreed to [a] price floor is obviously conclusory, and is not accepted as true.")).

HN5[] "A plaintiff's job at the pleading stage, in order to overcome a motion to dismiss, **[**22]** is to allege enough facts to support the inference that a conspiracy actually existed. . . . [T]here are two ways to do this." *Citigroup, 709 F.3d at 136*. Plaintiffs can either assert "direct evidence that the defendants entered into an agreement in violation of the antitrust laws," or "present circumstantial facts supporting the *inference* that a conspiracy existed." *Id.* By their nature, conspiracies are often difficult to prove with direct evidence. As such, cases often focus on whether indirect and circumstantial allegations are sufficient to plausibly allege a conspiracy and survive a motion to dismiss.

HN6[] "A horizontal agreement among competitors, the sort of pact alleged here, is commonly based on claims of parallel conduct by the alleged co-conspirators." *IRS I, 261 F. Supp. 3d at 462*. However, "an allegation of parallel conduct and a bare assertion of conspiracy will not suffice. Without more, parallel conduct does not suggest conspiracy, and a conclusory allegation of agreement at some unidentified point does not supply facts adequate to show illegality. Hence, when allegations of parallel conduct are set out in order to make a *§ 1* claim, they must be placed in a context that raises a suggestion of a preceding agreement, not merely parallel **[**23]** conduct that could just as well be independent action." *Twombly, 550 U.S. at 556-57*. Post-*Twombly*, courts considering whether a complaint states a *Section 1* claim look for both parallel conduct and "plus factors" that, "along with the parallel conduct, make it plausible to infer an agreement among competitors." *IRS I, 261 F. Supp. 3d at 462-63*.

DISCUSSION

Defendants move to dismiss Plaintiffs' Complaint on four grounds. First, they argue that Plaintiffs have not pled a plausible boycott conspiracy. Second, they argue that the Complaint fails to connect any specific Defendant to the alleged conspiracy and instead engages in impermissible group pleading. Third, they argue that Plaintiffs' claim is time-barred. Fourth, they argue that Plaintiffs fail to plead antitrust standing. The Court addresses each of these arguments in turn.

I. Plaintiffs Fail to Plead a Plausible Boycott Conspiracy

Defendants argue that Plaintiffs have failed to plead a plausible boycott conspiracy. They argue that Plaintiffs' boycott theory is fundamentally implausible; that Plaintiffs have not alleged facts—either in the form of direct evidence of a conspiracy or parallel conduct and plus factors—that lead to the inference of a conspiracy; and that Plaintiffs' allegations with regard to **[**24]** each of the electronic trading platforms that they argue Defendants either controlled or boycotted are individually defective.

The Complaint is ambiguous and unclear regarding the precise nature of the group boycott Plaintiffs allege. At some points, the Complaint appears to allege a conspiracy to boycott platforms that would allow access to retail investors and thereby increase transparency for such investors. SAC ¶¶ 195-200. That theory would require **[*415]** the existence, or at least the prospect of, platforms that would allow access to both retail and institutional investors. A group boycott of a platform that would allow access to retail investors could not occur absent the existence or the prospect of such a platform.

At other points, Plaintiffs appear to allege a group boycott of platforms that permit trading of both round lots and odd lots, or "a group boycott designed to maintain pricing opacity for odd-lot corporate bonds, whether they were bought to sold by retail or institutional investors." Dkt. No. 133 at 31. That theory would not necessarily be undermined by the absence of a platform that permitted access to retail investors for the group to boycott; Plaintiffs allege that institutional **[**25]** investors, as well as retail investors, trade odd lots. It would, however, be undermined by evidence that members of the purported group did business with, and did not boycott, platforms that provided pricing for odd lots. A defendant cannot boycott one with whom it does business.

Plaintiffs' briefing expressly disavows the former theory—a boycott of platforms that were open to retail investors. Dkt. No. 133 at 31. None of the platforms that Plaintiffs identify as part of Defendants' group boycott allowed direct access by retail investors. The allegations of the Complaint undercut the latter theory. The Complaint alleges that the Defendants who were members of the conspiracy in fact supported TradeWeb and MarketAxess—platforms that "increase pre-trade pricing transparency, which results in better competition on pricing and lower transactional costs for institutional investors trading in corporate bonds." SAC ¶ 198.

The Court's discussion that follows is agnostic to the different theories. The analysis would apply to both theories. The Court identifies the allegations of parallel conduct, analyzes whether those allegations of parallel conduct plausibly support the existence of a preexisting **[**26]** agreement among competitors to engage in predetermined conduct, and then analyzes the relevant plus factors. Regardless whether the Complaint is understood to plead a conspiracy to boycott a platform that would permit retail investors or to boycott platforms that provide pricing for odd-lot transactions, it fails to state a plausible claim for relief.

1. Parallel Conduct

Plaintiffs acknowledge in their opposition that they do not plead "direct evidence of an agreement among defendants." Dkt. No. 133 at 16. They seek rather to support the existence of a conspiracy by attempting to "present circumstantial facts supporting the *inference* that a conspiracy existed." *Citigroup, 709 F.3d at 136*. They argue that parallel conduct in addition to plus factors supports the existence of a conspiracy.

HN7[] The first step in analyzing such a claim is to identify allegations of parallel conduct. However, parallel conduct does not itself establish conspiracy or a plausible inference of conspiracy. For one, "'conscious parallelism' [is] a common reaction of 'firms in a concentrated market [that] recogniz[e] their interests and their interdependence with respect to price and output decisions.'" *Twombly, 550 U.S. at 553-54* (quoting *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*). It is "as much in line with **[**27]** a wide swath of rational and competitive business strategy unilaterally prompted by common perceptions of the market" as it is with conspiracy. *Id. at 554*. Thus, stating a *Section 1* claim without direct evidence requires "allegations of parallel conduct . . . placed in a context that raises a suggestion of a **[*416]** preceding agreement, not merely parallel conduct that could just as well be independent action." *Id. at 556-57*; *see also* *Citigroup, 709 F.3d at 136* ("Generally, however, alleging parallel conduct alone is insufficient, even at the pleading stage. This is *Twombly*'s contribution."); *id.* (quoting *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 323 (3d Cir. 2010)*, for the proposition that "[a] corollary of [Twombly] is that plaintiffs relying on parallel conduct must allege facts that, if true, would establish at least one 'plus factor,' since plus factors are, by definition, facts that tend to ensure that courts punish concerted action—an actual agreement—instead of the unilateral, independent conduct of competitors").

The Court first identifies the well-pled allegations in the Complaint that establish parallel conduct. They fall into three general categories: (1) parallel investment in certain trading platforms; (2) parallel refusal to support other trading platforms that Plaintiffs allege would improve pricing **[**28]** transparency, including two electronic trading platforms in particular; and (3) parallel application of punishment and pressure to boycott electronic platforms and specific dealers or traders that threatened to improve pricing. Dkt. No. 133 at 9-13, 27-29.

The Court rejects Defendants' argument that conduct must be "unexpected or idiosyncratic" in order to be parallel. Dkt. No. 136 at 4. That argument conflates and collapses two separate inquiries—the identification of well-pled conduct alleged to be parallel and the judgment whether that conduct, if accepted as true, supports a plausible inference of a preexisting agreement among competitors. *See* *Citigroup, 709 F.3d at 138* (noting that "Plaintiffs have essentially pleaded only parallel conduct, with little more," and that they do not allege additional facts "to suggest that this parallel conduct flowed from a preceding agreement rather than from their own business priorities"); *see also* *id. at 140* ("Although *Twombly*'s holding rests on numerous justifications, at bottom its prime concern, like all cases interpreting *Rule 12(b)(6)*, is isolating those cases that assert a plausible antitrust conspiracy . . . from those that merely presume a conspiracy from parallel action.").

Defendants' general **[**29]** point, however, is well-taken. In summary and as further elaborated below, the conduct alleged to be parallel is not suggestive of a preexisting agreement; rather it is suggestive of independent competitive conduct, whether analyzed in isolation or "holistically," *see* Dkt. No. 133 at 30.

In essence, Plaintiffs assert that over a decades-long period, a group of ten Defendants invested in parallel in certain electronic trading platforms that allowed access only to institutional investors and did not provide transparent pricing for odd-lot transactions, and that they also did not support platforms that would allow access to retail investors or otherwise increase pre-trade pricing transparency for odd-lot transactions. They claim that such conduct must have been based on a preexisting agreement to restrain competition and to preserve what Plaintiffs claim was Defendants' supracompetitive—i.e., not competitive—pricing.

Plaintiffs' theory falters upon their own factual allegations. If, as Plaintiffs allege, each Defendant had interests in (1) preserving a pricing structure that was profitable to that Defendant, SAC ¶ 77, and (2) investing in platforms that otherwise threatened to take some **[**30]** of their profits, which they could recoup by owning equity in those platforms, *id.* ¶ 148, they would not have needed to form a group boycott to pursue those interests. It would have been in the interest of each Defendant **[*417]** individually to invest in platforms that they believed would be successful and thus would immediately take some of their profits. It also would have been in the interest of each Defendant individually not to invest in other platforms that did not have the promise of success. There is no reason to assume the existence of a preexisting agreement from each Defendant's actions, even if all of them took similar actions. "[T]here is no reason to infer that the [Defendants] had agreed among themselves to do what was only natural anyway." *Twombly at 566* (holding that no inference of conspiracy can be drawn by parallel conduct of each defendant intended to maintain "its regional dominance"). ***HN8***[] An inference of conspiracy will not arise when the alleged conspirators' conduct "made perfect business sense," *Citigroup, 709 F.3d at 138*, or where there are "obvious alternative explanations for the facts alleged," *In re INS Brokerage Antitrust Litig., 618 F.3d 300, 322-23 (3d Cir. 2010)* (internal quotation marks and alterations omitted) (quoting *Twombly, 550 U.S. at 567*).

No inference of conspiracy can be drawn from the **[**31]** allegations that a Defendant would not participate in a platform without knowing whether others would do so as well. If, as Plaintiffs suggest, no platform could be successful without the participation of all or most of the dealers in the corporate bond market, it would be "only natural" for no individual dealer to commit to participate in a particular platform without knowing or believing that others would participate in that same platform. No preexisting agreement would be necessary or can be inferred. It would be in the independent business interest of each dealer not to make the investment of time and resources to trade on a platform unless it believed others would do so as well.

Finally, if, as Plaintiffs further allege, over the extended period of the purported conspiracy most of the start-up electronic trading platforms have quickly failed, SAC ¶ 132, it would be "natural" that each individual defendant acting unilaterally and in its own economic self-interest would be loath to make an investment of time and resources without a strong belief that a new platform would break the pattern and succeed.

No inference of preexisting agreement can be drawn from Plaintiffs' allegations. **[**32]** At various times during the lengthy period of the alleged conspiracy, some of the Defendants invested in particular platforms, while others chose not to invest or to participate. There are no allegations of parallel conduct that was so consistent in time, *see* *IRS I, 261 F. Supp. 3d at 475* (highlighting allegations that four defendants each contacted a platform *on the same day* to tell them that they would not participate in the that platform until they had taken specific steps), or that was so unexpected or idiosyncratic in type as to be unlikely in the absence of an agreement, *see* *Quality Auto Painting Ctr. Of Roselle, Inc. v. State Farm Indem. Co., 917 F.3d 1249, 1272 (11th Cir. 2019)* ("The alleged boycotting methods are not so idiosyncratic that they suggest conspiracy."); *see also* *In re Treasury Securities Auction Antitrust Litigation ("TSA"), 2021 U.S. Dist. LEXIS 62529, 2021 WL 1226670, at *15 (S.D.N.Y. Mar. 31, 2012)* (noting that in *Alaska Electrical Pension Fund v. Bank of America Corp., 175 F. Supp. 3d 44, 54 (S.D.N.Y. 2016)*, the complaint alleged that defendants "claimed to have the exact same bid/ask spread for nearly every day for multiple years," and finding persuasive the fact that there were no similar allegations by the *TSA* plaintiffs).

In the end, then, Plaintiffs are left with the allegations that it is more expensive to **[*418]** purchase a bond in an odd-lot transaction than in a round-lot transaction and that a platform that provides pricing transparency for odd-lot transactions has been slow to develop. As further explained below, the **[**33]** first claim does not establish an antitrust conspiracy, much less a group boycott. Plaintiffs' statistics do not show that Defendants each enjoyed the ability to impose supracompetitive, non-market prices they had an interest in preserving. Moreover, the Complaint shows why such pricing differentials would persist in a natural, competitive environment. Round lots of corporate bonds tend to be traded by institutional investors, who are "sophisticated, repeat participants in the market that maintain longstanding relationships with dealers and are willing and able to shop around for the best pricing," and who "tend to be better informed than odd-lot or retail investors, who typically trade infrequently." SAC ¶ 81. In other words, they have market power to drive better bargains. *See id.* ¶ 82. And since the "costs to Defendants for actual transmission and trading execution is . . . the same whether Defendants are dealing in [smaller] odd-lots or [larger] round lots of corporate bonds," *id.* ¶ 232, there are obvious scale efficiencies which the round-lot purchasers enjoy. As to the second claim, even assuming that the platform the Plaintiffs desire has not yet emerged, there is nothing in **[**34]** the Complaint that suggests that this failure was the result of a preexisting agreement to restrain trade rather than the function of independent market forces.

The Court now turns to the three sets of allegations in detail.

a. Investment in and Control over Trading Platforms

The Complaint alleges that Defendants invested in parallel in certain trading platforms: TradeWeb, MarketAxess, and BondDesk. It also alleges conduct in connection with the direction of those platforms. First, it alleges that in 1996 two Defendants and two entities later acquired by two other Defendants provided initial funding for TradeWeb: Credit Suisse, Goldman Sachs, Lehman Brothers (later acquired by Barclays) and Salomon Smith Barney (later acquired by Citigroup). SAC ¶ 143. It further alleges that by 2004, Citigroup, Merrill Lynch, Morgan Stanley, JPMorgan, and Deutsche Bank had also obtained ownership interests in TradeWeb; at that point, Thompson Reuters purchased TradeWeb from its owners. *Id.* ¶ 143, 149. It then alleges that "Thompson Reuters proposed

'Project Fusion,' a joint ownership structure that went into effect in January 2008 that gave minority ownership stakes in TradeWeb to Credit Suisse, Goldman **[**35]** Sachs, Lehman Brothers (later acquired by Barclays), Merrill Lynch (later acquired by Bank of America), Morgan Stanley, JPMorgan, Deutsche Bank, and RBS," and that Citigroup acquired ownership interest in TradeWeb in 2008 as well. *Id.* ¶ 151. Second, the Complaint alleges that in 2000, MarketAxess was founded by JPMorgan, among others, *id.* ¶ 193, and it cites a 2000 *Euromoney* article saying that Credit Suisse and Lehman (now owned by Barclays) have also invested in MarketAxess, *id.* ¶ 147. Third, the Complaint alleges that by 2004, BondDesk, which was founded in 1999, "had sold ownership stakes to 14 major banks, including Defendants such as Goldman Sachs, Bank of America, JPMorgan, and Wells Fargo," *id.* ¶ 173, before BondDesk was acquired by TradeWeb and folded into TradeWeb Direct, *id.* ¶¶ 186-188.

The Court treats this investment activity as parallel conduct. Although Defendants argue that "no court has treated this type of lawful joint-investment activity as a form of 'parallel behavior' that supports an inference of unlawful conspiracy," Dkt. No. **[*419]** 136 at 6-7, there is no logical reason why parallel investment—like parallel failure to invest—cannot be considered parallel conduct. Conduct **[**36]** that would be lawful if taken independently is paradigmatic parallel conduct.

However, Defendants are correct that this conduct is "lawful parallel conduct" that "fails to bespeak unlawful agreement," and does not support an inference of unlawful conspiracy. *See* *Twombly, 550 U.S. at 556-57*. According to Plaintiffs, the emergence of new platforms posed a threat to each Defendant's business model. In those circumstances, it would be "only natural," *id. at 556*, for a Defendant acting in its own independent economic interest to invest in a platform to at least continue to enjoy indirectly the business and the market share that it otherwise—but for the emergence of the platform—would have been able to enjoy directly, *see* SAC ¶ 148 (quoting a *Euromoney* article arguing that investment in electronic trading platforms that threatened to decrease dealers' profits was a way for those dealers to replace that lost revenue). That several Defendants chose to invest in platforms that appeared as if they might be profitable and might otherwise take business from them proves nothing more than pursuit of the adage: "If you can't beat them, join them." Collins Online Dictionary, accessible at https://www.collinsdictionary.com/us/dictionary/english/if-you-cant-beat-them-join-them **[**37]** (accessed Oct. 12, 2021).

Plaintiffs allege that, after some Defendants invested, the platforms either limited access to institutional investors, did not provide transparent pricing for odd lots, or acquired other platforms which (but for their acquisition) might have provided access to retail investors. These allegations do not establish parallel conduct by the firms who invested in the platform and who had representatives involved with the platform. Conduct that is engaged in by a company or joint venture in which certain Defendants were investors or held board positions is not parallel conduct. It is not simultaneous, similar conduct of competitors otherwise expected to conduct business and compete with one another independently. It is the activity of a single joint venture. ***HN9***[] "[V]iewing the operation of a legitimate joint venture as akin to that of a single firm, modern ***antitrust law*** evaluates such joint conduct—including the creation of the joint venture itself, its business focus, its product selection, and its pricing—under the rule of reason, with the pleading requirements that standard imposes." *IRS I, 261 F. Supp. 3d at 467* (citing *Texaco, Inc. v. Dagher, 547 U.S. 1, 1 n.1 & 6-7, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*, for the proposition that "[a]s a single entity, a joint venture, like **[**38]** any other firm, must have the discretion to make decisions regarding the conduct of that venture" (internal quotation omitted)). As in *IRS I*, Plaintiffs here fail to plead any facts that would remove decisions about the operation of a legitimate joint venture from this body of case law and further fail "to plead facts sufficient to support the conclusion that, evaluated under rule-of-reason methodology, the Project Fusion joint venture . . . represented an unreasonable restraint of trade." *Id. at 468*. In short, Plaintiffs do not allege that any of the joint ventures engaged in conduct as a joint venture that was against that joint venture's own economic interest or that constituted an unreasonable restraint of trade.

Moreover, even if decisions of the platforms could be considered parallel conduct by Defendants rather than unilateral activity by the joint venture, Plaintiffs have not adequately pled facts supporting the alleged use of the platforms **[*420]** to stifle transparent trading, including by blocking direct retail-investor access to the platforms. Indeed, Plaintiffs' factual allegations undermine their own theory.

First, although Plaintiffs allege that "[t]to this day," TradeWeb "continues to **[**39]** maintain a dealer-to-dealer market structure rather than all-to-all trading," SAC ¶ 152, the Complaint also asserts that TradeWeb (as well as MarketAxess) "allow[s] investor-to-investor direct trading (without intermediary dealers), and increase[s] pre-trade pricing transparency, which results in better competition on pricing and lower transactional costs for institutional investors trading in corporate bonds," *id.* ¶ 198. Second, although Plaintiffs allege that "Defendants' ownership of TradeWeb (as well as other platforms, such as MarketAxess) gave them . . . the ability to shut out retail odd-lot investors from using these platforms," *id.* ¶ 152, tellingly they do not allege that TradeWeb ever considered opening its platform to retail odd-lot investors whether before or after Defendants' investment. Similarly, although Plaintiffs allege that BondDesk was seen "as a threat to the supracompetitive profitability [Defendants] enjoyed from wider bid-offer spreads on odd-lots of corporate bonds," *id.* ¶ 175, they admit that "[f]rom its inception, BondDesk . . . was not directly open to retail clients," *id.* ¶ 172, and do not allege that BondDesk ever considered any contrary business model. **[**40]** Thus, Plaintiffs do not allege the existence or prospect of any retail all-to-all platform for Defendants to "catch and kill" with the platforms they invested in.

The Court in *IRS* I rejected similar allegations. The plaintiffs there alleged that defendants acquired ownership interests in TradeWeb and used that to ensure that it would not be used for all-to-all trading. The court dismissed these allegations as conclusions "not supported by well-pled facts." *IRS I, 261 F.3d at 466*. The complaint failed to state a claim because it "d[id] not cite *any* evidence supporting its critical background premise—that Tradeweb ever had such a plan [for all-to-all trading]. The SAC's claim that Tradeweb was 'planning' in 2007 to introduce such a platform, which 'plan' the Dealers then sought to subvert, is stated as a conclusion. It is not supported by well-pled facts." *Id.* The same result follows here.

b. Failure to Support Platforms that Would Increase Pricing Transparency

Plaintiffs' next set of allegations is a combination of inaction and action—the failure to support as well as the boycott of platforms that would admit retail investors or provide increased pricing transparency for odd-lot trades.

Much of what Plaintiffs **[**41]** allege is in generalities: Defendants engaged in conduct to "continu[e] to maintain a dealer-to-dealer market structure rather than all-to-all trading," SAC ¶ 94, in that they individually did not support the development of a platform for all-to-all trading for both round-lot and odd-lot trades that if all of them collectively decided to support would have been successful.[2] Therefore, Plaintiffs conclude, the failure of any one Defendant to support the development of a platform that permitted all-to-all pricing for both round lots and odd lots must have been the product of a preexisting agreement between all Defendants.

The theory is flawed factually and logically. Factually, the Complaint acknowledges that TradeWeb and MarketAxess, **[*421]** which Defendants invested in and supported, "allow investor-to-investor direct trading (without intermediary dealers), and increase pre-trade pricing transparency, which results in better competition on pricing and lower transactional costs for institutional investors trading in corporate bonds." SAC ¶ 198. Logically, the more plausible inference is that to the extent no such platform has yet developed, that is because no entrepreneur has developed a business **[**42]** model that would permit all-to-all pricing for round lots and odd lots that would compete with existing platforms and that has been attractive to any dealer individually. The Complaint shows the functioning of a competitive market and not the absence of one.

Plaintiffs' more specific allegations are that Defendants "refus[ed] to participate in and provide order flow (supply of bonds for trading) to odd-lot trading platforms, NYSE Bonds and Bonds.com." Dkt. No. 133 at 28; *see* SAC ¶¶ 156-158, 168. These allegations start with the failure of ABS and NYSE Bonds and reason backwards that such failure must have been the product of a group boycott. The Complaint alleges that:

- "ABS failed. By 2002, only 5% of all corporate bonds were listed on ABS for trading. By 2006, only 333 U.S. corporate bond issues (around 1% of the total number of unique TRACE-eligible corporate bond issues traded that year) traded on ABS." SAC ¶ 154.

---

[2] Or drawn them all down collectively.

• "NYSE Bonds failed to gain traction in trading among dealers. As of November 2017, only 25 bond dealers continued to participate on NYSE Bonds." *Id.* ¶ 156.

• "ABS and NYSE Bonds failed to achieve larger-scale success among investors because of . . . a concerted boycott **[**43]** of the platforms by Defendants." *Id.* ¶ 157.

• "Defendants engaged in a group boycott to not provide or allow order flow to ABS/NYSE Bonds, or to severely limit such order flow to a small number of corporate bond issues." *Id.* ¶ 158.

These allegations fail to state a claim for group boycott. Plaintiffs "fail to . . . plead a single time, place, or person involved in the alleged agreement to boycott ABS/NYSE Bonds" and fail to "allege that any Defendant declined to participate on the platform." Dkt. No. 136 at 11. "[N]o specific Boycott Defendant is identified," and "the actions themselves are described in generic terms." *TSA, 2021 U.S. Dist. LEXIS 62529, 2021 WL 1226670, at *19*. As such, the allegations are conclusions, unsupported by well-pled factual allegations.

In the absence of any well-pled factual allegations, the Complaint asks the Court to accept the premise that it would be in the economic self-interest of each Defendant alone, and without the participation of others, to support ABS and NYSE. From that premise, Plaintiffs would draw the conclusion that the decision of every single one of Defendants not to participate in ABS or NYSE must have been a result of a preexisting agreement. The premise is not well-pled or supported, however, **[**44]** and thus the conclusion does not follow. From the Complaint's allegations, no one Defendant would necessarily have had an interest in supporting ABS or NYSE without believing that others would do the same and that the platform was likely to succeed. The claim that none of the Defendants supported ABS and NYSE thus cannot support the conclusion that each of the Defendants is a party to a conspiracy.

The allegations regarding Bonds.com suffer from similar flaws. The Complaint alleges:

[*422] • "Another example of Defendants' collusive conduct designed to prevent competition from electronic platforms is their refusal to deal with Bonds.com." SAC ¶ 164.

• "After just three months, . . . Bonds.com jettisoned BondStation's retail odd-lot focus amidst pressure from dealers such as Defendants. In April 2008, the company '[r]efocused from the retail segment to the institutional segment due to market conditions and other economic factors.' One of those 'market conditions' was a group boycott of the retail-focused BondStation by dealers." *Id.* ¶ 167.

• "Between 2012 and 2013, Bonds.com sought order flow and participation on its BondsPro platform from major corporate bond dealers like Defendants, including **[**45]** Bank of America, JPMorgan, and Morgan Stanley, among others." *Id.* ¶ 169.

• "None of the dealers would participate with Bonds.com and the Defendants monitored and policed their conspiracy to make sure there would be no defectors. Bank of America indicated that it had interest in participating on BondsPro, but that it could not do so due to the blowback it would suffer from other Defendants. Of course, threatening to punish cartel defectors is further evidence of the existence of the conspiracy. Bank of America stated that it would only be willing to participate on Bonds.com if at least one or two of the larger dealers (such as Morgan Stanley or JPMorgan) also participated and could provide it cover from retribution." *Id.* ¶ 170.

• "As a result of this group boycott by Defendants of Bonds.com's all-to-all, anonymous odd-lot trading platform, Bonds.com ran out of money by late 2013 . . . ." *Id.* ¶ 171.

The claim thus appears to be two-fold: (1) Bank of America, JPMorgan, and Morgan Stanley were solicited and failed to participate and thus they must have reached a collective agreement not to participate; and (2) Bank of America stated it would only be willing to participate if others participated **[**46]** as well.

The first claim does constitute parallel conduct. However, it is not parallel conduct suggestive of conspiracy for the same reasons identified above with respect to ABS and NYSE. An inference of conspiracy cannot be drawn from the fact that Bank of America, JPMorgan, and Morgan Stanley each chose not to participate. The conduct suggests "rational and competitive business strategy unilaterally prompted by common perceptions of the market." *Twombly, 550 U.S. at 554*. The second claim illustrates the point. Not only is the unilateral expression of one market participant insufficient to show the existence of a preexisting agreement not to compete, but it is the expression of a market participant acting its own independent "competitive business strategy." *Id.* It would "only be natural," *id.*, for a market participant such as Bank of America not to devote resources to a start-up platform such as BondsPro unless it thought that others would participate as well and that the platform would enjoy the liquidity that would make trading on it attractive. Thus, to the extent Plaintiffs allege any parallel conduct, it is the very same type of parallel conduct that *IRS I* rejected, because there is "a 'natural explanation,' **[**47]** consistent with unilateral action, for the Dealers' decisions not to supply liquidity to" the platform without knowing that at least some others would do the same. *IRS I, 261 F. Supp. 3d at 475* (citation omitted). Defendants' lack of individual motivation to support a platform **[*423]** like BondsPro can be explained both by the fact that their existing business model was profitable and it was in their individual self-interests to maintain that model and by the fact that most start-up platforms quickly failed. As such, "[e]ach Dealer's decision to avoid the startup platforms, like the decision by each phone company in *Twombly* not to compete in new markets, is, in and of itself unremarkable. Considered alone, it is not—at all—suggestive of conspiracy." *Id.*

c. Enforcement of the Conspiracy via Punishment and Pressure

Plaintiffs' third set of allegations relates to what they claim was parallel conduct by Defendants in applying "punishment and pressure to boycott electronic platforms that threatened improved pricing." Dkt. No. 133 at 10.

Plaintiffs allege that "when odd-lot traders employed by InterVest engaged in trading that Salomon Smith Barney (later acquired by Citigroup) deemed to be 'disruptive' of the market, Salomon refused **[**48]** to do business with those traders," SAC ¶ 137, and that "none of the other Defendants stepped in to do business with the traders, as one would expect in a competitive market," *id.* However, Plaintiffs plead no facts for their central premise that "one would expect" a different dealer to "step in" if Salomon chose not to do business with the traders. There is no allegation that the traders were particularly attractive or valuable or that any of the dealers lacked access to the traders before Salomon ceased doing business with them. Plaintiffs' allegation rests on mere conclusion. Even if the individual decisions of each of the other Defendants not to "step in" could be considered parallel conduct (or non-conduct), it is not suggestive of conspiracy. It most plausibly suggests that no Defendant thought it could make more money transacting through the InterVest traders than they had been able to make transacting with other traders.

Plaintiffs also allege that "[f]ollowing the announcement of InterVest [which would debut a new electronic trading system for corporate bonds] on Bloomberg, bond dealers began to complain to Bloomberg that InterVest offered a service that competed with them." **[**49]** *Id.* ¶ 142. But Plaintiff does not name a single Defendant who complained or a single complaint that was made to Bloomberg. Moreover, even if the Complaint had contained a well-pled allegation that more than one dealer who paid money for services from Bloomberg complained when Bloomberg decided to do business with that dealer's competitor, such allegation would not without more suggest that each complaint was the product of a conspiracy. Each dealer individually would have an interest in a competitor not taking market share from it. That is ordinary competitive activity. It does not require an agreement.

Next, Plaintiffs allege that Defendants pressured and threatened Bloomberg to stop it from quickly granting NYSE Bonds a connection to Bloomberg TOMS: "Defendants — which are large financial institutions with significant accounts with Bloomberg's separate and profitable Bloomberg Terminal business — used their market power and value to Bloomberg as Bloomberg Terminal customers to force Bloomberg to materially delay NYSE Bonds' connectivity through Bloomberg TOMS by threatening to terminate or reduce their Bloomberg Terminal leases if Bloomberg failed to do so." *Id.* ¶ 163. Again Plaintiffs **[**50]** do not identify any complaint that was made to Bloomberg or any Defendant who made a complaint. The allegation rests on speculation: The fact that NYSE Bonds' connectivity was delayed must have been a result of threats **[*424]** from "Defendants." But, Plaintiffs do not allege what those threats were, that they were made by more than one Defendant, or how they impacted Bloomberg. There is nothing in that conduct that suggests a preexisting agreement rather than an individual decision of each alleged complainant as to its own economic interest.

Plaintiffs further allege that Defendants monitored and policed their boycott of Bonds.com through threats. The only specific factual allegation is that Bank of America was reluctant to participate on Bonds.com if other dealers did not participate and therefore it monitored whether others would participate:

> None of the dealers would participate with Bonds.com and the Defendants monitored and policed their conspiracy to make sure there would be no defectors. Bank of America indicated that it had interest in participating on BondsPro, but that it could not do so due to the blowback it would suffer from other Defendants. Of course, threatening to punish cartel **[**51]** defectors is further evidence of the existence of the conspiracy. Bank of America stated that it would only be willing to participate on Bonds.com if at least one or two of the other larger dealers (such as Morgan Stanley or JPMorgan) also participated and could cover it from retribution.

Id. ¶ 170.

This allegation begins with a conclusion and ends with a factual example that does not support the conclusion. Simply stating that "Defendants monitored and policed their conspiracy to make sure there would be no defectors" is a label and conclusion insufficient to get Plaintiffs over the *Twombly/Iqbal* line or subject Defendants to discovery. The allegation that Bank of America chose not to participate in BondsPro due its perception of "the blowback it would suffer from other Defendants" does not contain the factual content necessary to cross that line. It does not create an inference that any Defendant—much less a group of Defendants—in parallel threatened Bank of America for participation. The further allegation that Bank of America declined to participate in Bonds.com if at least one or two other large dealers did not also participate does not add support to the claim. The most plausible **[**52]** inference from the pleaded facts is that Bank of America arrived at that decision independently in the exercise of its own business judgment, and not collectively as the result of an agreement. No dealer would want to invest time or money in a trading platform absent some indication that other large dealers would also participate. Absent any allegations that other Defendants engaged in similar conduct, made similar excuses to avoid participating in new platforms, or similarly expressed reluctance to act alone, this allegation pertains just to one isolated comment by one isolated Defendant, and not to any parallel conduct.

Plaintiffs' only specific allegation of parallel enforcement conduct is their claim that two of the eleven Defendants—Morgan Stanley and Citibank—each threatened to limit its business with First Tennessee, a regional bank, to punish it for offering narrow spreads for corporate bond transactions:

> • "Defendants [sic] efforts to punish those who threaten to narrow odd-lot spreads continue to this day. . . . Blackrock began to use competitive regional banks and brokers such as First Tennessee, Piper Jaffrey, and McDonald & Co. for its odd-lots trading needs because of the **[**53]** narrower spreads they provided. When defendant Morgan Stanley learned that Blackrock was providing First Tennessee with axe sheets and allowing it to gain business because of the **[*425]** narrower spreads that it was providing, Morgan Stanley threatened to limit any business that it transacted with First Tennessee and blackball them. Defendant Morgan Stanley took such steps in order to punish First Tennessee for offering narrower spreads for such transactions." SAC ¶ 138.
>
> • "During the period from 2016 through 2018, Blackrock used electronic RFQ's available on MarketAxess to execute directly with regional banks such as First Tennessee, Piper Jaffrey, and McDonald & Co. in order to benefit from the narrower spread that such dealers provided. Eventually, defendants Morgan Stanley and Citibank learned of these transactions and threatened to limit any business that they transacted with First Tennessee for offering narrower spreads for such transactions." *Id.* ¶ 139.
>
> • "When individual employees of disciplining Defendant dealers tried to help the traders that were being penalized (by, for example, transacting business with them), they did so at risk of losing their jobs with the

> Defendant dealer. The **[**54]** substantial risks faced by employees ensured that the penalty box — the disciplining action — worked." *Id.* ¶ 140.

The claim that "defendants Morgan Stanley and Citibank learned of these transactions and threatened to limit any business that they transacted with First Tennessee for offering narrower spreads for such transactions," *id.* ¶ 129, can be read to suggest parallel conduct, albeit barely. But the interest of each of them in not doing business with a bank that undercut its own individual pricing and the fact that all that Plaintiffs can allege is that two of the eleven Defendants made such a threat is also inconsistent with conspiracy.[3]

2. Plus Factors

When stripped of conclusions and reduced to allegations of fact, the Complaint contains three well-pled allegations of parallel conduct: (1) Defendants' parallel investments in TradeWeb, BondDesk, and MarketAxess; (2) two Defendants' alleged retaliation against First Tennessee; and (3) the alleged group boycott of BondsPro. For reasons stated above, these allegations are not suggestive of a conspiracy whether viewed individually or collectively; rather, they are consistent with Defendants' individual self-interest.

The Court next **[**55]** considers whether the Complaint pleads any "plus factors" which, considered in conjunction with the parallel conduct, support the inference of a conspiracy. ***HN10***[] Plus factors are "additional circumstances . . . which, when viewed in conjunction with the parallel acts, can serve to allow a fact-finder to infer a conspiracy." *Apex Oil Co. v. DiMaruo, 822 F.2d 246, 253-54 (2d Cir. 1987)*. "These plus factors may include: a common motive to conspire, evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, and evidence of a high level of interfirm communications." *Citigroup, 709 F.3d at 136* (internal quotation **[*426]** marks omitted) (quoting *Twombly v. Bell Atl. Corp., 425 F.3d 99, 114 (2d Cir. 2005)*, *rev'd on other grounds, Twombly, 550 U.S. 544*). However, something like interfirm conduct does not automatically convert parallel conduct not suggestive of a conspiracy into a valid *Section 1* claim; rather, plus factors must be "circumstances which, when combined with parallel behavior, might permit a jury to infer the existence of an agreement." *Id. at 136 n.6*; *see also Apex, 822 F.2d at 254* ("However, such plus factors may not necessarily lead to an inference of conspiracy. For example, such factors in a particular case could lead to an equally plausible inference of mere interdependent behavior, i.e., actions taken by market actors **[**56]** who are aware of and anticipate similar actions taken by competitors, but which fall short of a tacit agreement. In such a case, a court might find it difficult to hold that the parallel acts 'tend to exclude the possibility' of interdependent action.").

Plaintiffs argue that the Complaint pleads four plus factors: (1) statistical evidence that shows that Defendants acted against their unilateral self-interest; (2) market concentration; (3) common motive to conspire; and (4) interfirm communication. Those factors do not support the alleged conspiracy.

a. Statistical Evidence of Actions Against Individual Self-Interest

Plaintiffs argue that the Complaint's "abundant statistical evidence of Defendants' supracompetitive odd-lots pricing" is "market evidence that makes no rational, economic sense" and therefore "lends plausibility to the existence of a conspiracy." Dkt. No. 133 at 44-45. Plaintiffs presume that each of the Defendants, and Defendants alone, enjoyed "supracompetitive" pricing and from that presumption seek to draw the inference that Defendants also enjoyed a common interest or motive to preserve a market where prices would not be competitive. They further assert that "if

---

[3] Although Plaintiffs seem to allege that this was part of a course of parallel conduct along with the earlier-referenced InterVest "penalty" by Salomon, two isolated actions that are somewhat similar but separated by about two decades do not constitute parallel conduct. *See TSA, 2021 U.S. Dist. LEXIS 62529, 2021 WL 1226670, at *19* (holding with regard to events that "took place ten years or more before most of Plaintiffs' remaining allegations" that "Plaintiffs have not pled sufficient intervening facts to tie together the alleged 2003 conduct with conduct that took place in 2013 or later").

the **[**57]** relevant market were truly competitive, each Defendant would be competing on price and driving down odd-lot spreads to parity with already profitable round-lot spreads in order to gain a larger share of the market," but that instead Defendants "ignored the logical competitive response of meeting customer demand and growing market share with better prices created by available technological innovations—which is in their unilateral interests—and instead have repeatedly and collectively settled for smaller market share by stifling any evolution in the market for odd lots of corporate bonds that would threaten their ability to change." *Id.* at 45. In other words, they suggest that their statistical allegations of a pricing disparity between odd-lot spreads and round-lot spreads demonstrate actions against each Defendant's unilateral self-interest and indicate the existence of a conspiracy.

The Court analyzes Plaintiffs' statistical allegations in detail. When carefully reviewed, they do not support the existence of a boycott conspiracy, nor do they support the claim that each Defendant enjoyed similar "supracompetitive odds-lots pricing," or that any individual Defendant enjoyed wider spreads **[**58]** than any individual dealer in the non-Defendant group.

Plaintiffs' first set of statistical allegations consists of evidence that the mean or average price per bond paid for the purchase of bonds in odd lots is higher and the spread is wider than for the purchase of bonds in round lots. SAC ¶¶ 86-94. Plaintiffs cite eleven studies that "show that odd-lot investors in corporate bonds pay average transaction costs (represented by the bid-offer spread) that are between 10% . . . to as much as 1,775% . . . greater than round lot investors." *Id.* ¶ 90. Plaintiffs **[*427]** conclude from these allegations: "In sum, numerous peer-reviewed studies demonstrate that dealers, including Defendants, have engaged in a pattern of parallel conduct by charging odd-lot investors higher selling prices and paying them lower purchase prices than round lot investors for the same bond issue." *Id.* ¶ 94.

These allegations do not support the inference that Defendants enjoyed supracompetitive pricing or had an interest in engaging in a group boycott conspiracy. The quoted studies describe that, on average, purchasers of bonds in odd lots suffered a pricing disparity compared to purchasers of round lots. They do not reflect **[**59]** that each dealer imposed a pricing disparity on all purchasers of odd lots compared to round lots or that Defendants—and Defendants alone—imposed such a disparity. The Complaint alleges that "dealers, including Defendants," charged odd-lot investors higher selling prices, not that all Defendants did so or that only Defendants did so. Indeed, Plaintiffs have abjured any allegation of price-fixing among Defendants.

The plausible inference to be drawn from Plaintiffs' allegations is that any price disparity between the price paid for bonds purchased in an odd lot versus the price paid for bonds purchased in a round lot is the result of natural competitive forces. Plaintiffs themselves allege that "[r]ound lot transactions, given their size, almost always involve institutional investors that trade for numerous individuals and companies - sophisticated, repeat participants in the market that maintain longstanding relationships with dealers and are willing and able to shop around for the best pricing. As a result, they tend to be better informed than odd-lot or retail investors, who typically trade infrequently." *Id.* ¶ 81. Those investors—by virtue of their size, sophistication, and market **[**60]** power—are able to demand better pricing. The Complaint further outlines why, in a competitive market, this translates to a pricing disparity between odd-lot and round-lot trades:

> As a result, dealers responding to an RFQ for a round lot know that they are dealing with an institutional investor that is likely to be: (a) price sensitive; (b) willing and able to obtain multiple quotes from other dealers; (c) knowledgeable regarding the market and pricing due to their repeated role in trading; and (d) in control of large portfolios of bond that offer additional trading opportunities in the future if the dealer is competitive in its pricing. Responding to these incentives, dealers provide quotes for round lots at their best competitive prices, keeping their spreads narrow, in the hope of securing this (and other, future) trades from the round lot institutional investor - a process entirely consistent with economic and market microstructure theory.

Id. ¶ 82.

The Complaint also outlines the reasons why in a natural, competitive market dealers generally would be able to offer better prices to round-lot investors, regardless whether they were institutions. The "costs to Defendants for actual transmission **[**61]** and trading execution is . . . the same whether Defendants are dealing in [smaller] odd-lots or [larger] round lots of corporate bonds." *Id.* ¶ 232. The average price is lower and the bid-offer spread more narrow when those costs are able to be spread over a larger lot of bonds.

In other words, the Complaint itself provides specific and detailed allegations outlining why each dealer and therefore also each individual Defendant would have both the ability to offer better pricing to investors trading in round lots than investors trading in odd lots and the interest in **[*428]** doing so, undercutting the theory that "[t]here is no explanation consistent with a healthy, competitive market for why the differential in spreads between odd-lots and round lots has persisted to the degree it has." *Id.* ¶ 85. Each individual Defendant has clear incentives to offer lower prices to repeat institutional investors; although this may negatively impact prices for Plaintiffs and other retail investors, "there is no reason to infer that the companies had agreed among themselves to do what was only natural anyway." *Twombly, 550 U.S. at 556*.

That same conclusion follows from the analysis provided by Plaintiffs' expert, set forth in the Complaint, **[**62]** who "analyzed the transactions costs for Riskless Principal Trades ("RPTs") in the U.S. corporate bond market from January 2006 to December 2019." SAC ¶ 95. The expert found "statistically and economically significant differences in transaction costs for round lot and odd lot trades over the period from 2006-2009." *Id.* ¶ 99. The study reflects what one would expect in a market environment in which—as Plaintiffs allege—the institutional investors who command buy-side market power also transact primarily in round lots and in which there is obvious scale efficiency to purchasing in a round lot. Prices are lower for those who purchase through an institutional investor and do so in round lots. The study shows nothing distinctive about Defendants and nothing other than what one would expect from the natural operation of market forces.

Plaintiffs' next set of statistical allegations sets out to remedy one flaw in the previous sets of allegations. However, it leaves the remaining flaws. Plaintiffs indicate that they "have gone a step further and analyzed a subset of actual trades by Defendants." *Id.* ¶ 100. They allege that "[t]he analysis found that . . . Defendants charged an average of 86 **[**63]** basis points for smaller odd-lot trades (less than or equal to $50,000 in size) 94 basis points for odd-lot trades ranging from $50,000 to $100,000 in size and 22 basis points for odd-lot trades from $100,000 to $1 million. In contrast, average spreads on round lot RPT trades over $1 million executed by Defendants averaged 13 basis points." *Id.* ¶ 102. Plaintiffs then compare their data regarding "RPT spreads on odd-lot trades executed by Defendants to trades by non-Defendant dealers," and allege that "transaction costs on odd-lot trades less than or equal to $50,000 in size executed by Defendant dealers average 62 basis points higher than non-Defendant trades of the same size," and that "for odd-lot trade sizes ranging from $50,000 to $100,000 . . . Defendant trades average 17 basis points higher than same-sized trades by non-Defendant trades." *Id.* ¶ 103 (emphasis omitted).

These allegations have the benefit of trying to isolate the Defendant group from the group of non-Defendants. But, because Plaintiffs make these allegations only in gross with respect to the Defendant group as a whole and the non-Defendant group as a whole, they do not say anything meaningful about the role of any **[**64]** individual Defendant and thus about the group of Defendants as a whole. Plaintiffs compare *average* spreads for odd lots amongst *all* Defendants to *average* spreads for odd lots amongst *all* non-Defendant dealers. Plaintiffs do not analyze whether each Defendant on average charges more for an odd-lot transaction than every non-Defendant or even whether a majority of Defendants charge more than the average non-Defendant for purchases done in an odd lot. It is impossible to know from Plaintiffs' statistics whether the average for the Defendant group is driven by one particular dealer who charges a higher spread than the remainder and whose trades drive the average **[*429]** or whether the average for the non-Defendant group too is driven by one or a small group of dealers who charge a lower spread. From Plaintiffs' allegations, it is equally if not more plausible that one or more than one Defendant charges lower prices on average for odd-lot transactions than one or more of the dealers in the non-Defendant group.

The allegation suffers from additional defects. Plaintiffs presumably proffer the statistics for the proposition that Defendants, and Defendants alone, charge higher prices for bonds purchased **[**65]** in odd lots than those purchased in round lots and thus that they have a pricing advantage with respect to odd lots over other participants in the market that they are trying to preserve. But the allegation does not compare the pricing of round-lot transactions by Defendants to those by non-Defendants. It compares only odd lots, *see id.*, and is entirely and conspicuously silent about the pricing for bonds purchased in round lots through non-Defendants. From the allegations, it is equally if not more plausible that for the non-Defendant group and for each dealer within the non-Defendant group there is a similar or greater differential as compared to that within the Defendant group between the price charged for a bond purchased in a round lot and one purchased in an odd lot.

The allegation thus shows only that bonds can be purchased cheaper if purchased as part of a round lot than if purchased as part of an odd lot. But, for reasons stated, those allegations do not show that Defendants had any particular pricing advantage they were trying to preserve, much less that each of them had such a pricing advantage. They show only that those who have market power and who can benefit from scale **[**66]** economies frequently do so in a natural competitive market environment.

Paragraph 112 of the Complaint offers the first—and only—statistical allegation that compares pricing differentials of *individual* Defendants with non-Defendant dealers. Plaintiffs compare "the differential between individual Defendants' and non-Defendants'" non-competitive price markdowns for customer-initiated odd-lot sales. However, once again, Plaintiffs utilize an average of all non-Defendant dealers as a comparator; there is no way to infer from this that each Defendant's pricing differentials were higher than those of every non-Defendant dealer, or even that each Defendant's pricing differentials were higher than those of a majority of non-Defendant dealers. Moreover, the table Plaintiffs present—comparing each individual Defendant's average customer-initiated round-lot sales price minus customer-initiated odd-lot sales price for the matching bond and date, which Plaintiffs refer to as the "markup," with the average non-Defendant markup—highlights the problem with the earlier statistics that grouped together Defendants as a whole. The table omits two Defendants, Goldman Sachs and Credit Suisse, because their **[**67]** markups were *lower* than the average non-Defendant markup. *Id.* ¶ 112. And the significant disparity between the numbers presented for each of the eight individual Defendants included in the table undercuts any assumption that Defendants' odd-lot bond pricing was supracompetitive and that Defendants were not competing amongst each other. Barclays' average markdown was 83.7 basis points, which is significantly higher than Goldman Sachs' average markdown of 27.3 basis points. *Id.* This pricing disparity is consistent with a market in which Defendants "compete[d] for odd-lot business by improving execution prices," *contra id.* ¶ 109, and as discussed above, the fact that pricing is still different for each Defendant between odd lots and round lots has a logical explanation **[*430]** also consistent with a competitive market. As such, Plaintiffs fail to present any statistical evidence or allegations plausibly suggesting that Defendants each, or all, benefitted from supracompetitive odd-lot pricing, that Defendants were not competing amongst each other, or that Defendants were acting against their unilateral self-interest.

b. Market Concentration

Plaintiffs argue that they have alleged a plus factor of **[**68]** market concentration. Dkt. No. 133 at 46. ***HN11***[] This factor looks at the feasibility of competitors reaching and enforcing an agreement to restrain trade. The fewer the number of participants in the market the easier to reach an agreement to restrain trade and the easier to enforce such an agreement, thus the more plausible the inference of conspiracy. *See* *Todd v. Exxon Corp., 275 F.3d 191, 208 (2d Cir. 2001)* ("Generally speaking, the possibility of anticompetitive collusive practices is most realistic in concentrated industries."); *SourceOne Dental, Inc. v. Patterson Companies, Inc., 310 F. Supp. 3d 346, 362 (E.D.N.Y. 2018)* ("Defendants' secure positions in the market and the relative ease of excluding others make the allegations of collusive behavior all the more plausible.").

Plaintiffs allege that the U.S. corporate bond market is a concentrated market that Defendants control. The Complaint alleges that "OTC trading in the secondary markets for U.S. corporate bonds is highly concentrated, and is becoming even more so. This concentration makes it more likely that Defendants are engaging in collusion. Defendants have dominated the U.S. corporate bond market for well over a decade." SAC ¶ 78. Plaintiffs allege that the ten Defendants "have controlled 65% or more of the bond underwriting market every year since at least 2014." *Id.* **[**69]** ¶ 79. They allege that this market share means that Defendants "control the vast majority of trading, such that the market is highly concentrated," and that this "dominance over the supply of U.S. corporate bonds has allowed them to effectively conspire to inflate the spread of odd-lot bonds in the secondary trading market." *Id.* ¶ 229.

The Complaint only alleges specific facts about Defendants' market share in the *underwriting* market, not in the Relevant Market—the secondary odd-lot corporate bond market. It alleges that a large share of the underwriting market translates directly to a large share of the secondary market: "The Defendants' collectively large market share in the underwriting market for U.S. corporate bonds gives them power over the secondary market for trading in these bonds. That power flows from their control over the supply of bonds to be sold in the secondary market. From these leading positions as U.S. corporate bond underwriters, Defendants have secured a correspondingly larger aggregate share as the top dealers in the Relevant Market . . . for secondary trading in U.S. corporate bonds." *Id.* ¶ 80. The Complaint reiterates this assumption throughout: "In short, the **[**70]** Defendants control the largest inventory of bonds because they serve as underwriters and issuers of those bonds. That dominance over the supply of U.S. corporate bonds has allowed them to effectively conspire to inflate the spread of odd-lot bonds in the secondary trading market." *Id.* ¶ 229. Defendants argue that Plaintiffs' premise—that a large market share in the underwriting market directly translates to a large market share in the secondary market—is false. They argue: "Bond underwriters purchase new bond from issuers and resell them to investors and other dealers in the primary market. After the underwriters resell the bonds, investors and other dealers trade them in the secondary **[*431]** market. The underwriters have no control over the bonds in the secondary market once they sell them in the primary market." Dkt. No. 131 at 26 (citing SAC ¶¶ 3-4).

Plaintiffs' allegations, taken as true, do not establish that the secondary corporate bond market for odd lots—the Relevant Market—was concentrated. Both the number of entities whom Plaintiffs contend "control" the market and the aggregate market share they enjoy are inconsistent with the notion that the Relevant Market is concentrated. Defendants **[**71]** are ten entities and their affiliates; even if they collectively control something around 65% of the secondary corporate bond market, this does not constitute the "highly concentrated" market that Plaintiffs argue enables a conspiracy. Ten market participants is a large number; there is no basis to assume that an anticompetitive agreement among that large a number of banks would be easy to reach or, once reached, easy to enforce, particularly when other market participants—not part of the alleged conspiracy—already controlled the remaining 35% of the market. *See* Dkt. No. 133 at 14; *cf. Ross v. American Exp. Co., 35 F. Supp. 3d 407, 430 (S.D.N.Y. Apr. 10, 2014)* ("Because such a small number of firms [the issuing banks—7 entities] hold nearly 80% of the market share, the credit card market is highly concentrated and oligopolistic."); *Todd, 275 F.3d at 208* ("If the relevant market in this case is defined as the plaintiff contends, the defendants would collectively control a 80-90% market share. While this is an extremely high market share by any measure, the district court contends that the alleged market 'is not, as plaintiff contends, so clearly oliogopolistic.' The district court points out that there are fourteen defendants in this case, and that this is not a concentrated market **[**72]** under the Department of Justice Merger Guidelines. That the market would not be deemed highly concentrated by this measure, however, does not preclude the possibility of collusive activity."); *E.I. du Pont de Nemours & Co. v. F.T.C., 729 F.2d 128, 130-31 (2d Cir. 1984)* ("During . . . the period of the alleged violations, these were the only four domestic producers and sellers of the compounds. No other firm has ever made or sold the compounds in this country. Thus, the industry has always been highly concentrated."); *In re Text Messaging Antitrust Litigation, 630 F.3d 622, 628 (7th Cir. 2010)* (finding that where the complaint alleged that the four defendants sell 90% of U.S. text messaging services, it would not be difficult for them to agree on prices and detect any deviations from that agreement); *Starr v. Sony BMG Music Entertainment, 592 F.3d 314, 318 (2d Cir. 2010)* (noting that four defendants had combined 80% market share); *Transnor (Bermuda) Ltd. v. BP North America Petroleum, 738 F. Supp. 1472, 1481 n.15 (S.D.N.Y. 1990)* (finding, on a summary judgment motion, that eight firms accounting for 65% of total product sales in Western Europe represented a "moderately concentrated market" under the Herfindahl-Hirshman Index).

Moreover, Plaintiffs' allegations do not demonstrate that Defendants had control over the secondary corporate bond market for odd lots. Plaintiffs allege that "bonds being traded from the same issue are fungible," so "odd-lots of that issue can be combined into a round lot, and, **[**73]** conversely, a round lot of a given issue can be broken into odd-lots of that issue." SAC ¶ 5. They further allege that approximately 82% of trading volume by par value in the U.S. corporate bond market is estimated to be in round lots. *Id.* ¶ 93. Given this, there is no way for any Defendant—or all Defendants—to control what happens with that 82% of corporate bonds once they are sold in round lots; any institutional investor **[*432]** who purchases them could easily break them down into odd lots and resell them at "competitive" rates. As such, even crediting Plaintiffs' allegations that Defendants' share of the underwriting market means that they have corresponding control of those bonds when they enter the secondary market, this does not mean that Defendants controlled the same share of the *odd-lot* secondary market, and furthermore this control does not extend to the level Plaintiffs suggest and does not support an inference that Defendants had control over pricing in the secondary corporate bond market.

But even crediting *arguendo* Plaintiffs' assertion that they have pled that Defendants control a large market share of the secondary corporate bond market, this does not make the alleged parallel **[**74]** conduct suggestive of a conspiracy and therefore does not count as a plus factor; rather, it is suggestive of mere interdependent conduct. ***HN12***[] "Even conscious parallelism, a common reaction of firms *in a concentrated market* that recognize their shared economic interests and their interdependence with respect to price and output decisions is not in and of itself unlawful." *Twombly, 550 U.S. at 553-54* (emphasis added) (internal quotation and alterations omitted).

c. Common Motive to Conspire

Third, Plaintiffs argue that Defendants have a common motive "to protect the pricing opacity that was jeopardized by the electronic platforms." Dkt. No. 133 at 47.

This theory rests on two premises: first that Defendants enjoyed supracompetitive pricing, which they were seeking to preserve and which increased pricing transparency would jeopardize, and second that the platform Defendants allegedly boycotted—BondsPro—presented an immediate threat to pricing opacity in a way that the platforms Defendants supported did not. As *IRS I* held, a common motive to conspire is "at best thinly pled" where the allegedly boycott platform did not present a threat to Defendants' profit margins. *261 F. Supp. 3d at 471*.

As to the former, as discussed above, despite its plethora **[**75]** of statistics, the Complaint fails to plausibly allege that Defendants enjoyed supracompetitive pricing for odd-lot bonds. The Complaint therefore does not allege that there was a pricing advantage that the Defendants as a group had a motive to preserve. Each Defendant had an interest in competing against the others as well as against those not named as defendants.

As to the latter, the Complaint fails to plausibly allege that BondsPro threatened pricing opacity in a way that platforms like TradeWeb and MarketAxess, which Defendants supported, did not. The Complaint also makes it clear that BondsPro, like TradeWeb and MarketAxess, "focus[ed] on institutional odd-lot investors rather than retail investors." SAC ¶ 168. It therefore does not support a common motive to conspire to prevent the emergence of electronic trading platforms that would improve transparency and pricing for *retail investors*. The Complaint does allege that BondsPro "allow[ed] all-to-all, anonymous, exchange-style trading - trading that would eliminate Defendants as middlemen, or force them through anonymous pricing competition to lower odd-lot bid-offer spreads." *Id.* However, the Complaint acknowledges that TradeWeb **[**76]** and MarketAxess, which Defendants supported, "allow investor-to-investor direct trading (without intermediary dealers), and increase pre-trade pricing transparency, which results in better competition on pricing and lower transactional costs for institutional investors trading in corporate bonds." *Id.* ¶ 198. Plaintiffs offer no plausible reason why Defendants would **[*433]** have a common motive to support some platforms that increased pricing transparency and competition, removed Defendants as intermediaries, and did not offer access to retail investors yet also boycott a platform because it threatened to increase pricing transparency and competition, threatened to remove Defendants as intermediaries, and did not offer access to retail investors. They similarly do not offer any reason to believe a platform like BondsPro, which was similar to platforms Defendants supported but also similar to the many start-up trading platforms that quickly failed, presented any *immediate* threat to Defendants' profits—as such, "there was little urgency to conspire against it." *IRS I, 261 F. Supp. 3d at 471*.

Thus, Plaintiffs have not plausibly pled a common motive to conspire to boycott platforms that presented an immediate threat to their **[**77]** supracompetitive pricing, both because Plaintiffs have not demonstrated supracompetitive pricing and because Plaintiffs have not demonstrated any distinct threat posed by BondsPro.

d. Interfirm Communication

Plaintiffs further argue that the Complaint alleges "high levels of interfirm communications among Defendants." Dkt. No. 133 at 14. This plus factor is relevant because the existence of communications among firms could permit an anticompetitive conspiracy to form and to flourish. ***HN13***[] Thus, where there are "extensive communications among high-level officials at Dealers with responsibilities" for the products at issue and where communications occur in fora where discussion of competitive threats "might naturally arise," those communications tend to be supportive of the existence of a conspiracy. *IRS I, 261 F. Supp. 3d at 476-77*. This is particularly true where the communications "'represent[] a departure from the ordinary pattern' of communications between defendants" or "where there is evidence that defendants exchanged confidential information or sought to conceal their communications." *Anderson News, L.L.C. v. American Media, Inc., 123 F. Supp. 3d 478, 504 (S.D.N.Y. 2015)* (quoting *United States v. Apple, Inc., 952 F. Supp. 2d 638, 655 n.14 (S.D.N.Y. 2013)*).

The Complaint alleges no such communications. *Cf. Gelboim v. Bank of America Corp., 823 F.3d 759, 781 (2d Cir. 2016)* (holding that this plus factor was established and helped the allegations **[**78]** of a conspiracy "clear the bar of plausibility" where the complaint alleged "a high number of interfirm communications, including Barclays' knowledge of other banks' confidential individual submissions in advance"); *Iowa Pub. Employees' Retirement Sys. v. Merrill Lynch, Pierce, Fenner & Smith Inc., 340 F. Supp. 3d 285, 321-22 (S.D.N.Y. 2018)* (holding that allegations were sufficient to "plead 'a high level of interfirm communications' and to support an inference of an opportunity to conspire" where the allegations included "multiple interfirm meetings at conferences, private dinners, and . . . board meetings, including the 2009 meeting convened by Bank of America[;] meetings between Wipf and Conley; a 2009 meeting between Bank of America and Goldman Sachs executives; meetings between Morgan Stanley, Goldman Sachs, and other Defendants at private dinners and conferences" (internal citations omitted)); *In re Propranolol Antitrust Litigation, 249 F. Supp. 3d 712, 722 (S.D.N.Y. 2017)* (holding that plaintiffs' allegations established this plus factor where "[t]he pleadings extensively recount defendants' participation in trade association meetings taking place over a number of years and list the dates of such conferences, the names of the attendees from each defendant, and their respective job titles," and the pleadings **[*434]** further alleged that the representatives "were responsible for setting **[**79]** drug prices" and had discussions at these meetings regarding pricing strategies and "other competitively-sensitive information").

Instead, the Complaint focuses exclusively on the fact that traders from different dealers communicate about pricing in the course of trading. It alleges that "there is a constant communication loop among a small group of bond trading insiders" and that "Defendants' traders see live quotes from their competitors and likewise coordinate their pricing." SAC ¶¶ 237-241. It is conceivable that those fora could provide a venue for traders to fix prices. *See id.* (alleging that the high levels of interfirm communication "makes fixing prices in odd-lots of corporate bonds easier to accomplish," and that "it appears that Defendants use these channels of interfirm communication to collude, rather than to find ways to compete that would improve prices for odd-lot investors"); *see also City of Philadelphia v. Bank of America Corp., 498 F. Supp. 3d 516, 529 (S.D.N.Y. 2020)* (holding that a high level of interfirm communications was established and supports the inference of a price-fixing conspiracy where those communications were alleged to include "Banks routinely . . . shar[ing] information about their base rates, inventory levels, and planned rate changes **[**80]** with each other over the telephone and through electronic communications . . . [and] Banks communicat[ing] their future rates to each other"). The Court need not reach that issue as Plaintiffs have abandoned any *Section 1* price-fixing claim.

The allegations do not support a plus factor of high levels of interfirm communication *relevant to the alleged boycott*. There is no reason to believe that the traders who communicate with one another about pricing in the course of the day are communicating confidential information much less that they are discussing the platforms they will support and those that they will boycott. The conduct Plaintiffs challenge involves decisions regarding investment in and management of alternate platforms for the trading of bonds. The Complaint offers no reason to believe that the traders who transacted on individual trades would have had the authority to make decisions about such matters or the interest in communicating about them on behalf of the firms for which they worked, nor does it offer any reason to believe that any of those who had authority or an interest in such strategic matters engaged in interfirm communications.

In contrast, in *IRS I*, the court found that **[**81]** this plus fact was "clearly present" for a boycott claim when the complaint alleged communication "via the Dealers common ownership of TradeNet, their participation in OTCDerivNet, their participation on industry associations, and the social and professional . . . interactions among executives of Dealers in this market niche." *261 F. Supp. 3d at 471*. These types of interfirm communication are all plausibly related to a boycott, whereas the types of interfirm communication alleged here relate only to communications between traders related to pricing. ***HN14***[] A "mere showing of close relations or frequent meetings between the alleged conspirators . . . will not sustain a plaintiff's burden absent evidence which would permit the inference that these close ties led to an illegal agreement." *H.L. Moore Drug Exch. v. Eli Lilly & Co., 662 F.2d 935, 941 (2d Cir. 1981)* (citation omitted). "[A]nalysis of inter-firm communications is not mechanical, and the probative value of such evidence depends on the participants, the information exchanged, and the context—specifically, the connection between the content and the . . . conspiracy alleged." *In re Commodity Exchange, Inc. Gold Futures **[*435]** and Options Trading Litigation, 328 F. Supp. 3d 217, 229 (S.D.N.Y. 2018)*. Plaintiffs have not alleged any interfirm communications that are connected to the alleged group boycott; as such, the Complaint does not establish this **[**82]** plus factor, and it lends no additional support to the plausibility of the alleged conspiracy.

II. Plaintiffs' Complaint Fails to Connect Any Specific Defendant to the Alleged Conspiracy

HN15[] It is fundamental to pleading in the post-*Twombly* era that before a defendant is forced to be held to account for conduct as serious as a conspiracy in restraint of trade in violation of the *Sherman Act* that the pleader inform the defendant what it is alleged to have done. It is not sufficient for the plaintiff to allege that a group has done something wrong unless the allegations give reason to believe that the defendant, as a member of the group, also has committed the wrong. "[A]uthorities overwhelmingly hold that a complaint that provides no basis to infer the culpability of the specific defendants named in the complaint fails to state a claim." *In re Mexican Government Bonds Antitrust Litig. ("MGB"), 412 F. Supp. 3d 380, 388 (S.D.N.Y. 2019)* (internal quotation marks, alterations, and citation omitted).

For example, in *TSA*, the court held that as to allegations which referred to only one defendant by name and "refer[red] to the other Boycott Defendants collectively - as in 'among other Boycott Defendants' and 'gave in to the Boycott Defendants' threat' - the Complaint engages in impermissible group pleading." *2021 U.S. Dist. LEXIS 62529, 2021 WL 1226670, at *21*. ***HN16***[] "[C]laims **[**83]** as to the motivations or actions of [defendants] as a general collective bloc, or generalized claims of parallel conduct, must . . . be set aside . . . as impermissible group pleading." *In re Interest Rate Swaps Antitrust Litig. ("IRS II"), 2018 U.S. Dist. LEXIS 86732, 2018 WL 2332069, at *15 (S.D.N.Y. May 23, 2018)*; *see also* *TSA, 2021 U.S. Dist. LEXIS 62529, 2021 WL 1226670, at *17* (quoting *IRS II* for the same proposition). "An antitrust complaint that fails to connect each or any individual entity to the overarching conspiracy . . . cannot ordinarily survive a motion to dismiss." *MGB, 412 F. Supp. 3d at 387* (internal quotation marks, alterations, and citation omitted).

The Complaint fails those precepts. It does not contain allegations as to any individual Defendant that would establish that such Defendant engaged in a group boycott. And, in the absence of such allegations as to any Defendant, the Complaint must be dismissed against all Defendants.

The thrust of the Complaint is that Defendants were all among the largest underwriters of bonds and that as such each individual Defendant had an interest in preserving the market structure. In essence, because a Defendant ranked as number 1, or number 3, or number 7 in the ranks of bond underwriters, the Complaint alleges that such Defendant must have been a participant in what is claimed to be a group boycott. The deficiencies of that approach have **[**84]** already been discussed. The fact that a bank is large and active does not mean that it is an antitrust conspirator.

At oral argument, when asked to identify a particular Defendant against whom they claimed the allegations were well-pled and to identify the facts that supported the claim, Plaintiffs directed the Court to their allegations against Goldman Sachs. Oral Argument Transcript at 26:2-5. Examination of those allegations, however, demonstrates the flaws in Plaintiffs' pleading. The Complaint alleges that Goldman Sachs held between a 7% and 8% share of the

U.S. corporate bond underwriting market between 2014 and 2018, SAC ¶ 79; that **[*436]** Goldman Sachs' prices obtained for their customers selling odd lots as compared to round lots of the same bond on the same date were 27.3 basis points lower, *id.* ¶ 111; that Goldman Sachs, along with three other banks, provided initial funding for TradeWeb, regained a minority ownership stake in TradeWeb as part of "Project Fusion" in 2008, and was also invested in BondBook, *id.* ¶¶ 143, 147, 151; that Goldman Sachs had ownership interests in BondDesk—which was later acquired by TradeWeb—"by 2004," and that two "individuals affiliated with" Goldman **[**85]** held seats on the board of directors of BondDesk in 2004, which they used "to remove the existing management of BondDesk from their day-to-day leadership positions at the company in 2004," *id.* ¶¶ 173-181, 186. At oral argument, Plaintiffs summarized their allegations of parallel conduct as to Goldman Sachs specifically as: "So our allegations of the parallel conduct are defendants' use of these companies to catch and kill potential competitors that threaten their market. We also make other allegations about refusal to provide liquidity and delaying access." Oral Argument Transcript at 28:21-25.

The allegations amount, at most, to the claim that Goldman Sachs had a less than 10% market share of the U.S. corporate bond underwriting market and that it invested in TradeWeb and in BondDesk, which was later acquired by TradeWeb. That conduct, however, is as consistent with the rational and competitive decisions of a business which wants to at least preserve its market share and, if possible, gain market share, and believes that it can do so by investing in a platform that offers traders a further venue through which to obtain a price. The Complaint also goes into significant detail about **[**86]** actions of board members of BondDesk who were affiliated with Goldman Sachs, but activity by board members within a lawful joint venture cannot be imputed against Goldman as parallel conduct relevant to a per se *Section 1* group boycott claim. Absent from the Complaint is any allegation of concerted action by Goldman Sachs with any of the other Defendants alleged to be a member of the group boycott. Indeed, as discussed in detail above, the only statistical allegation proffered by Plaintiffs cuts against the inference Plaintiffs would draw of conspiracy. The Complaint compares pricing differentials of certain *individual* Defendants with non-Defendant dealers for customer-initiated odd-lot sales but omits Goldman Sachs entirely from the analysis because their markups were *lower* than the average non-Defendant markup. SAC ¶ 112. In short, assuming it is even "conceivable" that the allegations against Goldman Sachs would be consistent with anticompetitive conduct, those allegations fail to push the inference that Goldman Sachs participated in a group boycott over the line from "possible" to "plausible," and thus fail to "state a claim to relief that is plausible on its face" as against Goldman Sachs. **[**87]** *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 570*).

Other than Goldman Sachs, the Defendant whose name is most frequently mentioned in the Complaint is JPMorgan. The allegations against JPMorgan are that it held between an 11% and 12% share of the U.S. corporate bond underwriting market between 2014 and 2018, SAC ¶ 79; that its average markup for odd-lot sales as compared to round-lot sales was 55.7 basis points, as compared to a 41.7 basis point average markup among non-Defendants, *id.* ¶ 112; that it held an ownership interest in TradeWeb by 2004, *id.* ¶ 143; that it regained a minority ownership stake in TradeWeb as part of "Project Fusion" in 2008, *id.* ¶ 151; that Bonds.com "sought order flow and participation on its BondsPro **[*437]** platform from major corporate bond dealers like Defendants, including . . . JPMorgan," but that "[n]one of the dealers would participate with Bonds.com," *id.* ¶ 169; that it had ownership interests in BondDesk—which was later acquired by TradeWeb—"by 2004," and that one "individual[] affiliated with" Bear Stearns & Co., later acquired by JPMorgan, held a seat on the board of directors of BondDesk in 2004, which it used "to remove the existing management of BondDesk from their day-to-day leadership **[**88]** positions at the company in 2004," *id.* ¶¶ 173-181, 186; and that JPMorgan was one of the founders of MarketAxess, which acquired Trading Edge in 2001 but did not carry over its anonymous trading feature, *id.* ¶ 193.

Those allegations fail to state an antitrust claim against JPMorgan. As with Goldman Sachs, activity within a lawful joint venture that JPMorgan had ownership stakes in cannot be imputed against JPMorgan as parallel conduct relevant to a per se *Section 1* group boycott claim. What is left, then, is the allegation that JPMorgan's pricing disparity that disadvantaged odd-lot sales was slightly worse than the average among all non-Defendants (absent any basis from which to conclude that it was worse than that of all, or even most, non-Defendants), the allegations that JPMorgan participated in TradeWeb and MarketAxess, and the allegation that BondsPro "sought order flow and participation" from JPMorgan but that JPMorgan did not participate. Viewed holistically, the allegations do not make out a plausible inference that JPMorgan was part of a group boycott conspiracy. The Complaint does not establish that JPMorgan enjoyed supracompetitive pricing as compared to any non-Defendant dealer; **[**89]** JPMorgan's lawful investment activity has a rational explanation and thus does not give rise to a plausible inference of conspiracy; and the allegation that JPMorgan chose not to participate on BondsPro is similarly consistent with its rational and competitive business interests.

The allegations against the other Defendants are even more sparse.

Absent allegations that would support a claim against an individual defendant, there is no basis for the Court to sustain the complaint against any defendant. *MGB, 412 F. Supp. 3d at 387* ("An antitrust complaint that fails to connect each or any individual entity to the overarching conspiracy . . . cannot ordinarily survive a motion to dismiss." (internal quotation marks, alteration, and citation omitted)). The Complaint here is replete with allegations that refer to Defendants as a collective bloc and assert generalized claims of parallel conduct, but it fails to connect any individual Defendant to the alleged conspiracy. The vast majority of the allegations in the Complaint that refer to specific Defendants relate to the fact that many Defendants had lawful ownership interests in platforms like TradeWeb and MarketAxess. However, these allegations do not plead that those **[**90]** Defendants, who were participants in a lawful joint venture, "in their individual capacities, consciously committed themselves to a common scheme designed to achieve an unlawful objective." *AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 234 (2d Cir. 1999)*. With regard to the actual boycott activity itself—the failure to support or trade on platforms like BondsPro—the Complaint is almost entirely devoid of allegations about any specific defendant. This defect is fatal to Plaintiffs' boycott claims.

III. Plaintiffs' Claim is Time-Barred

Defendants also move to dismiss on the separate ground that Plaintiffs' group boycott claim is time-barred. ***HN17***[] "Although the statute of limitations is ordinarily **[*438]** an affirmative defense that must be raised in the answer, a statute of limitations defense may be decided on a *Rule 12(b)(6)* motion if the defense appears on the face of the complaint." *Ellul v. Cong. of Christian Brothers, 774 F.3d 791, 798 n.1 (2d Cir. 2014)* (citation omitted); *see also Ghartey v. St. John's Queens Hosp.*, 869, F.2d 160, 162 (2d Cir. 1989) ("Where the dates in a complaint show that an action is barred by a statute of limitations, a defendant may raise the affirmative defense in a pre-answer motion to dismiss."). In the instance of a case where the discovery accrual rule is at issue, "[w]here . . . the facts needed for determination of when a reasonable investor of ordinary intelligence would have **[**91]** been aware of the existence of fraud can be gleaned from the complaint and papers . . . integral to the complaint, resolution of the issue on a motion to dismiss is appropriate." *Dodds v. Cigna Sec., Inc., 12 F.3d 346, 352 n.3 (2d Cir. 1993)*.

HN18[] A claim under *Section 1 of the Sherman Act* is subject to a four-year statute of limitations that runs from the date of injury. Plaintiffs filed their initial complaint on April 21, 2020; Defendants argue that any claim based on conduct that occurred before April 21, 2016 is therefore time-barred, and that because the Complaint does not allege any anticompetitive conduct that occurred after this date, the entire Complaint must be dismissed. Plaintiffs argue that the Complaint should not be dismissed under the statute of limitations because "each sale of an odd-lot bond is a continuing violation" and because Defendants fraudulently concealed their conspiracy.

A. Continuing Violation

Plaintiffs argue that "each sale of an odd-lot bond is a continuing violation, starting the running of the four-year statute of limitations period from that time." Dkt. No. 133 at 49. ***HN19***[] The Supreme Court has held that "[a]ntitrust law provides that, in the case of a 'continuing violation,' say, a price-fixing conspiracy that brings about a series of unlawfully **[**92]** high priced sales over a period of years, 'each overt act that is part of the violation and injures the plaintiff,' *e.g.*, each sale to the plaintiff, 'starts the statutory period running again.'" *Klehr v. A.O. Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1984)*. However, this rule only applies to overt acts that are *part of the violation*; "an overt act committed more than four years prior to the filing of the complaint whose effects were first felt outside the limitations, therefore, usually will not support a cause of action even the *effects* persist into the limitations period." *In re Nine West Shoes Antitrust Litigation, 80 F. Supp. 2d 181, 191 (S.D.N.Y. 2000)*; *see also* *US Airways v. Sabre Holdings Corp., 938 F.3d 43, 69 (2d Cir. 2019)* ("We thus conclude that each supracompetitive price charged to US Airways by Sabre pursuant to the 2006 contract was not an overt act of its own, but a manifestation of the prior overt act of entering into the 2006 contract."). Because of this distinction, the price-fixing continuing violation cases that Plaintiffs cite are inapposite. ***HN20***[] In a price-fixing conspiracy, each "fixed" price is itself an overt act that is part of the antitrust violation, and therefore starts the statutory period as to that act. In contrast, in a group boycott conspiracy, higher prices are not the conspiracy itself but are, at most, the effects of the boycott agreement and actions. As **[**93]** such, even crediting the argument that odd-lot bonds continued to be sold at inflated prices after April 21, 2016 *because* of the conspiracy, each sale at an inflated price is not part of the antitrust violation—the boycott—but rather merely an effect of the antitrust violation, **[*439]** which therefore does not start the statutory period running again.

Plaintiffs also argue that "[o]ther acts also continued after April 2016. Morgan Stanley took steps to punish First Tennessee (a competitive regional bank) that was offering Blackrock odd-lot trades at narrower spreads than those offered by the Defendant and (¶¶ 138-139) that Defendants shut down retail investor access to TradeWeb and MarketAxess. (¶¶15, 135, 147, 152, 193.)" Dkt. No. 133 at 49. As to the former, paragraphs 138 and 139 of the Complaint do not identify with specificity when "Morgan Stanley [took] steps to punish First Tennessee." *Id.* But even assuming that this conduct occurred during the statutory period—and assuming, for the purposes of the statute of limitations analysis that this allegation is well-pled and relates to a broader well-pled conspiracy—it does not extend the conspiracy as a whole into the statutory period. ***HN21***[] As Plaintiffs **[**94]** point out in their briefing, "In a continuing antitrust conspiracy, . . . the general limitations rule 'has usually been understood to mean that each time a plaintiff *is injured* by an act of the defendants a cause of action accrues to him to recover *the damages caused by that act* and that, as to those damages, the statute of limitations runs from the commission of the act.'" *Id.* (quoting *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*); *see also* *Klehr, 521 U.S. at 191* (analogizing, from the antitrust rule that "each overt act that is part of the violation and that injures the plaintiff . . . starts the statutory period running again," that in civil RICO cases "the plaintiff cannot use an independent, new predicate act as a bootstrap to recover for injuries caused by other earlier predicate acts that took place outside the limitations" (internal quotation marks omitted)). In other words, an action by defendants within the statutory period does not bring the entire alleged conspiracy, the vast majority of which occurred outside the statutory period, into that period. Rather, it will only give rise to a cause of action (a) if the action within the statutory period itself injures the plaintiffs and (b) as to damages stemming from that action. Applying this **[**95]** framework, Morgan Stanley's alleged retaliation towards First Tennessee does not give rise to a cause of action for Plaintiffs. It is difficult to imagine—and Plaintiffs do not allege in their Complaint or elucidate in their briefing—how one Defendant retaliating against a regional bank for offering a narrower spread to BlackRock could have caused injury to Plaintiffs, who do not allege that they ever purchased bonds from either BlackRock or First Tennessee, or how this one isolated incident within the statutory period could have had any broad impact on the market that in turn might have indirectly injured Plaintiffs. As to the latter, the Complaint alleges that Defendants gained ownership interest in both TradeWeb and MarketAxess well before 2016, and alleges no conduct whatsoever by any Defendants after 2016 to shut down retail investor access to these platforms.

B. Fraudulent Concealment

HN22[] "A claim of fraudulent concealment must be pled with particularity." *IRS I, 261 F. Supp. 3d at 487*. "[A]n antitrust plaintiff may prove fraudulent concealment sufficient to toll the running of the statute of limitations if he establishes: (1) that the defendant concealed from him the existence of his cause of action, (2) that **[**96]** he remained in ignorance of that cause of action until some point within four years of the commencement of his action, and (3) that his continuing ignorance was not attributable to lack of diligence on his part." **[*440]** *New York v. Hendrickson Bros., Inc., 840 F.2d 1065, 1083 (2d Cir. 1988)*.

For the first element, "the plaintiff may prove the concealment element by showing either that the defendant took affirmative steps to prevent the plaintiff's discovery of his claim or injury or that the wrong itself was of such a nature as to be self-concealing." *Id. at 1083-84*. Plaintiffs argue both that the alleged conspiracy is "inherently self-concealing" and that "Plaintiffs also pleaded active concealment." Dkt. No. 133 at 51. However, the group boycott allegations do not support a finding of active concealment or of a self-concealing conspiracy.

First, Plaintiffs argue that "Defendants used secret Bloomberg messages, dealer-to-sales-desk-to dealer channels and online platforms closed to retail investors to collude. They regularly communicated pricing information via these channels that they withheld from odd-lot investors." *Id.* (citing SAC ¶¶ 16, 237-241, 261). Plaintiffs fail to address, however, that the alleged secret communications relate only to "pricing information," *id.*, **[**97]** not to any group boycott conspiracy. As such, the allegations about private Bloomberg messages and communications among individual dealers and traders on platforms closed to retail investors are entirely irrelevant to concealment of a group boycott conspiracy.

Plaintiffs also argue that Defendants actively concealed their conspiracy by taking "affirmative steps to throw Plaintiffs off of their scent," by "hold[ing] out to the public that their activities are in good faith through detailed codes of conduct promising the highest ethical standards." *Id.* (citing SAC ¶ 263). The Complaint alleges that "each Defendant's code of conduct represented that their operations were above-board, providing a false sense of security to corporate bond investors." SAC ¶ 263. ***HN23***[] These statements "are not sufficient to invoke fraudulent concealment," because "communications to the community at large will not generally support a finding of fraudulent concealment." *In re Merrill, BofA, and Morgan Stanley Spoofing Litigation. ("Spoofing"), 2021 U.S. Dist. LEXIS 40712, 2021 WL 827190, at *11 (S.D.N.Y. Mar. 4, 2021)*. As in *Spoofing*, there is no evidence here that Defendants' general representations of ethical behavior in their codes of conduct were directed at Plaintiffs, referred specifically **[**98]** to the Relevant Market, or were intended or reasonably understood to induce the kind of reliance that Plaintiffs now claim. *See id.* ***HN24***[] Moreover, "[i]t is well established that general statements about reputation, integrity, and compliance with ethical norms are inactionable 'puffery,' meaning that they are 'too general to cause a reasonable investor to rely upon them.'" *City of Pontiac Policemen's & Firemen's Ret. Sys. v. UBS AG, 752 F.3d 173, 183 (2d Cir. 2014)* (quoting *ECA & Loc. 134 IBEW Joint Pension Tr. of Chi. v. JPMorgan Chase Co., 553 F.3d 187, 206 (2d Cir. 2009)*). "If that is so, the statements are also too general for a would-be plaintiff to rely upon them in foregoing an investigation . . . ." *Spoofing, 2021 U.S. Dist. LEXIS 40712, 2021 WL 827190, at *11*.

Nor is the alleged conspiracy self-concealing. In *IRS I*, the court emphasized "the visible nature of Tradeweb's trading platform and of Defendants' majority ownership," and therefore reasoned that the conspiracy was not self-concealing because "[o]n plaintiffs' theory the failure of TradeWeb to evolve into an all-to-all IRS trading exchange occurred in plain sight and in contrast to the market's expectations," which "if anything would have invited, rather than lulled, skeptical attention." *261 F. Supp. 3d at 488*. Similarly, here Plaintiffs' allegations about Defendants' control of several trading platforms and boycott of **[*441]** others are largely derived from contemporaneous, publicly available news articles, **[**99]** statistics, and information about the various platforms and their success. *See, e.g.*, SAC ¶¶ 146-149, 151, 171. Plaintiffs do not allege that Defendants' ownership interests in platforms like TradeWeb and MarketAxess were hidden, and on Plaintiffs' theory it would have been readily apparent to the public that trading platforms that sought to increase pre-trade pricing transparency or allow access to retail investors failed to gain support and quickly failed. It is not plausible that these events, which the Complaint establishes were public at the time, were self-concealing. As such, Plaintiffs cannot establish the first element of a fraudulent concealment claim—the concealment itself.

In addition, even if Plaintiffs could establish either that Defendants actively concealed their alleged conspiracy or that the alleged conspiracy was self-concealing, the Complaint's allegations establish that Plaintiffs were on inquiry notice of the conspiracy. ***HN25***[] "[A]ll that is necessary to cause the tolling period to cease is for there to be reason to suspect the probability of any manner of wrongdoing." *131 Maine St. Assocs. v. Manko, 179 F. Supp. 2d 339, 348 (S.D.N.Y. 2002)*; *see also* *LC Capital Partners, LP v. Frontier Ins. Group, Inc., 318 F.3d 148, 154 (2d Cir. 2003)* ("As we have explained, '[W]hen the circumstances would suggest to an investor of ordinary **[**100]** intelligence the probability that she has been defrauded, a duty of inquiry arises.' 'Such circumstances are often analogized to "storm warnings."'" (quoting *Dodds v. Cigna Securities, Inc., 12 F.3d 346, 350 (2d Cir. 1993)*)). The Complaint alleges that "[t]he fact that electronic trading platforms . . . are open to institutional investors, but not retail investors, defies any economic, competitive justification." SAC ¶ 203. As in *IRS I*, "plaintiffs' express claim" is that the failure of the market to develop a platform that either increased pre-trade pricing transparency, was open to retail investors, or both "was unnatural and contrary to expectations, suggesting conspiratorial manipulation." *261 F. Supp. 3d at 489*. Accepting this premise "that only a plot can explain the missing platforms, [Plaintiffs] had every basis, in real time, to smell a rat. At minimum, they were on inquiry notice." *Id.*

IV. Antitrust Standing

Defendants also argue that the Complaint should be dismissed because no Plaintiff has antitrust standing to assert a group boycott claim.

"*Section 4 of the Clayton Act* ***HN26***[] establishes a private right of action for violations of the federal antitrust laws, and entitles 'any person who is injured in his business or property by reason of anything forbidden in the antitrust laws' to **[**101]** treble damages for those injuries." *Gatt Comms., Inc. v. PMC Assocs, L.L.C., 711 F.3d 68, 75 (2d Cir. 2013)* (alterations omitted) (quoting *15 U.S.C. § 15*). The Second Circuit, applying *Associated General Contractors of Cal., Inc. v. California State Council of Carpenters, 459 U.S. 519, 534, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*, has "distilled" the factors used to determine whether a private plaintiff has antitrust standing "into two imperatives: we require a private antitrust plaintiff plausibly to allege (a) that it suffered 'a special kind of "antitrust injury,"' and (b) that it is a suitable plaintiff to pursue the alleged antitrust violations and thus is an 'efficient enforcer' of the antitrust laws." *Gatt, 711 F.3d at 75* (quoting *Port Dock & Stone Corp. v. Oldcastle Ne., Inc., 507 F.3d 117, 121-22 (2d Cir. 2007)*).

[*442] Plaintiffs' Complaint fails to plead antitrust standing at the first inquiry. Defendants argue that Plaintiffs lack antitrust standing because "they do not allege that they or a broker or investment advisor acting on their behalf ever sought to trade corporate bonds on an electronic platform but were blocked from doing so because of the supposed boycott." Dkt. No. 131 at 59. Plaintiffs respond in their briefing that their injury is not that they were prevented from trading on electronic platforms, but rather that "the Complaint alleges harm through the inflation of prices resulting from continued opacity in a market that, in the absence of Defendants' collusive conduct, would have seen the development **[**102]** of robust electronic trading platforms." Dkt. No. 133 at 58. They argue that "[t]he conspiracy affected pricing throughout the market, not just for those that tried to purchase their bonds through the platforms that Defendants conspired to eliminate." *Id.* at 58-59 (citing SAC ¶¶ 2, 10). The factual allegations of the Complaint do not support this conclusory statement. The Court therefore does not need to reach the question whether the link is too attenuated to constitute antitrust injury or whether Plaintiffs are efficient enforcers of the antitrust laws.

The Complaint's introductory section alleges that the case "involves a conspiracy by defendants to restraint electronic advances in the marketplace that would have reduced transactional costs for investors in odd-lots of corporate bonds" plus the boilerplate claim "[a]s a result of Defendants' conspiracy, Plaintiffs and the Class paid more when buying, and received less when selling, their corporate bonds, suffering antitrust injury under *Section 1 of the Sherman Act*." SAC ¶ 2. This allegation is merely a conclusion and a recitation of the required elements. *See* *Rosner v. Bank of China, 528 F. Supp. 2d 419, 428, 430 (S.D.N.Y. 2007)* (noting that "a plaintiff's pleading obligations require more than labels and conclusions, **[**103]** and a formulaic recitation of the elements of a cause of action will not suffice," and finding that plaintiff's complaint "merely states that 'inventors were injured as a result of [defendant's] conduct' but does not allege that any specific injuries were caused by" defendant's specifically challenged conduct (alteration omitted)). The other paragraph cited by Plaintiffs, paragraph 10, focuses exclusively on a claim of parallel pricing and makes no reference to a group boycott.

Notably, the section of the Complaint that directly addresses antitrust injury contains a single paragraph—paragraph 258. It alleges that "Plaintiffs and the Class have suffered the quintessential antitrust injury - purchasing *a price-fixed product* directly from horizontal competitors." SAC ¶ 258. It makes no reference to a group boycott. This allegation, and the Complaint as a whole, fails to establish that Plaintiffs suffered any antitrust injury stemming from the alleged group boycott conspiracy, rather than from the price-fixing conspiracy that Plaintiffs originally claimed but have now abandoned.

CONCLUSION

The motion to dismiss is GRANTED. Because the Court concludes that any amendment would be futile and **[**104]** also because the statute of limitations on Plaintiffs' claims has run and Plaintiffs have not proffered a reason for tolling the statute of limitations, and also because Plaintiffs have not requested leave to amend the Complaint if the motion to dismiss is granted, the Complaint is dismissed with **[*443]** prejudice.[4]

The Clerk of Court is respectfully directed to close the motion at Dkt. No. 130 and to prepare a judgment and close the case.

SO ORDERED.

Dated: October 25, 2021

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion brought pursuant to Fed. R. Civ. P. 12(b)(6) to dismiss a counterclaim is evaluated under the same standards applicable to a motion to dismiss a complaint. In a patent case, Rule 12(b)(6) motions are governed by regional circuit law. The Ninth Circuit instructs that, when considering a Rule 12(b)(6) motion to dismiss, the court must accept all well-pleaded facts as true and draw all reasonable inferences in favor of the non-moving party.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

Although a pleading challenged by a Fed. R. Civ. P. 12(b)(6) motion to dismiss need not provide detailed factual allegations, it must offer more than labels and conclusions and contain more than a formulaic recitation of the elements of a cause of action. A pleading may be lacking for one of two reasons: (i) absence of a cognizable legal theory, or (ii) insufficient facts to support a cognizable legal claim. The question for the court is whether the facts in the pleading sufficiently state a plausible ground for relief. If the court dismisses a pleading or portions thereof, it must consider whether to grant leave to amend. Fed. R. Civ. P. 15(a)(2) provides that leave to amend should be freely given when justice so requires.

HN3[] **Inequitable Conduct, Effect of Inequitable Conduct**

Although the Ninth Circuit's procedural standards apply to a Fed. R. Civ. P. 12(b)(6) motion, whether inequitable conduct has been adequately pleaded is a question of Federal Circuit, not regional circuit, jurisprudence because it pertains to or is unique to patent law. The substantive elements of inequitable conduct are: (1) an individual associated with the filing and prosecution of a patent application made an affirmative misrepresentation of a material fact, failed to disclose material information, or submitted false material information; and (2) the individual did so with a specific intent to deceive the U.S. Patent and Trademark Office (PTO.) Although scienter may be alleged generally, a pleading of inequitable conduct must, in addition to stating the who, what, when, where, and how of the material misrepresentation or omission, include sufficient facts from which a court can reasonably infer that a specific individual both knew of the invalidating information that was withheld from the PTO and withheld that information with a specific intent to deceive the PTO. Fed. R. Civ. P. 9(b).

Patent Law > Originality > Correction of Inventorship Errors

Patent Law > Originality > Joinder of Inventors

Patent Law > Originality > Joint & Sole Inventorship

HN4[] **Originality, Correction of Inventorship Errors**

35 U.S.C.S. § 256 is limited in effect and cannot properly be the vehicle for substituting or adding inventors on a patent based on a claim sounding in fraud. Section 256 provides a remedy for only innocent errors in joinder or non-joinder of inventors.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Patent Law > Infringement Actions > Defenses > Marking

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN5[ ] Heightened Pleading Requirements, Fraud Claims

35 U.S.C.S. § 292 prohibits affixing on an unpatented article the word patent (or a word or number implying that the item is patented) for the purpose of deceiving the public. Because § 292 claims sound in fraud, the heightened pleading standards of Fed. R. Civ. P. 9(b) apply. To survive a Fed. R. Civ. P. 12(b)(6) challenge, an accusation of mismarking must contain particularized allegations plausibly showing (i) an unpatented article was (ii) marked in a way that falsely suggested it is patented (iii) with the intent of deceiving the public.

Evidence > Inferences & Presumptions > Inferences

Patent Law > Infringement Actions > Defenses > Marking

HN6[ ] Inferences & Presumptions, Inferences

An item is unpatented within the meaning of 35 U.S.C.S. § 292 if it is not covered by at least one claim of each patent with which the article is marked. If a product is mismarked as patented, then the inquiry is whether the accused party had a reasonable belief that the article was covered by the patent or patents at issue. An honest, but mistaken, view that a mismarked item was indeed patented cannot be a basis for liability, but the mere assertion of a lack of intent to deceive is also not a sufficient defense. The question of intent is measured by objective criteria and the fact of misrepresentation coupled with proof that the party making it had knowledge of its falsity is enough to warrant drawing the inference that there was a fraudulent intent. To survive a motion to dismiss, a mismarking claim must contain specific underlying facts tending to show the requisite knowledge from which intent may be inferred.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Constitutional Law > Supremacy Clause > Federal Preemption

HN7[ ] Deceptive & Unfair Trade Practices, State Regulation

A Washington Consumer Protection Act claim is preempted when it merely restates claims that are or could be brought under federal patent law.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN8[ ] Sherman Act, Claims

An entity that obtained a patent by fraud may not enjoy the limited exception for patents to the monopoly prohibitions of § 2 of the Sherman Act. 15 U.S.C.S. § 2. Because a Walker Process monopolization claim arises under the Sherman Act (or state ***antitrust law***), and not patent law, it must be evaluated under regional circuit (or state) jurisprudence. Use of a fraudulently-acquired patent constitutes an antitrust violation if the patent was employed to produce (or attempt to produce) monopoly power in a specified market. To establish liability for monopolization, a plaintiff must show that (i) defendant possessed monopoly power in the relevant market; (ii) defendant willfully acquired or maintained such power; and (iii) plaintiff suffered causal antitrust injury. To prove attempted monopolization, a plaintiff must demonstrate that (i) defendant engaged in predatory or anticompetitive conduct with (ii) a specific intent to monopolize and (iii) a dangerous probability of achieving monopoly power. A relevant market must be defined by the interchangeability of use or the cross-elasticity of demand between the product in question and substitutes for it.

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN9[] **Intentional Interference, Elements**

The tort of interference with a business expectancy has five elements: (i) the existence of a business expectancy; (ii) knowledge of that expectancy; (iii) interference with the expectancy done for an improper purpose or using improper means; (iv) termination of the expectancy induced or caused by the interference; and (v) resultant damage.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Irrelevant Matters

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Redundant Matters

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Scandalous Matters

HN10[] **Motions to Strike, Immaterial Matters**

Like a Fed. R. Civ. P. 12(b)(6) motion, a motion brought under Rule 12(f) to strike one or more affirmative defenses is governed by regional circuit law. The court may strike from a pleading any insufficient defense or any redundant, immaterial, impertinent, or scandalous matter. Fed. R. Civ. P. 12(f). Motions to strike are generally disfavored and should be granted only when doing so will save time and expense by disposing of matters that clearly could have no possible bearing on the subject of the litigation.

For Innovative Intelligent Products LLC, doing business as GPS Lockbox, Defendant: Dale C Barr, CONSTELLATION LAW GROUP PLLC, TRACYTON, WA; Joshua King, King IP Law, Bellevue, WA.

For Innovative Intelligent Products LLC, Counter Claimant: Dale C Barr, CONSTELLATION LAW GROUP PLLC, TRACYTON, WA; Joshua King, King IP Law, Bellevue, WA.

Judges: Honorable Richard A. Jones, United States District Judge.

Opinion by: Richard A. Jones

Opinion

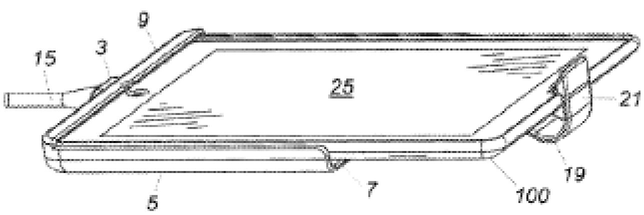
ORDER

THIS MATTER comes before the Court on a motion, docket no. 47, brought by plaintiff National Products Inc. ("NPI") to dismiss certain counterclaims and to strike certain affirmative defenses. Having reviewed all papers filed in support of, and in opposition to, the motion, and having concluded that the motion can be decided without oral argument, the Court enters the following Order.

Background

In this action, NPI has asserted patent infringement claims against defendant Innovative Intelligent Products, LLC d/b/a GPS Lockbox ("GPS") relating to four (4) patents: U.S. Patents Nos. 9,706,026 (the "'026 Patent"), 10,454,515 (the "'515 Patent"), 10,630,334 (the "'334 Patent"), and 10,666,309 (the "'309 Patent"). See 2d Am. Compl. (docket **[*2]** no. 43). Each of the patents-in-suit is titled "Docking Sleeve with Electrical Adapter," and each discloses a "protective arrangement for an electronic device" and a "fixedly positioned" adapter having a "male plug" that can mate with the "female socket of the device." See Exs. A-C to Am. Compl. (docket nos. 14-1, 14-2, & 14-3) ('026, '515, and '334 Patents); Ex. A to McMichael Decl. (docket no. 48-1) ('309 Patent). Each patent contains the following illustration of an embodiment of the invention:

Fig. 2 of '026, '515, '334, & '309 Patents (docket nos. 14-1, 14-2, 14-3, & 48-1).



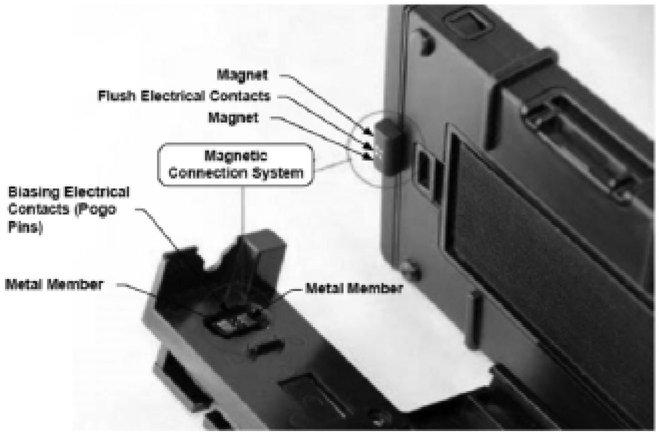
The above figure shows an electronic device with a touch-sensitive screen display **25**, inserted into the cavity of a protective cover **100**, a docking cradle **5** that has a tray **7** with a base receiver **9**, a docking connector **3**, which includes a plurality of biasing electrical contacts (typically biasing pogo pins or biasing leaf spring contacts) that are coupled to leads in a cable **15**, and a clamp **19**, which has a compression component or arm **21**. See '026, '515, '334, and '309 Patents at Cols. 6-10. All of the patents-in-suit identify Jeffrey D. Carnevali as the inventor, and indicate that NPI is the assignee and applicant. Id. at 1.

In response to NPI's Second Amended Complaint, GPS filed a Third **[*3]** Amended Answer and Amended Counterclaims ("3d Am. Ans."), docket no. 38.[1] In its operative pleading, GPS has asserted twelve (12) affirmative defenses, four (4) of which NPI moves to strike, and seventeen (17) counterclaims, the last nine (9) of which NPI moves to dismiss. GPS alleges, in essence, that Joseph Todrzak of GPS is the inventor (or at least a co-inventor) of the technology at issue, that the patents-in-suit were procured by fraud on the U.S. Patent and Trademark Office ("PTO"), and that NPI has misused the patents to engage in anticompetitive behavior. See 3d Am. Ans. at ¶¶ 97-407 (docket no. 38). According to GPS, while attending a trade show in Las Vegas in January 2014, Todrzak met

---

[1] NPI accuses GPS of violating *Federal Rule of Civil Procedure 15*, which permits a party to amend its pleading "once as a matter of course" within 21 days after (i) serving it, (ii) service of a responsive pleading, or (iii) service of a motion under *Rule 12(b)*, *(e)*, or *(f)*, whichever is earlier. See *Fed. R. Civ. P. 15(a)(1)*. NPI contends that GPS used its "once as a matter of course" opportunity when it filed its Second Amended Answer and Amended Counterclaims, docket no. 35, on December 8, 2020. Citing *Ramirez v. County of San Bernardino, 806 F.3d 1002 (9th Cir. 2015)*, GPS counters that all prior amendments of its responsive pleading were filed with NPI's consent, as "other amendments" pursuant to *Rule 15(a)(2)*, and that it invoked its "once as a matter of course" right only in filing its Third Amended Answer and Amended Counterclaims, docket no. 38. NPI does not dispute that GPS's latest pleading was filed within 21 days after NPI filed its original motion to dismiss, docket no. 36, which was later voluntarily withdrawn, see Notice (docket no. 44), and NPI has not disagreed with GPS's characterization of its earlier amendments as having been filed upon agreement of the parties, see Reply (docket no. 69); see also Stip. Mot. (docket no. 32). The Court finds no procedural deficiency in GPS's operative pleading, but to the extent that GPS had already exercised its "once as a matter of course" option, the Court hereby GRANTS leave to amend nunc pro tunc and considers GPS's Third Amended Answer and Amended Counterclaims properly filed.

representatives of a South Korean company known as Dae Han and learned of a magnetic connection system marketed under the brand name "Magtron." Id. at ¶ 103. By early February 2014, the Magtron system had been incorporated into GPS's electronic-device cradle called the Ultra Pro 7. Id. at ¶¶ 111-13. GPS avers that, since early 2014, the magnetic connection system and other material features of the Ultra Pro 7 have remained substantially the same, and that they are incorporated into the Accused **[*4]** Products, namely ATMOS cradle kits, ELD vehicle mount kits, Flex II cradle kits, Flex III ATMOS cradle kits, Eclipse PTT and ATMOS cradle packages, Push-to-Talk cradle packages, and various GPS Lockbox Rugged Cases, all of which are designed for Samsung devices. See id. at ¶ 116; see also 2d Am. Compl. at ¶¶ 29, 36, 45, & 52 (docket no. 43) (describing the Accused Products). In its operative pleading, GPS has offered the following view of the magnetic connection system at issue:



3d Am. Ans. at ¶ 114 (docket no. 38).

GPS indicates that Todrzak and a colleague, Jack Dovey, "presented, offered for sale, and otherwise made public" the Ultra Pro 7 (and two other products containing the magnetic connection system) at the Sprint Trade Show in Seattle, which was held in February 2014. Id. at ¶ 118. GPS further alleges that, in March or April 2014, Todrzak and Dovey met with Jake Parker and Aaron Hursey (misspelled in GPS's pleading and hereinafter appearing as "Hersey") of NPI at NPI's offices in Seattle and showed them the Ultra Pro 7, to explore the possibility of collaborating on its production. Id. at ¶¶ 129-38. According to GPS, in August 2014, NPI filed a patent application **[*5]** that was the first one to include any reference to a magnetic connection system. See id. at ¶¶ 145-53. Several more patent applications followed, and during the entire period of patent prosecution, GPS and NPI were competitors in a "relatively small market of customers," but NPI never disclosed GPS's products to the PTO. Id. at ¶¶ 201-02.

The first eight (8) of GPS's counterclaims seek declaratory relief of invalidity and non-infringement as to the four (4) patents-in-suit, and they are not the subject of NPI's motion to dismiss. GPS's remaining counterclaims, which NPI seeks to dismiss, are as follows: Counts Nine, Ten, and Eleven allege inequitable conduct before the PTO, Count Twelve seeks a declaratory judgment that Todrzak is a co-inventor of one or more of the patents-in-suit, Count Thirteen accuses NPI of patent mismarking, Count Fourteen pleads a violation of the unfair competition provisions of Washington's Consumer Protection Act ("CPA"), Counts Fifteen and Seventeen claim that NPI has engaged in anticompetitive conduct in violation of Washington and federal law, respectively, and Count Sixteen asserts that NPI tortiously interfered with GPS's economic relations. Id. at ¶¶ **[*6]** 219-407. GPS's eighth affirmative defense, which NPI moves to strike, overlaps with its Ninth, Tenth, and Eleventh Counterclaims alleging inequitable conduct. See id. at ¶ 70. NPI also asks that the Court strike GPS's ninth, tenth, and twelfth affirmative defenses of patent misuse, license, and unclean hands, respectively. See id. at ¶¶ 71, 72-77, & 80. Finally, counsel for NPI, which has not appeared on behalf of Carnevali, argues that GPS did not timely join Carnevali as a defendant and has not adequately pleaded claims for individual liability against him.

Discussion

A. Counterclaims

HN1[] A motion brought pursuant to *Federal Rule of Civil Procedure 12(b)(6)* to dismiss a counterclaim is evaluated under the same standards applicable to a motion to dismiss a complaint. See *Lemman v. Foley, No. C20-591, 2020 U.S. Dist. LEXIS 229456, 2020 WL 7181055, at *1 (W.D. Wash. Dec. 7, 2020)*. In a patent case, *Rule 12(b)(6)* motions are governed by regional circuit law. *Deep9 Corp. v. Barnes & Noble, Inc., No. C11-35, 2012 U.S. Dist. LEXIS 203227, 2012 WL 13019208, at *2 (W.D. Wash. July 11, 2012)* (citing *McZeal v. Sprint Nextel Corp., 501 F.3d 1354, 1355-56 (Fed. Cir. 2007)*, and *Polymer Indus. Prods. Co. v. Bridgestone/Firestone, Inc., 347 F. 3d 935, 937 (Fed. Cir. 2003)*). The Ninth Circuit instructs that, when considering a *Rule 12(b)(6)* motion to dismiss, the Court must accept all well-pleaded facts as true and draw all reasonable inferences in favor of the non-moving party. See id. (citing *Wyler Summit P'ship v. Turner Broad. Sys., Inc., 135 F.3d 658, 661 (9th Cir. 1998)*).

HN2[] Although a pleading challenged by a *Rule 12(b)(6)* motion to dismiss need not provide detailed factual allegations, it must offer "more than labels and conclusions" and contain more **[*7]** than a "formulaic recitation of the elements of a cause of action." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A pleading may be lacking for one of two reasons: (i) absence of a cognizable legal theory, or (ii) insufficient facts to support a cognizable legal claim. *Robertson v. Dean Witter Reynolds, Inc., 749 F.2d 530, 534 (9th Cir. 1984)*. The question for the Court is whether the facts in the pleading sufficiently state a "plausible" ground for relief. *Twombly, 550 U.S. at 570*. If the Court dismisses a pleading or portions thereof, it must consider whether to grant leave to amend. *Lopez v. Smith, 203 F.3d 1122, 1130 (9th Cir. 2000)*; see *Fed. R. Civ. P. 15(a)(2)* (leave to amend should be "freely" given "when justice so requires").

1. Inequitable Conduct

HN3[] Although the Ninth Circuit's procedural standards apply to NPI's *Rule 12(b)(6)* motion, whether inequitable conduct has been adequately pleaded is a question of Federal Circuit, not regional circuit, jurisprudence because it "pertains to or is unique to patent law." *Deep9, 2012 U.S. Dist. LEXIS 203227, 2012 WL 13019208, at *2* (citing *Exergen Corp. v. Wal-Mart Stores, Inc., 575 F.3d 1312, 1326 (Fed. Cir. 2009)*). "The substantive elements of inequitable conduct are: (1) an individual associated with the filing and prosecution of a patent application made an affirmative misrepresentation of a material fact, failed to disclose material information, or submitted false material information; and (2) the individual did so with a specific intent to deceive the PTO." Id. Although scienter may be alleged **[*8]** generally, a pleading of inequitable conduct must, in addition to stating the who, what, when, where, and how of the material misrepresentation or omission, "include sufficient facts from which a court can 'reasonably infer that a specific individual both knew of the invalidating information that was withheld from the PTO and withheld that information with a specific intent to deceive the PTO.'" Id. (quoting *Delano Farms Co. v. Cal. Table Grape Comm'n, 655 F.3d 1337, 1350 (Fed. Cir. 2011)*); see also *Fed. R. Civ. P. 9(b)*.

GPS's three theories of inequitable conduct are as follows: with the intent to deceive the PTO, Carnevali, a co-owner of NPI, and/or others acting on his behalf (i) misrepresented to the PTO that he was the sole inventor as to the patents-in-suit; (ii) misrepresented (or made inconsistent representations) to the PTO concerning the state of the art related to biasing contacts (biasing pogo pins or biasing leaf spring contacts); and/or (iii) withheld from the PTO information about the Ultra Pro 7 and other GPS products. See 3d Am. Ans. at ¶¶ 219-340 (docket no. 38).

With regard to the first claim of inequitable conduct (the Ninth Counterclaim), NPI argues that GPS has not pleaded enough to establish joint inventorship and that GPS has not provided corroboration for its **[*9]** assertion that Todrzak and Dovey met with Parker and Hersey in March or April 2014. GPS, however, need not prove joint inventorship to establish inequitable conduct; the crux of its claim is that NPI copied GPS's design and that Carnevali, with knowledge of this fact, misrepresented to the PTO that he invented the magnetic connection system disclosed in the various patents-in-suit. GPS also need not, at this stage of the proceedings, proffer evidence to support its factual statements; rather, the Court must accept the allegations of GPS's operative pleading as true and draw all reasonable inferences in favor of GPS. Having done so, the Court concludes that GPS's Ninth

Counterclaim for inequitable conduct is sufficiently pleaded. Whether this particular accusation of inequitable conduct has merit is a question for another day.

As to GPS's second claim of inequitable conduct (the Tenth Counterclaim), NPI does not rely on an absence of a cognizable legal theory or supporting facts, but rather disputes the inferences to be drawn from the allegations of the operative pleading. GPS asserts that NPI indicated in five patent applications filed between February 24, 2014, and March 24, 2015, **[*10]** that "[m]ost docking cradles . . . use some sort of biasing pogo pin or biasing leaf spring contact in the docking connector." 3d Am. Ans. at ¶¶ 275-78. The applications that ripened into the patents-in-suit, however, did not contain this statement about biasing contacts, id. at ¶¶ 279-80, and in response to the patent examiner's initial rejections based on prior art, Carnevali (or others on his behalf) amended the claim language to specify biasing contacts, id. at ¶¶ 283-291. GPS alleges that, but for this change, the claims of the patents-in-suit would not have been allowed, see id. at ¶ 301 (quoting Notice of Allowance for '026 Patent (Application No. 14/936,517)), and that omission of the earlier explanation about the state of the art relating to biasing contacts violated the duty of candor owed to the PTO.

In seeking to dismiss the Tenth Counterclaim, NPI denies that it "removed" the statement about biasing contacts, but this argument involves mere semantics; GPS's pleading is best understood as alleging that the statement was "omitted," as opposed to "removed," from the relevant patent applications. NPI also explains that the patent examiner, not NPI, indicated that the prior art did not **[*11]** disclose biasing contacts, but this account of events misses the point of GPS's accusation. GPS contends that, because Carnevali (or others acting on his behalf) omitted the statement about biasing contacts, the patent examiner was misled into believing that biasing contacts were novel over the prior art. Again, whether GPS's accusation of inequitable conduct has merit is an issue for another time; for now, the Court concludes that GPS has provided the requisite who, what, when, where, and how in support of its Tenth Counterclaim.

With respect to the last claim of inequitable conduct (the Eleventh Counterclaim), NPI again tries to deny the factual allegations of GPS's Third Amended Answer and Amended Counterclaims. NPI, however, cannot prevail on a motion to dismiss by insisting on evidence to corroborate the operative pleading. NPI also discounts the reasonable inferences to be drawn from the factual information proffered by GPS, arguing that, even if Todrzak and Dovey did meet with Parker and Hersey, GPS has not plausibly suggested that Carnevali was told (by Parker or Hersey) about the Ultra Pro 7 or knew he should have disclosed it to the PTO. GPS has, however, further indicated **[*12]** that Carnevali is one of NPI's owners, that the first patent application listing Carnevali as the inventor in which a magnetic connection system was disclosed was filed a few months after Todrzak and Dovey supposedly showed the Ultra Pro 7 to Parker and Hersey, that NPI and GPS were (and still are) competitors in a small market, and that the Ultra Pro 7 and GPS's other products were publicly available during the period when the patents-in-suit were being prosecuted. Taken together, these factual assertions, along with the alleged meeting in the spring of 2014, give rise to a reasonable inference and plausible claim that Carnevali was aware of GPS's magnetic connection system and intentionally withheld it from the PTO. GPS will be permitted to further develop its Eleventh Counterclaim for inequitable conduct.

2. Co-Inventorship

GPS's Twelfth Counterclaim, seeking a declaration that Todrzak is a co-inventor of one or more of the patents-in-suit, is pleaded under *35 U.S.C. § 256*. See 3d Am. Ans. at ¶ 343 (docket no. 38). ***HN4***[] *Section 256*, however, is "limited in effect and cannot properly be the vehicle for substituting [or adding] inventors on a patent . . . [based on] a claim sounding in . . . fraud." *Bemis v. Chevron Rsch. Co., 599 F.2d 910, 912 (9th Cir. 1979)*. *Section 256* provides a **[*13]** remedy for "only innocent errors in joinder or non-joinder of inventors." Id. GPS does not assert inadvertence or mere oversight in omitting Todrzak as a co-inventor, but rather contends his exclusion was fraudulent, and thus, GPS has not stated a cognizable claim under *§ 256*. No purpose would be served in allowing GPS to amend its Twelfth Counterclaim; if Carnevali is not the sole inventor (an assertion that must be proven by clear and convincing evidence), then the patents-in-suit are invalid and Todrzak could not be simply joined as a co-inventor. See *Solomon v. Kimberly-Clark Corp., 216 F.3d 1372, 1381 (Fed. Cir. 2000)*. In light of these rulings, the

Court need not address NPI's arguments concerning the substantive deficiencies of GPS's assertion that Todrzak is a co-inventor of one or more of the patents-in-suit.

3. Patent Mismarking

HN5[] GPS's Thirteenth Counterclaim is brought under 35 U.S.C. § 292, which prohibits inter alia affixing on an unpatented article the word "patent" (or a word or number implying that the item is patented) for the purpose of deceiving the public. GPS contends that NPI has engaged in this type of patent mismarking by listing its patents on a website in a vague, confusing, or inaccurate manner, rather than specifying the relevant patents on its **[*14]** products or accompanying literature. See 3d Am. Ans. at ¶¶ 351-60 (docket no. 38). Because § 292 claims sound in fraud, the heightened pleading standards of Rule 9(b) apply. See *Music Grp. Servs. US Inc. v. Peavey Elecs. Corp., No. C10-2066, 2011 U.S. Dist. LEXIS 168532, 2011 WL 13232515, at *2 (W.D. Wash. June 21, 2011)*. To survive a Rule 12(b)(6) challenge, an accusation of mismarking must contain particularized allegations plausibly showing (i) an unpatented article was (ii) marked in a way that falsely suggested it is patented (iii) with the intent of deceiving the public. See id. (citing *Brinkmeier v. Graco Child.'s Prods. Inc., 684 F. Supp. 2d 548, 551 (D. Del. 2010)*).

HN6[] An item is "unpatented" within the meaning of § 292 if it is "not covered by at least one claim of each patent with which the article is marked." *Clontech Labs., Inc. v. Invitrogen Corp., 406 F.3d 1347, 1352 (Fed. Cir. 2005)*. If a product is mismarked as "patented," then the inquiry is whether the accused party had a reasonable belief that the article was covered by the patent or patents at issue. *Id. at 1352-53*. An honest, but mistaken, view that a mismarked item was indeed patented cannot be a basis for liability, but the mere assertion of a lack of intent to deceive is also not a sufficient defense. *Id. at 1352*. The question of intent is measured by objective criteria and "the *fact* of misrepresentation coupled with proof that the party making it had knowledge of its falsity is enough to warrant drawing the inference that there was a fraudulent intent." Id. (emphasis **[*15]** in original). To survive a motion to dismiss, a mismarking claim must contain "specific underlying facts" tending to show the requisite knowledge from which intent may be inferred. See *In re BP Lubricants USA Inc., 637 F.3d 1307, 1311-12 (Fed. Cir. 2011)*.

In its operative pleading, GPS indicates that (i) NPI sell numerous products under the trademarks "GDS" and "IntelliSkin," (ii) some of these items are not covered by any of the patents-in-suit, (iii) NPI's website associates all of the patents-in-suit with the "GDS" and "IntelliSkin" branded articles, see Ex. E to Tamimi Decl. (docket no. 37-5) (printed from NPI's webpage https://www.rammount.com/legal), and (iv) NPI has admitted in discovery that it sells no embodiment of the claims of one of the four patents-in-suit, namely the '334 Patent. 3d Am. Ans. at ¶¶ 358-59 (docket no. 38). NPI counters that its website contains the explanation that its RAM® products are "covered under one or more of the following patents," which "undercuts" GPS's premise that NPI intended to deceive the public; NPI contends that its overbroad listing of patents serves the public interest by providing notice of all "patents that would need to be avoided to launch a competing product." Mot. at 18-19 (docket no. 47). NPI further argues **[*16]** that GPS's failure to allege that any of NPI's products are not covered by at least one patent is fatal to its mismarking claim.

NPI cites no legal authority to support its propositions concerning what GPS must plead or eventually prove, and *Clontech*, which NPI did not cite, actually contradicts NPI's contentions. *Clontech* suggests that NPI's attempted disclaimer ("one or more of the following") is ineffective and that at least one claim of each listed patent must "read on" the marked article. The Federal Circuit opinion also undermines NPI's apparent assertion that, if at least one listed patent covers the marked product, then the product is not "unpatented" within the meaning of § 292. NPI's mistake in enumerating more patents than it honestly believed protected its "GDS" and "IntelliSkin" articles appears to be one of law, not of fact, and the Court concludes that GPS has adequately pleaded the requisite knowledge from which an intent to deceive may be inferred. Thus, GPS's Thirteenth Counterclaim remains in the case.

4. CPA Violation

Other than noting that an individual may be held personally liable for a CPA violation, see Resp. at 23 (docket no. 67), GPS has made no effort to support its Fourteenth **[*17]** Counterclaim. ***HN7***[] A CPA claim is preempted when it merely restates claims that are or could be brought under federal patent law. See *Milo & Gabby, LLC v. Amazon.com, Inc., 12 F. Supp. 3d 1341, 1347 (W.D. Wash. 2014)*. GPS's operative pleading does not set forth subject matter for the CPA claim that is outside the realm of patent law, and GPS has not stated a cognizable claim for unfair competition under *RCW 19.86.020*. The Court recognizes that NPI did not invoke preemption as a basis for dismissal, and the Court will therefore grant leave to amend, but reminds GPS and its attorneys of their obligations under *Federal Rule of Civil Procedure 11* and *28 U.S.C. § 1927*.

5. Anticompetitive Behavior

GPS's Fifteenth and Seventeenth Counterclaims are predicated on GPS's assertion that the patents-in-suit were procured through fraud. ***HN8***[] An entity that obtained a patent by fraud may not enjoy the limited exception for patents to the monopoly prohibitions of *Section 2 of the Sherman Act*. See *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 175-77, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*; see also *15 U.S.C. § 2*. Because a *Walker Process* monopolization claim arises under the *Sherman Act* (or state ***antitrust law***), and not patent law, it must be evaluated under regional circuit (or state) jurisprudence. See *Chandler v. Phoenix Servs. LLC, 1 F.4th 1013 (Fed. Cir. 2021)* (concluding that the Federal Circuit lacks appellate jurisdiction as to a standalone *Walker Process* monopolization claim). Use of a fraudulently-acquired patent constitutes an antitrust violation if the patent was employed to produce (or **[*18]** attempt to produce) monopoly power in a specified market. See *Bourns, Inc. v. Raychem Corp., 331 F.3d 704, 711 (9th Cir. 2003)*. To establish liability for monopolization, GPS must show that (i) NPI possessed monopoly power in the relevant market; (ii) NPI willfully acquired or maintained such power; and (iii) GPS suffered causal antitrust injury. See *Fed. Trade Comm'n v. Qualcomm Inc., 969 F.3d 974, 989-90 (9th Cir. 2020)*. To prove attempted monopolization, GPS must demonstrate that (i) NPI engaged in predatory or anticompetitive conduct with (ii) a specific intent to monopolize and (iii) a dangerous probability of achieving monopoly power. See *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*; see also *Cascade Health Sols. v. PeaceHealth, 515 F.3d 883, 893 (9th Cir. 2008)*. But see *Boeing Co. v. Sierracin Corp., 108 Wn.2d 38, 59, 738 P.2d 665 (1987)* (declining to adopt "dangerous probability of success" as an element of a claim under *RCW 19.86.040* because it may be inferred from specific intent and monopoly power, citing *Lessig v. Tidewater Oil Co., 327 F.2d 459, 474-75 (9th Cir. 1964)*, abrogated by *Spectrum Sports, 506 U.S. at 457-59*).

NPI contends that GPS's antitrust counterclaims should be dismissed because GPS has not (i) adequately pleaded inequitable conduct, (ii) defined the relevant market, or (iii) alleged an antitrust injury. NPI's first argument fails for the reasons set forth in Section A.1 of this discussion. NPI's second ground for dismissal accuses GPS of defining the market in a "hyper-narrow" manner, see Mot. at 16 (docket no. 47), but the authority on which NPI relies does not support such conclusion. **[*19]** See *Adidas Am., Inc. v. Nat'l Collegiate Athletic Ass'n, 64 F. Supp. 2d 1097 (D. Kan. 1999)*. As explained in *Adidas*, "a relevant market must be defined by 'the interchangeability of use or the cross-elasticity of demand between the product [in question] and substitutes for it.'" *Id. at 1102* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*). GPS's operative pleading satisfies this standard; it indicates that four or five entities, including NPI and GPS, are the primary suppliers of articles similar to the Accused Products, and it names ProClip USA Inc. ("ProClip"), Brodit AB ("Brodit"), and Arkon Resources, Inc. ("Arkon") as the other competitors. 3d Am. Ans. at ¶¶ 378-81 (docket no. 38). NPI does not contend that GPS has omitted one or more sources of interchangeable or substitute goods or that GPS could not cure any deficiency by amending its definition of the relevant market. Thus, NPI has not demonstrated that failure to plead the relevant market constitutes a basis to dismiss with prejudice GPS's counterclaims under *Sherman Act § 2* and/or *RCW 19.86.040*.

NPI's last assertion, namely that GPS has not alleged an antitrust harm, likewise lacks merit. GPS's operative pleading indicates that NPI has sued ProClip and Brodit in the District of Wisconsin for infringement of at least two of the patents-in-suit in this matter, and that NPI has entered into **[*20]** a licensing agreement with Arkon after suing it for patent infringement. See 3d Am. Ans. at ¶¶ 379 & 381. In essence, GPS contends that NPI is using the patents-in-suit, which were allegedly obtained through fraud, to try to force every competitor out of the market. Of course, if the patents-in-suit are valid, NPI may, without fear of antitrust liability, exercise its right to exclude others from practicing the art described therein. See *In re Indep. Serv. Orgs. Antitrust Litig., 203 F.3d 1322, 1325 (Fed. Cir. 2000)* ("The commercial advantage gained by new technology and its statutory protection by patent do not covert the possessor thereof into a prohibited monopolist." (quoting *Abbott Labs. v. Brennan, 952 F.2d 1346, 1354 (Fed. Cir. 1991)*)). On the other hand, if the patents-in-suit are tainted by inequitable conduct before the PTO, then NPI's systematic use of them in litigation against its competitors results in the type of anticompetitive injury that the *Sherman Act* and *RCW 19.86.040* are intended to rectify. See *id. at 1326* (citing *Walker Process, 382 U.S. at 177*). The Court concludes that GPS's Fifteenth and Seventeenth Counterclaims are adequately pleaded.

6. Tortious Interference

In response to NPI's motion to dismiss, GPS offers minimal analysis concerning how the facts alleged in its operative pleading support its Sixteenth Counterclaim. ***HN9***[] The tort of interference with a business **[*21]** expectancy has five elements: (i) the existence of a business expectancy; (ii) knowledge of that expectancy; (iii) interference with the expectancy done for an improper purpose or using improper means; (iv) termination of the expectancy induced or caused by the interference; and (v) resultant damage. See *Greensun Grp., LLC v. City of Bellevue, 7 Wn. App. 2d 754, 768, 436 P.3d 397 (2019)* (quoting *Pac. Nw. Shooting Park Ass'n v. City of Sequim, 158 Wn.2d 342, 351, 144 P.3d 276 (2006)*). In connection with the Sixteenth Counterclaim, the business expectancy at issue was the potential sale of GPS to a third party. See 3d Am. Ans. at ¶ 393 (docket no. 38). The operative pleading, however, does not indicate that NPI knew about the potential sale and does not explain how or why the potential sale was interrupted or terminated. Absent additional factual allegations, the Court cannot conclude that the tortious interference counterclaim is plausible. Although NPI has sought dismissal with prejudice, it has not made a showing that amendment would be futile. Thus, GPS will be provided an opportunity to try to correct the deficiencies of its Sixteenth Counterclaim.

B. Affirmative Defenses

HN10[] Like a *Rule 12(b)(6)* motion, a motion brought under *Federal Rule of Civil Procedure 12(f)* to strike one or more affirmative defenses is governed by regional circuit law. See *Ameranth, Inc. v. Pizza Hut, Inc., No. 11-CV-1810, 2012 U.S. Dist. LEXIS 208152, 2012 WL 12918370, at *2 (S.D. Cal. June 26, 2012)* (citing *McZeal, 501 F.3d at 1355-56*). The Court may strike from a pleading "any **[*22]** insufficient defense or any redundant, immaterial, impertinent, or scandalous matter." *Fed. R. Civ. P. 12(f)*. Motions to strike are generally disfavored and should be granted only when doing so will "save time and expense" by disposing of matters that "clearly could have no possible bearing on the subject of the litigation." *Ameranth, 2012 U.S. Dist. LEXIS 208152, 2012 WL 12918370, at *3* (citing *Neilson v. Union Bank of Cal., N.A., 290 F. Supp. 2d 1101, 1152 (C.D. Cal 2003)*, and quoting *Platte Anchor Bolt, Inc. v. IHI, Inc., 352 F. Supp. 2d 1048, 1057 (N.D. Cal. 2004)*).

Whether *Twombly*'s "plausibility" standard applies to affirmative defenses has not been addressed by the Ninth Circuit, and district courts have ruled in a variety of ways. *2012 U.S. Dist. LEXIS 208152, [WL] at *3* & n.1. In *Ameranth*, in declining to require that affirmative defenses meet the "plausibility" test, the court reasoned that *Rule 8(a)(2)*'s requirement that a pleader "show" entitlement to relief, which is the language upon which *Twombly*'s doctrines are built, differs from *Rule 8(c)*'s directive that a responding party "state" its defenses. Id. The *Ameranth* Court further observed that practical and judicial economy considerations (for example, the limited time allowed to prepare an answer, avoidance of repeated amendments, and discouragement of motions to strike brought for dilatory or harassment purposes) support the traditional standard for pleading affirmative defenses, namely whether the statement provides "fair notice." *2012 U.S. Dist. LEXIS 208152, [WL] at *4* (citing *Wyshak v. City Nat'l Bank, 607 F.2d 824, 827 (9th Cir. 1979)*); see **[*23]** also *Hargrove v. Hargrove, No. 16-1743, 2017 U.S. Dist. LEXIS 69289, 2017 WL 1788426, at *1 (W.D. Wash. May 5, 2017)* ("Courts generally decline to strike affirmative defenses unless the moving party shows [that] 'there are no questions of fact, that any questions of law are clear and not in dispute, and that under no set of circumstances could the defense succeed.'").

1. Inequitable Conduct, Patent Misuse, and Unclean Hands

For the same reasons NPI failed to demonstrate that GPS's inequitable conduct counterclaims should be dismissed, NPI's motion to strike GPS's affirmative defenses of inequitable conduct, patent misuse, and unclean hands lacks merit. As drafted, these affirmative defenses give "fair notice" of GPS's contention that it cannot be held liable for infringement of the patents-in-suit because they are invalid and/or unenforceable, NPI is misusing them, and/or NPI is equitably barred from recovering by its improper behavior.

2. License

In its tenth affirmative defense, GPS indicates that some of the Accused Products are covered by the aforementioned license between NPI and Arkon. 3d Am. Ans. at ¶¶ 73-76 (docket no. 38). GPS has further explained that it purchases (or has purchased) some of the Accused Products from Arkon. Resp. at 17 (docket no. 67). NPI, however, has proffered evidence **[*24]** outside the pleadings[2] showing that the license with Arkon concerns only U.S. Patent No. 6,585,212, which is not one of the patents-in-suit. See Settlement Agreement, Ex. E to McMichael Decl. (docket no. 48-5). In response, GPS has not identified any other license that might support its affirmative defense, and thus, has not given the requisite "fair notice." Moreover, NPI has met its burden to show that, with respect to GPS's license defense, no questions of fact exist, the questions of law are clear and not in dispute, and given the circumstances, the defense cannot succeed. See *Hargrove, 2017 U.S. Dist. LEXIS 69289, 2017 WL 1788426, at *1*. GPS's tenth affirmative defense is STRICKEN as insufficient. See *Fed. R. Civ. P. 12(f)*.

C. Individual Liability

The record contains no indication that GPS's third-party claims against Carnevali have been properly served, and no attorney has appeared on Carnevali's behalf. Unless GPS takes the steps necessary to join Carnevali as a third-party defendant, the Court sees no purpose in addressing the arguments made by NPI concerning the insufficiency of GPS's third-party claims against Carnevali. The Court notes, however, that Carnevali need not be individually named as a party with respect to GPS's inequitable conduct counterclaims; the patents-in-suit **[*25]** have been assigned to NPI, and NPI is the real-party-in-interest in supporting their validity. See *Delano Farms, 655 F.3d at 1342* (observing that, if a patentee has transferred all substantial rights in a patent to another, for example, an exclusive licensee, then the assignor is no longer regarded as the owner of the patent and need not be joined in any action brought on the patent).

Conclusion

For the foregoing reasons, the Court ORDERS:

(1) NPI's motion, docket no. 47, is GRANTED in part, STRICKEN in part, and DENIED in part, as follows:

(a) GPS's Twelfth Counterclaim for a declaration of co-inventorship is DISMISSED with prejudice;

(b) GPS's Fourteenth Counterclaim for violation of the CPA is DISMISSED without prejudice and with leave to amend;

(c) GPS's Sixteenth Counterclaim for tortious interference with business expectancy is DISMISSED without prejudice and with leave to amend;

(d) GPS's tenth affirmative defense based on a license between NPI and Arkon is STRICKEN with prejudice;

(e) NPI's arguments advanced on behalf of Carnevali are STRICKEN as premature and not yet ripe for the Court's consideration; and

---

[2] The directive requiring the Court to convert a *Rule 12(b)(6)* or *12(c)* motion into one for summary judgment if matters outside the pleadings are presented and not excluded does not apply to *Rule 12(f)* motions to strike. See *Fed. R. Civ. P. 12(d)*.

(f) NPI's motion is otherwise DENIED.

(2) Any amended pleading by GPS must be electronically filed within **[*26]** fourteen (14) days of the date of this Order. Any responsive pleading or motion by NPI shall be filed within fourteen (14) days thereafter. See *Fed. R. Civ. P. 15(a)(3)*.

(3) The Clerk is directed to send a copy of this Order to all counsel of record.

IT IS SO ORDERED.

Dated this 25th day of October, 2021.

/s/ Richard A. Jones

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Under Fed. R. Civ. P. 12(b)(6), a defendant may move to dismiss for failure to state a claim upon which relief can be granted. A plaintiff must state enough facts to state a claim to relief that is plausible on its face. A claim has facial plausibility if the plaintiff pleads facts that allow the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

In resolving a Fed. R. Civ. P. 12(b)(6) motion under Twombly, the court must follow a two-pronged approach. First, the court must accept all well-pleaded factual allegations as true, but threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice. Nor must the court accept as true a legal conclusion couched as a factual allegation. Second, assuming the veracity of well-pleaded factual allegations, the court must determine whether they plausibly give rise to an entitlement to relief. This determination is context-specific, requiring the court to draw on its experience and common sense, but there is no plausibility where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct.

Business & Corporate Compliance > ... > Causes of Action Involving Trademarks > Infringement Actions > Determinations

Trademark Law > Causes of Action Involving Trademarks > Infringement Actions > Burdens of Proof

HN3[] **Infringement Actions, Determinations**

To state a claim for trademark infringement, a plaintiff must allege two elements: first, that the plaintiff owns a valid and protectible trademark; and second, that a defendant used, in commerce, a similar mark without authorization in a manner that is likely to cause consumer mistake, confusion, or deception.

Business & Corporate Compliance > ... > Causes of Action Involving Trademarks > Infringement Actions > Determinations

HN4[] **Infringement Actions, Determinations**

15 U.S.C.S. § 1125 is concerned with the confusion that may arise from trademark infringement—not the confusion that may arise from a wrongfully-registered mark.

Antitrust & Trade Law > Consumer Protection > Likelihood of Confusion > False Designation of Origin

Trademark Law > ... > Particular Subject Matter > Geographic Terms > Terms Ineligible for Protection

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Trade Dress Protection > Causes of Action

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

HN5[] **Likelihood of Confusion, False Designation of Origin**

The Lanham Act prohibits a person from misrepresenting the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities in commercial advertising or promotion. 15 U.S.C.S. § 1125(a)(1)(B). A false advertising claim requires a showing that: (1) the defendant made a false statement either about the plaintiff's or its own product; (2) the statement was made in commercial advertisement or promotion; (3) the statement actually deceived or had the tendency to deceive a substantial segment of its audience; (4) the deception is material; (5) the defendant caused its false statement to enter interstate commerce; and (6) the plaintiff has been or is likely to be injured as a result of the false statement, either by direct diversion of sales from itself to the defendant, or by a lessening of goodwill associated with the plaintiff's product. A false designation of origin claim requires that a plaintiff show that the defendant used in commerce any word, term, name, symbol, or device that is likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of defendant with plaintiff, or as to the origin, sponsorship, or approval of his goods by plaintiff.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN6[] Actual Fraud, Elements

To state a claim for fraudulent inducement under California law, a plaintiff must allege: (1) a misrepresentation; (2) knowledge of its falsity; (3) with intent to defraud; (4) justifiable reliance; and (5) resulting damages.

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

HN7[] Actual Fraud, Elements

Language considered non-actionable puffery cannot form the basis for fraudulent inducement claims because vague, exaggerated, generalized or highly subjective statements regarding a product or business are extremely unlikely to induce consumer reliance.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN8[] Heightened Pleading Requirements, Fraud Claims

While mere failure to perform a contract does not constitute fraud, a promise made without the intention to perform can be actionable fraud. To establish a claim of fraudulent inducement, one must show that the defendant did not intend to honor its contractual promises when they were made. Under Fed. R. Civ. P. 9(b), while the factual circumstances of the fraud itself must be alleged with particularity, the state of mind—or scienter—of the defendants may be alleged generally. Nonetheless, allegations of intent must satisfy the plausibility requirements of Fed. R. Civ. P. 8(a). Under Rule 8(a), a plaintiff must point to facts which show that defendant harbored an intention not to be bound by terms of the contract at formation. It is insufficient to allege intent based purely on defendant's failure to perform its promises.

Business & Corporate Compliance > ... > Trademark Law > Causes of Action Involving Trademarks > Fraudulent Registrations

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Elements

Evidence > Burdens of Proof > Allocation

HN9[] Causes of Action Involving Trademarks, Fraudulent Registrations

When a party asserts a claim for fraud on the U.S. Patent and Trademark Office, it must prove a false representation regarding a material fact, the registrant's knowledge or belief that the representation is false, the intent to induce reliance upon the misrepresentation and reasonable reliance thereon, and damages proximately resulting from the reliance. The party alleging trademark fraud bears a heavy burden of proof.

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN10[] Standing, Injury in Fact

Injury-in-fact for standing requires a plaintiff to allege an injury that is both concrete and particularized.

Business & Corporate Compliance > ... > US Trademark Trial & Appeal Board Proceedings > Cancellations > Grounds

Trademark Law > ... > Registration Procedures > Federal Registration > Degree of Protection

HN11[] Cancellations, Grounds

15 U.S.C.S. § 1119 gives district courts the power to order the cancellation of a trademark registration in any action involving a registered mark. 15 U.S.C.S. § 1119. The plain language specifies that cancellation may only be sought if there is already an ongoing action that involves a registered mark; it does not indicate that a cancellation claim is available as an independent cause of action.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Torts > Business Torts > Unfair Business Practices > Elements

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN12[] State Regulation, Claims

California's Unfair Competition Law (UCL) prohibits any unlawful, unfair, or fraudulent business act or practices. Cal. Bus. & Prof. Code § 17200 et. seq. To prevail on a UCL claim, a plaintiff must make a twofold showing: he or she must demonstrate injury in fact and a loss of money or property caused by unfair competition.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN13[] Trade Practices & Unfair Competition, State Regulation

In the context of California's Unfair Competition Law, Cal. Bus. & Prof. Code § 17200, unfair means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN14[] **State Regulation, Claims**

To have standing to assert a California's Unfair Competition Law, Cal. Bus. & Prof. Code § 17200 claim, the plaintiff must (1) establish a loss or deprivation of money or property sufficient to qualify as injury in fact, i.e., economic injury, and (2) show that the economic injury was the result of, i.e., caused by, the unfair business practice or false advertising that is the gravamen of the claim.

Opinion

CIVIL MINUTES - GENERAL

Proceedings: [IN CHAMBERS] Order Regarding Motion to Dismiss

Defendant DFO Global Performance Commerce Ltd. ("DFO") filed a motion to dismiss the Fourth Amended Complaint ("4AC") of Plaintiffs Agency Y LLC ("Agency Y") and Global Media Holdings Incorporated ("Global Media"). Mot., Dkt. No. 67. Agency Y opposed the motion. Opp'n, Dkt. No. 70. DFO replied. Reply, Dkt. No. 71.

For the following reasons, the Court **GRANTS** the motion, without leave to amend.

I. BACKGROUND

The following facts are alleged in Agency Y's 4AC. See 4AC Dkt. No. 67.

Tim Burd ("Burd") is a high-profile internet marketing professional. Id. ¶ 15. Burd's name is recognized as a source of origin for his internet marketing services, some of which he provides through his corporation, Global Media. Id. Global Media is the owner of the service mark TIM BURD and obtained a service mark registration. Id. Later in 2016, Burd and Sean Brown ("Brown") founded Agency Y. Id. ¶ 17. They also created a brand under the service mark "AGENCY Y" to promote Agency Y's **[*2]** internet marketing services via the website at "www.agencyy.com" (the "Domain"). Id. ¶ 18.

In December 2016, Agency Y registered the Domain through the registrar GoDaddy, which has been an important mechanism through which Agency Y has interacted with its clients. Id. ¶ From 2016 to 2020, Agency Y participated in numerous regional and global conferences to market and promote its services under the mark. Id. ¶ 21. In 2017, Agency Y expended approximately $700,000 on the marketing, advertising, and promotion of services offered under the mark. Id. From December 2016 to February 2017, the mark and services offered thereunder received significant media coverage, word of mouth marketing, and personal referrals. Id. ¶ 22. As a result, the mark became distinctive to both the public and Agency Y's trade. Id. ¶ 23. In 2017, Agency Y generated over $750,000 in Year-1 revenue under the mark. Id. The mark came to signify the high quality and high-end services designated by the mark and acquired distinction, reputation, and goodwill belonging exclusively to Agency Y. Id. ¶ 25.

Prior to working with DFO, Agency Y received virtually no complaints. Id. ¶ 26. After DFO took over day-to-day operations, **[*3]** a deluge of complaints followed, particularly regarding a lack of follow-up. Id. Alex Brown ("DFO Brown"), previously DFO's Chief Marketing Officer, admitted that he had not checked the Agency Y leads in months and had not followed up on a single lead. Id.

On October 19, 2016, Jordan Rolband ("Rolband"), President of DFO, texted Burd about traveling to Toronto, Canada to discuss partnering on an advertising agency. Id. ¶ 27. Over dinner, Burd, Rolband, and Niket Shah of Facebook discussed a strategic partnership, and Rolband stated that DFO wanted to associate with the Burd brand to help repair its damaged reputation. Id. On November 17, 2016, Burd met with Rolband and Bruce Cran, DFO's CEO, where Cran promised unlimited resources, funding, growth potential, and synergies between the Burd brand and DFO. Id. ¶ 28. Later in December, Cran and Rolband offered Burd an opportunity to work with them in a minority ownership capacity, which Burd rejected. Id. On September 21, 2017, Burd met with Robland at DFO's San Diego office, where Robland shared details on DFO's internal resources and promised to make Agency Y "one of the biggest powerhouse agencies in the world" and promised that the **[*4]** deal would be worth "millions of dollars to Agency Y." Id. ¶ 29.

In October 2017, Cran approached Burd and Brown about creating a joint venture between Cran's company and Agency Y to promote the AGENCY Y brand and grow Agency Y's business. Id. ¶ 30. In reliance on Cran's representations, on November 8, 2017, Agency Y entered into an agreement (the "Agreement") with DFO NJ for a 12-month term that was renewable for additional 12-month terms. Id. ¶ 31. The Agreement promised Agency Y commissions for referring its clients to DFO in the event that Agency Y's clients engage DFO to perform services. Id. ¶ 32. In return, DFO agreed to manage leads, handle day-to-day client management, and push for growth and upsells. Id.

For approximately two years thereafter, DFO was not taking any steps to grow Agency Y or managing leads or effectively overseeing the day-to-day client management. Id. ¶ 33. On October 2, 2018, DFO Canada filed an application with the USPTO to register the AGENCY Y mark despite not owning it at the time. Id.

During the initial and first renewal term of the Agreement, Agency Y remained the owner of the AGENCY Y service mark and all goodwill associated with it per Section 8(d) **[*5]** of the Agreement. Id. ¶ 34. In less than a year after DFO's assumption of the Agency Y brand, Agency Y noticed that the brand's business reputation was suffering as a result of DFO's subpar service and that any associated goodwill diminished. Id. ¶ 35. Clients were less likely to hire Agency Y for its services and threatened to leave Agency Y. Id. On one occasion, DFO high jacked a referred client's product and business model. Id. ¶ 36. Upon receiving confidential business information from the client, DFO Brown and Jon Biggs ("Biggs") replicated the client's product using data from the client's ad campaigns at Agency Y. Id. ¶¶ 36, 37.

In February 2019, Cran told Burd and Brown that he intended to make some changes to the Agreement to "bring it in line with the business relationship." Id. ¶ 39. Cran said that Agency Y was such a small deal that he did not feel the negotiate and that he would stop working on Agency Y if they did not comply with his demands. Id. On February 27, 2019, Agency Y entered into its first amendment to the Agreement ("First Addendum"). Id. ¶ 40. The First Addendum states that DFO NJ was replaced by DFO BC or DFO NV—which have identical names (although the First **[*6]** Addendum does not specify which is DFO NJ's successor). Id. ¶ 40. The First Addendum also replaced the provision in the Agreement that each party remains the owner of its respective marks and associated goodwill with an assignment from Agency Y to DFO NJ's successor (either DFO BC or DFO NV). Id.

In September 2019, Cran proposed to Burd and Brown the execution of a Second Addendum to the Agreement ("Second Addendum"). Id. ¶ 45. The Second Addendum included a provision whereby Agency Y agreed to sell and transfer its brand name, domain, and website to DFO. Id. Burd was hesitant to agree to the provision, but Cran promised that if the deal went awry, Agency Y would simply take back its intellectual property. Id. Unbeknownst to Burd and Brown, DFO Canada had already registered the AGENCY Y mark with the USPTO. Id. ¶¶ 45-46. Based on Cran's representations of unlimited resources, intentions to grow Agency Y, and Burd and Brown's belief that DFO would deliver on its promise to return Agency Y's intellectual property if the deal went awry, on September 10, 2019, Agency Y entered into the Second Addendum, which also did not specify whether DFO BC or DFO NV is DFO NJ's successor. Id. ¶ 47.

[*7] The Second Addendum changed the mechanism for extension of the term by putting DFO on a "probationary period" with certain performance benchmarks it needed to meet to prevent termination of the Agreement. Id. ¶ 48. The Second Addendum also provided that in the event of termination, DFO would return to Agency Y its intellectual property, which would include the Agency Y brand. Id. However, Cran had no intention of returning to Agency Y its intellectual property and instead intended for DFO to "regain control over the [AGENCY Y] mark, its trademark registration, and the agencyy.com domain name." Id. In fact, upon termination of the Agreement and Agency Y's request for its intellectual property, Cran proceeded to eviscerate Agency Y and moved the business to Amasa, rather than complying with the terms of the Agreement. Id. DFO "intended for Agency Y and Burd to continue to refer its clients to [DFO], take over these clients, use the Agency Y brand and the Tim Burd brand to attract customers and repair their tarnished reputation, and re-brand the services to make the Agency Y brand worthless and irrelevant, simultanesouly shutting Burd and Brown out of the business and denying them of any revenue generated from clients." Id.

Burd and Brown received letters from DFO legal that they had breached the Agreement. Id. ¶ 51. DFO proceeded to disintegrate Agency Y and took clients without compensating either Burd or Brown. Id. Cran informed them of the AGENCY Y trademark registration and stated there was nothing they could do to stop DFO's takeover of the Agency Y brand. Id. On June 4, 2020, Agency Y invoked Section 3(c) of the Second Addendum that authorizes the return of the Agency Y intellectual property rights to Agency Y. Id. ¶ 52. In the meantime, DFO had dismantled the Agency Y website and changed the www.agencyy.com website to display Agency Y on the "Home Page," but to link to DFO's new company, Amasa, at the "About" section. Id. ¶ 53. The Agency Y web address led only to the new website, www.agencyamasa.com, and remnants of Agency Y remained on DFO's website, but clicking on the link for more information about Agency Y directed to www.agencyamasa.com. Id. Moreover, on June 22, 2020, DFO **[*8]** announced a rebranding initiative before the parties had an opportunity to discuss the proper distribution of the intellectual property assets upon termination of the Agreement. Id. ¶ 54.

The announcement is entitled, "Agency Y Announces Major Rebrand," despite the fact that it was DFO, not Agency Y, who undertook the rebranding initiative. Id. ¶ 55. DFO concealed the fact that it is DFO, not Agency Y, that is rebranding itself as Amasa by deceptively calling itself the "[m]edia buying firm Agency Y." Id. The announcement also states that the initiative is the result of the dissolution of DFO's agreement with Tim Burd, rather than stating that the entire DFO/Agency relationship dissolved, thereby giving the impression that while Tim Burd is no longer an associated party, DFO and Agency Y are still doing business together. Id. Burd received Facebook messages and calls from potential clients and people in the industry asking if Burd had sold Agency Y to DFO, if Agency Y was still in business, and whether Agency Y was still able to take on clients. Id. ¶ 56. As he was unable to provide an accurate answer, this caused further damage to his reputation in the industry. Id. In making it appear **[*9]** as though Agency Y no longer existed as a company, DFO vitiated Agency Y's right under the Second Addendum to reclaim its brand, domain, and website address. Id. ¶ 57.

II. Legal Standard

HN1[] Under *Rule 12(b)(6)*, a defendant may move to dismiss for failure to state a claim upon which relief can be granted. A plaintiff must state "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim has "facial plausibility" if the plaintiff pleads facts that "allow[] the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

HN2[] In resolving a 12(b)(6) motion under *Twombly*, the Court must follow a two-pronged approach. First, the Court must accept all well-pleaded factual allegations as true, but "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Iqbal, 556 U.S. at 678*. Nor must the Court "'accept as true a legal conclusion couched as a factual allegation.'" *Id. at 678-80* (quoting *Twombly, 550 U.S. at 555*). Second, assuming the veracity of well-pleaded factual allegations, the Court must "determine whether they plausibly give rise to an entitlement to relief." *Id. at 679*. This determination is context-specific, requiring the Court to draw on its experience and **[*10]** common sense, but there is no plausibility "where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct." Id.

III. DISCUSSION

A. Agency Y's Claims

1. Trademark Infringement

HN3[] To state a claim for trademark infringement, a plaintiff must allege two elements: first, that the plaintiff owns a valid and protectible trademark; and second, that a defendant used, in commerce, a similar mark without authorization in a manner that is likely to cause consumer mistake, confusion, or deception. *So. Cal. Darts Ass'n v. Zaffina, 762 F.3d 921, 929 (9th Cir. 2014)*.

DFO asks the Court to dismiss Agency Y's federal and common law trademark infringement claims as they relate to the AGENCY Y mark on the ground that limiting the claims to the period of October 2018 to February 2019 (4AC ¶ 67) does not cure their inconsistencies with the agreements that bar the causes of action, as noted by the Court's prior orders. Mot. at 4. DFO reasons that the Agreement, which operated from November 2017 until the First Addendum was executed in February 2019, gave DFO a "license to use . . . Agency Y's name and associated logos and domain names(s) . . ." Agreement, 4AC, Ex. A, § 8(a).

Agency Y responds that although it licensed the trademark **[*11]** to DFO starting in November 2017, it can maintain an action for trademark infringement because DFO's conduct fell outside the scope of the license. Opp'n at 10-11. First, Agency Y argues that DFO acted outside the scope of the Agreement by filing an application with the USPTO on October 2, 2018 because the original Agreement barred transfer of ownership of the trademark. Id. at 11. Second, Agency Y argues that DFO acted outside the scope of the Agreement by stealing confidential information from Agency Y's client, XTRA-PC, replicating the client's product, and creating advertisements using Agency Y branded materials. Id.

With regard to DFO's USPTO filing, the Court agrees with DFO that "***HN4***[] *Section 1125* is concerned with the confusion that may arise from trademark infringement—not the confusion that may arise from a wrongfully-registered mark." *Stemcell Techs. Canada Inc. V. StemExpress, LLC, No. 21-CV-01594-VC, 2021 U.S. Dist. LEXIS 139816, 2021 WL 3087668, at *1 (N.D. Cal. July 22, 2021)*.

With regard to XTRA-PC, while the 4AC alleges that DFO replicated a client's product and ran advertisements for their version of the product using the advertisements that Agency Y had produced for the client, it does not make clear when the alleged conduct took place. See 4AC ¶¶ 36-67. Agency Y notes in a footnote in its opposition that on February 5, 2019, **[*12]** Burd and Brown met with "XTRA-PC who was a potential client." Opp'n at 11 n.1. Hence, if DFO's alleged conduct took place after the parties signed the First Addendum on February 27, 2019, the conduct would not amount to trademark infringement because the First Addendum irrevocably transferred the AGENCY Y mark to DFO. See 4AC, Ex. D. Even if the conduct took place before then, the Court agrees with DFO that Agency Y has released its right to bring such a claim under the First Addendum. See Addendum, § (b).

Accordingly, the Court **GRANTS** the motion to dismiss the trademark infringement claims as they relate to the Agency Y mark.

2. False Advertising, False Designation of Origin, and Unfair Competition

DFO next asks the Court to dismiss Agency Y's false advertising, false designation of origin, and common law unfair competition claims. Mot. at 5.

HN5[] The Lanham Act "prohibits a person from misrepresenting the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities in commercial advertising or promotion." *Alfasigma USA, Inc. v. First Databank, Inc., 398 F. Supp. 3d 578, 590 (N.D. Cal. 2019)* (citing *15 U.S.C. § 1125(a)(1)(B)*). A false advertising claim requires a showing that: (1) the defendant made a false statement either about the plaintiff's **[*13]** or its own product; (2) the statement was made in commercial advertisement or promotion; (3) the statement actually deceived or had the tendency to deceive a substantial segment of its audience; (4) the deception is material; (5) the defendant caused its false statement to enter interstate commerce; and (6) the plaintiff has been or is likely to be injured as a result of the false statement, either by direct diversion of sales from itself to the defendant, or by a lessening of goodwill associated with the plaintiff's product. *Jarrow Formulas, Inc. v. Nutrition Now, Inc., 304 F.3d 829, 835 n.4 (9th Cir. 2002)*. A false designation of origin claim requires that a plaintiff show that the defendant "used in commerce any word, term, name, symbol, or device . . ." that is "likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of [d]efendant with [p]laintiff, or as to the origin, sponsorship, or approval of his goods by [p]laintiff." *Blizzard Entm't, Inc., 2018 U.S. Dist. LEXIS 224178, 2018 WL 7448915, at *5*.

The 4AC alleges violations of the Lanham Act, as well as common law unfair competition, premised on the allegations that (1) DFO announced on June 22, 2020 that Agency Y was rebranding as Amasa, thereby falsely suggesting that DFO was the owner of Agency Y or that Agency Y was taking on the rebranding **[*14]** initiative; (2) DFO re-routed Agency Y's web address to the Amasa website; and (3) DFO posted a Pitchbook Profile with allegedly misleading representations. 4AC ¶¶ 72-82; 122-124. As the 4AC fails to distinguish between false designation of origin and false advertising, the Court will analyze each allegation broadly under the Lanham Act. The same analysis applies to common law unfair competition.

With regards to the June 22, 2020 announcement, in granting DFO's motion to dismiss the Second Amended Complaint ("SAC"), the Court stated:

> "[T]he Court does not find that Agency Y has alleged that this 'rebranding' was false or likely to cause consumer confusion. As DFO Global notes, even if Agency Y is able to prevail on its breach of contract theory and is found to own the Agency Y Mark, in announcing the rebrand, DFO Global ensure[d] that its consumers knew where the services were coming from."

Order re SAC, Dkt. No. 45, at 14. The Court once again agrees with DFO that the announcement correctly indicated that Agency Y services were now going to come from Amasa, instead of DFO. See Mot. at 6. The fact that Burd received messages, calls, and questions in person asking if Burd sold Agency Y to DFO does **[*15]** not change the Court's analysis because, as DFO notes, the Second Addendum provided that Burd "will announce the final sale and transfer of AGENCY Y brand name, domain, and website to DFO." Addendum, 4AC, Ex. B, (d); Second Addendum, 4AC, Ex. C, 3(d).

With regards to re-routing Agency Y's web address to the Amasa website, the Court already found in the Order re Motion to Dismiss the Third Amended Complaint ("TAC") that "rerouting to Amasa is accurate in showing that the services in question were coming from DFO Global" and that "this kind of rerouting from one website to another does not constitute the kind of behavior that the Lanham Act prohibits." Order re TAC, Dkt. No. 61, at 8-9. Again, the fact that Burd and Brown received messages and calls from people looking for details about the name change does not alter the Court's analysis. See 4AC ¶ 78. Moreover, the Court also found that "allegations that Agency Y's June 4, 2020 demand regarding the return of the IP Assets eliminated DFO Global's right to make changes to the website or inform the public of its rebranding is a breach of contract claim, not a false designation claim." Order re TAC. at 9.

With regards to the Pitchbook Profile, Agency **[*16]** Y has not cured any of the deficiencies found by the Court. First, the Court in the Order re SAC dismissed the claim on the basis that Agency Y failed to show "how the Pitchbook profile is [a] '"commercial advertisement or promotion."' Order re SAC at 13. Second, the Court once again finds that "Agency Y does not sufficiently plead that this statement was untruthful or misleading under the circumstances when made" or that DFO was "subsequently '"re-stating'" the Pitchbook profile causing it to be inaccurate." Order re TAC. at 13. Agency Y responds that the Pitchbook profile "has never been accurate has Burd has never had any relationship with Amasa." Opp'n at 12-13. However, given Agency Y's own allegation that "Cran proceeded to eviscerate Agency Y and moved the business to Amasa," Agency Y still must plead that the statement was untruthful under the circumstances when made, which plausibly might be when the transition occurred. 4AC ¶¶ 45.

Finally, the Court agrees with DFO that to the extent Agency Y contends that filing with the USPTO is a Lanham Act violation, the Court already determined that "any damages resulting from the USPTO filing would be breach of contract damages, so the economic **[*17]** loss doctrine bars this tort claim." Order re TAC at 8.

Accordingly, the Court **GRANTS** the motion to dismiss the Lanham Act claims and common law unfair competition claim.

3. Fraudulent Inducement

DFO next asks the Court to dismiss Agency Y's fraudulent inducement claim, arguing that the claim is "simply a compilation of previously-made allegations under a different name." Mot. at 8. Specifically, DFO argues that (1) the claim constitutes non-actionable puffery; (2) the claim is barred by the economic loss doctrine; and (3) Agency Y fails to plead inducement to execute the Second Addendum. Mot. at 8-13.

HN6[] To state a claim for fraudulent inducement under California law, a plaintiff must allege: (1) a misrepresentation; (2) knowledge of its falsity; (3) with intent to defraud; (4) justifiable reliance; and (5) resulting damages. *Lazar v. Superior Court, 12 Cal. 4th 631, 638, 49 Cal. Rptr. 2d 377, 909 P.2d 981 (Cal. 1996)*.

The Court agrees with DFO that Agency Y's allegation that Cran promised Burd and Brown "unlimited resources" and "millions of dollars" and to make Agency Y "one of the biggest powerhouse agencies in the world" is too vague, exaggerated, and generalized, and thus, constitutes non-actionable puffery. See Mot. at 9-10. ***HN7***[] Language considered non-actionable puffery cannot form the **[*18]** basis for fraudulent inducement claims because "vague, exaggerated, generalized or highly subjective statements regarding a product or business" are "extremely unlikely to induce consumer reliance." *Cty. of Marin v. Deloitte Consulting LLP, 836 F. Supp. 2d 1030, 1039 (N.D. Cal. 2011)*; *Newcal Indus., Inc. v. Ikon Office Sol., 513 F.3d 1038, 1053 (9th Cir. 2008)*.

Agency Y also argues that Cran fraudulently induced Burd and Brown to enter into the Second Addendum by promising them that "if the deal wen awry, Agency Y could simply take back all of its intellectual property" even though "he knew [DFO] had no intention of ever turning over ownership of this mark to Agency Y." 4AC ¶¶ 133, 134. ***HN8***[] While mere failure to perform a contract does not constitute fraud, "a promise made without the intention to perform can be actionable fraud." *Richardson v. Reliance Nat'l. Indem. Co., No. C 99-2952 CRB, 2000 U.S. Dist. LEXIS 2838, 2000 WL 284211, at *4 (N.D. Cal. Mar. 9, 2000)*; see also *Lazar v. Superior Court, 12 Cal. 4th 631, 49 Cal. Rptr. 2d 377, 909 P.2d 981, 985 (Cal. 1996)*. "To establish a claim of fraudulent inducement, one must show that the defendant did not intend to honor its contractual promises when they were made." *Food Safety Net Services v. Eco Safe Systems USA, Inc., 209 Cal. App. 4th 1118, 1131, 147 Cal. Rptr. 3d 634 (2012)*. Under *Fed. R. Civ. P. 9(b)*, "[w]hile the factual circumstances of the fraud itself must be alleged with particularity, the state of mind—or scienter—of the defendants may be alleged generally." *Odom v. Microsoft Corp., 486 F.3d 541, 554 (9th Cir. 2007)*. Nonetheless, allegations of intent must satisfy the plausibility requirements of *Rule 8(a)*. *Biofuels, LLC v. Chemex LLC, No. 16-CV-00716, 2017 U.S. Dist. LEXIS 47129, 2017 WL 1164296, at *11 (N.D. Cal. 2017)*. Under *Rule 8(a)*, a plaintiff "must point to *facts* which show that defendant harbored an intention not to **[*19]** be bound by terms of the contract at formation." Id. (quoting *UMG Recordings, Inc. v. Glob. Eagle Entm't, Inc., 117 F. Supp. 3d 1092, 1109-10 (C.D. Cal. 2015)*). "[I]t is insufficient to allege intent based purely on Defendant's failure to perform its promises." Id.

Here, the Court finds that Agency Y does not sufficiently allege facts showing that Cran had no intention of returning Agency Y its intellectual property. The allegation that Cran knew that DFO Canada had been the registered owner of the AGENCY Y mark for five months does not show that Cran or DFO harbored an intent not to return the mark upon termination of the Agreement. See 4AC ¶ 134. No allegation in the 4AC amounts to circumstantial evidence that may create an inference of fraudulent intent not to perform the promise. Because the Court has found that this claim is inadequately pled, it does not reach the parties' arguments regarding economic loss.

Although Agency Y argues that it does not base its fraudulent inducement claim on Cran's alleged "threats," the Court nonetheless agrees with DFO that even if Agency Y were to base its claim on the allegation, it is insufficient to show fraudulent inducement.

Accordingly, the Court **GRANTS** the motion to dismiss the fraudulent inducement claim.

*4. Fraudulent Procurement of **[*20]** Federal Registration*

The 4AC alleges that DFO fraudulently procured federal registration of the AGENCY Y mark by procuring the registration despite not owning it at the time. 4AC ¶¶ 142-47. DFO moves the Court to dismiss this claim, arguing that (1) Agency Y released its right to make the claim, (2) Agency Y has not and cannot plead damages, and (3) the claim is duplicative of the breach of contract claim.

HN9[] When a party asserts a claim for fraud on the USPTO, it must prove "a false representation regarding a material fact, the registrant's knowledge or belief that the representation is false, the intent to induce reliance upon the misrepresentation and reasonable reliance thereon, and damages proximately resulting from the reliance." *Levi Strauss & Co. V. Esprit US Distrib. Ltd., 588 F. Supp. 2d, 1083-84 (N. D. Cal. 2008)* (quoting *Robi v. Five Platters, 918 F.2d 1439, 1444 (9th Cir.1990)*). The party alleging trademark fraud bears a "heavy" burden of proof. Id.

The Court agrees with DFO that Agency Y lacks standing to assert its cause of action under *Section 1120*. DFO filed its application to register the AGENCY Y mark with the USPTO on October 2, 2018, and the registration went into effect on April 9, 2019. 4AC, Ex. D. Agency Y cannot plead any damages because the First Addendum irrevocably transferred Agency Y's intellectual property to DFO **[*21]** in February 2019, and DFO's registration for the AGENCY Y mark was not procured until April 9, 2019. 4AC, Ex. D. Agency Y responds that DFO's "application for trademark registration of a mark it did not own was fraud upon the USPTO," rather than "fraud against Agency Y." Opp'n at 19. However, any such injury is not particular to DFO and cannot support its standing under *Section 1120*. See *Spokeo, Inc. V. Robins, 578 U.S. 330, 334, 136 S. Ct. 1540, 194 L. Ed. 2d 635 (2016)* (noting that ***HN10***[] injury-in-fact requires a plaintiff to allege an injury that is both "concrete *and* particularized").

The Court further agrees with DFO that Agency Y lacks standing to seek cancellation of the trademark registration under *Section 1119*. ***HN11***[] *Section 1119* gives district courts the power to order the cancellation of a trademark registration "in any action involving a registered mark." *15 U.S.C. § 1119*. The plain language "specifies that cancellation may only be sought if there is already an ongoing action that involves a registered mark; it does not indicate that a cancellation claim is available as an independent cause of action." *Air Aromatics, LLC v. Victoria's Secret Stores Brand Mgmt., Inc., 744 F.3d 595, 599 (9th Cir. 2014)*. Given that Agency Y lacks standing under *Section 1120*, there is no basis for Agency Y to have standing to seek cancellation of the registration under *Section 1119*.

More importantly, the Court agrees with DFO that this claim is duplicative of **[*22]** the breach of contract claim. See Order re TAC at 8 ("The Court once again finds that any damages resulting from the USPTO filing would be breach of contract damages, so the economic loss doctrine bars this tort claim.").

Accordingly, the Court **GRANTS** the motion to dismiss with respect to the fraudulent procurement of federal registration claim.

5. California Unfair Competition Law

DFO next asks the Court do dismiss Agency Y's claims under the unlawful, unfair, and fraudulent prongs of California's Unfair Competition Law ("UCL"). Mot. at 15-16.

HN12[] California's UCL prohibits "any unlawful, unfair, or fraudulent business act or practices." *Cal. Bus. & Prof. Code §17200, et. seq.* To prevail on a UCL claim, a plaintiff must "make a twofold showing: he or she must demonstrate injury in fact and a loss of money or property caused by unfair competition." *Peterson v. Cellco P'ship, 164 Cal. App. 4th 1583, 1590, 80 Cal. Rptr. 3d 316 (4th Dist. 2008)*.

As to the unlawful prong, DFO argues, "Agency Y claims DFO has acted unlawfully due to the above allegations. Because these claims must be dismissed, as analyzed *supra*, the UCL claim predicated on the claims must be dismissed as well." Mot. at 15 (citing 4AC ¶¶ 159, 160). For the fourth time on this point, the Court agrees. Agency Y's contention of unlawful behavior under the UCL is **[*23]** based on the fact that DFO registered the AGENCY Y mark with the USPTO and engaged in fraudulent procurement. 4AC ¶ 160. Thus, this claim is premised on the fraudulent procurement claim, which as discussed above, cannot survive. Accordingly, the Court **GRANTS** the motion to dismiss the UCL claim based on the unlawful prong.

With respect to the unfair prong, DFO argues that Agency Y has not cured the defect that the Court noted with regard to the TAC, which was that the "allegations do not sufficiently allege violation of public policy." Order re TAC at 11. Agency responds that it has sufficiently pled that DFO's business practice is "immoral, unethical, oppressive, unscrupulous, or substantially injurious to customers." Opp'n at 21. **HN13**[] In the context of *section 17200*, "unfair . . . means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. As DFO notes, the *Cel-Tech* court determined that appellate defining "unfair" as "immoral, unethical, oppressive, scrupulous, or substantially injurious to consumers" was **[*24]** "too amorphous and provides little guidance to courts and businesses." *Id. at 184-85*. Thus, the Court agrees with DFO that Agency Y's allegations fail under the *Cel-Tech* test. Accordingly, the Court **GRANTS** the motion to dismiss the UCL claim based on the unfair prong.

Finally, with regard to the fraudulent prong, DFO argues that Agency Y's claims fail because once again, they do not meet the *Rule 9(b)* pleading standard and because the fraudulent inducement and fraudulent registration claims on which it is based are insufficiently pled. Mot. at 15-16. The Court finds that because all of the allegations on which Agency Y relies to plead the UCL claim based on the fraudulent prong are either improperly pled or barred, as analyzed above under the Lanham Act, fraudulent inducement, and fraudulent registration, Agenecy Y's UCL claim based on the fraud prong fails. Accordingly, the Court **GRANTS** the motion to dismiss the UCL claim based on the fraudulent prong.

B. Global Media's Claims

1. Trademark Infringement, Unfair Competition, False Advertising, and False Designation of Origin

Global Media brings five causes of action related to the "Tim Burd" mark: (1) federal trademark infringement, (2) common law trademark infringement, (3) **[*25]** federal unfair competition, false advertising and false designation of origin, (4) common law unfair competition, and (5) violation of California's unfair competition law. DFO moves to dismiss all claims. Mot. at 16.

Global Media alleges that DFO relied on the Burd mark to handle calls or meetings with potential clients, asked Burd to record promotional videos to attract clients while telling people his role was passive, misused the mark to onboard a client and copied that client's product, used the mark in posts and videos while telling people that Burd did nothing, yet never received approval from Burd or Global Media to make statements asserting Burd's sponsorship of DFO's services, and made a false Pitchbook Profile. 4AC ¶¶ 89-96; 101-105.

First, the Court agrees with DFO that the allegation that DFO never received approval to assert Burd's sponsorship of DFO's services is contradicted by Global Media's own admission that Burd recorded and participated in promotional videos for DFO. Mot. at 16. The Court further agrees with DFO that none of the aforementioned allegations show that the use of Burd's name was unauthorized, and that "instead, these allegations indicate that DFO was **[*26]** using Burd's name to refer to his involvement in the business, which is accurate." Id. To the extent that DFO allegedly told people that Burd's role was passive or that he did nothing, the Court finds that such allegations do not constitute the kind of conduct that the Lanham Act prohibits. See *15 U.S.C. § 1125(a)(1)(B)* (the Lanham Act "prohibits a person from misrepresenting the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities in commercial advertising or promotion.").

With respect to the Pitchbook Profile, the Court has already found in the Order re TAC, as well as in the present Order, that the Pitchbook Profile fails to sufficiently The Court has already found that the 4AC does not allege sufficient facts regarding the profile to plead a violation of the Lanham Act. See Order re TAC at 13.

With respect to the allegation that DFO stole a client's confidential information and copied the client's product, the Court agrees with DFO that Agency Y does not have standing to bring the claim on the client's behalf. Mot. at 18; see *Kwikset Corp. v. Superior Court, 51 Cal.4th 310, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)* (***HN14***[] To have standing to assert a *Section 17200* claim, the plaintiff must "(1) establish a loss or deprivation of money or property sufficient to qualify **[*27]** as injury in fact, i.e., economic injury, and (2) show that that economic injury was the result of, i.e., caused by, the unfair business practice or false advertising that is the gravamen of the claim.").

Finally, the Court has already dismissed any claims brought conjunctively with Agency Y.

Accordingly, the Court **GRANTS** the motion to dismiss the Lanham Act claims, common law trademark infringement claim, and common law unfair competition claim, and UCL claim as they relate to the Burd mark.

2. Fraudulent Inducement

The Court agrees with DFO that the inclusion of Global Media as a Plaintiff for the fraudulent inducement claim is improper because Cran did not enter into a business relationship or contract with Global Media. See Mot. at 9. Accordingly, the Court **GRANTS** the motion to dismiss the fraudulent inducement claim.

C. Claims against Cran

DFO asks the Court to *sua sponte* dismiss all claims against Cran for failure of service. The Court orders Plaintiffs to show good cause for why the complaint against Cran should not be dismissed for failure of service pursuant to *Federal Rule of Civil Procedure 4(m)*.

IV. CONCLUSION

For the foregoing reasons, the Court **GRANTS** the motion to dismiss Agency Y's first nine causes of action. The Court **[*28]** finds that leave to amend would be futile and dismisses the first nine causes of action with prejudice.

IT IS SO ORDERED.

Judges: CECILIA M. ALTONAGA, CHIEF UNITED STATES DISTRICT JUDGE.

Opinion by: CECILIA M. ALTONAGA

Opinion

ORDER

THIS CAUSE came before the Court on the Direct Purchaser Plaintiffs' Motion for Leave to Amend Complaint [ECF No. 423], accompanied by supporting exhibits [ECF Nos. 423-1-423-2], filed on September 23, 2021. Defendants filed an Opposition [ECF No. 434], along with supporting exhibits [ECF Nos. 434-1-434-5], to which Plaintiffs filed a Reply [ECF No. 442]. The Court has carefully considered the parties' written submissions, the **[*15]** record, and applicable law. For the following reasons, the Motion is granted.

Background. The Court assumes the reader's familiarity with the underlying allegations and claims raised in this case, which are found in the March 23, 2021 Order Denying Defendants' Motion to Dismiss the Second Consolidated Amended Direct Purchaser Class Action Complaint for Failure to State a Claim [ECF No. 307]. (*See id.* 1-15).[1] In the operative Scheduling Order [ECF No. 308], the Court set a deadline of September 23, 2021 for the filing of motions for leave to amend pleadings. (*See id.* 1). The current operative complaint is Plaintiffs' Second Consolidated Amended Direct Purchaser Class Action Complaint ("SCAC") [ECF Nos. 246, 251-1].

Plaintiffs timely submitted the present Motion, seeking leave to file a Third Consolidated Amended Direct Purchaser Class Action Complaint ("TCAC") that includes the following amendments: "(1) non-substantive changes to reflect that certain plaintiffs have been removed . . . and to delete no-longer-relevant background information regarding Defendants' production of documents; and (2) additional allegations about the relevant production market that have been added following a **[*16]** recent meet and confer with Defendants' counsel." (Mot. 2 (alteration added)). Specifically, given that Defendants recently advised Plaintiffs that they do not believe the SCAC states a rule of reason claim, Plaintiffs would like to amend their pleading to "clarify that they assert a Sherman Antitrust Act claim that can be judged *either* under the *per se* or rule of reason standard[]." (*Id.* (emphasis in original; alteration added)).

Standards. Under *Federal Rule of Civil Procedure 15(a)*, leave to amend a complaint "shall be freely given when justice so requires." *Espey v. Wainwright, 734 F.2d 748, 750 (11th Cir. 1984)* (quotation marks and citation omitted). The district court's discretion under *Rule 15(a)* is "extensive[.]" *Hargett v. Valley Fed. Sav. Bank, 60 F.3d 754, 761 (11th Cir. 1995)* (alteration added; citation omitted). The Supreme Court has directed that leave to amend should be denied only in cases marked by undue delay, bad faith or dilatory motive, futility of amendment, or undue

[1] The Court uses the pagination generated by the electronic CM/ECF database, which appears in the headers of all court filings.

prejudice to the opposing party. *See* Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962). The Eleventh Circuit has further explained that "[u]nless there is a substantial reason to deny leave to amend, the discretion of the district court is not broad enough to permit denial." *Thomas v. Town of Davie, 847 F.2d 771, 773 (11th Cir. 1988)* (alteration added; quotation marks and citation omitted).

Discussion. Defendants raise two *Foman* factors as reasons for the Court to deny Plaintiffs' Motion: undue delay **[*17]** and undue prejudice. (*See generally* Opp'n). The Court addresses each in turn.

Undue Delay. Defendants argue Plaintiffs unduly delayed in asserting the rule of reason theory and insist Plaintiffs "did not include any market-definition or harm-to-competition allegations, as required to plead a rule of reason claim." (*Id.* 5). They further contend Plaintiffs' subsequent court filings confirm Plaintiffs' intention to solely litigate a per se theory (*id.* 5-6) and summarize their argument as follows:

> In short, for over two years, Plaintiffs consistently told Defendants (and the Court) that they were pursuing a *per se* price-fixing claim and only a *per se* claim. They went so far as to expressly tell Defendants that they were not pursuing a rule of reason claim to resist discovery that would plainly be relevant to a rule of reason theory. When Defendants sought to confirm Plaintiffs' position, Plaintiffs sat silent for two months, while document discovery of Defendants went forward at a rapid pace.

(*Id.* 7-8).

According to Plaintiffs, Defendants do not cite any on-point case law that compels the denial of a request for leave to amend on the basis of undue delay in a situation such as this one, where **[*18]** the scheduling order deadline for amendments was complied with, discovery is open, and summary judgment motions and trial are over a year away. (*See* Reply 7-8*; see* Opp'n 5-7). Plaintiffs have the better position.

In the context of undue delay, the "mere passage of time, without anything more, is an insufficient reason to deny leave to amend." *Floyd v. Eastern Airlines, Inc., 872 F.2d 1462, 1490 (11th Cir. 1989)* (citations omitted), *rev'd on other grounds*, *499 U.S. 530, 111 S. Ct. 1489, 113 L. Ed. 2d 569 (1991)*. By contrast, "[p]rejudice and undue delay are inherent in an amendment asserted after the close of discovery and after dispositive motions have been filed, briefed, and decided." *Campbell v. Emory Clinic, 166 F.3d 1157, 1162 (11th Cir. 1999)* (alteration added; citation omitted). Moreover, "[a] district court may find undue delay when the movant knew of facts supporting the new claim long before the movant requested leave to amend, and amendment would further delay the proceedings." *Tampa Bay Water v. HDR Eng'g, Inc., 731 F.3d 1171, 1186 (11th Cir. 2013)* (alteration added; citations omitted), *abrogated on other grounds by* *CSX Transp., Inc. v. Gen. Mills, Inc., 846 F.3d 1333 (11th Cir. 2017)*; *see also* *id. at 1187* (holding the district court did not abuse its discretion in denying a motion for leave to amend brought after the close of discovery where the movant knew "the basis for [the amendment] for almost a year[,]" "amendment would prejudice [the opponent]," and amendment "would require additional discovery **[*19]** and further delay the trial" (alterations added)).

Defendants fail to cite any analogous precedent where a court has found undue delay, likely because the Eleventh Circuit's decisions affirming district courts' denials of leave to amend are radically distinguishable from the present case. (*See* Opp'n 5-8). *See, e.g.,* *Nolin v. Douglas Cnty., 903 F.2d 1546, 1551 (11th Cir. 1990)* (affirming district court's denial of leave to amend for undue delay where "both the parties and the court were fully prepared for trial and the addition of a new claim would have re-opened the pretrial process and delayed the trial, and [the plaintiff's] attorney had sufficient opportunity to request a timely amendment before the pretrial order had been submitted" (alteration added)), *overruled on other grounds by McKinney v. Pate, 20 F.3d 1550 (11th Cir. 1994)*; *Rhodes v. Amarillo Hosp. Dist., 654 F.2d 1148, 1154 (5th Cir. 1981)* (same result where a party moved for leave to amend 30 months after the original complaint and only three weeks before trial, and the only justification offered for the delay was plaintiff's retention of a new attorney); *Burger King Corp. v. Weaver, 169 F.3d 1310, 1319 (11th Cir. 1999)* (same result where "forty months had passed since the filing of the original counterclaim, the new counts would require proof of different facts, and the only apparent reason for the new claims was [defendant's] retention of new counsel" **[*20]** (alteration added)).

Here, Plaintiffs timely seek leave to amend. The class certification discovery deadline is not until March 23, 2022; discovery does not close until December 2, 2022; the dispositive motions deadline is not until January 3, 2023; and trial is set to occur during the Court's two-week trial calendar beginning May 22, 2023. (*See* Sched. Order 1-2).

Defendants also cite two antitrust cases where parties sought leave to amend; both are unpersuasive in this context. (*See* Opp'n 8 (citing *In re Aluminum Warehousing Antitrust Litig., No. 13-md-2481, 2016 U.S. Dist. LEXIS 54643, 2016 WL 1629350, at *8 (S.D.N.Y. Apr. 25, 2016)*; *Kelsey K. v. NFL Enters., LLC, 757 F. App'x 524, 527 n.3 (9th Cir. 2018)*)). The first, *In re Aluminum Warehousing*, dealt with a request for leave to amend brought after the scheduling order deadline had passed and was thus subject to the *Rule 16(b)(4)* good cause standard, which the court held the parties failed to meet. *See* *2016 U.S. Dist. LEXIS 54643, 2016 WL 1629350, at *1, 4-8*. The good cause standard does not apply here because Plaintiffs timely moved for leave to amend before the expiration of the Scheduling Order deadline.

The second case, *Kelsey K.*, is likewise inapt. *See* *757 F. App'x 524*. There, the court denied leave to amend where the plaintiff failed to sufficiently plead a rule of reason claim because she provided "no explanation" for her failure to allege facts relevant to a rule of reason analysis, and "the amendments that [she] propose[d] **[*21]** would not cure the[] defects." *Id. at 527 & n.3* (alterations added; citation omitted). Here, Plaintiffs' SCAC survived a motion to dismiss, and Plaintiffs provide a justification for why they now seek to amend their claims — namely, that Defendants, after previously stating they "'were unable to locate any limitation to a per se case in Plaintiffs' pleadings'" (Reply 8 (quoting Opp'n, Ex. 2, Email from Ryan W. Marth [ECF No. 434-2] 2)), later implied during a conferral that they viewed the SCAC as only asserting a per se claim, to the exclusion of a rule of reason claim (*see* Reply 8; *see also* Mot. 2, 7).

Undue Prejudice.

The crux of Defendants' argument is that Plaintiffs are seeking to assert a new theory of liability. (*See generally* Opp'n). To be sure, courts routinely grant leave to amend even where a party seeks to assert new theories of liability or claims. *See, e.g.,* *Stewart v. Bureaus Inv. Grp. No. 1, LLC, 24 F. Supp. 3d 1142, 1164-65 (M.D. Ala. 2014)* (granting leave to amend over objection of undue delay to allow plaintiff to assert new theories of liability four years after the inception of the case); *Gropp v. United Airlines, Inc., 847 F. Supp. 941, 945 (M.D. Fla. 1994)* ("A change of the legal theory of the action cannot be accepted as the test of the propriety of a proposed amendment." (citation omitted)); *Travelers Indem. Co. of Conn. v. Richard McKenzie & Sons, Inc., No. 8:17 cv-2106, 2017 U.S. Dist. LEXIS 234055, 2017 WL 10295897, at *2 (M.D. Fla. Sept. 6, 2017)*; *James Ventures, L.P. v. Timco Aviation Servs., Inc., No. 06-60420-Civ, 2007 U.S. Dist. LEXIS 110682, 2007 WL 9700499, at *1 (S.D. Fla. June 12, 2007)*. That said, *Foman*'s prejudice factor **[*22]** imposes an important limitation on a party's ability to assert new theories or claims. *See* *Tampa Bay Water, 731 F.3d at 1186* ("[P]rejudice is especially likely to exist if the amendment involves new theories of recovery or would require additional discovery[.]" (alterations added; quotation marks and citation omitted)).

Defendants insist they will suffer undue prejudice because (1) "Plaintiffs' new claim will significantly expand the scope of the case, requiring the parties and the [C]ourt to litigate an entirely new set of issues" (Opp'n 9 (alteration added)); (2) "Plaintiffs' new claim targets fundamentally distinct anticompetitive conduct" (*id.* 10); and (3) Plaintiffs disclaimed the rule of reason theory (*see id.* 11). Plaintiffs assert their operative pleading encompasses a rule of reason claim (and, moreover, they were not required to specifically plead which theory they would later rely on).[2] (*See* Mot. 8-10; Reply 3-4, 6, 9-11). They further argue that "[t]he only thing Defendants have identified that they

[2] Plaintiffs think the quick-look standard, an approach that lies "'somewhere on the continuum between the *per se* rule and the rule of reason'" approach, should apply here. (Reply 9 n.5 (quoting *In re Blue Cross Blue Shield Antitrust Litig., 26 F. Supp. 3d 1172, 1185 (N.D. Ala. 2014)*)). "[The quick look approach] applies where an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets." *Procaps S.A. v. Patheon, Inc., 845 F.3d 1072, 1084 n.3 (11th Cir. 2016)* (alteration added; quotation marks and citation omitted).

would do differently is seek discovery of fish other than salmon[,]" which Plaintiffs contend is irrelevant and, even if the Court deems it relevant, "Defendants still have more than a year to collect that discovery **[*23]** under the current schedule." (Reply 10 (alterations added)). Plaintiffs summarize: "The mere possibility that a defendant may have 'to do more work than it otherwise would have performed without the amendment does not support a finding of prejudice.'" (*Id.* 11 (quoting *DeCurtis LLC v. Carnival Corp., No. 20-22945-Civ, 2021 U.S. Dist. LEXIS 25277, 2021 WL 493758, at *4 (S.D. Fla. Feb. 10, 2021)*)). Here again, the Court agrees with Plaintiffs.

The leading Eleventh Circuit case on amendment involving new legal theories, *Tampa Bay Water*, held that a district court did not abuse its discretion in denying leave to amend where the movant "knew many of the facts supporting its two new claims . . . for almost a year prior to requesting leave to amend." *731 F.3d at 1186-87* (alteration added). Importantly, the district court found prejudice because amendment "would introduce an entirely new theory of recovery into the case *after the close of discovery*[,]" which would "require additional discovery and further delay the trial." *Id. at 1187* (emphasis and alteration added). This close-of-discovery distinction is, as one court put it, "critical[.]" *Brantley Cnty. Dev. Partners, LLC v. Brantley Cnty., No. 5:19-cv-109, 2020 U.S. Dist. LEXIS 117078, 2020 WL 3621319, at *2 n.3 (S.D. Ga. July 2, 2020)* (alteration added). Here, the discovery cut-off is over a year away, and there is no indication that permitting amendment will delay the trial.

The **[*24]** standard under *Foman* is "*undue* prejudice[,]" *371 U.S. at 182* (emphasis and alteration added), which does not preclude an amendment solely because it may result in additional discovery while the discovery period is still open. Put differently, the possibility that Defendants may have "to do more work than [they] otherwise would have performed without the amendment does not support a finding of [undue] prejudice." *DeCurtis LLC, 2021 U.S. Dist. LEXIS 25277, 2021 WL 493758, at *4* (alterations added; quotation marks and citation omitted).

Further, the Court is not convinced that the TCAC actually pleads a *new* theory of recovery, *i.e.*, that Defendants were not on notice of Plaintiffs' intent to pursue a rule of reason claim, even if secondary and alternative to a per se theory. First, an examination of the SCAC reinforces Plaintiffs' arguments that the proposed amendment includes information that is consistent with the SCAC. (*See* Reply 3-4 (citing SCAC ¶¶ 7, 102, 104, 197-99, 134, 240, 255-64, 275, 301-10); *see also* SCAC ¶¶ 132, 151, 231, 232, 252, 296). Second, the parties' email correspondence (cited by Defendants) indicates that Defendants understood Plaintiffs' SCAC to potentially encompass a rule of reason claim. (*See* Email from Ryan W. Marth 2). A brief discussion **[*25]** of the differences between the proof requirements of a per se versus rule of reason theory is helpful.

"Per se violations 'are limited to a very small class of antitrust practices whose character is well understood and that almost always harm competition.'" *United Am. Corp. v. Bitmain, Inc., 530 F. Supp. 3d 1241, 2021 WL 1807782, at *23 (S.D. Fla. 2021)* (quoting *Jacobs v. Tempur-Pedic Int'l, Inc., 626 F.3d 1327, 1334 (11th Cir. 2010)*). By contrast, the flexible "rule of reason" analysis requires "the factfinder [to] weigh[] all of the circumstances of a case" before deciding whether the conduct is illegal. *Cont'l T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 49, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)* (alterations added; footnote call number omitted). "Under rule of reason analysis, a plaintiff may show either actual or potential harm to competition[,]" and must also "identify the relevant market in which the harm occurs." *Jacobs, 626 F.3d at 1336* (alteration added; citations omitted). Despite these differences, "no bright line separates per se from [r]ule of [r]eason analysis." *Nat'l Bancard Corp. (NaBanco) v. VISA U.S.A., Inc., 779 F.2d 592, 596 (11th Cir. 1986)* (alteration adopted; other alterations added; quotation marks and citation omitted).

Typical per se violations "include horizontal price fixing among competitors, group boycotts, and horizontal market division — business relationships that, in the courts' experience, virtually always stifle competition." *Jacobs, 626 F.3d at 1334* (citation omitted). Once determined to be applicable, the "per se rule [] applies a conclusive **[*26]** presumption that certain restraints automatically are unreasonable, and therefore illegal, without further investigation." *Nat'l Bancard, 779 F.2d at 597* (alteration added; footnote call number omitted). Notably, "'the per se rule is the trump card of ***antitrust law***. When an antitrust plaintiff successfully plays it, he need only tally his score.'" *Id. at 598* (alteration adopted; quoting *United States v. Realty Multi-List, Inc., 629 F.2d 1351, 1362-63 (5th Cir. 1980)*).

In applying the rule of reason, courts must ask whether the defendant "has shown that the alleged restraint has had an anticompetitive effect on the market." *Procaps S.A., 845 F.3d at 1084*. "[C]ourts usually cannot properly apply the rule of reason without an accurate definition of the relevant market." *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2285, 201 L. Ed. 2d 678 (2018)* (alteration added; footnote call number omitted). In cases involving horizontal restraints on trade, the plaintiff need not define the relevant market and plead market power if it has offered actual evidence of adverse effects on competition. *See id. at 2285 n.7* (citations omitted). In cases involving vertical restraints on trade, the plaintiff must do both because "[v]ertical restraints often pose no risk to competition unless the entity imposing them has market power, which cannot be evaluated unless the [c]ourt first defines the relevant market." *Id.* (alterations added; citations **[*27]** omitted).

Although the TCAC adds significant factual allegations related to the product market (*see generally* Mot., Ex. 2, TCAC [ECF No. 423-2]), the SCAC also addresses the salmon market at length. (*See generally* SCAC; *see also* Reply 4 (citing SCAC ¶¶ 102, 134, 240, 255-64, 275)). Indeed, the words "salmon market" appear 13 times throughout the SCAC. (*See* SCAC ¶¶ 6, 96, 102, 103, 109, 120, 129, 141, 169, 233, 251, 268, 270). The SCAC also addresses market power (*see id.* ¶¶ 132, 231, 232), anticompetitive effects (*see id.* ¶ 296), and a lack of procompetitive justifications (*see id.* ¶ 151) — the latter of which Plaintiffs cited to in their Opposition to Defendants' Motion to Dismiss (*see* [ECF No. 298] 24-25).

Although Plaintiffs could choose to "lighten [their] litigation burden" by litigating only under a per se theory — and thus avoid the extensive economic analysis attendant to rule of reason-based claims—the SCAC indicates Plaintiffs did not expressly disavow the rule of reason theory. *In re Processed Egg Prods. Antitrust Litig., 206 F. Supp. 3d 1033, 1051 (E.D. Pa. 2016)* (alteration added; citations omitted), *aff'd*, *962 F.3d 719 (3d Cir. 2020)*. Certainly, the above allegations "would only be relevant to a rule of reason inquiry." *Id. at 1052* (citing *Pace Elecs., Inc. v. Canon Comput. Sys., Inc., 213 F.3d 118, 123 (3d Cir. 2000)* ("We believe that requiring a plaintiff to demonstrate **[*28]** that an injury stemming from a per se violation of the antitrust laws caused an actual, adverse effect on a relevant market in order to satisfy the antitrust injury requirement comes dangerously close to transforming a per se violation into a case to be judged under the rule of reason." (italicization omitted))).

Defendants cite an email in support of their contention that "Plaintiffs represented to us on [a] call that they were pursuing only a per se theory of liability[.]" (Email from Ryan W. Marth 2 (alterations added; italicization omitted)).[3] Yet, this email also undercuts Defendants' position. Defendants noted in the email that they "were unable to locate any limitation to a per se case in Plaintiffs' pleadings[.]" (*Id.* (alteration added)). Defendants' observation buttresses the notion that Plaintiffs never limited — let alone memorialized a decision to limit — their claim to a per se theory of liability.

Admittedly Plaintiffs, throughout the litigation, have relied on quintessential per se conduct — an alleged conspiracy to fix prices. "An antitrust plaintiff, however, does not waive his ability to pursue a rule of reason claim simply by arguing that a conspiracy **[*29]** should be found per se unlawful." *In re Processed Egg Prods. Antitrust Litig., 206 F. Supp. 3d at 1051* (italicization omitted; citing *Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 25, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*). The defendants in *Processed Egg Products* opposed the plaintiffs' rule of reason arguments at summary judgment. *See id. at 1051-52*. Despite plaintiffs' counsel stating to opposing counsel they "were 'definitely sticking with the per se standard for this case[,]'" the court permitted plaintiffs to proceed on a rule of reason theory, explaining that plaintiffs "ha[d] nevertheless developed evidence of the effect of the conspiracy and its unlawful nature; such arguments would only be relevant to a rule of reason inquiry." *Id. at 1052* (alterations added; italicization, citation, and footnote call number omitted).

---

[3] These emails relate to a discovery dispute. Defendants sought discovery related to fish other than salmon, which Plaintiffs opposed as not relevant. (*See* Opp'n 6). Defendants contend this opposition was evidence that Plaintiffs intended to only pursue a per se claim, because, according to Defendants, information about other fish is clearly relevant to a rule of reason analysis. (*See id.*). Plaintiffs disagree, stating the market is simply farm-raised Atlantic salmon, and discovery about other fish is irrelevant. (*See* Reply 10). Without commenting on the merits of either position, the Court does not believe that Plaintiffs' discovery position is inconsistent with a rule of reason theory; even now, when pursuing a rule of reason theory, they still contend that non-salmon fish discovery is irrelevant. (*See id.*).

Here, Defendants similarly accuse Plaintiffs of expressly stating they planned to litigate solely under a per se theory. (*See* Opp'n 6-7, 11). But as explained, the SCAC demonstrates Plaintiffs did not commit to any theory, despite their "strenuous arguments in favor of application of a per se rule[.]" *In re Processed Egg Prods. Antitrust Litig., 206 F. Supp. 3d at 1052* (alteration added; italicization omitted).

Relevance of Plaintiff's Extension Request. Defendants lodge one final argument: Plaintiffs' plan to seek an extension of the class certification schedule, found in a separate Motion for Modification **[*30]** [ECF No. 435] filed on October 12, 2021 and not yet fully briefed, "underscores why amendment should be denied." (Opp'n 12). As Defendants put it, "if Plaintiffs do not believe they are capable of litigating this case without a six-month extension as it currently stands, then it is clear that their proposed amendment cannot be accommodated without further derailing progress." (*Id.* 14). Not so. The two inquiries are separate. The Court can certainly grant amendment and deny Plaintiffs' extension request. And the Court will only grant an extension if Plaintiffs establish good cause. *See* *Fed. R. Civ. P. 16(b)*.

Further, Plaintiffs insist that "[e]ven if [they] never sought to amend the SCAC, they would still be asking for an extension to the schedule because the pace of discovery—despite Plaintiffs['] efforts and Magistrate Judge Louis's assistance—does not permit either them (or the Defendants, for that matter) to meet" the Scheduling Order's deadlines. (Reply 11-12 (alterations added; emphasis omitted)). A cursory review of Plaintiffs' now-filed Motion makes apparent that the request for amendment is disconnected from the request for an extension; they lodged the request for an extension because "the upcoming **[*31]** December 1, 2021 deadline for 'the exchange of expert witness summaries or reports on issues of class certification' does not appear feasible[.]" (Pl.'s Mot. Modification 1 (alteration added; quoting Sched. Order 1)). They explain that, among other issues, their already-retained expert's econometric analyses of the millions of transactions are taking longer than anticipated (*see id.* 4), but they make no mention of any link between their request to extend the deadlines and their request for leave to amend (*see generally id.*). There is no reason for the Court to think that Plaintiffs' counsel are being untruthful or misleading about the reasons for the extension request. In short, Defendants' argument on this point also fails.

Conclusion. For the foregoing reasons, it is

ORDERED AND ADJUDGED that the Direct Purchaser Plaintiffs' Motion for Leave to Amend Complaint **[ECF No. 423]** is **GRANTED**. Plaintiffs shall file their third amended complaint as a separate docket entry by October 28, 2021. Defendants' combined response, or separate answers, are due within the time permitted by the Rules.

DONE AND ORDERED in Miami, Florida, this 27th day of October, 2021.

/s/ Cecilia M. Altonaga

CECILIA M. ALTONAGA [*32]

CHIEF UNITED STATES DISTRICT JUDGE

In re Zetia Ezetimibe Antitrust Litig.

United States District Court for the Eastern District of Virginia, Norfolk Division

November 1, 2021, Decided; November 1, 2021, Filed

MDL No. 2:18-md-2836

For Glenmark Generics Inc., USA, Defendant: James Kevin Fee, LEAD ATTORNEY, Morgan Lewis Bockius LLP (DC), Washington, DC; Jason Z Pesick, LEAD ATTORNEY, PRO HAC VICE, Winston & Strawn LLP, Chicago, IL; Dustin Mitchell Paul, Richard Hooper Ottinger, Vandeventer Black LLP (Norfolk), Norfolk, VA; Mark J. Fanelli, Melina Rose DiMattio, Richard Brendan Fee, Steven Andrew Reed, Zachary Mills Johns, PRO HAC VICE, Morgan Lewis & Bockius LLP (PA-NA), Philadelphia, PA; Samantha Maxfield Lerner, PRO HAC VICE, Winston & Strawn LLP (IL-NA), Chicago, IL; Stacey Anne Mahoney, PRO HAC VICE, Morgan Lewis & Bockius LLP (NY-NA), New York, NY.

For Merck & Company Inc., Shering-Plough Corporation, Schering Corporation, MSP Singapore Company LLC, Shering-Plough Corporation, Defendants: Christopher Dean Dusseault, Samuel Grant **[*12]** Liversidge, LEAD ATTORNEYS, PRO HAC VICE, Gibson Dunn & Crutcher LLP (CA-NA), Los Angeles, CA; Eric Jonathan Stock, LEAD ATTORNEY, PRO HAC VICE, Gibson Dunn & Crutcher LLP (NY-NA), New York, NY.

For Glenmark Pharmaceuticals Inc., USA, Glenmark Pharmaceuticals Ltd., Defendants: Geoffrey T. Holtz, LEAD ATTORNEY, Morgan, Lewis & Bockius LLP, San Francisco, CA; Richard Hooper Ottinger, LEAD ATTORNEY, Vandeventer Black LLP (Norfolk), Norfolk, VA; Steven A. Reed, LEAD ATTORNEY, Morgan, Lewis Bockius LLP, Philadelphia, PA.

For Zydus Pharmaceuticals (USA) Inc., Interested Party: Donald Charles Schultz, LEAD ATTORNEY, Crenshaw Ware & Martin PLC, Norfolk, VA.

For Apotex USA, Inc. and Apotex Corp., Interested Party: David Neil Ventker, LEAD ATTORNEY, Ventker, Henderson, PLLC, Norfolk, VA; Brian Sodikoff, Guylaine Hache, PRO HAC VICE, Katten Muchin Rosenman LLP (IL-NA), Chicago, IL.

Judges: DOUGLAS E. MILLER, UNITED STATES MAGISTRATE JUDGE.

Opinion by: DOUGLAS E. MILLER

Opinion

REPORT AND RECOMMENDATION

Two motions in this multi-district case present the question of whether Defendants' expert testimony is sufficient to create a jury question on the issue of the relevant anti-trust market for the products affected by the anti-trust **[*13]** conduct alleged. In the first, Plaintiffs moved to exclude the proposed testimony of Dr. Anupam B. Jena, (ECF No. 1066, 1070), arguing that the expert's testimony does not reliably address cross-price elasticity of demand in establishing the relevant anti-trust market, Pls.' Mem. in Supp. of Mot. to Exclude (ECF No. 1068) ("Pls.' Mem. to Exclude"). Plaintiffs also moved for partial summary judgment that the relevant anti-trust market is limited to Zetia and its AB-rated generic equivalents sold in the United States and its territories. (ECF No. 1077, 1080); see also

Pls.' Mem. in Supp. of Mot. for Summ. J. (ECF No. 1090, at 20 n.59) ("Pls.' Mem."). Defendants opposed these motions, (ECF No. 1146) ("Defs.' Opp'n"), and Plaintiffs replied, (ECF No. 1206) ("Pls.' Reply").

The matter was referred to the undersigned United States Magistrate Judge for a report and recommendation pursuant to *28 U.S.C. § 636(b)(1)(B)* and *Rule 72(b) of the Federal Rules of Civil Procedure*. This Report concludes that the expert testimony, though admissible, fails to address facts necessary to create a dispute regarding the relevant market, and thus RECOMMENDS the court DENY Plaintiffs' Motion to exclude the proposed testimony of Dr. Anupam B. Jena (ECF No. 1066, 1070) and GRANT Plaintiffs' **[*14]** Partial Motion for Summary Judgment concerning the relevant market (ECF No. 1077, 1080).

I. BACKGROUND

As pertinent to the conclusions set out below,[1] Plaintiffs allege that Merck[2] and Glenmark,[3] a generic drug manufacturer, entered into a patent settlement agreement (hereafter "Settlement Agreement") to delay generic competition for Zetia, a cholesterol medication manufactured by Merck. Specifically, Plaintiffs' claim Glenmark dismissed meritorious patent claims in exchange for Merck's promise not to launch an authorized generic ("AG") for Zetia during Glenmark's period of generic exclusivity. The pending motions seek to define the relevant anti-trust product market -- or the group of products reasonably interchangeable with Zetia as to be affected by the anti-competitive conduct -- from May 2010, when Merck and Glenmark executed their agreement, through December 2016, when generic ezetimibe entered the market. Pls.' Mem. (ECF No. 1090, at 20 n.59); see also *Microbix Biosystems, Inc. v. Biowhittaker, Inc., 172 F. Supp. 2d 680, 695 (D. Md. 2000)* (determining "monopoly power . . . [from] the time the alleged monopolization occurred").

Zetia is the brand-name of the molecule ezetimibe, originally developed and manufactured **[*15]** by Merck. Starr Rpt. ¶ 5 (ECF No. 1090-5, at 4). Ezetimibe is a cholesterol-lowering medication that treats hyperlipidemia. Fazio Rpt. ¶ 27 (ECF No. 1144-1, at 15-16). In 2010, there were several cholesterol-lowering medications available, such as bile acid sequestrants, fibrates, niacin, and combination medications. Id. ¶ 24 (ECF No. 1144-1, at 11-12). Physicians generally consider many types of cholesterol-lowering medications when treating patients, including Zetia. Jena Rpt. ¶¶ 17, 26 (ECF No. 1090-1, at 12, 18-19).

While statins block production of cholesterol in the liver, Zetia works differently, blocking the absorption of cholesterol in the intestine. Starr Rpt. ¶ 12 (ECF No. 1090-5, at 6). Zetia can be prescribed as either a monotherapy or a combination therapy with a statin. Id. ¶ 13 (ECF No. 1090-5, at 6-7). During the relevant period, approximately thirty-five percent of prescriptions were for first-line use (monotherapy or combination), and sixty-five percent of prescriptions were for second-line use. Jena Rpt. ¶¶ 68, 102 (ECF No. 1090-1, at 40-41, 56). Zetia is "primarily used as a second- or later-line treatment after a patient has failed to achieve" cholesterol goals **[*16]** "on his first treatment, typically a statin." Id. ¶ 102 (ECF No. 1090-1, at 56). Zetia is the only FDA-approved cholesterol absorption inhibitor. Starr Rpt. ¶ 12 (ECF No. 1090-5, at 6).

A. Alleged Anti-Competitive Conduct in the Settlement Agreement.

---

[1] For a detailed review of the facts in this case, see *In re Zetia (Ezetimibe) Anti. Litig., No. 2:18-md-2836, 2019 U.S. Dist. LEXIS 205545, 2019 WL 6122017, at *1-3 (E.D. Va. Oct. 15, 2019)*, R. & R. adopted as modified, *2019 U.S. Dist. LEXIS 220078, 2019 WL 6977405 (E.D. Va. Dec. 20, 2019)*; *In re Zetia (Ezetimibe) Anti. Litig., No. 2:18-md-2836, 2019 U.S. Dist. LEXIS 59469, 2019 WL 1397228, at *1-10 (E.D. Va. Feb. 6, 2019)*, R. & R. adopted as modified, *400 F. Supp. 3d 418 (E.D. Va. 2019)*.

[2] "Merck" consists of Merck & Co., Inc.; Merck Sharp & Dohme Corp.; Schering-Plough Corp.; Schering Corp.; and MSP Singapore Co. LLC.

[3] "Glenmark" consists of Glenmark Pharmaceuticals Limited and Glenmark Pharmaceuticals Inc., USA, the latter incorrectly identified as Glenmark Generics Inc., USA.

The Drug Price Competition and Patent Term Restoration Act of 1984 ("Hatch-Waxman Amendments"), which amended the Federal Food, Drug, and Cosmetic Act, governs the generic drug approval process. See *21 U.S.C. § 355*. Under the Hatch-Waxman Amendments, a generic manufacturer can submit an abbreviated new drug application ("ANDA") relying on the brand manufacturer's original approval. Id. *§ 355(j)*. A generic that is bioequivalent to the branded drug receives an AB rating (hereafter "AB-rated generic equivalent"). See id. *§ 355(j)(2)(A)(iv)*; DPP Compl. ¶¶ 51-54 (ECF No. 253-1, at 20-22). To provide incentives for generics to enter the market, an ANDA first filer enjoys a statutory 180-day exclusivity period, which generally begins upon marketing the generic. *21 U.S.C. § 355(j)(5)(B)(iv)*.

Glenmark was the ANDA first filer for ezetimibe. DPP Compl. ¶ 5 (ECF No. 253-1, at 9). Glenmark thus had 180 days of exclusivity as to other generic manufacturers, but it could not prevent Merck from selling an AG. Id. Plaintiffs **[*17]** allege that the Settlement Agreement contained a provision in which Merck agreed not to launch an AG as quid pro quo for Glenmark foregoing meritorious challenges to the ezetimibe patents and delaying its generic launch until late 2016. Id. ¶ 193 (ECF No. 253-1, at 63-64). Without competition from a Merck AG, Glenmark could keep the price of its generic higher to maximize its profits during the exclusivity period. Id. ¶ 222 (ECF No. 253-1, at 70). Plaintiffs allege Merck's promise not to launch an AG for Zetia was therefore an actionable anti-competitive payment of the type the Supreme Court has proscribed in *Federal Trade Commission v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*.

B. Competition between Zetia, Generic Ezetimibe, and Other Cholesterol Medication.

From 2010 to 2016, the time between the Settlement Agreement and the release of generic ezetimibe, Merck raised Zetia's wholesale acquisition cost ("WAC price") approximately fourteen times,[4] from approximately three dollars to eight dollars a pill. PX003[5] (ECF No. 1090-2); PX004 (ECF No. 1086-4). These WAC price increases were always profitable to Merck. Davish Dep. 80:11-14 (ECF No. 1086-2, at 5). Merck never reduced Zetia's WAC price, although pharmaceutical companies typically do not lower WAC **[*18]** prices. Id. 108:25-109:5 (ECF No. 1086-2, at 6-7). However, Merck offered rebates and discounts, which could reduce the price actually paid by end consumers (the "net price"). See, e.g., Def.'s Ex. 27 (ECF No. 1147-12).

Merck considered the price of other cholesterol medications in setting its prices. See, e.g., PX009 (ECF No. 1090-6, at 7) (aiming to "[f]ollow Crestor's WAC pricing actions"). Specifically, Merck "took into consideration what the WAC prices were for other brand drugs" when pricing Zetia. Starr Dep. 129:10-15 (ECF No. 1144-11, at 9); cf. Starr Rpt. ¶ 80 n.245 (ECF No. 1090-5, at 50) ("Merck documents refer to Lipitor and Crestor as 'pricing anchors' for Vytorin and aimed to set Zetia's list price somewhat below that of Vytorin."). Among payors, perception of Zetia was "as a non-statin with no direct competitors (branded or generic)." PX009 (ECF No. 1090-6, at 5); see also PX030 (ECF No. 1091-10, at 7) ("No direct competitors for non-statin market."); PX013 (ECF No. 1090-9, at 3) (finding "[n]o branded competition").

In December 2016, Glenmark's generic ezetimibe entered the market. Addanki Rpt. ¶ 28 (ECF No. 1091-11, at 21). During Glenmark's 180-day period of exclusivity, **[*19]** Merck engaged in extensive strategic contracting -- known as loss-of-exclusivity ("LOE") contracting -- by which it offered substantial rebates for Zetia, permitting Zetia to enjoy a more favorable formulary position.[6] Id. ¶¶ 29, 31 (ECF No. 1091-11, at 21-23). Merck's LOE contracting was

---

[4] Defendants object on foundation grounds, Defs.' Opp'n (ECF No. 1146, at 15 n.7), to the admissibility of Plaintiffs' exhibit, PX004 (ECF No. 1086-4), through which Patrick T. Davish confirmed the WAC price increases, Davish Dep. 108:10-109:5 (ECF No. 1086-2, at 6-7). However, because Defendants do not dispute the price increases themselves, the court accepts Plaintiffs' evidence that the WAC price increased fourteen times.

[5] Exhibits designated MPX" are the exhibits to the Declaration of Thomas M. Sobol in Support of Purchasers' Oppositions to Merck and Glenmark Defendants' Motions for Summary Judgment and to Exclude the Opinions and Testimony of Purchasers' Experts. (ECF No. 1086). Sealed exhibits are filed at ECF Nos. 1090 and 1091.

successful, allowing "ret[ention of] a relatively large quantity of Zetia sales during Glenmark's 180-day exclusivity period for generic ezetimibe." Id. ¶ 37 (ECF No. 1091-11, at 24).

However, Merck still lost sales. Jena Dep. 317:9-14 (ECF No. 1091-6, at 42). Defendants and other generic ezetimibe manufactures predicted that generics would erode Zetia sales. See, e.g., PX019 (ECF No. 1091-2); Brown Dep. 180:11-20 (ECF No. 1086-24, at 4). During Glenmark's 180-day exclusivity period, fifty-six percent of total prescriptions for ezetimibe were generics. Def.'s Opp'n (ECF No. 1146, at 17 n.10) (citing backup data to Starr's report). One year after multiple generics were on the market, the average WAC price for generic ezetimibe was $0.22 per pill, which is 97.5% less than Zetia's November 2016 price of $8.72 a pill. Starr Rpt. ¶ 51 (ECF No. 1090-5, at 30).

Between 2010 and **[*20]** 2016, several other brand and generic cholesterol drugs launched. PX007 (ECF No. 1086-7). Merck's internal strategy documents indicate that other cholesterol drugs presented relatively small immediate risk to Zetia sales.[7] When generic Niaspan launched in September 2013, Zetia had experienced no impact by October. PX012 (ECF No. 1090-8, at 38). Impact was similarly small in the months after generic Crestor and Lipitor -- two blockbuster statins -- entered the market. See Jankiewicz Dep. 117:12-118:10 (ECF No. 1144-7, at 3-4) (stating no "significant change" for Crestor generic); PX027 (ECF No. 1086-27, at 2) (stating "no discernible impact" for Lipitor generic).

C. Dr. Martha A. Starr's Evidence of Cross-Price Elasticity of Demand with Zetia.

Plaintiffs retained Dr. Martha A. Starr ("Starr"), an economist specializing in health economics and the economics of the pharmaceutical industry, to opine on market definition and market power. Starr Rpt. ¶¶ 2, 5 (ECF No. 1090-5, at 3, 4). After performing various studies, she testified that there was "no positive and significant cross-price elasticities of demand for other cholesterol drugs with respect to ezetimibe . . . ." **[*21]** Id. ¶ 8 (ECF No. 1090-5, at 5). Defendants have not moved to exclude Starr. See Tr. 65:6-7 (ECF No. 1300, at 65) (asserting that they "are not trying to exclude [Starr's] testimony"). However, Defendants' expert, Dr. Anupam B. Jena ("Jena"), was hired to rebut Starr's findings. Defs.' Opp'n (ECF No. 1146, at 58 n.27, 60); Jena Rpt. ¶ 10 (ECF No. 1090-1, at 9).

1. Findings Concerning Cross-Price Elasticity of Demand.

Starr reached her conclusions about cross-price elasticity of demand by conducting a series of "natural experiments" analyzing how sales of other cholesterol drugs changed when generic ezetimibe entered the market. Starr Rpt. ¶ 70 (ECF No. 1090-5, at 41-42). She also examined evidence from estimation of an econometric model of demand, and she applied a Hypothetical Monopolist Test ("HMT"). Id. Starr's results rely on sales data from IQVIA National Sales Perspectives ("IQVIA NSP"). See, e.g., id. ¶ 51 (ECF No. 1090-5, at 30 n.158). Defendants do not dispute the accuracy of the reported data. Defs.' Opp'n (ECF No. 1146, at 17 n.10) (referencing "IQVIA NPA data").

---

[6] Defendants contend that Merck "increase[d] discounts and rebates (lowering net price) regularly prior to the loss of exclusivity . . . ." Defs.' Opp'n (ECF No. 1146, at 22) (emphasis in original). Plaintiffs contend "[t]he scattered documents cited . . . do not establish that market-wide discounting for Zetia took place before generic Zetia entry in December 2016." Pls.' Reply (ECF No. 1206, at 27 n.75). Merck planned for LOE contracting at least a year in advance of generic ezetimibe launch. See Addanki Rpt. ¶ 33 (ECF No. 1091-11, at 23). The court agrees that the evidence in the summary judgment record on this motion does not establish that Merck engaged in the same level of rebating and discounting before generic launch as it did upon launch. To the extent reasonable jurors might find more discounting before generic entry, it could not be sufficient to create a dispute of material fact on the relevant market issue, given the consistent and undisputed evidence of WAC price increases.

[7] Plaintiffs repeatedly claim that Merck "knew" that Zetia was not in direct competition with other cholesterol-lowering drugs, see, e.g., Pls.' Mem. (ECF No. 1090, at 16-17), but Plaintiffs' record citations do not establish that Merck universally believed no other cholesterol drugs presented a financial threat to Zetia. In fact, Merck documents classify some products as potential risks. See, e.g., PX012 (ECF No. 1090-8, at 21) (noting that Crestor's LOE was a "risk").

"Natural experiments" are "situations in which an explanatory variable of interest (like price) changes suddenly" **[*22]** and "the change is not itself caused by changes in market conditions." Starr Rpt. ¶ 82 (ECF No. 1090-5, at 52-53). For her natural experiments, Starr first identified potential economic substitutes for Zetia. Id. T. 4 (ECF No. 1090-5, at 52). She then used regression analysis to examine whether trends in drug prescriptions for these products changed significantly in the eighteen months before and after entry of generic ezetimibe. Id. ¶ 85 (ECF No. 1090-5, at 53-54). After examining statins, bile acid sequestrants, fibrates, and other cholesterol drugs, she found that there was "no significant decline in the trend for any of the potential substitutes for Zetia at the time that generic ezetimibe entered." Id. ¶ 88 (ECF No. 1090-5, at 57); see also id. ¶ 87 (ECF No. 1090-5, at 54-55).

As another natural experiment, Starr examined whether the launch of generic versions of other cholesterol medications affected Zetia prescriptions during the period before generic ezetimibe was available. Id. ¶ 89 (ECF No. 1090-5, at 58). The release of generic statins for Pravachol and Zocor in 2006 "did not decelerate the rise of Zetia prescribing" then occurring. Id. ¶ 90. In 2011, generic Lipitor did **[*23]** not "accelerate the decline in Zetia prescribing then" occurring. Id. Finally, "[e]ntries of non-statin drugs Trilipix, Niaspan, and Lovaza in 2013-14 . . . had no significant negative effect on Zetia prescribing." Id.

Starr also used an Almost Ideal Demand System ("AIDS") model to estimate how change in one product's price affects demand for other products. Id. ¶ 91 (ECF No. 1090-5, at 59-60). Starr analyzed the top-prescribed drugs available from March 2004 through December 2018. Id. ¶ 93 (ECF No. 1090-5, at 61). The model showed that "none of the other cholesterol drugs ha[d] a positive and statistically significant cross-price elasticity with respect to Zetia," and only two drugs had a "negative and statically significant" cross-price elasticity "consistent with economic complentarity." Id. ¶ 95 (ECF No. 1090-5, at 61-62). Therefore, her model showed that "[n]one of Zetia's potential economic substitutes were substituted for it on the basis of price." Id. ¶ 96 (ECF No. 1090-5, at 62).

Lastly, Starr performed an HMT. Id. ¶ 97 (ECF No. 1090-5, at 62-63). The HMT comes from the Department of Justice's and Federal Trade Commission's Horizontal Merger Guidelines. Id. As applied to this **[*24]** case, the HMT asks the following question:

> If production of Zetia and its next-best substitute [generic ezetimibe] were to come under the control of a Hypothetical Monopolist, could the monopolist profitably increase the price of the products by 5% for at least a year, assuming prices of all other potential substitutes remanded constant, or would substitution towards other drugs render that price increase unprofitable?

Id. ¶ 99 (ECF No. 1090-5, at 63). Using an empirical analysis, Starr concluded that a hypothetical monopolist could raise prices profitably. Id. ¶ 101 (ECF No. 1090-5, at 64). Because of this, no drugs other than Zetia or its AB-rated generic equivalents "need[ed] to be added to the relevant antitrust market." Id. ¶ 102.

2. Dr. Anupam B. Jena's Critiques of Plaintiffs' Expert Methodology.

Jena, a medical doctor and an economist specializing in the economics of physician behavior, healthcare productivity, and medical innovation, is Defendants' rebuttal expert. Defs.' Opp'n (ECF No. 1146, at 58 n.27, 60); Jena Rpt. ¶¶ 1-4 (ECF No. 1090-1, at 5-6). Plaintiffs do not challenge Jena's qualifications. See Pls.' Mem. to Exclude (ECF No. 1068, at 11); Def.'s Opp'n (ECF No. 1146, **[*25]** at 58 n.27). Using Jena's critiques, Defendants contend that Starr's "natural experiments" are unreliable and therefore cannot establish whether patients switched therapies and whether Zetia lacks elasticity of demand with other cholesterol medications. See, e.g., Defs.' Opp'n (ECF No. 1146, at 49). Jena criticizes the approach Starr[8] took for assessing market definition, primarily because of

---

[8] Jena extends his critiques to Dr. Keith Leffler ("Leffler"). See Defs.' Opp'n (ECF No. 1146, at 60); Jena Rpt. ¶¶ 111-63 (ECF No. 1090-1, at 60-83). Leffler also assessed "the competitive impact of the reverse payment settlement" and "whether a delay of generic Zetia allowed Merck to maintain market power in the sale of Zetia." Leffler Rpt. ¶ 7 (ECF No. 1091-13, at 5). Defendants have moved to exclude Leffler. Defs.' Joint Mot. to Exclude Test. & Ops. of Pls.' Experts Drs. Thomas McGuire and Keith Leffler (ECF No. 1048). That motion remains before the court, but it is not necessary to resolve it here. Plaintiffs rely almost exclusively upon Starr in their motion for partial summary judgment. See generally Pls.' Mem. (ECF No. 1090, at 30-32).

allegedly inappropriate data inputs, flawed assumptions, and Starr's use of the HMT. Defs.' Opp'n (ECF No. 1146, at 49-55); Jena Rpt. ¶¶ 111-63 (ECF No. 1090-1, at 60-83).

Regarding data inputs, Jena specifically censures Starr's use of aggregate data for all prescriptions, and not "focus[ing] on" customers likely to switch products based on price (i.e., "newly diagnosed patients or those for whom treatment with a 'moderate-intensity' statin dosage has proven ineffective") and for including "patients whose high cholesterol is already adequately controlled . . . ." Jena Rpt. ¶ 114 (ECF No. 1090-1, at 62). Jena states that this "predispose[s Starr] to find that economic substitution does not exist . . . ." Id. ¶ 111 (ECF No. 1090-1, at 60). Jena also opines that Plaintiffs' experts inadequately **[*26]** controlled for market conditions other than price, like promotional spending. Id. ¶¶ 116-17 (ECF No. 1090-1, at 63-64).

Regarding assumptions, Jena criticizes Starr's AIDS model as assuming that brand and generic versions share prices. Id. ¶ 134 (ECF No. 1090-1, at 70). Jena also accuses Starr of using "prices and quantities at different places in the distribution chain." Id. ¶ 135 (ECF No. 1090-1, at 71). Thus, Starr does "not capture the substantial discounts and rebates that drug manufacturers offer . . . and that ultimately determine the prices that consumers (or their plans) actually pay for the medications." Id. Jena also takes issue with Starr's claims that other cholesterol-lowering drugs, such as statins, are complements of ezetimibe rather than substitutes. Id. ¶¶ 140-42 (ECF No. 1090-1, at 73).

Lastly, Jena argues that Starr's application of the HMT is flawed. See id. ¶1 146-49 (ECF No. 1090-1, at 74-76). Again, Jena argues that the framework does not adequately control for non-price changes and that regulation in the pharmaceutical industry can affect the test. Id.

D. Defendants' Evidence of Cross-Price Elasticity of Demand.

Defendants also hired Jena to opine on the relevant **[*27]** market. Jena Rpt. ¶ 10 (ECF No. 1090-1, at 9). In his report, Jena principally concludes that there was clinical and economic "substitutability" between Zetia and other cholesterol-lowering medications during the relevant time-period. Id. ¶ 13 (ECF No. 1090-1, at 10). Jena, who practices internal medicine, notes that "ezetimibe was one of several treatment options available to treat patients with hyperlipidemia, particularly for second-line use." Id. ¶ 15 (ECF No. 1090-1, at 11). Jena does not specifically identify any pharmaceutical products that he would include in the market with Zetia. See id. ¶ 110 (ECF No. 1090-1, at 60) ("I have not been asked to affirmatively define the outer boundaries of the relevant market . . ."); Jena Dep. 124:20-22 (ECF No. 1091-6, at 31) (stating that he "assess[ed] whether ... [the] market was constituted only by Zetia and ezetimibe"). Rather, he opines that the relevant market involves a broad class of therapies available to treat hyperlipidemia. Jena Rpt. ¶ 110 (ECF No. 1090-1, at 60) " [m]y analyses ... point to Zetia being part of a market of cholesterol-lowering medication that includes statins, non-statins, and combination drugs.").

Jena also examined **[*28]** Zetia's "own-price elasticity of demand," which "measures the extent to which the demand for a product changes when its own price changes." Jena Rpt. ¶ 32 (ECF No. 1090-1, at 21-22) (emphasis added). His analysis found that Merck could increase sales only within a certain range by lowering its price.[9] Id. 11 91 (ECF No. 1090-1, at 51) (finding "an own-price elasticity for Zetia ranging from - 1.74 to - 1.96 percent"). But he conceded that own-price elasticity is "insufficient to assess the contours of the market ..." Jena Dep. 128:7-9 (ECF No. 1091-6, at 33).

Lastly, Jena examined competition for formulary placement between Zetia and other cholesterol-lowering drugs. See Jena Rpt. ¶¶ 79-90 (ECF No. 1090-1, at 45-51). Health plans place drugs on formularies depending on the manufacturer's price. Id. ¶ 79 (ECF No. 1090-1, at 45-46). Formulary placement then affects a patient's co-

---

[9] Plaintiffs express concern that Jena's own-price elasticity analysis is based entirely on a 2015 emailed spreadsheet. See Pls.' Mem. to Exclude (ECF No. 1068, at 15-16). Jena confirmed that his "empirical estimate of own-price elasticity . . . comes from this spreadsheet." Jena Dep. 75:20-21 (ECF No. 1091-6, at 19). However, Defendants clarify that the scope of Jena's analysis is broader than just the spreadsheet. Defs.' Opp'n (ECF No. 1146, at 59). For the purposes of this motion, the court accepts Jena's evidence of own-price elasticity.

payment. Id. Merck "sought comparable or preferred formulary placement" compared to other cholesterol-lowering medications, and specifically sought "unrestricted" status so that Zetia would be covered without prior health plan authorization. Id. ¶ 83 (ECF No. 1090-1, at 47). Jena opined that "[p]rice competition **[*29]** for favorable formulary placement . . . is indicative of the economic substitutability between Zetia and other drugs." Id. ¶ 79 (ECF No. 1090-1, at 45-46).

E. Plaintiffs' Current Motions.

Plaintiffs moved to exclude Jena's testimony. (ECF Nos. 1066, 1070).[10] Plaintiffs argued that Jena's opinions were irrelevant because he did not examine cross-price elasticity and that his methods were unreliable, primarily because they differed from his non-litigation academic work. Pls.' Mem. to Exclude (ECF No. 1068). On the same day, Plaintiffs also moved for partial summary judgment on the relevant market. (ECF Nos. 1077, 1080).[11] Plaintiffs argued that the relevant market should only include products with significant cross-price elasticity of demand with Zetia, and that undisputed evidence in the summary judgment record showed that only Zetia and its AB-rated generic equivalents had such elasticity. (ECF Nos. 1078, 1090).[12]

To reduce filings, the court ordered that Defendants file a single opposition brief to both Plaintiffs' motions, and that Plaintiffs similarly reply in a single brief. Order (ECF No. 1109). Defendants opposed both Plaintiffs' motions. (ECF Nos. 1140, 1146). Defendants argued that **[*30]** the relevant market was a more holistic inquiry than merely cross-price elasticity, that Jena had appropriately disputed Plaintiffs' evidence, and that Jena's opinions were reliable and relevant. Plaintiffs replied, (ECF Nos. 1194, 1206), and with the matter fully briefed, the parties appeared by counsel for oral argument on June 30, 2021, Tr. (ECF No. 1300).

On this procedural history and these undisputed facts, this Report addresses the merits of Plaintiffs' motion to exclude the proposed testimony of Dr. Anupam B. Jena (ECF No. 1070) and Plaintiffs' partial motion for summary judgment concerning the relevant market (ECF No. 1077).

II. STANDARD OF REVIEW ON SUMMARY JUDGMENT

Federal Rule of Civil Procedure 56 requires the court to grant a motion for summary judgment if "the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*; *Celotex Corp. v. Catrett, 477 U.S. 317, 322-24, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. "A material fact is one 'that might affect the outcome of the suit under the governing law.' A disputed fact presents a genuine issue 'if the evidence is such that a reasonable jury could return a verdict for the non-moving party.'" *Spriggs v. Diamond Auto Glass, 242 F.3d 179, 183 (4th Cir. 2001)* (quoting *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*).

The party seeking summary judgment has the initial burden of informing the **[*31]** court of the basis of its motion and identifying materials in the record it believes demonstrates the absence of a genuine dispute of material fact.

---

[10] The Direct Purchaser Plaintiffs filed the primary motion, (ECF No. 1066), which the End-Payor Plaintiffs then incorporated, (ECF No. 1070).

[11] The Direct Purchaser Plaintiffs filed the primary motion, (ECF No. 1077), which the End-Payor Plaintiffs then incorporated, (ECF No. 1080).

[12] Plaintiffs and Defendants filed supporting memoranda as both public (redacted) and under seal. Plaintiffs' Memorandum in Support is filed as public at ECF No. 1078 and sealed at ECF No. 1090. Defendants' Opposition is filed as public at ECF No. 1140 and sealed at ECF No. 1146. Plaintiffs' Reply is filed as public at ECF No. 1194 and sealed at ECF No. 1206.

This Report and Recommendation relies upon the parties' sealed memoranda. To the extent that the court utilizes facts in recommending disposition that were originally sealed, the court has determined that the interests of the public outweigh the parties' interests in confidentiality, and the information relied upon is hereby unsealed.

Fed. R. Civ. P. 56(c); *Celotex Corp., 477 U.S. at 322-24*. When the moving party has met its burden to show that the evidence is insufficient to support the nonmoving party's case, the burden shifts to the nonmoving party to present specific facts demonstrating that there is a genuine issue for trial. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586-87, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

In considering a motion for summary judgment, "the court must draw all reasonable inferences in favor of the nonmoving party, and it may not make credibility determinations or weigh the evidence." *Reeves v. Sanderson Plumbing Prods., Inc., 530 U.S. 133, 150, 120 S. Ct. 2097, 147 L. Ed. 2d 105 (2000)*; see *Anderson, 477 U.S. at 255*. "[A]t the summary judgment stage the judge's function is not himself to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for trial." *Anderson, 477 U.S. at 249*.

Rule 56 permits partial summary judgment on claims and defenses. *Fed. R. Civ. P. 56(a)*. "A motion for partial summary judgment utilizes the same standards required for consideration of a full motion for summary judgment." *Pettengill v. United States, 867 F. Supp. 380, 381 (E.D. Va. 1994)* (citing *Gill v. Rollins Protective Servs., 773 F.2d 592, 595 (4th Cir. 1985)*, amended, *788 F.2d 1042 (4th Cir. 1986)*; *Fed. R. Civ. P. 56(d)*). Partial summary judgment expedites the trial process:

> "[P]artial summary judgment is merely a pretrial adjudication that certain issues shall be deemed established for the trial of the case. **[*32]** This adjudication . . . serves the purpose of speeding up litigation by" narrowing the issues for trial to those over which there is a genuine dispute of material fact.

J.E. Dunn Constr. Co. v. S.R.P. Dev. Ltd. P'ship, 115 F. Supp. 3d 593, 599 (D. Md. 2015) (quoting Rotorex Co. v. Kinsbury Corp., F. Supp. 2d 563, 571 (D. Md. 1999)). It "avoid[s] a useless trial of facts and issues over which there was really never any controversy and which would tend to confuse and complicate a lawsuit." *In re Norfolk, Balt. & Carolina Line, Inc., 478 F. Supp. 383, 386 (E.D. Va. 1979)* (quoting *Lucia Steel & Trad. Corp. v. Ford, 9 F.R.D. 479, 481 (D. Neb. 1949)*).

III. ANALYSIS

Plaintiffs' underlying action requires them to prove that Defendants possessed "monopoly power" during the alleged timeframe. *Intell. Ventures I LLC v. Cap. One Fin. Corp., 280 F. Supp. 3d 691, 701 (D. Md. 2017)* (quoting *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*). "A company that can exert market power to set prices or exclude competition, without regard to outside market forces, has monopoly power." *E.I. Dupont De Nemours & Co. v. Kolon Indus., 688 F. Supp. 2d 443, 456 (E.D. Va. 2009)* (citing *In re Payment Card Inter. Fee & Merch. Anti. Disc. Anti. Litig., 562 F. Supp. 3d 392, 399 (E.D.N.Y. 2008)*). Because monopoly power is only found in the relevant market, defining the relevant market becomes a "threshold" inquiry. *Consul, Ltd. v. Transco Energy Co., 805 F.2d 490, 493 (4th Cir. 1986)*.

After considering the summary judgment record, I find that there are no genuine disputes of material fact regarding the relevant market. First, Jena's opinions are admissible under *Federal Rule of Evidence 702* and the standard in *Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. However, while Jena's testimony is admissible, it fails to address cross-price elasticity of demand and is therefore insufficient to create a genuine dispute of material fact regarding the relevant market. The record contains **[*33]** sufficient evidence for a reasonable juror to conclude that the relevant market for the anti-trust conduct alleged -- the unlawful delay of generic competition -- was limited to Zetia and its AB-rated generic equivalents. And Defendants have failed to meet their burden to demonstrate a dispute of material fact sufficient to rebut this conclusion. The court thus RECOMMENDS DENYING Plaintiffs' motion to exclude the proposed testimony of Dr. Anupum B. Jena, (ECF Nos. 1066, 1070), and RECOMMENDS GRANTING Plaintiffs' motion for partial summary judgment, (ECF Nos. 1070, 1080).

A. Jena's Expert Opinions are Admissible.

Rule 702 of the Federal Rules of Evidence governs the admissibility of expert testimony. *United States v. Wilson, 484 F.3d 267, 274-75 (4th Cir. 2007)*. Under the Rule:

> A witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if:
>
> > (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue;
> > (b) the testimony is based on sufficient facts or data;
> > (c) the testimony is the product of reliable principles and methods; and
> >
> > (d) the expert has reliably applied the principles and methods to the facts of the **[*34]** case.

Fed. R. Evid. 702. In other words, expert testimony is admissible under *Rule 702* "if it concerns (1) scientific, technical, or other specialized knowledge that (2) will aid the jury or other trier of fact to understand or resolve a fact at issue." *Westberry v. Gislaved Gummi AB, 178 F.3d 257, 260 (4th Cir. 1999)* (citing *Daubert, 509 U.S. at 592*).

The first prong requires the court to examine "whether the reasoning or methodology underlying the expert's proffered opinion is reliable" and the second prong asks the court to analyze "whether the opinion is relevant to the facts at issue." Id.; see also *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 141, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)* ("[T]he Federal Rules of Evidence 'assign to the trial judge the task of ensuring that an expert's testimony both rests on a reliable foundation and is relevant to the task at hand." (quoting *Daubert, 509 U.S. at 597*)); *Oglesby v. General Motors Corp., 190 F.3d 244, 249-50 (4th Cir. 1999)* ("[A] district judge, considering a proffer of expert testimony under *Federal Rule of Evidence 702*—whether based on scientific, technical, or other knowledge -- [the court] must, in determining its admissibility, ensure that the evidence is 'not only relevant, but reliable'" (quoting *Daubert, 509 U.S. at 589*)). That is, "a reliable expert opinion must be based on scientific, technical, or other specialized knowledge and not on belief or speculation, and inferences must be derived using scientific or other valid methods." *Oglesby, 190 F.3d at 250 (4th Cir. 1999)* (citing *Daubert, 509 U.S. at 590, 592-93*). "The proponent of the **[*35]** testimony must establish its admissibility by a preponderance of proof." *Cooper v. Smith & Nephew, Inc., 259 F.3d 194, 199 (4th Cir. 2001)* (citing *Daubert, 509 U.S. at 592 n.10*).

Thus, the District Court serves as a gatekeeper to assess whether the proffered evidence is reliable and relevant. *Kumho Tire Co., 526 U.S. at 141*. But the gatekeeper function does not require that the Court "determine that the proffered expert testimony is irrefutable or certainly correct" because expert testimony is "subject to testing by 'vigorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof.'" *United States v. Moreland, 437 F.3d 424, 431 (4th Cir. 2006)* (quoting *Daubert, 509 U.S. at 596*). There is no "mechanistic test for determining the reliability of an expert's proffered testimony; on the contrary, 'the test of reliability is flexible and the law grants a district court the same broad latitude when it decides how to determine reliability as it enjoys in respect to its ultimate reliability determination.'" *Peters-Martin v. Navistar Int. Trans. Corp., 410 Fed. Appx. 612, 617 (4th Cir. 2011)* (quoting *United States v. Wilson, 484 F.3d 267, 274 (4th Cir. 2007)* (internal citations and quotations omitted).

Plaintiffs seek exclude Jena's opinions on relevancy grounds because he did not analyze cross-price elasticity of demand. Pls.' Mem. to Exclude (ECF No. 1068, at 15). Plaintiffs also argue that Jena's criticisms of their own experts should be excluded because he used an approach that "differs markedly **[*36]** from his approach in his academic work." Id. at 19. However, Plaintiffs' arguments go to the weight of Jena's testimony and its persuasiveness at trial, or in response to their motion, not to the admissibility or reliability of his testimony. Therefore, this Report RECOMMENDS DENYING Plaintiffs' motion to exclude the proposed testimony of Dr. Anupum B. Jena (ECF Nos. 1066, 1070).

i. Jena's Opinions Are Admissible Despite His Failure to Directly Analyze Cross-Price Elasticity of Demand.

Plaintiffs' arguments about relevancy are not sufficient to exclude Jena's opinions entirely. See Pls.' Mem. to Exclude (ECF No. 1068, at 15). The thrust of Plaintiffs' motion concerns the "[c]orrect [q]uestion" that Plaintiffs argue Jena should have answered: that is, cross-price elasticity of demand. Pls.' Mem. to Exclude (ECF No. 1068, at 11). While the court agrees that this is the determinative legal question for Plaintiffs' motion for partial summary judgment on the relevant market, as discussed below, it is not the correct standard for excluding Jena's opinions entirely.

Relevance under the Federal Rules of Evidence requires only that the evidence have a "tendency to make a fact more or less probable **[*37]** than it would be without the evidence" and that "the fact is of consequence in determining the action." *Fed. R. Evid. 401*. "Relevance is typically a low bar to the admissibility of evidence, even though other [Rules] . . . may otherwise limit such evidence." *Jones v. Ford Motor Co., 71 Fed. App'x 280, 283 (4th Cir. 2006)* (citing *Fed. R. Evid. 401*, *404*). As such, Jena does not need to conclusively prove cross-price elasticity with other products for his testimony to be admissible, and Plaintiffs' focus on the legal standard for the relevant market overstates Defendants' burden in admitting Jena's opinions. See Pls.' Mem. to Exclude (ECF No. 1068, at 11-18).

Jena's testimony may affect the "probable" truth of certain facts, including those related to the relevant anti-trust market. *Fed. R. Evid. 401*. As Defendants argue, the caselaw does not require that "an expert offering an opinion on market definition must undertake a certain type of cross-price elasticity study." Defs.' Opp'n (ECF No. 1146, at 55) (emphasis in original). "[D]ifferent economic analys[e]s" can "bear upon a showing of cross-elasticity of demand." *In re Solodyn (Minocycline Hydrochloride) Anti. Litig. [Solodyn], No. 14-md-02503, 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *9 (D. Mass. Jan. 25, 2018)*. In their opposition, Defendants identify conclusions from Jena's report that are potentially helpful to the trier of fact, Def.'s Opp'n (ECF No. 1146, at 57-58), in evaluating "evidentiary **[*38]** proxies . . . for cross-elasticity," *Rothery Storage & Van Co. v. Atlas Van Lines, Inc., 792 F.2d 210, 218, 253 U.S. App. D.C. 142 (D.C. Cir. 1986)*. For instance, Jena examined evidence regarding therapeutic alternatives, formulary placement, and own-price elasticity of demand. Def.'s Opp'n (ECF No. 1146, at 57-58). Lastly, Jena testified that he performed "multifaceted analyses" that accounted for pricing, rebating, and other factors. Jena Dep. 123:13-124:8 (ECF No. 1091-6, at 30-31). While none of his opinions create a genuine dispute of material fact, as discussed below, this does not mean they are entirely irrelevant.

Jena's opinions are also directed to other issues, including damages testimony by Plaintiffs' expert economists. See Jena Rpt. ¶ 10 (ECF No. 1090-1, at 9) (clarifying that his assignment included review of Dr. Keith Leffler's expert report); Leffler Rpt. ¶ 9 (ECF No. 1091-13, at 6) (reporting that Plaintiffs asked him "to quantify the overcharge damages that Plaintiffs suffered because of any delay in the entry of AB-rated generic Zetia"). In evaluating whether to exclude or limit his testimony, the full scope of matters in dispute bears scrutiny.

Jena's opinions likewise stem from his specialized expertise as an economist. See *Westberry, 178 F.3d at 260* (citing *Daubert, 509 U.S. at 592*); Jena Rpt. ¶ 11 (ECF No. 1090-1, at **[*39]** 9). Plaintiffs have not moved to exclude Jena based on his qualifications. See Pls.' Mem. to Exclude (ECF No. 1068, at 11); Def.'s Opp'n (ECF No. 1146, at 58 n.27). Furthermore, Jena has testified that he "personally consider[ed] the relationship between the increase in price of Zetia on the quantities demanded of other drugs . . . ." Jena Dep. (ECF No. 1144-8, at 9). While that opinion ultimately might be insufficient, in his view, Jena did address the requisite standard, and he was fully qualified to perform such analysis. Therefore, this court does not recommend excluding Jena's opinions in connection with the pending motion.

ii. Jena's Criticisms of Plaintiffs' Experts Are Admissible.

Plaintiffs argue that Jena's criticisms of their own experts should also be excluded because he used an approach that "differs markedly from his approach in his academic work." Pls.' Mem. to Exclude (ECF No. 1068, at 19). Specifically, Jena testified that his model "did not converge" in this case, Jena Dep. 269:4-10 (ECF No. 1091-6, at 37), when he always ensures in his "own academic research" that results converge, id. 56:2-5 (ECF No. 1091-6, at 8). When a statistical model fails to converge, it means **[*40]** that it "loops and loops over the data," failing to produce a meaningful result. Id. 48:3-11 (ECF No. 1091-6, at 4). Jena testified that researchers typically re-estimate models until they converge. Id. 49:17-22 (ECF No. 1091-6, at 5). But the court is reluctant to exclude Jena's opinions based on this argument because, in their opposition, Defendants persuasively argue that Jena's deposition testimony on convergence was "misconstrue[d]" and that the failure to converge that Plaintiffs identify described

Jena's re-estimation of Plaintiffs' experts' model over a different time period. Defs.' Opp'n (ECF No. 1146, at 61). Therefore, there is genuine doubt about what Jena's deposition testimony conceded on this point.

Next, Jena is a rebuttal expert, not "an affirmative expert on market definition." Id. at 60. "Rebuttal evidence is defined as 'evidence given to explain, repel, counteract, or disprove facts given in evidence by the opposing party.'" *United States v. Stitt, 250 F.3d 878, 897 (4th Cir. 2001)* (quoting Black's Law Dictionary 1267 (6th ed. 1990)). A major portion of Jena's report is devoted to criticisms of Starr, see Jena Rpt. ¶¶ 111-63 (ECF No. 1090-1, at 60-83), and his criticisms are based on his own specialized knowledge as an **[*41]** economist and physician, see id. ¶¶ 10-11 (ECF No. 1090-1, at 9-10). These criticisms, however, create no dispute of material fact, as discussed below. As a result, although permissible, they are insufficient to create a dispute of material fact on the threshold issue of relevant market.

B. The Relevant Product Market is Zetia and its AB-Rated Generic Equivalents.

Proof of a relevant market is a threshold determination for an anti-trust claim. *Consul, Ltd., 805 F.2d at 493*. The relevant market "provides the context against which to measure the competitive effects of an agreement," *Geneva Pharms. Corp. v. Barr Labs, Inc., 386 F.3d 485, 496 (2d Cir. 2004)*, and it has two components: (1) the geographic market, or area of competition; and (2) the product market, or products and services in competition, *Consul, Ltd., 805 F.2d at 495*. The geographic component examines "that geographic area within which the defendant's customers . . . can practicably turn to alternative supplies if the defendant were to raise its prices or restrict its output." *E.I. du Pont de Nemours & Co. v. Kolon Indus., Inc., 637 F.3d 435, 441 (4th Cir. 2011)*. The parties agree that the appropriate geographic demarcation is the United States and its territories. See Pls.' Mem. (ECF No. 1090, at 20-21). However, the parties dispute the relevant product market.

Plaintiffs contend that the relevant product market is Zetia and Zetia's AB-rated **[*42]** generic equivalent, ezetimibe. Pls.' Mem. (ECF No. 1090, at 8). Defendants do not specify the outer contours of a different market, but they argue that "Zetia competed in a broad, competitive market for cholesterol-lowering medications." Defs.' Opp'n (ECF No. 1146, at 33). Because the Settlement Agreement underlying Plaintiffs' claims targeted only the market for Zetia and ezetimibe, and because Defendants produced no evidence of substantial cross-price elasticity of demand between Zetia and any products other than its AB-rated generic equivalent, ezetimibe, the court finds that Plaintiffs have satisfied their burden in showing that there are no material disputed facts concerning the scope of the relevant product market within which to evaluate anti-competitive effects of the Settlement Agreement.

1. The Purpose of the Relevant Market Inquiry.

In defining the product market, the court principally seeks to understand whether Defendants were capable of causing anti-competitive effects: "The purpose of the inquiries into market definition and market power is to determine whether an arrangement has the potential for genuine adverse effects on competition." *Dickson v. Microsoft Corp., 309 F.3d 193, 210 (4th Cir. 2002)* (quoting *Fed. Trade Comm'n v. Ind. Fed'n of Dentists, 476 U.S. 447, 460, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*) (emphasis in original). **[*43]** As such, the inquiry is not what Merck and Glenmark did to compete with other cholesterol-lowering drug manufacturers or with each other; the question is what they did to defeat competition. See id.

The boundaries of the relevant market should therefore track the alleged anti-competitive conduct itself. As the court in In re Aggrenox Antitrust Litigation [Aggrenox] observed:

> [A]s a practical matter, the only "relevant" market in . . . cases brought under F.T.C. v. Actavis, will be the market in which the challenged settlement agreement allegedly acted as an anticompetitive restraint: that is, in this case, it will be implicitly defined by the scope of the disputed patent.[13]

199 F. Supp. 3d 662, 665 (D. Conn. 2016). This practical result comes because the patent created the market. And the anti-competitive harm from reverse payment agreements derives from the attempt to illegally extend a previously legitimate monopoly on that market. See *Actavis, Inc., 570 U.S. at 157-58* (referencing the "patentee's market," and noting that companies use reverse payments "to maintain supracompetitive prices . . . rather than face what might have been a competitive market" (emphasis added)). As a result, other courts have similarly limited the relevant market before trial in **[*44]** reverse-payment cases to the branded drug and its generic equivalent. See, e.g., *Aggrenox, 199 F. Supp. 3d at 663, 669*; *United Food & Com. Workers Loc. 1776 & Participating Empr's Health & Welfare Fund v. Teikoku Pharm USA [Lidoderm], 296 F. Supp. 3d 1142, 1176 (N.D. Cal. 2017)*.

Defendants argue that considering the patent's scope in determining relevant market "would result in a finding of market power in essentially all pharmaceutical antitrust cases." Defs.' Opp'n (ECF No. 1146, at 36 n.20). But while a large reverse payment is "suggestive of market power," market power exists only if Defendants could "profitably charge supracompetitive prices over a sustained period" of time. *Aggrenox, 199 F. Supp. 3d at 666*. Because there could "conceivabl[y]" be "fierce competition" in the market, a finding of market power is not certain. Id. But what this focused inquiry makes clear is that pharmaceutical companies, like Merck and Glenmark, are "vanishingly unlikely" to agree to reverse payments if they do not already have market power (because otherwise the disputed patent would be worthless). Id. Of course, Plaintiffs must still prove the Settlement Agreement contained a reverse payment -- a fact sharply contested and on which only Defendants have moved for summary judgment. But if Plaintiffs succeed, then the Settlement Agreement itself would be "a strong indicator" that Defendants exerted power **[*45]** over the market created by the disputed patent. Id.

In this case, therefore, the relevant market depends on the challenged reverse payment provision in the Settlement Agreement, which resolved the Merck-Glenmark patent litigation. As Plaintiffs allege, Merck and Glenmark targeted Zetia and its AB-rated generic equivalents in the Settlement Agreement -- they did not attempt to control pricing on all cholesterol-lowering medication. See Pls.' Mem. (ECF No. 1090, at 22). Plaintiffs allege that the Settlement Agreement's no-AG provision enabled Merck to unlawfully extend the monopoly conferred legitimately by its patent and sell Zetia for longer without generic competition. DPP Compl. ¶¶ 215-16 (ECF No. 253-1, at 68). They also allege the company allowed Glenmark to maximize profits for generic ezetimibe during its 180-day period of exclusivity, holding up the price of the generic by limiting generic competition. Id. ¶ 222 (ECF No. 253-1, at 70). Thus, assuming Plaintiffs establish the reverse payment they have alleged, the Settlement Agreement created two distinct periods of anti-competitive threat, allocating all sales of ezetimibe (Zetia) to Merck before generic competition, and all **[*46]** generic ezetimibe sales to Glenmark after generic entry for 180 days. Id. ¶ 272 (ECF No. 253-1, at 82). Both periods affected the market for the patented drug, ezetimibe.

As important, the Settlement Agreement imposed no other restrictions on either company's ability to compete in all the usual ways. It contained no price or production limits, restrictions on rebating or formulary placement, no allocation of markets, or any other allegedly anti-competitive terms. Therefore, the Settlement Agreement defined the market as comprised only of Zetia and its AB-rated generic equivalents. The question for resolution in this case thus becomes whether this agreement could cause anti-competitive effect. And it is to this question that the relevant market inquiry here must be directed.

2. Cross-Price Elasticity of Demand and Factors for Defining the Relevant Market.

---

[13] This observation was made in the context of a discovery dispute, in which the judge found that any discovery related to other drugs beyond the patented one and its generic equivalent was "irrelevant." *Aggrenox, 199 F. Supp. 3d at 663, 669*. Defendants make much of that posture. See, e.g., Tr. 90:25-91:2 (ECF No. 1300, at 90-91) (arguing that the judge "never looked at any evidence"). However, despite the difference between that posture and the one here, I find *Aggrenox*'s legal analysis is sound, persuasive, and entirely consistent with the extensive evidence presented in this motion.

Parties dispute the legal standard applicable to defining the relevant market. Defendants argue that market definition "is a holistic, fact-intensive" inquiry, accusing Plaintiffs of impermissibly focusing on "sensitivity to price changes" as the only applicable metric. Def.'s Opp'n (ECF No. 1146, at 8). Plaintiffs argue that Defendants' **[*47]** holistic approach is contrary to existing law, and that "the existence of cross-price elasticity is the determinative legal question." Pls.' Reply (ECF No. 1206, at 16). They also argue that their own evidence establishes that Zetia had cross-price elasticity only with Zetia and its AB-rated generic equivalents. Id. at 17.

After considering the anti-competitive conduct alleged in this case, I find that cross-price elasticity is determinative of relevant market under Fourth Circuit precedent. Plaintiffs have met their burden in establishing that Zetia had cross-price elasticity only with its AB-rated generic equivalents. Further, Defendants have failed to introduce facts sufficient to permit any reasonable juror to conclude that Zetia demonstrated cross-price elasticity of demand with any other products.

i. The Requirement for Cross-Price Elasticity of Demand in Defining the Relevant Market.

The relevant market must be "the narrowest market which is wide enough so that [other] products . . . cannot compete on substantial parity with those included in the market." *Int'l Wood Processors v. Power Dry, Inc., 792 F.2d 416, 430 (4th Cir. 1986)* (quoting L. Sullivan, Handbook of the Law of Antitrust § 12, at 41 (1977)) (emphasis added). The boundaries of that market **[*48]** depend on the "extent to which consumers will change their consumption of one product in response to a price change in another, i.e., the 'cross-elasticity of demand.'" *It's My Party, Inc. v. Live Nation, Inc., 811 F.3d 676, 683 (4th Cir. 2016)* (quoting *Eastman Kodak Co., 504 U.S. at 469*).

Cross-price elasticity of demand measures "the responsiveness of the sales of one product to price changes of the other." *United States v. E.I. Du Pont de Nemours & Co. [DuPont], 351 U.S. 377, 400, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. If a price change "causes a considerable number of customers . . . to switch" products, then there is "a high cross-elasticity of demand" between the products. Id. Products with high elasticity of demand "compete in the same market." Id. Products showing only "low" cross-price elasticity "are not in the same product market." *Fed. Trade Comm'n v. Lundbeck, Inc., 650 F.3d 1236, 1240 (8th Cir. 2011)* (citing *H.J., Inc. v. Int'l Tel. & Tel. Corp., 867 F.2d 1531, 1538, 1540 (8th Cir. 1989)*).

In arguing for a holistic factorial approach to market definition, as opposed to only cross-price elasticity, Defendants rely heavily on *Brown Shoe Co. v. United States, 370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. See Def.'s Opp'n (ECF No. 1146, at 8-11, 34-49). There, the Supreme Court of the United States listed appropriate factors for consideration:

> industry or public recognition of the []market as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.

Brown Shoe Co., 370 U.S. at 325. But other caselaw clarifies **[*49]** that these factors are simply "evidentiary proxies . . . for cross-elasticities." *Rothery Storage & Van Co., 792 F.2d at 218*; see also *H.J., Inc. v. Int'l Tel. & Tel. Corp., 867 F.2d 1531, 1538-40 (8th Cir. 1989)* (citing id.). They do not replace cross-elasticity as the key inquiry.

Throughout their briefing, Defendants emphasize "reasonable interchangeability" as the broader inquiry necessary to render Jena's opinions on the relevant market persuasive. See, e.g., Defs.' Opp'n (ECF No. 1146, at 57). However, reasonable interchangeability is not something separate from cross-price elasticity of demand. *Brown Shoe* framed reasonable interchangeability in terms of cross-price elasticity: "The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Brown Shoe Co., 370 U.S. at 325* (emphasis added). The Fourth Circuit echoed this definition, placing cross-price elasticity as its central meaning. See *It's My Party, Inc., 811 F.3d at 683* (quoting *Eastman Kodak Co., 504 U.S. at 469*).

Cross-price elasticity is essential because market definition is used to measure "genuine adverse effects on competition." *Dickson, 309 F.3d at 210* (quoting *Ind. Fed'n of Dentists, 476 U.S. at 460*). As Plaintiffs argue, "the whole question . . . is to identify products that, by threatening Merck with substantial loss of unit sales for doing so, will constrain Merck's ability to **[*50]** raise or maintain Zetia prices a small but significant amount above the competitive level (that is, constrain Merck's market power)." Pls.' Mem. (ECF No. 1090, at 25). The question is not whether ordinary and expected competition in the marketplace restrained Merck's pricing decisions -- it obviously did. But to be part of the relevant market in evaluating Defendants' anti-competitive actions, other drugs must have been able to constrain Zetia's pricing above the competitive level. See *United States v. Microsoft Corp., 253 F.3d 34, 53, 346 U.S. App. D.C. 330 (D.C.C. 2001)* (considering "only substitutes that constrain pricing"). Applying this well-established law requiring cross-price elasticity of demand, there is no dispute of material fact on the relevant market within which to measure Plaintiffs' allegations of antitrust harm.

ii. Plaintiffs' Evidence of Cross-Price Elasticity of Demand with Zetia and Its AB-Rated Generic Equivalents.

Plaintiffs' motion is supported by strong evidence that no other drugs significantly constrained Zetia pricing prior to the launch of generic ezetimibe. Merck raised Zetia's WAC price repeatedly in the years before generic launch, from approximately three to eight dollars a pill, without loss in profitability. PX003 (ECF No. 1090-2); PX004 **[*51]** (ECF No. 1086-4); Davish Dep. 80:11-14 (ECF No. 1086-2, at 5). Merck also never reduced Zetia's WAC price. Davish Dep. 108:25-109:5 (ECF No. 1086-2, at 6-7). Even after recognizing that pharmaceutical companies rarely reduce WAC price, and considering any rebates affecting net price, this profitable rise in WAC price is significant.

Plaintiffs' expert evidence in this case is also compelling. Starr's natural experiments show lack of cross-price elasticity with any other drugs by demonstrating (1) that patients did not switch from other cholesterol-lowering medications to cheaper ezetimibe when it first became available, and (2) that availability of cheaper generics for other cholesterol-lowering medication (i.e., generics of Zocor, Pravachol, Lipitor, Trilipix, Niacin, and Lovaza) did not cause patients to switch from more expensive Zetia. Starr Rpt. ¶¶ 82-90 (ECF No. 1090-5, at 52-59). These natural experiments go to the heart of cross-price elasticity by showing "the responsiveness of the sales of one product to price changes of the other." *DuPont, 351 U.S. at 400*. Starr also did not limit her study to natural experiments, but also drew upon her AIDS model and an HMT. Id. ¶¶ 91-102 (ECF No. 1090-5, at 59-64). **[*52]** Each of these methods "point[ed] to the same finding: The relevant antitrust product market is Zetia and its AB-rated equivalents." Id. ¶ 103 (ECF No. 1090-5, at 64-65).

Lastly, the "price water fall . . . when generic ezetimibe entered the market" demonstrates the absence of cross-price elasticity because previous competition "was not sufficient to discipline the price to anywhere near the competitive level," Tr. 84:24-85:21 (ECF No. 300, at 84-85). Monopoly power is evidenced by a firm's ability to "profitably raise prices substantially above the competitive level." *Dickson, 309 F.3d at 199 n.1* (quoting *United States v. Microsoft Corp., 253 F.3d 34, 51, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)*). Drugs with cross-price elasticity discipline a product's pricing. See *DuPont, 351 U.S. at 400 (1956)* (defining cross-price elasticity). Zetia's pre-generic price was $8.72 a pill and the generic price was $0.22 a pill within one year. Starr Rpt. ¶ 51 & Fig. 4 (ECF No. 1090-5, at 30-31). Even recognizing that generic prices are generally lower (as they did not incur research and development costs), Defs.' Opp'n (ECF No. 1146, at 17), the dramatic price difference between Zetia and generic ezetimibe indicates a lack of cross-price elasticity with any of the alternative options Defendants seek to include. This includes several other generic **[*53]** cholesterol-lowering drugs that were far cheaper than Zetia before generic ezetimibe entered the market.

iii. The Court Can Rely Upon Plaintiffs' Studies of Cross-Price Elasticity Despite Jena's Critiques.

However, the dispute on this motion is not whether Plaintiffs' evidence shows cross-price elasticity, but rather whether Plaintiffs' evidence is sufficiently undisputed for summary judgment after Jena's critiques. See Defs.' Opp'n (ECF No. 1146, at 49) ("Plaintiffs have not met their burden . . . given the substantial flaws in [Plaintiffs'] experts' alleged cross-price elasticity studies, as illustrated by . . . Jena."). Jena's critiques focus mainly on Starr's methodology and data inputs. See Jena Rpt. ¶¶ 111, 114 (ECF No. 1090-1, at 60, 62). But his critiques occur at the margins of Starr's analysis, and they do not prevent the court from relying on Plaintiffs' abundant evidence showing cross-price elasticity only between Zetia and its AB-rated generic equivalents.

Regarding the natural experiments, Jena critiques Starr's use of aggregate date and any controls for market condition. See id. Jena asserts that Starr's analysis is thus "fundamentally flawed." Id. ¶ 111 (ECF No. 1090-1, **[*54]** at 60). But labeling something "flawed" is not the same as demonstrating it. In fact, while the minor adjustments Jena recommends might diminish the stark degree to which cross-price elasticity was lacking with other products, they would not cause Starr to find cross-price elasticity where there was none before. Cross-price elasticity must be substantial, not "small." *Times-Picayune Pub. Co. v. United States, 345 U.S. 594, 612 n.31, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*; see also *SmithKline Corp. v. Eli Lilly & Co., 575 F.2d 1056, 1064 (3d Cir. 1978)* (requiring "significant positive cross-price elasticity" (emphasis added)).

Starr's decision to use aggregate data (as opposed to attempting to isolate new users of the drug) to reflect the "overall" market is also not misleading. Starr Rebut. ¶ 39 (ECF No. 1091-12, at 22-23); cf. Defs.' Opp'n (ECF No. 1146, at 49-51). The increased price sensitivity of "new" customers can certainly be relevant. See, e.g., *Solodyn, 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *41*. But the very definition of cross-price elasticity requires consideration of "old" customers. See *DuPont, 351 U.S. at 400* (discussing customers who "switch" products). Because aggregate data reflects all potential customers, "old" as well as "new," it is unlikely to be misleading in any analysis of relevant market. See Starr Rebut. ¶ 39 (ECF No. 1091-12, at 22-23).

Jena's critique of Starr's AIDS model fails to create material **[*55]** disputes of fact for similar reasons. Defendants criticize a variety of Starr's data inputs, see Defs.' Opp'n (ECF No. 1146, at 51-53), but fail to show how these adjustments could create more than "low" cross-price elasticity when none appeared initially. *Lundbeck, Inc., 650 F.3d at 1240* citing *H.J., Inc., 867 F.2d at 1538, 1540*. Defendants also criticize Starr's AIDS model for what they perceive are illogical results. See Defs.' Opp'n (ECF No. 1206, at 52). For example, they dislike Starr's characterization of statins as complements, not substitutes, for Zetia, when up to thirty-five percent of Zetia is prescribed as a monotherapy. See id.; Jena Rpt. ¶ 68 (ECF No. 1090-1, at 40-41). However, Plaintiffs have produced evidence that "Zetia is only used as a first-line treatment when statins are contraindicated," making them "not therapeutically interchangeable . . . . Miller Rebut. ¶ 100 (ECF No. 1199-5, at 45-46). Because Defendants' criticisms are based on perception, not proven contradiction,[14] they do not undermine Starr's AIDS model.

Lastly, Defendants claim that an HMT is inappropriate outside the Department of Justice's review of horizontal mergers. Defs.' Opp'n (ECF No. 1146, at 53). Plaintiffs cite *Victus, Ltd. v. Collezione Europa U.S.A., Inc., 26 F. Supp. 2d 772 (M.D.N.C. 1998)*, as endorsing the HMT in the antitrust **[*56]** context, Pls.' Reply (ECF No. 1206, at 44). This case, as well as others, appear to endorse application of the Horizonal Merger Guidelines to the product market definition. See *Victus, Ltd., 26 F. Supp. 2d at 785*; see also Pls.' Reply (ECF No. 1206, at 44 n.141) (citing cases). Defendants' other critiques of Starr's HMT are merely extensions of their other arguments (e.g., that Starr "fail[ed] to adequately control for non-price changes"), and therefore fail to create material disputes of fact for the same reasons. Defs.' Opp'n (ECF No. 1146, at 54-55).

It is also relevant that Defendants have not tried to exclude Starr. See Tr. 65:6-7 (ECF No. 1300, at 65). While Defendants argue that Starr made "a lot of mistakes," id. 65:5, they apparently concede that she is qualified to conduct these studies. Starr has extensive relevant education and expertise. Starr Rpt. ¶ 1 (ECF No. 1090-5, at 3). She has also "conducted economic and econometric analyses of . . . market definition" before, even testifying "on market definition in litigation alleging delayed generic entry" for another drug. Id. ¶ 3 (ECF No. 1090-5, at 34). Considering this, Jena's marginal critiques do not render her testimony unreliable.

Importantly, Starr's evidence **[*57]** does not present a marginal case or close call on relevant market. She analyzed at least six natural experiments, using reliable nation-wide sales figures, which demonstrate -- without exception -- that several of the supposed substitutes Defendants seek to include in the relevant market do not show any evidence of cross-price elasticity. See id. ¶¶ 82-90 (ECF No. 1090-5, at 52-58). And the AB-rated generic equivalents which were the target of the antitrust conduct alleged had profound price effects when they became available. Id. ¶ 82 (ECF No. 1095-5, at 53).

While this Report does not individually address every critique Defendants raise regarding Starr's work, after reviewing Jena's expert report in detail, I find it does not raise any criticism -- singly or in combination - that

[14] Defendants argue that the AIDS model also shows several statins as complements, but this comes from Jena's recalculations. *See* Defs.' Opp'n (ECF No. 1146, at 53).

undermines Plaintiffs' strong evidence of cross-price elasticity between only Zetia and its AB-rated generic equivalents. As the relevant market inquiry is a screening mechanism only, and cross-price elasticity is used to determine "whether an arrangement has the potential for genuine adverse effects on competition," this court is satisfied that Plaintiffs' evidence demonstrates that potential. *Dickson, 309 F.3d at 210* (quoting **[*58]** *Ind. Fed'n of Dentists, 476 U.S. at 460*).

iv. Defendants' Evidence Does Not Show Cross-Price Elasticity of Demand with Any Other Products.

Because Plaintiffs met their burden as the moving party to produce evidence sufficient to demonstrate entitlement to summary judgment on their part, Defendants must produce sufficient facts to show there is a genuine issue for trial. *Matsushita Elec. Indus. Co., 475 U.S. at 586-87*. Even considering Jena's opinion testimony, they cannot do so. There is no question that "Zetia competed in a broad, competitive market for cholesterol-lowering medications." Def. Opp'n (ECF No. 1146, at 33); see also id. at 31-33 (citing marketing actions). Merck contemplated the WAC price for other medications when pricing Zetia, Starr Dep. 129:10-15 (ECF No. 1144-11, at 9), considered discounting Zetia in relation to other medications, see, e.g., PX009 (ECF No. 1090-6, at 7), priced Zetia in line with other cholesterol medication, Jena Rpt. Ex. 6 (ECF No. 1090-1, at 155), and tracked prescription shares and volume for statins and non-statins, see, e.g., Defs.' Opp'n Ex. 21 (ECF No. 1147-9). But again, the target inquiry to define relevant market in an anti-trust case is not Defendants' competitive actions but their anti-competitive actions. See *Dickson, 309 F.3d at 210 (4th Cir. 2002)* (quoting **[*59]** *Ind. Fed'n of Dentists, 476 U.S. at 460 (1986)*). Evidence of ordinary competition in a broad market for cholesterol-lowering therapies is only relevant if the anti-trust conduct alleged, namely the Settlement Agreement, was alleged to confer monopoly power in that market. See id.; *It's My Party, Inc., 811 F.3d at 683* (quoting *Eastman Kodak Co., 504 U.S. at 469*).

Defendants' evidence, and particularly Jena's testimony, does not establish that Zetia had cross-price elasticity with any medication other than Zetia and its AB-rated generic equivalents. And Jena's testimony that Merck considered other drug prices or employed aggressive rebating strategies is simply evidence of ordinary competitive behavior -- none of which is alleged to have been targeted by the Settlement Agreement's term's, which Plaintiffs' allege delayed and limited generic competition for ezetimibe. See Jena Rpt. ¶¶ 79-90 (ECF No. 1090-1, at 45-51). Defendants argue that Jena considered cross-price elasticity, citing (1) findings of substitutability; (2) Jena's own-price elasticity of demand study; and (3) competition for formulary placement. Defs.' Opp'n (ECF No. 1146, at 59-60). None of this evidence demonstrates cross-price elasticity with respect to any other product. Instead, it shows only ordinary competition with other cholesterol-lowering **[*60]** medications.

Therapeutic substitutability is not the same as cross-price elasticity. Defendants argue that "an analysis of the relevant market necessarily must begin with an assessment of clinical alternatives for a given drug," emphasizing that "other cholesterol-lowering drugs were therapeutically substitutable with Zetia . . . ." Defs.' Opp'n (ECF No. 1146, at 37, 38). In 2010, several non-ezetimibe medications were available to treat high cholesterol, Fazio Rpt. ¶ 24 (ECF No. 1144-1, at 11-12), to which "Zetie's clinical effect is comparable . . . ." Talreja Rpt. ¶ 26 (ECF No. 1145-5, at 9); see also Fazio Rpt. ¶ 47 (ECF No. 1144-1, at 32) (noting that he "routinely considered whether to put patients on ezetimibe versus switching them to a more powerful statin"). For exactly this reason, Starr's series of natural experiments tested whether any of these therapeutically similar drugs constrained Zetia pricing above the competitive level. They did not. And Jena's report provides no empirical data to suggest that they did. "[S]omething more than mere therapeutic equivalency is required to define the relevant antitrust product market. There must be some showing of cross-price elasticity." **[*61]** *Lidoderm, 296 F. Supp. 3d at 1172* (emphasis in original).

Jena's own-price elasticity study similarly fails to prove cross-price elasticity because it is simply not the same measurement. Cross-price elasticity is intended to show "the responsiveness of the sales of one product to price changes of the other," and own-price elasticity has no inputs for non-Zetia drugs. *DuPont, 351 U.S. at 400*. Own-price elasticity also cannot help the fact finder determine market power "when market power is already being exercised" because supracompetitive prices are frequently sensitive to price increases. Starr Rebut. ¶ 77 (ECF No. 1091-12, at 44).

Lastly, formulary placement is not enough to show cross-price elasticity. Defendants place great weight on formulary placement as the key determining factor. See Tr. 47:9-12 (ECF No. 300, at 47) (arguing that "formulary competition . . . is the heart of competition"); id. 55:23-24 (ECF No. 300, at 55) (arguing that "the issue is the formulary competition"). But while other courts have discussed formulary placement, it is not determinative. See, e.g., *Fed. Trade Comm'n v. AbbVie Inc., 329 F. Supp. 3d 98, 131 (E.D. Pa. 2018)*, rev'd in part on other grounds, *976 F.3d 327 (3d Cir. 2020)* (cross-price elasticity undisputed); *Solodyn, 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *17* (mentioned as factual background only). Merck may have offered "significant rebates to ensure **[*62]** that it maintained its formulary status," but it is unclear from formulary status alone what "significant market share" would have been lost, and to which competitors. Defs.' Opp'n (ECF No. 1146, at 10).

Instead, seeking "preferred formulary placement" is an example of Merck (not the market) constraining Zetia's pricing. Defs.' Opp'n (ECF No. 1146, at 35). At least one court has reasoned that a manufacturer "increase[ing] its price concessions . . . does not necessarily show" cross-price elasticity but could also mean that Merck was "taking measures to increase the ultimate number of prescriptions" written. *Lidoderm, 296 F. Supp. 3d at 1175*. Merck's negotiations for "unrestricted" status support this conclusion. Jena Rpt. ¶ 83 (ECF No. 1090-1, at 47). Even if Merck "specifically attempted to negotiate a more favorable formulary placement as compared to" other cholesterol-lowering medications, and even if Merck "estimated" a profit from such a movement, this does not show cross-price elasticity in the relevant market targeted by the anti-trust conduct alleged. Defs.' Mem. (ECF No. 1146, at 47)). At most, this is ordinary competitive positioning.

Nowhere did Jena meaningfully address cross-price elasticity of demand. **[*63]** He admitted that he "did not compute an empirical figure for a cross-price elasticity." Jena Dep. 69:17-19 (ECF No. 1199-8, at 4); see also id. 283:10-14 (ECF No. 1199-8, at 5) (testifying he did "not estimate[] the cross-price elasticity between branded Zetia and generic ezetimibe to compare that cross-price elasticity with the cross-price elasticity of other products"). Although Defendants' brief emphasizes that Jena "[a]bsolutely" considered it, Defs.' Opp'n (ECF No. 1146, at 59) (quoting Jena Dep. 137:5-11 (ECF No. 1144-8, at 9)), their citations point only to Jena's labeling of his alternative analyses as evidence of cross-price elasticity. In fact, Jena's alternative analysis involves "how Merck was competing with the manufacturers of Crestor and Lipitor on price," which he then asserts "is essentially an analysis of cross-price elasticity," Jena Dep. 137:5-16 (ECF No. 1144-8, at 9) (emphasis added). Evidence of Merck's "internal projections" and corporate belief that Zetia participated in a broad market does not constitute evidence of cross-price elasticity necessary to define the relevant market in this anti-trust case; rather, this is more evidence of ordinary competition. **[*64]** Jena Rpt. ¶ 18 (ECF No. 1090-1, at 12-14).

Defendants contend that Jena's evidence should not be discounted simply because he uses a different economic analysis. Defs.' Opp'n (ECF No. 1146, at 46). Experts may "use[] a different economic analysis" that "explicitly considers the changes in effective pricing (i.e., accounting for coupons, discounts and rebates)" to describe cross-price elasticity of demand. *Solodyn, 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *9*. However, those experts still used some "models to examine how [the manufacturer]'s rebate programs and [the generic] 's launch impact[ed] the rate of new . . . prescriptions." Id. Jena provides no such alternative models.

Defendants are correct in asserting that they do not bear the burden of defining the relevant market on summary judgment. Defs.' Opp'n (ECF No. 1146, at 56); *Fed. R. Civ. P. 56*. However, Defendants refer repeatedly to the "total lipid" or "cholesterol-lowering" market, without identifying the specific drugs comprising these alternative relevant markets.[15] Defs.' Opp'n (ECF No. 1146, at 9). Not only would such a broad relevant market unfairly impede Plaintiffs, but Defendants' position indicates that the evidence does not support a narrow, workable relevant market without becoming too **[*65]** expansive and unwieldy for the current litigation. See *Int'l Wood Processors, 792 F.2d at 430* (quoting L. Sullivan, Handbook of the Law of Antitrust § 12, at 41 (1977)) (requiring "the narrowest market" with genuine competition); cf. *Times-Picayune Pub. Co., 345 U.S. at 612 n.31* ("For every product, substitutes exist. But a relevant market cannot meaningfully encompass that infinite range."). As such, Defendants' evidence fails to

---

[15] Defendants provide some evidence of formulary placement for several specific medications (Crestor, simvastatin, and atorvastatin), claiming that it shows "significant cross-price elasticity between Zetia and these competitive cholesterol-lowering drugs." Defs.' Opp'n (ECF No. 1146, at 46-47). However, Defendants do not attempt to define the market as including only Zetia and these named drugs. In fact, Defendants' loose definition would seem to encompass drug and non-drug therapies.

create any dispute of material fact to overcome Plaintiffs' proof that the relevant market should be limited to Zetia and its AB-rated generic equivalents.

3. This is not a "single product" market.

Defendants accuse Plaintiffs of drawing the relevant market so narrowly that the relevant market is only the product itself. See Defs.' Opp'n (ECF No. 1146, at 7). ***Antitrust law*** permits a one-product market where the product is truly "unique" and "not interchangeable with [any] other product." *Queen City Plaza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 439 (3d Cir. 1997)*; *Eastman Kodak Co., 504 U.S. at 481-82* (allowing single-product markets). However, even if single-product markets were wholly impermissible, I do not agree that Zetia and its AB-rated generic equivalents constitute a single product.

When an item is sold by multiple manufacturers, each of the manufacturer's products constitute a separate product for this inquiry. See *Xerox Corp. v. Media Scis. Int'l, Inc., 511 F. Supp. 2d 372, 384 (S.D.N.Y. 2007)*. Plaintiffs define the relevant **[*66]** market as including all Zetia's AB-rated generic equivalents, which includes ezetimibe produced by all the generic drug makers eligible to produce it. Pls.' Reply (ECF No. 1206, at 39-40). Leaving aside the undisputed evidence that "multiple generics" entered the market after Glenmark's exclusivity period ended, Starr Rpt. ¶ 49 (ECF No. 1090-5, at 29), Zetia and Glenmark's generic would be sufficient to render the market broader than a single product.

4. This Recommendation Does Not Impermissibly Take the Issue Away from the Jury.

Defendants emphasize that "market definition is a highly complex and fact-laden question not susceptible to summary judgment." Defs.' Opp'n (ECF No. 1146, at 7); see also Tr. 39:18-20 (ECF No. 1300, at 39) (arguing that "all" cited "summary judgment decisions" find "that market power is a factual issue" for the jury). Indeed, courts have observed that generally "[t]he determination of a relevant product market . . . is a highly factual one best allocated to the trier of fact." *Intell. Ventures I LLC, 280 F. Supp. 3d at 701* (quoting *Fineman v. Armstrong World Indus., Inc., 980 F.2d 171, 199 (3d Cir. 1992)*). But these were not pharmaceutical patent cases where the anti-trust conduct alleged involved allegations that the patent holder sought to pay a generic competitor to prolong **[*67]** a patent monopoly. See *Actavis, Inc., 570 U.S. at 54* (analogizing reverse payments to "a purchase by the patentee of the exclusive right to sell its product, a right it already claims but would lose if the patent litigation were to continue"). The Supreme Court held such restraints have the potential for genuine adverse effects on competition, in part because "where a reverse payment threatens to work unjustified anticompetitive harm, the patentee likely possesses the power to bring that harm about in practice." *Id. at 157*.

Plaintiffs can obtain summary judgment if they produce evidence entitling them to a directed verdict. See *Celotex Corp., 477 U.S. at 331*. Plaintiffs have met this burden. See supra. Defendants are therefore required to show more than "a scintilla of evidence" disputing Plaintiffs' evidence. *Anderson, 477 U.S. at 252*. Defendants have failed to meet this burden. See supra. Therefore, no matter how "hotly disputed" the facts have been in other relevant market cases, they are not so here. *Intell. Ventures I LLC, 280 F. Supp. 3d at 701*.

This recommendation, if adopted, does not decide the entire matter. Its extent is that "for the trial of the case," the relevant market is Zetia and its AB-rated generic equivalents. *J.E. Dunn Constr. Co., 115 F. Supp. 3d at 599* (quoting Rotorex Co., F. Supp. 2d at 571). Issues are thus "narrow[ed] . . . to those over which there is genuine dispute **[*68]** of material fact." Id. Under the facts in this record, "there was really never any controversy" over market definition, and any prolonged trial on the issue "would tend to confuse and complicate [this] lawsuit." *In re Norfolk, Balt. & Carolina Line, Inc., 478 F. Supp. at 386* (quoting *Lucia Steel, 9 F.R.D. at 481*)). As Plaintiffs have argued, deciding market power would take "days of testimony of highly intricate economic analysis," when the issue is not genuinely disputed. Tr. 12:2-6 (ECF No. 1300, at 12). Removing market definition as a triable issue will allow the jury to focus on many other matters genuinely disputed here.[16]

IV. RECOMMENDATION

For the foregoing reasons, this Report RECOMMENDS that the district court DENY Plaintiffs' Motion to exclude the proposed testimony of Dr. Anupam B. Jena (ECF Nos. 1066, 1070) and GRANT Plaintiffs' partial motion for summary judgment concerning the relevant market (ECF Nos. 1077, 1080).

V. REVIEW PROCEDURE

By copy of this Report and Recommendation, the parties are notified that pursuant to *28 U.S.C. § 636(b)(1)(C)*:

1. Any party may serve upon the other party and file with the Clerk written objections to the foregoing findings and recommendations within fourteen (14) days from the date of mailing of this Report to the objecting party, *28 U.S.C. § 636(b)(1)(C)*, computed pursuant to **[*69]** *Rule 6(a) of the Federal Rules of Civil Procedure*. A party may respond to another party's objections within fourteen (14) days after being served with a copy thereof.

2. A district judge shall make a de novo determination of those portions of this report or specified findings or recommendations to which objection is made.

The parties are further notified that failure to file timely objections to the findings and recommendations set forth above will result in waiver of right to appeal from a judgment of this court based on such findings and recommendations. *Thomas v. Arn, 474 U.S. 140, 106 S. Ct. 466, 88 L. Ed. 2d 435 (1985)*; *Carr v. Hutto, 737 F.2d 433 (4th Cir. 1984)*; *United States v. Schronce, 727 F.2d 91 (4th Cir. 1984)*.

Business & Corporate Compliance > ... > Contracts Law > Standards of Performance > Discharge & Termination

Contracts Law > Remedies > Election of Remedies

Business & Corporate Compliance > ... > Contracts Law > Breach > Nonperformance

HN1[] **Standards of Performance, Discharge & Termination**

Anticipatory repudiation occurs when, before the time for performance has arisen, a party to a contract declares his intention not to fulfill a contractual duty. The Second Circuit has held that under New York contract law, when confronted with an anticipatory repudiation, the non-repudiating party has two mutually exclusive options. He may (a) elect to treat the repudiation as an anticipatory breach and seek damages for breach of contract, thereby terminating the contractual relation between the parties, or (b) he may continue to treat the contract as valid and await the designated time for performance before bringing suit. The non-repudiating party must make an affirmative election, because it cannot at the same time treat the contract as broken and subsisting, for one course of action excludes the other. Once a party has elected a remedy for a particular breach, his choice is binding with respect to that breach and cannot be changed. When a party elects to treat the contract as valid and await the designated time for performance before bringing suit, it remains entitled to performance.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

HN2[] Injunctions, Preliminary & Temporary Injunctions

A party seeking a preliminary injunction must ordinarily establish (1) irreparable harm; (2) either (a) a likelihood of success on the merits, or (b) sufficiently serious questions going to the merits of its claims to make them fair ground for litigation, plus a balance of the hardships tipping decidedly in favor of the moving party; and (3) that a preliminary injunction is in the public interest.

Civil Procedure > Remedies > Injunctions > Mandatory Injunctions

HN3[] Injunctions, Mandatory Injunctions

Confusion in breach of contract cases as to whether an injunction is mandatory or prohibitory may stem from the meaning of status quo. A plaintiff's view of the status quo is the situation that would prevail if its version of the contract were performed. A defendant's view of the status quo is its continued failure to perform as the plaintiff desires. To a breach of contract defendant, any injunction requiring performance may seem mandatory.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Conditions Precedent

HN4[] Contract Conditions & Provisions, Conditions Precedent

Notice-and-cure provisions are generally enforced. Under New York law, where the contract specifies conditions precedent to the right of cancellation, the conditions must be complied with.

Business & Corporate Compliance > ... > Contracts Law > Standards of Performance > Discharge & Termination

HN5[] Standards of Performance, Discharge & Termination

Under New York law, a terminating party's failure to afford contractually-required notice and cure is excusable as futile only in limited circumstances. Among these are where the non-performing party (1) expressly repudiates the parties' contract or (2) abandons performance thereunder.

Business & Corporate Compliance > ... > Contracts Law > Standards of Performance > Discharge & Termination

HN6[] Standards of Performance, Discharge & Termination

Where a contract includes a termination provision setting forth certain procedures for the contract's cancellation, including a requirement for notice and an opportunity to cure, the general rule is that a party asserting nonperformance must afford a defaulting party any contractually-secured opportunity to cure prior to terminating a contract. Applying the clear New York rule requiring termination of a contract according to its terms, where a termination provision requires 30-day notice and an opportunity to cure an alleged breach. New York law is also clear that freedom of contract prevails in an arm's length transaction between sophisticated parties, and in the absence of countervailing public policy concerns there is no reason to relieve them of the consequences of their bargain. Courts will not rewrite contracts that have been negotiated between sophisticated, counseled commercial entities.

Business & Corporate Compliance > ... > Contract Conditions & Provisions > Waivers > Continued Performance

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Rescission

HN7[] **Waivers, Continued Performance**

It is well established in New York law that a party can waive any right to rescind a contract on a theory of breach when the allegedly injured party has failed to promptly assert its claim: Where a party to a contract asserts a right to rescind for breach of contract there can be no rescission where the breach of contract has been waived by the party who has been wronged; and, as a matter of law, right to rescind must be exercised promptly after the injured party learns of the wrong. Acceptance of benefit under the contract with knowledge of the wrong constitutes a waiver of the wrong. Notice of rescission for wrong which has been waived is, of course, a futile act. Recognition that the contract is still in force may prove such abandonment and constitute a waiver of a previous breach.

Business & Corporate Compliance > ... > Contract Conditions & Provisions > Waivers > Continued Performance

HN8[] **Waivers, Continued Performance**

Since waiver of a contract right must be proved to be intentional, the defense of waiver requires a clear manifestation of an intent by the party asserting breach to relinquish her known right and mere silence, oversight, or thoughtlessness in failing to object to a breach of the contract will not support a finding of waiver. And while intent to waive is usually a question of fact, knowing acceptance of payment without any effort to terminate justifies an inference that the contract remains in force.

Business & Corporate Compliance > ... > Contracts Law > Breach > Material Breach

Business & Corporate Compliance > ... > Contracts Law > Standards of Performance > Substantial Performance

HN9[] **Breach, Material Breach**

Under New York law, a party's performance under a contract is excused where the other party has substantially failed to perform its side of the bargain or, synonymously, where that party has committed a material breach. Recission is therefore not permitted for a slight, casual, or technical breach, but, as a general rule, only for such as are material and willful, or, if not willful, so substantial and fundamental as to strongly tend to defeat the object of the parties in making the contract.

Contracts Law > Remedies > Specific Performance

HN10[] **Remedies, Specific Performance**

Specific performance is an equitable remedy for a breach of contract, rather than a separate cause of action.

Business & Corporate Compliance > ... > Contracts Law > Standards of Performance > Discharge & Termination

HN11[] **Standards of Performance, Discharge & Termination**

The Second Circuit has recognized that a party's purported termination that does not follow contractually secured, applicable termination procedures may itself constitute an independent breach of the contract.

Contracts Law > Remedies > Specific Performance

HN12[] **Remedies, Specific Performance**

Under New York law, specific performance may be ordered where no adequate monetary remedy is available and that relief is favored by the balance of equities, which may include the public interest. There is no adequate monetary remedy and so specific performance is a proper remedy where the subject matter of the particular contract is unique and has no established market value, so the claimant would have difficulty in proving damages with reasonable certainty.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN13[] **Sherman Act, Claims**

To prove that a contract violates Section 1 of the Sherman Act, a plaintiff must establish (1) a contract, combination, or conspiracy exists that (2) unreasonably restrains trade. The Second Circuit presumptively applies the rule of reason analysis to determine whether contracts unreasonably restrain trade. The rule of reason analysis therefore requires a plaintiff to demonstrate that the particular contract or combination is in fact unreasonable and anticompetitive before it will be found unlawful. Rule of reason analysis employs a burden-shifting framework: A plaintiff bears the initial burden of showing that the challenged action has had an actual adverse effect on competition as a whole in the relevant market. After a prima facie case of anticompetitive conduct has been established, the burden shifts to the defendant to proffer procompetitive justifications for the agreement. Assuming defendants can provide such proof, the burden shifts back to the plaintiffs to prove that any legitimate competitive benefits offered by defendants could have been achieved through less restrictive means.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN14[] **Actual Monopolization, Claims**

A Section 2 of the Sherman Act monopolization claim requires a plaintiff to establish (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. An attempted monopolization under Section 2 requires a plaintiff to prove (1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power.

Antitrust & Trade Law > Clayton Act > Claims

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Clayton Act > Scope

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

HN15[] **Clayton Act, Claims**

Section 7 of the Clayton Act prohibits a transaction if its effect may be substantially to lessen competition in any product or geographic market. Section 7 claims are generally analyzed under a three-step burden shifting framework. At the first step, a plaintiff establishes a prima facie case by showing that the transaction will significantly increase market concentration, thereby creating a presumption that the transaction is likely to substantially reduce competition. The defendant may then rebut that presumption by undermining the prediction of future anticompetitive effect; if this rebuttal succeeds, the plaintiff has a last-ditch effort to persuade the court that the transaction will substantially harm competition.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN16[] **Grounds for Injunctions, Irreparable Harm**

A party seeking a preliminary injunction must demonstrate both that it will suffer an irreparable injury if the injunction does not issue and that it will lack adequate remedies at law to redress those injuries.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN17[] **Injunctions, Preliminary & Temporary Injunctions**

For injunction purposes, even if damages are adequate in other respects, they will be inadequate if they cannot be collected by judgment and execution.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

HN18[] **Injunctions, Preliminary & Temporary Injunctions**

The final requirement is that issuance of the preliminary injunction would be in the public interest. There is a well-recognized public interest in enforcing contracts and upholding the rule of law. This is particularly true where the contract involves sophisticated counterparties who engaged in actual negotiation over the provisions at issue.

Opinion

[*106] OPINION AND ORDER

JED S. RAKOFF, U.S.D.J.:

Before the Court is the motion of Defendants and Counter-Claimants Celgene Corporation ("Celgene") and Bristol-Myers Squibb Company ("BMS") for a preliminary injunction. On October 14, 2021, the Court issued a short, "bottom-line" order granting Celgene and BMS's motion. That order preliminarily enjoined Plaintiffs and Counter-Defendants Nimbus Therapeutics, LLC and Nimbus Lakshmi, Inc. (collectively, "Nimbus") from selling, transferring, encumbering, or otherwise disposing of, in part or in whole, Nimbus Lakshmi or the intellectual property assets Nimbus Lakshmi holds that are associated with the allosteric Tyk2 inhibitor drug that Nimbus has developed with financing and assistance from Celgene. The order also prohibits Celgene from making any assignment of its right to purchase Nimbus Lakshmi or the intellectual property assets it holds. In this Opinion and Order, the Court sets forth its reasoning in detail for these determinations.

I. Factual Background

A. Nimbus and Celgene Create a Tyk2 Research & Development Partnership

Nimbus **[**3]** Therapeutics LLC is a biotechnology company that identifies molecules which have promise to become clinically significant drugs. It then seeks to partner with large, established pharmaceutical companies to develop the molecules, run clinical trials, obtain regulatory approval, and commercialize each drug candidate. Celgene is a large pharmaceutical company with a broad portfolio of clinical drugs. Celgene became a wholly-owned subsidiary of BMS in a 2019 merger transaction.

Celgene has entered two research and development ("R&D") partnerships with Nimbus related to two different drug candidates, one of which is unrelated to this suit and turned out to be unsuccessful after Celgene provided Nimbus with $25 million in R&D funding. ECF 15 ("Counterclaims") ¶ 37.[1] Through these **[*107]** partnerships, Celgene provides Nimbus both financing for its R&D efforts and its expertise on research, clinical trials, and pharmaceutical commercialization.

The drugs at issue in this case are allosteric inhibitors[2] of the tyrosine kinase 2 ("Tyk2"), which is an enzyme that mediates signaling in immune cells. Genetic studies have shown that reduction in Tyk2 activity reduces downstream immune signaling in a manner **[**4]** that can be protective in certain autoimmune and inflammatory diseases. ECF 1 ("Compl.") ¶ 18. Allosteric Tyk2 inhibitors therefore have promise as treatments for various rheumatological conditions including moderate-to-severe psoriasis, and they may be effective against other autoimmune conditions such as lupus and irritable bowel syndrome. Id. ¶ 2. Neither the Food and Drug Administration nor any other drug regulator has yet approved a Tyk2 inhibitor. Id. ¶¶ 18-23. Celgene previously owned the dominant oral treatment for moderate-to-severe psoriasis, Otezla (generic name, apremilast), which was launched in 2014. Id. ¶ 3. Once commercialized, allosteric Tyk2 inhibitors are expected to "erode virtually all of apremilast's sales." Id. ¶ 23.

In 2015, BMS began developing a new allosteric Tyk2 drug, deucravacitinib, and in April 2021 BMS announced that deucravacitinib had successfully completed phase 3 clinical trials. Id. ¶ 20. While other pharmaceutical companies had Tyk2 R&D programs, no companies other than BMS and Nimbus are expected to commercialize a competitive allosteric Tyk2 inhibitor, because the time to generic competition (and therefore reduced profits) will begin **[**5]** running once deucravacitinib is approved for use. Id. ¶ 21.

Celgene responded in 2017 to the threat of competition to apremilast by entering the Tyk2 R&D partnership with Nimbus to develop a Tyk2 inhibitor to compete with BMS's deucravacitinib. Id. ¶¶ 2-4. Celgene ultimately made two payments totaling almost $55 million to finance Nimbus's Tyk2 R&D: a $39.9 million upfront payment and a $15 million payment made in December 2019 following the FDA's acceptance of an Investigational New Drug Application submitted by Nimbus. Declaration of Elizabeth Mily ("Mily Decl.") ¶ 8, ECF 18; Ex. 1 to Mily Decl. ¶ 2.1(a) ("Warrant"). This collaboration was controlled by a Joint Steering Committee, the rules of which allegedly provide for Nimbus to retain ultimate control over the Tyk2 R&D program. Counterclaims ¶ 49.

a. **The Warrant**

The Nimbus-Celgene collaboration is governed by several interlocking contracts. The crucial contract for the present dispute is the Warrant, which took effect on September 21, 2017, governs the financial relationship between the companies, and provides for Celgene's option to acquire the Tyk2 assets. Specifically, the Warrant provides Celgene with the right to acquire the **[**6]** equity of the special purpose vehicle created to hold the intellectual property associated with the Tyk2 assets, plaintiff Nimbus Lakshmi. Mily Decl. ¶ 5. This purchase would be effected by Celgene purchasing 100% of Nimbus Lakshmi's Series B voting shares for $400 million after the earlier of (1) Nimbus completing **[*108]** its first Phase 1B clinical trial[3] or (2) the sixth anniversary of the Warrant's

---

[1] Unless otherwise specified, all internal quotation marks, citations, omissions, alterations, and emphases are omitted from all sources cited herein.

[2] "Allosteric" regulation of an enzyme refers to the biochemical process of increasing or inhibiting an enzyme's activity through the binding of an effector molecule at a specific site on the enzyme other than the active site, which is the location on the enzyme where a substrate binds so the enzyme can trigger a chemical reaction. "Allosteric," OED Online, (June 2019), https://www.oed.com/view/Entry/5426.

issuance. Id. ¶ 9; Warrant §§ 1.1, 2.2(a)). Nimbus completed Phase 1B clinical trials on May 4, 2021 and sent Celgene a "Warrant Trigger Data Package" that same day containing data including the Phase 1B trial results, as contractually required. Counterclaims ¶¶ 75-77. This action triggered the following set of deadlines under the Warrant, as alleged by Celgene and BMS: Id. ¶ 78.

- June 1, 2021: Celgene to deliver Notice of Interest
- June 24, 2021: Numbus to deliver Financial and Diligence Packages
- August 27, 2021: Diligence period ends
- September 3, 2021: Nimbus delivers Update and Tender Package
- October 11, 2021: Review Period ends and Celgene must deliver notice of exercise
- February 11, 2022: Termination Date & Deadline for closing Transaction.

The Warrant (and federal ***antitrust law***) prohibits **[**7]** Celgene from closing on an acquisition of Nimbus Lakshmi unless the FTC has cleared the transaction under the HSR Act or allowed the HSR Act's waiting period to expire following the parties' satisfaction of the Second Request. Opp. 4; Warrant § 8.1(c). While parties seeking HSR Act approval have an incentive to quickly comply with a Second Request if they want to consummate the proposed transaction, neither the HSR Act nor the FTC sets a deadline for compliance. Nimbus avers that under the Warrant, if all closing conditions other than HSR Act approval or expiration of the HSR Act waiting period have been satisfied by the Termination Date (120 days after Celgene provides a written notice of exercise), then Celgene may unilaterally extend the Termination Date for an additional 360 days, to October 6, 2022. Opp. 5; Warrant § 10.1(e).

The Warrant generally prohibits nonconsensual assignment of rights and obligations. Mily Decl. ¶ 13; Warrant § 11.2(a). But Celgene may unilaterally assign its rights to "a Third Party in the pharmaceutical industry with financial resources and capabilities greater than or substantially similar to those of Celgene" when "a Governmental Authority shall have **[**8]** issued a [Hart-Scott-Rodino Act (HSR Act) Second Request to either Nimbus or Celgene] in connection with this Warrant." Id. ¶ 15; Warrant § 11.2(a)(iii)(z). Celgene and BMS allege that during the 2017 negotiations over the Warrant, Nimbus initially rejected Celgene's proposed assignment clause that provided it with the unilateral right to assign its Warrant rights following a Second Request; but Celgene ultimately prevailed on this point, and the assignment right was included as a hedge against the risk that the Celgene's acquisition of the Tyk2 assets would draw antitrust scrutiny. Counterclaims ¶¶ 34-36.

Article X provides for the parties to terminate the Warrant. In general, Celgene can unilaterally terminate the Warrant at any time (or let it expire without exercise). Warrant § 10.1(a). The parties may also terminate the Warrant on mutual written consent. Warrant § 10.1(b). The Warrants also terminates if a court or governmental authority issues a ruling or order that permanently prohibits the transaction from closing. Id. § 10.1(d). Finally, **[*109]** Nimbus may unilaterally terminate the Warrant:

> upon a material breach of any representation, warranty, covenant, or agreement on the part of Celgene **[**9]** set forth in this Warrant ... or if any representation or warranty of Celgene shall have become materially untrue, in either case such that the conditions set forth in [the closing conditions] would not be satisfied as of the time of such breach or as of the time such representation or warranty shall have become untrue.

Id. § 10.1(c). However, "if such inaccuracy in Celgene's representations and warranties or breach by Celgene is curable by Celgene prior to the Warrant Expiration Date through the exercise of reasonable efforts, then the Company may not terminate this Warrant ... prior to 30 days following the receipt of written notice from the Company to Celgene of such breach," during which time Celgene may attempt to cure the alleged breach. Id.

Among the warranties and covenants to which Celgene agreed is a commitment to comply with applicable law:

> The execution and delivery of this Warrant and the other Transaction Agreements and the consummation of the transactions contemplated hereby, will not ... (b) violate any Applicable Law or Court Order applicable to

[3] "Phase 1B clinical trials are human clinical trials of a drug aimed at determining the safety and tolerability of the drug following repeat dosing in patients." Counterclaims ¶ 74.

> Celgene, in each case, solely to the extent that such breach or violation would have a material adverse impact on Celgene's **[**10]** ability to consummate the transactions contemplated hereby.

Id. § 5.2(b). Nimbus and Celgene further covenanted to "coordinate and cooperate with one another and shall each use commercially reasonable efforts to comply with, and shall each refrain from taking any action that would impede compliance with, all Applicable Laws." Id. § 6.8(a). The Warrant provides that "'Applicable Law' shall mean any applicable federal, state, local or foreign law (including common law), statute, ordinance, rule, regulation or Court Order." Id. § 1.1. Nimbus argues that the obligation to comply with "Applicable Law" therefore includes the duty to comply with federal antitrust laws, Compl. ¶¶ 37-39, which Celgene and BMS do not dispute.

B. **BMS Acquires Celgene**

On January 3, 2019, BMS and Celgene announced that they had signed a merger agreement by which BMS would acquire Celgene for $74 billion (the "Merger"). Counterclaims ¶ 58. The Merger was subject to antitrust review by the FTC under the HSR Act. The FTC investigated the Merger's effects on competition, and this investigation addressed Celgene's rights to Nimbus's Tyk2 asset under the Warrant and BMS's own Tyk2 inhibitor, deucravacitinib. Id. ¶ 60. The **[**11]** FTC ultimately approved the merger, with the commissioners voting 3-2 on November 15, 2019 to approve a consent agreement in which Celgene and BMS would divest Celgene's worldwide Otezla (apremilast) business to Amgen, another pharmaceutical company. Id. ¶ 66.[4] The Merger closed on November 20, 2019, and Celgene became a wholly owned subsidiary of BMS. Id. ¶ 67.

[*110] Nimbus and Celgene continued their collaborative Tyk2 R&D program following the Merger, though the parties dispute whether and how the Merger effected the companies' relationship. Nimbus has submitted a declaration from its chief executive officer, Jeb Keiper. See ECF 23 ("Keiper Decl."). Keiper has been CEO of Nimbus since October 2018 and previously worked as its chief financial officer (2017-2018) and chief business officer (2014-2017). Id. ¶ 1. Keiper recounts a series of communications with Celgene by email and phone following the Merger announcement, which he describes as "attempts to solicit an agreement to terminate the [Warrant] once the BMS acquisition of Celgene was complete." Id. ¶ 4.

For instance, on Friday November 15, 2019 (the same day the FTC voted to approve the Merger), Keiper emailed Rupert Vessey at Celgene, **[**12]** writing:

> Just a courtesy note to let you know that our Tyk2 IND for NDI-034858 has been filed with FDA. As you know FDA have 30 calendar days to review and get back to us if any comments.... As I shared with you in summer, our understanding of the situation is that once the merger with BMS is finally closed shortly, you will have two Tyk2 compounds in clinical development as well as preclinical backups inside BMS beyond that. Given that, Nimbus understands and appreciates the 'need' for a Tyk2 has changed radically for you since we first did the deal in 2017, and **we would much prefer to have the rights back to the program and progress ourselves, avoiding the tension of engaging regularly with a fierce competitor that has a massive head start**. Please appreciate that we recognize the difference between the strategic position now and the people involved — we really love working with your teams, and have such fondness and respect for them, and frankly are sad that this period of positive engagement on Tyk2 is ending, but we remain buoyed by the opportunity of continuing to engage with HPK1, where any competitive efforts are likely much more parallel, and much better suited for collaboration. **[**13]**

ECF 23-2 at 3 (emphasis added).Vessey responded by email that "[w]e have a process in place with BMS to address the questions below." Id. at 2.

---

[4] Each side quotes from various statements issued by FTC Commissioners in connection with this vote. None is dispositive and it is black letter law that the FTC's decision to settle and not to file a complaint seeking to block the merger does not establish that the merger was lawful under the Sherman and Clayton Acts. See *15 U.S.C. § 45(e)* ("No order of the Commission or judgement of court to enforce the same shall in anywise relieve or absolve any person, partnership, or corporation from any liability under the Antitrust Acts.").

Keiper describes his communication as "ask[ing] ... to terminate the relationship," Keiper Decl. ¶ 5, a characterization not wholly supported by the email quoted above. Celgene and BMS have submitted a declaration from Vessey explaining that he took the email "as a means to seek a dialogue to discuss and evaluate the parties' relationship post-BMS's acquisition of Celgene." Declaration of Rupert Vessey, ECF 26 ¶ 4. Vessey further explains that he "had additional conversations with Mr. Keiper" after that email and that he does not believe Keiper ever "purported to terminate the Warrant, claimed that Celgene had already violated ***antitrust law*** through its acquisition by BMS or had somehow already breached the Warrant," though Keiper "may have encouraged Celgene to voluntarily agree to terminate the Warrant" in view of potential FTC scrutiny should Celgene seek to acquire Nimbus Lakshmi. Id. ¶ 5. While Keiper also reports that Celgene and BMS cancelled the December 3, 2019 quarterly meeting of the Nimbus-Celgene Joint Steering Committee governing **[**14]** the Tyk2 collaboration, Keiper Decl. ¶ 5, subsequent Steering Committee meetings did occur, see Mily Decl. ¶ 29.

In December 2019, Celgene sent Nimbus the $15 million payment required within 10 days of the FDA's acceptance of Nimbus's Investigational New Drug Application. See Mily Decl. ¶ 26; Warrant § 2.1(a)(ii). **[*111]** Nimbus accepted the $15 million payment. Id. ¶ 27.

Then, on February 12, 2020, Celgene emailed Nimbus a list of three BMS employees with access to confidential information about BMS's deucravacitinib, who would be screened from information about Nimbus's allosteric Tyk2 inhibitor research. See id. ¶ 28; Ex. 6 to Mily Decl. Nimbus's vice president for business development wrote that Nimbus had "no objections" to this arrangement. See id.

Keiper also highlights a pair of conversations he had with Dr. Giovanni Caforio, the chief executive officer of BMS. First, on March 27, 2020, Keiper states that he "raise[d his] concerns about the risk of uncertainty for Nimbus" and that Nimbus's position was that if deucravacitinib was "successful in its Phase 3 trials ... the Warrant certainly needed to be terminated." Keiper Decl. ¶ 6. In his own declaration, Caforio denies that Keiper ever **[**15]** "purport[ed] to terminate the Warrant" or "assert that [the Merger] was itself an antitrust violation" or "a breach of the Warrant." Declaration of Dr. Giovanni Caforio, ECF 25 ¶ 5.

Finally, on February 3, 2021, Keiper and Caforio held a video call following BMS's announcement that deucravacitinib had successfully completed Phase 3 trials. Implicitly conceding that he had not previously done so, Keiper states that in this video call he "explicitly asked Dr. Caforio to terminate the relationship amicably." Keiper Decl. ¶ 9. Keiper reports that Caforio insisted on leaving the Warrant in place and that BMS would review Nimbus's Phase 1B trial results before deciding how to proceed. Id. ¶ 9. Caforio describes the conversation similarly. He recalls Keiper expressing doubts that the FTC would clear BMS to acquire Nimbus Lakshmi and "asked if Celgene would agree to give the molecule back to Nimbus," a request Caforio said he declined. Caforio Decl. ¶ 6. Caforio also recalls that Keiper "did express some concern about sharing the Phase 1b data with BMS, claiming BMS was a competitor." Id. ¶ 7. But Caforio denies that Keiper ever "purport[ed] to terminate the Warrant" or "claim[ed] that BMS's **[**16]** acquisition of Celgene was itself an antitrust violation" or "a breach of the Warrant." Id.

C. **Celgene Seeks to Exercise the Warrant**

Celgene delivered Nimbus the Notice of Interest on June 1, as required by the Warrant's timetable. Counterclaims ¶ 80. As part of this process, BMS has demanded access to review Nimbus's Tyk2 confidential business information, including sensitive research data, which Nimbus alleges BMS could use to harm Nimbus's ability to compete. The FTC subsequently issued an HSR Act Second Request, and the parties have apparently cooperated in responding to the Second Request. The parties adhered to the Warrant's other deadlines until August 13, 2021, when Nimbus delivered a letter to Celgene purporting to unilaterally terminate the Warrant on the ground that Celgene had breached its covenants and representations in the Warrant. See Ex. 10 to Mily Decl., ECF 18-10 ("August 13 Letter"). Nimbus filed this lawsuit the same day.

In the August 13 Letter, Nimbus cited Celgene's covenant not to "'violate any Applicable Law [including federal antitrust **[*112]** laws] ... solely to the extent that such breach or violation would have a material adverse impact on Celgene's ability to consummate **[**17]** the transactions contemplated hereby'" and Celgene's covenant to "'use commercially reasonable efforts to comply with, and [] refrain from taking any action that would impede compliance with, all Applicable Laws [including federal antitrust laws].'" Id. at 2 (quoting Warrant §§ 5.3, 6.8 (alterations in original)). Nimbus argued both that the 2019 merger of BMS and Celgene violated federal antitrust laws, because BMS controlled deucravacitinib, Nimbus's main competitor in the nascent market for allosteric Tyk2 inhibitors, and also that Celgene's exercise of the Warrant violated federal antitrust laws because it would allow Celgene and BMS to monopolize the allosteric Tyk2 inhibitor market. Id. at 3. Nimbus contends the August 13 Letter immediately terminated the Warrant. Celgene and BMS argue that Nimbus failed to terminate the Warrant, because Warrant § 10.1(c) requires that unless the alleged breach was incurable, Nimbus must provide Celgene with 30 days' notice and an opportunity to cure. Rather, Celgene and BMS allege that the August 13 Letter constitutes a breach of the Warrant by Nimbus. Counterclaims ¶¶ 118-129.

October 11, 2021, the day before argument was held on this motion, **[**18]** was Celgene's deadline under the Warrant to deliver a "notice of exercise." Id. ¶ 78. At argument, Celgene and BMS's counsel explained that Celgene had not delivered a notice of exercise by the October 11, 2021 deadline. Rather, in light of Nimbus's purported termination of the Warrant, Celgene "sent a letter on Friday, ... before that deadline, saying that we're reserving our rights with respect to that deadline" because Nimbus's counsel had previously indicated that it was "not intending to honor [Celgene's] notice of exercise." Tr. 3-4.

II. Procedural Posture

Nimbus filed its Complaint on August 13, 2021, the same day it purported to terminate the Warrant. The Complaint alleged essentially the same theory Nimbus outlined in its August 13 Letter and sought termination of the Warrant, an injunction prohibiting Celgene's exercise of the Warrant, and antitrust damages arising from the Merger and other conduct. ECF 1. Celgene and BMS then filed counterclaims on September 15, 2021, alleging, inter alia, that Nimbus's anticipatory repudiation of the Warrant was both ineffective and constituted breach and seeking specific performance of the assignment provision. ECF 15. Celgene and BMS simultaneously **[**19]** filed this motion for a preliminary injunction. ECF 16.

The Motion asks the Court to preserve the status quo by "preliminarily enjoining Nimbus from taking any actions inconsistent with the Warrant, including but not limited to, selling or otherwise transferring interests in the Tyk2 Asset or Nimbus Lakshmi to third parties, and tolling the time for Celgene or its assignee to exercise the Warrant from the date when Nimbus Lakshmi unilaterally claimed that the Warrant was terminated on August 13, 2021, through the pendency of this litigation." Mot. 25. In its opposition, Nimbus argues that the language of the requested injunction is vague and states that it has "no present interest to sell or transfer its allosteric TYK2 asset and [is] prepared to stipulate as such through the trial ready date," which is currently February 17, 2022. Opp. 2; ECF 19 at 1. However, the parties confirm that no such stipulation has been reached. See Reply 5 n. 7. Celgene and BMS, for their part, maintain that their objective is to preserve their entitlement to assign Celgene's purchase right under the Warrant after the conclusion of this litigation.

III. Validity of the Warrant

As a threshold matter, Nimbus **[**20]** argues that Celgene and BMS cannot obtain a preliminary injunction because Nimbus purports to have terminated the Warrant **[*113]** through its August 13, 2021 letter. Therefore, Nimbus argues, a preliminary injunction would involve "changing the status quo" by "effectively locking up Nimbus's asset until this litigation is over" through reimposition of contractual duties. Opp. 8. "The Court cannot enjoin the termination that has already happened," Nimbus contends, and "revival of the Warrant is not a remedy that can or should be granted on a motion for preliminary injunction." Id.

But the Court is not so constrained. Whether Nimbus's August 13 Letter was effective in terminating the contract depends in part on whether Nimbus was justified in asserting that Celgene had incurably and materially breached its covenants. See Warrant § 10.1(c). That is a dubious proposition for reasons explained further below. As Celgene and BMS argue, Nimbus's August 13 Letter amounts to an anticipatory repudiation of the Warrant. See Reply 4. ***HN1***[] "Anticipatory repudiation occurs when, before the time for performance has arisen, a party to a contract declares his intention not to fulfill a contractual duty. *Lucente v. Int'l Bus. Machines Corp., 310 F.3d 243, 258 (2d Cir. 2002)*. The Second **[**21]** Circuit has held that under New York contract law, "[w]hen confronted with an anticipatory repudiation, the non-repudiating party has two mutually exclusive options. He may (a) elect to treat the repudiation as an anticipatory breach and seek damages for breach of contract, thereby terminating the contractual relation between the parties, or (b) he may continue to treat the contract as valid and await the designated time for performance before bringing suit." *Id., 310 F.3d at 258*. The non-repudiating party must "make an affirmative election," because it "cannot at the same time treat the contract as broken and subsisting, for one course of action excludes the other.... Once a party has elected a remedy for a particular breach, his choice is binding with respect to that breach and cannot be changed." *Id. at 258-259*. Celgene pronounces in its reply brief that it "has elected to [treat the contract as valid and await the designated time for performance before bringing suit."[5] Reply 4. Where a party chooses this route, it remains entitled to performance. See, e.g., *Jamuna Fashion Wears v. Micom Trading Corp., 2012 U.S. Dist. LEXIS 201958, 2012 WL 13140780, at *4 (S.D.N.Y. Dec. 28, 2012)*.

The Court need not decide the ultimate effect of the August 13 letter now. It is enough at this juncture to conclude that Celgene and BMS are likely to succeed **[**22]** on the merits in demonstrating that Nimbus's August 13 Letter did not terminate the Warrant and so it erects no bar to granting Celgene and BMS's motion for a preliminary injunction.

IV. Preliminary Injunction

HN2[] "A party seeking a preliminary injunction must ordinarily establish (1) irreparable harm; (2) either (a) a likelihood of success on the merits, or (b) sufficiently serious questions going to the merits of its claims to make them fair ground for litigation, plus a balance of the hardships tipping decidedly in favor of the moving party; and (3) that a preliminary injunction is in the public interest." *New York ex rel. Schneiderman v. Actavis PLC, 787 F.3d 638, 650 (2d Cir. 2015)*.[6] Nimbus suggests **[*114]** the standard is elevated because the motion purportedly seeks a mandatory injunction that would change the status quo. Opp. 7-8. If so, Celgene and BMS would have to "show a 'clear' or 'substantial' likelihood of success on the merits and make a 'strong showing' of irreparable harm. Id.[7] The Second Circuit has recognized that the always-ambiguous distinction between mandatory and prohibitory injunctions is particularly murky in contract cases.[8] But as explained above, Nimbus's position depends on the premise that its August 13 Letter terminated the Warrant, a premise **[**23]** the Court has rejected for the purpose of deciding this motion. The ordinary preliminary injunction standard therefore applies, though it may be noted that the Court would grant the motion under either standard.

A. Likelihood of Success on the Merits

Celgene and BMS argue that it is likely to succeed in establishing that it is entitled to specific performance of the Warrant's assignment clause. This entails four constituent propositions, which Celgene and BMS assert they will succeed in proving on the merits: (i) the Warrant entitles Celgene to assign to another pharmaceutical company its

[5] Celgene does not explain how its decision to send Nimbus a "letter ... reserving [its]rights with respect to [the notice of exercise] deadline" rather than to deliver a notice of exercise on October 11, 2021 is consistent with the choice to treat the contract as valid. See Tr. 3. But the Court need not resolve that issue now.

[6] Neither party contends that the serious questions prong applies here. See *Actavis PLC, 787 F.3d at 650*.

[7] A higher standard also applies where the preliminary injunction would provide substantially all the relief the movant ultimately seeks and that relief cannot be undone if the non-movant prevails at trial. See *Tom Doherty Assocs., Inc. v. Saban Ent., Inc., 60 F.3d 27, 34 (2d Cir. 1995)*. Neither party argues that the instant motion implicates this issue.

[8] See *Tom Doherty Assocs., Inc., 60 F.3d at 34* ("Confusion in breach of contract cases as to whether an injunction is mandatory or prohibitory may stem from the meaning of 'status quo.' ***HN3***[] A plaintiff's view of the status quo is the situation that would prevail if its version of the contract were performed. A defendant's view of the status quo is its continued failure to perform as the plaintiff desires. To a breach of contract defendant, any injunction requiring performance may seem mandatory.").

rights to acquire the Tyk2 assets; (ii) Nimbus cannot repudiate the Warrant based on BMS's acquisition of Celgene; (iii) Celgene is likely to establish the predicates to specific performance of the Warrant; and (iv) granting specific performance of the assignment provision would not contravene the antitrust laws. As explained below, the Court concludes that Celgene and BMS are likely to succeed on all four issues.

a. **Celgene's Entitlement to Assign**

Section 11.2(a)(iii)(z) of the Warrant plainly entitles Celgene to assign its right to purchase the Tyk2 assets to another pharmaceutical company **[**24]** with similar or better resources in the event a federal antitrust enforcement agency issues the parties an HSR Second Request in connection with Celgene's demonstrated intent to exercise the Warrant. Nimbus disputes neither Celgene's construction of this assignment provision nor that it was triggered when the FTC issued the Second Request. See Opp. 19-20.

Instead, Nimbus suggests that "the Court should doubt the bona fides of Defendants' self-serving representation that they will assign the Warrant to a third party given [their] representations to the federal government in their HSR filing that they intend to acquire Nimbus's allosteric Tyk2 asset." Opp. 19. Nimbus argues that "Defendants have not taken any action that would bind them to assign, rather than acquire" the Tyk2 assets. But this is a red herring. The HSR Act bars Celgene from acquiring the Tyk2 assets unless the FTC clears the transaction as consistent with the federal antitrust laws. Separately, if Nimbus prevails in this litigation on its claim that Celgene's acquisition of the **[*115]** Tyk2 assets would violate the antitrust laws, then this Court could enter a permanent injunction prohibiting Celgene from closing on the transaction. **[**25]** But if Celgene prevails in demonstrating that its exercise of the Warrant would be legal under the antitrust laws, both before the FTC and in this litigation, then Celgene would be entitled to acquire the Tyk2 assets and the preliminary injunction preserving its rights under the Warrant would have prejudiced neither Nimbus nor the public interest. What matters at this juncture is whether Celgene will be likely to prevail in proving either that it may acquire the Tyk2 assets or that it may assign that right, since neither party has suggested that the preliminary relief necessary to preserve those rights would differ.[9]

Since Celgene and BMS will likely succeed in establishing that the Warrant entitles Celgene to assign the right to purchase the Tyk2 assets, then they will have established a likelihood of success on the merits overall by also demonstrating a likelihood of success in proving that the Warrant has not been terminated and should not be rescinded, that Nimbus breached the Warrant and specific performance is the appropriate remedy, and that Celgene's assignment of its right to acquire Nimbus Lakshmi would not contravene federal ***antitrust law***. So, the Court turns to these.

[26]** b. **Termination & Breach**

Nimbus asserts that it is no longer bound to perform under the Warrant, either because the August 13 Letter terminated the Warrant or because the Court should rescind the Warrant because Celgene allegedly breached its covenants. The Court, however, concludes that Celgene and BMS are likely to rebut both of Nimbus's termination arguments, and thus that the Warrant is likely still enforceable.

i. **The August 13 Letter**

Nimbus first argues that its August 13 Letter successfully terminated the Warrant. Nimbus presents this argument through the Complaint's first count, which seeks a declaration that the August 13 Letter terminated the Warrant. See Complaint ¶¶ 45-52. Celgene and BMS counter, inter alia, that Nimbus failed to provide the contractually required thirty-day notice and opportunity to cure, so the purported termination letter was a nullity. See Counterclaims ¶¶ 107-117 (first counterclaim, seeking declaratory judgment).

---

[9] Specifically, Celgene argues that the relevant obligation arises from the parties' covenant to "use commercially reasonable efforts to take, or cause to be taken, all reasonable actions, and to do, or cause to be done, and to assist and cooperate with the other Party in doing, all things reasonably necessary, proper or advisable to consummate the transactions contemplated hereby." Warrant § 6.8(d); See Mot. 13-14.

The parties agree that the only potential basis for Nimbus to have unilaterally terminated the Warrant via the August 13 Letter would be under Section 10.1(c). That provision permits unilateral termination by Nimbus "upon a material breach of **[**27]** any representation, warranty, covenant, or agreement on the part of Celgene set forth in this Warrant ... or if any representation or warranty of Celgene shall have become materially untrue, in either case such that the conditions set forth in [the closing conditions] would not be satisfied as of the time of such breach or as of the time such representation or warranty shall have become untrue." Warrant § 10.1(c). But Nimbus must provide Celgene notice and a 30-day opportunity to cure unless the alleged breach is incurable. Id.

[*116] ***HN4***[] Such notice-and-cure provisions are generally enforced. "Under New York law, where the contract specifies conditions precedent to the right of cancellation, the conditions must be complied with." *Bausch & Lomb Inc. v. Bressler, 977 F.2d 720, 727 (2d Cir. 1992)* (affirming conclusion that party's failure to comply with 30-day notice and opportunity to cure provision constituted breach). Whether the August 13 letter could properly terminate the Warrant therefore turns in part on whether Celgene's alleged material breaches of the covenants were curable.

Nimbus naturally argues that Celgene had incurably breached by "pursuing the Tyk2 asset for themselves" and by merging with BMS, which Nimbus describes as having "attempted to **[**28]** monopolize or otherwise unlawfully restrain[] competition" in violation of the *Sherman Act*. Opp. 13-14 The Merger, Nimbus argues, "created an insurmountable antitrust issue for the exercise of the Warrant as early as late 2019." Id. Nimbus asserts that notice was unnecessary under the Warrant because it "would have been futile," since Celgene and BMS "rejected" Nimbus's prior attempts "to have BMS take some action to cure the anticompetitive relationship." Id. at 23. Celgene and BMS counter that the Warrant itself provides the cure to the alleged antitrust problem arising from Celgene's exercise of the Warrant's right to acquire Nimbus's Tyk2 assets: assignment. Reply 9.

The Court holds that Celgene is likely to succeed in showing that Nimbus's August 13 letter did not terminate the Warrant. Nimbus cannot evade the 30-day notice-and-opportunity-to-cure requirement by invoking the general doctrine of futility. ***HN5***[] "Under New York law, a terminating party's failure to afford contractually-required notice and cure is excusable as futile only in limited circumstances. Among these are where the non-performing party (1) expressly repudiates the parties' contract or (2) abandons performance thereunder." **[**29]** *Point Prods. A.G. v. Sony Music Entm't, Inc., 2000 U.S. Dist. LEXIS 10066, 2000 WL 1006236, at *4 (S.D.N.Y. July 20, 2000)*. Celgene never repudiated the Warrant. And Nimbus alleges no failure of performance, other than the Merger, which likely does not establish breach for the reasons explained below.

And even if the Merger did lead Celgene to breach its covenants by creating an antitrust obstacle to its own acquisition of Nimbus Lakshmi, Celgene and BMS are likely to prove that assignment was an appropriate cure, so the August 13 Letter was procedurally defective under Section 10.1(c) of the Warrant.

Nimbus responds that Celgene has taken no action that binds it to assign rather exercise the Warrant. Opp. 19-20. But that is irrelevant to whether assignment could cure the alleged breach. Nimbus also argues that assignment is not guaranteed to be procompetitive, but these contentions fail for reasons addressed in the discussion of Nimbus's antitrust defense to specific performance, discussed below. If Celgene attempted to scuttle Nimbus's Tyk2 asset through assignment, Nimbus might be able sue under the contract. But the prospect of Celgene acting in bad faith does not change the fact that the express purpose of the assignment provision is to cure antitrust issues that might arise preventing Celgene's own **[**30]** exercise of the Warrant.

Since a cure to the alleged breach was available, Celgene and BMS will likely prove that Nimbus was not entitled to unilateral termination, so the August 13 Letter did not terminate the Warrant.

ii. **Celgene's Alleged Breach of Covenants**

Nimbus has alleged that Celgene "breached the representations and warranties" **[*117]** not to break applicable law and to cooperate toward consummation of the transactions contemplated by the Warrant, because the Merger allegedly violated the Sherman and Clayton Acts, so Nimbus has sought recission and termination of the Warrant. See Compl. ¶¶ 53-57 (Count II: Breach of Contract). Thus, as relevant to this motion, Nimbus is effectively raising a contract defense to the counterclaim for specific performance, arguing that Celgene already breached so no performance is now due from Nimbus.

This breach of contract theory essentially repackages the allegations asserted in the August 13 Letter and the declaratory judgment claim. It therefore seeks cancellation of the contract in a manner calculated to circumvent the termination provisions of Article X of the Warrant. *HN6*[] As explained above, where a contract includes a termination provision setting **[**31]** forth certain procedures for the contract's cancellation, including a requirement for notice and an opportunity to cure, "the general rule is that a party asserting nonperformance must afford a defaulting party any contractually-secured opportunity to cure prior to terminating a contract." *Karabu v. Pension Benefit Guar. Corp., 1997 U.S. Dist. LEXIS 19582, 1997 WL 759462, at *8 (S.D.N.Y. Dec. 10, 1997)*. See also *Filmline (Cross-Country) Prods., Inc. v. United Artists Corp., 865 F.2d 513, 519 (2d Cir. 1989)* ("apply[ing] the clear New York rule requiring termination of a contract according to its terms," where a termination provision requires 30-day notice and an opportunity to cure an alleged breach). New York law is also clear that "[f]reedom of contract prevails in an arm's length transaction between sophisticated parties such as these, and in the absence of countervailing public policy concerns there is no reason to relieve them of the consequences of their bargain." *Oppenheimer & Co. v. Oppenheim, Appel, Dixon & Co., 86 N.Y.2d 685, 695, 660 N.E.2d 415, 636 N.Y.S.2d 734 (1995)*. See also *Flag Wharf, Inc. v. Merrill Lynch Cap. Corp., 40 A.D.3d 506, 507, 836 N.Y.S.2d 406 (1st Dep't 2007)* ("Courts will not rewrite contracts that have been negotiated between sophisticated, counseled commercial entities."). Since accepting Nimbus's breach of contract claim would undermine Celgene's contractually secured right to cure an alleged default of any representation, covenant, or warranty, Nimbus's request for rescission is disfavored.

The Court concludes that Celgene and BMS will likely succeed in resisting **[**32]** Nimbus's attempt to obtain recission of the Warrant on either version of this theory.

First, Nimbus alleges that the Merger violated the Sherman and Clayton Acts, so Celgene allegedly committed a material breach of its covenants to follow applicable laws. See Complaint, Count II. Among Celgene's warranties, covenants, and representations in the Warrant is Section 6.8(a), which includes a mutual covenant that the parties shall "coordinate and cooperate with one another and shall each use commercially reasonable efforts to comply with, and shall each refrain from taking any action that would impede compliance with, all Applicable Laws." Nimbus's argument, therefore, is that by agreeing to the Merger, Celgene failed to "use commercially reasonable efforts to comply with" federal antitrust laws, because the Merger allegedly violated the Sherman and Clayton Acts. Another version is that by agreeing to the Merger, Celgene failed to "refrain from taking any action that would impede compliance with" federal antitrust laws when it came time for it to exercise the Warrant, since the Merger made it more likely that antitrust authorities would scrutinize Celgene's attempt to acquire Nimbus Lakshmi. **[**33]**

[*118] Celgene and BMS counter that Nimbus has waived its right to obtain recission or termination of the contract on this basis. According to Celgene and BMS's telling, Nimbus learned of the Celgene-BMS merger on January 3, 2019, when it was publicly announced, but it "did not seek to terminate the Warrant on the basis that this 2019 merger caused Celgene to breach the Warrant for thirty-one months, until its August 13 Letter." Mot. 21-22. Rather, Celgene and BMS assert that Nimbus "continued to act affirmatively as though the Warrant was in effect," including by "accept[ing] an additional $15 million payment under the Warrant by Celgene in December 2019 (a month after the merger had closed)," by agreeing to a screening protocol to prevent BMS employees working on deucravacitinib from learning confidential information about Nimbus's Tyk2 program, and by sending Celgene the data package with Phase 1B clinical trial results on May 4, 2021. Id.

HN7[] It is well established in New York law that a party can waive any right to rescind a contract on a theory of breach when the allegedly injured party has failed to promptly assert its claim:

> [W]here a party to a contract asserts a right to rescind for ... **[**34]** breach of contract ... there can be no rescission where the breach of contract ... has been waived by the party who has been wronged; and, as a matter of law, right to rescind must be exercised promptly after the injured party learns of the wrong. Acceptance of benefit under the contract with knowledge of the wrong constitutes a waiver of the wrong. Notice

> of rescission for wrong which has been waived is, of course, a futile act.... Recognition that the contract is still in force may prove such abandonment and constitute a waiver of a previous breach.

New York Tel. Co. v. Jamestown Tel. Corp., 282 N.Y. 365, 372-373, 26 N.E.2d 295 (1940).

Celgene and BMS argue that Nimbus continued to treat the Warrant as an intact contract after the Merger closed in November 2019. For instance, Nimbus accepted the $15 million payment from Celgene in December 2019, after its CEO asserts that he was cognizant of the "'tension of engaging regularly with a fierce competitor [BMS] that has a massive head start.'". Keiper Decl. ¶ 5 (quoting ECF 23-2 at 3 (alteration in original)). While Keiper expressed concerns about the Merger's implications for the Tyk2 collaboration, the current record reflects no assertion by Nimbus that the Merger had caused Celgene to have breached the Warrant. Rather, **[**35]** Celgene stated that it had "a process in place with BMS to address" the competition concerns Keiper had raised. See ECF 23-2 at 2. Then, in February 2020, Celgene proposed an information screening protocol to prevent BMS employees working on deucravacitinib from having access to confidential information about Nimbus's allosteric Tyk2 inhibitor. See Mily Decl. ¶ 28. Nimbus agreed to that protocol. See Ex. 6 to Mily Decl., ECF 18-6.

The record reflects that Nimbus never expressly sought termination of the Warrant until February 23, 2021 at the earliest, see, e.g., Keiper Decl. ¶ 9, nor did it assert that Celgene had breached the Warrant until the August 13 Letter. ***HN8***[] But since "waiver of a contract right must be proved to be intentional, the defense of waiver requires a clear manifestation of an intent by [the party asserting breach] to relinquish her known right and mere silence, oversight, or thoughtlessness in failing to object to a breach of the contract will not support a finding of waiver." *Beth Israel Med. Ctr. v. Horizon Blue Cross & Blue Shield of New Jersey, Inc., 448 F.3d 573, 585* ***[*119]*** *(2d Cir. 2006)*. Nimbus maintains that it never waived any right to rescind. Instead, Nimbus argues, it raised concerns about the antitrust implications of the Merger for years and sought to "fix the anticompetitive **[**36]** relationship between the parties." Opp. 22.

But stating that Nimbus "would much prefer to have the rights back to the program and progress [itself]," ECF 23-2, is not the same as purporting to terminate the Warrant or alleging that Celgene had breached. And while "intent to waive is usually a question of fact, knowing acceptance of [payment] without any effort to terminate justifies an inference that" the contract remains in force. *Jefpaul Garage Corp. v. Presbyterian Hospital in New York, 61 N.Y.2d 442, 448, 462 N.E.2d 1176, 474 N.Y.S.2d 458 (1984)*. Nimbus's acceptance of the $15 million payment in December 2019 therefore justifies the inference that Nimbus intended the Warrant to remain in force notwithstanding the "tensions" introduced by the Merger. And Nimbus's agreement to the February 2020 screening protocol further supports that inference.

Concededly, the record is incomplete at this juncture; but the Court concludes that Celgene and BMS are likely to succeed in its position that Nimbus waived its right to obtain recission of the Warrant in response to Celgene's alleged breach of its covenants to comply with the federal antitrust laws.[10]

In any event, even if Celgene and BMS failed to prove Nimbus's waiver, so that the Court later reached the merits of Nimbus's breach of contract claim, Celgene **[**37]** and BMS would raise various potentially meritorious defenses to Celgene's alleged breach of its covenants. For instance, the covenant in section 6.8(a) "is heavily qualified by the commercially reasonable efforts standard, which means that Celgene 'was not required to do things that it was unable to do or that it would not have made commercial sense to do.'" Reply 8 (quoting *In re Condado Plaza Acquisition LLC, 620 B.R. 820, 833 (Bankr. S.D.N.Y. 2020)*. This, Celgene and BMS argue, differentiates Nimbus's claim from a straightforward question of whether a direct suit under the Sherman or Clayton Acts would have succeeded in blocking the Merger had it been filed at the time. The question instead might be whether it would have

---

[10] Nimbus points out that it is separately "challenging the enforceability of the Warrant under various claims under the Sherman Act and the Clayton Act," and that these claims have four-year statutes of limitations. Opp. 22-23 (citing *15 U.S.C. § 15b*). But whether claims arising under the antitrust laws themselves are timely is a distinct issue from whether Nimbus may still assert a defense to a counterclaim for specific performance (or a claim for breach of contract) based on an alleged violation of the antitrust laws.

been commercially reasonable for Celgene to resist BMS's acquisition effort after the transaction received the FTC's approval following HSR Act review, or if the commercially reasonable approach would have been to resist the Merger entirely. Whatever the merits an action under the Clayton or Sherman Acts would have been, the covenant's "commercially reasonable efforts" qualification makes it more likely Celgene and BMS would succeed in resisting the Warrant's recission on this ground.

Celgene and BMS also argue that Nimbus has also failed **[**38]** to allege or argue that any breach of the Warrant by Celgene was material. ***HN9***[] "Under New York law, a party's performance under a contract is excused where the other party has substantially failed to perform its side of the bargain or, synonymously, where that party has committed a material breach." *Process Am., Inc. v. Cynergy Holdings, LLC, 839 F.3d 125, 136 (2d Cir. 2016)*. **[*120]** Recission is therefore "not permitted for a slight, casual, or technical breach, but, as a general rule, only for such as are material and willful, or, if not willful, so substantial and fundamental as to strongly tend to defeat the object of the parties in making the contract." *Callanan v. Keeseville, Ausable Chasm & Lake Champlain R.R. Co., 199 N.Y. 268, 284, 92 N.E. 747 (1910)*. Here, however, Celgene and BMS argue that even assuming arguendo that the Merger did violate the antitrust laws, the consequent breach of its covenants was not "a failure which le[ft] the subject of the contract substantially different from what was contracted for." Id. Indeed, if Celgene were to assign to another similarly situated pharmaceutical company the right to acquire Nimbus Lakshmi for $400 million -- a transaction contemplated by the Warrant as a cure if Celgene's own acquisition of the Tyk2 asset invokes antitrust scrutiny -- Nimbus Therapeutics would likely be left in a substantially similar position **[**39]** to the one it contemplated at the time the Warrant was created: in receipt of $400 million and engaged in an ongoing business relationship with a large pharmaceutical company to commercialize the Tyk2 inhibitor molecule.

Therefore, the Court concludes that even if Nimbus prevailed on the waiver issue, Celgene and BMS would still likely succeed in resisting Nimbus's attempt to obtain recission of the Warrant because the Merger allegedly violated the antitrust laws.

Separately, Nimbus suggests that Celgene breached its Section 6.8(a) covenant to cooperate with Nimbus to achieve compliance with federal antitrust laws and that Celgene failed to use commercially reasonable efforts to achieve government approval for its exercise of the Warrant. Opp. 14-15. But the Court concludes that Nimbus will likely fail to establish that Celgene breached the Warrant by allegedly failing to cooperate.

Nimbus alleges that Celgene failed to cooperate in achieving compliance with antitrust laws because "Nimbus's efforts to fix the antitrust issues presented by [the Merger] were expressly and repeatedly rejected by BMS." Opp. 15. But as Celgene and BMS argue, "a covenant to cooperate is not a covenant to surrender; **[**40]** it does not oblige a party to give up its express rights under the contract." Reply 7. In any event, Nimbus does not identify any proposed "fix" that BMS rejected, other than termination of the Warrant. See generally Opp. 15-18; Keiper Decl.[11] Termination was first expressly requested in February 2021 and Nimbus has not explained why the covenant to cooperate obliged BMS to relinquish its contractual rights, particularly when its position is that the Warrant's assignment provision is the cure to any alleged antitrust issues arising from Celgene's acquisition of Nimbus Lakshmi. Therefore, Celgene and BMS are likely to succeed in repulsing Nimbus's claim that Celgene breached its obligation to cooperate in achieving compliance with federal antitrust laws.

Nimbus also argues that Celgene failed to coordinate and cooperate in obtaining FTC approval for its exercise of the Warrant. See Opp. 14-15. But Celgene and BMS cogently argue that since the Warrant entitles Celgene to assign its acquisition right after issuance of a Second Request, it has no "obligation to continue to work toward antitrust clearance of an exercise by Celgene and not an assignee," especially when Nimbus alleges Celgene's **[**41]** acquisition of Nimbus Lakshmi would be **[*121]** illegal under the federal antitrust laws. Reply 8. The Court concludes Celgene are BMS are likely to succeed on this issue as well.

---

[11] To the contrary, the record reflects that to address tensions arising from the Merger, Celgene and BMS established an information screening protocol in February 2020, to which Nimbus consented without objections. See ECF 18-6.

In sum, the Court concludes that Nimbus is unlikely to prevail in either establishing that the Warrant was terminated via the August 13 Letter or that the Court ought to rescind the Warrant as a remedy for Celgene's alleged breaches of its covenants to comply with federal antitrust laws or to cooperate with Nimbus in achieving compliance. Celgene and BMS are thus likely to succeed on the merits of their first counterclaim, which seeks a declaration that the Warrant entitles Celgene to assign its right to acquire Nimbus Lakshmi and that the Warrant remains enforceable. See Counterclaims ¶¶ 107-117. Therefore, Celgene and BMS are likely to succeed on their counterclaim for specific performance of the assignment provision if Celgene and BMS will likely establish their entitlement to specific performance and unless Nimbus Celgene's use of the Warrant's assignment provision would likely be illegal under the federal antitrust laws. So, the Court now turns to these remaining two issues.

c. **Celgene's Entitlement to Specific [**42] Performance**

The Court has already found that Celgene and BMS will likely establish that the Warrant entitles Celgene to assign the right to acquire Nimbus Lakshmi and that the Warrant is neither terminated nor subject to recission. Therefore, leaving aside Nimbus's antitrust defenses for the moment, Celgene and BMS are likely to establish an entitlement to specific performance of the assignment clause if they will prove that Nimbus materially breached the contract and that the appropriate remedy for that material breach is specific performance.[12] See *Warberg Opportunistic Trading Fund, L.P. v. GeoResources, Inc., 112 A.D.3d 78, 86, 973 N.Y.S.2d 187 (1st Dep't 2013)* ("**HN10**[] [S]pecific performance is an equitable remedy for a breach of contract, rather than a separate cause of action."). The Court concludes that Celgene and BMS are likely to succeed on both issues.

First, Celgene and BMS are likely to establish that Nimbus materially breached the Warrant. Celgene and BMS allege, inter alia, that Nimbus breached two covenants by purporting to terminate the Warrant in its August 13, 2021 Letter, by filing the instant litigation, and by otherwise refusing to cooperate with Celgene's effort to make an assignment under the Warrant. See Counterclaims ¶¶ 124-125.

Celgene and BMS cite two covenants or representations. **[**43]** Section 6.8(d) requires the parties to "use commercially reasonable efforts to take, or cause to be taken, all reasonable actions, and to do, or cause to be done, and to assist and cooperate with the other Party in doing, all things reasonably necessary, proper or advisable to consummate the transactions contemplated [in **[*122]** the Warrant.]" Warrant § 6.8(d). Section 11.13 commits the parties "to execute, acknowledge and deliver such further instruments, and to do all such other acts, as may be reasonably necessary or appropriate in order to carry out the purposes and intent of this Warrant." Warrant § 11.13.

Celgene and BMS are likely to succeed in proving that Nimbus's purported termination and refusal to cooperate with an assignment amounted to a material breach of these representations. Nimbus' claim to have terminated the Warrant and its subsequent refusal to acknowledge Celgene's attempts to make an assignment impeded Celgene from obtaining any value from the Warrant, denying Celgene the benefit of its bargain. It plainly violated the commitment to cooperate in bringing about an assignment, which is clearly a "transaction contemplated" in the Warrant. Warrant § 6.8(d). Preventing Celgene **[**44]** from realizing the benefit of its bargain also frustrated the "purposes and intent of th[e] Warrant." Warrant § 11.13. And these breaches are likely material, because preventing Celgene from monetizing its successful investment in the Tyk2 R&D program defeats the fundamental purpose of the Warrant.

---

[12] Celgene would also need to establish that it substantially performed under the Warrant. See *NML Cap., Ltd. v. Republic of Argentina, 699 F.3d 246, 261 n. 12 (2d Cir. 2012)* ("To be eligible for specific performance of a contractual provision, a party also needs to show that (1) a valid contract exists between the parties, (2) the plaintiff has substantially performed its part of the contract, and (3) plaintiff and defendant are each able to continue performing their parts of the agreement."). The only relevant aspect of Celgene's performance that Nimbus disputes is whether Celgene satisfied its covenants or breached them by consummating the Merger. Since the Court concluded that Celgene and BMS are likely to succeed in establishing that Celgene did not materially breach its covenants, the Court accordingly holds that it they also will likely prove that Celgene adequately performed its contractual duties under the Warrant.

Celgene and BMS are also likely to succeed in proving that Nimbus's purported termination amounts to an independent breach. ***HN11***[] The Second Circuit has recognized that a party's purported termination that does not follow contractually secured, applicable termination procedures may itself constitute an independent breach of the contract. See *Bausch & Lomb Inc., 977 F.2d at 727*. As explained above, Celgene and BMS are likely to demonstrate that the August 13 Letter failed to adhere to the enforceable termination procedures and so amounted to breach.

Celgene and BMS are also likely to succeed in demonstrating that Celgene is entitled to specific performance as a remedy for Nimbus's material breach of the Warrant. ***HN12***[] Under New York law, "[s]pecific performance may be ordered where no adequate monetary remedy is available and that relief is favored by the balance of equities, which may include the public interest." *NML Cap., Ltd. v. Republic of Argentina, 699 F.3d 246, 261 (2d Cir. 2012)*. There is no adequate **[**45]** monetary remedy and so "[s]pecific performance is a proper remedy ... where the subject matter of the particular contract is unique and has no established market value," so the claimant would have "difficulty [in] proving damages with reasonable certainty." *Sokoloff v. Harriman Estates Dev. Corp., 96 N.Y.2d 409, 415, 754 N.E.2d 184, 729 N.Y.S.2d 425 (2001)*. As explained further below in the discussion of irreparable harm, the Tyk2 asset held by Nimbus Lakshmi is a unique asset, still in development, with no established market value. Therefore, damages would be difficult to ascertain with reasonable certainty. Celgene would thus likely succeed in establishing that specific performance of the assignment provision is an appropriate remedy.

d. **Legality of the Assignment Provision Under the Antitrust Laws**

As to the final issue regarding likelihood of success on the merits, Nimbus's complaint alleges that Celgene's exercise of the Warrant to acquire Nimbus Lakshmi would be anticompetitive because it would give BMS control over both the leading allosteric Tyk2 inhibitor drug candidates, and so it must be invalidated as contrary to the Sherman and Clayton Acts. In the context of this motion, those arguments arise as antitrust defenses to Celgene's claim for specific performance. Celgene argues **[**46]** in support of its motion that assignment **[*123]** of its purchase rights to a similarly situated pharmaceutical company without a current allosteric Tyk2 inhibitor R&D program is a procompetitive cure to any antitrust concerns associated with Celgene exercising the Warrant's acquisition rights itself. Accordingly, Celgene and BMS argue that they are highly likely to succeed in their counterclaim for specific performance of the assignment clause and the Warrant's supporting and associated provisions.

Before analyzing each of the three statutory antitrust claims that Nimbus has levied against the Warrant, it is useful to discuss, and reject, two cross-cutting arguments Nimbus presents in its opposition.

First, as discussed above, Nimbus argues that "the Court should doubt the bona fides of Defendants' self-serving representation that they will assign the Warrant to a third party" since they "have not taken any action that would bind them to assign, rather than acquire, Nimbus's assets." Opp. 19. Again, whether Celgene has bound itself only to assign rather than to acquire is irrelevant to this motion, which seeks to preserve the conditions under which Celgene would be able to complete an assignment **[**47]** if it won its claim for specific performance of that provision. If this Court determines that Celgene is entitled to specific performance of the assignment provision, "the court ha[s] considerable latitude in fashioning the relief," so the "performance required by a decree need not ... be identical with that promised in the contract." *NML Capital, 699 F.3d at 262*. Therefore, the Court's permanent injunctive relief could limit Celgene only to making an assignment, if that were appropriate.

Second, Nimbus argues that assignment to a third-party pharmaceutical company would not necessarily be procompetitive, because it "would be inescapably plagued by the obvious conflict of interest [Celgene and BMS] face between acting for their own benefit (and selecting a weaker competitor) and acting for the benefit of the public (and selecting a stronger one)." Opp. 20. Nimbus also argues that Celgene could unreasonably delay assignment to give BMS more time without a commercial competitor to deucravacitinib. Id. at 19. These arguments are unlikely to succeed: Nimbus, a sophisticated and counseled entity, agreed to the assignment provision after extended, arms-length negotiation. The final assignment provision constrains Celgene **[**48]** to assign only to a pharmaceutical company "with financial resources and capabilities greater than or substantially similar to those of Celgene." Warrant § 11.2(a)(iii)(z). Crediting Celgene's reasonable representation that it is seeking to assign the

Warrant's purchase right to a third-party pharmaceutical company without an allosteric Tyk2 inhibitor program, making an assignment would increase the number of firms controlling competitors in this developing market. Nimbus is unlikely to succeed in showing that is anticompetitive.

Having addressed these two general arguments, the Court turns to whether Celgene and BMS are likely to succeed in defeating Nimbus's various arguments that Celgene's assignment of the Warrant would violate the antitrust laws. It finds that Celgene and BMS are likely to succeed in repulsing all three antitrust defenses.

i. ***Sherman Act* — Section 1**

HN13[] To prove that assignment under the Warrant violates *Section 1* of the *Sherman Act*, Nimbus "must establish (1) a contract, combination, or conspiracy exists that (2) unreasonably restrains trade." *1-800 Contacts, Inc. v. Fed. Trade Comm'n, 1 F.4th 102, 114 (2d Cir. 2021)* (per curiam). The first element is uncontested: **[*124]** The Warrant is "undeniably [a] contract[]." Id. As for the second element, the Second Circuit presumptively **[**49]** applies "rule of reason" analysis to determine whether contracts unreasonably restrain trade. Id. Nimbus does not contend that the Warrant is per se illegal under the *Sherman Act*, and there is no indication that this is one of those agreements that are "so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality," *National Soc. of Professional Engineers v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*.[13] The rule of reason analysis therefore requires Nimbus to "demonstrate that [the] particular contract or combination is in fact unreasonable and anticompetitive before it will be found unlawful." *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*. Rule of reason analysis employs a burden-shifting framework:

> A plaintiff bears the initial burden of showing that the challenged action has had an actual adverse effect on competition as a whole in the relevant market. After a prima facie case of anticompetitive conduct has been established, the burden shifts to the defendant to proffer procompetitive justifications for the agreement. Assuming defendants can provide such proof, the burden shifts back to the plaintiffs to prove that any legitimate competitive benefits offered by defendants could have been achieved through less restrictive means.

1-800 Contacts, 1 F.4th at 114.

As discussed above, the fact that **[**50]** Celgene may have a conflict of interest in choosing its assignee likely does not render the assignment provision anticompetitive, since the Warrant requires that the assignee have substantially similar or better resources for development of the Tyk2 assets than Celgene. See supra 24; Opp. 20. Nimbus opposes by arguing that Celgene and BMS "offer no support for the assertion that an assignment necessarily would be procompetitive." Opp. 19 (capitalization changed). But that assertion is not only wrong as a matter of fact -- the Motion offers several reasons why it would be procompetitive to assign the Tyk2 acquisition rights to a well-resourced pharmaceutical company without an allosteric Tyk2 R&D program -- but also ignores that Nimbus bears the burden of establishing a prima facie case of anticompetitive effect under the Rule of Reason burden shifting framework, regardless of whether the argument arises in the context of Nimbus's affirmative claims or as an antitrust defense to Celgene's counterclaim for specific performance of the assignment provision. Therefore, the Court holds that Nimbus will likely fail to establish that Celgene's assignment of the Warrant violates *Section 1* of the *Sherman Act*.

ii. **[**51]** ***Sherman Act* — Section 2**

Nimbus argues that Celgene's exercise of the Warrant violates *Section 2* of the *Sherman Act*, because it allegedly monopolizes the market for allosteric Tyk2 inhibitors. ***HN14***[] A *Section 2* monopolization claim requires a plaintiff to "establish '(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *In re DDAVP Direct Purchaser Antitrust Litig., 585 F.3d 677, 686-87 (2d Cir.*

[13] Nor is so-called "quick look" analysis appropriate, since the assignment provision is not an "inherently suspect" device where "the great likelihood of anticompetitive effects can be easily ascertained." *1-800 Contacts, 1 F.4th at 115*.

2009). Nimbus **[*125]** might have an argument that Celgene's exercise of the Warrant's Tyk2 acquisition rights would pose a threat of monopolization, but that is irrelevant for the purposes of this motion, which seeks to preserve Celgene's ability to make an assignment. As Celgene argues, "by assigning its rights to a third party that BMS and Celgene do not control and that does not have a Tyk2 asset, BMS and Celgene are *increasing* the number of competitors and thus *reducing* any potential power they might have in the relevant markets." Mot. 17. For the same reason, Celgene will also likely defeat the claim that assignment would amount to attempted monopolization under *Section 2*, which requires a plaintiff to prove "(1) that the defendant has engaged **[**52]** in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Actavis, 787 F.3d at 651*. Therefore, Nimbus will likely fail to establish that it would violate *section 2* of the *Sherman Act* for Celgene to make an assignment under the Warrant.

iii. ***Clayton Act***

HN15[] *Section 7* of the *Clayton Act* prohibits a transaction if its effect "may be substantially to lessen competition" in any product or geographic market. *United States v. Phila. Nat'l Bank, 374 U.S. 321, 355, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*. *Section 7* claims are generally analyzed under a three-step burden shifting framework. At the first step, a plaintiff establishes a prima facie case by showing that the transaction will significantly increase market concentration, thereby creating a presumption that the transaction is likely to substantially reduce competition. See *F.T.C. v. H.J. Heinz Co., 246 F.3d 708, 715, 345 U.S. App. D.C. 364 (D.C. Cir. 2001)*. The defendant may then rebut that presumption by undermining the prediction of future anticompetitive effect; if this rebuttal succeeds, the plaintiff has a last-ditch effort to persuade the court that the transaction will substantially harm competition. See id. Here, Nimbus is unlikely to succeed in establishing that assignment to a third-party pharmaceutical company will substantially lessen competition. Indeed, the fact that assignment would increase the **[**53]** number of well-resourced pharmaceutical companies positioned to develop allosteric Tyk2 inhibitor drugs makes it unlikely that Nimbus could even establish a presumption of anticompetitive effect at the first step of the *Section 7* burden shifting framework. Celgene and BMS will thus likely succeed in showing that assignment under the Warrant does not violate *Section 7* of the *Clayton Act*.

In sum, the Court holds that Celgene and BMS are likely to succeed on the merits in establishing each of the components necessary to prevail on their counterclaim for breach of contract and specific performance of the Warrant's assignment provision: (i) the Warrant likely entitles Celgene to make a unilateral assignment, since the FTC issued the parties an HSR Act Second Request; (ii) the August 13 Letter likely did not terminate the Warrant, and Nimbus will likely fail to obtain recission of the Warrant for Celgene's alleged breach of covenants to comply with antitrust laws and cooperate; (iii) Celgene is likely to establish that Nimbus breached the Warrant, including by purportedly terminating the Warrant in the August 13 Letter, and Celgene will likely obtain the remedy of specific performance for that breach; and (iv) Celgene **[**54]** will likely succeed in rebutting Nimbus's claims that the federal antitrust laws prohibit assignment to a third-party pharmaceutical company of the right to purchase Nimbus Lakshmi. The Court thus turns to the next requirement for a preliminary injunction.

[*126] B. **Irreparable Harm**

HN16[] A party seeking a preliminary injunction must demonstrate both that it will suffer an irreparable injury if the injunction does not issue and that it will lack adequate remedies at law to redress those injuries. See *Ticor Title Ins. Co. v. Cohen, 173 F3d 63, 68 (2d Cir. 1999)*. Celgene presents two types of arguments for irreparable harm: (i) that the parties agreed that a breach of the Warrant would result in irreparable harm and (ii) that if Nimbus were to dispose of the Tyk2 asset during this litigation, any money damages available at law would inadequately compensate Celgene and BMS, were they to prevail on their counterclaim for breach.

Celgene and BMS quote a provision of the Warrant in which the parties agree that injunctive relief and specific performance would be an appropriate remedy for breach: "The Parties hereby acknowledge that irreparable damage would occur in the event that any of the provisions of th[e] Warrant were not performed in accordance with their specific **[**55]** terms or were otherwise breached and that the Parties would not have any adequate remedy at law." Warrant § 11.12. This provision expressly states that the "parties shall be entitled to seek an injunction ... to prevent breaches or threatened breaches of this Warrant and to enforce specifically the terms and provisions of this Warrant, in addition to any and all other rights and remedies at law or in equity." Id.

Celgene and BMS further argue that they will suffer irreparable injury in practice for several reasons. Their injury would be irreparable, Celgene and BMS aver, because they would be unable to obtain a reasonably certain valuation of the Tyk2 inhibitor molecule to support a damages claim. The molecule is a unique asset that is still in development, meaning its clinical and commercial values are unknown and there remains a risk it will not ultimately receive FDA approval. Celgene and BMS also argue that the value of the right under the Warrant to acquire Nimbus Lakshmi is difficult to calculate at this time because there is no established market for Nimbus Lakshmi shares and this litigation has created significant uncertainty, preventing an accurate valuation by bid solicitation. **[**56]** Reply 5-6. They also contend that the Warrant purports to limit Celgene's monetary damages for breach to $55 million, which is the total amount Celgene invested, so it may be unable to obtain money damages adequate to compensate it for the lost business opportunity if Nimbus disposes of the Tyk2 assets and Celgene later prevails in obtaining a declaration that it is entitled to assign its rights under the Warrant. See Warrant § 9.5.

Celgene has established irreparable injury for reasons similar to those establishing that it will likely obtain specific performance as a remedy for Nimbus's alleged breach of the Warrant. Cf. *Nemer Jeep-Eagle, Inc. v. Jeep-Eagle Sales Corp., 992 F.2d 430, 433 (2d Cir. 1993)* (comparing equitable standards for preliminary injunction and specific performance). While Nimbus cites caselaw for the proposition that "the contractual language declaring money damages inadequate in the event of a breach does not control the question whether preliminary injunctive relief is appropriate," *Baker's Aid, a Div. of M. Raubvogel Co. v. Hussmann Foodservice Co., 830 F.2d 13, 16 (2d Cir. 1987)*, that point is irrelevant because Celgene and BMS are relying on more than just the parties' agreement that an injunction is appropriate to prevent or respond to breach of the Warrant. Even though Nimbus is right that Celgene's interest in the assignment provision **[**57]** is ultimately financial, it does not disclaim Celgene and BMS's proposed construction of **[*127]** section 9.5 of the Warrant limiting failure-to-close money damages to $55 million, which would only reimburse Celgene's investment (without interest) but not compensate Celgene for the lost revenue from an assignment transaction. See Reply 6. ***HN17***[] "Even if damages are adequate in other respects, they will be inadequate if they cannot be collected by judgment and execution." *NML Cap., 699 F.3d at 262*. Finally, Nimbus fails to provide a satisfying response to the proposition that Celgene and BMS cannot reliably value the Tyk2 assets. See Opp. 10. Celgene and BMS's interactions with potential assignees are affected by the uncertainty created by this litigation, so it may not be a reliable valuation indicator. And Nimbus misses the mark with its cases asserting that there is no irreparable injury from a breach of a contract to acquire stock, since Nimbus Lakshmi's shares are illiquid, unlike the publicly traded stock in the cases cited by Nimbus. See Reply 6 n.12 (addressing Nimbus's cases). Finally, it is no answer to argue, as Nimbus does, that Celgene's "sales process could ... continue following trial in this case," since the **[**58]** question at this juncture is whether Celgene could obtain adequate money damages later on if Nimbus had already disposed of the Tyk2 assets before final judgment issued. See Opp. 10. In that scenario, Celgene could not restart a process to assign the right to purchase assets Nimbus had already disposed of.

Accordingly, the Court holds that if Nimbus sells or otherwise disposes of the Tyk2 assets during the pendency of this litigation Celgene and BMS will suffer irreparable harm, because money damages available at law would inadequately compensate Celgene and BMS were they to prevail on their counterclaims for breach.

C. **Public Interest**

HN18[] The final requirement is that issuance of the preliminary injunction would be in the public interest. See *Actavis PLC, 787 F.3d at 650*. Celgene and BMS argue that issuance of the injunction would serve the public interest for two reasons. First, "[t]here is a well-recognized public interest in enforcing contracts and upholding the rule of law." *Empower Energies, Inc. v. SolarBlue, LLC, 2016 U.S. Dist. LEXIS 130583, 2016 WL 5338555, at *13 (S.D.N.Y. Sept. 23, 2016)*. This is particularly true where, as here, the contract involves sophisticated counterparties who engaged in actual negotiation over the provisions at issue. Second, Celgene and BMS argue that vindicating Celgene's right to profit from its **[**59]** risky investment in Nimbus's allosteric Tyk2 inhibitor program advances the public interest in encouraging investment in pharmaceutical R&D. Letting Nimbus undermine Celgene's option to realize a profit from the success of a drug candidate whose development it financed would, Celgene and BMS argue, discourage future partnerships between large, experienced pharmaceutical companies and smaller biotechnology companies that need assistance and funding to bring new technologies to market.

The Court agrees. The value proposition undermining this model for pharmaceutical innovation requires that companies providing financing to early-stage drug candidates be able to realize profits when molecules show promise. It therefore serves the public interest to maintain the status quo while the Court determines whether Nimbus -- a sophisticated, counseled entity that is a repeat player in these contractual arrangements -- should be held to the terms of the financing arrangement it established with Celgene.

The Court also discounts Nimbus's argument that preserving Celgene's ability to assign the Tyk2 purchase rights disserves the public interest because it would violate **[*128]** the antitrust laws, since, as **[**60]** discussed above, Nimbus is unlikely to succeed in proving that assignment would be anticompetitive. See Opp. 24. In any event, if Nimbus prevails on Celgene and BMS's counterclaims, then Nimbus will regain the right to dispose of the Tyk2 assets in another way. Finally, to the extent Nimbus prevails on its substantive Sherman Act and Clayton Act claims, issuance of this preliminary injunction will do nothing to prevent Nimbus from obtaining antitrust damages arising from the Merger.

V. Conclusion

The Court holds that Celgene and BMS have established that they are likely to succeed on their counterclaim that Nimbus breached the Warrant and are likely to obtain specific performance of the Warrant's assignment provision as a remedy for that breach. The Court further holds that Celgene and BMS would be irreparably injured if Nimbus disposed of the Tyk2 assets before they obtained judgment on their counterclaim and that issuance of a preliminary injunction prohibiting Nimbus from disposing of the Tyk2 assets is in the public interest. The Court therefore grants Celgene and BMS's motion for a preliminary injunction to preserve the status quo.

The motion asks the Court to preserve the status **[**61]** quo by "preliminarily enjoining Nimbus from taking any actions inconsistent with the Warrant, including but not limited to, selling or otherwise transferring interests in the Tyk2 Asset or Nimbus Lakshmi to third parties, and tolling the time for Celgene or its assignee to exercise the Warrant from the date when Nimbus Lakshmi unilaterally claimed that the Warrant was terminated on August 13, 2021, through the pendency of this litigation." Mot. 25. In its opposition, Nimbus argues that the language of the requested injunction is vague, because a prohibition on "taking any actions inconsistent with the warrant" has an indeterminate scope, considering the many covenants and obligations set forth in the Warrant. See Tr. 20. Celgene and BMS, for their part, maintain that their objective is to preserve their entitlement to assign Celgene's purchase right under the Warrant after the conclusion of this litigation. Counsel for Celgene and BMS acknowledged at argument that it would be sufficient for their purposes to prohibit Nimbus from selling or encumbering the Tyk2 assets while litigation is pending, and he was unable to identify any other specific action Nimbus might take that it would **[**62]** ask the Court to enjoin. See Tr. 25. Therefore, the Court concludes that it is appropriate to enter an injunction narrower than the one requested in Celgene and BMS's motion.

Counsel for Celgene and BMS also acknowledged that Celgene and BMS contemplated only proceeding with an assignment after receiving a final judgment from this Court. See Tr. 6. Therefore, to preserve the status quo amid the flurry of claims and counterclaims, the Court prohibits Celgene from consummating an assignment transaction under the Warrant while this preliminary injunction remains in force.

The motion also asks the Court to "toll[] the time for Celgene or its assignee to exercise the Warrant from the date when Nimbus Lakshmi unilaterally claimed that the Warrant was terminated on August 13, 2021, through the pendency of this litigation." Mot. 25. Nimbus contends that BMS has an incentive to delay development of Nimbus's allosteric Tyk2 inhibitor drug, since that would give deucravacitinib a competitive advantage in the marketplace. If so, then BMS may try to drag out the Warrant's timelines, perhaps by extending the termination date under section 10.1(e), before assigning the purchase rights to **[*129]** another pharmaceutical **[**63]** company, Nimbus argues. The Court is loath to inadvertently enable such gamesmanship. Therefore, the Court denies Celgene and BMS's present request to toll the Warrants deadlines, without prejudice to revisiting the issue in the future. In any event, Celgene already decided not to deliver a notice of exercise on October 11, 2021, as required under the Warrant, so there is almost certainly going to be some future dispute over the timeliness of any assignment transaction that proceeds in the future. As Counsel for Celgene and BMS conceded, the Court could take up the issue of whether to extend Celgene' s time to complete an assignment transaction, if necessary, after rendering judgment on the counterclaims.

For the foregoing reasons, and as previously ordered on October 14, 2021, Nimbus is hereby preliminarily enjoined, from October 14, 2021 through issuance by this Court of a final judgment on the merits, from selling, transferring, encumbering, or otherwise disposing of, in part or in whole, Nimbus Lakshmi or the intellectual property assets Nimbus Lakshmi holds that are associated with the allosteric Tyk2 inhibitor drug under development. While this preliminary injunction is in place, **[**64]** Celgene shall not consummate an assignment of its purchase rights under the Warrant to any third party pharmaceutical company. The Court declines at this time to toll the deadlines set forth by the Warrant, although Celgene and BMS may raise this issue again should it ultimately prevail on the merits.

SO ORDERED.

[Prevent USA Corp. v. Volkswagen AG](#)

United States Court of Appeals for the Sixth Circuit

October 21, 2021, Argued; November 8, 2021, Decided; November 8, 2021, Filed

File Name: 21a0254p.06

No. 21-1379

Reporter
17 F.4th 653 *; 2021 U.S. App. LEXIS 33234 **; 2021 FED App. 0254P (6th Cir.) ***

PREVENT USA CORPORATION; EASTERN HORIZON GROUP NETHERLANDS B.V., Plaintiffs-Appellants, v. VOLKSWAGEN AG; VOLKSWAGEN GROUP OF AMERICA, INC., Defendants-Appellees.

Prior History: [1]** Appeal from the United States District Court for the Eastern District of Michigan at Detroit. No. 2:19-cv-13400—Bernard A. Friedman, District Judge.

Prevent USA Corp. v. Volkswagen, AG, 2020 U.S. Dist. LEXIS 43638 (E.D. Mich., Mar. 13, 2020)

Core Terms

forum non conveniens, antitrust, venue provision, courts, anticompetitive, acquire, lawsuit, district court, Sherman Act, factors, convenience, manufacturers, subsidiary, suppliers, alleges, grounds, venue, choice of forum, violations, deference, domestic, cases

LexisNexis® Headnotes

Business & Corporate Compliance > ... > Dispute Resolution > Conflict of Law > Forum Selection

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > Preliminary Considerations > Venue > Forum Non Conveniens

HN1[] **Conflict of Law, Forum Selection**

In deciding whether to dismiss a case on the basis of forum non conveniens, the central focus is convenience. Three questions guide a district court's discretion: Is there an adequate alternative forum. Would the chosen forum be unduly burdensome to the defendant or court given the private and public considerations at play? Are there legitimate reasons for denying the plaintiff its choice of forum.

Business & Corporate Compliance > ... > Dispute Resolution > Conflict of Law > Forum Selection

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Preliminary Considerations > Venue > Forum Non Conveniens

HN2[] **Conflict of Law, Forum Selection**

In reviewing a forum non conveniens ruling, appellate courts ask whether the district court committed a clear abuse of discretion. They give substantial deference to district court decisions that get the process right—that account for all of the relevant public and private interest factors. Fresh review applies to questions of law, such as whether an adequate alternative forum exists.

Business & Corporate Compliance > ... > Dispute Resolution > Conflict of Law > Forum Selection

Civil Procedure > Preliminary Considerations > Venue > Forum Non Conveniens

HN3[] **Conflict of Law, Forum Selection**

Under forum non conveniens, in the rare circumstances in which the remedy offered by the other forum is clearly unsatisfactory, American courts tend to keep the case.

Governments > Courts > Authority to Adjudicate

HN4[] **Courts, Authority to Adjudicate**

German ***antitrust law*** gives its courts jurisdiction over all restraints of competition having an effect within the area of application of this act, even if they were caused outside the area of application of this at.

Civil Procedure > ... > Voluntary Dismissals > Court Order > Dismissal Without Prejudice

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN5[] **Court Order, Dismissal Without Prejudice**

A dismissal without prejudice has no res judicata effect on a subsequent claim.

Business & Corporate Compliance > ... > Dispute Resolution > Conflict of Law > Forum Selection

Civil Procedure > ... > Venue > Motions to Transfer > Choice of Forum

Civil Procedure > Preliminary Considerations > Venue > Forum Non Conveniens

HN6[] **Conflict of Law, Forum Selection**

Because forum non conveniens is designed to secure convenient trials, it makes sense to defer to a plaintiff's choice of forum based on an assumption that the plaintiff knows its self-interest better than anyone else and thus will choose a convenient forum. But that assumption is less valid in the case of a foreign plaintiff or a "shell corporation" set up primarily for suing within the United States, and when affiliates of the new American corporation have already tried and largely failed to win on similar grounds in a foreign forum.

Antitrust & Trade Law > Clayton Act > Jurisdiction

Civil Procedure > Preliminary Considerations > Venue > Forum Non Conveniens

Antitrust & Trade Law > Clayton Act > Scope

HN7[] **Clayton Act, Jurisdiction**

The Clayton Act says nothing about forum non conveniens dismissal. Although its special venue provision generously authorizes a plaintiff to sue in any district wherein defendant may be found or transacts business, nothing in that language indicates that the district court may not dismiss a case for refiling in a foreign country. *15 U.S.C.S. § 22*.

Civil Procedure > Preliminary Considerations > Venue > Forum Non Conveniens

Civil Procedure > Remedies > Damages > Punitive Damages

HN8[] **Venue, Forum Non Conveniens**

For forum non conveniens purposes, differences in the amount of recovery will not make a forum inadequate, even when it lacks punitive damages, as long as the forum provides some remedy.

Counsel: ARGUED: Matthew S. Tripolitsiotis, BOIES, SCHILLER & FLEXNER, LLP, Armonk, New York, for Appellants.

Sharon L. Nelles, SULLIVAN & CROMWELL LLP, New York, New York, for Appellees.

ON BRIEF: Matthew S. Tripolitsiotis, BOIES, SCHILLER & FLEXNER, LLP, Armonk, New York, Duane L. Loft, Brianna S. Hills, BOIES, SCHILLER & FLEXNER, LLP, New York, New York, for Appellants.

Judges: Before: SUTTON, Chief Judge; BATCHELDER and LARSEN, Circuit Judges.

Opinion by: SUTTON

Opinion

[*656] [*2]** SUTTON, Chief Judge. This litigation has had two chapters, so far. Chapter one grew out of a dispute between Volkswagen, a company based in Germany, and a group of companies based in Europe, called the Prevent Group, that specializes in turning around distressed automotive parts suppliers. The seeds of the dispute, from Volkswagen's vantage point, arose when the Prevent Group organized **[**2]** an effort to halt supplies of their car parts in order to obtain better terms from Volkswagen, and Volkswagen responded by opting not to do business with the affiliated companies. From the Prevent Group's vantage point, Volkswagen engineered a boycott of its companies and violated several German and European antitrust laws in the process. Begun in 2016, this litigation initially involved claims of unfair business practices and anticompetitive behavior under German and European law and was handled by a number of German trial and appellate courts. Volkswagen has prevailed in most of these suits, and one case is still pending before the Regional Court in Frankfurt.

Chapter two began in 2019 and was initiated by two members of the Prevent Group: Eastern Horizon Group, based in the Netherlands, and an American subsidiary (Prevent USA). The two of them sued Volkswagen and its American subsidiary in Michigan, alleging that the carmaker unfairly prevented them from acquiring distressed automotive-parts manufacturers. After determining that the Eastern Horizon Group and Prevent USA were trying to open another front on a dispute that should remain in Europe, the district court dismissed the complaint **[**3]** on the basis of forum non conveniens. Finding no errors of law or abuse of discretion in the district court's weighing of the relevant factors, we affirm.

I.

Eastern Horizon Group is part of a network of companies called the Prevent **[*657]** Group. The group is located in Europe, and the affiliated companies specialize in turning around failing or underperforming automotive-parts suppliers. Prevent USA Corporation is a subsidiary formed to acquire distressed manufacturers in the United States, and it is headquartered out of an apartment **[***3]** building in Pittsburgh, Pennsylvania. Prevent-owned companies have supplied Volkswagen, a German company, with parts for several years.

Roughly five years ago, the relationship soured. Eastern Horizon and Prevent USA (collectively Prevent USA from now on unless otherwise specified) claim that Volkswagen abruptly cancelled its contracts because the Prevent Group's acquisition of several manufacturers threatened Volkswagen's single-buyer status for car parts. Volkswagen used this position, Prevent USA claims, to keep the prices of its inputs low by buying only from small companies with little bargaining power. For its part, Volkswagen alleges that a Prevent company **[**4]** unexpectedly demanded millions of euros in additional payments in the middle of a contract and halted production when Volkswagen declined, prompting the carmaker to conclude that the Prevent Group could not be trusted as a business partner.

According to Prevent USA, Volkswagen launched a coordinated initiative called "Project 1" to impede well-resourced suppliers like the Prevent Group from acquiring distressed manufacturers. R.1 at 35. Volkswagen reportedly used a variety of means to frustrate the Prevent Group's acquisition of struggling parts manufacturers. One of them involved option agreements that gave Volkswagen the right to purchase the target company if Volkswagen objected to a prospective buyer. Prevent USA claims that it learned about Project 1 through internal documents, including presentations and spreadsheets, that a Volkswagen executive leaked. In response to this conduct, Prevent Group companies sued Volkswagen at least five times in German courts.

Prevent USA alleges that Volkswagen's anticompetitive efforts frustrated its plans to acquire struggling suppliers in the United States. When the Prevent Group attempted to buy the Brazilian manufacturing arm of the Michigan **[**5]** company Tower International, Tower's CEO informed it that Volkswagen would have to approve the Group's purchase of the Brazilian operations. Prevent USA also claims that Tower admitted to signing an option agreement to allow Volkswagen to purchase the Brazilian operations if a Prevent entity attempted to acquire them. Prevent USA infers that Project 1 likewise frustrated its efforts to acquire six other Michigan-based companies on a "Problematic Suppliers" list that Volkswagen kept. *Id.* at 45-46.

[*4]** Prevent USA sued Volkswagen in federal court, alleging violations of *§§ 1* and *2* of the Sherman Act and several state laws. Prevent USA alleges that Project 1 blocked the Prevent Group from profiting from potential American investments, "caused loss to Prevent's industry goodwill and market reputation, and substantially decreased the overall market valuation of the Prevent Group." *Id.* at 57.

Volkswagen moved to dismiss on forum non conveniens, among other grounds, arguing that the dispute should proceed in Germany. The district court agreed, reasoning that Germany was an adequate and available alternative forum, that the public and private interest factors favored dismissal, and that the choice **[**6]** of forum by the one American plaintiff (Prevent USA) merited little deference because it was merely a shell company acting as a "scouting party" for the Prevent Group. R.56 at 12-21.

[*658] II.

The phrase forum non conveniens (an "unfitting forum") may suggest a more venerable history than the cases reveal. As Latin phrases go, this one has a relatively recent vintage. Minted by a Scottish court in 1845, the common law doctrine, which allows a court to dismiss a case in favor of a more convenient forum, has attained by some accounts the status of "Scotland's most significant legal export in the field of private international law." Ardavan Arzandeh, *The Origins of the Scottish Forum Non Conveniens Doctrine*, 13 J. Priv. Int'l L. 130, 130-32 (2017). The doctrine gained popularity in the Anglo-American legal world after the House of Lords recognized it in 1926. *Société de Gaz de Paris v. Société Anonyme de Navigation*, 1926 SC (HL) 13. The U.S. Supreme Court mentioned forum non conveniens for the first time in the 1930s. *See* *Rogers v. Guar. Tr. Co. of N.Y., 288 U.S. 123, 151, 53 S. Ct. 295, 77 L. Ed. 652 (1933)* (Cardozo, J., dissenting); *Can. Malting Co. v. Paterson S.S., 285 U.S. 413, 423, 52 S. Ct. 413, 76 L. Ed. 837 (1932)* (explaining "[c]ourts of equity **[**7]** and of law also occasionally decline, in the interest of justice, to exercise jurisdiction, where the suit is between aliens or nonresidents, or where for kindred reasons the litigation can more appropriately be conducted in a foreign tribunal").

But the Court did not provide a full explanation of the American common law doctrine and the factors bearing on its invocation until *Gulf Oil Corp. v. Gilbert, 330 U.S. 501, 67 S. Ct. 839, 91 L. Ed. 1055 (1947)*. **[***5]** With Justice Jackson writing for the majority, *Gilbert* held that the district court's power to dismiss a case on forum non conveniens grounds is rooted in the reality that "a court may resist imposition upon its jurisdiction even when jurisdiction is authorized by the letter of a general venue statute." *Id. at 507*. Justice Black dissented, insisting that a court faced with a cognizable claim based on alleged violations of common law or statutory rights may not decline to exercise jurisdiction absent congressional authorization, no matter the inconvenience to the defendant. *Id. at 513-15* (Black, J., dissenting). Since then, the Court has stuck to Justice Jackson's path, authorizing trial courts to dismiss a case on forum non conveniens grounds. *Piper Aircraft Co. v. Reyno, 454 U.S. 235, 257, 102 S. Ct. 252, 70 L. Ed. 2d 419 (1981)* **[**8]** ; *see* Lonny S. Hoffman & Keith A. Rowley, *Forum Non Conveniens in Federal Statutory Cases*, *49 Emory L.J. 1137, 1153-54 (2000)*.

HN1[] In deciding whether to dismiss a case on this basis, "the central focus" is "convenience." *Piper Aircraft, 454 U.S. at 249*. Three questions guide a district court's discretion: Is there an adequate alternative forum? Would the chosen forum be unduly burdensome to the defendant or court given the private and public considerations at play? Are there legitimate reasons for denying the plaintiff its choice of forum? *Jones v. IPX Int'l Eq. Guinea, S.A., 920 F.3d 1085, 1090 (6th Cir. 2019)*.

HN2[] In reviewing a forum non conveniens ruling, we ask whether the district court committed a "clear abuse of discretion." *Piper Aircraft, 454 U.S. at 257*. We give "substantial deference" to district court decisions that get the process right—that account for all of the "relevant public and private interest factors." *Id.; see* *Jones, 920 F.3d at 1093*. Fresh review applies to questions of law, such as whether an adequate alternative forum exists. *DRFP L.L.C. v. Republica Bolivariana de Venezuela, 622 F.3d 513, 518 (6th Cir. 2010)*.

[*659] 1. Is there an available **[**9]** and adequate alternative forum? Countries that have jurisdiction over the defendant typically qualify. *Piper Aircraft, 454 U.S. at 254 n.22*. ***HN3***[] In the "rare circumstances" in which "the remedy offered by the other forum is clearly unsatisfactory," American courts tend to keep the case. *Id.* But the reality that the foreign venue makes it more difficult to establish the claim or that the foreign law is less generous to prevailing plaintiffs does not establish unavailability. *See, e.g., id. at 249, 255*.

[*6]** Germany is an adequate forum to hear this case. ***HN4***[] German ***antitrust law*** gives its courts jurisdiction over "all restraints of competition having an effect within the area of application of this Act, even if they were caused outside the area of application of this Act." *Gesetz gegen Wettbewerbsbeschränkungen* [GWB] [Act against Restraints of Competition], § 185 (2), https://www.gesetze-im-internet.de/englisch_gwb/englisch_gwb.html#p1903 (Ger.). Prevent USA has adequately alleged an anticompetitive effect within Germany, as it identified antitrust injuries that arose from missed investment opportunities and its European parent's resulting stunted growth, all in contrast with Volkswagen's German-based **[**10]** market dominance during this period. On top of that, Prevent USA alleges that, as a result of Project 1, its parent company (based in Europe) missed out on key investment opportunities within Germany.

As between a Germany-based antitrust lawsuit and an American one, it appears that the German one would reach *more* conduct and more injuries. In Germany, the Prevent Group also may bring antitrust claims under European law. The Rome II Regulation, which regulates choice of law in private lawsuits within the European Union, provides a mechanism for bringing before a single member state's court anticompetitive behavior affecting many European states. Clay H. Kaminsky, *The Rome II Regulation: A Comparative Perspective on Federalizing Choice of Law*, *85 Tul. L. Rev. 55, 66 (2010)*. A plaintiff may bring an antitrust action alleging effects in multiple countries in the "court of the domicile of the defendant" based on that country's law, "provided that the market in that Member State is amongst those directly and substantially affected by the restriction of competition." Commission Regulation 864/2007, on the Law Applicable to Non-Contractual Obligations (Rome II), 2007 O.J. (L 199) 44. That means **[**11]** the Prevent Group could bring an action in German court for anticompetitive effects across the European Union. Not so for a Sherman Act claim, which would not reach foreign conduct that produces only anticompetitive harm abroad. Absent proof of domestic injury, Prevent USA could not recover for any of the alleged European antitrust violations in an American court. *F. Hoffmann-La Roche Ltd. v. Empagran S.A., 542 U.S. 155, 165, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004)*. This factor favors a German court.

This approach, by the way, may not necessarily end Prevent USA's opportunity to sue in an American federal court. ***HN5***[] A dismissal without prejudice has no res judicata effect on a **[***7]** subsequent claim. 9 Charles A. Wright & Arthur R. Miller, Federal Practice and Procedure § 2367 (4th ed. 2021). And it may be the case—we need not finally decide—that claims dismissed on forum non conveniens grounds may be refiled in federal court if the alternative forum itself declines to exercise jurisdiction or otherwise determines it lacks authority to address injuries located solely on American soil. *See* *Butler v. Denka Performance Elastomer LLC, 806 F. App'x 271, 274 (5th Cir. 2020)* (per curiam); **[*660]** *Sigalas v. Lido Mar., Inc., 776 F.2d 1512*, **[**12]** 1516 (11th Cir. 1985); *Fischer v. Magyar Allamvasutak Zrt., 777 F.3d 847, 852 (7th Cir. 2015)*.

2. Do the private and public interest factors favor an American or German court? Start with the private considerations: access to evidence, mechanisms for ensuring that unwilling witnesses participate, and costs of obtaining testimony from willing witnesses. *Gilbert, 330 U.S. at 508*; *Duha v. Agrium, Inc., 448 F.3d 867, 875 (6th Cir. 2006)*. The question through it all is whether these considerations "establish . . . oppressiveness and vexation to a defendant . . . out of all proportion to plaintiff's convenience." *Piper Aircraft, 454 U.S. at 241* (quotation omitted).

The district court reasonably weighed these private interest factors. German and Portuguese are the languages of choice of the documents purporting to establish Project 1, and the imperative of translation into the language of an American forum favors dismissal. *Duha, 448 F.3d at 876-77*. Most of the witnesses also reside in Europe. Prevent USA's allegations about the relevant presentations and spreadsheets, all directed at German executives, suggest that much of the evidence will be in German, and that the German courts will be able **[**13]** to access these documents and witnesses far more conveniently than American courts could. The district court reasonably thought as much, and not one major private consideration disrupts this balancing.

Turn to the public interest factors: local interest in the dispute, the location of the injury, the fullness of the court's docket, preference for trying cases in the place of the governing law, hesitance to apply foreign law, and desire to avoid conflict-of-law problems. *Wong v. PartyGaming Ltd., 589 F.3d 821, 832 (6th Cir. 2009)*. These factors ultimately speak to an American court's potential "administrative and legal problems" with trying the case. *Piper Aircraft, 454 U.S. at 241* (quotation omitted).

[*8]** The district court reasonably applied these considerations and followed a well-travelled path in doing so. It found that "Michigan jurors would have scant relation to this case" and that, based on Prevent USA's allegations, "Germany is the country with the greatest interest in the controversy." R.56 at 17-18. Both of the "local-interest considerations"—namely, "the parties' connections to the local forum and the location of the injury"—favor dismissal. *Hefferan v. Ethicon Endo-Surgery Inc., 828 F.3d 488, 500 (6th Cir. 2016)* **[**14]** . In truth, the only instance in which Prevent USA specifically alleged in its complaint that Volkswagen's anticompetitive behavior blocked its concrete efforts to acquire a company involved the *Brazilian* subsidiary of Tower International. Without more specific pleadings about blocked Prevent USA efforts to acquire the American operations of Michigan-based companies on the "problematic suppliers" list, we share the district court's concern over whether the plaintiffs have shown a meaningful connection between the alleged injury and the United States. No abuse of discretion occurred.

3. Are there legitimate reasons for denying Prevent USA its choice of forum? **HN6**[] Because forum non conveniens is designed to "secure convenient trials," it makes sense to "defer to a plaintiff's choice of forum based on an assumption that the plaintiff" knows its self-interest better than anyone else and thus "will choose a convenient forum." *Jones, 920 F.3d at 1094*. In the abstract, this consideration favors an American forum. But that assumption is less valid in the case of a **[*661]** foreign plaintiff or a "shell corporation" set up primarily for suing within the United States, **[**15]** *Rustal Trading US, Inc. v. Makki, 17 F. App'x 331, 338 & n.6 (6th Cir. 2001)*, and, worse in this instance, when affiliates of the new American corporation have already tried and largely failed to win on similar grounds in a foreign forum.

The convenience of handling this lawsuit in Michigan is not obvious, even from Prevent USA's perspective. Keep in mind that the Prevent Group brought five different actions in Germany before bringing this American lawsuit. And Prevent USA, a corporation designed to acquire American companies but that has not yet succeeded in doing so, has several hallmarks of a "shell company"—a place of business in an apartment, few employees, and little apparent presence or activity in this country—whose forum choice merits little deference. *See id.* Regardless of the exact size of Prevent USA's operations, the litigation history demonstrates that the real party in interest is the Prevent Group, which as a foreign plaintiff enjoys less deference **[***9]** in its choice of forum. *Piper Aircraft, 454 U.S. at 255*. It is difficult to be overly concerned that Volkswagen "will uproot plaintiffs as a form of litigation strategy," *Hefferan, 828 F.3d at 493*, given how many German roots **[**16]** this long-running dispute already has. The Prevent Group's own prior actions confirm as much, as it initially launched this litigation in 2016 in Germany, a forum choice that one long-standing member of the Prevent Group (Eastern Horizon) cannot fairly distance itself from and that the creation of an American subsidiary (Prevent USA) does not make go away.

Trying to fend off this conclusion, Prevent USA claims that antitrust actions may *never* be dismissed for forum non conveniens. It urges us to follow the Fifth Circuit's decision in *Industrial Investment Development Corp. v. Mitsui & Co., 671 F.2d 876, 890-91 (5th Cir. 1982)*, which reached that conclusion for two reasons. The Fifth Circuit first looked to *United States v. National City Lines, Inc., 334 U.S. 573, 68 S. Ct. 1169, 92 L. Ed. 1584 (1948)* (*National City Lines I*), which held that the broad venue provision of the *Clayton Act* precluded a federal court from dismissing a lawsuit on forum non conveniens grounds and making the claimant file it in a different federal district. The Fifth Circuit held that this precedent "appl[ied] fully" to foreign courts, not just domestic ones. *Mitsui, 671 F.2d at 890*. It made no difference to the Fifth Circuit that Congress **[**17]** repudiated *National City Lines I* later that year by enacting a domestic venue transfer statute, *28 U.S.C. § 1404(a)*, or that the Court recognized the impact of *§ 1404* and limited its decision in *United States v. National City Lines, 337 U.S. 78, 84, 69 S. Ct. 955, 93 L. Ed. 1226 (1949)* (*National City Lines II*). As the Fifth Circuit saw it, *National City Lines II* did not disturb its predecessor's holding that common law dismissal under forum non conveniens is inappropriate for antitrust actions. *Mitsui, 671 F.2d at 890 n.18*.

The Fifth Circuit next determined that, with or without *National City Lines I*, it would not apply forum non conveniens to Sherman Act claims. In its view, the Act's focus on penalizing and deterring monopolistic behavior made dismissal in favor of a foreign venue inappropriate because it risked placing anticompetitive violations "beyond the reach of the *Sherman Act*." *Id. at 891*.

We are not persuaded. *National City Lines I* for one does not control this case. **HN7**[] The Clayton Act says nothing about forum non conveniens dismissal. Although its special venue **[***10]** provision generously authorizes a plaintiff to sue "in any district wherein [defendant] may be found or transacts **[*662]** business," nothing in that language **[**18]** indicates that the district court may not dismiss a case for refiling in a foreign country. *15 U.S.C. § 22*. As then-Chief Judge Breyer reasoned about a similar special venue provision in a federal securities statute, "[*t*]*he language of such a statute does not forbid transfer*" but "simply adds to the number of courts *empowered* to hear a plaintiff's claim." *Howe v. Goldcorp Invs., Ltd., 946 F.2d 944, 949 (1st Cir. 1991)*. If a general venue statute like *§ 1404(a)* does not bar the international transfer of a lawsuit, as *Piper* confirms, it is hard to see why a special venue provision would do so implicitly. *Id. at 948-49*.

The Fifth Circuit also is not the only court of appeals to consider this question. The First Circuit, as suggested, took a different approach. It reasoned that *National City Lines I* had no role to play in view of the later enactment of *§ 1404* and the Supreme Court's decision in *National City Lines II*. *Id.* It explained that, under a special venue provision in the *Securities Act of 1934*, which allowed the plaintiff to sue in the jurisdiction "wherein any act or transaction constituting the violation occurred," the common law doctrine of forum non conveniens remained a viable **[**19]** option. *Id. at 948, 950*. Then-Chief Judge Breyer reasoned that the statute does not prohibit transfer explicitly or implicitly and thus does not end the common law tradition of allowing such transfers. *Id. at 949-50*.

The Second Circuit followed a similar path in the context of a claim just like this one, a Sherman Act complaint. *Cap. Currency Exch., N.V. v. Nat'l Westminster Bank PLC, 155 F.3d 603, 606 (2d Cir. 1998)*. It held that, even after *National City Lines I*, antitrust claims may be dismissed under forum non conveniens. *Id. at 608-09*. In doing so, it relied on the First Circuit's decision in *Howe*, concluding that the Supreme Court had "considered only domestic transfers; it did not consider international transfers at all." *Id. at 608* (quoting *Howe, 946 F.2d at 949*). It saw no good reason why *National City Lines I* required any particular approach in the international context because the Supreme Court's decision focused on domestic antitrust litigation.

Prevent USA invokes legislative history in an effort to show that the relevant antitrust and securities acts differ, offering a reason to distinguish *Howe* (but not *Capital Currency Exchange*). Two answers come to mind. The first is **[**20]** that the argument does little to counter the **[***11]** First Circuit's persuasive (and non-legislative-history-based) explanation why *National City Lines I* does not advance the plaintiffs' cause. The second is that the argument illustrates a vice of relying on legislative history. If accepted, this approach would require us to conclude that two statutes with materially identical venue provisions—the Sherman Act and the 1934 Securities Act—would somehow generate opposite conclusions about the continuing vitality of the common law doctrine of forum non conveniens. Whatever virtues this kind of argument advances, the rule of law is not among them. By creating a "hodge-podge" of different conclusions about a court's power to dismiss a case for statutes with similar special venue provisions, *Howe, 946 F.2d at 950*, we would sacrifice consistent and predictable decision making.

Confirming the risk, the Fifth Circuit has brought that prediction to fruition. *Mitsui*, as shown, barred a forum non conveniens dismissal of an antitrust lawsuit given the statute's special venue provision (*15 U.S.C. § 22*), which allows plaintiffs to sue "in any district wherein [defendant] may be found or transacts business." **[**21]** *671 F.2d at 890* & n.17 (quotation omitted). But other Fifth Circuit **[*663]** cases reach a different result with other federal statutes that have similar venue provisions. In one, the court upheld a forum non conveniens dismissal of a claim premised on the *Racketeer Influenced and Corrupt Organizations Act*, or RICO. *Kempe v. Ocean Drilling & Expl. Co., 876 F.2d 1138, 1144 (5th Cir. 1989)*. That statute has a special venue provision that allows plaintiffs to sue in "any district in which" defendant "resides, is found, has an agent, or transacts his affairs." *18 U.S.C. § 1965(a)*. In another, the court noted the availability of a forum non conveniens dismissal of a tort claim under the *Jones Act*, *In re Air Crash Disaster Near New Orleans, 821 F.2d 1147, 1163 n.25 (5th Cir. 1987)* (en banc), which had a since-repealed venue provision (46 U.S.C. § 688) that authorized jurisdiction "under the court of the district in which the defendant employer resides or in which his principal office is located." To give the Clayton Act's special venue provision different legal effect than similarly worded provisions of other statutes based on a handful of floor statements would be contrary to our duty to "interpret **[**22]** laws rather than reconstruct legislators' intentions." *I.N.S. v. Cardoza-Fonseca, 480 U.S. 421, 452-53, 107 S. Ct. 1207, 94 L. Ed. 2d 434 (1987)* (Scalia, J., concurring in the judgment).

[*12]** One might wonder whether *Piper Aircraft*'s dismissal for forum non conveniens to international courts is limited to common law claims. That is a fair question. *Piper Aircraft* after all considered only the dismissal of common law tort claims. *454 U.S. at 239-40*. But nothing in the decision limits its holding to common law claims, and in many cases the type of tort claim at issue in *Piper Aircraft* is created by a statute, say a tort claim under the Jones Act. Court after court, moreover, has declined to draw this line, as shown by the many courts of appeals that have allowed forum non conveniens dismissals of federal statutory claims. *See Howe, 946 F.2d at 950 (Securities Act)*; *Cap. Currency Exch., 155 F.3d at 609 (Sherman Act)*; *Trotter v. 7R Holdings LLC, 873 F.3d 435, 442, 68 V.I. 818 (3d Cir. 2017)* (Jones Act); *Kempe, 876 F.2d at 1144 (RICO)*; *Gemini Cap. Grp., Inc. v. Yap Fishing Corp., 150*

F.3d 1088, 1092 (9th Cir. 1998) (RICO); *Republic of Panama v. BCCI Holdings (Luxembourg) S.A., 119 F.3d 935, 952-53 (11th Cir. 1997)* (RICO).

Also unpersuasive **[**23]** are Prevent USA's other arguments for barring the use of forum non conveniens in antitrust claims. It overstates the risk that dismissing this lawsuit between competitors will prohibit anyone from challenging Volkswagen's alleged anticompetitive behavior. The U.S. Department of Justice, the fifty state attorneys general, and any consumers harmed by higher car prices could still sue the company under the Sherman Act and would be less likely to have their lawsuits dismissed under forum non conveniens. *15 U.S.C. §§ 4*, *15*. Nor is it obvious that the German and European antitrust protections lack teeth. Consider the increasingly sophisticated antitrust legislation being written in Europe and elsewhere today that offers private remedies between competitors. *See* Daniel J. Gifford & Robert T. Kudrle, *The Atlantic Divide in Antitrust: An Examination of US and EU Competition Policy* 1 (2015) (explaining "[t]he United States and the European Union have competition laws that are broadly similar").

Prevent USA separately argues that Germany is not an adequate alternative forum because the German courts would not apply the Sherman Act and consequently would not award treble damages for antitrust violations. **[**24]** But suing under German ***antitrust law*** instead of the Sherman Act does not "render the possible remedy so clearly inadequate that forcing **[*664]** a plaintiff to bring suit [in Germany] would be unjust." *Hefferan, 828 F.3d at 495*. ***HN8***[] Differences in the **[***13]** amount of recovery will not make a forum inadequate, even when it lacks punitive damages, *id.*, as long as the forum provides some remedy, *Piper Aircraft, 454 U.S. at 255*. That is amply true here.

Prevent USA adds that Germany is not an available forum because German courts would not be able to exercise jurisdiction over codefendant Volkswagen Group of America. But Volkswagen's German law expert explained that its American subsidiary could be held liable as a joint tortfeasor for inflicting intentional economic damage to the Prevent Group. Besides, we have affirmed dismissal for forum non conveniens even when the other forum lacked jurisdiction over one defendant where other affiliated corporate entities from whom the plaintiffs could recover were amenable to service. *Est. of Thomson ex rel. Est. of Rakestraw v. Toyota Motor Corp. Worldwide, 545 F.3d 357, 365 (6th Cir. 2008)*.

We affirm.

Opinion

[*819] REDACTED — ORDER RE MOTIONS FOR SUMMARY JUDGMENT AND MOTIONS TO EXCLUDE EXPERT TESTIMONY

Re: Dkt. Nos. 466, 467, 470, 472, 474, 476, 480, 495

Defendants SAP SE, SAP America, **[**4]** Inc., and SAP Labs, LLC (collectively "SAP") **[*820]** move for summary judgment on plaintiffs Teradata Corporation, Teradata US, Inc., and Teradata Operations, Inc.'s (collectively "Teradata") technical trade secret claims, business trade secret claims, and tying claim. Teradata also moves for summary judgment and argues that counterclaim-plaintiff SAP SE's U.S. Patent No. 8,214,321 ("'321 Patent") is invalid under *35 U.S.C. § 101*. It argues that SAP is not entitled to damages for the alleged infringement of U.S. Patent Nos. 7,617,179 ("'179 Patent"), and 9,626,421 ("'421 Patent") before May 19, 2019. Teradata also moves to exclude portions of four of SAP's expert's opinions: Tim Kraska, Stephen Horn, Gregory Leonard and Ouri Wolfson, and Sharad Mehrotra. SAP moves to exclude portions of one of Teradata's expert's opinions, John Asker.

For the reasons explained below, SAP's motion for summary judgment on Teradata's technical trade secret claims and tying claim is GRANTED. Its motion related to Teradata's business trade secret claims under the DTSA is DENIED as moot. Its motion to exclude portions of Asker's report is GRANTED in part and DENIED in part. Teradata's motion for summary judgment on the invalidity of the '321 Patent is GRANTED. Its motion for partial summary judgment against an award of damages for infringement **[**5]** of the '179 and '421 Patents before May 21, 2019, is also GRANTED. Its motion to exclude portions of Kraska's expert report is DENIED as moot. Its motion to exclude portions of Horn's report is GRANTED in part and DENIED in part. Its motion to exclude portions of the Leonard and Wolfson reports is DENIED in part as moot and DENIED in part on the merits. Its motion to exclude portions of Mehrotra's report is DENIED.[1]

BACKGROUND

---

[1] The parties have also filed 21 motions to seal. Dkt. Nos. 462, 465, 468, 471, 473, 475, 479, 506, 515, 518, 522, 524, 528, 531, 536, 550, 551, 554, 560, 568, 599. I will issue a separate order addressing these motions. Suffice it to say, the parties have sought to seal a great deal of information that does not meet the compelling interest standard that applies to dispositive motions. *See* *Ctr. for Auto Safety v. Chrysler Grp., LLC, 809 F.3d 1092, 1096-99 (9th Cir. 2016)*, *cert. denied sub nom.* ***FCA U.S. LLC v. Ctr. for Auto Safety, 137 S. Ct. 38, 196 L. Ed. 2d 26 (2016)***. While I will address all of the sealing requests in a separate order, what is not sealed in this Order does not meet the applicable standard. Further, with respect to those portions of this Order that are sealed, the parties should not assume that I have concluded that they have provided a sufficient basis to seal the information. These redactions are preliminary and should not be taken as an indication about the merits of sealing.

I. FACTUAL HISTORY

Teradata conducts research, development, engineering, and other technical operations related to its Enterprise Data Analytics and Warehousing ("EDAW" or "EDW") products. *See* Dkt. No. 67 ("SAC") ¶ 4. Teradata's flagship product is the Teradata Database, a relational database management system designed for EDW. SAC ¶ 16. Teradata was the first commercial EDW vendor to utilize massively parallel processing ("MPP") through Teradata Database to execute high volumes of analytical queries on massive amounts of data for EDAW customers. Dkt. No. 528-9 ("Walter Decl.") ¶ 3.

SAP is best known for Enterprise Resource Planning ("ERP") software, historically designed to run on transactional databases such as those by Oracle, IBM, and Microsoft. Dkt. **[**6]** No. 462-5 ("Anicich Decl.") ¶ 39. SAP's ERP applications do not, and have never, run on top of Teradata's analytical database. Dkt. No. 467-5 ("Mehrotra Decl.") ¶ 127.

[*821] ERP Applications allow companies to manage data required to conduct their day-to-day operations across numerous aspects of the business enterprise and are typically designed around a relational transactional database that can ensure users have access to a uniform and current set of data. *Id.*; Dkt. No. 452-11 ("Stiroh Rep.") ¶ 10; Anicich Decl. ¶¶ 24-28. Transactional databases are also known as "online transactional processing" ("OLTP") databases and are typically "row-based," which is advantageous for processing transactions, such as pay roll data, and running a large number of simple transactions concurrently. Mehrotra Decl. ¶ 53.

In contrast, analytical applications are designed to run on a second type of database, known as an analytics or "OLAP" database. Dkt. No. 463-15 ("Sell Depo.") at 18-19. These databases typically store data in columns to optimize the running of a small number of queries with a large number of complex records. Mehrotra Decl. ¶ 60; Dkt. No. 562-6 ("Kraska Decl.") ¶ 22. There are three different **[**7]** types of analytical databases: (1) data marts; (2) enterprise data warehouses ("EDWs"); and (3) data lakes. Sell Depo. at 14. EDWs are large-structured analytics databases that draw data from different sources, e.g., transactional databases, across an enterprise. *Id.* at 13.

In 2009, SAP and Teradata entered into a partnership referred to as the "Bridge Project" to combine SAP's ERP Applications and SAP BW tool interface with Teradata's MPP architecture that it uses in Teradata Database for EDW. Kraska Decl. ¶ 161. During the Bridge Project, Teradata provided SAP with access to its confidential information. SAC ¶ 35. The parties executed two agreements to formalize the Bridge Project, the Software Development Cooperation Agreement ("SDCA") and the Technology Partner Agreement ("TPA"). SAC ¶ 32. These agreements restricted disclosures of each parties' confidential information. *Id.* The parties also entered into a mutual non-disclosure agreement ("Mutual NDA") in December 2008 and June 2009 ("NDAs"). *Id.*

Through the Bridge Project, SAP and Teradata jointly developed "Teradata Foundation" which enabled SAP's ERP applications to use Teradata for the transactional database and data-analytics **[**8]** for EDW activities. Dkt. No. 528-5 ("Graas Decl.") ¶¶ 6-9. While the Bridge Project was underway, SAP was developing another EDW product called SAP HANA ("HANA"). Dkt. No. 530-39 ("Primsch Depo.") at 362. By June 2011, HANA was commercially available. After nearly three years in the Bridge Project, and two months after HANA was made available, SAP unilaterally terminated the joint venture and stopped supporting, selling, and marketing Teradata Foundation. Dkt. No. 529-25 at 068.

In February 2015, SAP launched its latest version of ERP Application, SAP S/4HANA and combined its ERP Application and EDAW products into a single sales offering. S/4HANA is integrated to operate on top of SAP's HANA database, a translytical database with both transactional and analytical functionalities. Anicich Decl. ¶ 40. Customers can purchase HANA either with a full-use license, with no restrictions on how the data within HANA can be used, or a lower-cost limited-use "runtime" license, with database use limited to supporting S/4HANA. Dkt. No. 467-53 ("Zenus Depo.") at 105-115. In other words, if customers want to export their own data from HANA for use with third-party products, they must pay an additional **[**9]** license fee, i.e., an exit fee. Dkt. No. 532-41 at 583.

II. PROCEDURAL HISTORY

On June 19, 2018, Teradata filed a complaint against SAP alleging, among other **[*822]** things, misappropriation of its trade secrets and violation of antitrust laws.[2] Dkt. No. 1. On December 12, 2018, I granted in part and dismissed in part SAP's motion to dismiss. Dkt. No. 65 ("MTD Order"). On December 21, 2018, Teradata filed a second amended complaint alleging that SAP disingenuously entered a joint venture with it to steal its trade secrets and develop a competing product, HANA, misappropriating trade secrets, and violating antitrust laws in the process. *See* Dkt. No. 67 ("SAC"). The following claims remain at issue: whether SAP misappropriated Teradata's trade secrets related to the Batched Merge method and whether SAP unlawfully tied its ERP applications to its HANA product.[3] SAP answered on January 11, 2019 and filed counterclaims related to five of its patents on May 29, 2019. *See* Dkt. Nos. 72, 106. SAP's remaining patent infringement counterclaims concern the following patents: the '421 Patent, the '321 Patent, and the '179 Patent. On June 12, 2020, I held a claims construction hearing, and issued an order on July 15, 2020. Dkt. No. 279 ("Claim **[**10]** Construction Order"). On August 25, 2021, Teradata and SAP filed all of the motions at issue.

LEGAL STANDARD

I. SUMMARY JUDGMENT

A party is entitled to summary judgment where it "shows that there is no genuine dispute as to any material fact and [it] is entitled to judgment as a matter of law." *FED. R. CIV. P. 56(a)*. A dispute is genuine if it could reasonably be resolved in favor of the nonmoving party. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A fact is material where it could affect the outcome of the case. *Id.*

The moving party has the initial burden of informing the court of the basis for its motion and identifying those portions of the record that demonstrate the absence of a genuine dispute of material fact. *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 323-24, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. Once the movant has made this showing, the burden shifts to the nonmoving party to identify specific evidence showing that a material factual issue remains for trial. *Id.* The nonmoving party may not rest on mere allegations or denials from its pleadings but must "cit[e] to particular parts of materials in the record" demonstrating the presence of a material factual dispute. *FED. R. CIV. P. 56(c)(1)(A)*; *see also* *Liberty Lobby, 477 U.S. at 248*. The nonmoving party need not show that the issue will be conclusively resolved in its favor. *Id. at 248-49*. All that is required is the **[**11]** identification of sufficient evidence to create a genuine dispute of material fact, thereby "requir[ing] a jury or judge to resolve the parties' differing versions of the truth at trial." *Id.* (internal quotation marks omitted). If the nonmoving party cannot produce such evidence, the movant "is entitled to . . . judgment as a matter of law because the nonmoving party has failed to make a sufficient showing on an essential element of her case." *Celotex, 477 U.S. at 323*.

On summary judgment, the court draws all reasonable factual inferences in favor of the nonmoving party. *Liberty Lobby, 477 U.S. at 255*. "Credibility determinations, the weighing of the evidence, **[*823]** and the drawing of legitimate inferences from the facts are jury functions, not those of a judge." *Id.* However, conclusory and speculative testimony does not raise a genuine factual dispute and is insufficient to defeat summary judgment. *See* *Thornhill Publ'g Co., Inc. v. GTE Corp., 594 F.2d 730, 738-39 (9th Cir. 1979)*.

II. FEDERAL RULES

---

[2] This case is related to *Teradata v. SAP*, No. 20-CV-06127-WHO.

[3] The parties dispute whether Teradata asserted a new tying theory during the summary judgment briefing, i.e., that SAP unlawfully tied S/4HANA to HANA's analytical capabilities through licensing. *See infra* Part I.B.3.

Federal Rule of Evidence 702 allows a qualified expert to provide an opinion where:

> (a) the expert's scientific, technical, or other specialized knowledge will help the trier of fact to understand the evidence or to determine a fact in issue;
> (b) the testimony is based on sufficient facts or data;
>
> (c) the testimony is the product of reliable principles and **[**12]** methods; and
> (d) the expert has reliably applied the principles and methods to the facts of the case.

Fed. R. Evid. 702.

Expert testimony is admissible under *Rule 702* "if it is both relevant and reliable." *See Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 589, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. "[R]elevance means that the evidence will assist the trier of fact to understand or determine a fact in issue." *Cooper v. Brown, 510 F.3d 870, 942 (9th Cir. 2007)*. Under the reliability requirement, expert testimony must "relate to scientific, technical, or other specialized knowledge, which does not include unsubstantiated speculation and subjective beliefs." *Id.* To ensure reliability, the court must "assess the [expert's] reasoning or methodology, using as appropriate such criteria as testability, publication in peer reviewed literature, and general acceptance." *Primiano v. Cook, 598 F.3d 558, 565 (9th Cir. 2010)*. These factors are "helpful, not definitive," and a court has discretion to decide how to test reliability "based on the particular circumstances of the particular case." *Id.* (internal quotation marks and footnotes omitted).

The inquiry into the admissibility of expert testimony is "a flexible one" where "[s]haky but admissible evidence is to be attacked by cross examination, contrary evidence, and attention to the burden of proof, not exclusion." *Id. at 564*. "When the methodology is sound, and the evidence **[**13]** relied upon sufficiently related to the case at hand, disputes about the degree of relevance or accuracy (above this minimum threshold) may go to the testimony's weight, but not its admissibility." *i4i Ltd. P'ship v. Microsoft Corp., 598 F.3d 831, 852 (Fed. Cir. 2010)*. The burden is on the proponent of the expert testimony to show, by a preponderance of the evidence, that the admissibility requirements are satisfied. *Fed. R. Evid. 702* advisory committee notes.

"Trial courts must exercise reasonable discretion in evaluating and in determining how to evaluate the relevance and reliability of expert opinion testimony." *United States v. Sandoval-Mendoza, 472 F.3d 645, 655 (9th Cir. 2006)*. A district court serves as "a gatekeeper, not a factfinder." *Id. at 654*.

DISCUSSION

I. SAP'S MOTION FOR SUMMARY JUDGMENT

SAP moves for summary judgment on Teradata's technical trade secret claims, business trade secret claims, attempted monopolization claim, and tying claim. Dkt. No. 467 ("SMSJ"). During the briefing, however, Teradata stipulated to the dismissal of its attempted monopolization claim. Dkt. No. 545. It also voluntarily dropped its federal Defend Trade Secrets Act ("DTSA") claim regarding its business trade secrets. Dkt. No. 542 ("Opp. SMSJ") **[*824]** at 25. It continues to assert claims related to trade secrets 54-56 under the *California Uniform Trade Secrets Act ("CUTSA")* ***[**14]***. *Id.* SAP's motion for summary judgment related to Teradata's attempted monopolization claim and business trade secret claims under the DTSA is therefore DENIED as moot. Teradata opposes SAP's motion related to its technical trade secret claims and its tying claim.

A. Trade Secret Claim

SAP moves for summary judgment on Teradata's technical trade secret claims. SMSJ at 2-12. Over the course of this case, Teradata's trade secret allegations have significantly narrowed and now focus on only one category of technical trade secrets: the Batched Merge method ("Asserted Trade Secret"), [TEXT REDACTED BY THE COURT] Dkt. No. 528-9 ("Walter Decl.") ¶¶ 3-12. SAP asserts that Teradata does not have standing to sue, it failed to mark the Asserted Trade Secret as confidential, as required by its agreements with Teradata, and that SAP is contractually authorized to use the product that incorporates Teradata's Asserted Trade Secret. SMSJ at 2-12.

1. Standing

SAP asserts that Teradata lacks standing to assert its technical trade secret claims because Teradata assigned the claims to Marlin Equity, a third-party firm. SMSJ at 10. On April 22, 2016, Teradata sold to Marlin a portion of its assets **[**15]** related to its "Marketing Execution and Marketing Operations" business, or Teradata's Marketing Applications Business ("TMA Business") as defined in the Asset Purchase Agreement ("APA"). Dkt. No. 543-3 ("APA") at 15. In the APA, Teradata assigned to Marlin contracts that were material to the TMA Business or "Material Contracts" as defined in the APA. *Id.* at 42. Teradata expressly identified the SDCA as a "Material Contract." Dkt. No. 464-26 at ("APA Schedule") at 163. In addition, Teradata's general counsel wrote to SAP that Teradata was assigning away "all of Teradata's rights, title and interests in, to, and under the" SDCA and that it "should deal solely" with Marlin. Dkt. No. 464-1 ("Lanier Decl., Ex. 58"). Teradata acknowledges that it provided the Asserted Trade Secret to SAP "[d]uring the Bridge Project, subject to the terms of the parties' agreements" such as the SDCA. SAC ¶ 34. SAP asserts that because the SDCA is material to the TMA Business under the APA, Teradata's alleged trade secrets claims are also material to the TMA Business and therefore that Teradata assigned all such claims to Marlin. SMSJ at 11.

Teradata contends that no assignment occurred because (1) any assignment **[**16]** required SAP's consent and SAP never consented and (2) the listing of the SDCA in the APA was a mistake and not part of the assignment. Opp. SMSJ at 11. Section 14.9 of the SDCA states that "Neither party may assign this Agreement . . . except with the express written consent of the other Party." SDCA ¶ 14.9. Similarly, Section 5.5(b) of the APA states, "Notwithstanding anything in this Agreement to the contrary, this Agreement shall not constitute an assignment, sale, transfer, conveyance etc., with respect to any Transferred Asset, or any right thereunder if an assignment, sale, transfer . . . without the Third-Party Consent of, or other action by, any third party, would constitute a breach or other contravention of the terms of such Transferred Asset." APA § 5.5(b); Dkt. No. 596 ("Hearing Tr.") at 6.

It is undisputed that SAP did not consent to the assignment of the SDCA under the APA. Dkt. No. 532-6 ("Weber Depo.") at 81-83. But SAP asserts that its consent is irrelevant to the issue of assignment under the SDCA's choice-of law, New York law. Reply SMSJ at 2-3. New **[*825]** York courts have "consistently held that assignments made in contravention of a prohibition clause [e.g., a contractual **[**17]** provision prohibiting assignments without the written consent of a party] in a contract are void if the contract contains clear, definite, and appropriate language declaring the invalidity of such assignments." *Sullivan v. Int'l Fid. Ins. Co., 96 A.D.2d 555, 465 N.Y.S.2d 235, 237 (1983)* (collecting cases); *see also Purchase Partners, LLC v. Carver Fed. Sav. Bank, 914 F. Supp. 2d 480, 505 (S.D.N.Y. 2012)*, *on reconsideration in part*, *2013 U.S. Dist. LEXIS 51850, 2013 WL 1499417 (S.D.N.Y. Apr. 10, 2013)* (holding that a transfer was valid because even though the agreement prohibited transfers or assignment without the written consent of the other party, it did not state that "any such transfer or assignment would be invalid or void."). The SDCA does not contain clear, definite, and appropriate language declaring the invalidity of an assignment made without SAP's consent. The assignment of the SDCA to Marlin is therefore valid.

Even if SAP had consented and its claims were subject to the assignment, Teradata contends that summary judgment should be denied because whether the SDCA was listed in the APA by mistake is a disputed factual issue and that the APA should be reformed to rectify the mistake. Opp. SMSJ at 11 n.15. It argues that because the SDCA is not related to the TMA Business, its inclusion in the APA was a mistake.

The APA is governed by Delaware law. APA § 11.3(a). "Claims for contract reformation require proof by clear **[**18]** and convincing evidence." *Parke Bancorp Inc. v. 659 Chestnut LLC, 217 A.3d 701, 710 (Del. 2019)*. In cases of unilateral mistake, reformation is permissible only when "the other party knew of the mistake but remained silent." *Scion Breckenridge Managing Member, LLC v. ASB Allegiance Real Est. Fund, 68 A.3d 665, 680 (Del. 2013)*. In cases of mutual mistake, reformation is permissible only if the parties "came to a specific prior understanding ... that differed materially from the written agreement." *Parke Bancorp, 217 A.3d at 710*.

Teradata does not show by clear and convincing evidence that Marlin knew of Teradata's mistake and remained silent or that Marlin and Teradata expressed an intent to agree to terms that differed from the terms in the APA. Instead, it contends that Steven Weber, its Global Head of Deal Management, testified that the SDCA or the Teradata Database "does not have anything to do with the TMA products" and that the letter from Teradata's general counsel was sent in error. Opp. SMSJ at 11. But such self-serving testimony is not evidence that there was either a unilateral or mutual mistake necessary for contract reformation. Reply SMSJ at 3. The APA is unambiguous and so "the writing itself is the sole source for gaining an understanding of intent." *Penton Bus. Media Holdings, LLC v. Informa PLC, 252 A.3d 445, 461 (Del. Ch. 2018)*. Because Teradata fails to identify sufficient evidence to create a genuine dispute of material fact, whether the SDCA **[**19]** was listed in the APA by mistake cannot preclude summary judgment.

In contrast, Teradata contends that neither the APA nor the SDCA assigns Teradata's trade secrets to Marlin and "without a clear assignment of the underlying intellectual property," it cannot have assigned its trade secret claims to Marlin. *Id.*at 12. SAP asserts that the question about whether the APA assigned the Asserted Trade Secret itself is irrelevant; the relevant question is whether Teradata assigned the right to sue for misappropriation of the Asserted Trade Secret. Reply SMSJ at 3-4. It argues that Teradata did because it assigned to Marlin "[a]ll **[*826]** Intellectual Property that is Related to the TMA Business," e.g., "trade secrets and confidential proprietary business information" and Teradata's claim is based on trade secrets purportedly provided subject to the SDCA's terms, which is "primarily related" to the TMA business. APA § 2.1(e); APA at 8. It also assigned to Marlin "[a]ll rights to Any Actions of any nature available to or being pursued by any member of [Teradata] to the extent related to the TMA Business" and "[a]ll goodwill and the going concern value of the TMA Business or the Marks included in the **[**20]** Transferred IP, and the right to sue for and recover for damages and profits for past and future infringements and misappropriations by any third party of any part of any of the Transferred IP owned by any member of [Teradata]." *Id.* §§ 2.1(h), (k). Teradata responds that its trade secret claims are not primarily related to the SDCA because its claims are for misappropriation and not breach of contract. Hearing Tr. at 7-8. It also contends that no actual intellectual property was ever conveyed. *Id.*

At the very least, there is a genuine dispute of whether Teradata's trade secret claims fall outside the scope of the assignment. Teradata has standing to pursue its trade secret claims.

2. Marking the Asserted Trade Secret Communications as Confidential

SAP asserts that Teradata's Batched Merge method trade secret claims also fail, however, because Teradata never marked as confidential any of the communications that purportedly disclosed the trade secrets as required by the NDAs. SMSJ at 13. The NDAs governed the sharing of confidential information during the Bridge Project and stated that "Confidential Information" shall mean the following:

> "[A]ll information which Disclosing Party protects **[**21]** against unrestricted disclosure to others, furnished by the Disclosing Party . . . to the Receiving Party . . . in writing or in other tangible form and clearly identified as confidential or proprietary at the time of disclosure marked with an appropriate legend indicating that the information is deemed confidential or proprietary by the Disclosing Party . . . Where the Confidential Information has not been reduced to written or other tangible form at the time of disclosure, and such disclosure is made orally or visually, the Disclosing Party agrees to identify it as confidential or proprietary at the time of disclosure and to summarize the Confidential Information in writing and deliver such summary within thirty (30) calendar days of such oral or visual disclosure provided . . . ."

Dkt. No. 463-27 ("Mutual NDA 1") ¶ 2; Dkt. No. 463-28 ("Mutual NDA 2") ¶ 2.

There are two documents at issue, different versions of the same document created by John Graas, a Teradata employee, that were marked confidential ("Marked Document"). *See* Dkt. Nos. 464-3 (version 1), 463-24 (version 6). Teradata contends that the first version of the Marked Document from July 2008 identifies the Batched Merge method **[**22]** and explained how the method could resolve SAP's problems. Opp. SMSJ at 14. But its witness, Graas, concedes that the first version of the Marked Document "does not contain the details of the overall batched merge method that was conveyed — conveyed to SAP" and only "listed the batched merge method . . . as a reference." Dkt. No. 462-17 ("Graas Depo.") at 106, 109. He explained that "the entire explanation of the batched merge method . . . would not have been in writing" and that he would "have conveyed it verbally within the meeting explaining to [SAP] what I meant with the [batched merge method] and how it worked." *Id.* at 84, 105.

[*827] The sixth version from August 2010, however, explained the manner in which the Batched Merge method was implemented to address deficiencies that prevented SAP from processing large batches of data. Opp. SMSJ at 13; Dkt. No. 463-24 § 4.2. SAP does not dispute that the sixth version contains the details of the Batched Merge method but argues that there is no evidence that Graas ever sent the sixth version to SAP. Graas Depo. at 268 ("Q: Do you have any records, any evidence at all, of version 6 being shared with SAP in any way? A: I don't recall."). It relies **[**23]** on *Prostar Wireless Grp., LLC v. Domino's Pizza, Inc., 360 F. Supp. 3d 994 (N.D. Cal. 2018)*, to argue that because "there was *no* evidence that the defendant had access to the trade secrets" the sixth version of the Marked Document cannot be the basis for a trade secret claim. Reply SMSJ at 6 (citing *Prostar Wireless, 360 F. Supp. at 1002*). Teradata objects and contends that *Prostar Wireless* is distinguishable because SAP does not dispute that it received the five prior versions of the document. Opp. SMSJ at 13 n.17. But Section 4.2 of the sixth version, which conveys how the Batched Merge Method was implemented, is not in any other version. Reply SMSJ at 6 n.3; *see* Dkt. Nos. 530-19 at 224-25, 464-3, 529-27, 529-28, 529-29. The first version of the Marked Document therefore fails to put SAP on notice about the allegedly confidential Batched Merge Method; there is no evidence that SAP received the sixth version.

The question then is whether Teradata's trade secret claims fail because of its failure to mark as confidential the communications that allegedly conveyed the Batched Merge Method. Teradata contends that its claims do not fail because, as SAP admits, Graas testified that he conveyed the Batched Merge Method orally to SAP employees in relation to the first version of the Marked Document. Opp. SMSJ at 15-17. It argues **[**24]** that the MNDA does not require marking subsequent oral discussion of confidential information already marked as confidential and even if it did, the parties waived this requirement through their conduct. *Id.* at 17. SAP responds that its argument is not that the NDAs require marking subsequent oral discussions of confidential information already marked as confidential but that Graas never disclosed the claimed trade secret in a writing marked as confidential in the first place. Reply SMSJ at 6.

It also asserts that the parties have not waived the marking requirement through their conduct. *Id.* at 7. The NDAs contain no-waiver provisions and therefore "Teradata must prove that SAP intentionally relinquished the marking provision and the no-waiver provision itself." *Id.*; Mutual NDA 1 ¶ 15; Mutual NDA 2 ¶ 15. Under New York law, waiver "'should not be lightly presumed' and must be based on 'a clear manifestation of intent' to relinquish a contractual protection." *Kassab v. Kasab, 195 A.D.3d 832, 838, 151 N.Y.S.3d 94 (N.Y. App. Div. 2021)*.

There is no clear manifestation of intent to relinquish either provision here. Teradata contends that there is waiver based on the conduct of its and SAP's employees "that shows that the parties intended that subsequent oral discussions **[**25]** of information already identified as confidential would be treated confidentially." Opp. SMSJ at 17-18. In support, it emphasizes testimony from various SAP employees, including SAP's CTO, where they state that they were required to protect Teradata's confidential information. *See, e.g.*, Dkt. No. 532-1 ("Sikka Depo.") at 58-59 ("Q: So if it turned out that somebody on your team took Teradata confidential information and used it in the development of NewDB, would that . . . be consistent with your understanding of the confidentiality obligations between SAP and Teradata? **[*828]** [Objection to form] A: No, it would not be consistent with it."); Dkt. No. 530-25 ("Holetke Depo.") at 120 ("Q: So you cannot imagine sharing Teradata's confidential information with other groups at SAP? [Objection to form] A: Yes."); Dkt. No. 530-39 ("Primsch Depo.") at 354-55 ("Q: Employees working on the Bridge Project would not have shared [internal] information outside of SAP or Teradata? A: To -- to the extent, yes."). It also emphasizes an email from an SAP employee telling colleagues not to share "internal information of TD [Teradata]" with IBM. Dkt. No. 529-30 at 437. These are not evidence of a clear manifestation **[**26]** of SAP's intent to relinquish either provision in the Mutual NDAs. As SAP points out, it is not apparent from the testimonies what information was "confidential" under the Mutual NDAs, only that information reduced to writing and marked confidential is confidential. Reply SMSJ at 7-9.

SAP asserts that Teradata's trade secret claims therefore necessarily fail because Teradata failed to comply with its contractual obligation to designate information as confidential when it disclosed the alleged Batched Merge Method trade secret to SAP. It requests that I reconsider my analysis of *PQ Labs, Inc. v. Yang Qi, No. 12-CV-0450-CW, 2014 U.S. Dist. LEXIS 11769, 2014 WL 334453, at *4 (N.D. Cal. Jan. 29, 2014)* in the prior MTD Order, where I rejected SAP's arguments that failure to satisfy the contractual marking requirement requires the dismissal of Teradata's claims because I concluded that there may be other ways for Teradata to have disclosed its trade secrets to SAP. MTD Order at 8-9. For example, the Mutual NDAs "were only two of four contracts involved in the Bridge Project to ensure that Teradata's proprietary information would not be misappropriated or reverse engineered." *Id.* at 9. But with the record on summary judgment, it is clear that *PQ Labs* case is distinguishable **[**27]** from this case.

In *PQ Labs*, the court held that the marking requirement was irrelevant because PQ Labs had "presented evidence that it used other means to notify its employees and agents that its technological and customer information was confidential." *PQ Labs, 2014 U.S. Dist. LEXIS 11769, 2014 WL 334453, at *4*. But unlike this case, there was no contractual marking requirement in *PQ Labs*; instead, the marking requirement derived from non-precedential Tenth Circuit case law. *Id.*

In contrast, a case like *Convolve Inc. v. Compaq Computer Corp., 527 F. App'x 910 (Fed. Cir. 2013)* is more analogous. In *Convolve*, there was a contractual marking requirement "to confirm in writing, within twenty (20) days of the disclosure, that the information was confidential." *Id. at 923*. The Federal Circuit affirmed the district court's decision that there was no misappropriation of trade secrets because the appellant had failed to protect the confidentiality of its information. *Id. at 921-22*. It also held that there was no waiver or modification of the marking requirement because "the testimony of a single Seagate employee that he believed that all disclosures were confidential . . . is not indicative of the mutual intent of both parties." *Id. at 924*.

Likewise, Teradata's technical trade secret claims fail because it failed to protect the confidentiality of its information. Even if *PQ Labs* was **[**28]** analogous to this case, there is no evidence that Teradata notified SAP of the confidentiality of the Batched Merge method through other means. Reply SMSJ at 8-9.

3. Contractual Right to Use the Asserted Trade Secret in Any SAP Product

Even if Teradata had sufficiently protected the confidentiality of the Batched Merge method, SAP asserts that it is contractually **[*829]** authorized to use any "Confidential Information" under the NDAs in any product. SMSJ at 16. Teradata has sued SAP for "using the proprietary information conveyed by John Graas pertaining to Teradata's batched merge method." Dkt. No. 464-14 ("Lanier Decl., Ex. 72") at 8. The Batched Merge method "is alleged to have been incorporated into the Bridge Project software (the MaxDB Bridge, also called the Teradata Foundation)—and then allegedly into the interface between SAP applications and HANA ("Native FAE")," also known as the conceptual design. *Id.* at 17.

According to SAP, both the software and its conceptual design are SAP property. *Id.* Section 10 of the SDCA outlines the "Proprietary Rights of the Parties." SDCA § 10. It states that SAP owns all rights to "the Conceptual Design [and] the SAP Interface in the form originally supplied by SAP as well as any modified **[**29]** versions," and the "software code that is necessary to adapt its software to" Teradata's database, including SAP's Interface. *Id.* § 10.1. The "Conceptual Design" is defined as "the description of the functional specifications of the SAP Interface or any other architecture, guideline or specification developed by or with SAP concerning or related to the integration of the [Teradata Database] with the [SAP BW product]." *Id.* § 1.2. "SAP Interface" is defined as "an application interface developed by or with SAP that resides on or in the SAP Software and which, when activated will give access to the Partner's Solution [i.e., Teradata's database]." *Id.* § 1.11. And section 10.3 states that "any and all Intellectual Property Rights to or arising out of any Newly Developed Materials shall belong to SAP" and "Newly Developed Materials" is defined as "any software . . . developed by SAP and/or [Teradata] in connection with or as a result of a party's interaction with the other party within the context of this Agreement." *Id.* §§ 1.8, 10.3.

Teradata responds that SAP's arguments depend on the Batched Merge method falling under certain SDCA provisions, but resolving which provision applies depends **[**30]** on disputed factual issues. Opp. SMSJ at 21. It argues that the Batched Merge trade secrets are not part of SAP's Interface or Conceptual Design but rather

Partner Materials under the SDCA, and therefore when SAP ended the Bridge Project, its license to use the Batched Merge method terminated. *Id.* The SDCA defines "Partner Materials" as "any and all Intellectual Property Rights in any programs, tools, systems, data or materials utilized or made available by Partner [Teradata] in the course of the performance under this Agreement," which "shall remain vested exclusively in [Teradata]" but "[s]ubject to any rights expressly granted to SAP hereunder." SDCA § 10.2. Section 9.2 of the SDCA limits use of Teradata's Partner Materials to five specific purposes, none of which include the development of SAP's HANA product; therefore, SAP was only allowed to use these materials "during the Term" of the SDCA. Opp. SMSJ at 21-22. Section 9.2 provides SAP a limited license to "the Partner Solution, related Documentation, and any other programs, tools, or other materials provided by Partner to SAP under a Project Plan." SDCA § 9.2.

SAP points out that Teradata does not and cannot explain how Graas's **[**31]** suggestions are any of the above. Reply SMSJ at 11. Graas's suggestions are not the Partner Solution, which is defined as only the Teradata Database itself, not the Database, not the documentation related to the database such as manuals, not a program and not a tool. *See* SDCA § 1.9. As SAP asserts, Graas's suggestions do not fall under section 9.2, the purpose of which is to prevent SAP from using Teradata's Database itself. *Id.* Instead, section 9.4 encompasses **[*830]** Graas's input, as explained below.

Teradata argues that the Batched Merge method was neither developed in connection with or as a result of the parties' interactions within the context of the SDCA, nor developed by or with SAP as the Conceptual Design. Opp. SMSJ at 22; see SDCA §10.03. Accordingly, Section 10.3 ("Newly Developed Materials") could not apply because those intellectual property rights existed prior to the Bridge Project. But whether Teradata owned the Batched Merge method and incorporated it into its own software before the Bridge Project is irrelevant. SAP does not argue that it owns the Batched Merge method but rather that "it owns the new software that includes the optimizations based on SAP's interactions with Graas." **[**32]** *Id.* at 10.

Section 10.2, which provides an exception to the rights expressly granted to SAP under the SDCA, does not change the fact that Section 10.1 expressly licenses to SAP the right to use Graas's input—i.e., his conversation with SAP employees—in any product. SMSJ at 18. Both the SDCA and the Mutual NDAs permit SAP to use any Teradata feedback or input regarding SAP's products, even if such information was marked confidential. *Id.* (citing SDCA §§ 9.4, 12; Mutual NDA 1 § 7, Mutual NDA 2 § 7).

For example, Section 9.4 of the SDCA provides,

> "Partner [Teradata] grants to SAP a worldwide, nonexclusive, royalty-free fully paid up, perpetual and irrevocable license to use, reproduce, display, distribute, create derivative works, or sublicense any Input submitted by Partner [Teradata] to SAP with resect to any deliverables or other items that SAP provides or shall provide to the Partner . . . To the extent that any such Input is incorporated into an SAP product, any inherent disclosure of Confidential and/or trade secret Information of Partner through the exercise of the license grants set forth in this Section 9.4 shall not constitute a breach of this Agreement including, but not limited **[**33]** to, any agreement between the Parties with respect to such Confidential or trade secret information referenced herein."

SDCA § 9.4. The SDCA states that "Input" means "suggestions, comments, and feedback (whether in oral or written form), including any included ideas and know-how, voluntarily provided by one Party to the other Party with respect to the work performed under this Agreement." *Id.* § 1.6. Similarly section 7 of the Mutual NDAs state,

> "During the course of this Agreement, Company [Teradata] may provide or SAP may solicit Company's input regarding SAP's Software, products, services, business or technology plans, including, without limitation, comments or suggestions regarding the possible creation, modification, correction, improvement or enhancement of SAP Software, products and/or services . . . (collectively, 'Company Feedback') . . . In order for SAP to utilize such Company Feedback Company grants to SAP a non-exclusive, perpetual, irrevocable, worldwide, royalty-free license . . . SAP shall be entitled to use Company Feedback for any purpose without restriction or remuneration of any kind with respect to Company."

Mutual NDA 1 § 7, Mutual NDA 2 § 7.

According to SAP, Graas's **[**34]** suggestions to SAP engineers about how to approach a command/query coming from SAP applications to work more efficiently with the Teradata database qualifies as "Input" under the SDCA and "Company Feedback" under the Mutual NDAs. SMSJ at 18-19. Teradata does not dispute that Graas's disclosures fall within "input," but **[*831]** it argues that the Batched Merge method was not mere "Input." Opp. SMSJ at 23; Reply SMSJ at 10. It argues that the trade secret is a proprietary method developed over many years, is something that could not be fixed through a mere "thought" or "offhand comment," and took SAP more than a year to understand that it was necessary and months more to implement it. Opp. SMSJ at 23. As SAP points out, however, the license is not limited to thoughts or offhand comments but rather distinguishes Teradata software, which SAP could only use for the purposes of the Bridge Project, and changes made to SAP software, which could be used in any SAP product under section 9.3 of the SDCA. Reply SMSJS at 10-11. As a result, SAP has the right under the agreements to use the alleged Batched Merge method in its products outside of the Bridge Project. SMSJ at 19.

Finally, the parties dispute **[**35]** whether SAP's interpretation of the SDCA contradicts the implied covenant of good faith and dealing. "In every contract there is an implied covenant that neither party shall do anything which will have the effect of destroying or injuring the right of the other party to receive the fruits of the contract, which means that in every contract." *Kirke La Shelle Co. v. Paul Armstrong Co., 263 N.Y. 79, 188 N.E. 163, 164 (1933)*. But it cannot be used "to add contract terms that contradict the unambiguous provisions of the written contracts*." Atlas Equity, Inc. v. Chase Bank USA, N.A., 403 F. App'x 190, 192 (9th Cir. 2010)*. Teradata contends that the SDCA's purpose was to develop a joint solution that connects its hardware and software with SAP Business solutions and jointly promote the solution. SDCA, Preamble. According to Teradata, "SAP's interpretation of SDCA's license provisions—that it could use what it took from Teradata to develop and sell a competing product simultaneously—would destroy these benefits." Opp. SMSJ at 24. SAP responds that Teradata's argument contradicts its intent when it entered into the SDCA. Reply SMSJ at 12. Teradata knew that SAP was not working exclusively with Teradata on updates to its MaxDB database and knew that under the SDCA, all developments of SAP products would be owned by SAP even if made by Teradata. *See* **[**36]** SDCA § 2.3 ("This Agreement is not exclusive. SAP or Partner may enter into similar agreements with other partners."); SDCA § 10.1.

Accordingly, there is no genuine dispute of fact that Teradata not only failed to protect the confidentiality of its alleged trade secrets but also that SAP has a contractual right to use the alleged Batched Merge method in its own product. SAP's motion for summary judgment on Teradata's technical trade secret claims related to the Batched Merge method are GRANTED.

4. Related Motions to Exclude Expert Testimony

Two of Teradata's motions to exclude expert testimony relate to its trade secret claims. The first is Teradata's motion to exclude ten paragraphs in the report of SAP's computer science expert Tim Kraska. Dkt. Nos. 466, 495 at 1. Teradata asserts that Kraska improperly offers opinions regarding his interpretation of the SDCA and the Mutual NDAs. *Id.* Because none of Teradata's technical trade secret claims survive, I DENY Teradata's motion to exclude portions of Kraska's testimony as moot.

The second motion relates to Teradata's business trade secrets and seeks to exclude certain paragraphs in the report of SAP's data management expert Stephen Horn. **[**37]** Dkt. No. 474 ("Horn Mot.") at 1. Horn is SAP's rebuttal expert to Teradata's damages expert, Paul Meyer. Specifically, Teradata moves to exclude Horn's opinions on whether the allegedly stolen **[*832]** Teradata confidential information includes trade secrets, whether use of the confidential information contributed to any sales of SAP HANA, whether Teradata took reasonable measures to protect its confidential information, and what examples are of "reasonable" measures taken by data management companies to protect confidential information. *Id.* (citing Dkt. No. 473-4 ("Horn Reb. Rep.") ¶¶ 19, 21, 51-57, 63-84, 97-105).

First, Teradata asserts that Horn relies in part on documents that he and SAP refuse to produce, which Horn claims show that Teradata's trade secrets were publicly available. Horn Mot. at 4; *see* Dkt. No. 473-5 ("Horn Tr.") at 74 ("Q: Did you do any investigation to see if that information was publicly available in 2011? A: Yes. Actually I was able to use some of my own folders of information . . . Q: But your materials in your folders are not cited in this report; right? A: Correct, because I wanted to keep them confidential."). Teradata seeks to exclude Horn's opinions based on **[**38]** these documents in paragraphs 63-84. SAP responds that Horn bases his opinion on materials he referenced in his report as well as publicly available documents such as articles, websites, industry reports, laws, and statutes. Dkt. No. 523 ("Horn Opp.") at 2, 9. Further, SAP points out that under the parties' stipulation (Dkt. No. 235 ¶ 3), the parties are only required to produce materials underlying the expert report rather than all materials an expert ever considered and therefore Horn is not required to produce the documents at issue. *Id.* at 10. It contends that Horn does not and will not offer any opinion based on documents that are not available to Teradata. *Id.* at 2. With this understanding, Teradata's motion to strike paragraphs 63-84 because they allegedly include Horn's opinions based on unproduced documents is DENIED. Teradata may question Horn about this issue during cross examination as it goes to the weight of his testimony, but it is not a basis for excluding the testimony.

Second, Teradata argues that I should exclude Horn's opinions that present a legal conclusion based on a fundamental misunderstanding of the law. Horn Mot. at 1. Specifically, Teradata asserts that Horn **[**39]** should not be allowed to testify to what is or is not a trade secret because his understanding of the law is incorrect and to allow his testimony would mislead the jury and confuse the issues at trial. *Id.*

Under the CUTSA, "[c]ombinations of public information from a variety of different sources when combined in a novel way can be a trade secret." *O2 Micro Int'l Ltd. v. Monolithic Power Sys., 420 F. Supp. 2d 1070, 1089-90 (N.D. Cal. 2006)*, *aff'd*, *221 Fed. Appx. 996 (Fed. Cir. 2007)*. When asked whether "information that's collected through public sources or is otherwise public, when collected together, can still be [a] trade secret," Horn testified that this standard was "totally incorrect." Dkt. No. 473-5 ("Horn. Depo.") at 24. As a result, Teradata argues that Horn should be precluded from testifying about what types of information would be considered trade secrets and that the allegedly stolen confidential Teradata information cannot be a trade secret because he purportedly found snippets of information from those documents in various public or customer-facing documents. Horn Mot. at 8.

SAP responds that Horn does not provide any legal conclusions in his report and that he is allowed to challenge the factual issue of whether or not Teradata's alleged trade secrets could be ascertained by others outside Teradata. **[**40]** Horn Opp. at 2. But as Teradata points out, Horn does offer legal opinions that Teradata's information are not trade secrets or proprietary to Teradata. *See* Horn Reb. Rep. ¶¶ 73-74, 77, 82. Horn can address the **[*833]** factual issue of whether Teradata's purported trade secret information was ascertainable to others outside of Teradata, but he cannot testify that Teradata allegedly stolen confidential information are not trade secrets. Teradata's motion to exclude Horn's legal conclusions is GRANTED.

Third, Teradata asserts that Horn's opinion that its confidential information did not lead to sales of SAP HANA is insufficiently supported because he admits that he failed to conduct any investigation of the sales. Horn Mot. at 1. SAP contends that Horn is not required to replicate Meyer's investigation and that Horn properly relied on SAP's damages expert Leonard, who examined each of the six sales for purposes of his damages analysis. Horn Opp. at 2, 16. Teradata responds that Horn does not simply rely on Leonard's opinions but endorses them by opining that they "are consistent with the commonly prevailing principles in the industry, and with [his] experience and expertise." Horn Reb. Rep. ¶¶ **[**41]** 101-02. It asserts that in the cases on which SAP relies, the "courts have been careful to either require independent investigation or to strictly limit their testimony to critiquing methodology or assumptions of an opposing expert." Horn Opp. at 7 (citing *TCL Communs. Tech. Holdings Ltd. v. Telefonaktenbologet LM Ericsson, 2016 U.S. Dist. LEXIS 194814, 2016 WL 7042085, at *5 (C.D. Cal. Aug. 17, 2016)* (holding "it is proper for [rebuttal] experts to utilize their own independent analyses and methodologies to" rebut expert opinions); *Cmty. Ass'n for Restoration of the Env't, Inc. v. Cow Palace, LLC, 80 F. Supp. 3d 1180, 1215 (E.D. Wash. 2015)* ("recogniz[ing] the limited bases for [rebuttal expert's] rebuttal opinions" given the lack of independent investigation)). Teradata's motion to exclude paragraphs 21, 99-105 of Horn's report is DENIED because Horn properly relies on Leonard's analysis, but Horn may not otherwise endorse or offer any affirmative opinions about Leonard's analysis.

Finally, Teradata argues that Horn is not qualified to opine on industry standards regarding the protection of confidential information. Horn Mot. at 1. According to Teradata, Horn has no experience drafting or developing protocols for the protection of confidential information, and therefore cannot base his opinions on what reasonable measures are taken by data management companies. *Id.* at 11. SAP responds that Horn has decades of experience implementing, **[**42]** applying, and working with confidentiality policies of data management companies and, based on that experience, has conducted a more than sufficient review to rebut Meyer's assumptions regarding the alleged confidentiality of Teradata's purported business trade secrets. Horn Opp. at 17-18. Even if Horn did not have the experience, lack of particularized expertise goes to weight rather than admissibility. Teradata's motion to exclude paragraphs 51-57 and 97 is DENIED.

B. Tying Claim

SAP moves for summary judgment on Teradata's tying claim. Before I address SAP's motion, I will address two motions to exclude expert testimony and Teradata's objections to SAP's reply evidence.

1. Motion to Exclude Asker Testimony

SAP moves to strike the opinions of Teradata's liability and damages expert, Dr. Asker. Dkt. No. 470 ("Asker Mot.") at 1. Asker opines that the relevant product market for the tying market is "core ERP products for large enterprises." Dkt. No. 468-20 ("Asker Rep.") ¶ 46. Market participants include SAP and Oracle, with Workday and Microsoft appearing as leaders of a fringe of participants. *Id.* He defines the tied market as "EDW products with OLAP capabilities for large enterprises" **[**43]** with **[*834]** market participants such as [TEXT REDACTED BY THE COURT] *Id.* ¶ 78. He opines that SAP has economically significant market power in the tying market, that SAP has caused harm to competition in the tied market, and that there are no procompetitive benefits of the alleged tie. *Id.* ¶¶ 12, 105, 171. Finally, he asserts that Teradata has lost significant profits and will experience significant future losses due to the alleged tying arrangement. *Id.* ¶¶ 181, 192.

a. Tying Product Market

SAP argues that Asker's methodology for defining the tying product market is unreliable because instead of showing cross-elasticity, Asker's primary methodology is "to interpret ordinary course documents produced in the case" and "buttress this qualitative approach with a quantitative 'aggregate diversion analysis'" of the Customer Relationship Management ("CRM") data from SAP and Oracle. Asker Mot. at 5-6; *see* Asker Rep. ¶¶ 63, 64, 70.

In a tying arrangement the seller conditions one product, the tying product, on the buyer's purchase of another product, the tied product, to extend its market power in a distinct product market. *See Cascade Health Sols. v. PeaceHealth, 515 F.3d 883, 912 (9th Cir. 2008)*. A tying arrangement is "forbidden on the theory that, if the seller has **[**44]** market power over the tying product, the seller can leverage this market power through tying arrangements to exclude other sellers of the tied product." *Id.*

i. Cross-Elasticity of Demand

First, SAP asserts that Asker's methodology is flawed because he failed to calculate the cross elasticities for demand among various ERP products. Asker Mot. at 5. As the Supreme Court has instructed, "The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. The Ninth Circuit has recognized that "[t]he principle most fundamental to product market definition is 'cross-elasticity of demand' for certain products or services. Commodities which are 'reasonably interchangeable' for the same or similar uses normally should be included in the same product market for antitrust purposes." *Kaplan v. Burroughs Corp., 611 F.2d 286, 291-92 (9th Cir. 1979)*. Cross-elasticity of demand occurs where "an increase in the price of one product leads to an increase in demand for another"; in that circumstance, "both products should be included in the relevant product market." *Olin Corp. v. F.T.C., 986 F.2d 1295, 1298 (9th Cir. 1993)*. As I have previously acknowledged, "[n]umerous cases have recognized the importance **[**45]** of cross-elasticity to determining what products should be included in or excluded from the relevant antitrust market." United Food & Com. Workers Loc. 1776 & Participating Emps. Health & Welfare Fund v. Teikoku Pharma USA, 296 F. Supp. 3d 1142, 1167 (N.D. Cal. 2017) (collecting cases).

Teradata contends that Asker was not required to measure cross-elasticity of demand, especially where, as here, it was not possible to calculate cross-elasticities. Dkt. No. 537 ("Asker Opp.") at 7. It points to three district court cases where the court relied on an expert's methodology that did not use cross-elasticities and instead used "practical indicia" as outlined by the Supreme Court in Brown Shoe to determine the boundaries of a product market. *See* Epic Games, Inc. v. Apple Inc., No. 20-CV-05640-YGR, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *85 (N.D. Cal. Sept. 10, 2021); In re Live Concert Antitrust Litig., 863 F. Supp. 2d 966, 984-86 (C.D. Cal. 2012); Nobody in Particular Presents, Inc. v. Clear Channel Commc'ns, Inc., 311 F. Supp. 2d 1048, 1082 **[*835]** (D. Colo. 2004). Teradata's reliance on these three cases, however, is misplaced.

In Epic Games, the court focused on practical indicia and not cross-elasticities when determining the submarket. Epic Games, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *85. This is proper under Brown Shoe and Ninth Circuit precedent. "In limited settings . . . the relevant product market may be narrowed beyond the boundaries of physical interchangeability and cross-price elasticity to account for identifiable submarkets or product clusters." Thurman Indus., Inc. v. Pay 'N Pak Stores, Inc., 875 F.2d 1369, 1374 (9th Cir. 1989). "The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, **[**46]** the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." Brown Shoe, 370 U.S. at 325. Here, Asker is not defining a submarket but the tying product market. He also does not address the practical indicia under Brown Shoe.[4]

In *In re Live Concert*, the court held that "while calculating the cross-elasticity of demand (and supply) is the preferred methodology, it is not an absolute requirement" and found that "it is usually necessary to consider other factors that can serve as useful surrogates for cross-elasticity data" because "it is ordinarily quite difficult to measure cross-elasticities of supply and demand accurately." In re Live Concert, 863 F. Supp. 2d at 984. Likewise, in Clear Channel, the court found "that a plaintiff may, through sufficient evidence of other indicia of market definition, define a relevant market without economic study of cross-elasticity of demand, especially when economic analysis of cross-elasticity of demand is infeasible based on pricing data." Clear Channel, 311 F. Supp. at 1082. Both courts then evaluated the sufficiency of the expert's methodology that was based on the Brown Shoe practical indicia factors. *See, e.g.*, Clear Channel, 311 F. Supp. at 1083 (finding that the expert's methodology is sufficient). **[**47]** The court in *In re Live Concert* recognized that the Ninth Circuit "has never expressly held that . . . a plaintiff's expert economist[] can define the relevant product market exclusively by reference to these 'practical indicia.'" In re Live Concert, 863 F. Supp. 2d at 985, 986. But for the purposes of the motion, it assumed that an expert economist could and found that the expert's purported market definition was "neither sufficiently reliable nor sufficiently helpful to the trier of fact to warrant admission under Rule 702" because the expert's analysis (1) fails to comport with his "chosen methodology (i.e., the "SSNIP" methodology); (2) is effectively predicated on the analysis of a single Brown Shoe factor; and (3) fails to consider the cross-elasticity of supply." Id. at 994.

[*836] Teradata contends that it was "not possible to calculate cross-elasticities" here because third parties such as Oracle, IBM, and Microsoft were not "ordered to produce the type of granular data required to calculate cross-elasticities of demand." Asker Opp. at 7. It also argues that SAP's expert, Dr. Stiroh, admits that such data is unavailable. *Id.* at 8; *see* Dkt. No. 541-33 ¶ 62 ("Econometric methods include the estimation of the cross-price

[4] During the hearing, Teradata's counsel asserted for the first time that Asker's methodology was proper because market definition can be determined based on practical indicia. Hearing Tr. at 31. Its counsel expressly identified one factor, industry or public recognition of the market, as a separate economic entity. *Id.* But the case on which Teradata relies holds that, "[t]he existence of three or four of these indicia has been held 'sufficient to delineate a submarket,'" not one. In re Live Concert Antitrust Litig., 863 F. Supp. 2d at 989. As explained in the subsequent sections, there is no evidence of three or four of these practical indicia. *See* Brown Shoe, 370 U.S. at 325 (practical indicia are "industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.").

elasticity of demand. However, I have **[**48]** not seen data in this case that can be used to reliably estimate actual lost sales and diversion ratios in response to price changes of different ERP products."). SAP responds that Teradata did not request any data from third parties that would have permitted analysis of cross-elasticity of demand. Dkt. No. 555 ("Asker Reply") at 2.

Regardless, Teradata contends that Asker does, in fact, analyze cross-elasticity of demand. Hearing Tr. at 29. According to Teradata, although Asker does not have an econometric estimation of cross-elasticity, he looks at cross-elasticity, i.e., substitutability, from a quantitative and qualitative standpoint. *Id.*

ii. Qualitative Analysis

SAP asserts that Asker's qualitative approach is unreliable because it is based on "his own subjective interpretation of ordinary course documents" and his inconsistent use of evidence. Asker Mot. at 5, 7. In particular, it criticizes Asker's definition of "core ERP" and "large enterprises" ("LEs") in his tying product market definition of "core ERP products for large enterprises," composed of SAP and Oracle. Asker Opp. at 9.

For "core ERP," SAP asserts that Asker changes its definition to fit his needs. *Id.* at 7. For example, **[**49]** Asker defines "core ERP" as products that "are identified with reference to the finance modules of ERP software." Asker Rep. ¶ 9. According to Exhibit 2 in Asker's initial report, however, only 30% of "core EP" is finance and the other 70% is human resources, procurement, R&D sales, supply chain, and travel. *See id.* at 33, Ex. 2. But Asker mainly focuses on finance when defining "core ERP." He explains that "[w]hile there are various core ERP definitions, a consistent feature of core ERP is that it includes finance." *Id.* ¶ 48. And none of SAP's three economic experts dispute Asker's relevant market definition. *See, e.g.*, Dkt. No. 532-3 ("Stiroh Depo.") at 108-09 ("Q: And you don't dispute in your report that Dr. Asker's opinion that the relevant product market for S/4HANA is limited to core ERP products; is that right? A: I don't take that on. . . . The opinions that I have in my report are not dependent on a specific definition of what is included or excluded in core ERP.").

Moreover, Asker's focus on finance in his definition of "core ERP" is supported by SAP's own witness testimony. SAP's Vice President for competitive market insights for business applications and industries testified **[**50]** that the solutions included within "core ERP" are "general ledger and some of the other financial — you know, financial close, that type of activity you start to — I'd also say that master data governance types of products are — may be considered part of digital core." Dkt. No. 530-16 ("Dover Depo.") at 30. Likewise, SAP's Senior Vice President of S/4HANA testified that when SAP decided to build S/4HANA it "obviously started in the finance area because that's the center of every ERP system." Dkt. No. 530-22 ("Grigoliet Depo.") at 24. Teradata's industry expert, Paul Pinto also opined that "large enterprises build their systems around their financial ERP, which is why it is often referred to as 'core ERP.'" Dkt. No. 528-8 ("Pinto Decl.") ¶ 31.

SAP also objects to Asker's use of applications such as "treasury management" **[*837]** "when it is expedient to do so" because it is outside his definition of core finance. Asker Mot. at 7 (citing Asker Rep. ¶ 122 (mentioning that SAP [TEXT REDACTED BY THE COURT]). The column titled "core ERP" in Exhibit 2 in Asker's report does not mention "treasury management." Asker Rep. at 33, Ex. 2. Teradata's own expert also testified that "treasury management" is **[**51]** not part of "core ERP." *See* Dkt. No. 555-3 ("Pinto Depo.") at 83 ("Q: What about cash and treasury management, would you consider that part of core ERP? A: I would not."). That said, column 1 in Exhibit 2 in Asker's report, titled "Digital Core" includes "Treasury Management" under "Core Finance." Asker Rep. at 33, Ex. 2. Asker also testified that he considered treasury management part of "core ERP." Dkt. No. 536-6 ("Asker Depo.") at 20-22 ("[T]he left-hand side column it — this is labeled . . . 'Digital Core.' It says 'Core Finance plus Enterprise Risk & Compliance, Treasury Management, Real Estate Management, Indirect Tax.' I interpret that as incorporating the articulation of "Core Finance" that's located in the middle column."). In addition, SAP's own documents include "treasury management" in its definition of "core ERP." Dkt. No. 536-12 at 69-70. As a result, contrary to SAP's assertion, Asker's definition of "core ERP" is proper.

Next, SAP argues that Asker's definition of "large enterprises" is problematic. Asker Mot. at 8. Asker defines "large enterprises" as "companies with over 1,000 or 1,500 employees and over 125 users of the ERP product"; his own sources, such as SAP's **[**52]** internal documents, show that there is no commonly accepted categorization of SAP's customers. *See, e.g.*, Asker Rep. ¶ 50 n.110-11 (SAP internal presentation defining large enterprise as "Revenue: €250 [million] + Size 250 employees"); *id.* ¶ 50 n.111 (SAP presentation defining large enterprises as companies with "over 1000, 5000, or 10K"); *id.* ¶ 38 n.84 (large enterprises: over 500 employees, $1 billion in annual revenue, and an ERP user count of over 250); *id.* ¶ 20 n.24 (large enterprise: companies with over $1 billion in revenues in North America and over $250 million or $500 million in Latin America).

Further, according to SAP, Asker testifies that there are approximately 100,000 companies in his proposed relevant market but he does not sufficiently explain why he then focuses only on documents discussing the largest 500 or 2,000 companies in the world, e.g., companies in Forbes Global 2000, Global Fortune 500, DAX stock index, and MDAX index. Asker Mot. at 8; *see* Dkt. No. 512-2 ("Asker Depo.") at 32 ("Q: And global . . . is fewer than 100,000 companies would qualify as large enterprises? A: It may be a little more than that . . . Q: So best estimate is, give or take, somewhere around **[**53]** a hundred thousand? A: [A]s I sit here today, that would be my sense, but I want to be very clear that it may be a fair bit less, it may be somewhat more."). Teradata responds that SAP mischaracterizes Asker's testimony and that he repeatedly testified that SAP does not count its own customers. Dkt. No. 536-6 ("Asker Depo.") at 30 ("I note that even in their own documents, SAP doesn't count customers; but, rather, they talk about total market opportunities). It also highlights SAP's own documents to its investors, which show that SAP relies on the Forbes Global 2000 index and the DAX stock index to assess and report its market position. *See* Dkt. No. 537-8 at 7 ("S/4 is further gaining market share, and we see positive software license growth and high double-digit cloud revenue growth. 80% of the DAX companies and 65% of the Forbes' Global 2,000 companies already rely on SAP S/4HANA.").

SAP also relies on *United States v. Oracle Corp., 331 F. Supp. 2d 1098 (N.D. Cal. 2004)* to argue that a product market limited to "large" ERP customers is improper. **[*838]** Asker Reply at 3. In *Oracle*, the court evaluated evidence after a two-week trial and rejected the plaintiffs' product market that only included products sold by Oracle, PeopleSoft, and SAP, and did not include mid-market **[**54]** products. *Oracle, 331 F. Supp. at 1158*. The court rejected the proposed product market in part because there was "no 'quantitative metric' that could be used to determine the distinction between a high function product and a mid-market product." *Id.* For example, it found that Microsoft would be a viable substitute after examining its entry into the high function product market. *Id. at 1160*. Today, however, Microsoft [TEXT REDACTED BY THE COURT] Dkt. No. 543-44 at 7. Teradata asserts that the case is therefore distinguishable because the ERP market has changed since *Oracle*, e.g., mid-market competitors that the *Oracle* court relied on have now been acquired by larger ERP vendors or disappeared from the market. Asker Opp. at 11 (citing *Oracle, 331 F. Supp. at 1159-61*).

SAP contends that the case is persuasive for rejecting a proposed product market where, as here, "there is no clear line separating those companies or the products they buy from others." Asker Reply at 3. Despite Asker's admission that there is no common definition of "large enterprises," even among SAP's own internal documents, he concludes, without further explanation, that "'large enterprises' are generally companies with over 1,000 or 1,500 employees and over 125 users of the ERP product." Asker Rep. **[**55]** ¶ 50. He bases his conclusion on two SAP documents that show that it markets different ERP products based on customer size, namely S/4HANA to large enterprises that have over 1,000 employees. *See* Dkt. No. 537-6 at 572. But he ignores the other SAP documents that indicate otherwise. As a result, Asker's limitation of the product market to "large enterprise" customers "stands on infirm ground" because Teradata "makes no other effort to reconcile Dr. Asker's distinct separate market with the broad continuum of customers and varied and flexible approach to customer size taken by the industry." Asker Reply at 3.

iii. Quantitative Analysis

More importantly, Asker's quantitative analysis, which he uses to corroborate his qualitative analysis, is flawed because contrary to his claims, Asker does not apply a "hypothetical monopolist" test ("HMT") as contemplated in the Department of Justice and the Federal Trade Commission's ("FTC") Horizontal Merger Guidelines (the

"Guidelines").[5] Asker Mot. at 9. This test asks whether a hypothetical monopolist over a group of products could profitably impose a small but significant and non-transitory increase in price ("SSNIP") of 5%; if a significant number **[**56]** of customers respond to a SSNIP by purchasing substitute products, then the SSNIP would not be profitable and the market definition must be expanded to include those substitute products. *See Saint Alphonsus Med. **[*839]** Ctr.-Nampa Inc. v. St. Luke's Health Sys., Ltd., 778 F.3d 775, 784 (9th Cir. 2015)*.

Asker states that he conducts a quantitative hypothetical monopolist test using aggregate diversion ("ADR") analysis of "Customer Relationship Management" ("CRM") data from SAP and Oracle, based on the number of times competitors are mentioned in sales representatives' sales report.[6] Asker Rep. ¶¶ 63, 64, 71. He opines that "CRM databases can be informative for market definition to the extent that they provide some information on how frequently a business encounters various potential competitors." Asker Rep. ¶ 65. But he admits that CRM data "may not always be a reliable indicator of the actual competitor faced by a company because the data is often incomplete or the salesperson may have only a limited view into competition." *Id.* He concedes that, "CRM databases may also lack detail that allow precise evaluations of specific markets" and that "this is the case in this matter, where every CRM data set [he has] examined has limitations." *Id.* As a result, he explains that he views the CRM data **[**57]** " as merely providing a way to corroborate the patterns that are present in the deposition testimony and documentary evidence on the record" and expresses caution about using the data to form conclusions. *Id.* That said, he concludes that the results of his analysis is "consistent with the deposition testimony and documentary record that is my primary foundation for concluding that SAP and Oracle are each other's primary competitors for core ERP opportunities for large enterprises. Asker Rep. ¶ 71.

SAP's expert, Stiroh, asserts that the ADR analysis is flawed because "[s]uch an analysis requires data and inputs that can be used to reliably estimate actual lost sales and diversion ratios in response to price changes of different ERP products" but such data was not available in this case. Dkt. No. 554-9 ("Stiroh Rep.") ¶ 58. Moreover, "[t]he CRM data that Asker uses to calibrate his ADR model do not show actual diversion from one company to another, do not reflect changes in purchasing patterns in response to price changes, and do not account for the competitive effects of emerging competitors and technologies or potential changes to SAP's expected competitive significance over the decade." **[**58]** *Id.* ¶ 59.

Teradata contends that ADR analysis is an accepted methodology and that disputes concerning an expert's decision about what data to use in their analysis "bear on the weight, not the admissibility, of expert testimony." *In re Qualcomm Antitrust Litig., 328 F.R.D. 280, 305 (N.D. Cal. 2018)* (collecting cases). Although courts often conclude that "'experts' decisions about what data to use' in their analysis bear on the weight, not the admissibility, of expert testimony," *id.*, ADR analysis has rarely been accepted by courts.

Teradata only cites to two district court cases that allowed an expert to use this methodology to determine a product market. Asker's ADR analysis, however, is distinguishable because the experts in those cases relied on data sets that measured a customer's response to changes in price, e.g., actual win/loss data or bidding data, when using ADR analysis. In *Federal Trade Commission v. Sysco Corp., 113 F. Supp. 3d 1 (D.D.C. 2015)*, the FTC moved to enjoin a potential merger between two food distribution companies. *Sysco, 113 F. **[*840]** Supp. 3d at 15*. FTC's

---

[5] In its opposition to SAP's motion for summary judgment, Teradata asserts that SAP's argument—"that a product market must include economic substitutes, i.e., products that would see increased demand in response to a price increase in another product"—contravenes established economic principles. Dkt. No. 542 at 30. It argues that the Guidelines "make clear that even if a significant number of customers (even two thirds) would switch to other suppliers' products in response to a price increase, that does not require their inclusion in a properly defined relevant market." *Id.* (citing Dkt. No. 543-64 ("Guidelines") § 4.1). But the Guidelines do not say this. Instead, Section 4.1 of the Guidelines make clear that although a product market need not include every competitor, it must "contain enough substitute products" to satisfy the SSNIP test. Guidelines § 4.1; *see* Dkt. No. 552 at 20.

[6] "Aggregate diversion analysis finds the threshold where a hypothetical monopolist imposing a [SSNIP] would lose enough sales ('actual loss') compared the "critical loss" such that the SSNIP would be unprofitable for the hypothetical monopolist. When the estimated actual loss due to a SSNIP is smaller than the critical loss, the candidate market is considered a relevant antitrust market." Asker Rep. ¶ 71.

expert had "calculated the actual aggregate diversion based on three different data sets" and "built a database for each company that tracked, for each bidding opportunity, the incumbent distributor, the winning distributor, and the competing bidders." *Id. at 35*. Like SAP in this case, the **[**59]** defendants had objected to the expert's methodology in part because the data on which he relied did not describe whether the two companies "lost a customer for a price-based reason or some reason having nothing to do with price." *Id. at 36*. The court expressed its hesitancy to rely on the expert's findings but concluded that "when evaluated against the record as a whole" the expert's "conclusions are more consistent with the business realities of the food distribution market than" the defendants' expert. *Id. at 37*.

Similarly, in *Federal Trade Commission v. Wilh. Wilhelmsen Holding ASA, 341 F. Supp. 3d 27 (D.D.C. 2018)*, the FTC moved to block a potential merger between two large providers of marine water treatment chemicals. *Wilh. Wilhelmsen, 341 F. Supp. 3d at 39*. FTC's expert "used three kinds of data—revenue information provided by marine suppliers, [] salesforce data, and [the providers'] win-loss data." *Id. at 57*. The court accepted the FTC expert's market definition in part because the defendants' expert did not contest that the FTC's expert's methodology was flawed, did not present any alternative calculations or HMT results, and "the gap between critical loss and aggregate diversion in every trial was so large as to ensure the stability of the HMT's qualitative result against any but the gravest of statistical errors." *Id.*

Teradata **[**60]** asserts that like both cases, Asker's methodology "confirmed the market realities evident in the record" and his findings ensured "the stability of the HMT's qualitative result against any but the gravest of statistical errors." Asker Opp. at 12 (citing Dkt. No. 468-21 ("Asker Reb. Rep.") ¶ 89) (opining that "the CRM data would have to overstate aggregate diversion by a factor of 2.5 to 3.2 for the conclusions for the aggregate diversion ratio analysis to change."). But Asker's methodology is less reliable than those of the FTC experts because unlike the FTC experts, Asker did not build a database of the type prices or rely on the price ultimately paid by the customer. *See* Asker Depo. at 66-67 ("My recollection is that the final pricing is not available in Oracle's CRM data, and my recollection is that it's not available in SAP's CRM data.); *id.* at 67 ("Q: And in instances in which a competitor is listed, neither SAP's nor Oracle's CRM data indicate the pricing offered by competitors; right? A: As I sit here today, that's my recollection of those data sets.").[7] His evaluation of CRM data did not and cannot consider pricing because the CRM data does not measure customer responses to **[**61]** changes in price. *Id.* at 68-69. As a result, Asker's ADR analysis of SAP's CRM data cannot measure the most fundamental principle in defining a market: cross-elasticity of demand.[8]

[*841] Teradata also contends that Asker conducts a robust quantitative analysis of SAP's pricing data to analyze price discrimination, which corroborates his conclusion that large enterprises form a separate market. Asker Opp. at 10. As the Guidelines state, "[t]he possibility of price discrimination influences market definition [], the measurement of market shares [], and the evaluation of competitive effects." Guidelines at 6. Teradata argues that even SAP's expert admits that there is price discrimination between large and small enterprises. *Id.* For pricing discrimination to exist there must be (1) differential pricing; and (2) limited arbitrage. Guidelines at 6. According to Teradata, Stiroh's pricing analyses [TEXT REDACTED BY THE COURT], and she does not dispute that there is limited arbitrage. Asker Rep. ¶ 79; Dkt. No. 532-3 ("Stiroh Depo.") at 109. But SAP points out that its differential pricing is unrelated to customer size. Asker Reply at 4. "Per-unit and per-user pricing confirm that SAP charges **[**62]** equivalent prices for large, mid-sized, and small companies."[9] *Id.* (citing Stiroh Rep. ¶¶ 48-57). Further, Teradata's argument

---

[7] In fact, as opposed to the "hundreds of thousands" of entries in the CRM data used by the expert in Sysco, Asker relied on fewer than 7,700 entries in SAP's CRM data because almost 85% of the data lacked any competitor information. Asker Rep. at 46, Exhibit 14; *see* *Sysco, 113 F. Supp. 3d at 35*.

[8] Teradata contends that SAP's expert, Murphy confirmed the proprietary of Asker's methodology. Asker Opp. at 3 n.9; Hearing Tr. at 29. But Asker relied on CRM data, which addresses the "relative frequency with which those firms compete for Core ERP sales opportunities," whereas Murphy confirmed the methodology of looking at "win/loss" data to indicate substitutability. Asker Opp. at 3; see Dkt. No. 530-36 ("Murphy Depo.") at 44-45. SAP also points out that Murphy does not use the CRM data to define any antitrust markets. Hearing Tr. at 56.

that Asker does not need to demonstrate that SAP currently charges higher prices of large customers and only needs to demonstrate that future price discrimination is "feasible" and "reasonably likely" undermines its argument. Asker Reply at 4. If SAP can charge higher prices to larger customers in the future because SAP negotiated different prices with customers in the past, it could also charge higher prices to small customers. *Id.* But this does not make them antitrust markets; in the absence of evidence of actual current price discrimination against large customers there is no basis to assume that future price discrimination is feasible or likely. Stiroh Rep. ¶ 57.

Asker's methodology in defining the tying market is unreliable. Contrary to Teradata's assertion, he does not measure the cross-elasticity of demand or the substitutability of products based on reliable quantitative and qualitative analyses. Because his methodology for defining the relevant tying market is unreliable, his conclusions that SAP has market power in his proposed market should also **[**63]** be excluded.

b. Tied Product Market

Asker's proposed tied market is "EDW products with OLAP capabilities for large enterprises." Asker Rep. ¶ 10. For the same reasons as above, SAP objects to this definition; his qualitative analysis fails to consider the appropriate universe of documents and his quantitative analysis is not a result of any reliable methodology. Asker Mot. at 14.

First, SAP asserts that Asker fails to consider all of the relevant documents when determining the tied market. *Id.* For example, Asker excludes an EDW vendor Snowflake from the market because he found it did not compete for EDW use cases for large enterprises. Asker Rep. ¶ 91. But Teradata's documents show that Snowflake was one of Teradata's primary competitors, if not the largest competitor, in 2019. *See* Dkt. No. 468-22 at 8-9 [TEXT REDACTED BY THE COURT] ; Dkt. No. 468-23 at 4, 5-7 [TEXT REDACTED BY THE COURT]. **[*842]** But to claim that Asker ignored evidence regarding Snowflake is incorrect. Teradata responds that this one document is contrary to the testimony of SAP's competitive intelligence team and SAP documents which characterize Snowflake as a [TEXT REDACTED BY THE COURT] Opp. Asker at 17 (citing Dkt. No. 536-10 **[**64]** at 548; Dkt. No. 530-46 at 147-48 [TEXT REDACTED BY THE COURT]. Asker also analyzed the CRM data himself and recognized that Snowflake was not a significant competitor. Asker Depo. at 97-100.

SAP also asserts that Asker's conclusion that SAP's HANA is in his tied market is inconsistent with Teradata's own admissions. *Id.* at 15. Its Senior Vice President of Global Marketing, Chris Twogood, testified that Teradata does not compete frequently against HANA for sales of EDW because HANA was not "designed to be an enterprise data warehouse," and Teradata does not consider SAP to be a primary competitor in the EDW space. Dkt. No. 468-17 ("Twogood Depo.") at 20-22. Teradata points out that Twogood clarified, however, that once SAP tied HANA to S/4HANA, SAP was able to "leverage[] all their ERP customers to grow market share." Dkt. No. 543-38 ("Twogood Depo.") at 312, 315-16. But Twogood's testimony describes HANA being used as a transactional database under SAP ERP applications and S/4HANA, not as an EDW. Twogood Depo. at 314-15 ("[T]hey weren't successful with HANA only or HANA alone in the marketplace. So they bundled it in with their ERP solution and to really ride a leverage for (verbatim) **[**65]** install base and force people to the HANA platform.").

Teradata also emphasizes that SAP omits the testimony of Teradata witnesses and ordinary course documents identifying SAP as a key EDW competitor. *See, e.g.*, Dkt. No. 530-9 ("Boerger Depo.") at 303 ("IBM, Oracle, and SAP HANA compete for large enterprise data warehousing types of customers"); Dkt. No. 543-26 ("Lea Depo.") at 59 ("Q: Who are the primary competitors to Teradata Vantage, based on your experience today, with large enough customers looking for an EDW solution? A: It is more our traditional vendors, Oracle, IBM with Netezza and with

---

[9] SAP points out that in his initial report, Asker also analyzes "per-unit prices" for large customers, based on the "'size' of installation (number of users)," and concludes that they vary. *See* Asker Rep. ¶ 76; *id.*, Ex. 7. Stiroh responded that the per user prices paid by small and mid-sized customers also vary, but tend to be higher than those paid by large customers, and therefore there is no evidence of price discrimination against large customers. Stiroh Rep. ¶¶ 51-57. In his reply report, Asker criticizes Dr. Stiroh for using "per-user" prices and claims that the appropriate measure is "total spend." Asker Reb. Rep. ¶ 77. According to SAP, "neither Dr. Asker nor Teradata explain this flip-flop." Asker Reply at 5.

Db2, and HANA"); Dkt. No. 543-37 ("Susag Depo.") at 20 ("Q: Who do you consider to be Teradata's main competitors in the enterprise data warehouse space? A: IBM, Oracle, SAP, Microsoft at the lower end of the enterprise data warehouse space."). As a result, Asker's conclusions are not inconsistent with Teradata's own admissions.[10]

Asker's methodology is once again unreliable because he conducts an ADR analysis on CRM data. Asker Rep. ¶ 95. His methodology is further problematic because it is inconsistent with his methodology when defining the relevant ERP market. Asker Reply at 8. For the ERP **[**66]** market, Asker applied his ADR analysis to determine the minimum number of market participants and concluded that the relevant market consisted of only Oracle and SAP. *Id.* But under this same approach, the tied market would have excluded SAP and therefore Asker included more than the minimum number of participants to bring SAP into the market definition. As a result, and for the same reasons above, Asker's testimony regarding the tied market **[*843]** should be excluded as unreliable and unhelpful to a jury.[11]

c. Alleged Harm to Competition and Benefits of Tie

Finally, SAP opposes Asker's claims that its alleged conduct caused harm to competition in his proposed tied market because it lacks support in the record and is based on a series of unwarranted assumptions. Asker Mot. at 16. Asker's opinion is the following: "In this case, the data and documents indicate that SAP's tie is causing sales of HAMA that otherwise would not have occurred. That is, SAP's conduct distorts purchasers' choices of EDW products, which harms purchasers and competitors competing for those sales." Asker Rep. ¶ 12.

First, SAP asserts that Asker presents no evidence of harm to competition. *Id.* Notably, he has not analyzed **[**67]** the impact of SAP's alleged conduct on the major competitors in his purported market for EDW products with OLAP capabilities. *Id.* at 17. He ignores the issue of harm to competition generally. He does not dispute that Oracle accounts for [TEXT REDACTED BY THE COURT] of database sales. Microsoft accounts for about [TEXT REDACTED BY THE COURT], IBM accounts for [TEXT REDACTED BY THE COURT], and Amazon accounts for [TEXT REDACTED BY THE COURT] Asker Reply at 10. In other words, despite the undisputed fact that Asker Mot. at 17.

Teradata responds that Asker is not required to quantify damages for every participant in the relevant market in order to opine that there are anticompetitive effects due to the tie. Asker Opp. at 21-22. It points to SAP's own economist, Murphy, who admits that database vendors like Oracle and IBM are losing sales for database products that include OLAP/EDW capabilities as a result of SAP's tie and that SAP's licensing restrictions have an anticompetitive effect, as they reduce customers' demand for using Teradata. Dkt. No. 530-36 ("Murphy Depo.") at 145-46; Dkt. No. 541-31 ("Murphy Rep.") ¶ 224. But Murphy's statement concerned transactional databases, not products **[**68]** that include OLAP/EDW capabilities. Asker Reply at 11.

Teradata asserts that "Tying arrangements are forbidden on the theory that, if the seller has market power over the tying product, the seller can leverage this market power through tying arrangements to exclude other sellers of the tied product." *Cascade Health Sols. v. PeaceHealth, 515 F.3d 883, 912 (9th Cir. 2008)*. It argues that "the injury

---

[10] Further, Teradata asserts that SAP's contention that HANA does not compete with Teradata contradicts its prior statements. Hearing Tr. at 38-39; see, e.g., Dkt. No. 543-54 at 367 (a technical textbook explaining to customers how to use HANA as an EDW). SAP responds that the relevant question is not whether SAP tried to sell HANA as an EDW but whether customers purchase and use HANA for this purpose. It asserts that Asker's "false assumption that, because SAP tried to market SAP as an EDW, customers necessarily use it as an EDW, runs throughout Asker's EDW-related opinions and renders them unreliable." Reply at 8.

[11] Teradata cites two internal SAP documents but neither suggests Dr. Asker's proposed market is properly limited to just SAP and one competitor. Asker Reply at 20; *see, e.g.*, Dkt. 539-5 at 688-90 (concerns cloud competition and shows that while SAP considers Oracle its "main" competitor, it also loses business to Microsoft and Workday); Dkt. 543-44 at 7 (includes additional competitors like Infor, Sage, and Microsoft on the slide).

caused by an unlawful tying arrangement is 'whether a total amount of business, substantial enough in terms of dollar-volume so as not to be merely *de minimis*, is foreclosed to competitors by the tie.'" Datagate, Inc. v. Hewlett-Packard Co., 60 F.3d 1421, 1425 (9th Cir. 1995) (internal citations omitted). For example, Asker relies on SAP revenue data [TEXT REDACTED BY THE COURT] as evidence of a distortion due to a tie and "not simply the result of competition on the merits. Asker Rep. ¶¶ 145,147. Asker reviewed evidence that also showed that customers are not allowed "to use S/4HANA and a third-party EDW without also purchasing HANA. In particular, the customer must still purchase the 'full use' HANA license in order for it to use a competing third-party EDW." *Id.* ¶ 158. He opined: "If a condition of purchasing a product is the simultaneous purchase of a product of a competitor, economic reasoning indicates that the **[*844]** product's competitive **[**69]** position is weakened." *Id.* Teradata therefore argues that Asker's opinions about the alleged harm to competition are proper.

There needs to be a showing of "substantial" harm; de minimis harm is not enough under rule of reason analysis.[12] *See* Qualcomm, 969 F.3d at 991 (Under § 1, "the plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market."). Asker failed to show this; he presented no evidence of harm.

In addition, SAP asserts that Asker relies on a series of unwarranted assumptions, specifically that because HANA has OLAP capabilities, it is necessarily always sold as an EDW. Asker Reb. Rep. ¶ 127. When HANA is "sold together with S/4HANA, [it] is almost always bundled with S/4HANA under a runtime license," which precludes use of HANA as an EDW. SMSJ at 28. With a runtime license, HANA can be used only to support the SAP application running on top of it; in other words HANA is the transactional database that supports the application, S/4HANA. Stiroh Decl. ¶ 176. It cannot be an EDW, as defined by Teradata, because it does not bring data from multiple sources across an enterprise and then use sophisticated **[**70]** analytics tools to conduct analysis of that combined data. *See* SAC ¶ 16.

Teradata does not dispute that approximately 88% of SAP's customers have purchased HANA with a runtime license. SMSJ at 29. And it does not present any evidence that a single customer has taken S/4HANA together with HANA pursuant to a full use license and used that HANA installation as an EDW. *Id.* Teradata does not provide any instance where a customer who used Teradata Database replaced it with HANA for the same purpose. Because these undisputed facts render Asker's opinion unreasonable and because Teradata's opposition is based on an incorrect legal standard, SAP's motion to exclude portions of Asker's opinions related to alleged harm to competition is GRANTED.

SAP also objects to Asker's opinions that HANA's adoption is not being driven by any procompetitive benefits of the alleged tie. Asker Mot. at 4. According to SAP, Asker lacks the expertise necessary to evaluate evidence of the design benefits of S/4HANA and admits that he did not understand much of the relevant evidence. *Id.; see* Asker Rep. ¶ 171 ("I do not have the expertise to evaluate whether there is a technical benefit from combining S/4HANA with **[**71]** HANA."). Teradata responds that Asker is not opining that there are no technical benefits for the integration of S/4HANA and HANA but rather that the "documentary and deposition evidence indicates that there is no technical reason for the tie and that the decision to tie was made by SAP's board of directors on business grounds." Asker Opp. at 22-23. SAP replies that this distinction is nonsensical because if S/4HANA is designed to work with HANA such that S/4HANA "is wholly incompatible with other transactional databases" as Teradata alleges, then this is the technical reason why customers must license S/4HANA and HANA together. Asker Reply at 12.

Teradata asserts that no SAP witness or expert has provided a technical justification—or any justification—for tying S/3HANA to HANA's analytical capabilities.[13] Asker is qualified to assess the **[*845]** economic realities of SAP's

---

[12] *See infra* Part I.B.4.a for discussion on the application of either the rule of reason or per se analysis to this case.

[13] The reason for this lack of evidence, however, is Teradata's allegation of a new tying theory during the summary judgment briefmg. *See infra* Part I.B.3.

business decisions to tie S/4HANA to the OLAP capabilities of HANA. Asker Depo. at 226. His testimony related to the alleged lack of procompetitive benefits should not be excluded.[14]

2. Motion to Exclude Mehrotra Testimony

Teradata's moved to exclude three out of four of SAP's expert, Dr. Sharad Mehrotra's opinions **[**72]** in sections VI and VII of his report, which rebut the opinions of Teradata's technical expert Hosagrahar Jagadish: (1) that SAP could achieve significant benefits by designing S/4HANA for its HANA database product; (2) that SAP could not have achieved these same or similar benefits by designing S/4HANA to run on other databases; and (3) that "porting" S/4HANA to third-party databases would be challenging. Dkt. No. 472 ("Mehrotra Mot.") at 1. It contends that Mehrotra lacks the necessary factual foundation for these opinions and that he did not follow any reliable methodology in reaching them. *Id.* It argues that Mehrotra never reviewed any of the source code for S/4HANA or HANA, has never used or examined the products, has never used or examined the third-party database products he compares to HANA, disregarded testimony from SAP executives, and relies on cherry-picked documents for sweeping conclusions. *Id.* at 2. SAP responds that Mehrotra's methodology is reliable, and that the rest of Teradata's arguments go to the weight and not the admissibility of evidence. Dkt. No. 533 ("Mehrotra Opp.") at 1.

First, Teradata argues that Mehrotra's opinion in section VI of his report—that SAP was **[**73]** able to realize multiple technical and practical benefits by designing S/4HANA to work closely with HANA—should be excluded because it is unsupported and unreliable. Mehrotra Mot. at 2. Mehrotra admits that he has never used or even examined the S/4HANA or HANA software, any SAP ERP applications, or source code. Dkt. No. 483-4 ("Mehrotra Depo.") at 42-44 ("Q: Have you ever used S/4 Hana? A: Personally, no . . . Q: Have you ever used any part of SAP's Business Suite? A: No, I have not. Q: Have you ever used SAP's HANA database? A: I have personally not used SAP HANA database. It's not an open source database. So it's not free."). When asked whether he had ever used any SAP ERP software, he responded, "No. I am an academic. We normally do not deal with the operational aspect of the problem, so where companies sort of run these things." *Id.* at 43-44. Teradata contends that SAP "is silent on the issue" and "cites no case where an expert was allowed to opine on the design, capabilities, performance, and compatibility of products without ever having even looked at them." Dkt. No. 551-4 ("Mehrotra Reply") at 1.

SAP does not respond directly to the argument that Mehrotra did not use any of **[**74]** the SAP products. It does assert, however, that Mehrotra reviewed the architecture and design of S/4HANA, relying on a series of 28 architectural guidelines of all of the versions starting with the first in May 2014 through March 2019. Mehrotra Opp. at 18. It also asserts that it was unfeasible and not useful for Mehrotra to review all 300 million lines of source code. *Id.* at 10. Teradata responds that the argument that Mehrotra "cannot look at everything does not mean it is proper to look at little to nothing" and at the very least, he "should have identified some representative queries in S/4HANA that would require porting **[*846]** to third-party database." Mehrotra Reply at 1.

Mehrotra did not have to review the source code because he reviewed the architecture and design of S/4HANA instead. Mehrotra Depo. at 147. For example, he stated that he is "intimately aware" of the "architectural aspects of things, but [] not [as] aware of the exact software implementation." *Id.* But he testified that source code is simply "one aspect of the system analysis" and that he understood "the system and its properties" by the architectural diagrams. *Id.* SAP contends that reviewing S/4HANA and HANA at a design **[**75]** and architectural level is "a common and accepted method of software analysis," as evidenced by the academic and expert works that Mehrotra cites in Appendix B of his report, which "rely on exactly this architectural level of analysis." Mehrotra Opp. at 11 (citing Dkt. No. 483-3 ("Mehrotra Rep."), Appendix B). Teradata responds that SAP does not point to any specific methodologies that are supposedly found in any of these works. Mehrotra Reply at 2. It asserts that "[t]he reality is that the cited works provide only general software background, not any methodology for the sort of software analysis required in this case." *Id.* SAP also, however, contends that Mehrotra's reliance on the

---

[14] Because Teradata's tying claim fails, *see infra* Part I.B.4, I will not address SAP's motion to exclude Asker's analysis of lost profits due to the alleged tying arrangement.

architecture and design of S/4HANA is proper as evidenced by Teradata's expert Jagadish also relying on architecture-level analyses. Mehrotra Opp. at 11 (citing Dkt. No. 531-21 ("Jagadish Rep.") ns. 290-92,306,319-33,336,341-45,357-60,365-70). Teradata does not respond to this argument.[15]

The following cases provide a helpful analysis of whether Mehrotra's approach is proper. Teradata relies on a Seventh Circuit case in support of its argument that Mehrotra's approach is flawed, but the case is **[**76]** distinguishable. In *Autotech Tech. Ltd. P 'ship v. Automationdirect.com, 471 F.3d 745 (7th Cir. 2006)*, an expert testified "[biased on his 26 years of experience in software development, review of the EZTouch software, and review of advertisements about C—More . . . that the features of C—More could not be developed independently of EZTouch" but he had "never conducted tests on the product." *Autotech, 471 F.3d at 749*. The Seventh Circuit affirmed the district court's decision that this methodology was unreliable because "computer experts must do more than read advertisements." *Id.* The court held that "[t]o qualify as an expert on software, an expert should, at a minimum, examine the product and software upon which the expert bases his opinion." *Id.* In this case, while Mehrotra did not use the product or examine the source code, he reviewed the architecture and design of S/4HANA over the course of five years.

Iconics, Inc. v. Massaro, 266 F. Supp. 3d 461 (D. Mass. 2017) is more factually analogous to the case here. In *Iconics*, the court declined to exclude the expert's testimony regarding the "core architecture" of the software products, which was based on "three architectural diagrams," even though the expert failed to inspect the software code or review technical documents. *Iconics, 266 F. Supp. at 470*. The court held that because the expert "illuminates aspects of the core architecture **[**77]** trade secret" any challenge went to the **[*847]** credibility of the testimony and not admissibility. *Id.* Teradata contends that *Iconics* is distinguishable because there the expert relied on the same architecture documents that the plaintiff cited to whereas here Mehrotra relies on "hand-selected" documents by SAP's counsel and not Teradata's materials. Mehrotra Mot. at 4-5. But in *Iconics* the product at issue belonged to the plaintiff whereas here the S/4HANA product belongs to SAP. It is unclear why it is improper for Mehrotra to rely on technical documents from SAP itself when reviewing its product. Mehrotra Opp. at 18. As the *Iconics* court held, "[r]egardless of the benefits of any alternative approaches," for example those found in Jagadish's report, Mehrotra's opinion is sufficiently reliable. *Iconics, 266 F. Supp. at 470*. "Any questions on the comparative weight or credibility of these two analyses are questions for a jury to resolve." *Id.*

As for Teradata's other objections—"that Mehrotra could not identify with sufficient specificity the academic literature he relied on, did not cite to the particular documents that Teradata thinks he should have, and did not interview the individuals that Teradata thinks he should have"—all go to the **[**78]** weight of his testimony are not grounds for excluding his opinions. Mehrotra Opp. at 16; *In re Korean Ramen Antitrust Litig., 281 F. Supp. 3d 892, 931 (N.D. Cal. 2017)* (holding that an expert's failure to "address (or review) deposition testimony where defendants' employees testified to matters that purportedly undermine some of his opinions or assumptions does not make his testimony excludable. Those are grounds for cross-examination."). For example, Teradata asserts that Mehrotra's opinions are flawed in part because he did not interview the SAP employees that Rudolf Hois spoke with in preparation for his 30(b)(6) deposition. Mehrotra Mot. at 4. SAP responds that Mehrotra did not have to speak with the individuals that Hois spoke with because Hois's experience is in the area of ERP applications whereas Mehrotra's experience is in databases. Mehrotra Opp. at 23. SAP also points out that Mehrotra had the deposition transcripts of Hois and other SAP employees related to the interface of S/4HANA with HANA. *Id.* (citing Mehrotra Rep., Appendix B). Its argument is well-taken: Teradata's motion to exclude Section VI of Mehrotra's expert report is DENIED.

Finally, Teradata moves to exclude section VII of Mehrotra's report which opines that SAP could not have realized **[**79]** the same benefits by designing S/4 for multiple databases and that porting S/4HANA to another database would be challenging and unpredictable because it is unsupported and unreliable. Mehrotra Mot. at 8.

---

[15] Teradata does assert that unlike Mehrotra, Jagadish examined the source code and software. Mehrotra Mot. at 10. SAP responds that nowhere in the sections of Jagadish's report, to which Mehrotra responds, does Jagadish refer to S/4HANA source code. Mehrotra Opp. at 13-14. Instead, Jagadish discusses the source code only in relation to trade secrets. *Compare* Jagadish Rep. § X.0 I 247-75 (discussing trade secrets) *with* Jagadish Rep. § X.E ¶¶336-77 (discussing antitrust opinions).

Teradata asserts that in support of his opinions, Mehrotra could and should have reviewed some of the analytical queries in S/4HANA in order to provide at least one specific example of a query that purportedly requires the use of HANA, and not another database. Mehrotra Reply at 5-6.

SAP contends that it is unclear how Mehrotra was supposed to do this or what purpose it would serve. Mehrotra Opp. at 14. Mehrotra and Jagadish do not dispute that [TEXT REDACTED BY THE COURT] *Id.* at 7; Mehrotra Reply at 5. But [TEXT REDACTED BY THE COURT] Mehrotra Opp. at 14 (citing Dkt. No. 531-8 ("Hois Depo.") at 14-16,70-74. [TEXT REDACTED BY THE COURT] Mehrotra Depo at 131-32. SAP points out that review of this code is unnecessary because both Jagadish and Mehrotra agree that the key issue is not how much code must be ported to another database but how difficult it would be. Mehrotra Opp. at 16 (citing Mehrotra Depo. at 186-88; Dkt. No. 531-14 ("Jagadish Depo.") at 227).

To determine how difficult porting **[**80]** would be, Mehrotra relies on "SAP's past experience porting Business Suite optimizations to Oracle and IBM databases, the **[*848]** more integrated design and architecture of S/4HANA on HANA compared to Business Suite on HANA, and the differences in the architectures and technologies of other databases" such as those of Oracle and IBM, to conclude that trying to port S/4HANA to a database other than HANA would be difficult, time-consuming, and unpredictable. Mehrotra Opp. at 7 (citing Mehrotra Rep. ¶¶ 177-98). Teradata objects to Mehrotra's reliance on SAP documents and testimony, arguing that SAP's counsel "cherry-picked" these documents for him Mehrotra Reply at 7. But Teradata "provides no basis for its insinuation that the SAP documents upon which Dr. Mehrotra relied are in any way biased." Mehrotra Opp. at 18. Mehrotra explained that he relied primarily on technical documents, not marketing documents. Mehrotra Depo. at 153-54, 156-57. Teradata responds that SAP's technical documents "can be biased or inaccurate" but such arguments go to weight and not admissibility of the opinions.

Teradata also asserts that Mehrotra's analysis is flawed because he improperly relied on "SAP's alleged experience **[**81]** porting its prior ERP applications (not S/4HANA) to databases prior to 2015 (not databases that exist today or even in the last five years)." *Id.* (citing Mehrotra Rep. ¶¶ 168, 177-78). Mehrotra admits that he has not used IBM's or Oracle's database software since 2006 and 1998 respectively and that he has not examined the current database products. Mehrotra Depo. at 44, 45, 47. According to Teradata, he also misunderstood capabilities of these third-party databases, e.g., misstating that HANA [TEXT REDACTED BY THE COURT] and wrongly assuming that IBM and Oracle's products were released after the development of S/4HANA. Mehrotra Rep. ¶ 9.c. SAP responds that Mehrotra correctly testified about the dates on which the IBM and Oracle databases were released because it is undisputed that Oracle did not release its database until six months after SAP began development of S/4HANA. Mehrotra Opp. at 20. Although IBM released a version of its database in the summer of 2013, Mehrotra relied on SAP documents that explained that [TEXT REDACTED BY THE COURT] . *Id.* at 21. Teradata makes the same objection that I rejected above—that this "is not Mehrotra's conclusion but SAP's allegation. parroted **[**82]** from SAP documents selected by SAP's counsel." Mehrotra Reply at 12. It also points out that Mehrotra failed to reconcile this allegation with results of [TEXT REDACTED BY THE COURT] as noted in Jagadish's opening report. *Id.* (citing Jagadish Rep. I 342, 372). But again, Mehrotra's failure to consider contrary evidence goes to weight and not admissibility. Teradata's motion to exclude portions of Mehrotra's expert report is therefore DENIED.

3. Teradata's Objections to SAP's Reply Evidence

The final preliminary matter I must address is Teradata's objections to SAP's reply evidence, namely its declaration of Rudolph Hois, Dkt. No. 552-1 ("Hois Declaration"). Dkt. No. 568-4 at 1. Teradata asserts that I should strike the declaration because it is impermissible and highly prejudicial. *Id.* The Hois Declaration concerns a key issue underlying Teradata's theory—that SAP's requirement that S/4HANA customers license HANA's analytical capabilities violates federal ***antitrust law***. *Id.* Teradata argues that even if it were true that SAP first heard of this theory from Asker's reply report, as it claims, SAP should have submitted the Hois declaration with its motion, a full month after Asker's reply **[**83]** report. *Id.* Instead, it asserts that SAP improperly waited until its reply brief to submit the evidence. *Id.*

SAP responds that the Hois Declaration was necessary because it was not aware **[*849]** of Teradata's new theory until its opposition to SAP's summary judgment motion. Dkt. No. 585 at 1. There, Teradata abandoned the tying theory pleaded in its complaint and asserted a new one, after the close of fact discovery. Dkt. No. 585 at 1. In the SAC, Teradata alleged that SAP tied S/4HANA to HANA by making it "wholly incompatible with other transactional databases," forcing customers that purchase S/4HANA to also adopt HANA. SAC ¶¶ 89, 132. But in SAP's summary judgment motion, SAP showed how it and other leading vendors achieved procompetitive benefits by integrating their ERP applications with their databases. Dkt. No. 585 at 1. Then, in its opposition, Teradata argued that the tie was different; it was between S/4HANA and HANA's analytical capabilities, which offer EDW functions. Dkt. No. 542 at 26. As a result, the mechanism at issue is no longer a technological incompatibility but licensing terms that SAP allegedly forces upon its customers. *Id.* at 31. Teradata asserts that SAP has failed **[**84]** to show procompetitive justifications for the licensing practices that tie S/4HANA to HANA's analytical capacities. *Id.* at 27.

In support of its argument that Teradata changed its tying theory, SAP points to Asker's opening expert report that expressly and repeatedly defined the "tied product" to mean HANA, not its analytical capabilities. Asker Rep. ¶¶ 5-6, 35. But in his reply report, Asker suggests that SAP should have to justify the tie of S/4HANA to the EDW capabilities of its HANA database. Asker Reb. Rep. ¶ 4. SAP contends that "this shift did not put SAP on notice that Teradata had changed its legal theory regarding the alleged tie" and therefore it did not file the Hois Declaration with its summary judgment motion. Dkt. No. 585 at 2.

Teradata maintains that its theory has not changed. It emphasizes paragraph 95 of the SAC, which states:

> "SAP's Top-Tier ERP Applications customers were free to choose how to manage their data needs, those locked-in customers will now be forced to adopt HANA. Given the costs of licensing, implementing, and maintaining EDAW products, the vast majority of large-scale customers will have no choice but to abandon their prior EDAW providers because they **[**85]** cannot support dual EDAW providers. Thus, because *HANA purports to offer some or all of the functionality offered by Teradata*, SAP is effectively coercing its customers into leaving Teradata and adopting the full stack of SAP products (including HANA)."

Dkt. No. 599 (quoting SAC ¶ 95) at 1. Teradata explains that throughout its complaint, the "functionality offered by Teradata" that HANA purports to offer to replace Teradata's products is HANA's *analytical* (or EDAW) functionality. *Id.*; *see, e.g.*, SAC ¶ 45 (HANA purports to provide "EDAW functionality that SAP claims can enable enterprise analytics similar to those offered by Teradata" and "[t]hus, with HANA . . . SAP now positions itself as a direct competitor in the EDAW market"). It contends that it has never alleged that HANA's transactional functionality competes with EDAW products. Dkt. No. 467 at 4.

Teradata's arguments do not address SAP's point—that Teradata initially challenged the technological integration of the ERP application and HANA, not the licensing practice. Teradata asserts that its allegation that SAP's "sales practice" is "directly contrary to the practices of other ERP applications" is regarding its licensing. But **[**86]** in actuality, the alleged "sales practice" in the SAC does not refer to **[*850]** licensing but a design change, i.e., "tying upgrades of customers' ERP Applications to customers' adoption of HANA (while ending support for older versions of ERP Applications)." SAC ¶ 58. Furthermore, references to "licensing" in the SAC concern the exit fee, not the licensing of HANA's analytical capabilities. *See, e.g.*, SAC ¶ 90 ("SAP's licensing agreements further restrict the ability of customers to read and copy S/4HANA ERP data to any other database); *id.* ¶ 151 ("This rate will only rise more rapidly as more customers upgrade to S/4HANA and are foreclosed from either licensing alternative EDAW products or accessing their SAP ERP data for use with Teradata's EDAW products.").

Teradata also claims that Hois Declaration contradicts his deposition as a corporate witness and should be struck as undisclosed expert testimony. Dkt. No. 568-4 at 3-5. It asserts that in his declaration, Hois explains HANA's capabilities as unique and opines about the comparisons between HANA and other databases. Hois Decl. ¶¶ 4-6. But during his deposition he repeatedly claimed that he lacked the requisite knowledge or expertise to **[**87]** compare the databases and deferred to other experts. Dkt. No. 568-6 ("Hois Depo.") at 64; Dkt. No. 568-8 ("Hois Depo.") at 12, 14, 18. In the his declaration, however, Hois is not comparing databases; instead, he explains a feature of Oracle databases in a manner that is consistent with his deposition testimony. *Compare* Hois Decl. ¶ 6 *with* Hois Depo. at 34-35. Moreover, Hois's high-level opinions are based on his personal knowledge and therefore are proper. Hois Decl. ¶¶ 2-3.

SAP contends that "Teradata cannot oppose summary judgment on the basis of an unpled, and prejudicially-late change in theory." Dkt. No. 552 at 13 (citing *Navajo Nation v. U.S. Forest Serv., 535 F.3d 1058, 1080 (9th Cir. 2008)* ("where . . . the complaint does not include the necessary factual allegations . . . raising such a claim in a summary judgment motion is insufficient to present the claim to the district court")). I agree. The Hois Declaration is proper, even though it is new evidence, as a "reasonable response to the opposition." *Hodges v. Hertz Corp., 351 F. Supp. 3d 1227, 1249 (N.D. Cal. 2018)*.

4. Motion for Summary Judgment

I will now turn to SAP's motion for summary judgment on Teradata's tying claim. To state a sufficient tying claim under *Section 1 of the Sherman Act*, Teradata must prove: (1) a contract, combination or conspiracy among two or more persons **[**88]** or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce []; (3) which actually injures competition." *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008)*.

a. Per Se or Rule of Reason Analysis

The first dispute between the parties is whether the per se rule or rule of reason test applies in this case. To determine whether a practice unreasonably restrains trade, courts sometimes apply a "rule of reason" analysis. *Bhan v. NME Hosps., Inc., 929 F.2d 1404, 1410 (9th Cir. 1991)*. Under the rule of reason test, courts "analyze the degree of harm to competition along with any justifications or pro-competitive effects to determine whether the practice is unreasonable on balance. The focus is on the actual effects that the challenged restraint has had on competition in a relevant market." *Id.* "Some practices, however, are so likely to interfere with competition that they violate the *Sherman Act* per se. In these cases, [courts] do not require evidence of any actual effects on competition because [they] consider the potential for harm to **[*851]** be so clear and so great." *Id.* Under the per se test, Teradata must prove: (1) that the defendant tied together the sale of two distinct products or services; (2) that the defendant possesses enough economic power in the tying **[**89]** product market to coerce its customers into purchasing the tied product; and (3) that the tying arrangement affects a "not insubstantial volume of commerce" in the tied product market. *Cascade Health, 515 F.3d at 913*.

"Restraints that are not unreasonable per se are judged under the 'rule of reason.'" *Fed. Trade Comm'n v. Qualcomm Inc., 969 F.3d 974, 989 (9th Cir. 2020)*. "[N]ovel business practices—especially in technology markets—should not be conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use." *Id. at 990-91* (internal quotation marks omitted). "Because innovation involves new products and business practices, courts['] and economists' initial understanding of these practices will skew initial likelihoods that innovation is anticompetitive and the proper subject of antitrust scrutiny." *Id. at 991*. In this case, the rule of reason applies because this is not a case that "has so little redeeming virtue, and that there would be so very little loss to society from its ban, that an inquiry into its costs in the individual case [can be] considered [] unnecessary." *United States v. Microsoft Corp., 253 F.3d 34, 94, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (internal quotation marks and citations omitted).

Contrary to Teradata's argument, there are procompetitive justifications from SAP's **[**90]** design of S/4HANA to run on HANA rather than on multiple databases. Reply SMSJ at 14. For example, under Teradata's original theory, SAP's expert, Mehrotra, explains how SAP achieved efficiency gains such as improved performance and functionality with S/4HANA by designing it for only HANA. Mehrotra Rep. ¶¶ 138-98. Under its new theory, Teradata implies that there is no reason SAP could not separately license HANA's analytical capabilities, SMSJ Opp. at 35, but SAP explains that unlike Oracle and Microsoft, SAP lacks the ability to license analytical and transactional functionalities separately because they operate on the same set of data and are intertwined. Hois Decl. ¶¶ 5-6. It asserts that SAP "achieved procompetitive benefits by designing S/4HANA to run on all of HANA, including its analytical capabilities." SMSJ Reply at 15. That Teradata contends that the design of S/4HANA has no efficiency gains is irrelevant to the question of whether the rule of reason applies. Instead, these "purported efficiencies suggest that judicial 'experience' provides little basis for believing that" SAP's S/4HANA "lacked any redeeming virtue and therefore should be presumed unreasonable." *Microsoft, 253 F.3d at 90-91*. Rule of **[**91]** reason applies in this case.

b. Failure to Properly Define a Tied or Tying Market

That said, under either test, Teradata's tying claim fails. As established above, because Teradata has failed to properly define a tied market, there is no triable issue of fact whether the alleged tying arrangement harmed competition in the tied market under the rule of reason analysis. Likewise, because Teradata has failed to properly define a tying market, there is no triable issue of fact whether SAP has market power in a properly-defined tying market. *See* *Truck-Rail Handling Inc. v. BNSF Ry. Co., 2005 U.S. Dist. LEXIS 61300, 2005 WL 8178364, at *8 (N.D. Cal. Mar. 8, 2005)* (granting defendants' motion for summary judgment on market definition because plaintiff's evidence did not "assist in evaluating cross-elasticity of supply and demand").

[*852] Teradata contends that the issue of market definition should be decided by a jury. Opp. SMSJ at 32; *see* *High Tech. Careers v. San Jose Mercury News, 996 F.2d 987, 990 (9th Cir. 1993)* ("The process of defining the relevant market is a factual inquiry for the jury."). But where there is an absence of evidence to support Teradata's claim that SAP competes in the purported tying or tied market, summary judgment is appropriate. In *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421 (9th Cir. 1995)*, the Ninth Circuit acknowledged "that the definition of the relevant market is a factual inquiry for the jury, and the court may not **[**92]** weigh evidence or judge witness credibility." *Rebel Oil, 996 F.2d at 1435*. It held, however, "that an issue is factual does not necessarily preclude summary judgment. If the moving party shows that there is an absence of evidence to support the plaintiff's case, the nonmoving party bears the burden of producing evidence sufficient to sustain a jury verdict on those issues for which it bears the burden at trial." *Id.* It also noted that when, as here, "an expert opinion is not supported by sufficient facts to validate it in the eyes of the law, or when indisputable record facts contradict or otherwise render the opinion unreasonable, it cannot support a jury's verdict" and therefore summary judgment is appropriate. *Id. at 1436* (quoting *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 242, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*). Accordingly, SAP's motion for summary judgment on Teradata's tying claim is GRANTED.[16]

II. TERADATA'S MOTION FOR SUMMARY JUDGMENT

Teradata moves for summary judgment against SAP's counterclaims, which contend that Teradata infringes its '321 Patent, '179 Patent, and '421 Patent. Dkt. No. 472 ("TMSJ") at 1. Teradata asserts that the claims of the '321 Patent are invalid because they are directed to patent-ineligible subject matter under *35 U.S.C. § 101*. *Id.* Teradata also asserts that SAP is not entitled to damages for the alleged infringement **[**93]** of the '179 and '421 Patents before May 19, 2019, when it first informed Teradata of its infringement allegations because SAP had failed to give notice to the public that its products practice the claims of these patents prior to then. *Id.*; *see* *35 USC § 287*. SAP does not oppose Teradata's motion for summary judgment against an award of damages for infringement of the '179 and '421 Patents before May 21, 2019. Dkt. No. 520 ("Opp. TMSJ") at 1. SAP does, however, contend that the '321 Patent is valid. *Id.*

A. Legal Standard

---

[16] Moreover, even if the tied market definition was proper, summary judgment would still be appropriate because Teradata cannot show that SAP has caused actual injury to competition in a market for "EDW products with OLAP capabilities for large enterprises." *See supra* Part I.B.1.b.

Under *Section 101 of the Patent Act*, "[w]hoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor . . . ." *35 U.S.C. § 101*. The Supreme Court "has long held that this provision contains an important implicit exception: Laws of nature, natural phenomena, and abstract ideas are not patentable." *Alice Corp. Pty. Ltd. v. CLS Bank Int'l, 573 U.S. 208, 216, 134 S. Ct. 2347, 189 L. Ed. 2d 296 (2014)*. The reason for the exception is clear enough—"such discoveries are manifestations of . . . nature, free to all men and reserved exclusively to none." *Mayo Collaborative Servs. v. Vometheus Labs., Inc., 566 U.S. 66, 71, 132 S. Ct. 1289, 182 L. Ed. 2d 321 (2012)* (internal quotation marks and citations **[*853]** omitted). The boundaries of the exception, however, are not so clear.

The *Alice* court highlighted "the concern that drives this exclusionary principle as one of pre-emption." **[**94]** *Alice, 573 U.S. at 216* (noting the delicate balance inherent in promoting progress, the primary object of patent law, and granting a monopoly, the means for accomplishing that goal). In other words, patents that seek to wholly preempt others from using a law of nature or an abstract idea—"the basic tools of scientific and technological work"—are invalid. *Id.* "Accordingly, in applying the *§ 101* exception, we must distinguish between patents that claim the buildin[g] block[s] of human ingenuity and those that integrate the building blocks into something more, thereby transform[ing] them into a patent-eligible invention." *Id. at 217* (internal quotation marks and citations omitted).

In evaluating whether claims are patent-eligible, I must first "determine whether the claims at issue are directed to one of those patent-ineligible concepts." *Alice, 573 U.S. at 217*. "[T]he 'directed to' inquiry applies a stage-one filter to claims, considered in light of the specification, based on whether their character as a whole is directed to excluded subject matter." *Enfish, LLC v. Microsoft Corp., 822 F.3d 1327, 1335 (Fed. Cir. 2016)* (internal quotation marks omitted). Although there is no bright-line rule for determining whether a claim is directed to an abstract idea, courts have articulated some guiding principles. When **[**95]** evaluating computer-related claims, courts look to whether the claims "improve the functioning of the computer itself," *Alice, 573 U.S. at 225*, or whether "computers are invoked merely as a tool" to implement an abstract process. *Enfish, 822 F.3d at 1336*.

If the claims are directed to a patent-ineligible concept, I must then "consider the elements of each claim both individually and 'as an ordered combination' to determine whether the additional elements 'transform the nature of the claim' into a patent-eligible application." *Id. at 1334* (internal citations omitted). This step entails the "search for an inventive concept—i.e., an element or combination of elements that is sufficient to ensure that the patent in practice amounts to significantly more than a patent upon the [ineligible concept] itself." *Alice, 573 U.S. at 217-18* (internal quotation marks and citations omitted). An inventive concept "cannot simply be an instruction to implement or apply the abstract idea on a computer" and "must be significantly more than the abstract idea itself." *BASCOM Glob. Internet Servs., Inc. v. AT&T Mobility LLC, 827 F.3d 1341, 1350 (Fed. Cir. 2016)*.

"For the role of a computer in a computer-implemented invention to be deemed meaningful in the context of this analysis, it must involve more than performance of well-understood, routine, [and] conventional activities previously **[**96]** known to the industry." *Content Extraction & Transmission LLC v. Wells Fargo Bank, N.A., 776 F.3d 1343, 1347-48 (Fed. Cir. 2014)*. "[T]he mere recitation of a generic computer cannot transform a patent-ineligible abstract idea into a patent-eligible invention." *Id. at 1348*. However, "an inventive concept can be found in the non-conventional and non-generic arrangement of known, conventional pieces." *BASCOM, 827 F.3d at 1350*.

B. Whether the '321 Patent Is Invalid Under *35 U.S.C. § 101*

The '321 Patent is titled "Systems and Methods for Data Processing." Dkt. No. 124-1 ("'321 Patent"). SAP alleges that Teradata infringes at claims 1, 2, and 4 of **[*854]** the '321 Patent. Dkt. No. 461 at 1. Independent claim 1 and dependent claim 2 recite:

> "**1**. A data processing method comprising:
> providing a set of database tables in a data warehouse, each database table being assigned to an entity type and storing entities of its entity type;

> providing a set of online analytical processing cubes in a data warehouse, each online analytical processing cube specifying a layout for transactional data storage;
> providing at least one application program for processing at least one class of database tables and at least one class of online analytical processing cubes;
>
> mapping a sub-set of the set of database tables to the at least one class of database tables, the sub-set of database tables comprising database tables of **[**97]** one or more entity types;
> mapping a sub-set of the set of online analytical processing cubes to the at least one class of online analytical processing cubes;
> invoking an online analytical processing component to fill the online analytical processing cubes with transactional data;
> processing the entities stored in the sub-set of database tables and the transactional data stored in the sub-set of online analytical processing cubes by the application program; and
> providing analysis of the entities and the transactional data the application program to a user.
>
> **2**. The method of claim 1, comprising providing a set of application programs, whereby each application program of the set of application programs is adapted to process a set of classes of database tables and online analytical processing cubes."

'321 Patent at 7:12-42.

Independent claim 4 is a system claim that is similar to claim 1:

> "**4**. A data processing system comprising:
> a relational database of a data warehouse for storing a set of database tables, each database table being assigned to an entity type and storing entities of its entity type;
>
> a relational database of a data warehouse for storing a set of online analytical processing cubes, each online **[**98]** analytical processing cube specifying a layout for transactional data storage;
> at least one application program for processing at least one class of database tables and at least one class of online analytical processing cubes;
> a mapping table for mapping a sub-set of the set of database tables to the at least one class of database tables, the sub-set of database tables comprising database tables of one or more entity types;
> a mapping table for mapping a sub-set of the set of online analytical processing cubes to the at least one class of online analytical processing cubes; means for invoking an online analytical processing component to
> means for invoking an online analytical processing component to fill the online analytical processing cubes with transactional data;
> means for processing the entities stored in the sub-set of database tables and the transactional data stored in the sub-set of online analytical processing cubes with the application program; and
> means for providing analysis of the entities and the transactional data processed by the application program to a user."

[*855] *Id.* at 7:46-8:18. Claim 1 is representative because it is "substantially similar" to claim 4. TMSJ at 5; *see Content Extraction, 776 F.3d at 1348* (concluding **[**99]** that a claim is representative of other claims when they are "substantially similar and linked to the same abstract idea"). SAP does not oppose that claim 1 is representative.

1. The '321 Patent Is Directed to the Abstract Idea of "Organizing Information into Logical Groups"

Teradata asserts that the '321 Patent is directed to the abstract idea of "associating ('mapping') database tables and OLAP cubes with respective classes for use with application programs."[17] TMSJ at 7. When evaluating

---

[17] In the Claim Construction Order, I rejected Teradata's proposal to construe "mapping" as "associating or assigning." Claim Construction Order at 14-15. Instead I construed "mapping" as "[c]reating and storing, in computer system memory or secondary

computer-related claims, the first step in the *Alice* inquiry "asks whether the focus of the claims is on the specific asserted improvement in computer capabilities" or "instead, on a process that qualifies as an 'abstract idea' for which computers are invoked merely as a tool." *Enfish, 822 F.3d at 1335-36*. Teradata argues that the "'mapping' to classes at the heart of the '321 patent is simply a practice of organizing information, a type of activity that courts have held to be abstract and ineligible for patent protection." TMSJ at 7. For example, even SAP's expert, Dr. David Maier, explains,

> "The '321 patent relates to ways to organize the tables and cubes used in databases so that they can be more easily and efficiently recognized and accessed. At a high level this organization **[**100]** is accomplished by assigning a table or cube to a particular class. These classes serve to group data structures storing related data, so an application can access the structures together."

Dkt. No. 472-2 ("Maier Reb. Rep.") ¶ 683.

SAP contends that "if there is an abstract idea, it is organizing information into logical groups." Opp. TMSJ at 3-6. Although its opposition assumes *arguendo* that the claims are directed to an abstract idea, SAP does not dispute that the claims are directed to an abstract idea. It "does not contest that the claims are directed to this idea of 'organizing information into logical groups' and that it is abstract." *Id.* at 4. Instead, it disputes Teradata's assertion that the claims are directed to the narrower abstract idea of "associating ('mapping') database tables and OLAP cubes with respective classes for use with application programs." TMSJ at 7.

SAP takes the unusual position as a patentee of asserting a broader definition of the abstract idea in order to contend that the physical-realm claim elements—i.e., database tables, OLAP cubes, application programs, and mapping—and their combination should be analyzed under *Alice* step two to determine that there is **[**101]** an inventive concept. *See* Opp. TMSJ at 6; Hearing Tr. at 60-61. An inventive concept "reflects something more than the application of an abstract idea using well-understood, routine, and conventional activities previously known to the industry. It must be enough to transform an abstract idea into a patent-eligible invention." *Cellspin Soft, Inc. v. Fitbit, Inc., 927 F.3d 1306, 1316 (Fed. Cir. 2019)*, *cert. denied sub nom. Garmin USA, Inc. v. Cellspin Soft, Inc., 140 S. Ct. 907, 205 L. Ed. 2d 459 (2020)* (internal quotation marks and citations omitted).

[*856] In *Berkheimer v. HP Inc., 881 F.3d 1360 (Fed. Cir. 2018)*, the Federal Circuit held that "[w]hether something is well-understood, routine, and conventional to a skilled artisan at the time of the patent is a factual determination." *Berkheimer, 881 F.3d at 1369*. The court held that the claims at issue were directed to the abstract ideas of parsing, comparing, storing, and editing data. *Id. at 1366*. The patentee argued that the specification described "an inventive feature that stores parsed data in a purportedly unconventional manner" which "eliminates redundancies, improves system efficiency, [and] reduces storage requirements" among other things. *Id. at 1369*. The Federal Circuit therefore held that the "improvements in the specification, to the extent they are captured in the claims, create a factual dispute regarding whether the invention describes well-understood, routine, and conventional **[**102]** activities." *Id.*

In contrast, in *BSG Tech LLC v. Buyseasons, Inc., 899 F.3d 1281 (Fed. Cir. 2018)*, the Federal Circuit held that the dispute about whether the claims recited "unconventional features that provides benefits over conventional prior art databases" was irrelevant because "a claimed invention's use of the ineligible concept to which it is directed cannot supply the inventive concept that renders the invention 'significantly more' than that ineligible concept." *BSG, 899 F.3d at 1289-91*. The court held that the claims at issue were directed to the abstract idea of "considering historical usage information while inputting data." *Id. at 1286*. The only alleged unconventional feature of the claims was "the requirement that users are guided by summary comparison usage information or relative historical usage information." *Id. at 1291*. The Federal Circuit held that "this simply restate[d]" what it had already determined was an abstract idea and therefore the question about whether this requirement was non-routine or unconventional was irrelevant. *Id.* "As a matter of law, narrowing or reformulating an abstract idea does not add 'significantly more' to it." *Id.* The Federal Circuit affirmed the district court's determination that the asserted claims lacked an inventive concept. *Id.*

---

storage for a computer system, an association between data elements in the computer system such that a computer can locate a data element using that association." *Id.*

In this case, **[**103]** Teradata asserts that the abstract idea is "associating ('mapping') database tables and OLAP cubes with respective classes for use with application programs" because then SAP's purported inventive concept is simply a restatement of the abstract idea and arguably fails. In contrast, SAP contends that the abstract idea is "organizing information into logical groups" because then the combined elements of the database, OLAP cubes, application programs, and mapping arguably create an inventive concept and a genuine dispute of fact of whether the combination of these elements is non-routine or unconventional. I will now address which abstract idea the claims are directed towards.

SAP argues that "mapping" database tables and OLAP cubes with respective classes for use with application programs is not an abstract idea because database tables, OLAP cubes, and application programs are computer structures, not mere concepts, and "mapping" requires the creation of computer data structures. Opp. TMSJ at 4. Teradata cites no precedent holding that a database, OLAP cube, or application program is an abstract idea. *See id.* For "mapping," however, Teradata points to *Autodesk*, where the district court held that **[**104]** "it would be difficult to conceive of a more abstract concept than 'mapping,' when that concept is not tied to any particular object or method." *East Coast Sheet Metal Fabricating Corp. v. Autodesk, Inc., 2015 U.S. Dist. LEXIS 5536, 2015 WL 226084, at *6 (D.N.H. Jan. 15, 2015)*, *amended in part*, *2015 U.S. Dist. LEXIS 25668, 2015 WL 925614 (D.N.H. Mar. 3, 2015)*, **[*857]** *and aff'd*, *645 F. App'x 992 (Fed. Cir. 2016)*. Although SAP does not directly address *Autodesk*, it contends that "mapping" as construed by the Claim Construction Order is not abstract because it requires the creation of computer data structures: "[c]reating and storing, in computer system memory or secondary storage for a computer system, an association between data elements in the computer system such that a computer can locate a data element using that association." Claim Construction Order at 15. According to SAP, "[t]here is nothing abstract about a data structure that an application program running on a computer uses to locate particular data stored in other data structures in the computer system." Opp. TMSJ at 4.

Teradata responds that despite the claim construction, "mapping" is an abstract idea because "there is nothing in the claim language or specification that would materially distinguish a computerized mapping table from one that could be created with a pen and paper." TMSJ at 11. I agree. In *Intellectual Ventures I LLC v. Symantec Corp., 838 F.3d 1307 (Fed. Cir. 2016)*, the Federal Circuit held that the patent at issue was directed **[**105]** to the abstract idea of "receiving e-mail (and other data file) identifiers, characterizing e-mail based on the identifiers, and communicating the characterization—in other words, filtering files/e-mail." *Symantec Corp., 848 F.3d at 1313*. It held that the patent was invalid because "with the exception of generic computer-implemented steps, there is nothing in the claims themselves that foreclose them from being performed by a human, mentally or with pen and paper." *Id. at 1318*. In this case, SAP's expert, Maier, opined that "[a] folder or directory structure stored on a computer system [that] groups objects and allows them to be located . . . can be considered a mapping table." Dkt. No. 472-3 ("Appendix 3 to Maier Report") at 32. Because a computer folder "originated as a metaphor for paper folders," "mapping" is an abstract idea. TMSJ at 12.

Moreover, the claims are not focused on how "mapping" improves computer functionality. SAP's expert explains that the "ways to organize the tables and cubes used in databases," e.g., "assigning a table or cube to a particular class," makes the database tables and OLAP cubes "more easily and efficiently recognized and accessed." Maier Reb. Rep. ¶ 683. But the specification expressly states **[**106]** that the improvement is simplifying the "selection of database tables as input parameters and the selection of OLAP cubes" to make it "more *user* friendly." '321 Patent at 5:63-65 (emphasis added); *see also id.* at 2:40-44; 3:61-64; 4:8-19; 5:27-30; 5:35-44; 6:11-16 (references to how the value from "mapping" is a result of a human's choice to associate particular tables or cubes with classes, not from a new data structure or technological improvement). Further, neither the claims nor the specification recites any specific algorithms for mapping tables and cubes to classes, collecting data into OLAP cubes, processing the data, or analyzing the data. TMSJ at 14. Consequently, SAP only "conclusorily claims an improvement, but never identifies what the specific improvement is, despite the Federal Circuit's requirement that claims assert a 'specific asserted improvement.'" *MyMail, Ltd. v. OoVoo, LLC, No. 17-CV-04487-LHK, 2020 U.S. Dist. LEXIS 80972, 2020 WL 2219036, at *15 (N.D. Cal. May 7, 2020)*, *aff'd*, *2021 U.S. App. LEXIS 24764, 2021 WL 3671364 (Fed. Cir. Aug. 19, 2021)* (quoting *McRO, Inc. v. Bandai Namco Games Am. Inc., 837 F.3d 1299, 1314-15 (Fed. Cir. 2016)*). As a result, "mapping" is an abstraction.

Teradata also asserts that the presence of physical components—i.e., the computer data structures composed of the database, OLAP cubes, and application programs— **[*858]** do not save the claims from being directed to an abstract idea. **[**107]** Dkt. No. 559 ("Reply TMSJ") at 5-6. For example, in *In re TLI Commc'ns LLC Pat. Litig., 823 F.3d 607 (Fed. Cir. 2016)*, the Federal Circuit determined that the claim at issue was directed to an abstract idea even though the claims required "concrete, tangible components such as 'a telephone unit' and a 'server,'" because "the specification makes clear that the recited physical components merely provide a generic environment in which to carry out the abstract idea." *TLI, 823 F.3d at 611*.

But SAP does not dispute that the claims are directed to an abstract idea; instead it disputes the scope of the abstract idea. SAP persuasively contends that, contrary to Teradata's narrow characterization of multiple Federal Circuit decisions, the Federal Circuit "resists conflating a claim's abstract idea with its physical-realm elements." Opp. TMSJ at 6. For example, Teradata characterized the Federal Circuit's conclusion in *Capital One* as stating that the claims were directed to the abstract idea of "[s]ystems for manipulating XML documents by organizing data components into data objects and records and responding to modifications of the data." TMSJ at 8. Instead, the Federal Circuit concluded that "the patent claims are, at their core, directed to the abstract idea of collecting, **[**108]** displaying, and manipulating data." *Capital One, 850 F.3d at 1340*. Similarly, Teradata characterized the decision in *Electric Power Group* to hold that the claims at issue were directed to the abstract idea of "[s]ystems and methods for performing real-time monitoring of an electric power grid by collecting data from multiple data sources, analyzing the data, and displaying the results." TMSJ at 8. But the Federal Circuit held that the claims were focused on the following abstract idea: "a process of gathering and analyzing information of a specified content, then displaying the results." *Elec. Power Grp., 830 F.3d at 1354*.

Teradata points to *Intellectual Ventures I LLC v. Erie Indemnity Co., 850 F.3d 1315 (Fed. Cir. 2017)* as an example of the Federal Circuit including a physical-realm element in its articulation of the abstract idea. Reply TSMJ at 4. There, the Federal Circuit held that "the invention is drawn to the abstract idea of 'creating an index and using that index to search for and retrieve data.'" *Erie, 850 F.3d at 1327*. An "index" was a known structure in the field of database technology. The Federal Circuit, however, was not discussing the specific index in the field of database technology in its definition of the abstract idea, but indexes generally. *See id.* (explaining that "[t]his type of activity, i.e., organizing and accessing records **[**109]** through the creation of an index-searchable database, includes longstanding conduct that existed well before the advent of computers and the Internet. For example, a hardcopy-based classification system (such as library-indexing system) employs a similar concept as the one recited by" the patent).

Accordingly, I agree with SAP that the claims are directed to the abstract idea of "organizing information into logical groups".[18] But for the reasons explained below, the claims are patent-ineligible because they fail to encompass an inventive concept.

2. The '321 Patent Does Not Contain an Inventive Concept

Teradata asserts that the '321 Patent lacks an inventive concept because it "recites **[*859]** well-known, routine, and conventional database elements" and "uses these elements to perform well-understood, routine, and conventional functions of collecting, organizing, processing, or analyzing data." TMSJ at 13. An inventive concept "cannot simply be an instruction to implement or apply the abstract idea on a computer" and "must be significantly more than the abstract idea itself." *BASCOM, 827 F.3d at 1350*. "If a claim's only 'inventive concept' is the application of an abstract idea using conventional and well-understood techniques, the claim has **[**110]** not been transformed into a patent-eligible application of an abstract idea." *BSG, 899 F.3d at 1290-91 (Fed. Cir. 2018)*. But "an inventive concept can be found in the non-conventional and non-generic arrangement of known, conventional pieces." *BASCOM, 827 F.3d at 1350*.

---

[18] Teradata asserts that whether I adopt SAP's or its articulation of the abstract idea, the *Section 101* analysis does not change because its articulation "is simply a form of organizing information into logical groups." Reply TMSJ at 7.

At the summary judgment stage, Teradata, as the movant, has the burden of showing that there is no genuine dispute as to any material fact and that it is entitled to judgment as a matter of law. *FED. R. CIV. P. 56(a)*. "[W]hether a claim limitation or combination of limitations is well-understood, routine, and conventional is a factual question." *BSG, 899 F.3d at 1290*. Because such a fact is "pertinent to the invalidity conclusion" it "must be proven by clear and convincing evidence." *Berkheimer, 881 F.3d at 1368*. "When there is no genuine issue of material fact regarding whether the claim element or claimed combination is well-understood, routine, conventional to a skilled artisan in the relevant field, this issue can be decided on summary judgment as a matter of law." *Id.* And if the only alleged unconventional feature is the abstract idea itself, summary judgment is appropriate. *BSG, 899 F.3d at 1291*.

a. Inventive Concept Identified During the Hearing

Notably, SAP did not assert what the inventive concept is in its opposition. When asked during the hearing, its counsel explained **[**111]** that the inventive concept is composed of three elements in claim 4:[19] (1) a relational database that stores both database tables and OLAP cubes ('321 Patent at 7:47-53); (2) an application program that accesses and processes those database tables and OLAP cubes, not individually, but as a class ('321 Patent at 7:54-56); and (3) the two mapping tables, which are data structures inside the computer, which associate the database tables and the OLAP cubes with a particular class ('321 Patent at 8:1-7). Hearing Tr. at 60-61. Its counsel contended that combining these elements constituted an improved database technique that simplified "the selection of database tables as input parameters and the selection of OLAP cubes" and made it "more user friendly." *Id.* at 62 (citing '321 Patent at 5:63-67). According to the '321 Patent, the improved database technique also "may enable non-expert users to perform complex transactional data processing and to integrate expert knowledge in the class definitions." *Id.*

Teradata's counsel responded that these elements do not create an inventive concept. For the first element, under the agreed claim construction, "a relational database of a data warehouse for storing a set of [OLAP] cubes" is "a database that stores **[**112]** information in tables of rows and columns of data located in a data warehouse that can store at least one [OLAP] cube." Dkt. No. 206 ("Joint Claim Construction Statement") at 2. In other words, the OLAP cube is not stored in the relational database as SAP's counsel explained, **[*860]** but in the data warehouse. Hearing Tr. at 64; *see also* '321 Patent at 4:58-60, Fig. 3 (showing that the data warehouse contains a set of OLAP cubes and not a relational database). And the specification admits that the storage of OLAP cubes in data warehouse systems is well-understood, routine, and conventional. *Id.* at 1:26-27 ("An OLAP cube is a multi-dimensional representation of a set of data. Such a cube is the basis for transaction data storage in prior art data warehouse systems.").

For the second element, Teradata's counsel pointed out that SAP admitted that application programs were well-known in the prior art. *See* Dkt. No. 211 ("SAP Opening Claim Construction Brief") at 20 ("Application programs were well-known to the POSITA at the time the '321 patent was filed."). And for the third element, Teradata's counsel asserted that "mapping" is "merely an abstraction" for the reasons explained above, e.g., there is nothing in the specification **[**113]** that would distinguish the mapping tables from what a person could do on pen and paper. Hearing Tr. at 66; *see supra* Part II.B.1.

SAP's counsel conceded that application programs, database tables, and OLAP cubes were well-known. Hearing Tr. at 68. But he argued that nothing in the specification or the record suggested that any of the three elements it identified were well-known or conventional in 2003, the patent's effective filing date. *Id.* This does not address, however, Teradata's argument that "mapping" is an abstraction. Because "mapping" simply restates what I have determined is an abstract idea, i.e., organizing information into logical groups, the question of whether the claim element is well-understood, routine, and conventional, is irrelevant. *BSG, 899 F.3d at 1291*.

SAP's response also does not address Teradata's argument that application programs, database tables, and OLAP cubes are generic software components that cannot supply an inventive concept. Reply TMSJ at 11; *see Content*

[19] SAP only addresses claim 4 but Teradata addresses the parallel elements of claims 1 and 4 together. Reply TMSJ at 9.

Extraction, 776 F. at 1348 ("[T]he mere recitation of a generic computer cannot transform a patent-ineligible abstract idea into a patent-eligible invention."). The specification does not identify any specific advancement over prior art. Instead, it explains **[**114]** that these physical elements were well-understood, routine, and conventional features of databases. As SAP's counsel explained, "mapping" is how the application program accesses the data in the database tables and OLAP cubes as a class and therefore because "mapping" is an abstraction, none of these elements can provide an inventive concept. *See* Hearing Tr. at 60-61.

Even though the question of conventionality is irrelevant, Teradata also points to examples in the prior art to argue that "mapping" is a well-understood, routine, and conventional element. *Id.* at 14-15. Some prior art patent applications contained the same process of classifying or assigning tables or cubes to logical groupings or classes, each associated with applications for processing. *See, e.g.*, Dkt. No. 472-4 ("'061 Colossi Reference") (U.S. Patent Application Publication No. US 2004/0139061) (Figure 3 showing a grouping of tables related to the measurement of sales by time, product, and region); Dkt. No. 472-5 ("Bakalash Reference") (U.S. Patent No. 6,385,604") (Figure 4A showing a grouping of tables by supplier, time period, part, and supplied parts); Dkt. No. 472-6 ("Colossi Article" or "Colossi Reference") (Figure 1 showing a class of **[**115]** OLAP cubes related to finance, market share, employees, and customers).

SAP contends that Teradata has not shown an absence of a genuine dispute of material fact because "[w]hether a particular technology is well-understood, routine, and conventional goes beyond what was **[*861]** simply known in the prior art. The mere fact that something is disclosed in a piece of prior art, for example, does not mean it was well-understood, routine, and conventional." *Berkheimer, 881 F.3d at 1369*. It argues that the prior art references do not support Teradata's argument because Teradata "cites no evidence that these references were widely read and understood by 2003, or adopted by others so widely that they became routine and conventional." Opp. TMSJ at 10. For example, the Colossi '061 reference was not published until 2004, after the '321 Patent's effective filing date and therefore "it cannot possibly show that others adopted its teachings to such an extent that they became conventional in 2003." *Id.* As for the other Colossi reference, it contends that Figure 1 of the 2002 Colossi article was simply a proposal and Teradata cites to no evidence showing that anyone adopted the proposal so that it became routine and conventional by 2003. *Id.* Similarly, **[**116]** it argues that there is no evidence that the Bakalash reference was widely read or understood by 2003. *Id.*

Further, SAP contends that Teradata has not met its burden of showing that the patent claims' combination of physical-realm elements was conventional, routine, and well-understood. *Id.* at 11. According to SAP, the prior art references show different claimed inventions than the one at issue in the '321 Patent. *Id.* For example, both the Colossi '061 reference and the Bakalash reference describe the claimed invention as a "star schema," a way to represent the logical structure of a relational base, which is not the claimed invention at issue here. *Id.* at 17; *see* Bakalash Reference at 3:54-57 ("An exemplary star schema is illustrated in FIG. 4A"); '061 Colossi Reference ¶ 0075 ("FIG. 3 illustrates a sample star-join schema"). Teradata does not contend that either reference shows any of the other '321 claim elements, e.g., any system in which both tables and cubes are mapped to classes, as required by the '321 Patent. *Id.* at 11-12. Similarly, SAP's expert opines that Figure 1 in the Colossi Reference describes cubes that are different from the construed definition of OLAP cubes in this case. Dkt. No. 520-2 ("Maier **[**117]** Reb. Rep.") ¶¶ 746-48.

These arguments are irrelevant, however, because under a *Section 101* analysis, as opposed to a *Section 102* or *103* analysis, Teradata does not have to compare each '321 claim to the prior art. Reply TMSJ at 10. As the Federal Circuit has explained,

> "The appropriate question is not whether the entire claim as a whole was 'well-understood, routine [and] conventional' to a skilled artisan (i.e., whether it lacks novelty), but rather, there are two distinct questions: (1) whether each of the [elements] in the claimed [product] (apart from the natural laws themselves) involve well-understood, routine, conventional activity previously engaged in by researchers in the field, and (2) whether all of the steps as an ordered combination add[ ] nothing to the laws of nature that is not already present when the steps are considered separately."

Chamberlain Grp., Inc. v. Techtronic Indus. Co., 935 F.3d 1341, 1348-49 (Fed. Cir. 2019), *cert. denied*, *141 S. Ct. 241, 208 L. Ed. 2d 19 (2020)* (internal citations and quotation marks omitted). Teradata explains that it was relying on the prior art references to show that "mapping" and "mapping tables," under my construction and as interpreted by SAP's expert, were well-known in the art. Reply TMSJ at 10-11. SAP does not address Teradata's arguments that the Colossi '061 and Bakalash references **[**118]** show mappings of tables to classes. Further, SAP's expert undermines its argument that there is no clear and convincing evidence that the Colossi and Bakalash references were widely circulated or understood **[*862]** by 2003; Maier opines that a POSITA would have understood how to implement certain claim elements at the time based on these three references. *See infra* Part II.B.2.b; *see* Maier Reb. Rep. ¶¶ 704, 715. SAP's argument that these three elements create an inventive concept fails.

b. Remaining Claim Elements

SAP's counsel clarified that SAP was not abandoning the seven physical-realm elements outlined in its opposition by focusing on the elements above. Hearing Tr. at 63. According to SAP, "even if each of the [] seven claim elements individually were known, Teradata submits no clear and convincing evidence that this particular combination of structural, physical-realm elements was conventional by 2003": the elements above and (1) "an OLAP component filling the OLAP cubes with transactional data and [a particular] means for invoking that component to perform that function; (2) "a [particular] means for processing with the application program the entities stored in the sub-set of database **[**119]** tables and the transactional data stored in the sub-set of OLAP cubes; and (3) "a [particular] means for providing analysis of those entities and transactional data processed by the application program." Opp. TMSJ at 9.

But these remaining claim limitations—"filling cubes with data, processing data, and providing analysis"—are also abstract and cannot provide an inventive concept. TMSJ at 14. Contrary to SAP's addition of the word "[particular]" in the elements,[20] these limitations are purely functional because the claims do not recite any specific algorithms for performing these steps; instead they simply claim a result and reflect abstract ideas. TMSJ at 14; *see Affinity Labs of Texas, LLC v. Amazon.com Inc., 838 F.3d 1266, 1269 (Fed. Cir. 2016)* ("The purely functional nature of the claim confirms that it is directed to an abstract idea, not to a concrete embodiment of that idea."). SAP does not respond to this argument. The question of whether these elements are well-understood, routine, and conventional is therefore irrelevant because these elements are abstract ideas and therefore cannot supply an inventive concept. *See BSG, 899 F.3d at 1290-91*.

In any event, Teradata argues that all of these steps are also well-understood, routine, and conventional, as SAP admits. *Id.* SAP's expert admits **[**120]** that filling cubes with data, processing data, and providing analysis are all well-known elements and would be familiar to a skilled artisan. *See, e.g.*, Maier Reb. Rep. ¶ 704 (arguing that the "Colossi and Colossi '061 references . . . further demonstrate that a POSITA would have been well aware of applications that utilized RDBMS components to fill OLAP cubes."); *id.* ¶ 715 (arguing that the "Colossi reference . . . further demonstrate[s] that a POSITA would have been well aware of applications that processed the entities stored in the sub-set of database tables and the transactional data stored in the sub-set of online and analytical processing cubes with the application program."); *id.* ¶ 719 (arguing that the structures for "providing analysis of the entities and the transaction data processed by the application program to a user" were "familiar to a skilled artisan"). Maier pointed to business intelligence tools such as "Microsoft Excel, BusinessObjects and Tableau" as examples of applications that were well-known that filled cubes with data, processed **[*863]** data, and provided analysis of data. *Id.* ¶¶ 701, 712, 719.

Furthermore, the specification is silent as to any purported improvement **[**121]** provided by the claimed combination. *See MyMail, 2020 U.S. Dist. LEXIS 80972, 2020 WL 2219036, at *19* (invalidating claims under *§ 101* in part because the specification was "entirely silent as to . . . how any inventive feature, alone or in an ordered combination, is used in an unconventional manner.") (internal quotation marks omitted). Because the claim

---

[20] Teradata asserts that SAP's rewriting of claim 4 underscores that the ordered "combination" of elements in claim 4 cannot survive *Alice* step two. Reply TMSJ at 9. It argues that SAP (1) combines the first two elements; (2) moves the "mapping" limitations to follow the filling, processing, and providing analysis limitations; and (3) adds the word "[particular]" to make three claim elements seem less generic. *Id.*

elements simply apply the abstract idea of organizing information into logical groups using well-understood, routine, and conventional activities previously known to the industry, the claims do not make the abstract idea patent eligible. Cellspin Soft, 927 F.3d at 1316.[21] SAP's claims are directed to the abstract idea of organizing data into logical groups. There is no inventive concept that provides something more than the abstract idea itself. Teradata's motion for summary judgment is GRANTED.

III. MOTION TO EXCLUDE LEONARD AND WOLFSON TESTIMONY

Teradata's final motion to exclude expert testimony seeks to exclude portions of Dr. Wolfson and Dr. Leonard's reports. Dkt. No. 480 ("L&W Mot.") at 1. Teradata asserts that I should exclude Wolfson's apportionment opinions because they do not satisfy Rule 702 and Leonard's Profit Apportionment Method with respect to the '321 Patent, which relies on Wolfson's apportionment factors. *Id.* Because I conclude **[**122]** that the '321 Patent is invalid, any arguments related to it are DENIED as moot. Teradata also moves to exclude certain alternative calculations for reasonable royalties, such as damages before May 21, 2019 for the '421 and '179 Patents and damages related to an exhibit labeled as "Scenario 2." *Id.* SAP does not dispute these issues and therefore Teradata's motion in relation to these is GRANTED. *See* Dkt. No. 525 ("L&W Opp.") at 12, 15. As for the antitrust damages, Teradata moves to exclude Leonard's opinion that certain Teradata business decisions caused the damages. L&W Mot. at 2. Because I conclude that Teradata's tying claim fails, any argument about antitrust damages is DENIED as moot. The remaining issues, then, are whether Wolfson's apportionment analysis of the '421 and '179 Patents is unreliable and therefore whether Leonard's Profit Apportionment Method for the '421 and '179 Patents is unreliable.

Teradata asserts that Wolfson's apportionment analysis is flawed. *Id.* at 5. SAP explains that Wolfson "was tasked with estimating the value of Teradata's infringing technology by drawing on his more than 35 years of experience as a computer science professor and the president of a startup company in the data science field." L&W Opp. at 1 **[**123]** (citing Dkt. No. 488-6 ("Wolfson Rep.") ¶¶ 4-18). Teradata points out that Wolfson admits that he has never conducted an apportionment analysis before, and he could not provide examples of others apportioning revenues in the manner he did or any third-party resources that could guide his efforts. Dkt. No. 488 ("Wolfson Depo.") at 42-43, 46, 77-78.

Wolfson's analysis follows the same methodology affirmed by the Federal Circuit in Summit 6, LLC v. Samsung **[*864]** Elecs. Co. Ltd., 802 F.3d 1283, 1296-98 (Fed. Cir. 2015). *Id.* at 2-3. There, the expert determined the smallest salable patent-practicing unit for which revenue data is available and further apportioned the value of the claimed invention to take into account only those features that infringed. Summit 6, 802 F. 3d at 1297. In this case, Wolfson identified the smallest salable unit for each patent, e.g., the Teradata Columnar feature for the '421 Patent and the Teradata Database for the '179 Patent, and then undertook a "multi-step, quantitative apportionment specific to each patent." Id. at 1297. Teradata asserts that Summit 6 is distinguishable because there, an economist, not a technical expert, made opinions based on his careful quantitative review of objective financial and customer usage data. Dkt No. 561 ("L&W Reply") at 4. Here, Wolfson repeatedly confirmed that he had no **[**124]** data on customers' usage of the specific features. *See* Dkt. No. 560-6 ("Wolfson Depo.") at 98-110.

But Wolfson explains that he does not use such data because Teradata claims that it does not possess or maintain information about how its customers deploy or configure features such as the Teradata Columnar, for example. Wolfson Rep. ¶ 49. Instead, Wolfson "had information about how certain Teradata employees who are in direct contact with customers value various features that are related to '421 . . . ." Wolfson Depo. at 110. Like the expert in Summit 6, for the '421 Patent he determined the proportion of customers who would be expected to configure Teradata Columnar in an infringing manner based on Teradata's documentation and publications and then

[21] SAP also contends that Teradata has not shown a lack of genuine dispute that there are no other ways to implement the alleged abstract idea. Opp. TMSJ at 15-16. But Teradata does not have to show that SAP has preempted an entire idea for the '321 claims to be patent-ineligible. "While preemption may signal patent ineligible subject matter, the absence of complete preemption does not demonstrate patent eligibility." FairWarning IP, LLC v. Iatric Systems, Inc., 839 F.3d 1089, 1098 (Fed. Cir. 2016) (citation omitted).

subtracted non-infringing configuration options. Wolfson Rep. ¶¶ 48-69. For the '179 Patent, he approximated the value of Teradata's "complex query" processing components of the Teradata Database based on Teradata's internal spreadsheets. *Id.* ¶¶ 97-108. Wolfson then excluded use cases that do not involve the infringing subquery processing. *Id.* ¶¶119-22. His methodology is proper.

Teradata asserts that when asked how he came to determine or know what the alleged infringing **[**125]** conduct was, Wolfson responded that he did not "exactly recall how" he identified the exact piece that infringes and that "some of it is a hunch." Wolfson Depo. at 77-78. But the full context of his statement was that apportionment is not an "exact science," which has been acknowledged by courts. L&W Opp. at 4; *see* *Apple Inc. v. Motorola, Inc., 757 F.3d 1286, 1315, 1319 (Fed. Cir. 2014)*, *overruled on other grounds by* *Williamson v. Citrix Online, LLC, 792 F.3d 1339 (Fed. Cir. 2015)* (recognizing that estimating a "reasonable royalty" for example "is not an exact science" and holding that an expert's method of apportionment was admissible even if other reliable methods of estimating a reasonable royalty existed). Wolfson testified that he did not analyze the infringement, or the claim construction order himself and he never spoke to SAP's expert on infringement, Dr. Maier. *Id.* at 34, 84. But his analysis of the relative value of the infringing technology relies on Maier's opinions on patent infringement, which is common and appropriate. *Fujifilm Corp. v. Motorola Mobility LLC, No. 12-cv-03587-WHO, 2015 U.S. Dist. LEXIS 46106, 2015 WL 1737951, at *4 (N.D. Cal. Apr. 8, 2015)* (It is "reasonable to expect that experts will rely on the opinion of experts in other fields as background material for arriving at an opinion."). When asked when he received Maier's report, he stated that the earliest copy he had was from the same day that he signed his own report, **[**126]** but he testified that it was his impression that he had received something similar beforehand. *Id.* at 162-63. In addition, Wolfson testified that he relied upon SAP's infringement contentions, which were the basis of Maier's report, before finalizing his report. *See* Wolfson Depo. at 67-68, 157-61.

[*865] Teradata also emphasizes that "Wolfson's views on the patents are confused and plainly omit key elements of the claimed invention." L&W Mot. at 7. According to Teradata, he ignored the existence of a limitation in the '179 Patent that subqueries be optimized "without transformation" and only focused on whether there were subqueries to the queries being processed. *See* Dkt. No. 491-15 ("'179 Patent") at 39:3-5; *see* Wolfson Depo. at 126-27 (stating that he believed the question of "transformation" was "completely tangential" to his report and confirming that the word "transformation" was "not even in" his report). Because Wolfson "values only the prevalence of subqueries rather than subqueries that are optimized 'without transformation,'" Teradata asserts that his approach is inappropriate. L&W Mot. at 7. SAP responds that it is appropriate that Wolfson only considered the prevalence of subqueries because according **[**127]** to Maier, the "without transformation" limitation is met when a query contains a subquery. L&W Opp. at 5 (citing Dkt. No. 524-11 ("Appendix 4 of the Maier Expert Rep.") at 82-84). It contends that Teradata has cited no evidence otherwise and therefore Wolfson did not need to account for the "without transformation" limitation. *Id.* These arguments go to the weight and not the admissibility of Wolfson's opinions.

Finally, Teradata asserts that Wolfson's calculations "reflect a host of allegedly quantitative assumptions that do not connect to the qualitative documents on which he relies." L&W Mot. at 8. For example, Teradata argues that he assumes that 50-100% of Teradata's customers use a certain configuration of Columnar solely because Teradata "recommends" the configuration, but he has no basis for this assumption. *Id.* SAP points out that this is a rational analysis given that some customers may not follow Teradata's recommendation and therefore would be expected to choose both options equally (the 50% endpoint of the range). *Id.* at 5. And because customers are likely to follow a manufacturer's recommendation, this would result in the upper endpoint of the range (100%). *Id.* Teradata **[**128]** also argues that with the '179 Patent, Wolfson relied on a 50% estimate for the prevalence of queries containing subqueries "solely on a third-party paper," but SAP contends that the paper "analyzed a well-established industry performance benchmark, was peer-reviewed, [] was presented at a prestigious computer science conference," and Wolfson analyzed the benchmark independently. L&W Mot. at 8-9; L&W Opp. at 5-6; *see* Wolfson Rep. ¶ 121. These arguments go to the weight and not the admissibility of Wolfson's opinions.

Wolfson's apportionment analysis was based on reliable principles and guided by Federal Circuit case law. Leonard's Profit Apportionment Approach for the '421 and '179 Patents should not be excluded either.

CONCLUSION

For the reasons above, SAP's motion for summary judgment on Teradata's trade secret claims is GRANTED. Its motion related to Teradata's business trade secret claims under the DTSA is DENIED as moot. Its motion related to Teradata's tying claim is GRANTED. Teradata's motion for summary judgment on the invalidity of the '321 Patent is GRANTED. Its motion for partial summary judgment against an award of damages for infringement of the '179 and '421 Patents before May 21, 2019, is GRANTED. Its motion to exclude portions **[**129]** of Kraska's expert report is DENIED as moot. Its motion to exclude portions of Horn's report is GRANTED in part and DENIED in part. Its motion to exclude portions of the Leonard and Wolfson reports is DENIED in part as moot **[*866]** and DENIED in part on the merits. Its motion to exclude portions of Mehrotra's report is DENIED. SAP's motion to exclude portions of Asker's report is GRANTED in part and DENIED in part.

IT IS SO ORDERED.

Judges: GARY A. FENNER, UNITED STATES DISTRICT JUDGE.

Opinion by: GARY A. FENNER

Opinion

ORDER

Now before the Court is the Indirect Purchaser Plaintiffs' (hereinafter, "Plaintiffs") Motion for Class Certification (Doc. # 476). Defendant Ferrellgas L.P. ("Ferrellgas") opposes. (Doc. # 494). On September 23, 2021, the parties appeared before the Court for a hearing on Plaintiffs' Motion. (Doc. # 602). For the reasons set forth below, and upon consideration of the pleadings, evidence, and arguments presented, Plaintiffs' Motion for Class Certification is DENIED.

DISCUSSION [*7]

I. BACKGROUND

The Court has previously discussed the extensive factual and procedural background of this case. (*See* Master Case, Doc. ## 333, 355).[1] The Court thereby provides only the background relevant to Plaintiffs' instant motion for class certification.

This case involves portable propane exchange tanks and two of the nation's leading suppliers of them—Ferrellgas and AmeriGas. Portable propane exchange tanks are used in barbeques, patio heaters, generators, and other outdoor equipment. Unlike portable propane tanks that need to be refilled, propane exchange tanks offer customers the convenience of exchanging an empty propane tank for a new, filled tank at retail outlets such as big box stores, grocery chains, hardware stores, gas stations, and convenience stores. Two types of propane exchange tanks are available for purchase: (i) spare tanks, which are those where a customer purchases the cylinder itself and the propane in it; and (ii) exchange tanks, where a customer returns an empty cylinder and purchases a filled tank in exchange.

Plaintiffs seek to represent a putative class of customers who purchased AmeriGas and Blue Rhino branded portable propane exchange tanks from various **[*8]** retailers in 13 states.[2] In relation to Defendants AmeriGas and Ferrellgas (which sells tanks under the Blue Rhino brand), Plaintiffs are indirect purchasers of spare and exchange tanks. Retailers purchase spare and exchange tanks directly from AmeriGas and Ferrellgas at wholesale prices; those retailers then resell those tanks to the customers that comprise the putative class here.

---

[1] Master Case refers to No. 4:14-md-02567-GAF (W.D. Mo.). All docket citations will be to the Master Case unless otherwise noted.

[2] Plaintiffs originally asserted a federal injunctive relief claim and state law claims from 24 different states. The Court dismissed Plaintiffs' federal injunctive relief claim, and that dismissal was affirmed on appeal by the Eighth Circuit. (Doc. # 283). Subsequently, Defendants moved for judgment on the pleadings on Plaintiffs' remaining state law claims and the Court granted the motion in part as to 11 of Plaintiffs' 24 state law claims. (Doc. # 355). Accordingly, Plaintiffs moved for class certification on their remaining 13 state law claims.

Plaintiffs allege that AmeriGas and Ferrellgas engaged in an ongoing conspiracy to fix the fill levels of their propane exchange tanks. (Doc. # 198 ("Complaint" ¶ 1)). They claim that in 2008, in response to a spike in the price of propane, AmeriGas and Ferrellgas agreed with each other to reduce the fill level of their propane exchange tanks from 17 to 15 pounds without a corresponding reduction in wholesale price. (*Id.* at ¶¶ 50-92). The alleged purpose and effect of this agreement was to raise the wholesale price at which AmeriGas and Ferrellgas sold their propane exchange tanks. (*Id.* at ¶ 93).

A prior action was brought in 2009 by a putative class of indirect purchasers against AmeriGas and Ferrellgas based upon the same alleged 2008 fill-reduction conspiracy. *See In re: Pre-Filled Propane Tank Marketing* ***[*9]*** *& Sales Practices Litig.*, No. 4:09-md-2086-GAF (W.D. Mo.) ("*Propane I*"). AmeriGas settled that lawsuit on December 1, 2009, and Ferrellgas settled on October 14, 2011. (*See Propane I*, Doc. ## 38-3, 250-1, 289).

The current action was filed on May 30, 2014. Plaintiffs allege that despite the prior class-wide settlements with indirect purchaser plaintiffs in the *Propane I* actions, the conspiracy persisted. (*See* Master Case, Complaint, ¶¶ 96, 100). Following years of motion practice and an appeal to the Eighth Circuit, what remains are state law claims brought on behalf of a putative class of indirect purchasers from 13 states. Prior to the commencement of class certification briefing, on September 18, 2020, AmeriGas settled with Plaintiffs, leaving Ferrellgas as the only remaining defendant. (Doc. ## 471, 541).

Plaintiffs moved to certify a multi-state damages class under *Federal Rule of Civil Procedure 23(b)(3)* consisting of all persons in Arizona, Nevada, North Carolina, New Mexico, Maine, Minnesota, Michigan, South Dakota, Utah, California, Iowa, North Dakota, and West Virginia who purchased (i) AmeriGas spare or exchange tanks between December 1, 2009 and the date judgment is entered in this action or (ii) Blue Rhino spare **[*10]** or exchange tanks between October 14, 2011 and the date judgment is entered in this action.[3] (Doc. # 476 at p. 5). In support of their motion, and as their proposed common proof of class-wide injury and damages, Plaintiffs offered economic analyses and opinions by Professor Daniel A. Ackerberg, a professor of economics at the University of Texas. (Doc. # 476-1).

Professor Ackerberg put forth an analysis purporting to show that common evidence and methods demonstrate that the 2008 fill reduction by Ferrellgas and AmeriGas caused all of the indirect purchaser class members to uniformly pay supracompetitive per-gallon prices for AmeriGas and Ferrellgas propane exchange tanks throughout the alleged class period. (*See generally id.*).[4] Professor Ackerberg offered regression analyses to determine a set of common, average overcharges that he claims represent the average inflated prices per gallon of propane paid by AmeriGas's and Ferrellgas's direct retailer customers for both spares and exchange tanks due to the 2008 fill reduction. (*Id.*). Instead of calculating overcharges allegedly incurred by each of Ferrellgas's and AmeriGas's individual retailers (or even certain of their largest **[*11]** ones), Professor Ackerberg's method averaged all of the wholesale prices for AmeriGas and Blue Rhino tanks to calculate an average price per gallon, from which he then calculated an average per-gallon overcharge for AmeriGas and Blue Rhino spare and exchange tanks. (*Id.*).

Professor Ackerberg also conducted pass-through studies for three retailers, and used those studies as the basis to opine that all of AmeriGas's and Ferrellgas's thousands of retailer customers passed on overcharges at a "conservative" rate of 100% to their customers (and the putative class members) who purchased AmeriGas and Blue Rhino propane tanks during the class period. Based on these analyses, Professor Ackerberg initially estimated

[3] Plaintiffs also sought conditionally to certify a multi-state class of supposed end customers who "directly" purchased AmeriGas and Blue Rhino spare and exchange tanks during the same alleged class period. (*See* Doc. # 476 at p. 5). At the time Plaintiffs moved for class certification, their motion for leave to amend their complaint to add "direct purchaser" claims based on customer purchases of tanks from AmeriGas and Blue Rhino vending machines was then pending. (Doc. ## 426, 427). The Court subsequently denied Plaintiffs' motion for leave to amend, thereby mooting their alternative request to certify a "direct purchaser" class. (*See* Doc. # 491).

[4] By way of introduction, the Court generally cites to the expert reports. However, specific cites to expert opinions referenced are provided in the "Analysis" section of this Order.

$117 million as a reasonable measure of classwide damages (before trebling) to the putative indirect purchaser class. (*Id.*).

Ferrellgas opposed certification, primarily on the ground that Plaintiffs failed to satisfy their burden of establishing predominance under *Rule 23(b)(3)*. (Doc. # 494). In support, Ferrellgas submitted an expert declaration by Professor Kevin Murphy, a Professor of Economics at the University of Chicago. (Doc. # 494-1). Professor Murphy conducted an independent analysis of **[*12]** the market, including Defendants' pricing to their various customers throughout the proposed class period, and then provided a number of critiques and conducted economic analyses to test the reliability of the common proof of a class-wide overcharge to the putative class advanced by Professor Ackerberg. (*See generally id.*). Among other things, Professor Murphy conducted various pricing analyses, all of which indicated how the wholesale prices-per gallon of AmeriGas's and Ferrellgas's spares and exchange tanks varied widely amongst retailers throughout the class period and changed constantly due to individualized pricing negotiations. (*Id.*). Professor Murphy also ran Professor Ackerberg's own overcharge regressions with individualized retailer data, rather than average wholesale prices, to opine that Professor Ackerberg's use of a single average overcharge estimate wrongly attributed an overcharge to significant percentages of sales of AmeriGas's and Ferrellgas's propane tanks during the class period—sales for which there was in fact insufficient evidence of any overcharges. (*Id.*).

Professor Murphy further opined on various design flaws within Professor Ackerberg's average overcharge **[*13]** regressions, all of which Professor Murphy claims undermine the reliability of whether Professor Ackerberg's regressions are capable of determining and isolating the impact of an anticompetitive overcharge due to the alleged conspiracy, as opposed to myriad other non-collusive factors that could have affected the wholesale per-gallon prices of AmeriGas's and Ferrellgas's spare and exchange tanks. (*Id.*). As for Professor Ackerberg's pass-through studies, Professor Murphy opined that they are unreliable because they do not actually measure a pass-through rate or isolate whether (and the extent to which) a cost *change* at the wholesale level causes a *change* in the retail price to consumers. (*Id.*). Further, Professor Murphy opined that Professor Ackerberg's pass-through studies, based on data from just three retailers, is not representative and cannot be used to infer a common pass-through rate for thousands of retail customers. (*Id.*).

On reply, Plaintiffs offered a supplemental analysis by Professor Ackerberg. (*See* Doc. # 540-1). Professor Ackerberg purported to address the various critiques advanced by Professor Murphy, and offered new overcharge regressions that continued to estimate **[*14]** an average overcharge paid by Ferrellgas's and AmeriGas's retailer customers through January 31, 2015. (*Id.* pp. 9-10 ¶ 36). This revised overcharge regression corresponded with revisions made by Plaintiffs to their proposed class period, which they limited on reply to the end of January 31, 2015. (Doc. # 540, p. 10 n.19). Plaintiffs made these adjustments to reflect the Court's January 21, 2020, Order denying Plaintiff's motion to compel documents and data post January 2015.[5] Beyond the revised regression analysis, Professor Ackerberg's reply declaration included new opinions and evidence. (*See generally* Doc. # 540-1). Plaintiffs also submitted 37 additional exhibits. (*Id.*). Because of the altered class period, Professor Ackerberg also adjusted his estimated class-wide damages number from $117 million to $54 million (before trebling). (*Id.* at p. 63).

Ferrellgas moved for and the Court granted it leave to file a sur-reply and a corresponding declaration by Professor Murphy to address the new and additional analyses and evidence set forth by Plaintiffs and Professor Ackerberg on reply. (Doc. # 587).

With Plaintiffs' adjustments on reply limiting their class period through the end of **[*15]** January 2015, the operative proposed class that Plaintiffs now seek to certify consists of the following:

> All persons who, in Arizona, Nevada, North Carolina, New Mexico, Maine, Minnesota, Michigan, South Dakota, Utah, California, Iowa, North Dakota, and West Virginia, purchased a filled propane exchange tank or paid to

---

[5] After moving for class certification, Plaintiffs requested additional discovery from Ferrellgas relating solely to post-2015 damages. The Court concluded that Plaintiffs' belated discovery request was foreclosed by the Eighth Circuit's prior decision in *In re Pre-Filled Propane Tank Antitrust Litigation, 893 F.3d 1047 (8th Cir. 2018)*. (*See* Doc. # 547, pp. 11-12).

exchange their already-purchased propane exchange tank, and whose tank was provided by AmeriGas between December 1, 2009, and January 31, 2015, or by Blue Rhino between October 14, 2011, and January 31, 2015.

(Doc. # 476 at p. 5, Doc. # 540, p.10 n.19; Doc. # 540-1 p. 9 ¶ 36 & n.10).

On September 23, 2021, the Court held a lengthy hearing on Plaintiffs' motion for class certification. (Doc. # 602). Both Plaintiffs' expert, Professor Ackerberg, and Ferrellgas's expert, Professor Murphy, were present at the hearing.

II. LEGAL STANDARD

"The class action is an exception to the usual rule that litigation is conducted by and on behalf of individual named parties only." *Comcast Corp. v. Behrend, 569 U.S. 27, 33, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* (citations and quotation marks omitted). "*Rule 23* does not set forth a mere pleading standard." *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 351, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*. "No class action may be certified unless the party seeking certification 'affirmatively demonstrate[s] his compliance with **[*16]** *Rule 23*.'" *In re State Farm Fire & Cas. Company, 872 F.3d 567, 572 (8th Cir. 2017)* (quoting *Comcast, 569 U.S. at 33*). "*Rule [23]* imposes stringent requirements for certification that in practice exclude most claims." *Am. Express Co. v. Italian Colors Rest., 570 U.S. 228, 234, 133 S. Ct. 2304, 186 L. Ed. 2d 417 (2013)*.

"To be certified as a class, plaintiffs must meet all of the requirements of *Rule 23(a)* and must satisfy one of the three subsections of *Rule 23(b)*." *Postawko v. Mo. Dep't of Corr., 910 F.3d 1030, 1036 (8th Cir. 2010)* (citations and internal quotation marks omitted). "Under *Rule 23(a)*, a district court may certify a class only if it is satisfied, after a rigorous analysis, that the four threshold requirements are met: numerosity of plaintiffs, commonality of legal or factual questions, typicality of the named plaintiff's claims or defenses, and adequacy of representation by class counsel." *Ebert v. Gen. Mills, Inc., 823 F.3d 472, 477 (8th Cir. 2016)* (citations and internal quotation marks omitted).

Plaintiffs here seek to certify a *Rule 23(b)(3)* class. "For certification under *Rule 23(b)(3)*, the party must show that 'questions of law or fact common to class members predominate over any questions affecting only individual members.'" *Hudock v. LG Electronics U.S.A., Inc., 12 F.4th 773, 2021 WL 4029769, at *1 (8th Cir. 2021)* (quoting *Comcast, 569 U.S. at 34*). "An individual question is one where members of a proposed class will need to present evidence that varies from member to member, while a common question is one where the same evidence will suffice for each member to make a prima facie showing or the issue is susceptible to generalized, class-wide proof." *Tyson Foods, Inc. v. Bouaphakeo, 577 U.S. 442, 453, 136 S. Ct. 1036, 194 L. Ed. 2d 124 (2016)*. "What matters **[*17]** to class certification ... is not the raising of common 'questions'—even in droves—but, rather the capacity of a classwide proceeding to generate common *answers* apt to drive the resolution of the litigation." *Wal-Mart, 564 U.S. at 350* (quotation marks omitted). Predominance is lacking in circumstances where a plaintiff's common proof of impact fails to show that all or nearly all class members were in fact injured. *See In re Asacol Antitrust Litig., 907 F.3d 42, 53 (1st Cir. 2018)* (if there are class members who "in fact suffered no injury," the "need to identify those individuals will predominate"); *In re Rail Freight Fuel Surcharge Antitrust Litig., 725 F.3d 244, 252, 406 U.S. App. D.C. 371 (D.C. Cir. 2013)* (similar).

In an antitrust case such as this one, the issue of antitrust "impact often is critically important for the purposes of evaluating *Rule 23(b)(3)*'s predominance requirement because it is an element of the claim that may call for individual, as opposed to common, proof." *In re Modafil Antitrust Litig., 837 F.3d 238, 262 (3d Cir. 2016)*; *see also In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 204, 211 (3d Cir. 2008)* (same). "A plaintiff seeking treble damages under ... *§ 4* of the Clayton Act must establish an antitrust violation (here, the alleged conspiracy to fix prices) and the fact of damage or injury, i.e., impact." *Blades v. Monsanto Co., 400 F.3d 562, 569 (8th Cir. 2005)*. "[P]roof of conspiracy is not proof of common injury." *Id. at 569*. Plaintiffs must do more than present "common evidence that defendants colluded to raise [prices]"; they "must also show that they can prove, through **[*18]** common evidence, that all class members were in fact injured by the alleged conspiracy. Otherwise, individual trials are necessary to establish whether a particular [plaintiff] suffered harm from the [conspiracy]." *In re Rail Freight Fuel Surcharge*

Antitrust Litig., 725 F.3d 244, 252, 406 U.S. App. D.C. 371 (D.C. Cir. 2013) (citing Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 623-24, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)); *see also* Sykes v. Mel S. Harris & Assocs. LLC, 780 F.3d 70, 82 (2d Cir. 2015) (same); In re New Motor Vehicles Canadian Export Antitrust Litig., 522 F.3d 6, 20 (1st Cir. 2008) ("In antitrust class actions, common issues do not predominate if the fact of antitrust violation and the fact of antitrust impact cannot be established through common proof.").

With respect to whether Plaintiffs have satisfied their burdens under Rule 23(a) and (b)(3), the law is now clear that district courts must rigorously scrutinize the evidence and proof offered by Plaintiffs in support of class certification, and must find, by a preponderance of the evidence, that Rule 23's requirements are met. *See* Cope v. Let's Eat Out, Inc., 319 F.R.D. 544, 551 (W.D. Mo. 2017) ("The preponderance of the evidence standard applies to evidence proffered to establish the requirements of Rule 23."); *see also* Lamictal Direct Purchaser Antitrust Litig., 957 F.3d 184, 191 (3d Cir. 2020); In re Nexium Antitrust Litig., 777 F.3d 9, 27 (1st Cir. 2015); Messner v. Northshore Univ. Healthsystem, 669 F.3d 802, 811 (7th Cir. 2012). Following the Supreme Court's decisions in Wal-Mart and Comcast, "[i]t is now indisputably the role of the district court to scrutinize the evidence before granting certification, even when doing so 'requires inquiry into the merits of the claim." Rail Freight, 725 F.3d at 253 (D.C. Cir. 2013) (quoting Comcast, 569 U.S. at 28); *see also* Wal-Mart, 564 U.S. at 351-52.

As for the kind of economic evidence offered by Plaintiffs, the Court must scrutinize **[*19]** it rigorously to ensure that it is capable of demonstrating impact on a class-wide basis: "[i]t is now clear ... that Rule 23 not only authorizes a hard look at the soundness of statistical models that purport to show predominance—the rule commands it." Rail Freight, 725 F.3d at 255; *see also* Lamictal, 957 F.3d at 193 (holding that a district court abused its discretion in refusing to "address [plaintiff's] multi-leveled microeconomic analysis" in determining whether predominance under Rule 23(b)(3) was satisfied). Practically, this standard "requires district courts to closely scrutinize factual evidence and expert reports that demonstrate that impact can be proven on a classwide basis"; the Court "must determine not only the admissibility of expert evidence that forms the basis of the methodology that demonstrates [predominance]," but also "whether that expert evidence is persuasive, which may require the Court to resolve methodological disputes." In re High-Tech Employee Antitrust Litig., 985 F. Supp. 2d 1167, 1186-87 (N.D. Cal. 2013); *see also* In re Mushroom Direct Purchaser Antitrust Litig., 319 F.R.D. 158, 201 (E.D. Pa. 2016) ("[The Court is] required to weigh [the plaintiff's expert's] analysis ... and determine whether it supports a finding that plaintiffs' theory of impact is susceptible to common proof a trial through available evidence common to the class."); In re Photochromic Lens Antitrust Litig., No. 8:10-CV-00984-T-27EA, 2014 U.S. Dist. LEXIS 46107, 2014 WL 1338605, at *25 (M.D. Fla. Apr. 3, 2014) (rejecting plaintiffs' contention that a magistrate judge **[*20]** applied "an unnecessarily strict standard by critiquing [their expert's] choices in structuring [his] methodology [for demonstrating common impact] and regressions" as "inconsistent with recent class certification jurisprudence").

The Supreme Court has also made clear that whether representative evidence offered by a plaintiff can be used to "establish classwide liability will depend on the purpose for which the sample is being introduced and the underlying cause of action." Tyson, 577 U.S. at 460. Because class certification requires that "each member [of the proposed class] have standing and show injury in fact," Halvorson v. Auto-Owners Ins. Co., 718 F.3d 773, 778 (8th Cir. 2013), representative or aggregate evidence fails Rule 23 if it masks individualized issues or predicts injury where none otherwise exists. *See* In re Processed Egg Prod. Antitrust Litig., 312 F.R.D. 124, 159 (E.D. Pa. 2015) ("The case law understandably allows for averages and aggregations, but only if the court is convinced that the averages and aggregations are not masking individualized issues that are likely to predominate."); Rail Freight, 725 F.3d at 252 ("[A] methodology [that] detects injury where none could exist ... shred[s] the plaintiffs' case for certification.").

And, because the Rules Enabling Act precludes Rule 23 from being applied to "abridge, enlarge or modify any substantive right," 28 U.S.C. § 2072(b), the Supreme Court has rejected a **[*21]** "Trial by Formula" approach to certification, explaining that "a class cannot be certified on the premise that [the defendant] will not be entitled to litigate its statutory defense to individual claims." Wal-Mart, 564 U.S. at 367. Accordingly, the Supreme Court has made clear representative evidence or a "sample relied upon [by Plaintiffs] is a permissible method of proving classwide liability" only if "each class member could have relied upon that sample to *establish liability* if he or she had brought an individual action." Tyson, 577 U.S. at 455 (emphasis added); *see* id. at 458 (explaining that the "underlying question" in determining the permissibility of representative evidence is "whether the sample at issue could have been used to establish liability in an individual action," and that the sample in Wal-Mart failed because it could not meet this test). It is not enough, therefore, for the representative evidence to simply be *admissible* in the individual proceeding. Rather, such evidence must on its own be "sufficient to sustain a jury finding ... if it were introduced in each [] individual action." Id. at 459; Tyson, 577 U.S. at 456-57 (noting that reliance on representative evidence "did not deprive petitioner of its ability to litigate individual defenses" only because "there **[*22]** were no alternative means for the employees to establish their hours worked," and thus liability).

III. ANALYSIS

Plaintiffs have taken on the burden of trying to demonstrate, through common proof, that an alleged conspiracy between Defendants to reduce the fill levels of their propane exchange tanks in 2008 resulted in (i) an overcharge (an unlawfully inflated price per gallon) paid by all or nearly all of Defendants' thousands of retail customers that (ii) was subsequently passed on to all or nearly all of the end consumers who purchased propane exchange tanks from those retail customers in the 13 remaining class states. Plaintiffs claim that the putative class suffered common impact and damages in the form of inflated prices on AmeriGas and Blue Rhino branded propane exchange tanks stemming from the 2008 fill reduction on purchases throughout a class period that ends in January, 2015. Ferrellgas's challenge to Plaintiffs' motion for class certification is one directed at their ability to satisfy the predominance requirement under Rule 23(b)(3), the failure of which alone suffices to defeat class certification. The Court's analysis therefore focuses on whether Plaintiffs' have met their burden of **[*23]** establishing predominance.

As a putative class of indirect purchasers, Plaintiffs have a two-part burden in establishing predominance. They must first demonstrate a common impact—in the form of an overcharge—incurred by all or nearly all retailers who directly purchased AmeriGas and Blue Rhino propane exchange tanks throughout the class period. Plaintiffs must then demonstrate that this impact—those overcharges—were passed on by the retailers to all or nearly all of the end customers who purchased AmeriGas and Blue Rhino propane exchange tanks. *See* In re Fla. Cement & Concrete Antitrust Litig., 278 F.R.D. 674, 682 (S.D. Fla. 2012) (IPPs "have a double burden ... [of] first prov[ing] common impact on direct purchasers who bought ... from the Defendants, and then show[ing[that impact was passed through to the indirect purchaser class."); Somers v. Apple Inc., 258 F.R.D. 354, 358 (N.D. Cal. 2009) ("Recovery in an indirect purchaser case under state law requires a demonstration that a defendant 'overcharged [its] direct purchasers for [the product at issue] and that those direct purchasers passed on the overcharge to [the] plaintiffs." (quoting In re Graphics Proceeding Units Antitrust Litig., 253 F.R.D. 478, 499 (N.D. Cal. 2008)); In re Optical Disk Drive Antitrust Litig., No. 3:10-md-2143, 2016 U.S. Dist. LEXIS 15899, 2016 WL 467444, at *7 (N.D. Cal. Feb. 8, 2016) (same). The failure to satisfy either element fails the predominance requirement.

As the Court explains below, Plaintiffs and their expert have failed to carry their burden of demonstrating **[*24]** that class-wide impact and damages can be established with common proof, as is required under Rule 23(b)(3). The Court's analysis proceeds in three parts. First, the Court summarizes the relevant evidence bearing on the class certification issues. Second, the Court analyzes Plaintiffs' proffered common proof with respect to overcharge to retailers. Third, the Court analyzes Plaintiffs' proffered common proof that overcharges were passed through by retailers to plaintiffs resulting in class-wide overcharges.

A. Overview of the Evidence

1. Defendants Sell to Thousands of Diverse Retail Customers

Throughout the class period, AmeriGas and Ferrellgas sold exchange and spare tanks to thousands of individual retail customers for resale to end customers. For example, in 2008, Ferrellgas sold tanks to over 45,000 retail locations in the U.S., with over 12,000 of them located in the 13 remaining class states. (*See* Doc. # 494-46, p. 5 ¶ 15). Over time, the number of retailers increased; in 2017, Ferrellgas sold propane tanks to over 50,000 different retail locations with over 13,000 of them in the 13 class states. (*Id.*).

Defendants' retail customers also varied substantially in type, size, location and volumes **[*25]** of tanks purchased. For instance, Ferrellgas's retail customers include national big-box stores (e.g., Walmart, Sears), home centers (e.g., Lowe's), grocery stores (e.g., Delhaize, Safeway), drug stores (e.g., Walgreens), fuel centers (e.g., Valero), convenience stores (e.g., 7-Eleven), national and local hardware stores (e.g., Ace Hardware and thousands of local stores), and small mom-and-pop shops. (*Id.* at pp. 4-5 ¶ 13).

B. Overcharge

The first step of Plaintiffs' burden to establish predominance is showing, through common proof, that all or nearly all of the thousands of AmeriGas and Ferrellgas direct retailer customers suffered impact—via unlawful overcharges—on the propane tanks that those retailers purchased from AmeriGas and Ferrellgas for resale to the proposed class members. Aside from disputed allegations regarding a one-time fill-level reduction in 2008, Plaintiffs do not proffer any evidence or mechanism for how pricing throughout the entire class period was subject to ongoing collusion. As their expert, Professor Ackerberg, admitted, he has not seen evidence of pricing coordination throughout the class period. (Doc. # 494-3, 44:10-15). Plaintiffs' theory, therefore, is that **[*26]** an inflated price effect on AmeriGas and Blue Rhino propane exchange and spare tanks continued unimpeded and market-wide since the 2008 fill-level change despite: (i) divergent and individually negotiated prices for exchange and spare tanks paid by AmeriGas's and Ferrellgas's retail customers throughout the class period, (ii) the absence of any evidence of communications with respect to pricing between Defendants during the class period, and (iii) the fact that the proposed class periods extend years after the 2008 fill-level adjustment, throughout which time Defendants have been continuously subject to a government investigation and class action lawsuits.

As noted above, Plaintiffs rely on the economic evidence offered by Professor Ackerberg to establish a classwide overcharge. Professor Ackerberg cites to market characteristics, including that propane is a commodity product and that AmeriGas and Ferrellgas are two large suppliers with substantial market share, and opines that common evidence of classwide injury is shown through his overcharge regression, which demonstrates that all or nearly all of AmeriGas's and Ferrellgas's retailer customers incurred a positive and statistically **[*27]** significant overcharge. (*See e.g.* Doc. # 476-1, p. 17 ¶ 43, p. 23 ¶ 63). Professor Ackerberg's regression model combined the revenues and gallons of all retailers in a given month to compute a singular weighted "average" measure of revenues per gallon. (*Id.* at p. 19 ¶¶ 49-50, p. 21 ¶ 57, p. 26 ¶ 64, p. 56; Doc. # 540-1, p. 63). Professor Ackerberg then purported to control for all factors that impact pricing—utilizing just three types of control variables (contemporary costs, seasonality differences, and two catch-all time trend variables for any unobserved factors that impact price over time)—and measured an average impact of the fill-level reduction across Defendants' sales transactions. (Doc. # 476-1, pp. 26-27 ¶¶ 73-80). The result of Professor Ackerberg's regression model consists of four average overcharge estimates—one each for AmeriGas and Ferrellgas's spares and exchange tanks. (Doc. # 540-1, pp. 48, 63). Professor Ackerberg and Plaintiffs contend that, while these average overcharge amounts measured by his regression are not reflective of actual overcharge amounts incurred by any one retailer, they are adequate common proof that all retailers in fact paid a supracompetitive **[*28]** overcharge during the class period. (Doc. # 540, pp. 5-8).

In response, Ferrellgas claims that Professor Ackerberg's regression model is flawed by design and cannot show classwide impact. (*See generally* Docs. ## 494, 589). Ferrellgas argues that, even accepting Professor Ackerberg's regression model, which pools all data across all customers to estimate an "average" overcharge, the model masks the pricing variation that exists in the market and therefore is a methodology that is designed to assume, rather than to assess, the "common impact" that Plaintiffs have the burden of showing at class certification. (Doc. # 494, pp. 14-19; Doc. # 589, pp. 6, 8-10). Professor Murphy ran a series of sub-regressions that disaggregate Professor Ackerberg's model to test for the existence of any measured overcharge for individual retailers by applying Professor Ackerberg's model separately for AmeriGas's and Ferrellgas's ten largest retailers. (Doc. # 494-1, pp. 65-66 ¶¶ 127-130; Doc. # 589-1, pp. 4-6 ¶¶ 8-11). Such disaggregation is a common economic method for testing whether an aggregated overcharge model like that offered by Professor Ackerberg is in fact capable of demonstrating that all retailers **[*29]** were impacted. (*See* Doc. # 494-1, pp. 65-66 ¶¶ 127-130). The results of Murphy's disaggregation demonstrate that significant proportions (over 30%) of the at-issue class sales did not exhibit an overcharge, even though Professor Ackerberg's application of that same model on "aggregated" data otherwise indicates that all of those sales were subject to an overcharge. (Doc. # 589-1, pp. 4-6 ¶¶ 8-11).

Ferrellgas argues that Professor Ackerberg's regression exhibited another fundamental problem: it relies on two sets of variables that measure the passage of time, but Professor Ackerberg arbitrarily interprets one set as measuring the effect of the alleged conspiracy and the other as capturing the effect of all other "unobserved demand or cost shifters" that impact pricing. (Doc. # 589, pp. 12-13) (citing Doc. # 494-1, pp. 73-74 ¶¶ 157-159). Ferrellgas contends that the unreliability of Professor Ackerberg's regression is confirmed by the fact that his predicted overcharges only (and illogically) *increase* after Professor Ackerberg purportedly addressed the analytical and design flaws that Professor Murphy identified. (Doc. # 589, pp. 12-13).

Plaintiffs insist that the Court need not weigh **[*30]** Professor Ackerberg's economic evidence. (Doc. # 476, p. 17). That is incorrect. The law requires the Court to rigorously scrutinize Plaintiffs' proffered evidence in support of class certification, and to resolve contested issues and economic evidence to make findings as to whether Plaintiffs have met their burden of demonstrating *Rule 23*'s requirements by a preponderance of the evidence. *See, e.g., Cope, 319 F.R.D. at 551*; *Lamictal, 957 F.3d at 191*. Accordingly, the Court engages in a rigorous analysis of Plaintiffs' proffered common proof and Ferrellgas's expert evidence. The Court finds that Plaintiffs have not satisfied their burden of establishing a common overcharge.

1. Professor Ackerberg's Use of Averaging and Aggregated Data Masks Variation and Skews the Evidentiary Record

By pooling the revenues and gallons of all retailers in a given month and estimating an "average" overcharge, Professor Ackerberg's overcharge regression masks unequivocal record evidence and data that wholesale prices were regularly negotiated, individually set, and highly dispersed among AmeriGas' and Ferrellgas's individual retail customers. Professor Ackerberg admits that his aggregated regression model cannot account for retailer differences that impact **[*31]** pricing, such as size, type, purchase volume, negotiating leverage, proximity to distribution centers, localized competition, or any other difference among retailers. (*See* Doc. # 494-3, 72:10-76:20). These limitations are problematic because they reflect that Professor Ackerberg's average overcharge models are concealing record evidence of individualized issues.

An example of this involves one of Defendants' major retail customers—Walmart. The record indicates that shortly after the fill level change in 2008, Walmart sought to obtain—and received—pricing concessions from AmeriGas and Ferrellgas beginning in 2009. (Doc. # 494-1, p. 93 ¶ 207; Doc. # 494-28 (Ferrellgas offering to reduce pricing on exchange and spare tanks); Doc. # 494-29, 98:23-99:12). The Walmart buyer responsible for negotiating and purchasing propane exchange tanks testified those reductions constituted the cost concession Walmart wanted at that time. (*See* Doc. # 494-29, 98:23-99:12). Later in 2009, Walmart again negotiated with its suppliers for further cost reductions, which led Ferrellgas to offer another price reduction in January 2010. (*See* Doc. # 494-30). By pooling Defendants' pricing and sales to Walmart with **[*32]** that of all other retail customers, Professor Ackerberg's overcharge regressions mask this evidence of Walmart's individual negotiating leverage and the resulting individualized prices paid by Walmart.

Individualized evidence bearing on whether retail customers in fact paid an overcharge is not limited to just large buyers. There is also evidence in the record that Ferrellgas made cost concessions in May 2009 to hundreds of its independent retailers in California (one of the 13 class states), because Ferrellgas wanted to "stop the rising number of losses we have experienced in California" given "a very competitive environment" and other suppliers' efforts to "steal" Blue Rhino customers. (*See* Doc. # 494-27). Once again, Professor Ackerberg admits that his regression is "not able to isolate regional competition" impacts on pricing. (*See* Doc. # 494-3, 245:11-12). By using averages and estimating an average overcharge for all of Defendant's retail customers, Professor Ackerberg's regression masks such individualized evidence.

Overcharge models that rely on averaging of this sort can be problematic because, by design, they conceal variation in pricing and other individualized issues that **[*33]** may predominate. *See* ABA Section of ***Antitrust Law***, Econometrics: Legal, Practical, & Technical Issues § 13.B.1.c.2 (2d ed. 2014) ("[A]verages may hide substantial differences among customers or products, which may be critical for determining whether there is individual impact."). That is demonstrated here by comparing the results of Professor Ackerberg's average overcharge regression with the actual, individualized evidence in the record. Courts accordingly have held that markets characterized by individualized pricing negotiations are generally incompatible with common proof of impact. In *Blades v. Monsanto, 400 F.3d 562, 572 (8th Cir. 2005)*, the Eighth Circuit held that the plaintiffs' use of average seed prices to demonstrate class-wide impact in the form of supracompetitive seed prices due to a genetically modified seed price-fixing conspiracy failed to satisfy predominance. Because the "market for seeds [was] highly individualized," and the prices for genetically modified seeds "varied widely," the use of an average inflated price was not adequate common evidence "to show inflation through the whole range of [seed] list prices." *Id. at 572, 575*. Similarly, in *In re Lamictal Direct Purchaser Antitrust Litigation, 957 F.3d 184 (3d Cir. 2020)*, the plaintiffs' reliance on average prices could not show class-wide impact in the **[*34]** form of inflated prices for the drug lamotrigine. Given that the lamotrigine "market [was] characterized by individual negotiations and a discounted-brand competition strategy," the Third Circuit vacated the district court's decision to certify the class and remanded the case for a more rigorous analysis of whether the use of averages was masking otherwise individualized injury. *See id. at 188, 192-94*. "Numerous [other] courts have rejected the use of average price differentials to show evidence of antitrust impact that is common to the class." *In re Pharmacy Benefit Mgrs. Antitrust Litig., No. CV 03-4730, 2017 U.S. Dist. LEXIS 6987, 2017 WL 275398, at *21 (E.D. Pa. Jan. 18, 2017)* (collecting cases).

Here, Professor Ackerberg's aggregated overcharge regression suffers from a similar problem: it does not employ common or class-wide evidence capable of demonstrating that any given retailer was overcharged. Nor does it account for the undisputed and highly individualized issues with respect to retailer pricing. Instead, the regression model, designed to arrive at a single "average" overcharge that Plaintiffs contend shows class-wide injury, conceals the significant and undisputed variation in pricing that exists among Defendant's retail customers. That is not a way to solve for individualized issues that predominate with respect to an overcharge. **[*35]** Rather, it is merely a proposal to disregard them, akin to the impermissible methodologies that various courts have rejected as insufficient to carry Plaintiffs' burden under *Rule 23(b)(3)*.

2. Professor Ackerberg's Use of Averaging and Aggregated Data Covers Up the Existence of Numerous Uninjured Class Members

Professor Ackerberg contends that the actual, individually negotiated wholesale prices charged to Walmart—data that is available in the case and part of the record—are less reliable for measuring an overcharge to Walmart compared to pooling and averaging the wholesale prices paid by *all* of Ferrellgas' or AmeriGas's retailer customers, as he does with his average overcharge regression. (Doc. # 540-1, p. 20 ¶ 79). On its face, this argument does not make sense. Given the undisputed evidence of dispersed and varied pricing in this industry, it is questionable that Professor Ackerberg did not study whether his regression model would predict an overcharge for even the largest individual retailers whose purchases comprise significant portions of the class.

Furthermore, Professor Ackerberg's contention regarding statistical noise can be tested, yet it is something he did not do. Professor Murphy, however, **[*36]** tested whether applying Professor Ackerberg's own regressions to disaggregated data for the top ten retailers would introduce statistical noise, and confirmed that it did not. (Doc. # 563-2 pp. 9-10 ¶ 18). Such testing is a common economic technique. (*See id.* ¶¶ 18-19 & n.21). Professor Ackerberg's unsupported suggestion that pricing at non-Walmart stores offers a better estimate of what Walmart was overcharged compared to what is reflected in Walmart's own data is illogical.

Plaintiffs seek to undermine the disaggregated results of Professor Ackerberg's own regression by downplaying the importance of *p*-values, which they claim are "arbitrary." (Doc. # 540, p. 8). *P*-values are an important statistic for understanding whether the results of a regression are reliable evidence of impact. (Doc. # 563-2, pp. 13-14 ¶ 27 & n. 28, 33). They essentially estimate the risk of false positives. (*Id.*). The point estimate for Home Depot's purchases of AmeriGas exchange tanks (which account for approximately 17.4% of all class sales) is illustrative. That point estimate shows a slightly positive overcharge (of $0.02, much lower than the estimate of $0.31 produced by Professor Ackerberg's aggregation **[*37]** of the data) and the associated *p*-value is 0.82, meaning that there is an 82% probability that Professor Ackerberg's regression would estimate an overcharge of $0.02 or larger even if there was in fact no overcharge at all. (*Id.* at p. 6 ¶ 9 & n.10). Such a high percentage, as reflected in the *p*-value, means that the regression result is not reliable economic evidence of whether Home Depot paid an overcharge on its purchases of AmeriGas propane exchange tanks. (*Id.*). Plaintiffs' contention that this Court can simply overlook the significance of a *p*-value, and what it reflects regarding the reliability of a regression's results as proof of impact, is without merit.

There is also no basis for finding *p*-values as high as 0.29 (Ace Hardware exchanges), 0.39 (Home Depot spares), and 0.82 (Home Depot exchanges) to be statistically significant, and Professor Ackerberg's attempt to characterize these results as evidence of an overcharge is inconsistent with his published work outside of litigation and contradicted by the various publications that he references. (*See* Doc. # 589 p. 12 n.5; Doc. # 589-1, p. 11 ¶ 24 & n.25). Professor Ackerberg's willingness to now accept *p*-values at unreliably **[*38]** high values is not credible given the contrary positions regarding *p*-values that he takes in his original class certification declaration and his peer-reviewed work. Plaintiffs cannot avoid the empirical and substantive evidence confirming that Professor Ackerberg's use of a pooled regression to calculate a classwide average overcharge is impermissibly masking individualized differences among class members that bear directly on whether class members suffered any injury. That is not sufficient evidence to carry Plaintiffs' burden of establishing predominance under Rule 23(b)(3).

3. Professor Ackerberg's Overcharge Model Suffers from Other Design Flaws That Render it Unreliable and Incapable of Satisfying Plaintiffs' Rule 23 Burden

A reliable regression isolates the non-collusive factors that affect price to determine whether, and to what extent, differences in prices between a benchmark period and the at-issue period may be attributed to alleged collusion. (Doc. # 494-1, p. 61 ¶ 116 & n. 145, p. 69, ¶ 141). Following a rigorous analysis, the Court is unconvinced that Professor Ackerberg's regression accomplishes this goal. The indicator (or "dummy") variables used for the alleged conduct periods, which Professor **[*39]** Ackerberg interprets as capturing solely the effect of the alleged collusive conduct, in fact capture the effects of *other* factors that influence price, such as undisputed increases in demand over time and inflation. (*Id.*).

As stated in a popular econometrics textbook, "[t]he general linear multiple regression model is a particular specification of some economic process in which the values of a dependent variable (or regressand) are determined by several explanatory variables (or regressors)." (Doc. # 494-3, p. 61 ¶ 116) (citing Mirer, Thad W., *Economic Statistics and Econometrics*, Third Edition). In Professor Ackerberg's regression model, the dependent variable is price per gallon, and he claims his regression can evaluate price per gallon as a function of explanatory variables that purportedly represent "costs, demand, and the nature of competition." (Doc. # 476-1, p. 26, ¶¶ 73-74). However, given the individualized prices negotiated by Ferrellgas's and AmeriGas's tens of thousands of customers, Professor Ackerberg's overcharge regression model is notably bare with respect to variables that purport to control for all factors impacting price other than the alleged conduct. (*Id.*). The **[*40]** regression contains only variables that control for costs, the seasons, and "time trend," variables that supposedly capture every other "unobserved" factor that impact pricing to all customers, across all states, and over the multi-year class period. *Id.* Professor Ackerberg attributes any changes to the "predicted" prices in the conduct period to a dummy (or "conspiracy") variable that his regression turns on at a specified time period corresponding with the beginning of the alleged class period. *Id.*

Further, Professor Ackerberg designs his dummy variable to turn on beginning on specific dates that are dictated by the settlement releases from *Propane I* (*i.e.*, December 2009 for AmeriGas and October 2011 for Ferrellgas). (*Id.* at pp. 26-27 ¶ 76). So while he purports to study the price effects of the 2008 fill reduction, which Plaintiffs claim was the result of collusion, his regression is designed in such a way as to only estimate for the existence of impact beginning with the start of a class period that is set entirely by the *Propane I* settlement release dates. (*Id.*). However, even as a matter of sheer logic, if the effect of the 2008 fill-level reduction was going to dissipate, it **[*41]** would dissipate gradually over time. It wouldn't just disappear suddenly on one date. In particular, it wouldn't disappear on the release date magically.

C. Pass Through

Because Plaintiffs' common proof with respect to overcharge fails, that itself suffices to defeat predominance. The Court nevertheless addresses the issue of pass-through. As their common proof of class-wide pass-through, Plaintiffs offered pass-through studies conducted by Professor Ackerberg. (*See e.g.* Doc. # 476-1, pp. 28-29, ¶¶ 83-91). His studies were limited to just three of AmeriGas's and Ferrellgas's thousands of individual retail customers—Walmart, UNFI, and Dollar General. (*Id.*). For each of these retailers, Professor Ackerberg compared the average wholesale prices paid and retail prices charged for AmeriGas and Blue Rhino propane exchange tanks before and after the 2008 fill reduction. (*Id.* at p. 28 ¶ 83). Based on those calculations, he concludes that all of AmeriGas's and Ferrellgas's thousands of retail customers passed on an overcharge at a "conservative" rate of 100%. (*Id.* at p. 30, ¶ 96). Further, although the class period ends in January, 2015, Professor Ackerberg's pass-through studies end in 2012—nearly **[*42]** three years before the end of the class period, because, as he himself acknowledges, "the empirical effect of Defendants' coordinated fill reduction is less likely to be captured farther away from the event date." (*Id.* at p. 29 ¶ 90).

After careful consideration, the Court concludes that Professor Ackerberg's pass through studies cannot satisfy *Rule 23(b)(3)*'s predominance requirement. As an initial matter, the Court has serious doubt over whether Professor Ackerberg's analysis can reliably isolate and measure the pertinent inquiry: whether (and the extent to which) a wholesale cost *change* causes a *change* in retail price. His studies just employ a formula to capture whether there was a change in the retail price per gallon relative to a change in wholesale price per gallon for the propane exchange tanks purchased and resold by three retailers. That does not actually measure whether a cost change *due to an overcharge* as opposed to some other reason was passed-on by these retailers to their customers.

Setting that aside, the fundamental problem with Professor Ackerberg's pass-through analysis is that its reliance on averages and its miniscule sampling of retailer data cannot reliably account for the **[*43]** variation in wholesale and retail prices across AmeriGas's and Ferrellgas's thousands of retailer customers. The evidence is undisputed that those retailer customers paid individually negotiated wholesale prices and then resold AmeriGas and Blue Rhino propane exchange tanks at individually-set retail prices. Professor Ackerberg's pass-through studies do not account for any of this variation, and he even admitted that his pass-through studies "cannot target individual cases," since his "conclusions are about averages." (Doc. # 494-3, 349:3-351:6).

Courts have consistently rejected such pass-through methodologies because their use of averaging and sampling to assume a singular pass-through rate by all intermediaries, without underlying evidentiary support, can mask individualized questions that otherwise predominate. For example, in *In re Processed Eggs Products Antitrust Litigation, 312 F.R.D. 124, 160 (E.D. Pa. 2015)*, class certification was denied because the indirect purchaser plaintiff's "pass-through model improperly assume[d], without adequate support, that because one retailer passed through the overcharge at a certain rate averaged across its stores, all retailers *nationwide* shared that overcharge rate or, at least, passed along some positive overcharge." (Emphasis **[*44]** in original). While "[t]he case law understandably allows for averages and aggregations," it must be "convinced that the averages and aggregations are not masking individualized issues that are likely to predominate"—a test which plaintiffs' expert's pass-through model failed. *Id.; see also In re Methionine Antitrust Litig., 204 F.R.D. 161, 164-65 (N.D. Cal. 2001)* (denying certification where indirect purchasers' expert's "method assume[d] that there is a single pass-through rate for all direct and indirect resellers, yet ... point to nothing in the record that suggest that such an assumption is valid"); *In re Flash Memory Antitrust Litig., No. C 07-0086 SBA, 2010 U.S. Dist. LEXIS 59491, 2010 WL 2332081, at *12-13 (N.D. Cal. June 9, 2010)* (finding indirect purchaser plaintiffs failed to satisfy *Rule 23(b)(3)* where their expert's regression "simply assume[d] that the pass through rates for all personal media players are the same and are equal to the average pass through rate for all products").

Professor Ackerberg's pass-through studies suffer from the same flaw. Based on a study of sales to only three retailers that ends three years before the end of the class period (and therefore comprise less than 10% of sales to the putative class), Professor Ackerberg makes the inferential leap that *all* of AmeriGas's and Ferrellgas's thousands of retailers similarly passed on an overcharge, and at the same rate. **[*45]** The only evidence in the record, however, casts doubt on whether there was any pass-through at all. For example, Walmart—one of the three retailers that Professor Ackerberg did study—indicated that it would not always pass on price increases or decreases from a supplier to its customers. (Doc. # 494-31, 130:18-132:5). And although Ferrellgas lowered its wholesale prices for propane exchange tanks sold to Walmart between 2009 and 2010, Walmart kept its retail prices for those tanks the *same* throughout that period, further undercutting any possible conclusion that Wal-Mart could have passed on any overcharges.[6] (*Id.* at 155:6-19; Doc. # 494-1, p. 85 ¶ 202). Evidence from another retailer, Fry's, indicated that it maintained the same retail price for AmeriGas propane exchange tanks for a long time, despite changes in the cost. (Doc. # 589-3, p. 8-15 (Exhibit 2)). There is no other retailer evidence in the record.[7]

Professor Ackerberg's pass-through studies not only fail to account for any of this evidence, but when weighed against the actual evidence in the record, are clearly masking this and other individualized issues relating to pass-through by employing a common, pass-through rate **[*46]** for all the thousands of Ferrellgas's and AmeriGas's retailer customers. This cannot satisfy *Rule 23(b)(3)*'s predominance standard. *See* *In re Processed Eggs Prods. Antitrust Litig., 312 F.R.D. at 160*.

The final infirmity that defeats predominance is the fact that Professor Ackerberg's pass-through studies are limited to the end of 2012, when the alleged class period here goes through the end of January, 2015. A pass-through analysis that purports to estimate class-wide impact but falls short of the alleged class period by nearly three years cannot satisfy Plaintiffs' burden under *Rule 23(b)(3)*. Indeed, Professor Ackerberg admitted as much in his own report—that his pass-through analysis ends in 2012 because "the empirical effect of Defendants' coordinated fill reduction is less likely to be captured farther away from the event date" (Doc. # 476-1, p. 29 ¶ 90)—i.e., the 2008 fill reduction.[8] But that is precisely what *Rule 23* requires Plaintiffs to show—that all or nearly all of Defendants' retailer customers passed-on overcharges to the indirect purchaser plaintiffs throughout the class period. A set of pass-through studies for three retailers through the end of 2012 cannot satisfy Plaintiffs' burden of demonstrating class-wide pass-through for a class period that ends in January, **[*47]** 2015. Plaintiffs have not satisfied their burden of demonstrating that common issues predominate as to impact to the proposed indirect purchaser class.

CONCLUSION

For the reasons set forth in this Order, and following this Court's rigorous analysis of Plaintiffs' proffered proof and expert analyses, the Court concludes that Plaintiffs have not met their burden of demonstrating that common issues will predominate as to their claims. Plaintiffs' motion for class certification is therefore DENIED.

IT IS SO ORDERED.

---

6 [ILLEGIBLE FOOTNOTE]

7 Plaintiffs on reply offered the opinion that "cost-plus" pricing is "prevalent" in the industry, such that "there is no reason to think that any overcharge would not be passed through," (Doc. # 540 at 11), but that is nothing more than conjecture, unsupported by any actual evidence in the record. It is not something that can be relied upon as common proof of class-wide pass-through. *See* *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 242, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* (expert opinion is "useful as a guide to interpreting market facts, but it is not a substitute for them").

8 Plaintiffs sought to undo this admitted limitation of Professor Ackerberg's pass-through studies by pointing to how Professor Ackerberg also analyzed data beyond 2012 for robustness. But the fact that Professor Ackerberg undertook such a robustness analysis and nevertheless concluded, based on his expertise, to limit his opinions and conclusions regarding pass-through on data only through 2012 just confirms that his studies cannot serve as proof of any impact beyond 2012.

Opinion by: LURANA S. SNOW

Opinion

REPORT AND RECOMMENDATION

THIS CAUSE is before the Court on the Defendant MidOcean Partners IV, L.P.'s Motion for Attorneys' Fees and Litigation Costs (ECF No. 266),which was referred to United States Magistrate Judge, Lurana S. Snow. The Motion is fully briefed and ripe for consideration.

I. PROCEDURAL BACKGROUND

The Plaintiffs brought this action by Complaint filed February 7, 2019 against the Defendants for alleged violations of the *Sherman Act*. (ECF No. 1) They asserted that MidOcean Partners IV, L.P. ("MidOcean") violated the Act by conspiracy to commit concerted refusal to deal (Count IV), and also asserted a state law claim of tortious interference with a contract and business relationship (Count V). These claims arose from the alleged marketplace actions of Co-Defendant Kidcraft, Inc. ("Kidcraft"), a portfolio company of MidOcean. MidOcean was not named in Counts I-III of the Complaint, which contained *Sherman Act* claims against Kidcraft only. MidOcean and Kidcfaft were jointly represented by the law firms of Gibson Dunn and Ackerman.

On November 27, 2019, MidOcean offered the Plaintiffs **[*3]** $1,000.00 to settle the case as the Plaintiffs' Count V (the state law claim), which was declined. On March 31, 2021, the Defendants' Motion for Summary Judgment was granted on all claims against both Defendants. (ECF No. 255) The Order granting the Motion notes that the Plaintiffs' Count V claim for tortious interference with contract and business relations depended on their success on the antitrust claim asserted in Count IV. Since that claim had failed, the Plaintiffs could not prevail on the state law claim. Id. at 8. MidOcean bases its claim for fees and expenses on the Florida Offer of Judgment Statute, *Fla. Stat. § 768.79*, which authorizes such a claim when a party fails to recover at least 75% of the opponent's offer of judgment. MidOcean seeks attorney and paralegal fees in the total amount of $4,087,135.01, representing an average billing rate $680.40 per hour for 4,020.6 hours of work by Gibson Dunn and an average hourly rate of $381.25 for 1,526.60 hours of work by Ackerman. MidOcean also seeks nontaxable costs in the amount of $983,739.44, for a total fees and claim of $5,070,874.45 (ECF No. 266 at 9)

To establish the reasonableness of these requests, MidOcean states:

> Antitrust litigation **[*4]** is . . . expensive to defend against claims of the nature of those launched by Plaintiffs against Defendants, particularly when Plaintiffs pursue discovery as extensive as they sought here against MidOcean and Kidcraft.
> Morever, the stakes in this case were very high. . . . Plaintiffs' initial damage disclosures claimed over $79 million in compensatory damages which, if successful, would have been trebled under the antitrust laws for a potential recovery in excess of $237 million.

Id. at 12. MidOcean contends that the instant Motion should be granted summarily based on the Plaintiff's failure to comply with Local Rule 7.3.

In response, the Plaintiffs argue that MidOcean's offer of judgment was defective for several reasons: (1) Florida's Offer of Judgment statute is pre-empted by the *Sherman Act*; (2) MidOcean's offer did not comply with the statute because it would not have resolved all damages that otherwise would have been awarded in a final judgment and because it excluded punitive damages, and (3) the Offer is unenforceable because it was not made in good faith. The Plaintiffs also contend that MidOcean is not entitled to "fees on fees" for litigating the amount of attorneys' fees to which it is entitled; **[*5]** Gibson Dunn's hourly rates exceed those charged by comparable South Florida attorneys; the hours claimed are excessive and duplicative, and the billing statements are inadequate because of consistent block billing. The Plaintiffs also argue that MidOcean's claimed costs are not recoverable or should be greatly reduced. The Plaintiffs do not address their own alleged failure to comply with Local Rule 7.3.

II. DISCUSSION

A. Fla. Stat. § 768.59

The Defendants contend that they are entitled to an award of attorneys' fees pursuant to *Fla. Stat. § 768.79* (2021), Florida's offer of judgment statute. The Defendants correctly point out that this statute is substantive, and thus applies in federal diversity cases. *Southeast Floating Docks, Inc. v. Auto-Owners Ins. Co., 82 So. 3d 73 (Fla. 2012)*. Pursuant to *Fla. Stat. § 768.79 (6)(a)*,

> If a defendant serves an offer which is not accepted by the plaintiff and if the judgment obtained by the plaintiff is at least 25 percent less than the amount of the offer, the defendant shall be awarded reasonable costs, including investigative expenses, and attorneys' fees, calculated in accordance with the guidelines promulgated by the Supreme Court, incurred from the date the offer was served. . . .

Since the judgment awarded to the Plaintiff was $0, it clearly was less than 25% of the $1,000.00 offer of judgment extended **[*6]** by the Defendants.

Subsection (2) of the statute requires that the offer "state with particularity the amount offered to settle a claim for punitive damages, if any," that the offer "shall be construed as including all damages which may be awarded in a final judgment." Moreover, offers made under *§ 768.79* are governed by *Fla. R. Civ. P. 1.442(c) (1)-(2)*, which requires that the offer be in writing and identify the Florida law under which it is being made, and that it

> (A) name the party or parties making the proposal and the parties to whom the proposal is being made;
>
> (B) state that the proposal resolves all damages that would otherwise be awarded in a final judgment in the action in which the proposal is served, subject to *subdivision (F)*;
> (C) state with particularity any relevant conditions;
> (D) state the total amount of the proposal and state with particularity all nonmonetary terms of the proposal;
> (E) state with particularity the amount proposed to settle a claim for punitive damages, if any;
> (F) state whether the proposal includes attorney's fees and whether attorneys' fees are part of the legal claim; and
> (G) include a certificate of service in the form required by Florida Rule of Judicial Administration 2.516.

The Court may refuse to award fees and costs if it determines that the offer was not made **[*7]** in good faith. *Fla. Stat. § 768.79 (7)(a)*. In the instant case, the Plaintiffs contend that MidOcean's offer of judgment was not tendered in good faith, and also that it violated *§ 768.79* and *Rule 1.442(c)(2)(B)* and *(E)* because it did not resolve all damages that would otherwise be awarded in a final judgment in the action and did not state with particularity the amount proposed to settle a claim for punitive damages. The Plaintiffs also argue that *§ 768.79* is pre-empted by federal ***antitrust law***.

1. Resolution of All Damages in the Case

The Plaintiffs' most persuasive argument is that MidOcean's Offer of Judgment (ECF No. 285-2) did not state that it resolved all damages that would otherwise be awarded in a final judgment in the action. The Offer states, in pertinent part:

> 3. This Offer seeks to fully and finally settle and resolve OJC's claim made for Tortious Interference With Contract and Business Relationship against MidOcean (Count V of the Complaint), including any and all claims for economic damages, including compensatory damages, special damages and consequential damages, court costs, prejudgment interest, and any requests for other relief from the Court in connection with the claim asserted in Count V of the Complaint that would otherwise **[*8]** be awarded in a final judgment for OJC and against MidOcean.

Id. at 1. There is no mention of the federal claim in Count IV of the Complaint, alleging violation of the *Sherman Act* by MidOcean, and the Plaintiffs argue that this omission is fatal. MidOcean's response, by way of a footnote, is that "[a]n offer of judgment cannot include federal claims, therefore only the tortious interference claim could be included." (ECF No. 266 at 7 n.9) MidOcean reasons that because the offer of judgment encompassed all claims it was permitted to include, it was sufficient under the applicable statute and rule. Id.

This reasoning is circular, if not disingenuous. In *Harrington v. Roundpoint Mortg. Servicing Corp.*, the plaintiff alleged that the defendants violated the federal *Telephone Consumer Protection Act (TCPA)* and the Florida Consumer Collection Practices Act (FCCPA), and the court entered judgment in favor of the Defendants on both counts. *Harrington v. Roundpoint Mortg. Servicing Corp., No. 2:15-cv-322-FtM-28MRM, 2018 U.S. Dist. LEXIS 146260, 2018 WL 4100957 (M.D. Fla. Aug. 9, 2019)*. The Defendants sought an award of attorneys' fees and costs pursuant to *Fla. Stat. § 768.79* based on an offer judgment that was explicitly limited to the state FCCPA claim. The Plaintiff argued that the offer was invalid because it failed to encompass the federal claim.

The court first noted that while the Eleventh Circuit had held *§ 768.79* to be substantive in nature and thereby **[*9]** applicable under *Erie R.Co. v. Tompkins, 304 U.S. 64, 58 S. Ct. 817, 82 L. Ed. 1188 (1938)*, it had not made a determination on the nature of *Rule 1.442(c)(2)(B)*. However, in *Primo v. State Farm Mut. Ins. Co.*, the appellate court stated that while it need not decide the issue, "*Rule 1.442(c)(2)(B)* is likely substantive." *Primo v. State Farm Mut. Ins. Co., 661 F. App'x 661, 664 n.4 (11th Cir. 2016)*. The *Harrington* court found both the statute and the rule to be substantive law, and applied the "'outcome determinative test' to evaluate whether the Rule's application would be so important to the outcome that failure to apply it would unfairly discriminate against citizens of the forum State, or be likely to cause a plaintiff to choose federal court." *Harrington, 2018 U.S. Dist. LEXIS 146260, 2018 WL 4100957 at * 4* (citing *Horowitch v. Diamond Aircraft Indus., Inc., 645 F.3d 1254, 1258 (11th Cir. 2011)*). The court found that the question posed by this test must be answered in the affirmative because without a statement that an offer resolves all damages, "an offeree cannot properly evaluate an offer because certain claims remain unresolved." Id. Accordingly, the court found the Defendants' partial offer of judgment which applied only to the state claim was unenforceable.

Harrington is consistent with the Florida Supreme Court's order *In re Amendments to Fla. R. Civ. P., 131 So. 3d 643, 643-44 (Fla. 2013)*, adopting the 2013 amendment to *Rule 1.442* which deleted "the requirement that the proposal for settlement 'identify the claim or claims the proposal is attempting to resolve' and replace[d] it with the requirement that the proposal 'state that **[*10]** [it] resolves all damages that would otherwise be awarded to a final judgment in the action.'" The Supreme Court noted that there were two purposes for this substitution: to curtail partial proposals for settlement and to ensure that the rule comported with the corresponding provision of *§ 768.79*, which states that an offer of judgment is construed as including all damages which could be awarded in a final judgment. *Id. at 644*. Moreover, the Florida Supreme Court has held that because the language of *§ 768.79* and Rule 1.422 are in derogation of common law, it must be strictly construed, and even a technical violation will invalidate an offer. *Campbell v. Goldman, 959 So. 2d 223, 226-27 (Fla. 2007)*.

In the instant case, MidOcean implicitly acknowledges the weakness of its argument on this issue by mischaracterizing the purpose of the statute by stating, "*Section 768.79* provides a mechanism for encouraging early settlement (*or partial settlement*) of cases by allowing for the recovery of fees from the date an offer under the statute is made." (ECF No. 289 at 4) (emphasis added) Instead, as noted above, the purposes of the 2013 amendment to *Rule 1.442* were to *curtail* partial settlements and to conform the rule to the provisions of the offer of judgment statute. Indeed, even before the 2013 amendment, **[*11]** Florida courts have held that offers of judgment which do not encompass all claims for relief are invalid. See, e.g., *Palm Beach Polo Holdings v. Equestrian Club Estates Prop. Owners Ass'n, 22 So. 3d 140 (Fla. 4th DCA 2009)*; *Bayley Products, Inc. v. Cole, 720 So. 2d 550 (Fla. 4th DCA 1998)*.

The undersigned concludes that because MidOcean's Offer of Judgment failed to resolve all damages which would otherwise be awarded in a final judgment in the case, it violated the provisions of *Fla. Stat. § 768.79* and *Fla. R. Civ. P. 1.442(c)(2)(B)* and is unenforceable. The fact that the federal *Sherman Act* claim could not have been included in the offer under this statute is immaterial, since the Florida statute and rule must be strictly construed and were designed to eliminate partial settlements. Moreover, this case was filed in federal court, where the appropriate vehicle is an offer of judgment under *Fed. R. Civ. P. 68*. The fact that MidOcean was unable to avail itself of a more favorable state procedure is not a basis to award attorneys' fees and expenses in derogation of common law.

2. Bad Faith

The Plaintiffs also contend that MidOcean's $1,000.00 offer of judgment, made early in the litigation, was not made in good faith, noting that proof of the state claim was dependent on the Plaintiff's ability to prove the *Sherman Act* claim. Thus, "the fact that MidOcean is really seeking its fees for defending an antitrust case is undeniable; had OJC accepted **[*12]** MidOcean's offer of judgement, nothing at all about MidOcean's defense would have changed as it would have needed to do the exact amount of work to defend against the antitrust claims." (ECF No. 285 at 4) (emphasis omitted)

As noted earlier, this Court may refuse to award fees and costs if it determines that the offer was not made in good faith. *Fla. Stat. § 768.79 (7)(a)*. "Although 'nominal offers are suspect where they are not based on any assessment of liability and damages,' they can be valid if the offerors have 'a reasonable basis at the time of the offer to conclude that their exposure was nominal.'" *McMahan v. Toto, 311 F.3d 1077, 1083 (11th Cir. 2002)* (quoting *Fox v. McCaw Cellular Commc's of Fla., Inc., 745 So. 2d 330, 332 (Fla. 4th DCA 1998)*). This is because "the good faith requirement of *§ 768.79(7))(a)* does not 'demand that an offeror necessarily possess, at the time he makes an offer or demand under the statute, the kind or quantum of evidence needed to support a judgment. The obligation of good faith merely insists that the offeror have some reasonable foundation on which to base the offer.'" *McMahan, 311 F.3d at 1083* (quoting *Schmidt v. Fortner, 629 So. 2d 1036, 1039 (Fla. 4th DCA 1993)*).

Nevertheless, an "offer of judgment ought to fairly account for the risk of litigation, the costs and fees at stake, and the other components of uncertainty that sophisticated persons assay when deciding whether to settle," and "should be sufficient **[*13]** to cause a temperate and knowledgeable attorney to pause and carefully evaluate his client's stance." *Stouffer Hotel Co. v. Teachers Ins., 432 F. Supp. 874, 875 (M.D.Fla. 1995)*. Although not controlling on this issue, the reasonableness of the Defendants' assessment of their exposure may be bolstered by the fact that they obtained a favorable judgment. *McMahan, 311 F.3d at 1083-84*. The burden of proving that an offer was not made in good faith is on the offeree. *Id. at 1083*; *Schmidt, 629 So. 2d at 1041 n.6*.

The Plaintiffs cite several cases which they contend support a finding of bad faith in this case. In *JES Props., Inc. V. USA Equestrian, Inc., 432 F. Supp. 2d 1283 (M.D. Fla. 2006)*, the complaint contained several counts alleging violation of the Sherman Act, the Florida Antitrust Act and the Florida Deceptive and Unfair Trade Practices Act (FDUPTA). The defendants tendered offers of judgment proposing to settle five of these claims for $500 each.

The court rejected the defendants' motion for attorneys' fees and costs under *§ 768.79*, noting first that the Defendants had failed to state the basis for their belief that their exposure was nominal. *Id. at 1295*. The court went on to point out that "[t]he Florida Supreme Court recognizes 'that attorney fees awarded pursuant to the offer of judgment are sanctions. . . for unreasonable rejections of offers of judgment,'" and "'unnecessarily continuing the litigation.'" Id. (quoting **[*14]** *Sarkis v. Allstate Ins. Co., 863 So. 2d 210, 218, 222 (Fla. 2003)*). The court further observed that the case before it was "a complex antitrust case with multiple parties and numerous allegations, requiring lengthy and substantial discovery," and at the time the offers of judgment were served, substantial discovery remained to be completed. Id. The court concluded that "given the novelty and difficulty of the issues in this case, and the timing and amount of the . . . offers of judgment, that the offers of judgment were not in good faith." Id. [1]

In the instant case, the Plaintiffs point out that MidOcean's Offer of Judgment was served just eight days after this Court denied its motion to dismiss, before any meaningful discovery had been performed and six months before any depositions were taken. Moreover, no experts had been engaged at the time of the Offer. The undersigned notes that although MidOcean responds that it had a good faith belief that it would prevail at the time the offer of judgment was made, MidOcean simultaneously justifies its claim for attorneys fees and costs on the ground that this was a complex case involving federal and state law, multiple experts, significant research and nine months of

[1] The JES Properties court also held that *§ 768.79* was pre-empted by federal ***antitrust law*** and that the offers of judgment were invalid because they were ambiguous and failed to address the plaintiffs' claims for injunctive relief. *JES Props., 432 F. Supp. 2d at 1293-94*.

extensive discovery, with **[*15]** a potential exposure of $237 million. (ECF No. 266 at 3, 17) MidOcean should not be permitted to have it both ways.

It is important to note that MidOcean's Offer of Judgment applied only to one state law count against one defendant, while the Complaint contains five state and federal counts against two defendants. Additionally, the parties agree that proof of the state law claim against MidOcean in Count V was wholly dependent on proof of the *Sherman Act* claim in Count IV, which was not covered by the offer of judgment. As a result, acceptance of the offer by the Plaintiffs would not have saved either party or the court any time or expense. MidOcean stood to benefit only if the Plaintiffs rejected the offer and lost the case, creating the opportunity for MidOcean to claim its fees and costs for defending both Defendants on all counts, as it now has done.

Clearly an offer which confers no benefit on anyone unless it is rejected cannot have been made in good faith. Both state and federal courts have refused to countenance this type of ploy, recognizing that the "spirit of the offer of judgment statute is to encourage litigants to resolve cases early to avoid incurring substantial amounts of court **[*16]** costs and attorneys' fees" by imposing "a penalty for parties who fail to act reasonably and in good faith in settling lawsuits." *Eagleman v. Eagleman, 673 So. 2d 946, 947 (Fla. 4th DCA 1996)*. Thus, "an offer of judgment or offer of settlement or the same thing by another name ought to be more than a carefully crafted, cleverly calculated and disingenuous attempt to shift the economic burden of litigation." *Stouffer Hotel v. Teachers Ins., 944 F. Supp. 874, 875 (M.D. Fla. 1995)*. "The point of the statute is not to force plaintiffs into accepting unreasonable offers for fear of having to pay defendants' attorneys fees should they refuse and ultimately obtain a lesser judgment." *James v. Wash Depot Holdings, Inc., 489 F.Supp. 2d 1336, 1340 (S.D.Fla. 2007)*.

Offers such as the one tendered by MidOcean in this case "are not made in a sincere attempt to settle the plaintiffs' claims." Hendrix v. Evenflo Co., This is a good example of why a partial offer of judgment such as the Offer in this case is not permitted under Florida law, as discussed in the preceding section. The undersigned finds that MidOcean's $1000.00 offer of judgment was not made in good faith and should not be enforced.

3. Other arguments

The Plaintiffs also argue that MidOcean's offer of judgment was unenforceable because it excluded punitive damages and was ambiguous, and because *§ 768.79* is pre-empted by federal ***antitrust law*** which does **[*17]** not explicitly permit an award of attorneys' fees to successful defendants.

Regarding the issue of punitive damages, the Offer of Judgment states, "[a]t the present time, there is no claim for punitive damages pending, and thus, no portion of the amount offered . . . is being offered to settle a claim for punitive damages." (ECF No. 285-2 at 2) The Plaintiffs point out that Count V of the Complaint does include a claim for punitive damages (ECF No. 1 at 13), and argue that MidOcean's Offer was ambiguous because it failed to state whether a separate offer to resolve the punitive damages claim would be forthcoming. MidOcean responds that the Plaintiffs waived their right to punitive damages by failing to include them in their *Rule 26(a)(1)* disclosures. Thus, a ruling on the Plaintiffs' argument would require this Court to decide whether a claim for punitive damages is extinguished by a plaintiff's failure to include those damages in its *Rule 26(a)(1)* disclosures.

With respect to preemption, the Eleventh Circuit has not resolved the issue of whether *§ 768.79* is preempted by federal ***antitrust law***. However, in *Snyder v. Accord Corp., 811 F. App'x 447, 464 (10th Cir. 2020)*, the Tenth Circuit rejected the appellant's claim that a Colorado statute permitting a fee award was preempted by **[*18]** federal RICO and antitrust laws. MidOcean emphasizes that the Sherman/*Clayton Act* is silent on the issue of fee awards to prevailing defendants, and in a case cited by the court in Snyder, *Smith v. Psychiatric Sols, Inc., 750 F.3d 1253, 1257 (11th Cir. 2014)*, the Eleventh Circuit found that a federal statute's silence does not serve as an implicit prohibition against awarding attorneys' fees when authorized elsewhere. Based on this reasoning, the undersigned believes it likely that the Eleventh Circuit, if presented with the issue, would hold that federal ***antitrust law*** would not preempt the Florida Offer of Judgment statute.

The parties have advanced colorable arguments on both sides of these two issues. Since the undersigned believes that MidOcean's Offer of Judgment clearly was invalid because it fails to include all of the damages which could have been included in a final judgment and because it was not made in good faith, it does not appear to be necessary to resolve these close questions. Should the District Judge disagree, the Motion can be re-referred for a supplemental Report and Recommendation addressing these issues.

B. Local Rule 7.3

MidOcean contends that this Court should grant the instant Motion in its entirety because the Plaintiffs did not comply with the requirements **[*19]** of Local Rule 7.3 because they failed to submit an affidavit regarding their counsel's hourly rates, and failed to make specific objections to the time entries of MidOcean's counsel. The procedure for obtaining an award of attorneys' fees and costs is governed by the Local Rules for this District. *S.D. Fla. R. 7.3(a)* sets out the "mechanism to assist parties in resolving fee and costs disputes by agreement" and states that "a motion for an award of attorneys fees and/or non-taxable expenses and costs arising from the entry of a final judgment or order shall not be filed until a good faith effort to resolve the motion, as described in paragraph (b) below, has been completed."

The Rule also sets forth the procedure for filing a response to a fees motion, which requires the respondent to "describe with reasonable particularity each time entry or nontaxable expense to which it objects, both as to issues of entitlement and as to amount," and to "provide supporting legal authority." If the respondent objects to an hourly rate, "its counsel must submit an affidavit giving its firm's hourly rates for the matter and include any contingency, partial contingency, or other arrangements that could change the effective hourly rate."

Local Rule 7.3(b) requires **[*20]** the movant to serve a draft motion for fees to the respondent within 30 days after entry of the final judgment or order. The parties must then confer and attempt in good faith to agree on entitlement to and the amount of fees and expenses not taxable under *28 U.S.C. § 1920*. Once again, the respondent must "describe in writing and with reasonable particularity each time entry or nontaxable expense to which it objects, both as to issues of entitlement and as to amount, and shall provide supporting legal authority.

The Plaintiffs do not contest MidOcean's assertion that they failed to submit an affidavit pertaining to their counsel's hourly rates, or that prior to the filing of the instant Motion they failed to provide specific objections to the time entries of MidOcean's attorneys. The undersigned notes, however, that the Plaintiffs did file an Expedited Motion to Bifurcate Entitlement and Amount and Other Relief (ECF No. 267). The undersigned denied the request to bifurcate as untimely, but in light of the significant amount of fees requested by Defendant, an extension of time to respond to the Motion was granted. For the same reason, the undersigned found that the Plaintiffs failure to comply with **[*21]** all of the requirements of Local Rule 7.3 would not result in a waiver of all their objections to the hourly rates and hours claimed by counsel for the Defendant. (ECF No. 274 at 2)

Thus, the Court already has ruled that the Plaintiffs were entitled to object to the hourly rates and hours claimed by counsel for MidOcean. The undersigned will expand the prior ruling to excuse the Plaintiffs' failure to submit an affidavit as the hourly rates of their attorneys. Especially in view of the undersigned's conclusion that MidOcean is not entitled to any award of attorneys' fees and litigation expenses, MidOcean's argument that the instant Motion should be granted based on the Plaintiffs' violation of Local Rule 7.3 is rejected.

C. Claimed Attorneys' Fees and Nontaxable Costs

Finally, the Plaintiffs contend that MidOcean is not entitled to "fees on fees" for litigating the amount of attorneys' fees to which it is entitled; Gibson Dunn's hourly rates exceed those charged by comparable South Florida attorneys; the hours claimed are excessive and duplicative, and the billing statements are inadequate because of consistent block billing. The Plaintiffs also argue that MidOcean's claimed costs are not recoverable or should be **[*22]** greatly reduced.

The undersigned notes that the supporting documents in this case comprise hundreds of pages of billing statements and receipts, covering more than 5,500 hours of work and a total claim exceeding $5 million. (ECF Nos. 266-2; 266-3) The amount of time required for the Court to review these records and evaluate the Plaintiffs' objections would be considerable, to say the least. Therefore, the undersigned will address MidOcean's claimed fees and costs upon re-referral if the District Judge determines that MidOcean is entitled to an award.

III. CONCLUSION

This Court having considered carefully the papers, arguments of counsel, and the applicable case law, it is hereby

RECOMMENDED that the Defendant MidOcean Partners IV, L.P.'s Motion for Attorneys' Fees and Litigation Costs (ECF No. 266) be DENIED.

The parties will have fourteen (14) days from the date of being served with a copy of this Report and Recommendation within which to file written objections, if any, with the Honorable Marcia Cooke, United States District Judge. Failure to file objections timely shall bar the parties from a de novo determination by the District Judge of an issue covered in the Report and shall bar **[*23]** the parties from attacking on appeal unobjected-to factual and legal conclusions contained therein, except upon grounds of plain error if necessary in the interest of justice. See *28 U.S.C. § 636(b)(1)*; *Thomas v. Arn, 474 U.S. 140, 149, 106 S. Ct. 466, 88 L. Ed. 2d 435 (1985)*; *Henley v. Johnson, 885 F.2d 790, 794 (1989)*; *11th Cir. R. 3-1*.

DONE AND SUBMITTED at Fort Lauderdale, Florida, this 15th day of November, 2021.

Judges: CECILIA M. ALTONAGA, CHIEF UNITED STATES DISTRICT JUDGE.

Opinion by: CECILIA M. ALTONAGA

Opinion

ORDER

THIS CAUSE came before the Court on Defendants'[1] Motion to Dismiss the Antitrust Tranche Complaint [ECF No. 408]. Plaintiffs[2] filed a [Response] in Opposition [ECF No. 413], to which Defendants filed a Reply [ECF No. 419]. The Court has carefully considered The Corrected Consolidated Class Action Complaint (the "CCAC") [ECF No. 416], the parties' written submissions, the record, and applicable law. For the following reasons, the Motion is granted.

I. BACKGROUND [*20]

This putative class action is brought on behalf of individual investors (the "Retail Investors") who suffered losses as a result of Defendants' response to a "short squeeze" — a situation in which stocks or other assets rise sharply in value, distressing short positions.[3] (*See id.* ¶ 12). This short squeeze occurred in late January 2021, as the Retail Investors rapidly purchased the Relevant Securities,[4] exposing those with short positions in the Relevant Securities to "massive potential losses[.]" (*Id.* ¶ 7 (alteration added); *see id.* ¶ 6). According to Plaintiffs, Defendants conspired to prevent these losses by "artificially constrict[ing] the price appreciation of the Relevant Securities," in violation of the *Sherman Act, 15 U.S.C. § 1*. (CCAC ¶ 16 (alteration added); *see id.* ¶¶ 494-507).

The parties.

The Defendants. The CCAC categorizes Defendants into three[5] groups: the Clearing Defendants, the Brokerage Defendants, and the Market Maker Defendants. (*See id.* ¶¶ 51-75).

---

[1] The Defendants are E*Trade Securities LLC; E*Trade Financial Holdings, LLC; Interactive Brokers LLC; Robinhood Markets, Inc.; Robinhood Financial LLC; Robinhood Securities, LLC; Citadel Securities LLC; Apex Clearing Corp.; Electronic Transaction Clearing, Inc.; and PEAK6 Investments LLC (collectively, "Defendants"). (*See* CCAC ¶¶ 51-75).

[2] The Plaintiffs are Angel Guzman, Burke Minahan, Christopher Miller, and Terell Sterling (collectively, "Plaintiffs"). (*See* CCAC ¶¶ 23-41).

[3] A "short" seller borrows a security believing the price of the security will decrease. (*See* CCAC ¶ 8). If the price of the security drops, the short seller buys the security back at a lower price and returns it to the lender. (*See id.*). Because the difference between the sell price and the buy price is the short seller's profit, the short seller loses money if the price of the security increases. (*See id.*).

[4] The "Relevant Securities" are certain stocks the Retail Investors believed would increase in price: GameStop (GME), AMC Entertainment (AMC), Bed Bath & Beyond (BBBY), BlackBerry (BB), Express (EXPR), Koss (KOSS), Nokia (NOK), Tootsie Roll Industries (TR), and Trivago NV (TRVG). (*See* CCAC ¶ 6).

[5] In the CCAC, Plaintiffs allege there was a fourth group called the Introducing Brokerage Defendants (*see* CCAC ¶¶ 42-50), but they have since voluntarily dismissed those Defendants (*see* [ECF No. 380] (Stash Financial, Inc.); [ECF No. 396] (Open to the Public Investing, Inc.); [ECF No. 397] (Ally Financial Inc.); [ECF No. 398] (Alpaca Securities, LLC); [ECF No. 400] (Dough LLC); [ECF No. 401] (Tastyworks, Inc.); [ECF No. 402] (Webull Financial LLC); [ECF No. 404] (SoFi Securities LLC)). The Court refers to this group as the "Introducing Brokerages."

The Introducing Brokerages provide financial trading services through an electronic trading platform. (*See* CCAC ¶¶ 42-44, 46, 47, 49, 50). During the relevant period, each Introducing Brokerage restricted and/or limited the ability of investors to purchase the Relevant Securities. (*See id.*).

Because the Introducing Brokerages are only introducing brokerages — as opposed to self-clearing brokerages — they contract with an independent clearing firm to handle the execution and settlement of securities trade orders from clients or their own trading desks, rather than handle the process themselves. (*See id.* ¶¶ 105, 111). The independent clearing firm receives

The Clearing Defendants. Defendants, Apex Clearing Corporation ("Apex") and Electronic Transaction Clearing, Inc. ("ETC"), are, collectively, the "Clearing Defendants[.]"[6] (*Id.* ¶¶ 66-75 (alteration **[*21]** added)).

The Clearing Defendants are independent clearing firms: they handle the back-office details of securities transactions for broker-dealers, such as the Introducing Brokerages. (*See id.* ¶ 105). Independent clearing firms are supervised by the Financial Industry Regulatory Authority ("FINRA") and the Depository Trust and Clearing Corporation ("DTCC").[7] (*See id.* ¶¶ 96-97, 108, 110). Apex and ETC acted as the clearing firms for one or more of the Introducing Brokerages. (*See id.* ¶¶ 42-44, 46, 47, 49, 50).

The Brokerage Defendants. Defendants, E*Trade;[8] Interactive Brokers LLC; and Robinhood,[9] are, collectively, the "Brokerage Defendants[.]" (*Id.* ¶¶ 51-63 (alteration added)).

The Brokerage Defendants act as self-clearing brokers: they act as both an introducing broker and as their own clearing firm. (*See id.* ¶¶ 54, 56, 63, 113). In other words, the Brokerage Defendants handle orders to buy and sell securities, as well as execute and settle orders, maintain custody of securities and other assets, and maintain the paperwork associated with clearing and executing a transaction. (*See id.* ¶ 113). Self-clearing brokers are subject to DTCC rules and regulations. **[*22]** (*See id.* ¶ 116).

The Market Maker Defendant.[10] Defendant, Citadel Securities LLC, is the only named "Market Maker Defendant[] [.]" (*Id.* ¶¶ 64-65 (alterations added)).

Citadel Securities is a market maker: it acts as a market participant by providing bid prices and ask prices for securities; maintaining an inventory of securities from its own trading; and matching incoming buy and sell orders to fill those orders. (*See id.* ¶ 118). Relevant here, "if a market maker receives an order to buy a certain security, it may route that order to an exchange or it may execute the orders off-exchange in its capacity as a dealer by transacting against the buy orders with contra-side sell order, either from its own inventory or by selling the security

---

payments and maintains custody of the security. (*See id.* ¶ 111). At all relevant times, each Introducing Brokerage used a Clearing Defendant as its clearing firm. (*See id.* ¶¶ 42-44, 46, 47, 49, 50).

[6] Apex Clearing Holdings LLC and Defendant, PEAK6 Investments LLC, are the parent corporations of Defendants, Apex and ETC. (*See* CCAC ¶¶ 67, 70).

[7] The DTCC is a holding company that owns and operates three clearing agencies registered with the U.S. Securities and Exchange Commission ("SEC"): the National Securities Clearing Corporation ("NSCC"), the Fixed Income Clearing Corporation ("FICC"), and the Depository Trust Company ("DTC"). (*See* CCAC ¶ 96). The NSCC is the central counterparty that clears cash transactions in the U.S. equities markets by netting securities deliveries and payments among NSCC's clearing members and guaranteeing the completion of trades, even if one party to the transaction defaults. (*See id.* ¶ 98). It takes two business days for the NSCC to transfer the security to the buyer and the cash to the seller. (*See id.* ¶ 101). If a clearing member defaults on its settlement obligations, the NSCC guarantees the delivery of cash and securities to its non-defaulting members. (*See id.* ¶ 102).

In line with the CCAC and the parties' briefings, the Court refers to the DTCC and NSCC interchangeably.

[8] Defendant, E*Trade Financial Holdings, LLC (*see* CCAC ¶ 52), is the parent corporation of Defendant, E*Trade Securities LLC (*see* Mot. 22 n.9; Resp. 47). The Court refers to these two Defendants collectively as "E*Trade[.]" Doing so has no impact on the Court's analysis.

The Court uses the pagination generated by the electronic CM/ECF database, which appears in the headers of all court filings.

[9] Defendants, Robinhood Markets, Inc.; Robinhood Financial LLC; and Robinhood Securities, LLC, are, collectively, "Robinhood[.]" Robinhood Financial LLC and Robinhood Securities, LLC are wholly-owned subsidiaries of Robinhood Markets, Inc. (*See* CCAC ¶¶ 58, 60). Defendants dispute the inclusion of Robinhood as a self-clearing broker, arguing Robinhood Financial LLC is an introducing broker entity separate from Robinhood Securities, LLC, the clearing entity. (*See* Mot. 13, 14 n.2). This distinction, however, has no impact on the Court's analysis.

[10] Although Plaintiffs refer to "Market Maker Defendants" (*see, e.g.*, CCAC ¶ 92), Plaintiffs name only one Market Maker Defendant (*see id.* ¶¶ 64-65).

short." (*Id.* ¶ 124). Citadel Securities took short positions in the Relevant Securities during the relevant period. (*See id.* ¶ 65).

Agents and co-conspirators. Defendants' alleged acts "were authorized, ordered or performed by the Defendants' respective officers, agents, employees, representatives, or shareholders while actively engaged in the management, direction, or control of the Defendants' businesses or affairs." (*Id.* ¶ 76). The Defendant **[*23]** parent entities exercise dominance and control over all their subsidiary entities; and the Defendant subsidiary entities have a unity of purpose and interest with their respective parents. (*See id.* ¶¶ 76-78). In addition, "[e]ach Defendant acted as the principal, agent, or joint venture of, or for other Defendants with respect to the acts, violations, and common course of conduct alleged[.]" (*Id.* ¶ 80 (alterations added)). Plaintiffs allege there may be various persons and/or firms that have participated as co-conspirators but are unknown at this time. (*See id.* ¶ 79).

The Plaintiffs. The named Plaintiffs are four individual investors who were subject to trading limitations imposed on the Relevant Securities between January 28, 2021 and February 4, 2021 (the "Class Period"). (*See id.* ¶¶ 23-41). Each Plaintiff held shares of one or more of the Relevant Securities at the close of the stock market on January 27, 2021. (*See id.* ¶¶ 23, 28, 33, 38). The next day, January 28, 2021, each Plaintiff was prohibited from purchasing the Relevant Securities on Robinhood's trading platform. (*See id.* ¶¶ 24, 29, 34, 39).

That same day, Guzman and Miller applied for accounts with Charles Schwab, Fidelity, **[*24]** and TD Ameritrade — who were not prohibiting customers from purchasing the Relevant Securities — but were unable due to the amount of time required to set up the accounts. (*See id.* ¶¶ 25, 35). Minahan successfully applied for an account with Fidelity and was able to purchase a share of GameStop Corp. stock that day. (*See id.* ¶ 30). Each Plaintiff then sold his or her shares of the Relevant Securities on Robinhood between January 28, 2021 and February 4, 2021. (*See id.* ¶¶ 26-27, 31-32, 36-37, 40-41).

Injury and proposed class. According to the named Plaintiffs:

> As a direct and intended result of Defendants [sic] contract, combination, agreement and restraint of trade or conspiracy, Defendants caused injury to Plaintiffs by restricting purchases of Relevant Securities. The Brokerage Defendants deactivated the buy option on their platforms and left Plaintiffs with no option but to sell shares of the stocks on their platforms. Plaintiffs and Class members, faced with an imminent decrease in the price of their positions in the Relevant Securities due to the inability of Retail Investors to purchase shares, were induced to sell their shares in the Relevant Securities at a lower price than **[*25]** they otherwise would have, but for the conspiracy, combination, agreement and restraint of trade.

(*Id.* ¶ 501).

The named Plaintiffs seek to certify the following class:

> All persons or entities in the United States that held shares of stock or call options in GameStop Corp. (GME), AMC Entertainment Holdings Inc. (AMC), Bed Bath & Beyond Inc. (BBBY), BlackBerry Ltd. (BB), Express, Inc. (EXPR), Koss Corporation (KOSS), Nokia Corp. (NOK), Tootsie Roll Industries, Inc. (TR), or Trivago N.V. (TRVG) as of the close of market on January 27, 2021, and sold the above-listed securities from January 28, 2021 up to and including February 4, 2021 (the "Class Period").

(*Id.* ¶ 81).

The alleged facts.

Mechanics of securities trading. Individual investors' market share of U.S. equity trading has steadily increased since 2019 and has recently accounted for a third of all U.S. stock market trading. (*See id.* ¶¶ 130-31). When individual investors make investments on their own behalf, they execute their personal trades through websites, apps, and trading platforms provided by brokerage firms or other investment service providers. (*See id.* ¶ 2). After an individual investor places a trade order with a brokerage **[*26]** firm, the brokerage sends the order to an independent clearing firm for clearing services if it is only an introducing broker, or the brokerage firm performs the clearing services itself if it is a self-clearing broker. (*See id.* ¶¶ 105, 108, 111, 129). The independent clearing firm or self-clearing broker then executes the trade order itself or sends the order to a market maker for execution. (*See id.* ¶¶ 105, 113, 122).

Market makers are market participants who provide bid prices and ask prices and match incoming buy and sell orders to fill those orders. (*See id.* ¶ 118). Market makers fill these orders from their own inventory, by routing the order to an exchange, or by taking the other side of a transaction (*e.g.*, selling a security short in response to receiving an order to buy the security). (*See id.* ¶¶ 118, 123-24). Once an order is filled, the market makers pocket the difference between the bid and ask prices, which is known as the "spread." (*See id.* ¶ 118). While the spreads may be small, they become significant due to the large volume of orders filled. (*See id.*).

Although individual investors historically had to pay a fee or commission to their brokerages for executing personal **[*27]** trades, today most brokerages do not charge their investors a fee per transaction. (*See id.* ¶ 3). Instead, in exchange for routing the order to the market maker, brokerages earn revenue through rebates, kickbacks, and other payments — these payments are collectively known as payment for order flow. (*See id.* ¶¶ 3, 133-35). Clearing firms also generate a significant portion of their revenue from payment for order flow. (*See id.* ¶ 107).

After an order is filled, the details of the executed order are sent to the NSCC for clearinghouse and settling services. (*See id.* ¶¶ 101, 129). Securities trades submitted to the NSCC take two days to settle — *i.e.*, it takes two business days for the cash and the securities to be electronically exchanged. (*See id.* ¶ 101). As stated, because there is a risk that a party to a securities transaction defaults before the trade is completed, the NSCC guarantees the delivery of cash and securities to its non-defaulting members. (*See id.* ¶ 102).

The NSCC collects clearing fund contributions, or margin, from clearing members at the start of each day and intraday in volatile markets. (*See id.* ¶ 103). The margin protects the NSCC and all market participants against **[*28]** clearing member defaults, and margin requirements must be met by clearing members on a timely basis. (*See id.*). Margin requirements are based in part on market volatility and risk. (*See id.* ¶ 470). The rules for calculating the contribution requirements and the timing of collection of contributions are known to every clearing member; and the NSCC provides reporting tools, calculators, and documentation to allow the members to monitor their risk in near real-time and estimate clearing fund contribution requirements. (*See id.* ¶ 103).

January 2021 market volatility. The Retail Investors exchange investment information via online discussion forums such as the WallStreetBets financial discussion forum on Reddit. (*See id.* ¶¶ 141, 180). WallStreetBets is characterized by a particular culture centered around discussion of financial investments and memes; many of its users are sophisticated, financially savvy individual investors with business acumen. (*See id.* ¶ 180).

Beginning in 2019, the Retail Investors, through these online discussion forums, developed the hypothesis that shares of GameStop's stock were trading at lower prices than they should have been based on GameStop's publicly available **[*29]** financial disclosures and prospects. (*See id.* ¶ 141). The Retail Investors deduced that GameStop was undervalued for a variety of reasons, including because large financial institutions had taken substantial short positions in GameStop stock. (*See id.* ¶ 142). These substantial short positions would bear significant costs if the outlook on GameStop improved and the short positions had to be exited. (*See id.*). The Retail Investors saw similar investment opportunities in the other Relevant Securities. (*See id.* ¶¶ 143-44).

Leading up to January 27, 2021, the Retail Investors, through stock brokerages, including the Brokerage Defendants, purchased long positions in the Relevant Securities with the expectation that the stocks would increase in value. (*See id.* ¶¶ 6, 91, 148). As more investors purchased the Relevant Securities and "out of the money" call options[11] in the Relevant Securities, the market prices for the stocks rose due to supply and demand. (*See id.* ¶¶ 146, 162). The Relevant Securities started appreciating to "unprecedented levels." (*Id.* ¶ 14).

---

[11] A call option gives the holder the right to buy the asset at a stated fixed price or the "strike price." (*See* CCAC ¶ 166). An "out of the money" option has a strike price unfavorable in comparison to the market price for the underlying asset. (*See id.* ¶ 169).

To illustrate this rapid growth, a share of GameStop stock was worth $3.00 in 2019 (*see id.* ¶ 142); $43.03 on January 21, 2021 **[*30]** (*see id.* ¶ 185); $76.79 on January 25, 2021 (*see id.*); $147.98 on January 26, 2021 (*see id.* ¶ 188); and $380.00 on January 27, 2021 (*see id.* ¶ 190). GameStop's stock price reached a closing high of $347.51 on January 27, 2021 — a 134.84% increase from the previous day. (*See id.*). Other Relevant Securities experienced similar surges; for example, AMC's and Express's share prices increased over 300% and 200%, respectively. (*See id.*).

As Retail Investors increased long positions in the Relevant Securities, those who held short positions in the Relevant Securities, such as Citadel Securities (*see id.* ¶¶ 7, 195-96), were caught in a short squeeze. (*See id.* ¶¶ 162-63). Investors with these short positions were faced with a rapid increase in the shorted assets' values, exposing short sellers to increased and theoretically limitless losses because the short sellers must at some point buy back the stocks to return them to their lenders. (*See id.* ¶¶ 8, 12, 163).[12]

Around 5:00 p.m. on January 27, 2021, the SEC released a statement indicating it was "aware of and actively monitoring the on-going market volatility in the options and equities markets," but neither the SEC **[*31]** nor any other government agency issued any directive to restrict trading in the Relevant Securities. (*Id.* ¶ 200 (quotation marks omitted)).

Events of January 28, 2021. Analytics reveal a significant volume of GameStop short position transactions during after-hours trading immediately before the markets opened on January 28, 2021. (*See id.* ¶ 212). Because retail brokers do not allow individual investors to engage in after-hours trading to the same extent as institutional investors, it is likely that this increase in short volume was the result of institutional investors, like Citadel Securities, taking new short positions. (*See id.* ¶ 213). Additionally, failure to delivers ("FTDs") rose dramatically in the period leading up to January 28, 2021, a phenomenon consistent with increasing short interest by market makers like Citadel Securities.[13] (*See id.* ¶ 218).

This increase in short positions was counterintuitive, considering chatter in various financial discussion forums indicated high excitement and motivation on the part of Retail Investors to continue investing in the Relevant Securities. (*See id.* ¶ 228). Many Retail Investors had announced plans to increase long positions **[*32]** in the Relevant Securities on January 28, 2021. (*See id.*).

Around 1:00 a.m. EST on January 28, 2021, Robinhood informed its users that in "light of unprecedented volatility surrounding [GameStop] and AMC [stock], and in an effort to help reduce risk, all [GameStop] and AMC options with expirations of January 29[], 2021 [would] be set to closing transactions only." (*Id.* ¶ 229 (alterations added)). Customers would be able to close out their positions in GameStop and AMC but could not make new investments. (*See id.*).

At 5:11 a.m. EST, Robinhood received an email from the NSCC titled "NSCC Daily Margin Statement" indicating that Robinhood had a collateral requirement deficit of over $3 billion. (*Id.* ¶ 231). At 8:00 a.m. EST, Gretchen Howard, Robinhood's COO, messaged internally that Robinhood had a "major liquidity issue" and it was moving the Relevant Securities to Position Close Only ("PCO"), *i.e.*, Robinhood users could sell the Relevant Securities but

---

[12] Another phenomenon known as a "Gamma squeeze" occurred as the prices of the Relevant Securities increased. (*See* CCAC ¶¶ 162, 164). Options are priced based on a variety of risk variables, including one called "Gamma," which increases as the option nears its expiration date or as the option approaches its strike price (*i.e.* "being in the money"). (*See id.* ¶¶ 170, 172-74, 177). When a security experiences a sharp price increase, the Gamma increases; stated differently, options that were previously unlikely to reach their strike prices before expiration become more likely to. (*See id.* ¶ 176-78). As the Gamma increases, market makers hedge by purchasing more of the underlying security, which further drives the price of the security higher and creates a feedback loop as even deeper out of the money options approach their strike price. (*See id.* ¶ 178).

[13] An FTD occurs when one party in a trading contract, such as in a short transaction, does not deliver on its obligations. (*See* CCAC ¶ 214). FTDs are indicative of naked short selling, which occurs when a short seller does not actually possess the security it is supposed to borrow. (*See id.* ¶ 215). This practice is largely inaccessible to individual investors but accessible to market makers. (*See id.* ¶ 217).

could not buy them. (*Id.* ¶ 233 (quotation marks omitted)). Shortly thereafter, in an internal Robinhood message, a manager asked David Dusseault, Robinhood Financial's President and COO, whether Robinhood made AMC and GameStop stocks PCO, **[*33]** to which Dusseault responded: "[Robinhood Securities] received a very large call — confidentially, all firms on street Jim is saying [sic] are doing [the] same thing[.]" (*Id.* ¶ 244 (alterations added; quotation marks omitted)).

Robinhood moved the Relevant Securities to PCO by the time the markets opened on January 28, 2021. (*See id.* ¶¶ 232-34). Robinhood users were no longer able to purchase the Relevant Securities — the "buy" button was deactivated as a feature, leaving users with no option but to sell or hold their securities. (*See id.* ¶¶ 235-36). On Robinhood's web platform and mobile app, users were blocked from searching for the Relevant Securities' ticker symbols. (*See id.* ¶ 239). Robinhood also canceled overnight purchase orders of the Relevant Securities placed on January 27, 2021 and queued to move forward when the markets opened on January 28, 2021. (*See id.* ¶ 237).

Customers were not given advance notice of the restriction of the Relevant Securities to PCO. (*See id.* ¶ 234). Robinhood announced the news on January 28, 2021 by tweeting that it was restricting the Relevant Securities to PCO due to market volatility. (*See id.* ¶¶ 248, 251-53).

The other Brokerage Defendants similarly **[*34]** prevented the Retail Investors from opening new positions in one or more of the Relevant Securities on January 28, 2021. (*See id.* ¶ 246). Around 9:05 a.m. on January 28, 2021, Interactive Brokers announced that it placed AMC, BB, EXPR, GME, and KOSS option trading into liquidation due to the "extraordinary volatility" in the markets. (*Id.* ¶ 249). E*Trade halted GME and AMC, citing "extraordinary volumes" as the reason. (*Id.* ¶ 250 (quotation marks omitted)).

While not all brokerages restricted the purchase of the Relevant Securities, the Introducing Brokerages restricted trading because the Clearing Defendants raised fees to purchase the Relevant Securities or otherwise instructed the brokerages not to consummate purchase orders. (*See id.* ¶¶ 270-71, 273, 278). For instance, Anthony Denier, Webull Financial's CEO, blamed Webull's clearing firm, Apex, for its restrictions on trading in the Relevant Securities placed on January 28, 2021. (*See id.* ¶ 274). Apex informed Denier that Webull needed to shut off the ability to open new positions in certain stocks after Apex learned that the DTCC was increasing the collateral needed to settle trades for the Relevant Securities. (*See id.*). Several **[*35]** other Introducing Brokerages also reported that Apex instructed them to halt all opening transactions of GameStop, AMC, and Koss on their platforms, while ETC prohibited Alpaca from allowing its users to purchase the Relevant Securities. (*See id.* ¶¶ 275-77). Apex cited increasing collateral requirements for the restrictions it imposed on trading, including through the Introducing Brokerages. (*See id.* ¶ 479).

Altogether, numerous brokerages blocked the Retail Investors from purchasing the Relevant Securities. (*See id.* ¶¶ 254, 269). Some restricted the Retail Investors from buying or opening new long positions in securities altogether, whereas others restricted purchasing options only. (*See id.* ¶ 269).

This broad prohibition on buying the Relevant Securities led to a massive sell-off, which in turn resulted in a steep decline in the prices of the Relevant Securities. (*See id.* ¶ 255). For example, on January 28, 2021, GameStop shares reached an intraday peak of $483.00 before dropping down to a closing price of $193.60 — a 44.29% drop from the closing price of $347.51 the day before. (*See id.* ¶ 256). Similarly, AMC shares dropped 56.63%, EXPR shares fell 50.79%, and BBBY shares declined **[*36]** 36.40%. (*See id.*). The Retail Investors who wanted to take advantage of the price drops to buy more shares of the Relevant Securities were unable to do so due to the prohibition on purchasing. (*See id.*).

While individual investors were prohibited from purchasing the Relevant Securities, institutional investors were not. (*See id.* ¶ 267). Large investment firms were able to purchase the Relevant Securities at artificially reduced prices because they had access to private stock exchanges known as "dark pools."[14] (*See id.*). Citadel Securities and

---

[14] Private stock exchanges are known colloquially as "dark pools" or "dark exchanges" because they do not disseminate public quotations of securities prices. (*See* CCAC ¶¶ 151-54). Through these private exchanges, institutional investors can discreetly

other firms with short positions bought the Relevant Securities at artificially reduced prices to close out their positions by returning the borrowed securities they had sold short. (*See id.* ¶¶ 267-68).

Events after January 28, 2021. As the market opened on January 29, 2021, nearly all the Brokerage Defendants had lifted their trading restrictions and permitted individual investors to open new long positions in the Relevant Securities; even so, the Brokerage Defendants continued to heavily restrict such purchases. (*See id.* ¶¶ 319, 321). Robinhood, for example, placed limitations on the number of new positions its users could open in the **[*37]** Relevant Securities, including by limiting purchases of GameStop stock to two shares. (*See id.* ¶¶ 323-24). The next day, January 30, as the Relevant Securities began to regain their value, Robinhood instituted a one share limit on certain Relevant Securities, including GME and AMC. (*See id.* ¶ 325). Robinhood maintained trading limitations on certain securities through February 4, 2021. (*See id.* ¶ 336). Restrictions like these continued to suppress the value of the Relevant Securities and pressured investors to sell these stocks. (*See id.* ¶¶ 321, 325, 331).

On January 31, 2021, Vlad Tenev, Robinhood's CEO, explained in an opinion piece published in USA TODAY that Robinhood maintained trading restrictions because clearinghouse-mandated deposit requirements were "increased ten-fold." (*Id.* ¶ 338 (quotation marks omitted)). Robinhood had announced two days earlier that it raised more than $1 billion to help meet rising demands for cash and shore up its balance sheet. (*See id.* ¶ 336). This money raised was on top of $500 million Robinhood accessed through credit lines to ensure it had the capital required to allow its clients to trade the Relevant Securities. (*See id.*). On February 1, 2021, **[*38]** Robinhood announced it raised an additional $2.4 billion in funding above the $1 billion it had already raised. (*See id.*). Weeks later, while testifying before the U.S. House Committee on Financial Services, Tenev testified that Robinhood met its revised deposit requirements a little after 9:00 a.m. on January 28, 2021. (*See id.* ¶ 340).

Apex also initially cited increased collateral requirements as the reason for the restrictions it imposed on trading, including through other Brokerage Defendants. (*See id.* ¶ 479). Later, on February 9, 2021, Apex sent a letter to the New Jersey Office of the Attorney General, stating that it imposed the restrictions due "to the potential future collateral requirement that NSCC appeared it may impose on Apex[.]" (*Id.* ¶ 480 (alteration added)). Tricia Rothschild, Apex's president, explained in an interview with Financial Planning on March 4, 2021, that Apex had "headroom in terms of the capital available" and "lines of credit that" it could call on, but still restricted trading on January 28, 2021 "due to anomalous information." (*Id.* ¶ 481 (quotation marks omitted); *see id.* ¶ 341).

In the period following January 28, 2021, the SEC continued to closely **[*39]** monitor the price volatility of the Relevant Securities. (*See id.* ¶ 337). On February 1, 2021, then acting SEC Chair Allison Herren Lee stated that the SEC would "closely review actions taken by regulated entities that may disadvantage investors or otherwise unduly inhibit their ability to trade certain securities." (*Id.* (quotation marks omitted)). She also specified that the SEC was investigating the role that short selling may have played in the recent events. (*See id.*).

Publicly available data reveals short interests in the Relevant Securities generally climbed leading up to January 28, 2021 (*see id.* ¶¶ 346-47, 361), and then decreased because of the trading restrictions imposed during the Class Period, with the sharpest and most significant decreases occurring after the restrictions imposed on January 28, 2021 (*see id.* ¶¶ 342-49). FINRA data shows significant increases in dark pool trading activity for each of the Relevant Securities on and around January 28, 2021, during the period when restrictions were first placed on the Relevant Securities. (*See id.* ¶¶ 350-56). Given that the Retail Investors are generally not able to trade in dark pools and dark exchanges, this trading activity **[*40]** indicates high institutional investor trading activity consistent with the exiting of short positions. (*See id.* ¶ 357).

More specifically, given the scale of Citadel Securities' business, the FINRA data indicates that the bulk of the trading activity can be attributed to Citadel Securities. (*See id.* ¶¶ 358-61). Because Citadel Securities accounts for about 50% of dark trading activity, a large shift in the percentage of sales represented by short trades is likely to be caused by a shift in Citadel Securities' position from long to short or vice versa. (*See id.* ¶ 360).

---

buy or sell securities in large blocks, mitigating some of the price impacts that their buying or selling activity would otherwise have on a "lit," or public, national securities exchange. (*See id.* ¶ 154).

Collusion among Defendants. The CCAC alleges "Defendants were aware that they were acting in concert to collude and manipulate the market." (*Id.* ¶ 279).

Motive to collude. According to the CCAC, "Defendants shared a common motive to conspire — to prevent themselves, and their peers, from hemorrhaging losses totaling potentially billions of dollars." (*Id.* ¶ 406).

Citadel Securities possessed significant short positions in the Relevant Securities during the period in question. (*See id.*). As the prices of the Relevant Securities surged to unprecedented levels, Citadel Securities was exposed to potentially infinite losses. (***[*41]*** *See id.* ¶¶ 14, 406). As of December 31, 2020, Citadel Securities reported $57.5 billion in "securities sold, not yet purchased, at fair value" — which the CCAC asserts are "likely representative of Citadel Securities's short position." (*Id.* ¶ 407 (quotation marks omitted)).

Each of the Brokerage Defendants and Clearing Defendants earns revenue from payment for order flow sold to market makers. (*See id.* ¶¶ 412, 416-18). Robinhood, for example, earns somewhere between 60% and 70% of its revenue by selling its order flow — the primary purchaser of which is Citadel Securities. (*See id.* ¶ 417). As for the other Brokerage Defendants and the Clearing Defendants, Citadel Securities is either the largest or one of the largest payors for order flow. (*See id.* ¶ 418).

Communications among Defendants. In the lead up to, during, and after January 28, 2021, high-level executives of Citadel Securities were able to communicate with brokerages, including Robinhood, due to pre-existing relationships among them. (*See id.* ¶ 296).

On January 20, 2021, Citadel Securities' Head of Execution Services extended an unknown proposition to Josh Drobnyk, Robinhood's Vice President of Corporate Relations and Communications, **[*42]** who conferred with Daniel Gallagher and Lucas Moskowitz, Robinhood's Chief Legal Officer and Deputy General Counsel, respectively. (*See id.* ¶¶ 297-98). The Citadel Securities executive and Drobnyk had a prior relationship through Drobnyk's employment at FINRA. (*See id.* ¶ 297). On January 25, 2021, Drobnyk responded via email "[w]e are on board" and that Moskowitz would be the central point of contact for Robinhood. (*Id.* ¶ 300 (quotation marks omitted)). The Citadel Securities executive responded to Moskowitz with an offer to chat, emphasizing the "strong relationship between the firms[.]" (*Id.* ¶ 302 (alteration added)). The details of the ensuing January 26, 2021 phone call have not been disclosed. (*See id.* ¶¶ 302-03).

On January 27, 2021, the day before the trading restrictions were implemented, Citadel Securities and Robinhood high-level employees exchanged several communications. (*See id.* ¶ 304). In an internal conversation around 4:40 p.m., Howard informed Tenev that she, along with Gallagher and Jim Swartwout, President and CEO of Robinhood Securities, would be joining "a call with Citadel" at 5:00 p.m. that day. (*Id.* ¶ 307; *see id.* ¶ 305). Howard indicated she believed Citadel **[*43]** Securities would make demands on limiting payment for order flow. (*See id.* ¶¶ 305, 307). Tenev responded that "[m]aybe this would be a good time for me to chat with Ken [G]riffin" and told Howard, "[y]ou guys can mention that[.]" (*Id.* ¶ 307 (quotation marks omitted; alterations added)). Tenev noted that he had never met Griffin, the CEO of Citadel Securities, before. (*See id.*).

Shortly thereafter, around 6:25 p.m., Robinhood's Senior Director of Clearing Operations informed Swartwout in an internal chat that there is "[a]necdotal evidence that several 'very large' firms are having really bad nights too." (*Id.* ¶ 308 (quotation marks omitted)). Swartwout replied, "everyone is. [Y]ou wouldnt [sic] believe the conv[ersation] we had with Citadel. [T]otal mess[.]" (*Id.* (alterations added)). At 8:16 p.m., Swartwout updated a Citadel Securities employee that he was "[s]till looking for the new Citadel numbers." (*Id.* ¶ 310 (alteration added)). The Citadel Securities employee responded, "[f]irming up right now in light of the follow up conversation between Gallagher and [redacted.]" (*Id.* (alterations added)).

At 8:29 p.m. that evening, the Citadel Securities Vice President of Business Development **[*44]** notified Swartwout that one of its executives, who Tenev had met before, was available to speak to Tenev that night. (*See id.* ¶¶ 311, 313). Swartwout replied, "[b]ecause of our partnership, Vlad would like to have a discussion with Ken [Griffin] at some point, just given our relationship. Not specific to this crazy issue[.]" (*Id.* ¶ 313 (alterations added); *see id.* ¶ 312). Swartwout emailed in the same chain later that night that he was "beyond disappointed in how this went down[,]" and that it is "difficult to have a partnership when these kind[s] of things go down this way." (*Id.* ¶ 313 (alterations added)).

On the morning of January 28, 2021, Robinhood Securities executives participated in "a very large call — confidentially." (*Id.* ¶ 244 (quotation marks omitted)). Swartwout told Dusseault that "all firms on street . . . are doing [the] same thing[.]" (*Id.* (alterations added)). Later that day, employees of Citadel Securities communicated with high-level employees of E*Trade to ensure certain orders were cancelled. (*See id.* ¶¶ 315-16).

Plaintiffs allege two specific communications among Defendants in the days following January 28, 2021. (*See id.* ¶¶ 327-35). First, on January 29, 2021, **[*45]** Apex notified Robinhood about a post on WallStreetBets indicating that the Retail Investors found a loophole allowing them to purchase shares of the Relevant Securities above Robinhood's imposed limitations. (*See id.* ¶ 330). This assistance came even though Apex had already lifted its restrictions and did not have an economic relationship with Robinhood at the time. (*See id.* ¶¶ 457-58).

Second, on January 30, 2021, a Citadel Securities executive sent an email to Drobnyk, stating he "wanted to generally coordinate messaging[.]" (*Id.* ¶ 335 (alteration added); *see id.* ¶ 333). The Citadel Securities executive also introduced Drobnyk to someone who was "running point on this narrative for [them]" and copied company lawyers "as an FYI and for privilege." (*Id.* ¶ 335 (alteration added); *see id.* ¶ 333).

Actions against unilateral self-interest. The Brokerage Defendants and Clearing Defendants sell order flow. (*See id.* ¶ 427). Firms that sell order flow, like Robinhood, benefit the more investors transact on their platforms. (*See id.* ¶¶ 420, 423, 425). Because these entities earn order flow revenue — which is generated by volume — restricting trading is an action against their unilateral self-interest. **[*46]** (*See id.* ¶¶ 420, 426).

Likewise, Citadel Securities, who pays for order flow and earns revenue through spreads, benefits from a large volume of transactions. (*See id.* ¶ 428). If any entity that sells it order flow restricts trade, Citadel Securities will lose revenue from the reduced volume of orders and the number of spreads it can pocket. (*See id.*).

In addition to lost order flow revenue, when Apex restricted trading in the Relevant Securities, it was unable to generate revenue from users purchasing the shares and from using those shares as stock loans to generate even further revenue. (*See id.* ¶ 422).

Opportunities to coordinate and collude. Along with the referenced communications between some of the Defendants, the CCAC states certain features of the financial services industry potentially afford Defendants opportunities to coordinate and collude. (*See id.* ¶¶ 442-58). The industry is close-knit and built on preexisting relationships; and it is replete with specialized jargon, terms of art, and specialized terminology, providing those in the industry a common language. (*See id.* ¶ 445). Further, individuals within the industry frequently move from one market participant to another **[*47]** or invest financial resources in other market participants. (*See id.* ¶ 446).

Evidence of concealment and pretext. Plaintiffs allege that many of the communications between certain Defendants were verbal or telephonic to avoid detection. (*See id.* ¶ 460).

In addition, Plaintiffs claim that both Robinhood and Apex provided "changing and conflicting explanations for the trading restrictions." (*Id.* ¶ 465; *see id.* ¶ 478). On January 28, 2021, Robinhood explained that it restricted trading due to market volatility. (*See id.* ¶ 466). Tenev also told the media that the shutdowns were unrelated to Robinhood's liquidity and Robinhood did not have a liquidity problem. (*See id.* ¶ 467). Later, Robinhood blamed the trading restrictions on being unable to meet the deposit requirements imposed by clearinghouses. (*See id.* ¶ 468).

More specifically, when Tenev testified before the House Financial Services Subcommittee, he explained that the trading restrictions were put in place to meet regulatory deposit requirements imposed by the DTCC affiliate, the NSCC. (*See id.* ¶ 469). Michael Bodson, the President of the DTCC, testified to the House Financial Services Subcommittee that the decision to restrict trading **[*48]** was internal to Robinhood and the DTCC and NSCC did not have discussions about restricting securities. (*See id.* ¶ 472). Further, Plaintiffs assert that Robinhood Securities would have at all times known how much collateral the DTCC may ask it to post to cover customer trades. (*See id.* ¶¶ 470-71).

As for Apex's conflicting explanation, on January 28, 2021, Apex cited increasing collateral requirements for the restrictions it imposed on trading, including through the Introducing Brokerages. (*See id.* ¶ 479). On March 4, 2021, however, Rothschild stated that Apex restricted trading "due to anomalous information" and that "it was not a similar situation to Robinhood." (*Id.* ¶ 481 (quotation marks omitted)).

Government Investigations. Several governmental entities have investigated the trading restrictions imposed on January 28, 2021. (*See id.* ¶¶ 486-93). The Congressional House Financial Services Committee issued subpoenas and held three highly publicized hearings regarding the restrictions, and the Senate Banking Committee also held hearings on the topic. (*See id.* ¶¶ 487-88). The fraud division of the Department of Justice and the San Francisco U.S. Attorney's office have also sought information **[*49]** about the restrictions from brokers and social media companies. (*See id.* ¶¶ 489, 492). And according to GameStop's 10-Q report dated June 9, 2021, the SEC is investigating the trading restrictions imposed on January 28, 2021. (*See id.* ¶ 490).

Robinhood's Focus Report filed with the SEC on February 26, 2021 confirms many of these investigations and reveals that Robinhood received inquiries related to the trading restrictions from the U.S. Attorney's Office of the Northern District of California, the SEC's Division of Examinations, FINRA, the New York Attorney General's Office, the offices of other states' Attorneys General, and Congress. (*See id.* ¶ 491). On June 30, 2021, FINRA announced that Robinhood was ordered to pay a record financial penalty of $70 million for "systemic supervisory failures and significant harm suffered by millions of customers." (*Id.* ¶ 493 (quotation marks omitted)).

Structure and characteristics of the market. According to the CCAC, the "structure and characteristics of the market for securities, and in particular the lack of disclosure of short interest positions at any given time, make it conducive to collusion and anticompetitive conduct." (*Id.* ¶ 362).

High ***[*50]*** *barriers to entry*. An entrant to the financial services industry seeking to become a broker-dealer or a clearing firm would need specialized knowledge, several licenses, and memberships, including memberships in organizations such as FINRA. (*See id.* ¶ 365). In addition to licensure costs, compliance costs to adhere to industry and regulatory standards are significant. (*See id.*). Entrants would also need significant amounts of cash or capital to deposit at clearinghouses such as the DTCC as collateral. (*See id.* ¶ 366). And entrants would need to have the necessary technological infrastructure and expertise to navigate the digital market. (*See id.* ¶ 367).

High fixed costs and low variable costs. The markets for broker-dealers, clearing firms, and market makers are defined by high fixed costs and low variable costs. (*See id.* ¶ 368). These market participants benefit greatly from scale, particularly with regard to online broker-dealers and clearing firms. (*See id.*). Online broker-dealers, for example, require significant IT infrastructure, software, and data security infrastructure to develop and maintain the applications through which investors trade. (*See id.* ¶ 369). Clearing firms require **[*51]** similar infrastructures and software to facilitate the digital clearing and custodial services they provide to online broker-dealers. (*See id.* ¶ 370). Market makers — in particular, high frequency trading market makers — must invest significant effort and resources to increase the speed of trading technology to maximize their profits. (*See id.* ¶¶ 371-72).

Commoditization. The Relevant Securities are homogenous products: one share in a Relevant Security is identical to another share in that security and thus can be substituted for another. (*See id.* ¶ 374). Competition in trading the Relevant Securities is purely based on price, which is determined by current market conditions. (*See id.*). The determinant of price is the relative supply and demand in investors who want to buy or sell shares in the Relevant Security, and price at one point in time is identical globally. (*See id.* ¶¶ 375-76).

Captive market. In the short run, an investor in the securities market is generally locked into the broker-dealers it already invests with. (*See id.* ¶ 379). The process to open a trading account with a broker-dealer may take several days. (*See id.* ¶ 380). If coordinated trading restrictions occur in a **[*52]** short time window, investors do not have the opportunity to switch or change broker-dealers. (*See id.* ¶ 381). Even investors with multiple trading accounts may be without a short-term trading option if multiple broker-dealers restrict trading at the same time. (*See id.* ¶ 385).

Opaque market. While financial markets are generally regulated, important aspects of these are opaque. (*See id.* ¶ 386). Specifically, it is generally impossible to know who owns a short interest at any given time despite the prevailing regulatory regime. (*See id.* ¶¶ 387, 399). While an investor may voluntarily disclose its short positions, this does not occur often. (*See id.* ¶¶ 388, 399).

To provide transparency to investors and the public, the SEC requires investment managers who have at least $100 million in assets under management to file a Form 13F up to 45 days after the end of every quarter. (*See id.* ¶¶ 389, 394). Disclosures in Form 13F filings, however, are limited: investors must only report long positions, put options, and call options, but not short positions; and 13F filings do not require the reporting of when a particular position was purchased, or in the case of put or call options, the strike price **[*53]** or expiry date. (*See id.* ¶¶ 391, 394-95).

FINRA also requires member firms to report short interest positions in all equity securities twice a month, typically on the 15th and the last day of each month. (*See id.* ¶ 396). Even though FINRA publishes short interest reports publicly, it takes several days before the information is published — the number of shares sold short in the market may have changed dramatically in that time. (*See id.* ¶ 397).

Although it is not possible to detect which specific investors are in large exposed short positions, the companies issuing securities can and sometimes do confirm if their stock has been significantly shorted or subject to a short squeeze. (*See id.* ¶ 400). For example, GameStop disclosed in its Form 10-K filed on March 23, 2021 that a large proportion of its stock had been sold short and that it experienced a short squeeze. (*See id.* ¶ 401).

The CCAC and Defendants' Motion. The CCAC alleges a violation of *section 1 of the Sherman Act, 15 U.S.C. § 1*, against all Defendants. (*See* CCAC ¶¶ 494-507). Plaintiffs' overarching theory is that "Citadel Securities conspired with the Brokerage Defendants and the Clearing Defendants to prevent retail investors from purchasing shares of the **[*54]** Relevant Securities to artificially suppress share prices so that Citadel Securities could cover its short positions and mitigate its potential losses." (Resp. 11).

Defendants move to dismiss the CCAC. (*See generally* Mot.). They argue: (1) Plaintiffs fail to sufficiently plead that Defendants agreed to conspire; (2) Plaintiffs fail to plead the remaining elements of a *Sherman Act section 1* claim; and (3) Plaintiffs' antitrust theory is precluded by federal securities laws. (*See generally* Mot.; Reply).

II. LEGAL STANDARD

"To survive a motion to dismiss [under *Federal Rule of Civil Procedure 12(b)(6)*], a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (alteration added; quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). Although this pleading standard "does not require 'detailed factual allegations,' . . . it demands more than an unadorned, the-defendant-unlawfully-harmed-me accusation." *Id.* (alteration added; quoting *Twombly, 550 U.S. at 555*). Pleadings must contain "more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555* (citation omitted). "[O]nly a complaint that states a plausible claim for relief survives a motion to dismiss." *Iqbal, 556 U.S. at 679* (alteration added; citing *Twombly, 550 U.S. at 556*).

To meet this **[*55]** "plausibility standard," a plaintiff must "plead[] factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id. at 678* (alteration added; citing *Twombly, 550 U.S. at 556*). "The mere possibility the defendant acted unlawfully is insufficient to survive a motion to dismiss." *Sinaltrainal v. Coca-Cola Co., 578 F.3d 1252, 1261 (11th Cir. 2009)* (citation omitted), *abrogated on other grounds by Mohamad v. Palestinian Auth., 566 U.S. 449, 132 S. Ct. 1702, 182 L. Ed. 2d 720 (2012)*. When considering a motion to dismiss, a court must construe the complaint in the light most favorable to the plaintiff and take the factual allegations as true. *See Brooks v. Blue Cross & Blue Shield of Fla., Inc., 116 F.3d 1364, 1369 (11th Cir. 1997)* (citing *SEC v. ESM Grp., Inc., 835 F.2d 270, 272 (11th Cir. 1988)*).

III. ANALYSIS

As stated, Plaintiffs assert one claim under section 1 of the Sherman Act, *15 U.S.C. § 1*. (*See* CCAC ¶¶ 494-507).

Section 1 of the Sherman Act provides "[e]very contract, combination . . . , or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1* (alterations added). "Despite the different terminology, there is no magic unique to each term in *[section] 1*; the terms 'contract,' 'combination,' and 'conspiracy' are used interchangeably to capture the concept of concerted action, that is an 'agreement.'" *Am. Contractors Supply, LLC v. HD Supply Constr. Supply, Ltd., 989 F.3d 1224, 1233 (11th Cir. 2021)* (alteration added; some quotation marks and citation omitted).

"The purpose of the *Sherman Act* is to protect consumers from injury that results **[*56]** from diminished competition." *Agnew v. Nat'l Collegiate Athletic Ass'n, 683 F.3d 328, 334-35 (7th Cir. 2012)* (citation omitted). "[T]he Supreme Court has long concluded that Congress intended only to prohibit 'unreasonable' restraints on trade." *Quality Auto Painting Ctr. of Roselle, Inc. v. State Farm Indem. Co., 917 F.3d 1249, 1260 (11th Cir. 2019)* (alteration added; citation omitted). Thus, *section 1* "prohibits (1) conspiracies that (2) unreasonably (3) restrain interstate or foreign trade." *Id.* (citation omitted).

In their Motion, Defendants start by attacking the sufficiency of the allegations directed at the first requirement — that Plaintiffs plead a conspiracy among Defendants. (*See* Mot. 22-35). Defendants next dispute whether Plaintiffs adequately plead that the alleged agreement among Defendants unreasonably restrained trade. (*See id.* 35-40). Lastly, Defendants assert that Plaintiffs' antitrust theory is precluded by federal securities laws. (*See id.* 41-46). Because Plaintiffs fail to plead a conspiracy, the Court declines to reach the second and third suggested grounds for dismissal.

Conspiracy. "The first inquiry[] in any *section 1* claim . . . is to locate the agreement that restrains trade." *Tidmore Oil Co., Inc. v. BP Oil Co./Gulp Prods. Div., a Div. of BP Oil Co., 932 F.2d 1384, 1388 (11th Cir. 1994)* (alterations added). Adequately stating a *section 1* claim "requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made." *Twombly, 550 U.S. at 556*. The "crucial question" **[*57]** with regard to a conspiracy claim under *section 1* "is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express[.]" *Id. at 553* (alteration added; other alteration adopted; quotation marks and citation omitted). To allege an antitrust conspiracy, the plaintiff "should present direct or circumstantial evidence that reasonably tends to prove that the [defendant] and others had a conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 764, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)* (alteration added; quotation marks and citations omitted).

Plaintiffs contend they have plausibly alleged facts, both direct and circumstantial, that "Citadel Securities conspired with the Brokerage Defendants and the Clearing Defendants to prevent retail investors from purchasing shares of the Relevant Securities to artificially suppress share prices so that Citadel Securities could cover its short positions and mitigate its potential losses." (Resp. 11; *see id.* 12-29). The Court examines these allegations that purport to support the existence of a conspiracy directly or circumstantially.

Allegations of direct evidence of an agreement. "[I]t is only in rare cases that a plaintiff can establish **[*58]** the existence of a conspiracy by showing an explicit agreement; most conspiracies are inferred from the behavior of the alleged conspirators." *Seagood Trading Corp. v. Jerrico, Inc., 924 F.2d 1555, 1573-74 (11th Cir. 1991)* (alteration added; citation omitted). According to Plaintiffs, "[t]his is one of those rare cases" that involves "direct evidence of [an] unlawful agreement." (Resp. 14 (alterations added)). The Court disagrees.

"Direct evidence of an agreement is explicit and requires no inferences to establish the proposition or conclusion being asserted." *In re Loc. TV Advert. Antitrust Litig., No. 18 C 6785, 2020 U.S. Dist. LEXIS 208215, 2020 WL 6557665, at *7 (N.D. Ill. Nov. 6, 2020)* (quotation marks and citations omitted); *see also* *Mayor & City Council of Balt. v. Citigroup, Inc., 709 F.3d 129, 136 (2d Cir. 2013)* ("[A] plaintiff may . . . assert direct evidence that the defendants entered into an agreement in violation of the antitrust laws. . . . Such evidence would consist, for example, of a recorded phone call in which two competitors agreed to fix prices at a certain level." (alterations added; citation omitted)). The CCAC contains several allegations that Plaintiffs claim constitute direct evidence. Upon further examination, each allegation requires an inference to establish that an unlawful agreement was entered into between Defendants and therefore cannot be direct evidence.

To begin, Plaintiffs allege that "high-level executives of Citadel Securities regularly **[*59]** communicated with and coordinated with high-level executives of Robinhood and others in the lead up to, during and after the restrictions imposed on or around January 28, 2021." (CCAC ¶ 296; *see also* Resp. 14). Yet, by Plaintiffs' own admission, "[t]he written communications appear deliberately vague and do not describe the contents of what was agreed to in the communications." (Resp. 14 n.6 (alteration added)). Indeed, the alleged communications between Citadel Securities and Robinhood merely show that high-level executives at both firms agreed to "chat" and "work[] together." (CCAC ¶¶ 299, 302 (alteration added); *see id.* ¶¶ 297-307, 452-53). The CCAC does not detail any subsequent discussions because "these communications have not been disclosed[.]" (*Id.* ¶ 303 (alteration added)). These unknown discussions have no relevance at all unless one *infers* that Citadel Securities requested that Robinhood restrict trading in the Relevant Securities and Robinhood agreed.[15]

Similarly, Plaintiffs claim that "on January 28, 2021, high level employees of [] E*Trade communicated with employees of Citadel Securities to ensure certain orders were cancelled." (CCAC ¶ 315 (alteration added); *see also* ***[*60]*** Resp. 14). As support, the CCAC contains a screenshot of a January 28, 2021 email between the Senior Manager for Trading Operations for E*Trade and a Citadel Securities employee titled, "RE: Potential open orders[.]" (CCAC ¶ 316 (alteration added)). The E*Trade executive lists a number of securities and asks: "[c]an you confirm you're out on these?" (*Id.* (alteration added)). The Citadel Securities employee responds, "[c]anceled[.]" (*Id.* (alterations added).

As described by Defendants, this appears to be "no more than a routine daily trading account reconciliation email canceling ten trade orders, and Plaintiffs fail to allege that the email even pertains to the Relevant Securities." (Reply 9). To conclude this email evidences an unlawful agreement to restrain trade requires an exercise in incredible leaping logic in which the Court declines to engage.

Plaintiffs also assert that Apex "instructed" several Introducing Brokerages "to halt all opening transactions of GameStop, AMC and Koss on their platforms" (CCAC ¶ 276; *see id.* ¶¶ 274-75), which purportedly is direct evidence of an unlawful agreement to restrain trade (*see* Resp. 14). The only specific details provided in the CCAC about **[*61]** these instructions are: (1) the CEO of Webull explained that the brokerage restricted trading in the Relevant Securities on January 28, 2021 because "the collateral required by Apex for GameStop increased by 100% and Apex had informed him that Webull needed to shut off the ability to open new positions in certain stocks[,]" and "Apex was instructed by the DTCC that it was increasing the collateral needed to settle trades for the Relevant Securities" (CCAC ¶ 274 (alteration added)); (2) SoFi informed users that its clearing partner, Apex, "ha[d] prevented purchases in GME" (*id.* ¶ 275 (alteration added)); (3) Dough LLC tweeted, "our clearing has notified us that we must set GME, AMC, and KOSS to closing only. We will comply." (*id.* ¶ 276 (alteration adopted; quotation marks omitted)); and (4) Public.com tweeted, "our clearing firm, Apex Holdings, has decided to halt the buying of $KOSS, $GME, and $AMC" (*id.* (alteration adopted; quotation marks omitted)).

According to Plaintiffs, these Introducing Brokerages' statements show an explicit agreement between Apex and the Introducing Brokerages to *unlawfully* restrain trade; curiously an alternative explanation for the trading restrictions is **[*62]** provided by the CEO of Webull himself and appears in the pleading's factual allegations — "the DTCC . . . was increasing the collateral needed to settle trades for the Relevant Securities." (*Id.* ¶ 274 (alteration added)). The CCAC provides further support for this alternative explanation: "on February 9, 2021, in its letter to the

---

[15] Plaintiffs find no support in *In re Insurance Brokerage Antitrust Litigation, 618 F.3d 300, 324 n.23 (3d Cir. 2010)*. (*See* Resp. 14). There, the court explained that direct conspiracy includes "document[s] or conversation[s] explicitly manifesting the existence of the agreement in question[.]" *In re Ins. Brokerage Antitrust Litig., 618 F.3d at 324 n.23* (alterations added; citations omitted). As Plaintiffs concede, the alleged conversations between Citadel Securities and Robinhood were "vague and do not describe the contents of what was agreed to in the communications" — in other words, the opposite of explicit. (Resp. 14 n.6).

New Jersey Office of the Attorney General, Apex stated" that "[t]he reason for the temporary trading restrictions [it] imposed regarding purchases of AMC, GME and KOSS relates directly to the potential future collateral requirement that NSCC appeared it may impose on Apex as part of the margin system NSCC maintains to comply with the SEC's standards for covered clearing agencies." (*Id.* ¶ 480 (alterations added)). This explanation makes sense because NSCC clearing members can "monitor their risk in near real-time and estimate clearing fund contribution requirements." (*Id.* ¶ 103). Plaintiffs thus ask the Court to *infer* that the publicly stated explanations recited in the CCAC are untrue.

It is important to remember that Plaintiffs' conspiracy theory is that Citadel Securities influenced the Clearing Defendants and Brokerage Defendants to restrain trading in **[*63]** the Relevant Securities to protect itself from a short squeeze. Therefore, if the Introducing Brokerages' statements are to have any relevance to the alleged conspiracy at all, one must also *infer* that the true reason Apex instructed the Introducing Brokerages to restrict trading was to benefit Apex's business partner, Citadel Securities. These statements clearly cannot constitute direct evidence of an unlawful agreement given the chain of inferences that must be made for them to have relevance.

Plaintiffs proffer several other pieces of purported "direct evidence that Defendants acted in concert": "an internal Robinhood communication . . . discussing that others were doing the same"; "Robinhood['s] deci[sion] to impose purchasing restrictions on the Relevant Securities shortly after the NSCC margin call"; Defendants' "homogenous public statements to explain the events"; and Apex's warning to Robinhood "of efforts by investors to purchase the Restricted Securities even though Apex had no business relationship with Robinhood." (Resp. 14-15 (alterations added; footnote call numbers omitted)). Yet, by Plaintiffs' own admission, these allegations — at the most — "*demonstrate*[] that the **[*64]** coordinated trading restrictions imposed by Defendants were not the result of happenstance or independent decision-making[.]" (*Id.* 15 (emphasis and alterations added; footnote call number omitted)). Put differently, one can only *infer* an unlawful agreement was entered into based on these alleged facts.

Taken together, Plaintiffs fall far short of providing allegations "explicitly manifesting the existence of the agreement in question[.]" *In re Ins. Brokerage Antitrust Litig., 618 F.3d at 324 n.23* (alteration added; citations omitted). Certainly, "the complaint leaves no doubt that [P]laintiffs rest their *[section] 1* claim on descriptions of parallel conduct and not on any independent allegation of actual agreement among [Defendants]." *Twombly, 550 U.S. at 564* (alterations added). "Although in form a few stray statements speak directly of agreement, on fair reading these are merely legal conclusions resting on the prior allegations. . . . The nub of the complaint, then, is [Defendants'] parallel behavior, . . . and its sufficiency turns on the suggestions raised by this conduct when viewed in light of common economic experience." *Id. at 564-65* (alterations added; footnote call numbers omitted).

Allegations of circumstantial evidence of an agreement. As an alternative to alleging direct evidence, **[*65]** a plaintiff "may present circumstantial facts supporting the inference that a conspiracy existed." *Gamm v. Sanderson Farms, Inc., 944 F.3d 455, 465 (2d Cir. 2019)* (quotation marks and citation omitted). A conspiracy "may be inferred on the basis of conscious parallelism,[16] when such interdependent conduct is accompanied by circumstantial evidence and plus factors such as defendants' use of facilitating practices." *Todd v. Exxon Corp., 275 F.3d 191, 198 (2d Cir. 2001)* (alteration added; citations omitted). In other words, "[a]llegations of parallel conduct . . . are insufficient standing alone to raise an inference of conspiracy[;]" rather, "a plaintiff must allege sufficient plus factors to make the parallel conduct more probative of conspiracy than of conscious parallelism." *Auto. Alignment & Body Serv., Inc. v. State Farm Mut. Auto. Ins. Co., 953 F.3d 707, 726 (11th Cir. 2020)* (alterations added; quotation marks and citations omitted). Such plus factors "may include: a common motive to conspire, evidence that shows that the parallel acts were against the apparent individual economic self-interest of the alleged conspirators, and evidence of a high level of interfirm communications." *Citigroup, Inc., 709 F.3d at 136* (quotation marks, citation, and footnote call number omitted); *see also* *In re Delta/AirTran Baggage Fee Antitrust Litig., 733 F. Supp. 2d 1348, 1360 (N.D.*

---

[16] Conscious parallelism is a "process, not in itself unlawful, by which firms in a concentrated market might in effect share monopoly power, setting their prices at a profit-maximizing, supracompetitive level by recognizing their shared economic interests and their interdependence with respect to price and output decisions." *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* (citation omitted).

Ga. 2010) (explaining circumstantial evidence can include "speeches at industry conferences, announcements of future prices, statements on earnings calls, **[*66]** and in other public ways" (collecting cases)).

Parallel conduct. "A plaintiff establishes parallel conduct when it pleads facts indicating that the defendants acted similarly." *SD3, LLC v. Black & Decker (U.S.) Inc., 801 F.3d 412, 427 (4th Cir. 2015)* (quotation marks and citations omitted). "Parallel conduct occurs when competitors act similarly or follow the same course of action — for example, adopting similar policies at or around the same time in response to similar market conditions." *Jones v. Micron Tech. Inc., 400 F. Supp. 3d 897, 915 (N.D. Cal. 2019)* (citations omitted). Examples of parallel conduct allegations that suffice under the *Twombly* standard include "parallel behavior that would probably not result from chance, coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties[;]" and "complex and historically unprecedented changes in pricing structure made at the very same time by multiple competitors, and made for no other discernible reason[.]" *Twombly, 550 U.S. at 556 n.4* (alterations added; quotation marks and citations omitted).

Defendants argue the allegedly parallel conduct was not, in fact, parallel because it "varied in material ways, both before and after the NSCC's collateral calls on January 28, 2021." (Mot. 26). Indeed, "each Defendant put in place restrictions for **[*67]** different stock symbols, for different durations and for varying types of trades." (Reply 11 (footnote call number omitted)). On January 28, 2021, Robinhood set to position-closing only AMC, BB, BBBY, EXPR, GME, KOSS, NOK, TR, and TRVG (*see* CCAC ¶ 252); E*Trade "halted GME and AMC" (*id.* ¶ 250); Interactive Brokers "put AMC, BB, EXPR, GME, and KOSS option trading into liquidation only" (*id.* ¶ 249); and Apex instructed the Introducing Brokerages to "halt all opening transactions of GameStop, AMC and Koss on their platforms" (*id.* ¶ 276). As for ETC, the only allegation regarding its conduct is the general assertion that it "prohibited Alpaca from allowing its users to purchase the Relevant Securities." (*Id.* ¶ 277).

The restrictions among Defendants also varied in duration. For example, Apex lifted restrictions on trading by January 29, 2021 (*see id.* ¶ 327), while Robinhood maintained trading limitations on certain securities through February 4, 2021 (*see id.* ¶ 336). And one firm — Citadel Securities — did not impose any trading restrictions at all. (*See generally* CCAC; *see* Mot. 27).

While the Court disagrees with Plaintiffs' characterization of these restrictions as "virtually identical" **[*68]** (Resp. 17), Plaintiffs have at least alleged Defendants acted "similarly." *SD3, LLC, 801 F.3d at 427* (quotation marks omitted; quoting *Petruzzi's IGA Supermarkets, Inc. v. Darling-Del. Co., Inc., 998 F.2d 1224, 1243 (3d Cir. 1993)*; other citation omitted). The key parallel conduct allegation here is that on January 28, 2021 the Brokerage Defendants and the Clearing Defendants each restricted trading in one or more of the Relevant Securities. (*See, e.g.*, CCAC ¶¶ 14-15). As a result, the prices of the Relevant Securities decreased. (*See id.* ¶ 331). That the Brokerage Defendants and the Clearing Defendants did not restrict trading in the exact same manner or stock is not fatal to Plaintiffs' allegations of parallelism. *See* *Anderson News, L.L.C. v. Am. Media, Inc., 680 F.3d 162, 191 (2d Cir. 2012)* (disagreeing with the district court's holding that the plaintiff's "conspiracy claim was implausible because [the] defendants had a variety of reactions" and instead finding that "the *key* parallel conduct allegation was that all of the publisher and distributor defendants ceased doing business with [the plaintiff]" (alterations added; quotation marks, emphasis, and citation omitted));[17] *Jones, 400 F. Supp. 3d at 916* ("That these adjustments are not alleged to have occurred simultaneously is immaterial, and the available case law does not suggest any firm temporal limitation on 'parallel.'" (citing *Interstate Cir. v. United States, 306 U.S. 208, 227, 59 S. Ct. 467, 83 L. Ed. 610 (1939)*)).

Further, the fact that Citadel Securities did not itself restrict trading is inconsequential. Plaintiffs allege the Brokerage Defendants and the Clearing Defendants restricted trading to benefit Citadel Securities, who executed

[17] Defendants' reliance on *Anderson News, L.L.C. v. American Media, Inc., 899 F.3d 87 (2d Cir. 2018)*, is inapt. (*See* Mot. 28). There, after initially finding at the motion-to-dismiss stage that the varied responses by the defendants were inconsequential to a finding of parallel conduct, *see* *Anderson News, L.L.C., 680 F.3d at 191*, the Second Circuit held at the summary judgment stage that the defendants' conduct "was not, in fact, parallel" because "*evidence **[*69]** presented at summary judgment* undercut[] th[e] allegation" of parallel conduct. *Anderson News, L.L.C., 899 F.3d at 105* (alterations and emphasis added).

short trades in the Relevant Securities on January 27, 2021, "in anticipation of the Relevant Securities declining in price on January 28, 2021." (CCAC ¶ 13). Plaintiffs contend they have pleaded a "hub-and-spoke conspiracy" wherein Citadel Securities "coordinate[d] [] horizontal agreement[s] to restrict markets or to fix prices." (Resp. 34 (alterations added; citations omitted)). In these scenarios, it is obvious that the "hub" would not necessarily take the same action as the "spoke."

In all, Plaintiffs adequately allege that Defendants engaged in parallel conduct.[18] But because Plaintiffs' parallel conduct allegations are "insufficient standing alone to raise an inference of conspiracy[,]" the Court turns to whether Plaintiffs "allege sufficient plus factors to make the parallel conduct more probative of conspiracy than of conscious parallelism." *Auto. Alignment & Body Serv., 953 F.3d at 726* (alteration added; quotation marks and citations omitted).

Plus Factors. "[A]ny showing **[*70]** by [plaintiffs] that tends to exclude the possibility of independent action can qualify as a plus factor." *Williamson Oil Co., Inc. v. Philip Morris USA, 346 F.3d 1287, 1301 (11th Cir. 2003)* (alterations added; other alteration adopted; quotation marks and citation omitted); *see also In re Delta/AirTran Baggage Fee Antitrust Litig., 245 F. Supp. 3d 1343, 1371 (N.D. Ga. 2017)* ("There is no finite list of potential plus factors."). The Court examines below each of the plus factors identified by Plaintiffs. (*See* Resp. 18-29).

Common motive to conspire. The CCAC details an intricate plot in which Citadel Securities purchased short positions in the Relevant Securities — even as the Retail Investors' trading activity increased the price of the Relevant Securities to extreme, historic levels — and then "leverage[d] its relationships" with the other Defendants "to halt trading of GameStop and other Relevant Securities and artificially depress their share price[s]." (CCAC ¶ 409 (alterations added)).

As an initial matter, Defendants argue any allegation that Citadel Securities held short positions in the Relevant Securities during the relevant time period is based on "[p]ure speculation[.]" (Mot. 28 (alterations added; quotation marks omitted; citing *United Am. Corp. v. Bitmain, Inc., No. 18-cv-25106, 530 F. Supp. 3d 1241, 2021 U.S. Dist. LEXIS 69525, 2021 WL 1807782, at *13 (S.D. Fla. Mar. 31, 2021)* ("Pure speculation does not make out a plus factor."))). Notably, the CCAC admits "it is not possible to ascertain **[*71]** which investor has a short position in a particular security at any particular time unless the position is voluntarily publicly disclosed by the holder of the short position." (CCAC ¶ 399; *see also id.* ¶ 387). Plaintiffs instead rely on publicly available data.

As detailed in the CCAC, "FINRA data shows notable and significant increases in dark pool trading activity for each of the Relevant Securities on and around January 28, 2021" (*id.* ¶ 353), and short volume reporting shows a significant shift from shares sold long to shares sold short during that time (*see id.* ¶ 361). Given that individual investors generally cannot engage in dark trading (*see id.* ¶ 357), and "Citadel Securities represents about 50% of the dark trading activity [during that time], a large shift in the percentage of sales represented by short trades is highly likely to be caused by a shift in Citadel Securities's position from long to short or vice versa" (*id.* ¶ 360 (alteration added)). Plaintiffs' methodology is appropriate given the circumstances. *See In re Plasma-Derivative Protein Therapies Antitrust Litig., 764 F. Supp. 2d 991, 1002 n.10 (N.D. Ill. 2011)* ("If private plaintiffs, who do not have access to inside information, are to pursue violations of the law, the pleading standard must take into account the fact **[*72]** that a complaint will ordinarily be limited to allegations pieced together from publicly available data."). That Citadel Securities held short interests in the Relevant Securities is a reasonable inference to be drawn in Plaintiffs' favor. *See Spanish Broad. Sys. of Fla., Inc. v. Clear Channel Commc'ns, Inc., 376 F.3d 1065, 1069 n.1 (11th Cir. 2004)*.

Plaintiffs' theory regarding the Brokerage Defendants and Clearing Defendants' motive is more attenuated. According to the CCAC, the Brokerage Defendants and Clearing Defendants agreed to halt trading to benefit Citadel Securities because Citadel Securities "is either the largest or one of the largest payors for order flow for most of them." (CCAC ¶ 418). To illustrate, in 2020, "34% of Robinhood's revenue derived from transactions with

---

[18] While the varied restrictions do not preclude a finding of parallel conduct at this stage, they do influence the Court's plausibility analysis.

Citadel Securities" (*id.* ¶ 135); and "Apex sent 23.26% of all 'non-directed' order flow to Citadel Securities in S&P 500 stocks and 13.26% of all 'non-directed' order flow for non-S&P500 stocks to Citadel Securities in January 2021" (*id.* ¶ 140). Plaintiffs conclude that "[t]he preservation of [the] Brokerage and Clearing Defendants' mutually beneficial and highly lucrative payment for order flow relationships alone provides sufficient motive to conspire." (Resp. 20 (alterations added)).

In essence, Plaintiffs **[*73]** ask the Court to infer the Brokerage Defendants and Clearing Defendants had a common motive to illegally restrain trade simply because Citadel Securities is an important business partner of the other Defendants and might have suffered losses as a result of its short positions in the Relevant Securities. Yet, as discussed below, Plaintiffs also maintain that "restrict[ing] trading in the Relevant Securities is against the Brokerage and Clearing Defendants' self-interest" because they earn revenue from each transaction and because the trading restrictions create a risk of "both immediate and long-term reputational harm[.]" (Resp. 20, 22 (alterations added; quotation marks omitted)). As Defendants note, there are no allegations that Citadel Securities threatened or suggested it would cut off business relationships with any other Defendants if they did not impose trading restrictions, and Plaintiffs fail to otherwise explain why each Defendant would not simply use another market maker in such a scenario. (*See* Reply 13). The mere fact that Citadel Securities is an important business partner of the other Defendants does not provide sufficient motive to conspire.

Plaintiffs' proffered motive **[*74]** theory is even less plausible given that the CCAC provides an "obvious alternative explanation" for imposing the trading restrictions provided in the CCAC: increased collateral requirements caused by market volatility. *Iqbal, 556 U.S. at 682* (quotation marks omitted; quoting *Twombly, 550 U.S. at 567*). As clearing entities, each of the Brokerage Defendants and Clearing Defendants is a member of the DTCC and therefore subject to its collateral requirements. (*See* CCAC ¶¶ 110, 116). "The DTCC collateral requirement changes depending on the perceived risk of the order, since if one side of the trade defaults, and the broker cannot cover the loss, DTCC member firms are on the hook for completing the trade." (*Id.* ¶ 413).

As stated in the CCAC, the markets for the Relevant Securities were extremely volatile in the days leading up to January 28, 2021. (*See id.* ¶¶ 200-209). "On the morning of January 28, [the] DTCC demanded that its member clearing agents supply additional collateral to support these trades [in the Relevant Securities]." (*Id.*¶ 414 (alterations added)). For example, "[a]t 5:11 a.m. Eastern Standard Time, Robinhood received an email from NSCC indicating that Robinhood had a deficit of roughly $3 billion dollars." (*Id.* ¶ 231 **[*75]** (alteration added)).

Robinhood and multiple other Defendants cited the extraordinary market volatility and/or collateral requirements as the motivation for their trading restrictions. (*See, e.g., id.* ¶¶ 249-51, 274, 338-40, 479-80). The fact that each Defendant implemented varying trading restrictions gives support to their stated reasons because each Defendant would have its own unique risk tolerance and collateral requirements. And considering the CCAC itself states that firms *not alleged to be part of the conspiracy* also restricted transactions in the Relevant Securities and similarly cited "unprecedented market conditions[,]" the Court finds Plaintiffs' theory regarding motive implausible. (*Id.* ¶ 198 (alteration added); *see id.* ¶ 199).

To recap, Plaintiffs adequately explain Citadel Securities' motive for allegedly orchestrating the trading restrictions imposed by the Brokerage Defendants and Clearing Defendants. But the Court is unconvinced that Plaintiffs have set forth a coherent common motive as to the Brokerage Defendants and Clearing Defendants. This plus factor does not weigh in Plaintiffs' favor.

Actions against unilateral self-interest. "It is firmly established that actions **[*76]** that are contrary to an actor's economic interest constitute a plus factor[.]" *Williamson Oil, 346 F.3d at 1310* (alteration added; citation omitted). Nonetheless, courts "must exercise prudence in labeling a given action as being contrary to the actor's economic interests, lest we be too quick to second-guess well-intentioned business judgments of all kinds." *Id.* (citation omitted). "[E]xtreme action against self-interest . . . may suggest prior agreement — for example, where individual action would be so perilous in the absence of advance agreement that no reasonable firm would make the challenged move without such an agreement." *In re Musical Instruments and Equip. Antitrust Litig., 798 F.3d 1186, 1195 (9th Cir. 2015)* (alterations added); *see also* *City of Tuscaloosa v. Harcros Chems. Inc., 158 F.3d 548, 570 n.33 (11th Cir. 1998)* (citations omitted).

Defendants concede the trading restrictions imposed on January 28, 2021 were against their self-interest because the restrictions (1) "create[d] a real risk of both immediate and long-term reputational and financial harm (including this Action)" and (2) "cost each broker revenue — fewer trades mean fewer payments for order flow (or fewer commissions) for the Clearing and [Brokerage] Defendants, and less spread capture for the Market Makers[.]" (Mot. 30-31 (alterations added); *see* Resp. 21-22).

Nevertheless, the CCAC itself "provides ample **[*77]** independent business reasons" why each of the Brokerage Defendants and Clearing Defendants would have restricted trading without assurances that all other brokerages and clearing firms would restrict trading. *In re Musical Instruments, 798 F.3d at 1195* (finding no action against self-interest at the motion-to-dismiss stage). These Defendants faced historic market volatility and increased NSCC collateral requirements resulting from the volatility. Based on these allegations, Plaintiffs cannot credibly argue that "no reasonable firm" would have restricted trading in such circumstances. *Id.* In fact, the CCAC itself identifies firms *not alleged to be part of the conspiracy* that implemented restrictions on certain transactions involving the Relevant Securities on January 28, 2021. (*See* CCAC ¶¶ 198-99). Plaintiffs fail to make out a plus factor here.

Opportunity to coordinate and collude. Plaintiffs contend Defendants had ample opportunity to conspire because "[t]he financial industry is close-knit and secretive, replete with specialized jargon and terminology[,]" and "[i]ndividuals within the industry frequently move from one company to another and often work closely with competitors." (Resp. 23 (alterations added)). These are generic **[*78]** descriptions of features that many industries share. While it is perhaps necessary to allege some opportunity to conspire to infer a conspiracy, "the mere opportunity to conspire among antitrust defendants does not, standing alone, permit the inference of conspiracy." *Williamson Oil, 346 F.3d at 1319* (quotation marks and citation omitted); *see also* *Twombly, 550 U.S. at 567 n.12*.

Interfirm communications.[19] (*See* Resp. 23). "[E]vidence of a high level of interfirm communications" may constitute a plus factor. *Citigroup, 709 F.3d at 136* (alteration added; footnote call number, quotation marks, and citation omitted). The CCAC alleges several interfirm communications, some of which warrant consideration here, while others do not.

Beginning with those that do not — first, Apex warned Robinhood that the Retail Investors found a loophole around some of the trading restrictions imposed by Robinhood. (*See* CCAC ¶¶ 327-30). The CCAC explains "Apex had lifted restrictions on trading" by January 29, 2021. (*Id.* ¶ 327). While Plaintiffs claim this shows Apex was "policing the conspiracy" (*id.*), they fail to explain how this makes sense considering Apex had already lifted its trading restrictions by then. In any event, helping a competitor prevent fraudulent conduct is not an antitrust violation. **[*79]** *See* *Cement Mfrs.' Protective Ass'n v. United States, 268 U.S. 588, 604, 45 S. Ct. 586, 69 L. Ed. 1104 (1925)*.

Second, the CCAC includes what appears to be a routine email between E*Trade and Citadel Securities (*i.e.*, a brokerage and its market maker) about cancelling a securities order between them. (*See* CCAC ¶¶ 315-16). Plaintiffs do not explain the email's relevance.

Third and finally, several of the Introducing Brokerages reported that Apex "instructed them to halt all opening transactions of GameStop, AMC and Koss on their platforms." (*Id.* ¶ 276; *see id.* ¶¶ 274-75, 443-44). Given that Apex served as these firms' clearing entity and "was instructed by the DTCC that it was increasing the collateral needed to settle trades for the Relevant Securities[,]" these instructions are neither here nor there. (*Id.* ¶ 274 (alteration added); *see id.* ¶¶ 275-76).

Now, the communications that do warrant consideration. Embedded in the CCAC are several vague and ambiguous emails between high-level executives of Robinhood and Citadel Securities and internal Robinhood emails discussing external conversations that, given the timing and overall context, could be inferred to relate to the trading restrictions imposed on January 28, 2021.

---

[19] This section addresses Plaintiffs' arguments raised in their Response under both the "ample opportunity to coordinate and collude" and "acts [] inconsistent with unilateral conduct" sections. (Resp. 22-24, 28-29 (alteration added)).

On January 20, 2021, Citadel Securities' Head of Execution Services emailed **[*80]** Josh Drobnyk, Robinhood's Vice President of Corporate Relations and Communications, stating he was happy they "will be working together" and asking Drobnyk to "let [him] know if [they are] interested and who the main contact should be." (*Id.* ¶ 299 (alterations added; quotation marks omitted)). On January 25, 2021, Drobnyk replied "[w]e are on board" and copied Lucas Moskowitz, Robinhood's Deputy General Counsel, who was "going to be [Robinhood's] central point of contact[.]" (*Id.* ¶ 300 (alterations added)). Moskowitz and the Citadel Securities executive then arranged a call for the morning of January 26, 2021 — the details of which are unknown. (*See id.* ¶¶ 302-03). Considering the CCAC admits the details of this agreement or discussion are unknown, these emails are only relevant given their timing.

Around 4:40 p.m. EST on January 27, 2021, Gretchen Howard, Robinhood's COO, messaged Vlad Tenev, Robinhood's CEO, that she, along with Daniel Gallagher and Jim Swartwout, Robinhood's Chief Legal Officer and Robinhood Securities' President and CEO, would be joining "a call with Citadel" at 5 p.m. that day. (*Id.* ¶ 307; *see id.* ¶ 305). Howard told Tenev that she believed Citadel Securities would **[*81]** "make some demands on limiting [payment for order flow] across the board" but that they "won't agree to anything[.]" (*Id.* ¶ 307 (alterations added)). Tenev told Howard that although he had never met Ken Griffin, the CEO of Citadel Securities, she could mention on the call that "this would be a good time for [Tenev] to chat with [] Griffin[.]" (*Id.* (alterations added)). The request from a market maker to limit the order flow sent to it is not equivalent to a demand to restrict trading in certain securities; however, the timing and the involvement of high-level executives render these emails relevant.

Roughly two hours later, Swartwout received an internal message stating there was "[a]necdotal evidence that several 'very large' firms are having really bad nights too"; to which Swartwout replied, "everyone is. [Y]ou wouldnt [sic] believe the conv[ersation] we had with Citadel. [T]otal mess[.]" (*Id.* ¶ 308 (alterations added)). Around 8:30 p.m. that night, Swartwout emailed Citadel Securities' Vice President of Business Development to offer to set up a call that night with Tenev, and mentioned Tenev would like to have a discussion with Griffin at some point, given their relationship, but **[*82]** "[n]ot specific to this crazy issue[.]" (*Id.* ¶ 313 (alterations added); *see id.* ¶¶ 311-12). After the Citadel Securities executive asked Swartwout if Tenev would like to have the call that night, Swartout declined and said: "[j]ust looking for your dictated schedule and caps. I have 20 minutes until batch so whatever it is we are not going to be able to address it tomorrow given the notice. I have to say I am beyond disappointed in how this went down. It's difficult to have a partnership when these kind[s] of things go down this way." (*Id.* ¶ 313 (alterations added)). Again, these emails are vague and ambiguous, and are only relevant considering the timing and those involved.

On the morning of January 28, 2021, after Robinhood set AMC and GME to PCO, David Dusseault, Robinhood Financial's President and COO, informed Robinhood's Manager of Market Operations that "[Robinhood Securities] received a very large call — confidentially. [A]ll firms on street . . . are doing [the] same thing[.]" (*Id.* ¶ 244 (quotation marks omitted; alterations added)). The CCAC does not assert who was on this call.

Lastly, on January 30, 2021, a Citadel Securities executive informed Drobnyk that he "wanted to **[*83]** generally coordinate messaging" and copied on the email Robinhood's "[General Counsels] as an FYI and for privilege." (*Id.* ¶ 335 (alteration added); *see id.* ¶¶ 332-33). The two then arranged an "[u]rgent" phone call. (*Id.* ¶ 335 (alteration added)). Given the context of the preceding communications and the fact that this request to coordinate messaging occurred even as Robinhood continued to restrict trading in the Relevant Securities, these emails — while vague and ambiguous — do lend some credence to Plaintiffs' conspiracy theory.

Defendants insist each of these communications between Citadel Securities and Robinhood "reflect[s] ordinary business dealings between a Market Maker and its client." (Mot. 32 (alteration added; footnote call number omitted)). But given the timing, the players involved, and the fact that each of these emails could be inferred to relate to the trading restrictions imposed on January 28, 2021, Plaintiffs' allegations of interfirm communications are supportive of a conspiracy.

The support is thin, however. Plaintiffs cite to the undersigned's opinion in *In re Salmon, No. 19-21551-Civ, 2021 U.S. Dist. LEXIS 54321, 2021 WL 1109128 (S.D. Fla. Mar. 23, 2021)*, but the allegations here are hardly comparable. (*See* Resp. 22-24). There, the plaintiffs "point[ed] to bilateral **[*84]** and multilateral agreements not to compete and a high level of communications among [d]efendants," including complete details of multiple meetings, such as who was in attendance, when the meetings occurred, and the contents of those communications. *In re Salmon, 2021 U.S. Dist. LEXIS 54321, 2021 WL 1109128, at *15* (alterations added). Here, Plaintiffs concede they do not know what was discussed during the several calls between Robinhood and Citadel Securities executives.

In addition, the CCAC lacks specific allegations of interfirm communications between any other alleged co-conspirator. The Court thus finds no support here for a reasonable inference of a conspiracy involving any other Defendants.

In sum, Plaintiffs establish a plus factor here supporting, albeit weakly, an inference of a conspiracy between Robinhood and Citadel Securities.

Evidence of concealment and pretext. Plaintiffs contend "[u]nrecorded communications between coconspirators are hallmarks of antitrust conspiracies[,]" suggesting the simple fact that Robinhood and Citadel Securities[20] arranged to have discussions over the phone instead of exchanging information via email supports an inference of an illegal conspiracy. (Resp. 24-25 (alterations added; citations omitted)). The Court **[*85]** is not convinced such a proposition supports plausibility on a motion to dismiss.

In this regard, Plaintiffs cite *In re Flat Glass Antitrust Litigation, 385 F.3d 350, 364-65 (3d Cir. 2004)*, wherein the court noted a coconspirator asked another coconspirator to call him — one minor fact among a litany of allegations. (*See* Resp. 24). It is not clear that the phone call was important to the court's analysis.

Plaintiffs also cite *In re Urethane Antitrust Litigation, 913 F. Supp. 2d 1145, 1154-56 (D. Kan. 2012)*. (*See* Resp. 24-25). There, at summary judgment the court did find persuasive circumstantial evidence "that the alleged conspirators undertook to maintain the secrecy of their communications, particularly those involving pricing." *913 F. Supp. 2d at 1155*. The court relied on numerous, detailed facts indicating efforts to maintain secrecy, for example: coconspirators made calls "from a pay phone at a gas station using a prepaid credit card"; at a particular meeting with competitors, coconspirators "went outside to discuss pricing, in order to avoid listening devices in the facility"; the coconspirators' "reports of the meeting excluded their pricing discussion"; at the same meeting, coconspirators shared documents containing pricing information after "assurances that the document would be destroyed"; and coconspirators left trade association meetings to "conduct **[*86]** future price discussions at an off-site coffee shop so that the men could talk in confidence[.]" *Id. at 1155-56* (alteration added); *see* *id. at 1161-63*.

The only similarity between the allegations in the present case and the record in *In re Urethane* is that alleged coconspirators made phone calls around the time the alleged anticompetitive conduct occurred. Upon further examination, however, even this shared fact is not helpful to Plaintiffs.

The coconspirators in *In re Urethane* were direct competitors conspiring to fix prices — the fact that they would have numerous phone calls around the time of price increase announcements is highly suspicious. *See* *id. at 1149, 1155-56*. Here, Citadel Securities is Robinhood's most important business partner. It surely is not unusual for two firms in an ongoing business relationship to have conversations over the phone; and Plaintiffs admit they do not know the substance of these conversations. (*See* CCAC ¶ 461). The Court will not infer a conspiracy simply because two business partners chose to use phones to communicate.

In addition to these allegations of concealment, Plaintiffs insist they have set forth "pretextual statements" made by Robinhood and Apex "that provide evolving, inconsistent and **[*87]** conflicting explanations for the trading restrictions." (Resp. 25 (footnote call number omitted)). Plaintiffs first point to the fact that Robinhood "initially attributed the trading restrictions to market volatility, only to later assert that clearinghouse collateral requirements forced Robinhood to impose said restrictions." (*Id.*). Defendants counter that those statements were not inconsistent and conflicting because "market volatility led to the increased collateral requirements." (Reply 14). Defendants have the better argument.

[20] In their Response, Plaintiffs also refer to phone calls between Apex and the Introducing Brokerages it serves. (*See* Resp. 24). As explained, absent animating details, the Court declines to find these phone calls suggestive of an illegal agreement.

Indeed, the CCAC itself explains that collateral requirements change because "the DTCC may assign a volatility multiplier on certain securities which the DTCC perceives as having more risk." (CCAC ¶ 470). And the fact that Robinhood continued to impose restrictions after meeting its collateral requirements is of no moment because the trading restrictions "reduce[d] the volatility multiplier on the collateral that Robinhood Securities was required to post with the NSCC." (Reply 15 (alteration added); *see* Resp. 25; CCAC ¶ 470). It is not suspicious for Robinhood to strive to avoid higher collateral requirements.

Plaintiffs next cite several Robinhood statements **[*88]** that they assert conflict with its COO, Gretchen Howard's internal message that Robinhood had a "major liquidity issue" as it set certain Relevant Securities to PCO in the early morning of January 28, 2021. (CCAC ¶ 233; *see* Resp. 25). Later that day, "Robinhood posted on its blog that market volatility was the reason for the restrictions." (CCAC ¶ 466). In addition, Robinhood's CEO, Vlad Tenev, publicly stated "that the shutdowns were unrelated to Robinhood's liquidity and that Robinhood did not have a liquidity problem." (*Id.* ¶ 467). Tenev later testified before the House Financial Services Subcommittee "that trading restrictions were put in place to meet regulatory deposit requirements imposed by DTCC affiliate NSCC." (*Id.* ¶ 469; *see also id.* ¶ 340).

These statements are not conflicting because Howard's internal message stating Robinhood had a "major liquidity issue" came shortly after Robinhood "received an email from NSCC indicating that Robinhood had a deficit of roughly $3 billion dollars." (*Id.* ¶¶ 231, 233). Even viewing the pleading in the light most favorable to Plaintiffs, Howard was likely referring to Robinhood's ability to pay the increased collateral requirements caused **[*89]** by the market volatility, which is consistent with Robinhood later placing the blame on these collateral requirements.

Finally, Plaintiffs again refer to Apex's "conflicting explanations as to why it restricted trading." (Resp. 25). According to Plaintiffs, "[a]lthough Apex cited increased collateral requirements as the reason for the restrictions, Apex later admitted that it was not subject to any heightened collateral requirements but rather made the decision to restrict trade based solely on a 'potential future' collateral requirement despite having sufficient capital and available lines of credit." (*Id.* (alteration added)).

As further explained in the CCAC, Apex had told state regulators it imposed restrictions because of "the potential future collateral requirement that NSCC *appeared* it may impose on Apex" (CCAC ¶ 480 (emphasis added)); and Apex's President explained that Apex restricted "due to anomalous information" (*id.* ¶ 481 (quotation marks omitted)). Considering Apex lifted its restrictions after one day, this explanation makes sense. (*See id.* ¶ 327). As Defendants put it: "the market volatility in late January 2021 was extraordinary, with events occurring quickly to meet **[*90]** market and clearinghouse demands. Therefore, it is understandable that earlier-in-time internal Robinhood and Apex communications, as Plaintiffs identified, did not reflect final information later presented publicly." (Reply 15).[21]

In total, Plaintiffs do not make out a plus factor here.

Government investigations. Plaintiffs maintain the investigations of "the events concerning the January 28, 2021 trading restrictions" by "[t]he [SEC], FINRA, Congress, the Department of Justice, the San Francisco U.S. Attorney's Office, and the Attorneys General of various states" are indicative of collusion among Defendants. (Resp. 26 n.20 (alterations added)). The CCAC does not allege, however, that any of these authorities is investigating possible *collusion* among Defendants. (*See* CCAC ¶¶ 486-93). In fact, Plaintiffs concede "there is simply no evidence to suggest that the SEC is investigating the claims of concerted activity at issue here." (Resp. 45 (footnote call number and citation omitted)).

Defendants do not disagree that government investigations can bolster conspiracy allegations. (*Compare* Mot. 33, *and* Reply 15, *with* Resp. 26). They instead correctly note that where "allegations are **[*91]** sparse, the existence of

[21] Contrary to Plaintiffs' suggestion, the fact that government regulators did not directly call on Defendants to restrict trading is inconsequential (*see* Resp. 25 n.18), because the restrictions lowered the volatility multiplier that determines DTCC collateral requirements (*see, e.g*, CCAC ¶ 470).

government inquiries is insufficient to raise an inference of conspiracy." (Mot. 33 (alteration adopted; quotation marks and citations omitted)); *see also e.g., In re Loc. TV Advert., 2020 U.S. Dist. LEXIS 208215, 2020 WL 6557665, at *8* (collecting cases). Such is the case here. Given the thin allegations overall, and the fact that Plaintiffs have not alleged an investigation specifically into concerted activity among Defendants, Plaintiffs fail to establish a plus factor here.

Structural characteristics of the market. Plaintiffs contend they have alleged "economic market factors [that] paint a picture of a market whose characteristics make it ripe for collusion in violation of the ***antitrust law***." (Resp. 28 (alteration added)). While the CCAC does allege the existence of several characteristics that each tend to make a market susceptible to anticompetitive conduct and unlawful collusion, Plaintiffs present an incoherent market definition. (*See* CCAC ¶¶ 362-405).

In their Response, Plaintiffs argue that "the CCAC makes clear that the relevant market to which [they] refer is the securities market." (Resp. 26 (alteration added)). But the CCAC is hardly a model of clarity on this point. (*See* Mot. 34). Although Plaintiffs do not elaborate, **[*92]** it appears from the CCAC that Plaintiffs are attempting to define multiple markets — one for each Relevant Security — by stating "[t]he Relevant Securities are commodity (homogenous) products." (CCAC ¶ 374 (alteration added)). To complicate matters further, the CCAC also confusingly discusses characteristics of "[t]he markets for broker dealers, clearing firms and market making[.]" (*Id.* ¶ 368 (alterations added)). The Court is thus unable to discern from the CCAC what the alleged market definition is.

Moreover, Plaintiffs fail to grapple with Defendants' argument that the case is unlike the typical price-fixing conspiracies where this plus factor is invoked. (*See* Mot. 34). In each of the cases cited by Plaintiffs — all of which involve price-fixing conspiracies — the defendants utilized their market power to raise the prices of goods they sold. (*See* Resp. 26-28 (citing *In re Salmon, 2021 U.S. Dist. LEXIS 54321, 2021 WL 1109128, at *14*; *In re Disposable Contact Lens Antitrust, 215 F. Supp. 3d 1272, 1295-96 (M.D. Fla. 2016)*; *In re Ethylene Propylene Diene Monomer (EPDM) Antitrust Litig., 681 F. Supp. 2d 141, 169 (D. Conn. 2009)*; *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 656-58 (7th Cir. 2002)*)). Here, Plaintiffs allege that the Brokerage Defendants and Clearing Defendants restricted output to lower prices for securities they are not alleged to have bought or sold for their own accounts, all to benefit the Market Maker Defendant who actually engages in such transactions. Plaintiffs do not address this **[*93]** distinction at all and do not provide any legal authority supporting the application of this plus factor to their novel anticompetitive theory.

In short, Plaintiffs fail to coherently define a market and persuade the Court that this plus factor weighs in their favor.

* * *

What factual allegations are left standing that support a plausible inference of a conspiracy? Well, there are none — other than an allegation of parallel conduct — with respect to Defendants, E*Trade, Interactive Brokers, Apex, ETC, and PEAK6. Each of these Defendants therefore must be dismissed because "an allegation of parallel conduct and a bare assertion of conspiracy will not suffice" to state a *section 1* claim. *Twombly, 550 U.S. at 556*.

That leaves Robinhood and Citadel Securities. High-level executives at these firms exchanged various vague and ambiguous emails immediately before and after Robinhood imposed trading restrictions on the Relevant Securities on January 28, 2021. These emails set up telephone discussions between the executives, the substance of which is unknown to Plaintiffs. Admittedly, these emails may be somewhat suspicious given the participants and their timing. But are a few vague and ambiguous emails between two firms in an **[*94]** otherwise lawful, ongoing business relationship enough to "nudge[] [Plaintiffs'] claims across the line from conceivable to plausible[?]" *Id. at 570* (alterations added). The Court thinks not.

Accordingly, the CCAC is dismissed.

IV. CONCLUSION

For the foregoing reasons, it is

ORDERED AND ADJUDGED that Defendants' Motion to Dismiss the Antitrust Tranche Complaint **[ECF No. 408]** is **GRANTED**. The Corrected Consolidated Class Action Complaint **[ECF No. 416]** is **DISMISSED without prejudice**. Plaintiffs have until **December 20, 2021** to file their final amended complaint in the Antitrust Tranche of this Multidistrict Litigation.

Plaintiffs' Motion to Strike Defendant Citadel Securities LLC's Notice of Supplemental Authority **[ECF No. 437]** is **DENIED as moot**.

DONE AND ORDERED in Miami, Florida, this 17th day of November, 2021.

HN1[] **Horizontal Refusals to Deal, Boycotts**

An insurance practice receives McCarran-Ferguson immunity from federal antitrust liability if it (1) constitutes the business of insurance, (2) is regulated by state law, and (3) does not amount to a boycott, coercion, or intimidation. 15 U.S.C.S. § 1012(b). Under the first prong, a court must examine an insurance practice against three criteria to determine whether it constitutes the business of insurance: (a) whether the practice has the effect of transferring or spreading a policyholder's risk; (b) whether the practice is an integral part of the policy relationship between the insurer and the insured; and (c) whether the practice is limited to entities within the insurance industry. Under the second prong, state regulation need not mirror federal ***antitrust law*** to trigger McCarran-Ferguson's exemption, rather, general prohibitions designed to guarantee certain standards of conduct are sufficient to show regulation by the state so long as they are not mere pretense. Finally, exemptions from the antitrust laws are to be narrowly construed.

Insurance Law > ... > Insurance Company Operations > Company Representatives > Brokers

HN2[] **Company Representatives, Brokers**

The Third Circuit has held that an arrangement where brokers steered clients to particular insurers in exchange for payment was not the business of insurance because that conduct did not affect whether or to what extent a prospective insurance purchaser would transfer risk to an insurer, but merely to which insurer that risk would be transferred.

Insurance Law > Claim, Contract & Practice Issues > Policy Interpretation > Equal Bargaining Power

HN3[] **Policy Interpretation, Equal Bargaining Power**

It has long been established that the policy relationship between the insurer and insured relates to the type of policy which could be issued, its reliability, interpretation, and enforcement. At the outset, there is a distinction between vertical agreements—such as an agreement between an insurer and a provider—and a horizontal agreement, such as an agreement among insurers to engage in cooperative ratemaking and underwriting.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

HN4[] **Scope, Exemptions**

Regarding whether an insurance practice receives McCarran-Ferguson immunity from federal antitrust liability, the test is not whether an arrangement is limited to insurance companies or insurers, but whether it is limited to entities within the insurance industry.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > McCarran-Ferguson Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN5[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

No Act of Congress shall be construed to invalidate, impair, or supersede any law enacted by any State for the purpose of regulating the business of insurance, or which imposes a fee or tax upon such business, unless such Act specifically relates to the business of insurance: provided, that the federal antitrust laws shall be applicable to the business of insurance to the extent that such business is not regulated by state law. 15 U.S.C.S. § 1012(b). The first sentence deals with all federal statutes, while the second focuses specifically on federal antitrust laws.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN6[] **Scope, Exemptions**

A state's regulatory scheme need not regulate an insurance practice in the particular; so long as a state's scheme is not mere pretense, an insurance practice will not lose McCarran-Ferguson's antitrust immunity. Similarly, the Third Circuit has rejected the argument that, to exempt conduct from the federal antitrust laws, state regulation must parallel the Sherman Act. Had Congress desired this type of regulation, it could simply have continued the applicability to insurance companies of the Sherman Act itself. The Fourth and Sixth Circuits have held the same.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

HN7[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

When a court applies the first sentence of 15 U.S.C.S. § 1012(b) to an insurance practice (i.e., when it is dealing with a federal law outside the antitrust context), it must determine whether there is a conflict between the federal law and the law of the state in question. However, when a court applies the second sentence of § 1012(b), the test is whether the state in which the insurance practice is challenged has enacted non-pretextual regulations of its insurance industry.

Opinion

OPINION[*]

FISHER, *Circuit Judge*.

Appellant LifeWatch Services, Inc. is a large seller of telemetry monitors, which are outpatient heart monitors used primarily for detecting arrhythmias. Appellee Blue Cross Blue Shield Association licenses the Blue Cross/Blue

[*] This disposition is not an opinion of the full Court and pursuant to I.O.P. 5.7 does not constitute binding precedent.

Shield trade name to approximately 36 separate, locally operated health insurers **[*2]** called Blue Plans. LifeWatch alleges that the Association and Blue Plans have a horizontal agreement not to cover telemetry and that this agreement violates the Sherman Act, which prohibits conspiracies that restrain trade. The District Court dismissed LifeWatch's complaint, holding that the agreement between the Association and Blue Plans is exempt from federal antitrust liability under the McCarran-Ferguson Act. LifeWatch now appeals. We will affirm.[1]

HN1[] An insurance practice receives McCarran-Ferguson immunity from federal antitrust liability if it (1) constitutes the "business of insurance," (2) is "regulated by state law," and (3) does not "amount to a boycott, coercion, or intimidation." *Union Lab. Life Ins. Co. v. Pireno, 458 U.S. 119, 124, 102 S. Ct. 3002, 73 L. Ed. 2d 647 (1982)* (internal quotation omitted); *see also* *15 U.S.C. § 1012(b)*. Only the first and second prongs are at issue here. Under the first prong, a court must examine an insurance practice against three criteria to determine whether it constitutes the business of insurance: (a) "whether the practice has the effect of transferring or spreading a policyholder's risk"; (b) "whether the practice is an integral part of the policy relationship between the insurer and the insured"; and (c) "whether the practice is limited to entities within the **[*3]** insurance industry." *Pireno, 458 U.S. at 129*. Under the second prong, state regulation need not mirror federal ***antitrust law*** to trigger McCarran-Ferguson's exemption, *Travelers Ins. Co. v. Blue Cross of W. Pa., 481 F.2d 80, 83 n.10 (3d Cir. 1973)*; rather, "general prohibition[s] designed to guarantee certain standards of conduct" are sufficient to show regulation by the state so long as they are not "mere pretense." *FTC v. Nat'l Cas. Co., 357 U.S. 560, 564 (1957)*. Finally, "exemptions from the antitrust laws are to be narrowly construed." *Grp. Life & Health Ins. Co. v. Royal Drug, Co., 440 U.S. 205, 231, 99 S. Ct. 1067, 59 L. Ed. 2d 261 (1979)* (citation omitted).

LifeWatch argues that the horizontal agreement between the Association and Blue Plans not to cover telemetry, which it dubs the Uniformity Rule, fails both of McCarran-Ferguson's first two prongs and is therefore not immune from federal antitrust liability. We disagree.

According to LifeWatch's complaint, the Uniformity Rule works as follows. The Association and Blue Plans create a model medical policy, which is made up of directions for the Blue Plans on what claims to cover. The model medical policy is set by a Medical Policy Panel and voted on by each Blue Plan. The Association and Blue Plans then "agree to require substantial conformity" by Blue Plans with the model medical policy. J.A. 49. The Association, LifeWatch alleges, enforces the Uniformity Rule through "audits" **[*4]** to ensure that each Blue Plan substantially complies with the model medical policy. *Id.* The gravamen of LifeWatch's argument is that the Blue Plans have "repeatedly voted on the model medical policy that requires blanket denial of telemetry coverage," *Id.*, and that the Uniformity Rule enforcing this decision does not constitute the business of insurance. This argument does not pass muster when assessed against the three "business of insurance" criteria. *Pireno, 458 U.S. at 129*.

First, the arrangement between the Association and Blue Plans "has the effect of transferring or spreading a policyholder's risk," *id.*, because, according to LifeWatch's complaint, it is an agreement "not to compete on the package of services offered." J.A. 52. McCarran-Ferguson "was intended primarily to protect '*intra*-industry cooperation' in the underwriting of risks." *Pireno, 458 U.S. at 133* (emphasis in original) (quoting *Royal Drug, 440 U.S. at 221*). The arrangement here keeps the risk of the cost for telemetry services with the insured when it might otherwise be borne by an insurer as "medically necessary," and thus transfers the policyholder's risk. It is precisely the intra-industry cooperation in underwriting Congress contemplated. Thus, this arrangement is readily distinguishable **[*5]** from ones that the Supreme Court and we have found not to constitute the business of insurance.

For example, in *Royal Drug* the Supreme Court held that an agreement between an insurer and participating pharmacies did not spread risk. There, the defendant insurer's policy promised subscribers prescription drug coverage at $2 per prescription, with the insurer reimbursing the pharmacy for the balance. *440 U.S. at 209*. To fulfill its obligations, the insurer entered a separate "Pharmacy Agreement" with participating pharmacies. *Id.* If a

[1] The District Court had jurisdiction under *28 U.S.C. §§ 1331* (federal questions), *1337* (commerce and antitrust regulations). This Court has jurisdiction under *28 U.S.C. § 1291* (final judgments).

subscriber filled a prescription at a participating pharmacy, the insurer covered the cost according to the terms of the policy; however, if a subscriber filled a prescription at a non-participating pharmacy, he or she had to pay full price and the insurer would only reimburse him or her for 75% of the amount over $2. *Id.* This arrangement, the Court held, did not spread risk, but "serve[d] only to minimize the costs [the insurer] incur[red] in fulfilling its underwriting obligations." *Id. at 213*. Similarly, in *Pireno*, the Court held that a defendant-insurer's use of a peer-review committee to determine whether a subscriber's claim for chiropractic care was "necessary" and "reasonabl[y]" priced **[*6]** under the policy did not spread risk because it was "logically and temporally unconnected to the transfer of risk accomplished" by the policy itself. *458 U.S. at 130*.

HN2[] We have held that an arrangement where brokers steered clients to particular insurers in exchange for payment was not the business of insurance because that conduct did not affect "*whether* or *to what extent* a prospective insurance purchaser would transfer risk to an insurer, but merely to *which* insurer that risk would be transferred." *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 311-13, 357 (3d Cir. 2010)* (emphasis in original).

Here, the arrangement between the Association and Blue Plans bears "on the package of services offered" to insureds through the Blue Plans' respective policies. J.A. 52. This is not "merely [an] arrangement[] for the purchase of goods or services," *Royal Drug, 440 U.S. at 214*, or a post-execution determination of benefits "unconnected to the transfer of risk," *Pireno, 458 U.S. at 130*, but rather an agreement as to "the type of coverage [prospective policyholders can] obtain," *Ins. Brokerage, 618 F.3d at 357*. Accordingly, the arrangement between the Association and Blue Plans meets *Pireno*'s first criterion of risk-spreading.

Second, the arrangement between the Association and Blue Plans is "an integral part of the policy relationship" between the Blue Plans and their **[*7]** insureds. *See Pireno, 458 U.S. at 129*. ***HN3***[] It has long been established that the policy relationship between the insurer and insured relates to the "type of policy which could be issued, its reliability, interpretation, and enforcement." *SEC v. Nat'l Sec., Inc., 393 U.S. 453, 460 (1969)*. At the outset, there is a distinction between vertical agreements—such as an agreement between an insurer and a provider—and a horizontal agreement, such as an agreement among insurers to engage in cooperative ratemaking and underwriting. *See Restraint of Trade, Black's Law Dictionary* (11th ed. 2019) (defining "horizontal restraint" as "[a] restraint of trade imposed by an agreement between competitors at the same level of distribution"). For this reason, the arrangement in question here is far afield from the arrangements in *Royal Drug* and *Pireno* that the Supreme Court held as not integral to the insurer-insured relationship. The challenged relationships in those cases involved vertical agreements with entities wholly outside the insurance industry, and in both cases the Court reasoned that agreements with such entities were too attenuated from the insurer-insured relationship to be integral to it. *Royal Drug, 440 U.S. at 216*; *Pireno, 458 U.S. at 131*. Here, the arrangement between the Association and Blue Plans determines the "type of coverage" **[*8]** that an insured may receive. *Ins. Brokerage, 618 F.3d at 357*. Therefore, the arrangement between the Association and Blue Plans satisfies *Pireno*'s second criterion because it is integral to the insurer-policyholder relationship.

Third, the Association and Blue Plans are "entities within the insurance industry." *Pireno, 458 U.S. at 129*. LifeWatch concedes that the Blue Plans, which are health insurers, are in the insurance industry, but it argues that the Association is not. LifeWatch's argument cannot be squared with the allegations in its complaint that, in addition to licensing the Blue Cross/Blue Shield trade name, the Association also "negotiat[es] . . . benefits and premiums" for "Blue Cross health insurance [for] 5.3 million federal employees," and "establish[es] medical policies affecting subscribers and providers." J.A. 34-35. Moreover, the Supreme Court in *Royal Drug* and *Pireno* held that the arrangements in those cases did not constitute the business of insurance in part because they included entities "wholly outside the insurance industry." *Royal Drug, 440 U.S. at 231*; *Pireno, 458 U.S. at 132*. ***HN4***[] The test is not whether an arrangement is limited to "insurance companies" or "insurers," but whether it is limited to "entities within the insurance industry." *Pireno, 458 U.S. at 129*.

In short, the Association is dissimilar to the **[*9]** pharmacies in *Royal Drug* and the peer-review committee in *Pireno*. As the Association and Blue Plans correctly point out, "LifeWatch does not allege the Association is involved in any activities unrelated to Blue Plans." Appellee's Br. 30. And according to LifeWatch's complaint, the Association, in collaboration with the Blue Plans, sets the very model medical policy at issue here. It follows that the arrangement between the Association and Blue Plans is limited to entities within the insurance industry under Pireno's third criterion.

Analyzed against the three Pireno criteria, the Uniformity Rule meets the first requirement for McCarran-Ferguson antitrust exemption: it constitutes the business of insurance.

The second prong of McCarran-Ferguson at issue here is whether the Uniformity Rule is "regulated by State Law." 15 U.S.C. § 1012(b). The relevant portion of the statute in effect during the time of the conduct alleged here provides:

> **HN5**[] No Act of Congress shall be construed to invalidate, impair, or supersede any law enacted by any State for the purpose of regulating the business of insurance, or which imposes a fee or tax upon such business, unless such Act specifically relates to the business of insurance: *Provided*, That . . . [the **[*10]** federal antitrust laws] . . . shall be applicable to the business of insurance to the extent that such business is not regulated by State Law.

15 U.S.C. § 1012(b). The first sentence deals with all federal statutes, while the second focuses specifically on federal antitrust laws. LifeWatch offers two interpretive theories to argue that the District Court erred in concluding that the arrangement between the Association and Blue Plans is regulated within the meaning of McCarran-Ferguson. Neither theory is persuasive, even under a narrow construction of the statute.

First, LifeWatch argues that the District Court did not place proper weight on the statutory phrase "to the extent that." Focusing on that phrase, LifeWatch argues that "the business of insurance *is* exempt only '*to the extent that*' it is controlled, by rule or restriction, by state law." Appellant's Br. 24 (emphasis in original) (footnote omitted) (quoting 15 U.S.C. § 1012(b)). Therefore, LifeWatch argues that federal ***antitrust law*** applies up to the point that the challenged conduct is regulated by state law. According to LifeWatch, a court must take a practice-by-practice approach and look to whether an individual insurance practice—like the exclusion of telemetry **[*11]** through the Uniformity Rule—is regulated by the state to determine whether McCarran-Ferguson applies.

No court has embraced this interpretation of the statutory text. Indeed, the Supreme Court rejected substantially the same argument in FTC v. National Casualty Co., 357 U.S. 560, 78 S. Ct. 1260, 2 L. Ed. 2d 1540 (1957). There, the petitioner argued that the "regulated by state law" prong of McCarran-Ferguson was not met because "a general prohibition designed to guarantee certain standards of conduct is too 'inchoate' to be 'regulation' until that prohibition has been crystallized into 'administrative elaboration of these standards and application in individual cases.'" Id. at 564. The Supreme Court rejected this position. *See* id. at 564-65. **HN6**[] A state's regulatory scheme need not regulate an insurance practice in the particular; so long as a state's scheme is not "mere pretense," id. at 564, an insurance practice will not lose McCarran-Ferguson's antitrust immunity.

Similarly, we have rejected the argument that, "to exempt conduct from the federal antitrust laws, state regulation must parallel the Sherman Act." Travelers Ins. Co., 481 F.2d at 83 n.10. "[H]ad Congress desired this type of regulation, it could simply have continued the applicability to insurance companies of the Sherman Act itself." *Id.* The Fourth and Sixth Circuits have held the same. *See* Crawford v. Am. Title Ins. Co., 518 F.2d 217, 218 (4th Cir. 1975) (per **[*12]** curiam) ("[McCarran-Ferguson] renders the federal antitrust laws inapplicable when state legislation generally proscribes, permits, or otherwise regulates the conduct in question and authorizes enforcement through a scheme of administrative supervision." (citing Nat'l Cas., 357 U.S. at 564-65)); Ohio AFL-CIO v. Ins. Rating Bd., 451 F.2d 1178, 1182 (6th Cir. 1971) ("[W]e are convinced that the controlling test is . . . whether the state has generally authorized or permitted certain standards of conduct." (internal quotation omitted)).

Here, every state in which the arrangement between the Association and Blue Plans is challenged has health insurance regulations on the books. What's more, every state in question specifically regulates unfair trade practices, methods of competition, or unfair acts in the insurance industry. LifeWatch does not argue that these regulations are pretextual—just that they do not deal specifically with horizontal agreements in the telemetry market. This argument is foreclosed by controlling case law. *See, e.g., Travelers, 481 F.2d at 83 n.10*. LifeWatch's first argument on the state regulation prong fails.

For its second interpretive theory, LifeWatch argues that the statute's clauses have been bifurcated when they should be read together. The sole case that LifeWatch cites in support **[*13]** of this argument is *Humana Inc. v. Forsyth, 525 U.S. 299, 119 S. Ct. 710, 142 L. Ed. 2d 753 (1999)*. There, the Supreme Court applied McCarran-Ferguson's first clause to hold that, because the Racketeer Influenced and Corrupt Organizations (RICO) Act—which is not an ***antitrust law***—did not "invalidate, impair, or supersede" state law on unfair trade practices, it could be applied "in harmony with the State's regulation." *Humana, 525 U.S. at 303*. Based on this holding, LifeWatch argues that federal ***antitrust law*** should apply to the insurance industry so long as it does not "invalidate, impair, or supersede" state law.

This argument overplays its hand. The Court in *Humana* noted the differences in language between the first and second sentences of *§ 1012(b)*, and these differences played a key part in its decision. *525 U.S. at 309* ("Congress could have provided, as it did with respect to the Sherman, Clayton, and Federal Trade Commission Acts . . . that federal legislation generally, or RICO in particular, would be 'applicable to the business of insurance [only] *to the extent that* such business *is not regulated* by State law.'" (second alteration in original) (quoting *§ 1012(b)*). Thus, when a court applies the first sentence of *§ 1012(b)* to an insurance practice (*i.e.*, when it is dealing with a federal law outside the antitrust context), **[*14]** it must determine whether there is a conflict between the federal law and the law of the state in question. ***HN7***[] However, when a court applies the second sentence of *§ 1012(b)*, the test is whether the state in which the insurance practice is challenged has enacted non-pretextual regulations of its insurance industry. *See id.* (noting the difference in language and application between McCarran-Ferguson's first and second clauses). LifeWatch's second argument on the state regulation prong fails as well.

* * *

The challenged arrangement between the Association and Blue Plans, the Uniformity Rule, constitutes the business of insurance under the three criteria set forth in *Pireno*. In addition, the arrangement is regulated by the states within the meaning of McCarran-Ferguson because each state in which it is challenged regulates its health insurance industry by permitting and proscribing certain conduct. Accordingly, the challenged arrangement is accorded McCarran-Ferguson immunity from federal antitrust liability.[2]

For these reasons, we will affirm.

End of Document

[2] The Competitive Health Insurance Reform Act of 2020 was enacted after the District Court dismissed LifeWatch's Third Amended Complaint. Accordingly, this opinion does not resolve the question of whether CHIRA applies to LifeWatch's prayer for injunctive relief. That issue was not a part of this dispute.

LexisNexis® Headnotes

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN1[] **Fundamental Freedoms, Freedom to Petition**

California's anti-SLAPP statute is designed to protect defendants from meritless lawsuits that might chill the exercise of their rights to speak and petition on matters of public concern. To that end, the statute authorizes a special motion to strike a claim arising from any act of that person in furtherance of the person's right of petition or free speech under the United States Constitution or the California Constitution in connection with a public issue.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

Evidence > Burdens of Proof > Allocation

HN2[] Freedom of Speech, Strategic Lawsuits Against Public Participation

A court evaluates an anti-SLAPP motion in two steps. Initially, the moving defendant bears the burden of establishing that the challenged allegations or claims arise from protected activity in which the defendant has engaged. If the defendant carries its burden, the plaintiff must then demonstrate its claims have at least minimal merit. If the plaintiff fails to meet that burden, the court will strike the claim.

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN3[] Fundamental Freedoms, Freedom to Petition

A defendant's first-step burden is to identify the activity each challenged claim rests on and demonstrate that that activity is protected by the anti-SLAPP statute. A claim may be struck only if the speech or petitioning activity itself is the wrong complained of, and not just evidence of liability or a step leading to some different act for which liability is asserted. To determine whether a claim arises from protected activity, courts must consider the elements of the challenged claim and what actions by the defendant supply those elements and consequently form the basis for liability. Courts then must evaluate whether the defendant has shown any of these actions fall within one or more of the four categories of acts protected by the anti-SLAPP statute.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN4[] Freedom of Speech, Strategic Lawsuits Against Public Participation

The second step of the anti-SLAPP analysis has been described as a summary-judgment-like procedure. The court determines whether the plaintiff has stated a legally sufficient claim and made a prima facie factual showing sufficient to sustain a favorable judgment. The plaintiff may not rely solely on its complaint, even if verified; instead, its proof must be made upon competent admissible evidence. The defendant may submit evidence in support of its motion. However, the court does not weigh evidence or resolve conflicting factual claims. Rather, the court accepts the plaintiff's evidence as true, and evaluates the defendant's showing only to determine if it defeats the plaintiff's claim as a matter of law. Claims with the requisite minimal merit may proceed.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN5[] Standards of Review, De Novo Review

An order granting an anti-SLAPP motion is reviewed de novo.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN6[] Freedom of Speech, Strategic Lawsuits Against Public Participation

Malicious prosecution arises from an underlying lawsuit and involves allegations that the defendant committed a tort by engaging in the underlying action. A malicious prosecution claim meets the requirement of the first prong of the anti-SLAPP analysis as it constitutes protected activity under *Code Civ. Proc., § 425.16*.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN7[] Freedom of Speech, Strategic Lawsuits Against Public Participation

A mixed claim, in the context of an anti-SLAPP motion, is a claim based on protected and unprotected conduct.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN8[] Freedom of Speech, Strategic Lawsuits Against Public Participation

Code Civ. Proc., § 425.17, seeks to accomplish the goal of curbing abuse of the anti-SLAPP statute by expressly excluding several categories of claims from the scope of *Code Civ. Proc., § 425.16*.

Constitutional Law > ... > Freedom of Speech > Commercial Speech > Advertising

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Scope

Constitutional Law > ... > Freedom of Speech > Commercial Speech > Misleading Speech

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN9[] Commercial Speech, Advertising

The legislative history of *Code Civ. Proc., § 425.17*, indicates it was drafted to track constitutional principles governing regulation of commercial speech. Three elements distinguish commercial speech from noncommercial speech: the speaker, the audience, and the content of the message.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN10[] Freedom of Speech, Strategic Lawsuits Against Public Participation

Code Civ. Proc., § 425.17, subd. (c), establishes an exclusion from anti-SLAPP protection for claims concerning some commercial speech. The exemption applies when: (1) the cause of action is against a person primarily engaged in the business of selling or leasing goods or services; (2) the cause of action arises from a statement or conduct by that person consisting of representations of fact about that person's or a business competitor's business operations, goods, or services; (3) the statement or conduct was made either for the purpose of obtaining approval for, promoting, or securing sales or leases of, or commercial transactions in, the person's goods or services or in the course of delivering the person's goods or services; and (4) the intended audience for the statement or conduct meets the definition set forth in *§ 425.17, subd. (c)(2)*.

Constitutional Law > ... > Freedom of Speech > Commercial Speech > Misleading Speech

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN11[] **Commercial Speech, Misleading Speech**

The burden of proof as to the applicability of the *Code Civ. Proc., § 425.17*, commercial speech exemption falls on the party seeking the benefit of it. As a statutory exception to *Code Civ. Proc., § 425.16*, *§ 425.17* must be narrowly construed. Under the two-pronged test of *§ 425.16*, whether a *§ 425.17* exemption applies is a first prong determination. The court does not consider whether the plaintiff is likely to prevail on the merits. The court independently reviews the applicability of the commercial speech exemption.

Constitutional Law > ... > Freedom of Speech > Commercial Speech > Advertising

Constitutional Law > ... > Freedom of Speech > Commercial Speech > Misleading Speech

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN12[] **Commercial Speech, Advertising**

Mentioning a competitor or a competitor's product is not required under the *Code Civ. Proc., § 425.17*, commercial speech exemption. It is enough that the statements relate to the speaker's own product. *§ 425.17, subd. (c)(1)*.

Governments > Courts > Judicial Precedent

HN13[] **Courts, Judicial Precedent**

A decision does not stand for a proposition not considered by the court.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

Constitutional Law > ... > Freedom of Speech > Commercial Speech > Advertising

Constitutional Law > ... > Freedom of Speech > Commercial Speech > Misleading Speech

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN14[] **False Advertising, Lanham Act**

Code Civ. Proc., § 425.17, subd. (c), does not use the word "advertising," but instead provides its own explanation regarding what the commercial speech exception covers. Accordingly, cases construing claims under the Lanham Act are not instructive in construing the commercial speech exception to the anti-SLAPP statute.

Constitutional Law > ... > Freedom of Speech > Commercial Speech > Misleading Speech

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN15[] **Commercial Speech, Misleading Speech**

Code Civ. Proc., § 425.17, subd. (c)(2), identifies the audience to whom the defendant must make the statement for it to fall under the commercial speech exception. The intended audience is an actual or potential buyer or customer, or a person likely to repeat the statement to, or otherwise influence, an actual or potential buyer or customer, or the statement or conduct arose out of or within the context of a regulatory approval process, proceeding, or investigation.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

HN16[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

A citizen petition is a means afforded by the U.S. Food and Drug Administration (FDA) for raising concerns about products the FDA reviews; any individual may file such a petition concerning scientific or legal issues before or while the product is on the market. Through this petition process, the FDA permits private entities to provide comments and opinions on draft guidance by filing these petitions. *21 C.F.R. § 10.30 (2021)*. A petition can request that the FDA issue, amend, or revoke a regulation or order or take or refrain from taking any other form of administrative action. A citizen petition must describe the FDA action the petitioner requests and must include a certification by the petitioner that the petition includes all information and views on which the petition relies, and that it includes representative data and information known to the petitioner which are unfavorable to the petition. As such, a citizen petition is a means by which the FDA explicitly allows private entities to express safety, scientific, or legal concerns regarding a product. Alternatively stated, the citizen petition is a mechanism wherein a private entity can petition the government (a government agency) for redress.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Governments > Legislation > Initiative & Referendum

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN17[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

A citizen petition is classic protected activity under the anti-SLAPP statute. *Code Civ. Proc., § 425.16, subd. (e)(2)*. And the right to petition has been called an essential attribute of governing, vital to a basic process in California's constitutional scheme—direct initiation of change by the citizenry through initiative, referendum, and recall. Moreover, under the Noerr-Pennington doctrine, statements made in a citizen petition are generally immune from civil liability.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN18[] **Freedom of Speech, Strategic Lawsuits Against Public Participation**

A party asserting mixed causes of action need only establish a probability of prevailing on its claims based on protected conduct under the anti-SLAPP statute. If it cannot do so, then the allegations concerning the protected conduct must be stricken. However, the court disregards allegations concerning unprotected conduct. As such, the party does not have to prove a probability of success on the merits to the extent its claims are based on unprotected conduct.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN19[] **Freedom of Speech, Strategic Lawsuits Against Public Participation**

Only a cause of action that satisfies both prongs of the anti-SLAPP statute—i.e., that arises from protected speech or petitioning and lacks even minimal merit—is a SLAPP, subject to being stricken under the statute.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN20[] **Freedom of Speech, Strategic Lawsuits Against Public Participation**

In employing a summary-judgment-like procedure for the second prong of the anti-SLAPP analysis, a court determines whether the plaintiff's prima facie showing is enough to win a favorable judgment. This threshold is not high. Claims with minimal merit proceed.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

Evidence > Burdens of Proof > Allocation

HN21[] **Freedom of Speech, Strategic Lawsuits Against Public Participation**

During the second prong of a court's anti-SLAPP analysis, a defendant bears the burden of proving a privilege's applicability.

Torts > ... > Defenses > Privileges > Absolute Privileges

HN22[] **Privileges, Absolute Privileges**

Civ. *Code, § 47, subd. (b)*, renders absolutely privileged communications made as part of a judicial or quasi-judicial proceeding. The usual formulation is that the privilege applies to any communication (1) made in judicial or quasi-judicial proceedings; (2) by litigants or other participants authorized by law; (3) to achieve the objects of the litigation; and (4) that have some connection or logical relation to the action.

Torts > ... > Defenses > Privileges > Absolute Privileges

HN23[] **Privileges, Absolute Privileges**

The principal purpose of the litigation privilege is to afford litigants and witnesses the utmost freedom of access to the courts without fear of being harassed subsequently by derivative tort actions. Stated differently, it exists to protect citizens from the threat of litigation for communications to government agencies whose function it is to investigate and remedy wrongdoing. Thus, the crux of the litigation privilege is that it covers communications made as part of a judicial or quasi-judicial proceeding.

Torts > ... > Defenses > Privileges > Absolute Privileges

HN24[] **Privileges, Absolute Privileges**

One invoking the litigation privilege must do more than simply point to the allegedly privileged document.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN25[] **Scope, Exemptions**

The Noerr-Pennington doctrine, which arose in the context of ***antitrust law***, holds that those who petition government for redress are generally immune from antitrust liability. The doctrine has since been applied beyond the antitrust context and generally shields a defendant's petitioning activity before courts as well as administrative and other government agencies.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN26[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

An exception to the Noerr-Pennington doctrine arises when efforts to influence government are merely a sham; such efforts are not protected by the Noerr-Pennington doctrine. There is a two-part test for determining whether a defendant's petitioning activity falls outside the Noerr-Pennington doctrine. First, it must be objectively baseless in the sense that no reasonable litigant could realistically expect success of the merits; second, the litigant's subjective motivation must conceal an attempt to interfere directly with the business relationships of a competitor through the use of the governmental process—as opposed to the outcome of that process—as an anticompetitive weapon. To meet this test, the defendant's petitioning activities thus must be a sham both objectively and subjectively.

Civil Procedure > Appeals > Appellate Briefs

Civil Procedure > Appeals > Record on Appeal

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN27[] **Appeals, Appellate Briefs**

It is not the role of an appellate court to scour the record and make a party's arguments.

Torts > ... > Malicious Prosecution > Elements > Malice

HN28[] **Elements, Malice**

An action for malicious prosecution has three required elements: (1) the defendant brought (or continued to pursue) a claim in the underlying action without objective probable cause, (2) the claim was pursued by the defendant with subjective malice, and (3) the underlying action was ultimately resolved in the plaintiff's favor.

Torts > ... > Elements > Lack of Probable Cause > Determinations of Probable Cause

Torts > ... > Elements > Lack of Probable Cause > Evidence

HN29[] **Lack of Probable Cause, Determinations of Probable Cause**

An action is deemed to have been pursued without probable cause, for purposes of malicious prosecution, if it was not legally tenable when viewed in an objective manner as of the time the action was initiated or while it was being prosecuted. A prior action was not initiated without probable cause merely because it was ultimately found to lack merit; it was initiated without probable cause only if all reasonable lawyers would agree that the suit, at the time of filing, was totally and completely without merit based on the facts known to the defendant at the time the suit was filed. Probable cause is a low threshold designed to protect a litigant's right to assert arguable legal claims even if the claims are extremely unlikely to succeed.

Business & Corporate Compliance > ... > Patent Law > US Patent & Trademark Office Proceedings > Reexamination Proceedings

Patent Law > US Patent & Trademark Office Proceedings > Appeals

Patent Law > US Patent & Trademark Office Proceedings > Examinations > Office Actions

HN30[] **US Patent & Trademark Office Proceedings, Reexamination Proceedings**

35 U.S.C. § 325(d) provides the Patent Trial and Appeal Board of the United States Patent and Trademark Office (PTO) with the discretion to deny a petition for inter partes review but does not require the board to deny the petition even if the petition is simply repeating previously made arguments. And, under the statute, the board can appropriately exercise its discretion to grant a petition even though it raises claims based on the same prior art or arguments previously made to the PTO. Therefore, it is mere speculation to baldly conclude that a denial of a petition per the board's discretion under § 325(d) establishes a lack of probable cause to satisfy the corresponding element of a cause of action for malicious prosecution.

Headnotes/Summary

Summary

[*769] CALIFORNIA OFFICIAL REPORTS SUMMARY

The superior court granted in part and denied in part a company's anti-SLAPP special motion to strike (Code Civ. Proc., § 425.16) a competitor's defamation, unfair competition, and malicious prosecution claims. (Superior Court of San Diego County, Nos. 37-2019-00064665-CU-BT-CTL and 37-2019-00064665-CU-BT-CTL, John S. Meyer, Judge.)

The Court of Appeal affirmed in part, reversed in part, and remanded. The court held that the commercial speech exception to the anti-SLAPP statute (Code Civ. Proc., § 425.17, subd. (c)) applied to statements the company made to potential investors about development of a drug because the investors were in a position to influence future buyers by investing to bring the drug to market. A request to stay federal approval of the competitor's drug was protected conduct (§ 425.16, subd. (e)(2)) because it was petitioning activity, and although the litigation privilege (*Civ. Code, § 47, subd. (b)*) was not shown to apply, defamation and unfair competition claims arising from the request lacked minimal merit because the *Noerr-Pennington* doctrine provided immunity. A probability of prevailing was not shown as to the malicious prosecution claim because the denial of a petition challenging the competitor's patent did not establish lack of probable cause. (Opinion by Huffman, J., with McConnell, P. J., and O'Rourke, J., concurring.)

Headnotes

CALIFORNIA OFFICIAL REPORTS HEADNOTES

CA(1)[] (1)

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Protected Activity.

California's anti-SLAPP statute is designed to protect defendants from meritless lawsuits that might chill the exercise of their rights to speak and petition on matters of public concern. To that end, the statute authorizes a special motion to strike a claim arising from any act of that person in furtherance of the person's right of petition or free speech under the United States Constitution or the California Constitution in connection with a public issue.

CA(2)[] (2)

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Two-step Analysis.

A court evaluates an anti-SLAPP motion in two steps. Initially, the moving defendant bears the burden of establishing that the challenged allegations or claims arise from protected activity in which the defendant has engaged. If the defendant carries its burden, the plaintiff must then demonstrate its claims have at least minimal merit. If the plaintiff fails to meet that burden, the court will strike the claim.

CA(3)[] **(3)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Protected Activity.

A defendant's first-step burden is to identify the activity each challenged claim rests on and demonstrate that that activity is protected by the anti-SLAPP statute. A claim may be struck only if the speech or petitioning activity itself is the wrong complained of, and not just evidence of liability or a step leading to some different act for which liability is asserted. To determine whether a claim arises from protected activity, courts must consider the elements of the challenged claim and what actions by the defendant supply those elements and consequently form the basis for liability. Courts then must evaluate whether the defendant has shown any of these actions fall within one or more of the four categories of acts protected by the anti-SLAPP statute.

CA(4)[] **(4)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Probability of Prevailing.

The second step of the anti-SLAPP analysis has been described as a summary-judgment-like procedure. The court determines whether the plaintiff has stated a legally sufficient claim and made a prima facie factual showing sufficient to sustain a favorable judgment. The plaintiff may not rely solely on its complaint, even if verified; instead, its proof must be made upon competent admissible evidence. The defendant may submit evidence in support of its motion. However, the court does not weigh evidence or resolve conflicting factual claims. Rather, the court accepts the plaintiff's evidence as **[*771]** true, and evaluates the defendant's showing only to determine if it defeats the plaintiff's claim as a matter of law. Claims with the requisite minimal merit may proceed.

CA(5)[] **(5)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Review.

An order granting an anti-SLAPP motion is reviewed de novo.

CA(6)[] **(6)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Protected Activity—Malicious Prosecution Claim.

Malicious prosecution arises from an underlying lawsuit and involves allegations that the defendant committed a tort by engaging in the underlying action. A malicious prosecution claim meets the requirement of the first prong of the anti-SLAPP analysis as it constitutes protected activity under *Code Civ. Proc., § 425.16*.

CA(7)[] **(7)**

Pleading § 94—Motions and Objections—Motion to Strike—Anti-SLAPP—Mixed Claim.

A mixed claim, in the context of an anti-SLAPP motion, is a claim based on protected and unprotected conduct.

CA(8)[] **(8)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Scope—Excluded Claims.

Code Civ. Proc., § 425.17, seeks to accomplish the goal of curbing abuse of the anti-SLAPP statute by expressly excluding several categories of claims from the scope of *Code Civ. Proc., § 425.16*.

CA(9)[] **(9)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Commercial Speech Exemption.

The legislative history of *Code Civ. Proc., § 425.17*, indicates it was drafted to track constitutional principles governing regulation of commercial speech. Three elements distinguish commercial speech from noncommercial speech: the speaker, the audience, and the content of the message.

CA(10)[] **(10)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Commercial Speech Exemption.

Code Civ. Proc., § 425.17, subd. (c), establishes an exclusion from anti-SLAPP protection for claims concerning some commercial speech. The exemption applies when: (1) the cause of action is against a person primarily engaged in the business of selling or leasing goods or services; (2) the cause of action arises from a statement or conduct by that person consisting of representations of fact about that person's or a business competitor's business operations, goods, or services; (3) the statement or conduct was made either for the purpose of obtaining approval for, promoting, or securing sales or leases of, or commercial transactions in, the person's **[*772]** goods or services or in the course of delivering the person's goods or services; and (4) the intended audience for the statement or conduct meets the definition set forth in *§ 425.17, subd. (c)(2)*.

CA(11)[] **(11)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Commercial Speech Exemption.

The burden of proof as to the applicability of the *Code Civ. Proc., § 425.17* commercial speech exemption falls on the party seeking the benefit of it. As a statutory exception to *Code Civ. Proc., § 425.16*, *§ 425.17* must be narrowly construed. Under the two-pronged test of *§ 425.16*, whether a *§ 425.17* exemption applies is a first prong determination. The court does not consider whether the plaintiff is likely to prevail on the merits. The court independently reviews the applicability of the commercial speech exemption.

CA(12)[] **(12)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Commercial Speech Exemption.

Mentioning a competitor or a competitor's product is not required under the *Code Civ. Proc., § 425.17* commercial speech exemption. It is enough that the statements relate to the speaker's own product (*§ 425.17, subd. (c)(1)*).

CA(13)[] **(13)**

Courts § 38—Decisions and Orders—Doctrine of Stare Decisis—Identity of Law and Fact—Propositions Not Considered.

A decision does not stand for a proposition not considered by the court.

CA(14)[] **(14)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Commercial Speech Exemption.

Code Civ. Proc., § 425.17, subd. (c), does not use the word "advertising," but instead provides its own explanation regarding what the commercial speech exception covers. Accordingly, cases construing claims under the *Lanham Act (15 U.S.C. § 1125(a)(1)*) are not instructive in construing the commercial speech exception to the anti-SLAPP statute.

CA(15)[] **(15)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Commercial Speech Exemption.

Code Civ. Proc., § 425.17, subd. (c)(2), identifies the audience to whom the defendant must make the statement for it to fall under the commercial speech exception. The intended audience is an actual or potential buyer or customer, or a person likely to repeat the statement to, or otherwise influence, an actual or potential buyer or customer, or the statement or conduct arose out of or within the context of a regulatory approval process, proceeding, or investigation.

CA(16)[] **(16)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Commercial Speech Exemption.

Comments made to potential investors related to a company's development of a drug. To this end, **[*773]** the company emphasized that the drug was further along in development than other competing drugs, discussed patients' response rate to the drug, and highlighted the need for federal approval. At the time these statements were made, the company had not taken the drug to market. Thus, there were no consumers that would have been able to purchase the drug when the comments were made. However, clearly the audience of the statements was in a position to otherwise influence a potential buyer by investing in the company to help ensure that the company brought the drug to market before other competing drugs. Under these unique circumstances, the statements were commercial speech and fell under the exception to the anti-SLAPP statute (*Code Civ. Proc., § 425.17, subd. (c)*) in a lawsuit brought by a competitor alleging defamation, malicious prosecution, and unfair competition.

[Cal. Forms of Pleading and Practice (2021) ch. 376, Motions to Strike: Anti-SLAPP, § 376.16; 1 Wagstaffe Group, Matthew Bender Practice Guide: Cal. Pretrial Civil Procedure (2021) § 25-III.]

CA(17)[] **(17)**

Administrative Law § 22—Administrative Actions—Practice and Procedure—Petition for Adoption or Repeal of Regulation—Citizen Petition to U.S. Food and Drug Administration.

A citizen petition is a means afforded by the U.S. Food and Drug Administration (FDA) for raising concerns about products the FDA reviews; any individual may file such a petition concerning scientific or legal issues before or while the product is on the market. Through this petition process, the FDA permits private entities to provide comments and opinions on draft guidance by filing these petitions (*21 C.F.R. § 10.30 (2021)*). A petition can request that the FDA issue, amend, or revoke a regulation or order or take or refrain from taking any other form of administrative action. A citizen petition must describe the FDA action the petitioner requests and must include a certification by the petitioner that the petition includes all information and views on which the petition relies, and that it includes representative data and information known to the petitioner which are unfavorable to the petition. As such, a citizen petition is a means by which the FDA explicitly allows private entities to express safety, scientific, or legal concerns regarding a product. Alternatively stated, the citizen petition is a mechanism wherein a private entity can petition the government (a government agency) for redress.

CA(18)[] **(18)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Protected Activity—Petitioning.

A citizen petition is classic protected activity under the anti-SLAPP statute (*Code Civ. Proc., § 425.16, subd. (e)(2)*). And the right to petition has been called an essential attribute of governing, vital to a basic process in California's **[*774]** constitutional scheme—direct initiation of change by the citizenry through initiative, referendum, and recall. Moreover, under the *Noerr-Pennington* doctrine, statements made in a citizen petition are generally immune from civil liability.

CA(19)[] **(19)**

Pleading § 94—Motions and Objections—Motion to Strike—Anti-SLAPP—Probability of Prevailing—Mixed Claim.

A party asserting mixed causes of action need only establish a probability of prevailing on its claims based on protected conduct under the anti-SLAPP statute. If it cannot do so, then the allegations concerning the protected conduct must be stricken. However, the court disregards allegations concerning unprotected conduct. As such, the party does not have to prove a probability of success on the merits to the extent its claims are based on unprotected conduct.

CA(20)[] **(20)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Two-step Analysis.

Only a cause of action that satisfies both prongs of the anti-SLAPP statute—i.e., that arises from protected speech or petitioning and lacks even minimal merit—is a SLAPP, subject to being stricken under the statute.

CA(21)[] **(21)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Probability of Prevailing.

In employing a summary-judgment-like procedure for the second prong of the anti-SLAPP analysis, a court determines whether the plaintiff's prima facie showing is enough to win a favorable judgment. This threshold is not high. Claims with minimal merit proceed.

CA(22)[] **(22)**

Pleading § 93—Motions and Objections—Motion to Strike—Anti-SLAPP—Burden of Proof.

During the second prong of a court's anti-SLAPP analysis, a defendant bears the burden of proving a privilege's applicability.

CA(23)[] **(23)**

Libel and Slander § 18—Privileged Communications—Absolute Privilege—Legislative and Judicial Proceedings—Litigation Privilege—Elements.

Civ. *Code, § 47, subd. (b)*, renders absolutely privileged communications made as part of a judicial or quasi-judicial proceeding. The usual formulation is that the privilege applies to any communication (1) made in judicial or quasi-judicial proceedings; (2) by litigants or other participants authorized by law; (3) to achieve the objects of the litigation; and (4) that have some connection or logical relation to the action.

CA(24)[] **(24)**

Libel and Slander § 18—Privileged Communications—Absolute Privilege—Legislative and Judicial Proceedings—Litigation Privilege—Purpose and Scope.

The principal purpose of the litigation privilege is to afford **[*775]** litigants and witnesses the utmost freedom of access to the courts without fear of being harassed subsequently by derivative tort actions. Stated differently, it exists to protect citizens from the threat of litigation for communications to government agencies whose function it is to investigate and remedy wrongdoing. Thus, the crux of the litigation privilege is that it covers communications made as part of a judicial or quasi-judicial proceeding.

CA(25)[] **(25)**

Libel and Slander § 18—Privileged Communications—Absolute Privilege—Legislative and Judicial Proceedings—Litigation Privilege—Burden of Proof.

One invoking the litigation privilege must do more than simply point to the allegedly privileged document.

CA(26)[] **(26)**

Monopolies and Restraints of Trade § 5—Actions—Noerr-Pennington Immunity.

The *Noerr-Pennington* doctrine, which arose in the context of ***antitrust law***, holds that those who petition government for redress are generally immune from antitrust liability. The doctrine has since been applied beyond the antitrust context and generally shields a defendant's petitioning activity before courts as well as administrative and other government agencies.

CA(27)[] **(27)**

Monopolies and Restraints of Trade § 5—Actions—Noerr-Pennington Immunity—Sham Exception.

An exception to the *Noerr-Pennington* doctrine arises when efforts to influence government are merely a sham; such efforts are not protected by the *Noerr-Pennington* doctrine. There is a two-part test for determining whether a defendant's petitioning activity falls outside the *Noerr-Pennington* doctrine. First, it must be objectively baseless in the sense that no reasonable litigant could realistically expect success of the merits; second, the litigant's subjective motivation must conceal an attempt to interfere directly with the business relationships of a competitor through the use of the governmental process—as opposed to the outcome of that process—as an anticompetitive weapon. To meet this test, the defendant's petitioning activities thus must be a sham both objectively and subjectively.

CA(28)[] **(28)**

Appellate Review § 109—Briefs—Form and Requisites—Argument and Authority—Noncompliance.

It is not the role of an appellate court to scour the record and make a party's arguments.

CA(29)[] **(29)**

Malicious Prosecution § 3—Essentials to Maintenance of Action—Three Required Elements.

An action for malicious prosecution has three required elements: (1) the defendant brought (or continued to pursue) a claim in the underlying action without objective probable cause, (2) the claim was pursued by the defendant with subjective malice, and (3) the underlying action was ultimately resolved in the plaintiff's favor.

[*776] *CA(30)*[] **(30)**

Malicious Prosecution § 6—Essentials to Maintenance of Action—Want of Probable Cause—Tenability.

An action is deemed to have been pursued without probable cause, for purposes of malicious prosecution, if it was not legally tenable when viewed in an objective manner as of the time the action was initiated or while it was being prosecuted. A prior action was not initiated without probable cause merely because it was ultimately found to lack merit; it was initiated without probable cause only if all reasonable lawyers would agree that the suit, at the time of filing, was totally and completely without merit based on the facts known to the defendant at the time the suit was filed. Probable cause is a low threshold designed to protect a litigant's right to assert arguable legal claims even if the claims are extremely unlikely to succeed.

CA(31)[] **(31)**

Malicious Prosecution § 6—Essentials to Maintenance of Action—Want of Probable Cause—Unsuccessful Petition Challenging Patent.

Tit. *35 U.S.C. § 325(d)* provides the Patent Trial and Appeal Board of the United States Patent and Trademark Office (PTO) with the discretion to deny a petition for inter partes review but does not require the board to deny the petition even if the petition is simply repeating previously made arguments. And, under the statute, the board can appropriately exercise its discretion to grant a petition even though it raises claims based on the same prior art or arguments previously made to the PTO. Therefore, it is mere speculation to baldly conclude that a denial of a petition per the board's discretion under *§ 325(d)* establishes a lack of probable cause to satisfy the corresponding element of a cause of action for malicious prosecution.

Opinion by: Huffman, J.

Opinion

[636] HUFFMAN, J.**—Neurelis, Inc. (Neurelis), and Aquestive Therapeutics, Inc. (Aquestive), are pharmaceutical companies developing their own respective **[*777]** means to administer diazepam, a drug used to treat acute repetitive seizures (ARS). Neurelis was further along in the development process than Aquestive. Thus, according to Neurelis, Aquestive engaged in a "multi-year, anticompetitive campaign to derail the Food and Drug Administration" (FDA) **[***2]** from approving Neurelis's new drug. Based on Aquestive's alleged conduct, Neurelis sued Aquestive for defamation, malicious prosecution, and violation of the unfair competition law (UCL; *Bus. & Prof. Code, § 17200 et seq.*). In response, Aquestive brought a special motion to strike the complaint under the anti-SLAPP (strategic lawsuit against public participation) statute, *Code of Civil Procedure section 425.16*.[1]

The superior court granted in part and denied in part Aquestive's motion, finding that the defamation cause of action could not withstand the anti-SLAPP challenge. However, the court denied the motion as to Neurelis's other two causes of action.

Aquestive appeals, contending the court erred by failing to strike the malicious prosecution action as well as the claim for a violation of the UCL. Neurelis, in turn, cross-appeals from the order, maintaining that the conduct giving rise to its defamation cause of action was not protected under the anti-SLAPP statute.

We agree that at least some of the conduct giving rise to the defamation action is covered by the commercial speech exception (*§ 425.17, subd. (c)*) and not subject to the anti-SLAPP statute. Accordingly, we determine the superior court erred in granting the anti-SLAPP motion as to the defamation action. Some of **[***3]** this same conduct also gives rise to the UCL claim and is not subject to the anti-SLAPP statute as well. However, we note that Neurelis bases part of two of its causes of action on Aquestive's petitioning activity. That activity is protected conduct under the anti-SLAPP statute, and Neurelis has not shown a likelihood to prevail on the merits. Thus, allegations relating to this petitioning conduct must be struck. Finally, we determine that Neurelis has not shown a probability of success on the merits regarding its malicious prosecution claim. As such, that claim should be struck under the anti-SLAPP statute.

In summary, the superior court's order is affirmed in part and reversed in part. We will remand this matter back to the superior court with instructions to enter an order striking the allegations relating to Aquestive's petitioning activity, striking the malicious prosecution action, and denying the motion as to the UCL and defamation causes of action to the extent they are based on unprotected conduct.
[*778]

FACTUAL AND PROCEDURAL BACKGROUND

The Operative Complaint

Neurelis is a Delaware corporation with its principal place of business in San Diego. Its focus is to develop pharmaceuticals **[***4]** to treat central nervous system disorders. Aquestive is a Delaware corporation with its principal place of business in New Jersey. Both Neurelis and Aquestive were working to develop a drug to treat patients with epilepsy who suffer from ARS. For over 20 years, Diastat® was the only approved drug on the market to treat ARS, but it requires rectal administration. Therefore, Neurelis and Aquestive were **[**637]** trying to develop a new method to administer the needed medicine.

To this end, Neurelis formed in 2007 with the aim of combining various technologies to find an effective way to create an intranasal delivery system for an ARS treating drug (diazepam). In 2008, Neurelis had developed a novel formation for nasal delivery of the drug diazepam, which would be named Valtoco®.

In 2011, after initial nonclinical studies, Neurelis began discussions with the FDA regarding Valtoco as an investigational new drug. That same year, Neurelis conducted the first human proof-of-concept study. It announced the completion of dosing on April 20, 2011. Two months later, Neurelis publicly announced the results from this

---

[1] Statutory references are to the Code of Civil Procedure unless otherwise specified.

phase 1 study that demonstrated a bioavailability[2] of 96 percent when comparing Valtoco with **[***5]** intravenous diazepam.

Based on these results, Neurelis scheduled a preinvestigational new drug application with the FDA, which was conducted in November 2011. On February 6, 2012, Neurelis publicly announced the FDA's acceptance of the NRL-1 (Valtoco) investigational new drug application. Per the direction of the FDA, Neurelis continued working toward the development of Valtoco throughout 2012, 2013, and 2014.

On December 22, 2015, Neurelis announced the receipt of orphan drug designation from the FDA for Valtoco for management of ARS. Such designation may be obtained when a rare disorder or condition meets criteria specified by the *Orphan Drug Act of 1983* and the FDA's implementing regulations. This designation did not indicate that Valtoco was safe or effective for public use but, instead, operated to qualify Neurelis for various development incentives, like tax credits and potential exclusivity for seven years if the FDA ultimately approved Valtoco.
[*779]

On January 5, 2017, Neurelis announced receipt of fast track designation from the FDA for Valtoco. That designation allows for the potential expedited or priority review from the FDA once the new drug application has been submitted. It also provides **[***6]** for prioritized interactions with the FDA during the clinical development program.

On September 24, 2018, Neurelis announced the filing of a new drug application for Valtoco as a treatment for ARS. At the time of filing the operative complaint (Dec. 9, 2019), the FDA was still considering that application.

While Neurelis was in the process of developing Valtoco and seeking FDA approval, Aquestive also was working toward the development of its own drug to treat ARS, Libervant®. However, Aquestive was not as far along in the process as Neurelis. Indeed, at various times, Aquestive approached Neurelis about partnering in the development process, but Neurelis declined.

Libervant has a different delivery system than Valtoco. Although Valtoco is administered nasally, Libervant utilizes “fast-melt strips” for a “buccal delivery of diazepam.” So, the drug is delivered by placing a soluble strip in the patient's mouth against the cheek, which would quickly dissolve for oral administration. Libervant obtained orphan drug designation on November 10, 2016.

In June 2017, Aquestive's chief executive officer, Keith Kendall, and its chief operating officer, Dan Barber, met with Neurelis's chief executive **[***7]** officer, Craig **[**638]** Chambliss, to discuss “the two companies' diazepam programs and … to forge a potential strategic partnership between Aquestive and Neurelis.” Chambliss explained Neurelis's historical efforts to bring Valtoco to market as well as his views of the importance of formulating a nasal administration of diazepam to treat ARS for the epilepsy community. Kendall interrupted Chambliss's explanation, stating, “‘Look, let's be honest here. We don‘t care about the patients, epilepsy, or any of this. We are not here for patients, we are here for our investors and need to show them a return.’” After these comments, Chambliss left the meeting.

Kendall and Barber requested another meeting with Chambliss in January 2018. Chambliss agreed in the hopes of discussing “some type of proposal about other products[] because the significant gap in progress between the two diazepam programs would not make a good partnership.” However, at the meeting, Chambliss came to believe that Kendall and Barber were merely trying to obtain competitive intelligence on Neurelis and Valtoco. Kendall “attempted to insert Aquestive into a strategic partnering process with Neurelis,” but Chambliss explained **[***8]** that Aquestive was not an appropriate partner for Neurelis.
[*780]

---

[2] Bioavailability means “the rate and extent to which the active ingredient or active moiety is absorbed from a drug product and becomes available at the site of drug action.” (*21 C.F.R. § 314.3 (2021)*.)

Aquestive completed its initial public offering on July 24, 2018. Before the offering, Aquestive filed a form S-1 (Form S-1) with the Securities and Exchange Commission (SEC). In that form, Libervant was featured prominently. Although development of Libervant was not as far along as Valtoco, Aquestive represented that it was “further along” than other companies who were developing “other routes of administration” of diazepam for the treatment of ARS, including companies developing intranasal and subcutaneous implementations. However, Aquestive admitted that if any of these other companies obtained FDA approval for their formulations of diazepam for the treatment of ARS before Aquestive, then Aquestive would be barred from marketing Libervant in the United States for seven years.[3]

In a subsequent filing with the SEC, Aquestive did not claim that it was further along in the development of Libervant than other companies developing their diazepam products, but it still admitted that if a company were to get its product approved by the FDA before Libervant then Aquestive would most likely not be able to market Libervant in the United States **[***9]** for seven years.

Because Aquestive encountered multiple obstacles in the development of Libervant and its stock value decreased significantly, Aquestive threatened to file three inter partes review (IPR) petitions with the Patent Trial and Appeal Board (Board) of the United States Patent and Trademark Office (PTO) unless Neurelis signed a waiver of its orphan drug exclusivity. These petitions challenged the validity of claims from an issued United States patent belonging to Neurelis. Prompted by this threat, Chambliss agreed to meet with Kendall and Barber on January 9, 2019. Kendall would not consent to share the contents of the proposed petitions unless Neurelis agreed to “work together” with Aquestive. Chambliss had brought a Neurelis board member as well as an intellectual property **[**639]** attorney to the meeting. Yet, no agreement was reached.

Two days later, Aquestive's leadership and legal counsel had a phone call with Chambliss and Neurelis's legal counsel to discuss the threatened petitions. During the call, Aquestive stated that it would not share details of the petitions unless Neurelis signed a waiver of orphan drug exclusivity. Chambliss responded that the proposal was “ridiculous” **[***10]** and there was no need for further discussions.
[*781]

At a followup discussion the next week, Aquestive shared some details of the threatened petitions. Neurelis‘s legal counsel then determined the petitions were meritless. As such, Neurelis concluded that the petitions were proposed solely to extort it to sign an orphan drug exclusivity waiver. Chambliss therefore explained to Kendall on January 23, 2019, that Neurelis would not sign any waiver and given the frivolousness of the petitions, the money the parties would spend on litigation would be better served invested in the epilepsy community. To this end, Chambliss encouraged Kendall to “‘do the right thing here,’” but Kendall indicated Aquestive would move forward with the petitions.

On January 29, 2019, Aquestive filed the three IPR petitions with the Board, challenging the validity of all the claims of Neurelis's U.S. Patent No. 9,763,876 (’876 Patent). The Board denied institution of a review for one of the petitions because Aquestive's petition failed to demonstrate a reasonable likelihood of prevailing on showing invalidity of a claim. The Board also denied institution of a review for another one of the petitions, under *35 United States Code section 325(d)*, because that petition asserted the same or substantially **[***11]** the same prior art or arguments that had already been presented to the PTO during the original prosecution of the ’876 Patent. As to the third petition, the Board instituted a review on August 13, 2019. At the time of the filing of the operative complaint, the petition remained pending.

In addition to filing the three petitions with the Board, Aquestive also filed a citizen petition with the FDA on November 1, 2019, requesting that the FDA stay approval of Neurelis's new drug application for Valtoco “‘until additional clinical studies have been conducted that would allow for adequate labeling as requested in this petition.’”

---

[3] Neurelis alleges that, at the time of the filing of Aquestive's Form S-1, Aquestive had not yet completed any clinical trials for Libervant. Although Aquestive did not mention Neurelis or Valtoco by name, Neurelis avers Aquestive made its statements “with Neurelis in mind.” Moreover, because Neurelis was further along in the development of Valtoco than Aquestive was with Libervant, Neurelis claims Aquestive's factual representations in the Form S-1 were false.

Aquestive additionally requested that the FDA determine that Valtoco was neither clinically superior to other diazepam products nor offered a "'major contribution to patient care.'" According to Neurelis, such a determination would be tantamount to the FDA not giving Valtoco orphan drug exclusivity. Neurelis argues that none of Aquestive's claims against Valtoco were accurate, but instead, they were "founded on misleading, inaccurate, and incomplete data."

Neurelis filed a responsive letter to the FDA on November 22, 2019, explaining why Aquestive's FDA petition was meritless. **[***12]** Aquestive then submitted a supplemental petition asking the FDA to require Neurelis to reformulate Valtoco because it contains Vitamin E. Again, Neurelis contends the claims in Aquestive's supplemental filing were based on "inaccurate data and misinformation."

Moreover, on a November 6, 2019 quarterly investors call, Kendall stated, "'Based on patient survey data, Libervant is preferred by 80-plus percent of **[*782]** patients when compared to nasal sprays. Once approved by the FDA, Libervant will be the only treatment option usable by and delivering a consistent, predictable dose to virtually all patients to whom it's prescribed.'"

Because of Aquestive's actions, Neurelis brought suit, alleging causes of action for **[**640]** violations of the UCL, defamation, and malicious prosecution.

The Anti-SLAPP Motion

In response to the operative complaint, Aquestive filed an anti-SLAPP motion. In that motion, Aquestive argued the three causes of action were based on speech protected under *subdivision (e)(1)*, *(2)*, and *(3) of section 425.16*. Neurelis opposed the motion arguing that Aquestive's private threats were not protected under the anti-SLAPP statute and that any causes of action arising out of the statements to investors and the citizen petition were **[***13]** not protected because they fell under the commercial speech exemption. In addition, Neurelis contended that it had a probability of succeeding on the merits on each cause of action and Aquestive failed to carry its burden on any affirmative defense.

After considering the papers and evidence submitted in support of and in opposition to the motion as well as entertaining oral argument, the superior court asked the parties to submit supplemental briefing on two issues, whether: (1) the investor statements qualify for the commercial speech exemption and (2) the denial of the petitions filed with the Board could give rise to a malicious prosecution claim.

The court then considered the supplemental briefs and issued its ruling, denying in part and granting in part the anti-SLAPP motion. Specifically, the court struck the defamation cause of action, but allowed the UCL and malicious prosecution causes of action to stand. In doing so, the court found that the comments made to the investors did not fall under the commercial speech exception codified in *section 425.17, subdivision (c)(2)*. In addition, the court determined that the denial of two of the petitions filed with the Board could serve as the basis for the malicious prosecution **[***14]** action. Regarding the probability of success on the merits, the court concluded that Neurelis did not satisfy its burden as to the defamation action but did so as to the UCL and malicious prosecution claims.

Appeals

Aquestive appeals the court's order as to its denial of the anti-SLAPP motion regarding the UCL and malicious prosecution causes of action. **[*783]** Neurelis appeals the order as to the granting of the motion concerning the defamation cause of action. On our own motion, we consolidated the two appeals.

DISCUSSION

I

THE ANTI-SLAPP MOTION

A. Legal Standards

CA(1)[] **(1)** “Enacted by the Legislature in 1992, ***HN1***[] the anti-SLAPP statute is designed to protect defendants from meritless lawsuits that might chill the exercise of their rights to speak and petition on matters of public concern. [Citations.] To that end, the statute authorizes a special motion to strike a claim ‘arising from any act of that person in furtherance of the person's *right of petition or free speech under the United States Constitution* or the *California Constitution* in connection with a public issue.’” (*Wilson v. Cable News Network, Inc. (2019) 7 Cal.5th 871, 883–884 [249 Cal. Rptr. 3d 569, 444 P.3d 706] (Wilson)*.)

HN2[] ***CA(2)***[] **(2)** “A court evaluates an anti-SLAPP motion in two steps. ‘Initially, the moving defendant bears the burden of establishing that the challenged **[***15]** allegations or claims “aris[e] from” protected activity in which the defendant has engaged. [Citations.] If the defendant carries its burden, **[**641]** the plaintiff must then demonstrate its claims have at least “minimal merit.”’ [Citation.] If the plaintiff fails to meet that burden, the court will strike the claim.” (*Wilson, supra, 7 Cal.5th at p. 884*.)

HN3[] ***CA(3)***[] **(3)** “The defendant's first-step burden is to identify the activity each challenged claim rests on and demonstrate that that activity is protected by the anti-SLAPP statute. A ‘claim may be struck only if the speech or petitioning activity *itself* is the wrong complained of, and not just evidence of liability or a step leading to some different act for which liability is asserted.’ [Citation.] To determine whether a claim arises from protected activity, courts must ‘consider the elements of the challenged claim and what actions by the defendant supply those elements and consequently form the basis for liability.’ [Citation.] Courts then must evaluate whether the defendant has shown any of these actions fall within one or more of the four categories of ‘“act[s]”’ protected by the anti-SLAPP statute.” (*Wilson, supra, 7 Cal.5th at p. 884*.)

[*784]

HN4[] ***CA(4)***[] **(4)** The second step of the anti-SLAPP analysis has been described as a summary-judgment-like **[***16]** procedure. (*Sweetwater Union High School Dist. v. Gilbane Building Co. (2019) 6 Cal.5th 931, 940 [243 Cal. Rptr. 3d 880, 434 P.3d 1152] (Sweetwater Union)*.) The court determines whether “‘the plaintiff has stated a legally sufficient claim and made a prima facie factual showing sufficient to sustain a favorable judgment.’” (*Ibid.*) The plaintiff “‘may not rely solely on its complaint, even if verified; instead, its proof must be made upon competent admissible evidence.’” (*Ibid.*) The defendant may submit evidence in support of its motion. (*1-800 Contacts, Inc. v. Steinberg (2003) 107 Cal.App.4th 568, 585 [132 Cal. Rptr. 2d 789]*.) However, “‘[t]he court does not weigh evidence or resolve conflicting factual claims.’” (*Sweetwater Union, at p. 940*.) Rather, the court “‘accepts the plaintiff's evidence as true, and evaluates the defendant's showing only to determine if it defeats the plaintiff's claim as a matter of law. [Citation.] “[C]laims with the requisite minimal merit may proceed.”’” (*Ibid.*)

HN5[] ***CA(5)***[] **(5)** We review an order granting an anti-SLAPP motion de novo. (*Sweetwater Union, supra, 6 Cal.5th at p. 940*.)

B. First Prong of the Anti-SLAPP Analysis

CA(6)[] **(6)** In the instant action, Neurelis alleges three causes of action against Aquestive—violation of the UCL, defamation, and malicious prosecution. As to the last cause of action, ***HN6***[] malicious prosecution arises from an underlying lawsuit and involves allegations that the defendant committed a tort by engaging in the underlying action. (See *Jarrow Formulas, Inc. v. LaMarche (2003) 31 Cal.4th 728, 734–735, 740–741 [3 Cal. Rptr. 3d 636, 74 P.3d 737] (Jarrow Formulas)* [concluding **[***17]** that malicious prosecution is not exempt from anti-SLAPP scrutiny and explaining that “every Court of Appeal that has addressed the question has concluded that malicious prosecution causes of action fall within the purview of the anti-SLAPP statute”].) Because the malicious prosecution claim meets the requirement of the first prong as it constitutes protected activity under *section 425.16*, we will address the parties' respective arguments as to that cause of action under the second prong of our anti-SLAPP analysis, *post*. In considering the first prong of the anti-SLAPP motion, we shall focus on the UCL and defamation claims.

[642]**

CA(7)[] **(7)** As a threshold matter, we note that the UCL cause of action is ***HN7***[] a mixed claim; that is, it is based on protected and unprotected conduct. (See *Baral v. Schnitt (2016) 1 Cal.5th 376, 396 [205 Cal.Rptr.3d 475, 376 P.3d 604]* (*Baral*).) Thus, the UCL claim relies on Aquestive's “extortionist behavior using litigation as leverage to force Neurelis into waiving [o]rphan [d]rug [e]xclusivity" as well statements Aquestive made in the citizen petition and representations it made to investors. Aquestive admits in its opening brief that **[*785]** the anti-SLAPP motion was not aimed at Aquestive's threats to Neurelis. As such, as to the **[***18]** UCL cause of action only, the anti-SLAPP motion could not have struck that entire cause of action. Therefore, at least the portion of the UCL claim based on the private threats is not part of this appeal and survives regardless of the outcome here. (*Baral, at p. 396*.)

So, we are left with Aquestive's statements in the citizen petition and its representations to investors, both of which form the basis of Neurelis's causes of action for violation of the UCL and defamation. Aquestive maintains these statements and representations are protected conduct under the anti-SLAPP statute; thus, we must move on to the second prong of our analysis. Neurelis does not argue that the challenged statements do not concern an issue of public interest and, as such, are not covered under the anti-SLAPP statute for that reason. Instead, it counters that the conduct is not protected because it falls under the commercial speech exception found in *section 425.17, subdivision (c)*. We accept the implicit concession by Neurelis that the statements concern an issue of public interest and turn to analyzing whether the commercial speech exception applies.

1. The Commercial Speech Exception

CA(8)[] **(8)** In 2003, the Legislature enacted *section 425.17* to curb "a disturbing abuse of *Section 425.16* **[***19]** … which has undermined the exercise of the constitutional rights of freedom of speech and petition for the redress of grievances, contrary to the purpose and intent of *Section 425.16*." (*§ 425.17, subd. (a)*.)[4] ***HN8***[] *Section 425.17* seeks to accomplish that goal by expressly excluding several categories of claims from the scope of *section 425.16*.

HN10[] ***CA(10)***[] **(10)** *Section 425.17, subdivision (c)* establishes such an exclusion for claims concerning some commercial speech. As our high court explained, the exemption applies when: "(1) the cause of action is against a person primarily engaged in the business of selling or leasing goods or services; (2) the cause of action arises from a statement or conduct by that person consisting of representations of fact about that person's or a business competitor's business operations, goods, or services; (3) the statement or conduct was made either for the purpose of obtaining approval for, promoting, or securing sales or **[*786]** leases of, or commercial transactions in, the person's goods or services or in the course of delivering the person's goods or services; and (4) the intended audience for the statement or conduct meets the definition set forth in *section 425.17(c)(2)*." (*Simpson Strong-Tie Co., Inc. v. Gore (2010) 49 Cal.4th 12, 30 [109 Cal. Rptr. 3d 329, 230 P.3d 1117] (Simpson)* **[**643]** ; see *Demetriades v. Yelp, Inc. (2014) 228 Cal.App.4th 294, 308–309 [175 Cal. Rptr. 3d 131] (Demetriades)*.)

HN11[] ***CA(11)***[] **(11)** The burden of proof as to the applicability of *section 425.17*'s commercial speech exemption **[***20]** falls on the party seeking the benefit of it, in this case, Neurelis. (*Simpson, supra, 49 Cal.4th at p. 26*.) As a statutory exception to *section 425.16*, *section 425.17* must be narrowly construed. (*Simpson, at p. 22*; *JAMS, supra, 1 Cal.App.5th at p. 992*.) "Under the two-pronged test of *section 425.16*, whether a *section 425.17* exemption applies is a first prong determination." (*Demetriades, supra, 228 Cal.App.4th at p. 308*.) We do not consider whether the plaintiff is likely to prevail on the merits. (*JAMS, at p. 993*.) We independently review the applicability of the commercial speech exemption. (*Simpson, at p. 26*.)

a. Aquestive's Comments to Investors

We first consider whether Aquestive's comments to investors fall under the commercial speech exception. Neurelis maintains that the first requirement of the exception is satisfied because Aquestive is "primarily engaged in the

---

[4] ***HN9***[] ***CA(9)***[] **(9)** "[T]he legislative history of *section 425.17* indicates it was drafted to track constitutional principles governing regulation of commercial speech based upon guidelines discussed in *Kasky v. Nike, Inc. (2002) 27 Cal.4th 939 [119 Cal.Rptr.2d 296, 45 P.3d 243]* (*Kasky*). (See Assem. Com. on Judiciary, Analysis of Sen. Bill No. 515 (2003–2004 Reg. Sess.) as amended June 27, 2003, p. 8.)" (*JAMS, Inc. v. Superior Court (2016) 1 Cal.App.5th 984, 994 [205 Cal. Rptr. 3d 307], fn. omitted (JAMS)*.) In *Kasky*, our high court observed that three elements distinguish commercial speech from noncommercial speech: the speaker, the audience, and the content of the message. (*Kasky, at p. 960*.)

business of selling" "goods," including both pharmaceuticals and "securities." (See *§ 425.17, subd. (c)*.) Aquestive does not contest this point, nor could it effectively do so.

Neurelis also argues that *section 425.17, subdivision (c)(1)* is satisfied because the investor statements relate to Aquestive, Neurelis, and their respective ARS drugs. Therefore, the statements concern Aquestive's "or a business competitor's business operations, goods, or services." (See *§ 425.17, subd. (c)(1)*.) For example, in a 2018 Form S-1 filed with the SEC, Aquestive stated that Libervant was "further along in development than **[***21]** … other companies' versions of diazepam." Similarly, in a November 6, 2019, investor call, Aquestive stated that "[b]ased on patient survey data, Libervant is preferred by 80-plus percent of patients when compared to nasal sprays." These statements explicitly refer to Libervant and implicitly Valtoco, another "compan[y's] version[] of diazepam" and the only nasal spray then in development at that time.

CA(12)[] **(12)** Aquestive suggests that *subdivision (c)(1) of section 425.17* may not be satisfied because the investor statements do not specifically mention Neurelis or Valtoco by name. However, ***HN12***[] mentioning a competitor or a competitor's product under the subdivision is not required. It is enough that **[*787]** the statements relate to Aquestive's own product. (See *§ 425.17, subd. (c)(1)*.) That said, the statements implicitly refer to Neurelis ("other companies") and its product ("nasal spray"). We thus reject Aquestive's argument that Neurelis has not carried its burden as to this factor of the commercial speech exception.

Additionally, Neurelis contends that the investor statements were made to an "intended audience" of "actual or potential buyer[s] or customer[s]" of Aquestive's pharmaceuticals and securities or to people "likely to repeat the statement to, or **[***22]** otherwise influence, … actual or potential buyer[s] or customer[s]" of Aquestive's pharmaceuticals and securities. (See *§ 425.17, subd. (c)(2)*.) To this end, Neurelis notes that Aquestive made statements at the H.C. Wainwright Conference to industry and business development executives, public and private companies, institutional investors, and private equity firms. Further, Aquestive has admitted that its investor calls were a "public forum." Finally, **[**644]** Neurelis points out that the investor statements were also made in "the context of a regulatory approval process, proceeding, or investigation." (*§ 425.17, subd. (c)(2)*.)

Aquestive insists that Neurelis is incorrect that the intended target of the investor representations is sufficient to bring the investor statements under the auspice of the commercial speech exception because there is no evidence that the intended audience of the representations was "'physicians, hospitals or others in the medical community, who may be interested in purchasing Libervant or Valtoco.'" Instead, the representations were made to investors who buy Aquestive's stock not its products. As such, Aquestive contends the commercial speech exception cannot apply under the facts here.

Further, Aquestive **[***23]** contends that the commercial speech exception only applies to a certain subset of commercial speech, namely comparative advertising. (See *FilmOn.com Inc. v. DoubleVerify Inc. (2019) 7 Cal.5th 133, 147–148 [246 Cal. Rptr. 3d 591, 439 P.3d 1156] (FilmOn.com)*.)[5] Although we acknowledge that many of the reported cases addressing the commercial **[*788]** speech exception have involved false or misleading advertising (see, e.g., *JAMS, supra, 1 Cal.App.5th at pp. 996–998*; *L.A. Taxi Cooperative, Inc. v. The Independent Taxi Owners Assn. of Los Angeles (2015) 239 Cal.App.4th 918, 930–932 [191 Cal. Rptr. 3d 579]*), none of these cases addressed a situation similar to what we have here—a defendant who makes allegedly false statements about itself and/or its product as well as that of a competitor to current and potential investors and the general public.

---

[5] ***CA(13)***[] **(13)** The California Supreme Court noted that "certain commercially oriented statements will fall outside the scope of *section 425.17, subdivision (c)*." (*FilmOn.com, supra, 7 Cal.5th at p. 148*.) The court further observed that "the language of *section 425.17, subdivision (c)* and subsequent case law indicate that the provision exempts 'only a subset of commercial speech'—specifically, comparative advertising." (*Id. at p. 147*.) However, in that case, the court was not considering whether certain speech fell under *subdivision (c)*. (*FilmOn.com, at p. 147, fn. 4*.) Instead, the court discussed *section 425.17, subdivision (c)* for the purpose of interpreting the "catchall" provision of *section 425.16, subdivision (e)(4)*. (*FilmOn.com, at pp. 142–143, 147–148*.) We read nothing in *FilmOn.com* that precludes the applicability of the commercial speech exception under the facts before us. (See ***HN13***[] ***Nolan v. City of Anaheim (2004) 33 Cal.4th 335, 343 [14 Cal. Rptr. 3d 857, 92 P.3d 350]*** ["A decision, of course, does not stand for a proposition not considered by the court"].)

CA(14)[] **(14)** In the absence of any California cases on point, Aquestive relies on three federal district court cases to support its position: *Allergan, Inc. v. Merz Pharmaceuticals, LLC (C.D.Cal., Nov. 14, 2011, No. SACV 11-446 AG (Ex)) 2011 WL 13323246*; *Tercica, Inc. v. Insmed Inc.* (N.D.Cal., June 9, 2006, No. C 05-5027 SBA) 2006 WL 1626930; *RPost Holdings, Inc. v. Trustifi Corp. (C.D.Cal., May 11, 2012, No. CV 10-1416 PSG (SHx)) 2012 WL 12952728*. Specifically, Aquestive maintains that these three cases stand for the proposition that statements to investors cannot be considered commercial speech. However, none of these cases addresses the commercial speech exception codified in *section 425.17, subdivision (c)*. Instead, these cases concern what is actionable commercial speech under *15 United States Code section 1125(a)(1)*, the *Lanham Act*. The false advertising prohibition in the *Lanham Act* applies only to "commercial advertising or promotion" (*15 U.S.C. § 1125(a)(1)(B)*), a term not defined under the act. Federal courts have limited the term to "advertising" intended to **[***24]** influence "consumers." **[**645]** (*Rice v. Fox Broad Co. (9th Cir. 2003) 330 F.3d 1170, 1181*.) ***HN14***[] *Section 425.17, subdivision (c)* does not use the word "advertising," but instead, provides its own explanation regarding what the commercial speech exception covers. Indeed, *subdivision (c)* explicitly lists "securities" among the "goods or services" covered under the exception. (*§ 425.17, subd (c)*.) Accordingly, these cases cited by Aquestive, construing claims under the *Lanham Act*, are not instructive here.

The only case cited by either party addressing the application of the commercial speech exception under the anti-SLAPP statute to representations made to investors is *Neuralstem, Inc. v. StemCells, Inc. (D.Md., Aug. 4, 2009, Civil Action No. AW-08-CV-1173) 2009 WL 2412126*. There, StemCells claimed that Neuralstem had "made false statements about the value or quality of StemCells' patents in order to devalue and injure the intellectual property of StemCells, to impugn the business honesty of StemCells, and to engage in unfair competition." (*Id. at p. *5*.) Neuralstem argued that its statements were protected conduct under the anti-SLAPP statute; however, in applying California law, the court found the commercial speech exemption under *subdivision (c) of section 425.17* applied. (*Neuralstem, at p. *5*.) The court determined that the public "statements were directed toward an audience of actual or potential buyers" because "Neuralstem is a publicly **[*789]** traded company and concedes these **[***25]** public statements were made to a specific target audience comprised of existing and potential investors." (*Id. at p. *7*.)

Neurelis relies on *Neuralstem*, maintaining it is analogous to the instant matter. Like StemCells and Neuralstem, Neurelis and Aquestive are business competitors. Similar to Neuralstem, Aquestive made statements of fact to its investors about its product as well as Neurelis's product (e.g., Libervant is further along in development than these other versions of diazepam and Libervant is preferred by 80-plus percent of patients when compared to nasal sprays). And both Neuralstem and Aquestive made their respective statements to investors and potential investors.

Despite Neurelis's reliance on *Neuralstem*, Aquestive does not discuss or even mention that case in its briefs. Instead, Aquestive argues that the commercial speech exception only applies if it had made the subject comments to customers or potential customers of its products (here, drugs) and not investors, who only buy its stock. Aquestive further points out that it is not in the busines of selling securities and securities are just the means by which it finds investment for its "true business" of "selling … pharmaceuticals **[***26]** for medical conditions." Therefore, Aquestive contends that if we adopt Neurelis's argument and find the commercial speech exception applicable here, then we will be improperly expanding the "narrowly construed commercial speech exemption." In other words, Aquestive all but concedes that the investor statements at issue would be considered speech if they were made to an audience of potential buyers of their drugs. But as they are aimed at investors (i.e., those who would give Aquestive money to develop the drugs to sell), the statements are protected under the anti-SLAPP statute.

CA(15)[] **(15)** Here, we do not believe Aquestive's distinction between investors who buy stock and consumers who would purchase its drugs carries the day, at least under the facts of this case. ***HN15***[] *Subdivision (c)(2) of section 425.17* identifies the "audience" to whom the defendant must make the statement for it to fall under the commercial **[**646]** speech exception. That subdivision provides, in relevant part: "The intended audience is an actual or potential buyer or customer, or a person likely to repeat the statement to, or otherwise influence, an actual or potential buyer or customer, or the statement or conduct arose out of or within the context of a regulatory approval **[***27]** process, proceeding, or investigation …" (*§ 425.17, subd. (c)(2)*). Neurelis points out that some of the investor statements were made to industry and business development executives, public and private companies, institutional investors, and private equity firms. Then Neurelis claims, "[a]t the very least, this audience could have been expected to share what they learned with 'physicians, hospitals or others in the medical community, who may be interested in purchasing Libervant or Valtoco.'" Alternatively stated, Neurelis argues it can be **[*790]** inferred or assumed that the audience would repeat what they heard to potential consumers. Yet, under the plain language of the statute and the facts of this case, we do not need to make any such assumption or inference.

CA(16)[] **(16)** Here, the subject investor comments relate to Aquestive's development of Libervant. To this end, Aquestive emphasizes that Libervant is further along in development than other competing drugs. Aquestive discusses patients' "response rate" to Libervant. Aquestive states that more than 80 percent of the patients prefer Libervant to nasal sprays. Moreover, the comments highlight the need to get FDA approval of Libervant before the competing drugs to ensure **[***28]** Aquestive is not barred from marketing Libervant for a seven-year period. And Aquestive admits that it made the subject statements to investors as a means to encourage investment in its business (by way of the purchase of securities) so it can fund its "true business" of "selling … pharmaceuticals for medical conditions." At the time these statements were made, Aquestive had not taken Libervant to market but was seeking additional funding to obtain FDA approval and begin offering Libervant as a treatment for ARS. Thus, there were no consumers that would have been able to purchase Libervant when the comments were made. However, clearly the audience of Aquestive's statements was in a position to "otherwise influence" a "potential buyer" of Libervant by investing in Aquestive to help ensure that company brought Libervant to market before other competing drugs, like Valtoco. Under these unique circumstances, we determine the subject investor statements are commercial speech and fall under the exception to the anti-SLAPP statute under *section 425.17, subdivision (c)*.

Our conclusion is not inconsistent with the Second Appellate District's statement that "the legislative history of the commercial speech exemption to **[***29]** the anti-SLAPP statute confirms the Legislature's intent to except from anti-SLAPP coverage disputes that are purely commercial." (*Taheri Law Group v. Evans (2008) 160 Cal.App.4th 482, 491 [72 Cal. Rptr. 3d 847]*; accord, *Brill Media Co., LLC v. TCW Group, Inc. (2005) 132 Cal.App.4th 324, 342 [33 Cal. Rptr. 3d 371]* [*§ 425.17* "was intended to apply to commercial disputes"].) The instant action does not involve a plaintiff attempting to limit a defendant's constitutionally protected free speech rights. (See *Rusheen v. Coheen (2006) 37 Cal.4th 1048, 1055–1056 [39 Cal.Rptr.3d 516, 128 P.3d 713]*.) To the contrary, here, we have two rival pharmaceutical companies competing for FDA approval of their respective drugs that treat the same condition. Neurelis has sued Aquestive, claiming that Aquestive has attempted to extort Neurelis and lied about Neurelis and Valtoco as well as its own **[**647]** drug (Libervant) while trying to bring its drug to market. This is not the type of case for which the anti-SLAPP statute was intended. (See *No Doubt v. Activision Publishing, Inc. (2011) 192 Cal.App.4th 1018, 1026 [122 Cal. Rptr. 3d 397]* ["The purpose of the statute is 'to provide a procedural **[*791]** remedy to dispose of lawsuits that are brought to chill the valid exercise of constitutional rights'"].) Instead, it is the type of case to be covered by the commercial speech exception of *section 425.17, subdivision (c)*. (See *Taheri, at p. 491*; *Brill Media, at p. 342*.)

2. The Citizen Petition

In somewhat cursory fashion, Neurelis also contends that the citizen petition falls under the commercial speech exception. To this end, Neurelis observes: **[***30]** (1) Aquestive is primarily engaged in the business of selling goods; (2) the petition contained representations of fact; and (3) the petition was filed within the context of a regulatory approval process, proceeding, or investigation. In addition, Neurelis claims that *section 425.17, subdivision (c)* was specifically focused on overturning *DuPont Merck Pharmaceutical Co. v. Superior Court (2000) 78 Cal.App.4th 562 [92 Cal. Rptr. 2d 755] (DuPont)*, which involved a pharmaceutical company's "'false statements and conduct before a regulatory agency.'" Therefore, Neurelis argues the citizen petition here is analogous to the defendant in *DuPont* making "false statements before regulatory bodies, the medical profession, and to the public in connection with one of its pharmaceutical products." (*Id. at p. 564*.)

Aquestive insists the commercial speech exception does not apply to the citizen petition because the petition does not concern its own drug but, instead, focuses on Neurelis's drug. Thus, the petition cannot constitute advertising subject to the commercial speech exception. Also, Aquestive maintains that it could not be considered to be submitting the petition as part of the regulatory approval process because that process only pertains to the approval of its own drug. As Aquestive did not discuss Libervant in the citizen petition but only **[***31]** Valtoco, it argues that the petition was not part of the regulatory approval process as required under *subdivision (c)(2) of section 425.17*.

CA(17)[] **(17)** Absent from either party's discussion of whether the commercial speech exception applies is any explanation of the citizen petition process. ***HN16***[] A citizen petition is "a means afforded by the FDA for raising concerns about products the FDA reviews; any individual may file such a petition concerning scientific or legal issues before or while the product is on the market." (*Apotex Inc. v. Acorda Therapeutics, Inc. (2d Cir. 2016) 823 F.3d 51, 57 (Apotex)*.) Through this petition process, the FDA permits private entities to provide comments and opinions on draft guidance by filing these petitions. (*21 C.F.R. § 10.30 (2021)*.) A petition can request that the FDA "issue, amend, or revoke a regulation or order or take or refrain from taking any other form of administrative action." (*Ibid.*) A citizen petition must describe the FDA action the petitioner requests and must include a certification by the petitioner that **[*792]** the petition "includes all information and views on which the petition relies, and that it includes representative data and information known to the petitioner which are unfavorable to the petition." (*Ibid.*) As such, a citizen petition is a means by which the FDA explicitly **[***32]** allows private entities to express safety, scientific, or legal concerns regarding a product. Alternatively stated, the citizen petition is a mechanism wherein a private entity, like **[**648]** Aquestive, can petition the government (here, a government agency) for redress.

Neurelis offers no argument that even suggests the commercial speech exception can trump a party exercising its *First Amendment* right to petition the government. It does claim that the proponents of the commercial speech exception "were specifically focused on overturning *DuPont*." Yet, even if we agree with this representation, there remains no basis on which to apply the commercial speech exception to a citizen petition based on *DuPont*. That case did concern allegations that the "defendant made false statements before regulatory bodies, the medical profession, and to the public in connection with one of its pharmaceutical products." (*DuPont, supra, 78 Cal.App.4th at p. 564*.) And the appellate court found those statements protected under the anti-SLAPP statute. (*Id. at p. 567*.) Further, the court summarized the alleged false statements falling into two categories: "(1) lobbying and other activities seeking to influence the decisions of regulatory and legislative bodies and (2) advertising, marketing, and **[***33]** public relations activities directed at the medical profession and the general public." (*Id. at pp. 565–566*.) However, there is no indication in *DuPont* that the plaintiffs were basing any of their claims against the defendant for filing a citizen petition.

CA(18)[] **(18)** Additionally, we are not persuaded that the commercial speech exception could apply to the citizen petition in any event. ***HN17***[] The citizen petition is classic protected activity under the anti-SLAPP statute. (See *§ 425.16, subd. (e)(2)* ["any written or oral statement or writing made in connection with an issue under consideration or review by a legislative, executive, or judicial body, or any other official proceeding authorized by law"].) And the right to petition has been called "an essential attribute of governing. … vital to a basic process in the state's constitutional scheme—direct initiation of change by the citizenry through initiative, referendum, and recall." (*Robins v. Pruneyard Shopping Center (1979) 23 Cal.3d 899, 907–908 [153 Cal. Rptr. 854, 592 P.2d 341]*, citations & fn. omitted, affd. *sub nom.* *PruneYard Shopping Ctr. v. Robins (1980) 447 U.S. 74 [64 L.Ed.2d 741, 100 S.Ct. 2035]*; accord, *United States v. Cruikshank (1875) 92 U.S. 542, 552 [23 L.Ed. 588, 591]* ["The very idea of a government, republican in form, implies a right on the part of its citizens to meet peaceably for consultation in respect to public affairs and to petition for a redress of grievances"].) Moreover, under the *Noerr-Pennington* doctrine, **[***34]** the statements made in the citizen petition are generally immune from civil liability. (See *California Motor* ***[*793]*** *Transport Co. v. Trucking Unlimited (1972) 404 U.S. 508, 510–511 [30 L.Ed.2d 642, 92 S.Ct. 609]* (*California Transport*); *Ludwig v. Superior Court (1995) 37 Cal.App.4th 8, 21, fn. 17 [43 Cal. Rptr. 2d 350] (Ludwig)* ["the principle applies to virtually any tort, including unfair competition and interference with contract"].)[6]

---

[6] To the extent an exception applies to the *Noerr-Pennington* doctrine, we will consider it during our second prong analysis of the anti-SLAPP motion.

In short, the citizen petition is protected under the anti-SLAPP statute and the commercial speech exception does not apply. Therefore, to the extent any claim relies on the citizen petition, we must proceed with the second prong analysis of those claims.[7]

[649]**

C. Second Prong of the Anti-SLAPP Analysis

CA(20)[] **(20)** We turn to the second prong of the anti-SLAPP analysis to consider whether Neurelis has met its burden to establish a probability it would prevail on the merits. (*Baral, supra, 1 Cal.5th at p. 384*; *§ 425.16, subd. (b)(1)*.) ***HN19***[] "Only a cause of action that satisfies *both* prongs of the anti-SLAPP statute—i.e., that arises from protected speech or petitioning *and* lacks even minimal merit—is a SLAPP, subject to being stricken under the statute." (*Navellier v. Sletten (2002) 29 Cal.4th 82, 89 [124 Cal. Rptr. 2d 530, 52 P.3d 703]*.)

HN20[] *CA(21)*[] **(21)** In employing a summary-judgment-like procedure for the second prong, we determine whether Neurelis's prima facia showing is enough to win a favorable judgment. (*Sweetwater Union, supra, 6 Cal.5th at p. 940*.) This threshold is "not high." (*Greene v. Bank of America (2013) 216 Cal.App.4th 454, 458 [156 Cal. Rptr. 3d 901]*.) Claims with minimal merit proceed. (*Sweetwater Union, at p. 940*.)

1. The Citizen Petition

Below, **[***35]** the superior court found that the statements in the citizen petition were protected under the litigation privilege, and Neurelis did not prove such **[*794]** statements were not privileged. (See *Civ. Code, § 47, subd. (b)*.) Neurelis insists the superior court erred in reaching this conclusion because the court improperly placed the burden on Neurelis to establish the absence of the privilege instead of requiring Aquestive to prove the privilege applies. Neurelis then argues that Aquestive "fell far short" of establishing the applicability of the litigation privilege to the citizen petition.

In response, Aquestive argues the only evidence it needed to provide to prove applicability of the litigation privilege was the citizen petition itself. To this end, Aquestive claims the petition was filed as part of an official proceeding pursuant to federal law. (Cf. *People ex rel. Gallegos v. Pacific Lumber Co. (2008) 158 Cal.App.4th 950, 958–959 [70 Cal. Rptr. 3d 501] (Pacific Lumber)* ["allegedly fraudulent conduct in communicating information to government agencies … fall[s] squarely within the scope of the litigation privilege"].) In addition, Aquestive maintains, in any event, it was not its burden to prove the privilege but Neurelis's burden to disprove the privilege.

CA(22)[] **(22)** Neurelis has the better argument regarding who bears the burden in establishing **[***36]** the applicability of the litigation privilege. ***HN21***[] During the second prong of a court's anti-SLAPP analysis, a defendant bears the burden of proving a privilege's applicability. (*Hawran v. Hixson (2012) 209 Cal.App.4th 256, 278 [147 Cal. Rptr. 3d 88]*; *Carver v. Bonds (2005) 135 Cal.App.4th 328, 348–349 [37 Cal. Rptr. 3d 480]*.) Here, Aquestive insists it has done enough to prove the applicability of the privilege simply **[**650]** by pointing to the citizen petition. It has not.

HN22[] *CA(23)*[] **(23)** *Civil Code section 47, subdivision (b)* renders absolutely privileged communications made as part of a "judicial or quasi-judicial proceeding." (*Silberg v. Anderson (1990) 50 Cal.3d 205, 212 [266 Cal. Rptr. 638, 786 P.2d 365] (Silberg)*; *Civ. Code, § 47, subd. (b)*; *Action Apartment Assn., Inc. v. City of Santa Monica*

---

[7] *CA(19)*[] **(19)** Here, we observe that two of Neurelis's causes of action are mixed, meaning they rely on both protected and unprotected conduct. The UCL claim is based on Aquestive's private threats, its investor statements, and the citizen petition. Similarly, the defamation claim is based on the investor statements and the citizen petition. As we discussed *ante*, only the citizen petition is protected conduct under the anti-SLAPP statute. ***HN18***[] As such, Neurelis need only establish a probability of prevailing on its UCL and defamation claims based on the citizen petition. If it cannot do so, then the allegations concerning the citizen petition must be stricken. (See *Baral, supra, 1 Cal.5th at p. 395*.) However, we disregard the allegations concerning the unprotected conduct. (*Id. at p. 396*; *Sheley v. Harrop (2017) 9 Cal.App.5th 1147, 1171 [215 Cal. Rptr. 3d 606]*.) As such, Neurelis does not have to prove a probability of success on the merits as to the UCL and defamation claims to the extent they are based on the private threats and/or investor statements.

(2007) 41 Cal.4th 1232, 1241 [63 Cal. Rptr. 3d 398, 163 P.3d 89] (Action Apartment).) "The usual formulation is that the privilege applies to any communication (1) made in judicial or quasi-judicial proceedings; (2) by litigants or other participants authorized by law; (3) to achieve the objects of the litigation; and (4) that have some connection or logical relation to the action." (Silberg, at p. 212.)

HN23[] ***CA(24)***[] **(24)** "'The principal purpose of [the litigation privilege] is to afford litigants and witnesses [citation] the utmost freedom of access to the courts without fear of being harassed subsequently by derivative tort actions. [Citations.]'" (Action Apartment, supra, 41 Cal.4th at p. 1241.) Stated differently, it "exists to protect citizens from the threat of litigation for communications to government agencies whose function it is to investigate **[*795]** and remedy wrongdoing. [Citation.]" (Wise v. Thrifty Payless, Inc. (2000) 83 Cal.App.4th 1296, 1303 [100 Cal. Rptr. 2d 437].)

Thus, the crux of the **[***37]** litigation privilege is that it covers communications made as part of a judicial or quasi-judicial proceeding. Here, Aquestive has not argued that the citizen petition is part of a judicial or quasi-judicial proceeding. Indeed, it does not describe the process whatsoever except to note that the citizen petition was "filed as part of an official proceeding pursuant to federal law." Further, Aquestive's reliance on Pacific Lumber is not helpful here. There, the appellate court concluded that communications made to government agencies during a California Environmental Quality Act (CEQA; Pub. Resources Code, § 21000 et seq.) administrative proceeding were covered by the litigation privilege. (Pacific Lumber, supra, 158 Cal.App.4th at pp. 958–959.) However, Aquestive has not explained why a CEQA proceeding is analogous to the citizen petition process with the FDA. And although some courts have defined "judicial or quasi-judicial" proceedings to include "all kinds of truth-seeking proceedings" (see Silberg, supra, 50 Cal.3d at p. 213), Aquestive makes no argument here why its statements in the citizen petition warrant protection under the litigation privilege codified in *subdivision (b) of Civil Code section 47*. Instead, it merely assumes it is privileged. Consequently, Aquestive has not done enough to establish that the litigation privilege applies.[8]

CA(26)[] **(26)** Next, Aquestive maintains that even if the litigation privilege **[***38]** does not apply, Neurelis cannot overcome the *Noerr-Pennington* doctrine. ***HN25***[] "The *Noerr-Pennington* doctrine, which arose in the context of ***antitrust law***, holds that '[t]hose who petition government for redress are generally immune from antitrust liability.'" (*Premier Medical Management Systems, Inc. v. California Ins. Guarantee Assn. (2006) 136 Cal.App.4th 464, 478 [39 Cal. Rptr. 3d 43] (Premier Medical)*.) **[**651]** The doctrine has since been applied beyond the antitrust context and generally shields a defendant's petitioning activity before courts as well as administrative and other government agencies. (See California Transport, supra, 404 U.S. at pp. 510–511; Ludwig, supra, 37 Cal.App.4th at pp. 21–22.)

CA(27)[] **(27)** However, ***HN26***[] "[a]n exception to the doctrine arises when efforts to influence government are merely a sham; such efforts are not protected by the *Noerr Pennington* doctrine … ." (Hi-Top Steel Corp. v. Lehrer (1994) 24 Cal.App.4th 570, 575 [29 Cal. Rptr. 2d 646].) There is a two part test for **[*796]** determining whether a defendant's petitioning activity falls outside the *Noerr-Pennington* doctrine. "[F]irst, it 'must be objectively baseless in the sense that no reasonable litigant could realistically expect success of the merits'; second, the litigant's subjective motivation must 'conceal an attempt to interfere *directly with the business relationships of a competitor … through the use [of] the governmental process*—as opposed to the *outcome* of that process—as an anticompetitive weapon.'" (BE&K Construction Co. v. National Labor Relations Board (2002) 536 U.S. 516, 526 [153 L.Ed.2d 499, 122 S.Ct. 2390] (BE&K), quoting Professional Real Estate Investors, Inc. v. Columbia Pictures Industries, Inc. (1993) 508 U.S. 49, 60–61 [123 L.Ed.2d 611, 113 S.Ct. 1920].) To meet this **[***39]** test, the defendant's petitioning activities thus "must be a sham both objectively and subjectively." (BE&K, at p. 526, italics omitted.)

---

[8] ***CA(25)***[] **(25)** We note the limited nature of our conclusion here. We are not determining, as a matter of law, that statements made in a citizen petition to the FDA are not covered by the litigation privilege. We merely find that Aquestive has not carried its burden of showing the application of the privilege on the record before us. ***HN24***[] One invoking the privilege must do more than simply point to the allegedly privileged document.

Neurelis argues that Aquestive has not carried its burden of proving the applicability of the *Noerr-Pennington* doctrine. (See *Premier Medical, supra, 136 Cal.App.4th at p. 478* [as part of the second prong of the anti-SLAPP analysis, "[d]efendants bear the burden of establishing a probability of prevailing on those defenses"].) However, the burden for Aquestive, here, is not high. Neurelis is basing two of its causes of action, in part, on statements Aquestive made in the citizen petition itself. The citizen petition is a procedure by which private entities can petition the FDA to take a specific action. (See *Apotex, supra, 823 F.3d at p. 57*; *21 C.F.R. § 10.30 (2021)*.) Therefore, Aquestive, through the citizen petition, was petitioning the government for redress and the *Noerr-Pennington* doctrine applies (see *California Transport, supra, 404 U.S. at pp. 510–511*) unless the petition was a sham (*BE&K, supra, 536 U.S. at p. 526*).

Having concluded that the *Noerr-Pennington* doctrine applies to the citizen petition, the burden shifts to Neurelis to prove the citizen petition was a sham. On the record before us, Neurelis has not carried its burden.

Neurelis argues Aquestive's submitted the citizen petition for the purpose of delaying approval of Valtoco, and, as such, **[***40]** Aquestive's "'subjective motivation'" was to use the petition process "'as an anticompetitive weapon.'" The FDA seemed to agree, to some extent, commenting that it "appear[ed] to be the case here" that the petition "was submitted for the primary purpose of delaying approval of" a new drug application. Yet, we conclude that Neurelis has not shown that the petition was "objectively baseless." Neurelis contends the FDA noted that "'publicly available information on the general characteristics of nasal spray product[]' showed that 'it [was] unlikely'" that Aquestive's complaints about Valtoco had any merit. Based on this statement from the FDA, Neurelis asserts the citizen petition was objectively baseless. But Neurelis overstates **[**652]** the importance of the **[*797]** quoted language. The FDA observed the existence of "publicly available information on the general characteristics of nasal spray products that would show it is unlikely that droplets generated by a nasal spray product would reach the alveoli of the lungs." It also noted that Aquestive did not include any such information in its supplemental citizen petition. The FDA then indicated that the omission of this publicly available and pertinent **[***41]** data further suggested that the petition "was submitted with the primary purpose of delaying approval." However, the FDA did not conclude, as Neurelis claims, that the omitted publicly available data somehow proved that none of Aquestive's complaints in the petition had any merit. Indeed, the subject publicly available information about nasal spray products does not appear to be relevant to other issues raised in the citizen petition.[9]

CA(28)[] **(28)** Instead, the FDA determined that it could not summarily deny the citizen petition as requested by Neurelis because it was "unable to conclude that the petition does not, on its face, raise valid scientific or regulatory issues." (See *21 U.S.C. § 355(q)(1)(E)*.) Now, it may be that a petition does not have to be summarily denied to be "objectively unreasonable" under the sham exception to the *Noerr-Pennington* doctrine, but Neurelis makes no such argument. Additionally, Neurelis has not discussed the other requests in the citizen petition and explained why they support a determination that the petition was objectively unreasonable. And ***HN27***[] it is not the role of this court to scour the record and make Neurelis's arguments. (See *Keyes v. Bowen (2010) 189 Cal.App.4th 647, 655–656 [117 Cal. Rptr. 3d 207]*; *Bains v. Moores (2009) 172 Cal.App.4th 445, 455 [91 Cal. Rptr. 3d 309]*.)[10]

2. Malicious Prosecution

a. Background

Neurelis bases **[***42]** its malicious prosecution action on the three IPR petitions. To this end, in the operative complaint, Neurelis alleges that Aquestive had no reasonable belief that its three IPR petitions were based on reasonable grounds, "at least because Neurelis told Aquestive as much"; the Board denied instituting proceedings based on two of the petitions (Neurelis predicted the third IPR petition would terminate in its favor); Aquestive brought **[*798]** the petitions to pressure Neurelis into giving up orphan exclusivity for Valtoco; Aquestive initiated

[9] For example, Aquestive requested that the FDA require Neurelis to conduct a bridging study comparing Valtoco and Diastat as well as a food effect study. In addition, Aquestive asked the FDA to determine "that Valtoco is not clinically superior to nor offers a major contribution to patient care when compared to Diastat." Neurelis neither discusses these requests of the citizen petition nor explains how the publicly available information about nasal sprays renders these requests objectively without merit.

[10] In denying the citizen petition, the FDA indicated that it had approved the new drug application for Valtoco.

the petitions with malice; and Neurelis was harmed because it spent "considerable money and resources" as well as "lost executive time" responding to the petitions.

Because the malicious prosecution claim concerns the IPR petitions, we briefly discuss that petition process. Pursuant to the Leahy-Smith America Invents Act, the IPR proceeding replaces the PTO's previous inter partes reexamination. (35 U.S.C. §§ 311–319.) Congress, in enacting the IPR procedure, sought "'to establish a more efficient and streamlined patent system that [would] improve patent quality and limit unnecessary and counterproductive **[**653]** litigation costs'" and "'to create a timely, cost-effective alternative **[***43]** to litigation.'" (Milwaukee Electric Tool Corp. v. Snap-On Inc. (E.D.Wis. 2017) 271 F.Supp.3d 990, 1027.) "The purpose of this reform was to 'convert[] inter partes reexamination from an examinational to an adjudicative proceeding.'" (Abbott Labs. v. Cordis Corp. (Fed. Cir. 2013) 710 F.3d 1318, 1326.) Under the new procedure, any party other than the patent owner may request to cancel one or more claims of a patent; in doing so, the petitioner is limited to grounds that could be raised under 35 United States Code sections 102 and/or 103 and only based on prior art consisting of patents and printed publications. (35 U.S.C. § 311(a)–(b).)

Under the IPR process, a party that wants to challenge a patent must file "a petition to institute an inter partes review of [a] patent." (35 U.S.C. § 311(a).) The petition must identify "each claim challenged," the grounds for the challenge, and the evidence supporting the challenge. (35 U.S.C. § 312(a)(3).) Within three months of the filing of the petition, the patent owner may file a preliminary response setting forth arguments as to why the Board should not institute a review; alternatively the patent owner may waive the preliminary response to expedite the proceeding. (35 U.S.C. § 313; 37 C.F.R. § 42.107(a)–(b) (2021).) For the Board to institute an IPR proceeding, the petitioner must show "that there is a reasonable likelihood that the petitioner would prevail with respect to at least 1 of the claims challenged in the petition," **[***44]** a higher burden than in the predecessor reexamination proceedings where the requester was only required to show a "substantial new question of patentability." (35 U.S.C. §§ 314(a), 304.) However, if it finds no reasonable likelihood of success then it must deny the petition and notify the petitioner and patent owner in writing. (35 U.S.C. § 314(a), (c).) That determination is "final and nonappealable." (35 U.S.C. § 314(d).) The Board must decide whether to institute the IPR within three months after the patent owner's preliminary response or by the last date on which the response could have been filed if the patent owner did not file a response. (35 U.S.C. § 314(b).)

If the Board institutes the review, the proceeding is conducted before three technically trained administrative patent judges. (See 35 U.S.C. §§ 6(a)–(c), **[*799]** 311.) The Board must issue its final IPR determination within one year, extendable for good cause for not more than six months. (35 U.S.C. § 316(a)(11).) Final determinations are appealable to the Federal Circuit. (35 U.S.C. §§ 141(c), 319.) To streamline later litigation and reduce the likelihood of inconsistent judgments, the petitioner is estopped from later asserting that a "claim is invalid on any ground that the petitioner raised or reasonably could have raised during that inter partes review." (35 U.S.C. § 315(e)(2).)

Here, Aquestive **[***45]** filed three IPR petitions but all three challenged claims under the '876 Patent. And the three petitions were filed on the same day. In case No. IPR2019-00449, the petition ('449 Petition) challenged a subset of claims of the '876 Patent on anticipation and obviousness grounds based on specific prior art. The petition filed in case No. IPR2019-00450 ('450 Petition) challenged all of the claims of the '876 Patent and did so only on obviousness grounds based on different combinations of prior art. And the petition filed in case No. IPR2019-00451 ('451 Petition) challenged all the claims of the '876 Patent on obviousness grounds as well but based on a different combination of prior art.

In the instant matter, each of Aquestive's IPR petitions was over 90 pages long **[**654]** and included more than 200 pages of expert declarations and dozens of exhibits. Neurelis submitted substantive responses that were each more than 25 pages and were also accompanied by multiple exhibits.

On August 1, 2019, the Board declined to institute review in the '449 and '450 Petitions. With respect to the '449 Petition, a three-judge panel issued a unanimous 26-page decision, in which it found no "reasonable likelihood that [Aquestive] would prevail" on even one of the claims. **[***46]** With respect to the '450 Petition, the same three-judge panel issued a unanimous 22-page decision declining to institute review. There, the Board relied primarily on

35 United States Code section 325(d) and concluded that the same prior art arguments raised by Aquestive had already been considered (and rejected) by the PTO during prosecution of the ’876 Patent. As the Board explained, “[i]t is simply not an efficient use of the Board's time and resources to revisit the same prior art disclosures that were examined in detail by the Examiner over eight years of patent prosecution.”

On August 13, 2019, the Board instituted review of the ’451 Petition. When the trial court decided the anti-SLAPP motion at issue here, the review on the ’451 Petition was still pending. However, on August 6, 2020, the Board declared the ’876 Patent invalid. (*Aquestive Therapeutics, Inc. v. Neurelis, Inc.* (Board, Aug. 6, 2020, Dec. No. IPR2019-00451) p. 68.) Neurelis appealed that decision to the Federal Circuit, and the Federal Circuit **[*800]** affirmed the decision. (*Neurelis, Inc. v. Aquestive Therapeutics, Inc. (Fed.Cir., Oct. 7, 2021, No. 21-1038) 2021 U.S.App. Lexis 30158* (*per curiam*).)

b. Analysis

HN28[] ***CA(29)***[] **(29)** An action for malicious prosecution has three required elements: “(1) the defendant brought (or continued to pursue) a claim in the underlying action without objective probable cause, (2) the claim was pursued by the defendant with subjective **[***47]** malice, and (3) the underlying action was ultimately resolved in the plaintiff's favor.” (*Lane v. Bell (2018) 20 Cal.App.5th 61, 67 [228 Cal. Rptr. 3d 605]*.) The superior court determined that Neurelis established a probability of success as to each of these three elements and denied the anti-SLAPP motion as to the malicious prosecution claim. Aquestive claims the court erred in reaching this conclusion because: (1) the denial of an IPR petition cannot serve as a malicious prosecution predicate (i.e., it does not constitute an underlying action); (2) the IPR petitions did not terminate in Neurelis's favor; and (3) Neurelis did not submit sufficient evidence that Aquestive filed the IPR petitions without probable cause.

CA(30)[] **(30)** Although the parties spend the lion's share of their respective briefs disputing whether a denial of an IPR petition could serve as a predicate act for a malicious prosecution claim, we need not weigh in on that issue because Neurelis has not offered evidence that Aquestive brought the petitions without probable cause. ***HN29***[] “An action is deemed to have been pursued without probable cause if it was not legally tenable when viewed in an objective manner as of the time the action was initiated or while it was being prosecuted.” (*Sycamore Ridge Apartments, LLC v. Naumann (2007) 157 Cal.App.4th 1385, 1402 [69 Cal. Rptr. 3d 561]*.) “A prior **[***48]** action was not initiated without probable cause merely because it was ultimately found to lack merit; it was initiated without probable cause only if ‘*all* reasonable lawyers’ would ‘agree’ that the suit, at the time of filing, was ‘totally and completely without merit’ [based on] … . ‘the facts known to the **[**655]** defendant’ ‘at the time the suit was filed.’” (*Gruber v. Gruber (2020) 48 Cal.App.5th 529, 537–538 [261 Cal. Rptr. 3d 819]*, quoting *Jarrow Formulas, supra, 31 Cal.4th at p. 743, fn. 13* & *Sheldon Appel Co. v. Albert & Oliker (1989) 47 Cal.3d 863, 878 [254 Cal. Rptr. 336, 765 P.2d 498]*; see *Soukup v. Law Offices of Herbert Hafif (2006) 39 Cal.4th 260, 292 [46 Cal. Rptr. 3d 638, 139 P.3d 30]* [“‘A litigant will lack probable cause for his action either if he relies upon facts which he has no reasonable cause to believe to be true, or if he seeks recovery upon a legal theory which is untenable under the facts known to him’”].) “Probable cause is a low threshold designed to protect a litigant's right to assert arguable legal claims even if the claims are extremely unlikely to succeed.” (*Plumley v. Mockett (2008) 164 Cal.App.4th 1031, 1047 [79 Cal. Rptr. 3d 822]*.)

[*801]

Below, the superior court found: “Based on the PTO decisions, [Aquestive] failed to demonstrate a reasonable likelihood of prevailing on those petitions, supporting the element that the petitions were meritless and without probable cause.” In making this finding, Aquestive maintains the court improperly conflated the first two elements of a malicious prosecution claim. It further argues that a favorable termination **[***49]** of an underlying claim does not establish a lack of probable cause. (See, e.g., *Crowley v. Katleman (1994) 8 Cal.4th 666, 686 [34 Cal. Rptr. 2d 386, 881 P.2d 1083]* [noting “[p]rior opinions have stressed that the two elements of the tort serve different purposes”]; *Nicholson v. Lucas (1994) 21 Cal.App.4th 1657, 1665 [26 Cal. Rptr. 2d 778]* [“Mere proof of favorable termination does not create a conflict on the issue of probable cause, nor does proof of the existence of malice”].)

Neurelis counters that the court made no such mistake. To this end, Neurelis insists “[t]he court held that Aquestive's petitions were not just ‘meritless,’ but also that they were brought ‘without probable cause.’” Yet, in making this argument, Neurelis glosses over the fact that the court found a lack of probable cause based on the denial of the petitions only. The court's order points to no other "evidence" establishing a lack of probable cause. And Neurelis does not cite to any evidence in the record purporting to establish a lack of probable cause. Rather, Neurelis's claim that it has shown a lack of probable cause begins and ends with the two written decisions of the Board denying the ’449 and ’450 Petitions without granting a review.

Regarding the ’449 Petition, Neurelis argues that the Board denied the petition because Aquestive did "not show that there is a reasonable **[***50]** likelihood that [it] would prevail with respect to at least one of the claims." Neurelis, however, does not explain why this denial showed that Aquestive lacked probable cause to bring the ’449 Petition. It simply asks us to assume it is so. Aquestive points out that "no reasonable likelihood of prevailing" is a higher standard than "probable cause." As such, it argues that the Board's finding that Aquestive had not shown a reasonable likelihood of prevailing on the petition is not the same as establishing Aquestive did not have probable cause to bring the petition. Neurelis claims such a distinction does not matter here because Aquestive did not have probable cause to bring the ’450 Petition. Neurelis further argues it is sufficient to satisfy its burden here to show that Aquestive did not have probable cause to bring the ’450 Petition only. (See *Cuevas-Martinez v. Sun Salt Sand, Inc. (2019) 35 Cal.App.5th 1109, 1121 [248 Cal. Rptr. 3d 200]* ["a prima facie case" that the defendants "lacked probable cause for at least two of the claims in the prior action is more than sufficient to carry his anti-SLAPP **[**656]** burden"].) We read Neurelis's argument as a tacit admission that we should focus on the Board's decision on the ’450 **[*802]** Petition as evidence of a lack of probable cause.[11] Nonetheless, Neurelis directs **[***51]** us to a couple of comments in the Board's denial of the ’449 Petition, claiming that such comments suggest a lack of probable cause.

For example, Neurelis notes that the Board stated that Aquestive had relied on "bald assertions" with insufficient record support and ignored key statements made in both the European Patent Office (for "nearly identical claims") and the PTO. However, these comments are not as significant as Neurelis represents. True, the Board did refer to "bald assertions" made by Aquestive and its expert witness, but those assertions specifically related to a single argument "that the ’876 [P]atent ‘does not disclose any unexpected effect’ for the claimed ethanol and benzyl alcohol ranges." Specifically, it found those assertions "to be insufficiently supported by the evidence of record." Nevertheless, Neurelis does not discuss the other challenges asserted in the ’449 Petition and how the Board's rejection of those other challenges showed a lack of probable cause. Such an omission is fatal to Neurelis's argument that Aquestive lacked probable cause to bring the ’449 Petition. It is not enough for Neurelis to direct us to a couple sentences in a 26-page decision that reject one of the arguments **[***52]** made by Aquestive and extrapolate from those sentences that Aquestive lacked probable cause to bring the petition.

Turning to the ’450 Petition, Neurelis maintains the Board denied that petition because the same prior art arguments raised by Aquestive had already been considered (and rejected) by the PTO during prosecution of the ’876 Patent. Neurelis also emphasizes that the Board explained it was a waste "of the Board's time and resources to revisit the same prior art disclosures that were examined in detail by the Examiner over eight years of patent prosecution." Neurelis therefore insists the Board's reasoning in denying the ’450 Petition is evidence that Aquestive lacked probable cause to bring the ’450 Petition. We disagree.

The Board issued a 22-page decision denying the ’450 Petition and not granting a review. In that decision, the Board explained that the institution of inter partes review was discretionary. (See *Harmonic Inc. v. Avid Tech, Inc. (Fed. Cir. 2016) 815 F.3d 1356, 1367*.) Further, the Board noted that, under *35 United States Code section 325(d)*, it could take into account and reject a **[*803]** petition because "‘the same or substantially the same prior art or arguments previously were presented to the Office.’"[12] **[**657]** The Board set forth "several non-exhaustive factors"

---

[11] We note that Neurelis's malicious prosecution claim has evolved during its opposition to the anti-SLAPP motion. The operative complaint bases the malicious prosecution cause of action on all three IPR petitions. Yet, the ’451 Petition resulted in the Board invalidating the ’876 Patent. Therefore, Neurelis essentially tells us to ignore that petition. However, Neurelis all but concedes that it has no evidence that Aquestive lacked probable cause to bring the ’449 Petition. These meaningful shortcomings undermine the theory that Neurelis's advances as to the IPR petitions, that they were brought only to extort Neurelis to give up orphan drug exclusivity as to Valtoco. Clearly, the Board did not share Neurelis's conclusion about the validity of the petitions.

it considered in evaluating whether to **[***53]** exercise its discretion under *35 United States Code section 325(d)*, which included:

"(a) the similarities and material differences between the asserted art and the prior art involved during examination;

"(b) the cumulative nature of the asserted art and the prior art evaluated during examination;

"(c) the extent to which the asserted art was evaluated during examination, including whether the prior art was the basis of the rejection;

"(d) the extent of the overlap between the arguments made during the examination and the manner in which Petitioner relies on the prior art or Patent Owner distinguishes the prior art;

"(e) whether Petitioner has pointed out sufficiently how the Examiner erred in its evaluation of the asserted prior art; and

"(f) the extent to which additional evidence and facts presented in the Petition warrant reconsideration of the prior art or arguments."

In applying these factors to the petition, the Board reviewed the prosecution history of the '876 patent family. After doing so, it found that *factors (a)*, *(c)*, and *(d)* "strongly favor[ed] exercising [its] discretion to deny the Petition under *35 U.S.C. § 325(d)*." In addition, it found that *factors (e)* and *(f)* were, "at best, neutral with respect to exercising discretion under *[section] 325(d)*." Also, **[***54]** although the Board acknowledged that Aquestive offered "additional evidence in the form of the declaration testimony" of its expert witness that was not previously considered in examining the '876 Patent, the court concluded the "presence of [the] declaration" was not "sufficient to warrant reconsideration of the same prior art that was before the Examiner during prosecution." Moreover, the Board similarly was not persuaded that a review should be granted because Aquestive and its expert witness "formulate[d] **[*804]** new hypothetical compounds." Simply put, the Board was not swayed that it should consider the same or similar arguments that were previously addressed in the prosecution of the '876 Patent.

CA(31)[] **(31)** We see nothing in the Board's decision denying the '450 Petition that even suggests Aquestive lacked probable cause to bring the petition. Ultimately, the Board used its discretion to deny the petition because "the same or substantially the same prior art or arguments previously were presented to the [PTO]." (*35 U.S.C. § 325(d)*.) However, we note that ***HN30***[] *35 United States Code section 325(d)* provides the Board with the *discretion* to deny the petition but does not require Board to deny the petition even if the petition is simply repeating previously made arguments. And, under **[***55]** the statute, the Board could appropriately exercise its discretion to grant a petition even though it raises claims based on the same prior art or arguments previously made to the PTO. Therefore, it is mere speculation to baldly conclude that a denial of a petition per the Board's discretion under *35 United States Code section 325(d)* establishes a lack of probable cause to satisfy the corresponding element of a cause of action for malicious prosecution. (Cf. *Shandralina G. v. Homonchuk (2007) 147 Cal.App.4th 395, 411 [54 Cal. Rptr. 3d 207]* [an inference can **[**658]** serve as substantial evidence for a factual finding on appeal, but ""the inference must be a reasonable conclusion from the evidence and cannot be based upon suspicion, imagination, speculation, surmise, conjecture or guesswork"""]; *Gilbert v. Sykes (2007) 147 Cal.App.4th 13, 26–27 [53 Cal. Rptr. 3d 752]* [In the SLAPP context, we disregard evidence that is "argumentative, speculative, impermissible opinion, hearsay, or conclusory"].) What is missing here is any evidence or explanation that the petition was so completely lacking in merit that no reasonable attorney would have thought it tenable. (See *Wilson v. Parker, Covert & Chidester (2002) 28 Cal.4th 811, 817 [123 Cal. Rptr. 2d 19, 50 P.3d 733]* ["Only those actions that '"any reasonable

---

[12] *35 United States Code section 325(d)* states: "Notwithstanding *sections 135(a)*, *251*, and *252*, and chapter 30, during the pendency of any post-grant review under this chapter, if another proceeding or matter involving the patent is before the Office, the Director may determine the manner in which the post-grant review or other proceeding or matter may proceed, including providing for the stay, transfer, consolidation, or termination of any such matter or proceeding. In determining whether to institute or order a proceeding under this chapter, chapter 30, or chapter 31, the Director may take into account whether, and reject the petition or request because, the same or substantially the same prior art or arguments previously were presented to the Office."

attorney would agree [are] totally and completely without merit"' may form the basis for a malicious prosecution suit"].)

In the instant matter, apart from selective quotations **[***56]** from the Board's decision on the petitions, Neurelis offers no evidence that Aquestive filed any of the IPR petitions without probable cause. Instead, Neurelis simply argues the petitions were meritless and, thus, "factually and legally untenable." As we addressed *ante*, Neurelis has not provided any evidence to support these assertions. Consequently, the malicious prosecution action cannot survive the anti-SLAPP motion.

DISPOSITION

The order is affirmed in part and reversed in part. This matter is remanded to the superior court with instructions to enter a revised order consistent with **[*805]** this opinion, denying the anti-SLAPP motion as to the UCL and defamation causes of action to the extent such claims are dependent on unprotected conduct, including statements to investors. The anti-SLAPP motion is to be granted as to the malicious prosecution claim. All allegations concerning the citizen petition should be stricken as well. The parties are to bear their own costs on appeal.

McConnell, P. J., and O'Rourke, J., concurred.

For General Motors, LLC, Defendant: Abirami Gnanadesigan, J Kevin Snyder, LEAD ATTORNEYS, Dykema Gossett, Los Angeles, CA; Derek S. Whitefield, LEAD ATTORNEY, Dykema Gossett LLP, Los Angeles, CA.

Judges: Hon. William Q. Hayes, United Slates District Court.

Opinion by: William Q. Hayes

Opinion

ORDER

HAYES, Judge:

The matter before the Court is the Motion to Dismiss Plaintiff's Second Amended Class Action Complaint filed by Defendant General Motors, LLC. (ECF No. 38).

I. PROCEDURAL BACKGROUND

On February 18, 2020, Plaintiff Rebecca Casey filed a Class Action Complaint against Defendant General Motors, LLC ("GM"). (ECF No. 1). On September 15, 2020, Casey filed an Amended Class Action Complaint against Defendants GM and Does 1 through 10. (ECF No. 14). On April 13, 2021, the Court granted GM's Motion to Dismiss for failure to state a claim and dismissed the Amended Class Action Complaint without prejudice. (ECF No. 26).

On July 19, 2021, the Court granted Casey's Motion **[*2]** for Leave to File Second Amended Complaint. (ECF No. 36). On July 20, 2021, Casey filed a Second Amended Class Action Complaint ("SAC") against Defendants GM and Does 1 through 10. (ECF No. 37). The SAC alleges that that Defendants violated California state law by failing to adequately acknowledge or remedy a defect located in the engine bay fuse blocks of certain vehicles manufactured by GM between 2013 and 2017.

On August 3, 2021, GM filed a Motion to Dismiss the SAC for failure to state a claim. (ECF No. 38). On August 24, 2021, Casey filed an Opposition to the Motion to Dismiss. (ECF No. 39). On August 30, 2021, GM filed a Reply. (ECF No. 40).

II. ALLEGATIONS IN THE AMENDED COMPLAINT

On December 9, 2016, Casey purchased a used 2014 Buick Enclave ("Vehicle") from GM franchise dealership Hoehn Buick, GMC, Cadillac ("Hoehn") in Carlsbad, California. The Vehicle had previously been "sold new" on October 13, 2013. (ECF No. 37 ¶ 2).

> At the time the [ ] Vehicle was sold new, the [ ] Vehicle came with a 4-year 50,000-mile basic warranty, a 6-year 70,000-mile powertrain warranty, a 7-year 70,000-mile California emissions warranty, an 8-year 80,000-mile federal emissions warranty for certain **[*3]** emissions related components, and a 6-year unlimited mileage warranty for certain types of rust.

(*Id.* ¶ 2). When Casey purchased the Vehicle, it had been driven 70,657 miles. "Thus, at the time that Casey purchased the [ ] Vehicle, the [ ] Vehicle was still covered by portions of the original factory warranty." (*Id.*). Before deciding to purchase the Vehicle, "Casey reviewed the window sticker and relied on its advertisements, including details of the existence and length" of the Vehicle's factory warranty. (*Id.* ¶ 3).

On April 30, 2018, at 89,373 miles, Casey brought the Vehicle to Hoehn for repair. On approximately five occasions, the Vehicle lost power, and the "stability and traction warning illuminated," requiring Casey to pull over and restart the Vehicle. (*Id.* ¶ 66). Hoehn "identified Fault Code P1682, and found that the fuse block ignition bus, also known as both Terminal 51 and the Engine Relay, was loose." (*Id.* ¶ 68). Hoehn attempted to fix the problem by reinstalling and resecuring the engine bay fuse block. "The repair did not work, and the [ ] Vehicle was brought back by Casey on June 20, 2018 with the same symptoms." (*Id.*). Hoehn diagnosed the engine bay fuse block as "defective" **[*4]** and replaced it. (*Id.* ¶ 69). Casey was required to pay for the repairs.

In certain GM vehicles, including Casey's Vehicle, there is an engine bay fuse block located on the passenger side under the hood. The function of a fuse block is to control and distribute electrical energy from a vehicle's battery or generator throughout the vehicle. The engine bay fuse block provides electrical energy to different engine components using a relay. The relay plugs into the engine bay fuse block "like a power cord plugs into a power outlet in the wall of a home." (*Id.* ¶ 21). To function properly, there must be adequate tension so that the relay's metal prongs fit tightly into the engine bay fuse block. If the relay is loose, the vehicle can fail to start or can stall, which can cause "the loss of acceleration, the loss of power steering, the loss of power brakes, and several other very unsafe conditions." (*Id.* ¶ 25). "A properly designed and constructed fuse block should last the life of a vehicle." (*Id.* ¶ 19).

The engine bay fuse blocks for the following GM products have "virtually the identical layout and design:" 1) the 2007-2010 Saturn Outlook; 2) the 2008-2017 Buick Enclave—including Casey's **[*5]** Vehicle; 3) the 2009-2017 Chevrolet Traverse; 4) the 2007-2016 Chevrolet Acadia; and 5) the 2017 Chevrolet Acadia Limited (collectively, "class vehicles"). (*Id.* ¶ 31). There is a "Fuse Block Defect" in the design, materials, and assembly of these engine bay fuse blocks "wherein the fuse block terminals fail to maintain sufficient tension, resulting in relays which are mounted on fuse blocks being loose." (*Id.* ¶ 32).

The Fuse Block Defect "causes engine stalling, as well as intermittent no crank/no start, intermittent malfunction indicator lamp (MIL) illumination, intermittent service lamp illumination and intermittent service messages being displayed." (*Id.* ¶ 57). "[I]f a Class Vehicle stalls while the Class Vehicle is being driven on the roadway, the stalling creates an extremely unsafe and unacceptably dangerous condition for the occupants of the Class Vehicle, and the pedestrians and other vehicle occupants in the general vicinity." (*Id.* ¶ 58).

GM "had actual knowledge of issues regarding poor terminal connection in the fuse block as early as 2010." (*Id.* ¶ 34). A series of GM service bulletins published starting in 2010 "describe the symptoms of the Fuse Block Defect and how to diagnose **[*6]** it, and purport to offer a repair." (*Id.* ¶ 33). Before 2019, GM offered "band-aid solutions" to the Fuse Block Defect, including "to pack the area with dielectric lubricant, or blame the problem on after market equipment, to attempt to remedy or at least explain away the poor terminal connection." (*Id.* ¶¶ 35, 51). GM "failed to take any action to resolve the problem because, based upon a cost benefit analysis, GM has not been financially motivated to resolve the problem." (*Id.* ¶ 52).

On December 12, 2019, GM issued Technical Service Bulletin 19-NA-276. The bulletin applies to the 2013-2017 Buick Enclave, 2013-2017 Chevrolet Traverse, 2013-2016 Chevrolet Acadia, and 2017 Chevrolet Acadia Limited, which share the common fuse block design. The bulletin states: "Subject: Potential reduced engine power message displayed and/or engine stall with DTCs P1682 and/or P0689 set," "Condition: Some customers may comment that the engine stalled and/or a reduced engine power message was displayed. The technician may find DTCs P1682 and/or P0689 stored," "Cause: The cause of the condition may be poor terminal tension on terminal 51 in X50A Fuse Block - underhood X3." (*Id.* ¶ 65).

As a result of GM's **[*7]** conduct, Casey and other consumers have expended money for repairs, have not received the value for which they bargained when they purchased their vehicles, and have experienced a diminished resale value of their vehicles.

Casey seeks to represent the following class:

> All Persons in the State of California who purchased or leased model year 2013 through 2017 Buick Enclave, model year 2013 through 2017 Chevrolet Traverse, model year 2013 through 2016 Chevrolet Acadia, and model year 2017 Chevrolet Acadia Limited vehicles ("Class Vehicles").
> Excluded from the Class are: (1) Defendants, any entity or division in which Defendants has a controlling interest, and its legal representatives, officers, directors, assigns, and successors; (2) the Judge to whom this case is assigned and the Judge's staff; and (3) persons who have suffered personal injuries as the result of the facts alleged herein.

(*Id.* ¶ 85).

Casey and the class bring the following claims against Defendants: 1) violation of the California Song-Beverly Consumer Warranty Act ("Song-Beverly Act"), *Cal. Civ. Code § 1790, et seq.*; and 2) violation of the California Unfair Competition Law ("UCL"), Cal. Civ. Code § 17200, *et seq.* Casey and class seek injunctive relief, declaratory relief, damages, **[*8]** and attorneys' fees and costs.

III. LEGAL STANDARD

Rule 12(b)(6) of the Federal Rules of Civil Procedure permits dismissal for "failure to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. In order to state a claim for relief, a pleading "must contain . . . a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. Dismissal under *Rule 12(b)(6)* "is proper only where there is no cognizable legal theory or an absence of sufficient facts alleged to support a cognizable legal theory." *Shroyer v. New Cingular Wireless Servs., Inc., 622 F.3d 1035, 1041 (9th Cir. 2010)*.

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* However, "a plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555* (alteration in original) (quoting *Fed. R. Civ. P. 8(a)*). A court is not "required to accept as true allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable **[*9]** inferences." *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001)*. "In sum, for a complaint to survive a motion to dismiss, the non-conclusory factual content, and reasonable inferences from that content, must be plausibly suggestive of a claim entitling the plaintiff to relief." *Moss v. U.S. Secret Serv., 572 F.3d 962, 969 (9th Cir. 2009)*.

IV. DISCUSSION[1]

GM contends that "Plaintiff's Song-Beverly claim fails as a matter of law because she purchased her [V]ehicle used." (ECF No. 38-1 at 15). GM contends that even if the *Song-Beverly Act* was applicable, Casey's Vehicle was merchantable due to "extensive trouble-free use" and because repairs "solved" the Vehicle's problems. (*Id.* at 18). GM contends that its actions do not fall within the "unlawful" UCL prong because Casey's claim is not premised on any viable independent legal violation. GM contends that Casey's "unfair" prong UCL claim should be dismissed because a Vehicle part that "functions throughout the term of its express warranty cannot be characterized as causing a substantial injury to consumers." (*Id.* at 23). GM contends that Casey's UCL claim should be dismissed because Casey has an adequate remedy at law.

Casey contends that the Song-Beverly Act applies because the Vehicle was still partially covered by the original factory warranty. **[*10]** Casey contends that her Vehicle is not considered a used vehicle because she had previously leased the Vehicle and subsequently purchased the Vehicle pursuant to an option in her lease. Casey contends that the Vehicle was not merchantable because the "inherent design flaw" in a part alleged to last the life of the Vehicle "cause[d] the [V]ehicle[] to fail during [its] useful life" and rendered the Vehicle "not fit for ordinary use." (ECF No. 39 at 15-16). Casey contends that GM's conduct was unlawful under the UCL because GM violated the Song-Beverly Act and federal regulations issued by the National Highway Traffic Safety Administration ("NHTSA"). Casey contends that GM's conduct was unfair under the UCL. Casey contends that she is permitted to plead her equitable UCL claim in the alternative.

California's Song-Beverly Act provides an implied warranty that requires goods to be "fit for the ordinary purposes for which such goods are used." *Cal. Civ. Code § 1791.1(a)(2)*. To be fit for its ordinary purpose, a vehicle must be "safe," "reliable," and "substantially free from defects." *Goldstein v. Gen. Motors LLC, 445 F. Supp. 3d 1000, 1016 (S.D. Cal. 2020)* (collecting cases).

The SAC alleges that Casey "purchased a used 2014 Buick Enclave . . . from Hoehn Buick, GMC, Cadillac . . . ." (ECF **[*11]** No. 37 ¶ 1). The SAC alleges that the Vehicle had previously been "sold new." (*Id.* ¶ 2). The SAC alleges that "[a]t the time of purchase, the [ ] Vehicle had already been driven 70,657 miles." (*Id.* ¶ 1). The SAC alleges that "at the time that Casey purchased the [ ] Vehicle, the [ ] Vehicle was still covered by portions of the original factory warranty," namely, "an 8-year 80,000-mile federal emissions warranty for certain emissions related components" (*Id.* ¶ 2). The SAC alleges that the Class Vehicles "contained an inherent defect at the time of sale that causes the Class Vehicles to experience stalling and other unsafe driving conditions." (*Id.* ¶ 94). The SAC alleges that, because of the defect, GM "breached the implied warranty that the Class Vehicles were of merchantable quality and fit for [ ] use in violation of *California Civil Code §§ 1792* and *1791.1*." (*Id.* ¶ 98).

The Song-Beverly Act does not generally impose implied warranty obligations on manufacturers in sales of used vehicles. *See* *Cal. Civ. Code § 1795.5* ("It shall be the obligation of the distributor or retail seller making express

[1] GM requests that the Court take judicial notice of eight documents filed concurrently with its Motion to Dismiss. (ECF No. 38-2). Casey requests that the Court take judicial notice of one document filed concurrently with her Opposition to the Motion to Dismiss. (ECF No. 39-1). Judicial notice of all requested documents is denied, as judicial notice of the documents is unnecessary to this Order.

warranties with respect to used consumer goods (and not the original manufacturer, distributor, or retail seller making express warranties with respect **[*12]** to such goods when new) . . . ."); *see also* Potts v. Ford Motor Co., No. 21-cv-256-BEN-BGS, 2021 U.S. Dist. LEXIS 136995, 2021 WL 3112471, at *4 (S.D. Cal. July 21, 2021); Goldstein, 445 F. Supp. 3d at 1018 ("[T]he distributor or retailer is liable for the sale of used products, not the original product manufacturer."). *But see* Kiluk v. Mercedes-Benz USA, LLC, 43 Cal. App. 5th 334, 340, 256 Cal. Rptr. 3d 484 (2019) (making an exception where the manufacturer offers a *new* express warranty at the time the used vehicle is resold because the manufacturer in such a scenario "acts in the capacity of a retailer"). This is true even where a vehicle is resold with a balance remaining on the *original* express manufacturer warranty. *See* Victorino v. FCA US LLC, 326 F.R.D. 282, 301 (S.D. Cal. 2018) (declining to impose an implied warranty under such circumstances and distinguishing Jensen v. BMW of N. Am., 35 Cal. App. 4th 112, 41 Cal. Rptr. 2d 295 (1995), on the basis that, in Jensen, the plaintiff sought relief under an express warranty, not an implied warranty). The SAC's allegation that Casey purchased a used Vehicle from an authorized dealership that was still partially covered by the balance of GM's original manufacturer warranty fails to establish that GM owed any implied warranty obligations to Casey.[2] GM's Motion to Dismiss Casey's Song-Beverly Act claim is granted.

"The UCL broadly prohibits 'unfair competition,' defined as 'any unlawful, unfair or fraudulent business practice.'" Friedman v. AARP, Inc., 855 F.3d 1047, 1051 (9th Cir. 2017) (quoting Cal. Bus. & Prof. Code § 17200). "Because the statute is written in the disjunctive, it is violated if a **[*13]** defendant violates any of the unlawful, unfair or fraudulent prongs." *Id.* (citing Davis v. HSBC Bank Nev., N.A., 691 F.3d 1152, 1168 (9th Cir. 2012)).[3]

The "unlawful" prong of the UCL "'borrows violations of other laws and treats them as unlawful practices' that the unfair competition law makes independently actionable." Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999) (quoting State Farm Fire & Cas. Co. v. Superior Court, 45 Cal. App. 4th 1093, 1103, 53 Cal. Rptr. 2d 229 (1996)). "[V]irtually any state, federal, or local law can serve as the predicate." Friedman, 855 F.3d at 1052.

The SAC alleges that GM's conduct is independently actionable under the "unlawful" prong of the UCL due to violations of two predicate laws. The first alleged predicate is GM's violation of the Song-Beverly Act. However, the Song-Beverly Act cannot serve as a predicate for Casey's UCL claim because the Court has concluded that the SAC does not state a claim for relief under the Song-Beverly Act.

The SAC also alleges that GM's violation of a regulation issued by the NHTSA—"49 C.F.R. [§] 573.6 (and Federal Motor Vehicle Safety Standard 'FMVSS' 573)"—serves as a predicate for Casey's UCL claim. (ECF No. 37 ¶ 64). That regulation requires vehicle manufacturers to "furnish a report to the NHTSA for each defect in [their] vehicles or in [their] items of original or replacement equipment that [they] or the Administrator determines to be related to motor vehicle safety, and **[*14]** for each noncompliance with a motor vehicle safety standard in such vehicles or items of equipment which either [they] or the Administrator determines to exist." 49 C.F.R. § 573.6.

The SAC alleges that GM breached "a duty under the regulations" because "GM [ ] determined that there was a safety related defect" and failed to act. (ECF No. 37 ¶ 65). The SAC alleges that GM's determination of a safety related defect is evidenced by a "plain reading" of Technical Service Bulletin 19-NA-276. (*Id.*). The SAC alleges that the bulletin states: "Subject: Potential reduced engine power message displayed and/or engine stall with DTCs P1682 and/or P0689 set," "Condition: Some customers may comment that the engine stalled and/or a reduced engine power message was displayed. The technician may find DTCs P1682 and/or P0689 stored," "Cause: The cause of the condition may be poor terminal tension on terminal 51 in X50A Fuse Block - underhood X3." (*Id.*).

---

[2] The Court does not address Casey's argument that the Song-Beverly Act applies because the Vehicle was purchased pursuant to an option in a prior lease, as there are no facts concerning any prior lease alleged in the SAC. *See* Schneider v. Cal. Dept. of Corrections, 151 F.3d 1194, 1197 n.1 (9th Cir. 1998) ("'[N]ew' allegations contained in [Plaintiffs'] opposition motion, however, are irrelevant for Rule 12(b)(6) purposes.").

[3] Casey does not contend in her Opposition or allege in the SAC that GM has violated the fraudulent prong of the UCL.

The United States Code for Motor Vehicle Safety defines motor vehicle safety as

> the performance of a motor vehicle or motor vehicle equipment in a way that protects the public against unreasonable risk of accidents occurring because of the design, construction, or performance **[*15]** of a motor vehicle, and against unreasonable risk of death or injury in an accident, and includes nonoperational safety of a motor vehicle.

49 U.S.C. § 30102(a)(9). In assessing whether a vehicle condition that results in engine stalling poses an "unreasonable risk," *id.*, and is thus "related to motor vehicle safety," *49 C.F.R. § 573.6*, the NHTSA considers several factors, including

> the speeds at which stalling may occur, the ability of the driver to restart the vehicle, the warning available to the driver prior to stalling, the effects of engine stall on vehicle controllability, when and where the stalling will occur and the effects of the condition on other safety systems of the vehicle.

Denial of Motor Vehicle Defect Petition, 80 Fed. Reg. 18935-01 (Apr. 8, 2015). The text of Technical Service Bulletin 19-NA-276 does not adequately support an inference that GM determined that the alleged defect related to motor vehicle safety. Absent such a determination by GM or the Administrator, GM had no duty to act under *49 C.F.R. § 573.6*. GM's Motion to Dismiss Casey's "unlawful" UCL claim is granted.

The "unfair" prong of the UCL prohibits "practice[s] [that] may be deemed unfair even if not specifically proscribed by some other law." *Cel-Tech Commc'ns, 20 Cal. 4th at 180*.

> Under the UCL's unfairness prong, courts consider either: (1) whether the **[*16]** challenged conduct is tethered to any underlying constitutional, statutory or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***; (2) whether the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers; or (3) whether the practice's impact on the victim outweighs the reasons, justifications and motives of the alleged wrongdoer.

Doe v. CVS Pharm, Inc., 982 F.3d 1204, 1214-15 (9th Cir. 2020), *reh'g en banc denied* (Jan. 15, 2021); *cert. granted, in part, on other grounds, CVS Pharm., Inc. v. Doe, 141 S. Ct. 2882, 210 L. Ed. 2d 990, 2021 U.S. LEXIS 3572 (July 2, 2021)*. Determining whether a defendant's conduct was unfair "raises of questions of fact that are appropriate for resolution on a motion to dismiss only in rare situations." *Friedman, 855 F.3d at 1055* (quoting *Reid v. Johnson & Johnson, 780 F.3d 952, 958 (9th Cir. 2015)*).

The SAC alleges that "[i]t is unfair for GM to fail to acknowledge the Fuse Block Defect or offer an adequate or permanent solution for the problem . . . ." (ECF No. 37 ¶ 114). The SAC alleges that "[i]t is also unfair for GM to charge customers for the resulting repairs . . . ." (*Id.*). The SAC alleges that Casey suffered financial harm, including reduced fuel efficiency "resulting in having to buy more gas" and having to "pay out of pocket for the diagnosis and repairs" of **[*17]** the alleged defect. (*Id.* ¶ 115). The SAC alleges that GM's conduct is tethered to legislative policies declared in the Song-Beverly Act and in NHTSA regulations.

GM's alleged conduct is not "tethered to any underlying constitutional, statutory or regulatory provision," *Doe, 982 F.3d at 1214-15*, because the Court has already concluded that the SAC fails to allege facts to support an inference that GM's conduct violated the Song-Beverly Act or NHTSA regulations. GM's failure to acknowledge or remedy a defect that occurred outside any applicable express warranty period cannot plausibly be characterized as "immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." *See Clemens v. DaimlerChrysler Corp., 534 F.3d 1017, 1026-27 (9th Cir. 2008)* ("[T]he failure to disclose a defect that might, or might not, shorten the effective life span of an automobile part that functions precisely as warranted throughout the term of its express warranty cannot be characterized as causing a substantial injury to consumers, and accordingly does not constitute an unfair practice under the UCL." (quoting *Daugherty v. Am. Honda Motor Co., Inc., 144 Cal. App. 4th 824, 839, 51 Cal. Rptr. 3d 118 (2006)*). The SAC alleges that "the gravity of the consequences of GM's conduct . . . outweighs the justifications . . . ." (ECF No. 37 ¶ 119). The SAC alleges that weighing the relevant **[*18]** factors "is fact intensive and requires a full factual record." (*Id.*). These conclusory allegations are insufficient to support a UCL "unfair" prong claim. *See Doe, 982 F.3d at 1215* (affirming dismissal of UCL "unfair" prong claim because "conclusory recitation of one of the UCL's legal standards does not clarify what conduct [the plaintiffs] claim is unfair, or on what allegations in the complaint [the plaintiffs] rely for this claim"). GM's Motion to Dismiss the "unfair" UCL claim is granted.

V. CONCLUSION

IT IS HEREBY ORDERED that the Motion to Dismiss Plaintiff's Second Amended Class Action Complaint filed by Defendant General Motors, LLC (ECF No. 38) is granted. The Second Amended Class Action Complaint (ECF No. 37) is dismissed without prejudice.[4] No later than thirty (30) days from the date of this Order, Plaintiff Rebecca Casey may file any motion for leave to amend pursuant to Civil *Local Rules 7.1* and *15.1(c)*. If no motion is filed, the case will be closed.

Dated: November 19, 2021

/s/ William Q. Hayes

Hon. William Q. Hayes

United Slates District Court

[4] GM contends that the SAC should be dismissed with prejudice. Although Casey does not dispute this contention in her Opposition, dismissal with prejudice is inappropriate because the Court cannot conclude that further amendment would be futile at this point in time.

Counsel: **[**1]** For Ranbaxy Generic Drug Application Antitrust Litigation, In Re: Gregory T. Arnold, Hagens Berman Sobol Shapiro LLP, Cambridge, MA.

For United Food and Commercial Workers Health and Welfare Fund of Northern Pennsylvania, on behalf of itself and all others similary situated, Consolidated Plaintiff: Gerald Lawrence, William J Olson, LEAD ATTORNEY, PRO HAC VICE, Lowey Dannenberg, P.C., West Conshohocken, PA; RENEE A. NOLAN, LEAD ATTORNEY, Lowey Dannenberg, PC, West Conshohocken, PA; Eric L Young, Paul V Shehadi, PRO HAC VICE, McEldrew Young, Attorneys-at-Law, Philadelphia, PA; Gregory T. Arnold, Hagens Berman Sobol Shapiro LLP, Cambridge, MA.

For Louisiana Health Services and Indemnity Company d/b/a Blue Cross and Blue Shield of Louisiana, on behalf of itself and all others similary situated, Consolidated Plaintiff: David Scott Scalia, LEAD ATTORNEY, PRO HAC VICE, The Dugan Law Firm, New Orleans, MA; James R. Dugan, II, LEAD ATTORNEY, PRO HAC VICE, The Dugan Law Firm, New Orleans, LA; Terrianne Benedetto, PRO HAC VICE, THE DUGAN LAW FIRM, APLC, Philadelphia, PA.

For Meijer, Inc., Meijer Distribution, Inc., Plaintiffs: Alfred Luke Smith, LEAD ATTORNEY, PRO HAC VICE, Radice Law Firm, PC, Philadelphia, **[**2]** PA; Eamon P. Kelly, LEAD ATTORNEY, PRO HAC VICE, Sperling & Slater PC, Chicago, IL; Justin N. Boley, LEAD ATTORNEY, PRO HAC VICE, WEXLER WALLACE LLP, Chicago, IL; Kenneth A. Wexler, Tyler J. Story, LEAD ATTORNEY, PRO HAC VICE, Wexler Wallace LLP, Chicago, IL; Royce Zeisler, Sharon K. Robertson, LEAD ATTORNEY, PRO HAC VICE, Donna M. Evans, Cohen Milstein Sellers & Toll PLLC, New York, NY; Steve D. Shadowen, LEAD ATTORNEY, Matthew Weiner, Richard M. Brunell, Hilliard & Shadowen LLP, Austin, TX; David P. Germaine, John P. Bjork, Sperling & Slater, P.C., Chicago, IL; Ethan J. Barlieb, Joseph H. Meltzer, TERENCE S. ZIEGLER, Kessler Topaz Meltzer & Check, LLP, Radnor, PA; Gregory T. Arnold, Kristie A. LaSalle, Thomas M. Sobol, Hagens Berman Sobol Shapiro LLP, Cambridge, MA; John D. Radice, Radice Law Firm, PC, Long Beach, NJ; Joseph M. Vanek, SPERLING & SLATER, P.C., Chicago, IL.

For Cesar Castillo, Inc., Plaintiff: Linda P. Nussbaum, LEAD ATTORNEY, Nussbaum Law Group, P.C., New York, NY; Gregory T. Arnold, Hagens Berman Sobol Shapiro LLP, Cambridge, MA.

Prinston Pharmaceutical Inc., Plaintiff, Pro se.

For Sun Pharmaceutical Industries Limited, Ranbaxy, Inc., Defendants: Alexandra I. Russell, **[**3]** LEAD ATTORNEY, PRO HAC VICE, Kirkland & Ellis, LLP, Washington, DC; Devora Allon, LEAD ATTORNEY, Kevin M

Neylan, Jr., PRO HAC VICE, Kyla Jackson, ROBERT ALLEN, Kirkland & Ellis LLP, New York, NY; Jay P. Lefkowitz, LEAD ATTORNEY, Kirkland & Ellis LLP, New York, NY; Kara E. Cheever, LEAD ATTORNEY, PRO HAC VICE, Kirkland & Ellis, LLP, New York, NY; Benjamin M. Greene, McCarter & English, LLP, Boston, MA; Dena Harriet Medford, Kirkland & Ellis LLP, Boston, MA; Paul E. White, Arent Fox LLP, Boston, MA.

For Prinston Pharmaceutical Inc., Respondent: Scott A Cunning, II, LEAD ATTORNEY, PRO HAC VICE, Parker Poe Adams & Bernstein, LLP, Washington, DC.

Judges: Nathaniel M. Gorton, United States District Judge.

Opinion by: Nathaniel M. Gorton

Opinion

[*464] MEMORANDUM & ORDER

GORTON, J.

This multi-district litigation involves five actions which were centralized in this Court and divided into two classes against Ranbaxy Inc. and Sun Pharmaceutical Industries Limited (collectively, "Ranbaxy" or "defendants") for allegedly causing the delayed market entry of three generic drugs.

The two plaintiff classes are composed of direct purchaser plaintiffs ("DPPs") and end-payor plaintiffs ("EPPs"). DPPs, such as wholesalers and distributors, purchase **[**4]** generic drugs directly from drug manufacturers. EPPs are third-party payors, such as health plans and insurance companies, that indirectly purchase and/or provide reimbursement for generic drugs at the end of the distribution chain from retailers and other intermediaries. The DPPs and EPPs (collectively, "plaintiffs") bring claims against Ranbaxy for violations of federal and state ***antitrust law***, the federal Racketeer Influenced and Corrupt Organizations Act ("RICO") and state consumer protection statutes.

Pending before the Court are cross motions for summary judgment under *Federal Rule of Civil Procedure 56*. For the reasons that follow, both the defendants' and plaintiffs' motions will be denied.

I. Background

A. Factual Background

Both the Court and the parties are well acquainted with the facts, which are described in detail in the Report and Recommendation of United States Magistrate Judge M. Page Kelley on Ranbaxy's motion to dismiss the complaint of the plaintiffs in the original action in this Court prior to centralization. See *Meijer, Inc. v. Ranbaxy, Inc., No.1:15-cv-11828-NMG, 2016 U.S. Dist. LEXIS 120998 (D. Mass. Sept. 7, 2016)*. For purposes of completeness, however, the Court provides the following abbreviated summary of the background relevant to the pending motions.

In the early 2000s, Ranbaxy filed a series **[**5]** of applications with the United States Food and Drug Administration ("FDA") seeking approval to manufacture and market generic versions of various pharmaceuticals. Under the *Hatch-Waxman Act, Pub. L. No. 98-417, 98 Stat. 1585 (1984)*, the first generic drug manufacturer to submit a substantially complete Abbreviated New Drug Application ("ANDA") is entitled to a 180-day period of exclusivity during which no other manufacturer is permitted to market a generic version of the subject drug. The FDA may, however, revoke the exclusivity period if the generic manufacturer fails to obtain tentative approval from the FDA within 30 months of submission, among other reasons. Tentative approval, which requires the manufacturer to demonstrate that its facilities comply with current good manufacturing practices, effectively means that the ANDA meets all the substantive requirements for final approval, but the FDA is barred from formally approving the application due to preexisting patents.

In 2004 and 2005, Ranbaxy submitted the first substantially complete ANDAs for the three brand drugs at issue here: Diovan, Nexium and Valcyte. Ranbaxy subsequently **[*465]** obtained tentative approval for each of those drugs in 2007 and 2008. Despite its early success, **[**6]** Ranbaxy failed to secure final approval for its generic version of Diovan until June, 2014 and did not bring that generic to market until July, 2014. Before defendants could secure final approval for its generic Nexium and Valcyte ANDAs, the FDA revoked its tentative approval for both drugs. Ranbaxy's generic versions of these two drugs were never brought to market.

Plaintiffs allege that Ranbaxy violated RICO, federal and state antitrust laws and state consumer protection laws by submitting multiple ANDAs with missing, incorrect or fraudulent information, thereby wrongfully acquiring exclusivity periods and delaying the market entry of generic Diovan, Nexium and Valcyte. Plaintiffs assert that but for defendants' allegedly anti-competitive conduct, generic versions of those three drugs would have entered the market and been available at lower prices much sooner. As a result, plaintiffs contend they paid artificially inflated prices for Diovan, Nexium and Valcyte during the Class Periods.

B. Relevant Procedural History

The five actions comprising this multidistrict litigation were centralized in this Court in February, 2019. In April, 2019, the Court consolidated for pretrial purposes **[**7]** all direct purchaser actions and all end-payor actions that were centralized in this District and assigned to this Court, thereby creating two putative class actions. Amended complaints were filed by the DPPs and EPPs later that month. The EPPs further amended their complaint in February, 2020 and March, 2021. The DPPs also amended their complaint in March, 2021. After oral argument, this Court certified two sets of classes, one for DPPs and EPPs, in May, 2021. Each set is composed of three nationwide classes, one for each of the pharmaceuticals at issue.

Shortly thereafter, the parties filed cross motions for summary judgment. Parties have submitted oppositions to these motions, which have, in turn, engendered sur-replies. This Court heard oral argument on the motions in October, 2021.

II. Legal Standard

The role of summary judgment is "to pierce the pleadings and to assess the proof in order to see whether there is a genuine need for trial." *Mesnick v. Gen. Elec. Co., 950 F.2d 816, 822 (1st Cir. 1991)* (quoting *Garside v. Osco Drug, Inc., 895 F.2d 46, 50 (1st Cir. 1990)*). The burden is on the moving party to show, through the pleadings, discovery and affidavits, "that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*.

A fact is material if **[**8]** it "might affect the outcome of the suit under the governing law...." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A genuine issue of material fact exists where the evidence with respect to the material fact in dispute "is such that a reasonable jury could return a verdict for the nonmoving party." Id.

If the moving party satisfies its burden, the burden shifts to the nonmoving party to set forth specific facts showing that there is a genuine, triable issue. *Celotex Corp. v. Catrett, 477 U.S. 317, 324, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. The Court must view the entire record in the light most favorable to the non-moving party and make all reasonable inferences in that party's favor. *O'Connor v. Steeves, 994 F.2d 905, 907 (1st Cir. 1993)*. Summary judgment is appropriate if, after viewing the record in the non-moving party's favor, **[*466]** the Court determines that no genuine issue of material fact exists and that the moving party is entitled to judgment as a matter of law. *Celotex Corp., 477 U.S. at 322-23*.

III. Analysis

A. Ranbaxy's Motion for Summary Judgment

Defendants contend that summary judgment is appropriate for a variety of reasons and, in the alternative, partial summary judgment on damages is required.

1. FDCA Preclusion

This Court has previously rejected Ranbaxy's contention that the authority to enforce violations of the Federal Food, Drug, and Cosmetic Act ("FDCA") belongs exclusively to **[**9]** the FDA, recognizing that the issue is one of first impression in this Circuit. While Ranbaxy yet again asserts the relevance of *Buckman v. Plaintiffs' Legal Committee, 531 U.S. 341, 121 S. Ct. 1012, 148 L. Ed. 2d 854 (2001)*, defendants have failed to provide any persuasive reason for the Court to reexamine its prior analysis, which concluded that the *Buckman* decision did not directly resolve the matter. See *Arizona v. California, 460 U.S. 605, 618, 103 S. Ct. 1382, 75 L. Ed. 2d 318*, supplemented by *466 U.S. 144, 104 S. Ct. 1900, 80 L. Ed. 2d 194 (1984)* ("[W]hen a court decides upon a rule of law, that decision should continue to govern the same issues in subsequent stages in the same case."). Neither party cites new case law addressing FDCA preclusion of federal antitrust claims involving fraud on the FDA and the Court has found none. See *Naser Jewelers, Inc. v. City of Concord, N.H., 538 F.3d 17, 20 (1st Cir. 2008)* ("Narrow exceptions to the doctrine exist if the initial ruling was made on an inadequate record or was designed to be preliminary; if there has been a material change in controlling law; if there is newly discovered evidence bearing on the question; and if it is appropriate to avoid manifest injustice." (citations omitted)).

Accordingly, the Court relies upon its prior reasoning and finds the plaintiffs' claims are not precluded by the FDCA.

2. RICO Predicate Offenses

Citing the recent decision in *Kelly v. United States, 140 S. Ct. 1565, 206 L. Ed. 2d 882 (2020)*, Ranbaxy urges this Court to reconsider its determination that the plaintiffs **[**10]** have provided evidence sufficient to allege the predicate offenses of mail and/or wire fraud under RICO. As the Court has previously articulated, mail and wire fraud require proof of: (1) a scheme or artifice to defraud, (2) knowing and willing participation in that scheme with the specific intent to defraud, and (3) the use of interstate mail or wire communications in furtherance of the scheme. *Sanchez v. Triple-S Mgmt., Corp., 492 F.3d 1, 9-10 (1st Cir. 2007)*. Both statutes are "limited in scope to the protection of property rights." *Cleveland v. United States, 531 U.S. 12, 18, 121 S. Ct. 365, 148 L. Ed. 2d 221 (2000)* (citation omitted). In other words, the thing obtained by fraud must be "property in the hands of the victim." *Id. at 15*. Defendants allege that plaintiffs have provided no cognizable property upon which to ground their RICO claims. Defendants seek to draw a distinction between Ranbaxy's regulatory interests and property rights.

The Court has already rejected this reasoning. In its order on defendants' motion to dismiss, the Court found the plaintiffs had sufficiently pled a predicate offense under RICO by asserting that Ranbaxy's fraud affected the interests of individuals and entities other than the government. *Kelly*, in which the Supreme Court distinguished between property sufficient for a **[*467]** fraud claim and "run-of-the-mine...regulatory **[**11]** power," even when such regulatory power causes foreseeable loss to third parties, does not change this calculus. *140 S. Ct. at 1573*. *Kelly* is a straightforward application of the holding in *Cleveland*, which this Court previously determined did not bar plaintiffs' claims. In both *Kelly* and *Cleveland*, a scheme to alter the government's regulatory choice did not implicate a property right.

Here, by contrast, the object of the scheme was not simply the government's regulatory choice but rather the property rights implicated by that choice. See *In re JUUL Labs, Inc., Mktg., Sales Pracs., & Prod. Liab. Litig., 497 F.*

Supp. 3d 552, 615 (N.D. Cal. 2020) (finding Kelly did not foreclose plaintiffs' RICO claims where "the scheme was to secure the money and property of the end consumer"). As this Court has previously articulated, the victims of the alleged fraud need not be the parties upon whom the defendants' fraud was perpetrated. See United States v. Hatch, 926 F.2d 387, 392 (5th Cir. 1991) ("The focus of the mail fraud statute is upon the use of the mail to further a scheme to defraud, not upon any particular kind of victim."). Nor is there a requirement in the mail or wire fraud statutes that the victim who is deprived of money or property be the party who was deceived by the defendants' scheme. See id.; accord. United States v. Valencia, No. CRIM. H-04-514-SS, 2006 U.S. Dist. LEXIS 90298, 2006 WL 3716657, at *4 (S.D. Tex. Dec. 14, 2006), aff'd, 600 F.3d 389 (5th Cir. 2010); United States v. Howard, 619 F.3d 723, 727 (7th Cir. 2010).

Defendants suggest no other legal or factual deficiencies to undermine **[**12]** the Court's prior ruling.

3. Causation

Defendants assert that plaintiffs' theory of causation hinges on two premises: (1) Ranbaxy's alleged fraud induced the FDA to grant tentative approval for Diovan, Nexium and Valcyte before the expiration of the 30-month deadline to earn tentative approval for each drug, and (2) the FDA would have revoked Ranbaxy's period of exclusivity for generic Diovan if Ranbaxy had failed to obtain tentative approval within 30 months. Ranbaxy takes issue with both premises.

On the first issue, defendants argue that none of the tentative approvals was induced by fraud, as evidenced by the FDA's communications with Ranbaxy. More specifically, Ranbaxy points to a 2012 consent decree between the defendants and the FDA that established new practices and offices to ensure Ranbaxy's regulatory compliance, withdrew certain ANDAs and submitted other ANDAs to new audits. Diovan, Nexium and Valcyte were among those pharmaceuticals subject to new audits. After those audits, the FDA sent three letters to Ranbaxy informing it that those applications did not appear to contain any "untrue statements of material fact" or "data irregularities" and, based upon those findings, the **[**13]** FDA resumed consideration of whether those ANDAs were eligible for final approval. Ranbaxy now asserts that those letters prove that the FDA's tentative approvals of Diovan, Nexium, and Valcyte were not induced by fraud and, thus, that plaintiffs cannot prove that the fraud alleged caused plaintiffs' injuries.

Ranbaxy further contends that the record disproves causation with respect to generic Diovan because, after Ranbaxy submitted its application but before the FDA granted Ranbaxy tentative approval, the FDA altered the requirements for approval of that application, thus invoking a statutory exception. The applicable provision, known as the "change-based exception", indicates that a first filer will forfeit **[*468]** its exclusionary period if it does not obtain tentative approval within 30 months,

> unless the failure is caused by a change in or a review of the requirements for approval of the application imposed after the date on which the application is filed.

21 U.S.C. § 355(j)(5)(D)(i)(IV). Ranbaxy contends that the exception applies because a change in the brand drug's USP monograph was one reason why Ranbaxy failed to obtain approval within 30 months of filing. Therefore, Ranbaxy explains, any alleged fraud was not the **[**14]** reason for the delay that resulted in the plaintiffs' alleged injury, i.e. the delay was inevitable and excusable.

"[A]n antitrust plaintiff must prove that he or she suffered damages from an antitrust violation and that there is a causal connection between the illegal practice and the injury." In re Intuniv Antitrust Litig., 496 F. Supp. 3d 639, 672 (D. Mass. 2020) (quoting In re Nexium (Esomeprazole) Antitrust Litig., 42 F. Supp. 3d 231, 267 (D. Mass. 2014)). An antitrust violation may, however, still cause the plaintiffs' injury "even if there are additional independent causes of the injury." In re Nexium, 42 F. Supp. 3d at 267 (quoting In re Flonase Antitrust Litig., 798 F. Supp. 2d 619, 627-28 (E.D. Pa. 2011)). "Once a plaintiff presents evidence that he suffered the sort of injury that would be the expected consequence of the defendant's wrongful conduct, the burden shifts to the defendant to rebut this causal inference." In re Neurontin Mktg. and Sales Practices Litig., 712 F.3d 21, 45 (1st Cir. 2013) (internal quotation and citation omitted). "Defendants have a high bar to meet, because causation is generally a question best left for the jury." *In re Loestrin 24 Fe Antitrust Litig., 433 F. Supp. 3d 274, 323 (2019)* (citations omitted); see also *Peckham v. Continental Cas. Ins. Co., 895 F.2d 830, 837 (1st Cir. 1990)* ("Causation questions of this sort are normally grist for the jury's mill.")

Defendants have failed to rebut compellingly the plaintiffs' causal inferences on either of the issues addressed.

First, defendants' description of the subject letters as "no fraud" letters is misguided and inaccurately characterizes their significance. Plaintiffs have presented **[**15]** sufficient evidence to suggest that, in reaching the conclusion that the ANDAs

> [did] not appear to contain any untrue statements of material fact [nor] contain a pattern or practice of data irregularities affecting approval[,]

the FDA did not assess all the evidence now available to the Court. Moreover, as clearly articulated in the letters, the FDA's determinations of wrongdoing were constrained by the relevant consent decree and did not restrict the "FDA's ability to raise additional data integrity concerns regarding the review process" at a later time. These letters are not the conclusive exculpation that defendants confidently submit.

Even assuming, arguendo, that these letters are evidence that the FDA determined that defendants did not fraudulently secure tentative approval for the relevant drugs, that determination does not preclude the Court from making its own independent assessment. In the context of administrative decision-making, federal courts give the decisions of an administrative agency, such as the FDA, preclusive effect

> when an administrative agency is acting in a judicial capacity and resolves disputed issues of fact properly before it which the parties have had an adequate **[**16]** opportunity to litigate.

B & B Hardware, Inc. v. Hargis Indus., Inc., 575 U.S. 138, 148, 135 S. Ct. 1293, 191 L. Ed. 2d 222 (2015) (quoting *Univ. of Tennessee* **[*469]** *v. Elliott, 478 U.S. 788, 798, 106 S. Ct. 3220, 92 L. Ed. 2d 635 (1986)*). These conditions can, however, only be met "insofar as the proceeding resulting in the determination entailed the essential elements of adjudication." *Restatement (Second) of Judgments § 83(2)(b)* (1982); see *Astoria Fed. Sav. & Loan Ass'n v. Solimino, 501 U.S. 104, 109-10, 111 S. Ct. 2166, 115 L. Ed. 2d 96, (1991)* ("Although administrative estoppel is favored as a matter of general policy, its suitability may vary according to...the relative adequacy of agency procedures."). Here, the FDA process that resulted in the relevant letters did not include any sort of "adjudicative scheme...sufficient to trigger the doctrine of collateral estoppel." *Ríos-Piñeiro v. United States, 713 F.3d 688, 692 (1st Cir. 2013)*. Compare *Rios-Pineiro, 713 F.3d. at 692* (granting preclusive effect to agency decision where agency adjudication was alternative to Federal Court of Claims and procedures included limited discovery and examination of witnesses at hearing) with *Johnson v. Vilsack, 833 F.3d 948, 957 (8th Cir. 2016)* (declining to grant preclusive effect to agency decision that was based on selective information and parties had limited rights to present evidence or argument). For this reason, these letters carry no preclusive effect in the present litigation and cannot conclusively disprove causality.

Nor does the change-based exception undermine the plaintiffs' contention of causality. As an initial matter, while defendants argue that the FDA's tentative approval **[**17]** of generic Diovan in 2007 would have been delayed due to that change independent of any alleged fraud, they do not address causality in the context of Ranbaxy's initial, 2004 generic Diovan application. Ranbaxy was eligible for the tentative approval at issue only because it was the first filer in 2004 and plaintiffs contend that such initial eligibility was fraudulently based. Thus, to the extent the purported injuries stem from Ranbaxy, rather than from another manufacturer, securing the coveted first-filer status for generic Diovan, the monograph change did not break the "causal connection between the illegal practice and the injury." *Sullivan v. Nat'l Football League, 34 F.3d 1091, 1103 (1st Cir. 1994)*, as amended on denial of reh'g (Oct. 26, 1994).

Moreover, as noted above, the possibility that plaintiffs' injuries resulted from multiple, independent causes does not exculpate the defendants. They have proffered insufficient evidence to rebut the inference that the alleged fraud, alone or in concert with the monograph change, caused plaintiffs' injuries with respect to generic Diovan. "Plaintiffs need not prove that the antitrust violation was the sole cause of their injury, but only that it was a material cause." *In re Nexium (Esomeprazole) Antitrust Litig., 42 F. Supp. 3d at 267 (D. Mass. 2014)* (quoting *Engine Specialties, Inc.*

v. Bombardier Ltd., 605 F.2d 1, 14 (1st Cir. 1979)); see also In re Nexium (Esomeprazole) Antitrust Litig., 309 F.R.D. 107, 141 (D. Mass. 2015), as amended **[**18]** (Aug. 7, 2015), aff'd, 842 F.3d 34 (1st Cir. 2016), and cases cited. The parties' experts present diverging perspectives with respect to the import of the change-based exception relative to the award of the exclusionary period to Ranbaxy. In light of that disagreement, "the evidence raises a genuine dispute of material fact on this causation theory." In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. CV 14-MD-02503, 2018 U.S. Dist. LEXIS 11921, 2018 WL 563144, at *16 (D. Mass. Jan. 25, 2018).

4. Proof of Monopoly Power

Plaintiffs assert two claims under the *Sherman Act*: monopolization and attempted monopolization.

> **[*470]** To successfully prove a monopolization offense, a plaintiff must show that defendant (1) has monopoly power and (2) the defendant has engaged in impermissible exclusionary practices with the design or effect of protecting or enhancing its monopoly position.

Coastal Fuels of P.R., Inc. v. Caribbean Petroleum Corp., 79 F.3d 182, 195 (1st Cir. 1996) (internal quotation and citation omitted). To prove attempted monopolization, a plaintiff must similarly prove predatory or anticompetitive conduct but need only demonstrate that there was "a dangerous probability of achieving monopoly power" and "a specific intent to monopolize." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*. With regard to both claims, "[m]onopoly power is the power to control prices or exclude competition." *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*.

Plaintiffs may prove such power with two kinds of evidence: direct, such as super-competitive prices or restricted output, **[**19]** or circumstantial. See *Coastal Fuels, 79 F.3d at 196-97* (citations omitted); accord. *Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 307 (3d Cir. 2007)*. Some courts have, by implication, limited the circumstantial evidence that can support a claim of monopoly power to the defendant's market share in the relevant market. See *Heerwagen v. Clear Channel Communications, 435 F.3d 219 (2d Cir. 2006)* ("Indirect proof of market power, that is, proof that the defendant has a large percentage share of the relevant market, is a 'surrogate' for direct proof of market power."); *Arani v. TriHealth Inc., 77 Fed. Appx. 823, 826 (6th Cir. 2003)* ("The existence of monopoly power can be established by either: (1) presenting direct evidence of a defendant's exercise of control over prices or the actual exclusion of competitors; or (2) showing that a defendant has a high market share in a defined market."). Others, including the First Circuit Court of Appeals, have not done so. See *Diaz Aviation Corp. v. Airport Aviation Servs., Inc., 716 F.3d 256, 265 (1st Cir. 2013)* ("[M]onopoly power is *typically* proven by defining a relevant market and showing that the defendant has a dominant share of that market." (emphasis added)); *Coastal Fuels, 79 F.3d at 197* ("Market power *may* be proved circumstantially by showing that the defendant has a dominant share in a well-defined relevant market and that there are significant barriers to entry in that market and that existing competitors lack the capacity to increase their output in the short run." (emphasis **[**20]** added)).

The Court therefore rejects defendants' assertions that the fact that Ranbaxy never sold Valcyte and Nexium, and thus never maintained a significant share of the relevant market, is dispositive of the *Sherman Act* claims. While an antitrust defendants' share of the relevant market is typically used as evidence of monopoly power, typicality is not necessary here. Within the highly regulated market for pharmaceuticals, plaintiffs have proffered sufficient evidence to create a genuine dispute of material fact as to whether Ranbaxy maintained monopoly power due to its first-filer status and the resulting exclusionary periods. This holistic assessment provides strong evidence that Ranbaxy maintained the "ability to lessen or destroy competition in the relevant market," the determining factor in assessing monopoly power. *Sterling Merch., Inc. v. Nestlé, S.A., 656 F.3d 112, 125 (1st Cir. 2011)* (internal quotation and citations omitted); see also *Geneva Pharms. Tech. Corp. v. Barr Lab'ys Inc., 386 F.3d 485, 500-01 (2d Cir. 2004)*. "[A]fter full consideration of the relationship between market **[*471]** share and other relevant market characteristics," *Tops Markets, Inc. v. Quality Markets, Inc., 142 F.3d 90, 98 (2nd Cir. 1998)*, the fact that Ranbaxy never sold Valcyte and Nexium is not dispositive. See *F.T.C. v. Indiana Fed'n of Dentists, 476 U.S. 447, 460-61, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)* ("the purpose of the inquiries into market definition and market power is to determine whether an arrangement has the potential for **[**21]** genuine adverse effects on competition" (internal quotation and citation omitted)). These unique circumstances reveal that Ranbaxy's decision not to enter those markets is reflective, rather than dispositive, of the market power that the defendants allegedly wielded.

Defendants' argument that Ranbaxy did not have monopoly power in the Diovan market because of the presence of brand Diovan and the brand company's authorized generic ("AG") is equally unpersuasive. There is no dispute that the brand drug, the AG and Ranbaxy's generic version were, from a medical perspective, undifferentiated substitutes. Nor do plaintiffs contend that the entrance of generic Diovan into the market had no impact on the brand price. It is, however, undisputed that:

> Substitutability with other drugs shows a lack of market power only if it effectively limits the price to the competitive level or something slightly above, and if that is the case, then entry of new competitors should not have a substantial effect on average price.

In re Aggrenox Antitrust Litig., 199 F. Supp. 3d 662, 668 (D. Conn. 2016) (quotation and citations omitted). Here, plaintiffs have proffered compelling, though disputed, evidence that Ranbaxy charged super-competitive prices during their period of exclusivity **[**22]** for generic Diovan. That pricing data provides evidence that the medical substitutability of available alternatives was of limited import in this context.

Furthermore, contrary to defendants' assertion, courts have recognized the potential for monopoly power where the relevant market is limited to the generic version of the product and generic prices demonstrate a degree of independence from brand-name competition. See *Geneva Pharms. Tech. Corp. v. Barr Labs. Inc., 386 F.3d 485, 496 (2d Cir. 2004)* (holding that, while "[i]t may seem paradoxical," the relevant product market was only the generic drug because "in examining the competitive pressures that affect the ability of a lone generic manufacturer to raise prices or reduce output, we are persuaded that competition among generics creates those restraints"); *In re Lorazepam & Clorazepate Antitrust Litig., 467 F. Supp. 2d 74, 82 (D.D.C. 2006)*. Where there are disagreements "about the products that make up the market capable of constraining [defendant's] profit margins and price to a competitive level," as here, summary judgment is inappropriate. *In re Loestrin 24 Fe Antitrust Litig., 433 F. Supp. 3d at 299*.

5. Standing to Recover "Brand-Brand" Damages

As this Court previously articulated, although it is true that "[c]ompetitors and consumers in the market where trade is allegedly restrained are presumptively the proper plaintiffs" in an antitrust action, **[**23]** *Breiding v. Eversource Energy, 344 F. Supp. 3d 433, 452 (D. Mass. 2018)* (quoting *Serpa Corp. v. McWane, Inc., 199 F.3d 6, 10-11 (1st Cir. 1999)*), it does not follow that consumers who are outside of that market necessarily lack standing. Rather, standing depends on whether the injury suffered "flows from that which makes defendants' acts unlawful." *Serpa Corp., 199 F.3d at 10* (internal citation omitted).

[*472] Ranbaxy's contention that plaintiffs necessarily lack antitrust standing to recover for alleged brand-brand injury because their experts defined the relevant antitrust market as limited to ANDA-based generics is therefore unavailing. Brand-brand injuries are those stemming from transactions in which class members actually purchased brand drugs and would have also purchased brand drugs absent Ranbaxy's alleged wrongdoing.

Plaintiffs have provided evidence sufficient to create a genuine dispute as to whether Ranbaxy's activities caused brand purchasers to pay higher drug prices due to delayed generic entry. Plaintiffs' experts have proffered opinions that Ranbaxy's alleged delays allowed brand manufacturers to avoid the competitive pressure of generics for longer than would have otherwise been possible. As the defendants point out, plaintiffs' expert suggests that the cross-price elasticity of demand between brand and generic drugs is low. Low **[**24]** is not, however, the same as nonexistent. Other courts have countenanced recovery based upon similar theories. See *In re Nexium (Esomeprazole) Antitrust Litig., 296 F.R.D. 47, 56 (D. Mass. 2013)* (recognizing entry of generic drug would result in price decline of both brand and generic); *Teva Pharms. USA, Inc. v. Abbott Lab'ys, 252 F.R.D. 213, 228 (D. Del. 2008)* (considering brand-brand damages); *In re Niaspan Antitrust Litig., 397 F. Supp. 3d 668, 690 (E.D. Pa. 2019)* (same).

Thus, while brand-brand injuries rest upon transactions outside the generic markets in which Ranbaxy participated, its alleged anticompetitive behavior may still have caused damages to these plaintiffs. Plaintiffs have presented sufficient evidence of those damages to survive defendants' motion for summary judgment.

6. Partial Summary Judgment on Damages

Ranbaxy urges that the defendants are entitled to partial summary judgment based upon four alleged errors in the damages methodology used by plaintiffs. Those errors purportedly do not implicate a genuine dispute of material fact.

a. Damages for generic Nexium purchases

Three nationwide RICO classes of EPPs have been certified by this Court, one for each of the pharmaceuticals at issue. For Diovan and Valcyte, the classes include EPPs who purchased, paid or provided reimbursement for the relevant drug and/or AB-rated generic versions of the drug from the defendants during the relevant class **[**25]** period. In contrast, the Nexium class includes only those EPPs who purchased, paid or provided reimbursement for the AB-rated generic version of the drug, not the brand drug. As a result, plaintiffs' damages expert did not factor in brand rebates on purchases of Nexium in her calculation of damages, in contrast to her calculations for Diovan and Valcyte.

Claiming that neither plaintiffs nor their damages experts provides any justification for the inconsistency, defendants contend that the proffered calculations exaggerate the damages of Nexium EPPs because they do not account for rebates from brand manufacturers. At the hearing on the motion, defendants proposed that the Nexium EPPs were actually better off as a result of Ranbaxy's alleged anti-competitive conduct because brand Nexium prices were lower than generic prices. Defendants argued that the delayed market entry of generic Nexium therefore saved class members money.

The problem with defendants' contention is that the class definition excludes EPPs who purchased brand Nexium and, thus, excludes EPPs who received the rebates at **[*473]** issue. Defendants' reliance on *Los Angeles Mem'l Coliseum Comm'n v. Nat'l Football League, 791 F.2d 1356 (9th Cir. 1986)*, is misplaced. In that case, the Ninth Circuit Court of Appeals found **[**26]** that:

> plaintiff's gross recovery for the antitrust violation must be reduced by any benefits that plaintiff would not have received had there been no anticompetitive conduct by the defendant.

791 F.2d at 1366. In that case, however, plaintiffs were the parties who benefited from the supposed misconduct. Here, in contrast, the EPPs who benefited from the subject rebates are excluded from the relevant class. These rebates are, thus, simply irrelevant. To conclude otherwise would create an untenable disconnect between the plaintiffs' case for liability and their case for damages. See *Comcast Corp. v. Behrend, 569 U.S. 27, 35, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* (citations omitted).

b. Manufacturers launching generic Diovan in September, 2012

Plaintiffs allege that, but for Ranbaxy's illegal and anticompetitive behavior, generic Diovan could have been marketed as early as September, 2012. Based on that timeline, plaintiffs' experts calculate the damages for two but-for scenarios, one in which three manufacturers would have launched generic Diovan between September, 2012 and April, 2013, and another in which at least five generic manufacturers would have launched the drug in September, 2012. Defendants take issue with the latter scenario, asserting that plaintiffs have not proffered **[**27]** evidence sufficient to conclude that five generic manufacturers would have been able to launch the pharmaceutical at that time.

"Expert testimony without...a factual foundation cannot defeat a motion for summary judgment." *In re Nexium (Esomeprazole) Antitrust Litig., 42 F. Supp. 3d. at 248* (citations omitted). Testimony, including the testimony of expert witnesses, can, however, be based on "probable and inferential as well as direct and positive proof." *In re Asacol Antitrust Litig., 323 F.R.D. 451, 488 (D. Mass. 2017)*, rev'd and remanded, *907 F.3d 42 (1st Cir. 2018)*. "Any other rule would...be an inducement to make wrongdoing so effective and complete in every case as to preclude any recovery, by rendering the measure of damages uncertain." *Bigelow v. RKO Radio Pictures, 327 U.S. 251, 264, 66 S. Ct. 574, 90 L. Ed. 652 (1946)*.

Plaintiffs appropriately rely on such probable and inferential evidence, the only kind of evidence available given the counterfactual under consideration, and defendants do not substantively refute their logic. In fact, the defendants' own uncertainty regarding the precise number of market entrants in the but-for world highlights the genuine dispute as to this issue, which renders it unsuitable for resolution on a motion for summary judgment. Moreover, this is not a circumstance in which the plaintiffs' logic

> rest[s] solely on an expert's bottom line conclusion, without some underlying facts and reasons, **[**28]** or a logical inference process to support the expert's opinion.

In re Nexium (Esomeprazole) Antitrust Litig., 42 F. Supp. 3d at 248. Rather, plaintiffs have supplied sufficient evidence regarding the interest of other generic manufacturers in producing generic Diovan before, during and after Ranbaxy's alleged anticompetitive behavior, to survive defendants' motion for summary judgment.

c. Brand-generic damages after actual generic entry date

Plaintiffs' damages calculations include brand-generic overcharges after generics entered the market. They allege **[*474]** that the conversion from the brand to generic product is not immediate and that Ranbaxy's anticompetitive practices delayed the conversion. The defendants take issue with this logic, suggesting that the plaintiffs cannot show that Ranbaxy's conduct prevented them from purchasing generics once they had come to market and, more specifically, that the difference in the generic volume between the actual world and but-for world was caused by Ranbaxy's alleged activity.

Defendants do not substantively address the plaintiffs' rebuttal that it can take several months, or more, for generic substitutes to penetrate the market fully and for brand prices to stabilize after generics are introduced. While plaintiffs **[**29]** were, of course, theoretically able to purchase generics once they became available, there is a genuine dispute of material fact as to whether Ranbaxy's alleged behavior resulted in artificially inflated drug prices even after there were generic options in the market. See, e.g., *In re Nexium (Esomeprazole) Antitrust Litig., 296 F.R.D. 47, at 55-56 (D. Mass. 2013)* (noting that brand erosion after generic entry is generally accepted to increase over time).

d. Overcharges for indirect purchasers

Finally, defendants allege that, even among the DPPs, very few members of the plaintiff classes purchased the drugs at issue directly from Ranbaxy. Ranbaxy avers that, under precedent stemming from *Hanover Shoe Inc. v. United Shoe Mach. Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*, those indirect purchasers can recover only based upon their net injuries, rather than from alleged overcharges at the time of purchase. Plaintiffs base their damages calculations upon those alleged overcharges which are higher than net injuries because plaintiffs passed along at least some of the super-competitive pricing to customers.

The proposition that indirect purchasers removed from an antitrust violator in a distribution chain may not seek damages against the alleged wrongdoer, see *Illinois Brick Co. v. Illinois, 431 U.S. 720, 746-747, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, is, however, inapposite to the case at hand. Plaintiffs here do not seek damages based upon overcharges **[**30]** extracted by Ranbaxy directly but rather by other manufacturers that benefited from Ranbaxy's alleged malfeasance. In such circumstances, the distribution link between the defendants and plaintiffs is irrelevant because purchasers are "neither direct nor indirect purchasers." *In re Namenda Direct Purchaser Antitrust Litig., 331 F. Supp. 3d 152, 212 (S.D.N.Y. 2018)*; see also *In re Loestrin 24 Fe Antitrust Litig., No. 1:13-MD-2472, 2019 U.S. Dist. LEXIS 118308, 2019 WL 3214257, at *8-10 (D.R.I. July 2, 2019)*.

Moreover,

> [o]vercharges, the difference between the actual price and the presumed competitive price multiplied by the quantity purchased, provide what the Supreme Court has long recognized as the principal measure of damages for plaintiffs injured as customers, rather than as competitors.

In re Relafen Antitrust Litig., 218 F.R.D. 337, 344 (D. Mass. 2003) (quotations and citations omitted). Courts have countenanced such damages based upon overcharges when the injury stems alleged from delayed generic entry. See *In re Nexium (Esomeprazole) Antitrust Litig., 42 F. Supp. 3d 231, 296-297 (D. Mass. 2014)*, aff'd, *842 F.3d 34 (1st Cir. 2016)* ("[T]his Court discerns no requirement that antitrust damages be demonstrated only by "lost profit" methodologies.); *In re Solodyn, 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *10*; *In re Loestrin 24 Fe Antitrust Litig., 2019 U.S. Dist. LEXIS 118308, 2019 WL 3214257, at *5 n.10*. The cases cited by Ranbaxy for the proposition **[*475]** that antitrust plaintiffs may recover only to the extent of net injuries are unconvincing on this point because they concern competitors seeking lost profits, rather than overcharges.

B. Plaintiffs' Motion for Partial Summary Judgment

Plaintiffs seek partial summary judgment to preclude **[**31]** defendants from relitigating issues allegedly decided in prior litigation between Ranbaxy and the FDA ("the *Burwell* litigation"). See *Ranbaxy Lab'ys, Ltd. v. Burwell, 82 F. Supp. 3d 159, 181 (D.D.C. 2015)*. In that litigation, Ranbaxy sought to invalidate the 2014 decisions of the FDA rescinding tentative approvals of the ANDAs for Ranbaxy's Nexium and Valcyte. After Ranbaxy unsuccessfully moved for a temporary restraining order, the FDA moved for summary judgment. In a thorough opinion, United States District Judge Beryl A. Howell of the District of Columbia granted the FDA's motion for summary judgment. Although Ranbaxy initially appealed that decision, it later withdrew its appeal before it was decided.

Issue preclusion, also known as collateral estoppel, "bars parties from relitigating issues of either fact or law that were adjudicated in an earlier proceeding." *Vargas-Colón v. Fundación Damas, Inc., 864 F.3d 14, 25 (1st Cir. 2017)* (citation omitted); see also *Taylor v. Sturgell, 553 U.S. 880, 892, 128 S. Ct. 2161, 171 L. Ed. 2d 155 (2008)*. The doctrine may be used defensively, to prevent plaintiffs from asserting a previously litigated claim against the defendant, or offensively, to foreclose the defendant from re-litigating an issue that it previously lost. See *Parklane Hosiery Co., Inc. v. Shore, 439 U.S. 322, 326 n.4, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979)*. Offensive use of issue preclusion does, however, raise concerns of fairness. See *Enica v. Principi, 544 F.3d 328, 337 (1st Cir. 2008)*. Application is non-mutual where "the party asserting preclusion **[**32]** was not a party to the prior case." *Brown v. Colegio de Abogados de Puerto Rico, 613 F.3d 44, 48 (1st Cir. 2010)*. Non-mutual offensive issue preclusion, the variety of preclusion plaintiffs seek to apply here, "historically spawned the greatest misgivings among jurists." *Acevedo-Garcia v. Monroig, 351 F.3d 547, 573 (1st Cir. 2003)*. See generally *Parklane Hosiery, 439 U.S. at 329-31 (1979)*. Despite these concerns, the Supreme Court has granted district courts broad discretion to apply non-mutual offensive issue preclusion. See *id. at 331*.

Federal common law provides the standard with which to assess the applicability of issue preclusion in this case because the prior litigation was adjudicated by a federal district court. See *Negron—Fuentes v. UPS Supply Chain Solutions, 532 F.3d 1, 7 (1st Cir. 2008)*. Thus, "[i]ssue preclusion requires that (1) both proceedings involve[] the same issue of law or fact, (2) the parties actually litigated that issue [in the prior proceeding], (3) the prior court decided that issue in a final judgment, and (4) resolution of that issue was essential to judgment on the merits." *Global NAPs, Inc. v. Verizon New Eng. Inc., 603 F.3d 71, 95 (1st Cir. 2010)*. "Collateral estoppel is not limited to ultimate issues: necessary intermediate findings can now be used to preclude relitigation," *Rodriguez-Garcia v. Miranda-Marin, 610 F.3d 756, 771 (1st Cir. 2010)* (quoting *Biggins v. Hazen Paper Co., 111 F.3d 205, 210 (1st Cir.1997)* (emphasis original)); see also *Restatement (Second) of Judgments § 27, cmt. j*. Litigants are not, however, precluded from relitigating an issue if it came "under consideration only collaterally or incidentally." *Norton*

v. Larney, 266 U.S. 511, 517, 45 S. Ct. 145, 69 L. Ed. 413 (1925); see also C. Wright, A. Miller, **[**33]** & E. Cooper, **[*476]** Federal Practice and Procedure § 4421 (2d ed. 2002). "Under modern preclusion doctrine, the central question is whether a party has had a full and fair opportunity for judicial resolution of the same issue." Manganella v. Evanston Ins. Co., 700 F.3d 585, 591 (1st Cir. 2012).

Plaintiffs seek to preclude Ranbaxy from contradicting or relitigating the following facts:

(1) By regulation and policy, the FDA conditions tentative approval on a finding of compliance with the current good manufacturing practices;

(2) The FDA did not alter that policy when it granted tentative approval to Ranbaxy's ANDAs;

(3) As of June 19, 2007 and based on information provided by Ranbaxy, the FDA's compliance staff believed that the compliance issues at Paonta Sahib had been resolved and therefore recommended tentative approval for two applications; for later applications, the FDA relied on earlier approvals to recommend tentative approval despite the compliance hold;

(4) The FDA's mistakes in granting tentative approval were caused in substantial part by Ranbaxy's malfeasance (including taking one year to turn over necessary audit reports, providing summaries that deceived the FDA into believing, as of June 19, 2007, that compliance issues at Paonta Sahib had been **[**34]** resolved, concealing the extent of Ranbaxy's non-compliance, and affirmatively interfering with the FDA's ability to recognize and rectify its mistakes);

(5) The Medicare Modernization Act provides a forfeiture mechanism with respect to exclusivity to prevent first applicants from "parking" their exclusivity rights, creating a bottleneck and stopping low-cost generic drugs from reaching the market; and

(6) The letters of August 10, 2012 and November 4, 2014, sent pursuant to the consent decree, allowed the FDA to resume consideration of whether Ranbaxy's ANDAs were eligible for approval but did not evaluate Ranbaxy's eligibility for tentative approval.

Prior to addressing the applicability of issue preclusion to each of these facts individually, however, defendants contend that issue preclusion is entirely unavailable to plaintiffs due to fundamental differences between the prior litigation and the instant case. More specifically, defendants argue that issue preclusion is inappropriate because: (1) Ranbaxy bore the burden of proof in the prior litigation, whereas plaintiffs bear the burden here, (2) the standard of review applied in the earlier case was more deferential to the FDA's view **[**35]** of the facts and law than the applicable standard of review here, and (3) Ranbaxy's procedural opportunities to develop the administrative record and take discovery in the prior litigation were severely limited.

Each of these objections and the precedent upon which they rely stem from

> the well-established principle that failure to carry a higher standard of proof on an issue does not preclude a subsequent attempt to satisfy a lower standard as to the same issue.

Fed. Practice and Procedure § 4422. Thus, Ranbaxy generally should not be foreclosed from relitigating an issue if it had the burden of proof in the prior litigation and that burden has shifted away from it in the subsequent litigation, see Medtronic, Inc. v. Mirowski Fam. Ventures, LLC, 571 U.S. 191, 200, 134 S. Ct. 843, 187 L. Ed. 2d 703 **[*477]** (2014), the applicable standard of review is more demanding in the second action, see FPL Energy Maine Hydro LLC v. F.E.R.C., 551 F.3d 58, 64 (1st Cir. 2008), or defendants may benefit from substantial differences in the availability or admissibility of evidence, see Worcester v. Comm'r, 370 F.2d 713, 717 (1st Cir. 1966). See generally Fed. Practice and Procedure § 4422; Restatement (Second) of Judgments § 28(4). In each of these circumstances, courts have recognized that there are sufficient differences between the relevant cases that the defendant did not have previously "a full and fair opportunity for judicial resolution of the same issue." Rodríguez—García, 610 F.3d at 771 (quoting Fiumara v. Fireman's Fund Ins. Cos., 746 F.2d 87, 92 (1st Cir. 1984)).

The **[**36]** first two of these considerations weigh heavily in favor of Ranbaxy.

In the Burwell litigation, Ranbaxy bore the burden of proving that the rescission by the FDA of tentative approvals for its Nexium and Valcyte ANDAs was "arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law," 5 U.S.C. § 706(2)(A), "in excess of statutory jurisdiction, authority, or limitations, or short of statutory right," id. *§ 706(2)(C)*, or "without observance of procedure required by law," id. *§ 706(2)(D)*; see *Otis Elevator Co. v. Sec'y of Labor, 762 F.3d 116, 120-21, 412 U.S. App. D.C. 116 (D.C. Cir. 2014)*. Here, in contrast, the plaintiffs bear the burden. Ranbaxy failed to satisfy its burden in the prior litigation but that does not require a finding that plaintiffs will satisfy their burden here. Thus, preclusion is unavailable in these circumstances because its application might inappropriately expand the holdings of the original court. See, e.g., *Clarke v. Spencer, 585 F. Supp. 2d 196, 207 (D. Mass. 2008)* ("[D]ifferences in burdens of proof also preclude application of collateral estoppel."), aff'd, *582 F.3d 135 (1st Cir. 2009)*.

The relevant standards of review in these cases are also readily distinguishable. The FDA in *Burwell* had to prove only there was a rational basis for its action and the Court deferred to the FDA's view of the facts. In contrast, this Court is not required to defer to plaintiffs' facts, **[**37]** nor can they succeed by a showing of mere rationality. Rather, plaintiffs must demonstrate that their allegations are more likely true than not true. Correspondingly, Ranbaxy's burden in this case is much lower than in the *Burwell* litigation because it need demonstrate only that its contentions are as plausible as those of the plaintiffs. Preclusion is inappropriate in such circumstances. *Cinelli v. City of Revere, 820 F.2d 474, 479-480 (1st Cir. 1987)* (recognizing an exception to collateral estoppel where the party against whom preclusion is sought had a significantly heavier burden of persuasion the first time around).

Plaintiffs rely upon *Bath Iron Works Corp. v. Dir., Office of Worker's Comp. Programs, 125 F.3d 18 (1997)* for the proposition that shifting the burden of proof does not necessarily defeat the application of issue preclusion in a subsequent case. The Court agrees but notes that the decision in that case blends the analysis of applying issue preclusion in the context of different burdens of proof and standards of review. The *Bath Iron Works* decision is, however, markedly different from the case at hand. First, the party seeking issue preclusion in the second adjudication in *Bath Iron Works* was a party to the prior litigation, as was the defendant. Morever, issue preclusion was asserted defensively in *Bath Iron Works*. To the contrary, plaintiffs here seek to apply **[**38]** non-mutual offensive issue preclusion. While neither of these elements is dispositive, both non- **[*478]** mutuality and the offensive application of issue preclusion is treated with greater caution than the variety of issue preclusion at issue in Bath Iron Works. See *Acevedo-Garcia, 351 F.3d at 573*.

Relatedly, the party in *Bath Iron Works* seeking to avoid issue preclusion bore the burden of proof in the second action. In essence, the plaintiff in the second case was seeking a second bite at the apple on his claim, which had already been decided. The situation here is different: Ranbaxy opposes issue preclusion but plaintiffs bear the burden of proof. It is also relevant to note that the example provided by the court in *Bath Iron Works* of circumstances in which collateral estoppel may be denied, i.e. "where the victor in the first case has a greater burden in the second," is just that, an example. *125 F.3d at 21*. Plaintiffs inaccurately portray that example as dispositive.

The Court is also not convinced that Ranbaxy had a full and fair opportunity to litigate the facts upon which plaintiffs seek preclusion because the *Burwell* court made clear that, in assessing whether the FDA's rescission was arbitrary and capricious, it

> need not and ought not engage in lengthy fact finding, **[**39]** since generally speaking, district courts reviewing agency action under the APA's arbitrary and capricious standard do not resolve factual issues, but operate instead as appellate courts resolving legal questions

Ranbaxy Lab'ys, Ltd. at 181 (D.D.C. 2015) (internal quotation and citations omitted). The *Burwell* court assessed the FDA's decision only "for a rational connection between the facts found and the choice made" and granted broad discretion to the facts as found by the FDA. *Id. at 184* (citation omitted). Plaintiffs attempt to rebut the relevancy of that discretion by asserting that this Court would approach the FDA's determinations with the same deference as the *Burwell* court. However, due to that deference, a question remains as to whether the Burwell court actually decided the facts upon which the plaintiffs now seek preclusion, as required under the relevant standard to determine the application of issue preclusion described above.

More generally, the Court is unpersuaded that the issues upon which the plaintiffs seek issue preclusion are those addressed by the decision in Burwell. See Federal Practice and Procedure § 4422 (1981) ("As with all matters of issue preclusion, it remains important to make sure that the same issue is involved."); **[**40]** *Galen Hosp. Alaska, Inc. v. Azar, 474 F. Supp. 3d 214, 227-228 (D.D.C. 2020)*. The plaintiffs seek to interpret each factual finding in the *Burwell* decision as an independent issue that was necessary to the ultimate conclusion for the purpose of issue preclusion. In opposition, Ranbaxy would have this Court confine the import of that opinion to its holding that the rescission of Ranbaxy's ANDAs was not arbitrary and capricious.

Although the Court has not located relevant precedent regarding application of issue preclusion in the wake of a district court's analysis as to whether a determination of an administrative agency was "arbitrary and capricious," the decision of the Ninth Circuit Court of Appeals in *Resolution Trust Corporation v. Keating, 186 F.3d 1110 (9th Cir. 1999)*, lends support to narrowly prescribing the impact of such a determination. There, the plaintiff sought to attach preclusive effect to the factual findings of a district court that had previously reviewed whether the rulings of the Federal Home Loan Board were arbitrary and capricious. The Appeals Court declined to ascribe preclusive effect to those findings, concluding that the only determination necessary to the outcome of the prior litigation concerned whether the agency's action was arbitrary and capricious **[*479]** and, thus, that it was only that determination that could **[**41]** support the application of issue preclusion. See *id. at 1116*. The Court reaches the same conclusion here.

ORDER

For the foregoing reasons,

1. the motion of defendants for summary judgment as to Direct Purchaser Plaintiffs (Docket No. 414) is **DENIED**;

2. the motion of defendants for summary judgment as to End Payor Plaintiffs (Docket No. 415) is **DENIED**; and

3. the motion of plaintiffs for partial summary judgment (Docket No. 417) is **DENIED**.

So ordered.

Prior History: **[**1]** On Appeal from the United States District Court for the Eastern District of New York.

The plaintiffs-appellants are commercial merchants that sought monetary and injunctive relief under both federal and California antitrust laws against the defendants-appellees—American Express Travel Related Services Co., Inc., and American Express Co.—alleging that the appellees' anti-steering rules caused merchant fees to rise across the market. The appellants do not accept American Express cards and therefore proceeded under an "umbrella" theory of liability. The district court considered the four "efficient enforcer" factors, concluded that the appellants lacked antitrust standing, and dismissed the claims. The appellants challenge that holding, arguing that the four efficient-enforcer factors support antitrust standing for the "umbrella" plaintiffs in this case.

We disagree. The efficient-enforcer factors structure a proximate cause analysis according to which there must be a sufficiently close relationship between the alleged injury and the alleged antitrust violation to establish antitrust standing. Here, that relationship is lacking. After considering the efficient-enforcer factors and the relevant **[**2]** state laws, we AFFIRM.

In re Am. Express Anti-Steering Rules Antitrust Litig., 433 F. Supp. 3d 395, 2020 U.S. Dist. LEXIS 7095, 2020 WL 227425 (E.D.N.Y., Jan. 14, 2020)

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN1[] **Standing, Requirements**

To determine whether a party can sue under the antitrust laws—whether the party has antitrust standing—the appellate court applies the efficient enforcer test. In cases of economic harm, proximate cause is demarcated by the first step rule, which limits liability to parties injured at the first step of the causal chain of the defendants' actions.

Banking Law > Consumer Protection > Credit Card Agreements > Liability for Accounts & Transactions

HN2[] **Credit Card Agreements, Liability for Accounts & Transactions**

No credit-card transaction can occur unless both the merchant and the cardholder simultaneously agree to use the same credit-card network.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Standards of Review, De Novo Review**

The appellate court reviews a district court's grant of a motion to dismiss de novo, accepting as true all factual claims in the complaint and drawing all reasonable inferences in the plaintiff's favor.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN4[] **Clayton Act, Claims**

The Clayton Act provides a private right of action for injuries by reason of anything forbidden in the antitrust laws, 15 U.S.C.S. § 15(a).

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN5[] **Standing, Clayton Act**

It is a well-established principle that, while the United States is authorized to sue anyone violating the federal antitrust laws, a private plaintiff must demonstrate standing. Antitrust standing is a threshold, pleading-stage inquiry and that when a complaint by its terms fails to establish this requirement the appellate court must dismiss it as a matter of law. This requirement prevents private plaintiffs from recovering damages under the Clayton Act merely by showing injury causally linked to an illegal presence in the market.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN6[] **Remedies, Damages**

To demonstrate antitrust standing, a private plaintiff must show both that (1) it suffered a special kind of antitrust injury and that (2) it is a suitable plaintiff to pursue the alleged antitrust violations and thus is an efficient enforcer of the antitrust laws. Whether a plaintiff is an efficient enforcer depends on the four factors the Supreme Court identified in AGC. Those factors are (1) the directness or indirectness of the asserted injury; (2) the existence of more direct victims or the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement; (3) the extent to which the claim is highly speculative; and (4) the importance of avoiding either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other. The weight to be given the various factors will necessarily vary with the circumstances of particular cases.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN7[] **Remedies, Damages**

The first efficient-enforcer factor asks whether the violation was a direct or remote cause of the injury. This factor turns on familiar principles of proximate causation. Proximate cause stands for the proposition that the judicial remedy cannot encompass every conceivable harm that can be traced to alleged wrongdoing. It encompasses the judicial tools used to limit a person's responsibility for the consequences of that person's own acts and reflects ideas of what justice demands, or of what is administratively possible and convenient. This principle limits antitrust liability beyond a certain point. Given the ripples of harm that antitrust violations may have in the economy, the Supreme Court has said that it is reasonable to assume that Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN8[] Clayton Act, Claims

In the context of antitrust standing, proximate cause generally follows the first-step rule. When the Clayton Act was enacted, the Supreme Court has explained, Congress understood the judicial gloss expressed by Justice Holmes: The general tendency of the law, in regard to damages at least, is not to go beyond the first step. The first-step rule requires some direct relation between the injury asserted and the injurious conduct alleged. Under the rule, injuries that happen at the first step following the harmful behavior are considered proximately caused by that behavior. Accordingly, directness in the antitrust context means close in the chain of causation. The Supreme Court's interpretation of § 4 has adhered to Justice Holmes' observation that the general tendency of the law, in regard to damages at least, is not to go beyond the first step.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN9[] Standing, Requirements

The second efficient-enforcer factor considers the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement. For this factor, we ask whether denying the plaintiff a remedy on the basis of its allegations is likely to leave a significant antitrust violation undetected or unremedied. The presence of plaintiffs who are better situated to vindicate the antitrust laws, though not dispositive, is relevant to this second factor. The existence of such plaintiffs diminishes the justification for allowing a more remote party to perform the office of a private attorney general.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Torts > Remedies > Damages > Proof

HN10[] Standing, Clayton Act

The third efficient-enforcer factor concerns the extent to which the claim is highly speculative. Highly speculative damages is a sign that a given plaintiff is an inefficient engine of enforcement. Under this factor, the appellate court asks whether there would be a high degree of speculation in a damages calculation. When an injury is derivative rather than direct, the potential recovery is often highly speculative. The appellate court also considers whether the alleged effects on the plaintiff may have been produced by independent factors.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN11[] **Standing, Clayton Act**

The four efficient-enforcer factors need not be given equal weight, and the relative significance of each factor will depend on the circumstances of the particular case. In particular, the Supreme Court has noted that the potential difficulty in ascertaining and apportioning damages is not an independent basis for denying standing where it is adequately alleged that a defendant's conduct has proximately injured an interest of the plaintiff's that the statute protects because this factor is a touchstone for the proximate-cause requirement.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Torts > Procedural Matters > Multiple Defendants > Distinct & Divisible Harms

HN12[] **Standing, Clayton Act**

The fourth efficient-enforcer factor stresses the importance of avoiding either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other. This factor reflects an administrative concern: massive and complex damages litigation not only burdens the courts, but also undermines the effectiveness of treble-damages suits. The concern arises when the damages to which the plaintiff lays claim are exactly the same damages other parties could have claimed.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Torts > ... > Causation > Proximate Cause > Foreseeability of Harm

HN13[] **Standing, Clayton Act**

While the fourth factor addresses a strong interest in keeping the scope of complex antitrust trials within judicially manageable limits, the efficient-enforcer inquiry remains, fundamentally, one into proximate cause.

Governments > Courts > Judicial Precedent

HN14[] **Courts, Judicial Precedent**

The appellate court considers the language of the state intermediate appellate courts to be helpful indicators of how the state's highest court would rule.

Opinion by: MENASHI

Opinion

[*134] MENASHI, *Circuit Judge*:

The appellants, on behalf of a class of commercial merchants, allege that the Anti-Steering Rules promulgated by the appellees, the American Express Company and American Express Travel Related Services Company, Inc. (together, "Amex"), violate the antitrust laws.

The appellants do not accept American Express cards but claim to be harmed by Amex's policies nevertheless. These merchants "seek monetary and injunctive relief for overcharges paid to Visa, MasterCard, and Discover," not to Amex, "caused by Amex's imposition of 'Anti-Steering Rules' in its agreements with merchants who accept Amex cards." Appellants' **[**3]** Br. 1-2. The appellants claim that "Amex's Anti-Steering Rules have stifled interbrand competition throughout the relevant market, causing the credit card transaction fees charged to Appellants by Visa, MasterCard, and Discover to prevail at supracompetitive levels under Amex's pricing umbrella." *Id.* at 2.

The U.S. District Court for the Eastern District of New York (Garaufis, J.) dismissed the appellants' claims under *Federal Rule of Civil Procedure 12(b)(6)* and ruled that the class lacked antitrust standing because it did not include "efficient enforcers" of the antitrust laws relative to Amex's challenged anticompetitive conduct. *In re Am. Express Anti-Steering Rules Antitrust Litig., 433 F. Supp. 3d 395, 407-13 (E.D.N.Y. 2020)*. The appellants "seek reversal of the district court's dismissal of their claims because Amex's anticompetitive conduct has directly injured them, and recognizing their standing would ensure efficient enforcement of the antitrust laws." Appellants' Br. 2. Amex contends that the district court was correct that the appellants "lack antitrust standing because they are not efficient enforcers" of the antitrust laws and the alleged damages are "too indirect" and "speculative." Appellees' Br. 3-4.

We affirm the district court's judgment. ***HN1***[] To determine whether a party can sue under the antitrust laws—whether **[**4]** the party has "antitrust standing"—we apply the "efficient enforcer" test. The efficient-enforcer test is an elaboration on the proximate cause requirement of *Associated General Contractors of California, Inc. v. California State Council of Carpenters (AGC), 459 U.S. 519, 535-36, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. In cases of economic **[*135]** harm, proximate cause is demarcated by the "first step" rule, which limits liability to parties injured at the first step of the causal chain of the defendants' actions. *See id. at 534*. Here, at the first step, Amex restrained trade to raise its own prices; only later did its competitors follow suit. Because the appellants were harmed at that later step, the claims here fail the first-step test. After considering the four *AGC* factors, we conclude that—taking the allegations of the complaint as true—the appellants are not efficient enforcers of the antitrust laws and therefore lack antitrust standing.

BACKGROUND[1]

The appellants challenge Amex's Anti-Steering Rules, or what Amex calls its non-discrimination provisions, contained in its Card Acceptance Agreement with merchants. The appellants allege that "Amex's Anti-Steering

[1] For purposes of this appeal, we accept as true all facts alleged in the second amended complaint ("SAC"). *Henry v. County of Nassau, 6 F.4th 324, 328 (2d Cir. 2021)*.

Rules unreasonably restrain interbrand price competition with the other major [credit card] networks because the Rules: (1) stifle interbrand competition among the networks; (2) impose supracompetitive **[**5]** merchant fees, without corresponding offsetting credit card user economic benefits; (3) cause the overall price of credit card transactions to rise above competitive levels marketwide, because the other credit card networks would not benefit competitively by reducing their merchant fees; and (4) raise consumer retail prices throughout the economy, thereby reducing output." Appellants' Br. 4; *see also* *Am. Express Anti-Steering, 433 F. Supp. 3d at 401*.

I

The credit card industry is divided among four competing networks: Amex, Visa, MasterCard, and Discover. *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2282, 201 L. Ed. 2d 678 (2018)*. The market is characterized by high barriers to entry. New entrants face a "chicken-and-egg" problem because "merchants value a payment system only if a sufficient number of cardholders use it and cardholders value a payment card only if a sufficient number of merchants accept it."[2]

Credit card networks such as Amex "operate what economists call a 'two-sided platform,'" which "offers different products or services to two different groups who both depend on the platform to intermediate between them." *Ohio, 138 S. Ct. at 2280*.[3] Amex provides credit-card services to both "merchants," who accept Amex as payment, "and cardholders," **[**6]** who use Amex to make payments. *Ohio, 138 S. Ct. at 2279-80*. ***HN2***[] Both parties are necessary; "no credit-card transaction can occur unless both the merchant and the cardholder simultaneously agree to use the same credit-card network." *Id. at 2280*.

While credit card companies often charge cardholders an annual fee, all credit card companies charge merchants a fee for every transaction processed.[4] According **[*136]** to the appellants, Amex charges higher merchant fees than its competitors. To avoid the higher fees, merchants—in the absence of any restraint prohibiting the practice—might "steer" their customers toward using another form of payment. "Steering" could be done in different ways, such as simply by asking, offering benefits for using other payment methods, or imposing a surcharge on the use of Amex cards.[5]

Steering allows for price signals between merchant and customer. Without steering, "consumers do not internalize the full costs of their choice of payment system."[6] Steering also may prevent Amex from charging higher fees because merchants will steer customers toward cards with lower **[**7]** fees. In sum, "American Express dislikes steering; the merchants like it; and the shoppers may benefit from it, whether because merchants will offer them incentives to use less expensive cards or in the form of lower retail prices overall." *Ohio, 138 S. Ct. at 2292* (Breyer, J., dissenting).

Amex has discouraged steering by inserting anti-steering provisions into its contracts with merchants. Pursuant to Amex's Anti-Steering Rules, merchants may not:

[3] *See also* D. Daniel Sokol, *Rethinking the Efficiency of the Common Law*, *95 Notre Dame L. Rev. 795, 803 (2019)* ("The value of the two-sided market (or platform) is the ability to make matches across both sides of the market.").

[4] *See* Timothy J. Muris, *Payment Card Regulation and the (Mis)application of the Economics of Two-Sided Markets*, *2005 Colum. Bus. L. Rev. 515, 522 (2005)*.

[5] *See* Klein et al., *supra* note 2, at 586-87.

[6] Adam J. Levitin, *Priceless? The Social Costs of Credit Card Merchant Restraints*, *45 Harv. J. on Legis. 1, 11 (2008)*; *see also id.* at 3 ("[S]ome consumers end up paying higher or lower prices for the transaction than they would have if the merchant charged prices that varied with the cost of accepting payment.").

• indicate or imply that they prefer, directly or indirectly, any Other Payment Products over Amex Cards;
• try to dissuade cardholders from using their Amex Card;
• criticize or mischaracterize the Amex Card or any of Amex's services or programs;
• try to persuade or prompt cardholders to use any Other Payment Products or any other method of payment (e.g., payment by check);
• impose any restriction, conditions, or disadvantages when the Card is accepted that are not imposed equally on all Other Payment Products, except for ACH funds transfer, cash, and checks;
• engage in activities that harm Amex's business or the American Express Brand (or both);

• or promote any Other Payment Products (except **[**8]** the Merchant's own private label card that they issue for use solely at their Establishments) more actively than the Merchant promotes Amex.

Am. Express Anti-Steering, 433 F. Supp. 3d at 404 (alterations omitted).

The appellants allege that these Anti-Steering Rules, when combined with Amex's higher merchant fees, have raised fees throughout the industry. Competing networks "have no economic incentive to compete in the market by offering lower merchant fees [because] merchants cannot educate cardholders and [steer] transactions to the cards with lower fees." Appellants' Br. 7. Because "lower-fee competitor[s] cannot gain market share" by competing on price, all competing networks raise prices. *Id.* This effect is widespread because "most large merchants, according to Plaintiffs, do accept Amex, meaning that the credit card companies would have little incentive to tailor contracts for relatively insignificant individual merchants who do not." *Am. Express Anti-Steering, 433 F. Supp. 3d at 415*.

[*137] II

The Anti-Steering Rules have been litigated for over a decade. Merchants have been filing suits since the 2000s. *See generally* Rite-Aid Corp. v. Am. Express Travel Related Servs. Co., 708 F. Supp. 2d 257, 260 (E.D.N.Y. 2010). "In October 2010, the Department of Justice and the attorneys general of eighteen states filed the Government Action against Amex, MasterCard, and Visa" challenging **[**9]** each company's version of the Anti-Steering Rules. *In re Am. Express Anti-Steering Rules Antitrust Litig.*, No. 08-CV-2315, 2016 U.S. Dist. LEXIS 3332, 2016 WL 748089, at *2 (E.D.N.Y. Jan. 7, 2016). "Visa and MasterCard entered into consent decrees with the Government on the same day that the Government Action was initiated. Only Amex remained as a defendant." 2016 U.S. Dist. LEXIS 3332, [WL] at *2 n.5. After a bench trial, the district court ruled for the government, concluding that it had shown by a preponderance of the evidence that the Anti-Steering Rules violated *§ 1 of the Sherman Act*. *United States v. Am. Express Co., 88 F. Supp. 3d 143, 238 (E.D.N.Y. 2015)*. Our court reversed that judgment, holding that the district court erred in not requiring the government to show harm to consumers "accounting for consumers on both sides of the platform." *United States v. Am. Express Co., 838 F.3d 179, 206-07 (2d Cir. 2016)*. The Supreme Court then affirmed. *Ohio, 138 S. Ct. at 2290*.

"Following the Supreme Court's affirmance of the dismissal of the Government Action, matters resumed in the [Merchant Plaintiff] Actions." *Am. Express Anti-Steering, 433 F. Supp. 3d at 405*. The merchant plaintiffs—including the appellants here—filed the SAC on December 17, 2018. The SAC sought monetary and equitable relief "on behalf of two putative classes: (1) a class of merchants who accept Amex cards ... (the 'Amex Class'); and (2) a class of merchants who do not accept Amex cards and who have no contract with Amex (the 'Non-Amex Class')." *Id. at 401*. Within both classes, subclasses of plaintiffs sought relief under California **[**10]** law. *Id. at 402, 405*.

On January 15, 2020, the district court ruled in Amex's favor. *Id. at 417*. It first granted Amex's motion to compel arbitration of the Amex Class's claims. *See id. at 405-07*. It then granted Amex's motion to dismiss the Non-Amex Class's claims. *See id. at 407-16*. Specifically, the district court held that "the Non-Amex Class has not established federal antitrust standing." *Id. at 413*. Applying the "efficient enforcer" test, *id. at 408*; *see* Balaklaw v. Lovell, 14 F.3d 793, 797 n.9 (2d Cir. 1994) (endorsing the efficient-enforcer test), the district court concluded that all four efficient-enforcer factors indicated that the appellants lacked antitrust standing. *Am. Express Anti-Steering, 433 F. Supp. 3d at 407-13*. For similar reasons, the district court concluded that the appellants lacked antitrust standing under California's Cartwright Act and Unfair Competition Law as well. *Id. at 413-16*. On May 14, 2020, the district court entered an order of partial final judgment pursuant to *Federal Rule of Civil Procedure 54(b)*. On June 8, 2020, the appellants timely appealed.

DISCUSSION

HN3[] "We review a district court's grant of a motion to dismiss *de novo*, accepting as true all factual claims in the complaint and drawing all reasonable inferences in the plaintiff's favor." *Henry, 6 F.4th at 328* (internal quotation marks omitted). The appellants argue that the district court erred when it dismissed their claims under the **[**11]** *Clayton Act* and under California ***antitrust law***. We address each claim in turn.

I

The appellants contend that the district court erred in dismissing their federal antitrust **[*138]** claim. ***HN4***[] The appellants brought that claim under the Clayton Act, which provides a private right of action for injuries "by reason of anything forbidden in the antitrust laws." *15 U.S.C. § 15(a)*. The district court dismissed the claim on the ground that the appellants lacked antitrust standing. *See* *Am. Express Anti-Steering, 433 F. Supp. 3d at 407-08*. We agree with the district court's conclusion.

HN5[] "It is a well-established principle that, while the United States is authorized to sue anyone violating the federal antitrust laws, a private plaintiff must demonstrate 'standing.'" *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 436 (2d Cir. 2005)*. We have explained that "[a]ntitrust standing is a threshold, pleading-stage inquiry" and that "when a complaint by its terms fails to establish this requirement we must dismiss it as a matter of law." *Gatt Commc'ns, Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 75 (2d Cir. 2013)* (quoting *NicSand, Inc. v. 3M Co., 507 F.3d 442, 450 (6th Cir. 2007)* (en banc)). This requirement "prevents private plaintiffs from recovering damages under" the Clayton Act "merely by showing injury causally linked to an illegal presence in the market." *Id. at 76* (internal quotation marks and alteration omitted).

HN6[] To demonstrate antitrust standing, a private plaintiff must show both that (1) "it suffered a special **[**12]** kind of antitrust injury" and that (2) "it is a suitable plaintiff to pursue the alleged antitrust violations and thus is an efficient enforcer of the antitrust laws." *Id.* (internal quotation marks omitted). Whether a plaintiff is an "efficient enforcer" depends on the four factors the Supreme Court identified in *AGC*. *459 U.S. at 540-45*. Those factors are (1) "the directness or indirectness of the asserted injury"; (2) "the existence of more direct victims" or the "existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement"; (3) the extent to which the claim is "highly speculative"; and (4) "the importance of avoiding either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other." *Id.; see also* *Gelboim v. Bank of Am. Corp., 823 F.3d 759, 772 (2d Cir. 2016)*. "[T]he weight to be given the various factors will necessarily vary with the circumstances of particular cases." *Daniel, 428 F.3d at 443*.

In this case, the appellants claim to have antitrust standing under a so-called "umbrella" theory. The classic "umbrella" scenario occurs when "[a] cartel cuts output, which elevates price throughout the market." *U.S. Gypsum Co. v. Ind. Gas Co., 350 F.3d 623, 627 (7th Cir. 2003)*. Because of that price umbrella, **[**13]** "customers of fringe firms (sellers that have not joined the cartel) pay this higher price, and thus suffer antitrust injury, just like customers of the cartel's members." *Id.* In other words, the umbrella theory "seeks to hold price-fixers liable for harm allegedly flowing from the illegal conduct even though the price-fixing defendants received none of the illegal gains and were uninvolved in their competitors' pricing decisions." *In re Coordinated Pretrial Proceedings in Petroleum Prods. Antitrust Litig., 691 F.2d 1335, 1339 (9th Cir. 1982)*. The appellant merchants in this case do not have a contractual relationship with Amex such that the Anti-Steering Rules apply to the appellants directly. Rather, the appellants argue that—as in a classic umbrella scenario—Amex's practices provide an umbrella under which the other credit card companies that do have a relationship with the appellants also raise prices.

[*139] The district court declined to determine whether the appellants had established an antitrust injury because it concluded that the appellants were not efficient enforcers of the antitrust laws and for that reason lacked antitrust standing. We likewise need not address antitrust injury. Because the four efficient-enforcer factors do not establish antitrust standing, we affirm the district court's **[**14]** judgment.

A

HN7[] The first efficient-enforcer factor asks whether "the violation was a direct or remote cause of the injury." *Gelboim, 823 F.3d at 772*. This factor turns on "familiar principles of proximate causation." *Lotes Co. v. Hon Hai Precision Indus. Co., 753 F.3d 395, 412 (2d Cir. 2014)*.

Proximate cause stands for the proposition that "the judicial remedy cannot encompass every conceivable harm that can be traced to alleged wrongdoing." *AGC, 459 U.S. at 536*. It encompasses "the judicial tools used to limit a person's responsibility for the consequences of that person's own acts" and "reflects ideas of what justice demands, or of what is administratively possible and convenient." *Holmes v. Sec. Inv. Prot. Corp., 503 U.S. 258, 268, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)* (internal quotation marks omitted). This principle limits antitrust liability beyond a certain point. Given the "ripples of harm" that antitrust violations may have in the economy, the Supreme Court has said that "[i]t is reasonable to assume that Congress did not intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business or property." *Blue Shield of Va. v. McCready, 457 U.S. 465, 476-77, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*. Therefore, "despite the broad wording of *§ 4 [of the Clayton Act]* there is a point beyond which the wrongdoer should not be held liable." *Id. at 477* (quoting *Ill. Brick Co. v. Illinois, 431 U.S. 720, 760, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)* (Brennan, J., dissenting)).

HN8[] In the context of antitrust standing, **[**15]** proximate cause generally follows the first-step rule. When the Clayton Act was enacted, the Supreme Court has explained, Congress understood "the judicial gloss" expressed by Justice Holmes: "The general tendency of the law, in regard to damages at least, is not to go beyond the first step." *AGC, 459 U.S. at 534* (quoting *S. Pac. Co. v. Darnell-Taenzer Lumber Co., 245 U.S. 531, 533, 38 S. Ct. 186, 62 L. Ed. 451 (1918)* (Holmes, J.)).[7] The first-step rule requires **[*140]** "some direct relation between the injury asserted and the injurious conduct alleged." *Bank of Am. Corp. v. City of Miami, 137 S. Ct. 1296, 1306, 197 L. Ed. 2d 678 (2017)* (quoting *Holmes, 503 U.S. at 268*). Under the rule, injuries that happen at the first step following the harmful behavior are considered proximately caused by that behavior. Accordingly, "[d]irectness in the antitrust context means close in the chain of causation." *Gatt Commc'ns, 711 F.3d at 78* (quoting *IBM Corp. v. Platform Sols., Inc., 658 F. Supp. 2d 603, 611 (S.D.N.Y. 2009)*). As Justice Stevens, the author of *AGC*, observed, the Supreme Court's "interpretation of *§ 4* has ... adhered to Justice Holmes' observation that the 'general tendency of the law, in regard

---

[7] In other words, the law "does not attribute remote consequences to a defendant," even if those consequences are foreseeable. *Darnell-Taenzer, 245 U.S. at 533*. Barring liability for foreseeable harms is not unusual. Such limits on liability can be found, for example, in the economic loss rule, *see* ***Akron Corp. v. M/T Cantigny, 706 F.2d 151, 153 (5th Cir. 1983)*** (noting that "a party may not recover for economic losses not associated with physical damages" so as "to prevent limitless liability for negligence and the filing of law suits of a highly speculative nature"); *see also* Restatement (Third) of Torts: Liab. for Econ. Harm § 1 cmt. c(1) (Am. L. Inst. 2020) (noting that one of the rationales for limiting tort liability for economic loss is that "[e]conomic losses proliferate more easily than losses of other kinds" even though such losses "may be at least generally foreseeable to the person who commits the negligent act"), and other limitations on liability for negligence, *see* *532 Madison Ave. Gourmet Foods, Inc. v. Finlandia Ctr., Inc., 96 N.Y.2d 280, 289, 750 N.E.2d 1097, 727 N.Y.S.2d 49 (2001)* ("Absent a duty running directly to the injured person there can be no liability in damages, however careless the conduct or foreseeable the harm."), and for negligent misrepresentation, *see* *Restatement (Third) of Torts: Liab. for Econ. Harm § 5 cmt. b* ("Liabilities that expand as easily as words travel would ... become indeterminate and unduly widespread in many cases."). Even when the law extends a right to recover for derivative injury—such as emotional distress from witnessing another's accident—that right is often confined to close relations and excludes others in ways unrelated to foreseeability. Robert L. Rabin, *Tort Recovery for Negligently Inflicted Economic Loss: A Reassessment*, *37 Stan. L. Rev. 1513, 1522 (1985)*. The "specter of collateral claims, virtually unlimited in number, as a result of any given accident"—not foreseeability—informs these limitations. *Id. at 1525*.

to damages at least, is not to go beyond the first step.'" *Verizon Commc'ns Inc. v. Law Offs. of Curtis V. Trinko, LLP, 540 U.S. 398, 417, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (Stevens, J., concurring in the judgment) (quoting *S. Pac. Co., 245 U.S. at 533*).

Our court has repeatedly followed the first-step rule in the antitrust context. In *Paycom Billing Services. v. MasterCard International,* ***[**16]*** *Inc.*, we held that a merchant, Paycom, did not suffer a direct injury from MasterCard's practice of forbidding its member banks from dealing with other card companies. *467 F.3d 283, 293 (2d Cir. 2006)*. Paycom's theory was that, absent that practice, MasterCard would have faced more competition from Discover and American Express, and it would have then adopted more favorable policies toward Paycom. *Id.* That was not enough to establish antitrust standing; we concluded that "any injury suffered by Paycom was indirect and flowed from the injuries suffered by Discover and American Express." *Id.* We similarly held that the injury suffered in *Gatt Communications* was indirect. *711 F.3d at 78-79*. In that case, Gatt Communications alleged that PMC Associates had formed a price-fixing conspiracy for the sale of Vertex radio equipment to government agencies, and when Gatt sought to defect, its "Dealer Agreement"—through which it was able to sell that brand of radio equipment in the first place—was terminated. *Id. at 71-73*. Gatt argued that it was entitled to damages for the commissions it would have received absent the anticompetitive conduct. *Id. at 74*. We held that Gatt was harmed "only incidentally" and that "[i]f there are direct victims of the alleged conspiracy, **[**17]** they are the state agencies, not Gatt." *Id. at 78-79*. Most recently, in *IQ Dental Supply, Inc. v. Henry Schein, Inc.*, we determined that IQ Dental Supply, though injured by a boycott of the third-party online portal through which IQ sold its goods, lacked antitrust standing to challenge that boycott. *924 F.3d 57, 65 (2d Cir. 2019)*. Because the harm to IQ "resulted from injury" to the third-party portal, the antitrust claims were "derivative and indirect." *Id.*

In this case, the appellants did not suffer a direct injury from the alleged antitrust violation. At the first step, Amex raised the price for Amex-accepting merchants through the Anti-Steering Rules. Amex did not raise the appellants' fees. Nor could it have: the appellants do not accept American Express cards. Similar to **[*141]** the holdings in *Gatt Communications* and *IQ Dental Supply*, if there are "direct victims," those victims are the merchants to which Amex's Anti-Steering Rules applied. *Gatt Commc'ns, 711 F.3d at 78-79*; *IQ Dental Supply, 924 F.3d at 65*. The appellants were allegedly injured when Amex's competitors, covered by Amex's price umbrella, raised their own prices. In the appellants' words, Amex's imposition of increased merchant fees "enabled" the competitor companies "to increase their own merchant fees." Appellants' Br. 10. **[**18]** Yet Amex "enabl[ing]" other credit card companies to raise the appellants' fees does not establish the "direct relation" between injury and antitrust violation that the first-step rule requires. *Bank of Am. Corp., 137 S. Ct. at 1306*.

Given the allegations in the SAC, we hold that the appellants' injuries did not occur at the first step following Amex's conduct. The injuries, therefore, were not proximately caused by Amex; the alleged antitrust violation was instead a "remote" cause of the injuries.

B

HN9[] The second efficient-enforcer factor considers the "existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement." *IQ Dental Supply, 924 F.3d at 65* (quoting *Daniel, 428 F.3d at 443*). For this factor, we ask whether "[d]enying the [plaintiff] a remedy on the basis of its allegations" is "likely to leave a significant antitrust violation undetected or unremedied." *AGC, 459 U.S. at 542*; *see also* *Paycom, 467 F.3d at 294*. "[T]he presence of plaintiffs who are better situated to vindicate the antitrust laws," though not dispositive, "is relevant to this second factor." *IQ Dental Supply, 924 F.3d at 66*. The existence of such plaintiffs "diminishes the justification for allowing a more remote party ... to perform the office of a private attorney general." *AGC, 459 U.S. at 542*.

This factor also **[**19]** counsels against antitrust standing here. In *IQ Dental Supply*, we concluded that antitrust standing based on the second factor was unlikely because "IQ [was] further removed from the harm caused by the Defendants than the parties directly affected by the boycott that have already sued the Defendants." *IQ Dental Supply, 924 F.3d at 66*. The same argument applies here. As noted, the merchants who have a relationship with

Amex *were* harmed at the first step by Amex's Anti-Steering Rules. And those merchants have already sued Amex. Am. Express Anti-Steering, 433 F. Supp. 3d at 401-02. We follow our precedent in holding that "the second efficient-enforcer factor weighs against ... antitrust standing" in this case. IQ Dental Supply, 924 F.3d at 66.

C

HN10[] The third efficient-enforcer factor concerns the extent to which the claim is "highly speculative." AGC, 459 U.S. at 542. "[H]ighly speculative damages is a sign that a given plaintiff is an inefficient engine of enforcement." Gelboim, 823 F.3d at 779. Under this factor, we ask whether there would be "a high degree of speculation in a damages calculation." IQ Dental Supply, 924 F.3d at 66-67. When an injury is "derivative" rather than direct, the potential recovery is often "highly speculative." Id. at 67. We also consider whether the "alleged effects on the [plaintiff] may have been produced by independent factors." AGC, 459 U.S. at 542.

Whether this factor weighs **[**20]** in favor of antitrust standing is a close question. **[*142]** The SAC presents a compelling prima facie case of foreseeable damages, given the allegation that Amex exercises market power and the district court's finding in the Government Action that the "prohibitions on merchant steering" have "enabled ... higher all-in fees." Am. Express Co., 88 F. Supp. 3d at 216.[8] Yet the fact that the appellants have suffered an "indirect" injury, and the accompanying uncertainty of how eliminating Amex's Anti-Steering Rules would affect its competitors' merchant fees, suggest that a damages calculation would rely on some speculation. *See* AGC, 459 U.S. at 542.

In any event, the third factor does not confer antitrust standing on the appellants. **HN11**[] The four efficient-enforcer factors "need not be given equal weight," and "the relative significance of each factor will depend on the circumstances of the particular case." IQ Dental Supply, 924 F.3d at 65. In particular, the Supreme Court has noted that the "potential difficulty in ascertaining and apportioning damages is not ... an *independent* basis for denying standing where it is adequately alleged that a defendant's conduct has proximately injured an interest of the plaintiff's that the statute protects" because this factor is a touchstone **[**21]** for "the proximate-cause requirement." Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 135, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014).

Even if the injury is not speculative here, it does not establish proximate cause. The appellants' injury may have been foreseeable, predictable, and even calculable, but proximate cause—especially in the economic harm context—requires more than foreseeability. *See* McCready, 457 U.S. at 476-77. In light of the other efficient-enforcer factors, the third factor does not confer antitrust standing.

D

HN12[] The fourth efficient-enforcer factor stresses the importance of "avoiding either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other." AGC, 459 U.S. at 543-44. This factor reflects an administrative concern: "massive and complex damages litigation not only burdens the courts, but also undermines the effectiveness of treble-damages suits." Id. at 545. The concern arises when

---

[8] In making this finding, the district court in the Government Action explained that from 1997 to 2009, "prohibitions on merchant steering" enabled Visa and MasterCard to "increase their average all-in merchant rates ... by more than 20% ... without fear of other networks undercutting their prices in order to gain [market] share." 88 F. Supp. 3d at 216. Discover was "forced to abandon its low-price strategy as a result of" prohibitions on merchant steering and "was able to raise its rates with virtual impunity, relying on the restraining effect of anti-steering rules to ensure that it would not be undercut by a competitor offering a lower price to merchants." *Id.* "These examples provide further support for the [district] court's finding that without affording merchants the ability to influence their customers' credit and charge card decisions" through steering, "there is little, if any, downward pressure on the price charged to merchants." *Id. Ohio* did not question this finding.

"[t]he damages to which [the plaintiff] lays claim" are "exactly the same damages [other parties] could have claimed." *IQ Dental Supply, 924 F.3d at 67*.

There is no risk of duplicate recoveries or complex reapportionment of damages here. The damages that the Amex and Non-Amex Classes seek do not overlap; each class alleges that the respective card companies charged separately. **[*143]** This case does not involve pass-on theories **[**22]** that would require a court to divide damages from the same violation among multiple plaintiffs. *See Ill. Brick Co., 431 U.S. at 737-38*; *Hanover Shoe, Inc. v. United Shoe Mach. Corp., 392 U.S. 481, 493, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*. Apportionment of damages here would neither "burden[] the courts" nor "undermine[] the effectiveness of treble-damages suits." *AGC, 459 U.S. at 545*.[9]
