LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss for failure to state a claim under *Fed. R. Civ. P. 12(b)(6)* tests the legal sufficiency of the claims alleged in the complaint. Dismissal under *Rule 12(b)(6)* may be based on the lack of a cognizable legal theory or the absence of sufficient facts alleged. Unless it would be clearly futile, a court granting a motion to dismiss should normally permit leave to amend.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

In assessing the sufficiency of the pleadings, the court accepts factual allegations in the complaint as true and construes the pleadings in the light most favorable to the non-moving party. The court need not and does not accept as true allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences. To survive a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss for failure to state a claim, the factual allegations that are taken as true must plausibly suggest an entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation. The plausibility standard asks for more than a sheer possibility that a defendant has acted unlawfully, and a complaint that pleads facts that are merely consistent with a defendant's liability stops short of the line between possibility and plausibility.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] Regulated Practices, Private Actions

A well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and that a recovery is very remote and unlikely. However, as the U.S. Supreme Court has noted precisely in the context of private antitrust litigation, it is one thing to be cautious before dismissing an antitrust complaint in advance of discovery, but quite another to forget that proceeding to antitrust discovery can be expensive. As such, a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN4[] Sherman Act, Claims

Section 1 of the Sherman Act prohibits unreasonable contracts or combinations in restraint of trade. *15 U.S.C.S. § 1*. To state a claim under *§ 1*, a private plaintiff must allege:(1) an agreement, conspiracy, or combination between two or more entities; (2) an unreasonable restraint of trade; (3) anticompetitive effects within the relevant market; and (4) a resulting antitrust injury suffered by the claimant.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN5[] Actual Monopolization, Claims

Section 2 of the Sherman Act prohibits monopolization and attempts to monopolize. *15 U.S.C.S. § 2*. In order to state a claim for monopolization under this provision, a plaintiff must allege: (1) the defendant possesses monopoly power in the relevant market; (2) the defendant has willfully acquired or maintained that power; and (3) the defendant's conduct has caused antitrust injury. A claim for attempted monopolization, requires allegations of the defendant's: (1) specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct to accomplish the monopolization; (3) dangerous probability of success; and (4) causal antitrust injury.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

HN6[] Standing, Clayton Act

Sections 4 and 16 of the Clayton Act provide complementary vehicles for private enforcement of the federal antitrust laws (including the Sherman Act). Section 4 allows the recovery of monetary damages, while § 16 permits a private party to enjoin anticompetitive conduct. *15 U.S.C.S. §§ 15*, *26*. Acknowledging that Clayton Act § 4 and § 16 are written in broad terms, the U.S. Supreme Court has recognized the importance of determining whether private parties are the appropriate plaintiffs to enforce the antitrust laws by inquiring into their antitrust standing to seek relief under those sections. Factors to consider for § 4 standing include: (1) whether the plaintiff has suffered antitrust injury; (2) the directness of the injury; (3) the speculative measure of the harm; (4) the risk of duplicative recovery; and (5) the complexity in apportioning damages.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN7[] **Private Actions, Standing**

The four requirements for antitrust injury are: (1) unlawful conduct; (2) causing an injury to the plaintiff; (3) that flows from that which makes the conduct unlawful; and (4) that is of the type the antitrust laws were intended to prevent. The injury must occur in the market where competition is being restrained. Parties whose injuries, though flowing from that which makes the defendant's conduct unlawful, are experienced in another market do not suffer antitrust injury.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN8[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

Exclusive dealing is a theory under both *§ 1* and *§ 2* of the Sherman Act. The classic exclusive dealing case involves an agreement between a vendor and a buyer that prevents the buyer from purchasing a given good from any other vendor. Because there are well-recognized economic benefits to exclusive dealing arrangements, such arrangements are not per se violations of *§ 1* and must instead be analyzed under the antitrust rule of reason. Exclusive dealing thus violates *§ 1* only if its effect is to foreclose competition in a substantial share of the line of commerce affected. Substantial share has been quantified as foreclosure of 40 percent to 50 percent of the relevant market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN9[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

In determining whether an alleged exclusionary arrangement violates the antitrust laws, courts consider a number of factors including the potential amount of foreclosure, the duration of the agreement, and the alternative avenues of distribution available to competitors. The prevailing rule in districts and circuits across the country is that where exclusive or semi-exclusive contracts are short in duration, easily terminable, incentive-based, and leave open alternative channels to competitors, they are not exclusionary.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN10[] **Tying Arrangements, Clayton Act**

Section 3 of the Clayton Act prohibits tying and exclusive dealings in the lease, sale, or contract for sale of goods, wares, merchandise, machinery, supplies, or other commodities. *15 U.S.C.S. § 14*. Section 16727 of California's Cartwright Act is based on § 3 of the Clayton Act and has a similar scope, including with respect to the definition of "commodities." Courts strictly construe the term "commodity" and hold that it denotes only tangible products of trade.

Opinion

[*1022] ORDER GRANTING MOTION TO DISMISS FIRST AMENDED COMPLAINT WITH LEAVE TO AMEND

[Re: ECF 38]

In this putative class action antitrust case, plaintiffs Gary Feitelson and Daniel McKee (collectively, "Plaintiffs") allege that defendant Google, Inc. ("Defendant") restrains trade in the market for Internet search through confidential agreements with cell phone manufacturers. Before the Court is Defendant's Motion to Dismiss First Amended Complaint. Def.'s Mot., ECF 38. The Court heard oral argument on the matter on December 18, 2014, after which it deemed the matter submitted. After careful consideration of the parties' respective written submissions and oral argument, the Court hereby GRANTS Defendant's Motion to Dismiss with leave to amend certain claims.

I. BACKGROUND

The following facts are taken from the First Amended Class Action Complaint ("FAC") and are assumed to be true.

A. Parties

Plaintiffs are consumers who purchased mobile phones connected to Defendant's alleged anticompetitive conduct. Mr. Feitelson owns an HTC EVO 3D mobile phone purchased in Louisville, Kentucky. FAC ¶ 15, ECF 31. Mr.

McKee owns a Samsung Galaxy **[**3]** S III mobile phone purchased in Des Moines, Iowa.[1] *Id*. ¶ 16. Both the HTC EVO 3D and Samsung Galaxy S III are devices that use the Android Operating System ("Android OS").

Defendant is a Delaware corporation with its headquarters and principal place of business in Mountain View, CA. Defendant is perhaps best known for Internet search, with which its name has become nearly synonymous. *Id*. ¶ 4. Defendant also owns the Android OS, which it licenses to phone manufacturers for free, as well as a bevy of popular mobile applications including YouTube, Google Maps, Gmail, and the "Google Play (formerly Android Market) client," through which mobile phone users are able to purchase applications, music, movies, and books from the Google Play store. *Id*. ¶¶ 6-8, 17, 35.

B. Relevant Markets

Internet search occurs "when a user goes to a search engine website—Google.com, for example—and executes a query there, or when he enters a query into his browser's search bar and a pre-designated search engine operating in the background executes it." *Id*. ¶ 19. Defendant and its rivals—such as **[**4]** Microsoft's Bing and DuckDuckGo—offer rival search engines, free of charge, for use by the general public. These search engines compete for users, as increased user queries help improve the search engine's effectiveness and also increases advertising revenue from paid search advertising. *See id*. ¶¶ 60-61.

Plaintiffs allege that the Internet search market has a number of barriers to entry. Search engines improve with use, and successful search products must attract a critical mass of users to input queries that, in **[*1023]** turn, aid in improving the algorithm underlying the search product. *Id*. ¶¶ 59-60. Improved search capabilities attract more users, thus iteratively enhancing the search product's capability and appeal. *Id*. This cycle tends to favor the established products over new entrants. Moreover, search engines also require significant infrastructure in the form of physical plants backed by significant financial and computational resources, as well as continuous programming support for the algorithms and software that support the search engine, and the ability to manage search on a global scale, thus also barring new entrants. *Id*. ¶¶ 59, 60 n.22, 63.

Plaintiff defines two relevant markets **[**5]** affected by Defendant's alleged anticompetitive conduct: (1) the "United States market for general search," which is "general Internet search conducted on desktop computers, laptops, and handheld devices via the Google search engine or one of its general search engine rivals, such as Bing," and (2) the submarket for "handheld general search" in the United States, which is "general Internet search conducted on smartphones and tablets. *Id*. ¶¶ 27, 75. Defendant's Google search engine, as of March 2014, accounted for 81.87% of all Internet searches conducted across all devices. *Id*. ¶¶ 20-21. In that same month Defendant's share of Internet searches conducted on mobile phone and table devices was 86.82%. *Id*. ¶ 26.

C. Mobile Application Distribution Agreements and Anticompetitive Conduct

As previously stated, Defendant owns the Android OS, as well as a suite of mobile applications ("Google Apps") that includes YouTube, Google Play, Google Phone-top search, Google Maps, Google Calendar, Gmail, Google Talk, etc. *Id*. ¶¶ 6-8, 35. While Defendant licenses the Android OS to mobile device manufacturers (or, original equipment manufacturers, or "OEMs") for free, it places restrictions on the OEMs' **[**6]** installation of Google Apps on the Android OS devices that they produce.

Specifically, OEMs frequently "pre-load" applications onto their devices because consumers demand access at startup to popular Google Apps such as YouTube and the Google Play store. *Id*. ¶ 36 n.6, n.7. If an OEM wishes to pre-load any of the Google Apps on an Android OS phone, for example, they must enter into a confidential licensing agreement with Defendant called a "Mobile Application Distribution Agreement" ("MADA"). *Id*. ¶¶ 7-8, 35. Through public filings in an unrelated case, Plaintiffs have obtained two such MADAs between Defendant and OEMs HTC

[1] Though not expressly alleged, the Court infers that the named Plaintiffs are residents of Kentucky and Iowa respectively.

and Samsung. *Id*. Exhs. A-B; *see also id*. ¶ 36 n.8 (suggesting that Defendant has entered into MADAs with a panoply of Android OEMs). Among other terms in the representative MADAs, an OEM that wishes to pre-load apps like YouTube and the Play client on an Android OS phone must also agree to make Google the default search engine for all "search access points" on the device. *Id*. ¶ 36, Exh. A at 5; Exh. B at 4. The OEM must also pre-load all of a suite of Google Apps and must give those apps "prime screen real estate."[2] *Id*. at ¶ 36. The MADAs terminate after two years and cover specific device **[**7]** models, which must be approved by Defendant and are identified by addenda to the agreements. *See id*. Exhs. A-B.

Prime placement on device screens and default setting status are important avenues **[*1024]** by which search engines obtain access to users. Handheld device users will generally use the prominently placed search engine app or widget that comes pre-loaded on their phone. *Id*. ¶ 40. Moreover, handheld device users are "unaware of the interaction between their browser . . . and the search engine which happens to be powering it," and will generally simply execute searches by typing queries into a browser's omnibox (the search/address box at the top of each browser) without realizing that the search is being powered by Google, the default search engine on their device. *Id*. Searches improve a search engine's algorithm and can also translate to greater advertising revenue. *See id*. ¶¶ 41, 60-61. Thus, because device users are generally unaware of the default settings, or are not strongly incentivized to change **[**8]** the default setting, Defendant benefits from consumer preference for the status quo. *Id*. ¶¶ 42, 55.

In January 2014, the Android OS's share of the United States smartphone market was estimated to be 51.7%. *Id*. ¶ 24. Additionally, over the years, Defendant has paid Apple—which accounts for the other substantial portion of the smartphone and handheld device market—substantial amounts of money (estimated to reach $1 billion dollars in 2014) to act as the default search engine on Apple iPhones, iPads, and iPods. *Id*. ¶ 49.

D. Harm to Plaintiffs and Claims for Relief

Plaintiffs use their phones for, among other things, Internet searches. At the time they purchased their respective phones, neither Plaintiff was aware that Google search was set as the default search engine on those phones. Further, neither Feitelson nor McKee know if there is a way to change the default search engine setting, nor how to change the default search engine if there is indeed a way to change it. *Id*. ¶¶ 15-16. Both of Plaintiffs' Android-based phones are alleged to be covered by MADAs between HTC and Samsung—the respective phone manufacturers—and Defendant. *Id*. But for Defendant's anticompetitive MADAs, Plaintiffs **[**9]** assert that their phones "would have cost less and had better search capabilities as the result of the competition that would have ensued." *Id*.; *see also id*. ¶¶ 70-73.

Plaintiffs allege that the MADAs "quash competition for default search engine status before it even can begin." *Id*. ¶ 42. This, in turn, forecloses competition in the market for general and handheld Internet search because default search engine status is the most effective and cost-effective distribution channel for search engines. *Id*. ¶¶ 51-58. Search engines improve in quality with greater usage, so the diversion of search users to the Google search engine also permits Defendant to improve its search algorithm, thereby shutting out competition on the merits. *Id*. ¶¶ 50, 59-60, 66-67. Plaintiffs allege that this cycle, if allowed to persist, would have the effect of stifling innovation and diminishing consumer choice in the market for Internet search by forcing Defendant's competitors out of business. *Id*. ¶ 70. Furthermore, the MADAs prevent Defendant's search competitors from competing for default search engine status on Android phones by offering to pay for that status (as Defendant has done with Apple). Because this **[**10]** price competition does not occur for default search engine status on Android OS phones, OEMs cannot pass on subsidies from search engine competitors to consumers and Defendant therefore causes "supra-competitive" pricing in Android phones, which injures consumers. *Id*. ¶¶ 71-73.

Based on the foregoing, Plaintiffs seek to represent a class of similarly situated purchasers of Android OS mobile telephones **[*1025]** or tablets wherein the manufacturer has entered into a similar contract with Defendant "by

[2] Although not expressly alleged, it does not appear that the OEMs pay for the applications. In other words, the Google Apps are free to pre-load, subject to the conditions in the MADAs.

which Google has conditioned the right to pre-load any application from a suite of Google applications . . . on the manufacturer's mandatory acceptance and installation of Google search, or so-called Google Phone-top Search, as the default search engine on that device." *Id*. ¶ 84. Plaintiffs assert six causes of action, seeking injunctive relief under *§ 1* and *§ 2 of the Sherman Act* (First, Second, and Third Causes of Action, or "COAs"), *15 U.S.C. §§ 1-2*; § 3 of the Clayton Act (Fourth COA), *15 U.S.C. § 14*; and the California Unfair Competition Law (Sixth COA), *Cal. Bus. & Prof. Code § 17200 et seq*.; as well as injunctive relief and treble damages based on monetary injuries under California's Cartwright Act (Fifth COA), *Cal. Bus. & Prof. Code § 16727*. *Id*. ¶¶ 95-141.

II. LEGAL STANDARD

HN1[] A motion to dismiss **[**11]** under *Federal Rule of Civil Procedure 12(b)(6)* tests the legal sufficiency of the claims alleged in the complaint. *Ileto v. Glock Inc., 349 F.3d 1191, 1199-200 (9th Cir. 2003)*. Dismissal under *Rule 12(b)(6)* may be based on the "lack of a cognizable legal theory" or "the absence of sufficient facts alleged." *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1988)*. Unless it would be clearly futile, a court granting a motion to dismiss should normally permit leave to amend. *Lopez v. Smith, 203 F.3d 1122, 1130 (9th Cir. 2000)*.

HN2[] In assessing the sufficiency of the pleadings, the court "accept[s] factual allegations in the complaint as true and construe[s] the pleadings in the light most favorable to the non-moving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. The court need not and does not accept as true allegations that are "merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)*. To survive a *Rule 12(b)(6)* motion, "the factual allegations that are taken as true must plausibly suggest an entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation." *Starr v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011)*; *see also* *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* ("A claim has facial plausibility when the pleaded factual content allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged."). The plausibility standard "asks for more than a sheer possibility that a defendant has acted unlawfully," and a complaint that **[**12]** pleads facts that are "merely consistent with" a defendant's liability "stops short of the line between possibility and plausibility." *Iqbal, 556 U.S. at 678* (internal quotations omitted).

HN3[] "[O]f course, a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable, and that a recovery is very remote and unlikely." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 556, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (internal quotations omitted). However, as our Supreme Court has noted precisely in the context of private antitrust litigation, "it is one thing to be cautious before dismissing an antitrust complaint in advance of discovery, but quite another to forget that proceeding to antitrust discovery can be expensive." *Id. at 558-59* (internal citations omitted). As such, "a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed." *Associated Gen. Contractors of Cal., Inc. v. Carpenters, 459 U.S. 519, 528, n.17, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* ("*AGC*") *quoted* ***[*1026]*** *with approval in* *Twombly, 550 U.S. at 559*.

III. SHERMAN ACT CLAIMS (FIRST, SECOND, AND THIRD COA'S)

HN4[] *Section 1 of the Sherman Act* prohibits unreasonable contracts or combinations in restraint of trade. *15 U.S.C. § 1*. To state a claim under *§ 1*, a private plaintiff must allege "(1) an agreement, conspiracy, or combination between two or more entities, (2) an unreasonable restraint **[**13]** of trade, (3) anticompetitive effects within the relevant market, and (4) a resulting antitrust injury suffered by the claimant." *Church & Dwight Co. v. Mayer Labs., Inc., 868 F. Supp. 2d 876, 889 (N.D. Cal. 2012)* (citing *Queen City Pizza v. Domino's Pizza, 124 F.3d 430, 442 (3d Cir. 1997))*, *order vacated in part on reconsideration*, *No. C-10-4429 EMC, 2012 U.S. Dist. LEXIS 68681, 2012 WL 1745592 (N.D. Cal. May 16, 2012)*.

HN5[] Section 2 of the Sherman Act prohibits monopolization and attempts to monopolize. 15 U.S.C. § 2. In order to state a claim for monopolization under this provision, a plaintiff must allege: "(1) the defendant possesses monopoly power in the relevant market; (2) the defendant has willfully acquired or maintained that power; and (3) the defendant's conduct has caused antitrust injury." Cost Mgmt. Servs., Inc. v. Washington Natural Gas Co., 99 F.3d 937, 949 (9th Cir. 1996); Allied Orthopedic Appliances Inc. v. Tyco Health Care Grp. LP, 592 F.3d 991, 998 (9th Cir. 2010). A claim for attempted monopolization, requires allegations of the defendant's "(1) specific intent to control prices or destroy competition; (2) predatory or anticompetitive conduct to accomplish the monopolization; (3) dangerous probability of success; and (4) causal antitrust injury. Cost Mgmt. Servs., 99 F.3d at 949; Cal. Computer Prods., Inc. v. Int'l Bus. Mach. Corp., 613 F.2d 727, 735 (9th Cir. 1979); United States v. Microsoft Corp., 253 F.3d 34, 50, 80, 346 U.S. App. D.C. 330 (2001).

HN6[] Sections 4 and 16 of the Clayton Act provide complementary vehicles for private enforcement of the federal antitrust laws (including the Sherman Act). Section 4 allows the recovery of monetary damages, while § 16 permits a private party to enjoin anticompetitive conduct. 15 U.S.C. §§ 15, 26; Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 109, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986). Acknowledging that Clayton Act § 4 and § 16 are written in broad terms, the Supreme Court has recognized **[**14]** the importance of determining whether private parties are the appropriate plaintiffs to enforce the antitrust laws by inquiring into their "antitrust standing" to seek relief under those sections. *See* AGC, 459 U.S. at 529-535 (factors to consider for § 4 standing include (1) whether the plaintiff has suffered antitrust injury; (2) the directness of the injury; (3) the speculative measure of the harm; (4) the risk of duplicative recovery; and (5) the complexity in apportioning damages); Cargill, 479 U.S. at 109-113 (addressing standing requirements to pursue § 16 injunctive relief).

The element of causal antitrust injury is common to both the substantive pleading requirements under the Sherman Act and the analysis of antitrust standing. Because Plaintiffs' allegations fall short on this critical element, the Court's analysis begins there, followed by a discussion of the substantive sufficiency of the Sherman Act claims.

A. Antitrust Standing and Antitrust Injury

The Court begins by observing that both parties have briefed the issue of antitrust standing assuming that Plaintiffs are seeking damages under § 4 of the Clayton Act. **[*1027]** *See* Def.'s Mot. 18-23, ECF 38; Pl.'s Opp. 21-23, ECF 39. On the face of the pleadings, it appears that Plaintiffs are seeking **[**15]** damages under the Cartwright Act and that their Sherman Act claims are only for injunctive relief under § 16 of the Clayton Act.[3] *See* FAC ¶¶ 95-135. This distinction matters because the standing requirements for injunctive relief under § 16 are more lenient than those for damages under § 4 of the Clayton Act. *See* Cargill, 479 U.S. at 111 n.6. Regardless, "under both § 16 and § 4 the plaintiff must still allege an injury of the type the antitrust laws were designed to prevent." Id. at 111. Plaintiffs have not adequately done so here.

HN7[] The four requirements for antitrust injury are "(1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent." Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of California, 190 F.3d 1051, 1055 (9th Cir. 1999). The injury must occur "in the market where competition is being restrained." Id. at 1057. "Parties whose injuries, though flowing from that which makes the defendant's conduct unlawful, are experienced in another market do not suffer antitrust injury." *Id*. Plaintiffs allege two types of injury from Defendant's anticompetitive use of the MADAs: (1) likely loss of innovation **[**16]** and concomitant restriction of consumer choice, FAC ¶ 70, and (2) supracompetitive prices for Android phones, FAC ¶¶ 71-73. Neither of these injuries suffices to maintain the claims asserted here.

The allegations of Plaintiffs' injuries in the FAC are similar to those dismissed by the court in Lorenzo v. Qualcomm Inc., 603 F. Supp. 2d 1291, (S.D. Cal. 2009). There, the plaintiff was a consumer in the market for cell phones and cellular services, whereas the defendant was a leader in the market for mobile phone chip technology. The plaintiff alleged that the defendant's anticompetitive licensing practices with respect to its CDMA chip technology caused

[3] As addressed below, the Court finds that the Cartwright Act claim must be dismissed without leave to amend.

harm in the form of "supracompetitive prices and impaired non-price competition in innovation of CDMA functionality." *Id. at 1301*. The supracompetitive prices were passed down through at least three levels of the supply chain—chipset manufacturers, device manufacturers, and vendors—before ultimately reaching the consumer-plaintiff. *Id*. The court, acknowledging that the plaintiff's "indirect purchaser status alone does not preclude antitrust standing" nevertheless dismissed his claim for *injunctive* relief, finding that the asserted injury incurred by the plaintiff was "too remote" from the defendant's alleged **[**17]** anticompetitive conduct "to support standing" to pursue such relief under the Clayton Act. *Id*. In so doing, the *Lorenzo* court appears to have also implicitly rejected the plaintiff's claim to antitrust injury from threatened harm to innovation. *Id. at 1296* (recounting the plaintiff's allegations of anticompetitive harm including "supracompetitive prices and impaired non-price competition in innovation of CDMA functionality").[4]

Similarly here, Plaintiffs allege that they suffered antitrust injury in the form of supracompetitive pricing in Android **[*1028]** phones, which is not the market in which the alleged anticompetitive conduct occurred. *See* Def.'s Mot. 19-21. Moreover, Plaintiffs elide allegations concerning the number of supply chain levels between OEMs who sign the allegedly anticompetitive MADAs and end consumers like Plaintiffs. Without such allegations, the Court cannot determine whether Plaintiffs' alleged price injury "flows from that which makes [Defendant's] conduct unlawful."[5] *Am. Ad Mgmt., 190 F.3d at 1055*. As such, Plaintiffs have failed **[**18]** to allege that they have suffered "antitrust injury" in the same market as and sufficiently close to the alleged anticompetitive conduct to allow them to pursue private antitrust remedies against Defendant. *See Lorenzo, 603 F. Supp. 2d at 1301*.

Plaintiffs attempt to distinguish *Lorenzo* by arguing that the court there found that the plaintiff had failed to allege "that he was the 'necessary means' by which defendant 'carried out its anticompetitive licensing scheme.'" Pl.'s Opp. 23 n.26 (quoting *Lorenzo, 603 F. Supp. 2d at 1301*). The *Lorenzo* court cited *Ostrofe v. H.S. Crocker Co., 740 F.2d 739, 745 (9th Cir. 1984)*, for the "necessary means" language and Plaintiffs at oral argument urged this Court to consider *Ostrofe*—which is not cited in their papers—when considering whether Plaintiffs' injury is "inextricably intertwined" with Defendant's unlawful conduct. It is not. *Ostrofe*, decided very shortly after *AGC*, interpreted *Blue Shield of Virginia v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*, to recognize a narrow exception to *AGC* allowing a dismissed employee to sue to enforce the antitrust laws where that employee was dismissed for refusing to participate **[**19]** in the defendant's price fixing conspiracy. *Ostrofe, 740 F.2d at 746*. Subsequent courts have limited *Ostrofe* to its facts, finding that the exception "is limited to those cases in which a dismissed employee is an 'essential participant' in an antitrust scheme, the dismissal is a 'necessary means' to accomplish the scheme, and the employee has the greatest incentive to challenge the antitrust violation." *Vinci v. Waste Mgmt., Inc., 80 F.3d 1372, 1376 (9th Cir. 1996)*. Similarly, the exceedingly narrow *McCready* exception requires that the plaintiff's injury be inextricably intertwined with the *injury* of the intended victim such that injuring the plaintiff is a necessary part of the anticompetitive scheme. *Exhibitors' Serv., Inc. v. Am. Multi-Cinema, Inc., 788 F.2d 574, 580 (9th Cir. 1986)*; *Datel Holdings Ltd. v. Microsoft Corp., 712 F. Supp. 2d 974, 993 n.1 (N.D. Cal. 2010)*. Neither *Ostrofe* nor *McCready* benefits Plaintiffs here, as their alleged injuries—supracompetitive prices and threatened loss of innovation and consumer choice—are not the necessary means by which Defendant is allegedly accomplishing its anticompetitive ends.[6]

Plaintiffs' alternative theory of antitrust injury supporting their standing **[**20]** to seek injunctive relief—the threatened harm to innovation and consumer choice—is equally deficient. For one, accepting Plaintiffs' argument

---

[4] Though granted leave to amend, the *Lorenzo* plaintiff did not renew his federal antitrust (Clayton Act) claim in the subsequent pleading. *See Lorenzo v. Qualcomm Inc., No. 08cv2124 WQH(LSP), 2009 U.S. Dist. LEXIS 69843, 2009 WL 2448375, at *2 (S.D. Cal. Aug. 10, 2009)*.

[5] Similarly, because directness is a factor to consider under *AGC* for purposes of standing for damages, Plaintiffs must also sufficiently allege directness of injury to the extent they intend to pursue a *Clayton Act § 4* remedy. *See AGC, 459 U.S. at 543-44*; *Am. Ad Mgmt., 190 F.3d at 1055*.

[6] To the extent Plaintiffs are the means by which Defendant improves its search engine algorithm and search product, Plaintiffs' relationship to Google search as the unwitting consumer is not an "injury" within the meaning of the antitrust laws.

would permit any consumer of Internet search to have standing to sue for injunctive relief, as the proposed class of Android OS device consumers is no different from the Apple device user or the computer search user when it comes to **[*1029]** innovation and choice in the market for Internet search products. More fundamentally, Plaintiffs' allegations of hypothetical loss of consumer choice and innovation are entirely too conclusory and speculative. Plaintiffs allege that the MADAs—which cover only Android devices—*could* have the ultimate result of "forc[ing] [Defendant's] remaining competition, which are hanging on for dear life, from the general search markets altogether," and that "[i]f Google is the only search engine left standing . . . then it will have no incentive to innovate." Pl.'s Opp. 23. However, the Court agrees with Defendant that there are no facts alleged that would render these threatened injuries more concrete than hypothetical, as there are no facts alleged to indicate that Defendant's conduct has prevented consumers from freely choosing among search **[**21]** products or prevented competitors from innovating. *See* Def.'s Reply 14-15.

Plaintiffs' citations to both *Sullivan v. National Football League, 34 F.3d 1091 (1st Cir. 1994)*, and AGC are unavailing. *See* Pl.'s Opp. 22 n.25. Plaintiffs quote passages concerning parties that were directly precluded from making certain choices by the anticompetitive conduct at issue, but Plaintiffs here are at least one step removed from the preclusive effect of the MADAs that are at the core of Plaintiffs' antitrust claims. Defendant uses the MADAs to capitalize on the preference of consumers (like Plaintiffs) for the status quo, but this does not victimize them or restrict their ability to "mak[e] free choices between market alternatives." *AGC, 459 U.S. at 528*. The threatened loss of innovation is even farther removed, as the Court would have to accept that the MADAs will push competitors out of the market for general Internet search and that, as the sole remaining search product provider, Defendant will not innovate. Such allegations, without more factual enhancement, "stop[] short of the line between possibility and plausibility." *Twombly, 550 U.S. at 557*.

To be sure, the standing requirements for injunctive relief are lower than those for damages, and Plaintiffs may likely have standing to pursue a *Clayton Act § 16* remedy **[**22]** if they are able to successfully allege antitrust injury. In support of their contention that the present pleadings suffice for standing to pursue injunctive relief, however, Plaintiffs place sole reliance on *Axiom Advisers & Consultants, Inc. v. School Innovation & Advocacy, Inc., No. 2:05CV 02395 FCD PAN, 2006 U.S. Dist. LEXIS 11404, 2006 WL 1049997 (E.D. Cal. Mar. 20, 2006)*, wherein the court found adequate the plaintiffs' allegations that the defendant's conduct "has injured competition and consumers and that its acts have an anticompetitive effect of harming the competitive process, limiting consumer choice, and harming consumers." *2006 U.S. Dist. LEXIS 11404, [WL] at *8*. As Defendant points out in reply, *Axiom* was decided before the enunciation of the *Twombly* standard, and subsequent courts have questioned whether Axiom would reach the same result today. *Southern California Inst. of Law v. TCS Educ. Sys., No. CV 10-8026 PSG AJWX, 2011 U.S. Dist. LEXIS 39827, 2011 WL 1296602, at *8 n.6 (C.D. Cal. Apr. 5, 2011)*. As described above, the allegations of antitrust injury fall far short of the plausibility standard set forth in *Twombly* and *Iqbal* and are thus insufficient for standing to pursue either monetary or injunctive relief.

B. Exclusive Dealing

Defendant also challenges the substantive sufficiency of Plaintiffs' allegations of anticompetitive **[**23]** conduct, which focuses on a theory of exclusive dealing. The Court agrees, though the deficiencies here are less significant than those with respect to Plaintiffs' standing to maintain this suit.

HN8[] Exclusive dealing is a theory under both *§ 1* and *§ 2 of the Sherman Act*.[7] **[*1030]** The classic exclusive dealing case "involves an agreement between a vendor and a buyer that prevents the buyer from purchasing a

[7] For purposes of this motion, Defendant has elected not to challenge Plaintiffs' allegations of the relevant market and of its market power in those relevant markets. Def.'s Mot. 17 n.11. As such, the parties' briefing (and this Court's order) focuses on the sufficiency of the allegations with respect to **[**24]** Defendant's exclusionary conduct, and not with respect to any other elements of Plaintiffs' *§ 2* claims for monopolization and attempted monopolization. The Court notes only that the analysis of attempted monopolization is "wholly independent" from the analysis of monopoly maintenance. *Microsoft, 253 F.3d at 81*. To the extent Defendant does not challenge Plaintiffs' allegations of its market power, *see* FAC ¶¶ 19-27 (alleging more than 80% share

given good from any other vendor." *Allied Orthopedic, 592 F.3d at 996*. Because there are "well-recognized economic benefits to exclusive dealing arrangements," such arrangements are not per se violations of *§ 1* and must instead be analyzed under the antitrust rule of reason. *Id*. (quoting *Omega Envtl., Inc. v. Gilbarco, Inc., 127 F.3d 1157, 1162 (9th Cir. 1997))*. Exclusive dealing thus violates *§ 1* "only if its effect is to 'foreclose competition in a substantial share of the line of commerce affected.'" *Id*. (quoting *Omega, 127 F.3d at 1162*). "Substantial share" has been quantified as foreclosure of 40% to 50% of the relevant market.[8] *Microsoft, 253 F.3d at 70*.

HN9[] In determining whether an alleged exclusionary arrangement violates the antitrust laws, courts consider a number of factors including the potential amount of foreclosure, the duration of the agreement, and the alternative avenues of distribution available to competitors. "The prevailing rule in districts and circuits across the country is that where exclusive or semi-exclusive contracts are short in duration, easily terminable, incentive-based, and leave open alternative channels to competitors, they are not exclusionary." *Church & Dwight, 868 F. Supp. 2d at 903*; *see also* *PNY Techs., Inc. v. SanDisk Corp., No. 11-CV-04689-WHO, 2014 U.S. Dist. LEXIS 90649, 2014 WL 2987322, at *4 (N.D. Cal. July 2, 2014)* **[**26]** ("*SanDisk*"). Defendant contends that the MADAs are short in duration, do not foreclose alternative avenues of distribution, and are not even restrictive because OEMs are welcome to preload other search products onto covered phones. Def.'s Mot. 11-15. Further, because they only cover specific approved phone models, OEMs may set other search products as **[*1031]** the default search on phone models that are not covered by the MADAs. *Id*. at 11.

Plaintiffs contend that the limited duration and reach of the MADAs is not fatal to their exclusive dealing claim, *see* Pl.'s Opp. 14-16, and the Court agrees in a limited respect. As a practical matter, although other distribution channels for Internet search products do exist, the allegations demonstrate that the default search setting on mobile devices is the most effective and cost-efficient method of distribution. FAC ¶¶ 51-58. Taken as true, the allegations suggest that alternative distribution methods are viable but not effective compared to the default search setting status. *See* *United States v. Dentsply Int'l, Inc., 399 F.3d 181, 193 (3d Cir. 2005)* (citing *Microsoft, 253 F.3d at 71*, for proposition that alternative distribution channels must "pose[] a real threat" of competition). Because, by definition, there can only be one default search engine on **[**27]** a given device, Defendant's use of the MADAs has the effect of excluding rival search products from the most effective means of distribution to handheld device users.

Moreover, the short duration and easy terminability of the MADAs does not, within the context of handheld devices, necessarily diminish their exclusivity. Any person who has purchased a handheld device in the last decade knows that new models are introduced nearly annually (if not more frequently), and that older models become obsolete very quickly. This is borne out by the large number of devices covered by the HTC MADA, with the opportunity to add additional devices subject to Defendant's approval. *See* FAC Exh. B (HTC MADA Exh. B). As a practical matter, the fact that each MADA lasts only two years does not preclude the MADAs from being effectively exclusive for the lifetime of the covered models. Furthermore, unlike *SanDisk*, upon which Defendant relies, Plaintiffs have alleged that competitors cannot offer better terms to lure OEMs away from Defendant's MADAs because there is no

---

of the relevant markets), the claim of "attempted monopolization" would appear superfluous—if not paradoxical—in the face of those allegations.

[8] It is not clear that there are any pleading differences between exclusive dealing under *§ 1* and *§ 2* with respect to the degree of market foreclosure, and the parties' briefing does not suggest that they believe there is a difference. For purposes of this motion, the Court assumes that at the pleading stage, the degree of market foreclosure required to make out an exclusive dealing claim does not differ under *§ 1* and *§ 2*. *Compare* *Microsoft, 253 F.3d 34, 70, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* ("[A] monopolist's use of exclusive contracts, in certain circumstances, may give rise to a *§ 2* violation even though the contracts foreclose less than the roughly 40% or 50% share usually required in order to establish **[**25]** a *§ 1* violation.") *to* *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (describing the *§ 2* standard as "the more stringent monopoly standard"); *see generally* Areeda & Hovenkamp, Fundamentals of ***Antitrust Law*** § 18.01 (4th ed. 2014) ("As a legal matter, *§ 2* requires that the defendant have either monopoly power or a dangerous probability of achieving it, but when such power is established may find illegality on lower percentages than the *§ 1* law of exclusive dealing requires. By contrast, *§ 1* is sometimes applied to nondominant defendants and where a 'dangerous probability' of monopoly is not in prospect, but in such cases assesses somewhat higher foreclosure requirements.").

other method by which OEMs can obtain licenses to preload Google Apps onto their Android OS devices. FAC ¶ 36; *compare* SanDisk, 2014 U.S. Dist. LEXIS 90649, 2014 WL 2987322, at *6 (competitor plaintiff **[**28]** did not allege that it offered better terms to retailers in short term exclusive contracts with defendant). As a whole, the allegations in the FAC thus plausibly suggest that the MADAs, though limited in duration and in scope, have the practical effect of foreclosing Defendant's search rivals from effective access to handheld Internet search users on covered Android OS devices.[9]

Where Plaintiffs' allegations fail, however, is in **[**29]** tying the effect of the MADAs to the relevant alleged markets—general Internet search and handheld search—to demonstrate substantial foreclosure of competition in those markets. Plaintiffs contend that "[g]iven the uniquely effective channel for the distribution of search engines to mobile device users that Google has coerced for itself, it is reasonable **[*1032]** to infer at the pleadings stage that substantial market foreclosure has occurred." Pl.'s Opp. 16. Plaintiffs have only alleged that the Android OS occupies a 51.7% share of the United States *smartphone* market, FAC ¶ 24, and they fail to explain how the logical leap from that allegation to substantial market foreclosure in the market for general handheld search (which includes all handheld devices such as phones and tablets) is reasonable based upon the existence of MADAs that admittedly only cover a subset of Android devices, FAC ¶ 36 n.8.[10] To be sure, this is a close call. However, the Court must insist on some greater specificity in pleading "before allowing a potentially massive factual controversy to proceed," AGC, 459 U.S. at 528, n.17, and Plaintiffs should have the opportunity to amend in order to more plausibly allege the relationship between the MADAs and **[**30]** competition in the market for handheld general search.

As to the broader market for general Internet search, the inference of substantial foreclosure is significantly less reasonable. The FAC contains no allegations concerning the actual portion of general Internet search that consists of handheld search. Lacking such allegations concerning the relationship between the two markets, the Court is unable to infer that the MADAs, which cover only a portion of the handheld search market, substantially foreclose competition in the market for general Internet search.

Defendant's Motion to Dismiss is accordingly GRANTED with respect to Plaintiffs' Sherman Act claims (First, Second, and Third COAs). Plaintiffs shall have leave to amend in order to adequately allege causal antitrust injury and substantial foreclosure in the relevant alleged markets caused by Defendant's anticompetitive **[**31]** conduct.[11]

IV. CLAYTON AND CARTWRIGHT ACT CLAIMS (FOURTH AND FIFTH COA'S)

---

[9] At a higher level of abstraction, this means that those competitors who cannot access users are unable to improve their search algorithms, thereby impairing their ability to compete with Defendant on the merits of their respective search products. *See* FAC ¶¶ 59-60. This is akin to the theory of Sherman Act § 2 monopoly maintenance described in Microsoft, 253 F.3d at 60-62, wherein Microsoft's exclusive licensing terms prevented OEMs from promoting rival Internet browsers, thereby reducing rival browser usage and developer interest in those browsers, with the effect of maintaining developer focus on developing for Microsoft's Windows operating system, which contributed to maintaining Microsoft's monopoly over the market for operating systems. Whether this theory is viable under § 1 is unclear.

[10] Plaintiffs attempt to further atomize the relevant market into not just handheld search, but handheld search on non-Apple devices. That is not the relevant market that Plaintiffs have alleged for § 1 purposes, although the Court acknowledges that Defendant's conduct with respect to Apple devices may be relevant to a § 2 analysis.

[11] Should Plaintiffs successfully amend to allege cognizable antitrust injury, they would also need to demonstrate other factors in support of standing to pursue monetary relief (to the extent they do intend to seek damages under § 4 of the Clayton Act). The Court assumes that Plaintiffs are familiar with the *AGC* factors for § 4 standing, as further elaborated in *American Ad Management. See* AGC, 459 U.S. at 536-46; Am. Ad Mgmt., 190 F.3d at 1055; *see also* Cargill, 479 U.S. at 110 n.5 ("A showing of antitrust injury is necessary, but not always sufficient, to establish standing under § 4, because a party may have suffered antitrust injury but may not be a proper plaintiff under § 4 for other reasons."). Plaintiffs are also encouraged to clearly indicate in their amended pleading whether they are in fact seeking § 4 relief.

The deficiencies in Plaintiffs' allegations of antitrust injury and exclusionary conduct described above equally apply to Plaintiffs' claims under *§ 3 of the Clayton Act* and *§ 16727 of the California Business & Professions Code*, a provision of California's Cartwright Act. These claims furthermore suffer from an even more fatal flaw. Defendant contends that, as a matter of law, Plaintiffs cannot state claims under the Clayton and Cartwright Acts because **[**32]** the subject MADAs are not tangible commodities (nor do they cover tangible commodities) within the narrower scope of the Clayton and Cartwright Acts. Def.'s Mot. 18, 23. The Court agrees.

[*1033] ***HN10***[] *Section 3 of the Clayton Act* prohibits tying and exclusive dealings in the lease, sale, or contract for sale of "goods, wares, merchandise, machinery, supplies, or other *commodities*." *15 U.S.C. § 14* (emphasis added). *Section 16727* of the Cartwright Act is based on *§ 3 of the Clayton Act* and has a similar scope, including with respect to the definition of "commodities." *Suburban Mobile Homes, Inc. v. Amfac Communities, Inc., 101 Cal. App. 3d 532, 549, 161 Cal. Rptr. 811 (1980)*; *see also* *Morrison v. Viacom, 66 Cal. App. 4th 534, 546, 78 Cal. Rptr. 2d 133 (1998)*. Courts have "strictly construed" the term "commodit[y]" and held "that it denotes only tangible products of trade." *Tele Atlas N.V. v. Navteq Corp., 397 F. Supp. 2d 1184, 1192 (N.D. Cal. 2005)* (quoting *Innomed Labs, LLC v. ALZA Corp., 368 F.3d 148, 155 (2d Cir. 2004)*.

Tele Atlas concerned tying and exclusive dealing claims directed at a patent holder's refusal to license its patented navigation display technology unless a licensee also agreed to license map data for use with the licensed technology. *Tele Atlas, 397 F. Supp. 2d at 1187*. In rejecting the plaintiff's *Clayton Act § 3* and Cartwright Act *§ 16727* claims, the Tele Atlas court reasoned that "[a] license is not the sale of a tangible good" and thus could not fall within the ambit of the Clayton and Cartwright Acts. *Id. at 1192*. The court further rejected the plaintiff's arguments that it should apply the "dominant **[**33]** nature" test to the license agreements, as the plaintiff alleged only that the defendant sold a "purely ethereal consideration" and did not allege the sale of any physical item. *Id*.; *accord* *Code Rebel, LLC v. Aqua Connect, Inc., No. CV 13-4539 RSWL MANX, 2014 U.S. Dist. LEXIS 2824, 2014 WL 46696, at *5 (C.D. Cal. Jan. 3, 2014)* (dismissing claim under *Clayton Act § 2*—which also only extends to commodities—because software product at issue was not tangible, and therefore not a "commodity").

Relying on *Tele Atlas*, Defendant characterizes the MADAs as licenses to use the Google Apps, which are not tangible commodities. Def.'s Mot. 18, 23. Plaintiffs disagree with this characterization, cursorily arguing that the "products at issue" are not licenses but the software that the MADAs cover. Pl.'s Opp. 21 n.23. This is a strained reading of the MADAs, which clearly confer nonexclusive *licenses* to reproduce and distribute the Google Apps according to the terms and conditions set forth in the agreements. *See, e.g*., FAC Exh. A § 2.1, ECF 31-1. In any case, even accepting Plaintiffs' interpretation of the MADAs, Plaintiffs identify no authority holding that software products are absolutely within the coverage of the Clayton and Cartwright **[**34]** Acts, regardless of their tangibility.

For the proposition that software products are "commodities" within the meaning of the Clayton and Cartwright Acts, Plaintiffs rely on an implied holding from *Digidyne Corp. v. Data Gen. Corp., 734 F.2d 1336 (9th Cir. 1984)*, wherein the Ninth Circuit concluded that a defendant's refusal to license operating system software except to purchasers of its central processing units was an unlawful tying arrangement under *§ 1 of the Sherman Act* and *§ 3 of the Clayton Act*. *Id. at 1338*. However, the ultimate holding of the *Digidyne* court was that the trial court erred in setting aside a jury verdict for the plaintiffs on the issue of the defendant's economic power in an alleged *per se* tying arrangement; aside from passing mention of the Clayton Act, it does not appear that the court ever considered whether the Clayton Act could apply to completely intangible software products. *See generally, id*. Digidyne thus avails Plaintiffs little, even were the Court to accept the illusory distinction between software and licenses that Plaintiffs proffer.

[*1034] Rather, the Court finds more persuasive the weight of opinion that "commodity," as that term is used in *§ 3* of the Clayton Act, refers to *tangible* goods. *See* *Tele Atlas 397 F. Supp. 2d at 1192-93* (collecting cases); *see also* *May Dep't Store v. Graphic Process Co., 637 F.2d 1211, 1214-15 (9th Cir. 1980)* *and* *Code Rebel, 2013 U.S. Dist. LEXIS 137937, 2013 WL 5405706, at *7-8* (same **[**35]** interpretation of "commodity" in analogous context of Clayton Act *§ 2*). Here, Plaintiffs do not allege that the Google Apps are sold to OEMs in physical form, or even that the Google Apps have any tangible component. Nor does it appear that they can so allege, as the subject matter of the MADAs is the limited conferral of certain incorporeal rights to OEMs to install and distribute Google Apps on the OEMs' Android devices. As such, the MADAs are not sales or contracts for sale of tangible goods. Defendant's

Motion to Dismiss is therefore GRANTED as to these claims, and Plaintiffs' *Clayton Act § 3* and *Cartwright Act § 16727* claims (Fourth and Fifth COAs) are dismissed without leave to amend.

V. UNFAIR COMPETITION (SIXTH COA)

Plaintiffs' UCL claim based on "unfair" competition rises and falls with their Sherman Act claims. *See City of San Jose v. Office of the Comm'r of Baseball, 776 F.3d 686, 2015 U.S. App. LEXIS 675, 2015 WL 178358, at *5 (9th Cir. Jan. 15, 2015)*. As Plaintiffs have been given leave to amend their Sherman Act claims, they shall also have the opportunity to amend the UCL claim, particularly as it relates to antitrust injury and Plaintiffs' loss of money or property due to Defendant's unfair practices. *Kwikset Corp. v. Superior Court, 51 Cal. 4th 310, 323, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)*.

More fundamentally, neither of the named Plaintiffs resides in California, though they seek to enforce California law. **[**36]** Plaintiffs' counsel indicated at oral argument that although they believe it is sufficient for purposes of the UCL claim that Defendant is headquartered in California, they can easily identify and name an additional plaintiff who resides in California. As such, the Court shall GRANT Defendant's Motion to Dismiss the UCL claim (Sixth COA) with leave to amend in order to address the deficiencies identified in this order and to add a named plaintiff from California.

VI. ORDER

For the foregoing reasons, IT IS HEREBY ORDERED that Defendant's Motion to Dismiss is GRANTED. Plaintiffs shall have leave to amend only their Sherman Act and California UCL claims. The amended pleading shall be due **within twenty-one (21) days** of the date of this order.

IT IS SO ORDERED.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **Standards of Review, De Novo Review**

In reviewing a judgment of dismissal after a demurrer is sustained without leave to amend, the appellate court assumes the truth of all properly pleaded facts. The appellate court examines the complaint's factual allegations to determine whether they state a cause of action on any available legal theory regardless of the label attached to a cause of action. The appellate court does not assume the truth of contentions, deductions, or conclusions of fact or law, and may disregard allegations that are contrary to the law or to a fact that may be judicially noticed. A demurrer is proper when a ground for objection to the complaint appears on its face or from matters of which the court may or must take judicial notice. To the extent statutory construction issues are raised, the appellate court applies the rules of statutory construction and exercises its independent judgment as to whether the complaint states a cause of action.

HN3[] **Standards of Review, Abuse of Discretion**

Whether leave to amend should have been granted is reviewed under the abuse of discretion standard, although error is shown if there is any reasonable probability an amendment that cures the defect can be made. Appellants bear the burden on appeal of showing a reasonable possibility exists that the complaint can be successfully amended.

Constitutional Law > Supremacy Clause > Federal Preemption

Governments > Federal Government > US Congress

HN4[] **Supremacy Clause, Federal Preemption**

Under the *Supremacy Clause of the United States Constitution*, *U.S. Const., art. VI, cl. 2*, federal law shall be the supreme law of the land. Therefore Congress may preempt state laws to the extent it believes such action is necessary to achieve its purposes. Congress may exercise that power expressly, or the courts may infer preemption under one of three implied preemption doctrines: conflict, obstacle, or field preemption. Express preemption occurs when Congress defines the extent to which a statute preempts state law. Conflict preemption exists when it is impossible to simultaneously comply with both state and federal law. Obstacle preemption occurs when state law stands in the way of full accomplishment and execution of federal law. Field preemption applies when comprehensive federal regulations leave no room for state regulation.

Constitutional Law > Supremacy Clause > Federal Preemption

HN5[] **Supremacy Clause, Federal Preemption**

Preemption may be based either on federal statutes or on federal regulations that are properly adopted in accordance with statutory authorization. As a result, a federal agency acting within the scope of its congressionally delegated authority may preempt state regulation and render unenforceable state or local laws that are otherwise not inconsistent with federal law. When regulatory preemption is at issue, the regulation's force does not depend on express congressional authorization to displace state law. As a result, a narrow focus on Congress's intent to supersede state law is not appropriate. Therefore the focus is on the agency and whether it acted within the bounds of its lawful authority.

Constitutional Law > Supremacy Clause > Federal Preemption

HN6[] **Supremacy Clause, Federal Preemption**

A federal agency's regulations will preempt any state or local laws that conflict with or frustrate the regulations' purpose. Beyond that, in proper circumstances an agency may determine that its authority is exclusive and preempts any state efforts to regulate at all in the forbidden area. Many of the responsibilities conferred on federal agencies include a broad grant of authority to reconcile conflicting policies. Where this is true, the United States Supreme Court has cautioned that even in the area of preemption, if the agency's choice to preempt represents a reasonable accommodation of conflicting policies that were committed to the agency's care by statute, the courts should not disturb it unless it appears from the statute or its legislative history that the accommodation is not one Congress would have sanctioned.

Business & Corporate Compliance > ... > Communications Law > Federal Acts > Cable Television Consumer Protection & Competition Act

HN7[] **Federal Acts, Cable Television Consumer Protection & Competition Act**

The Federal Communication Commission regulates cable television service through the Cable Television Consumer Protection and Competition Act of 1992, *47 U.S.C. § 521 et seq.* *47 U.S.C. § 543(a)(1)* governs the regulation of rates and provides that, with certain exceptions, no federal agency or state may regulate rates. Section 5438(8)(f) also prohibits cable operators from engaging in negative option billing, such that subscribers may not be charged for any service or equipment that the subscriber has not affirmatively requested by name. This section prohibits cable companies from providing a service the customer has not expressly requested and then charging for the service if the customer fails to exercise the negative option of cancelling the subscription or opting out of the service. *Section 543(8)(f)* reinforces the prohibition against negative option billing by providing that a subscriber's failure to refuse a cable operator's proposal to provide such service or equipment shall not be deemed to be an affirmative request for such service or equipment.

Constitutional Law > Supremacy Clause > Federal Preemption

HN15[] Deceptive & Unfair Trade Practices, State Regulation

The Federal Communication Commission, pursuant to its statutory authority, has made it clear that state consumer protection laws are preempted in regard to negative option billing practices that result in rate hikes due to the addition of a small number of channels because those rate hikes do not represent a fundamental change in service.

Headnotes/Summary

Summary

CALIFORNIA OFFICIAL REPORTS SUMMARY

Cable subscribers filed a class action unfair competition complaint against a cable provider and two professional sports teams based on rate hikes for carrying channels that broadcast the teams' games. The trial court sustained defendants' demurrers to the subscribers' complaint without leave to amend and entered a judgment of dismissal. (Superior Court of Los Angeles County, No. BC512259, Lee Smalley Edmon and Amy D. Hogue, Judges.)

The Court of Appeal affirmed the judgment of dismissal. The court concluded that 47 C.F.R. § 76.981 (2014) was a proper exercise of the Federal Communications Commission's regulatory authority and preempted the subscribers' unfair competition law claim. Although the Cable Television Consumer Protection and Competition Act of 1992 (47 U.S.C. § 521 et seq.) generally prohibits cable operators from engaging in negative option billing, literal application of negative option billing to every minor change would be seriously burdensome to cable operators. The Court of Appeal rejected the subscribers' contention that the addition of the three sports channels constituted a fundamental change to the basic service tier that brought it outside the preemptive effect of § 76.891. (Opinion by Rubin, Acting P. J., with Flier and Grimes, JJ., concurring.)

Headnotes

CALIFORNIA OFFICIAL REPORTS HEADNOTES

CA(1)[] **(1)**

Constitutional Law § 31—Supremacy Clause—Federal Preemption.

Under the supremacy clause of the United States Constitution (U.S. Const., art. VI, cl. 2), federal law is the supreme law of the land. Therefore Congress may preempt state laws to the extent it believes such action is necessary to achieve its purposes. Congress may exercise that power expressly, or the courts may infer preemption under one of three implied preemption doctrines: conflict, obstacle, or field preemption. Express preemption occurs when Congress defines the extent to which a statute preempts state law. Conflict preemption exists when it is impossible to simultaneously comply with both state and federal law. Obstacle preemption occurs when state law stands in the way of full accomplishment and execution of federal law. Field preemption applies when comprehensive federal regulations leave no room for state regulation.

CA(2)[] **(2)**

Constitutional Law § 31—Federal Preemption—Regulations.

Preemption may be based either on federal statutes or on federal regulations that are properly adopted in accordance with statutory authorization. As a result, a federal agency acting within the scope of its congressionally delegated authority may preempt state regulation and render unenforceable state or local laws that are otherwise not inconsistent with federal law. When regulatory preemption is at issue, the regulation's force does not depend on express congressional authorization to displace state law. As a result, a narrow focus on Congress's intent to supersede state law is not appropriate. Therefore the focus is on the agency and whether it acted within the bounds of its lawful authority.

CA(3)[] **(3)**

Constitutional Law § 31—Federal Preemption—Regulations—Conflicting Policies.

A federal agency's regulations will preempt any state or local laws that conflict with or frustrate the regulations' purpose. Beyond that, in proper circumstances an agency may determine that its authority is exclusive and preempts any state efforts to regulate at all in the forbidden area. Many of the responsibilities conferred on federal agencies include a broad grant of authority to reconcile conflicting policies. Where this is true, the United States Supreme Court has cautioned that even in the area of preemption, if the agency's choice to preempt represents a reasonable accommodation of conflicting policies that were committed to the agency's care by statute, the courts should not disturb it unless it appears from the statute or its legislative history that the accommodation is not one Congress would have sanctioned.

CA(4)[] **(4)**

Telecommunications § 18—Cable Television—Negative Option Billing Prohibition.

The Federal Communications Commission regulates **[*786]** cable television service through the Cable Television Consumer Protection and Competition Act of 1992 (47 U.S.C. § 521 et seq.). Title 47 U.S.C. § 543(a)(1) governs the regulation of rates and provides that, with certain exceptions, no federal agency or state may regulate rates. Section 543(f) also prohibits cable operators from engaging in negative option billing, such that subscribers may not be charged for any service or equipment that the subscriber has not affirmatively requested by name. This section prohibits cable companies from providing a service the customer has not expressly requested and then charging for the service if the customer fails to exercise the negative option of cancelling the subscription or opting out of the service. *Section 543(f)* reinforces the prohibition against negative option billing by providing that a subscriber's failure to refuse a cable operator's proposal to provide such service or equipment must not be deemed to be an affirmative request for such service or equipment.

CA(5)[] **(5)**

Telecommunications § 18—Cable Television—Negative Option Billing Prohibition—Exception—Preemption—Fundamental Changes.

Title 47 C.F.R. § 76.981 (2014) implements *47 U.S.C. § 543*'s prohibition against negative option billing, but carves out an exception. Negative option billing does not include the addition or deletion of a specific program from a service offering, the addition or deletion of specific channels from an existing tier or service, the restructuring or division of existing tiers of service, or the adjustment of rates as a result of the addition, deletion or substitution of channels (*§ 76.981(b)*). Under the circumstances just described, negative option billing is permitted. The regulation also provides that state and local governments may not enforce consumer protections laws that conflict with this exception to the negative option billing prohibition so long as the changes proposed by the cable operator do not constitute a fundamental change in the nature of an existing service or tier of service and are otherwise consistent with applicable Federal Communications Commission regulations (*§ 76.981(b)*, *(c)*).

CA(6)[] **(6)**

Telecommunications § 18—Cable Television—Negative Option Billing Prohibition—Nonfundamental Changes—Preemption.

Changes to a service tier that do not amount to a fundamental change in the nature of service do not run afoul of the negative option billing prohibition, meaning that such changes can be made without a subscriber's express advance agreement. State and consumer protection laws are preempted to the extent they target such nonfundamental changes.

CA(7)[] **(7)**

Statutes § 19—Construction—Preemption—Agency's Interpretation—Deference.

When a statute is silent or ambiguous on the **[*787]** issue of preemption, the courts must defer to an interpretation by the administering agency so long as it is based on a permissible reading of the statute.

CA(8)[] **(8)**

Telecommunications § 18—Cable Television—Negative Option Billing Prohibition—Exception—Preemption—Unfair Competition Law.

Title 47 C.F.R. § 76.981 (2014), which carves out an exception to the prohibition against negative option billing, is a proper exercise of the Federal Communications Commission's regulatory authority. Accordingly, in a class action lawsuit brought by cable subscribers against a cable provider and two professional sports teams based on rate hikes for carrying channels that broadcast the teams' games, *§ 76.981* preempted the subscribers' unfair competition law claim.

[Cal. Forms of Pleading and Practice (2014) ch. 126A, Constitutional Law, § 126A.23; 13 Witkin, Summary of Cal. Law (10th ed. 2005) Equity, § 123; 7 Witkin, Summary of Cal. Law (10th ed. 2005) Constitutional Law, § 18.]

CA(9)[] **(9)**

Courts § 34—Judicial Precedent—Dissent.

A dissent has no precedential value.

CA(10)[] **(10)**

Telecommunications § 18—Cable Television—Negative Option Billing Practices—State Consumer Protection Laws—Preemption—Rate Hikes—Nonfundamental Changes.

The Federal Communications Commission, pursuant to its statutory authority, has made it clear that state consumer protection laws are preempted in regard to negative option billing practices that result in rate hikes due to the addition of a small number of channels because those rate hikes do not represent a fundamental change in service.

Counsel: Blecher Collins Pepperman & Joye, Maxwell M. Blecher and Courtney A. Palko for Plaintiffs and Appellants.

Judges: Opinion by Rubin, Acting P. J., with Flier and Grimes, JJ., concurring.

Opinion by: Rubin, Acting P. J.

Opinion

[492] RUBIN, Acting P. J.**—Four subscribers to Time Warner Cable Inc. appeal from the order sustaining without leave to amend the demurrers of Time Warner, the Los Angeles Lakers and the Los Angeles Dodgers to the subscribers' class action unfair competition complaint based on rate hikes for carrying channels that broadcast Dodgers and Lakers games. We affirm because federal regulations implementing federal communications statutes **[***2]** have expressly preempted this action.

FACTS AND PROCEDURAL HISTORY[1]

Time Warner Cable is a significant, if not the primary, provider of cable television throughout several Southern California counties. Typically, Time Warner buys content from programmers (think Fox, Disney, Viacom, and HBO), who require Time Warner to offer each programmer's channels in a single bundle as part of Time Warner's enhanced basic cable programming tier.

---

[1] Under the standard of review applicable to demurrers, which we discuss *post*, our recitation of the facts is based on the allegations of the complaint, which we accept as true.

In 2011, Time Warner paid the Lakers $3 billion for the licensing rights to televise Lakers games for 20 years over two channels: TWC SportsNet and TWC Deportes. Time Warner's subscription rates rose by $5 a month as a result of bundling those channels into the enhanced basic cable tier. In 2013, Time Warner paid the Dodgers $8 billion for the licensing rights to televise Dodgers games for 25 years. The new SportsNet LA channel was also added to the enhanced basic cable tier, raising subscribers' monthly rates by another $4. The rate hikes will cost Time Warner subscribers at least $11 billion **[***3]** over the life of the contracts.

[493]** Sherry Fischer, Stewart R. Graham, Todd Crow, and Gavin McKiernan filed a class action lawsuit against Time Warner, the Dodgers, and the Lakers, alleging that this new arrangement violated the state's unfair competition law **[*789]** (UCL) (*Bus. & Prof. Code, § 17200 et seq.*) because (1) Time Warner's acquisition of the licensing rights to Dodgers and Lakers games made it both programmer and distributor; (2) surveys showed that more than 60 percent of the population does not follow sports and would not pay separately to watch Dodgers or Lakers games; (3) there were no valid reasons for bundling these sports stations into the enhanced basic cable tier instead of offering them separately as part of a sports channel package;[2] (4) although a majority of Time Warner subscribers would opt out of those channels if they could, they had no such option and were instead forced to pay an extra $9 per month for unwanted programming; (5) Time Warner expanded the reach of this scheme by selling its rights to Lakers and Dodgers games to other cable and satellite television providers, requiring those providers to also include those channels as part of their enhanced basic tiers; and (6) the Lakers and Dodgers knew **[***4]** the increased costs would be passed on to unwilling subscribers and were the intended beneficiaries of these arrangements.[3]

Time Warner demurred to the complaint on the ground that federal **[***5]** law expressly permitted bundling of channels, thereby providing a "safe harbor" against unfair competition claims. The Dodgers and Lakers filed separate concurrent demurrers, with both contending they could not be liable because they had not committed unfair acts, while the Lakers also joined in Time Warner's demurrer.[4] The trial court sustained without leave to amend Time Warner's demurrer on the safe harbor ground, adding to its analysis a legal issue that had not previously been raised: the express preemption of state unfair competition laws by a federal regulation implementing federal statutes that govern the cable television industry. (*47 C.F.R. § 76.981(c) (2014)*.) The trial court sustained without leave to amend the Lakers' and Dodgers' demurrers because the absence of a claim against Time Warner meant there could be no claim as to them. The trial court then entered judgment for respondents.

[*790]

STANDARD OF REVIEW

HN1[] In reviewing a judgment of dismissal after a demurrer is sustained without leave to amend, we assume the truth of all properly pleaded facts. We examine the complaint's factual allegations to determine whether they state **[***6]** a cause of action on any available legal theory regardless of the **[**494]** label attached to a cause of action. (*Doe v. Doe 1 (2012) 208 Cal.App.4th 1185, 1188 [146 Cal. Rptr. 3d 215]*.) We do not assume the truth of

---

[2] By federal statute, which we detail in part 2 of our Discussion, cable service is divided into three parts: (1) a basic service tier of local commercial stations and public access channels that may be supplemented with additional cable channels; (2) cable programming services offered in tiers or groups, for which a separate rate is charged; and (3) video programming offered on a per-channel or per-program basis. (*Time Warner Entertainment Co., L.P. v. F.C.C. (D.C. Cir. 1995) 312 U.S. App.D.C. 187 & fns. 4–6 [56 F.3d 151, 180* & fns. 4–6], (dis. opn. of Randolph, J.) (*Time Warner*); *47 U.S.C. §§ 522(3)*, *(17)*, *543(a)(2)*, *(b)(7)(A)–(B)*, *(c)(1)*, *(c)(2)(D)*, *(l)(2)*.) Time Warner's cable lineup, which the trial court judicially noticed, lists the three disputed sports channels as part of its basic lineup. We assume that the reference in the complaint to an "enhanced basic tier" means that Time Warner added those and other channels to its basic service tier, as allowed by the federal cable act.

[3] We will refer to the four individual plaintiffs collectively as appellants. We will sometimes refer to Time Warner, the Dodgers and Lakers collectively as respondents.

[4] The parties raised other issues in their demurrers that are not relevant on appeal.

contentions, deductions, or conclusions of fact or law, and may disregard allegations that are contrary to the law or to a fact that may be judicially noticed. A demurrer is proper when a ground for objection to the complaint appears on its face or from matters of which the court may or must take judicial notice. (*Id. at pp. 1188–1189*.) To the extent statutory construction issues are raised we apply the rules of statutory construction and exercise our independent judgment as to whether the complaint states a cause of action. (*Id. at p. 1189*.)

HN2[] We will affirm an order sustaining a demurrer on any proper legal ground whether or not the trial court relied on that theory or it was raised by the defendant. (*Rossberg v. Bank of America, N.A. (2013) 219 Cal.App.4th 1481, 1490–1491 [162 Cal. Rptr. 3d 525]*; *Henry v. Associated Indemnity Corp. (1990) 217 Cal.App.3d 1405, 1413, fn. 8 [266 Cal. Rptr. 578]*.)[5]

Finally, ***HN3***[] whether leave to amend should have been granted is reviewed under the abuse of discretion standard, although error is shown if there is any reasonable probability an amendment that cures the defect can **[***7]** be made. Appellants bear the burden on appeal of showing a reasonable possibility exists that the complaint can be successfully amended. (*Rosen v. St. Joseph Hospital of Orange County (2011) 193 Cal.App.4th 453, 458 [122 Cal. Rptr. 3d 87]*.)

DISCUSSION

1. *Regulations of a Federal Agency May Preempt State Law*

HN4[] ***CA(1)***[] **(1)** Under the *supremacy clause of the United States Constitution (U.S. Const., art. VI, cl. 2)*, federal law "shall be the supreme Law of the Land." (See *Brown v. Mortensen (2011) 51 Cal.4th 1052, 1059 [126 Cal. Rptr. 3d 428, **[*791]** 253 P.3d 522]* (*Brown*).) Therefore Congress may preempt state laws to the extent it believes such action is necessary to achieve its purposes. (*City of New York v. FCC (1988) 486 U.S. 57, 63 [100 L. Ed. 2d 48, 108 S. Ct. 1637]* (*City of New York*).)

Congress may exercise that power expressly, or the courts may infer preemption under one of three implied preemption doctrines: conflict, obstacle, or field preemption. (*Brown, supra, 51 Cal.4th at p. 1059*.) Express preemption occurs when Congress defines the extent to which a statute preempts state law. (*Viva! Internat. Voice for Animals v. Adidas Promotional Retail Operations, Inc. (2007) 41 Cal.4th 929, 935 [63 Cal. Rptr. 3d 50, 162 P.3d 569]*.) Conflict preemption exists when it is impossible to simultaneously comply with both state and federal law. (*Ibid.*) Obstacle preemption occurs when state law stands in the way of full accomplishment and execution of federal law. (*Ibid.*) Field preemption applies when comprehensive federal regulations leave no room for state regulation. (*Ibid.*)

HN5[] ***CA(2)***[] **(2)** Preemption may be based either on federal statutes or on federal regulations that are properly adopted in accordance with statutory authorization. **[***8]** As a result, a federal agency acting within the scope of its congressionally delegated authority may preempt state regulation and "render unenforceable state or local laws that are otherwise not inconsistent with federal law." (*City of New York, supra, 486 U.S. at p. 64*.) **[**495]** The current appeal presents primarily the question of regulatory, not statutory, preemption.

When regulatory preemption is at issue, the regulation's force does not depend on express congressional authorization to displace state law. As a result, a narrow focus on Congress' intent to supersede state law is not appropriate. (*City of New York, supra, 486 U.S. at p. 64*.) Therefore the focus is on the agency and whether it acted within the bounds of its lawful authority. (*Ibid.*)

HN6[] ***CA(3)***[] **(3)** A federal agency's regulations will preempt any state or local laws that conflict with or frustrate the regulations' purpose. Beyond that, in proper circumstances an agency may determine that its authority is exclusive and preempts any state efforts to regulate at all in the forbidden area. (*City of New York, supra, 486*

[5] Perhaps in recognition of this rule, appellants do not contend that we may not consider the express regulatory preemption issue that was first raised by the trial court.

U.S. at p. 64.) Many of the responsibilities conferred on federal agencies include a broad grant of authority to reconcile conflicting policies. "Where this is true, the [Supreme] Court has cautioned that even in the area of pre-emption, **[***9]** if the agency's choice to pre-empt 'represents a reasonable accommodation of conflicting policies that were committed to the **[*792]** agency's care by the statute, we should not disturb it unless it appears from the statute or its legislative history that the accommodation is not one that Congress would have sanctioned.'" (*Ibid.*)

2. *Applicable Federal Statutes and Regulations in the Cable Industry*

HN7[] **CA(4)**[] **(4)** The Federal Communications Commission (FCC) regulates cable television service through the Cable Television Consumer Protection and Competition Act of 1992. (47 U.S.C. § 521 et seq.; the Cable Act.)[6] Section 543, part of the Cable Act, governs the regulation of rates and provides that, with certain exceptions, no federal agency or state may regulate rates. (§ 543(a)(1).)[7] Section 543, part of the Cable Act, also prohibits cable operators from engaging in "negative option billing," such that subscribers may not be charged "for any service or equipment that the subscriber has not affirmatively requested by name." (§ 543(f).)[8] **[**496]** This section prohibits cable companies from providing a service the customer has not expressly requested and then charging for the service if the customer fails to exercise the negative option of cancelling the subscription or opting **[***10]** out of the service. (Belton v. Comcast Cable Holdings, LLC (2007) 151 Cal.App.4th 1224, 1236 [60 Cal. Rptr. 3d 631].) The statute reinforces the prohibition against negative option billing by providing that "a subscriber's failure to refuse a cable operator's proposal to provide such service or equipment shall not be deemed to be an affirmative request for such service or equipment." (§ 543(f).)[9]
[*793]

CA(5)[] **(5)** Pursuant to its regulatory authority, the FCC promulgated **HN9**[] 47 Code of Federal Regulations part 76.981 (2014) implementing section 543's prohibition against negative option billing, but carved out an exception.[10] Negative option billing does not include "the addition **[***12]** or deletion of a specific program from a

---

[6] All further section references are to title 47 of the United States Code.

[7] When a cable provider is subject to "effective competition," its rates are unregulated. (§ 543(a)(1), (2).) Section 543 establishes three separate market share formulas to determine whether effective competition exists. (§ 543(l)(1); Time Warner, supra, 56 F.3d at p. 162.) If a cable provider is not subject to effective competition then the FCC regulates its rates according to a complex set of statutory and regulatory standards. (Time Warner, at pp. 162–163; § 543(c)(2); 47 C.F.R. § 76.922 (2014).)

The parties do not specifically address whether Time Warner is subject to effective competition and therefore exempt from rate regulation. However, while the complaint alleges that Time Warner is either a significant or primary cable provider in the affected areas, it also alleges the existence of alternate providers and does not state that Time Warner is not subject to effective competition. In its trial court points and authorities, Time Warner cited **[***11]** section 543(a) for the proposition that it had "complete discretion" to set its own rates, while appellants said they were not asking the court to regulate rates and instead wanted them determined by "market forces." We take from this that Time Warner is subject to effective competition under the Cable Act and that its rates are therefore unregulated, a fact that appellants' counsel confirmed during oral argument.

[8] Section 543(f) states: **HN8**[] "A cable operator shall not charge a subscriber for any service or equipment that the subscriber has not affirmatively requested by name. For purposes of this subsection, a subscriber's failure to refuse a cable operator's proposal to provide such service or equipment shall not be deemed to be an affirmative request for such service or equipment."

[9] The manner in which Time Warner effected its decision to add the Dodgers and Lakers channels unilaterally is an example of negative option billing as subscribers were not asked to affirmatively request or agree to the additional channels.

[10] The regulation states: "(a) **HN10**[] A cable operator shall not charge a subscriber for any service or equipment that the subscriber has not affirmatively requested by name. A subscriber's failure to refuse a cable operator's proposal to provide such service or equipment is not an affirmative request for service or equipment. A subscriber's affirmative request for service or equipment may be made orally or in **[***13]** writing.

"(b) The requirements of paragraph (a) of this section shall not preclude the adjustment of rates to reflect inflation, cost of living and other external costs, the addition or deletion of a specific program from a service offering, the addition or deletion of specific service offering, the addition or deletion of specific channels from an existing tier or service, the restructuring or division of existing tiers of service, or the adjustment of rates as a result of the addition, deletion or substitution of channels … .” (47 C.F.R. § 76.981(b) (2014).)[11] Under the circumstances just described, negative option billing is permitted. The Regulations also provide that state and local governments may not enforce consumer protection laws that conflict with this exception to the negative option billing prohibition so long as the changes proposed by the cable operator “do not constitute a fundamental change in the nature of an existing service or tier of service and are otherwise consistent with applicable [FCC] regulations.” (Regs., § 76.981(b), (c).)[12]

CA(6)[] **(6)** In sum, **HN11**[] changes to a service tier that *do not* amount to a fundamental change in the nature of service do not run afoul of the negative option billing prohibition, **[**497]** meaning that such changes can be made without a subscriber's express advance agreement. Particularly relevant to this case, **[*794]** state and consumer protection laws are preempted to the extent they target such nonfundamental changes.[13]

The question remains: Was the inclusion of the three sports channels to the basic tier (1) simply the addition of “specific” programs or channels and hence a form of negative option billing that is lawful under the regulations or **[***15]** (2) a fundamental change in the nature of an existing service or tier and hence subject to state consumer protective laws?

3. *Regulations Part 76.981 Preempts the UCL*

The trial court concluded, and respondents contend here, that Time Warner did nothing more than add three sports channels to its enhanced basic service tier and adjust subscribers' rates accordingly, changes that did not fundamentally alter the nature of the existing tier. As a result, respondents contend that appellants' UCL action is expressly preempted by Regulations part 76.981, which authorizes such minor channel lineup changes (Regs., § 76.981(b)), exempts them from the negative option billing prohibition (Regs., § 76.981(a)), and expressly preempts state consumer protection laws that “conflict with or undermine” the negative option billing/fundamental change regulation (Regs., § 76.981(c)).

Appellants contend that Regulations part 76.981 does not apply because (1) Time Warner's unilateral addition of new channels at a higher rate was a negative option billing practice prohibited by section 543(f); (2) the new channels fundamentally changed an existing tier of channels under Regulations part 76.981(b); (3) section 552(d)(1), part of the Cable Act, permits enforcement of state consumer protection laws unless the Cable **[***16]** Act expressly states otherwise; and (4) section 543, part of the Cable Act, does not provide for such preemption in this setting. We disagree.

---

channels from an existing tier or service, the restructuring or division of existing tiers of service, or the adjustment of rates as a result of the addition, deletion or substitution of channels pursuant to § 76.922, provided that such changes do not constitute a fundamental change in the nature of an existing service or tier of service and are otherwise consistent with applicable regulations.

“(c) State and local governments may not enforce state and local consumer protection laws that conflict with or undermine paragraph (a) or (b) of this section or any other sections of this Subpart that were established pursuant to Section 3 of the 1992 Cable Act, 47 U.S.C. 543.” (47 C.F.R. § 76.981 (2014).)

[11] All further references to “Regulations” are to title 47 of the Code of Federal Regulations (2014).

[12] The Cable Act itself contains several statutes relating to preemption. Section 556(c) provides generally that any provision of state law “which is inconsistent with this chapter shall be deemed to be preempted and superseded.” Section 552(d)(1) states, “Nothing in this subchapter **[***14]** shall be construed to prohibit any State or any franchising authority from enacting or enforcing any consumer protection law, to the extent not specifically preempted by this subchapter.” (See § 552(a), (b), § 557.)

[13] Regulations part 76.981(c) provides: “State and local governments may not enforce state and local consumer protection laws that conflict with or undermine paragraph (a) [(negative option billing)] or (b) [(limiting the prohibition against negative option to ‘fundamental’ changes)] of this section or any other sections of this Subpart that were established pursuant to Section 3 of the 1992 Cable Act, 47 U.S.C. 543.”

The only case to construe Regulations part 76.981, determine the FCC's authority to promulgate it, and consider the regulation's preemptive effect, is Time Warner Cable v. Doyle (7th Cir. 1995) 66 F.3d 867 (*Doyle*).[14]
[*795]

The *Doyle* court considered an unfair trade practices action brought by the State of Wisconsin against Time Warner for claimed negative option billing practices. Time Warner deleted certain channels from its basic and standard service tiers and began offering them on an “a la carte” or per-channel basis. This resulted in a rate decrease for the two existing tiers, coupled with a new charge for the a la carte channels. As a result, those who had already subscribed to both tiers saw no net increase in their monthly bills because the **[***17]** combined effect of the simultaneous rate increases and decreases balanced each other **[**498]** out. Time Warner did not ask its *existing* subscribers whether they wished to receive the a la carte channels and began billing for them. New subscribers were given an affirmative choice whether to receive the a la carte channels. Presumably, subscribers who opted out of the a la carte channels would have the cost of their cable service reduced.

CA(7)[] **(7)** The district court entered summary judgment for the state. The Seventh Circuit reversed, finding the action was preempted by Regulations part 76.981. The *Doyle* court began by noting the rule that ***HN12***[] when a statute is silent or ambiguous on the issue of preemption, the courts must defer to an interpretation by the administering agency so long as it is based on a permissible reading of the statute. (Doyle, supra, 66 F.3d at p. 876.) The negative option billing provision of section 543 was ambiguous because its language standing alone did not “answer the question of whether the unbundling or the mere relabeling of existing services” was sufficient to require affirmative customer consent. (66 F.3d at p. 877.)

The appellate court also observed that a literal interpretation of the “negative option billing” prohibition in section 543(f) would impose the **[***18]** burdensome requirement of cable operators obtaining affirmative customer consent every time a station was substituted, “producing significant compliance costs that would be difficult to reconcile with the contemplated rate regulation scheme.” (Doyle, supra, 66 F.3d at p. 877.)[15] Because section 543(f)'s negative option billing prohibition was placed in the Cable Act's rate regulation section, not the consumer protection section (§ 552), an inference arose that the requirement of an affirmative request for service was at least a factor in the regulatory scheme for rates, and was therefore subject to the bar on rate regulation under section 543(a)(1). (66 F.3d at p. 877.)
[*796]

The Seventh Circuit observed that section 552 permits the enforcement of state **[***19]** consumer protection laws absent their express preemption by the Cable Act.[16] But the court held that the FCC had reasonably interpreted

---

[14] The court in Time Warner, supra, 56 F.3d 151, considered a challenge by cable operators to FCC rulemaking opinions that heralded the FCC's interpretation of section 543(c)'s negative option billing provision to permit concurrent enforcement of state consumer protection laws unless they impinged on rate regulation. Regulations part 76.981 was never mentioned and the *Time Warner* court held that the issue was not yet ripe for judicial review. (56 F.3d at pp. 194–195.)

[15] In the context of the present case, if negative option billing were prohibited in every situation, Time Warner would not be able to delete, for example, the Velocity channel (channel 416) or the Oxygen channel (channel 77) from its basic cable lineup without affirmative agreement by subscribers to continue basic cable service without those channels. Regulations part 76.981(b) permits the cable operator to take such action without affirmative subscriber agreement because the deletion of the channels does not constitute a “fundamental change.”

[16] The version of section 552(d)(1) printed in the United States Code Annotated states that the statute's express **[***20]** endorsement of the companion use of state consumer protection laws unless otherwise preempted states that “[n]othing in this subchapter” prevents their enforcement. Based on this, respondents contend that the provision authorizing state consumer actions does not apply to negative option billing practices under section 543(f) because that statute is found in another *subchapter* of the Cable Act. The *Doyle* court clarified that the use of “subchapter” was essentially a typographical error because the Statutes at Large (106 Stat. 1484) uses the word “title” instead of “subchapter,” a conflict that is generally resolved in favor of the language used in the Statutes at Large. (Doyle, supra, 66 F.3d at p. 878 & fn. 11.) As a result, consumer protection in

section 543(f) to preempt state challenges to negative option billing practices that did not fundamentally alter a service tier, as expressly permitted by Regulations part 76.981. (Doyle, supra, 66 F.3d at pp. 878–879.) Although that choice was made clear by **[**499]** the current version of Regulations part 76.981, the *Doyle* court examined a previous version of that regulation that was in effect when Time Warner first implemented the tier restructuring. According to the *Doyle* court, a series of FCC reports showed an evolving awareness that Regulations part 76.981 was always intended to have preemptive effect where state consumer protection laws impinged on rate regulations. (66 F.3d at pp. 878–881.) The *Doyle* court acknowledged that there was long-standing tension between two policy concerns—federal control of matters that affect cable rates and state freedom to enforce consumer protection laws. It concluded that the FCC has consistently reconciled this tension by opting to protect the rate structure whenever it is jeopardized by state consumer protection laws. (Id. at p. 881.)

In short, the Seventh Circuit concluded that, while state consumer protection laws may be enforced generally under the Cable Act, where enforcement is sought in regard to negative option billing practices that concern nonfundamental service changes, they are preempted by Regulations part 76.981. (Doyle, supra, 66 F.3d at pp. 880–881.)

Another factor the *Doyle* court considered was the potential remedy of disgorgement **[***21]** available under Wisconsin's unfair trade practices act. Even though the parties later stipulated that disgorgement would not be sought, the Seventh Circuit held that the initial availability of that remedy impacted rate regulation because, were disgorgement ordered, the net effect would be that Time Warner would have provided the disputed channels for free. (Doyle, supra, 66 F.3d at pp. 881–882.) As a result, enforcement of that state law would have "impact on the rate rules by discouraging the provision of new services at a reasonable cost." (Id. at p. 882.) Accordingly, Regulations part **[*797]** 76.981 was a proper interpretation of section 543's ban on state regulation of rates, and therefore preempted Wisconsin's attempt to enforce its consumer protection law. (66 F.3d at pp. 881–882.)

CA(8)[] **(8)** With Doyle as a guide, we conclude that ***HN13***[] Regulations part 76.981 is a proper exercise of the FCC's regulatory authority and preempts appellants' UCL claim. First, as in *Doyle*, appellants seek restitution of the rate hike fees, thereby retroactively affecting rates Time Warner has already charged its customers. Second, the trial court took judicial notice of the channel lineups as they stood before and after the new sports channels were added. Only three of nearly 100 in the nonbroadcast basic cable **[***22]** tier were affected. An FCC order interpreting Regulations part 76.981 states that tier changes of that nature are minor, not "fundamental," even if they are accompanied by a rate adjustment, and are therefore within the preemptive scope of Regulations part 76.981(c). (*Implementation of Sections of the Cable Television Consumer Protection and Competition Act of 1992; Rate Regulation, Sixth Order on Reconsideration, 10 F.C.C.R. 1226*, ¶¶ 109–110, adopted Nov. 10, 1994, released Nov. 18, 1994 (FCC Sixth Order).) By contrast, deleting all existing channels from a particular tier and replacing them with an entirely new set of channels would constitute a fundamental change to a tier of channels. (*Id.*, ¶ 110.) In that hypothetical setting, negative option billing would be implicated and state laws that addressed such changes would not be preempted.

CA(9)[] **(9)** Appellants challenge *Doyle* by citing to the *Doyle* dissent's contention that section 543 was not ambiguous and therefore did not support the FCC's interpretation and concomitant enactment of Regulations part 76.981. Of course, ***HN14***[] a dissent has no **[**500]** precedential value, and we find it unpersuasive here. (Tearlach Resources Limited v. Western States Internat., Inc. (2013) 219 Cal.App.4th 773, 783 [162 Cal. Rptr. 3d 110].) We agree with the *Doyle* court that literal application of negative option billing to every minor change would be seriously burdensome to cable operators, and it **[***23]** was that reality that prompted the FCC to add the "fundamental change" rule to negative option billing in Regulations part 76.981. (Doyle, supra, 66 F.3d at p. 877.) Thus, the regulation was compatible, not inconsistent, with section 543, and hence a proper subject for regulatory promulgation and regulatory preemption. (City of New York, supra, 486 U.S. at pp. 63–64.)

---

section 552(d)(1) (formerly found in subsection (c)), applies to the general provisions of the Cable Act as a whole. (66 F.3d at pp. 878 & fn. 11, 881–882.)

Appellants also contend that the FCC Sixth Order actually supports their contention that Time Warner's addition of the three sports channels constituted a fundamental change to the basic service tier that brought it outside the preemptive effect of *Regulations part 76.981*. Because the FCC Sixth Order provides a 20-cent-per-channel cap on the costs of adding new channels, appellants contend that the $9-per-month rate hike for the three new channels did constitute a fundamental change. However, as Time Warner points out, **[*798]** that 20-cent cap was aimed at the “costs of adding a channel” and did not apply to programming costs, which are “the costs of obtaining programming.” Plaintiffs effectively alleged that the rate hikes represent Time Warner's costs of obtaining the programming, meaning that the 20-cent cap does not apply. Furthermore, that price cap was, by its terms, in place only through 1997. (FCC Sixth Order, **[***24]** ¶¶ 8, 9, 66, 72–73, 76.) Therefore, all that remains of the FCC Sixth Order relevant to negative option billing is its statement that state consumer protection laws are preempted in regard to nonfundamental channel additions and concomitant rate hikes. (*Id.*, ¶ 13.)[17]

Appellants also rely on decisions that have allowed enforcement of various state laws against cable operators, but none is applicable. (*Total TV v. Palmer Communications, Inc. (9th Cir. 1995) 69 F.3d 298* [action under the Unfair Practices Act (*Bus. & Prof. Code, § 17204*) by one cable operator against another alleging predatory pricing designed to drive it out of business; no mention of *Regs., § 76.981*]; *Cable Television Assn. v. Finneran (2d Cir. 1992) 954 F.2d 91* [N.Y. state law prohibiting cable operators from charging subscribers a $40 to $100 fee to downgrade to less expensive service not preempted by *§ 543* prohibition against state regulation of rates because the downgrade fee was not a rate; no mention of *Regs., § 76.981*]; *Morrison v. Viacom, Inc. (1997) 52 Cal.App.4th 1514, 1529–1531 [61 Cal. Rptr. 2d 544]* [class action by cable subscribers alleging that cable operator violated state ***antitrust law*** by “tying” purchase of one service to purchase of other service not preempted because it only *indirectly* affected rates; distinguished *Doyle* because *Doyle* concerned “a much different question” **[***25]** of “ ‘minor adjustments in programming’ ” and because the FCC had not preempted state law that only indirectly affects rates].)

CA(10)[] **(10)** In short, ***HN15***[] the FCC, pursuant to its statutory authority, has made it clear that state consumer protection laws are preempted in regard to negative option billing practices that result in rate hikes due to the addition of a small number of channels because those rate hikes do not represent a “fundamental change” in service. The essence of appellants' complaint is to the **[**501]** contrary—nonfundamental changes are not preempted. Even though they seek leave to amend to allege that the three channel additions fundamentally altered the basic cable tier, such an allegation would not eliminate that defect, as the cited authorities indicate that such additions are not fundamental changes. We therefore hold that the action is necessarily preempted as to all respondents.[18]

[*799]

DISPOSITION

The judgment of dismissal based on the order sustaining respondents' demurrers without leave to amend is affirmed. Respondents to recover their appellate costs.

Flier, J., and Grimes, J., concurred.

A petition for a rehearing was denied March 16, 2015, and appellant's petition for review by the Supreme Court was denied June 10, 2015, S225395.

---

[17] We asked for and received supplemental briefing from the parties on this issue.

[18] We do so keenly aware of how this issue affects millions of our fellow Southern California residents. With apologies to Bruce Springsteen, we appreciate the lament of cable television subscribers who feel that although they now receive 10 times 57 channels or more, mostly nothing is on that they wish to view. We **[***26]** simply hold that federal preemption principles bar application of state consumer protection laws in this case. Thus, consumers must present their complaints to Congress or the FCC.

Heartland Payment Sys. v. Mercury Payment Sys., LLC

United States District Court for the Northern District of California

February 23, 2015, Decided; February 24, 2015, Filed

Opinion

ORDER GRANTING in part and DENYING in part DEFENDANT'S MOTION TO DISMISS

(Docket No. 67)

Plaintiff Heartland Payment Systems filed its original complaint on January 29, 2014. Defendant Mercury Payment Systems moved to dismiss the complaint and, on November 7, 2014, the Court granted Mercury's motion and granted Heartland leave to amend. In its First Amended Complaint (1AC), Heartland asserts various unfair business practice claims against Mercury. Mercury moves to dismiss the 1AC. (Docket No. 67). Heartland has filed an opposition. Mercury has filed a reply. Having considered the motion on the papers, the Court GRANTS in part and DENIES in part the motion to dismiss.

BACKGROUND

In considering whether the complaint is sufficient to state a claim, the Court will take all material allegations as true and construe them in the light most favorable to Plaintiff. *Metzler Inv. GMBH v. Corinthian Colls., Inc., 540 F.3d 1049, 1061 (9th Cir. 2008)*. The Court's review is limited to the face of the complaint, materials incorporated into the complaint by reference, and facts **[*3]** of which the Court has taken judicial notice. Id. Facts plead in the original complaint and those that are judicially noticed are summarized in the Court's previous order. See November 7, 2014 Order, Docket No. 63 at 1-4; Compl. ¶¶ 1-28. The following is a summary of those facts, noting additional facts as alleged in the 1AC.

Heartland and Mercury are competitors in the payment processing industry. In the 1AC, Heartland alleges that while it is both a merchant acquirer and a payment processor, Mercury is not itself a processor, but only a merchant acquirer. See 1AC ¶ 15. Both companies "acquire" businesses, described as "merchants," to sign up for payment processing services. 1AC ¶ 11.[1] Payment processing systems allow merchants to accept credit and debit cards as payment from their customers. Both Heartland and Mercury serve small-and medium-sized merchants.

Under the pricing model pioneered by Heartland, known as "cost-plus," the merchant pays the fees charged by the card networks (e.g., Visa) and those charged by the banks (e.g., Wells Fargo) "at cost," i.e., with no mark-up by the merchant acquirer. Id. ¶ 28. The "plus" fee is that charged by the merchant acquirer, and it is on that fee that Heartland, Mercury and its competitors compete. Id. Heartland alleges that the term "costplus" is a "term of art" in the industry which means that the "acquirer (1) will pass through at cost the uncontrollable third party-charged interchange fees and assessments to the merchant, and (2) will add a separate **[*5]** markup, usually in some combination of percentage of a transaction and cents-per-transaction, that is supposed to represent the amount the acquirer is paid for its services." Id. ¶¶ 29-30. Heartland alleges that Mercury deceives merchants by purporting to charge "cost-plus" while actually charging other, undisclosed, fees. In addition to marking up fees that Mercury promises to pass through to merchants "at cost," Heartland alleges, Mercury charges "junk fees," or "fee[s] made up by Mercury, represented to be a third party fee, and charged in addition to Mercury's disclosed markup." Id. ¶ 86.

Heartland alleges that Mercury deceives merchants through various documents and written statements, including its Merchant Application, the "Operating Guide" on its website, and oral statements to merchants from Mercury's employees or agents. In the 1AC, Heartland alleges further that, in addition to statements made by Mercury's employees, Mercury's agents make oral statements to merchants to induce them to purchase Mercury's processing services. Id. ¶¶ 19-20. These agents include Point of Sale (POS) dealers and developers, who create, sell, install and maintain POS systems and who recommend Mercury's **[*6]** services to their customers, and Independent Sales Organizations (ISOs). Mercury offers the POS dealers and developers and the ISOs referral fees in return for signing up merchants. Id.

---

[1] In its Motion to Dismiss, Mercury argues that Heartland's new allegation that Mercury is a merchant acquirer but not a payment processor, see 1AC ¶ 15, is a new allegation that "directly contradicts" Heartland's original complaint and hence is not authorized by this Court's previous order. See Def.'s Mot. Dismiss, Docket No. 67 at **[*4]** 3. In the original complaint, Heartland asserted that "Mercury, like Heartland, is engaged in the business of payment processing for merchants. Also like Heartland, Mercury provides payment services nationwide." Compl. ¶ 11. Heartland explains that it has since learned new information. In the 1AC, Heartland also states that "Mercury competes directly with Heartland . . . [in] providing payment processing services for small and medium-sized merchants. . ." 1AC ¶ 14. The Court does not find that Heartland has impermissibly changed its allegations.

In the 1AC, Heartland alleges that, beyond the price competition, Mercury has also made it difficult for Heartland to compete directly for partnerships with POS dealers. Id. ¶ 131. Because POS dealers typically receive a portion of the revenue received by the merchant acquirer, Mercury is able to promise greater revenue than Heartland can offer. Id. But, Heartland alleges that the POS dealers are also being deceived; because "those inflated interchange fees are characterized as pass-through costs on merchant statements, rather than as part of Mercury's own markup, they are not included in the revenue shared with the POS dealer, and the POS dealer does not receive the benefits it expected to receive." Id.

Likewise, Heartland alleges, the ISOs are being deceived by Mercury. ISOs purchase processing services from Mercury, and then sell those services to merchants for a mark-up. For example, an ISO will purchase processing services from Mercury for "cost-plus two cents," and then sell those services to a **[*7]** merchant for "costplus five cents," expecting to net three cents for every transaction. See 1AC ¶ 64. Heartland alleges that while the ISO will receive the three cents per transaction, Mercury is inflating the "cost" amount and not sharing the mark-up with the ISO. This allegation is supported by a sworn affidavit from the President of Payment Revolutions, an ISO that contracts with Mercury, that Mercury "was secretly inflating [the interchange and assessment] fees and not sharing any portion of the mark up with" the ISO. 1AC ¶ 66.[2]

In the 1AC, Heartland states facts with regard to six merchants to support its allegations that Mercury charged undisclosed fees. Id. ¶¶ 108-130. Heartland alleges that Mercury promised each of these merchants that it is charging a fee less than it is actually charging. Heartland alleges that this deception occurred through Mercury's Merchant Application and through its agents' oral statements, and it provides detailed allegations on exactly how each merchant was overcharged. Also in the 1AC, Heartland alleges that from 2008 to 2012, due to its deceptive practices, Mercury's processing volume nearly quadrupled. Id. ¶ 22.

Heartland asserts five causes of action against Mercury: (1) false advertising in violation of *15 U.S.C. § 1125(a)(1)(B)* (Lanham Act); (2) unfair competition in violation of California's Unfair Competition Law, Business and Professions Code *section 17200 et seq.* (UCL); (3) false advertising in violation of *California Business and Professions Code section 17500 et seq.* (FAL); (4) intentional interference with contractual relations; and (5) intentional interference with prospective economic advantage.

LEGAL STANDARD

As noted in the Court's November 7, 2014 Order dismissing the original complaint, a complaint must **[*9]** contain a "short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)*. The plaintiff must proffer "enough facts to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. A claim is facially plausible "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Id.

However, the court need not accept legal conclusions, including "threadbare recitals of the elements of a cause of action, supported by mere conclusory statements." *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 555*).

DISCUSSION

I. *Rule 9(b)*

---

[2] In its Motion to Dismiss, Mercury argues that the ISO allegations are new and thus not allowed in Heartland's amended complaint. One ISO allegation is that one of the ways in which Mercury misleads merchants is by using the ISOs to make pricing statements which Mercury knows to be false. This is not a new allegation, but rather provides more detail as to how Mercury communicates misrepresentations to merchants. In addition, Heartland alleges that Mercury is directly deceiving the ISOs. This is a new allegation. However, this allegation is closely related to Heartland's main contention that Mercury is engaging in deceptive business practices. Thus, in the **[*8]** interest of judicial economy, the Court will allow the allegation.

As a threshold matter, Mercury again argues that all of Heartland's causes of action fail because they do not satisfy the heightened pleading requirements of *Rule 9(b)*. "In all averments of fraud or mistake, the circumstances constituting fraud or mistake shall be stated with particularity." *Fed. R. Civ. P. 9(b)*.

As discussed in the previous order, while Heartland may not use the word "fraud" in all of its causes of action, it has alleged "a unified course of fraudulent conduct and rel[ies] entirely on that course of conduct as the basis of [its] claim[s]." See *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)*.

The Court finds that Heartland has now plead its causes of action sufficiently to satisfy **[*10]** *Rule 9(b)*. It provides specific details as to which documents Mercury uses to deceive merchants and why the documents are deceptive, as well as details that shed light on the identities of Mercury employees and agents who allegedly made oral misrepresentations to merchants. Accordingly, the Court declines to dismiss Heartland's complaint in its entirety for failure to comply with *Rule 9(b)*.

The Court now turns to each cause of action.

II. First Cause of Action: False Advertising in Violation of *15 U.S.C. § 1125(a)(1)(B)*(Lanham Act)

> The elements of a Lanham Act . . . false advertising claim are: (1) a false statement of fact by the defendant in a commercial advertisement about its own or another's product; (2) the statement actually deceived or has the tendency to deceive a substantial segment of its audience; (3) the deception is material, in that it is likely to influence the purchasing decision; (4) the defendant caused its false statement to enter interstate commerce; and (5) the plaintiff has been or is likely to be injured as a result of the false statement, either by direct diversion of sales from itself to defendant or by a lessening of the goodwill associated with its products.

Southland Sod Farms v. Stover Seed Co., 108 F.3d 1134, 1139 (9th Cir. 1997) (citing *15 U.S.C. § 1125(a)(1)(B)*).

Heartland alleges that Mercury **[*11]** "has made and will continue to make, in commercial advertising or promotion throughout the United States including in California, false and/or misleading statements of fact that misrepresent the nature, characteristics and/or qualities of Defendant's and Plaintiff's services" in violation of the Lanham Act. 1AC ¶ 135.

Heartland alleges that Mercury's false advertising takes two forms: (1) its written documents (i.e., Merchant Application, Operating Guide and monthly statements) and (2) oral statements made by its employees or agents (i.e., POS dealers, POS developer partners, and ISOs.) Mercury counters that (1) the Merchant Application and monthly statements disclose that mark-ups may be added, and (2) the alleged oral misrepresentations are not plead with the required particularity.

In its previous Order dismissing the original complaint, the Court found that while Heartland had sufficiently plead that the written documents were commercial speech, Heartland

> has not stated facts sufficient to support the inference that 1) Mercury discloses its pricing in the way Heartland alleges, or that 2) Mercury has actually charged something other than what it discloses. It fails to allege any facts **[*12]** -- such as specific language or terms in the monthly statements, Operating Guide or Merchant Application -- to support the inference that the documents do not contain truthful "detailed terms and conditions . . . that make clear disclosures about Mercury's pricing and fees."

November 7, 2014 Order at 14.

In the 1AC, Heartland has stated, with particularity, facts sufficient to support its allegations that Mercury's written representations are false and why they are false. For example, Heartland alleges that the following statement, found in Mercury's Merchant Application, is false: "Merchant will also be assessed per transaction access fees for Visa, MasterCard and Discover transactions, which will be displayed as a separate item on Merchant's monthly statement and may include fees by both the applicable card association and Member or Global Direct." 1AC ¶ 41. Heartland alleges that this statement is false because

> Mercury, not the third parties Mercury identifies, marks up "access" fees. Mercury pads these fees and retains the markup for itself, but misrepresents that those fee markups are unavoidable costs imposed by third parties. Mercury falsely represents that such third parties "may" **[*13]** increase these fees, when in fact Mercury intends to, and does, inflate these fees.

Id. ¶ 43. Heartland supports the allegation by comparing the Merchant Application language with specific monthly statements which show (1) marked-up interchange fees and assessment fees, and (2) fees that are not clearly disclosed. See id. ¶¶ 108-130.

For example, Heartland alleges that, in one Merchant Application, Mercury states its fee will be six and one-half cents per transaction. Heartland alleges that merchants

> reasonably understand Mercury's fee schedule to mean that Mercury is proposing to charge the merchant cost-plus pricing . . . i.e., actual interchange rates and assessments plus the margin quoted in the fee schedule . . . [and] that Mercury's fees will be limited to the margins quoted in [its] fee schedule.

1AC ¶ 38. Even if Mercury discloses that additional fees may be assessed, and that additional fees are possible for some transactions, see id. ¶ 33, the implication is that these are unavoidable pass-through fees. Heartland points to a monthly statement where Mercury charged almost one hundred dollars more than what Heartland believes the merchant should have been charged if it were being **[*14]** charged "cost-plus." See id. ¶¶ 73-76.

Heartland also bases its allegations on a comparison of the Merchant Applications and monthly statements of six merchants who were deceived by Mercury. For three of these merchants, Heartland states facts that support the inference that Mercury charged something other than what was originally disclosed to the merchant in its Merchant Application. For example, Heartland alleges that Schat's, a California merchant, "discovered that, contrary to Mercury's representations [in its Merchant Application], Mercury had not been passing through 'actual' third party charged fees at cost." 1AC ¶ 108. Instead, "Mercury was inflating certain card network assessments, including the APF and NABU fees described above, by several cents per transaction." Id. ¶ 109.

Accordingly, Heartland has stated facts sufficient to support the allegation that Mercury charges something other than what it discloses in its written documents.

With regard to Heartland's allegations based on oral statements, in its previous Order the Court stated,

> Heartland alleges that it has the name of at least one merchant it believes was a victim of Mercury's deception. Yet it fails to disclose the **[*15]** name of that merchant, or any other merchant who it claims was deceived. It also fails to allege any facts to support that it was a Mercury employee or representative who made false statements to current or potential merchants.

November 7, 2014 Order at 11.

In the 1AC, Heartland discloses the names of three merchants it alleges were deceived by Mercury's employees or its agents, and states facts to support that it was a Mercury employee or agent who made false statements to these merchants. For example, Heartland alleges that,

> Mercury's sales representative told [Nothing Bundt Cake] franchisees they would be charged cost plus 5 cents and a $5 monthly service charge, and provided Merchant Applications that reflected that pricing. The franchises discovered in or around February 2014, however, that although their account statements separately listed interchange fees and assessments, their APF and NABU fees were each being inflated 4 cents, plus they were being charged junk fees, including a $15.95 monthly "maintenance fee" and a $24.95 monthly "membership fee," neither of which were disclosed in their Merchant Applications.

1AC ¶ 115.

Heartland also alleges that another merchant, Arena Softball, **[*16]** was told by a Mercury sales representative that "it would save money by switching from Heartland to Mercury." Id. ¶ 110.[3] Instead, Heartland alleges, Mercury inflated the fees and the merchant was charged more than what it would have been charged by Heartland.

Thus, the Court finds that Heartland has stated facts sufficient to support the allegation that Mercury charges something other than what its agents disclose in their oral representations. Accordingly, the Court DENIES Mercury's motion to dismiss the Lanham Act cause of action.

III. Second Cause of Action: Unfair Competition in Violation of *California Business and Professions Code section 17200 et seq.* (UCL)

The UCL prohibits "any unlawful, unfair or fraudulent business act." *Cal. Bus. & Prof. Code § 17200 et seq.* Because *section 17200* is written in the disjunctive, it establishes three types of unfair competition. *Davis v. Ford Motor Credit Co., 179 Cal. App. 4th 581, 593, 101 Cal. Rptr. 3d 697 (2009)*. Therefore, a practice may be prohibited as unfair or deceptive even if it is not unlawful and vice versa. *Podolsky v. First Healthcare Corp., 50 Cal. App. 4th 632, 647, 58 Cal. Rptr. 2d 89 (1996)*. Heartland alleges claims under all three prongs.

A. Unlawful business practices

[*17] An unlawful business practice includes anything that can be called a business practice and that is forbidden by law. *Ticconi v. Blue Shield of Cal. Life & Health Ins., 160 Cal. App. 4th 528, 539, 72 Cal. Rptr. 3d 888 (2008)*. Any federal, state or local law can serve as a predicate for an unlawful business practice action. *Smith v. State Farm Mut. Auto. Ins. Co., 93 Cal. App. 4th 700, 718, 113 Cal. Rptr. 2d 399 (2001)*. Thus, the UCL incorporates violations of other laws and treats them as unlawful practices independently actionable under the UCL. Id.; *Chabner v. United of Omaha Life Ins. Co., 225 F.3d 1042, 1048 (9th Cir. 2000)*; *Cel-Tech Communs., Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*.

In its previous order, the Court found that, because Heartland's allegations failed to comply with *Rule 9(b)* and failed to state a claim upon which relief could be granted, Heartland had also failed to state a claim under the unlawful prong of the UCL. See November 7, 2014 Order at 17. As discussed elsewhere in this order, in its 1AC Heartland has plead facts sufficient to support its Lanham Act and FAL causes of action. Accordingly, the Court DENIES Mercury's motion to dismiss this UCL cause of action for unlawful business practices.

B. Unfair business practices

"When a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes *section 17200*, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc., 20 Cal. 4th at 187*.

In its previous order, the Court found that,

> Heartland alleges that Mercury's actions threaten a violation **[*18]** of ***antitrust law***, "including but not limited to *Section 5* of the Federal Trade Commission Act, violate the policy or spirit of such law, and/or otherwise significantly threaten or harm competition." Compl. ¶ 48. Heartland fails to state facts to support the allegation that Mercury's conduct violates or threatens to violate *§ 5* of the Federal Trade Commission Act, or any anti-trust law.

November 7, 2014 Order at 17-18.

"*Section 5* of the Federal Trade Commission Act prohibits 'deceptive acts or practices in or affecting commerce'. . . . [A] practice falls within this prohibition (1) if it is likely to mislead consumers acting reasonably under the

[3] Heartland has not, however, plead any facts to support its allegations that Mercury's agents made "Best Rate" or "Rate Match" guarantees. Accordingly, Heartland may not rely on those allegations as evidence of Mercury's deception.

circumstances (2) in a way that is material." *FTC v. Cyberspace.Com LLC, 453 F.3d 1196, 1199 (9th Cir. 2006)* (citing *FTCA § 5(a)(1)*, *15 U.S.C. § 45(a)*).

As discussed above, Heartland has plead facts sufficient to support its allegation that Mercury represents that it is charging merchants "cost-plus" while actually marking fees up and charging fees that are not clearly disclosed. The Court finds that, if these allegations are true, these actions are likely to deceive in a way that is material. Thus, Heartland has alleged facts sufficient to support an unfair business practices claim due to "deceptive acts or practices" and an incipient violation of *§ 5* of the FTCA.

Accordingly, **[*19]** the Court DENIES Mercury's motion to dismiss this UCL cause of action for unfair business practices.

C. Fraudulent business practices

"A fraudulent business practice is one in which members of the public are likely to be deceived." *Morgan v. AT&T Wireless Servs., Inc., 177 Cal. App. 4th 1235, 1254, 99 Cal. Rptr. 3d 768 (2009)*. In its previous order, the Court dismissed this cause of action for failure to comply with *Rule 9(b)*. See November 7, 2014 Order at 18. In the 1AC, Heartland has stated facts sufficient to support its Lanham Act and FAL causes of action and these facts are likewise sufficient to support its fraudulent business practices claim under *section 17200*. If Heartland's allegations are true, Mercury's actions likely deceived the public.

Mercury contends that Heartland has not plead facts sufficient to support the reliance element of its fraud claim because it does not allege that it relied on Mercury's misrepresentations.

In *In re Tobacco II Cases, 46 Cal. 4th 298, 326-28, 93 Cal. Rptr. 3d 559, 207 P.3d 20 & n.17 (2009)*, the California Supreme Court found that the amended UCL "imposes an actual reliance requirement on plaintiffs" who bring a UCL action "based on a fraud theory involving false advertising and misrepresentations to consumers" because "reliance is the causal mechanism of fraud."

> Reliance is proved by showing that the defendant's misrepresentation or nondisclosure was **[*20]** "an immediate cause" of the plaintiff's injury-producing conduct. A plaintiff may establish that the defendant's misrepresentation is an "immediate cause" of the plaintiff's conduct by showing that in its absence the plaintiff "in all reasonable probability" would not have engaged in the injury-producing conduct.

In re Tobacco II Cases, 46 Cal. 4th at 326 (citations omitted).

No California court has addressed, however, if competitor plaintiffs must plead their own reliance or whether pleading consumer reliance is sufficient for fraudulent business practices claims brought by competitors. Furthermore, federal courts sitting in California disagree on this issue. For example, in *U.S. Legal Support, Inc. v. Hofioni, 2013 U.S. Dist. LEXIS 179282, 2013 WL 6844756, at *15 (E.D. Cal.)*, a court ruled that competitors do not have standing under the UCL fraudulent prong because they cannot plead their own reliance. ("As Plaintiff is not a consumer of Defendants' services, it cannot demonstrate reliance on Defendants' fraudulent statements in order to establish standing under the UCL's fraud prong.") See also *O'Connor v. Uber Techs., Inc., 58 F. Supp. 3d 989, 2014 U.S. Dist. LEXIS 124136, 2014 WL 4382880, at *9 (N.D. Cal.)* ("However, Plaintiffs have not alleged their own reliance on Uber's misrepresentations. Rather, the clear import of the FAC is that Uber's customers relied on the alleged misrepresentations. This third-party reliance is insufficient **[*21]** to establish standing under the fraud prong of the UCL.") On the other hand, in *VP Racing Fuels, Inc. v. Gen. Petroleum Corp., 2010 U.S. Dist. LEXIS 47453, 2010 WL 1611398, at *2 (E.D. Cal.)*, a court found that pleading customer reliance was sufficient to state a competitor's claim under the fraudulent prong of the UCL ("Plaintiff has been injured by consumer reliance upon Defendant's misrepresentations which have resulted in competitive harm and diverted sales.")

Here, Heartland pleads both its own reliance and consumer reliance. It alleges that, if not for Mercury's fraudulent conduct, it would not have engaged in injury-producing conduct such as lowering its fees in order to compete. Heartland argues that this is adequate to plead its own reliance as a direct competitor:

> Because Mercury falsely represents the actual prices it will charge merchants, Heartland and other payment processors are unable to accurately and effectively compete with Mercury's deceptive prices. Heartland has had to reduce its prices and therefore reduce its profit margin, in order to retain merchants who have been quoted deceptively low and false pricing by Mercury.

1AC ¶ 103.

The Court agrees that Heartland's allegations are sufficient. Heartland has also stated facts sufficient to plead consumer reliance. It alleges **[*22]** that at least six merchants were deceived by Mercury's fraudulent representations. Accordingly, the Court declines to dismiss Heartland's UCL cause of action for fraudulent business practices for failure to allege reliance.

IV. Third Cause of Action: False Advertising in Violation of *California Business and Professions Code section 17500 et seq.* (FAL)

> California's False Advertising Law makes it unlawful for any person to induce the public to enter into any obligation based on a statement that is untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading. Whether an advertisement is misleading must be judged by the effect it would have on a reasonable consumer. . . . A reasonable consumer is the ordinary consumer acting reasonably under the circumstances. To prevail under this standard, [Plaintiff] must show that members of the public are likely to be deceived by the advertisement.

Davis v. HSBC Bank Nev., N.A., 691 F.3d 1152, 1162 (9th Cir. 2012) (citations omitted).

Heartland relies on the same set of facts to support its FAL claims as it does its Lanham Act claim. Thus, as discussed above, Heartland has stated facts sufficient to support its allegation that Mercury made misrepresentations, in both in its written documents and oral statements, **[*23]** which induced merchants to use its payment processing services. It has also plead sufficient facts to support its own reliance and consumer reliance on Mercury's false advertising. Accordingly, the Court DENIES Mercury's motion to dismiss this cause of action.

V. Fourth Cause of Action: Intentional Interference with Contractual Relations (IICR)

> Under California law, the elements for the tort of intentional interference with contractual relations are (1) a valid contract between plaintiff and a third party; (2) defendant's knowledge of this contract; (3) defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; (4) actual breach or disruption of the contractual relationship; and (5) resulting damage.

United Nat. Maint., Inc. v. San Diego Convention Ctr., Inc., 766 F.3d 1002, 1006 (9th Cir. 2014) (citing *Pac. Gas & Elec. Co. v. Bear Stearns & Co., 50 Cal. 3d 1118, 270 Cal. Rptr. 1, 791 P.2d 587 (1990))*. However, "an interference with an at-will contract properly is viewed as an interference with a prospective economic advantage, a tort that similarly compensates for the loss of an advantageous economic relationship but does not require the existence of a legally binding contract." *Reeves v. Hanlon, 33 Cal. 4th 1140, 1152, 17 Cal. Rptr. 3d 289, 95 P.3d 513 (2004)*.

In its previous order, the Court found,

> While Heartland asserts that it has "identified nearly thirty merchants who have left Heartland for Mercury within **[*24]** the last six months prior to filing the Complaint," it admits it does not know "why every merchant who leaves Heartland has chosen to do so," and cannot know without discovery. Docket No. 25 at 24. Be that as it may, Heartland does not allege that any of its contracts with any former merchant have actually been breached, much less breached because of interference by Mercury.

November 7 , 2014 Order at 20.

In the 1AC, Heartland alleges that at least two California merchants -- Arena Football, 1AC ¶¶ 110-113, and Submarina, id. ¶¶ 123-130 -- used Heartland's payment processing services and were induced to sever their relationships with Heartland and contract with Mercury due to Mercury's interference. Heartland does not, however, plead that it had actual term contracts with these merchants such that it could satisfy Reeves' definition of a cause of action for an intentional interference with contractual relations.

For example, Heartland alleges that Arena Softball "left Heartland and switched to Mercury," because "Mercury's sales representative, knowing that the merchant was using Heartland's services, expressly represented to the merchant that it would save money by switching from Heartland **[*25]** to Mercury." Id. ¶ 110. Heartland does not allege, however, that it had a valid binding term contract with Arena Softball that was breached due to Mercury's interference.

Similarly, Heartland alleges that, in late 2008, Submarina, a California merchant to whom Heartland had been providing payment processing services, "decided to bid out [its business] to various payment processing companies." Id. ¶ 123. Heartland alleges that Mercury induced Submarina into contracting with it through underbidding Heartland. Heartland alleges that Submarina "switched [its] preferred credit processing company from Heartland . . . to Mercury . . . [because] Mercury by far provided the best rates." Id. ¶ 124. Yet, again Heartland fails to allege the existence of a valid binding contract that was not terminable atwill. Rather, Heartland alleges that "Mercury's false and deceptive advertising has disrupted Heartland's contractual relationships because it has caused merchants to terminate or not renew contracts with Heartland and to contract with Mercury instead." 1AC ¶ 105. As discussed below, these allegations support an intentional interference with prospective economic advantage cause of action because **[*26]** they claim that Mercury lost out on future business with these merchants.

Thus, the Court finds that Heartland has not plead facts sufficient to support its allegations that Mercury intentionally interfered with contractual relationships between Heartland and various merchants. Accordingly, the Court GRANTS Mercury's motion to dismiss Heartland's IICR cause of action. Because Heartland has already been granted leave to amend this cause of action, the Court need not grant leave to amend a second time. See *Arroyo v. Chattem, Inc., 926 F. Supp. 2d 1070, 1081 (N.D. Cal. 2012)*. Accordingly, dismissal is without leave to amend.

VI. Fifth Cause of Action: Intentional Interference with Prospective Economic Advantage (IIPEA)

Heartland alleges that it has "developed . . . prospective opportunities which are likely to benefit [it] in the future," but that Mercury, "with knowledge of these . . . future economic opportunities, engaged in wrongful and intentional actions to interfere with them by inducing . . . prospective merchants to sever their . . . prospective business relationships with Heartland and instead engage the services of" Mercury. 1AC ¶¶ 156-160.

Under California law, a plaintiff must plead the following five elements to state a claim for intentional **[*27]** interference with prospective economic advantage:

> [1] the existence of an economic relationship with some third party that contains the probability of future economic benefit to the plaintiff . . . [2] a defendant must have knowledge of the plaintiff's economic relationship . . . [3] the defendant must have engaged in intentionally wrongful acts designed to disrupt the plaintiff's relationship . . . [4] actual disruption of the[economic relationship . . . [and] [5] . . . that the economic harm . . . suffered was proximately caused by the acts of the defendant.

Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1165, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003). "[A] plaintiff seeking to recover for alleged interference with prospective economic relations has the burden of pleading and proving that the defendant's interference was wrongful by some measure beyond the fact of the interference itself." *Della Penna v. Toyota Motor Sales, USA, Inc., 11 Cal. 4th 376, 392-93, 45 Cal. Rptr. 2d 436, 902 P.2d 740 (1995)*. Furthermore, as noted above, "an interference with an at-will contract properly is viewed as an interference with a prospective economic advantage, a tort that similarly compensates for the loss of an advantageous economic relationship but does not require the existence of a legally binding contract." *Reeves, 33 Cal. 4th at 1152*.

As discussed above, Heartland's allegations with regard to Mercury's interference with **[*28]** its relationships with Arena Softball and Submarina are sufficient to support a claim for IIEPA. Also, in the 1AC, Heartland alleges that

Schat's, 1AC ¶¶ 108-109, and five Nothing Bundt Cake franchises, id. ¶¶ 114-116, considered using Heartland's payment processing services but were induced to contract with Mercury due to Mercury's fraudulent conduct. In addition, as discussed above, Heartland states facts sufficient to support its Lanham Act and FAL causes of action; hence it has also stated facts sufficient to allege that the interference was "wrong beyond measure of the interference itself."

Accordingly, the Court DENIES Mercury's motion to dismiss Heartland's IIPEA cause of action.

CONCLUSION

For the reasons stated above, the Court GRANTS in part and DENIES in part Mercury's motion to dismiss (Docket No. 67). The parties are directed to appear for a case management conference at 2:00 p.m. on Wednesday, April 1, 2015 in order to schedule further pretrial and trial proceedings. The parties shall submit a joint case management statement on or before March 25, 2015. If either party is unavailable on April 1, 2015, then the parties may submit a stipulation to continue the case management **[*29]** conference.

IT IS SO ORDERED.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Constitutional Law > State Sovereign Immunity > General Overview

HN1[] **Exemptions & Immunities, Parker State Action Doctrine**

Judicial precedent interprets the antitrust laws to confer immunity on anticompetitive conduct by the States when acting in their sovereign capacity. That ruling recognizes Congress's purpose to respect the federal balance and to embody in the Sherman Act, *15 U.S.C.S. § 1 et seq.*, the federalism principle that the States possess a significant measure of sovereignty under the United States Constitution.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN2[] **Exemptions & Immunities, Parker State Action Doctrine**

A non-sovereign actor controlled by active market participants enjoys Parker immunity only if it satisfies two requirements: first that the challenged restraint be one clearly articulated and affirmatively expressed as state policy, and second that the policy be actively supervised by the State.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN3[] **Exemptions & Immunities, Parker State Action Doctrine**

Although state-action immunity exists to avoid conflicts between state sovereignty and the Nation's commitment to a policy of robust competition, Parker immunity is not unbounded. Given the fundamental national values of free enterprise and economic competition that are embodied in the federal antitrust laws, state action immunity is disfavored, much as are repeals by implication.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN4[] **Exemptions & Immunities, Parker State Action Doctrine**

An entity may not invoke Parker immunity unless the actions in question are an exercise of the State's sovereign power. State legislation and decisions of a state supreme court, acting legislatively rather than judicially, will satisfy this standard, and ipso facto are exempt from the operation of the antitrust laws because they are an undoubted exercise of state sovereign authority.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN5[] **Exemptions & Immunities, Parker State Action Doctrine**

While the Sherman Act, *15 U.S.C.S. § 1 et seq.*, confers immunity on the States' own anticompetitive policies out of respect for federalism, it does not always confer immunity where a State delegates control over a market to a non-sovereign actor. For purposes of Parker immunity, a non-sovereign actor is one whose conduct does not automatically qualify as that of the sovereign State itself. State agencies are not simply by their governmental character sovereign actors for purposes of state-action immunity. Immunity for state agencies, therefore, requires more than a mere facade of state involvement, for it is necessary in light of Parker's rationale to ensure the States accept political accountability for anticompetitive conduct they permit and control.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Constitutional Law > Supremacy Clause > General Overview

HN6[] **Exemptions & Immunities, Parker State Action Doctrine**

Limits on state-action immunity are most essential when the State seeks to delegate its regulatory power to active market participants, for established ethical standards may blend with private anticompetitive motives in a way difficult even for market participants to discern. Dual allegiances are not always apparent to an actor. In consequence, active market participants cannot be allowed to regulate their own markets free from antitrust accountability. Indeed, prohibitions against anticompetitive self-regulation by active market participants are an axiom of federal antitrust policy. So it follows that, under Parker immunity and the *Supremacy Clause*, the States' greater power to attain an end does not include the lesser power to negate the congressional judgment embodied in the Sherman Act, *15 U.S.C.S. § 1 et seq.*, through unsupervised delegations to active market participants.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN7[] **Exemptions & Immunities, Parker State Action Doctrine**

Parker immunity requires that the anticompetitive conduct of non-sovereign actors, especially those authorized by the State to regulate their own profession, result from procedures that suffice to make it the State's own. The question is not whether the challenged conduct is efficient, well-functioning, or wise. Rather, it is whether anticompetitive conduct engaged in by non-sovereign actors should be deemed state action and thus shielded from the antitrust laws.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN8[] **Exemptions & Immunities, Parker State Action Doctrine**

A state law or regulatory scheme cannot be the basis for antitrust immunity unless, first, the State has articulated a clear policy to allow the anticompetitive conduct, and second, the State provides active supervision of the anticompetitive conduct.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN9[] **Parker State Action Doctrine, Local Governments & Private Parties**

The Midcal clear articulation requirement for state action immunity is satisfied where the displacement of competition is the inherent, logical, or ordinary result of the exercise of authority delegated by the state legislature. In that scenario, the State must have foreseen and implicitly endorsed the anticompetitive effects as consistent with its policy goals. The active supervision requirement demands, inter alia, that state officials have and exercise power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN10[] **Parker State Action Doctrine, Local Governments & Private Parties**

The two Midcal requirements provide a proper analytical framework to resolve the ultimate question whether an anticompetitive policy is indeed the policy of a State. The first requirement, clear articulation, rarely will achieve that goal by itself, for a policy may satisfy this test yet still be defined at so high a level of generality as to leave open critical questions about how and to what extent the market should be regulated. Entities purporting to act under state authority might diverge from the State's considered definition of the public good. The resulting asymmetry between a state policy and its implementation can invite private self-dealing. The second Midcal requirement, active supervision, seeks to avoid this harm by requiring the State to review and approve interstitial policies made by the entity claiming immunity.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN11[] **Parker State Action Doctrine, Local Governments & Private Parties**

The Midcal supervision rule stems from the recognition that where a private party is engaging in anticompetitive activity, there is a real danger that he is acting to further his own interests, rather than the governmental interests of the State. Concern about the private incentives of active market participants animates the Midcal supervision mandate, which demands realistic assurance that a private party's anticompetitive conduct promotes state policy, rather than merely the party's individual interests.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN12[] **Parker State Action Doctrine, Local Governments & Private Parties**

In determining whether anticompetitive policies and conduct are indeed the action of a State in its sovereign capacity, there are instances in which an actor can be excused from the Midcal active supervision requirement. Municipalities are subject exclusively to the Midcal clear articulation requirement. That rule is consistent with the objective of ensuring that the policy at issue be one enacted by the State itself. Where the actor is a municipality, there is little or no danger that it is involved in a private price-fixing arrangement. The only real danger is that it will seek to further purely parochial public interests at the expense of more overriding state goals. Municipalities are electorally accountable and lack the kind of private incentives characteristic of active participants in the market. Critically, the municipality in judicial precedent exercised a wide range of governmental powers across different economic spheres, substantially reducing the risk that it would pursue private interests while regulating any single field. That the precedent excuses municipalities from the Midcal supervision rule for these reasons all but confirms the rule's applicability to actors controlled by active market participants, who ordinarily have none of the features justifying the narrow exception precedent identifies.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN13[] **Exemptions & Immunities, Parker State Action Doctrine**

There is no conspiracy exception to Parker immunity.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN14[] **Exemptions & Immunities, Parker State Action Doctrine**

Recipients of Parker immunity will not lose it on the basis of ad hoc and ex post questioning of their motives for making particular decisions.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN15[] **Parker State Action Doctrine, Local Governments & Private Parties**

The Midcal limits on delegation must ensure that actual state involvement, not deference to private price-fixing arrangements under the general auspices of state law, is the precondition for immunity from federal law. The Midcal active supervision requirement, in particular, is an essential condition of state-action immunity when a non-sovereign actor has an incentive to pursue its own self-interest under the guise of implementing state policies. The lesson is clear: the Midcal active supervision test is an essential prerequisite of Parker immunity for any non-sovereign entity, public or private, controlled by active market participants.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN16[] **Parker State Action Doctrine, Local Governments & Private Parties**

Private trade associations must satisfy the Midcal active supervision standard to be entitled to Parker immunity.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN17[] **Parker State Action Doctrine, Local Governments & Private Parties**

The similarities between agencies controlled by active market participants and private trade associations are not eliminated simply because the former are given a formal designation by the State, vested with a measure of government power, and required to follow some procedural rules. Parker immunity does not derive from nomenclature alone. When a State empowers a group of active market participants to decide who can participate in its market, and on what terms, the need for supervision is manifest. A state board on which a controlling number of decisionmakers are active market participants in the occupation the board regulates must satisfy the Midcal active supervision requirement in order to invoke state-action antitrust immunity.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN18[] **Exemptions & Immunities, Parker State Action Doctrine**

States can ensure Parker immunity is available to agencies by adopting clear policies to displace competition; and, if agencies controlled by active market participants interpret or enforce those policies, the States may provide active supervision.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN19[] **Exemptions & Immunities, Parker State Action Doctrine**

Active supervision need not entail day-to-day involvement in an agency's operations or micromanagement of its every decision in order to qualify for Parker immunity. Rather, the question is whether the State's review mechanisms provide realistic assurance that a non-sovereign actor's anticompetitive conduct promotes state policy, rather than merely the party's individual interests.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN20[] **Exemptions & Immunities, Parker State Action Doctrine**

Judicial precedent identifies only a few constant requirements of active supervision for purposes of Parker immunity: (1) the supervisor must review the substance of the anticompetitive decision, not merely the procedures followed to produce it; (2) the supervisor must have the power to veto or modify particular decisions to ensure they accord with state policy; and (3) the mere potential for state supervision is not an adequate substitute for a decision by the State. Further, the state supervisor may not itself be an active market participant. In general, however, the adequacy of supervision otherwise will depend on all the circumstances of a case.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN21[] **Sherman Act, Scope**

The Sherman Act, *15 U.S.C.S. § 1 et seq.*, protects competition while also respecting federalism. It does not authorize the States to abandon markets to the unsupervised control of active market participants, whether trade associations or hybrid agencies. If a State wants to rely on active market participants as regulators, it must provide active supervision if state-action immunity is to be invoked.

Lawyers' Edition Display

Decision

[*35]** State dental examiners board created by state law held not allowed to invoke state-action antitrust immunity, as (1) controlling number of board's decisionmakers were active dental-market participants; and (2) board was not subject to active state supervision.

Summary

Overview: HOLDINGS: [1]-The Midcal active supervision test was an essential prerequisite of Parker immunity for any non-sovereign entity, public or private, controlled by active market participants; [2]-A state board on which a controlling number of decisionmakers were active market participants in the occupation the board regulated had to satisfy the Midcal active supervision requirement in order to invoke state-action antitrust immunity; [3]-The North Carolina State Board of Dental Examiners was not entitled to state-action antitrust immunity where, even assuming that the clear articulation standard was satisfied, the Board did not receive active supervision by the State when it interpreted the Dental Practice Act as addressing teeth whitening and when it enforced that policy by issuing cease-and-desist letters to non-dentist teeth whiteners.

Outcome: Judgment affirmed. 6-3 decision, 1 dissent.

Further, the state supervisor may not itself be an active market participant. In general, however, the adequacy of supervision otherwise will depend on all the circumstances of a case. (Kennedy, J., joined by Roberts, Ch. J., and Ginsburg, Breyer, Sotomayor, and Kagan, JJ.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §9.5 > STATE-ACTION EXEMPTION -- MARKET PARTICIPANTS -- SUPERVISION > Headnote:
LEdHN[21][] [21]

The Sherman Act, *15 U.S.C.S. § 1 et seq.*, protects competition while also respecting federalism. It does not authorize the states to abandon markets to the unsupervised control of active market participants, whether trade associations or hybrid agencies. If a state wants to rely on active market participants as regulators, it must provide active supervision if state-action immunity is to be invoked. (Kennedy, J., joined by Roberts, Ch. J., and Ginsburg, Breyer, Sotomayor, and Kagan, JJ.)

Syllabus

[*494] **[**1104]** **[***41]** North Carolina's Dental Practice Act (Act) provides that the North Carolina State Board of Dental Examiners (Board) is "the agency of the State for the regulation of the practice of dentistry." The Board's principal duty is to create, administer, and enforce a licensing system for dentists; and six of its eight members must be licensed, practicing dentists.

The Act does not specify that teeth whitening is "the practice of dentistry." Nonetheless, after dentists complained to the Board that nondentists were charging lower prices for such services than dentists did, the Board issued at least 47 official cease-and-desist letters to nondentist teeth whitening service providers and product manufacturers, often warning that the unlicensed practice of dentistry is a crime. This and other related Board actions led nondentists to cease offering teeth whitening services in North Carolina.

The Federal Trade Commission (FTC) filed an administrative complaint, alleging that the Board's concerted action to exclude nondentists from the market for teeth whitening services in North Carolina constituted an anticompetitive **[****2]** and unfair method of competition under the Federal Trade Commission Act. An Administrative Law Judge (ALJ) denied the Board's motion to dismiss on the ground of state-action immunity. The FTC sustained that ruling, reasoning that even if the Board had acted pursuant to a clearly articulated state policy to displace competition, the Board must be actively supervised by the State to claim immunity, which it was not. After a hearing on the mer- **[***42]** its, the ALJ determined that the Board had unreasonably restrained trade in violation of ***antitrust law***. The FTC again sustained the ALJ, and the Fourth Circuit affirmed the FTC in all respects.

Held: Because a controlling number of the Board's decisionmakers are active market participants in the occupation the Board regulates, the Board can invoke state-action antitrust immunity only if it was subject to active supervision by the State, and here that requirement is not met. *Pp. 502-516, 191 L. Ed. 2d, at 47-55, 135 S. Ct. 1101*.

(a) Federal ***antitrust law*** is a central safeguard for the Nation's free market structures. However, requiring States to conform to the mandates **[*495]** of the Sherman Act at the expense of other values a State may deem fundamental would impose an impermissible burden on the States' **[****3]** power to regulate. Therefore, beginning with *Parker v. Brown, 317 U. S. 341, 63 S. Ct. 307, 87 L. Ed. 315*, this Court interpreted the antitrust laws to confer immunity on the anticompetitive conduct of States acting in their sovereign capacity. *Pp. 502-503, 191 L. Ed. 2d, at 47*.

(b) The Board's actions are not cloaked with *Parker* immunity. A nonsovereign actor controlled by active market participants--such as the Board--enjoys *Parker* immunity only if " 'the challenged restraint . . . [is] clearly articulated and **[**1105]** affirmatively expressed as state policy,' and . . . 'the policy . . . [is] actively supervised by the State.' " *FTC v. Phoebe Putney Health System, Inc., 568 U. S. 216, 225, 133 S. Ct. 1003, 1010, 185 L. Ed. 2d 43, 53* (quoting *California Retail Liquor Dealers Assn. v. Midcal Aluminum, Inc., 445 U. S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233)*. Here, the Board did not receive active supervision of its anticompetitive conduct. *Pp. 503-514, 191 L. Ed. 2d, at 47-54*.

(1) An entity may not invoke *Parker* immunity unless its actions are an exercise of the State's sovereign power. See *Columbia v. Omni Outdoor Advertising, Inc., 499 U. S. 365, 374, 111 S. Ct. 1344, 113 L. Ed. 2d 382*. Thus, where a State delegates control over a market to a nonsovereign actor, the Sherman Act confers immunity only if the State accepts political accountability for the anticompetitive conduct it permits and controls. Limits on state-action immunity are most essential when a State seeks to delegate its regulatory power to active market participants, for dual allegiances are not always apparent to an actor and prohibitions against anticompetitive **[****4]** self-regulation by active market participants are an axiom of federal antitrust policy. Accordingly, *Parker* immunity requires that the anticompetitive conduct of nonsovereign actors, especially those authorized by the State to regulate their own profession, result from procedures that suffice to make it the State's own. *Midcal*'s two-part test provides a proper analytical framework to resolve the ultimate question whether an anticompetitive policy is indeed the policy of a State. The first requirement--clear articulation--rarely will achieve that goal by itself, for entities purporting to act under state authority might diverge from the State's considered definition of the public good and engage in private self-dealing. The second *Midcal* requirement--active supervision--seeks to avoid this harm by requiring the State to review and approve interstitial policies made by **[***43]** the entity claiming immunity. *Pp. 504-507, 191 L. Ed. 2d, at 48-50*.

(2) There are instances in which an actor can be excused from *Midcal*'s active supervision requirement. Municipalities, which are electorally accountable, have general regulatory powers, and have no private price-fixing agenda, are subject exclusively to the clear articulation **[****5]** requirement. See *Hallie v. Eau Claire, 471 U. S. 34, 35, 105 S. Ct. 1713, 85 L. Ed. 2d 24*. That *Hallie* excused municipalities from *Midcal*'s supervision rule for these reasons, **[*496]** however, all but confirms the rule's applicability to actors controlled by active market participants. Further, in light of *Omni*'s holding that an otherwise immune entity will not lose immunity based on ad hoc and *ex post* questioning of its motives for making particular decisions, *499 U. S., at 374, 111 S. Ct. 1344, 113 L. Ed. 2d 382*, it is all the more necessary to ensure the conditions for granting immunity are met in the first place, see *FTC v. Ticor Title Ins. Co., 504 U. S. 621, 633, 112 S. Ct. 2169, 119 L. Ed. 2d 410*, and *Phoebe Putney, supra, at 226, 133 S. Ct. 1003, 185 L. Ed. 2d 43*. The clear lesson of precedent is that *Midcal*'s active supervision test is an essential prerequisite of *Parker* immunity for any nonsovereign entity--public or private--controlled by active market participants. *Pp. 507-510, 191 L. Ed. 2d, at 50-52*.

(3) The Board's argument that entities designated by the States as agencies are exempt from *Midcal*'s second requirement cannot be reconciled with the Court's repeated conclusion that the need for supervision turns not on the formal designation given by States to regulators but on the risk that active market participants will pursue private interests in restraining trade. State agencies controlled by active market participants pose the very risk of self-dealing *Midcal*'s supervision **[****6] [**1106]** requirement was created to address. See *Goldfarb v. Virginia State Bar, 421 U. S. 773, 791, 95 S. Ct. 2004, 44 L. Ed. 2d 572*. This conclusion does not question the good faith of state officers but rather is an assessment of the structural risk of market participants' confusing their own interests with the State's policy goals. While *Hallie* stated "it is likely that active state supervision would also not be required" for agencies, *471 U. S., at 46, n. 10, 105 S. Ct. 1713, 85 L. Ed. 2d 24*, the entity there was more like prototypical state

agencies, not specialized boards dominated by active market participants. The latter are similar to private trade associations vested by States with regulatory authority, which must satisfy *Midcal*'s active supervision standard. 445 U. S., at 105-106, 100 S. Ct. 937, 63 L. Ed. 2d 233. The similarities between agencies controlled by active market participants and such associations are not eliminated simply because the former are given a formal designation by the State, vested with a measure of government power, and required to follow some procedural rules. See *Hallie, supra, at 39, 105 S. Ct. 1713, 85 L. Ed. 2d 24*. When a State empowers a group of active market participants to decide who can participate in its market, and on what terms, the need for supervision is manifest. Thus, the Court holds today that a state board on which a controlling number of decisionmakers are active market **[****7]** participants in the occupation the board regulates must satisfy *Midcal*'s active supervision requirement in order to invoke state-action anti- **[***44]** trust immunity. Pp. 510-512, 191 L. Ed. 2d, at 52-53.

(4) The State argues that allowing this FTC order to stand will discourage dedicated citizens from serving on state agencies that regulate their own occupation. But this holding is not inconsistent with the idea that those who pursue a calling must embrace ethical standards **[*497]** that derive from a duty separate from the dictates of the State. Further, this case does not offer occasion to address the question whether agency officials, including board members, may, under some circumstances, enjoy immunity from damages liability. Of course, States may provide for the defense and indemnification of agency members in the event of litigation, and they can also ensure *Parker* immunity is available by adopting clear policies to displace competition and providing active supervision. Arguments against the wisdom of applying the antitrust laws to professional regulation absent compliance with the prerequisites for invoking *Parker* immunity must be rejected, see *Patrick v. Burget, 486 U. S. 94, 105-106, 108 S. Ct. 1658, 100 L. Ed. 2d 83*, particularly in light of the risks licensing boards dominated by market participants **[****8]** may pose to the free market. Pp. 512-514, 191 L. Ed. 2d, at 53-54.

(5) The Board does not contend in this Court that its anticompetitive conduct was actively supervised by the State or that it should receive *Parker* immunity on that basis. The Act delegates control over the practice of dentistry to the Board, but says nothing about teeth whitening. In acting to expel the dentists' competitors from the market, the Board relied on cease-and-desist letters threatening criminal liability, instead of other powers at its disposal that would have invoked oversight by a politically accountable official. Whether or not the Board exceeded its powers under North Carolina law, there is no evidence of any decision by the State to initiate or concur with the Board's actions against the nondentists. P. 514, 191 L. Ed. 2d, at 54.

(c) Here, where there are no specific supervisory systems to be reviewed, it suffices to note that the inquiry regarding active supervision is flexible and context dependent. The question is whether the State's review mechanisms provide “realistic assurance” that a nonsovereign actor's **[**1107]** anticompetitive conduct “promotes state policy, rather than merely the party's individual interests.” *Patrick, 486 U. S., 100-101, 108 S. Ct. 1658, 100 L. Ed. 2d 83*. The Court has identified only a few **[****9]** constant requirements of active supervision: The supervisor must review the substance of the anticompetitive decision, see *id., at 102-103, 108 S. Ct. 1658, 100 L. Ed. 2d 83*; the supervisor must have the power to veto or modify particular decisions to ensure they accord with state policy, see *ibid.*; and the “mere potential for state supervision is not an adequate substitute for a decision by the State,” *Ticor, supra, at 638, 112 S. Ct. 2169, 119 L. Ed. 2d 410*. Further, the state supervisor may not itself be an active market participant. In general, however, the adequacy of supervision otherwise will depend on all the circumstances of a case. Pp. 515, 191 L. Ed. 2d, at 55.

717 F. 3d 359, affirmed.

Counsel: Hashim M. Mooppan argued the cause for petitioner.

Malcolm L. Stewart argued the cause for respondent.

Judges: Kennedy, J., delivered the opinion of the Court, in which Roberts, C. J., and Ginsburg, Breyer, Sotomayor, and Kagan, JJ., joined. **[*498]** Alito, J., filed a dissenting opinion, in which Scalia and Thomas, JJ., joined, *post*, p. 516.

Opinion by: Kennedy

Opinion

[*499] **[***45]** Justice **Kennedy** delivered the opinion of the Court.

This case arises from an antitrust challenge to the actions of a state regulatory board. A majority of the board's members are engaged in the active practice of the profession it regulates. The question is whether the board's actions are protected from Sherman Act regulation under the doctrine of state-action antitrust immunity, as defined and applied in **[****10]** this Court's decisions beginning with *Parker v. Brown, 317 U. S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*.

I

A

In its Dental Practice Act (Act), North Carolina has declared the practice of dentistry to be a matter of public concern requiring regulation. *N. C. Gen. Stat. Ann. §90-22(a)* (2013). Under the Act, the North Carolina State Board of Dental Examiners (Board) is "the agency of the State for the regulation of the practice of dentistry." *§90-22(b)*.

The Board's principal duty is to create, administer, and enforce a licensing system for dentists. See *§§90-29 to 90-41*. To perform that function it has broad authority over licensees. See *§90-41*. The Board's authority with respect to unlicensed persons, however, is more restricted: Like "any resident citizen," the Board may file suit to "perpetually enjoin any person from . . . unlawfully practicing dentistry." *§90-40.1*.

[1108]** The Act provides that six of the Board's eight members must be licensed dentists engaged in the active practice of dentistry. *§90-22*. They are elected by other licensed dentists in North Carolina, who cast their ballots in elections conducted by the Board. *Ibid.* The seventh member must **[*500]** be a licensed and practicing dental hygienist, and he or she is elected by other licensed hygienists. *Ibid.* The final member is referred to by the Act as a "consumer" and is appointed **[****11]** by the Governor. *Ibid.* All members serve 3-year terms, and no person may serve more than two consecutive terms. *Ibid.* The Act does not create any mechanism for the removal of an elected member of the Board by a public official. See *ibid.*

Board members swear an oath of office, *§138A-22(a)*, and the Board must comply with the State's Administrative Procedure Act, *§150B-1 et seq.*, Public Records Act, *§132-1 et seq.*, and open-meetings law, *§143-318.9 et seq.* The Board may promulgate rules and regulations governing the practice of dentistry within the State, provided those mandates are not inconsistent with the Act and are approved by the North Carolina Rules Review Commission, whose members are appointed by the state legislature. See *§§90-48*, *143B-30.1*, *150B-21.9(a)*.

B

In the 1990's, dentists in North Carolina started whitening teeth. Many of those who did so, including 8 of the Board's 10 members during the period at issue in this case, earned substantial fees for that service. By 2003, nondentists arrived on the scene. They charged lower prices for their services than the dentists did. Dentists soon began to complain to the Board about their new competitors. Few complaints warned of possible harm to consumers. Most expressed **[***46]** a principal concern with the low prices charged **[****12]** by nondentists.

Responding to these filings, the Board opened an investigation into nondentist teeth whitening. A dentist member was placed in charge of the inquiry. Neither the Board's hygienist member nor its consumer member participated in this undertaking. The Board's chief operations officer remarked that the Board was "going forth to do battle" with nondentists. App. to Pet. for Cert. 103a. The Board's concern **[*501]** did not result in a formal rule or regulation reviewable by the independent Rules Review Commission, even though the Act does not, by its terms, specify that teeth whitening is "the practice of dentistry."

Starting in 2006, the Board issued at least 47 cease-and-desist letters on its official letterhead to nondentist teeth whitening service providers and product manufacturers. Many of those letters directed the recipient to cease "all activity constituting the practice of dentistry"; warned that the unlicensed practice of dentistry is a crime; and strongly implied (or expressly stated) that teeth whitening constitutes "the practice of dentistry." App. 13, 15. In early 2007, the Board persuaded the North Carolina Board of Cosmetic Art Examiners to warn cosmetologists against **[****13]** providing teeth whitening services. Later that year, the Board sent letters to mall operators, stating that kiosk teeth whiteners were violating the Act and advising that the malls consider expelling violators from their premises.

These actions had the intended result. Nondentists ceased offering teeth whitening services in North Carolina.

C

In 2010, the Federal Trade Commission (FTC) filed an administrative complaint charging the Board with violating §5 of **[**1109]** the Federal Trade Commission Act, 38 Stat. 719, as amended, *15 U. S. C. §45*. The FTC alleged that the Board's concerted action to exclude nondentists from the market for teeth whitening services in North Carolina constituted an anticompetitive and unfair method of competition. The Board moved to dismiss, alleging state-action immunity. An Administrative Law Judge (ALJ) denied the motion. On appeal, the FTC sustained the ALJ's ruling. It reasoned that, even assuming the Board had acted pursuant to a clearly articulated state policy to displace competition, the Board is a "public/private hybrid" that must be actively supervised by the State to claim immunity. App. to Pet. for Cert. 49a. **[*502]** The FTC further concluded the Board could not make that showing. **[****14]**

Following other proceedings not relevant here, the ALJ conducted a hearing on the merits and determined the Board had unreasonably restrained trade in violation of ***antitrust law***. On appeal, the FTC again sustained the ALJ. The FTC rejected the Board's public safety justification, noting, *inter alia*, "a wealth of evidence . . . suggesting that non-dentist provided teeth whitening is a safe cosmetic procedure." *Id.,* at 123a.

The FTC ordered the Board to stop sending the cease-and-desist letters or other communications that stated nondentists may not offer teeth whitening services and products. It further ordered the Board to issue notices to all earlier recipients of the Board's cease-and-desist orders advising them of the Board's proper sphere **[***47]** of authority and saying, among other options, that the notice recipients had a right to seek declaratory rulings in state court.

On petition for review, the Court of Appeals for the Fourth Circuit affirmed the FTC in all respects. *717 F. 3d 359, 370 (2013)*. This Court granted certiorari. *571 U. S. 1236, 134 S. Ct. 1491, 188 L. Ed. 2d 375 (2014)*.

II

Federal ***antitrust law*** is a central safeguard for the Nation's free market structures. In this regard it is "as important to the preservation of economic freedom and our free-enterprise system **[****15]** as the *Bill of Rights* is to the protection of our fundamental personal freedoms." *United States v. Topco Associates, Inc., 405 U. S. 596, 610, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*. The antitrust laws declare a considered and decisive prohibition by the Federal Government of cartels, price fixing, and other combinations or practices that undermine the free market.

The Sherman Act, 26 Stat. 209, as amended, *15 U. S. C. §1 et seq.*, serves to promote robust competition, which in turn empowers the States and provides their citizens with opportunities to pursue their own and the public's welfare. See **[*503]** *FTC v. Ticor Title Ins. Co., 504 U. S. 621, 632, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992)*. The States, however, when acting in their respective realm, need not adhere in all contexts to a model of unfettered competition. While "the States regulate their economies in many ways not inconsistent with the antitrust laws," *id., at 635-636, 112 S. Ct. 2169, 119 L. Ed. 2d 410*, in some spheres they impose restrictions on occupations, confer exclusive or shared rights to dominate a market, or otherwise limit competition to achieve public objectives. If every duly enacted state law or policy were required to conform to the mandates of the Sherman Act, thus promoting competition at the expense of other values a State may deem fundamental, federal ***antitrust law*** would impose an impermissible burden on the States' power to regulate. See *Exxon Corp. v. Governor of Maryland, 437 U. S. 117,* 133, 98 S. Ct. 2207, 57 L. Ed. 2d 91 (1978); see also Easterbrook, **[**1110]** Antitrust and **[****16]** the Economics of Federalism, 26 J. Law & Econ. 23, 24 (1983).

For these reasons, ***HN1***[] ***LEdHN[1]***[] [1] the Court in *Parker* v. *Brown* interpreted the antitrust laws to confer immunity on anticompetitive conduct by the States when acting in their sovereign capacity. See 317 U. S., at 350-351, 63 S. Ct. 307, 87 L. Ed. 315 . That ruling recognized Congress' purpose to respect the federal balance and to "embody in the Sherman Act the federalism principle that the States possess a significant measure of sovereignty under our Constitution." Community Communications Co. v. Boulder, 455 U. S. 40, 53, 102 S. Ct. 835, 70 L. Ed. 2d 810 (1982). Since 1943, the Court has reaffirmed the importance of *Parker*'s central holding. See, *e.g.,* Ticor, supra, at 632-637, 112 S. Ct. 2169, 119 L. Ed. 2d 410; Hoover v. Ronwin, 466 U. S. 558, 568, 104 S. Ct. 1989, 80 L. Ed. 2d 590 (1984); Lafayette v. Louisiana Power & Light Co., 435 U. S. 389, 394-400, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978).

III

In this case the Board argues its members were invested by North Carolina with the power of the State and that, as a result, the Board's **[***48]** actions are cloaked with Parker immunity. This argument fails, however. ***HN2***[] ***LEdHN[2]***[] [2] A nonsovereign actor controlled by active market participants — such as the **[*504]** Board — enjoys *Parker* immunity only if it satisfies two requirements: "first that 'the challenged restraint . . . be one clearly articulated and affirmatively expressed as state policy,' and second that 'the policy . . . be actively supervised by the State.'" FTC v. Phoebe Putney Health System, Inc., 568 U. S. 216, 225, 568 U.S. 216, 133 S. Ct. 1003, 1010, 185 L. Ed. 2d 43, 53 (2013) (quoting California Retail Liquor Dealers Assn. v. Midcal Aluminum, Inc., 445 U. S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)). The parties have assumed that the clear articulation requirement is satisfied, and we do the same. **[****17]** While North Carolina prohibits the unauthorized practice of dentistry, however, its Act is silent on whether that broad prohibition covers teeth whitening. Here, the Board did not receive active supervision by the State when it interpreted the Act as addressing teeth whitening and when it enforced that policy by issuing cease-and-desist letters to nondentist teeth whiteners.

A

HN3[] ***LEdHN[3]***[] [3] Although state-action immunity exists to avoid conflicts between state sovereignty and the Nation's commitment to a policy of robust competition, *Parker* immunity is not unbounded. "[G]iven the fundamental national values of free enterprise and economic competition that are embodied in the federal antitrust laws, 'state-action immunity is disfavored, much as are repeals by implication.'" Phoebe Putney, supra, at 225, 133 S. Ct. 1003, 1010, 185 L. Ed. 2d 43, 53) (quoting Ticor, supra, at 636, 112 S. Ct. 2169, 119 L. Ed. 2d 410).

HN4[] ***LEdHN[4]***[] [4] An entity may not invoke *Parker* immunity unless the actions in question are an exercise of the State's sovereign power. See Columbia v. Omni Outdoor Advertising, Inc., 499 U. S. 365, 374, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991). State legislation and "decision[s] of a state supreme court, acting legislatively rather than judicially," will satisfy this standard, and "*ipso facto* are exempt from the operation of the antitrust laws" because they are an undoubted exercise of state sovereign authority. Hoover, supra, at 567-568, 104 S. Ct. 1989, 80 L. Ed. 2d 590.

But ***HN5***[] ***LEdHN[5]***[] [5] while the **[****18]** Sherman Act confers immunity on the States' own anticompetitive policies out of respect for federalism, **[*505]** it does not always confer immunity where, as here, a State delegates control over a market to a nonsovereign actor. See Parker, supra, at 351, 63 S. Ct. 307, 87 L. Ed. 315 **[**1111]** ("[A] state does not give immunity to those who violate the Sherman Act by authorizing them to violate it, or by declaring that their action is lawful"). For purposes of *Parker*, a nonsovereign actor is one whose conduct does not automatically qualify as that of the sovereign State itself. See Hoover, supra, at 567-568, 104 S. Ct. 1989, 80 L. Ed. 2d 590 . State agencies are not simply by their governmental character sovereign actors for purposes of state-action immunity. See Goldfarb v. Virginia State Bar, 421 U. S. 773, 791, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975) ("The fact that the State Bar is a state agency for some limited purposes does not create an antitrust shield that allows it to foster anticompetitive practices for the benefit of its members"). Immunity for state agencies, therefore, requires more than a mere facade of state involvement, for it is necessary in light of *Parker*'s rationale to ensure

[*49]** the States accept political accountability for anticompetitive conduct they permit and control. See *Ticor, supra, at 636, 112 S. Ct. 2169, 119 L. Ed. 2d 410*.

HN6[] ***LEdHN[6]***[] [6] Limits on state-action immunity are most essential when the State seeks to delegate **[****19]** its regulatory power to active market participants, for established ethical standards may blend with private anticompetitive motives in a way difficult even for market participants to discern. Dual allegiances are not always apparent to an actor. In consequence, active market participants cannot be allowed to regulate their own markets free from antitrust accountability. See *Midcal, supra, at 106, 100 S. Ct. 937, 63 L. Ed. 2d 233* ("The national policy in favor of competition cannot be thwarted by casting . . . gauzy cloak of state involvement over what is essentially a private price-fixing arrangement"). Indeed, prohibitions against anticompetitive self-regulation by active market participants are an axiom of federal antitrust policy. See, *e.g., Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U. S. 492, 501, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)*; *Hoover, supra, at 584, 104 S. Ct. 1989, 80 L. Ed. 2d 590* (Stevens, J., dissenting) ("The risk that private regulation of market entry, prices, or output may be **[*506]** designed to confer monopoly profits on members of an industry at the expense of the consuming public has been the central concern of . . . our antitrust jurisprudence"); see also Elhauge, The Scope of Antitrust Process, *104 Harv. L. Rev. 667, 672 (1991)*. So it follows that, under *Parker*and the *Supremacy Clause*, the States' greater power to attain an end does not include the lesser power to negate the congressional judgment **[****20]** embodied in the Sherman Act through unsupervised delegations to active market participants. See Garland, Antitrust and State Action: Economic Efficiency and the Political Process, *96 Yale L. J. 486, 500 (1986)*.

HN7[] ***LEdHN[7]***[] [7] *Parker* immunity requires that the anticompetitive conduct of nonsovereign actors, especially those authorized by the State to regulate their own profession, result from procedures that suffice to make it the State's own. See *Goldfarb, supra, at 790, 95 S. Ct. 2004, 44 L. Ed. 2d 572*; see also 1A P. Areeda & H. Hovenkamp, ***Antitrust Law*** ¶226, p. 180 (4th ed. 2013) (Areeda & Hovenkamp). The question is not whether the challenged conduct is efficient, well functioning, or wise. See *Ticor, 504 U. S., at 634-635, 112 S. Ct. 2169, 119 L. Ed. 2d 410*. Rather, it is "whether anticompetitive conduct engaged in by [nonsovereign actors] should be deemed state action and thus shielded from the antitrust laws." *Patrick v. Burget, 486 U. S. 94, 100, 108 S. Ct. 1658, 100 L. Ed. 2d 83 (1988)*.

To answer this question, the Court applies the two-part test set forth in *California Retail Liquor Dealers Assn. v. Midcal Aluminum, Inc., 445 U. S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233*, a case arising from California's delegation of price-fixing authority **[**1112]** to wine merchants. Under *Midcal*, ***HN8***[] ***LEdHN[8]***[] [8] "[a] state law or regulatory scheme cannot be the basis for antitrust immunity unless, first, the State has articulated a clear . . . policy to allow the anticompetitive conduct, and second, the State provides active supervision of [the] **[****21]** anticompetitive conduct." *Ticor, supra, at 631, 112 S. Ct. 2169, 119 L. Ed. 2d 410* (citing *Midcal, supra, at 105, 100 S. Ct. 937, 63 L. Ed. 2d 233*.

[*50]** ***HN9***[] ***LEdHN[9]***[] [9] *Midcal*'s clear articulation requirement is satisfied "where the displacement of competition [is] the inherent, logical, or ordinary result of the exercise of authority delegated by the **[*507]** state legislature. In that scenario, the State must have foreseen and implicitly endorsed the anticompetitive effects as consistent with its policy goals." *Phoebe Putney, 568 U. S., at 229, 133 S. Ct. 1003, 185 L. Ed. 2d 43, 56*). The active supervision requirement demands, *inter alia*, "that state officials have and exercise power to review particular anticompetitive acts of private parties and disapprove those that fail to accord with state policy." *Patrick, supra, at 101, 108 S. Ct. 1658, 100 L. Ed. 2d 83*.

HN10[] ***LEdHN[10]***[] [10] The two requirements set forth in *Midcal* provide a proper analytical framework to resolve the ultimate question whether an anticompetitive policy is indeed the policy of a State. The first requirement — clear articulation — rarely will achieve that goal by itself, for a policy may satisfy this test yet still be defined at so high a level of generality as to leave open critical questions about how and to what extent the market should be regulated. See *Ticor, supra, at 636-637, 112 S. Ct. 2169, 119 L. Ed. 2d 410*. Entities purporting to act under state authority might diverge from the State's considered definition **[****22]** of the public good. The resulting asymmetry between a state policy and its implementation can invite private self-dealing. The second *Midcal* requirement —

active supervision — seeks to avoid this harm by requiring the State to review and approve interstitial policies made by the entity claiming immunity.

HN11[] **LEdHN[11]**[] [11] *Midcal*'s supervision rule "stems from the recognition that '[w]here a private party is engaging in anticompetitive activity, there is a real danger that he is acting to further his own interests, rather than the governmental interests of the State.'" *Patrick, supra, at 100, 108 S. Ct. 1658, 100 L. Ed. 2d 83*. Concern about the private incentives of active market participants animates *Midcal*'s supervision mandate, which demands "realistic assurance that a private party's anticompetitive conduct promotes state policy, rather than merely the party's individual interests." *Patrick, supra, at 101, 108 S. Ct. 1658, 100 L. Ed. 2d 83*.

B

HN12[] **LEdHN[12]**[] [12] In determining whether anticompetitive policies and conduct are indeed the action of a State in its sovereign capacity, **[*508]** there are instances in which an actor can be excused from *Midcal*'s active supervision requirement. In *Hallie v. Eau Claire, 471 U. S. 34, 45, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)*, the Court held municipalities are subject exclusively to *Midcal*'s "'clear articulation'" requirement. That rule, the Court observed, is **[****23]** consistent with the objective of ensuring that the policy at issue be one enacted by the State itself. *Hallie* explained that "[w]here the actor is a municipality, there is little or no danger that it is involved in a private price-fixing arrangement. The only real danger is that it will seek to further purely parochial public interests at the expense of more overriding state goals." *471 U. S., at 47, 105 S. Ct. 1713, 85 L. Ed. 2d 24* (emphasis deleted).*Hallie* further observed that municipalities are electorally accountable and lack the kind of private incentives characteristic of active participants in the market. See *id., at 45, n. 9, 105 S. Ct. 1713, 85 L. Ed. 2d 24*. Critically, the municipality in *Hallie* exercised a wide range of governmental **[**1113]** powers **[***51]** across different economic spheres, substantially reducing the risk that it would pursue private interests while regulating any single field. See *ibid.* That *Hallie* excused municipalities from *Midcal*'s supervision rule for these reasons all but confirms the rule's applicability to actors controlled by active market participants, who ordinarily have none of the features justifying the narrow exception *Hallie* identified. See *471 U. S., at 45, 105 S. Ct. 1713, 85 L. Ed. 2d 24*.

Following *Goldfarb*, *Midcal*, and *Hallie*, which clarified the conditions under which *Parker* immunity attaches to the conduct of a nonsovereign **[****24]** actor, the Court in *Columbia v. Omni Outdoor Advertising, Inc., 499 U. S. 365, 111 S. Ct. 1344, 113 L. Ed. 2d 382*, addressed whether an otherwise immune entity could lose immunity for conspiring with private parties. In *Omni*, an aspiring billboard merchant argued that the city of Columbia, South Carolina, had violated the Sherman Act—and forfeited its *Parker* immunity—by anticompetitively conspiring with an established local company in passing an ordinance restricting new billboard construction. *499 U. S., at 367-368, 111 S. Ct. 1344, 113 L. Ed. 2d 382*. The **[*509]** Court disagreed, holding **HN13**[] **LEdHN[13]**[] [13] there is no "conspiracy exception" to Parker. *Omni, supra, at 374, 111 S. Ct. 1344, 113 L. Ed. 2d 382*.

Omni, like the cases before it, recognized the importance of drawing a line "relevant to the purposes of the Sherman Act and of *Parker*: prohibiting the restriction of competition for private gain but permitting the restriction of competition in the public interest." *499 U. S., at 378, 111 S. Ct. 1344, 113 L. Ed. 2d 382*. In the context of a municipal actor which, as in *Hallie*, exercised substantial governmental powers, *Omni* rejected a conspiracy exception for "corruption" as vague and unworkable, since "virtually all regulation benefits some segments of the society and harms others" and may in that sense be seen as "'corrupt.'" *499 U. S., at 377, 111 S. Ct. 1344, 113 L. Ed. 2d 382*. *Omni* also rejected subjective tests for corruption that would force a "deconstruction of the governmental process and probing of the official **[****25]** 'intent' that we have consistently sought to avoid." *Ibid.* Thus, whereas the cases preceding it addressed the preconditions of *Parker* immunity and engaged in an objective, *ex ante* inquiry into nonsovereign actors' structure and incentives, *Omni* made clear that **HN14**[] **LEdHN[14]**[] [14] recipients of immunity will not lose it on the basis of ad hoc and *ex post* questioning of their motives for making particular decisions.

Omni's holding makes it all the more necessary to ensure the conditions for granting immunity are met in the first place. The Court's two state-action immunity cases decided after *Omni* reinforce this point. In *Ticor,* the Court affirmed that **HN15**[] **LEdHN[15]**[] [15] *Midcal*'s limits on delegation must ensure that "[a]ctual state involvement, not deference to private price-fixing arrangements under the general auspices of state law, is the precondition for immunity from federal law." *504 U. S., at 633, 112 S. Ct. 2169, 119 L. Ed. 2d 410*. And in *Phoebe Putney,* the Court observed that *Midcal*'s active supervision requirement, in particular, is an essential condition of state-action immunity when a nonsovereign actor has "an incentive to pursue [its] own self-interest under the guise of implementing state policies." **[*510]** *568 U. S., at 226, 133 S. Ct. 1003, 1011, 185 L. Ed. 2d 43, 54*) (quoting *Hallie, supra, at 46-47, 105* ***[***52]*** *S. Ct. 1713, 85 L. Ed. 2d 24*). The lesson is clear: *Midcal*'s active supervision **[****26]** test is an essential prerequisite of *Parker* immunity for any nonsovereign entity — public or private — controlled by active market participants.

C

The Board argues entities designated by the States as agencies are exempt from *Midcal*'s second requirement. **[**1114]** That premise, however, cannot be reconciled with the Court's repeated conclusion that the need for supervision turns not on the formal designation given by States to regulators but on the risk that active market participants will pursue private interests in restraining trade.

State agencies controlled by active market participants, who possess singularly strong private interests, pose the very risk of self-dealing *Midcal*'s supervision requirement was created to address. See Areeda & Hovenkamp ¶227, at 226. This conclusion does not question the good faith of state officers but rather is an assessment of the structural risk of market participants' confusing their own interests with the State's policy goals. See *Patrick, 486 U. S., at 100-101, 108 S. Ct. 1658, 100 L. Ed. 2d 83*.

The Court applied this reasoning to a state agency in *Goldfarb*. There the Court denied immunity to a state agency (the Virginia State Bar) controlled by market participants (lawyers) because the agency had "joined in what is essentially **[****27]** a private anticompetitive activity" for "the benefit of its members." *421 U. S., at 791, 792, 95 S. Ct. 2004, 44 L. Ed. 2d 572*. This emphasis on the Bar's private interests explains why *Goldfarb*, though it predates *Midcal*, considered the lack of supervision by the Virginia Supreme Court to be a principal reason for denying immunity. See *421 U. S., at 791, 95 S. Ct. 2004, 44 L. Ed. 2d 572*; see also *Hoover, 466 U. S., at 569, 104 S. Ct. 1989, 80 L. Ed. 2d 590* (emphasizing lack of active supervision in *Goldfarb*); *Bates v. State Bar of Ariz., 433 U. S. 350, 361-362, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977)* (granting the Arizona Bar state-action immunity partly because **[*511]** its "rules are subject to pointed re-examination by the policymaker").

While *Hallie* stated "it is likely that active state supervision would also not be required" for agencies, *471 U. S., at 46, n. 10, 105 S. Ct. 1713, 85 L. Ed. 2d 24*, the entity there, as was later the case in *Omni*, was an electorally accountable municipality with general regulatory powers and no private price-fixing agenda. In that and other respects the municipality was more like prototypical state agencies, not specialized boards dominated by active market participants. In important regards, agencies controlled by market participants are more similar to private trade associations vested by States with regulatory authority than to the agencies *Hallie*considered. And as the Court observed three years after *Hallie*, "[t]here is no doubt that the members of such associations **[****28]** often have economic incentives to restrain competition and that the product standards set by such associations have a serious potential for anticompetitive harm." *Allied Tube, 486 U. S., at 500, 108 S. Ct. 1931, 100 L. Ed. 2d 497* . For that reason, ***HN16***[] ***LEdHN[16]***[] [16] those associations must satisfy *Midcal*'s active supervision standard. See *Midcal, 445 U. S., at 105-106, 100 S. Ct. 937, 63 L. Ed. 2d 233*.

HN17[] ***LEdHN[17]***[] [17] The similarities between agencies controlled by active market participants and private trade associations **[***53]** are not eliminated simply because the former are given a formal designation by the State, vested with a measure of government power, and required to follow some procedural rules. See *Hallie, supra, at 39, 105 S. Ct. 1713, 85 L. Ed. 2d 24* (rejecting "purely formalistic" analysis). *Parker* immunity does not derive from nomenclature alone. When a State empowers a group of active market participants to decide who can participate in its market, and on what terms, the need for supervision is manifest. See Areeda & Hovenkamp ¶227, at 226. The Court holds today that a state board on which a controlling number of decisionmakers are active market participants in the occupation the board regulates must satisfy *Midcal's* active **[*512]** supervision requirement in order to invoke state-action antitrust immunity.

[1115]** D

The State argues that allowing this FTC order to stand will discourage dedicated **[****29]** citizens from serving on state agencies that regulate their own occupation. If this were so — and, for reasons to be noted, it need not be so — there would be some cause for concern. The States have a sovereign interest in structuring their governments, see *Gregory v. Ashcroft, 501 U. S. 452, 460, 111 S. Ct. 2395, 115 L. Ed. 2d 410 (1991)*, and may conclude there are substantial benefits to staffing their agencies with experts in complex and technical subjects, see *Southern Motor Carriers Rate Conference, Inc. v. United States, 471 U. S. 48, 64, 105 S. Ct. 1721, 85 L. Ed. 2d 36 (1985)*. There is, moreover, a long tradition of citizens esteemed by their professional colleagues devoting time, energy, and talent to enhancing the dignity of their calling.

Adherence to the idea that those who pursue a calling must embrace ethical standards that derive from a duty separate from the dictates of the State reaches back at least to the Hippocratic Oath. See generally S. Miles, The Hippocratic Oath and the Ethics of Medicine (2004). In the United States, there is a strong tradition of professional self-regulation, particularly with respect to the development of ethical rules. See generally R. Rotunda & J. Dzienkowski, Legal Ethics: The Lawyer's Deskbook on Professional Responsibility (2014); R. Baker, Before Bioethics: A History of American Medical Ethics From the Colonial Period to the Bioethics **[****30]** Revolution (2013). Dentists are no exception. The American Dental Association, for example, in an exercise of "the privilege and obligation of self-government," has "call[ed] upon dentists to follow high ethical standards," including "honesty, compassion, kindness, integrity, fairness and charity." American Dental Association, Principles of Ethics and Code of Professional Conduct 3-4 (2012). **[*513]** State laws and institutions are sustained by this tradition when they draw upon the expertise and commitment of professionals.

Today's holding is not inconsistent with that idea. The Board argues, however, that the potential for money damages will discourage members of regulated occupations from participating in state government. Cf. *Filarsky v. Delia, 566 U. S. 377, 390, 566 U.S. 377, 132 S. Ct. 1657, 1666, 182 L. Ed. 2d 662, 672 (2012)*) (warning in the context of civil rights suits that "the most talented candidates will decline public engagements if they do not receive the same immunity enjoyed by their public employee counterparts"). But this case, which does not present a claim for money damages, does not offer occasion **[***54]** to address the question whether agency officials, including board members, may, under some circumstances, enjoy immunity from damages liability. See *Goldfarb, 421 U. S., at 792, n. 22, 95 S. Ct. 2004, 44 L. Ed. 2d 572*; see also Brief for Respondent **[****31]** 56. And, of course, the States may provide for the defense and indemnification of agency members in the event of litigation.

HN18[] ***LEdHN[18]***[] [18] States, furthermore, can ensure *Parker* immunity is available to agencies by adopting clear policies to displace competition; and, if agencies controlled by active market participants interpret or enforce those policies, the States may provide active supervision. Precedent confirms this principle. The Court has rejected the argument that it would be unwise to apply the antitrust laws to professional regulation absent compliance with the prerequisites for invoking *Parker* immunity:

> "[Respondents] contend that effective peer review is essential to the provision of quality medical care and that any threat of antitrust liability will prevent physicians from participating openly and **[**1116]** actively in peer-review proceedings. This argument, however, essentially challenges the wisdom of applying the antitrust laws to the sphere of medical care, and as such is properly directed to the legislative branch. To the extent that Congress **[*514]** has declined to exempt medical peer review from the reach of the antitrust laws, peer review is immune from antitrust scrutiny only if the State effectively **[****32]** has made this conduct its own." *Patrick, 486 U. S., at 105-106, 108 S. Ct. 1658, 100 L. Ed. 2d 83* (footnote omitted).

The reasoning of *Patrick v. Burget* applies to this case with full force, particularly in light of the risks licensing boards dominated by market participants may pose to the free market. See generally Edlin & Haw, Cartels by Another Name: Should Licensed Occupations Face Antitrust Scrutiny? *162 U. Pa. L. Rev. 1093 (2014)*.

E

The Board does not contend in this Court that its anticompetitive conduct was actively supervised by the State or that it should receive *Parker* immunity on that basis.

By statute, North Carolina delegates control over the practice of dentistry to the Board. The Act, however, says nothing about teeth whitening, a practice that did not exist when it was passed. After receiving complaints from other dentists about the nondentists' cheaper services, the Board's dentist members — some of whom offered whitening services — acted to expel the dentists' competitors from the market. In so doing the Board relied upon cease-and-desist letters threatening criminal liability, rather than any of the powers at its disposal that would invoke oversight by a politically accountable official. With no active supervision by the State, North Carolina officials may well **[****33]** have been unaware that the Board had decided teeth whitening constitutes "the practice of dentistry" and sought to prohibit those who competed against dentists from participating in the teeth whitening market. Whether or not the Board exceeded its powers under North Carolina law, cf. *Omni, 499 U. S., at 371-372, 111 S. Ct. 1344, 113 L. Ed. 2d 382*, there is no evidence here of any decision by the State to initiate or concur with the Board's actions against the nondentists.

[*515] **[***55]** IV

The Board does not claim that the State exercised active, or indeed any, supervision over its conduct regarding nondentist teeth whiteners; and, as a result, no specific supervisory systems can be reviewed here. It suffices to note that the inquiry regarding active supervision is flexible and context dependent. ***HN19***[] ***LEdHN[19]***[] [19] Active supervision need not entail day-to-day involvement in an agency's operations or micromanagement of its every decision. Rather, the question is whether the State's review mechanisms provide "realistic assurance" that a nonsovereign actor's anticompetitive conduct "promotes state policy, rather than merely the party's individual interests." *Patrick, supra, at 100-101, 108 S. Ct. 1658, 100 L. Ed. 2d 83*; see also *Ticor, 504 U. S., at 639-640, 112 S. Ct. 2169, 119 L. Ed. 2d 410*.

HN20[] ***LEdHN[20]***[] [20] The Court has identified only a few constant requirements of active supervision: The supervisor must **[****34]** review the substance of the anticompetitive decision, not merely the procedures followed to produce it, see *Patrick, 486 U. S., at 102-103, 108 S. Ct. 1658, 100 L. Ed. 2d 83*; the supervisor must have the power to veto or modify particular decisions to ensure they accord with state policy, see *ibid.*; and the "mere potential for state supervision is not an adequate substitute for a decision by the State," *Ticor, supra, at 638, 112 S. Ct. 2169, 119 L. Ed. 2d 410*. Further, **[**1117]** the state supervisor may not itself be an active market participant. In general, however, the adequacy of supervision otherwise will depend on all the circumstances of a case.

* * *

HN21[] ***LEdHN[21]***[] [21] The Sherman Act protects competition while also respecting federalism. It does not authorize the States to abandon markets to the unsupervised control of active market participants, whether trade associations or hybrid agencies. If a State wants to rely on active market participants as regulators, it must provide active supervision if state-action immunity under *Parker* is to be invoked.

[*516] The judgment of the Court of Appeals for the Fourth Circuit is affirmed.

It is so ordered.

Dissent by: Alito

Dissent

Justice **Alito**, with whom Justice **Scalia** and Justice **Thomas** join, dissenting.

The Court's decision in this case is based on a serious misunderstanding of the doctrine of state-action **[****35]** antitrust immunity that this Court recognized more than 60 years ago in *Parker v. Brown, 317 U. S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. In *Parker*, the Court held that the Sherman Act does not prevent the States from continuing their age-old practice of enacting measures, such as licensing requirements, that are designed to protect the public health and welfare. *Id., at 352, 63 S. Ct. 307, 87 L. Ed. 315*. The case now before us involves precisely this type of state regulation—North Carolina's laws governing the practice of dentistry, which are administered by the North Carolina State Board of Dental Examiners (Board).

Today, however, the Court takes the unprecedented step of holding that *Parker* does not apply to the North Carolina Board because the Board is **[***56]** not structured in a way that merits a good-government seal of approval; that is, it is made up of practicing dentists who have a financial incentive to use the licensing laws to further the financial interests of the State's dentists. There is nothing new about the structure of the North Carolina Board. When the States first created medical and dental boards, well before the Sherman Act was enacted, they began to staff them in this way.[1] Nor is there anything new about the suspicion that the North Carolina Board — in attempting to prevent **[****36]** persons other than dentists from performing teeth whitening procedures — was serving the interests of dentists and not the public. Professional and occupational licensing requirements have often been **[*517]** used in such a way. [2] But that is not what *Parker* immunity is about. Indeed, the very state program involved in that case was unquestionably designed to benefit the regulated entities, California raisin growers.

The question before us is not whether such programs serve the public interest. The question, instead, is whether this case is controlled by *Parker*, and the answer to that question is clear. Under *Parker*, the Sherman Act (and the Federal Trade Commission Act, see **[**1118]** *FTC v. Ticor Title Ins. Co., 504 U. S. 621, 635, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992))* do not apply to state agencies; the Board **[****37]** is a state agency; and that is the end of the matter. By straying from this simple path, the Court has not only distorted *Parker*; it has headed into a morass. Determining whether a state agency is structured in a way that militates against regulatory capture is no easy task, and there is reason to fear that today's decision will spawn confusion. The Court has veered off course, and therefore I cannot go along.

I

In order to understand the nature of *Parker* state-action immunity, it is helpful to recall the constitutional landscape in 1890 when the Sherman Act was enacted. At that time, this Court and Congress had an understanding of the scope of federal and state power that is very different from our understanding today. The States were understood to possess the exclusive authority to regulate "their purely internal affairs." *Leisy v. Hardin, 135 U. S. 100, 122, 10 S. Ct. 681, 34 L. Ed. 128, 12 Ky. L. Rptr. 123 (1890)*. In exercising their police power in this area, the States had long **[*518]** enacted measures, such as price controls and licensing requirements, that had the effect of restraining trade. [3]

The Sherman Act was enacted pursuant to Congress' power to regulate interstate commerce, **[****38]** and in passing the Act, Congress wanted to exercise that power "to the utmost extent." *United States v. South-Eastern Underwriters Assn., 322 U. S. 533, 558, 64 S. Ct. 1162, 88 L. Ed. 1440 (1944)*. **[***57]** But in 1890, the understanding of the commerce power was far more limited than it is today. See, *e.g., Kidd v. Pearson, 128 U. S. 1, 17-18, 9 S. Ct. 6, 32 L. Ed. 346 (1888)*. As a result, the Act did not pose a threat to traditional state regulatory activity.

[1] S. White, History of Oral and Dental Science in America 197-214 (1876) (detailing earliest American regulations of the practice of dentistry.)

[2] See, e.g., R. Shrylock, Medical Licensing in America 29 (1967) (Shrylock) (detailing the deteriorations of licensing regimes in the mid-19th century, in part out of concerns about restraints on trade); Gellhorn, The Abuse of Occupational Licensing, 44 U. Chi. L. Rev. 6 (1976); Shepard, Licensing Restrictions and the Cost of Dental Care, 21 J. Law & Econ. 187 (1978).

[3] See Handler, The Current Attack on the Parker v. Brown State Action Doctrine, 76 Colum. L., Rev. 1, 4-6 (1976) (collecting cases).

By 1943, when *Parker* was decided, however, the situation had changed dramatically. This Court had held that the commerce power permitted Congress to regulate even local activity if it "exerts a substantial economic effect on interstate commerce." *Wickard v. Filburn, 317 U. S. 111, 125, 63 S. Ct. 82, 87 L. Ed. 122 (1942)*. This meant that Congress could regulate many of the matters that had once been thought to fall exclusively within the jurisdiction of the States. The new interpretation of the commerce power brought about an expansion of the reach of the Sherman Act. See *HospitalBuilding Co. v. Trustees of Rex Hospital, 425 U. S. 738, 743, n. 2, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)* ("[D]ecisions by this Court have permitted the reach of the Sherman Act to expand along with expanding notions of congressional power"). And the expanded reach of the Sherman Act raised an important question. The Sherman Act does not expressly exempt States from its scope. Does that mean that the Act applies to the States and that it potentially outlaws many traditional state regulatory measures? The Court confronted that question **[****39]** in *Parker.*

In *Parker*, a raisin producer challenged the California Agricultural Prorate Act, an agricultural price support program. The California Act authorized the creation of an Agricultural Prorate Advisory Commission (Commission) to **[*519]** establish marketing plans for certain agricultural commodities within the State. *317 U. S., at 346-347, 63 S. Ct. 307, 87 L. Ed. 315*. Raisins were among the regulated commodities, and so the Commission **[**1119]** established a marketing program that governed many aspects of raisin sales, including the quality and quantity of raisins sold, the timing of sales, and the price at which raisins were sold. *Id., at 347-348, 63 S. Ct. 307, 87 L. Ed. 315*. The *Parker* Court assumed that this program would have violated "the Sherman Act if it were organized and made effective solely by virtue of a contract, combination or conspiracy of private persons," and the Court also assumed that Congress could have prohibited a State from creating a program like California's if it had chosen to do so. *Id., at 350, 63 S. Ct. 307, 87 L. Ed. 315*. Nevertheless, the Court concluded that the California program did not violate the Sherman Act because the Act did not circumscribe state regulatory power. *Id., at 351, 63 S. Ct. 307, 87 L. Ed. 315*.

The Court's holding in *Parker* was not based on either the language of the Sherman Act or anything in the legislative history **[****40]** affirmatively showing that the Act was not meant to apply to the States. Instead, the Court reasoned that "[i]n a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress." *Ibid.*. For the Congress that enacted the Sherman Act in 1890, it would have been a truly radical and almost certainly futile step to attempt to prevent the States from exercising their traditional regulatory authority, and the **[***58]** *Parker* Court refused to assume that the Act was meant to have such an effect.

When the basis for the *Parker* state-action doctrine is understood, the Court's error in this case is plain. In 1890, the regulation of the practice of medicine and dentistry was regarded as falling squarely within the States' sovereign police power. By that time, many States had established medical **[*520]** and dental boards, often staffed by doctors or dentists, [4] and had given those boards the authority to confer and revoke licenses.[5] This was quintessential police power legislation, and although state laws **[****41]** were often challenged during that era under the doctrine of substantive due process, the licensing of medical professionals easily survived such assaults. Just one year before the enactment of the Sherman Act, in *Dent v. West Virginia, 129 U. S. 114, 128, 9 S. Ct. 231, 32 L. Ed. 623 (1889)*, this Court rejected such a challenge to a state law requiring all physicians to obtain a certificate from the state board of health attesting to their qualifications. And in *Hawker v. New York, 170 U. S. 189, 192, 18 S. Ct. 573, 42 L. Ed. 1002 (1898)*, the Court reiterated that a lawspecifying the qualifications to practice medicine was clearly a proper exercise of the police power. Thus, the North Carolina statutes establishing and specifying the powers of the State Board of Dental Examiners represent precisely the kind of state regulation that the *Parker* exemption was meant to immunize.

---

[4] Shrylock 54-55: D. Johnson and H. Chaudry, Medical Licensing and Discipline in America 23-24 92012).

[5] In *Hawker v. New York, 170 U.S. 189, 18 S. Ct. 573, 42 L. Ed. 1002 (1989)*, the Court cited state laws authorizing such boards to refuse or revoke medical licenses. *Id., at 191-193, n. 1, 18 S. Ct. 573, 42 L. Ed. 1002*. See also *Douglas v. Noble, 261 U.S. 165, 166, 43 S. Ct. 303, 67 L. Ed. 590 (1923)* ("In 1893 the legislature of Washington provided that only licensed persons should practice dentistry" and "vested the authority to license in a board of examiners, consisting of five practicing dentists").

II

As noted above, the only question in this case is whether **[****42]** the Board **[**1120]** is really a state agency, and the answer to that question is clearly yes.

•The North Carolina Legislature determined that the practice of dentistry "affect[s] the public health, safety and welfare" of North Carolina's citizens and that therefore the profession should be "subject to regulation and control in the public interest" in order to ensure "that **[*521]** only qualified persons be permitted to practice dentistry in the State." *N. C. Gen. Stat. Ann. §90-22(a)* (2013).

•To further that end, the legislature created the Board "as the agency of the State for the regulation of the practice of dentistry in th[e] State." *§90-22(b)*.

•The legislature specified the membership of the Board. *§90-22(c)*. It defined the "practice of dentistry," *§90-29(b)*, and it set out standards for licensing practitioners, *§90-30*. The legislature also set out standards under which the Board can initiate disciplinary proceedings against licensees who engage in certain improper acts. *§90-41(a)*.

[*59]** •The legislature empowered the Board to "maintain an action in the name of the State of North Carolina to perpetually enjoin any person from . . . unlawfully practicing dentistry." *§90-40.1(a)*. It authorized the Board to conduct investigations and **[****43]** to hire legal counsel, and the legislature made any "notice or statement of charges against any licensee" a public record under state law. *§§ 90-41(d)-(g)*.

•The legislature empowered the Board "to enact rules and regulations governing the practice of dentistry within the State," consistent with relevant statutes. *§90-48*. It has required that any such rules be included in the Board's annual report, which the Board must file with the North Carolina secretary of state, the state attorney general, and the legislature's Joint Regulatory Reform Committee. *§93B-2*. And if the Board fails to file the required report, state law demands that it be automatically suspended until it does so. *Ibid*.

As this regulatory regime demonstrates, North Carolina's Board is unmistakably a state agency created by the state legislature to serve a prescribed regulatory purpose and to do so using the State's power in cooperation with other arms of state government.

[*522] The Board is not a private or "nonsovereign" entity that the State of North Carolina has attempted to immunize from federal antitrust scrutiny. *Parker* made it clear that a State may not "'give immunity to those who violate the Sherman Act by authorizing them to **[****44]** violate it, or by declaring that their action is lawful.'" *Ante, at 505, 135 S. Ct. 1101, 191 L. Ed. 2d, at 48* (quoting *Parker, 317 U. S., at 351, 63 S. Ct. 307, 87 L. Ed. 315*). When the *Parker* Court disapproved of any such attempt, it cited *Northern Securities Co. v. United States, 193 U. S. 197, 24 S. Ct. 436, 48 L. Ed. 679 (1904)*, to show what it had in mind. In that case, the Court held that a State's act of chartering a corporation did not shield the corporation's monopolizing activities from federal ***antitrust law***. *Id., at 344-345, 63 S. Ct. 307, 87 L. Ed. 315*. Nothing similar is involved here. North Carolina did not authorize a private entity to enter into an anticompetitive arrangement; rather, North Carolina *created a state agency* and gave that agency the power to regulate a particular subject affecting public health and safety.

Nothing in *Parker* supports the type of inquiry that the Court now prescribes. The Court crafts a test under which state agencies that are "controlled by active **[**1121]** market participants," *ante, at 510, 135 S. Ct. 1101, 191 L. Ed. 2d, at 52*, must demonstrate active state supervision in order to be immune from federal ***antitrust law***. The Court thus treats these state agencies like private entities. But in *Parker*, the Court did not examine the structure of the California program to determine if it had been captured by private interests. If the Court had done so, the case would certainly have come out differently, because California **[****45]** conditioned its regulatory measures on the participation and approval of market actors in the relevant industry.

Establishing a prorate marketing plan under California's law first required the petition of at least 10 producers of the particular commodity. *Parker, 317 U. S., at 346, 63 S. Ct. 307, 87 L. Ed. 315*. If the Commission then agreed that a marketing plan was **[***60]** warranted, the Commission would "select a program committee *from among nominees chosen by the qualified producers*." **[*523]** *Ibid.* (emphasis added). That committee would then formulate the proration marketing program, which the Commission could modify or approve. But even after Commission approval, the program became law (and then, automatically) only if it gained the approval of 65 percent of the relevant producers, representing at least 51 percent of the acreage of the regulated crop. *Id., at 347, 63 S. Ct. 307, 87 L. Ed. 315*. This scheme gave decisive power to market participants. But despite these aspects of the California program, *Parker* held that California was acting as a "sovereign" when it "adopt[ed] and enforc[ed] the prorate program." *Id., at 352, 63 S. Ct. 307, 87 L. Ed. 315*. This reasoning is irreconcilable with the Court's today.

III

The Court goes astray because it forgets the origin of the*Parker* doctrine and is misdirected by subsequent cases that extended that doctrine **[****46]** (in certain circumstances) to private entities. The Court requires the North Carolina Board to satisfy the two-part test set out in *California Retail Liquor Dealers Assn. v. Midcal Aluminum, Inc., 445 U. S. 97, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*, but the party claiming *Parker* immunity in that case was not a state agency but a private trade association. Such an entity is entitled to *Parker* immunity, *Midcal* held, only if the anticompetitive conduct at issue was both "'clearly articulated'" and "'actively supervised, by the State itself." *445 U. S., at 105, 100 S. Ct. 937, 63 L. Ed. 2d 233*. Those requirements are needed where a State authorizes private parties to engage in anticompetitive conduct. They serve to identify those situations in which conduct *by private parties* can be regarded as the conduct of a State. But when the conduct in question is the conduct of a state agency, no such inquiry is required.

This case falls into the latter category, and therefore *Midcal* is inapposite. The North Carolina Board is not a private trade association. It is a state agency, created and empowered by the State to regulate an industry affecting public health. It would not exist if the State had not created it. **[*524]** And for purposes of *Parker*, its membership is irrelevant; what matters is that it is part of the government of the sovereign State of North Carolina. **[****47]**

Our decision in *Hallie v. Eau Claire, 471 U. S. 34, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)*, which involved Sherman Act claims against a municipality, not a state agency, is similarly inapplicable. In *Hallie,* the plaintiff argued that the two-pronged *Midcal* test should be applied, but the Court disagreed. The Court acknowledged that municipalities "are not themselves sovereign." *471 U. S., at 38, 105 S. Ct. 1713, 85 L. Ed. 2d 24*. But recognizing that a municipality is "an arm of the State," *id., at 45, 105 S. Ct. 1713, 85 L. Ed. 2d 24*, the Court held that a municipality **[**1122]** should be required to satisfy only the first prong of the *Midcal* test (requiring a clearly articulated state policy), *471 U. S., at 46, 105 S. Ct. 1713, 85 L. Ed. 2d 24*. That municipalities are not sovereign was critical to our analysis in *Hallie*, and thus that decision has no application in a case, like this one, involving a state agency.

[*61]** Here, however, the Court not only disregards the North Carolina Board's status as a full-fledged state agency; it treats the Board less favorably than a municipality. This is puzzling. States are sovereign, *Northern Ins. Co. of N. Y. v. Chatham County, 547 U. S. 189, 193, 126 S. Ct. 1689, 164 L. Ed. 2d 367 (2006)*, and California's sovereignty provided the foundation for the decision in *Parker, supra, at 352, 63 S. Ct. 307, 87 L. Ed. 315*. Municipalities are not sovereign. *Jinks v. Richland County, 538 U. S. 456, 466, 123 S. Ct. 1667, 155 L. Ed. 2d 631 (2003)*. And for this reason, federal law often treats municipalities differently from States. Compare *Will v. Michigan Dept. of State Police, 491 U. S. 58, 71, 109 S. Ct. 2304, 105 L. Ed. 2d 45 (1989)* ("[N]either a State nor its officials acting in their official capacities are 'persons' **[****48]** under [*42 U. S. C.] §1983*"), with *Monell v. New York City Dept. of Social Servs., 436 U. S. 658, 694, 8 S. Ct. 2018, 56 L. Ed. 2d 611 (1978)* (municipalities liable under *§1983* where "execution of a government's policy or custom . . . inflicts the injury").

The Court recognizes that municipalities, although not sovereign, nevertheless benefit from a more lenient standard for state-action immunity than private entities. Yet under the Court's approach, the Board, a full-fledged state agency, **[*525]** is treated like a private actor and must demonstrate that the State actively supervises its actions.

The Court's analysis seems to be predicated on an assessment of the varying degrees to which a municipality and a state agency like the North Carolina Board are likely to be captured by private interests. But until today, *Parker* immunity was never conditioned on the proper use of state regulatory authority. On the contrary, in *Columbia v.*

Omni Outdoor Advertising, Inc., 499 U. S. 365, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991), we refused to recognize an exception to *Parker* for cases in which it was shown that the defendants had engaged in a conspiracy or corruption or had acted in a way that was not in the public interest. 499 U.S., at 374, 111 S. Ct. 1344, 113 L. Ed. 2d 382. The Sherman Act, we said, is not an anticorruption or good-government statute. Id., at 398, 111 S. Ct. 1344, 113 L. Ed. 2d 382. We were unwilling in *Omni* to rewrite *Parker* in order to reach the allegedly abusive **[****49]** behavior of city officials. 499 at 374-379, 111 S. Ct. 1344, 113 L. Ed. 2d 382. But that is essentially what the Court has done here.

IV

Not only is the Court's decision inconsistent with the underlying theory of *Parker*; it will create practical problems and is likely to have far-reaching effects on the States' regulation of professions. As previously noted, state medical and dental boards have been staffed by practitioners since they were first created, and there are obvious advantages to this approach. It is reasonable for States to decide that the individuals best able to regulate technical professions are practitioners with expertise in those very professions. Staffing the State Board of Dental Examiners with certified public accountants would certainly lessen the risk of actions that place the well-being of dentists over those of the public, but this would also compromise the State's interest in sensibly regulating a technical profession in which lay people have little expertise.

[*62]** As a result of today's decision, States may find it necessary to change the composition **[**1123]** of medical, dental, and other **[*526]** boards, but it is not clear what sort of changes are needed to satisfy the test that the Court now adopts. The Court faults the structure **[****50]** of the North Carolina Board because "active market participants" constitute "a controlling number of [the] decisionmakers," ante, at 511, 135 S. Ct. 1101, 191 L. Ed. 2d, at 53, but this test raises many questions.

What is a "controlling number"? Is it a majority? And if so, why does the Court eschew that term? Or does the Court mean to leave open the possibility that something less than a majority might suffice in particular circumstances? Suppose that active market participants constitute a voting bloc that is generally able to get its way? How about an obstructionist minority or an agency chair empowered to set the agenda or veto regulations?

Who is an "active market participant"? If Board members withdraw from practice during a short term of service but typically return to practice when their terms end, does that mean that they are not active market participants during their period of service?

What is the scope of the market in which a member may not participate while serving on the board? Must the market be relevant to the particular regulation being challenged or merely to the jurisdiction of the entire agency? Would the result in the present case be different if a majority of the Board members, though practicing dentists, **[****51]** did not provide teeth whitening services? What if they were orthodontists, periodontists, and the like? And how much participation makes a person "active" in the market?

The answers to these questions are not obvious, but the States must predict the answers in order to make informed choices about how to constitute their agencies.

I suppose that all this will be worked out by the lower courts and the Federal Trade Commission (FTC), but the Court's approach raises a more fundamental question, and that is why the Court's inquiry should stop with an examination of the structure of a state licensing board. When the **[*527]** Court asks whether market participants control the North Carolina Board, the Court in essence is asking whether this regulatory body has been captured by the entities that it is supposed to regulate. Regulatory capture can occur in many ways.[6] So why ask only whether the members of a board are active market participants? The answer may be that determining when regulatory

[6] See, e.g., R. Noll, Reforming Regulation 40-43, 46 (1971); J. Wilson, The Politics of Regulation 357-394 (1980). Indeed, it has even been charged that the FTC, which brought this case, has been captured by entities over which it has jurisdiction. See E. Cox, "the Nader Report" on the Federal Trade Commission vii-xiv (1969); Posner, Federal Trade Commission, Chi, L. Rev. 47, 82-84 (1969).

capture has occurred is no simple task. That answer provides a reason for relieving courts from the obligation to make such determinations at all. It does not explain why it is appropriate for the Court to adopt **[****52]** the rather crude test for capture that constitutes the holding of today's decision.

V

The Court has created a new standard for distinguishing between private and state actors for purposes of **[***63]** federal antitrust immunity. This new standard is not true to the *Parker* doctrine; it diminishes our traditional respect for federalism and state sovereignty; and it will be difficult to apply. I therefore respectfully dissent.

Governments > Legislation > Interpretation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN4[] **Sherman Act, Scope**

Section 553.4 of the Iowa Competition Law provides that a contract, combination, or conspiracy between two or more persons shall not restrain or monopolize trade or commerce in a relevant market. *Iowa Code § 553.4 (2007)*. This provision of the Iowa Competition Law is the counterpart to *section 1* of the Sherman Act, which states, every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. *15 U.S.C.S. § 1*. The wording of the two provisions is notably similar. If anything, the Iowa Competition Law tilts more in the direction of an economics-based approach to antitrust, since it condemns only those contracts, combinations, and conspiracies that restrain trade "in a relevant market"—a distinctly economic concept. *Iowa Code § 553.4*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN5[] **Per Se Rule & Rule of Reason, Per Se Violations**

Under the federal antitrust laws, challenged agreements or conspiracies are presumptively analyzed through the rule of reason. This requires plaintiffs to demonstrate that a particular arrangement is in fact unreasonable and anticompetitive before it will be found unlawful. Per se liability is reserved for only those agreements that are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality. Some types of restraints have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit, that they are deemed unlawful per se.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6[ ] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

In applying the rule of reason, the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition. By contrast, when a practice falls under the per se rule, there is no need for case-by-case evaluation. The per se rule, treating categories of restraints as necessarily illegal, eliminates the need to study the reasonableness of an individual restraint in light of the real market forces at work.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN7[ ] Per Se Rule & Rule of Reason, Per Se Violations

It is only after considerable experience with certain business relationships that courts classify them as per se violations. Price-fixing agreements between competitors have been viewed as per se violations.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Copyright Law > ... > Assignments & Transfers > Licenses > General Overview

HN8[ ] Per Se Rule & Rule of Reason, Per Se Violations

The United States Supreme Court has held that the per se rule did not govern agreements among copyright holders to join together and issue blanket licenses at fixed rates. This is not a question simply of determining whether two or more potential competitors have literally "fixed" a "price." As generally used in the antitrust field, "price fixing" is a shorthand way of describing certain categories of business behavior to which the per se rule has been held applicable. The literal approach does not alone establish that this particular practice is one of those types or that it is "plainly anticompetitive" and very likely without "redeeming virtue." Literalness is overly simplistic and often overbroad. When two partners set the price of their goods or services they are literally "price fixing," but they are not per se in violation of the Sherman Act.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN9[ ] Regulated Practices, Monopolies & Monopolization

Monopsonistic conduct can create economic dislocation by forcing supplier prices down below the competitive level, just as monopolistic conduct can lead to dislocation by driving consumer prices above a competitive level.

Opinion by: MANSFIELD

Opinion

MANSFIELD, Justice.

Wellmark, Inc. is an Iowa-based health insurer that belongs to the national Blue Cross and Blue Shield (BCBS) network. Wellmark has contracted with health care providers in Iowa to provide services at certain reimbursement rates. By agreement, Wellmark makes those rates available both to self-insured Iowa plans that it administers and to out-of-state BCBS affiliates when those entities provide coverage for services provided in Iowa.

[*565] This appeal presents the question whether the foregoing agreements between **[**2]** Wellmark and self-insuring employers and between Wellmark and out-of-state BCBS affiliates amount to per se violations of Iowa ***antitrust law***. We conclude they do not. These arrangements are not the simple horizontal conspiracies that historically have qualified for per se treatment. Accordingly, and recognizing that the plaintiffs stipulated they were proceeding *only* under a per se theory and not under the rule of reason, we affirm the district court's grant of summary judgment to Wellmark.

I. Background Facts and Proceedings.

This case comes before us for the second time. *See* *Mueller v. Wellmark, Inc., 818 N.W.2d 244 (Iowa 2012)*.

Approximately seven years ago, a number of Iowa chiropractors sued Wellmark, the largest health insurer in Iowa, in the Polk County District Court. The suit challenged Wellmark's reimbursement rates and practices for chiropractic services and asked for class action certification. One count of the plaintiffs' petition sought relief under a variety of Iowa insurance statutes. *Mueller, 818 N.W.2d at 249* (noting plaintiffs sought relief based upon allegations Wellmark engaged in discriminatory practices in violation of *Iowa Code sections 509.3(6)*, *514.7*, *514.23(2)*, *514B.1(5)(c)*, *514F.2 (2007)*). Another count pled that Wellmark had entered into a contract, combination, or conspiracy in violation of *section 553.4* of the **[**3]** Iowa Competition Law, the counterpart to *section 1* of the Federal Sherman Antitrust Act. *Id.*; *see also* *15 U.S.C. § 1 (2006)*. A third count alleged that Wellmark had abused monopoly power in violation of *section 553.5* of the Iowa Competition Law, the counterpart to *section 2* of the Sherman Act. *Mueller, 818 N.W.2d at 249*; *see also* *15 U.S.C. § 2*.

On Wellmark's motion, the district court dismissed the claims based on the insurance statutes. *Mueller, 818 N.W.2d at 250*. It found no private cause of action was available under those laws. *Id*. The district court later granted summary judgment to Wellmark on the antitrust claims. *Id. at 252*. This ruling was primarily based on the "state action" exemption in the Iowa Competition Law. *Id.*; *see also* *Iowa Code § 553.6(4)* (providing that the Iowa Competition Law "shall not be construed to prohibit . . . activities or arrangements expressly approved or regulated by any regulatory body or officer acting under authority of this state"). Plaintiffs appealed. *Mueller, 818 N.W.2d at 253*.

On appeal, we affirmed the dismissal of the claims under Iowa insurance law. As we explained,

> [O]ur legislature chose to provide the Iowa Insurance Commissioner with exclusive powers to regulate health insurance practices under these statutes. For these reasons, we hold *Iowa Code sections 509.3(6)*, *514.7*, *514.23(2)*, *514B.1(5)(c)*, and *514F.2*, enacted as part of H.F. 2219, do not create a private **[**4]** cause of action.

Id. at 258.

However, we found that the state action exemption did not insulate Wellmark's reimbursement rates from antitrust review. We noted,

> These regulations [cited by Wellmark] are not directed to the regulation of rate differentials for particular services. Their purpose, rather, is to insure that health insurers do not abuse their overall relationship with patients and providers through the use of preferred provider plans. Thus, if a clinic decided to sue Wellmark under the Iowa Competition Law alleging that Wellmark had **[*566]** engaged in prohibited *section 553.5* monopolization by excluding it from a preferred provider arrangement, the *section 553.6(4)* state action exemption might well apply. But, it does not appear that the legislature has decided generally to remove the setting of reimbursement rates by health insurance companies from the operations of the marketplace or from claims under the Iowa Competition Law.

Id. at 262 (footnote omitted). Yet, we affirmed the dismissal of some of the chiropractors' antitrust claims, including the *Iowa Code section 553.5* monopolization claim, on alternate grounds that had been raised by Wellmark. *Id. at 264-66*. Still, with respect to the *section 553.4* conspiracy claim, "we reverse[d] the district court's summary judgment granting Wellmark **[**5]** a blanket exemption under *section 553.6(4)* from charges that it engaged in anticompetitive price-fixing or term-fixing schemes." *Id. at 264*.

On remand, the plaintiffs stipulated that their only remaining antitrust claims—alleging conspiracies between Wellmark and out-of-state BCBS affiliates and between Wellmark and self-funding employers that hired Wellmark to administer their plans—were being asserted on a per se theory. As the plaintiffs stated,

> Plaintiffs hereby agree and stipulate that the only violation of *Iowa Code § 553.4* alleged in the Fourth Amended and Substituted Petition for Damages is for a contract, combination or conspiracy between the Defendants and (1) out-of-state Blues and (2) in-state self-funded employers through administration contracts, to price fix by establishment of a maximum price for services of Iowa chiropractors in Wellmark's provider network or through the use of a restrictive or capitated payment system in Wellmark's HMO; and those alleged price fixing conspiracies are alleged to violate *Iowa Code § 553.4* based on Plaintiffs' contention that they constitute *per se* violations of the Iowa Competition Act. Plaintiffs' allegations exclude a contention that a rule of reason analysis is applicable to the violation **[**6]** of *Iowa Code § 553.4* alleged in the Fourth Amended and Substituted Petition.

Thereafter, Wellmark moved for summary judgment again, this time on the ground that neither of these alleged conspiracies was subject to *per se* treatment. As Wellmark put it, "Sharing a provider network does not amount to naked price fixing and is not subject to the *per se* rule." Wellmark urged that plaintiffs' claims were potentially viable, if at all, only under the rule of reason.

The summary judgment record revealed that employers wanting to provide group health insurance to their employees can contract with Wellmark in one of two ways. Either way, Wellmark makes its provider network available at established reimbursement rates and handles claims administration. However, if the employer self-insures, then the employer is financially responsible for claims. On the other hand, when Wellmark acts as an insurer in addition to a claims administrator, then the employer pays premiums to Wellmark, and Wellmark must bear the financial risk of the resulting claims.

The record also disclosed that Wellmark, which is the BCBS licensee in Iowa and South Dakota, has a BlueCard® program with BCBS licensees in other states. Under this arrangement, **[**7]** those out-of-state licensees have access to Wellmark's provider network in Iowa at the rates negotiated by Wellmark whenever they have to pay Iowa claims. Likewise, Wellmark has access to the other licensees' negotiated provider networks in their respective states at their rates whenever Wellmark **[*567]** has to pay claims in those states. *See* *Steward Health Care Sys., LLC v. Blue Cross & Blue Shield of R.I., 997 F. Supp. 2d 142, 150 n.3 (D.R.I. 2014)* (describing the BlueCard® program); *Solomon v. Blue Cross & Blue Shield Ass'n, 574 F. Supp. 2d 1288, 1289 (S.D. Fla. 2008)* (same).

The plaintiffs maintained that Wellmark had engaged in per se price-fixing when it entered into agreements with self-insuring Iowa employers to make its network and claims administration available to them. Similarly, the plaintiffs urged that Wellmark had engaged in per se price-fixing when it participated in the national BlueCard® program under which BCBS entities agreed to make their in-state networks available to each other when their respective customers needed out-of-state services.

After hearing the parties' arguments, the district court rejected plaintiffs' per se theories and entered summary judgment for Wellmark. This appeal followed.

II. Standard of Review.

HN1[] This court reviews grants of summary judgment for correction of errors at law. *Mueller, 818 N.W.2d at 253*. ***HN2***[] Whether the per se rule or the rule of reason applies to a given **[**8]** practice is a question of law. *See* *California ex rel. Harris v. Safeway, Inc., 651 F.3d 1118, 1124 (9th Cir. 2011)* (citing XI Phillip Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 1909b, at 279 (2d ed. 2005)); *Nat'l Bancard Corp. v. Visa U.S.A., Inc., 779 F.2d 592, 596 (11th Cir. 1986)*.

III. Legal Analysis.

A. The Iowa Competition Law. ***HN3***[] The general assembly has directed that the Iowa Competition Law "shall be construed to complement and be harmonized with the applied laws of the United States which have the same or similar purpose." *Iowa Code § 553.2*. As the legislature has stated,

> This construction shall not be made in such a way as to constitute a delegation of state authority to the federal government, but shall be made to achieve uniform application of the state and federal laws prohibiting restraints of economic activity and monopolistic practices.

Id.

Accordingly, in the past, when interpreting the Iowa Competition Law, we have generally adhered to federal interpretations of federal ***antitrust law***. *See* *Next Generation Realty, Inc. v. Iowa Realty Co., 686 N.W.2d 206, 208 (Iowa 2004)* (per curiam); *Max 100 L.C. v. Iowa Realty Co., 621 N.W.2d 178, 181-82 (Iowa 2001)*; *Fed. Land Bank of Omaha v. Tiffany, 529 N.W.2d 294, 296-97 (Iowa 1995)*; *Neyens v. Roth, 326 N.W.2d 294, 297 (Iowa 1982)*; *State v. Cedar Rapids Bd. of Realtors, 300 N.W.2d 127, 128 (Iowa 1981)*. In *Comes v. Microsoft Corp*., we declined to follow federal precedent on whether indirect purchasers had standing to sue under the Iowa Competition Law. *646 N.W.2d 440, 445-49 (Iowa 2002)*. We did so because: (1) the language of the relevant provision (*Iowa Code section 553.12 (1997)*) supported indirect purchaser standing; (2) uniformity only requires a uniform standard of conduct under state and federal law, not a uniform **[**9]** rule as to who may sue; and (3) most federal courts allowed indirect purchasers to sue at the time the Iowa Competition Law was enacted in 1976. *See id*.

This case involves *section 553.4* of the Iowa Competition Law. It provides, ***HN4***[] "A contract, combination, or conspiracy between two or more persons shall not restrain or monopolize trade or commerce in a relevant market." *Iowa Code § 553.4 (2007)*. This provision of the Iowa Competition **[*568]** Law is the counterpart to *section 1* of the Sherman Act, which states, "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*.

The wording of the two provisions is notably similar. If anything, the Iowa Competition Law tilts more in the direction of an economics-based approach to antitrust, since it condemns only those contracts, combinations, and conspiracies that restrain trade "in a relevant market"—a distinctly economic concept. Iowa Code § 553.4; *see, e.g.,* United States v. Grinnell Corp., 384 U.S. 563, 587, 86 S. Ct. 1698, 1712, 16 L. Ed. 2d 778, 795 (1966) (Fortas, J., dissenting) (noting that "the search for 'the relevant market' must be undertaken and pursued with relentless clarity" and "is, in essence, an economic task put to the uses of the law"); United States v. Phila. Nat'l Bank, 374 U.S. 321, 362, 83 S. Ct. 1715, 1741, 10 L. Ed. 2d 915, 944 (1963) (noting that a prediction **[**10]** of anticompetitive effects "is sound only if it is based upon a firm understanding of the structure of the relevant market [and that] the relevant economic data are both complex and elusive").

B. The Per Se Rule vs. the Rule of Reason. ***HN5***[] Under the federal antitrust laws, challenged agreements or conspiracies are presumptively analyzed through the "rule of reason." Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 1279, 164 L. Ed. 2d 1, 7 (2006). This requires plaintiffs to demonstrate that a particular arrangement "is in fact unreasonable and anticompetitive before it will be found unlawful." *Id*. "*Per se* liability is reserved for only those agreements that are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality." *Id*. (internal quotation marks omitted). "Some types of restraints . . . have such predictable and pernicious anticompetitive effect, and such limited potential for procompetitive benefit, that they are deemed unlawful *per se*." State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 279, 139 L. Ed. 2d 199, 206 (1997).

HN6[] In applying the rule of reason, "the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 723, 108 S. Ct. 1515, 1519, 99 L. Ed. 2d 808, 816 (1988) (internal quotation marks omitted). By contrast, when a practice falls **[**11]** under the per se rule, there is no need for "case-by-case evaluation." *Id*. "The *per se* rule, treating categories of restraints as necessarily illegal, eliminates the need to study the reasonableness of an individual restraint in light of the real market forces at work . . . ." Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 2713, 168 L. Ed. 2d 623, 634 (2007).

Thus, ***HN7***[] "'[i]t is only after considerable experience with certain business relationships that courts classify them as *per se* violations . . . .'" Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 9, 99 S. Ct. 1551, 1557, 60 L. Ed. 2d 1, 10 (1979) [hereinafter *BMI*] (alteration in original) (quoting United States v. Topco Assocs., Inc., 405 U.S. 596, 607-08, 92 S. Ct. 1126, 1133, 31 L. Ed. 2d 515, 525 (1972)). Price-fixing agreements between competitors have been viewed as per se violations. Texaco, 547 U.S. at 5, 126 S. Ct. at 1279, 164 L. Ed. 2d at 7.

But not all agreements on price are governed by the per se rule. When Texaco and Shell formed a joint venture known as "Equilon" to collaborate in the refining and marketing of gasoline in the western United States, the fact that the resulting gas was sold under the Texaco and Shell **[*569]** names at a single price did not amount to per se illegal price fixing. *See* id. at 5-8, 126 S. Ct. at 1279-81, 164 L. Ed. 2d at 7-9. As the United States Supreme Court explained,

> Texaco and Shell Oil did not compete with one another in the relevant market—namely, the sale of gasoline to service stations in the western United States—but instead participated in that market jointly through their investments in Equilon. **[**12]** . . . [T]hough Equilon's pricing policy may be price fixing in a literal sense, it is not price fixing in the antitrust sense.

Id. at 5-6, 126 S. Ct. at 1279-80, 164 L. Ed. 2d at 7-8.

Similarly, in the *BMI* case, ***HN8***[] the Court held that the per se rule did not govern agreements among copyright holders to join together and issue blanket licenses at fixed rates. BMI, 441 U.S. at 16, 99 S. Ct. at 1560, 60 L. Ed. 2d at 14. As the Court said,

> [T]his is not a question simply of determining whether two or more potential competitors have literally "fixed" a "price." As generally used in the antitrust field, "price fixing" is a shorthand way of describing certain categories of business behavior to which the *per se* rule has been held applicable. The Court of Appeals' literal approach

> does not alone establish that this particular practice is one of those types or that it is "plainly anticompetitive" and very likely without "redeeming virtue." Literalness is overly simplistic and often overbroad. When two partners set the price of their goods or services they are literally "price fixing," but they are not *per se* in violation of the Sherman Act.

Id. at 8-9, 99 S. Ct. at 1556-57, 60 L. Ed. 2d at 9-10. The Court emphasized that the blanket license was not a "'naked restrain[t] of trade with no purpose except stifling of competition,'" but instead "accompanies the integration of sales, monitoring, **[**13]** and enforcement against unauthorized copyright use." Id. at 20, 99 S. Ct. at 1562, 60 L. Ed. 2d at 16 (alteration in original) (quoting White Motor Co. v. United States, 372 U.S. 253, 263, 83 S. Ct. 696, 702, 9 L. Ed. 2d 738, 746 (1963)). The Court noted that the costs of individual sales transactions would be "prohibitive" and thus some form of blanket license was a necessity. Id. at 20-21, 99 S. Ct. at 1562-63, 60 L. Ed. 2d at 16-17.

C. Monopsony vs. Monopoly. As the plaintiffs point out, the present case does not involve cooperation on *sales* but rather collaboration on *purchases*—specifically, purchases of health care services. Thus, the concern is about potential monopsony power, not monopoly power. *See* Mueller, 818 N.W.2d at 249 n.3 (noting that the issue in the case is Wellmark is an alleged monopsonist rather than an alleged monopolist).

Still, **HN9**[] monopsonistic conduct can create economic dislocation by forcing supplier prices down *below* the competitive level, just as monopolistic conduct can lead to dislocation by driving consumer prices *above* a competitive level. *See id*. (citing Herbert Hovenkamp, *Federal Antitrust Policy: The Law of Competition and Its Practice* § 1.2(b), at 14 (4th ed. 2011)). In *Mandeville Island Farms, Inc. v. American Crystal Sugar Co*., the Supreme Court reversed the dismissal of a complaint brought by sugar beet growers, alleging that three sugar refiners had entered into an agreement to pay uniform **[**14]** prices for beets. 334 U.S. 219, 221, 246, 68 S. Ct. 996, 999, 1011, 92 L. Ed. 1328, 1333, 1345 (1948). As the Court put it, this arrangement "deprived the beet growers of any competitive opportunity for disposing of their crops by the immediate operation of the uniform price provision." Id. at 242, 68 S. Ct. at 1009, **[*570]** 92 L. Ed. at 1343; *see also* W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 104 (3d Cir. 2010) (citing Mandeville Island Farms, 334 U.S. 219, 68 S. Ct. 996, 92 L. Ed. 1328) (noting that a conspiracy to depress reimbursement rates to medical providers can "pose[] competitive threats similar to those posed by conspiracies among buyers to fix prices and other restraints that result in artificially depressed payments to suppliers—namely, suboptimal output, reduced quality, allocative inefficiencies, and (given the reductions in output) higher prices for consumers in the long run" (citation omitted)).

D. Is This a Per Se Case? Having said this, we nevertheless agree with the district court that Wellmark's arrangements with self-insured employers and out-of-state BCBS affiliates are governed by the rule of reason, not the per se rule. We reach this conclusion for several reasons.

To begin with, these arrangements are not naked price-fixing arrangements but are more akin to joint ventures. The self-insureds are not entering into bare agreements to refrain from competing on price with Wellmark—they are buying claims-administration service **[**15]** from Wellmark. Part of that service consists of Wellmark's negotiated pricing. As in BMI, the record indicates that it would be highly impractical for the vast majority of participants in the alleged conspiracy (i.e., the vast majority of the self-insured employers) to engage in the numerous individual transactions that would be needed if they could not latch on to Wellmark's pricing.[1] *Cf.* BMI, 441 U.S. at 20-21, 99 S. Ct. at 1563, 60 L. Ed. 2d at 17.

Wellmark's health care provider network is analogous to the blanket license in BMI. It provides a mechanism by which an otherwise unavailable product (self-financed health coverage) can be offered. *Cf. id*. If the only lawful choice for a self-insured employer were the time-consuming process of negotiating **[**16]** individual rates with

---

[1] The plaintiffs have included numerous pages of Wellmark reimbursement rates in the record. For example, for chiropractic services alone, Wellmark has approximately forty-eight different reimbursement rates in a given year, including twenty-one different rates for examination of X-rays. It seems implausible that a typical employer would have enough information about the value of chiropractic services to be able to negotiate with chiropractors on appropriate pricing for all these different procedures.

health care providers, the record indicates that almost all employers would avoid self-insuring. This would eliminate one possible way to render the health care market more efficient and reduce the costs of health care coverage—by allowing employers to bear the financial risk of health claims themselves.

Insurance involves both claims-handling and risk-spreading. A large number of Iowa employers, according to the summary judgment record, want some of the package but not all of it. That is, they do not wish to go into the health insurance business themselves but instead desire to purchase typical health insurance services from an outside entity like Wellmark. At the same time, those employers apparently have enough financial wherewithal to assume the ultimate risk that workforce claims will exceed workforce premiums.[2] Why should this additional option for employers be a per se violation of the antitrust laws?

Similar efficiency-related observations can be made about Wellmark's reciprocal arrangements with out-of-state BCBS licensees. **[*571]** Iowans insured by Wellmark **[**17]** occasionally need health care services outside Iowa. Rather than attempt to negotiate its own rates in all fifty states, Wellmark has a reciprocal arrangement with the BCBS affiliates in those states. Under that arrangement, Wellmark can utilize the other licensees' negotiated rates in their respective states, and they can use Wellmark's negotiated rates in Iowa (and South Dakota, where Wellmark also operates). This enables Wellmark to offer a fifty-state product that meets the needs of its customers while saving Wellmark from the expense of having to maintain a network and rate structure in states where it has relatively few claims.[3]

In a somewhat different context, the Supreme Court has recognized that joint buying can "achieve economies of scale . . . that would otherwise be **[**18]** unavailable." *Nw. Wholesale Stationers, Inc. v. Pac. Stationery & Printing Co., 472 U.S. 284, 286-87, 105 S. Ct. 2613, 2615, 86 L. Ed. 2d 202, 206 (1985)*. In *Northwest Wholesale Stationers*, the Court declined to apply a per se analysis to a member's claim that it had been wrongfully expelled from a nonprofit wholesale purchasing cooperative, noting that "such cooperative arrangements would seem to be 'designed to "increase economic efficiency and render markets more, rather than less, competitive."'" *Id. at 295, 105 S. Ct. at 2620, 86 L. Ed. 2d at 212* (quoting *BMI, 441 U.S. at 20, 99 S. Ct. at 1562, 60 L. Ed. 2d at 16*); *see also All Care Nursing Serv., Inc. v. High Tech Staffing Servs., Inc., 135 F.3d 740, 744, 747-49 (11th Cir. 1998)* (declining to apply a per se analysis to an arrangement whereby competing hospitals agreed to seek bids as a group for temporary nursing services); *Kartell v. Blue Shield of Mass., Inc., 749 F.2d 922, 925 (1st Cir. 1984)* (rejecting antitrust claims and contrasting a legitimate, independent medical cost insurer with a "'sham' organization seeking only to combine otherwise independent buyers in order to suppress their otherwise competitive instinct to bid up price").

Furthermore, neither of these types of Wellmark arrangements truly represents a horizontal agreement between competitors. *Cf. Texaco, 547 U.S. at 5, 126 S. Ct. at 1279, 164 L. Ed. 2d at 7*. Wellmark does not really compete with its self-insured clients. While a self-insured might elect not to use Wellmark's services, plaintiffs cite no example of a self-insured that markets those kinds of services to anyone else *in competition with* Wellmark. Nor does Wellmark compete with **[**19]** the out-of-state BCBS licensees. Its customers are in Iowa and South Dakota; the other licensees are licensed to sell health insurance in other states.[4]

Additionally, we agree with Wellmark that a decision of the United States District Court for the Northern District of Illinois is helpful and on point. *See N. Jackson Pharmacy, Inc. v. Caremark Rx, Inc., 385 F. Supp. 2d 740 (N.D. Ill.*

---

[2] Or they believe they can buy a different, cheaper form of protection against that risk, such as a stop-loss.

[3] If the plaintiffs were right, then an Iowa bank and a Florida bank could not reach an agreement on what they would charge each other's customers for use of their ATMs, for example, when a customer of the Iowa bank travels to Florida or a Florida customer travels to Iowa. *See In re ATM Fee Antitrust Litig., 554 F. Supp. 2d 1003, 1007, 1017 (N.D. Cal. 2008)* (finding that an agreement among banks concerning an ATM interchange fee should be governed by the rule of reason, not the per se rule).

[4] The plaintiffs make a passing assertion that Wellmark and the other out-of-state BCBS affiliates have entered into an illegal horizontal market division agreement not to sell health insurance in each other's territories. This theory is not alleged in the petition nor supported by evidence in the record, and hence we will not consider it.

2005). In *North Jackson*, a retail pharmacy sued a **[*572]** pharmacy benefits manager that "administer[ed] prescription drug benefit plans on behalf of employers, health insurers and other third-party payors of prescription drug costs ('Plan Sponsors')." *Id. at 744*. As the court stated, "By negotiating prescription drug reimbursement rates on behalf of the 1,200 Plan Sponsors it represents, Caremark acts on behalf of what is essentially a cooperative purchasing group." *Id. at 746*. The pharmacy alleged a per se violation of *section 1* of the Sherman Act on the theory that the plan sponsors were engaged **[**20]** in a horizontal conspiracy to fix prescription drug prices. *Id. at 744-46*.

The district court rejected the per se categorization. *Id. at 747-51*. The arrangement in question was not a "naked restraint," but one which was "ancillary" to a broader venture with procompetitive potential. *See id. at 747-48*. The court elaborated,

> Any alleged agreement between Plan Sponsors to set the price paid for prescription drugs thus cannot be viewed in a vacuum, but must instead be looked at as a corollary of the cooperative arrangement between Caremark and the Plan Sponsors under which Caremark performs a variety of functions in the administration of Plan Sponsors' drug benefit plans. Those functions include not only the negotiation of reimbursement rates with retail pharmacies but also the processing of reimbursement claims, maintenance of patient records, design and management of drug formularies, negotiation of manufacturer rebates and maintenance of a mail order pharmacy. According to Caremark, those functions contribute to increased efficiency and a reduction in the cost of prescription drugs delivered to Plan Subscribers.
>
> . . . .
>
> As described by the [complaint] and the parties' submissions on the current motion, the arrangement **[**21]** between Plan Sponsors and Caremark clearly has efficiency-enhancing potential. Caremark specializes in various functions of benefit plan administration and is likely able to achieve economies of scale in the performance of those functions that would otherwise be unavailable to Plan Sponsors. And the creation of retail pharmacy networks, which necessarily involves the setting of reimbursement rates, undoubtedly contributes to the success of that larger endeavor.
>
> . . . .
>
> . . . That is of particular relevance here, where (as North Jackson itself alleges) PBMs [Pharmacy Benefits Managers] such as Caremark administer the prescription drug benefits of "approximately 210 million Americans; 70% of the U.S. population". Any premature ruling that one of the primary functions performed by PBMs is per se illegal would have particularly far-reaching consequences for the delivery of affordable prescription drugs to a large portion of the population, a consideration that further supports thorough rule of reason analysis.
>
> What has been said to this point should not be read as expressing an ultimate view as to the lawfulness of the alleged conspiracy between Plan Sponsors. If the required rule of reason **[**22]** inquiry were to reveal that the anticompetitive consequences of any such conspiracy sufficiently outweigh its procompetitive benefits so that the restraint is ultimately judged unreasonable under *Section 1*, this Court would not hesitate to rule accordingly. But because no authority even suggests that all cooperative purchasing agreements run afoul of *Section 1*, and because the agreement at **[*573]** issue here is part of a larger and potentially procompetitive enterprise, the rule of reason must be applied to North Jackson's Claim I.

Id. at 748-51.

Another and related factor arises from a concern explained by *Kartell v. Blue Shield of Massachusetts, Inc., 749 F.2d 922, 931 (1st Cir. 1984)*:

> [T]he subject matter of the present agreement—medical costs—is an area of great complexity where more than solely economic values are at stake. How to provide affordable, high quality medical care is much debated. And, many different solutions—ranging from stricter regulation to greater reliance on competing service organizations—have been proposed. This fact, too, warrants judicial hesitancy to interfere.

The conditions that were present in *North Jackson Pharmacy* prevail here as well. The arrangements here are not bare price-fixing agreements; indeed, unlike in *North Jackson Pharmacy*, there is not even an allegation that **[**23]** the various self-insureds have entered into agreements with *each other*. Rather, the self-insured employers have entered into significant relationships with Wellmark under which Wellmark provides much more than a price list—i.e., a network of providers; rules for eligibility, limitations, copays, and deductibles; and claims administration and processing. From the employee's standpoint, Wellmark appears to be providing traditional health insurance. The only difference is that the employer and not Wellmark is the ultimate financial backstop.

Also, similar to the situation in *North Jackson Pharmacy*, the record here indicates that there are potential efficiencies and economies of scale when employers rely on Wellmark to perform these functions, in which it has experience and expertise. The vast majority of employers could not realistically perform these duties on their own. There are also potential efficiencies and economies of scale when out-of-state insurers collaborate with Wellmark instead of trying to set up their own network for a relatively small number of Iowa claims.

Additionally, as in *North Jackson Pharmacy*, there are reasons for "judicial hesitancy" in classifying the challenged **[**24]** practices as per se violations of ***antitrust law***. The plaintiffs themselves admit the practices are widespread. A large percentage of Iowans are covered by self-insured employer plans administered by Wellmark. The BlueCard® network is a national program used by health insurers and clients across the country. We should be reluctant to declare these arrangements flatly illegal, without considering their relative procompetitive or anticompetitive effects.

Plaintiffs seek to distinguish *North Jackson Pharmacy* on the ground that Wellmark is not a "mere independent third-party 'administrator'" but a "major competitor in the market for Iowa healthcare provider services." Yet we fail to see how this distinction helps the plaintiffs' cause. It is true that Wellmark provides a higher level of service than a "mere administrator." It is also true that Wellmark's health care provider network was set up at least in part for its own purposes, not merely as a device to enable group purchasing of health care services. But these factors, if anything, take the challenged arrangements even further out of the realm of naked restraints. The self-insured employers are purchasing a bundle of preexisting services **[**25]** from Wellmark that most of them could not provide themselves.

Plaintiffs analogize this case to *Arizona v. Maricopa County Medical Society*, but we think the analogy is imperfect. *See* *457 U.S. 332, **[*574]** 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*. That case involved naked price-fixing: The physician members of a trade association were agreeing to abide by fee schedules. *Id. at 340-41, 102 S. Ct. at 2471, 73 L. Ed. 2d at 56*. There was no joint product or service being developed or sold. *See* *id. at 339-40, 102 S. Ct. at 2470, 73 L. Ed. 2d at 55-56*. The two wrinkles in the case were that the agreed-upon fees were *maximum* prices and the price-fixers were professionals. *Id. at 348-49, 102 S. Ct. at 2475, 73 L. Ed. 2d at 61-62*. Yet the Court found that neither of these considerations mattered and that the per se rule still applied. *Id*. It took note of Arizona's contention that so-called maximum prices can have the effect of stabilizing and enhancing the level of actual charges. *Id. at 341-42, 102 S. Ct. at 2471-72, 73 L. Ed. 2d at 57*.

This case might be comparable to *Maricopa County Medical Society* if the plaintiffs were claiming that Wellmark and other Iowa health insurers had simply agreed they would pay the same reimbursements to health care providers, without exchanging any meaningful services. Under *Maricopa County Medical Society*, it would not be a defense that the health insurers had agreed on minimum rather than maximum reimbursement rates.[5] *457 U.S. at 348-49, 102 S. Ct. at 2475, 73 L. Ed 2d at 61-62*. But that is not the **[**26]** situation here. We do not have a naked price-fixing agreement among competitors.

The plaintiffs also argue at some length that Wellmark has market power in health insurance in Iowa. This may be true, but it is not relevant to a per se claim. If plaintiffs' per se argument were correct, then it would be illegal for *any* insurer to make its insurance network pricing available to a self-insured that used the insurer's administrative and claims services even if the insurer had only a miniscule market share.

---

[5] Note again that the ultimate concern relates to monopsony rather than monopoly effects.

Additionally, the plaintiffs rely on Department of Justice and Federal Trade Commission guidance on health care. However, we believe the line that those agencies have drawn between per se and rule of reason conduct is consistent with the decision in this case. Consider the following passage from the 1996 *Statements of Antitrust Enforcement Policy in Health Care*:

> An agreement among purchasers that simply fixes the price that each purchaser will pay or offer to pay for a product or service is not a legitimate joint purchasing arrangement and is a per se antitrust violation. Legitimate joint purchasing arrangements **[**27]** provide some integration of purchasing functions to achieve efficiencies.

U.S. Dep't of Justice & Fed. Trade Comm'n, *Statements of Antitrust Enforcement Policy in Health Care* 67 n.17 (1996), *available at* *http://www.justice.gov/atr/public/guidelines/0000.pdf*. The challenged arrangements here are not simply agreements among purchasers to fix a price, which would be subject to per se treatment. To the contrary, both the self-insureds and the out-of-state BCBS licensees are obtaining a block of Iowa claims-related services from Wellmark. In other words, there is "integration of purchasing [and other related] functions to achieve efficiencies." *Id*.

We are not today foreclosing a rule of reason claim against Wellmark if it were shown that the anticompetitive consequences of its practices exceeded their procompetitive benefits.[6] We simply uphold **[*575]** the district court's ruling that Wellmark's arrangements with self-insured employers and out-of-state BCBS licensees are not subject to the per se rule. Because the plaintiffs by stipulation limited themselves to a per se claim, we affirm the district court's grant of summary judgment.

IV. Conclusion.

For the foregoing reasons, the district court's judgment is affirmed.

AFFIRMED.

All justices concur except Hecht and Appel, JJ., who take no part.

End of Document

[6] As the court put it in *North Jackson Pharmacy*,

> If the required rule of reason inquiry were to reveal that the anticompetitive **[**28]** consequences of any such conspiracy sufficiently outweigh its procompetitive benefits so that the restraint is ultimately judged unreasonable under *Section 1* [of the Sherman Act], this Court would not hesitate to rule accordingly. But because no authority even suggests that all cooperative purchasing agreements run afoul of *Section 1*, and because the agreement at issue here is part of a larger and potentially procompetitive enterprise, the rule of reason must be applied to North Jackson's Claim I.

385 F. Supp. 2d at 750-51.

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Summary Judgment > Appellate Review > Standards of Review

HN1[] **Standards of Review, De Novo Review**

The appellate court reviews de novo the district court's grant of summary judgment.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN2[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate when there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. A genuine issue of material fact exists when the evidence is such that a reasonable jury could return a verdict for the nonmoving party.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN3[] **Standing, Burdens of Proof**

A plaintiff must establish U.S. Const. art. III standing, which requires proof of (1) injury-in-fact, (2) causation, and (3) redressability. For Article III purposes, an antitrust plaintiff establishes injury-in-fact when he has suffered an injury which bears a causal connection to the alleged antitrust violation.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN4[] **Standing, Requirements**

In addition to U.S. Const. art. III standing, private antitrust plaintiffs must also demonstrate antitrust injury, which is (1) injury of the type the antitrust laws were intended to prevent that also (2) flows from that which makes defendants' acts unlawful. This can be established by showing that consumers paid higher prices for a product due to anticompetitive actions of a defendant, such as a horizontal market allocation scheme.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

HN5[] **Standing, Requirements**

As a general rule, summary judgment is inappropriate where an expert's testimony supports the nonmoving party's case. However, the mere proffering of unsupported expert testimony does not create a triable issue as to antitrust injury-in-fact. In the context of ***antitrust law***, if there are undisputed facts about the structure of the market that render the inference economically unreasonable, the expert opinion is insufficient to support a jury verdict. Expert testimony is useful as a guide to interpreting market facts, but it is not a substitute for them, and it has little probative value in comparison with the economic factors that may dictate a particular conclusion.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN6[] **Complaints, Requirements for Complaint**

A disclosure made during discovery is unlikely to cure lack of notice, which generally must be provided by a well-pled complaint.

Civil Procedure > ... > Costs & Attorney Fees > Costs > General Overview

HN7[] **Costs & Attorney Fees, Costs**

The appellate court reviews a cost award under the abuse of discretion standard A district court abuses its discretion if it does not apply the correct law or if it rests its decision on a clearly erroneous finding of material fact. However, the appellate court reviews the threshold question of whether the district court has the authority to award costs de novo.

Civil Procedure > ... > Costs & Attorney Fees > Costs > General Overview

HN8[] **Costs & Attorney Fees, Costs**

Taxable costs are limited to relatively minor, incidental expenses as is evident from *28 U.S.C.S. § 1920*.

Civil Procedure > ... > Costs > Costs Recoverable > Reproduction Costs

HN9[] **Costs Recoverable, Reproduction Costs**

Electronic production of documents can constitute making copies under *28 U.S.C.S. § 1920(4)*.

Civil Procedure > ... > Costs & Attorney Fees > Costs > General Overview

HN10[] **Costs & Attorney Fees, Costs**

Costs and fees should be awarded to the prevailing party. *Fed. R. Civ. P. 54(d)(1)* provides that unless a federal statute, these rules, or court order provides otherwise, costs, other than attorney's fees, should be allowed to the prevailing party. However, a district court's discretion to award costs is limited to particular types of costs enumerated in *28 U.S.C.S. § 1920*. *Section 1920* defines the term "costs" as used in *Rule 54(d)*.

Governments > Legislation > Interpretation

HN11[] **Legislation, Interpretation**

As with all statutory construction questions, the court begins with the language employed by Congress and the assumption that the ordinary meaning of that language accurately expresses the legislative purpose.

Civil Procedure > ... > Costs > Costs Recoverable > Reproduction Costs

Governments > Legislation > Interpretation

HN12[] **Costs Recoverable, Reproduction Costs**

28 U.S.C.S. § 1920(4) provides that a judge or clerk may tax the costs of making copies of any materials where the copies are necessarily obtained for use in the case. Because the phrase "making copies" is not defined in the statute, the court applies its ordinary meaning.

Civil Procedure > ... > Costs > Costs Recoverable > Reproduction Costs

HN13[] **Costs Recoverable, Reproduction Costs**

28 U.S.C.S. § 1920(4) speaks narrowly of fees for exemplification and copies of papers, suggesting that fees are permitted only for the physical preparation and duplication of documents, not the intellectual effort involved in their production.

Civil Procedure > ... > Costs > Costs Recoverable > Reproduction Costs

HN14[] **Costs Recoverable, Reproduction Costs**

28 U.S.C.S. § 1920(4) further defines the awarding of costs for making copies, requiring that recoverable costs be restricted to the making of copies necessarily obtained for use in the case.

Civil Procedure > ... > Costs > Costs Recoverable > Reproduction Costs

HN15[] **Costs Recoverable, Reproduction Costs**

Costs can be incurred in litigation for making copies that are not necessarily obtained for use in the case, and such costs are not taxable.

Civil Procedure > ... > Costs > Costs Recoverable > Reproduction Costs

HN16[] **Costs Recoverable, Reproduction Costs**

28 U.S.C.S. § 1920(4) is not so restrictive as to specifically require that the copied document be introduced into the record to be an allowable cost. *Section 1920(4)* allows for the recovery of costs where the copies were obtained to be produced pursuant to *Fed. R. Civ. P. 34* or other discovery rules.

Civil Procedure > ... > Costs > Costs Recoverable > Reproduction Costs

HN17[] **Costs Recoverable, Reproduction Costs**

To the extent that a party is obligated to produce (or obligated to accept) electronic documents in a particular format or with particular characteristics intact (such as metadata, color, motion, or manipulability), the costs to make duplicates in such a format or with such characteristics preserved are recoverable as the costs of making copies necessarily obtained for use in the case. *28 U.S.C.S. § 1920(4)*.

Civil Procedure > ... > Costs > Costs Recoverable > Reproduction Costs

HN18[] **Costs Recoverable, Reproduction Costs**

That *28 U.S.C.S. § 1920(4)* restricts the award of costs to those incurred for copies necessarily obtained for use in the case is not, in itself, a justification permitting the award of costs for any task necessary to the prosecution or defense of a case. *Section 1920(4)* does not state that all steps that lead up to the production of copies of materials are taxable. Only the costs of creating the produced duplicates are included as recoverable, not a number of preparatory or ancillary costs commonly incurred leading up to, in conjunction with, or after duplication. It may be that extensive processing of electronically stored information is essential. But that does not mean that the services leading up to the actual production constitute making copies.

Civil Procedure > ... > Costs > Costs Recoverable > Reproduction Costs

HN19[] **Costs Recoverable, Reproduction Costs**

The proper application of a narrowly construed *28 U.S.C.S. § 1920(4)* requires that the tasks and services for which an award of costs is being considered must be described and established with sufficient specificity, particularity, and clarity as to permit a determination that costs are awarded for making copies. Document production and other similarly generic statements on the invoices are unhelpful in determining whether those costs are taxable. Further, a description of a task is useful only to the extent it accurately reflects the task for which copying costs are sought.

Civil Procedure > ... > Costs > Costs Recoverable > Reproduction Costs

HN20[] **Costs Recoverable, Reproduction Costs**

Consideration of whether certain tasks are taxable pursuant to *28 U.S.C.S. § 1920(4)* calls for some common-sense judgments guided by a comparison with the paper-document analogue.

Civil Procedure > ... > Costs > Costs Recoverable > Reproduction Costs

HN21[] **Costs Recoverable, Reproduction Costs**

The cost of making the copy is not rendered non-taxable merely because it was created by using fax machines rather than a photo-copier. Conversely, *28 U.S.C.S. § 1920(4)* does not award costs merely because a process resulted in the creation of a copy. That the fax process creates a copy does not, by itself, establish that the cost is taxable under *§1920(4)*. Rather, a further determination is required: whether the copy was necessarily obtained for use in the case. Like any other copy, if the faxed copy was created to be produced in discovery, the cost of making the fax would be taxable under *§ 1920(4)*. However, if the faxed copy was created solely for the convenience of counsel, the cost of making the copy would not be taxable.

Civil Procedure > ... > Costs > Costs Recoverable > Reproduction Costs

HN22[] **Costs Recoverable, Reproduction Costs**

A narrow construction of *28 U.S.C.S. § 1920(4)* requires recognition that the circumstances in which a copy will be deemed necessarily obtained for use in a case will be extremely limited. That a chosen document production process requires the creation of a copy does not establish that the copy is necessarily obtained for use in the case. A lawyer may review electronically stored information for privilege either by viewing the original documents on the client's computer or, alternatively, by viewing copies uploaded to the lawyer's computer. Although the latter method of review requires the creation of a copy, the ability to conduct the review by looking at the original document establishes that the uploaded copy was not necessarily obtained for use in the case.

Civil Procedure > Appeals > Appellate Briefs

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN23[] **Appeals, Appellate Briefs**

Where matters are not specifically and distinctly argued in the open briefing, the appellate court will not consider them.

Civil Procedure > ... > Costs & Attorney Fees > Costs > General Overview

HN24[] **Costs & Attorney Fees, Costs**

A district court need not give affirmative reasons for awarding costs; instead, it need only find that the reasons for denying costs are not sufficiently persuasive to overcome the presumption in favor of an award.

Civil Procedure > ... > Costs & Attorney Fees > Costs > General Overview

HN25[] **Costs & Attorney Fees, Costs**

A district court must specify reasons for its decision to abide the presumption and tax costs to the losing party.

Civil Procedure > ... > Costs > Costs Recoverable > Reproduction Costs

HN26[] **Costs Recoverable, Reproduction Costs**

Fees for exemplification and copying are permitted only for the physical preparation and duplication of documents, not the intellectual effort involved in their production. However, there is no authority for the proposition that the title of the person doing the work is relevant to classifying the type of work actually done. In fact, courts have held otherwise. Neither the degree of expertise necessary to perform the work nor the identity of the party performing the work of making copies is a factor that can be gleaned from *28 U.S.C.S. § 1920(4)*.

Summary:

SUMMARY**

Antitrust

The panel affirmed the district court's summary judgment and affirmed in part and reversed in part its award of costs in consolidated antitrust actions arising out of a promotion agreement whereby Walmart transferred its online DVDrental subscribers to Netflix, and Netflix agreed to promote Walmart's DVD sales business.

The plaintiffs, individuals representing a class of Netflix subscribers, contended that this arrangement violated *§§ 1* and *2 of the Sherman Act* by illegally allocating and monopolizing the online DVD-rental market. The panel held that the subscribers did not raise a triable issue of fact as to whether they suffered antitrust injury-in-fact on a theory that they paid supracompetitive prices for one of Netflix's subscription plans because Netflix would have reduced the price of that plan but for its allegedly anticompetitive conduct. **[**2]**

In light of *Taniguchi v. Kan Pac. Saipan, Ltd., 132 S. Ct. 1997, 182 L. Ed. 2d 903 (2012)*, which underscored the narrow scope of taxable costs under *28 U.S.C. § 1920*, the panel affirmed in part and reversed in part the district court's cost award. Finding persuasive the reasoning of the Third, Fourth, and Federal Circuits, the panel held that certain charges for "data upload" and "keywording" were not recoverable as costs for making copies under *§ 1920(4)*. The panel remanded for consideration of whether costs were properly awarded for "professional services." The panel concluded that of the costs challenged as non-taxable under *§ 1920(4)*, only those costs attributable to optical character recognition, converting documents to TIFF, and "endorsing" activities—all of which were explicitly required by the plaintiffs—were recoverable on the record before it. The panel held that the district court did not abuse its discretion in awarding costs for preparation of visual aids, for TIFF conversions, and for copying of paper documents. The district court also did not abuse its discretion in declining to award Netflix costs for production of certain PowerPoint documents.

Judges: Before: Sidney R. Thomas, Chief Judge, Stephen Reinhardt, Circuit Judge, and Lloyd D. George, Senior District Judge.* Opinion by Chief Judge Thomas.

Opinion by: Sidney R. Thomas

** This summary constitutes no part of the opinion of the court. It has been prepared by court staff for the convenience of the reader.

* The Honorable Lloyd D. George, Senior District Judge for the U.S.District Court for the District of Nevada, sitting by designation.

Opinion

[*918] THOMAS, Chief Judge:

These consolidated antitrust actions arise out of an agreement ("Promotion Agreement") between Netflix and Walmart[1] whereby Walmart transferred its online DVD-rental subscribers to Netflix, and Netflix agreed to promote Walmart's DVD sales business. The plaintiffs, individuals representing a class of Netflix subscribers ("Subscribers"), contend that this arrangement violated *§§ 1* and *2 of the Sherman Act* by illegally allocating and monopolizing the online DVD-rental market. The Subscribers' theory of injury is that they paid supracompetitive prices for one of Netflix's subscription plans because Netflix would have reduced the price of that plan but for its allegedly anticompetitive conduct.

We agree with the district court that the Subscribers **[**5]** have not raised a triable issue of fact as to whether they suffered antitrust injury-in-fact, and we affirm the district court's grant of summary judgment. We vacate in part the district court's cost award, and remand for consideration in light of this opinion.

I

In 1997, Reed Hastings and Marc Randolph co-founded Netflix, the first internet-based DVD rental service. Netflix **[*919]** commenced operations in 1998, offering customers through its website the option to rent or buy DVDs by mail. Netflix initially offered DVD rentals on a pay-per-rental basis, but soon replaced that system with a monthly subscription model. In 2000, it discontinued its DVD sales business altogether. Several Netflix subscription plans permitted customers to rent an unlimited number of DVDs, differing in how many DVDs a customer could borrow at a given time. For example, in 2003, Netflix offered its "3U" plan, which permitted three DVDs to be rented at a time, for $19.95 per month, while its "4U" plan cost $24.95 per month and allowed four DVDs at a time. Netflix's DVD-rental business flourished under the new model, and by 2005 it had a 77.8% share of the online DVD-rental market, rising to 92.3% by 2010.

Netflix faced **[**6]** no serious competition in its early years. However, in 2003, Walmart, one of the nation's largest retail companies, launched its own online DVD-rental service. Walmart initially offered its 3U plan for $18.76 a month. Although Walmart's 3U plan was cheaper than Netflix's ($19.95 per month), Netflix did not alter its 3U plan price for a full year. When Netflix eventually did change its 3U price, in June 2004, it *increased* the price to $21.99 per month.

Two months later, in August 2004, Blockbuster, the largest store-based DVD rental company, launched its own online DVD rental service, becoming the third major competitor in the market. Blockbuster offered its 3U plan at $19.99 per month and included with it two free coupons per month for in-store rentals.

In October 2004, in apparent response to rumors that Amazon planned to enter the online DVD-rental market as well, Netflix announced that it would lower the price of its 3U plan from $21.99 to $17.99 per month. Blockbuster responded the next day by announcing that it would cut its 3U price to $17.49 per month. In November 2004, Walmart reduced its 3U price to $17.36 per month. In December 2004, Blockbuster again reduced the price of its **[**7]** 3U plan, this time to $14.99 per month—the lowest 3U plan price in the market. Netflix maintained its $17.99 price until August 2007, when it lowered the price to $16.99.

During this period, Walmart's online DVD-rental business performed poorly. Walmart never had more than 60,000 subscribers. In contrast, in mid-2004 Netflix had over 2 million subscribers, and Blockbuster had 400,000 subscribers. From June 2003, when Walmart opened its online DVD-rental business, until it signed the Promotion Agreement with Netflix in March 2005, Walmart gained an average of 5,000 subscribers per quarter. Netflix added 250,000 subscribers per quarter over the same period. Walmart's subscriber share peaked at 2.4% in early 2004

---

[1] For ease of reference, "Wal-Mart Stores, Inc." and "walmart.com USA LLC" shall be collectively referred to as "Walmart" throughout this opinion.

and declined from that point. By February 2005, Walmart had only a 1.4% market share. In contrast, Netflix controlled 77.8% of the market in 2005. Walmart lost 7,000 subscribers during the final quarter of 2004.

In October 2004, Netflix's CEO Reed Hastings sought a meeting with Walmart CEO John Fleming. Hastings testified that he requested the meeting because he hoped to form a partnership with Walmart that would strengthen Netflix's position before Amazon entered the market. Hastings **[**8]** was aware that Walmart's online DVD-rental service was performing poorly, and hoped that Walmart might therefore be open to a partnership. The two CEOs met on October 27, 2004. Hastings recounts that Walmart seemed uninterested in a deal at the time and that there was no discussion about Netflix selling new **[*920]** DVDs. Fleming provided a similar account. No agreement was reached at the meeting.

Unbeknownst to Hastings, Walmart was entertaining other suitors. Walmart considered a potential partnership with Yahoo!, and a draft partnership agreement to that effect was prepared as early as December 1, 2004. Walmart considered a similar deal with Microsoft.

Walmart began considering alternative strategic options for its online DVD-rental business, and ultimately looked in depth at four possibilities: (1) continuing to run the business with a low subscriber amount, (2) aggressively building the business, (3) partnering with Yahoo!, and (4) exiting the online DVD-rental business. After carefully analyzing each option, Walmart concluded that none would be profitable and that, in fact, it would probably suffer multi-million dollar financial losses under all four scenarios.

Walmart made the final decision **[**9]** to exit the market by early January 2005. It established an impairment reserve to cover any losses incurred from the closure and stopped accepting new subscribers for its 3U and 4U plans. By February 2005, Walmart had incurred $3 million of costs associated with shuttering its online DVD-rental business. By March 2005, Netflix had 3 million subscribers. Walmart had 52,000. Walmart employees speculated that Walmart's online DVD-rental business did not succeed because Walmart devoted insufficient resources to marketing, could not match Netflix's guaranteed one- to two-day delivery, had a poorly designed website, and offered a relatively limited selection of DVDs.

Aware of Walmart's market share decline, but unaware of its plan to discontinue its online DVD-rental business, Hastings renewed his efforts to meet with Fleming. The two CEOs met on February 9, 2005. Fleming did not inform Hastings that Walmart had decided to leave the online DVD-rental business. Although no agreement was reached at the meeting, Hastings's efforts did eventually bear fruit. By March 17, 2005, Hastings and Fleming had reached a verbal agreement, the key terms of which were that: (1) Walmart DVD-rental subscribers **[**10]** and their rental queues would be transferred to Netflix, for those customers who so chose, free of charge, and customers would be offered the same subscription price for one year; (2) Walmart would promote on its website Netflix's online DVD-rental business; (3) Netflix would pay Walmart a 10% revenue share for each subscriber who transferred, as well as a $36 bounty for each new Netflix subscriber gained from Walmart's referrals; and (4) Netflix would promote Walmart's DVD sales business.

These key terms were incorporated into the Promotion Agreement. The Promotion Agreement did not include a covenant not to compete, did not prohibit Netflix from selling new DVDs, and explicitly *permitted* Walmart to offer an online DVD-rental service.[2] The Promotion Agreement was publically announced May 19, 2005.

Despite the earlier rumors, Amazon did not initiate an online DVD-rental service. Thus, after Walmart's exit in mid-2005, Netflix and Blockbuster remained as the two major competitors in the market. Blockbuster eventually **[**11]** filed for bankruptcy in September 2010, leaving Netflix as the sole major competitor, with over 90% of the online DVD-rental market.

---

[2] In fact, in February 2010, Walmart acquired the streaming video service VuDu, which competes directly with Netflix by offering rentals to consumers through Internet streaming.

Netflix kept its 3U price at $17.99 from November 2004 to August 2007, when it **[*921]** reduced the price to $16.99, which is where it remained through the end of the class period. During the class period, Netflix began offering video streaming over the Internet, and Netflix has since focused on developing that aspect of its business.

The Subscribers filed several actions, alleging antitrust violations by Netflix, Walmart Stores, and Walmart.com, and seeking to represent a class of Netflix subscribers. The actions were consolidated and an amended complaint filed. The thrust of the Subscribers' complaint is that the Promotion Agreement reflected an illegal allocation of the online DVD-rental market. The Subscribers assert four causes of action: (1) a *§ 1 Sherman Act* violation for unlawful market allocation of the online DVD-rental market (against all defendants); (2) a *§ 2 Sherman Act* claim for monopolization of the online DVD-rental market (against Netflix); (3) a *§ 2 Sherman Act* claim for attempted monopolization of the online DVD-rental market (against Netflix); and (4) **[**12]** a *§ 2 Sherman Act* claim for conspiracy to monopolize the online DVD-rental market (against all defendants).

The district court granted the Subscribers' motion for certification of a litigation class, defining the class as "[a]ny person or entity in the United States that paid a subscription fee to Netflix on or after May 19, 2005 up to and including [December 23, 2010,] the date of class certification." The district court subsequently approved Walmart's settlement with the class.

Netflix moved for summary judgment pursuant to *Federal Rule of Civil Procedure 56* as to all claims asserted against it. The district court granted the motion, concluding that there was no *per se* antitrust violation, and that the Subscribers had failed to raise a triable issue as to antitrust injury-in-fact. The district court also excluded tendered evidence of agreements Netflix had with Amazon, Best Buy, and Musicland, because the agreements raised new theories of liability that were not expressly pleaded in the complaint.

The district court entered final judgment against the Subscribers, after which Netflix filed a bill of costs seeking $744,740.11 in discovery costs. The district court subsequently awarded Netflix $710,194.23 in costs. The Subscribers **[**13]** filed a timely notice of appeal, and Netflix cross-appealed.

We have jurisdiction pursuant to *28 U.S.C. § 1291*. ***HN1***[] "We review de novo the district court's grant of summary judgment." *Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 912 (9th Cir. 2008)*. ***HN2***[] Summary judgment is appropriate when "there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A genuine issue of material fact exists when "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. Until recently, "[s]ummary judgment [was] disfavored in antitrust cases," *High Tech. Careers v. San Jose Mercury News, 996 F.2d 987, 989 (9th Cir. 1993)*, but "any presumption against the granting of summary judgment in complex antitrust cases has now disappeared," *In re ATM Fee Antitrust Litig., 554 F. Supp. 2d 1003, 1010 (N.D. Cal. 2008)* (citing Philip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 308c2 (3d ed. 2007)).

II

The district court properly concluded that the Subscribers failed to raise a triable issue of fact as to antitrust injury-in-fact, and that Netflix was thus entitled to summary judgment. As with all federal claims, ***HN3***[] a plaintiff must establish Article III standing, which requires proof of (1) **[*922]** injury-in-fact, (2) causation, and (3) redressability. *Gerlinger v. Amazon.com Inc., 526 F.3d 1253, 1255 (9th Cir. 2008)*. "For Article III purposes, an antitrust plaintiff establishes injury-in-fact when he has suffered an injury which bears a causal connection to the **[**14]** alleged antitrust violation." *Id.* (internal quotation marks and citation omitted).

HN4[] In addition to Article III standing, private antitrust plaintiffs must also demonstrate antitrust injury, which is (1) "injury of the type the antitrust laws were intended to prevent" that also (2) "flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. This can be established by showing that consumers paid higher prices for a product due to anticompetitive actions of a defendant, such as a horizontal market allocation scheme. *See In re Cardizem CD Antitrust Litigation, 332 F.3d 896, 910-11 (6th Cir. 2003)*.

The Subscribers' injury-in-fact theory is that Netflix subscribers paid supracompetitive prices for their DVD-rental subscriptions once Walmart exited the online DVD-rental market pursuant to the allegedly anticompetitive Promotion Agreement. Specifically, the Subscribers contend that Netflix would have reduced its 3U subscription price to $15.99 per month but for Netflix's allegedly anticompetitive conduct. Free from the competitive threat of Walmart, the Subscribers allege, Netflix was able to maintain this artificially high price point.

Applying the standards applicable to antitrust cases, the district court properly concluded that the Subscribers had not raised a genuine **[**15]** issue of material fact as to antitrust injury-in-fact. The Subscribers failed to adduce evidence raising a triable issue of fact that if Walmart remained in the market, Netflix would have reduced its prices.

The undisputed record belies this assertion. Netflix never lowered its 3U price at any time in response to Walmart. Even though Walmart entered the market with a lower price ($18.76 to Netflix's $19.95) for a comparable 3U plan, Netflix did not alter its 3U plan price for a full year after Walmart entered the market. When Netflix eventually did change the price, a year later, it *increased* the price to $21.99 per month. Netflix also did not reduce its price when Blockbuster offered a 3U plan for $14.99 (while Netflix's was $17.99), even though Blockbuster had a much greater share of the market than Walmart, and even though Netflix rightfully viewed Blockbuster as a competitive threat. Thus, the district court properly determined that no reasonable juror could conclude that Netflix was going to lower its 3U price to $15.99 in response to Walmart when (1) Netflix had never lowered its prices in response to Walmart at any time and (2) Netflix did not lower its price in the face of the **[**16]** $14.99 price cut by Blockbuster, which was objectively a greater competitive threat.

Walmart never had more than 60,000 subscribers, in contrast to Netflix's two million subscribers in mid-2004. Moreover, Walmart gained an average of just 5,000 subscribers per quarter between when it entered the online DVD-rental market in June 2003 and when the Promotion Agreement was announced in March 2005; during this same time period, Netflix was adding 250,000 subscribers per quarter. Thus, Walmart's subscriber market share peaked at 2.4% in early 2004 and declined from there, hitting 1.4% in February 2005. This subscriber decline was most prevalent during the final quarter of 2004, when Walmart lost 7,000 subscribers. Walmart.com's director of entertainment **[*923]** and photo opined that, in mid-2004, it had become clear that Walmart's venture would fail. Walmart attributed this selfdescribed "increased rate[] of attrition" from an already anemic subscriber base to a host of factors, including Walmart's inability to match Netflix's guaranteed 1- to 2-day delivery and Walmart's confusing, poorly designed website.

Not only was Walmart's online DVD-rental business lagging, it was perceived as such by Netflix, **[**17]** Blockbuster, and Amazon. For example, Blockbuster's senior Vice President testified that Blockbuster was not surprised that Walmart exited the business, in part because Walmart was unable to be "the low-cost provider" and received negative reviews from consumers. He concluded that Walmart's exit was "logical." Amazon held similar views. As one Amazon employee stated, he and his colleagues "spent next to no time thinking about Wal-mart" because Walmart wasn't "taking it seriously; they had one distribution center; they had limited selection; they had faulty systems that didn't really work."

The Subscribers' evidence consists of some internal documents produced by Netflix and Walmart employees that purportedly indicate that Walmart was regarded and treated and as a true competitor. For example, the Subscribers note that in November 2003 Walmart described its expectations of growth in the online DVD-rental market over the coming months, and that Hastings said in October 2002 that Walmart's entrance into the DVD-rental market was "unsettling." However, these communications pre-dated Walmart's entry into the market and subsequent poor performance.

The Subscribers also cite a number of documents **[**18]** in which Walmart claimed that its service was successful, such as a "talking points" memo. However, these documents were meant for promotional and motivational purposes, not performance analysis, and the memos do not contain any hard market data. Rather, the documents contain language best described as puffery. The Subscribers also rely on certain news articles that purportedly show that outside observers also considered Walmart a threat. However, many of the documents pre-date Walmart's entry into the market, and others refer to the market challenges posed by Blockbuster, not Walmart. Indeed, Netflix's internal documents indicate that it was analyzing a potential price cut to $15.99 in response to

Blockbuster, not Walmart. Further, as the district court emphasized, any Netflix price decrease was "(1) in response to Blockbuster (not Walmart); (2) always couched in terms of possibility; and (3) never actually occurred." Netflix's internal documents show that by late 2004, Netflix treated Walmart as a negligible threat. Indeed, much of the Subscribers' documentary evidence actually supports Netflix's position and convincingly reveals that Walmart did not view itself and was not viewed **[**19]** by others as a competitive threat in late 2004 and early 2005.

The Subscribers also rely on expert testimony. ***HN5***[] "As a general rule, summary judgment is inappropriate where an expert's testimony supports the nonmoving party's case." *Southland Sod Farms v. Stover Seed Co., 108 F.3d 1134, 1144 (9th Cir. 1997)* (internal quotation marks and citation omitted). *See also* *Dolphin Tours, Inc. v. Pacifico Creative Serv., Inc., 773 F.2d 1506, 1511 (9th Cir. 1985)* (anticompetitive injury could be inferred from an expert's conclusion that the plaintiff would have attained "a market share of roughly twenty percent" instead of the two percent it did reach). However, the mere proferring of unsupported expert testimony does not create a triable issue as to antitrust injury-in-fact. "In the context of ***antitrust*** **[*924]** ***law***, if there are undisputed facts about the structure of the market that render the inference economically unreasonable, the expert opinion is insufficient to support a jury verdict." *Rebel Oil Co., Inc. v. Atl. Richfield Co., 51 F.3d 1421, 1435-36 (9th Cir. 1995)*. "Expert testimony is useful as a guide to interpreting market facts, but it is not a substitute for them," and it "has little probative value in comparison with the economic factors that may dictate a particular conclusion." *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 242, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* (internal quotation marks and citation omitted). We agree with the district court that the Subscribers' experts' testimony is contrary to the undisputed **[**20]** market facts. The opinions are founded on speculation about Walmart's potential to remain in the market based on its general retail strength, untethered to its actual performance in this particular market. The testimony also ignores the fact that the Promotion Agreement allowed Walmart to rent DVDs.[3]

Gerlinger confirms the conclusion that, as a matter of law, the Subscribers have failed to raise a triable issue of antitrust injury-in-fact. In *Gerlinger*, Amazon.com and Borders book store entered into an agreement pursuant to which Borders' website directed customers to a site hosted by *Amazon.com. 526 F.3d at 1255*. In return for referring its online customers to Amazon, Borders received a commission for each book sold and agreed to abandon the online book sales market during the term of the agreement. *Id*. The plaintiff alleged that the agreement was an unlawful market allocation and that **[**21]** he paid supracompetitive prices as a result of it. *Id*. Like the Netflix Subscribers, Gerlinger's theory of injury-in-fact was that, if Borders continued competing in the market, book prices would have fallen. *Id*. But, as here, defendants presented evidence that prices in fact remained the same or even went down following the agreement. *Id*. This Court concluded that the plaintiff had not raised a triable issue as to whether he would have paid less for a book absent the allegedly anticompetitive agreement. *Id. at 1256*.

Thus, even considering the facts in the light most favorable to the plaintiffs, the district court properly concluded that the Subscribers did not raise a genuine issue of material fact as to antitrust injury-in-fact. Accordingly, we affirm the district court's summary judgment as to the four Sherman Act claims. Because the Subscribers have not shown injury-in-fact, we need not—and do not—reach the merits of their antitrust claims. *See* *Gerlinger, 526 F.3d at 1256* ("We do not reach the merits, however, because the plaintiff has not shown any injury-in-fact caused by the agreement, and he therefore lacks Article III standing to bring this claim . . . .").

III

Both parties contest the district court's cost award. **[**22]** ***HN7***[] We review a cost award under the abuse of discretion standard. *Arakaki v. Lingle, 477 F.3d 1048, 1069 (9th Cir. 2007)*. "A district court abuses its discretion if it does not apply the correct law or if it rests its decision on a clearly erroneous finding of material fact." *Jeff D. v. Otter, 643 F.3d 278, 283 (9th Cir. 2011)* (internal quotation marks and citation omitted). However, we review **[*925]**

---

[3] The district court also did not abuse its discretion in excluding evidence at summary judgment that supported new, unpled liability theories, even though the evidence had been adduced in discovery. *See* *Oliver v. Ralphs Grocery Co., 654 F.3d 903, 908-09 (9th Cir. 2011)* (***HN6***[] a disclosure made during discovery is unlikely to cure lack of notice, which generally must be provided by a well-pled complaint).

the threshold question of whether the district court has the authority to award costs de novo. *Russian River Watershed Protection Comm. v. City of Santa Rosa, 142 F.3d 1136, 1144 (9th Cir. 1998)*.

During discovery, the Subscribers sought production of electronically stored information. The Subscribers required that electronic information other than spreadsheets be produced in the static Tagged Image File Format ("TIFF").[4] The Subscribers also requested that these images contain searchable text and relevant metadata,[5] and that the produced documents be numbered sequentially and include certain identifying information. Netflix enlisted electronic discovery vendors to assist with responding to the Subscribers' discovery requests.

As can be expected from a case of this magnitude, discovery was extensive, and Netflix ultimately produced almost 15 million pages in response to the Subscribers' discovery requests. After summary judgment was granted, Netflix requested $744,740.11 as costs for discovery-related tasks, and was ultimately awarded $710,194.23 by the district court. The Subscribers appeal portions of that award, and Netflix cross-appeals.

The Subscribers argue that the district court (1) erred by broadly construing *§ 1920(4)* in its taxing of e-discovery and data management costs totaling $317,616.69, and (2) abused its discretion in taxing consulting fees, TIFFs, and copying costs totaling $245,471.31. Netflix cross appeals, arguing that the district court abused its discretion in disallowing $21,000 in costs to copy certain PowerPoint files.

A

The district court's decision rested upon a "broad construction of *section 1920* with respect **[**24]** to electronic discovery production costs." That determination was largely founded on our decision in *Taniguchi v. Kan Pacific Saipan, Ltd., 633 F.3d 1218, 1221 (9th Cir. 2011)*, which was subsequently reversed by the Supreme Court, *132 S. Ct. 1997, 182 L. Ed. 2d 903 (2012)*. In light of the intervening Supreme Court precedent, we vacate the award of some of the costs the Subscribers have challenged as "non-recoverable" and remand for further consideration of some of those costs pursuant to a narrow construction of *§ 1920(4)*.

1

In awarding costs, the district court explicitly adhered to a broad interpretation of *§ 1920(4)* pursuant to our decision in *Taniguchi*. After the Supreme Court's reversal of *Taniguchi*, we must reassess what electronic discovery costs may be properly taxed as costs of "making copies of any materials where the copies are necessarily obtained for use in the case" under *28 U.S.C. § 1920(4)*. In conducting this assessment, we find persuasive the reasoning of the Third Circuit in *Race Tires*, the Fourth Circuit in *Country Vintner*, and the Federal Circuit in *CBT Flint Partners, LLC v. Return Path, Inc., 737 F.3d 1320* ***[*926]*** *(Fed. Circ. 2013)*. We are also guided by the Supreme Court's reiteration, in *Tanaguchi*, of the limited reach of *§ 1920*. In that decision, the Supreme Court reversed our determination that costs of a translator of written documents can constitute the costs of an "interpreter" under *§ 1920(6)*. *132 S. Ct. at 2005*. In doing so, the Court underscored "the narrow scope of taxable costs" and reminded us that ***HN8***[] "[t]axable costs **[**25]** are limited to relatively minor, incidental expenses as is evident from *§ 1920*." *Id. at 2006*.

In establishing the boundaries that must be given to *§ 1920(4)*, some historical perspective is useful. "Although the taxation of costs was not allowed at common law, it was the practice of federal courts in the early years to award costs in the same manner as the courts of the relevant forum State." *Taniguchi, 132 S. Ct. at 2001* (citing *Alyeska*

---

[4] TIFF is a "widely used and supported graphic file format for storing bit-mapped images, with many different compression formats and resolutions. TIFF images are stored in tagged fields, and programs use the tags to accept or ignore fields, depending on the application." *Race Tires America, Inc. v. Hoosier Racing Tire Corp., 674 F.3d 158, 161 n.2 (3d Cir. 2012)* (internal **[**23]** quotation marks, citations, and alterations omitted).

[5] "Metadata is simply data that provides information about other data." *Country Vintner of N.C., LLC v. E. & J. Gallo Winery, Inc., 718 F.3d 249, 253 n.4 (4th Cir. 2013)* (internal quotation marks and citation omitted). It is "[s]econdary data that organize, manage, and facilitate the use of primary data." *Black's Law Dictionary* 1141 (10th ed. 2014).

Pipeline Serv. Co. v. Wilderness Soc'y, 421 U.S. 240, 247-48, 95 S. Ct. 1612, 44 L. Ed. 2d 141 (1975)). This diversity of rules led to a great diversity of awards, which in turn led to some losing litigants being "unfairly saddled with exorbitant fees." Alyeska, 421 U.S. at 251.

"In 1853, Congress undertook to standardize the costs allowable in federal litigation." *Id*. In doing so, they sought to "simplify the taxation of fees, by prescribing a limited number of definite items to be allowed." Country Vintner, 718 F.3d at 255 (quoting Cong. Globe, 32nd Cong., 2d Sess. App. 207 (1853) (statement of Sen. Bradbury)). The result was the Fee Act of 1853, ch. 80, 10 Stat. 161, which was a predecessor to *§ 1920*. The Fee Act "depart[ed] from the English practice of attempting to provide the successful litigant with total reimbursement." Race Tires, 674 F.3d at 164 (quoting 10 Charles Alan Wright, Arthur R. Miller, Mary Kay Kane & Richard L. Marcus, *Federal Practice and Procedure* § 2665 (3d ed. 1998)). The Supreme Court has since held **[**26]** that Congress intended with the Fee Act to "impose rigid controls on cost-shifting in federal courts." Crawford Fitting Co. v. J.T. Gibbons, Inc., 482 U.S. 437, 444, 107 S. Ct. 2494, 96 L. Ed. 2d 385 (1987). Thus, *§ 1920* "define[s] the full extent of a federal court's power to shift litigation costs absent express statutory authority to go further." W. Va. Univ. Hosps., Inc. v. Casey, 499 U.S. 83, 86, 111 S. Ct. 1138, 113 L. Ed. 2d 68 (1991).

The language of *§ 1920(4)* first appeared in § 3 of the Fee Act, stating that "lawful fees for exemplifications and copies of papers necessarily obtained for use on trial . . . shall be taxed by a judge or clerk of the court." 10 Stat. at 168. The language was altered over the years to apply to "cases," not just trials, and courts were later given discretion to award the costs, rather than being mandated to do so. Race Tires, 674 F.3d at 165. The statute originally applied to making only "copies of paper," but now applies to the "costs of making copies of any materials." Judicial Administration and Technical Amendments Act of 2008, *Pub. L. No. 110-406, § 6, 122 Stat. 4291, 4292*; *see also* In re Ricoh Co., Ltd. Patent Litig., 661 F.3d 1361, 1365 (Fed. Cir. 2011) (**HN9**[] "[E]lectronic production of documents can constitute . . . 'making copies' under *section 1920(4)*.").

As a general rule, **HN10**[] costs and fees should be awarded to the prevailing party. Fed. R. Civ. P. 54(d)(1) ("Unless a federal statute, these rules, or court order provides otherwise, costs—other than attorney's fees—should be allowed to the prevailing party."). However, a district court's discretion to award costs is limited to particular types of costs enumerated in *28 U.S.C. § 1920*. *See* Crawford Fitting, 482 U.S. at 441 ("*[Section] 1920* defines **[**27]** the term 'costs' as used in Rule 54(d).").

[*927] **HN11**[] As with all statutory construction questions, we "begin with the language employed by Congress and the assumption that the ordinary meaning of that language accurately expresses the legislative purpose." FMC Corp. v. Holliday, 498 U.S. 52, 57, 111 S. Ct. 403, 112 L. Ed. 2d 356 (1990) (internal quotation marks omitted). **HN12**[] *Section 1920(4)* provides that a judge or clerk may tax "the costs of making copies of any materials where the copies are necessarily obtained for use in the case." We first focus on the phrase "making copies." *28 U.S.C. § 1920(4)*. Because this language is not defined in the statute, we apply "its ordinary meaning." Taniguchi, 132 S. Ct. at 2002.

As the Fourth Circuit explained in *Country Vintner*, "'[c]opies' has appeared in the taxation statute since its enactment in 1853, when 'copy' meant a 'transcript,' a 'writing like another writing,' or an 'imitation.'" 718 F.3d at 258 (footnotes omitted). The noun retains an almost identical meaning today."[6] The definitions for the verb "make" relevant to the context of *§ 1920(4)* include "to cause to exist, occur, or appear" and "to bring (a material thing) into being by forming, shaping, or altering material."[7] These definitions are consistent with our previous observation that **HN13**[] "*[s]ection 1920(4)* speaks narrowly of '[f]ees for exemplification and copies of papers,' suggesting that fees **[**28]** are permitted only for the physical preparation and duplication of documents, not the intellectual effort involved in their production." Romero v. City of Pomona, 883 F.2d 1418, 1428 (9th Cir. 1989), *abrogated in part on*

---

[6] *See* Webster's Third New International Dictionary of the English Language Unabridged 504 (1993) (defining "copy" as "an imitation, transcript, or reproduction of an original work").

[7] Id. at 1363.

other grounds by Townsend v. Holman Consulting Corp., 929 F.2d 1358, 1363 (9th Cir.1991) (en banc); *see also Zuill v. Shanahan, 80 F.3d 1366, 1371 (9th Cir.1996)*.

HN14[] *Section 1920(4)* further defines the awarding of costs for making copies, requiring that recoverable costs be restricted to the making of copies "necessarily obtained for use in the case." Applying the statutory construction maxim *expressio unius est exclusio alterius* (the express mention of a thing implicitly excludes others in its class), we presume that Congress recognized that ***HN15***[] costs can also be incurred in litigation for making copies that are not necessarily obtained for use in the case, and that such costs are not taxable.

Nevertheless, ***HN16***[] the statute is not so restrictive as to "specifically require that the copied document be introduced into the record to be an allowable cost." *Haagen-Dazs Co., Inc. v. Double Rainbow Gourmet Ice Creams, Inc., 920 F.2d 587, 588 (9th Cir. 1990)*. *Section 1920(4)* allows for the recovery of costs where the copies were obtained to be produced pursuant to *Rule 34* or other discovery rules. *See Country Vintner, 718 F.3d at 257 n.9* (noting decisions **[**29]** of the Federal Circuit—applying the law of this circuit—as well as the Fifth, Seventh, and Eleventh Circuits recognizing that costs are recoverable under *§ 1920(4)* for copying costs for document production).

The faithful production of electronically stored information may require processes such as optical character recognition (which renders material text-searchable), preservation of metadata, and conversion to a non-editable file format. Parties might agree to employ a particular file format or methodology for electronically stored information production, or the court might order them to produce electronically **[*928]** stored information with certain characteristics. *See In re Ricoh, 661 F.3d at 1365* (parties agreed that a third party vendor would process and store e-mails in a secure document review database). The Federal Circuit held in *CBT Flint Partners* that

> ***HN17***[] To the extent that a party is obligated to produce (or obligated to accept) electronic documents in a particular format or with particular characteristics intact (such as metadata, color, motion, or manipulability), the costs to make duplicates in such a format or with such characteristics preserved are recoverable as "the costs of making copies . . . necessarily obtained **[**30]** for use in the case." *28 U.S.C. § 1920(4)*.

737 F.3d at 1328. *See also Country Vintner, 718 F.3d at 260 n.19* ("If, for instance, a case directly or indirectly required production of [electronically stored] unique information such as metadata, we assume, without deciding, that taxable costs would include any technical processes necessary to copy [electronically stored information] in a format that includes such information."). When copies are made in a fashion necessary to comply with obligations such as these, costs are taxable so long as the copies are also "necessarily obtained for use in the case."

HN18[] That *§ 1920(4)* restricts the award of costs to those incurred for copies necessarily obtained for use in the case is not, in itself, a justification permitting the award of costs for any task necessary to the prosecution or defense of a case. As noted by the Third Circuit in *Race Tires*, "*[s]ection 1920(4)* does not state that all steps that lead up to the production of copies of materials are taxable." *674 F.3d at 169*; *see also CBT Flint Partners, 737 F.3d at 1328* ("[O]nly the costs of creating the produced duplicates are included [as recoverable], not a number of preparatory or ancillary costs commonly incurred leading up to, in conjunction with, or after duplication."). The Third Circuit further explained, again in the context of **[**31]** producing electronically stored information, that "[i]t may be that extensive 'processing' of [electronically stored information] is essential . . . . But that does not mean that the services leading up to the actual production constitute 'making copies.'" *674 F.3d at 169*.

HN19[] The proper application of a narrowly construed *§ 1920(4)* requires that the tasks and services for which an award of costs is being considered must be described and established with sufficient specificity, particularity, and clarity as to permit a determination that costs are awarded for making copies. "'Document production' and other similarly generic statements on the invoices are unhelpful in determining whether those costs are taxable." *In re Ricoh, 661 F.3d at 1368*. Further, a description of a task is useful only to the extent it accurately reflects the task for which copying costs are sought.

2

In support of its opposition to the Subscribers' motion for the district court to review costs, Netflix submitted the declaration of Vivian Liu-Somers, a project manager for Esquire Litigation Solutions, a vendor that provided litigation support services to Netflix. In her declaration, Liu-Somers identified 44 different charges appearing on Esquire Litigation's invoices, and combines **[**32]** those charges into 21 groups. For each of the 21 groups, Liu-Somers provided a brief description of the services to which the charges refer.

The Subscribers challenge certain of these groups of charges as not taxable under *§ 1920(4)*, further combining them into four broader task categories: (1) "data upload," (2) "endorsing," (3) "keyword," and (4) "professional services." **[*929]** The Subscribers also challenge a charge invoiced by SFL Data, a different litigation support vendor providing services to Netflix, for "Electronic Data Discovery" tasks. We review each of the five challenged categories of charges asserted by the Subscribers in turn.

a

As challenged by the Subscribers, the "data upload" category of charges refers to two different groups of charges described by Liu-Somers in her declaration. She grouped the charges of "Data Upload," and "Catalyst Data Upload," and indicated that these charges referred "to the reproduction of documents for potential production into a database where they could be viewed." Separately, Liu-Somers described the charge of "Upload Production Documents" as referring "to the process of reproducing the collection of the documents actually being produced for viewing after **[**33]** all the processes necessary to prepare the documents in the required formats and with the required labels have been completed."

The Subscribers' challenge to these costs rests on the use of the word "upload" in the description of the charge. They note that an "upload" of electronically stored information is the movement of data from one location to another, and indicates the data is being transmitted.[8] The Subscribers argue that the costs incurred for such a task are not recoverable under *§ 1920(4)* because the task is "akin to the costs of moving boxes of information from client site to law firm to the room where reviewers would review them." Focusing on the word "reproduction" in both of Liu-Somers' descriptions of the services performed, Netflix responds that the task of uploading data was not merely for moving data, but necessarily involved "making copies." Neither argument fully responds to the question of whether the charges are taxable under *§ 1920(4)*.

HN20[↑] Consideration of whether certain tasks are taxable pursuant to *§ 1920(4)* "calls for some common-sense judgments guided by a comparison with the paper-document analogue." *CBT Flint Partners, 737 F.3d at 1331*. Instead of moving boxes of information, an upload of data is more akin to the paper-document analogue of faxing a document from the client site to the law firm, a process which involves the transmitting of data from location to location and which also results in a facsimile copy of the original document.

HN21[↑] The cost of making the copy is not rendered non-taxable merely because it was created by using fax machines rather than a photo-copier. Conversely, *§ 1920(4)* does not award costs merely because a process resulted in the creation of a copy. That the fax process creates a copy does not, by itself, establish that the cost is taxable under *§1920(4)*. Rather, a further determination is required: whether the copy was necessarily obtained for use in the case. Like any other copy, if the faxed copy was created to be produced in discovery, the cost of making the fax would be taxable under *§ 1920(4)*. However, if the faxed copy was created solely **[**35]** for the convenience of counsel, the cost of making the copy would not be taxable.

Liu-Somers' description of the "data upload" and "catalyst data upload" charges indicates the uploading process created new copies of documents inside a database. **[*930]** Assuming, without deciding, that the specific uploading task constituted "making copies," the further determination is required whether the copies were necessarily obtained for use in the litigation. Liu-Somers declared that "the reproduction of documents was a

---

[8] "Upload: To move data from one location to another in any manner, such as via modem, network, serial cable, internet connection or wireless signals; indicates that data is being transmitted to a location from a location." The Sedona Conference, *The* ***[**34]*** *Sedona Conference Glossary: E-Discovery & Digital Information Management* 48 (Sherry B. Harris et al. Eds., 4th ed. 2014).

necessary step in the document production process because it facilitated a selection of documents for production from the set of documents for potential production." This description establishes only that the copies were essential to the document production process, and fails to establish the copies were necessarily obtained for use in the litigation.

HN22[] A narrow construction of *§ 1920(4)* requires recognition that the circumstances in which a copy will be deemed "necessarily obtained" for use in a case will be extremely limited. That a chosen "document production process" requires the creation of a copy does not establish that the copy is necessarily obtained for use in the case. A lawyer may review **[**36]** electronically stored information for privilege either by viewing the original documents on the client's computer or, alternatively, by viewing copies uploaded to the lawyer's computer. Although the latter method of review requires the creation of a copy, the ability to conduct the review by looking at the original document establishes that the uploaded copy was not necessarily obtained for use in the case.

Similarly, Liu-Somers' description of the charges for "Upload Production Documents" indicates that the copies were created as a "necessary step in the document production process in order to view the documents as they appeared in the actual production being made." As with Netflix's description of the other "uploading" charges, this description establishes only that the copy is essential to the document production process that Netflix (or its litigation support vendor) elected to employ, and fails to establish the copies were necessarily obtained for use in the case. Accordingly, these charges are non-taxable under *§ 1920(4)*.

b

The Subscribers also challenge what they describe as "endorsing" activities. However, the only indication in the Subscribers' opening brief that they have even challenged **[**37]** the award costs for "endorsing" activities is the cursory mention, in their Statement of Facts, that "Netflix incurred $21,134.82 for 'Endorsing' tasks, which included the 'branding of image files with unique sequential production numbers and confidentiality designations." ***HN23***[] Because these matters were not "specifically and distinctly argued" in the open briefing, we will not consider them. *Christian Legal Soc'y Chapter of Univ. of Cal. v. Wu, 626 F.3d 483, 487 (9th Cir. 2010)*.

c

The Subscribers challenge the cost award for what they term "keywording" activities. As described by Liu-Somers in her declaration, Esquire Litigation used a variety of terms to charge Netflix "for the use of automated software processes to reproduce the set of documents for potential production into a reduced set of documents that did not include certain types of documents that did not need to be produced." Netflix attempts to shoehorn the filtering process into the ordinary meaning of "making copies" by arguing that filtering is "simply a mechanical process of making a copy of all documents that fit the supplied criteria." The argument reveals its own flaw, disclosing that the charge was incurred for two separate tasks: (a) identifying the documents that fit the supplied criteria, and then (b) **[**38]** making copies of those documents. The former task is akin to a person (lawyer, paralegal, or otherwise) mechanically reviewing **[*931]** a stack of documents and (based upon criteria supplied by a lawyer) separating them into two piles: one consisting of documents that might be potentially be produced, and the other consisting of documents that will not be produced. Netflix argues that its vendor "simply performed the mechanical process of applying the criteria it received from Netflix's attorneys to the documents being *reproduced for production* in the required formats" (emphasis added). The argument is contradicted by Netflix's implicit acknowledgment that the filtering process was also applied to documents that were not copied. As such, the application of automated software filtering processes to identify which documents to copy and which documents to not copy is not taxable.[9]

d

The Subscribers challenge the cost award **[**39]** for "professional services." Absent from Liu-Somers' declaration are descriptions for any charges titled "Professional Services," indicating the Subscribers' label for this category

[9] While the second task of making copies of the documents arguably falls within the ordinary meaning of "making copies," the record suggests that the charges invoiced by Esquire Litigation for the various keywording tasks were not for making the copies, but for the filtering process.

amounts to a generic statement "unhelpful in determining whether those costs are taxable." *In re Ricoh, 661 F.3d at 1368*. In their opening brief, the Subscribers further describe this category as including "activities like processing, native review, data analysis, project management, and production services." Liu-Somers' declaration demonstrates that the Subscribers have grouped an extremely broad range of activities into a single category. The declaration includes descriptions for a variety of narrower categories, ranging from "the imaging of the documents to create an electronic 'page' ready for bates and confidentiality branding and redactions" through "prepar[ing] the documents for production in the required formats." Netflix's response is equally generic and unhelpful, asserting that "these are all costs required in order to make copies of the information being produced" and "are akin to the costs of copy center employees, photocopy technicians, copier repairmen, and other overhead costs included with the flat per page rate charged by traditional **[**40]** outside photocopy vendors—costs which have always been deemed recoverable." The record before us leaves us unable to resolve whether any of the large variety of specific charges that the Subscribers broadly challenge as "professional services" are taxable under a narrow construction of *§ 1920(4)*. Thus, we must remand the issue to the district court for its determination in the first instance.

e

Finally, the Subscribers challenge a specific item on one invoice from SFL Data, asserting the charge was for "native review processing." Netflix counters that the invoice actually states that the "cost involved the copying of nearly 80GB of data for production constituting 167,311 documents." The $10,000 cost appears to have been incurred (at a flat rate per agreement with Netflix) for a variety of different tasks, including native review processing, optical character recognition, exporting documents, converting documents to TIFF, populating custom fields, and prepping for further processing. Although the cost incurred for some of these tasks appears to be taxable, the present record does not permit a conclusion that all of the tasks for which SFL charged Netflix a flat rate of $10,000 are taxable. To **[**41]** the extent the invoiced tasks exceeded optical character recognition, conversion to **[*932]** TIFF, and other activities essential to the making of copies necessary to the case, they are not taxable.

3

In summary, we conclude that of the $317,616.69 challenged by the Subscribers as non-taxable under *§ 1920(4)*, only those costs attributable to optical character recognition, converting documents to TIFF, and "endorsing" activities—all of which were explicitly required by Subscribers—are recoverable on the record before us. We therefore affirm the cost award in part, and vacate it in part. We remand for taxing of costs in accordance with this opinion.

B

The district court did not abuse its discretion in awarding $245,471.31 in consulting fees, TIFF images, and copying costs.

1

The Subscribers first complain that the district court failed to explain its findings adequately. However, ***HN24***[] "a district court need not give affirmative reasons for awarding costs; instead, it need only find that the reasons for denying costs are not sufficiently persuasive to overcome the presumption in favor of an award." *Save Our Valley v. Sound Transit, 335 F.3d 932, 945 (9th Cir. 2003)*.

Here, the district court explained in its order that it "read the parties' papers and carefully considered their arguments **[**42]** and the relevant legal authority." Further, the order specifically identified the Subscribers' arguments concerning "TIFF conversion costs; copying/'blowback' costs . . . documents productions purportedly not delivered; professional fees re visual aids." Under our deferential standard of review, the district court's explanation was sufficient. *See Save Our Valley, 335 F.3d at 945* ("[W]e have never held that ***HN25***[] a district court must specify reasons for its decision to abide the presumption and tax costs to the losing party." (emphasis in original)).

2

The Subscribers next contend that the costs claimed for preparing visual aids were actually unrecoverable consulting fees, relying on invoice descriptions of the title of the person performing the work. To be sure, *HN26*[] "[f]ees for exemplification and copying are permitted only for the physical preparation and duplication of documents, *not the intellectual effort involved in their production." Zuill v. Shanahan, 80 F.3d 1366, 1371 (9th Cir. 1996)* (emphasis added) (internal quotation marks and citation omitted). However, there is no authority for the proposition that the title of the person doing the work is relevant to classifying the type of work actually done. In fact, courts have held otherwise. *See* *Race Tires, 674 F.3d at 169* ("Neither the degree of expertise necessary **[**43]** to perform the work nor the identity of the party performing the work of 'making copies' is a factor that can be gleaned from *§ 1920(4)*."). In addition, evidence was presented by Netflix that the vendors were only paid to perform the tasks associated with production and not for creating the substantive content of the visual aids. Thus, the record supports the district court's conclusion that the tasks done by the consultants were not "intellectual effort," regardless of the job title listed on the invoices. The district court did not abuse its discretion in awarding $14,355.50 in costs for preparation of visual aids.

3

The district court did not abuse its discretion in awarding costs for TIFF conversions. The Subscribers argue that they were taxed $167,399.70 in excessive TIFFing **[*933]** costs because Netflix paid an unreasonable amount per TIFF page. The Subscribers' expert concluded that the rate of seven cents per page of TIFF conversion was unreasonable because it was above market and because Netflix's first invoice from its ediscovery vendor charged only two cents per page. Netflix's expert testified that the costs Netflix charged were reasonable. He testified that Netflix reviewed proposals from **[**44]** six electronic discovery vendors and that the firm that Netflix eventually went with offered the lowest prices to convert documents to TIFF images out of the six solicited firms. Netflix's expert further explained that the two-cent rate was charged only for a certain type of conversion—PDF to TIFF—and that the total bill for this batch was a mere $54.08.

The district court fully considered the two expert opinions and decided in favor of Netflix. Given our deferential standard of review, there is no basis to disturb that conclusion.

The Subscribers also contend that Netflix was awarded costs for documents unnecessarily produced, resulting in an overcharge of $46,773.71. However, the record does not support that conclusion, and the district court did not abuse its discretion in awarding these TIFF-related costs.

The district court did not abuse its discretion in awarding $16,942.40 for copying paper documents. The Subscribers contend that the documentation for these costs was inadequate. However, the invoices at issue indicate the purpose of the charge, such as printing exhibits and copying deposition transcripts, as well as the dates the work was done. Moreover, Netflix supported its bill **[**45]** of costs with a declaration from one of Netflix's attorneys, who clarified that certain documents were produced as "exhibits to depositions" and "disclosure or formal discovery documents." Netflix provided sufficient information for the district court to identify the documents being reproduced and, ultimately, to determine which costs were taxable. The district court did not abuse its discretion in awarding these costs.

C

The district court also did not abuse its discretion in declining to award Netflix $21,000 for producing certain black and white PowerPoint documents. The Subscribers had requested "single-page Group IV TIFF files," which is a black and white version, and separately requested that all documents "be produced in the same order as they are kept or maintained by you in the ordinary course of your business." In the usual course of business, Netflix maintained the PowerPoint in color. However, throughout discovery, Netflix produced black and white PowerPoint presentations. At some point during the litigation, Netflix submitted to the court a color version of a PowerPoint presentation. When the Subscribers learned that were colored slides available, they requested them, arguing **[**46]** that Netflix's failure to do so previously violated the instruction to produce documents as they were normally kept by Netflix. Because Netflix maintained colored slides in the ordinary course of business, the district court concluded that the Subscribers were entitled to production of the documents under their previous discovery requests. Although production of color slides was in some sense duplicative of the previously-produced black and white slides, the district court did not abuse its discretion in denying the cost award given the separate discovery requests, and the fact that Netflix likely could have avoided the duplicative production by first producing the color documents maintained in the usual course of business. The district court was not confused about **[*934]** the issue, as Netflix claims. To the contrary, the record reflects that the district court understood the issue and decided under the circumstances that a cost award was appropriately denied. The district court did not abuse its discretion in doing so.

IV

In sum, we affirm the district court's grant of summary judgment on the antitrust claims, for lack of antitrust injury-in-fact. We affirm the cost award in part and reverse **[**47]** it in part. We need not, and do not, reach any other issue urged by the parties.

AFFIRMED IN PART; **VACATED IN PART**; **REMANDED**.

Each party shall bear its own costs on appeal.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

When deciding a motion to dismiss for failure to state a claim under Fed. R. Civ. P. 12(b)(6), a court must accept all allegations in the complaint as true and draw all inferences in the non-moving party's favor. To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A complaint must do more than offer naked assertions devoid of further factual enhancement. A court is not bound to accept as true a legal conclusion couched as a factual allegation.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

For purposes of a motion to dismiss for failure to state a claim, a court deems a complaint to include any written instrument attached to it as an exhibit or any statements or documents incorporated in it by reference, as well as documents that the plaintiffs either possessed or knew about and upon which they relied in bringing the suit.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN3[] Sherman Act, Claims

Section 1 of the Sherman Act declares illegal every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several states, or with foreign nations. *15 U.S.C.S. § 1*. Although the language is capacious, it has been interpreted to outlaw only unreasonable restraints on trade. In order to state a claim under *§ 1*, a plaintiff must allege: (1) a contract, combination, or conspiracy between two legally distinct entities; (2) in restraint of trade; (3) affecting interstate commerce. The ultimate existence of an agreement under ***antitrust law*** is a legal conclusion, not a factual allegation. At the motion to dismiss stage, a plaintiff must allege enough facts to support the inference that a conspiracy actually existed. This can be accomplished by alleging direct evidence of an agreement, or by presenting circumstantial facts supporting the inference that a conspiracy existed.

Antitrust & Trade Law > Sherman Act > Claims

HN4[] Sherman Act, Claims

Generally, a claim under *Section 1 of the Sherman Act* requires concerted action between separate legal entities. In some instances, a conspiracy may exist among persons within a single organization when it joins together separate economic actors pursuing separate economic interests such that the agreement deprives the marketplace of independent centers of decisionmaking and therefore of a diversity of entrepreneurial interests and thus of actual or potential competition. Courts look at the competitive reality rather than the legal organization to determine if a conspiracy may exist within one legal entity.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Copyright Law > Scope of Copyright Protection > Ownership Rights

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN5[] Actual Monopolization, Claims

To state a claim for monopolization under *Section 2 of the Sherman Act*, *15 U.S.C.S. § 2*, a plaintiff must allege: (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. The core element of a monopolization claim is market power, which is defined as the ability to raise price by restricting output. To prove a monopolization claim, plaintiffs may demonstrate market power in one of two ways: either through direct evidence that the defendant can control prices or exclude competition, or through defendants' share of the relevant market. The possession of a copyright interest in property is a limited grant of monopoly privileges. The holder of intellectual property rights may enforce these rights, even in circumstances where it is not clear that conduct is actually infringing.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

HN6[] False Advertising, Lanham Act

To constitute commercial advertising or promotion under the *Lanham Act*, a statement must be: (1) commercial speech; (2) made for the purpose of influencing consumers to buy defendant's goods or services; and (3) although representations less formal than those made as part of a classic advertising campaign may suffice, they must be disseminated sufficiently to the relevant purchasing public.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

HN7[] **Supplemental Jurisdiction, Pendent Claims**

Where no federal claims remain in an action, and diversity jurisdiction is lacking, a district court is not required to retain jurisdiction of remaining state law claims. *28 U.S.C.S. § 1367(c)(3)*. A district court may, however, at its discretion, exercise supplemental jurisdiction over state law claims even where it has dismissed all claims over which it had original jurisdiction. The court must consider and weigh in each case, at every stage of the litigation, the values of judicial economy, convenience, fairness, and comity in order to decide whether to exercise jurisdiction over pendent claims.

Torts > ... > Defenses > Privileges > Absolute Privileges

HN8[] **Privileges, Absolute Privileges**

Under New York law, statements made in the course of legal proceedings are absolutely privileged if pertinent to the litigation. This privilege is not lost even in the presence of actual malice. Furthermore, while statements must be pertinent to the litigation to be privileged, this is the broadest of possible privileges and any matter which, by any possibility, under any circumstances, at any stage of the proceeding, may be or may become material or pertinent is protected by an absolute privilege even though such matter may be ineffectual as a defense.

Torts > Intentional Torts > Defamation > Elements

Torts > Intentional Torts > Defamation > Libel

HN9[] **Defamation, Elements**

Defamation or libel require a plaintiff to show: (1) a written defamatory factual statement concerning the plaintiff; (2) publication to a third party; (3) fault; (4) falsity of the defamatory statement; and (5) special damages or per se actionability. A plaintiff in a libel action must identify a plausible defamatory meaning of the challenged statement. If the statement is susceptible of only one meaning the court must determine, as a matter of law, whether that one meaning is defamatory.

Torts > Intentional Torts > Defamation > Libel

HN10[] **Defamation, Libel**

New York law distinguishes between defamation of a person and defamation of a product. The bare accusation that a product does not conform to its advertised quality does not, without more, defame the owner of the product. Where a statement impugns the basic integrity or creditworthiness of a business, an action for defamation lies. Where, however, the statement is confined to denigrating the quality of the business's goods or services, it could support an action for disparagement, but will do so only if the additional elements for trade libel are proven.

Torts > ... > Business Relationships > Intentional Interference > Elements

HN11[] **Intentional Interference, Elements**

To prevail on a tortious interference with business relations claim, a plaintiff must demonstrate that: (1) it had a business relationship with a third party; (2) the defendant knew of that relationship and intentionally interfered with it; (3) the defendant acted solely out of malice, or used dishonest, unfair, or improper means; and (4) the defendant's interference caused injury to the relationship.

Torts > Intentional Torts > Defamation > Elements

Torts > Intentional Torts > Defamation > Libel

HN12[] **Defamation, Elements**

Defamation of a product or good, rather than a person, constitutes a distinct cause of action under New York law. To recover for disparagement of goods, the plaintiff must show that the defendant published a defamatory statement directed at the quality of a business's goods and must prove that the statements caused special damages. Generally, special damages means the loss of something having economic or pecuniary value. Where loss of customers constitutes the alleged special damages, the individuals who ceased to be customers, or who refused to purchase, must be named and the exact damages itemized. Pleading damages as a round number with no attempt at itemization alleges general rather than special damages.

Torts > Intentional Torts > Prima Facie Tort > Elements

HN13[] **Prima Facie Tort, Elements**

Under New York law there are four elements to a prima facie tort claim: (1) an intentional infliction of harm; (2) without excuse or justification and motivated solely by malice; (3) resulting in special damages; (4) by an act that would otherwise be lawful.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

HN14[] **Types of Contracts, Quasi Contracts**

The basic elements of an unjust enrichment claim in New York require proof that: (1) a defendant was enriched; (2) at the plaintiff's expense; and (3) equity and good conscience militate against permitting the defendant to retain what plaintiff is seeking to recover. The benefit acquired by the defendant must be specific and directly related to the loss suffered by the plaintiff.

Opinion

[*39] OPINION & ORDER

DENISE COTE, District Judge:

Plaintiffs assert that they are owners of Keith Haring artwork and that the actions the Keith Haring Foundation ("Foundation") and related defendants interfered with the exhibition and sale of their artwork, reducing the value of their property. Keith Haring ("Haring"), who died in 1990, was a prolific artist and social activist whose work responded to the New York City street culture of the 1980s. Plaintiffs bring federal and state antitrust claims, as well as a false advertising claim under the *Lanham Act*. Plaintiffs also seek relief under New York law for defamation, conspiracy to defame, tortious interference with prospective business relations, trade libel, intentional infliction of economic harm/prima **[*40]** facie tort, and unjust enrichment. Defendants have moved to dismiss the complaint in its entirety. For the following reasons, defendants' motion to dismiss is granted.

BACKGROUND

This motion **[**2]** to dismiss is addressed to a consolidated amended complaint ("Complaint") filed on August 13, 2014. This is the third motion to dismiss the claims in this action, the plaintiffs having been given an opportunity to amend in response to the two prior motions.[1]

The following facts are asserted in the Complaint and taken from documents integral to it. This case principally concerns the authentication and sale of Haring artwork. Defendants **[**3]** include the Foundation, a New York not-for-profit corporation established by Haring to continue his philanthropic legacy, and individual officers and directors of the Foundation Julia Gruen ("Gruen"), Kristen Haring, Gilbert Vazquez ("Vazquez"), Allen Haring, Tom Eccles, and Judith Cox. The Complaint also names as defendants Studio LLC, the entity that formally operated an authentication committee for the Foundation, as well as the Estate of Keith Haring ("Estate") and David Stark ("Stark"), the president of Artestar, a company that represents the Foundation in licensing and consulting. Gruen and Stark are compensated by the Foundation; Gruen receives a salary and Stark receives fees for licensing and consulting work.

Haring bequeathed the majority of his works to the Foundation, as well as "any copyrights relating hereto" and trademarks.[2] The Foundation has maintained a collection of Haring works since his death, valued at approximately $25 million as of 2011. The Foundation earns income by selling pieces from its collection.

Haring's work is valuable. From 2008 to 2011, the Foundation sold an unspecified number **[**4]** of Haring works for a total of $4,598,697. In May 2014, three Harings were sold through the auction house Sotheby's. Two of these pieces were sold for $9,458,000 by Jeffrey Deitch ("Deitch"), who the Complaint describes as an "ally" of the defendants.

---

[1] Two separate actions were filed by two groups of plaintiffs on February 21, 2014, and March 7, and joined in a consolidated complaint filed on June 24. On August 13, the plaintiffs amended that pleading in response to a motion to dismiss filed on July 25. The plaintiffs who filed suit on February 21 are Elizabeth Bilinski ("Bilinski"), George Lathqouras, Lisa Cubisino, Jacqueline Petruzzelli, Anthony Petruzzelli, Arthur Canario, Geraldine Biehl, Jesus Ramos, and Lucas Schoormans. The plaintiffs who filed suit on March 7 are Tami Sturm, Maxine Kobley, Stephen Kobley, Dianne Duncan, Randy Nichols, Inez Strysick, Beverly Costello, Brendan Costello, Khristos Karastathis, Eva Karastathis, and Geri Berman. The first motion to dismiss was filed on May 9, 2014.

[2] Haring also bequeathed works to defendants Gruen, Kristen Haring, and Vazquez.

Until 2012, the Foundation operated an Authentication Committee ("Committee") to review artwork attributed to Haring and issue opinions regarding the authenticity of submitted works. Although the Committee was formally operated by Studio LLC, it was controlled by the Foundation. The dissolution of the Committee in 2012 has increased the value of previously-authenticated works.

Many auction houses require a certificate of authentication as a condition of sale, but will sell Haring artwork without a certificate with the tacit approval of the Foundation. Haring artwork may also be sold privately at reduced prices without authentication or the Foundation's approval.

[*41] The plaintiffs own 111 pieces of Haring work they believe to be authentic.[3] All of this artwork came to the plaintiffs through Angelo Moreno ("Moreno"), who was a personal friend of Haring. Delta Cortez ("Cortez"), who also knew Haring, acted on behalf of Moreno to sell a number of **[**5]** Moreno's Harings to plaintiff Elizabeth Bilinski ("Bilinski Collection").

In January 2007, Bilinski showed the Bilinski Collection to an art dealer, plaintiff Lucas Schoormans ("Schoormans"). Working on Bilinski's behalf, Schoormans submitted photographic transparencies for thirteen works on March 28, 2007, and transparencies for an additional twenty-eight works on May 4, to the Foundation. Schoormans also submitted letters of provenance from Cortez and Moreno. On May 7, 2007, the Foundation rejected the works as "not authentic." The letter of rejection did not provide a reason for the rejection, and stated that the determination by the Committee could "change by reason of circumstances arising or discovered . . . after the date of this opinion." Following the Foundation's rejection, Bilinski gathered additional evidence of authenticity. This evidence included a signed statement of origin from Moreno, in which he explained that he had received the works as gifts from Haring. An attorney for Bilinski and Schoormans deposed Moreno and Cortez.[4]

On May 8, 2008, the Foundation accused Bilinski in writing of selling or making "available for sale items you are representing to be original works by Keith Haring when you have been duly warned they are not," and warned Bilinski that legal action could follow if she did not cease this activity. Despite Bilinski's efforts to address the matter with the Foundation in 2008, the Foundation refused to respond.

In 2010, Bilinski resumed her efforts to sell her collection. In the spring or summer of 2010, Bilinski brought the Bilinski Collection to Sotheby's. A Sotheby's representative indicated his belief that the works were authentic, but reported that he could not do anything to help her because of Gruen. Bilinski then brought the works to Gagosian Gallery on May 26, 2010. After conferring with Gruen and others, the gallery refused to offer the works for sale.

Bilinski then sought to resubmit the pieces to the Foundation for authentication. In July **[**7]** 2010, Bilinski's representative, Petruzzelli,[5] wrote to the Foundation that Bilinski now had the necessary information to authenticate her collection. Gruen asked that Bilinski provide a written Power of Attorney or notarized letter authorizing Petruzzelli to speak on her behalf, and that she resubmit the Bilinski Collection through her attorneys on account of Bilinski's previous threats to sue. In response to Petruzzelli's inquiry, on February 7, 2011, the Foundation informed Bilinski that it would not reconsider its judgment about the authenticity of the Bilinski Collection.

In 2012, Bilinski received further confirmation that her Haring works were authentic. The auction house Guernsey's told Bilinski that the works appeared to be authentic and it would be willing to produce an auction of the Bilinski Collection. Bilinski commissioned a forensic analysis of two of the works. The analysis concluded **[*42]** that the two paintings "could be considered as having been produced in the mid-1980s."

---

[3] A list of the works owned by plaintiffs is attached as Exhibit A to the Complaint. Plaintiffs do not identify which plaintiffs own which works.

[4] The **[**6]** Complaint states that Bilinski contacted the Foundation in 2010 seeking to resubmit the entire Bilinski Collection to the Committee for authentication. It does not indicate whether this additional material was also submitted to the Foundation.

[5] The Complaint identifies Bilinski's representative by a last name only.

In early 2013, the plaintiffs participated in an exhibition organized by Michael Rosen ("Rosen") and Colored Thumb Corp. ("Colored Thumb") **[**8]** featuring the plaintiffs' Haring works ("Miami Exhibition"). The Miami Exhibition had a VIP opening on March 6, and was scheduled to run from March 7-10. Stark went to the exhibition to ascertain the authenticity of the works shown.

On March 8, the Foundation filed suit against Rosen and Colored Thumb ("Miami Complaint") and sought a temporary restraining order. The Miami Complaint described the works shown in the Miami Exhibition as "fakes, forgeries, counterfeits and/or infringements." The motion for a temporary restraining order referred to the show as "fraudulent." That same day, the Foundation and the organizers of the Miami Exhibition agreed to the removal of all but ten works from the Miami Exhibition, and to remove and destroy all copies of the brochure and/or catalog for the Miami Exhibition ("Agreement"). In a press release of March 8 ("Press Release"), the Foundation described the lawsuit as an "effort to stop the display of fake Haring works at the exhibition." The Press Release reports that the organizers of the Miami Exhibition "agreed to remove all fake Haring works from the exhibition immediately and to destroy the offending catalogue that illustrated most of the fake **[**9]** works." The Press Release also stated that the Foundation "plans to continue to pursue this lawsuit, carrying the message that it will enforce the Foundation's rights and protect the artist's legacy in every case of suspected fraud." Plaintiff Arthur Canario ("Canario") lost the sale of artwork to an unidentified museum in London as a result of the Press Release and Miami litigation.

DISCUSSION

HN1[] When deciding a motion to dismiss under *Rule 12(b)(6), Fed. R. Civ. P.*, a court must "accept all allegations in the complaint as true and draw all inferences in the non-moving party's favor." *LaFaro v. New York Cardiothoracic Group, PLLC, 570 F.3d 471, 475 (2d Cir. 2009)*. To survive a motion to dismiss, "a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citation omitted). A complaint must do more than offer "naked assertions devoid of further factual enhancement." Id. (citation omitted). A court is "not bound to accept as true a legal conclusion couched as a factual allegation." Id.

HN2[] "For purposes of a motion to dismiss, we have deemed a complaint to include any written instrument attached to it as an exhibit or any statements or documents incorporated in it by reference, as well as . . . documents that the plaintiffs either **[**10]** possessed or knew about and upon which they relied in bringing the suit." *Rothman v. Gregor, 220 F.3d 81, 88 (2d Cir. 2000)* (citation omitted). Plaintiffs have attached images and descriptions of their artwork to the Complaint. The Complaint also relies upon the Miami Complaint and Press Release. These materials may be considered in deciding the motion to dismiss.

I. The Antitrust Claims

Two of the nine claims raised in the Complaint assert violations of *Sections 1* and *2 of the Sherman Act*, and the corresponding New York State antitrust statute, the Donnelly Act.[6] The defendants **[*43]** have raised several grounds to support dismissal. It is unnecessary to discuss each of them. Assuming without deciding that the plaintiffs have antitrust standing, their claims are timely, and the Noerr-Pennington doctrine does not immunize the

---

[6] Except when state policy or legislative history dictates otherwise, the Donnelly Act is generally coextensive with the *Sherman Act*. See *Gatt Commc'ns, Inc. v. PMC Assoc., LLC, 711 F.3d 68, 81 (2d Cir. 2013)* (citing *X.L.O. Concrete Corp. v. Rivergate Corp., 83 N.Y.2d 513, 518, 634 N.E.2d 158, 611 N.Y.S.2d 786 (1994))*. No party has identified, and the Court has not found, any state policy or legislative history that would require a different interpretation of the Donnelly Act in **[**11]** this case. This Opinion thus analyzes the *Sherman Act* and Donnelly Act claims collectively.

filing of the Miami Complaint,[7] the defendants' motion to dismiss is granted as to the *Sherman Act* and Donnelly Act claims.

A. Conspiracy in Restraint of Trade

The Complaint alleges a violation of *Section 1 of the Sherman Act*. ***HN3***[] *Section 1 of the Sherman Act* declares illegal "[e]very contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 1*. Although the language is capacious, it has been interpreted to "outlaw only unreasonable restraints" on trade. *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)* (citation omitted). In order to state a claim under *Section 1*, a plaintiff must allege (1) a contract, combination or conspiracy between two **[**12]** legally distinct entities, (2) in restraint of trade, (3) affecting interstate commerce. See *E & L Consulting, Ltd. V. Doman Indus. Ltd., 472 F.3d 23, 29 (2d Cir. 2006)*; *Maric v. Saint Agnes Hosp. Corp., 65 F.3d 310, 313 (2d Cir. 1995)*.

"The ultimate existence of an agreement under ***antitrust law*** . . . is a legal conclusion, not a factual allegation." *Mayor & City Council of Baltimore, Md. v. Citigroup, Inc., 709 F.3d 129, 135-36 (2d Cir. 2013)*. At the motion to dismiss stage, a plaintiff must allege enough facts to support the inference that a conspiracy actually existed. *Id. at 136*. This can be accomplished by alleging direct evidence of an agreement, or by presenting circumstantial facts supporting the inference that a conspiracy existed. Id.

Plaintiffs essentially allege a group boycott between the defendants and "their allies" in the art world who sell Haring works. This boycott excluded the plaintiffs from that market, resulting in supracompetitive prices for Haring artwork.

The Complaint fails to state a claim under *Section 1 of the Sherman Act*. Even assuming that the market for the sale of Haring artwork constitutes a valid product market, the plaintiffs have failed to allege sufficient information about the conspiracy to give the defendants fair notice of the claim, or sufficient facts that would support the inference of interdependent, rather than independent, conduct by the alleged conspirators.

Plaintiffs describe the conspiracy, **[**13]** formed sometime in the early 90s, as being **[*44]** between "Defendants and their allies," specifically art galleries, dealers, and major auction houses who "severely restrict the supply of Haring artwork in the marketplace." All named defendants are employees of, or associated with, the Foundation. The only "ally" identified by name is Deitch, an art dealer who sold two Harings at a Sotheby's auction in 2014. Under the theory advanced in the Complaint, any refusal by an auction house, dealer, or gallery to sell a Haring without authentication by the Foundation could be a conspiratorial act. Such broad allegations do not give the defendants fair notice of the claim against them. See *In re Elevator Antitrust Litig., 502 F.3d 47, 50-52 (2d Cir. 2007)*.

Furthermore, the Complaint's allegations regarding the refusals of auction houses and others to accept plaintiffs' works can be explained by unilateral decisions motivated by entirely lawful goals. The decision by any individual entity not to sell artwork that may not be authentic is an act consistent with lawful, independent action. "[A]lleging parallel conduct alone is insufficient, even at the pleading stage." *Mayor & City Council of Baltimore, Md., 709 F.3d at 136*. After all, an art dealer may be liable under the law if it sells counterfeit work. See, e.g., *N.Y. Arts & Cult. Aff. Law § 13.01*; *U.C.C. § 2-313*.

---

[7] Antitrust standing, because it is intertwined with the merits of the antitrust claim, is not jurisdictional in nature but rather relates to the merits of a claim addressed through a *12(b)(6), Fed. R. Civ. P.*, motion to dismiss. See *Lerner v. Fleet Bank, N.A., 318 F.3d 113, 128-29 (2d Cir. 2003)* (analogizing RICO's proximate cause standing requirement to antitrust standing and holding that it was not jurisdictional); *In re Lorazepam & Clorazepate Antitrust Litig., 289 F.3d 98, 107-08, 351 U.S. App. D.C. 223 (D.C. Cir. 2002)*. Similarly, issues of timeliness and Noerr-Pennington immunity are also decided as part of 12(b)(6) motion to dismiss. See *Ortiz v. Cornetta, 867 F.2d 146, 149 (2d Cir. 1989)*; *Primetime 24 Joint Venture v. Nat'l Broad., Co., 219 F.3d 92, 98 (2d Cir. 2000)*. Accordingly, the Court may reach the merits of the antitrust claims without first addressing these threshold issues.

Moreover, **[**14]** the Complaint admits that a market for unauthenticated work exists, albeit at reduced prices. Furthermore, the Complaint does not assert that the defendants provide the only means to obtain authentication of Haring works. That the Foundation is the sole source of the Foundation's authentication certificate is stating the obvious and does not bridge this gap.

In support of their claim, the plaintiffs emphasize the refusals to deal by Sotheby's and Gagosian Gallery after initial expressions of interest. The plaintiffs contend that this supports an inference of illegal collusion since it is against an art dealer's self-interest to refuse to sell artwork it believes is authentic. A refusal to sell, however, is consistent with both independent and interdependent conduct as the decision to sell artwork turns on an assessment of a number of factors. Moreover, the plaintiffs have not stated in a non-conclusory fashion any facts indicating what benefit the auction houses derive from participating in a group boycott of works they believe to be authentic but that have not been authenticated by the Foundation.[8] At its core, the Complaint asserts that auction houses and other sellers of art do not **[**15]** sell Haring works without the Foundation's approval because they fear legal retribution from the Foundation. This is an argument for monopolization, not conspiracy, and is addressed below.

Plaintiffs attempt to save the *Section 1* claim by arguing that the Complaint sufficiently alleges an intra-enterprise conspiracy within the Foundation because some directors, as owners of Haring artwork, have a personal interest in restraining the market for Haring works. Plaintiffs have also suggested that defendants Stark and Gruen, who are compensated by the Foundation, have independent economic interests in the conspiracy. This argument lacks merit.

HN4[] **[*45]** Generally, a *Section 1* claim requires concerted action between separate legal **[**16]** entities. *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. In some instances, a conspiracy may exist among persons within a single organization when it joins together "separate economic actors pursuing separate economic interests such that the agreement deprives the marketplace of independent centers of decisionmaking and therefore of a diversity of entrepreneurial interests and thus of actual or potential competition." *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 195, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* (citation omitted). American Needle directs courts to look at the "competitive reality" rather than the legal organization to determine if a conspiracy may exist within one legal entity. *Id. at 196*.

The participation in the Foundation of three or more directors alleged to own Haring artwork does not "deprive the marketplace of independent centers of decisionmaking" in any sense. There is no allegation that these directors are art dealers or play a role akin to the other institutions alleged to be co-conspirators with the Foundation. The directors named as owners of Haring works acquired their artwork as bequests in Haring's will.

Nor is there any basis for asserting that, because some defendants are compensated by the Foundation, these defendants are separate competitors in the market for the sale of Haring art. The mere **[**17]** fact that a director is paid does not make a director a separate competitor in the market, even if the compensation gives the director an interest in perpetuating anticompetitive conduct.

In opposition to the defendants' motion to dismiss, the plaintiffs primarily rely on *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)*, and *Simon-Whelan v. Andy Warhol Found. for the Visual Arts, Inc., 07cv6423(LTS), 2009 U.S. Dist. LEXIS 44242, 2009 WL 1457177 (S.D.N.Y. May 26, 2009)*. Plaintiffs cite Allied Tube for the general proposition that "standard-setting" organizations are ripe for antitrust abuse, and argue that the Foundation is a "standard-setting" organization that has abused its authority. Reliance on *Allied Tube* is misplaced. The Foundation is not a standard-setting authority. It does not purport to create industry standards for competitors in the market. *Allied Tube, 486 U.S. at 500*. In any event, the existence of

[8] Plaintiffs make a single, general allegation that unnamed co-conspirators benefit from their participation in the boycott by being permitted to exhibit and display the Foundation's own collection. But, as plaintiffs acknowledge in the Complaint, they own $40 million worth of Haring artwork, and the Foundation only owns $25 million. It is not a credible inference that co-conspirators would forego the benefits of selling the plaintiffs' art solely for the privilege of selling the Foundation's.

standard-setting authority does not create a free-standing antitrust claim absent a Section 1 conspiracy or Section 2 monopoly. See id. at 509.

Simon-Whelan, though not binding on this Court, also arises from a dispute in the art world. Despite this surface similarity, however, reliance on Simon-Whelan in inapt. There, the Andy Warhol Foundation for the Visual Arts ("Warhol Foundation") was alleged to have conspired with the Andy Warhol Authentication **[**18]** Board ("Board") to restrain the market for Andy Warhol ("Warhol") artwork. Simon-Whelan, 2009 U.S. Dist. LEXIS 44242, 2009 WL 1457177, at *2. The plaintiff in Simon-Whelan alleged a conspiracy between the Warhol Foundation, which published a catalogue raisonné[9] of Warhol's work, and the Board, which authenticated or declined to authenticate submitted works. Id. By controlling both the catalogue raisonné and the Board, the defendants were alleged to exercise **[*46]** complete control over the authentication of Warhol's work, which they used to create scarcity in the market for Warhol's work.

Since the factual context in the two cases are so dissimilar, the Simon-Whelan legal analysis provides little guidance here. No catalogue raisonné exists for Haring's works, and the plaintiffs here do not premise their claim on an agreement between the Foundation and the Committee, but on an agreement between the Foundation and art dealers, auction houses, and galleries. As significantly, the defendants here ceased their authentication activities in 2012 and could not be plausibly alleged to control authentication of Haring's work. The Section 1 claim and corresponding claim under the **[**19]** Donnelly Act are dismissed.

B. Monopolization

Plaintiffs also bring a claim under Section 2 of the Sherman Act. ***HN5***[] To state a claim for monopolization under Section 2 of the Sherman Act, 15 U.S.C. § 2, a plaintiff must allege "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." Pepsico, Inc. v. Coca-Cola Co., 315 F.3d 101, 105 (2d Cir. 2002) (quoting United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1996)) (summary judgment decision); see also Clorox Co. v. Sterling Winthrop, Inc., 117 F.3d 50, 61 (2d Cir. 1997).

"The core element of a monopolization claim is market power, which is defined as the ability to raise price by restricting output." Pepsico, 315 F.3d at 107 (citation omitted). To prove a monopolization claim, plaintiffs may demonstrate market power in one of two ways: either through direct evidence that the defendant can control prices or exclude competition, or through defendants' share of the relevant market. Tops Markets, Inc. v. Quality Markets, Inc., 142 F.3d 90, 98 (2d Cir. 1998). The possession of a copyright interest in property is a "limited grant of monopoly privileges." Prof'l Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 64, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993) (citation omitted). The holder of intellectual property rights may enforce these rights, even in circumstances where it is not clear that conduct is actually infringing. Id. at 65.

Plaintiffs have defined the relevant market for their **[**20]** Section 2 claim as the worldwide market for the sale of Haring works. Plaintiffs do not allege any facts regarding the defendants' market share or even that the defendants have participated in the market more recently than 2011. Rather, the Complaint essentially claims that the Foundation continues to act as an informal market regulator by threatening or initiating pretexual lawsuits to preclude authentic Haring works from being exhibited or sold. Plaintiffs contend that the defendants, as the final standard-setting authority in the authentication market and the owner of "virtually all intellectual property rights relating to Keith Haring," are able to exclude any given Haring work from the relevant market through the use of lawsuits to enforce its intellectual property rights.

Assuming that the market for the sale of Haring works constitutes a valid submarket in the art market, the plaintiffs have failed to plausibly allege a claim under Section 2. The Complaint does not provide any factual basis for the

[9] A catalogue raisonné is a comprehensive, scholarly compilation of an artist's known body of work.

contention that the defendants possess monopoly power in the relevant market. Plaintiffs do not allege that defendants have participated in the market more recently than 2011, and allege no facts regarding **[**21]** the defendants' market share. The Committee was dissolved **[*47]** in 2012 and no longer offers authentication services. As the Complaint acknowledges, there are others in the art world that provided authentication services in the past and that do so today.

The only fact alleged in support of the claim that the defendants have monopoly power is that defendants possess intellectual property rights in Haring works, and the defendants initiate lawsuits asserting those rights. Even assuming that some of these lawsuits were brought in bad faith, this does not establish unlawful monopoly power. "Regardless of whether [a copyright holder] intended any monopolistic or predatory use, [it] acquired this [copy]right . . . [and] to condition a copyright upon a demonstrated lack of anticompetitive intent would upset the notion of copyright as a limited grant of monopoly privileges." *Id. at 64* (citation omitted).

In opposition to the motion to dismiss, the plaintiffs essentially abandon their *Section 2* claim.[10] The failure to allege facts to suggest that the defendants possess unlawful monopoly power requires dismissal of the *Section 2* claim and corresponding claim under the Donnelly Act.

II. The *Lanham Act* Claim

Plaintiffs also bring a claim under the *Lanham Act*, *15 U.S.C. § 1125*, on the theory that the Miami Complaint and Press Release constitute false advertising. The *Lanham Act* provides:

> Any person who, on or in connection with any goods or services, . . . uses in commerce any . . . false or misleading description of fact, or false or misleading representation of fact, which . . . in commercial advertising or promotion, misrepresents the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities shall be liable in a civil action by any person who believes that he or she is or is likely to be damaged by such act.

15 U.S.C. § 1125(a)(1)(B) (emphasis added). ***HN6***[] To constitute commercial advertising or promotion under the *Lanham Act*, a statement must be: "(1) commercial speech, (2) made for the purpose of influencing consumers to buy defendant's goods or services, and (3) although representations less formal than those made as part of a classic advertising campaign may suffice, they must be disseminated sufficiently to the relevant purchasing public." *Gmurzynska v. Hutton, 355 F.3d 206, 210 (2d Cir. 2004)* (citation omitted). Core commercial speech is "speech which does no more than **[**23]** propose a commercial transaction." *City of Cincinnati v. Discovery Network, Inc., 507 U.S. 410, 422, 113 S. Ct. 1505, 123 L. Ed. 2d 99 (1993)* (citation omitted). In some instances, "commercial speech" may also include "expression related solely to the economic interests of the speaker and its audience." Id. (citation omitted).

Plaintiffs have failed to plead a claim under the *Lanham Act*. Plaintiffs allege that the Press Release and Miami Complaint were commercial in nature because they were published "with the intent of preventing sales of the [the plaintiffs'] works . . . and of increasing the value of Defendants' artworks at their expense." (Emphasis added.) This fails to allege a sufficient connection between either the Press Release or Miami Complaint and a proposed commercial transaction and thus fails to allege the essential elements of a *Lanham Act* violation.[11] The plaintiffs' **[*48]** claims under the *Lanham Act* are dismissed.

III. State Law Claims

---

[10] Plaintiffs make only one reference -- in a footnote -— to **[**22]** the *Section 2* claim.

[11] The parties dispute whether a pleading could ever be considered commercial speech. It is unnecessary to reach this issue in order to resolve this motion.

Plaintiffs have also brought six separate tort claims under New York law stemming from the defendants' filing of the Miami Complaint and the issuance of the Press Release. ***HN7***[] Where no federal claims **[**24]** remain in an action, and diversity jurisdiction is lacking, a district court is not required to retain jurisdiction of remaining state law claims. *28 U.S.C. § 1367(c)(3)*; *Rocco v. New York State Teamsters Conference Pension & Retirement Fund, 281 F.3d 62, 72 (2d Cir. 2002)*. A district court may, however, "at its discretion, exercise supplemental jurisdiction over state law claims even where it has dismissed all claims over which it had original jurisdiction." *Parker v. Della Rocco, 252 F.3d 663, 666 (2d Cir. 2001)* (citation omitted). The court must "consider and weigh in each case, at every stage of the litigation, the values of judicial economy, convenience, fairness, and comity" in order to decide whether to exercise jurisdiction over pendent claims. *Itar-Tass Russian News Agency v. Russian Kurier, Inc., 140 F.3d 442, 445 (2d Cir. 1998)*; see also *Mauro v. Southern New England Telecomm., Inc., 208 F.3d 384, 388 (2d Cir. 2000)*.

On balance, these factors weigh in favor of exercising supplemental jurisdiction over the plaintiffs' state law claims. While the federal claims have been dismissed and this motion is brought at an early stage in the litigation, the state law claims may be resolved without considering any novel or complex questions of state law. Convenience and judicial economy weigh heavily in favor of resolving these straightforward tort claims as part of this motion. Thus, the Court will exercise supplemental jurisdiction over the plaintiffs' remaining state law claims. The defendants' motion to dismiss as to the **[**25]** plaintiffs' tort claims is granted.

A. Privilege

Defendants contend that the plaintiffs' state law claims are entirely barred by the absolute privilege afforded to statements made during judicial proceedings and the statutory privilege accorded to anyone who makes a "fair report" of a lawsuit. ***HN8***[] Under New York law, statements made in the course of legal proceedings are absolutely privileged if pertinent to the litigation. *Kelly v. Albarino, 485 F.3d 664, 666 (2d Cir. 2007)* (citation omitted) (applying New York law). This privilege is not lost even in the presence of actual malice. Id. Furthermore, while statements must be pertinent to the litigation to be privileged, "this is the broadest of possible privileges and any matter which, by any possibility, under any circumstances, at any stage of the proceeding, may be or may become material or pertinent is protected by an absolute privilege even though such matter may be ineffectual as a defense." Id.

The statements in the Miami Complaint are privileged. The core issue in the Miami litigation was whether the organizers of the Miami Exhibition falsely claimed that the displayed works were created by Haring, thereby infringing on the Foundation's intellectual property rights. The statements **[**26]** in the Miami Complaint alleged to be tortious -- namely, statements describing the plaintiffs' works as fakes or counterfeits -- are directly relevant to that central dispute. The statements in the Miami Complaint are therefore privileged and may not be the basis for a tort claim.

The statements in the Press Release, however, are not privileged. New York law provides that "[a] civil action cannot be maintained against any person, firm or corporation, for the publication of a fair and true report of any judicial proceeding . . . ." *N.Y. Civ. Rights Law § 74*. Whether or not the fair reporting privilege **[*49]** applies requires a determination of whether or not the report is "substantially accurate." *Karedes v. Ackerley Grp., 423 F.3d 107, 119 (2d Cir. 2005)* (citation omitted). Application of the fair reporting privilege is inappropriate at the motion to dismiss stage if a reasonable jury could conclude that the report "suggest[ed] more serious conduct than that actually suggested in the" judicial proceeding. Id. (citation omitted).

The Press Release characterized the Agreement between the parties as an agreement to remove "fake" Haring works.[12] The Agreement, however, does not contain any admission by the organizers of the Miami Exhibition that the removed works were inauthentic, and proffers **[**27]** no reason for the removal of the disputed works.

[12] The Miami litigation was later settled on February 28, 2014, through a stipulation of dismissal. This stipulation did not contain any agreement about the authenticity of the works displayed at the Miami Exhibition.

Accordingly, a reasonable jury could find that the Press Release stated that the parties had agreed that the works were inauthentic, a conclusion not warranted by the terms of the Agreement. For the purposes of this motion, it is therefore assumed that the fair reporting privilege does not apply to statements made in the Press Release.[13]

B. Defamation and Conspiracy to Defame

HN9[] Defamation or libel require a plaintiff to show: "(1) a written defamatory factual statement concerning the plaintiff; (2) publication to a third party; (3) fault; (4) falsity of the defamatory statement; and (5) special damages or per se actionability." *Chau v. Lewis, 771 F.3d 118, 126-27 (2d Cir. 2014)* (citation omitted) (applying New York law). "A plaintiff in a libel action must identify a plausible defamatory meaning of the challenged statement . . . . If the statement is susceptible of only one meaning the court must determine, as a matter of law, whether that one meaning is defamatory." *Celle v. Filipino Reporter Enterprises Inc., 209 F.3d 163, 178 (2d Cir. 2000)* (citation omitted) (applying New York law).

HN10[] New York law distinguishes between defamation of a person and defamation of a product. *Ruder & Finn Inc. v. Seaboard Sur. Co., 52 N.Y.2d 663, 670-71, 422 N.E.2d 518, 439 N.Y.S.2d 858 (1981)*. The bare accusation that a product does not conform to its advertised quality does not, without more, defame the owner of the product.

> Where a statement impugns the basic integrity or creditworthiness of a business, an action for defamation lies . . . . Where, however, the statement is confined to denigrating **[**29]** the quality of the business' goods or services, it could support an action for disparagement, but will do so only if [the additional elements for trade libel] are proven.

Id. at 670-71; see also *El Meson Espanol v. NYM Corp., 521 F.2d 737, 739-40 (2d Cir. 1975)* (applying New York law and finding **[*50]** that an article stating that a restaurant was a good place to meet for drug deals did not defame the owner, when it did not state that the owner knew or participated in the illegal activity); *Harwood Pharmacal Co. v. Nat'l Broad. Co., 9 N.Y.2d 460, 462-63, 174 N.E.2d 602, 214 N.Y.S.2d 725 (1961)* (noting that mere disparagement of the quality of a product does not defame the owner but statement that the plaintiff's product was "full of habit-forming drugs" and would require "a hospital cure to stop" defamed the owner because it accused him of putting an "unwholesome and dangerous" product on the market (citation omitted)); *Drug Research Corp. v. Curtis Pub. Co., 7 N.Y.2d 435, 440, 166 N.E.2d 319, 199 N.Y.S.2d 33 (1960)* (holding that article concerning the deceptive business activities of a corporation did not defame the integrity and business methods of the owner).

Even viewing the Press Release in the context of the Miami litigation, the plaintiffs have failed to allege sufficient facts that would allow a reasonable jury to conclude that the Press Release concerns them. The Press Release specifically states that the lawsuit is against the organizers of the Miami Exhibition. **[**30]** The Press Release also describes the lawsuit as an "effort to stop the display of fake Haring works at the exhibition," and the stipulation as an agreement "to remove all fake Haring works from the exhibition immediately and to destroy the offending catalogue that illustrated most of the fake works." No plaintiff is named as a defendant in the Miami litigation, and only Bilinski is mentioned by name in the Miami Complaint. The Miami Complaint was not disseminated with the Press Release. Assuming arguendo that the statements in the Press Release are defamatory, they are defamatory only in that they accuse the organizers -- not the owners of Haring works -- of misconduct. To the extent that the plaintiffs are referenced by implication, the disparagement only relates to their property and thus cannot constitute the basis for defamation. *El Meson Espanol, 521 F.2d at 739-40*.

---

[13] Plaintiffs also contend that the Williams exception to the fair reporting privilege applies. *Williams v. Williams, 23 N.Y.2d 592, 599, 246 N.E.2d 333, 298 N.Y.S.2d 473 (1969)*. In Williams, the New York Court of Appeals established an exception to the statutory fair reporting privilege that applies when a person maliciously institutes a judicial proceeding alleging false and defamatory charges, and then circulates a press release or other communication based on the judicial proceeding. Id. Plaintiffs suggest that if the Williams exception applies, it would permit tort claims against defendants for statements made in the judicial proceedings themselves. Even assuming that the **[**28]** Williams exception applies, it is an exception to the statutory fair reporting privilege, not the absolute privilege afforded to statements made in judicial proceedings.

Relying on *Kelly v. Schmidberger, 806 F.2d 44 (2d Cir. 1986)*, the plaintiffs argue that the Press Release defames them personally, rather than their property. In Kelly, a statement that the plaintiffs had placed church property "in their own names" sufficiently concerned the plaintiffs rather than their property. *Id. at 48*. That statement, however, addresses the plaintiffs' actions rather than the nature and **[**31]** quality of the property. In contrast, the statements at issue in the Press Release concern the quality of property. Because the plaintiffs have failed to demonstrate that the Press Release concerned them, it is unnecessary to resolve the parties' disputes over the other elements of a defamation claim and whether the Complaint adequately pleads those elements. The claims for defamation and conspiracy to commit defamation are dismissed.[14]

C. Tortious Interference with Business Relationships

The plaintiffs assert that the Miami litigation and Press Release tortiously interfered with a sale of Haring art by one of the plaintiffs to a London buyer. ***HN11***[] To prevail on a tortious interference with business relations claim, a plaintiff must demonstrate that: (1) it had a business relationship with a third party; (2) the defendant knew of that relationship and intentionally interfered with it; (3) the defendant acted solely out of malice, or used **[*51]** dishonest, unfair, or improper means; and (4) the defendant's interference caused injury to the relationship. *Carvel Corp. v. Noonan, 350 F.3d 6, 17 (2d Cir. 2003)* (New York law); see also *534 E. 11th St. Hous. Dev. Fund Corp. v. Hendrick, 90 A.D.3d 541, 935 N.Y.S.2d 23, 24 (App. Div. 2011)* (requiring the defendant to have knowledge of the business **[**32]** relationship); *Amaranth LLC v. J.P. Morgan Chase & Co., 71 A.D.3d 40, 888 N.Y.S.2d 489, 494 (App. Div. 2009)* (same); *Caprer v. Nussbaum, 36 A.D.3d 176, 825 N.Y.S.2d 55, 78 (App. Div. 2006)* (same).

This claim must be dismissed since the Complaint does not identify the London buyer or allege that the defendants knew of the business relationship at the time they filed their lawsuit or issued the Press Release. *Brill Physical Therapy, P.C. v. Leaf, 2011 N.Y. Slip Op. 33903(U) (Sup. Ct. Aug. 4, 2011)*, cited by the plaintiffs in support of their tortious interference claim, stands at most for the proposition that a plaintiffs need not identify the name of the buyer in this pleading. It does not excuse the plaintiff from pleading that the defendants actually knew of the business relationship. The tortious interference with business relations claim is dismissed.

D. Trade Libel

HN12[] Defamation of a product or good,[15] rather than a person, constitutes a distinct cause of action under New York law. *Fashion Boutique of Short Hills, Inc. v. Fendi USA, Inc., 314 F.3d 48, 59 (2d Cir. 2002)* (citing *Ruder & Finn, 52 N.Y.2d at 670—71*). "To recover for disparagement of goods, the plaintiff must show that the defendant published a[] . . . defamatory statement directed at the quality of a business's goods and must prove that the statements caused special damages." *Id.* Generally, special damages means "the loss of something having economic or pecuniary value." *Albert v. Loksen, 239 F.3d 256, 271 (2d Cir. 2001)* (citation omitted). "Where loss of customers constitutes the alleged special damages, the individuals who ceased **[**33]** to be customers, or who refused to purchase, must be named and the exact damages itemized." *Fashion Boutique, 314 F.3d at 59* (citation omitted) (New York law). Pleading damages as a round number with no attempt at itemization alleges general rather than special damages. *Drug Research Corp., 7 N.Y.2d at 441—42*.

Assuming that the plaintiffs have sufficiently alleged that the statements in the Press Release defamed their goods, the plaintiffs have failed to allege special damages. The Complaint only attempts to itemize damages for one plaintiff, alleging that Canario "lost the sale of artwork" to a London museum as a result of the Miami litigation, but does not name the museum or the sales price. As special damages are an element of a trade libel claim, the failure

---

[14] New York law does not recognize an independent tort of conspiracy. *Kirch v. Liberty Media Corp., 449 F.3d 388, 401 (2d Cir. 2006)*.

[15] This tort is described interchangeably as trade libel, injurious falsehood, and product disparagement.

to allege special damages is fatal to the claim. Defendants' motion to dismiss is granted as to the claim of trade libel.

Plaintiffs argue that they have alleged special damages because the requirement that the lost customers be identified may be relaxed when disparaging comments are disseminated widely and the nature of the plaintiffs' business prevents the identification of lost **[**34]** customers. This argument lacks merit. None of the authorities cited by plaintiffs excuse their failure to identify the amount of lost sales in connection with the sale to the London museum. Moreover, of the two cases cited by the plaintiffs **[*52]** in support of this argument, one was reversed on appeal as the plaintiffs had failed to plead special damages by not identifying lost customers or sales amounts. *Prince v. Fox Tel. Stas., Inc., 93 A.D.3d 614, 941 N.Y.S.2d 488, 488 (App. Div. 2012)* ("Plaintiffs' product disparagement claim should have been dismissed to the extent it seeks damages in connection with lost customers, as Plaintiffs failed to plead such special damages with the requisite specificity."). *Charles Atlas, Ltd. v. Time-Life Books, Inc., 570 F. Supp. 150 (S.D.N.Y. 1983)*, the other case cited by the plaintiffs, predates Prince and is also factually distinguishable as the plaintiff was able to identify an exact number of lost sales even if the identities of the would-be purchasers were unknown. *Id. at 155-56*.

E. Intentional Infliction of Economic Harm/Prima Facie Tort

HN13[] "Under New York law there are four elements to a prima facie business tort claim: (1) an intentional infliction of harm; (2) without excuse or justification and motivated solely by malice; (3) resulting in special damages; (4) by an act that would otherwise be lawful." *U.S. for Use & Benefit of Evergreen Pipeline Const. Co. v. Merritt Meridian Const. Corp., 95 F.3d 153, 161 (2d Cir. 1996)*. As the plaintiffs **[**35]** have failed to plead special damages, the prima facie tort claim is dismissed.

F. Unjust Enrichment

HN14[] "The basic elements of an unjust enrichment claim in New York require proof that (1) defendant was enriched, (2) at plaintiff's expense, and (3) equity and good conscience militate against permitting defendant to retain what plaintiff is seeking to recover." *Briarpatch Ltd., L.P v. Phoenix Pictures, Inc., 373 F.3d 296, 306 (2d Cir. 2004)*. The benefit acquired by the defendant must be "specific" and directly related to the loss suffered by the plaintiff. *Kaye v. Grossman, 202 F.3d 611, 616 (2d Cir. 2000)* (reversing a jury verdict where benefit acquired by the defendant was indirectly related to plaintiff's loss).

Plaintiffs allege that the defendants were enriched because the value of their own Haring works was increased by preventing others from selling works. Plaintiffs also allege that Stark and Gruen were enriched through the salaries and fees paid by the Foundation. These facts fail to plead a claim for unjust enrichment. The benefit acquired by the Foundation -- the alleged increase in value of Haring works owned by the Foundation -- is not a benefit flowing directly to the defendants at plaintiffs' expense. Rather, it is an indirect and hypothetical benefit. Also, the connection between the alleged harm to the **[**36]** plaintiffs and the compensation paid to individual defendants is too attenuated to support an unjust enrichment claim. Plaintiffs' claim for unjust enrichment is dismissed.[16]

CONCLUSION

Defendants' August 29 motion to dismiss is granted. The Clerk of Court shall close the case. A separate order addresses the defendants' motion for sanctions.

Dated: New York, New York

---

[16] Because all tort claims have been dismissed, the defendants' argument that claims against uncompensated directors are barred as a matter of law need not be considered.

March 6, 2015

/s/ Denise Cote

DENISE COTEDENISE COTEDenise CoteDENISE COTE

United States District Judge

ORDER

DENISE COTEDENISE COTEDenise CoteDENISE COTE, District Judge:

On March 6, 2014, the amended consolidated complaint was dismissed following a motion filed by the defendants. The March 6 Opinion addressed the third motion to dismiss in this action, the plaintiffs having been given an opportunity to amend in response to two prior motions. On November 10, 2014, defendants moved for sanctions on the basis of the tort claims and *Lanham Act* claim pled in all three complaints. Plaintiffs responded on December 5. The motion for sanctions was fully submitted on December **[**37]** 12.

Defendants request sanctions under *Rule 11, Fed. R. Civ. P.*, and *28 U.S.C. § 1927*. When *Rule 11* sanctions are initiated by motion, the challenged papers are judged by a standard of objective unreasonableness. *ATSI Comm., Inc. v. Shaar Fund, Ltd., 579 F.3d 143, 150 (2d Cir. 2009)*. In other words, *Rule 11* is violated if a pleading is submitted for "any improper purpose, or where, after reasonable inquiry, a competent attorney could not form a reasonable belief that the pleading is well grounded in fact and is warranted by existing law or a good faith argument for the extension, modification, or reversal of existing law." *Kropelnicki v. Siegel, 290 F.3d 118, 131 (2d Cir. 2002)* (citation omitted).

Section 1927 only applies to attorneys or those authorized to practice before the courts. *Salovaara v. Eckert, 222 F.3d 19, 35 n.13 (2d Cir. 2000)*. A court may sanction counsel pursuant to *Section 1927* "only when there is a finding of conduct constituting or akin to bad faith." *State Street Bank & Trust Co. v. Inversiones Errazuriz Limitada, 374 F.3d 158, 180 (2d Cir. 2004)* (citation omitted). The standard for sanctioning counsel pursuant to *Section 1927* is: a finding of "clear evidence that (1) the offending party's claims were entirely without color, and (2) the claims were brought in bad faith -- that is, motivated by improper purposes such as harassment or delay." *Eisemann v. Greene, 204 F.3d 393, 396 (2d Cir. 2000)* (citation omitted).

The defendants have failed to demonstrate that the plaintiffs' claims were so objectively unreasonable that sanctions are warranted under either *Rule 11, Fed. R. Civ. P.*, or *Section 1927*. The plaintiffs' **[**38]** claims, though subject to dismissal, were not so meritless that no competent attorney could form a reasonable belief that the pleading was warranted by existing law. The only basis for finding an improper motive or bad faith is the fact that the plaintiffs pled these claims three times, and did not sufficiently amend the complaint to survive dismissal or withdraw the claims. This is not sufficient to show bad faith or an improper motive. Accordingly, it is hereby

ORDERED that the defendants' November 10 motion for sanctions is denied.

Opinion

ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTION TO DISMISS

(ECF No. 40)

On June 12, 2013, Plaintiffs World Wide Travel Incorporated dba Worldwide Travel, Inc. ("WWT"), Laxmi Chand, and Usha Chand (collectively, "Plaintiffs") commenced this action against Defendants Travelmate US, Inc. dba TMI, dba TMI Web, dba TMI Web Services, dba Travelmate ("TMI") and Ritu Singla (collectively, "Defendants") in Superior Court for the District of Columbia. Defendants removed the case to the United States District Court for the District of Columbia on September 4, 2013 on the basis of diversity jurisdiction. The case was transferred to the Southern **[*2]** District of California on January 7, 2014.

On March 11, 2014, Plaintiffs filed a First Amended Complaint ("FAC") alleging (1) breach of contract, (2) fraud, (3) money had and received, (4) conversion, (5) breach of the implied covenant of good faith and fair dealing, (6) violation of *California Business and Professions Code Section 17200, et seq*. (the "UCL") and (7) accounting. Defendants now move to dismiss Plaintiffs' causes of action for fraud, conversion, accounting, and the UCL pursuant to *Federal Rule of Civil Procedure 12(b)(6)*.

The Court finds this motion suitable for determination on the papers submitted and without oral argument. *See* Civ. *L.R. 7.1(d)(1)*. For the reasons set forth below, Defendants' motion to dismiss is **GRANTED IN PART** with leave to amend and **DENIED IN PART**.

I. BACKGROUND

Plaintiffs Laxmi Chand and Usha Chand are the shareholders and officers of plaintiff WWT, a corporation in the business of selling overseas travel arrangements. (FAC at ¶ 1.) In 2004, Plaintiffs sponsored defendant Ritu Singla to move from India to the United States in order to work for WWT. (*Id*. at ¶ 9.) In 2005, Ms. Singla left WWT and allegedly moved to Texas. (*Id*. at ¶ 11.)

Plaintiffs allege that, while in Texas, Ms. Singla formed TMI, a business designed to sell the same type of overseas travel arrangements **[*3]** sold by Plaintiffs. (*Id*. at ¶ 12.) Plaintiffs further allege that Ms. Singla moved to California in 2009 and began to operate TMI in the City of San Diego. (*Id*. at ¶¶ 23, 13.) Plaintiffs also allege that Ms. Singla is TMI's sole officer, director, and shareholder. (*Id*. at ¶ 6.)

Due to the increase in online travel arrangements, Plaintiffs began seeking assistance to advertise WWT's website on Google. (FAC at ¶ 14.) Plaintiffs allege that, in or about February 2009, TMI, through its agent, "Tanya," solicited Laxmi Chand to use TMI's advertising services on Google. (*Id*. at ¶ 15, Ex. A.) In February 2009, Laxmi Chand and WWT entered into a written contract ("Contract") with TMI for "guaranteed 'first page placement'" of Plaintiffs' website on Google. (*Id*. at ¶ 15; Ex. A.) Ms. Singla was not a party to the Contract. Usha Chand was also not a party to the Contract. The Contract authorized TMI to charge its billings directly to Plaintiffs' American Express accounts. (*Id*. at ¶ 16; Ex. A.) Usha Chand was jointly liable with WWT for amounts charged to those accounts. (*Id*. at ¶ 16.)

The Contract authorized charges of $3,225 for the period of February 2, 2009 to March 1, 2009, and then subsequent **[*4]** monthly charges "based on hits on keyword phrases specified in . . . the Contract." (*Id*.) The parties allegedly orally modified the Contract in June 2009, "by basing charges on a 'per click' basis, that is, the number of times visitors 'clicked' on Plaintiffs' advertising appearing on Google." (*Id*.) Defendants allegedly made charges to Plaintiffs' credit card accounts from May 2009 through December 2009, and from February 2010 through November 2010. (*Id*. at ¶ 17.)

Plaintiffs allege that, "[w]ithout Plaintiffs' knowledge or consent, in about July 2010, Defendants returned to keyword rather than 'per click' invoicing[,]" and that "[i]n 2010, Defendants inexplicably began invoicing Plaintiffs for greatly increased amounts." (*Id*. at 18, 19.) In December 2010, Plaintiffs requested that Defendants provide documentation to justify the "unusually large charges." (*Id*. at ¶ 19.) Defendants refused Plaintiffs' request, and Plaintiffs subsequently notified them that no further charges were authorized to Plaintiffs' credit cards until the documentation was provided. (*Id*.)

In January 2011, Plaintiffs disputed Defendants' charges directly with American Express, and Defendants opposed the dispute. (*Id*. at ¶ 20.) In apparent **[*5]** response to the dispute, Defendants sent Plaintiffs "a few highly redacted Google account records" on February 22, 2011. (*Id*. at ¶ 21.) Plaintiffs allege the records "showed that Defendants had systematically lied to Plaintiffs about the number of 'clicks' and keyword hits realized, thus grossly overcharging Plaintiffs for services, and charging for services never provided and results never obtained." (*Id*.) Specifically, Plaintiffs allege the records "showed that Defendants diverted Plaintiffs' funds to their own Google advertising, billing Plaintiffs for Defendants' own Google keywords and clicks, thereby doubling, tripling or even quadrupling the charges Defendants invoiced to Plaintiffs taken by direct credit card charging." (*Id*. at ¶ 23.)

Plaintiffs allege, for example, that Defendants' records for May 2010 show that Plaintiffs were charged for thirty-two keywords, when only five of those keywords appeared on Plaintiffs' price list, and only one of them was used; and that Plaintiffs were charged for seventeen keywords in September 2010, when only six of those keywords appeared on Plaintiffs' price list, and again only one of them was used. (*Id*. at ¶ 24.) Defendants charged Plaintiffs' **[*6]** American Express card $12,865 in May and $8,680 in September, when, according to Plaintiffs, only $400 was actually justified and authorized for each month. (*Id*.)

In April 2011, Plaintiffs hired a "Google advertising expert" to analyze Defendants' records. (*Id*. at ¶ 25.) According to Plaintiffs, the expert determined that "the number of 'clicks' reported by Defendants was unsubstantiated and impossible[,]" and that the web logs from Plaintiffs' web server showed a routing from Plaintiffs' website to websites in Texas and California, states in which Plaintiffs believe Defendants formerly or now reside. (*Id*. at ¶¶ 25, 26.) Plaintiffs allege that they have suffered damages in excess of $160,000. (*Id*. at ¶ 30; Prayer.)

Finally, Plaintiffs allege on information and belief that there exists a unity of interest and ownership between Ms. Singla and TMI such that Ms. Singla is the alter ego of TMI. (*Id*. at ¶ 7.) Ms. Singla is described as TMI's sole officer, director, and shareholder, and both TMI and Ms. Singla are described in the FAC as residing and doing business at 13565 Lavender Way, San Diego, California. (*Id*. at ¶¶ 2-3, 6.) Plaintiffs further allege that Ms. Singla used TMI to misappropriate **[*7]** Plaintiffs' advertising funds and then used those funds to advertise her own business, TMI. (*Id*. at ¶ 7.) Plaintiffs also allege that adherence to TMI's corporate existence would sanction fraud and promote injustice, as TMI is insolvent and unable to pay Plaintiffs' damages. (*Id*.)

In the FAC, Plaintiffs assert claims for (1) breach of contract; (2) fraud; (3) money had and received; (4) conversion; (5) breach of the implied covenant of good faith and fair dealing; and (6) violation of *California Business and Professions Code Section 17200, et seq*. (*Id*. at ¶¶ 27-52, 57-61.) Plaintiffs also seek declaratory relief for accounting. (*Id*. at ¶¶ 53-56.) Defendants now move to dismiss the FAC in its entirety under *Rule 12(b)(6)*. Plaintiffs oppose.

II. STATEMENT OF LAW

A motion to dismiss pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure* tests the legal sufficiency of the claims asserted in the complaint. *Fed. R. Civ. P. 12(b)(6)*; *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. The court must accept all allegations of material fact pleaded in the complaint as true and must construe them and draw all reasonable inferences from them in favor of the nonmoving party. *Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)*. To avoid a *Rule 12(b)(6)* dismissal, a complaint need not contain detailed factual allegations, rather, it must plead "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility **[*8]** when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Twombly, 550 U.S. at 556*). "Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief." *Id. at 678* (quoting *Twombly, 550 U.S. at 557*) (internal quotations omitted).

"[A] plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555* (quoting *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)* (alteration in original)). A court need not accept "legal conclusions" as true. *Iqbal, 556 U.S. at 678*. Despite the deference the court must pay to the plaintiff's allegations, it is not proper for the court to assume that "the [plaintiff] can prove facts that [he or she] has not alleged or that defendants have violated the...laws in ways that have not been alleged." *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 526, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*.

Generally, courts may not consider material outside the complaint when ruling on a motion to dismiss. *Hal Roach Studios, Inc. v. Richard Feiner & Co., Inc., 896 F.2d 1542, 1555 n.19 (9th Cir. 1990)*; *Branch v. Tunnell, 14 F.3d 449, 453 (9th Cir. 1994)* (overruled on other grounds by *Galbraith v. Cnty of Santa Clara, 307 F.3d 1119, 1121 (9th Cir. 2002))*. "However, material which is properly submitted as part of the complaint may be considered." *Hal Roach Studios, Inc., 896 F.2d at 1555, n. 19*. Documents specifically **[*9]** identified in the complaint whose authenticity is not questioned by the parties may also be considered. *Fecht v. Price Co., 70 F.3d 1078, 1080 n.1 (9th Cir. 1995)* (superseded by statute on other grounds); *see also* *Branch, 14 F.3d at 453-54*. Such documents may be considered, so long as they are referenced in the complaint, even if they are not physically attached to the pleading. *Branch, 14 F.3d at 453-54*; *see also* *Lee v. City of Los Angeles, 250 F.3d 668, 689 (9th Cir. 2001)* (rule extends to documents upon which the plaintiff's complaint "necessarily relies" but which are not explicitly incorporated in the complaint). Moreover, the court may consider the full text of those documents even when the complaint quotes only selected portions. *Fecht, 70 F.3d at 1080 n. 1*. Additionally, the court may consider materials which are judicially noticeable. *Barron v. Reich, 13 F.3d 1370, 1377 (9th Cir. 1994)*.

As a general rule, a court freely grants leave to amend a complaint which has been dismissed. *Fed. R. Civ. P. 15(a)*; *Schreiber Distrib. Co. v. Serv-Well Furniture Co., 806 F.2d 1393, 1401 (9th Cir. 1986)*. However, leave to amend may be denied when "the court determines that the allegation of other facts consistent with the challenged pleading could not possibly cure the deficiency." *Schreiber Distrib. Co., 806 F.2d at 1401* (citing *Bonanno v. Thomas, 309 F.2d 320, 322 (9th Cir. 1962))*.

III. DISCUSSION

A. Standing

Defendants argue that Plaintiff Usha Chand lacks standing to pursue any of the claims asserted in the FAC, and, therefore, must be dismissed from this action. (Mot. at pp. 6-7.) In order to satisfy Article III standing,

> a plaintiff **[*10]** must show (1) [s]he has suffered an "injury in fact" that is concrete and particularized and actual or imminent, not conjectural or hypothetical; (2) the injury is fairly traceable to the challenged action of the defendant; and (3) it is likely, as opposed to merely speculative, that the injury will be redressed by a favorable decision.

Braunstein v. Ariz. Dept. of Transp., 683 F.3d 1177, 1184 (9th Cir. 2012) (citing *Bernhardt v. Cnty. of L.A., 279 F.3d 862, 868-69 (9th Cir. 2002))*. "At the pleading stage, general factual allegations of injury resulting from the defendant's conduct may suffice, for on a motion to dismiss we presum[e] that general allegations embrace those specific facts that are necessary to support the claim." *Maya v. Centex Corp., 658 F.3d 1060, 1068 (9th Cir. 2011)* (quoting *Lujan v. Defenders of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)* (alteration in original) (internal quotations omitted)).

"[A] shareholder must assert more than personal economic injury resulting from a wrong to the corporation" to have standing to maintain an individual action. *Shell Petroleum N.V. v. Graves, 709 F.2d 593, 595 (9th Cir. 1983)*; *see e.g., Von Brimer v. Whirlpool Corp., 536 F.2d 838, 846 (9th Cir. 1976)* (shareholder lacks standing to sue on the basis he suffered monetary loss when defendants caused the corporation to lose income and the value of his stock to decline). Rather, "[a] shareholder must be injured directly and independently of the corporation." *Id.; see also* *Sutter v. Gen. Petroleum Corp., 28 Cal. 2d 525, 530, 170 P.2d 898 (1946)* ("[A] stockholder may sue as an individual where he is directly and individually injured although the corporation **[*11]** may also have a cause of action for the same wrong."). The Supreme Court of California expressed this rule as follows:

> Generally, a (shareholder) may not maintain an action in his own behalf for a wrong done by a third person to the corporation on the theory that such wrong devalued his stock and the stock of other shareholders, for such an action would authorize multitudinous litigation and ignore the corporate entity. Under proper circumstances a shareholder may bring a representative action or derivative action on behalf of the corporation.

Von Brimer v. Whirlpool Corp., 536 F.2d 838, 846 (9th Cir. 1976) (citing Sutter, 28 Cal. 2d at 530). The rule "is a salutary one which avoids multitudinous litigation and recognizes the corporate entity." *Id*. "[I]t is the gravamen of the wrong alleged in the pleadings, not simply the resulting injury, which determines whether an individual action lies." Nelson v. Anderson, 72 Cal. App. 4th 111, 124, 84 Cal. Rptr. 2d 753 (1999).

Here, Defendants argue Usha Chand has no standing to pursue any claims in the FAC because she is not identified as an individual party on the Contract and Plaintiffs have failed to allege that she ever "personally paid the charges assessed on the American Express accounts." (Mot. at p. 7.) In response, Plaintiffs argue the allegations stating Usha Chand "was required to be jointly liable **[*12]** with [WWT] for amounts charged" on the American Express card accounts, and charges were in fact made on the accounts, are sufficient to allege standing. (Opp. at p. 3.)

Construing the allegations in the light most favorable to Plaintiffs, the Court finds that Plaintiffs have failed to sufficiently allege Usha Chand has standing to pursue this action. The gravamen of the wrong alleged in the pleadings is that Defendants breached a contract entered into between TMI, Laxmi Chand, and WWT by charging WWT a substantial amount of money under the contract for services not rendered to the corporation, and disguised that breach through fraudulent misrepresentations and the creation of fictitious reports. Thus, the gravamen of the alleged wrong is injury to the corporation.

The Court acknowledges the rule "is susceptible to an exception when the injury is to the plaintiff individually, as where the action is based on a contract to which he is a party, or on a right belonging severally to him, or on a fraud affecting him directly." Id. (internal quotations omitted) (citing Sutter, 28 Cal.2d at 530). However, Usha Chand is not a party to the Contract, and the allegation that Usha Chand was jointly liable on the charged American Express **[*13]** account listed in the Contract is not, without more, sufficient to allege standing. *See* Sparling v. Hoffman Constr. Co., 864 F.2d 635, 641 (9th Cir. 1988) (holding that the plaintiff-shareholders did not have standing on the basis they were guarantors on the corporation's bonds); Sherman v. British Leyland Motors, Ltd., 601 F. 2d 429, 439-40 & n. 10 (9th Cir. 1979) (finding the plaintiff-shareholder did not have standing to sue in his individual capacity, even when he, as the guarantor of certain corporate obligations to third parties, was required to repay loans on behalf of the corporation).

Accordingly, Defendants' motion to dismiss Usha Chand for lack of standing is **GRANTED** with leave to amend.

B. Alter Ego[1]

Defendants move to dismiss the FAC against Ms. Singla, arguing the FAC fails to state sufficient facts supporting the theory that Ms. Singla is the alter ego of TMI. (Mot. at pp. 7-9.) "Alter-ego liability allows a plaintiff to 'pierce the corporate veil' and hold a corporate actor . . . liable for the conduct of the corporation." Pacific Maritime Freight, Inc. v. Foster, No. 10-cv-0578, 2010 U.S. Dist. LEXIS 87205, 2010 WL 3339432, at *6 (S.D. Cal. Aug. 24, 2010) (citing Stark v. Coker, 20 Cal.2d 839, 845, 129 P.2d 390 (1942)); *see also* Sandoval v. Ali, 34 F. Supp. 3d 1031, 1040 (N.D. Cal. 2014) (citing RRX Indus., Inc. v. Lab-Con, Inc., 772 F.2d 543, 545-46 (9th Cir. 1985)) ("The equitable alter ego doctrine governs whether two separate entities **[*14]** may be treated as the same entity.") The doctrine applies where "(1) such a unity of interest and ownership exists that the personalities of the corporation and individual are no longer separate, and (2) an inequitable result will follow if the acts are treated as those of the corporation alone." RRX Indus., 772 F.2d at 545; *see also* Doe v. Unocal Corp., 248 F.3d 915, 926 (9th Cir. 2001).

"In assessing alter ego, courts consider the commingling of funds and other assets of the entities, the holding out by one entity that it is liable for the debts of the other, identical equitable ownership of the entities, use of the same offices and employees, use of one as a mere shell or conduit for the affairs of the other, inadequate capitalization, disregard of corporate formalities, lack of segregation of corporate records, and identical directors and officers."

---

[1] This Court has jurisdiction over this action pursuant to 28 U.S.C. § 1332, and thus it applies California's substantive law and federal procedural law. ***Freund v. Nycomed Amersham, 347 F.3d 752, 761 (9th Cir. 2003)*** (citing Gasperini v. Center for Humanities., 518 U.S. 415, 427, 116 S. Ct. 2211, 135 L. Ed. 2d 659 (1996)).

Sandoval, 34 F. Supp. at 1040. No single factor is determinative; instead a court must examine all the circumstances to determine whether to apply the doctrine. Virtualmagic Asia, INc. v. Fil-Cartoons, Inc., 99 Cal. App. 4th 228, 245, 121 Cal. Rptr. 2d 1 (2003). Common ownership alone, however, is insufficient to disregard the corporate form. Sandoval, 34 F. Supp. at 1040.

"Conclusory allegations of 'alter ego' status are insufficient to state a claim." Neilson v. Union Bank of Cal., N.A., 290 F. Supp. 2d 1101, 1116 (C.D. Cal. 2003). "Rather, a plaintiff must allege specifically both the elements of alter ego liability, as well as facts supporting **[*15]** each." *Id*.

1. Unity of Interest

Defendants argue that Plaintiffs' allegations regarding Ms. Singla's connection to TMI are "baseless assumptions." (Mot. at pp. 7-9.) Defendants also argue that Plaintiffs' alter ego allegations are a mere conclusory recitation of the factors courts use to analyze alter ego. (*Id*.)

Courts have held that the pleading of at least two factors in support of a unity of interest satisfies this element. Daewoo Elecs. Am., Inc. v. Opta Corp., No. C 13-1247, 2013 U.S. Dist. LEXIS 104603, 2013 WL 3877596, at *5 (N.D. Cal. July 25, 2013); Pacific Mar. Freight, Inc., 2010 U.S. Dist. LEXIS 87205, 2010 WL 3339432, at *6. Here, Plaintiffs allege at least two of the factors showing that unity of interest exists between Ms. Singla and TMI. Plaintiffs allege in the FAC that Ms. Singla is TMI's sole officer, director, and shareholder, and that Ms. Singla and TMI both reside and do business in the same location. (FAC at ¶¶ 2-3, 6.) Plaintiffs further allege Ms. Singla "dominated, influenced and controlled the affairs" of TMI as well as the business, property, and affairs of TMI. (FAC at P7.) Plaintiffs also allege, among other things, that TMI was a "mere shell and naked framework[]" which Ms. Singla used "as a device and conduit for the conduct of [her] individual and personal business, property and affairs." (FAC at ¶ 7.) In addition, Plaintiffs allege Ms. Singla diverted assets from TMI **[*16]** to the detriment of creditors, and commingled funds and assets with her own. (*Id*.) Thus, the Court finds Plaintiffs' "unity of interest" allegations are sufficient. *See* Daewoo Elecs. Am., Inc., 2013 U.S. Dist. LEXIS 104603, 2013 WL 3877596, at *5; Lacey v. Malandro Commc'n, No. CV-09-01429, 2009 U.S. Dist. LEXIS 113993, 2009 WL 4755399, at *6 (D. Ariz. Dec. 8, 2009); Fund Raising, Inc. v. Alaskans for Clean Water, Inc., No. CV 09-4106, 2009 U.S. Dist. LEXIS 106549, 2009 WL 3672518, at *4 (C.D. Cal. Oct. 29, 2009).

2. Inequitable Result

"Inequitable results flowing from the recognition of the corporate form include the frustration of a meritorious claim, perpetuation of a fraud, and the fraudulent avoidance of personal liability." Pac. Mar. Freight, Inc., 2010 U.S. Dist. LEXIS 87205, 2010 WL 3339432, at *7 (citing Hennessey's Tavern, Inc. v. Am. Air Filter Co., 204 Cal. App. 3d 1351, 1359, 251 Cal. Rptr. 859 (1988)). An inequitable result may also follow "if the complained of acts are treated as those of an undercapitalized corporation;" however, allegations that a plaintiff would face difficulty collecting a judgment from a corporation are insufficient. RRX Indus., 772 F.2d at 546 (citing Automotriz Del Golfo De Cal. S.A. De C.V. v. Resnick, 47 Cal.2d 792, 797, 306 P.2d 1 (1957)); Sandoval, 34 F. Supp. at 1041; Neilson, 290 F. Supp. 2d at 1117-18.

In general, California courts "require evidence of some bad-faith conduct to fulfill the second prong of alter-ego liability, [and] that bad faith must make it inequitable to recognize the corporate form." Daewoo, 2013 U.S. Dist. LEXIS 104603, 2013 WL 3877596, at *5 (quoting Smith v. Simmons, 638 F. Supp. 2d 1180, 1192 (E.D. Cal. 2009) (alteration in original)); *but see* RRX Indus., 772 F.2d at 546 ("A finding of bad faith, however, is not prerequisite to the application of the alter ego doctrine under California law."). A party alleging bad faith conduct must state how the corporate form was abused to perpetrate it. Pac. Mar. Freight, Inc., 2010 U.S. Dist. LEXIS 87205, 2010 WL 3339432, at *8.

Here, Plaintiffs allege **[*17]** that Ms. Singla failed to adequately capitalize TMI, a company she formed, and diverted assets from the company. (FAC at ¶¶ 7, 13.) Plaintiffs further allege TMI was created and continued, "pursuant to a fraudulent scheme, plan and device whereby [its] income, revenue and profits were diverted to [Ms. Singla], whereby [TMI was] fraudulently used by [Ms. Singla] and obligors for the assumption of obligations and liabilities, . . . which obligations were incapable of performance by TMI." (*Id.*) Plaintiffs also allege Ms. Singla "misappropriated Plaintiffs' advertising funds to instead pay for advertising for her business, done in the name of TMI and Travelmate—a travel agency directly competing with the business of Plaintiffs." (*Id.*) Lastly, Plaintiffs allege that Defendants produced Google records showing Plaintiffs were overcharged and that their funds were diverted to Defendants' own Google advertising. (FAC at ¶¶ 19, 23-24)

Unlike the plaintiffs in the cases cited by Defendants, Plaintiffs here go beyond mere conclusory allegations. (Mot. at pp. 8-9.) Assuming the facts are true, the Court finds the allegations in the FAC sufficient to raise the facial plausibility an inequitable result **[*18]** will follow if the acts are treated as those of the corporation alone. *See Lacey, 2009 U.S. Dist. LEXIS 113993, 2009 WL 4755399, at *6*. Moreover, "a complaint is sufficient if it gives the defendant 'fair notice of what the . . . claim is and the grounds upon which it rests.'" *Laguna v. Coverall N. Am., Inc., No. 09cv2131, 2009 U.S. Dist. LEXIS 118098, 2009 WL 5125606, at *3 (S.D. Cal. Dec. 18, 2009)* (citing *Twombly, 550 U.S. at 555-56*)). The Court finds that Plaintiffs' allegations in the FAC sufficiently identify the contours of an alter ego claim such that Defendants are able to prepare a response and conduct discovery. *2009 U.S. Dist. LEXIS 118098, [WL] at *3*. Accordingly, the Court finds that dismissal of Ms. Singla is not appropriate at this time.

C. Failure to State a Claim

1. Fraud

Defendants argue that Plaintiffs have failed to adequately plead facts sufficient to meet the heightened pleading requirements for fraud. (Mot. at pp. 10-13.) To state a claim for fraud in California, a plaintiff must allege "[1] a false representation, [2] knowledge of its falsity, [3] intent to defraud, [4] justifiable reliance, and [5] damages." *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1106 (9th Cir. 2003)* (quoting *Moore v. Brewster, 96 F.3d 1240, 1245 (9th Cir. 1996))* (internal quotations omitted). Under *Federal Rule of Civil Procedure Rule 9(b)*, "[i]n alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake." *Fed. R. Civ. P. 9(b)*; *see also Vess, 317 F.3d at 1103* ("*Rule 9(b)*'s particularity requirement applies to state-law causes of action."). The **[*19]** heightened particularity standard requires allegations of fraud to include the "who, what, when, where, and how" of the alleged misconduct, so as to be specific enough to give defendants notice "so that they can defend against the charge and not just deny that they have done anything wrong." *Vess, 317 F.3d at 1106* (citations omitted).

However, "the general rule that allegations of fraud based on information and belief do not satisfy *Rule 9(b)* may be relaxed with respect to matters within the opposing party's knowledge. In such situations, plaintiffs can not be expected to have personal knowledge of the relevant facts." *Neubronner v. Milken, 6 F.3d 666, 672 (9th Cir. 1993)* (citing *Wool v. Tandem Computers Inc., 818 F.2d 1433, 1439 (9th Cir. 1987)*; *Moore v. Kayport Package Express, Inc., 885 F.2d 531, 540 (9th Cir. 1989))*. But, a plaintiff who alleges fraud based "on information and belief must state the factual basis for the belief." *Id*.

Plaintiffs allege that Defendants made the following misrepresentations to Plaintiffs: (1) "Plaintiffs were being billed on a keyword basis, and only on keywords actually approved by Plaintiffs and utilized in the campaigns"; and (2) "Defendants' representation of the number of 'clicks' and keywords invoiced to Plaintiffs was true and accurate[.]" (FAC at ¶ 33.) Plaintiffs further allege that these misrepresentations were made by Defendants and TMI's agent, "Tanya," who **[*20]** is identified on the Contract as a TMI salesperson, during the period from February 2009 to February 2011. (*Id.)* The Court finds that these allegations satisfy the "who, what, when, where, and how" of the matter, and are "specific enough to give defendants notice of the particular misconduct . . . so that they can defend against the charge[.]" *Vess, 317 F.3d at 1106* (quoting *Bly-Magee v. Cal., 236 F.3d at 1019*).

Plaintiffs further allege that Defendants knew and intended to defraud Plaintiffs "to allow Defendants to charge monthly invoiced amounts directly to Plaintiffs' credit cards, while Defendants used such funds to fund their own Google advertising campaigns in direct competition with Plaintiffs' business." (FAC at ¶ 34.) In support of these allegations, Plaintiffs allege Defendants "created and gave to Plaintiffs fictitious reports and statistics to justify overbilling Plaintiffs for services purportedly rendered, and billing Plaintiffs for services never performed or results never obtained." (*Id*. at ¶ 33.) Plaintiffs further allege that the Google records they received for the May 2010 and September 2010 Google advertising campaigns reflect Plaintiffs were being charged for keywords they did not approve and were not utilized. (*Id*. **[*21]** at ¶ 24.)[2] Plaintiffs further allege the Google records show that "Defendants diverted Plaintiffs' funds to their own Google advertising, billing Plaintiffs for Defendants' own Google keywords and clicks." (*Id*. at ¶ 23.) Plaintiffs also contend Ms. Singla was a travel agent at the time specializing in travel to Central Asia and Africa and operated a business that directly competed with WWT. (*Id*. at ¶¶ 1, 13, 22, 34.) Lastly, Plaintiffs allege justifiable reliance, alleging a prior relationship and noting the "complex nature of Google advertising and accounting," and damages which are "believed to exceed $160,000." (*Id*. at ¶¶ 9-10, 35-37.) Based on these allegations, the Court finds that Plaintiffs have sufficiently identified the circumstances surrounding the alleged fraud so that Defendants can prepare an adequate answer. *See* *Moore, 885 F.2d at 540*; *Vess, 317 F.3d at 1106*.

Given the foregoing, the Court finds Plaintiffs' allegations in the FAC are sufficient to state a claim for fraud and further meet *Rule 9(b)*'s heightened pleading standard. The alleged fraud is alleged with enough particularity such that Defendants can defend against the charge. Defendants' motion to dismiss Plaintiffs cause of action for fraud is therefore **DENIED**.[3]

2. Conversion

Defendants argue that Plaintiffs' conversion claim must be dismissed because it is based on a mere overcharge. (Mot. at pp. 13-14.) In California, "[t]he elements of conversion are (1) the plaintiff's ownership or right to possession of the property; **[*23]** (2) the defendant's conversion by wrongful act inconsistent with the property rights of the plaintiff; and (3) damages." *In re Emery, 317 F.3d 1064, 1069 (9th Cir. 2003)* (citing *Burlesci v. Petersen, 68 Cal. App. 4th 1062, 1065, 80 Cal. Rptr. 2d 704 (1998))*. A conversion claim for money is not stated "unless there is a specific, identifiable sum involved, such as where an agent accepts a sum of money to be paid to another and fails to make the payment." *Kim v. Westmoore Partners, Inc., 201 Cal. App. 4th 267, 284, 133 Cal. Rptr. 3d 774 (2011)* (citing *McKell v. Wash. Mut., Inc., 142 Cal. App. 4th 1457, 1491, 49 Cal. Rptr. 3d 227 (2006))*. "There is no requirement that the [specific sum of] money have been held in trust—only that it be misappropriated." *Welco Elec.'s, Inc. v. Mora, 223 Cal. App. 4th 202, 216, 166 Cal. Rptr. 3d 877 (2014)*. A failure to pay money owed or claims arising out of an alleged simple overcharge cannot be the basis for a conversion claim. *Id. at 214* (citing *Kim, 201 Cal. App. 4th at 284*; *McKell, 142 Cal. App. 4th at 1467*).

Plaintiffs rely on *Welco* to support their claim of conversion. In *Welco*, the defendant worked for the plaintiff company, and without the plaintiff's knowledge or consent, used plaintiff's credit card to pay for defendant's services. *Id. at 205-07*. The defendant transferred over $370,000 into a bank account set up with a fictitious name

---

[2] Defendants contend Plaintiffs' misrepresentations are vague and ambiguous because the contract allegedly changed over the course of the nearly two year business relationship. (Mot. at pp. 11-12.) However, Plaintiffs allege that the Contract was orally modified "[i]n about June 2009," to reflect an agreed upon change to the method of billing. (FAC at ¶ 16.) Initially, **[*22]** charges were to be based on hits on approved keyword phrases; after June 2009, they were to be based on a "per click" basis. (*Id*.) Defendants further allege that "[w]ithout Plaintiffs' knowledge or consent, in about July 2010, Defendants returned to keyword rather than 'per click' invoicing." (*Id*. at ¶ 18.) These allegations are date specific enough to allow Defendants to defend against Plaintiffs' allegation of fraud.

[3] Because Plaintiffs state a cause of action for fraud, the Court also declines to dismiss Plaintiffs' prayer for punitive damages. *See* *Cal. Civ. Code § 3294(a)*; *TJRK, Inc. v. Waage, No. 08cv1140, 2008 U.S. Dist. LEXIS 86921, 2008 WL 4748179, at *3 (S.D. Cal. 2008)*.

using the plaintiff's credit card. *Id. at 205*. The defendant leased a swiping machine credit card terminal, which was used to make the transactions. *Id. at 206*. After discussing the evolution of the tort of conversion, the court held that, along with credit card information, a credit card **[*24]** balance is an intangible property right that can be converted. *Id. at 211-16*. The court explained:

> Plaintiff had a property right in its credit card account because plaintiffs interest was specific, control over its credit card account, and an exclusive claim to the balance. [] Defendant obtained the money from the credit card company. As a result, plaintiff became indebted to the credit card company. Thus, when defendant . . . for defendants benefit, misappropriated plaintiffs credit card and used it, part of plaintiffs credit balance with the credit card company was taken by defendant and what resulted was an unauthorized transfer to defendant of plaintiffs property rights—i.e., in money from the available credit line belonging to plaintiff with the credit card company.

Id. at 211.

In so holding, the *Welco* court distinguished case law finding that conversion claims fail if based on an overcharge because in those cases there was no taking of intangible property. *Id. at 214*. In addressing the defendant's argument that allowing the conversion claim to proceed would invite a conversion claim over any credit card dispute, the *Welco* court stated that

> [a] person's willing use of a credit card to pay for goods or services **[*25]** has no relationship to what occurred here. Plaintiff did not consent to its credit card or its information being used by or on behalf of defendant. This case does not . . . concern a simple overcharge, which [] does not constitute a conversion.

Id. at 215 (citing *McKell, 142 Cal. App. 4th at 1467*). Thus, the court distinguished between a situation where a defendant's action was akin to theft, and situations involving a dispute over a bill, *e.g*., disputes arising regarding the quality of goods purchased, fault concerning medical treatment, or the appropriateness of legal bills. *Id*. In determining that what occurred in *Welco* was theft, the *Welco* court placed significance on the fact that the defendant used the plaintiff's credit card without consent.

Here, Plaintiffs consented to Defendants' use of their credit card. Plaintiffs authorized Defendants to make monthly charges as payment for Defendants' advertising services. (FAC at ¶ 16, Ex. A.) The parties now dispute the amount and appropriateness of the charges. (*See id*. at ¶ 24.) Given the presence of consent, the Court finds the present dispute is more akin to a dispute over a bill than it is to outright theft. Accordingly, Defendants' motion to dismiss Plaintiffs' cause of **[*26]** action for conversion is **GRANTED** with leave to amend.

3. Business and Professions Code *Section 17200, et seq*.

Section 17200 defines unfair competition as "any unlawful, unfair or fraudulent business act or practice . . . ." *Cal. Bus. & Prof. Code § 17200*. "[T]he UCL's coverage is sweeping, embracing anything that can properly be called a business practice and that at the same time is forbidden by law." *Wilson v. Hewlett-Packard Co., 668 F.3d 1136, 1140 (9th Cir. 2012)* (quoting *CelTech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999))* (internal quotations omitted). There are three substantive prongs of the UCL: acts or business practices that are (1) unlawful, (2) unfair, or (3) fraudulent. *Id*. Under the UCL, a person has standing if that person "suffered injury in fact and has lost money or property as a result of the unfair competition." *Cal. Bus. & Prof. Code § 17204*.

In the FAC's seventh cause of action, Plaintiffs reincorporate every allegation in the FAC and generally state that "Defendants' acts constituted unlawful, unfair and fraudulent business acts or practices and directly harmed and damaged Plaintiffs." (FAC at P 59.) The Court addresses each prong in turn.

a. "*Unlawful" Acts or Practices*

"*Section 17200*'s unlawful prong borrows violations of other laws . . . and makes those unlawful practices actionable under the UCL." *Klein v. Chevron U.S.A., Inc., 202 Cal. App. 4th 1342, 1383, 137 Cal. Rptr. 3d 293 (2012)* (quoting *Lazar v. Hertz Corp., 69 Cal. App. 4th 1494, 1505, 82 Cal. Rptr. 2d 368 (1999))* (internal quotations omitted). Violations of almost any law, federal or state, may **[*27]** serve as a sufficient predicate for a claim under the UCL's "unlawful" prong. *Id*. However, violations of the common law (e.g., breach of contract, common law fraud) are insufficient to satisfy the unlawful prong. *See Shroyer v. New Cingular Wireless Servs., Inc., 622 F.3d 1035, 1044 (9th Cir. 2010)*; *Nat'l Rural Telecomms. Coop. v. DIRECTV, Inc., 319 F. Supp. 2d 1059, 1074-75 (C.D. Cal. 2003)*. Accordingly, Plaintiffs have failed to state a claim under the unlawful prong of the UCL.

b. "*Fraudulent" Acts or Practices*

"A fraudulent business practice [under the UCL] is one which is likely to deceive the public." *McKell, 142 Cal. App. 4th at 1471* (citing *Mass. Mut. Life Ins. Co. v. Super. Ct., 97 Cal. App. 4th 1282, 1290, 119 Cal. Rptr. 2d 190 (2002))*. "The determination as to whether a business practice is deceptive is based on the likely effect such practice would have on a reasonable consumer." *Id*. (citing *Lavie v. Procter & Gamble Co., 105 Cal. App. 4th 496, 507, 129 Cal. Rptr. 2d 486 (2003))*. The heightened pleading requirements of *Federal Rule of Civil Procedure 9(b)* apply to UCL "fraud" claims brought in federal court. *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)* (citing *Vess v. Ciba-Geigy Corp. U.S.A., 317 F. 3d 1097, 1102-05 (9th Cir. 2003))*.

As the Court has determined Plaintiffs have sufficiently alleged a cause of action for common law fraud, the Court finds Plaintiffs have adequately pleaded a *section 17200* claim under the fraudulent prong. *See Boschma v. Home Loan Center, 198 Cal. App. 4th 230, 253, 129 Cal. Rptr. 3d 874 (2011)*; *State Farm Fire & Cas. Co. v. Super. Ct., 45 Cal. App. 4th 1093, 1105-07, 53 Cal. Rptr. 2d 229 (1996)*, abrogated on other grounds by *Cel-Tech Commc'ns, Inc., 20 Cal. 4th at 185*.

c. *"Unfair" Acts or Practices*

The definition of an "unfair" business practice depends on whether the plaintiff is a competitor or consumer. A claim of unfairness to competitors must "be tethered to some legislatively declared policy or proof of some actual **[*28]** or threatened impact on competition." *Cel—Tech Commc'ns, Inc., 20 Cal. 4th at 186-87*. Therefore, when the plaintiff is a direct competitor of the defendant and invokes *Section 17200*'s "unfair" prong, "the word 'unfair' . . . means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Id. at 187*.

California courts are split on how to define "unfair" practices in consumer actions. *See Bardin v. Daimlerchrysler Corp., 136 Cal. App. 4th 1255, 1273-74, 39 Cal. Rptr. 3d 634 (2006)* (discussing the split between California Courts of Appeal); *Yanting Zhang v. Super. Ct., 57 Cal. 4th 364, 380 n. 9, 159 Cal. Rptr. 3d 672, 304 P.3d 163 (2013)* (acknowledging "[t]he standard for determining what business acts or practices are 'unfair' in consumer actions under the UCL is currently unsettled"). Some courts apply the *Cel-Tech* standard to consumer actions. *See Belton v. Comcast Cable Holdings, LLC, 151 Cal. App. 4th 1224, 1239-40, 60 Cal. Rptr. 3d 631 (2007)*. Other courts apply a balancing test in which the utility of the defendants' practices is weighed against the practices' impact on the plaintiff. *McKell, 142 Cal. App. 4th at 1473*. Finally, some courts apply a three-pronged test contained in the Federal Trade Commission Act, under which a business practice is "unfair" if (1) the consumer's injury is substantial; (2) the injury is not outweighed by any countervailing benefits of **[*29]** the practice to consumers or competition; and (3) the injury is such that consumers could not have reasonably avoided it. *Camacho v. Auto. Club of S. Cal., 142 Cal. App. 4th 1394, 1403-06, 48 Cal. Rptr. 3d 770 (2006)*.

In *Lozano v. AT&T Wireless Servs.., 504 F.3d 718, 736 (9th Cir. 2007)*, the Ninth Circuit endorsed the tethering test or the balancing test and declined "to apply the FTC standard in the absence of a clear holding from the California Supreme Court." *See also Ferrington v. McAfee, Inc., No. 10-cv-01455, 2010 U.S. Dist. LEXIS 106600, 2010 WL*

*3910169, at *12 (N.D. Cal. Oct. 5, 2010)* ("Pending resolution of this issue by the California Supreme Court, the Ninth Circuit has approved the use of either the balancing or the tethering tests in consumer actions, but has rejected the FTC test.") (citation omitted); *I.B. ex rel. Fife v. Facebook, Inc., 905 F.Supp.2d 989, 1010-11 (N.D. Cal. 2012)* (applying the tethering test).

There is disagreement between the parties as to whether Plaintiffs are "competitors" of TMI or whether they are "consumers." Defendants argue that Plaintiffs have failed to plead facts sufficient to support the contention that TMI is Plaintiffs' competitor, and also appear to take the stance that Plaintiffs are not consumers. (Mot. at pp. 16-17; Reply at p. 11.) Arguably, Plaintiffs fall under both categories. Plaintiffs allege that TMI and WWT are direct competitors and "instead of promoting Plaintiffs' business on Google, Defendants instead used Plaintiffs' payments to fund **[*30]** Defendants' own Google advertising campaigns." (FAC at ¶¶ 12, 26, 29, 34; Opp. at pp. 8-9.) Plaintiffs also allege they are consumers, in that Plaintiffs sought a service, and TMI agreed to provide that service in exchange for payment. (FAC at ¶¶ 15-16.)

To the extent Plaintiffs are pursuing their UCL claim under the unfair prong on the basis the parties are direct competitors, the Court finds that Plaintiffs have failed to sufficiently allege a cause of action, as Plaintiffs have not alleged that Defendants violated any legislatively declared policy, violated antitrust principles, or significantly threatened or harmed the competition. Plaintiffs' claim on the basis they are consumers fails on the same grounds if the Court applies the *Cel-Tech* test.

Under the balancing test, however, the question is whether the alleged business practice "is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers" and the court must "weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim." *Drum v. San Fernando Valley Bar Ass'n, 182 Cal. App. 4th 247, 257, 106 Cal. Rptr. 3d 46 (2010)* (citations omitted); *S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 886, 85 Cal. Rptr. 2d 301 (1999)*.

Here, Plaintiffs allege Defendants "systematically lied to Plaintiffs about the number of 'clicks' and keyword hits realized, thus grossly **[*31]** overcharging Plaintiffs for services, and charging for services never provided and results never obtained." (FAC at ¶ 21.) Plaintiffs further allege that Defendants switched from "per click" invoicing to keyword invoicing without Plaintiffs' knowledge or consent, and then began to invoice Plaintiffs for a large number of keywords that did not appear on Plaintiffs' original price list, and clicks that never occurred. (*See id*. at ¶¶ 18, 21, 23-25.) Plaintiffs also allege "[t]he redacted Google account records showed that Defendants diverted Plaintiffs' funds to their own Google advertising, billing Plaintiffs for Defendants' own Google keywords and clicks, thereby doubling, tripling or even quadrupling the charges Defendants invoiced to Plaintiffs taken by direct credit card charging." (*Id*. at ¶ 23.) Plaintiffs further allege they have been damaged in an amount exceeding $160,000. At this stage, these allegations are sufficient to state a claim that Plaintiffs have been harmed and Defendants' business practice is "immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers."[4] Thus, the Court finds Plaintiffs have sufficiently stated a claim under the UCL's unfair prong. **[*32]**

For the reasons discussed above, Defendants' motion to dismiss Plaintiffs' cause of action under *Section 17200, et seq*. is **GRANTED IN PART**, that is, to the extent Plaintiffs have alleged Defendants' acts constituted unlawful practices, with leave to amend, and **DENIED IN PART** to the extent Plaintiffs have alleged Defendants' acts constituted fraudulent or unfair practices.

4. Declaratory Relief for Accounting

In the FAC, Plaintiffs seek declaratory relief for accounting. (FAC at ¶¶ 53-56.) Defendants move to dismiss arguing that declaratory relief operates only prospectively, and thus Plaintiffs' claim is improper because it seeks to redress past wrongs. (Mot. at p. 14.) In their opposition, Plaintiffs argue that a cause of action for "declaratory relief for

[4] "[T]he determination [of] whether [a practice] is unfair is one of fact which requires a review of the evidence from both parties[,]" and is therefore a determination that cannot typically be made on a motion to dismiss. *See* *McKell, 49 Cal. Rptr. at 240*.

accounting" is appropriate under *California Code of Civil Procedure section 1060*. (Opp. at p. 6.) However, regardless of the use of the phrase "declaratory relief" in the title of the cause of action in the FAC, Plaintiffs clearly seek an accounting. In **[*33]** the FAC, they do not request a declaration of their rights or duties under the Contract. *See* *Cal. Civ. Proc. Code § 1060*; *Jolley v. Chase Home Fin., LLC, 213 Cal. App. 4th 872, 909, 153 Cal. Rptr. 3d 546 (2013)*; FAC at ¶¶ 53-56 & Prayer). Rather, they seek an accounting because "[t]he precise sum due . . . cannot be ascertained without an accounting." (FAC at ¶ 55).

"An accounting action 'is a proceeding in equity for the purpose of obtaining a judicial settlement of the accounts of the parties in which proceeding the court will adjudicate the amount due, administer full relief and render complete justice.'" *Flores v. EMC Mortg. Co., 997 F. Supp. 2d 1088, 1119-20 (E.D. Cal. 2014)* (quoting *Verdier v. Super. Ct. in & for City & Cnty. of San Francisco, 88 Cal. App. 2d 527, 531, 199 P.2d 325 (1948))*. "An accounting cause of action is equitable and may be sought where the accounts are so complicated that an ordinary legal action demanding a fixed sum is impracticable." *Id. at 1120* (citing *Civic W. Corp. v. Zila Indus., Inc., 66 Cal. App. 3d 1, 14, 135 Cal. Rptr. 915 (1977))*. "An accounting will not be accorded with respect to a sum that a plaintiff seeks to recover and alleges in his complaint to be a sum certain." *Id*. A right to an accounting is derivative and must be based on other claims. *Id*. (citing *Janis v. Cal. St. Lottery Comm'n, 68 Cal. App. 4th 824, 833-34, 80 Cal. Rptr. 2d 549 (1998))*.

"An accounting claim need only state facts showing the existence of the relationship which requires an accounting and the statement that some balance is due the plaintiff." *Flores, 997 F. Supp. 2d at 1120* (internal citations and quotations omitted). An action for accounting is appropriate where there is a **[*34]** fiduciary relationship or where "the accounts are so complicated that an ordinary legal action demanding a fixed sum is impracticable." *Civic. W. Corp., 66 Cal. App. 3d at 14*; *Glue-Fold, Inc. v. Slautterback Corp., 82 Cal. App. 4th 1018, 1023 n. 3, 98 Cal. Rptr. 2d 661 (2000)*; *Jolley, 213 Cal. App. 4th at 910*.

Here, there is no suggestion the parties are fiduciaries; they are simply two parties to a contract. A mere contract or debt does not create a fiduciary relationship. *Id*. at 33-34 (citing *Waverly Prods., Inc. v. RKO Gen., Inc., 217 Cal. App. 2d 721, 32 Cal. Rptr. 73, (1963))*. Plaintiffs do allege the "complex nature of Google advertising and accounting" and assert that "[t]he precise sum due from cannot be ascertained without an accounting of the true and complete documentation regarding the purported billing basis including but not limited to invoices, reports, statistics substantiating the sums charged to Plaintiffs." (FAC at ¶¶ 36, 55.) However, a "suit for an accounting will not lie where it appears from the complaint that none is necessary or that there is an adequate remedy at law." *Flores, 997 F. Supp. 2d at 1120*. Here, there is nothing to suggest that the accounting is so complicated that Plaintiffs cannot ascertain the true sum owed through discovery in this action. *See* *Cnty of Santa Clara v. Astra USA, Inc., No. C-05-03740, 2006 U.S. Dist. LEXIS 57176, 2006 WL 2193343, at *6 (N.D. Cal. July 28, 2006)*. Accordingly, the Court finds that Plaintiffs have failed to allege a cause of action for accounting and Defendants' motion to dismiss Plaintiffs' **[*35]** cause of action for accounting is **GRANTED** with leave to amend.

IV. CONCLUSION

For the foregoing reasons, Defendants' motion to dismiss the FAC is **GRANTED IN PART** with leave to amend and **DENIED IN PART** (ECF No. 40). If Plaintiffs choose to file a Second Amended Complaint, they must do so no later than March 30, 2015.

IT IS SO ORDERED.

DATED: March 9, 2015

Opinion

OPINION AND ORDER

The parties, who are competitors, make and sell sofas. This case involves, *inter alia*, Defendant's **[*3]** use, in its own advertising, of Plaintiff's trademarks and copyrighted photographic images of Plaintiff's sofas. Plaintiff asserts claims for trademark infringement, and false advertising under federal law, as well as a state law claim for false advertising. Am. Compl., ECF No. 58. Defendant filed an amended counterclaim that includes claims for unfair competition under Ohio common law, violation of the *Ohio Deceptive Trade Practices Act ("ODTPA")*, and false advertising under the federal *Lanham Act*. Am. Counterclaim, ECF No. 72. Plaintiff moves to dismiss Defendant's amended counterclaim. ECF No. 118. For the following reasons, the Court grants Plaintiff's motion to dismiss.

I. BACKGROUND

Plaintiff Ashley Furniture Industries, Inc. ("Ashley") sells its furniture through 400 of its own retail stores in addition to 6,000 independent retailers in the United States. Defendant American Signature, Inc., dba Value City Furniture ("Value City") operates 128 retail furniture stores in which it sells other companies' furniture. Defendant Value City sold Ashley furniture in the past but no longer does so.

In 2010 and 2011, Value City obtained the copyrighted images of Ashley's furniture from Ashley's **[*4]** website. Value City then used those photographs in its own advertisements. Some of the advertisements contained one of Ashley's copyrighted photographs alongside a photograph of a purportedly comparable item of furniture that Value City sells in its own stores. This is referred to as "comparative advertising." Value City displayed the comparative advertisements on websites, in newspapers, and in store handouts. It also emailed the advertisements to potential customers.

In 2010, Ashley brought a lawsuit against Value City based on the above factual allegations in federal district court in Chicago, Illinois. In the Chicago action, Ashley asserted claims against Value City for false advertising, unfair competition, and trademark infringement under the Lanham Act as well as analogous state law. The case was drawn by Senior Judge Milton I. Shader. Judge Shader expressed scepticism about Ashley's claims in his orders and on the record during a conference and a hearing. Those expressions never ripened to a final decision on the merits, however, and Ashley dismissed the Chicago action without prejudice.

Ashley filed the present action in May 2011. The original complaint set forth a single claim **[*5]** for copyright infringement. Compl., ECF No. 1. Less than one month later, and prior to discovery, Value City responded to the complaint by filing a motion for summary judgment. ECF No. 17. Ashley moved to defer ruling on Value City's summary judgment motion under *Federal Rule of Civil Procedure 56(d)*. ECF No. 29. The Magistrate Judge granted that motion and ordered discovery to proceed. ECF No. 36. After discovery was complete, Value City reified its motion for summary judgment. ECF No. 87. In June 2014, the Court issued an Opinion and Order granting Value City's motion for summary judgment on Ashley's federal copyright claim. ECF No. 121. Although the Court ruled in Value City's favor, Ashley's copyright claim was at the very least colorable.

Value City brings a counterclaim against Ashley alleging claims for: (1) unfair competition under Ohio common law; (2) violations of the ODTPA; and (3) false advertising in violation of *15 U.S.C. § 1125(a)*.

In Count One of its counterclaim, Value City asserts that Ashley has engaged in unfair competition in violation of Ohio common law. Count One relates to Ashley's attempts to litigate its claims against Value City. Value City alleges that Ashley engaged in unfair competition by filing a lawsuit against **[*6]** Value City in August 2010 in the United States District Court for the Northern District of Illinois, Chicago, by arguing in the present lawsuit that it needed discovery to respond to Value City's motion for summary judgment on Ashley's copyright claim, and by filing the instant lawsuit when Ashley knew its claims were baseless. In large part, the allegations supporting this claim consist of accusations that Ashley made misrepresentations to this Court.

Value City also brings claims for alleged violations of the ODTPA and the Lanham Act. Specifically, Value City asserts that advertisements for Ashley's furniture contain false and misleading information about the prices for that furniture. Value City provides seven examples of purportedly false advertisements. Amend. Counterclaim, ¶¶ 93-99, ECF No. 72. All of the examples involve items of furniture offered at a "sale" price along with one or more higher prices for comparison. In several of the examples, the item of furniture was featured several months later in one or more advertisements with different "regular" and "compare" prices. In addition, Ashley's advertisements included "one day" sales and "limited quantity" sales, but the items **[*7]** in those sales were offered on multiple occasions. Several advertisements also contain a statement that the items were discounted by a specific amount or percentage, but the advertisements do not identify the nature of the higher price, such as whether the higher price was Ashley's regular price or a competitor's price. Value City alleges, "upon information and belief," that the "sale" prices in the advertisements are in reality Ashley's regular prices, and the "regular" prices are artificially inflated prices created for the purpose of claiming a discounted price in the advertisements.

Ashley moves to dismiss Value City's counterclaims for failure to state a claim. ECF No. 118.

II. MOTION TO DISMISS

A claim survives a motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)* if it "contain[s] sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* A complaint's "[f]actual allegations must be enough to raise a right to relief above the speculative level, on the assumption that all of the complaint's allegations **[*8]** are true." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555-56, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (internal citations omitted).

A court must also "construe the complaint in the light most favorable to the plaintiff." *Inge v. Rock Fin. Corp., 281 F.3d 613, 619 (6th Cir. 2002)*. In doing so, however, a plaintiff must provide "more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555*; *see also* *Iqbal, 556 U.S. at 678* ("Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice."); *Ass'n of Cleveland Fire Fighters v. City of Cleveland, Ohio, 502 F.3d 545, 548 (6th Cir. 2007)*. "[A] naked assertion . . . gets the complaint close to stating a claim, but without some further factual enhancement it stops short of the line between possibility and plausibility . . . ." *Twombly, 550 U.S. at 557*. Thus, "something beyond the mere possibility of [relief] must be alleged, lest a plaintiff with a largely groundless claim be allowed to take up the time of a number of other people, with the right to do so representing an *in terrorem* increment of the settlement value." *Id. at 557-58* (internal citations omitted).

III. DISCUSSION

A. Ohio Common Law Unfair Competition

Value City asserts that Ashley engaged in unfair competition in violation of Ohio common law by filing the prior lawsuit against Value City in Chicago, by seeking discovery to respond to Value City's motion for summary judgment, **[*9]** and by filing the present lawsuit. The allegations supporting these claims consist of remarks made by the district judge in the prior action and alleged misrepresentations Ashley made to the Court in the course of the present litigation.

Ashley contends Value City's unfair competition claim fails because Value City fails to plausibly plead that Ashley's initiation of litigation was objectively baseless. It further argues that Value City's counterclaim is barred by the *Noerr Pennington* doctrine, which provides immunity against claims that might chill exercise of the First Amendment right to seek redress of grievances through litigation. In addition, Ashley argues Value City's state law claim based on Ashley's conduct in federal court is preempted by federal law.

Value City maintains that it has plausibly pleaded that Ashley's legal actions were objectively baseless. In addition, it contends that the *Noerr-Penntington* defense cannot be determined on the pleadings. Value City also argues federal law does not preempt its unfair competition claim.

"Ohio common law recognizes a claim for unfair competition based on malicious litigation." All Metal Sales, Inc. v. All Metal Source, LLC, No. 1:10-cv-2343, 2011 U.S. Dist. LEXIS 25019, 2011 WL 867020, at *2 (N.D. Ohio Mar. 11, 2011) (citing **[*10]** Water Mgmt. Inc. v. Stayanci, 15 Ohio St. 3d 83, 15 Ohio B. 186, 472 N.E.2d 715, 715 (Ohio 1984); Microsoft Corp. v. Action Software, 136 F. Supp. 2d 735, 740 (N.D. Ohio 2001)). "Unfair competition may include 'unfair commercial practices such as malicious litigation, circulation of false rumors, or publication of statements, all designed to harm the business of another.'" Hua-Cheng Pan v. Kohl's Dept. Stores, Inc., No. 2:12-cv-1063, 2013 U.S. Dist. LEXIS 130616, 2013 WL 5181144, at *8 (S.D. Ohio Sept. 12, 2013) (quoting Water Mgmt., 15 Ohio St. 3d at 85). "To successfully establish an unfair competition claim based upon legal action, a party must show that the legal action is objectively baseless and that the opposing party had the subjective intent to injure the party's ability to be competitive." Am. Chem. Soc. v. Leadscope, Inc., 133 Ohio St. 3d 366, 367, 2012- Ohio 4193, 978 N.E.2d 832 (2012) (syllabus ¶ 1). Thus, in order to succeed on its unfair competition claim, Value City must plausibly plead (1) that Ashley engaged in litigation against Value City that was objectively baseless, and (2) that Ashley did so with the subjective intent to injure Value City's ability to compete. *Id.*

Ashley also seeks dismissal based on *Noerr-Pennington* immunity.

> Under the Petition Clause of the First Amendment to the U.S. Constitution, private actors have the right to petition the government for action. U.S. Const. amend. I ("Congress shall make no law . . . abridging . . . the right of the people . . . to petition the Government for a redress of grievances."). Where private actors petition the government for action that would violate ***antitrust law***, the **[*11]** Petition Clause immunizes the actors from litigation in connection with their petitioning. Under these circumstances, private immunization from alleged violations of the Sherman Act is known as the *Noerr-Pennington* doctrine.

VIBO Corp., Inc. v. Conway, 669 F.3d 675, 683-84 (6th Cir. 2012). "Although the *Noerr-Pennington* doctrine was initially recognized in the antitrust field, the federal courts have by analogy applied it to claims brought under both state and federal laws, including common law claims of tortious interference." Campbell v. PMI Food Equip. Gp., Inc., 509 F.3d 776, 790 (6th Cir. 2007). Value City does not dispute that *Noerr-Pennington* applies to its Ohio common law claim for unfair competition.

The *Noerr-Pennington* immunity doctrine contains a narrow exception insofar as the immunity does not apply to sham lawsuits filed for the purpose of interfering with competition. Static Control Components, Inc. v. Lexmark Intern., Inc., 697 F.3d 387, 408 (6th Cir. 2012). To constitute sham litigation,

> [f]irst, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is immunized under *Noerr*, and an antitrust claim premised on the sham exception must fail. Only if challenged litigation is objectively meritless may a court examine **[*12]** the litigant's subjective motivation. Under this second part of our definition of sham, the court should focus on whether the baseless lawsuit conceals "an attempt to interfere directly with the business relationships of a competitor," through the

"use [of] the governmental process—as opposed to the outcome of that process—as an anti competitive weapon."

Prof'l Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 60-61, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993) (quoting Noerr, 365 U.S. at 144; City of Columbia v. Omni Outdoor Advertising, Inc., 499 U.S. 365, 380, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)).

An Ohio common law claim of unfair competition based on the filing of a sham lawsuit requires the party advancing the claim to plausibly plead that the lawsuit was objectively baseless. Leadscope, Inc., 133 Ohio St. 3d at 367. Similarly, a claimant must show the lawsuit against it was objectively baseless in order to defeat *Noerr-Pennington* immunity under the sham litigation exception to that doctrine. Prof'l Real Estate Investors, 508 U.S. at 60-61. Hence, in this case, the Court must examine whether Value City has adequately pleaded Ashley's lawsuits are objectively baseless in connection with both grounds for dismissal.

The Court agrees with Ashley that Value City has failed to plausibly plead that the two lawsuits Ashley filed against Value City were objectively baseless. First, the Court rejects Value City's suggestion that *Noerr-Pennington* immunity can never be addressed at the pleading stage. Courts **[*13]** in the Sixth Circuit have routinely dismissed claims under the *Noerr-Pennington* doctrine for failure to adequately plead the sham litigation exception. *See* Agema v. City of Allegan, No. 1:12-cv-417, 2014 U.S. Dist. LEXIS 7570, 2014 WL 249374 (W.D. Mich. Jan. 22, 2014); GMA Cover Corp. v. Saab Barracuda LLC, No. 4:10-CV-12060, 2012 U.S. Dist. LEXIS 25543, 2012 WL 642739 (E.D. Mich. Feb. 08, 2012); New Day Farms, LLC v. Board of Trustees of York Tp., Ohio, No. 2:08-cv-01107, 2009 U.S. Dist. LEXIS 107790, 2009 WL 4016480 (S.D. Ohio Nov. 17, 2009); MSC.Software Corp. v. Altair Engineering, Inc., No. 07-12807, 2009 U.S. Dist. LEXIS 82298, 2009 WL 2923075 (E.D. Mich. Sept. 10, 2009).

In support of its argument that *Noerr-Pennington* immunity cannot be addressed on a motion to dismiss, Value City relies primarily on a single decision by another branch of this Court. The Scooter Store, Inc. v. Spinlife.Com, LLC, 777 F. Supp. 2d 1102, 1115 (S.D. Ohio 2011) ("[W]hether a party's conduct is a genuine attempt to avail itself of the judicial process or is merely a sham is a question of fact that is inappropriate for a motion to dismiss."). Nonetheless, the decision *The Scooter Store* cites for that proposition examined the sham exception in the context of summary judgment. Clipper Exxpress v. Rocky Mountain Motor Tariff Bureau, Inc., 690 F.2d 1240, 1252-53 (9th Cir. 1982). Indeed, in *Clipper Exxpress*, the party asserting the sham exception had sufficiently demonstrated the protest at issue was baseless, and the intent of the party asserting immunity was "assumed." *Id.* The court indicated that whether protest was genuinely intended to influence the government is a question of fact. Id. at 1253. Thus, the question of fact in *Clipper* ***[*14]*** *Exxpress* concerned the subjective *intent* prong of the sham exception. In contrast, whether a lawsuit is objectively baseless may be decided as a question of law. Regional Multiple Listing Serv. of Minnesota, Inc. v. Am. Home Realty Network, Inc., 960 F. Supp. 2d 958, 979 (D. Minn. 2013). Therefore, the reluctance to grant the motion to dismiss in The Scooter Store likely pertained to the subjective intent element of the sham litigation exception. Here, in contrast, the Court's inquiry is focused on whether Ashley's lawsuits were objectively baseless.

Value City also makes much of the fact that Ashley's attorneys, representing a different client, opposed the dismissal of the claim in *The Scooter Store* by successfully arguing that the sham exception to *Noerr-Pennington* could not be determined in that case on the pleadings. That fact has no legal significance whatsoever to the present lawsuit. This is not a case where judicial estoppel or similar legal principle applies to Ashley's *Noerr-Pennington* defense. Irony, if it can even be called that, is not a ground for denying a Rule 12(b)(6) motion.

The Court finds Value City has not plausibly pleaded that Ashley's lawsuits were objectively baseless. Rather than attempt to plead facts showing that Ashley's lawsuits were objectively baseless, Value City focuses on comments made **[*15]** by Judge Shader in the Chicago lawsuit and alleged misrepresentations Ashley has made to this Court.

Indeed, the first several pages of Ashley's counterclaim are devoted to Judge Shader's expressions of doubt about the merits of Ashley's copyright claim. Value City goes so far as to represent that Judge Shader "held" that Ashley's claim had no merit. Amend. Counterclaim ¶ 18, ECF No. 72. Not so. Judge Shader never "held" Ashley's claim lacked merit. At most, Judge Shader expressed skepticism but never reached the merits of Ashley's claim. Judge Shader's incredulity simply does not remotely give rise to a plausible inference that Ashley's lawsuit was objectively baseless. Moreover, even if Judge Shader had reached the merits, an adverse ruling does not establish that a claim is objectively baseless. *Prof'l Real Estate Investors, 508 U.S. at 60*.

Value City's counterclaim goes on to aver that Ashley deceived this Court in connection with discovery. Even assuming that is true, it falls far short of giving rise to an inference that the present lawsuit was objectively baseless. Value City cites no authority for the proposition that discovery abuses are actionable through an Ohio common law claim for unfair competition. Further, for **[*16]** purposes of demonstrating the sham exception to *Noerr-Pennington* immunity, Value City must show that the *entire* lawsuit was baseless, not merely one claim or action. *MSC.Software, 2009 U.S. Dist. LEXIS 82298, 2009 WL 2923075, at *1-2*. Value City does not even attempt to plead that Ashley's lawsuits were objectively baseless in their entirety.

The remainder of Value City's unfair competition claim focuses on Ashley's alleged deceptive representations made in connection with its motion for leave to amend, including Ashley's representation that discovery provided the bases for new claims. Value City also alleges that a consumer survey Ashley conducted was flawed, and that Ashley misrepresented to the Court that the survey could not have been undertaken earlier. These purported misrepresentations, while potentially sanctionable, do not give rise to a plausible inference that the present lawsuit is objectively baseless in its entirety. *See id.*

In short, Value City utterly fails to plausibly plead that the lawsuits Ashley filed against it were objectively baseless. For that reason, Ashley is entitled to dismissal of Value City's Ohio common law claim for unfair competition.

In the alternative, the Court holds that federal law preempts Value City's common law **[*17]** unfair competition counterclaim. Value City's unfair competition counterclaim consists largely of Ashley's alleged misrepresentations to this Court. *Federal Rule of Civil Procedure 11* expressly governs the kind of representations Ashley made to the Court and provides for sanctions in the case of misrepresentations concerning claims or defenses. *Fed. R. Civ. P. 11(b)(2)*. *Rule 11* also contains a safe harbor provision that allows a litigant to withdraw a representation within twenty-one days. *Fed. R. Civ. P. 11(c)(1)(A)*. Ohio common law unfair competition does not contain such a safe harbor provision. It therefore directly conflicts with federal law and is preempted. *First Bank of Marietta v. Hartford Underwriters Ins. Co., 307 F.3d 501, 529-30 (6th Cir. 2002)*. For this additional reason, the Court dismisses Value City's Ohio common law claim for unfair competition based on Ashley's conduct in federal court.

B. Ohio Deceptive Trade Practices Act and Lanham Act

Value City also brings claims under the ODTPA and Lanham Act for alleged false advertising. Value City maintains that Ashley's advertisements contained false and misleading representations about the prices of Ashley's furniture.

Ashley argues that Value City has failed to plead facts to support a plausible inference that any of the advertisements featuring Ashley's furniture were literally false or misleading. In **[*18]** addition, Ashley argues ASI failed to plausibly plead the essential elements of a false advertising claim.

The ODTPA states in relevant part:

> A person engages in a deceptive trade practice when, in the course of the person's business, vocation, or occupation, the person does any of the following:
>
> . . .
>
> Makes false statements of fact concerning the reasons for, existence of, or amounts of price reductions; . . . .

Ohio Revised Code § 4165.02(A)(12).

Ashley also asserts a claim under the Lanham Act, which states:

> Any person who, on or in connection with any goods or services, or any container for goods, uses in commerce any word, term, name, symbol, or device, or any combination thereof, or any false designation of origin, false or misleading description of fact, or false or misleading representation of fact, which—
>
> . . .
>
> in commercial advertising or promotion, misrepresents the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities, . . .
>
> shall be liable in a civil action by any person who believes that he or she is or is likely to be damaged by such act.

15 U.S.C. §1125(a).

A claim under the ODTPA is treated the same as a claim for false advertising under the Lanham Act. **[*19]** *Stilson & Associates, Inc. v. Stilson Consulting Grp., LLC, 129 F. App'x 993, 994 (6th Cir. 2005)* ("The standard applicable to Lanham Act claims governs Plaintiffs' . . . claims under the Ohio Deceptive Trade Practices Act . . . .") (internal citations omitted). Under either statute, to prevail a plaintiff must prove: (1) the defendant made false or misleading statements of fact concerning either its own or another's product; (2) the statements actually or tend to deceive a substantial portion of the intended audience; (3) the statements are material in that they will likely influence the deceived consumer's purchasing decisions; (4) the advertisements were introduced into interstate commerce; (5) there is some causal link between the challenged statements and harm to the plaintiff. *Am. Council of Certified Podiatric Physicians and Surgeons v. Am. Bd. of Podiatric Surgery, Inc., 185 F.3d 606, 613 (6th Cir. 1999)*.

Value City provides seven examples of purportedly false advertisements that appeared in central Ohio newspapers. Amend. Counterclaim ¶¶ 93-99, ECF No. 72. The examples describe advertisements for furniture offered at a "sale" price with one or more higher prices for the consumer to compare. Value City alleges that the same items of furniture were depicted in later advertisements with different "regular" and "compare" prices, and that those prices were sometimes higher or lower than the "regular" and **[*20]** "compare" prices stated in earlier advertisements.[1] Other advertisements contained a statement that the item was discounted by a specific amount or percentage, but those advertisements did not indicate the nature of the higher comparison price, such as whether the higher price was Ashley's regular price or a competitor's price.[2] In addition, some advertisements offered the same item for sale on a "one day only" or "limited quantity" basis on multiple occasions. Furthermore, Value City asserts, "upon

---

[1] Paragraph 93 of Value City's Amended Counterclaim states:

> For example, the Ashley Counterclaim Defendants caused, approved, permitted, authorized, and/or ratified placement of an advertisement in November 2011 that offered for sale a particular sofa combined with a "free loveseat with purchase of sofa" for a total price of $397 and represented that the "compare" price was $1,159.98. The advertisement represented that the offer was for "1 DAY — FRIDAY ONLY" and that there were "ONLY 100 SETS TO SELL" and "limit **[*21]** 1 per household." In January 2012, the Ashley Counterclaim Defendants caused, approved, permitted, authorized, and/or ratified placement of an advertisement offering for sale the same sofa with the same "free loveseat with purchase of sofa" for the same price of $397 and represented that there was a "LIMITED QUANTITY" and that the "compare" price was $1,959.98 — or $800 higher than the previous "compare" price.

Amend. Counterclaim ¶ 93, ECF No. 72.

[2] Paragraph 94 of Value City's Amended Counterclaim states:

> As another example, over a time period extending at least from June 2010 through January 2012, the Ashley Counterclaim Defendants caused, approved, permitted, authorized, and/or ratified placement of numerous advertisements offering for sale a particular sofa at offering prices of $399, $398, or $388, depending on the advertisement, and making various additional representations, stating in some advertisements that the "compare" price for the item was $899.99 while in other advertisements that the "compare" price was $999.99. During this time frame and depending on the advertisement, the purported "compare" price seesawed between $899.99 and $999.99. One advertisement placed in June 2010 offered this sofa for $398 and stated "Save $132," without identifying the nature of the price **[*22]** that was $132 higher, such as whether it referred to a former Ashley price or another retailer's price.

Amend. Counterclaim ¶ 94, ECF No. 72.

information and belief," that the "sale" prices in the advertisements are in reality the regular prices, and the "regular" prices are artificially inflated prices created for the purpose of claiming a discounted price in the advertisements. *Id.* ¶ 100.

Ashley contends that the above factual allegations are insufficient and at most give rise to a mere possibility that Ashley's advertisements are literally false. It argues that Value City's ODTPA and Lanham Act false advertising claims therefore fail to meet the pleading standard established by *Twombly* and *Iqbal* and must be dismissed.

Value City maintains that it has plausibly pleaded its false advertising claims. It contends that

> It is reasonable to infer, for example, that serial offers of a "one day only" "limited quantity" sale on the same item are false and deceiving. It is reasonable to infer that "compare" prices that yo-yo up and down are not actual prices of comparable items at a competing retailer. It is also reasonable to infer that a "compare" price that suddenly zooms up by $800 is not based on bona fide sales of a comparable item at a competing retailer.

Mem. Opposition 18-19, ECF No. 119.

The Court finds that Value City has failed to plausibly plead a claim for false advertising based on literal falseness. Ashley is correct that Value City's allegations give rise to an **[*23]** inference that Ashley *possibly* engaged in false advertising, but the claim falls short of meeting the plausibility standard. First, Value City's core argument is that prices in the advertisements changed over time. But there are myriad possible explanations for price changes that do not involve false advertising. Businesses routinely adjust the prices of their products. The same is true of the allegedly successive one-day and limited quantity sales. Supplies might be limited at one point in time but not at a later date. Consequently, Value City's allegations do no more than raise a suspicion that Ashley engaged in false advertising.

Ashley's failure to identify the nature of the comparison price renders the advertisements ambiguous in that respect. If a consumer does not understand the nature of the higher comparison price, it follows the representation of that price is ambiguous. Similarly, the meaning and significance of "one-day" and "limited quantity" are ambiguous. The meaning of those terms is unclear. Does "one day" mean never again or not for a long time or just that the sale lasts one day? Does "limited quantity" mean limited temporarily or forever? As such, Ashley's alleged **[*24]** failure to identify the nature of the comparison price and its advertisements of successive one-day or limited quantity sales do not plausibly meet the standard for literal falsehood. *See* *Innovation Ventures, LLC v. N.V.E, Inc., 694 F.3d 723, 737 (6th Cir. 2012)* (only an unambiguous message can be literally false). When a claimant shows literal falsity, it is entitled to a presumption that the representation was material. *Id.* If the representation is ambiguous, however, the materiality element must be satisfied. *Id.*

One of the alleged misrepresentations could constitute literal falsity: the representation that Ashley's advertised prices are sales prices when in fact they are its regular prices. And the Court agrees with Value City that allegations based upon "information and belief' do not necessarily fail the *Twombly/Iqbal* standard. Nonetheless, in this instance, Value City's bald assertion that Ashley's sale prices are actually its regular prices is conclusory and speculative. Value City's counterclaim does not include any additional factual assertions that would indicate this particular allegation is plausible.

Furthermore, the Court rejects Value City's suggestion that additional facts are not required because the evidence that might support its allegations **[*25]** is uniquely in the possession of Ashley. Since *Iqbal*, the Sixth Circuit Court of Appeals has flatly rejected the notion that insufficient pleading may be excused because the specific facts are solely in the possession of the defendant. *New Albany Tractor, Inc. v. Louisville Tractor, Inc., 650 F.3d 1046, 1051 (6th Cir. 2011)* (rejecting argument that complaint should not have been dismissed as deficient because pricing information was solely in possession of the defendant). In sum, Value City has failed to plead a plausible claim of false advertising based on literal falsity.

Ashley also contends that Value City has failed to plead all of the elements of its ODTPA and Lanham Act false advertising claims with respect to the representations that are not literally false. Specifically, Ashley argues that Value City has failed to plausibly plead facts to support the essential element of materiality, i.e., that the purportedly false advertisements were material and influenced consumers' purchasing decisions. Moreover, Ashley contends

Value City has not pleaded a causal link between the alleged false statements and any harm suffered by Value City.

Value City maintains that because Ashley's advertisements were literally false, Value City is not required to plead materiality, that **[*26]** the advertisements deceived consumers, or a causal connection between the allegedly false statements and injury to Value City. The Court, however, has found that Value City has failed to plausibly plead literal falsity. The one category of representations about price that could arguably be literally false is pleaded in an entirely conclusory fashion. The remaining representations are not literally false.

Consequently, Value City was required to plead facts to plausibly support the other elements of its false advertising claims. *Aquashield, Inc. v. Sonitec Vortisand, Inc., No. 1:13-cv-119, 2013 U.S. Dist. LEXIS 143611, 2013 WL 5524598, at *7 (E.D. Tenn. Oct. 4, 2013)* (Lanham Act plaintiff must plausibly plead elements of consumer deception and materiality although it need not plead specific dates of advertisements).

Value City suggests that Ashley improperly seeks to require Value City to plead "magic words" or satisfy a heightened pleading requirement. Value City's suggestion mischaracterizes Ashley's argument. Rather, Ashley argues that Value City has failed to plausibly plead essential elements of its false advertising claim. Although Value City appears to deny that pleading requirement, it is in fact well-established. "To state a valid claim, a complaint must **[*27]** contain either direct or inferential allegations respecting *all the material elements* to sustain recovery under some viable legal theory." *League of United Latin Am. Citizens v. Bredesen, 500 F.3d 523, 527 (6th Cir. 2007)* (emphasis added) (citing *Twombly, 550 U.S. at 562*).

Here, Value City makes no effort to plausibly plead the essential element of materiality in connection with the representations in the advertisements that were not literally false. It likewise fails to plead any facts to plausibly support an inference of a causal link between Ashley's advertisements and an injury to Value City. Its false advertising claims therefore fail.

In sum, Value City's conclusory allegation is insufficient to support a false advertising claim based on literal falsity. In addition, Value City's failure to plead any facts supporting the essential elements of materiality and causality preclude a false advertising claim based on statements in Ashley's advertisements that are not literally false. Ashley is therefore entitled to dismissal of Value City's false advertising claims.

IV. DISPOSITION

For the above reasons, the Court **GRANTS** Ashley's motion to dismiss Value City's amended counterclaim. The Court **DISMISSES** Value City's counterclaim in its entirety **WITH PREJUDICE**.

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Complaints, Requirements for Complaint**

Fed. R. Civ. P. 8(a) requires that a pleading contain a short and plain statement of the claim showing that the pleader is entitled to relief. Under notice pleading in federal court, a complaint must give the defendant fair notice of what the claim is and the grounds upon which it rests. This simplified notice pleading standard relies on liberal discovery rules and summary judgment motions to define disputed facts and issues and to dispose of unmeritorious claims.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

On a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, the factual allegations of a complaint must be accepted as true. A court is bound to give plaintiff the benefit of every reasonable inference to be drawn from the well-pleaded allegations of the complaint. A plaintiff need not allege specific facts beyond those necessary to state his claim and the grounds showing entitlement to relief. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Nevertheless, a court need not assume the truth of legal conclusions cast in the form of factual allegations. While *Fed. R. Civ. P. 8(a)* does not require detailed factual allegations, it demands more than an unadorned, the defendant-unlawfully-harmed-me accusation. A pleading is insufficient if it offers mere labels and conclusions or a formulaic recitation of the elements of a cause of action. Moreover, it is inappropriate to assume that the plaintiff can prove facts that it has not alleged or that the defendants have violated the laws in ways that have not been alleged.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Motions to Dismiss, Failure to State Claim**

A court may not dismiss a complaint in which the plaintiff has alleged enough facts to state a claim to relief that is plausible on its face. Only where a plaintiff fails to nudge his or her claims across the line from conceivable to plausible is the complaint properly dismissed. While the plausibility requirement is not akin to a probability requirement, it demands more than a sheer possibility that a defendant has acted unlawfully. This plausibility inquiry is a context-specific task that requires the reviewing court to draw on its judicial experience and common sense.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Judicial Notice > Adjudicative Facts

HN4[] **Motions to Dismiss, Failure to State Claim**

In ruling upon a motion to dismiss, a court may consider only the complaint, any exhibits thereto, and matters which may be judicially noticed pursuant to *Fed. R. Evid. 201*.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN5[] **Amendment of Pleadings, Leave of Court**

If a complaint fails to state a plausible claim, a district court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts. Although a district court should freely give leave to amend when justice so requires under *Fed. R. Civ. P. 15(a)(2)*, the court's discretion to deny such leave is particularly broad where the plaintiff has previously amended its complaint.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN6[] **Intentional Interference, Elements**

The elements for a claim of interference with a prospective economic advantage under California law are as follows: (1) an economic relationship between the plaintiff and some third party, with the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) intentional acts on the part of the defendant designed to disrupt the relationship; (4) actual disruption of the relationship; and (5) economic harm to the plaintiff proximately caused by the acts of the defendant.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN7[] **Intentional Interference, Elements**

In order to establish intentional interference with a prospective economic advantage based upon a contract, a party is required to: (1) set out the written contract in verbatim in the complaint; (2) attach the contract as an exhibit; or (3) plead in full in accordance with the contract's legal effect.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN8[] **Intentional Interference, Elements**

Interference with a prospective economic advantage, a tort that similarly compensates for the loss of an advantageous economic relationship, does not require the existence of a legally binding contract.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN9[] **Intentional Interference, Elements**

A party cannot maintain a claim for intentional interference with a prospective economic advantage where the existing relationship is speculative.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN10[] **Intentional Interference, Elements**

With respect to a claim for intentional interference with a prospective economic advantage, a defendant's tortious conduct must interfere with a specific existing relationship, not simply with the formation of one in the future.

Evidence > Burdens of Proof > Allocation

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Evidence > Inferences & Presumptions > Inferences

HN11[] **Burdens of Proof, Allocation**

With respect to a claim for intentional interference with a prospective economic advantage, a plaintiff has the burden of proving that there was the probability of economic benefit with a third party. The law precludes recovery for overly speculative expectancies by initially requiring proof the business relationship contained the probability of future economic benefit to the plaintiff. Although it is necessary to infer that there would have been some benefit to the plaintiff but for defendant's interference, the chance the expectancy otherwise would have occurred is necessarily a matter of some uncertainty.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN12[] Intentional Interference, Elements

The act of interference with prospective economic advantage is not tortious in and of itself. To state a claim for intentional interference under California law, a plaintiff must allege that the defendant engaged in an independently wrongful act that is wrongful by some legal measure other than the act of interference itself. This is understood as an act proscribed by some constitutional, statutory, regulatory, common law, or other determinable legal standard.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN13[] Intentional Interference, Elements

An act of interference with prospective economic advantage must be wrongful by some legal measure, rather than merely a product of an improper, but lawful, purpose or motive.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN14[] Intentional Interference, Elements

The tort of intentional interference with prospective economic advantage is not intended to punish individuals or commercial entities for their choice of commercial relationships or their pursuit of commercial objectives, unless their interference amounts to independently actionable conduct. Interference based on lawful competition is not actionable.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN15[] State Regulation, Claims

California's Unfair Competition Law (UCL) prohibits any unlawful, unfair or fraudulent business act. *Cal. Bus. & Prof. Code § 17200*. To bring a UCL claim, a plaintiff must show either an (1) unlawful, unfair, or fraudulent business act or practice, or (2) unfair, deceptive, untrue or misleading advertising. A practice is prohibited as unfair or deceptive even if not unlawful or vice versa.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN16[] State Regulation, Claims

By proscribing "any unlawful" business practice, *Cal. Bus. & Prof. Code § 17200* borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable. A violation of another law is a predicate for stating a cause of action under the unlawful prong of the Unfair Competition Law (UCL). Where a plaintiff cannot state a claim under the "borrowed" law, it cannot state a UCL claim either.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN17[] State Regulation, Claims

A defendant is not liable under *Cal. Bus. & Prof. Code § 17200* for committing unlawful business practices without having violated another law.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN18[] **Heightened Pleading Requirements, Fraud Claims**

Under *Fed. R. Civ. P. 9(b)*, a plaintiff pleading a claim of fraud, or any claim that is grounded in fraud must state with particularity the circumstances constituting fraud or mistake. That is, the plaintiff must set forth with particularity the who, what, when, where, and how of the misconduct charged. The plaintiff must also allege the misrepresentations themselves with particularity. A pleading is sufficient under *Rule 9(b)* if it identifies the circumstances constituting fraud so that a defendant can prepare an adequate answer from the allegations.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN19[] **Trade Practices & Unfair Competition, State Regulation**

When a plaintiff who claims to have suffered injury from a direct competitor's "unfair" act or practice invokes *Cal. Bus. & Prof. Code § 17200*, the word "unfair" in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Torts > ... > Commercial Interference > Employment Relationships > Elements

HN20[] **Employment Relationships, Elements**

A cause of action for interference with the right to practice a profession exists when the right to pursue a lawful business, calling, trade, or occupation is intentionally interfered with either by unlawful means or by means otherwise lawful when there is a lack of sufficient justification. A cause of action for intentional interference with the right to practice one's profession requires intentional and malicious acts designed to prevent the plaintiff from practicing her profession. There must be a complete prohibition on the right to practice a profession to allege interference with the right to practice a profession.

Torts > ... > Commercial Interference > Employment Relationships > Elements

HN21[] **Employment Relationships, Elements**

In order to successfully claim interference with the right to practice a profession there must be a complete prohibition on the right to practice a profession.

Opinion

[*1173] ORDER GRANTING DEFENDANT'S MOTIONS TO DISMISS

This matter is before the Court pursuant to Defendant Sound Inpatient Physicians Medical Group, Inc.'s ("Defendant") Motion to Dismiss. (ECF No. 34.) Plaintiff Otashe Golden, M.D. ("Plaintiff") filed an Opposition to Defendant's motion. (ECF No. 44.) The Court has reviewed and considered the arguments in Defendant's **[*1174]** Motion to Dismiss and Reply, along with Plaintiff's Opposition. The Court hereby GRANTS Defendant's Motion to Dismiss with leave to amend.

I. FACTUAL AND PROCEDURAL BACKGROUND

Plaintiff is the majority shareholder in California Hospitalist Physicians, Inc. ("CHP"). (ECF No. 34 at 6.) In 2009 CHP contracted with Dameron Hospital Association ("DHA") to provide hospitalist services. (ECF No. 34 at 6.) The contract expired on April 4, 2012. (ECF No. 34 at 6.) Defendant **[**2]** was chosen to replace Plaintiff as the new hospitalist group for DHA. (ECF No. 34 at 6.) DHA asked community physicians to work with Defendant. (ECF No. 34 at 6.)

In the Second Amended Complaint ("SAC") Plaintiff alleges that on April 4, 2012, she entered into agreements with several doctors to provide hospitalist services for their patients. (ECF No. 33 at ¶ 7.)

Plaintiff allegedly provided a list to Defendant that contained the doctors that designated Plaintiff as the hospitalist for their patients. (ECF No. 33 at ¶ 8.) This list was posted in the Emergency Room. (ECF No. 33 at ¶ 9.) Plaintiff alleges that Defendant's Medical Director, Case Manager, and Hospitalist routinely instructed hospital staff to ignore the designation list and admit Plaintiff's patients as Defendant's patients. (ECF No. 33 at ¶ 10.)

Plaintiff initially filed a complaint on February 18, 2014. (ECF No. 1.) The aforementioned complaint was dismissed because Plaintiff failed to specify proper jurisdiction. (ECF No. 13.) Plaintiff then filed the First Amended Complaint on April 28, 2014. (ECF No. 14.) The First Amended Complaint again failed to plead Plaintiff's citizenship and was dismissed. (ECF No. 32.)

Plaintiff **[**3]** filed the Second Amended Complaint and Demand for a Jury Trial on July 29, 2014, alleging interference with a prospective economic advantage, violation of *California Business and Professions Code section 17200*, and interference with the right to practice a profession. (ECF No. 33.)

Defendant contends that Plaintiff's Second Amended Complaint is both factually and legally deficient, and thus moves this Court to dismiss Plaintiff's Second Amended Complaint with prejudice, pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. (ECF No. 34.)

II. STANDARD OF LAW

HN1[] *Federal Rule of Civil Procedure 8(a)* requires that a pleading contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *See Ashcroft v. Iqbal, 556 U.S. 662, 678—79, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. Under notice pleading in federal court, the complaint must "give the defendant fair notice of what the claim . . . is and the grounds upon which it rests." *Bell Atlantic v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (internal quotations omitted). "This simplified notice pleading standard relies on liberal discovery rules and summary judgment motions to define disputed facts and issues and to dispose of unmeritorious claims." *Swierkiewicz v. Sorema N.A., 534 U.S. 506, 512, 122 S. Ct. 992, 152 L. Ed. 2d 1 (2002)*.

HN2[] On a motion to dismiss, the factual allegations of the complaint must be accepted as true. *Cruz v. Beto, 405 U.S. 319, 322, 92 S. Ct. 1079, 31 L. Ed. 2d 263 (1972)*. A court is bound to give plaintiff the benefit of every reasonable inference to be drawn from the "well-pleaded" allegations of the complaint. **[**4]** *Retail Clerks Int'l Ass'n v. Schermerhorn, 373 U.S. 746, 753 n.6, 83 S. Ct. 1461, 10 L. Ed. 2d 678 (1963)*. A **[*1175]** plaintiff need not allege "'specific facts' beyond those necessary to state his claim and the grounds showing entitlement to relief." *Twombly, 550 U.S. at 570*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. 544, 556, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*.

Nevertheless, a court "need not assume the truth of legal conclusions cast in the form of factual allegations." *United States ex rel. Chunie v. Ringrose, 788 F.2d 638, 643 n.2 (9th Cir. 1986)*. While *Rule 8(a)* does not require detailed factual allegations, "it demands more than an unadorned, the defendant-unlawfully-harmed-me accusation." *Iqbal, 556 U.S. at 678*. A pleading is insufficient if it offers mere "labels and conclusions" or "a formulaic recitation of the elements of a cause of action." *Twombly, 550 U.S. at 555*; *see also* *Iqbal, 556 U.S. at 678* ("Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice."). Moreover, it is inappropriate to assume that the plaintiff "can prove facts that it has not alleged or that the defendants have violated the . . . laws in ways that have not been alleged[.]" *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 526, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*.

Ultimately, ***HN3***[] a court may not dismiss a complaint in which the plaintiff has alleged "enough facts to state a claim to relief that is plausible on its **[**5]** face." *Iqbal, 556 U.S. at 697* (quoting *Twombly, 550 U.S. at 570*). Only where a plaintiff fails to "nudge[] [his or her] claims . . . across the line from conceivable to plausible[,]" is the complaint properly dismissed. *Id. at 680*. While the plausibility requirement is not akin to a probability requirement, it demands more than "a sheer possibility that a defendant has acted unlawfully." *Id. at 678*. This plausibility inquiry is "a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." *Id. at 679*.

HN4[] In ruling upon a motion to dismiss, the court may consider only the complaint, any exhibits thereto, and matters which may be judicially noticed pursuant to *Federal Rule of Evidence 201*. *See* *Mir v. Little Co. of Mary Hosp., 844 F.2d 646, 649 (9th Cir. 1988)*; *Isuzu Motors Ltd. v. Consumers Union of United States, Inc., 12 F. Supp. 2d 1035, 1042 (C.D. Cal. 1998)*.

HN5[] If a complaint fails to state a plausible claim, "'[a] district court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts.'" *Lopez v. Smith, 203 F.3d 1122, 1130 (9th Cir. 2000)* (en banc) (quoting *Doe v. United States, 58 F.3d 494, 497 (9th Cir. 1995))*; *see also* *Mt. Hood Polaris, Inc. v. Martino (In re Gardner), 563 F.3d 981, 990 (9th Cir. 2009)* (finding no abuse of discretion in denying leave to amend when amendment would be futile). Although a district court should freely give leave to amend when justice so requires under *Rule 15(a)(2)*, "the court's discretion to deny such leave is 'particularly broad' where the plaintiff **[**6]** has previously amended its complaint[.]" *Ecological Rights Found. v. Pac. Gas & Elec. Co., 713 F.3d 502, 520 (9th Cir. 2013)* (quoting *Miller v. Yokohama Tire Corp., 358 F.3d 616, 622 (9th Cir. 2004))*.

III. ANALYSIS

Plaintiff alleges interference with a prospective economic advantage (Count I), a **[*1176]** violation of *California Business and Professions Code section 17200* (Count II), and interference with the right to practice a profession (Count III). (ECF No. 33.) The Court dismisses Count I, Count II, and Count III with leave to amend. The Court addresses each of Plaintiff's Causes of Action separately below.

a. Interference with a Prospective Economic Advantage (Count I)

Plaintiff's first cause of action alleges interference with a prospective economic advantage. ***HN6***[] The elements for such a claim are as follows: (1) an economic relationship between the plaintiff and some third party, with the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) intentional acts on the part of the defendant designed to disrupt the relationship; (4) actual disruption of the relationship; and (5) economic harm to the plaintiff proximately caused by the acts of the defendant. *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1153, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*; *Buckaloo v. Johnson, 14 Cal. 3d 815, 827, 122 Cal. Rptr. 745, 537 P.2d 865 (1975)*. Defendant asserts that: (1) Plaintiff failed to establish an economic relationship between herself and a third party with the probability of future economic benefit; (2) Defendant **[**7]** has not alleged to have nor has committed any intentional act; and (3) Defendant has not interfered with any existing relationship between Plaintiff and a third party. (ECF No. 34 at 2.)

The Court finds that Plaintiff has met elements (2), (4) and (5)[1] and thus, focuses its analysis on elements (1) and (3).

i. Economic relationship between plaintiff and some third party with the probability of future economic benefit to the plaintiff

Defendant alleges that Plaintiff has not established an economic relationship or probability of future relationship. (ECF No. 34 at 2). Plaintiff bases her claim upon agreements she alleges she entered into with several doctors. (ECF No. 33 at ¶ 7.)

Defendant argues that Plaintiff's claim for interference with a prospective economic advantage fails because Plaintiff failed to establish intentional **[**8]** interference based upon a contract and because Plaintiff failed to attach or allege the substance of the contract. (ECF No. 34 at 10.) ***HN7***[] In order to establish intentional interference based upon a contract, a party is required to: (1) set out the written contract in verbatim in the complaint; (2) attach the contract as an exhibit; or (3) plead in full in accordance with the contract's legal effect. *Staples v. Arthur Murray, 253 Cal. App. 2d 507, 513, 61 Cal. Rptr. 103 (1967)*. Defendant incorrectly argues that Plaintiff was required to have a legally binding contract. However, ***HN8***[] interference with a prospective economic advantage, a tort that similarly compensates for the loss of an advantageous economic relationship, does not require the existence of a legally binding contract. *Reeves v. Hanlon, 33 Cal. 4th 1140, 1152, 17 Cal. Rptr. 3d 289, 95 P.3d 513 (2004)*. Thus, Plaintiff was not required to have a legally binding contract to bring this particular claim.

Further, Defendant argues that Plaintiff failed to establish an economic relationship between herself and an identifiable third **[*1177]** party. (ECF No. 34 at 10.) However, Plaintiff specifically pleaded that she entered into a relationship with several doctors, who were third parties to Plaintiff's relationship with Defendant. (ECF No. 33 at ¶ 7.) Defendant relies on the reasoning in *Roth v. Rhodes, 25 Cal. App. 4th 530, 546, 30 Cal. Rptr. 2d 706 (1995)*. In *Roth* the **[**9]** court explained that***HN9***[] a party cannot maintain a claim where the existing relationship is speculative. *Id*. However, Plaintiff alleged that she entered into a relationship with several named doctors, which was more than the speculative nature of the unknown patients in *Roth*. Plaintiff is not required to allege "'specific facts' beyond those necessary to state [her] claim." *Twombly, 550 U.S. at 570*. By stating that she entered into agreements with doctors, Plaintiff met the burden of providing the necessary facts to allege that she had an economic relationship between herself and the doctors.

Defendant relies on *Westside Ctr. Assoc. v. Safeway Stores 23, Inc., 42 Cal. App. 4th 507, 525, 49 Cal. Rptr. 2d 793 (1996)* to argue that Plaintiff did not demonstrate "the existence of a specific economic relationship." (ECF No. 34 at 9.) In *Westside*, the court described how the defendant's tortious conduct must interfere with a specific existing relationship using the precedent set forth in *Rickards v. Canine Eye Registration Fdtn., Inc., 704 F.2d 1449 (9th Cir. 1983)*. *Westside, 42 Cal. App. 4th at 525*. In *Rickards*, the plaintiffs were veterinarians who could not acquire the certification necessary to perform eye examinations in order to list dogs in the defendant's registry of canine eye diseases. *Rickards, 704 F.2d at 1452*. The plaintiffs alleged that the defendant's establishment of the registry disrupted the veterinarians' economic relationship with dog **[**10]** owners. *Id*. The court affirmed a directed verdict for the defendants stating that the evidence failed to establish "the *existence of a specific economic*

[1] The Court finds that Plaintiff has properly pleaded the following: (2) that there was knowledge of the relationship (ECF No. 33 at 13); (4) there was an actual disruption of the relationship (ECF No. 33 at ¶ 15); and (5) that Plaintiff suffered economic harm as a result of Defendant allegedly instructing staff to ignore the designation list. (ECF No. 33 at ¶¶ 10 &16.)

relationship between [the plaintiff] and third parties . . . ." *Id. at 1456* (emphasis added). The court concluded that the veterinarians had no specific relationship with potential registry clients, and their lack of certification did not interfere with an "ongoing business relationship" between the veterinarians and their regular clients, who continued to see them for other purposes. *Id*. According to the *Rickards* court, ***HN10***[] a defendant's tortious conduct must interfere with a specific existing relationship, not simply with the formation of one in the future. *Id.; see also Westside Ctr. Assoc., 42 Cal. App. 4th at 525*.

Plaintiff specifically claimed that she had an economic relationship with the specified doctors. (ECF No. 33 at ¶ 12.) Plaintiff's claim is distinguishable from an unknown group of speculative future patients with no actual agreement in place. The plaintiffs in the cases that Defendant cites only speculated about future economic relationships. *See Westside Ctr. Assoc. v. Safeway Stores 23, Inc., 42 Cal. App. 4th 507, 525, 49 Cal. Rptr. 2d 793 (1996)* (Plaintiff did not succeed where the economic relationship was purely hypothetical). However, here Plaintiff is alleging specific, **[**11]** current economic relationships with named doctors.

HN11[] Plaintiff also has the burden of proving that there was the probability of economic benefit with a third party. *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1153, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*; *Buckaloo v. Johnson, 14 Cal. 3d 815, 827, 122 Cal. Rptr. 745, 537 P.2d 865 (1975)*. Defendant argues that Plaintiff failed to identify a future economic benefit. (ECF No. 24 at 11.) The law precludes recovery for overly speculative expectancies by initially requiring proof the business relationship contained "'the probability of future economic benefit to the plaintiff.'" *Westside, 42 Cal. App. 4th* ***[*1178]*** *at 522* (citing *Youst v. Longo, 43 Cal. 3d 64, 71, 233 Cal. Rptr. 294, 729 P.2d 728 (1987))*. Though it is necessary to infer that there would have been some benefit to the Plaintiff but for Defendant's interference, "the chance the expectancy otherwise would have occurred is necessarily a matter of some uncertainty." *Westside, 42 Cal. App. 4th at 522*.

Plaintiff stated that she entered into agreements with a group of doctors that would allow her to provide hospitalist services to their patients. (ECF No. 33 at ¶ 7.) Plaintiff further alleges that Defendant explicitly instructed hospital staff to ignore the designation list that provided that the specific doctors' patients would be directed to Plaintiff. (ECF No. 33 at ¶ 10.) The Court could infer that but for Defendant's alleged interference, Plaintiff would have had the opportunity to work with the **[**12]** doctors that she had entered into agreements with, thus receiving the economic advantage of more patients. However, this is not readily apparent. Plaintiff does not provide any details about what the agreements entail, such as whether they were exclusive or not. Furthermore, it is unclear whether the economic benefit would have resulted from the relationship with the third party doctors, or the speculative relationship with unknown future patients.

Therefore, given the facts presented by Plaintiff, the Court notes that it is unclear whether Plaintiff has met her burden of establishing that she has an economic relationship with a third party with the probability of a future economic benefit.

ii. Intentional acts on the part of the defendant designed to disrupt the relationship

Defendant alleges that Plaintiff has not proven that Defendant has committed any intentional wrongful act. (ECF No. 34 at 11.) The Court agrees.

HN12[] "[T]he act of interference with prospective economic advantage is not tortious in and of itself." *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1159, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*. To state a claim for intentional interference under California law, a plaintiff must allege that "the defendant engaged in an independently wrongful act," that is "wrongful by some **[**13]** legal measure other than the act of interference itself." *Korea Supply Co., 29 Cal. 4th at 1153* (citing *Della Penna v. Toyota Motor Sales, U.S.A., Inc., 11 Cal. 4th 376, 393, 45 Cal. Rptr. 2d 436, 902 P.2d 740 (1995))*. This is understood as an act "proscribed by some constitutional, statutory, regulatory, common law, or other determinable legal standard." *Korea Supply Co., 29 Cal. 4th at 1159*. In *Korea Supply Co*., Korea Supply Company satisfied the independent wrongfulness requirement by alleging that the defendant engaged in bribery and offered sexual favors to key Korean officials in order to obtain a contract from the Republic of Korea. *Id*. The specific bribery alleged was independently unlawful under the Foreign Corrupt Practices Act. *Id*. Here, Plaintiff has not alleged any independently unlawful act.

Plaintiff claims that certain individuals were instructed to ignore the designation list in favor of Defendant. (ECF No. 33 at ¶ 7.) However, ***HN13***[] "an act must be wrongful by some legal measure, rather than merely a product of an improper, but lawful, purpose or motive." *Korea Supply Co., 29 Cal. 4th at 1159, n. 11*. Plaintiff has not alleged that Defendant's conduct was independently wrongful by a legal measure beyond the interference. For example, Plaintiff has not alleged that Defendant **[*1179]** violated any constitutional, statutory, regulatory, common law, or other determinable legal standard. *See* *Korea Supply Co., 29 Cal. 4th at 1159*.

Further, ***HN14***[] "[t]he tort of **[**14]** intentional interference with prospective economic advantage is not intended to punish individuals or commercial entities for their choice of commercial relationships or their pursuit of commercial objectives, unless their interference amounts to independently actionable conduct." *Id. at 1158-59*. Interference based on lawful competition is not actionable. *See generally* *Bed Bath & Beyond of La Jolla, Inc. v. La Jolla Village Square Venture Partners, 52 Cal. App. 4th 867, 60 Cal. Rptr. 2d 830 (1997)* (finding that plaintiff did not have a claim for intentional interference with prospective advantage when defendant competitor competed successfully for a lease). As Defendant correctly argues, Plaintiff has not alleged that her agreement with the doctors was exclusive so as to prevent any lawful competition. (ECF No. 34 at 12—13.)

Defendant operated competing hospitalist services. Plaintiff has not alleged any contract or *exclusive* agreement that would preclude Defendant from participating in lawful competition. Thus, because Plaintiff has not stated an independently wrongful act beyond that of tortious interference, her claim must be dismissed with leave to amend.

b. Violation of *California Business and Professions Code Section 17200 et seq.* (Count II)

Plaintiff's second cause of action alleges violation of California's Unfair Competition Law ("UCL") pursuant to *California Business and Professions Code Section 17200*. (ECF No. 33 at ¶ 17—20.) **[**15]** Defendant asserts that the claim is derivative of the other claims made in the Complaint, and as the other claims fail, this claim fails as a matter of law. (ECF No. 34 at 2.) Defendant argues that this Claim must be dismissed because Plaintiff has failed to establish any independently actionable act to base the unfair competition claim upon. (ECF No. 34 at 14.)

HN15[] The UCL prohibits "any unlawful, unfair or fraudulent business act." *Cal. Bus. & Prof. § 17200*. "To bring a UCL claim, a plaintiff must show either an (1) unlawful, unfair, or fraudulent business act or practice, or (2) unfair, deceptive, untrue or misleading advertising." *Lippitt v Raymond James Fin. Servs., Inc., 340 F.3d 1033, 1043 (9th Cir. 2003)* (internal quotations omitted); *Gardner v. Am. Home Mortgage Servicing, Inc., 691 F. Supp. 2d 1192, 1201 (E.D. Cal. 2010)*. "[A] practice is prohibited as 'unfair' or 'deceptive' even if not 'unlawful' or vice versa." *Cel-Tech Communs., Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*.

i. "Unlawful" under the UCL

HN16[] "By proscribing 'any unlawful' business practice, '*section 17200* "borrows" violations of other laws and treats them as unlawful practices' that the unfair competition law makes independently actionable." *Belton v. Comcast Cable Holdings, LLC, 151 Cal. App. 4th 1224, 1233, 60 Cal. Rptr. 3d 631 (2007)* (citing *Cel-Tech Communs., Inc., 20 Cal. 4th at 180*). "[A] violation of another law is a predicate for stating a cause of action under the UCL's unlawful prong." *Berryman v. Merit Prop. Mgmt., Inc., 152 Cal. App. 4th 1544, 1554, 62 Cal. Rptr. 3d 177 (2007)*. Where a plaintiff cannot state a claim under the "borrowed" law, it cannot state a UCL claim either. **[**16]** *See, e.g.,* *Ingels v. Westwood One Broadcasting Servs., Inc., 129 Cal. App. 4th 1050, 1060, 28 Cal. Rptr. 3d 933 (2005)*.

HN17[] **[*1180]** Defendant is not liable under *Bus. and Prof. Code section 17200* for committing 'unlawful business practices' without having violated another law. *Ingels, 129 Cal. App. 4th 1050 at 1060, 28 Cal. Rptr. 3d*

933. In *Ingels* the plaintiff's underlying Unruh Act claim was dismissed, so there was no 'unlawful' act upon which to base the derivative Unfair Competition claim. *Id*. Here, Plaintiff has not alleged any 'unlawful' act to base the Unfair Competition claim upon. Thus, Plaintiff's UCL claim cannot rest upon the UCL's unlawful component.

ii. "Fraudulent" under the UCL

Additionally, Plaintiff has not shown that Defendant engaged in any fraudulent conduct. ***HN18***[] "Under *Federal Rule of Civil Procedure 9(b)*, a plaintiff pleading a claim of fraud, or any claim that is 'grounded in fraud' must 'state with particularity the circumstances constituting fraud or mistake.'" *Tuck Beckstoffer Wines LLC v. Ultimate Distribs., 682 F. Supp. 2d 1003, 1019 (N.D. Cal. 2010)* (citing *Fed. R. Civ. P. 9(b)*). "That is, the plaintiff must set forth with particularity the 'who, what, when, where, and how of the misconduct charged.'" *Tuck Beckstoffer Wines LLC, 682 F. Supp. 2d at 1019* (quoting *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1106 (9th Cir. 2003))*. The plaintiff must also allege the misrepresentations themselves with particularity. *Moore v. Kayport Package Exp., Inc., 885 F.2d 531, 540 (9th Cir. 1989)*. "A pleading is sufficient under *rule 9(b)* if it identifies the circumstances constituting fraud so that a defendant can prepare an adequate answer from the allegations." *Id*. Here, Plaintiff has not stated with **[**17]** particularity any circumstances constituting fraud. Plaintiff did not allege fraud and therefore did not satisfy *rule 9(b)*. Therefore, Plaintiff's UCL claim cannot succeed on the basis of fraudulent conduct.

iii. "Unfair" under the UCL

HN19[] "When a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes *section 17200*, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Comm'cns, Inc., 20 Cal. 4th at 187*.

Here, Plaintiff alleges that Defendant's conduct "violated the prohibitions of *Business and Professions Code section 17200 et seq.*" (ECF No. 33 ¶ at 19.) Even with the Court liberally construing the facts that Plaintiff has alleged, these facts do not amount to unfair conduct. Plaintiff has not alleged that Defendant acted "unfairly" under the UCL. Further, Plaintiff has not alleged any conduct that approaches a violation of an ***antitrust law*** or the policy or spirit of antitrust laws. *See also* *Stevenson Real Estate Services, Inc. v. CB Richard Ellis Real Estate Services, Inc., 138 Cal. App. 4th 1215, 1225, 42 Cal. Rptr. 3d 235 (2006)* (holding that the plaintiff's pleading was insufficient when he failed to allege conduct **[**18]** approaching a violation of an ***antitrust law*** or the policy or spirit of antitrust laws). By failing to allege the grounds for which Plaintiff brought her UCL claim, Plaintiff has failed to give Defendant fair notice of what the claim is and the grounds upon which it rests. Therefore, Plaintiff cannot succeed under the "unfair" prong of the UCL.

Plaintiff's claim for violations of the UCL cannot stand because Plaintiff has not alleged that Defendant has engaged in any unfair, fraudulent, or unlawful acts. Therefore, this claim is dismissed with leave to amend.

[*1181] c. Interference with the Right to Practice a Profession (Count III)

Plaintiff's third cause of action alleges Interference with the Right to Practice a Profession. In opposition, Defendant argues that (1) no such cause of action exists absent a complete prohibition on the right to practice a profession, and this cannot be alleged; and (2) Defendant has not and is not alleged to have committed any act that could be interpreted as interfering with Plaintiff's right to practice in the medical profession. (ECF No. 34 at 2.)

i. There must be a complete prohibition on the right to practice a profession to allege interference with the right ***[**19]*** *to practice a profession*

It is well established that*HN20*[] a cause of action exists when "the right to pursue a lawful business, calling, trade, or occupation is intentionally interfered with either by unlawful means or by means otherwise lawful when there is a lack of sufficient justification." *Willis v. Santa Ana Cmty Hosp. Ass'n, 58 Cal. 2d 806, 810, 26 Cal. Rptr. 640, 376 P.2d 568 (1962)*. A cause of action for intentional interference with the right to practice one's profession "requires intentional and malicious acts designed to prevent the plaintiff from practicing her profession." *Love v. Permanente Med. Group, 2013 U.S. Dist. LEXIS 49750, at *8 (N.D. Cal. Apr. 5, 2013)*. There must be a complete prohibition on the right to practice a profession to allege interference with the right to practice a profession. *See Love v. Permanente Med. Group, 2013 U.S. Dist. LEXIS 49750, at *9-10 (N.D. Cal. Apr. 5, 2013)* (holding that a motion to dismiss was appropriate when the plaintiff did not allege that the defendant had deprived her of other opportunities in her field); *Feather River Anesthesia Med. Group v. Fremont-Rideout Med. Group, 2007 Cal. App. Unpub. LEXIS 7004 (Cal. App. 3d Dist. Aug. 29, 2007)* (holding that a claim for interference with the right to practice a profession can prevail where plaintiffs were unable to work in an entire geographical area).

Plaintiff relies on the unpublished case *Feather River Anesthesia Med. Group v. Fremont-Rideout Med. Group*, to argue that the claim of interference with the right to practice a profession is recognized as an independent claim in California. (ECF **[**20]** No. 44 at 5.) Defendant, however, correctly argues that *Feather River* is inapplicable because ***HN21***[] in order to successfully claim interference with the right to practice a profession there must be a complete prohibition on the right to practice a profession. (ECF No. 34 at 2.)

The court in *Feather River* acknowledged that plaintiffs' claim for interference with the right to practice a profession was sufficient. *Feather River Anesthesia Med. Group v. Fremont-Rideout Med. Group at *40*. However, *Feather River* is distinguishable from this case. The plaintiffs in *Feather River* claimed that the defendants' unlawful anticompetitive conduct caused them actual injury by preventing them from working in the entire citywide market. *Id. at *40*. Here, Plaintiff alleges that she was only prevented from practicing her profession at the named hospital.

Further, in *Love v. Permanente Med. Group*, a motion to dismiss with leave to amend was warranted when the plaintiff did not allege that the defendants deprived her of another opportunity to become employed in her field. *Love, 2013 U.S. Dist. LEXIS 49750, at *9-10*. In *Love*, similar to here, the plaintiff's allegations related solely to being deprived of the opportunity to work for her specific former employer. In the instant case, Plaintiff does not allege that Defendant interfered **[**21]** with Plaintiff's right **[*1182]** to practice medicine beyond the scope of the specific hospital in this case. Thus, this claim is dismissed with leave to amend.

IV. CONCLUSION

For the reasons set forth above, the Court hereby GRANTS Defendant's Motion to Dismiss Plaintiff's Complaint as follows:

1. COUNTS I, II, and III are DISMISSED with leave to amend.
2. Plaintiff is granted 30 days from the date on which this Order is filed to file an amended complaint.
3. Defendant shall file their responsive pleading within 21 days of service of the Third Amended Complaint.

4. Plaintiff is further notified that this action may be dismissed with prejudice under *Rule 41(b)* if she fails to file an amended complaint within the prescribed time period.
5. If Plaintiff does not submit any amendments, this case will be closed.
6. Plaintiff is notified that if the Third Amended Complaint cannot survive a 12(b)(6) motion, it will be dismissed with prejudice.

IT IS SO ORDERED.

be prohibited under *§ 1* of the Sherman Act even if the tie is not explicit in the seller's contracts, but instead is enforced through informal constraints or pricing policies.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN2[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Two of the central elements of a tying claim are market power in the tying product market and coercion of buyers of the tying product to buy the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN3[] **Tying Arrangements, Sherman Act Violations**

Tying doctrine in ***antitrust law*** aims to prohibit a defendant from leveraging monopolistic market power in one market to monopolize another. A tying arrangement exists when the defendant agrees to sell one product only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier. The tie falls foul of ***antitrust law*** if the seller has appreciable economic power in the tying product market and the arrangement affects a substantial volume of commerce in the tied market. Tying arrangements meeting these conditions are condemned under *§ 1* of the Sherman Act as a contract, combination or conspiracy in the restraint of trade or commerce among the several States or with foreign nations, language that has been interpreted to prohibit unreasonable restraints on trade, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN4[] **Tying Arrangements, Sherman Act Violations**

The "appreciable economic power" and "substantial volume of commerce" conditions seek to ensure that only those tying arrangements that restrict competition over the tied product market are prohibited. If the seller lacks economic power in the tying product market, customers who do not wish to purchase the seller's brand of the tied product face little pressure to buy anything from the seller at all, since they have other options to obtain the tying product. And if the arrangement does not affect a substantial volume of commerce in the tied product market, then clearly the defendant is not significantly affecting competition in that market. In fact, even if the two conditions are met, the defendant is still permitted to argue as a sort of affirmative defense that its tying arrangement has procompetitive effects, or, alternatively, has a valid business justification.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN5[] **Tying Arrangements, Sherman Act Violations**

A tying arrangement that falls foul of these criteria and lacks a valid business justification is anticompetitive because it tends to force more efficient competitors out of the tied product market. Because of the defendant's power in the tying product market, customers who want to buy both the tying and tied product can buy the tying product only from the defendant. The defendant then additionally requires them to buy the tied product from it, meaning that they have no need to buy it from anyone else. This restrains competition in the tied product market because a competing seller of the tied product—in particular one who does not also produce the tying product—is unable to attract customers who additionally require the tying product even if the competing seller's product is superior in price or quality to the defendant's tied product. From the customer's point of view, the practical cost of the competing seller's product is the price the competing seller charges plus the cost of forgoing the tying product. With such a thumb on the scale, a competing seller may lose market share even if it can produce the tied product more efficiently than the defendant; the defendant's market power in the tying product, rather than its ability to produce the tied product efficiently, shapes the market for the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN6[] **Tying Arrangements, Sherman Act Violations**

Unlawful ties need not be explicit contractual provisions preventing buyers from purchasing the tied product from third parties. The existence of a tying arrangement depends on the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. When a defendant adopts a policy that makes it unreasonably difficult or costly to buy the tying product (over which the defendant has market power) without buying the tied product from the defendant, it "forces" buyers to buy the tied product from the defendant and not from competitors.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN7[] **Tying Arrangements, Sherman Act Violations**

In the special case of a tie enforced solely through differential pricing, the tie is not unlawful unless the differential pricing is the economic equivalent of selling the tied product below the defendant's cost. This is because differential pricing, unlike other forms of indirect coercion, can be employed legitimately without illegal anticompetitive influence from the defendant's control over the tying product market. In general, the ability of the defendant to impose the threat that creates the "forcing" depends on buyers' not being able to turn elsewhere for the tying product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN8[] **Tying Arrangements, Sherman Act Violations**

An explicit tie has a coercive effect so long as buyers cannot turn elsewhere for the tying product because buyers who need the tying product may have no option but to purchase the tied product from the defendant. But if the defendant merely offers a discount on the tying good to buyers who also purchase the tied good, then buyers are only "forced" to buy the tied good from the defendant if they cannot purchase the tied good elsewhere at a price low enough to offset the forgone discount for the tying product. The defendant uses its market power over the tying good to shift the discount from the tied good to the tying good, but this in itself does not "force" buyers to purchase the tied product any more than a discount on the tied product would. It follows that a discount on the tied product amounts to unfair competition only if the defendant is selling below cost.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN9[] **Scope, Monopolization Offenses**

In a bundled discount, the seller offers two products together (the bundle) at a price lower than the sum of the prices of the two products sold separately. It is the equivalent in economic terms to a tie enforced entirely through differential pricing, since in both cases customers pay less for the tied and tying products if they buy both from the defendant seller. The Ninth Circuit has adopted a "discount attribution" standard to determine whether a bundled discount is an unlawful attempt to monopolize under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*: The full amount of the discounts given by the defendant on the bundle are allocated to the competitive product or products. If the resulting price of the competitive product or products is below the defendant's incremental cost to produce them, the trier of fact may find that the bundled discount is exclusionary for the purpose of *§ 2*. This standard makes the defendant's bundled discounts legal unless the discounts have the potential to exclude a hypothetical equally efficient producer of the competitive product. A bundled discount is only equivalent to an unlawful tie when the discount attribution standard is met.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN10[] **Tying Arrangements, Sherman Act Violations**

In setting prices, it is important for companies to have clear guidelines. Every company knows its own cost of production, but the cost of production of its competitors may be less clear. Further, because competitors often do not sell exactly the same product, using the plaintiff's costs may ignore differences in the competitors' products' value to consumers that might affect the analysis.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN11[] **Tying Arrangements, Sherman Act Violations**

The availability of information about aftermarket pricing in the primary market (information costs) and the difficulty of switching to a different primary market supplier (switching costs) can both serve to insulate a primary market from the effects of aftermarket price increases, thus increasing the seller's market power in the aftermarket. There may also be other "actual market realities" serving either to restrict or protect market power in an aftermarket.

Opinion

[*267] [*2]** ROGERS, Circuit Judge. ***HN1***[] In a tying arrangement, a seller requires buyers of a product over which it has market power—the "tying product"— also to purchase a product over which it seeks to gain market power—the "tied product." A tying arrangement can be prohibited under *§ 1* of the Sherman Act even if the tie is not explicit in the seller's contracts, but instead is enforced through **[**2]** informal constraints or pricing policies. This appeal primarily concerns the question of when differential pricing—charging more for the tying product when the customer does not also purchase the tied product—in itself constitutes an unlawful tying arrangement. In short, the answer is that it does so only when the price differential in effect discounts the tied product below the seller's cost. In this case, the possibility that such a showing could be made warranted a preliminary injunction.

Eastman Kodak Company appeals the district court's grant of Collins Inkjet Corporation's motion for a preliminary injunction requiring Kodak to cease charging customers at different rates for Kodak's refurbished printer components depending on whether the customers buy Kodak ink. Collins is Kodak's competitor for selling ink for Versamark printers manufactured by Kodak. Users of Versamark printers must periodically replace a printer component called a printhead; Kodak is the only provider of replacement "refurbished printheads" for such printers. In July 2013, Kodak adopted a pricing policy that raised the cost of replacing Versamark printheads, but only for customers not purchasing Kodak ink. Collins **[**3]** filed suit, arguing that this amounts to a tying arrangement prohibited under *§ 1* of the Sherman Act, *15 U.S.C. § 1*, because it is designed to monopolize the Versamark ink market. Collins sought a preliminary injunction barring Kodak from charging Collins' customers a higher price for refurbished printheads. The district court issued the preliminary injunction, finding a **[*268]** strong likelihood that Kodak's pricing policy was a non-explicit tie that coerced Versamark owners into buying Kodak ink and that Kodak possessed sufficient market power in the market for refurbished printheads to make the tie effective.

[*3]** On appeal, Kodak challenges both the legal standard the district court applied to find whether customers were coerced into using Kodak ink and the district court's preliminary factual findings. In evaluating the likelihood of success on the merits, the district court applied a standard that unduly favored Collins to determine whether customers were coerced into buying Kodak ink. The court examined whether the policy made it likely that all or almost all customers would switch to Kodak ink, but did not examine whether this would be the result of unreasonable conduct on Kodak's part. A tying arrangement **[**4]** enforced entirely through differential pricing of the tying product contravenes the Sherman Act only if the pricing policy is economically equivalent to selling the tied product below cost. The record makes it difficult to determine conclusively Kodak's ink production costs, but the available evidence suggests that Kodak was worse off when customers bought both products, meaning that it was in effect selling ink at a loss. Thus, Collins was likely to succeed on the merits even under the correct standard. Furthermore, the district court was correct in its consideration of the other factors for a preliminary injunction. Accordingly, the preliminary injunction was not an abuse of discretion.

I. Kodak's pricing policy for Versamark refurbished printheads and ink

A. Versamark Printers, Kodak, and Collins

Kodak is a printing and imaging company that offers a wide range of products and services, including Versamark printers. Collins is a business that manufactures inkjet ink for industrial printing systems. Versamark printers are used by commercial printing companies and can cost in excess of $200,000; a full printing system using Versamark printers can cost ten times that. Kodak sold its last **[**5]** Versamark printer in 2009. It has since introduced a new line of printers under the name "Prosper," intended to replace Versamark. Users of Versamark printers must periodically purchase ink specially formulated for use in Versamark printers and replace specialized printer components, called printheads, through which the ink flows onto the page. Printheads are available in multiple sizes, and ink must be formulated specifically for each type of printhead. Prices for both printheads and ink vary based on the printhead's type, and also (in the ink's case) on the ink's composition. Kodak and Collins both manufacture Versamark ink, but Kodak is the only source of replacement "refurbished" printheads. Customers send old printheads to Kodak, which then refurbishes them and sends them back. Customers are highly **[***4]** sensitive to the total cost of printing, and take into account both the initial purchase price and subsequent costs in making decisions about printers.

B. The history of cooperation and competition between Kodak and Collins

Until 2001, Collins and Kodak's predecessor Scitex competed to sell Versamark ink. From 2001 until 2011, Collins and Kodak operated together in the Versamark ink **[**6]** market under a series of Supply and Reseller Agreements. Under these agreements, Collins manufactured ink under both its own name and Kodak's brand, and Kodak sold Collins ink on Collins' **[*269]** behalf. Collins attempted to terminate the last such agreement in 2011 due to concerns about Kodak's financial situation, but was prevented by a court injunction from doing so. The agreement terminated as scheduled in May 2012.

As soon as the agreement terminated in May 2012, Kodak announced that Collins was no longer an approved Versamark ink supplier and that it was implementing a new pricing policy with higher refurbished printhead prices, and no equipment warranty, for Collins ink users. Kodak never actually implemented the policy, apparently because of customer complaints.

C. The pricing policy at issue

In July 2013, Kodak announced a new pricing policy that is the subject of Collins' present tying claim. Under this policy, the difference between what Collins ink customers and Kodak ink customers would pay for refurbished printheads decreased relative to the May 2012 policy, but did not disappear. Kodak ink customers ("matched customers") received a discount on refurbished printheads, while non-Kodak **[**7]** ink customers ("unmatched customers") paid more. Kodak's refurbishment pricing structure used a base charge followed by a calculation based on hourly rates for "run hours" in different amounts, making calculation of the exact price difference difficult. However, in two of the three policy announcements sent to customers in the record, Kodak offered "matched" customers a 4% discount, while raising prices for "unmatched" customers by roughly 30%. In the third announcement, the discount for matched customers appeared to be slightly over 6%, while the price increase for unmatched customers appeared to be over 5%. Kodak delayed implementation until November 1, 2013, and even then some large customers received rebates making up for the price increases in the unmatched rates. In at least **[***5]** some cases, these rebates were granted because the customers made a verbal commitment to switch to Kodak ink. Collins sued, seeking to enjoin the enforcement of this policy.

D. Procedural history

On September 19, 2013, Collins brought suit against Kodak, alleging a violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1* (for tying), a violation of *§ 43(a)* of the Lanham Act, *15 U.S.C. § 1125* (for false statements about the quality of Collins ink made **[**8]** in justification of its pricing policies), a violation of state deceptive trade practices law (for the same), defamation (for the same), and tortious interference with prospective contractual relations (for both the anticompetitive conduct and the false statements). At the same time, Collins moved for a preliminary injunction preventing Kodak from charging Collins ink customers higher prices for refurbished printheads and from making false statements about Collins. After expedited discovery and a three-day evidentiary hearing, the district court found that Collins had not demonstrated a likelihood of success on the merits on the claims relating to Kodak's alleged false statements, but that it had demonstrated a likelihood of success on the merits on the tying claim and, by extension, the tortious interference claim.

The court first considered whether Kodak had in fact tied ink to refurbished printheads by conditioning access to printheads on purchases of Kodak ink. Relying on *Virtual Maintenance v. Prime Computer, 957 F.2d 1318, 1323 (6th Cir. 1992)* ("*Virtual Maintenance I*"), *vacated and remanded on other grounds*, *506 U.S. 910, 113 S. Ct. 314, 121 L. Ed. 2d 235 (1992)*, the court assumed that if Kodak's pricing would cause "all rational buyers" to switch to Kodak ink, then Kodak's pricing was **[*270]** sufficiently coercive **[**9]** to be a non-explicit tying arrangement. The court found that Kodak's policy had been adopted too recently to determine whether most of Collins' customers would actually be forced to switch to Kodak ink. However, Collins had presented sufficient evidence to suggest that the additional cost of not switching to Kodak ink would be so great that all rational buyers of Versamark ink would choose Kodak. The court declined Kodak's suggestion that the court take into account Collins' manufacturing costs and ability to compete with Kodak's pricing policy.

The district court next found a strong likelihood that refurbished printheads were a market over which Kodak had monopolistic control. In support of this conclusion the court noted that Kodak controls one hundred percent of the market for refurbished printheads, that **[***6]** high information costs and switching costs for customers reduce the influence of the competitive primary market for printers on Kodak's pricing, and that the barriers to entry to the refurbished printhead market are high. The court also found that a substantial volume of commerce in the tied market was affected, and that Kodak's asserted legitimate business justifications were **[**10]** not convincing.

Having found a likelihood of success on the merits of Collins' tying claim, the court also found that the irreparable harm and public interest factors in the preliminary injunction standard weighed in Collins' favor, while the substantial harm to others factor was roughly evenly balanced or favored Kodak. In particular, the court found that the potential loss of market share, employees, and ink customers would do irreparable and unquantifiable damage to Collins' "goodwill and reputation." The court's conclusion on the public interest favoring a preliminary injunction essentially followed from its analysis of the tie; because ***antitrust law*** ensures fair competition, enjoining Kodak's likely antitrust violation would protect consumers.

Kodak appeals the grant of the preliminary injunction, challenging the court's conclusions with regard to tying, Kodak's market power, the likelihood of irreparable harm to Collins, and the public interest served by a preliminary injunction. Kodak does not challenge the court's holding on the (un)likelihood of success on Kodak's legitimate business purpose argument.

II. Likelihood of proving an anticompetitive tie by price differentiation

HN2[] Two **[**11]** of the central elements of a tying claim, both at issue in this appeal, are market power in the tying product market and coercion of buyers of the tying product to buy the tied product. *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 11—12, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*. Collins has shown a sufficient likelihood of success on the merits of each. We address the coercion element first.

[***7] A. The discount attribution standard for coercion in claims of non-explicit tying via differential pricing

It appears likely that Kodak's pricing policy was a tying arrangement involving unlawful coercion, although the district court applied a standard that was unduly generous to Collins in this regard. That Kodak appeared to be offering a better deal to customers than Collins does not in itself constitute an unlawful tying arrangement; Kodak's differential pricing was unlawful only if it might have forced a more efficient competitor out of business. By relying solely on its finding that Kodak's prices made buying Collins ink significantly more expensive than buying Kodak ink, the district court adopted a standard that **[*271]** could too easily treat fair price competition as per se illegal under ***antitrust law***. Competitive sellers generally aim to make their products significantly cheaper than their **[**12]** competitors', and there is nothing inherently wrong with doing so via differential pricing. However, differential pricing becomes equivalent to an unlawful tying arrangement when the price discount, as applied to the original price of the tied product, in effect lowers the price of the tied product below the seller's cost. In that case, differential pricing becomes a predatory investment of monopoly profits from one market aimed at creating a monopoly in another; the seller's monopoly power in the tying product market, rather than its ability to offer the tied product at a competitive price, drives the differential pricing. When differential pricing satisfies this test, it is functionally equivalent to the coercion present in an unlawful tying arrangement. Although the evidence is far from conclusive, it appears that Kodak's profits decreased whenever a customer switched to Kodak ink, which in turn suggests that Kodak's pricing policy was predatory. Therefore there is a likelihood that Collins will succeed on the coercion prong of its tying claim, albeit under a stricter standard than the one applied by the district court.

1. Tying in general

HN3[] Tying doctrine in ***antitrust law*** aims to prohibit **[**13]** a defendant from leveraging monopolistic market power in one market to monopolize another. A tying arrangement exists when the defendant agrees "to sell one product . . . only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier." *N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5—6, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*. The tie falls foul of ***antitrust law*** if "the seller has 'appreciable economic power' in the tying product market and . . . the **[***8]** arrangement affects a substantial volume of commerce in the tied market." *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 462, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (quoting *Fortner Enters., Inc. v. U. S. Steel Corp., 394 U.S. 495, 503, 89 S. Ct. 1252, 22 L. Ed. 2d 495 (1969))*. Tying arrangements meeting these conditions are condemned under *§ 1* of the Sherman Act as a "contract, combination . . . or conspiracy in the restraint of trade or commerce among the several States or with foreign nations," language that has been interpreted to prohibit "unreasonable" restraints on trade. *15 U.S.C. § 1*; *N. Pac. Ry. Co., 356 U.S. at 5*.

HN4[] The "appreciable economic power" and "substantial volume of commerce" conditions seek to ensure that only those tying arrangements that restrict competition over the tied product market are prohibited. If the seller lacks economic power in the tying product market, customers who do not wish to purchase the seller's brand of the tied product **[**14]** face little pressure to buy anything from the seller at all, since they have other options to obtain the tying product. And if the arrangement does not affect a substantial volume of commerce in the tied product market, then clearly the defendant is not significantly affecting competition in that market. In fact, even if the two conditions are met, the defendant is still permitted to argue as a sort of affirmative defense that its tying arrangement has procompetitive effects, or, alternatively, has a valid business justification. *PSI Repair Servs., Inc. v. Honeywell, Inc., 104 F.3d 811, 815 n.2 (6th Cir. 1997)*; *Virtual Maintenance I, 957 F.2d at 1323*.

HN5[] A tying arrangement that falls foul of these criteria and lacks a valid business justification is anticompetitive because it tends **[*272]** to force more efficient competitors out of the tied product market. Because of the defendant's power in the tying product market, customers who want to buy both the tying and tied product can buy the tying product only from the defendant. The defendant then additionally requires them to buy the tied product from it, meaning that they have no need to buy it from anyone else. This restrains competition in the tied product market because a competing seller of the tied product—in particular one who does not also produce the tying **[**15]** product—is unable to attract customers who additionally require the tying product even if the competing seller's product is superior in price or quality to the defendant's tied product. From the customer's point of view, the practical cost of the competing seller's product is the price the competing seller charges *plus* the cost of forgoing the tying product. With such a **[***9]** thumb on the scale, a competing seller may lose market share even if it can produce the tied product more efficiently than the defendant; the defendant's market power in the tying product, rather than its ability to produce the tied product efficiently, shapes the market for the tied product. *See Fortner Enters., 394 U.S. at 498—99*.

2. The proper standards for non-explicit tying

HN6[] Unlawful ties need not be explicit contractual provisions preventing buyers from purchasing the tied product from third parties. The existence of a tying arrangement depends on the "the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." *Jefferson Parish Hosp., 466 U.S. at 12*. When a defendant adopts a policy that makes it unreasonably **[**16]** difficult or costly to buy the tying product (over which the defendant has market power) without buying the tied product from the defendant, it "forces" buyers to buy the tied product from the defendant and not from competitors. *Data Gen. Corp. v. Grumman Sys. Support Corp., 36 F.3d 1147, 1180 (1st Cir. 1994)*; *Amerinet, Inc. v. Xerox Corp., 972 F.2d 1483, 1500 (8th Cir. 1992)*.

HN7[] In the special case of a tie enforced solely through differential pricing, the tie is not unlawful unless the differential pricing is the economic equivalent of selling the tied product below the defendant's cost. This is because differential pricing, unlike other forms of indirect coercion, can be employed legitimately without illegal anticompetitive influence from the defendant's control over the tying product market. In general, the ability of the defendant to impose the threat that creates the "forcing" depends on buyers' not being able to turn elsewhere for the tying product. For example, ***HN8***[] an explicit tie has a coercive effect so long as buyers cannot turn elsewhere for the tying product because buyers who need the tying product may have no option but to purchase the tied product from the defendant. But if the defendant merely offers a discount on the tying good to buyers who also purchase the tied good, then buyers are only "forced" to buy the tied **[**17]** good from the defendant if they cannot purchase the tied good elsewhere at a price low enough to offset the forgone discount for the tying product. The defendant uses its market power over the tying good to shift the discount from the tied good to the tying good, but this in itself does not "force" buyers to purchase the tied product any more than a discount on the **[***10]** tied product would. It follows that a discount on the tied product amounts to unfair competition only if the defendant is selling below cost. **[*273]** *See Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*.

This analysis is the same as the Ninth Circuit's analysis of bundled discounts, an analogous pricing policy governed by *§ 2* rather than *§ 1* of the Sherman Act. ***HN9***[] In a bundled discount, the seller offers two products together (the bundle) at a price lower than the sum of the prices of the two products sold separately. It is the equivalent in economic terms to a tie enforced entirely through differential pricing, since in both cases customers pay less for the tied and tying products if they buy both from the defendant seller. The Ninth Circuit has adopted a "discount attribution" standard to determine whether a bundled discount is an unlawful "attempt to monopolize" under *§ 2* of the Sherman **[**18]** Act, *15 U.S.C. § 2*:

> [T]he full amount of the discounts given by the defendant on the bundle are allocated to the competitive product or products. If the resulting price of the competitive product or products is below the defendant's incremental cost to produce them, the trier of fact may find that the bundled discount is exclusionary for the purpose of *§ 2*. This standard makes the defendant's bundled discounts legal unless the discounts have the potential to exclude a *hypothetical* equally efficient producer of the competitive product.

Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 906 (9th Cir. 2008) (emphasis in original). The court justified the rule—which is identical to the one we find applicable here—by noting that a bundled discount is only equivalent to an unlawful tie when the discount attribution standard is met. *Id. at 900—01* (citing 3 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 749b2, at 332 (Supp. 2006)).

The *Cascade Health* analysis of bundled discounting logically applies to the tying arrangement at issue here—where the only tying mechanism is differential pricing—even though the *Cascade Health* court did not explicitly apply the discount attribution standard to tying. The plaintiff in *Cascade Health* alleged both tying under *§ 1* and unlawful bundled discounting **[**19]** under *§ 2*. In its analysis of the district court's grant of summary judgment for the defendant on the tying claim, the Ninth Circuit did not directly apply the discount attribution standard, but instead ruled that there was sufficient "evidence of economic coercion" to withstand summary judgment. *Id. at 915*. The court noted, in part, evidence that one of the defendant's sales "made no **[***11]** economic sense," which suggested that the buyer was "coerc[ed]," or did "something that he would not do in a competitive market." *Id*. When differential pricing is the only means of coercion, results other than what a competitive, unbundled market would achieve are possible only if the discount attribution standard is met and the defendant is in effect selling the tied good below cost. Otherwise, the discount on the bundle of the tied and tying products is equivalent to fair price competition in the tied product market. Without this result, economically identical behavior would be treated differently under *§§ 1* and *2* of the Sherman Act, even though both portions of the legislation prohibit anticompetitive conduct.

The Ninth Circuit's analysis in *Cascade Health* is more compelling than that of the Third Circuit in *LePage's, Inc. v. 3M, 324 F.3d 141, 154—57 (3d Cir. 2003)* (en banc). **[**20]** In that case, the court declined to apply a cost-based analysis because competitors may be unable to "compensate [buyers] for the foregone [tying product] discount" even when the bundled pricing scheme "yield[s] aggregate prices above cost." *Id. at 155* (quoting Phillip E. Areeda & Herbert **[*274]** Hovenkamp, ***Antitrust Law*** ¶ 794, at 83 (Supp. 2002)). But a bundled pricing scheme may be unlawful under the discount attribution standard even if the bundle's aggregate price is above cost, so long as the discount is significant enough to take the competitive (or tied) product's price below cost. And when the discount attribution standard is met, an equally efficient competitor will be unable to compensate buyers for the forgone tying product discount. Thus the discount attribution standard addresses the concerns that prevented the Third Circuit from applying a cost-based analysis.

The reasoning in our en banc decision in *NicSand, Inc. v. 3M Co., 507 F.3d 442 (6th Cir. 2007)* (en banc), further supports applying a discount attribution standard for ties enforced purely through differential pricing. In *NicSand*, the defendant 3M entered the automotive sandpaper manufacturing market, in which the plaintiff NicSand had until then been **[**21]** the dominant player, by offering a variety of pricing and contract incentives to retailers to carry its product, often exclusively. These did not include tying or bundled discounts, but instead consisted of rebates and long-term exclusive contracts. *Id. at 448*. NicSand sued, alleging that 3M's contracting practices constituted an unlawful attempt to monopolize the automotive sandpaper market under *§ 2* of the Sherman Act. *Id. at 449*. NicSand never alleged that 3M's **[***12]** pricing was predatory or below cost. *Id. at 458*. The en banc court held that NicSand had failed to plead an antitrust injury. *Id. at 459*. Although NicSand was obviously injured by competition from 3M, the point was that it was injured by *competition*, not by anticompetitive pricing or conduct. *Id. at 455*. The various incentives and contract structures 3M offered the retailers were in fact typical of the terms required by retailers, so 3M's pricing was simply fair competition. *Id. at 452—54*. This analysis suggests that for Collins to have a case, it must have suffered the type of injury that "the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful." *Id. at 450* (*quoting* *Brunswick Corp. v. Pueblo Bowl—O—Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. This will be the case if it **[**22]** suffers harm not just "as a competitor in the marketplace," but also "as a defender of marketplace competition." *Id. at 455* (quoting *Indeck Energy Servs. v. Consumers Energy Co., 250 F.3d 972, 977 (6th Cir. 2000))*. But so long as Kodak's pricing policy is the equivalent of offering an above-cost discount on ink, equally efficient competitors will not be forced out of the market. The discount attribution standard thus provides the test for determining whether a plaintiff challenging a competitor's tie that is enforced through differential pricing has antitrust standing under *NicSand*.

Relying in part on *NicSand*, Kodak argues that the relevant measure of costs is Collins' costs, not Kodak's. That is, so long as Collins can compete with Kodak, Kodak's pricing structure is not anticompetitive. This position would have unfortunate consequences and misreads *NicSand*. The correct measure of cost is the defendant's—Kodak's—cost. It is true that, in *NicSand*, we referred repeatedly to NicSand's high profit margins and likely ability to compete with 3M. *See* *id. at 452—55, 457*. However, we implicitly defined predatory pricing as pricing "below cost with the goal of recouping [the defendant's] losses by charging monopolistic prices later." *Id. at 452*. This definition makes no sense if "cost" refers to the plaintiff's **[**23]** cost, because then it is not certain that the defendant would have a loss to recoup. The defendant suffers a loss in this context if and only if it sells below its **[*275]** own cost. The better reading of *NicSand* is that we referred to NicSand's profit margins in order to illustrate the point that 3M's pricing policy opened the door for healthy price competition benefitting consumers. Kodak suggests that Collins' costs be used on the assumption that Collins has a lower cost of production than Kodak, in which case selling below Collins' cost would always leave Kodak with a loss. But this finds no support in *NicSand* (or other caselaw), which never considers whether the **[***13]** plaintiff or the defendant is in fact the more efficient producer. Rather, Supreme Court precedent on predatory pricing explicitly states a requirement that a plaintiff suing its rival "must prove that the prices complained of are below an appropriate measure of its rival's costs." *Brooke Grp., 509 U.S. at 222*.

Worse, relying on the plaintiff's costs, or the more efficient competitor's costs, would produce an unclear standard that might permit anticompetitive conduct. ***HN10***[] In setting prices, it is important for companies to have clear guidelines. *Pac. Bell Tel. Co. v. Linkline Commc'ns, Inc., 555 U.S. 438, 453, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)*. Every company **[**24]** knows its own cost of production, but the cost of production of its competitors may be less clear. *See Cascade Health, 515 F.3d at 908 n.16*. Further, because competitors often do not sell exactly the same product, using the plaintiff's costs may ignore differences in the competitors' products' value to consumers that might affect the analysis. For example, suppose that Collins has lower ink manufacturing costs than Kodak, but its ink gives off fumes during printing that necessitate increased ventilation in printing facilities. In that case, if Kodak can use a bundled discount to effectively sell its ink at a price equal to Collins' incremental cost, Collins will have to sell ink at a loss to maintain market share because it will have to offset buyers' increased ventilation costs. It would be difficult for courts to determine the hidden costs of a slightly inferior but cheaper product, particularly when, because of idiosyncratic customer preferences, these costs may be different for each customer. When the defendant effectively sells below its own costs, it puts pressure on its competitors to lower prices without actually lowering its own costs or otherwise creating a market efficiency. This is sufficient for the competitors **[**25]** to have antitrust standing.

Applying the discount attribution standard to the present case, there is a likelihood that Collins will be able to prove coercion because the record suggests (though it does not at present prove) that Kodak was in effect selling ink below its incremental cost. Kodak appears to have admitted in its appellate brief and provided proof before the district court that it stood to make more money if customers bought ink from Collins and paid Kodak's unmatched printhead refurbishment price than if they bought Kodak ink and paid the matched printhead refurbishment **[***14]** price. On its face, this suggests, at least as a matter of formal logic,[1] that **[*276]** Kodak's pricing is coercive under the discount attribution standard. Of course, such reasoning must yield to any actual evidence of Kodak's ink costs; the record at a preliminary injunction stage is not complete, and conclusions reached at this stage "are not binding at trial." *Univ. of Texas v. Camenisch, 451 U.S. 390, 395, 101 S. Ct. 1830, 68 L. Ed. 2d 175 (1981)*. But the evidence presently in the record suggests that Collins will be able to prove the coercion element of its tying claim.

---

[1] Kodak's apparent admission is, in effect, that its profit from an unmatched customer is greater than its profit from a matched **[**26]** customer, or that its profit when it is not selling ink is greater than when it is. Treating profit as the price of a good less its cost, the profit from an unmatched customer is the difference between the unmatched price of refurbished printheads (*UPR*) and the cost of refurbished printheads (*CR*):

$UPR - CR$

The profit from a matched customer (who buys both ink and refurbished printheads) is the sum of the difference between the matched price of refurbished printheads (*MPR*) and the cost of refurbished printheads (*CR*) and the difference between the price of ink (*PI*) and the cost of ink (*CI*):

$(MPR - CR) + (PI - CI)$

Kodak's admission can therefore be expressed as an inequality stating that the latter expression—profit from a matched customer—is less than the former—profit from an unmatched customer:

$(MPR - CR) + (PI - CI) < UPR - CR$

This is equivalent to

$PI - (UPR - MPR) < CI$

[This is achieved by adding $CR + CI$ to each side and subtracting UPR from each side.]

Under the discount attribution standard, Kodak's pricing is coercive if it is in effect selling ink below cost, that is, if the price of ink less the total discount (*D*) is less than the cost of ink:

$PI - D < CI$

Since the difference between the **[**27]** unmatched price of refurbishment and the matched price of refurbishment ($UPR - MPR$) is the total discount (*D*) in Kodak's scheme, the above two expressions are identical. Kodak's admission thus logically implies that the pricing structure is coercive under the discount attribution standard. The above analysis is general and may ignore salient features of the Versamark printer aftermarket (for example, the fact that different customers may require different amounts and types of ink per refurbished printhead). But at this preliminary stage, Kodak's statements about its own business provide some evidence that Kodak's pricing policy fails the discount attribution test.

Use of the discount attribution test is neither contradicted nor controlled by our analysis of coercion in *Virtual Maintenance I, 957 F.2d 1318*. In *Virtual Maintenance I*, we stated that the enormous difference in price between the tying product sold on its own and the tying product sold with the tied product was sufficient to establish a tying arrangement because "all rational buyers" of the tying product would also choose to buy the tied product. *Id. at 1323*. But this does not amount to a holding that there is coercion whenever there is a significant price difference, **[**28]** for two reasons.

[*15]** First, under the facts of *Virtual Maintenance I*, the pricing structure was so obviously coercive that there was no need to consider exactly how much of a price differential would constitute coercion giving rise to a tying arrangement. The cost of the tying product on its own ranged from $80,000 to $160,000, whereas the tied and tying product together cost $16,000; it was between five and ten times more expensive not to buy the tied product, even leaving aside the separate cost of the competitor's tied product. *Id. at 1322*. This pricing policy would self-evidently fail the discount attribution standard. Under such circumstances, there was little need to determine exactly when a pricing structure "coerces" buyers to buy the package of the tied and tying products rather than the tying product alone. We also made no attempt to do so, as our analysis on this point consisted of a single sentence with no supporting authority: "A tying arrangement clearly exists here because the large price differential between software support alone and the software support/hardware maintenance package induces all rational buyers of Prime's software support to accept its hardware maintenance." *Id* **[**29]** .

Second, in the logical framework of the decision, this analysis was dicta, unnecessary to determining the outcome of the **[*277]** appeal. The bulk of our opinion focused on the definition of the relevant market and the question of whether the defendant had sufficient market power in the tying product market to enforce a tie. *Id. at 1323—29*. We concluded that the defendant lacked market power, *id at 1329*, meaning that the defendant was entitled to judgment notwithstanding a general jury verdict against it regardless of whether it had attempted to impose a tying arrangement. The Supreme Court vacated our decision and remanded for reconsideration in light of the market power analysis in *Eastman Kodak Co. v. Image Technical Services Inc., 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. *Virtual Maint., Inc. v. Prime Computer, Inc., 506 U.S. 910, 113 S. Ct. 314, 121 L. Ed. 2d 235 (1992)*. On remand, we found that the plaintiff had made a sufficient showing of market power, meaning that a jury could find in its favor *provided that the other elements of an illegal tying arrangement could also be proved. Virtual Maint., Inc. v. Prime Computer, Inc., 11 F.3d 660, 667 (6th Cir. 1993)* (*Virtual Maintenance II*). We did not revisit our analysis of conditioning from *Virtual Maintenance I*, instead "reaffirm[ing] and reinstat[ing]" that portion of the opinion. *Id*. Thus our one-sentence analysis of conditioning in *Virtual Maintenance I* was technically part of the holding in *Virtual Maintenance II*, but in neither opinion did we **[**30]** seriously consider exactly what the standard should be or articulate a clear test.

[*16]** Thus, although our legal analysis differs from that of the district court, there is a likelihood that Collins can meet the coercion part of a claim for anticompetitive tying.

B. Kodak's market power over printheads

There is also a strong likelihood of Collins' success on a finding that Kodak had sufficient market power over printheads to sustain a tying arrangement with ink. Without substantial market power over refurbished printheads, Kodak would be unable to use a threatened printhead price increase to "force" buyers to buy its ink; buyers could simply choose not to buy its printheads. *See generally Jefferson Parish Hosp., 466 U.S. at 17—18*. Kodak concedes that it has a one-hundred-percent share of the refurbished printhead market. However, Kodak argues that it lacks market power over refurbished printheads because competition in the primary printer market and the possibility of customers' ending their use of Versamark printers restrain its ability to raise prices for printheads, while information costs for Kodak's sophisticated Versamark customers are not so high that customers could be unfairly locked in to Kodak's pricing **[**31]** policy. Finally, Kodak also points to the recent history of its printhead and ink pricing in an attempt to argue that it was not able to raise prices. The district court correctly rejected these arguments; none of the facts Kodak points to reflects clear restraint on its market power over Versamark printheads.

The classic indicators of market power in an aftermarket—high information costs and switching costs—are present here. ***HN11***[] The availability of information about aftermarket pricing in the primary market (information costs) and the difficulty of switching to a different primary market supplier (switching costs) can both serve to insulate a primary market from the effects of aftermarket price increases, thus increasing the seller's market power in the aftermarket. *Kodak, 504 U.S. at 477*. There may also be other "actual market realities" (in the words of the *Kodak* Court) serving either to restrict or protect market power in an aftermarket. *Id. at 466*.

[*278] Even though Kodak's customers are sophisticated, information costs here are still high because the customers have been locked in to high aftermarket prices without prior warning. Kodak argues that since its customers were sophisticated businesses intensely concerned with **[**32]** limiting total printing costs, these customers would be able to gather the information about aftermarket pricing they would need to make fully informed decisions. While it is true that the **[***17]** *Kodak* Court emphasized the fact that Kodak's customers in that case were not all sophisticated and that less sophisticated customers would be particularly unable to make decisions that incorporated aftermarket prices, *id. at 475—76*, that does not prevent information costs from being high even for sophisticated customers. Under a fair interpretation of *Kodak*, aftermarket price increases are problematic in particular when they are introduced after customers have been "locked in" to the primary market product. *PSI Repair Servs., 104 F.3d at 820*. The increases are problematic because in that case information about aftermarket costs is hard to come by precisely because of the change in price; the customers do not know and have no way of knowing that the seller will increase aftermarket prices. *Id*. When relevant information is simply unavailable, it is fair to say that information costs are high. This is true even when customers are otherwise sophisticated. Of course if there is a strong suggestion that aftermarket prices may vary in the future, **[**33]** sophisticated customers will be able to negotiate stable prices via contract or else will willingly accept the risk that prices may increase. But there is no indication that Kodak's Versamark customers had any reason to expect sharp variations in aftermarket prices. In particular, as the district court noted, customers had no reason to expect the particular pricing policy Kodak adopted; when the last Versamark printer sold in 2009, Collins and Kodak were not even in direct competition. Thus the district court's finding of likely significant information costs was reasonable.

The district court's finding that the cost of switching from Versamark printers to a competitor was high enough to dampen pressure on aftermarket pricing was also reasonable. The record suggests that a full Versamark system could cost in excess of $2 million, and Collins' expert's report provided analysis indicating that switching costs, including but not limited to the price of a new printing system, could be a significant insulating factor for the aftermarket. Versamark systems typically function for 10-20 years, and users would prefer not to replace them until necessary. It thus appears that Collins will have **[**34]** a strong argument that switching costs might dampen primary market reactions to an increase in printhead costs.

It is far from clear that Kodak's plan to sell its new printer, Prosper, to former Versamark customers significantly disciplines its behavior in the Versamark aftermarket. It is not clear why price increases in *Versamark* printheads would affect the market for *Prosper* printers. The **[***18]** lifecycle pricing analysis of the Supreme Court in *Kodak* under which, when consumers are informed of service market prices, "the service-market price . . . affect[s] equipment demand" applies to a situation in which the equipment whose service cost is increasing is still being sold. *Kodak, 504 U.S. at 473*. That is, if Kodak increases the price of Prosper printheads, potential Prosper printer buyers will know that Prosper printheads are expensive and account for this in their decisionmaking. On the other hand, increasing the price of Versamark printheads at worst hurts Kodak's reputation in the marketplace and hints that **[*279]** something similar might be possible in the future with Prosper printheads, but it certainly does not directly affect the price of Prosper printers or printheads. With the notice provided by the Versamark printhead **[**35]** policy, Prosper customers (who are presumably as sophisticated as Versamark customers) should be able to negotiate guarantees of fair aftermarket pricing. If some evidence suggests that Kodak was concerned about Versamark customers' not buying Prosper printers, that does not in itself prove a lack of market power. The Versamark printhead market thus appears to have been insulated from Kodak's primary markets.

The district court was also correct to place little weight on Kodak's "natural experiments" showing a lack of market power; these are simply inconclusive as to Kodak's market power over Versamark printheads. Kodak's first such "experiment," the fact that its first attempt at a differential pricing policy had failed due to customer resistance, is undercut by its decision to try a similar, though toned-down policy a second time. And the failure itself can be explained by Kodak's marketing department's fear of harming Kodak's reputation—a significant concern, but not one that necessarily reflects a limit on market power. Kodak's second "experiment," the suggestion that Kodak did not raise ink prices after Kodak and Collins began cooperating in the ink market in 2001, also does not **[**36]** show a lack of market power. It is not clear that Kodak's incentives changed when it began cooperating formally. Even without formal agreement, the players in a two-party market may realize that their interests are not served by aggressive price competition, and indeed this might explain why they agreed to cooperate formally. These facts may be relevant to whether Kodak has market power, but on their own they do little to undermine the conclusion that Kodak's one-hundred-percent control of an aftermarket with high information and switching costs constitutes market power.

[*19]** Because Collins appears to have a relatively strong likelihood of success on the two elements of unlawful tying challenged in this appeal, the district court's finding of likelihood of success on the merits—though not its reasoning as to coercion—was correct.

III. The remaining preliminary injunction factors

Turning to the other factors for granting the preliminary injunction at issue in this appeal, the balance of equities supports granting a preliminary injunction in favor of Collins.

A. The harm to Collins

First, absent a preliminary injunction, Collins faces a realistic prospect of irreparable harm. *See* *Chabad of S. Ohio & Congregation Lubavitch v. City of Cincinnati, 363 F.3d 427, 432 (6th Cir. 2004)* (quoting *Blue Cross & Blue Shield Mut. of Ohio v. Blue Cross & Blue Shield Ass'n, 110 F.3d 318, 322 (6th Cir. 1997))* **[**37]** (listing the preliminary injunction factors). Kodak claims that Collins' claim of irreparable harm is speculative at best, because Collins could cut prices to maintain market share, and lost profits are fairly easily calculated and remedied through damages. However, to the extent there is a realistic prospect of lost sales and market share, these losses would harm Collins' goodwill and competitive position in ways that would be hard to compensate and that would support a preliminary injunction. It is appropriate to use a preliminary injunction to avoid harms to goodwill and competitive position. *Basicomputer Corp. v. Scott, 973 F.2d 507, 512 (6th Cir. 1992)*. On the other hand, the record does not conclusively **[*280]** show that, in the early days of the policy, Collins lost a significant amount of sales or market share. Kodak alleges that it had significant difficulty implementing the policy and that relatively few customers switched from Collins to Kodak ink. But Collins need not suffer harm in order to justify a preliminary injunction, so long as there is a realistic prospect of harm in the immediate future. Whether Kodak's policy was ill-conceived or simply a slow starter is difficult to tell, but it was designed in part to encourage customers to switch **[**38]** to Kodak. Given Kodak's significant power in the printhead market, it is at least a reasonable prospect that its policy would eventually have succeeded in cutting into Collins' market share.

[*20] B. Threat of harm to others**

Second, though the factor is not explicitly addressed on appeal, we consider the threat of harm to others, in particular Kodak, posed by the preliminary injunction. Although the injunction as issued by the district court does not perfectly reflect the legal analysis we apply, it is an appropriate interim measure under the circumstances and does not unduly threaten Kodak's interests.

The injunction presently "requires non-differential pricing of Kodak's Versamark printhead refurbishment services for Collins-brand Versamark ink and Kodak-brand Versamark ink customers." Under our analysis, Kodak should be permitted to offer a lower matched price, so long as the pricing policy is not coercive under the discount attribution standard. However, without a measure of Kodak's incremental costs, it is not possible to ascertain whether that standard is complied with. The present injunction, assuming it permits Kodak to negotiate individually with customers so long as Kodak does not **[**39]** condition a lower price on purchases of Kodak ink, prevents Kodak from using an unlawful tying arrangement against Collins but does not prevent it from competing with Collins on a fair playing field. The injunction does not prevent Kodak from discounting its ink across the board to compete with Collins, and Kodak is free (as far as the injunction is concerned) to reap a monopoly profit from its refurbished printhead sales as well, by maintaining high prices across the board for refurbished printheads. Thus it is highly unlikely that the injunction will have the effect of preventing Kodak from competing with Collins.

C. The public interest

Finally, the public interest will be served by the injunction exactly to the extent that Collins ought to prevail on the merits. The public interest is served by the injunction if the injunction is itself pro-competitive; neither side identified additional factors affecting the public interest. This is the case if the behavior the injunction prevents is anticompetitive, which is essentially the question posed by the tying analysis.

The district court accordingly did not abuse its discretion in balancing the equities to grant Collins a preliminary injunction. **[**40]** Collins has shown that it is sufficiently likely to succeed **[***21]** on the merits of its tying claim and that it faces a realistic possibility of irreparable harm absent a preliminary injunction. Further, it has shown that Kodak and others will not be unduly harmed by the injunction. Lastly, the preliminary injunction is in the public interest. The preliminary injunction order of the district court is **AFFIRMED**.

Concur by: MARTHA CRAIG DAUGHTREY

Concur

[*22] CONCURRENCE**

MARTHA CRAIG DAUGHTREY, Circuit Judge, concurring. I concur in the majority's determination that the district court did not abuse its **[*281]** discretion in granting Collins Inkjet Corporation a preliminary injunction in this matter. I write separately, however, to express my belief that the majority's discussion expounds upon considerations not necessary to resolve the dispute now before us. Rather than subscribe to the majority's formulation of a decisional framework applicable to *all* tying arrangements—a broader sweep than is required—I would simply hold that where a defendant, like Eastman Kodak Company, has a 100-percent monopolistic share of the market for a tying product, it may not price a tied product, for which it does not control the relevant market, **[**41]** below its costs without running afoul of the provisions of the Sherman Act. We have been asked to resolve nothing more than that question raised by the unique facts of this case, and I would venture no further in our analysis.

Driessen v. Royal Bank Int'l

United States District Court for the District of Connecticut

March 18, 2015, Decided; March 18, 2015, Filed

Case No. 3:14-cv-1300 (VAB)

Reporter

2015 U.S. Dist. LEXIS 33322 *; 2016-1 Trade Reg. Rep. (CCH) P79,492; 2015 WL 1245575

ROCHELLE DRIESSEN, Plaintiff, v. ROYAL BANK INTERNATIONAL, a brand of the Royal Bank of Scotland Group, Defendant.

Subsequent History: Affirmed by *Driessen v. Royal Bank of Scot., 691 Fed. Appx. 21, 2017 U.S. App. LEXIS 9079 (2d Cir. Conn., May 25, 2017)*

Prior History: *Driessen v. Royal Bank Int'l, 2014 U.S. Dist. LEXIS 200391 (D. Conn., Dec. 17, 2014)*

Core Terms

amended complaint, original complaint, Recommended, antitrust, allegations, concerted action, leave to amend, purported

Counsel: **[*1]** Rochelle Driessen, Plaintiff, Pro se, Surfside, FL.

Judges: Victor A. Bolden, United States District Judge.

Opinion by: Victor A. Bolden

Opinion

RULING OF DISMISSAL

Plaintiff, Rochelle Driessen, filed an Amended Complaint on January 30, 2015 in response to the Court's dismissal of this action without prejudice pursuant to *28 U.S.C. § 1915(e)(2)(B)*. Because the Amended Complaint does nothing to remedy the fatal defect of her original Complaint, the action is now dismissed with prejudice.

The plaintiff initiated this action *pro se* by filing a Complaint [Doc. No. 1] on September 9, 2014 against "Royal Bank International" and moving for leave to proceed *in forma pauperis* [Doc. No. 2]. The case was referred to Magistrate Judge Martinez, who reviewed the plaintiff's filings pursuant to *28 U.S.C. § 1915*. Judge Martinez granted the *in forma pauperis* motion, but recommended that the Complaint be dismissed without prejudice [Doc. No. 6], issuing a Recommended Ruling of Dismissal [Doc. No. 7] on December 17, 2014. The plaintiff timely objected to the Recommended Ruling [Doc. No. 8], but the District Court approved and adopted the Recommended Ruling on January 6, 2015, ordering that if no amended complaint were filed by January 26, 2015, "a judgment will enter dismissing **[*2]** the action with prejudice" [Doc. No. 9]. Even though the plaintiff failed to comply with this Court's January 6 order and filed her Amended Complaint four days after the specified deadline, the Court will entertain the plaintiff's late filing in light of her *pro se* status.

The statute that authorizes the court to grant *in forma pauperis* relief to a plaintiff contains the following protection against abuse of such status: "Notwithstanding any filing fee, or any portion thereof, that may have been paid, the court shall dismiss the case at any time if the court determines that . . . the action . . . (i) is frivolous or malicious; (ii) fails to state a claim on which relief may be granted; or (iii) seeks monetary relief against a defendant who is immune from such relief." *28 U.S.C. § 1915(e)(2)(B)*.

The plaintiff's Amended Complaint [Doc. No. 11] is nearly identical to her original Complaint. The only substantive difference is the addition of conclusory allegations that the defendant's previously alleged actions also violated *Section 1* of the Sherman Antitrust Act, *15 U.S.C. § 1*. *See* Amended Complaint [Doc. No. 11] ¶¶ 6, 14, 15. The plaintiff's original Complaint had been dismissed with leave to amend on the grounds that it failed to **[*3]** "plausibly allege that the defendant had any actual involvement with the purported emails or lottery winnings." Recommended Ruling of Dismissal [Doc. No. 7], at 5. The Amended Complaint contains no new factual allegations against the defendant of any type, including those that would purport to connect the defendant to the purported emails or lottery winnings, and thus does nothing to address the fatal defect in the original Complaint, which was clearly identified and articulated in the Recommended Ruling.

Instead, the plaintiff has alleged an additional violation, of a completely different statutory scheme, predicated on the ***same*** alleged set of facts, which necessarily means that this claim, too, possesses the same fatal pleading defect—there has been no plausible allegation that the defendant was involved in any of the activity alleged.[1] Therefore, this new claim must be dismissed for the same reasons articulated in the Recommended Ruling and the January 6 Order.

The Recommended Ruling noted that the plaintiff's original Complaint "is virtually identical to another complaint the plaintiff filed in this court." Recommended Ruling of Dismissal [Doc. No. 7], at 4. Indeed, there have been numerous cases filed by the plaintiff in which she sued commercial banks implausibly alleging, as she does in this case, that she was entitled to a large sum of money that a bank failed to transfer to her in violation of *15 U.S.C. § 1693(b)* of the Electronic Funds Transfer Act ("EFTA").[2] Adding a claim, unsupported by factual allegations that federal ***antitrust law*** was violated, does not differentiate the complaint in this action from these other complaints in such manner so that it now states a plausible claim on which relief may be granted. All claims in this action shall therefore be dismissed with prejudice.

When faced with a *pro se* plaintiff who is proceeding *in forma pauperis*, a court "must liberally construe his pleadings, and must interpret his complaint to raise the strongest arguments it suggests," *Abbas v. Dixon, 480 F.3d 636, 639 (2d Cir. 2007)*, and further "should not dismiss without granting leave to amend at least once when a

---

[1] Furthermore, the plaintiff has failed to allege any facts that would constitute a violation of *Section 1* of the Sherman Antitrust Act. Setting the price of a service (*see* Amended Complaint [Doc. No. 11] ¶¶ 14-15) does not constitute **[*4]** the type of "price-fixing" that is contemplated by federal ***antitrust law***. *See infra*.

[2] *See, e.g., Driessen v. Natwest Bank PLC*, No. 3:13-cv-00217-MPS (alleging that two banks, including The Royal Bank of Scotland, violated the EFTA by failing to transfer her purported European lottery winnings to her bank account); *Driessen v. United Nations*, No. 1:12-cv-08289-LAP (S.D.N.Y), transferred, **[*5]** No. 1:13-cv-20065-CMA (S.D. Fla.) (claiming that the defendant bank was liable under EFTA for failing to transfer her $1.2 million inheritance check to her bank account after she refused to pay the transfer fee); *Driessen v. Citibank, N.A.*, No. 4:13-cv-04018-LLP (D.S.D.) (alleging that the defendant bank violated EFTA by failing to remit her winnings to her bank account both times that she won the UK National Lottery); *Driessen v. Home Loan State Bank*, No. 1:12-cv-02220-MSK-KLM (D. Colo.) (alleging that the defendant bank violated EFTA by failing to transfer a £ 3.5 million prize to her); *Driessen v. Woodforest Nat'l Bank*, No. 3:12-cv-00091 (S.D. Ohio) (alleging that the defendant bank violated EFTA by failing to transmit $8.3 million allegedly deposited with the defendant bank by the United Nations for her benefit); *Driessen v. S. African Reserve Bank*, No. 4:12-cv-00309-RAS-DDB (E.D. Tex.) (claiming that the defendant bank wrongfully withheld $30.5 million in violation of EFTA); *see also Driessen v. Clinton*, No. 4:12-cv-00227-RC-ALM (E.D. Tex.) (claiming that U.S. Secretary of State Hillary Rodham Clinton informed her that she had inherited $10.5 million from a Nigerian relative but **[*6]** then unlawfully prevented the transfer of funds on the grounds that the funds were terrorist- and drug-related). The Court may take judicial notice of Plaintiff's other lawsuits. *See* ***Kavowras v. N.Y. Times Co., 328 F.3d 50, 57 (2d Cir. 2003)*** ("Judicial notice may be taken of public filings[.]").

liberal reading of the complaint gives any indication that a valid claim might be stated," Gomez v. USAA Fed. Sav. Bank, 171 F.3d 794, 795 (2d Cir. 1999) (quoting Branum v. Clark, 927 F.2d 698, 705 (2d Cir. 1991)). Generally, however, an action may be dismissed with prejudice "where it appears that granting leave to amend is unlikely to be productive." Preston v. New York, 223 F. Supp. 2d 452, 463 (S.D.N.Y. 2002). For example, where amendment would be futile, "denial of an opportunity to amend is within the discretion of the District Court," Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962), and "the standard for denying leave to amend based on futility is the same as the standard for granting a motion to dismiss," Delollis v. Friedberg, No. 13-1628-cv, 600 Fed. Appx. 792, 2015 U.S. App. LEXIS 2140, *5 (2d Cir. Feb. 9, 2015).

In this action, the plaintiff's original Complaint was given a liberal reading and the plaintiff was granted leave to amend. The plaintiff **[*7]** subsequently failed to amend her Complaint in a manner that addressed the Court's clearly-expressed basis for dismissal. There is no basis to believe that granting leave to amend a second time would induce the plaintiff to add the kind of allegations needed to establish a facially-plausible claim when she took no steps to do so with her first opportunity to amend. *See, e.g.,* Brown v. Coach Stores, Inc., 163 F.3d 706, 712 n.4 (2d Cir. 1998) (denying leave to replead because "the district court already gave [plaintiff] an opportunity to file an amended complaint designed to cure the very defect that remains"); Cellular Technical Servs. Co. v. TruePosition, Inc., 609 F. Supp. 2d 223, 246-47 (D. Conn. 2009) (dismissing case with prejudice and without leave to amend because plaintiffs had already been given an opportunity to replead to cure identified deficiencies "and since they did not take advantage of that opportunity, the Court sees no reason to provide yet a third chance to plead [the same element]"). Under these circumstances, the Court determines that further amendment would be futile with respect to all claims in the plaintiff's Amended Complaint that were repeated from her original Complaint.

The new antitrust claim fails because of the same lack of facial plausibility. There are no new factual allegations regarding the defendant. The **[*8]** plaintiff's antitrust allegations amount, in their entirety, to the following:

> Defendant is in violation of 15 USC § 1 . . . by price fixing the cost of transfer fee of £ 650, and price fixing the cost of transfer fee of £ 650 for international transfers that exceeds the sum of one hundred thousand United States dollars under its Anti-Money Laundering Decree. . . . The anti-money laundering programs to guard against money laundering through financial institutions do not provide a fixed price for the international transfer of money pursuant to 31 USC § 5318(h)(1).

Amended Complaint [Doc. No. 11] ¶¶ 14-15. All the conduct alleged here, as throughout the Amended Complaint, was already alleged in the original Complaint, and thus the plaintiff asserts this purported antitrust violation against the defendant based solely on facts previously pleaded. Just as in the original Complaint, there is absolutely nothing in the Amended Complaint connecting the defendant to the conduct alleged to have occurred.

Even construing the Amended Complaint in the most liberal manner imaginable, the plaintiff has also wholly failed to allege a violation of Section 1 of the Sherman Antitrust Act. The statute is by its terms limited to collusive conduct—to **[*9]** contracts, combinations, and conspiracies that restrain the nation's domestic or foreign trade or commerce. *See* 15 U.S.C. § 1. The key inquiry therefore in any case brought under Section 1 is whether the challenged conduct consists of concerted action between separate entities or "conduct that is 'wholly unilateral.'" Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984) (quoting Albrecht v. Herald Co., 390 U.S. 145, 149, 88 S. Ct. 869, 19 L. Ed. 2d 998 (1968)); *see also* VI Phillip Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 1402a, at 10 (3d ed. 2010) ("A sharp distinction between unilateral and concerted action is apparent from the structure of the basic antitrust statute. Sherman Act § 1 reaches concerted action in unreasonable restraint of trade[.]").

A business unilaterally setting the price of a service it provides is not the type of "price fixing" contemplated by federal antitrust prohibitions. In fact, "setting one's own profitmaximizing price is entirely lawful under the antitrust laws." VI Areeda & Hovenkamp ¶ 1402a, at 10. Therefore, in addition to curing the previously-identified defects in this action, the plaintiff would also have had to add plausible allegations of concerted action by the defendant with others in order for this claim to survive. *See* Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 190, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010) ("Section 1 applies only to concerted action that restrains trade. . . . And because **[*10]** concerted action is discrete and distinct, a limit on such activity leaves untouched a vast amount of business conduct."); *Copperweld, 467 U.S. at 775 (1984)* (holding that "the Sherman Act does not prohibit unreasonable restraints of trade as such—but only restraints effected by a contract, combination, or conspiracy—it leaves untouched a single firm's anticompetitive conduct").

In any event, as discussed *supra* with respect to the claims repeated from the original Complaint, allowing the plaintiff to replead concerning the antitrust claim would likewise be futile because the plaintiff has demonstrated no inclination to attempt to plead the necessary facts plausibly tying the defendant to the existing allegations, even when explicitly prompted to do so by the Court. *See* Recommended Ruling of Dismissal [Doc. No. 7], at 5 ("the complaint in this case does not plausibly allege that the defendant bank had any actual involvement with the purported emails or lottery winnings"); *see also* *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* ("A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.").

For the reasons set forth above, the Court **DISMISSES [*11] WITH PREJUDICE** this action pursuant to *28 U.S.C. § 1915(e)(2)(B)* on the ground that the Amended Complaint fails to state a claim upon which relief may be granted.

IT IS SO ORDERED.

/s/ Victor A. Bolden

LexisNexis® Headnotes

Evidence > Judicial Notice > Adjudicative Facts > Facts Generally Known

Evidence > Judicial Notice > Scientific & Technical Facts

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

HN1[] **Adjudicative Facts, Facts Generally Known**

Pursuant to *Fed. R. Evid. 201(b)*, the court may judicially notice a fact that is not subject to reasonable dispute because it: (1) is generally known within the trial court's territorial jurisdiction; or (2) can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned. Of note, the court may take judicial notice at any stage of the proceeding. *Fed. R. Evid. 201(d)*. The Eleventh Circuit has noted that the kinds of things about which courts ordinarily take judicial notice are (1) scientific facts: for instance, when does the sun rise or set; (2) matters of geography: for instance, what are the boundaries of a state; or (3) matters of political history: for instance, who was president in 1958. This process is highly limited because taking judicial notice bypasses the safeguards which are involved with the usual process of proving facts by competent evidence in district court.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

When considering a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss, the court must accept as true the allegations set forth in the complaint drawing all reasonable inferences in the light most favorable to the plaintiff. Even so, a complaint offering mere labels and conclusions or a formulaic recitation of the elements of a cause of action is insufficient.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Evidence > Inferences & Presumptions > Inferences

HN3[] **Complaints, Requirements for Complaint**

A complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. Put another way, a plaintiff must plead factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. This so-called plausibility standard is not akin to a probability requirement; rather, the plaintiff must allege sufficient facts such that it is reasonable to expect that discovery will lead to evidence supporting the claim.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN4[] **Motions to Dismiss, Failure to State Claim**

Even if it is extremely unlikely that a plaintiff will recover, a complaint may nevertheless survive a motion to dismiss for failure to state a claim, and a court reviewing such a motion should bear in mind that it is testing the sufficiency of the complaint and not the merits of the case.

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

HN5[] **Adjudicative Facts, Verifiable Facts**

Courts do, on occasion, take judicial notice of maps. In fact, courts in other circuits commonly take judicial notice of information obtained specifically from Google Maps.

Antitrust & Trade Law > Sherman Act > Scope

HN6[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Antitrust Act declares illegal every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations. *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > Scope

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN7[] Antitrust & Trade Law, Sherman Act

Although the language of *Section 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, seems to create a blanket prohibition on concerted restraint of trade, the Supreme Court has clarified that many forms of concerted action should be evaluated using the rule of reason. Pursuant to that rule, the fact finder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN8[] Sherman Act, Claims

A plaintiff attempting to state a claim under *Section 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, must sufficiently plead the existence of an agreement to restrain trade.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN9[] Sherman Act, Claims

Stating a claim under *Section 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, requires a complaint with enough factual matter (taken as true) to suggest that an agreement was made. Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement. Put another way, the Court is tasked with determining if the complaint contains enough factual heft to plausibly suggest the existence of a conspiracy or agreement. Moreover, although the plaintiff must allege more than a mere opportunity to conspire, courts in the 11th Circuit recognize that most conspiracies are inferred from the behavior of the alleged conspirators.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN10[] Per Se Rule & Rule of Reason, Per Se Violations

Despite the broad language of *Section 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, that provision prohibits only unreasonable restraints on trade. In most cases, the reasonableness of a particular practice is weighed by the fact finder in light of the circumstances surrounding the case. A number of factors are relevant to this inquiry, including specific information about the relevant businesses as well as the restraint's history, nature and effect. In a limited class of cases, however, certain restraints on trade are considered unlawful per se. Such rules are necessary when conduct would always or almost always tend to restrict competition and decrease output. Vertical agreements are scrutinized using the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

HN11[] **Vertical Restraints, Nonprice Restraints**

Film industry clearance agreements are reasonable when used for the proper purpose if they are not unduly extended in area or duration. There are seven factors a court should consider when evaluating the reasonableness of a clearance agreement: (1) the admission prices of the theatres involved, as set by the exhibitors; (2) the character and location of the theatres involved, including size, type of entertainment, appointments, transit facilities, etc.; (3) the policy of operation of the theatres involved, such as the showing of double features, gift nights, give-aways, premiums, cut-rate tickets, lotteries, etc.; (4) the rental terms and license fees paid by the theatres involved and the revenues derived by the distributor-defendant from such theatres; (5) the extent to which the theatres involved compete with each other for patronage; (6) the fact that a theatre involved is affiliated with a defendant-distributor or with an independent circuit of theatres should be disregarded; and (7) there should be no clearance between theatres not in substantial competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

HN12[] **Per Se Rule & Rule of Reason, Sherman Act**

Interbrand competition is the competition among the manufacturers of the same generic product and is the primary concern of ***antitrust law***. The extreme example of a deficiency of interbrand competition is monopoly, where there is only one manufacturer. In contrast, intrabrand competition is the competition between the distributors wholesale or retail of the product of a particular manufacturer. The degree of intrabrand competition is wholly independent of the level of interbrand competition confronting the manufacturer. Thus, there may be fierce intrabrand competition among the distributors of a product produced by a monopolist and no intrabrand competition among the distributors of a product produced by a firm in a highly competitive industry. But when interbrand competition exists, it provides a significant check on the exploitation of intrabrand market power because of the ability of consumers to substitute a different brand of the same product. Importantly, courts sustaining vertical agreements under the rule of reason have done so by recognizing that such restrictions promote interbrand competition by allowing the manufacturer to achieve certain efficiencies in the distribution of his products. In regard to film industry clearance agreements specifically, courts have made this same observation.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

HN13[] **Vertical Restraints, Nonprice Restraints**

Film industry clearance agreements force theatres that are denied a license to certain movies to show alternatives, thereby increasing movie choices for consumers.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Vertical Restraints

HN14[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

In order to consider a rule of reason claim based on a vertical restraint, a court must conduct a systematic comparison of the negative effects of the restraint on competition and compare that with the positive effects on competition stemming from the restraint.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN15[] **Sherman Act, Claims**

To state a claim under *Section 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, a plaintiff must allege antitrust injury, i.e. an injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants acts unlawful. Further, because antitrust laws are not intended to protect competitors, a plaintiff asserting antitrust violations must allege actual or potential injury to the competition. In other words, the conduct at issue must impact the market rather than the competitors therein.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN16[] **Sherman Act, Claims**

Actual anticompetitive effects include, but are not limited to, reduction of output, increase in price, or deterioration in quality. The quintessential harm is not higher prices; rather, consumer welfare, understood in the sense of allocative efficiency, is the animating concern of the Sherman act. Therefore, a plaintiff alleging actual harm to competition should point to the specific damage done to consumers in the market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN17[] **Relevant Market, Geographic Market Definition**

Even assuming a plaintiff shows actual or potential harm to competition, he must identify the relevant market in which the harm occurs. Importantly, the relevant market has both product and geographic components. The parameters of these markets are considered questions of fact, but antitrust plaintiffs must nevertheless present enough information in their complaint to plausibly suggest the contours of the relevant geographic and product markets.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN18[] **Relevant Market, Geographic Market Definition**

Geographically, the relevant market is defined as the area in which the product or its reasonably interchangeable good is traded. When determining the geographic market, such economic and physical barriers to expansion as transportation costs, delivery limitations and customer convenience and preference must be considered. Moreover, markets involving services that can only be offered from a particular location, like those provided by hospitals, theaters, and ski areas, will often be defined by how far consumers are willing to travel.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN19[] **Relevant Market, Product Market Definition**

The relevant product market is determined by the availability of substitutes to which consumers can turn in response to price increases and other existing or potential producer's ability to expand output. In addition to examining the uses to which the product is put by consumers in general, the court should give special consideration to evidence of the cross-elasticity of demand and reasonable substitutability of the products.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN20[] **Relevant Market, Product Market Definition**

The cross-elasticity of demand measures the change in the quantity demanded by consumers of one product relative to the change in price of another. A high cross-elasticity of demand (that is, consumers demanding proportionately greater quantities of Product X in response to a relatively minor price increase in Product Y) indicates that the two products are close substitutes for each other—that is, consumers derive comparable utility from equivalent consumption of either one. For purposes of the relevant product market analysis, a high cross-elasticity of demand indicates that the two products in question are reasonably interchangeable substitutes for each other and hence are part of the same market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN21[] **Relevant Market, Product Market Definition**

The test for a relevant product market is not commodities reasonably interchangeable by a particular plaintiff, but commodities reasonably interchangeable by consumers for the same purpose.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN22[] **Standing, Requirements**

Standing is a question of law. Importantly, antitrust standing is not simply a search for an injury in fact; it involves an analysis of prudential considerations aimed at preserving the effective enforcement of the antitrust laws. To conduct this analysis, a court must evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN23[] **Actual Monopolization, Anticompetitive & Predatory Practices**

To state a prima facie case for monopolization, a plaintiff must plead sufficient facts to infer: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. In this context, monopoly power is the power to control prices in or exclude competition from the relevant market. Further, to satisfy the second element of a monopolization claim, the plaintiff must allege predatory or exclusionary acts or practices that have the effect of preventing or excluding competition within the relevant market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN24[] **Attempts to Monopolize, Elements**

A plaintiff states a claim for attempted monopolization by alleging sufficient facts to suggest predatory or anticompetitive conduct, specific intent to monopolize, and a dangerous probability of achieving monopoly power in the relevant market. As with claims under *Section 1* of the Sherman Antitrust Act, *15 U.S.C.S. § 1*, the relevant market has both product and geographic components.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN25[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The predatory or anticompetitive conduct criterion captures the critical antitrust idea of harm to competition, rather than to competitors. This requirement is perhaps the single most important aspect of attempted monopolization.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN26[] **Relevant Market, Geographic Market Definition**

To state a claim for monopolization, a plaintiff must first plead sufficient facts to infer the defendant possesses monopoly power in the relevant market. Defining the relevant market is therefore a necessary component of analyzing market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN27[] Actual Monopolization, Monopoly Power

Monopoly power is the power to control prices in or exclude competition from the relevant market. Further, market share is frequently used in litigation as a surrogate for market power. High market share, coupled with sufficient barriers to market entry, can result in a finding of market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN28[] Actual Monopolization, Monopoly Power

Although a market share of less than 50% is inadequate as a matter of law to constitute monopoly power, the analysis is somewhat fluid. In fact, the Supreme Court has noted that, in some circumstances, over two-thirds of the market is a monopoly. Companies that have been found to possess monopoly power usually have enjoyed market shares greater than seventy per cent, but whether such power actually exists is a quintessential question of fact.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN29[] Actual Monopolization, Monopoly Power

Allegations of market share alone are insufficient to establish monopoly power. In fact, even a market share of 100% is not determinative. Relevant determinants of the market power of a prospective predator include its absolute and relative market shares, and those of competing firms; the strength and capacity of current competitors; the potential for entry; the historic intensity of competition; and the impact of the legal or natural environment.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

HN30[] Exclusive & Reciprocal Dealing, Exclusive Dealing

"Circuit dealing" is not specifically defined by case law, but it occurs when a defendant pools the purchasing power of an entire circuit to eliminate the possibility of bidding for films on a theatre by theatre basis. In Paramount Pictures, the Supreme Court addressed circuit dealing in the context of film licensing agreements that cover exhibition in two or more theatres in a particular circuit. Notably, the Court found such agreements to be unlawful because they eliminate the opportunity for the small competitor to obtain the choice first-run films, and put a premium on the size of the circuit thereby undermining the competitive process. Certain circuit deals constitute unlawful monopoly leveraging, a form of anticompetitive conduct which involves a monopolist using its monopoly power in one market to gain a competitive advantage in another. Such conduct is unlawful because the pooling of the purchasing power of an entire circuit in bidding for films is a misuse of monopoly power insofar as it combines the theatres in closed towns with competitive situations.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN31[] **Scope, Monopolization Offenses**

A man with a monopoly of theatres in any one town commands the entrance for all films into that area. If he uses that strategic position to acquire exclusive privileges in a city where he has competitors, he is employing his monopoly power as a trade weapon against his competitors. It may be a feeble, ineffective weapon where he has only one closed or monopoly town. But as those towns increase in number throughout a region, his monopoly power in them may be used with crushing effect on competitors in other places. Though he makes no threat to withhold the business of his closed or monopoly towns unless the distributors give him the exclusive film rights in the towns where he has competitors, the effect is likely to be the same where the two are joined. When the buying power of the entire circuit is used to negotiate films for his competitive as well as his closed towns, he is using monopoly power to expand his empire. And even if we assume that a specific intent to accomplish that result is absent, he is chargeable in legal contemplation with that purpose since the end result is the necessary and direct consequence of what he did. Both forms of circuit dealing are considered per se violations of the Sherman Act.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN32[] **Scope, Monopolization Offenses**

When a film exhibitor uses the buying power of its entire circuit to negotiate films for its competitive and closed markets, it is guilty of circuit dealing. This is true even when the exhibitor does not expressly threaten distributors that it will withhold the business of its closed or monopoly markets unless it is given preferential treatment.

Torts > ... > Business Relationships > Intentional Interference > Elements

HN33[] **Intentional Interference, Elements**

To state a claim for tortious interference with business relations under Georgia law, the plaintiff must show that the defendant: (1) acted improperly and without privilege; (2) acted purposefully and maliciously with the intent to injure; (3) induced a third party not to enter into or continue a business relationship with the plaintiff; and (4) caused the plaintiff some financial injury. In this context, improper actions constitute conduct wrongful in itself; thus, improper conduct means wrongful action that generally involves predatory tactics such as physical violence, fraud or misrepresentation, defamation, use of confidential information, abusive civil suits, and unwarranted criminal prosecutions.

Contracts Law > Defenses > Illegal Bargains

Torts > Business Torts > Unfair Business Practices

HN34[] **Defenses, Illegal Bargains**

Ga. Const. art. III, § 6, para. 5 and *O.C.G.A. § 13-8-2* declare contracts in restraint of trade void as against public policy. Although these provisions merely render such agreements unenforceable and provide no cause of action for damages to those who are parties thereto, Georgia recognizes a common law tort action in favor of third parties who are injured by a conspiracy in restraint of trade.

Contracts Law > Defenses > Illegal Bargains

Torts > ... > Commercial Interference > Business Relationships > Intentional Interference

HN35[] **Defenses, Illegal Bargains**

Courts in the 11th Circuit allow plaintiffs to state claims for both tortious interference and for violations of Georgia law prohibiting contracts in restraint of trade.

Antitrust & Trade Law > Procedural Matters

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN36[] **Antitrust & Trade Law, Procedural Matters**

The 11th Circuit disfavors *Fed R. Civ. P. 12(b)(6)* dismissals in fact-intensive antitrust disputes.

Opinion

[*1325] ORDER

Plaintiffs Cobb Theatres III, LLC and Cobb Theatres IV, LLC (hereinafter "Plaintiffs" or "Cobb") brought this action against AMC Entertainment Holdings, Inc., AMC Entertainment, Inc., and American Multi-Cinema, Inc., (collectively "Defendants" or "AMC") for alleged violations of the Sherman Antitrust Act and various state laws. The case is presently before the Court on Defendants' **[**2]** Motion to Dismiss for Failure to State a Claim (Doc. No. 19), Plaintiffs' Notice of Objection and Motion to Strike (Doc. No. 24), and Plaintiffs' Motion for Leave to File Response to

Defendants' Second Notice of Supplemental Authority (Doc. No. 42). For the reasons that follow, the Court grants Plaintiffs' Motion for Leave to File Response, denies Plaintiffs' Motion to Strike, and denies Defendants' Motion to Dismiss.

I. BACKGROUND

A. Factual Background

As it must, the Court accepts as true the factual allegations set forth in the Complaint and draws all reasonable inferences in the light most favorable to Plaintiffs.

Cobb operates seven upscale movie theatres throughout the country—known as **[*1326]** "CinéBistros"—that combine the experience of fine dining with film exhibition. (Compl. ¶ 37, Doc. No. 1.) One such venue, the CinéBistro at Town Brookhaven (the "Brookhaven CinéBistro"), is located in Brookhaven, Georgia. (Id. ¶ 6.) The Brookhaven CinéBistro features seven screens and has the capacity to seat 758 patrons. (Id. at 37.) AMC, on the other hand, is one of the largest theatre companies in the United States. (Id. ¶¶ 10, 11.) Relevant to this case, AMC operates two theatres in Buckhead, a neighborhood **[**3]** in Atlanta, Georgia adjacent to the City of Brookhaven. (Id. ¶¶ 35, 36.) The first theatre, the AMC Phipps Plaza 14, boasts fourteen screens and 1,046 seats. (Id. ¶ 35.) The second, a smaller venue known as the AMC Fork & Screen Buckhead, has just six screens and 650 seats. (Id. ¶ 36.) Together, the Brookhaven CinéBistro and AMC's two Buckhead theatres comprise "the Buckhead-Brookhaven zone." (Id. ¶ 39.) In the film industry, a "zone" is a geographic area identified by a distributor for purposes of licensing films.[1] (Id. ¶ 27.) Theatres within each zone compete with one another to exhibit films to the public. (Id.)

As a general matter, the Complaint alleges considerable distinctions between the respective movie viewing experiences offered by Cobb and AMC. (Id. ¶¶ 38, 47.) On the one hand, Plaintiffs highlight the amenities offered at their theatres, including "valet parking on weekends and holidays, reserved seating, elegant and sophisticated auditoriums and lounges, high-back leather rocking chairs, in-theatre, full-service **[**4]** dining prior to the start of the film, a freshly prepared and seasonal American bistro menu and full bar (in addition to traditional movie theatre snacks), 100% digital cinema and theatre technology, 3-D capabilities, and no on-screen advertisements." (Id. ¶ 38.) Plaintiffs also point out that CinéBistros offer an adults-only environment after 6:00 P.M. (Id.) In contrast, the Complaint alleges Defendants deter theatre patrons "with on-screen advertising, harsh neon lighting, limited food and beverage offerings (and distracting food and beverage service throughout the entire film-play period at the AMC Fork & Screen Buckhead), accommodation of loud children and young people who can destroy the movie-going experience for others, and generally less pleasant atmosphere." (Id. at 47.)

Despite the alleged superior quality of their theatres, Plaintiffs contend several major film distributors have given Defendants preferential treatment thus depriving the Brookhaven CinéBistro of a fair opportunity to compete with AMC's Buckhead theatres. (Id. ¶ 48.) According to Plaintiffs, Defendants have ensured such treatment by engaging in the type of anti-competitive conduct prohibited by the Sherman Antitrust **[**5]** Act and various Georgia laws. (Id. ¶¶ 100-53.)

The events underlying this suit began shortly after Cobb and AMC competed to lease the space where the Brookhaven CinéBistro is currently located. (Id. ¶ 54.) Unhappy after losing that battle to Plaintiffs, AMC began requesting "clearances" for its nearby Buckhead theatres. (Id. ¶¶ 54-79.) The term "clearance" refers to a practice in the film industry whereby a distributor agrees to license a particular film to only one theatre in a given geographic area rather than engaging in a "day-and-date" release, i.e. allowing multiple theatres within a region to exhibit the same film on the same day. (Id. ¶ 29.) Prior to 2009, AMC did not request clearances over its nearby competitors. (Id. ¶ 55.) However, after a significant restructuring **[*1327]** of management, the theatre chain purportedly changed

---

[1] A "distributor" is an entity that markets, promotes, and licenses films. (Compl. ¶ 21.) Sony Pictures and Warner Brothers are examples of film distributors. (Id. ¶ 61.)

its policy and began a nationwide campaign to demand clearances over film exhibitors to "[insulate] itself from competition on the merits." (Id. ¶¶ 1, 54-79.)

More specifically, Plaintiffs contend the Senior Vice President and Head Film Buyer for AMC's Buckhead theatres sent a letter to "the major film distributors" in 2010 stating:

> [The Brookhaven CinéBistro] **[**6]** is 1.9 miles northeast of our AMC PHIPPS 14 and 2.5 miles northeast of our AMC FORK & SCREEN BUCKHEAD 6, and thus we will not play day-and-date with a venue at this location . . . . We have played 100% of your wide commercial releases and look forward to continuing that arrangement going forward.

(Id. ¶ 58.) The Complaint alleges this letter operated as a demand by AMC that distributors refuse to license certain films to the Brookhaven CinéBistro or, alternatively, risk damaging their relationships with one of the nation's largest film exhibitors. (Id. ¶ 59.) Plaintiffs further contend that, as a direct result of the letter, several major distributors began to honor AMC's demand for preferential treatment and allocated the Brookhaven CinéBistro fewer high-grossing, popular films.[2] (Id. ¶ 62.)

Plaintiffs also assert Defendants have interfered with their attempts to lease new space near existing AMC theatres. (Id. ¶ 87.) Specifically, Plaintiffs allege that AMC threatens landlords it will request clearances for its nearby theatres if the landlord decides to lease space to one of AMC's competitors, including Cobb. (Id.) Landlords are thus deterred from leasing to those competitors out of fear that the threatened clearances would make it difficult for the new theatre to license films thereby reducing customer traffic to the landlord's property. (Id.)

Despite their purported ability to offer moviegoers an overall better film viewing experience, Plaintiffs argue they have been deprived of a fair opportunity to compete with AMC's Buckhead theatres. Interestingly, Plaintiffs allege Defendants' conduct is not unique to the specific theatres at issue in this case but is instead a part of nationwide strategy to employ anticompetitive tactics to gain an unfair advantage in the marketplace.[3] As necessary, the Court will discuss additional facts in its analysis below. **[**8]**

B. Procedural Background

On January 22, 2014, Cobb filed suit in this Court seeking relief for AMC's alleged violations of the Sherman Antitrust Act and various Georgia laws. The Complaint alleges: 1) Defendants violated *sections 1* and/or *2* of the Sherman Act by engaging in "circuit dealing" (Count I); 2) Defendants violated *section 2* of the Sherman Act by engaging in monopolization and/or unlawful exercise of monopoly power (Count II); 3) Defendants violated *section 2* of the Sherman Act by attempting to engage in monopolization; 4) Defendants violated *section 1* of the Sherman Act by engaging **[*1328]** in "exclusive dealing" (Count IV); and 5) Defendants violated various Georgia laws (Counts V and VI). Defendants subsequently filed the present Motion to Dismiss for Failure to State a Claim (Doc. No. 19) on April 1, 2014.

In addition to filing a response, Plaintiffs filed a Notice of Objection and Motion to Strike (Doc. No. 24) Exhibit A to Defendants' Motion to Dismiss and all arguments relying **[**9]** thereon. The exhibit at issue is a Google map printout showing the location of various theatres in the Atlanta area. Citing the map, Defendants ask the Court to take judicial notice of the fact that "[t]he Regal Hollywood 24, Regal Perimeter Point Stadium 10, Regal Atlantic

---

[2] To support this contention, Plaintiffs cite the time period between January 1, 2013 and October 27, 2013, during which Sony Pictures licensed Elysium and Captain Phillips to the Brookhaven CinéBistro. (Compl. ¶ 61.) During those same dates, "Sony Pictures licensed to one or both of AMC's Buckhead theatres After Earth, The Amazing Spider-Man, Battle of the Year, The Call, Carrie, Evil Dead, Grown **[**7]** Ups 2, The Mortal Instruments, One Direction: This Is Us, This is the End, White House Down, and Zero Dark Thirty." (Id.)

[3] Concerning a space located in Miami, Florida, Plaintiffs allege the President and CEO of AMC told the President and CEO of Cobb that AMC would use its "full weight and power" to prevent a CinéBistro from opening in that location. (Compl. ¶ 91.)

Station Stadium 16, and United Tara Cinemas 4 are all approximately 15 minutes away [from the Brookhaven CinéBistro], according to the 'Directions' feature on Google Maps." (Mem. of Law in Supp. of Defs.' Mot. to Dismiss 2-3, Doc. No. 19-1.)

On January 15, 2015, the parties appeared for oral argument regarding the motions before the Court. Three weeks later, Defendants filed a Notice of Supplemental Authority (Doc. No. 41) to which Plaintiffs seek leave to file a response (Doc. No. 42). For good cause shown, the Court **GRANTS** Plaintiffs' Motion for Leave to File Response to Defendants' Second Notice of Supplemental Authority (Doc. No. 42). The Court notes that Plaintiffs have already submitted their response, and the Court has considered the arguments therein.

II. STANDARDS OF REVIEW

A. Judicial Notice

HN1[] Pursuant to *Federal Rule of Evidence 201(b)*, "[t]he court may judicially notice a fact that is not subject to reasonable dispute because it: (1) is generally **[**10]** known within the trial court's territorial jurisdiction; or (2) can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned." Of note, "[t]he court may take judicial notice at any stage of the proceeding." *Fed. R. Evid. 201(d)*. The Eleventh Circuit has noted that "the kinds of things about which courts ordinarily take judicial notice are (1) scientific facts: for instance, when does the sun rise or set; (2) matters of geography: for instance, what are the boundaries of a state; or (3) matters of political history: for instance, who was president in 1958." *Shahar v. Bowers, 120 F.3d 211, 214 (11th Cir. 1997)*. This process is highly limited because "taking judicial notice bypasses the safeguards which are involved with the usual process of proving facts by competent evidence in district court." Id. These standards guide the Court's inquiry as to whether Exhibit A should be stricken from Defendants' Motion to Dismiss.

B. Motion to Dismiss

HN2[] When considering a 12(b)(6) motion to dismiss, the Court must accept as true the allegations set forth in the complaint drawing all reasonable inferences in the light most favorable to the plaintiff. *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555-56, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*; *U.S. v. Stricker, 524 F. App'x 500, 505 (11th Cir. 2013)* (per curiam). Even so, a complaint offering mere "labels and conclusions" or "a formulaic **[**11]** recitation of the elements of a cause of action" is insufficient. *Ashcroft v. Iqbal, 556 U.S 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 555*); accord *Fin. Sec. Assurance, Inc. v. Stephens, Inc., 500 F.3d 1276, 1282-83 (11th Cir. 2007)*.

Further, ***HN3***[] the complaint must "contain sufficient factual matter, accepted as true, 'to state a claim to relief that is plausible on its face.'" Id. (citing *Twombly, 550 U.S. at 570*). Put another way, **[*1329]** a plaintiff must plead "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Id. This so-called "plausibility standard" is not akin to a probability requirement; rather, the plaintiff must allege sufficient facts such that it is reasonable to expect that discovery will lead to evidence supporting the claim. Id.

HN4[] Even if it is extremely unlikely that a plaintiff will recover, a complaint may nevertheless survive a motion to dismiss for failure to state a claim, and a court reviewing such a motion should bear in mind that it is testing the sufficiency of the complaint and not the merits of the case. *Twombly, 550 U.S. at 556*; see *Wein v. Am. Huts, Inc., 313 F. Supp. 2d 1356, 1359 (S.D. Fla. 2004)*. With these principles in mind, the Court considers Defendants' Motion to Dismiss.

III. ANALYSIS

Before considering Defendants' Motion to Dismiss, the Court must first address Plaintiffs' Notice of Objection and Motion to Strike (Doc. No. 42).

A. Motion to [12] Strike**

As mentioned briefly above, Defendants attached a Google map printout to their Motion to Dismiss purporting to show the geographic location of various theatres around Atlanta, including the Brookhaven CinéBistro and AMC's Buckhead theatres. (Mem. in Supp. of Defs.' Mot. to Dismiss Ex. A, Doc. No. 19-2.) Relying on this exhibit, Defendants argue the Court should take judicial notice of the geographic proximity of certain theatres to the Brookhaven CinéBistro. Taking it one step further, Defendants specifically aver that these other theatres are "approximately 15 minutes away [from the Brookhaven CinéBistro], according to the 'Directions' feature on Google Maps." (Id. 3.)

Plaintiffs acknowledge that ***HN5***[] courts do, on occasion, take judicial notice of maps. *United States v. Proch, 637 F.3d 1262, 1266 n.1 (11th Cir. 2011)*. In fact, courts in other circuits commonly take judicial notice of information obtained specifically from Google Maps. E.g., *Pahls v. Thomas, 718 F.3d 1210, 1216 n.1 (10th Cir. 2013)* (taking judicial notice of a Google map to show the general location of events relevant to the litigation); *Global Control Sys., Inc. v. Luebbert, No. 4:14-CV-657-DGK, 2015 U.S. Dist. LEXIS 20949, 2015 WL 753124, *1 n.1 (W.D. Mo. Feb. 23, 2015)* (taking judicial notice of a Google Maps search to establish the approximate distance between two locations). Plaintiffs do, however, contest the use **[**13]** of Defendants' exhibit to establish that the driving time between the Brookhaven CinéBistro and certain other theatres is approximately fifteen minutes.

As Plaintiffs note in their Motion to Strike, the exhibit in question does not purport to show the driving time between any two locations. Rather, it is simply a map showing the geographic locations of various theatres in the area surrounding Atlanta. In fact, the map does not provide a scale from which the Court could determine the distance in miles between any two points. Defendants, without demonstrating how they used Google Maps to make such a determination, cite the exhibit in question for the proposition that there are four theatres, other than AMC's Buckhead locations, within a fifteen minute drive of the Brookhaven CinéBistro. The Court declines to take judicial notice of this "fact." Defendants have not submitted evidence establishing the drive time between the Brookhaven CinéBistro and any other location. Further, the Court is skeptical as to whether driving times are facts that "can be accurately and readily determined" using Google Maps. *Fed. R. Evid. 201(b)(2)*; But see *Rindfleisch v. Gentiva Health Sys., Inc., 752 F. Supp. 2d 246, 259 n.13 (E.D.N.Y. 2010)* ("The Court **[*1330]** takes judicial notice of the fact that . . . the estimated driving **[**14]** time from Auburn to Central Islip [calculated using Google Maps] is approximately five and one-half hours.").

Even so, the exhibit in question does not purport to establish driving times between two places but rather shows the geographic location of various theatres in Atlanta. For that reason, Plaintiffs' Notice of Objection and Motion to Strike (Doc. No. 42) is **DENIED**. The Court will take judicial notice of the fact that there are other theatres in the Atlanta area besides the Brookhaven CinéBistro, AMC Phipps Plaza 14, and AMC Fork & Screen Buckhead. The Court will not, however, take judicial notice of the purported driving time between the Brookhaven CinéBistro and any other theatre.

B. Motion to Dismiss for Failure to State a Claim

Plaintiffs' claims in this action are brought pursuant to the Sherman Antitrust Act and various Georgia laws. The Court addresses Defendants' Motion to Dismiss as it relates to each of Plaintiffs' claims.

i. Exclusive Dealing: Sherman Antitrust Act § 1 Claim (Count IV)

Plaintiffs argue the clearance agreements in question violate ***HN6***[] *section 1* of the Sherman Antitrust Act, which declares illegal "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in **[**15]** restraint of trade or commerce among the several States, or with foreign nations . . . ." *15 U.S.C. § 1*. The Complaint also alleges Defendants violated this statute by entering into agreements with landlords pursuant to which those landlords agreed not to lease theatre space to AMC's competitors. ***HN7***[] Although the language of *section 1* seems to create a blanket prohibition on concerted restraint of trade, the Supreme Court has clarified that many forms of concerted action should be evaluated using the "rule of reason." *Standard Oil Co. v. United States, 221 U.S. 1, 58-62, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*; *Jacobs v. Tempur-Pedic Int'l, Inc., 626 F.3d 1327, 1333 (11th Cir. 2010)*. Pursuant to that rule, "the fact finder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." *Cont'l T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 49, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*.

Here, the Complaint alleges AMC coerced distributors to enter into clearance agreements which have deprived Cobb of the opportunity to compete with AMC for film licenses and theatre customers. (Compl. ¶ 124.) In response, Defendants argue Plaintiffs' exclusive dealing claim must fail because the Complaint does not adequately allege the existence of a conspiracy, an unreasonable restraint on trade, or harm to the competition. For the reasons that follow, Defendants' Motion to Dismiss is denied **[**16]** as to Plaintiffs' exclusive dealing claim.

a. The Existence of a Conspiracy

HN8[] A plaintiff attempting to state a claim under *section 1* of the Sherman Act must sufficiently plead the existence of an agreement to restrain trade. *City of Tuscaloosa v. Harcros Chems., Inc., 158 F.3d 548, 569 (11th Cir. 1998)* ("It is settled law that a threshold requirement of every antitrust conspiracy claim, whether brought under *section 1* or *section 2* of the Sherman Act, is 'an agreement to restrain trade.'"). Here, Defendants argue Plaintiffs' conspiracy allegations fail to establish the existence of an actual agreement because the Complaint does not identify which specific film distributors had clearance agreements with Plaintiffs. Defendants contend the Complaint refers to "distributors" and "the major film distributors" **[*1331]** but never identifies these entities by name. In response, Plaintiffs assert that there are fewer than ten "major film distributors," all of whom are known to Defendants. Further, Plaintiffs point out that the Complaint identifies Sony Pictures as one of the film distributors AMC allegedly coerced into giving it special treatment.

In *Twombly, 550 U.S. at 556*, the Supreme Court held ***HN9***[] stating a claim under *section 1* of the Sherman Act "requires a complaint with enough factual matter (taken as true) to suggest that an agreement **[**17]** was made. Asking for plausible grounds to infer an agreement does not impose a probability requirement at the pleading stage; it simply calls for enough fact to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." Put another way, the Court is tasked with determining if the Complaint contains enough factual heft to plausibly suggest the existence of a conspiracy or agreement. *Id. at 557*; *Jacobs, 626 F.3d at 1332-33*. Moreover, although the plaintiff must allege more than a mere opportunity to conspire, courts in this circuit recognize that "most conspiracies are inferred from the behavior of the alleged conspirators." *Seagood Trading Corp. v. Jerrico, Inc., 924 F.2d 1555, 1573-74 (11th Cir. 1991)*.

The Complaint alleges Defendants sent a letter to "the major film distributors" demanding clearances for its Buckhead theatres. (Compl. ¶ 58.) Although Plaintiffs set forth the specific contents of that letter, they do not identify "the major film distributors" by name. (Id.) Plaintiffs assert that, as a direct result of the letter, distributors began allocating the Brookhaven CinéBistro fewer high-grossing, popular films. (Id. ¶ 60.) Further, the Complaint specifically identifies Sony Pictures as one of the distributors that honored AMC's request for preferential **[**18]** treatment.[4] (Id. ¶ 61.) According to Plaintiffs, AMC forced distributors to enter into these agreements by threatening, at least implicitly, that the refusal to grant clearances would result in adverse economic consequences. (Id. ¶ 126.) Drawing all reasonable inferences in favor of Plaintiffs, these allegations provide enough factual matter to suggest

[4] Defendants contend Plaintiffs' allegations in reference to Sony are insufficient because Plaintiffs concede "that Sony exclusively licensed to Cobb two of its most successful films of the last year: the award-winning Captain Phillips and Elysium." (Mem. in Supp. of Defs.' Mot. to Dismiss 8 n.4.) This argument is without merit. Defendants cannot seriously contend dismissal is warranted by pointing out that Cobb was given crumbs when the Complaint alleges AMC was given the rest of the pie.

an agreement was made. *Twombly, 550 U.S. at 556*. Further, Plaintiffs have sufficiently identified Defendants' alleged co-conspirators using more than mere labels and conclusions. Dismissal is thus not warranted on this ground.

b. An Unreasonable Restraint on Trade

HN10[] Despite the broad language of *section 1* of the Sherman Act, that provision prohibits only "unreasonable" restraints on trade. **[**19]** *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 885, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)* (citing *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997))*. In most cases, the reasonableness of a particular practice is weighed by the fact finder in light of the circumstances surrounding the case. Id. (citing *Cont'l T.V., Inc., 433 U.S. at 49*). A number of factors are relevant to this inquiry, including "specific information about the relevant businesses" as well as "the restraint's history, nature and effect." *Id.* (citing *Khan, 522 U.S. at 10*).

[*1332] In a limited class of cases, however, certain restraints on trade are considered unlawful *per se.* Id. Such rules are necessary when conduct "would always or almost always tend to restrict competition and decrease output." *Id. at 886* (quoting *Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (2001))*. For example, "horizontal price fixing among competitors, group boycotts, and horizontal market division" are *per se* violations of the Sherman Act. *Jacobs, 626 F.3d at 1333*. In this case, Plaintiffs have alleged a conspiracy exists "between businesses operating at different levels of the same product's production chain or distribution chain, known as 'vertical' agreements." *Spanish Broad. Sys. of Fla., Inc. v. Clear Channel Commc'ns, Inc., 376 F.3d 1065, 1071 (11th Cir. 2004)*. These vertical agreements are scrutinized using the rule of reason. Id.

Defendants argue Plaintiffs' exclusive dealing claim must be dismissed because the Complaint does not allege an unreasonable restraint on trade. More specifically, Defendants contend the **[**20]** clearance agreements at issue are procompetitive as a matter of law. To support this proposition, Defendants cite *Reading Int'l, Inc. v. Oaktree Capital Mgmt., No. 03 Civ. 1895(PAC), 2007 U.S. Dist. LEXIS 504, 2007 WL 39301 (S.D.N.Y. 2003)*, a case from the Southern District of New York in which the owner, operator, and landlord of an independent movie theatre in lower Manhattan brought an antitrust action against the operators and principle investors of multiple large theatre chains. In that case, the court noted that "the Supreme Court has long held that [clearance agreements] are reasonable as long as they are not unduly extended as to area or duration." *Reading Int'l, Inc., 2007 U.S. Dist. LEXIS 504, 2007 WL 39301 at *15* (quoting *United States v. Paramount Pictures, Inc., 334 U.S. 131, 145, 68 S. Ct. 915, 92 L. Ed. 1260 (1948))* (internal quotations omitted). Here, Defendants argue, Plaintiffs have completely failed to allege that the clearances in question are unduly extended in any manner.

Moreover, Defendants point out that many "[c]ourts have found clearances . . . to be reasonable restraints of trade under certain conditions: when the theatres are in substantial competition, and the clearances are used to assure the exhibitor that the distributor will not license a competitor to show the movie at the same time or so soon thereafter that the exhibitor's expected income will be greatly diminished." *Theee Movies of Tarzana v. Pac. Theatres, Inc., 828 F.2d 1395, 1399 (9th Cir. 1987)* (citing *Paramount Pictures, 334 U.S. at 145-46*). **[**21]** Defendants contend the Complaint is totally void of allegations that the Brookhaven CinéBistro is not in substantial competition with AMC's Buckhead theatres; to the contrary, the Complaint acknowledges that the three theatres "compet[e] to exhibit films to the public in the Buckhead-Brookhaven zone." (Compl. ¶ 49.)

In response to Defendants' arguments, Plaintiffs first take issue with the assertion that clearances are procompetitive as a matter of law. The Court agrees that Defendants' stance on the presumptive legality of such agreements is too strong. The Supreme Court, in Paramount Pictures, held that ***HN11***[] clearances are reasonable when used for the proper purpose if they are not unduly extended in area or duration. *334 U.S. at 145-46*. Further, that case sets forth seven factors a court should consider when evaluating the reasonableness of a clearance agreement.[5] In the Court's view, such an inquiry **[*1333]** can hardly be said to imply that clearances are procompetitive as a matter of law. See also *Schine Chain Theatres v. United States, 334 U.S. 110, 124, 68 S. Ct. 947, 92 L. Ed. 1245 (1948)* (finding clearances obtained through the exercise of monopoly power to be unlawful).

Plaintiffs have not directly responded to Defendants' argument that the Complaint fails to state a claim for exclusive dealing because the Brookhaven CinéBistro and AMC's Buckhead theatres are in "substantial competition." Moreover, the Complaint does not specifically allege that the scope and duration of the clearance agreements in question are unduly extended. As discussed above, courts generally uphold the legality **[**23]** of clearances between theatres in "substantial competition" as long as those agreements are not "unduly extended as to area or duration." *Paramount Pictures, 334 U.S. at 145*. Rather than addressing these issues head on, Plaintiffs attack clearance agreements as no longer providing procompetitive benefits in the modern film industry. Specifically, Plaintiffs contend the "blanket clearances" at issue here restrict intrabrand competition while doing nothing to enhance interbrand competition. As explained by the Supreme Court,

> ***HN12***[] Interbrand competition is the competition among the manufacturers of the same generic product . . . and is the primary concern of ***antitrust law***. The extreme example of a deficiency of interbrand competition is monopoly, where there is only one manufacturer. In contrast, intrabrand competition is the competition between the distributors wholesale or retail of the product of a particular manufacturer. The degree of intrabrand competition is wholly independent of the level of interbrand competition confronting the manufacturer. Thus, there may be fierce intrabrand competition among the distributors of a product produced by a monopolist and no intrabrand competition among the distributors of a product **[**24]** produced by a firm in a highly competitive industry. But when interbrand competition exists . . . , it provides a significant check on the exploitation of intrabrand market power because of the ability of consumers to substitute a different brand of the same product.

Cont'l T.V., Inc., v. GTE Sylvania, 433 U.S. 36, 51 n.19, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977). Importantly, courts sustaining vertical agreements under the rule of reason have done so by recognizing that such restrictions "promote interbrand competition by allowing the manufacturer to achieve certain efficiencies in the distribution of his products." *Id. at 54*. In regard to clearances specifically, courts have made this same observation. E.g., *Movies of Tarzana, 828 F.2d at 1399-1400* (finding clearances that promoted interbrand competition without overly restricting intrabrand competition to be reasonable). Plaintiffs, however, contend the clearances at issue here severely restrict **[*1334]** intrabrand competition without providing counterbalancing enhancements to interbrand competition. In Plaintiffs' view, courts approving of clearances in the past did so "because each distributor used clearances as a tool for incentivizing the promotion of its own films" thus increasing interbrand competition. (Pls.' Resp. in Opp'n to Defs.' Mot. to Dismiss 16, Doc. No. 25.) Because **[**25]** distributors no longer rely on exhibitors to promote their films at a local level but instead run national advertising campaigns, Plaintiffs argue this rationale is outdated.[6] (Id.)

---

[5] The Court found the following factors relevant when considering whether a clearance is unreasonable: "(1) [t]he admission prices of the theatres **[**22]** involved, as set by the exhibitors; (2) [t]he character and location of the theatres involved, including size, type of entertainment, appointments, transit facilities, etc.; (3) [t]he policy of operation of the theatres involved, such as the showing of double features, gift nights, give-aways, premiums, cut-rate tickets, lotteries, etc.; (4) [t]he rental terms and license fees paid by the theatres involved and the revenues derived by the distributor-defendant from such theatres; (5) [t]he extent to which the theatres involved compete with each other for patronage; (6) [t]he fact that a theatre involved is affiliated with a defendant-distributor or with an independent circuit of theatres should be disregarded; and (7) there should be no clearance between theatres not in substantial competition." *Paramount Pictures, 334 U.S. at 145-46*.

[6] Even so, the Court is not convinced by Plaintiffs' argument that clearances serve *no* procompetitive purpose. As the Ninth Circuit noted in Movies of Tarzana, ***HN13***[] clearances force theatres that are denied a license to certain movies to show alternatives, thereby increasing movie choices for consumers. *828 F.2d at 1399-1400*. This logic may apply notwithstanding recent advancements in the film industry.

Although Defendants note courts routinely find clearances reasonable, they have not cited a single case in which that determination was made on a motion to dismiss.[7] *Movies of Tarzana, 828 F.2d at 1400* (agreeing with the district court's summary judgment finding that certain clearances were reasonable); *Reading Int'l, Inc., 2007 U.S. Dist. LEXIS 504, 2007 WL at 39301 *15* (finding certain clearances reasonable on a motion for summary judgment). In fact, the Court has been unable to find a single Eleventh Circuit case addressing clearances, and both parties have been forced to rely on opinions, many unpublished, from other circuits. Although Defendants are correct that courts generally find clearance agreements reasonable when theatres are **[**26]** in substantial competition, the Paramount Pictures court set forth several other factors that are relevant to the reasonableness inquiry. *334 U.S. at 145-46*. Further, as the Eleventh Circuit has noted, ***HN14***[] "in order to consider a rule of reason claim based on a vertical restraint . . . , a court must conduct a 'systematic comparison' of the negative effects of the restraint on competition and compare that with the positive effects on competition stemming from the restraint." *Maris Distrib. Co. v. Anheuser-Busch, Inc., 302 F.3d 1207, 1213 (11th Cir. 2002)* (citing *Graphic Prods. Distribs. v. Itek Corp., 717 F.2d 1560, 1571 (11th Cir. 1983))*.

Here, the Court concludes Plaintiffs have alleged sufficient facts to suggest the clearances **[**27]** in question are unreasonable. Accordingly, dismissal of Plaintiffs' exclusive dealing claim is not justifiable on this ground. Although Defendants may prove after discovery that the clearances at issue were justified, Plaintiffs' allegations are sufficient to withstand a motion to dismiss.

c. Injury to Competition

HN15[] To state a claim under *section 1* of the Sherman Act, a plaintiff must allege "antitrust injury," i.e. an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Further, because antitrust laws are not intended to protect competitors, a plaintiff asserting antitrust violations must allege actual or potential injury to the *competition*. *Spanish Broad.* ***[*1335]*** *Sys., 376 F.3d at 1074*. In other words, the conduct at issue must impact the market rather than the competitors therein. Id. (citing *Dickson v. Microsoft Corp., 309 F.3d 193, 206 (4th Cir. 2002))*.

Here, Defendants argue Plaintiffs' only assertion regarding actual harm is that the clearances in question have the effect of limiting moviegoers' theatre choices in the Buckhead-Brookhaven zone. Citing Reading, Defendants contend this allegation is insufficient as a matter of law to constitute harm to competition. *2007 U.S. Dist. LEXIS 504, 2007 WL at 39301 *14* ("[T]he mere possibility that a consumer might have to **[**28]** see his or her first choice movie at his or her second choice theatre . . . is not an actionable restraint on trade . . . [and] does not mean that there has been an actionable harm to consumer choice or competition."). Defendants also argue Plaintiffs' failure to define a relevant market precludes them from alleging potential harm to competition.

As the Eleventh Circuit noted in Jacobs, ***HN16***[] "[a]ctual anticompetitive effects include, but are not limited to, reduction of output, increase in price, or deterioration in quality." *626 F.3d at 1339* (citing *United States v. Brown Univ., 5 F.3d 658, 668 (3d Cir. 1993))*. The quintessential harm is not higher prices; "[r]ather, consumer welfare, understood in the sense of allocative efficiency, is the animating concern of the Sherman act." Id. Therefore, a plaintiff alleging actual harm to competition "should point to the specific damage done to consumers in the market." Id. (quoting *Spanish Broad Sys., 376 F.3d at 1072*) (internal quotations omitted). Here, the Court disagrees that Plaintiffs' only assertion regarding actual harm is that moviegoers in the Buckhead-Brookhaven zone simply have fewer theatre choices. Instead, as Plaintiffs point out in their brief opposing Defendants' Motion to Dismiss, the

[7] In their Second Notice of Supplemental Authority (Doc. No. 41), Defendants cite the Court to Starlight Cinemas v. Regal Entertainment Group, a case in which the court dismissed a complaint based on allegedly unlawful clearances. No. 2:14-cv-05463 (C.D. Cal. Feb. 2, 2015) (order denying plaintiff's motion for leave to file a first amended complaint). Unlike here, the plaintiff in that case did not "allege the necessary facts detailing a specific time, place, or person involved in the alleged conspiracies." Id. Finding the complaint failed to allege an agreement, the court in Starlight had no reason to conduct a reasonableness inquiry.

Complaint alleges in detail how Plaintiffs believe Defendants' conduct **[**29]** is reducing the quality of movie theatres offered to the public. Specifically, the Complaint compares and contrasts the various amenities that Cobb Theatres and AMC respectively offer consumers, often drawing stark differences. In the Court's view, these allegations are adequate to plausibly suggest Defendants' conduct has substantially diminished the quality of a good offered to the public thereby causing actual harm to competition. Id. Defendants cite *Spanish Broad. Sys., 376 F.3d at 1076*, and a string of other cases for the proposition that "use of unfair means resulting in the substitution of one competitor for another without more does not violate the antitrust laws." Plaintiffs have, however, alleged *more* than a mere substitution of competitors. Specifically, the Complaint alleges consumers are being forced to purchase a product that is less desirable and of inferior quality. Importantly, Defendants may be able disprove Plaintiffs' allegations regarding harm to competition after discovery, but, at the very least, this dispute cannot be resolved on a motion to dismiss.[8]

HN17[] Even assuming a plaintiff shows actual or potential harm to competition, "he must identify the relevant market in which the harm occurs." *Jacobs, 626 F.3d at 1336*. Importantly, the "relevant market" has both product and geographic components. Id. (citing *Rossi v. Standard Roofing, Inc., 156 F.3d 452, 464 (3d Cir. 1998))*. The parameters of these markets are considered questions of fact, *Thompson v. Metro. Multi-List, Inc., 934 F.2d 1566, 1573 (11th Cir. 1991)*, but antitrust **[*1336]** plaintiffs must nevertheless "present enough information in their complaint to plausibly suggest the contours of the relevant geographic and product markets." *Jacobs, 626 F.3d at 1336*. In this case, Defendants argue Plaintiffs' exclusive dealing claim should be dismissed because the Complaint's geographic and product market allegations are insufficient. The Court disagrees.

HN18[] Geographically, the relevant market is defined as "the area in which the product or its reasonably interchangeable good is traded." *L.A. Draper & Son v. Wheelabrator-Frye, Inc., 735 F.2d 414, 423 (11th Cir. 1984)*. Here, the Complaint alleges the relevant geographic market is the "Buckhead-Brookhaven film licensing zone," which is comprised of "moviegoers who reside in or around Buckhead and Brookhaven." (Compl. ¶ 39.) Defendants, however, argue this definition is self-serving **[**31]** and does not comport with market realities. To support this contention, Defendants point to Exhibit A, a Google map showing the location of various theatres around Atlanta. According to Defendants, Plaintiffs have not demonstrated why the market should be so narrowly drawn so as to exclude these theatres. This argument is not persuasive. When determining the geographic market, "such economic and physical barriers to expansion as transportation costs, delivery limitations and customer convenience and preference must be considered." *Id.* (quoting *Hornsby Oil Co. v. Champion Spark Plug Co., 714 F.2d 1384, 1394 (5th Cir. 1983))* (internal quotations omitted). Moreover, "[m]arkets involving services that can only be offered from a particular location, like those provided by hospitals, theaters, and ski areas, will often be defined by how far consumers are willing to travel . . . ." Earl W. Kintner, Federal ***Antitrust Law*** § 10.15 (2013). Significantly, the Complaint alleges moviegoers in the Buckhead-Brookhaven film zone are not willing to travel outside of the area to watch movies because of significant population density and heavy traffic congestion. All of these factors are relevant to the fact intensive inquiry of determining the geographic market. The Court therefore concludes Plaintiffs **[**32]** have alleged sufficient facts to survive a motion to dismiss in this regard.

HN19[] The relevant product market, on the other hand, is "determined by the availability of substitutes to which consumers can turn in response to price increases and other existing or potential producer's ability to expand output." *L.A. Draper, 735 F.2d at 423*. In addition to examining "the uses to which the product is put by consumers in general," *Jacobs, 626 F.3d 1327, 1337* (quoting *Maris Distrib. Co., 302 F.3d at 1221*), the court should give special consideration "to evidence of the cross-elasticity of demand and reasonable substitutability of the products . . . ."[9] *Id. at 1337-38*. In the Complaint, Plaintiffs identify the relevant product markets as **[*1337]** "the market . . . to

---

[8] Defendants also argue that Plaintiffs' failure to properly define the relevant market precludes them from alleging potential harm to competition. However, **[**30]** as discussed *infra*, the Court concludes the Complaint sufficiently pleads the contours of the relevant geographic and product markets.

[9] As explained by the Eleventh Circuit in Jacobs,

license films from distributors for exhibition to the public in the Buckhead-Brookhaven zone" and "the market for exhibition of films to patrons." (Compl. ¶¶ 41, 49.) Defendants argue the product markets identified in the Complaint are insufficient because they fail to allege cross-elasticity of demand. According to Defendants, Plaintiffs are asking the Court to assume, based on conclusory statements, that consumers do not perceive watching the same movie on DVD or pay-per-view in their home to be "a reasonable substitute for viewing films in **[**33]** theatre." (Compl. ¶ 18.)

To support their argument, Defendants cite *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997)*, a case in which the Third Circuit held a motion to dismiss may be granted when "the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences **[**34]** are granted in plaintiff's favor . . . ." In that case, the plaintiffs alleged "ingredients, supplies, materials, and distribution services used by and in the operation of Domino's pizza stores" constituted a relevant product market. *Queen City Pizza, 124 F.3d at 437*. The court, however, disagreed because "the dough, tomato sauce, and paper cups that meet Domino's Pizza, Inc. standards and are used by Domino's stores are interchangeable with dough, sauce and cups available from other suppliers and used by other pizza companies." *Id. at 438*. The facts here are entirely distinguishable from that case.

As the court in *Queen City Pizza* recognized, ***HN21***[] "the test for a relevant [product] market is not commodities reasonably interchangeable by a particular plaintiff, but commodities reasonably interchangeable by consumers for the same purpose." Id. (quoting *United States v. E.I. du Pont de Nemours & Co. (Cellophane), 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*. In regard to the relevant product market in this case, the Complaint alleges:

> When consumers watch motion pictures in their homes, they typically lose several advantages of the theater experience, including the size of screen, the sophistication of sound systems, the opportunity to watch in 3-D, and the social experience of viewing a film with other patrons. Additionally, the most **[**35]** popular, newly released or "first run" motion pictures (films) are not available for home viewing.
> Differences in the pricing of various forms of entertainment also reflect their lack of substitutability in the eyes of the consumers . . . . Renting a motion picture DVD for home viewing is usually significantly less expensive than viewing a film in a theater.
> [A] modern picture's theatrical exhibition life generally is no more than a few weeks, approximately 90-120 days after which it is released in other entertainment formats (e.g., DVD and pay-per-view television).

(Compl. ¶¶ 18, 19, and 23.) These allegations are sufficient to plausibly suggest the contours of a relevant product market. Unlike the plaintiffs in *Queen City Pizza,* Plaintiffs have alleged facts tending to show consumers might not consider watching a movie in a theatre and watching it at home to be "reasonably interchangeable" experiences. In contrast to the evident interchangeability of pizza ingredients, the Court is not convinced, as Defendants suggest, that there is such a high cross-elasticity of demand between home-viewing and watching a film in theatres that Plaintiffs' **[*1338]** exclusive dealing claim must fail on a motion **[**36]** to dismiss.

In their reply brief, Defendants also suggest that Plaintiffs have improperly disjoined the product at issue from their theory of competitive harm. More precisely, Defendants contend Plaintiffs have not alleged deterioration in the quality of first run, feature-length motion pictures, but instead alleged the quality of movie theatres has declined.

> ***HN20***[] [t]he cross-elasticity of demand measures the change in the quantity demanded by consumers of one product relative to the change in price of another. A high cross-elasticity of demand (that is, consumers demanding proportionately greater quantities of Product X in response to a relatively minor price increase in Product Y) indicates that the two products are close substitutes for each other—that is, consumers derive comparable utility from equivalent consumption of either one. For purposes of the relevant product market analysis, a high cross-elasticity of demand indicates that the two products in question are reasonably interchangeable substitutes for each other and hence are part of the same market.

626 F.3d at 1337 n.13 (citing *United States v. E.I. du Pont de Nemours & Co. (Cellophane), 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*.

This is important, Defendants argue, because the Complaint identifies the former product as the relevant market. The Court disagrees. The Complaint does not allege the relevant product market is "first run, feature-length motion pictures;" rather, Plaintiffs identify the relevant product markets as the market to *license* films from distributors and the *market* to exhibit films to the public. (Compl. ¶¶ 41, 49.) Having considered Defendants' arguments, the Court concludes Plaintiffs have alleged a relevant market and, accordingly, antitrust injury.[10]

For the foregoing reasons, and in consideration of the Eleventh Circuit's disfavor of Rule 12(b)(6) dismissals in fact-intensive antitrust cases, the Court denies Defendants' Motion to Dismiss as to Plaintiffs' claim for exclusive dealing. *Spanish Broad. Sys., 376 F.3d at 1070* (citing *Quality Foods de Centro Am., S.A. v. Latin Am. Agribusiness Dev. Corp., S.A., 711 F.2d 989, 994-95 (11th Cir. 1983))*.

ii. Monopolization: Sherman Antitrust Act § 2 Claims (Counts II and III)

The Complaint also alleges AMC has monopolized and attempted to monopolize markets for film licenses and theatre patrons in violation of *section 2* of the Sherman Antitrust Act. ***HN23***[] To state a prima facie case for monopolization, a plaintiff must plead sufficient facts to infer: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition **[**38]** or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. In this context, "monopoly power" is the "power to control prices in or exclude competition from the relevant market." *Morris Commc'n Corp. v. PGA Tour, Inc., 364 F.3d 1288, 1294 (11th Cir. 2004)* (citing *Cellophane, 351 U.S. at 391 (1956))*. Further, to satisfy the second element of a monopolization claim, the plaintiff must allege "predatory or exclusionary acts or practices that have the effect of preventing or excluding competition within the relevant market." Id. (citing *United States v. Microsoft, 253 F.3d 34, 58, 346 U.S. App. D.C. 330 (D.C. Cir. 2001))*.

Comparatively, ***HN24***[] a plaintiff states a claim for *attempted* monopolization by alleging sufficient facts to suggest "predatory or anticompetitive conduct," **[*1339]** "specific intent to monopolize," and "a dangerous probability of achieving monopoly power" in the relevant market. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*; *Spanish Broad. Sys., 376 F.3d at 1074*. As with section 1 claims, the "relevant market" has both product and geographic components. *Gulf States Reorganization Group, Inc. v. Nucor Corp., 721 F.3d 1281, 1285 (11th Cir. 2013)*.

In large part, Plaintiffs' *section 2* claims rely on the same allegations of anticompetitive behavior as their section 1 claims. Specifically, the Complaint alleges AMC has used its monopoly power to: 1) coerce distributors into denying Cobb the opportunity to fairly compete for film licenses and theatre customers; and 2) coerce landlords **[**39]** to enter into agreements pursuant to which those landlords agree not to lease theatre space to AMC's competitors. In their Motion to Dismiss, Defendants argue Plaintiffs' *section 2* claims fail for multiple reasons. First, Defendants contend the Complaint does not allege predatory or exclusionary conduct and therefore fails to state a claim for attempted monopolization. Second, Defendants argue Plaintiffs' failure to plead a relevant market forecloses any allegation that AMC has monopoly power.

---

[10] Defendants half-heartedly suggest that Plaintiffs' lack standing to bring this suit given their purported failure to allege antitrust injury. ***HN22***[] Standing is a question of law. *Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1448 (11th Cir. 1991)*. Importantly, "antitrust standing is not simply a search for an injury in fact; it involves an analysis of prudential **[**37]** considerations aimed at preserving the effective enforcement of the antitrust laws." Id. To conduct this analysis, a court must "evaluate the plaintiff's harm, the alleged wrongdoing by the defendants, and the relationship between them." *Associated Gen. Contractors of Calif., Inc. v. Calif. State Council of Carpenters, 459 U.S. 519, 535, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. Having considered the record and arguments from the parties, the Court concludes that Plaintiffs have alleged an injury "of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful." *Brunswick Corp., 429 U.S. at 489*. Plaintiffs therefore have standing to bring this suit.

a. Exclusionary or Predatory Conduct

As discussed above, a claim for attempted monopolization involves three distinct elements. *Spectrum Sports, 506 U.S. at 456* (noting that a plaintiff claiming attempted monopolization must show "(1) the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power"). Here, Defendants argue Plaintiffs have failed to state a claim for attempted monopolization because they do not allege AMC has engaged in predatory or anticompetitive conduct. More precisely, Defendants contend "AMC's alleged actions in requesting clearances cannot, as a matter of law, constitute exclusionary or predatory acts of monopolization **[**40]** when the clearances, even if granted, would be lawful." (Mem. of Law in Supp. of Defs.' Mot. to Dismiss 17, Doc. No. 19-1.) The Court has already addressed this argument in analyzing Plaintiffs' section 1 claims.

HN25[] The "[predatory or] anticompetitive conduct criterion captures the critical antitrust idea of harm to competition, rather than to competitors." *Spanish Broad Sys., 376 F.3d at 1075*. This requirement is perhaps "the single most important aspect of attempted monopolization." Id. (citing *Northeastern Tel. Co. v. Am. Tel. & Tel. Co., 651 F.2d 76, 85 (2d Cir. 1981))*. In this case, the Complaint does not allege mere injury to a single competitor or that an unfair practice has resulted in a simple substitution of one competitor for another. See Id. Instead, Plaintiffs allege Defendants' conduct is causing harm to competition by substantially diminishing the quality of a good offered to the public. (Compl. ¶¶ 38, 47, 66-68, 79, 85, and 94.) Defendants may eventually prove otherwise, but Plaintiffs have alleged sufficient facts to suggest exclusionary or predatory conduct, and Defendants' Motion to Dismiss Plaintiffs' claim for attempted monopolization is therefore denied.

b. Allegations of Monopoly Power

HN26[] To state a claim for monopolization, a plaintiff must first plead sufficient facts to infer the defendant **[**41]** possesses monopoly power in the relevant market. *Grinnell Corp., 384 U.S. at 570-71*. Defining the relevant market is therefore a necessary component of analyzing market power. *U.S. Anchor Mfg. v. Rule Indus., 7 F.3d 986, 994 (11th Cir.* ***[*1340]*** *1993)*. In reference to Plaintiffs' section 2 claims, Defendants raise identical arguments regarding the sufficiency of Plaintiffs' geographic and product market allegations as those discussed in the Court's analysis above. The Court will not needlessly readdress these issues, but instead reiterates that the Complaint contains enough factual matter concerning the contours of the relevant market to survive at motion to dismiss.

Defendants also argue, even assuming the Buckhead-Brookhaven zone is a relevant geographic market, that Plaintiffs' monopolization claim fails because the Complaint does not allege Defendants have monopoly power in that market. ***HN27***[] Monopoly power is the "power to control prices in or exclude competition from the relevant market." *Morris Commc'n Corp, 364 F.3d at 1294*. Further, "market share is frequently used in litigation as a surrogate for market power . . . ." *Jacobs, 626 F.3d at 1339-40* (quoting *Graphic Prods. Distribs., 717 F.2d at 1570*). Here, Plaintiffs allege AMC has market power in the Buckhead-Brookhaven zone because it owns a 69% share of that market as calculated using the number of theatre seats Cobb and AMC respectively control.[11] **[**42]** Furthermore, Plaintiffs argue high entry barriers to the market make it reasonable to presume AMC has monopoly power. *Bailey v. Allgas, Inc., 284 F.3d 1237, 1250 (11th Cir. 2002)* (noting that high market share, coupled with sufficient barriers to market entry, can result in a finding of market power).

As an initial matter, Defendants assert the percentage of theatre seats is not a competent measure of monopoly power because it reflects potential capacity, not actual sales in the marketplace. The Court agrees that such a statistic may not be *the best* indicator of market power; it is, however, a relevant factor suggesting AMC controls a substantial share of the market. Moreover, Defendants argue the allegations in the Complaint preclude a finding of

[11] Plaintiffs made this calculation using the seating capacities of the Brookhaven CinéBistro and AMC's Buckhead theatres. According to the Complaint, Defendants own 1,696 of the 2,454 theatre seats in the Buckhead-Brookhaven zone. (Compl. ¶¶ 35-37.)

monopoly power because Plaintiffs concede there is extensive competition between the Brookhaven CinéBistro and AMC's Buckhead theatres in the alleged geographic market. This argument has no merit. The allegations in the Complaint do not describe a "sharply **[**43]** competitive" marketplace as Defendants suggest. Cf. *U.S. Ring Binder L.P. v. World Wide Stationary Mfg. Co., 804 F. Supp. 2d 588, 595 (N.D. Ohio 2011)* ("Coupled with the Complaint's description of a sharply competitive marketplace, the allegation that monopoly power does or could exist in the [relevant market] is not plausible."). Rather, Plaintiffs repeatedly accuse Defendants of engaging in conduct that has stifled competition. The mere existence of a competitor in the marketplace does not eliminate the potential for monopoly power. If it were otherwise, monopoly power could only exist if a defendant controlled 100% of the market.

Defendants also question whether a 69% share of market is high enough to infer market power. ***HN28***[] Although a market share of less than 50% is inadequate as a matter of law to constitute monopoly power, the analysis is somewhat fluid. *Bailey, 284 F.3d at 1250*. In fact, the Supreme Court has noted that, in some circumstances, "over two-thirds of the market is a monopoly." *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 480, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (citing *Am. Tobacco Co. v. United States, 328 U.S. 781, 797, 66 S. Ct. 1125, 90 L. Ed.* ***[*1341]*** *1575 (1946))*. The Court concedes that whether a 69% share of the market supports a finding of monopoly power is a borderline issue. However, resolving all doubt in favor of Plaintiffs, the allegation at least withstands Defendants' motion to dismiss. See e.g., *Moore U.S.A., Inc. v. Std. Register Co., 139 F. Supp. 2d 348, 357 (W.D.N.Y. 2001)* (finding allegation of 65% product market share sufficient **[**44]** to survive a motion to dismiss); *Michael Anthony Jewelers, Inc. v. Peacock Jewelry, Inc., 795 F. Supp. 639, 646 (S.D.N.Y. 1992)* (finding 70% market share sufficient to support finding of market power); *Brager & Co. v. Leumi Sec. Corp., 429 F. Supp. 1341, 1347 (S.D.N.Y. 1977)* ("Concededly, companies that have been found to possess monopoly power usually have enjoyed market shares greater than seventy per cent, but whether such power actually exists is a quintessential question of fact."); *Pac. Eng'g & Prod. Co. v. Kerr-McGee Corp., No. C-40-70, 1974 U.S. Dist. LEXIS 12022, at *61 (D. Utah March 4, 1974)* (finding a 67% share of the market, although borderline, "probably supports the inference [of a monopoly]") rev'd in part on other grounds, *551 F.2d 790 (10th Cir. 1977)*.

Even so, ***HN29***[] allegations of market share alone are insufficient to establish monopoly power. *Jacobs, 626 F.3d at 1340*. In fact, even a market share of 100% is not determinative. See Id. "Relevant determinants of the market power of a prospective predator . . . include its absolute and relative market shares, and those of competing firms; the strength and capacity of current competitors; the potential for entry; the historic intensity of competition; and the impact of the legal or natural environment." *U.S. Anchor, 7 F.3d at 994* (quoting *Int'l Tel. & Tel. Corp., 104 F.T.C. 280, 412 (1984))*. Relevantly, the Complaint alleges Defendants have created high entry barriers to the market in order to perpetuate their monopoly. According to Plaintiffs, AMC has established a system **[**45]** of threatening landlords that it will request clearance agreements over competitors that are allowed to lease space near an existing AMC theatre. In short, AMC allegedly threatens that the new entrant will "have a hard time getting film product." (Compl. ¶ 87.) Consequently, landlords are often unwilling to rent space to AMC's competitors for fear that doing so will result in "reduc[ed] customer traffic to the landlord's shopping mall, plaza, or development." (Id. ¶ 88.) Further, Plaintiffs argue that film distributors are actually complying with AMC's clearance demands thereby securing preferential treatment over competing theatres and further suggesting AMC has monopoly power in the Buckhead-Brookhaven zone. By establishing a nationwide policy of bullying competitors with clearances, Plaintiffs argue, AMC has created high entry barriers to markets across the nation, including the one defined in the Complaint.

Conversely, Defendants assert that the allegations in the Complaint suggest any barriers to entering the Buckhead-Brookhaven market—to the extent they even exist—are low because Cobb admits it entered the market in 2011 and shortly thereafter gained a 30% market share. However, such an **[**46]** argument ignores the allegations in the Complaint that AMC erected barriers that Cobb had to overcome to open the Brookhaven CinéBistro. Specifically, Plaintiffs contend Defendants sent a letter to major film distributors setting forth AMC's expectation that it would play "100% of [the distributors'] wide commercial releases" rather than playing day-and-dates with the Brookhaven CinéBistro. (Compl. P 58.) Further, the Complaint alleges AMC has since begun threatening landlords that if they lease space to AMC's competitors, those competitors will have a hard time licensing **[*1342]** movies. (Id. 87.) Whether these barriers actually show AMC has monopoly power is a question for another day.

Based on the foregoing analysis, the Court concludes Plaintiffs have satisfied their burden of alleging market power. Accordingly, Defendants' Motion to Dismiss Plaintiffs' monopolization claim is denied.

iii. Circuit Dealing (Count I)

Plaintiffs also argue Defendants violated the Sherman Act by engaging in a practice known as "circuit dealing." ***HN30***[] That term is not specifically defined by case law, but it occurs when a defendant pools the purchasing power of an entire circuit to "eliminate the possibility of bidding **[**47]** for films [on a] theatre by theatre [basis]." *Paramount Pictures, 334 U.S. at 154* (discussing "formula deals" and "master agreements"). In Paramount Pictures, the Supreme Court addressed circuit dealing in the context of film licensing agreements "that cover exhibition in two or more theatres in a particular circuit . . . ." Id. Notably, the Court found such agreements to be unlawful because they "eliminate the opportunity for the small competitor to obtain the choice [first-run films], and put a premium on the size of the circuit" thereby undermining the competitive process. Id. Likewise, in *United States v. Griffith, 334 U.S. 100, 68 S. Ct. 941, 92 L. Ed. 1236 (1948)*, the Supreme Court held that certain circuit deals constitute unlawful monopoly leveraging, a form of anticompetitive conduct which involves a monopolist using "its monopoly power in one market to gain a competitive advantage in another." *Aquatherm Indus., Inc. v. Fla. Power & Light Co., 145 F.3d 1258, 1262 (11th Cir. 1998)* (quoting *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 275 (2d Cir. 1979))*. Such conduct is unlawful because "the pooling of the purchasing power of an entire circuit in bidding for films is a misuse of monopoly power insofar as it combines the theatres in closed towns with competitive situations."[12] *Paramount Pictures, 334 U.S. at 154-55*.

In Griffith, the Court set forth the circumstances in which circuit dealing amounts to unlawful monopoly leveraging:

> ***HN31***[] A man with a monopoly of theatres in any one town commands the entrance for all films into that area. If he uses that strategic position to acquire exclusive privileges in a city where he has competitors, he is employing his monopoly power as a trade weapon against his competitors. It may be a feeble, ineffective weapon where he has only one closed or monopoly town. But as those towns increase in number throughout a region, his monopoly power in them may be used with crushing effect on competitors in other places. He need not be as crass as the exhibitors in [*United States v. Crescent Amusement Co., 323 U.S. 173, 65 S. Ct. 254, 89 L. Ed. 160 (1944)]* in order to make his monopoly power effective in his competitive situations. Though he makes no threat to withhold the business of his closed or monopoly towns unless the distributors give him the exclusive film rights in the towns where he has competitors, the effect is likely to be the same where the two are joined. When the buying power of the entire circuit is used to negotiate films for his competitive **[**49]** as well as his closed towns, he is using monopoly power to expand his empire. And even if we assume that a specific intent to accomplish that result is absent, he is chargeable in legal contemplation with that purpose since the end result is the necessary **[*1343]** and direct consequence of what he did.

334 U.S. at 107. Of note, both forms of circuit dealing are considered *per se* violations of the Sherman Act. *Paramount Pictures, 334 U.S. at 153-55*; *Griffith, 334 U.S. at 106-09*. In their reply brief, Defendants suggest that circuit dealing should be scrutinized under the rule of reason. Even if that were true, the Court's analysis here would not change.

As to the circuit dealing arrangements prohibited by Paramount, Plaintiffs contend the letter AMC sent to distributors is evidence of a film licensing agreement that "cover[s] exhibition in two or more theatres in a particular circuit." *334 U.S. at 153-55*. In response to this claim, Defendants argue that there is "not a single fact alleged in the Complaint that any circuit deal, with any distributor, for any film, was ever accepted, implemented, or even proposed." (Mem. of Law in Supp. of Defs.' Mot. to Dismiss 9.) This is simply not true. There are numerous allegations in the Complaint regarding the letter purportedly sent to major film distributors, **[**50]** and additional

---

[12] A "closed" town or market is an area that has only a single theatre. Importantly, that theatre "faces no competition in the market for (1) exhibiting films to **[**48]** the public in that zone and (2) licensing films from distributors for exhibition in that zone." (Compl. ¶ 27.)

allegations regarding the conduct of those distributors after receiving the letter. (Compl. ¶¶ 58-62.) These allegations are sufficient to plausibly suggest the existence of an unlawful circuit dealing arrangement pursuant to which AMC simultaneously negotiated clearances for both of its Buckhead theatres.

Plaintiffs also allege Defendants have engaged in the type of circuit dealing that amounts to monopoly leveraging. Specifically, the Complaint accuses AMC of "using or attempting to use its circuit power and its monopoly power in a substantial number of non-competitive [closed] zones to drive high-quality theatres out of markets in which they compete with AMC . . . ." (Compl. P 85.) In Defendants' view, this claim must fail because "Cobb has not alleged any threats or agreements that amount to a 'circuit deal' and because Cobb has not alleged that AMC possesses the requisite monopoly power in a leveraging market in the first place." (Mem. of Law in Supp. of Defs.' Mot. to Dismiss 17.) These arguments are unavailing.

As to the sufficiency of Plaintiffs' allegations regarding a leveraging market, the Complaint states that AMC operates theatres in non-competitive zones **[**51]** across the United States. (Compl. ¶ 28.) The Complaint also alleges that AMC is the second-largest theatre circuit in the country. (Id. ¶ 11.) Although Defendants fault Plaintiffs for not citing a specific non-competitive market in which AMC owns a theatre, such criticism is unnecessary. Plaintiffs are alleging AMC is using the power of its *entire* nationwide circuit—including its theatres in closed markets—to acquire exclusive privileges in markets where it has competitors. Identifying specific closed markets used for leveraging is therefore unnecessary to state a claim for relief. Moreover, the Court is not persuaded by the argument that the Complaint fails to allege AMC made any agreements or threats that amount to a circuit deal. For instance, Plaintiffs specifically contend the letter Defendants sent to film distributors operated as a demand that those distributors grant AMC preferential treatment or, alternatively, "risk being denied the grossing potential of AMC's Buckhead theaters and, implicitly, *some or all of the theaters in its entire circuit* . . . ." (Compl. ¶ 59 (emphasis added).) ***HN32***[] When a film exhibitor uses the buying power of its entire circuit to negotiate films for **[**52]** its competitive and closed markets, it is guilty of circuit dealing. *Griffith, 334 U.S. at 107-09*. This is true even when the exhibitor does not expressly threaten distributors that it will withhold the business of its closed or monopoly markets unless it is given preferential treatment. Id. Accordingly, **[*1344]** Plaintiffs have stated a claim for circuit dealing and Defendants' Motion to Dismiss must be denied on this count.

iv. State Law Claims (Counts V and VI)

Plaintiffs rely on the same allegations of misconduct discussed above to support their state law claims for tortious interference with business relations and violations of the Georgia Constitution and *O.C.G.A. § 13-8-2*, which declare contracts in restraint of trade void as against public policy. The Court will address each of these claims in turn.

a. Tortious Interference

HN33[] To state a claim for tortious interference with business relations under Georgia law, the plaintiff must show that "the defendant: (1) acted improperly and without privilege; (2) acted purposefully and maliciously with the intent to injure; (3) induced a third party not to enter into or continue a business relationship with the plaintiff; and (4) caused the plaintiff some financial injury." *Meadow Springs, LLC v. IH Riverdale, LLC, 323 Ga. App. 478, 480, 747 S.E.2d 47 (2013)* (quoting *NationsBank, N.A. v. Southtrust Bank, N.A., 226 Ga. App. 888, 892, 487 S.E.2d 701 (1997))*. In this **[**53]** context, "[i]mproper actions constitute conduct wrongful in itself; thus, improper conduct means wrongful action that generally involves predatory tactics such as physical violence, fraud or misrepresentation, defamation, use of confidential information, abusive civil suits, and unwarranted criminal prosecutions." *Culpepper v. Thompson, 254 Ga. App. 569, 572, 562 S.E.2d 837 (2002)* (citations and internal quotations omitted).

First, Defendants argue Plaintiffs' tortious interference claim should be dismissed because the Complaint does not allege facts that would make the requested clearances improper or unlawful. The Court has considered and rejected this argument in its analysis above. Plaintiffs allege AMC sent a letter to film distributors threatening, at least implicitly, that the refusal to grant certain clearances would result in adverse consequences. Moreover, Plaintiffs also allege that Defendants have threatened landlords that they will make it difficult for AMC's competitors to license films if those competitors are allowed to lease space near an existing AMC theatre. Although Defendants attempt to characterize their conduct as harmless and in accordance with common business practices, the Court is not yet convinced that AMC's policies and procedures **[**54]** regarding clearances are beyond reproach. It is not entirely clear whether Defendants' alleged conduct comes within the ambit of predatory and improper behavior proscribed by Georgia tort law, but the Court nevertheless finds Plaintiffs' allegations sufficient to endure a motion to dismiss.

Defendants also argue for dismissal of Plaintiffs' tortious inference claim on the grounds that the Complaint does not identify which entities AMC induced not to do business with Cobb. Once again, the Court must reject Defendants' argument. The Complaint refers to "the major film distributors" and specifically identifies Sony Pictures as one of the distributors that reacted to Defendants' letter by giving AMC preferential treatment. These allegations standing alone satisfy Plaintiffs' burden. Even so, Plaintiffs go even further and allege they attempted to rent space in Miami, Florida, at the Dadeland Mall only to be told by AMC's President and CEO that AMC would use its full weight and power to prevent Plaintiffs from opening a CinéBistro at that location. Although the Complaint does not identify the landlord of that space by name, these allegations are also sufficient to support Plaintiffs' claim **[**55]** for tortious interference with business relations. Accordingly, Defendants' Motion to Dismiss is denied as to Count V of the Complaint.

[*1345] *b. Contract in Restraint of Trade*

Plaintiffs also allege Defendants are liable for violations of ***HN34***[] article III, § 6, ¶ 5 of the Georgia Constitution and *O.C.G.A. § 13-8-2*, which declare contracts in restraint of trade void as against public policy. Although "these provisions merely render such agreements unenforceable and provide no cause of action for damages to those who are parties thereto, . . . Georgia recognizes a common law tort action in favor of third parties who are injured by a conspiracy in restraint of trade." *U.S. Anchor, 7 F.3d at 1003* (citations and internal quotations omitted). Defendants first argue this claim should be dismissed because Georgia courts have clarified that "a contract may be upheld if the restraint is reasonable and the contract is valid in other respects." *Wedgewood Carpet Mills, Inc. v. Color-Set, Inc., 149 Ga. App. 417, 421, 254 S.E.2d 421 (1979)*. However, this argument is irrelevant given the Court's previous finding that Plaintiffs have alleged the existence of unreasonable agreements.

Next, Defendants cite U.S. Anchor to support their contention that a plaintiff's sole remedy to challenge a contract in restraint of trade under Georgia law is through a tortious **[**56]** interference claim. *7 F.3d at 1003* ("We also have some doubt as to whether intentional interference with business relations is a distinct cause of action from the tort of conspiracy in restraint of trade, or whether there is only a single theory of relief."). Other than citing that court's "doubt," Defendants do not direct the Court to additional authority to support their argument. Moreover, ***HN35***[] courts in this Circuit have continued to allow Plaintiffs to state claims for both tortious interference and for violations of Georgia law prohibiting contracts in restraint of trade. See *Atl. Fiberglass USA, LLC v. KPI, Co., Ltd., 911 F. Supp. 2d 1247 (N.D. Ga. 2012)*. Having disposed of these arguments, the Court must deny Defendants' Motion to Dismiss as to Count VI.

IV. CONCLUSION

For the foregoing reasons, Defendants' Motion to Dismiss for Failure to State a Claim (Doc. No. 19) is **DENIED**; Plaintiffs' Notice of Objection and Motion to Strike (Doc. No. 24) is **DENIED**; and Plaintiffs' Motion for Leave to File Response to Defendants' Second Notice of Supplemental Authority (Doc. No. 42) is **GRANTED**. The Court notes that its ruling is in keeping with ***HN36***[] this Circuit's disfavor of Rule 12(b)(6) dismissals in fact-intensive antitrust disputes. *Spanish Broad. Sys., 376 F.3d at 1070*. After Defendants file their Answer, the parties are directed to **[**57]** comply with the Court's previous order regarding deadlines for initial discovery related activities (Doc. No. 23).

SO ORDERED, this 20th day of March, 2015.

Opinion

MEMORANDUM ORDER

At Wilmington this 20th day of March, 2015, having considered plaintiffs' motion to stay and the papers filed in connection therewith;

IT IS ORDERED that said motion (D.I. 56) is granted in part and denied in part, for the reasons that follow: **[*2]**

1. Plaintiffs Intellectual Ventures I LLC and Intellectual Ventures II LLC (collectively, "IV") filed the above captioned lawsuit alleging that defendants Toshiba Corporation, Toshiba America, Inc., Toshiba America Electronic Components, Inc., and Toshiba America Information Systems, Inc. (collectively, "Toshiba") infringe multiple claims often asserted patents ("the asserted patents") ("IV's case"). In response, Toshiba filed, *inter alia*, a patent misuse defense and antitrust counterclaims. Rather than answer or otherwise respond by filing a pleading, IV filed the instant motion to stay consideration of such defense and counterclaims.

2. With respect to Toshiba's patent misuse defense,

> Toshiba alleges that IV is using the patents-in-suit to, among other things, (1) unlawfully force Toshiba to pay for many other irrelevant patents, (2) unlawfully force Toshiba to pay for many other invalid patents, and (3) unlawfully monopolize a market for its portfolio by aggregating thousands of patents into a hold-up portfolio and using the patents-in-suit to make Toshiba pay monopoly prices for "licenses."

(D.I. 61 at 5)

3. With respect to Toshiba's antitrust counterclaim under Section I of the Sherman **[*3]** Act, *15 U.S.C. § 1*, Toshiba generally alleges that IV "combined and conspired with others, including Talon Research, LLC, to restrain trade and competition in the relevant market and to engage in patent hold-up in violation of *Section 1* of the Sherman Act." More specifically, "IV agreed with Talon and others to take patents from IV's 'Semiconductor Portfolio' and assert them against companies that refused to succumb to IV's direct hold-up demands." (*Id*. at 7)

4. With respect to Toshiba's antitrust counterclaim under Section 7 of the Clayton Act, *15 U.S.C. § 18*, Toshiba alleges that

> IV's semiconductor patents carried little or no market power until IV acquired and integrated them into an enormous portfolio. Now, after IV has created a patent-licensing monopoly, they bestow power on IV beyond the summed value of the individual patents.

(*Id*. at 8)

5. Finally, in connection with its monopolization and attempted monopolization claims under *Section 2* of the Sherman Act, *15 U.S.C. § 2*,

> Toshiba's claims rest on IV unlawfully aggregating its claimed 3,700+ semiconductor patents to secure monopoly power that far exceeds the summed value of those patents when disaggregated. That acquisition and maintenance of monopoly power is illegal because IV acquired and is maintaining it willfully, **[*4]** rather than by means of superior product, business acumen or historic accident. IV combines large numbers of patents regardless of their validity precisely so that it can attach products existing in the marketplace and extract monopoly rents through the threat of endless litigation.

(*Id*. at 9)

6. In most cases, patent misuse defenses and antitrust counterclaims are related to, and co-extensive with, the scope of the patent litigation in which they are asserted. It makes sense under those circumstances to stay consideration of such defenses and counterclaims, as they are based in large measure on the efficacy of the patent litigation itself; e.g., if the patents are deemed valid by the fact-finder, there is no basis for a patent misuse defense or antitrust remedies.

7. Toshiba asserts that the above reasoning is not applicable to its defenses and counterclaims at bar because the ten patents-in-suit are just a small sampling of Toshiba's focus, that is, IV's "3,700+" patent portfolio. I agree to a point and, in an effort to be consistent with my past practice of staying such defense and counterclaims until the traditional patent claims of infringement and invalidity have been decided, will have **[*5]** Toshiba's defenses and counterclaims proceed as follows:

a. I will stay the defense of patent misuse and all aspects of the antitrust counterclaims that involve the validity of IV's patent portfolio.[1] More specifically, in the given context of a 3,700+ patent portfolio, I conclude that there is no reasonable way to determine how many of such patents are invalid and, if so, how many such "invalid" patents it takes to tip the balance between a legal and an illegal business practice, particularly if a jury has found one or more of the asserted patents valid. Moreover, there is potential for much mischief if the patent misuse defense were tried with IV's case, the possible inference being that the ten patents-in-suit are invalid by association with the remaining portfolio patents.

b. To the extent Toshiba relies in its antitrust counterclaims on the numerosity and value (i.e., presuming validity) of IV's patent portfolio **[*6]** and IV's allegedly improper leveraging of such, I agree that a stay is not warranted, as there are no overlapping issues with IV's case. Although I recognize the discovery and evidentiary challenges associated with Toshiba's allegations as to the market value of IV's individual patents versus the aggregate value of IV's patent portfolio,[2] these are issues that sound in ***antitrust law*** and may proceed, albeit on a bifurcated schedule from IV's case.

LexisNexis® Headnotes

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Evidence > Burdens of Proof > Allocation

HN1[] In Rem & Personal Jurisdiction, In Personam Actions

A plaintiff bears the burden of showing that the court has personal jurisdiction over each defendant. Where there has been no discovery on jurisdictional issues and the court is relying solely on the parties' pleadings and affidavits, the plaintiff need only make a prima facie showing that the court possesses personal jurisdiction over the defendant.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] Motions to Dismiss, Failure to State Claim

A motion to dismiss for failure to state a claim pursuant to *Fed. R. Civ. P. 12(b)(6)* is designed merely to assess the legal feasibility of a complaint, not to assay the weight of evidence which might be offered in support thereof. When deciding a motion to dismiss pursuant to *Rule 12(b)(6)*, the court must accept the material facts alleged in the complaint as true, draw all reasonable inferences in favor of the plaintiffs, and decide whether it is plausible that plaintiffs have a valid claim for relief.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] Complaints, Requirements for Complaint

Under Twombly, factual allegations must be enough to raise a right to relief above the speculative level, and assert a cause of action with enough heft to show entitlement to relief and enough facts to state a claim to relief that is plausible on its face. The plausibility standard set forth in Twombly and Iqbal obligates the plaintiff to provide the grounds of his entitlement to relief through more than labels and conclusions, and a formulaic recitation of the elements of a cause of action. Plausibility at the pleading stage is nonetheless distinct from probability, and a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of the claims is improbable, and recovery is very remote and unlikely.

Antitrust & Trade Law > Sherman Act > Defenses

HN4[] Sherman Act, Defenses

The statute of limitations for Sherman Act claims is four years from when the cause of action accrued, *15 U.S.C.S. § 15b*, and an antitrust cause of action generally accrues when a defendant commits an act that injures a plaintiff's business.

Antitrust & Trade Law > Sherman Act > Defenses

HN5[] Sherman Act, Defenses

For purposes of Sherman Act violations, a purchaser suing a monopolist for overcharges paid within the previous four years may satisfy the conduct prerequisite to recovery by pointing to anticompetitive actions taken before the limitations period. If a party commits an initial unlawful act that allows it to maintain market control and overcharge purchasers for a period longer than four years, purchasers maintain a right of action for any overcharges paid within the four years prior to their filings.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN6[] Actual Monopolization, Anticompetitive & Predatory Practices

In the context of settlements in Hatch-Waxman Act patent cases, large and unjustified reverse payments that can bring with them the risk of significant anticompetitive effects can bring those effects regardless of the particular form the transfer of value takes and thus are not limited to cash payments. A settlement agreement may be very simple or tremendously complex, and it may involve all manner of consideration; and if, when viewed holistically, it effects a large and unexplained net transfer of value from the patent-holder to the alleged patent-infringer, it may fairly be called a reverse-payment settlement. Such a settlement, under the Supreme Court's Actavis decision, is not ipso facto unlawful: the parties to the settlement might be able to explain the apparent "missing" value for the patent-holder in a procompetitive way—and they will have an opportunity to do so under the rule-of-reason framework—in which case the reverse payment may turn out to be justified, or to be entirely illusory. But if otherwise unexplained, it likely seeks to prevent the risk of competition. And that consequence constitutes the relevant anticompetitive harm.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

HN7[] Actual Monopolization, Anticompetitive & Predatory Practices

Under the Supreme Court's Actavis decision, the likelihood of a reverse payment bringing about anticompetitive effects depends upon its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

HN8[] Actual Monopolization, Anticompetitive & Predatory Practices

In the context of settlements in Hatch-Waxman Act patent cases, payments smaller than avoided litigation costs are presumptively not large and unexplained under the Supreme Court's Actavis decision, and represent a de facto safe harbor, and also payments exceeding avoided litigation costs are not automatically deemed unlawful for that reason alone. Even if the payments exceed avoided litigation costs, the Actavis factors—the size of the payments, their scale in relation to litigation costs, their independence from other services for which they might be fair consideration, and any other convincing justification—still matter. But it cannot be concluded that the size of the reverse payments in relation to the anticipated value of the patent is dispositive of the lawfulness of the agreement. Large reverse payments that are not particularly large in relation to the value of the patent may show confidence in the patent, but if they represent payment to avoid the risk of invalidation, then they still run afoul of Actavis.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Evidence > Burdens of Proof > Burden Shifting

HN9[] Per Se Rule & Rule of Reason, Sherman Act

Rule-of-reason analysis proceeds in three steps: First, the plaintiff bears the initial burden of showing that the defendant's conduct had an actual adverse effect on competition as a whole in the relevant market. If plaintiff satisfies this burden, the burden then shifts to defendant to offer evidence that its conduct had pro-competitive effects. If defendant is able to offer such proof, the burden shifts back to plaintiff, who must prove that any legitimate competitive effects could have been achieved through less restrictive alternatives.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN10[] Actual Monopolization, Monopoly Power

Monopoly power is a necessary element of Sherman Act claims, and the Supreme court has defined that power as the power to control prices or exclude competition. It is correct, however, that when direct evidence is available that a party profitably charges supra-competitive prices, the existence of market power can be established from that fact alone.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN11[] Market Definition, Relevant Market

In antitrust analysis, as a general rule, the process of defining the relevant product market requires consideration of cross-elasticity of demand, because the boundaries of a particular product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. This is usually a fact-intensive inquiry, and for that reason courts hesitate to grant motions to dismiss for failure to plead a relevant product market. The Supreme Court has been clear that market definitions can sometimes only be determined after a factual inquiry into the commercial realities faced by consumers, and that in some instances one brand of a product can constitute a separate market. Perhaps because of the peculiar features of pharmaceutical markets, the Second Circuit has even held that the relevant market can sometimes be limited to the generic of a particular drug, excluding the chemically-identical brand-name version.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN12[] Attempts to Monopolize, Elements

It is clearly the law in the Second Circuit that anticompetitive intent can be inferred from anticompetitive conduct. If a settlement included a large and unjustified reverse payment that was made in order to avoid the risk of patent invalidation, then antitrust liability may attach under the Supreme Court's Actavis decision; and that particular anticompetitive harm is necessarily intentional (even if intent is proved by inference).

Antitrust & Trade Law > Sherman Act > Defenses

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraud

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN13[] **Sherman Act, Defenses**

An antitrust plaintiff may prove fraudulent concealment sufficient to toll the running of the statute of limitations if he establishes (1) that the defendant concealed from him the existence of his cause of action, (2) that he remained in ignorance of that cause of action until some point within four years of the commencement of his action, and (3) that his continuing ignorance was not attributable to lack of diligence on his part. Concealment can be shown in one of two ways: either by demonstrating that the defendant took affirmative steps to prevent discovery of the claim or injury, or by demonstrating that the violation itself was "self-concealing"—that is, by showing that it is the type of violation that by its very nature is designed to appear innocent, essentially establishing fraud-by-omission. As a claim of fraud, the allegations that provide the factual basis for fraudulent concealment must meet *Fed. R. Civ. P. 9(b)*'s heightened pleading standard.

Civil Procedure > ... > Class Actions > Class Members > Absent Members

Civil Procedure > Preliminary Considerations > Justiciability > Standing

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN14[] **Class Members, Absent Members**

The Supreme Court acknowledged in Gratz that when there is "variation" between the claims of named plaintiffs and absent class members, there is a question whether the relevance of this variation is a matter of Article III standing at all or whether it goes to the propriety of class certification pursuant to *Fed. R. Civ. P. 23(a)*, and that there is tension in prior cases in this regard. The issue appears straightforward and one would expect it to be well settled; however, neither assumption is entirely true.

Civil Procedure > ... > Class Actions > Class Members > Absent Members

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN15[] **Class Members, Absent Members**

The Second Circuit in NECA-IBEW announced a broad standard for class standing, consonant with the Supreme Court's Gratz decision, that turns on whether the "same set of concerns" is implicated by the defendants' allegedly injurious conduct toward the named plaintiffs and toward the absent class members. Still, there is a fundamental analytical distinction between class standing and Article III standing. And Article III standing, as a fundamental constitutional requisite of federal judicial power, presents a threshold question in every federal case.

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN16[] **Standing, Injury in Fact**

A federal rule cannot alter a constitutional requirement, and therefore with respect to each asserted claim, a plaintiff must always have suffered a distinct and palpable injury to herself.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN17[] **Purchasers, Indirect Purchasers**

Utah has passed an Illinois Brick repealer, and its antitrust statute therefore does grant indirect purchasers the right to bring antitrust damages claims, but only if they are citizens or residents of Utah. *Utah Code Ann. § 76-10-3109*.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Governments > Legislation > Interpretation

HN18[] **Purchasers, Indirect Purchasers**

Puerto Rico has not passed an Illinois Brick repealer, and its territorial courts have apparently not directly addressed the issue, but its ***antitrust law*** is generally construed as essentially embodying the jurisprudence relevant to the parallel federal law. In the absence of a clear decision—by either the legislature or by the jurisdiction's own courts—to allow indirect-purchaser recovery, the antitrust laws of a state (or territory) are interpreted as presumptively consistent with federal law. Therefore, Puerto Rico follows the rule of Illinois Brick.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Governments > Legislation > Effect & Operation > Prospective Operation

HN19[] **Purchasers, Indirect Purchasers**

Rhode Island was an Illinois Brick state until its legislature enacted a repealer on July 15, 2013. *R.I. Gen. Laws § 6-36-7(d)*. In Rhode Island as elsewhere, statutes and their amendments are presumed to apply prospectively. Indeed, it is very widely recognized as an almost universal rule that statutes are addressed to the future, not to the past. In the absence of evidence of the Rhode Island legislature's intent to the contrary, it is fair to conclude that the law applies only prospectively.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN20[] **Deceptive & Unfair Trade Practices, State Regulation**

Hawaii's antitrust statute has an unfair or deceptive acts or practices prong, and an unfair methods of competition prong. *Haw. Rev. Stat. § 480-2*. Claims under the unfair or deceptive acts or practices prong can only be brought by consumers, the attorney general or the director of the office of consumer protection, *Haw. Rev. Stat. § 480-2(d)*. Claims under the "unfair methods of competition" prong are not limited in that way, but class actions brought under that prong require pre-suit notice to the state attorney general, who has a right of first refusal to bring claims. *Haw. Rev. Stat. § 480-13.3*.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN21[] **Deceptive & Unfair Trade Practices, State Regulation**

From the language of Hawaii's antitrust statute itself, it does not appear, for instance, to create a substantive right to recovery that only "vests" after some action or inaction of the state attorney general. Rather, it creates a right to "bring an action based on unfair methods of competition" in *Haw. Rev. Stat. § 480-2*, without any reference to notice, and delineates procedural prerequisites for class actions under the chapter in *Haw. Rev. Stat. § 480-13.3*. It cannot be concluded that the *Haw. Rev. Stat. § 480-13.3* procedural prerequisites are sufficiently a "part of a State's framework of substantive rights or remedies" to be controlling in federal court.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN22[] **Complaints, Requirements for Complaint**

A pleading that offers labels and conclusions or formulaic recitation of the elements of a cause of action will not do. The bald assertion that the alleged antitrust conduct violates dozens of non-antitrust laws, or the implication that there are no consequential differences between those laws, is not entitled to deference, because the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Substantial Contacts

HN23[] **In Personam Actions, Substantial Contacts**

The authority of a court to subject a particular defendant to personal jurisdiction has been analyzed as a constitutional question for well over a century. The statutory authority for jurisdiction, though a necessary condition of it, is not a sufficient one. A court may assert general jurisdiction over foreign (sister-state or foreign-country) corporations to hear any and all claims against them when their affiliations with the State are so continuous and systematic as to render them essentially at home in the forum State. Being "essentially at home" in a place is a very high bar, almost never found for corporations where they are neither incorporated nor headquartered. Even a company's engagement in a substantial, continuous, and systematic course of business is alone insufficient to render it at home in a forum.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

HN24[] **In Rem & Personal Jurisdiction, In Personam Actions**

Specific jurisdiction depends on an affiliation between the forum and the underlying controversy. Importantly, in contrast to general, all-purpose jurisdiction, specific jurisdiction is confined to adjudication of issues deriving from, or connected with, the very controversy that establishes jurisdiction. Pleading specific jurisdiction does not present nearly so high a bar as pleading general jurisdiction, but unlike general jurisdiction, it depends on case-specific contacts. Even frequent, substantial contacts cannot confer jurisdiction in this case unless the contacts were made in connection with the specific controversy being litigated.

Opinion by: Stefan R. Underhill

Opinion

[*231] **MEMORANDUM OF DECISION AND ORDER**

This case aggregates numerous antitrust actions brought by numerous plaintiffs in various districts against several interrelated pharmaceutical companies, all transferred to this Court by the Judicial Panel on Multidistrict Litigation. Under a Practice and Procedure Order (doc. # 37), the actions are consolidated into two groups: all direct-purchaser actions, and all indirect-purchaser actions (the indirect purchasers also style themselves "end payors"). Two consolidated, putative class-action complaints have accordingly been filed. One of the indirect purchasers (or end payors), Humana, Inc. ("Humana"), which alleges that it has the greatest economic interest of any such plaintiff (and that it alone has standing in every state), is pursuing its claims individually. There are thus three current complaints: (1) the direct-purchaser plaintiffs' putative class complaint (doc. # 109); (2) the indirect-purchaser plaintiffs' (or end-payor plaintiffs') putative class complaint (doc. # 120); and **[**11]** (3) the Humana complaint (doc. # 93).

The defendants are also divisible into several groups: (1) Boehringer Ingelheim **[*232]** Pharma GmbH & Co. KG and Boehringer Ingelheim International GmbH, which are organized under German law, and Boehringer Ingelheim Pharmaceuticals, Inc., which is a Delaware corporation (collectively "Boehringer"); (2) Teva Pharmaceutical Industries, Ltd. ("Teva Israel"), which is organized under Israeli law, and Teva Pharmaceuticals USA, Inc. ("Teva USA"), which is a Delaware corporation; (3) Barr Pharmaceuticals, Inc. and Barr Laboratories, Inc., which are both Delaware corporations (collectively "Barr"); and (4) Duramed Pharmaceuticals Inc. and Duramed Pharmaceuticals Sales Corp., which are both Delaware corporations (collectively "Duramed"). In 2008, Teva USA acquired Barr Pharmaceuticals. Duramed was, in turn, a subsidiary of Barr, and thus also became a subsidiary of Teva USA. Teva USA is a subsidiary of Teva Israel, making all non-Boehringer defendants at least indirect subsidiaries of Teva Israel.

There are four pending motions to dismiss, three of them filed collectively by all defendants except Teva Israel, and one filed by Teva Israel alone. Those motions are: **[**12]** (1) Teva Israel's motion to dismiss all complaints against it under *Rule 12(b)(2)* and *Rule 12(b)(6)* (doc. # 150); (2) the defendants' motion to dismiss the direct-purchaser complaint under *Rule 12(b)(6)* (doc. # 149; sealed mem., doc.168); (3) the defendants' motion to dismiss the indirect-purchaser complaint under *Rule 12(b)(6)* (doc. # 151); and (4) the defendants' motion to dismiss the Humana complaint under *Rule 12(b)(6)* (doc. # 152).

I. Standards of Review

A. Rule 12(b)(2)

HN1[] A plaintiff bears the burden of showing that the court has personal jurisdiction over each defendant. *Metro. Life Ins. Co. v. Robertson-Ceco Corp., 84 F.3d 560, 566 (2d Cir. 1996)*. Where, as here, there has been no discovery on jurisdictional issues and the court is relying solely on the parties' pleadings and affidavits, the plaintiff need only make a prima facie showing that the court possesses personal jurisdiction over the defendant. *Bank Brussels Lambert v. Fiddler Gonzalez & Rodriguez, 171 F.3d 779, 784 (2d Cir. 1999)*.

B. Rule 12(b)(6)

HN2[] A motion to dismiss for failure to state a claim pursuant to *Rule 12(b)(6)* is designed "merely to assess the legal feasibility of a complaint, not to assay the weight of evidence which might be offered in support thereof." *Ryder Energy Distribution Corp. v. Merrill Lynch Commodities, Inc., 748 F.2d 774, 779 (2d Cir. 1984)* (quoting *Geisler v. Petrocelli, 616 F.2d 636, 639 (2d Cir. 1980))*.

When deciding a motion to dismiss pursuant to *Rule 12(b)(6)*, the court must accept the material facts alleged in the complaint as true, draw all reasonable inferences in favor of the plaintiffs, and decide whether it is plausible **[**13]** that plaintiffs have a valid claim for relief. *Ashcroft v. Iqbal, 556 U.S. 662, 678-79, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*; *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555-56, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*; *Leeds v. Meltz, 85 F.3d 51, 53 (2d Cir. 1996)*.

HN3[] Under *Twombly*, "[f]actual allegations must be enough to raise a right to relief above the speculative level," and assert a cause of action with enough heft to show entitlement to relief and "enough facts to state a claim to relief that is plausible on its face." *550 U.S. at 555, 570*; *see also* *Iqbal, 556 U.S. at 679* ("While legal conclusions can provide the framework of a complaint, they must be supported by factual allegations."). The plausibility standard set forth in *Twombly* and *Iqbal* obligates **[*233]** the plaintiff to "provide the grounds of his entitlement to relief" through more than "labels and conclusions, and a formulaic recitation of the elements of a cause of action." *Twombly, 550 U.S. at 555* (quotation marks omitted). Plausibility at the pleading stage is nonetheless distinct from *probability*, and "a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of [the claims] is improbable, and . . . recovery is very remote and unlikely." *Id. at 556* (quotation marks omitted).

II. Discussion

A. Factual and Legal Background

This case arises at the intersection of two areas of law that would seem to be naturally at odds with one another: ***antitrust law***—procompetitive by design—which prohibits **[**14]** certain forms of anticompetitive conduct, and patent law—anticompetitive by design—which seeks to encourage innovation by rewarding innovators with limited legal monopolies. The question at the heart of this case is whether a patent-litigation settlement—that is, an agreement to settle litigation that had put the legitimacy of a patent's grant of monopoly at issue—constituted a violation of ***antitrust law***. Two features dominate the background: (1) the incentives to undertake patent litigation under the Drug Price Competition and Patent Term Restoration Act, commonly known as the Hatch-Waxman Act, and (2) the uncertain but disruptive effect on such litigation of the Supreme Court's recent decision in *FTC v. Actavis, Inc., 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. I discuss each in turn below, followed by a brief recitation of the central facts of this case.

1. *The Hatch-Waxman Act and "Pay for Delay" Settlements*

A pharmaceutical manufacturer seeking to introduce a new prescription drug to market must first obtain the approval of the FDA by filing a New Drug Application and undertaking an extensive and expensive testing process to demonstrate that the drug is safe and effective for its intended purpose. Under the Hatch-Waxman Act, a later manufacturer **[**15]** of a generic equivalent drug need not duplicate that effort, but may instead submit an Abbreviated New Drug Application that relies on the earlier scientific findings related to the already-approved brand-name drug. The abbreviated Hatch-Waxman process benefits consumers by expediting the introduction of low-cost generics to the market.

Hatch-Waxman also establishes special procedures relating to patent disputes and contains provisions that encourage patent challenges. A drug manufacturer filing a New Drug Application must list the number and expiration date of any relevant patent, and a manufacturer filing an Abbreviated New Drug Application must indicate the relationship of its generic drug to any such previously-listed patent in one of several ways. The manufacturer of the generic must certify either that no such patent has been filed, that such patent has expired, the date on which such patent will expire, or "that such patent is invalid or will not be infringed by ... the new drug." *21 U.S.C. § 355(j)(2)(A)(vii)(IV)*. That assertion of invalidity or non-infringement is known as "Paragraph IV certification," and insofar as it is inaccurate, it statutorily constitutes infringement, *see 35 U.S.C. § 271(e)(2)(A)*, and may therefore provoke **[**16]** litigation; it thus provides a procedure for challenging drug patents without starting production and sales of a possibly-infringing drug and potentially accruing damages. After Paragraph IV certification, the brand-name manufacturer may bring an infringement suit within 45 days and trigger an automatic stay of FDA approval of **[*234]** the generic for 30 months or, if it requires less time than that, until adjudication of the validity of the challenged patent in a district court.[1] *See 21 U.S.C. § 355(j)(5)(B)(iii)*.

As an incentive to make such challenges, Hatch-Waxman provides an exclusivity period of 180 days (from the first marketing of the generic) to the first manufacturer to file an Abbreviated New Drug Application with Paragraph IV certification, during which time no other Abbreviated New Drug Application will be approved. *See § 355(j)(5)(B)(iv)*. The Supreme Court in *Actavis* observed that the 180-day exclusivity period **[**17]** can be tremendously valuable, possibly worth hundreds of millions of dollars and a majority of the potential profits for a generic drug. *133 S. Ct. at 2229* (citing scholarship and a statement of the Generic Pharmaceutical Association).

Manufacturers of generic drugs have obvious motivation to bring Paragraph IV challenges to patents they believe are vulnerable; and because brand-name drugs sell at such high premiums, their manufacturers have obvious motivation to meet those challenges with infringement suits. But defending patents can be expensive, so brand-name manufacturers may also be motivated to settle the suits—all the more so if they suspect their challenged patents may indeed be vulnerable. Such settlements result in unusual dynamics. For instance, it sometimes happens that the parties settle under terms that require *the plaintiff patent-holder* to pay *the defendant infringer*—sometimes called a "reverse payment" settlement agreement—and to permit the defendant to begin producing a generic at a future date, but a date that is earlier than the expiration of the patent, in exchange for the defendant dropping its patent challenge. Assuming the patent is valid, and that the patent-holder would ultimately **[**18]** prevail, such a settlement means that the patent-holder is avoiding the cost of litigation by agreeing to shorten the length of its legal monopoly and to share some of its monopoly profits with the challenger. Consumers benefit by enjoying the lower prices of generics sooner than they otherwise would under the patent. Assuming, however, that the patent is invalid, and that the challenger would ultimately prevail, then such a settlement amounts to a "pay to delay" agreement: the patent-holder's monopoly is illegitimate, and it is paying a would-be competitor to delay its entry into the market. Consumers who should enjoy competitive prices now will instead pay monopoly prices until the end of the term of the anticompetitive collusion. The availability of such settlements allows manufacturers of brand-name drugs to avoid the invalidation of potentially weak patents and keep prices high by sharing their monopoly profits with manufacturers of generics.

Is that an antitrust violation? Several courts of appeals, including the Second Circuit, have said no, at least absent fraud in obtaining the patent and so long as the settlement terms are within its scope (*i.e.*, consumers will not face a **[**19]** longer period of monopoly under the settlement than they would have faced under the patent, implicitly presuming the patent's validity). *See, e.g., In re Tamoxifen Citrate Antitrust Litig., 466 F.3d 187 (2d Cir. 2006)*; *In re*

[1] If the validity of the patent has not yet been determined after 30 months, the FDA can give approval to the generic irrespective of possible infringement, but the manufacturer who then begins production of the generic does so at risk of an unfavorable judgment and the accrual of damages to the vindicated patent-holder.

Ciprofloxacin Hydrochloride Antitrust Litig., 544 F.3d 1323 (Fed. Cir. 2008). Other courts of appeals have said yes, at least **[*235]** unless a presumption of unlawful restraint of trade is rebutted. *See, e.g., In re K-Dur Antitrust Litig., 686 F.3d 197 (3d Cir. 2012)*; *In re Cardizem CD Antitrust Litig., 332 F.3d 896 (6th Cir. 2003)*. The Supreme Court in *Actavis*, abrogating those decisions, said "sometimes."

2. *The Actavis Decision*

The facts of *Actavis* in most essentials follow the discussion above: Solvay Pharmaceuticals filed a New Drug Application for a brand-name drug, obtained approval, and later a patent. Actavis, Inc. (among others) filed an Abbreviated New Drug Application for a generic equivalent and certified under Paragraph IV that Solvay's patent was invalid and the proposed generic would not infringe it. Solvay responded with litigation, which later settled, and the terms of the settlement guaranteed Actavis millions of dollars in annual payments from Solvay and allowed it to bring its generic to market at some time before the disputed patent expired, but not immediately. Actavis also agreed to provide some services, such as promoting the brand-name drug, and the companies described the payments as compensation for those services. **[**20]** The FTC sued, alleging that the services had little value and that the purpose of the payments was to compensate a would-be competitor for agreeing to delay competition. The district court held that the FTC failed to set forth an antitrust violation, *In re Androgel Antitrust Litigation (No. II), 687 F. Supp. 2d 1371, 1379 (N.D. Ga. 2010)*, and the Eleventh Circuit affirmed, writing that "absent sham litigation or fraud in obtaining the patent, a reverse payment settlement is immune from antitrust attack so long as its anticompetitive effects fall within the scope of the exclusionary potential of the patent."*FTC v. Watson Pharmaceuticals, Inc., 677 F.3d 1298, 1312 (11th Cir. 2012)*.

In a 5—3 opinion, the Supreme Court reversed the Eleventh Circuit, holding that such settlement agreements "can sometimes violate the antitrust laws," *Actavis, 133 S. Ct. at 2227*, and that the plaintiff "should have been given the opportunity to prove its antitrust claim." *Id. at 2234*. The Court reasoned that referring "simply to what the holder of a valid patent could do does not by itself answer the antitrust question," because *invalidated* patents confer no right to exclude competition, and the Paragraph IV certification "put the patent's validity at issue, as well as its actual preclusive scope." *Id. at 2230—31*. It cited legislative history from prior to the enactment of the 2003 amendments—specifically, statements **[**21]** of Senator Hatch and Representative Waxman—that clearly condemns reverse-payment settlements, and went on to conclude that "a reverse payment, where large and unjustified, can bring with it the risk of significant anticompetitive effects." *Id. at 2237*. It declined to adopt the "quick look" approach, which would make such settlements presumptively illegal, because "the likelihood of a reverse payment bringing about anticompetitive effects depends upon its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification." *Id*. The Court instead adopted the "rule of reason" approach, but as for more specific guidance on how to analyze "the basic question—that of the presence of significant unjustified anticompetitive consequences," the Court "leave[s] to the lower courts the structuring of the present rule-of-reason antitrust litigation." *Id. at 2238*.

Several district courts have already applied *Actavis*, with not entirely consistent results. *See King Drug Co. of Florence v. Cephalon, Inc., No. 2:06-CV-1797, 88 F. Supp. 3d 402, 2015 U.S. Dist. LEXIS 9545, 2015 WL 356913 (E.D. Pa. Jan. 28, 2015)*; **[*236]** *United Food & Commercial Workers Local 1776 & Participating Emp'rs Health & Welfare Fund v. Teikoku Pharma USA, Inc., No. 14-MD-02521-WHO, 74 F. Supp. 3d 1052, 2014 U.S. Dist. LEXIS 161069, 2014 WL 6465235 (N.D. Cal. Nov. 17, 2014)*; **[**22]** *In re Effexor XR Antitrust Litig., No. CIV. 11-5479 PGS, 2014 U.S. Dist. LEXIS 142206, 2014 WL 4988410 (D.N.J. Oct. 6, 2014)*; *In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 2014 WL 4403848 (E.D. Pa. 2014)*; *In re Loestrin 24 Fe Antitrust Litig., No. 1:13-MD-2472-S-PAS, 45 F. Supp. 3d 180, 2014 U.S. Dist. LEXIS 123322, 2014 WL 4368924 (D.R.I. Sept. 4, 2014)*; *In re Lamictal Direct Purchaser Antitrust Litig., 18 F. Supp. 3d 560, 2014 WL 282755 (D.N.J. 2014)*; *In re Nexium (Esomeprazole) Antitrust Litig., 968 F. Supp. 2d 367 (D. Mass. 2013)*; *In re Lipitor Antitrust Litig., No. 3:12-CV-2389 PGS, 2013 U.S. Dist. LEXIS 126468, 2013 WL 4780496 (D.N.J. Sept. 5, 2013)*. As of the date of this writing, at least one case applying *Actavis* has been argued before a federal Court of Appeals—*In re Lamictal* was argued at the Third Circuit in November 2014—but none of the circuits has yet issued an opinion interpreting it. There are some questions that arise in the application of *Actavis* that the district courts may answer in divergent ways—questions like what constitutes a reverse "payment," and what makes one "large" and "unjustified." Some of those questions will surely end up in the Courts of Appeals, and perhaps eventually back again at the Supreme Court. As one of the courts above observed, "[w]e are confronting this issue early in a law refinement process that will take some time to shake out." *In re Loestrin 24 Fe Antitrust Litig., 2014 U.S. Dist. LEXIS 123322, 2014 WL 4368924, at *13*.

3. *Aggrenox*

The facts of the Aggrenox litigation, as they appear in the pleadings, are virtually identical in essential respects to **[**23]** those of *Actavis*. Aggrenox is a brand-name prescription medication consisting of a particular combination of dipyridamole and aspirin. In January 2000, Boehringer obtained U.S. Patent No. 6,015,577 on the composition ("the '577 patent"), after having obtained FDA approval in November 1999 for its use to lower the risk of stroke in patients who have already had a stroke or transient ischemic attack. Boehringer listed the patent with the FDA and brought Aggrenox to market, where it has been a commercial success.

In January 2007—ten years before patent '577 is set to expire—Barr filed an Abbreviated New Drug Application seeking approval to market a generic equivalent of Aggrenox, with Paragraph IV certification challenging the '577 patent. Boehringer brought suit in the District of Delaware. At the same time, Barr also intended to introduce a generic of another Boehringer product, Mirapex, and separate litigation on that issue was pending in the District of Delaware. In August 2008, Boehringer and Barr settled all patent litigation between them, with respect to both Aggrenox and Mirapex. They contemporaneously entered a settlement agreement, an Aggrenox license, a Mirapex license, and a Co-Promotion Agreement. Among other things, Barr agreed **[**24]** to drop its patent challenge and not market generic Aggrenox until July 2015 (eighteen months prior to the expiration of the patent), and that Duramed (a Barr subsidiary) would use its specialized sales force to educate obstetricians and gynecologists about Aggrenox. Barr would be compensated based on several factors, including net sales of Aggrenox, regardless of whether its co-promotion generated any additional sales (the FTC estimated that the deal would cost Boehringer over $120 million in royalties). The agreements were announced publicly in a press release. The FTC commenced an inquiry in January 2009, which is apparently ongoing.

In August 2009, at least some of the same parties and lawyers in the present **[*237]** litigation brought suit against Boehringer in the Western District of Pennsylvania, alleging that the 2008 settlement was intended to delay entry of generic Mirapex in violation of ***antitrust law***. When the Federal Circuit upheld the validity of the Mirapex patent, the plaintiffs in that case dropped their suit. In 2013, the various suits consolidated here began to be filed, now alleging that the 2008 settlement was intended to delay entry of generic Aggrenox in violation of ***antitrust*** **[**25]** ***law***.

B. Federal Antitrust Claims

1. *Statute of Limitations*

The defendants argue in all of their motions to dismiss (most extensively in their motion to dismiss the direct-purchaser complaint, and that discussion is incorporated by reference in the other motions) that the 2013 claims are time-barred. There is no dispute that ***HN4***[] the statute of limitations for Sherman Act claims is four years from when "the cause of action accrued," *15 U.S.C. § 15b*, and that an antitrust cause of action generally accrues "when a defendant *commits* an act that *injures* a plaintiff's business," *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)* (emphasis added), but the parties differently emphasize the commission of the act itself and the consummation of the act in an injury, taking different positions on the applicability of *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263 (2d Cir. 1979)*.

The defendants offer two possibilities: the claims accrued in August 2008, when the Aggrenox settlement was reached and publicly announced; or in August 2009, when the FDA approved Barr's Abbreviated New Drug Application for a generic equivalent to Aggrenox. If the defendants committed some discrete anticompetitive act, then surely—as the complaints allege—it was the 2008 agreement. If injury was only speculative at that date, because Barr did not yet **[**26]** have approval to begin production of the generic, then surely it would become real in August 2009 when that approval was obtained. Both dates put the November 2013 filing of the first direct-purchaser complaint outside of the four-year window. The defendants also argue that the end of the automatic 30-month stay of FDA approval of a generic that was triggered by the filing of Boehringer's infringement suit—though falling just within four years of the filing of the first complaint—should not be taken as the accrual date. They argue that under the plaintiffs' theory of the case (at least as the defendants understand it), the invalidity of Boehringer's patent would have been determined in court (and the avoidance of this inevitability was the motivation for the settlement), and thus the stay would have ended prior to the 30-month period. The plaintiffs cannot be permitted, the defendants insist, to argue for an earlier date when arguing that the settlement caused the specific harm of delayed entry of a generic, but to argue for a later date for purposes of the statute of limitations.

The plaintiffs, however, believe the defendants are attempting to dodge *Berkey Photo*, which distinguishes **[**27]** injured rivals from injured purchasers in antitrust actions. "Although the business of a monopolist's rival may be injured at the time the anticompetitive conduct occurs," the Second Circuit reasoned, "a purchaser, by contrast, is not harmed until the monopolist actually exercises its illicit power to extract an excessive price. . . . So long as a monopolist continues to use the power it has gained illicitly to overcharge its customers, it has no claim on the repose that a statute of limitations is intended to provide. . . . The purchaser's cause of action, therefore, accrues only on the date damages **[*238]** are suffered . . . ." *603 F.2d at 295* (internal quotation marks omitted).

The defendants argue that *Berkey Photo* does not apply, because its analysis relied on circumstances in which plaintiffs might not yet have reason to believe they were injured within the limitations period. The case as they see it therefore stands for a narrow "speculative damages" exception, and more expansive language is mere dicta. Moreover, the defendants insist, this case and others that the plaintiffs cite rely on *ongoing* instances of discrete anticompetitive conduct within the limitations period, not merely carrying out the **[**28]** terms of an earlier agreement. They argue that the Second Circuit has distinguished between the new and independent acts needed to maintain a conspiracy and inertial consequences flowing from a discrete act. The defendants rely most heavily on *United States v. Grimm, 738 F.3d 498 (2d Cir. 2013)*, a criminal case dismissing a conspiracy-to-commit-wire-fraud indictment on grounds of a lapsed limitations period. The defendants also cite various other cases in addition to *Grimm* for the proposition that courts in the Second Circuit very strongly disfavor the "continuing violation" doctrine, and for the narrowness of the exception that the doctrine purportedly represents. *See, e.g., Pressley v. City of N.Y., 2013 U.S. Dist. LEXIS 5374, 2013 WL 145747 (E.D.N.Y. Jan. 14, 2013)*; *Trinidad v. N.Y. City Dept. of Corr., 423 F. Supp. 2d 151 (S.D.N.Y. 2006)*; *In re Ciprofloxacin Hydrochloride Antitrust Litig., 261 F. Supp. 2d 188 (E.D.N.Y. 2003)*; *Schultz v. Texaco Inc., 127 F. Supp. 2d 443 (S.D.N.Y. 2001)*. But the cited decisions are either not antitrust cases, or they do not examine the issue pertinent here of purchasers alleging ongoing overcharges. None of them abrogates or otherwise casts doubt on the authority or reasoning of *Berkey Photo*, and none of them so squarely meets the allegations in this case as *Berkey Photo* does.

The defendants are correct that the *Berkey Photo* Court discusses speculative damages and the potential of anticompetitive conduct to harm even businesses that do not yet exist at the time of the conduct. It is inaccurate, however, **[**29]** to suggest that the court used any such limiting language in its holding, or that the plaintiffs have misplaced reliance on its dicta. On the contrary, cutting through any dispute about what is and is not mere dictum, the court expressly flags its holding: "We hold, therefore, that ***HN5***[] a purchaser suing a monopolist for overcharges paid within the previous four years may satisfy the conduct prerequisite to recovery by pointing to anticompetitive actions taken before the limitations period." *603 F.2d at 296*. That is precisely the scenario that the plaintiffs allege. They allege, in fact, not just overcharges paid within the previous four years, but overcharges that are ongoing. Even if, as defendants argue, the prerequisite anticompetitive conduct occurred wholly outside of the four-year limitations period, the plaintiffs' claims still fall clearly and squarely under the holding of *Berkey Photo*.

Courts in other districts and circuits have used the same reasoning applied in *Berkey Photo*—a purchaser suing a monopolist for overcharges is injured anew by each overcharge—and have come to the same result. *See, e.g., In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 2014 WL 4403848, at *7 (E.D. Pa. Sept. 5, 2014)* ("Every court to have considered this issue in the pay-for-delay context has held that a new **[**30]** cause of action accrues to purchasers upon each overpriced sale of the drug.") (*citing In re K-Dur Antitrust Litig., 338 F. Supp. 2d 517, 549 (D.N.J. 2004)* ("Plaintiffs' claims are not barred by the statute of limitations to the extent that they bought and overpaid for K—Dur within the applicable time limitations."); **[*239]** *In re Buspirone Patent Litig., 185 F. Supp. 2d 363, 378 (S.D.N.Y. 2002)* ("[I]f a party commits an initial unlawful act that allows it to maintain market control and overcharge purchasers for a period longer than four years, purchasers maintain a right of action for any overcharges paid within the four years prior to their filings."); *In re Skelaxin (Metaxalone) Antitrust Litig., No. 12-md-2343, 2013 U.S. Dist. LEXIS 70968, 2013 WL 2181185 (E.D. Tenn. May 20, 2013)* (holding that the plaintiffs' claims were timely because they were "overcharged for metaxalone well into the limitations period")).

I conclude that the federal antitrust claims are timely for all overcharges alleged to have been incurred within the four years preceding the filing of the claims.

2. *Antitrust Injury Under Actavis*

The defendants argue that the plaintiffs do not plausibly allege antitrust injury, because any injury at all is predicated upon the assumption that Barr would have prevailed in its patent challenge, and because the plaintiffs make only the conclusory allegation that the patent was weak. The **[**31]** plaintiffs, they say, simply make no allegation meeting the plausibility standard on a motion to dismiss that the '577 patent would have been found invalid, or that a generic would have been introduced "at-risk," if only the defendants had not entered into the challenged settlement agreement. There is thus no plausible allegation of actual injury, the argument goes, because there is no plausible allegation of actual delay of the entry of a generic. That argument, however logically compelling it might be in isolation, fails to engage seriously with the Supreme Court's reasoning in *Actavis*, which poses an insurmountable obstacle to it.

The essential problem with the divergent rules for the treatment of reverse-payment patent-litigation settlements before *Actavis* is that they made (likely unjustifiable) presumptions about the validity of the underlying patents, which was the very issue disputed in the underlying patent litigation. Under the old "scope of the patent" test, which was rejected in *Actavis*, any settlement less restrictive than the patent was immune from antitrust scrutiny. But "to refer . . . simply to what the holder of a valid patent could do does not by itself answer the antitrust **[**32]** question," the Court held, because the patent "may or may not be valid, and may or may not be infringed. A *valid* patent excludes all except its owner from the use of the protected process or product . . . . But an *invalidated* patent carries with it no such right." *Actavis, 133 S. Ct. at 2230—31* (internal quotations and citation omitted). The patent's validity was precisely the disputed issue in the litigation, and the settlement ended that litigation. Taking the patent's exclusionary scope as the baseline does indeed make procompetitive any settlement that reflects any lesser exclusion; but that baseline presumes the validity of the patent. The opposite presumption—taking the invalidity of the patent as the baseline—would make any period of excluded competition that is agreed to in a settlement, no matter how much shorter than the patent's period of exclusion, necessarily anticompetitive. Both presumptions are impermissible.

The defendants, by expecting the plaintiffs to plead with specificity reasons to infer that the '577 patent would ultimately have been invalidated, appear to presume that the Supreme Court in *Actavis* favored a rule that required litigating the patent's merits, at least in some abbreviated fashion, **[**33]** in order to determine whether a settlement violates ***antitrust law***. That would be a logical (however impractical) way to avoid presuming either the patent's validity **[*240]** or invalidity, but the Supreme Court expressly disclaimed it:

> [I]t is normally not necessary to litigate patent validity to answer the antitrust question . . . . An unexplained large reverse payment itself would normally suggest that the patentee has serious doubts about the patent's survival. And that fact, in turn, suggests that the payment's objective is to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market—the very anticompetitive consequence that underlies the claim of antitrust unlawfulness.

Id. at 2236. The "unexplained large reverse payment" serves as a proxy for the weakness of the patent, which thus need not be proved (or pleaded) directly. Moreover, the Court identified the pertinent "anticompetitive consequence," which does not appear to depend on the conclusive invalidity of the patent. The antecedent of the appositive clause identifying the anticompetitive consequence contains a telling subjunctive: "to maintain supracompetitive prices **[**34]** to be shared among the patentee and the challenger rather than face what *might have been* a competitive market" (emphasis added). The Court was still clearer a few sentences later:

> The owner of a particularly valuable patent might contend, of course, that even a small risk of invalidity justifies a large payment. But, be that as it may, the payment (if otherwise unexplained) likely *seeks to prevent the risk*

> of competition. And, as we have said, *that consequence constitutes the relevant anticompetitive harm*. In a word, the size of the unexplained reverse payment can provide a workable surrogate for a patent's weakness, all without forcing a court to conduct a detailed exploration of the validity of the patent itself.

Id. at 2236—37 (emphasis added). The anticompetitive harm is *not* that the patent surely would have been invalidated if not for the settlement, and that a generic therefore surely would have entered the market sooner; if that were the anticompetitive harm, a determination of a patent settlement's lawfulness under ***antitrust law*** would require the very same patent litigation that the settlement avoided. The anticompetitive harm, under *Actavis*, is that the reverse-payment settlement "seeks **[**35]** to *prevent the risk* of competition" (emphasis added). The plaintiffs thus need not plead (or prove) the weakness of the '577 patent, because the patent's ultimate validity is not at issue. Rather, they must plead facts sufficient to infer (and they must ultimately prove, within the rule-of-reason framework) that a large and otherwise unjustified reverse-payment was made as part of the settlement in order to shore up some perceived *risk* of the '577 patent's invalidity.

The rule of *Actavis* might seem unusual or counterintuitive given the typical settlement context. The value of a lawsuit is traditionally estimated as the expected value of judgment multiplied by the probability of liability, less litigation costs. The probabilities are of course always rough estimates, but the parties evaluate the favorability of potential settlements by their respective estimation of risk and the allocation of that value between them. In the Hatch-Waxman context, however, where litigation was provoked by Paragraph IV certification (and production of allegedly infringing product need not have begun), there may be no actual damages, and the adverse outcome for the patent-holder is measured not by the size of a potential judgment **[**36]** but by the forgone monopoly profits in the event of patent invalidation. Any settlement that takes the risk of patent invalidation into account will tacitly reflect the value of continuing the patent **[*241]** monopoly. Of course it will generally be in the interest of both patent-holder and patent-challenger to share the monopoly profits rather than compete:

> Indeed, there are indications that patentees sometimes pay a generic challenger a sum even larger than what the generic would gain in profits if it won the paragraph IV litigation and entered the market. The rationale behind a payment of this size cannot in every case be supported by traditional settlement considerations. The payment may instead provide strong evidence that the patentee seeks to induce the generic challenger to abandon its claim with a share of its monopoly profits that would otherwise be lost in the competitive market.

Id. at 2235 (citation omitted). In such cases, the *ex ante* probability of patent invalidation will factor only into the allocation of monopoly profits between patent-holder and patent-challenger, while the consumer bears the cost of monopoly prices irrespective of the patent's strength or weakness.

Of course, the *actual* ***[**37]*** expected cost of litigation for the patent-holder necessarily includes the risk of invalidation and forgone monopoly profits, whether or not that is a permissible settlement consideration. It is thus no surprise if pre-*Actavis* settlements in the Hatch-Waxman context frequently included large payments flowing from patent-holders to patent-challengers (that is, large "reverse" payments), and we might therefore expect *Actavis* to discourage many patent settlements, especially where the patent in question is very valuable. That may impose a cost on the judicial system, which, as the Supreme Court acknowledged in *Actavis*, prefers "a general legal policy favoring the settlement of disputes," *id. at 2234*, but it is consistent with what the Court observed were the purposes of the Hatch-Waxman Act and Paragraph IV certification. *Id*. (observing "the general procompetitive thrust of the statute," and "its specific provisions facilitating challenges to a patent's validity").

In sum, though the defendants are correct that the several complaints in the present case plead relatively bare allegations of the '577 patent's vulnerability and the hypothetical earlier entry of a generic if not for the settlement agreement, **[**38]** the sparsity of those allegations does not fatally undermine the claims of antitrust injury under *Actavis*. The salient question is not whether the fully-litigated patent would ultimately be found valid or invalid—that may never be known—but whether the settlement included a large and unjustified reverse payment leading to the inference of profit-sharing to avoid the risk of competition.

3. *"Large" and "Unjustified" Reverse "Payment" Under Actavis*

In *Actavis*, a brand-name manufacturer and a generic manufacturer settled a lawsuit provoked by Paragraph IV certification, and the settlement terms required the generic manufacturer to drop the patent challenge and provide promotional services for the brand-name drug. In exchange, the generic manufacturer received large payments and an entry date for the competing generic that was not immediate but still earlier than the expiration of the patent. The subsequent antitrust complaint alleged that the services were mere pretext for the payment, which was in truth a payment to delay competition. Nearly identical allegations are presented here. The Court in *Actavis* held that large and unjustified reverse payments bring with them the risk of significant **[**39]** anticompetitive effects, that the plaintiffs should have been allowed to present their antitrust case, and that rule-of-reason analysis should be applied, but it did not **[*242]** discuss in any detail whether or why the reverse payment alleged in that case was "large" or "unjustified." District courts applying *Actavis* have thus had relatively little guidance on the question of what constitutes a "large" and "unjustified" reverse payment, and have diverged even on the issue of what constitutes "payment." The defendants here dispute the plaintiffs' characterization of their settlement agreement on all three grounds. The disputed "agreement" was in fact a complicated transaction involving a series of agreements settling separate litigation over two drug patents, and the defendants argue that nothing in any of it constitutes a reverse payment, but only compensation for services; and that even if some part of it does constitute a reverse payment, it is neither large nor unjustified.

The defendants emphasize that every settlement necessarily involves consideration on both sides, and that it therefore cannot be the case that a "reverse payment" of the sort contemplated in *Actavis* is present merely **[**40]** because an alleged patent infringer may be said to have received consideration as part of a settlement. That is doubtless correct—even a promise to stop litigating has value and may constitute consideration in a settlement agreement—but the defendants go altogether too far the other way in their attempt to read a maximally restrictive sense of "payment" into the *Actavis* decision. They make much of the fact that *Actavis* contains repeated examples and references to payments of money, and not to payments of some other form of consideration, and they dispute whether "payment" under *Actavis* comprises transfers of value in any form other than cash. As of the date of this writing, two courts have agreed with that view, *see* *In re Loestrin 24 Fe Antitrust Litig., No. 1:13-MD-2472-S-PAS, 2014 U.S. Dist. LEXIS 123322, 2014 WL 4368924 (D.R.I. Sept. 4, 2014)*; *In re Lamictal Direct Purchaser Antitrust Litig., 18 F. Supp. 3d 560, 2014 WL 282755 (D.N.J. Jan. 24, 2014)*, though one of them did so with "significant reservations" and called that conclusion "vexing." *In re Loestrin, 2014 U.S. Dist. LEXIS 123322, 2014 WL 4368924, at *11*. A majority of courts to have examined the issue take the opposite position, that "payment" is not limited to cash transfers. *See, e.g.,* *United Food & Commercial Workers Local 1776 & Participating Emp'rs Health & Welfare Fund v. Teikoku Pharma USA, Inc., No. 14-MD-02521-WHO, 2014 U.S. Dist. LEXIS 161069, 2014 WL 6465235 (N.D. Cal. Nov. 17, 2014)*; **[**41]** *In re Effexor XR Antitrust Litig., No. CIV. 11-5479 PGS, 2014 U.S. Dist. LEXIS 142206, 2014 WL 4988410 (D.N.J. Oct. 6, 2014)*; *In re Niaspan Antitrust Litig., 42 F. Supp. 3d 735, 2014 WL 4403848 (E.D. Pa. Sept. 5, 2014)*; *In re Nexium (Esomeprazole) Antitrust Litig., 968 F. Supp. 2d 367 (D. Mass. 2013)*. I must agree with the latter group.

Black's Law Dictionary defines "payment" as the "[p]erformance of an obligation by the delivery of money *or some other valuable thing* accepted in partial or full discharge of the obligation." (10th ed. 2014) (emphasis added). The Oxford English Dictionary defines it as a "sum of money (*or equivalent*) paid or payable, esp. in return for goods or services or in discharge of a debt." (3d ed. 2005) (emphasis added). Those definitions quite sensibly recognize the substitutability of value, because the distinction between transfers of money and transfers of things that are worth money is, in the words of the *Actavis* dissent, "a distinction without a difference." *Actavis, 133 S. Ct. at 2243* (Roberts, C.J., dissenting). Indeed, if antitrust scrutiny can be avoided simply by making one's large and unjustifiable reverse-payment settlement in gold bullion rather than dollars, then *Actavis* stands for nothing but an arbitrary restriction on the form such payments can take. To read the decision that way is to cabin its reasoning to the point of meaninglessness. I must conclude that ***HN6***[] large and unjustified **[**42]** **[*243]** reverse payments that "can bring with [them] the risk of significant anticompetitive effects," *id. at 2237* (majority opinion), can bring those effects regardless of the particular form the transfer of value takes and thus are not limited to cash payments. A settlement agreement may be very simple or tremendously complex, and it may involve all manner of consideration; and if, when viewed holistically, it effects a large and unexplained net transfer of value from the patent-holder to the alleged patent-infringer, it may fairly be called a reverse-payment settlement. Such a settlement, under *Actavis*, is not *ipso facto* unlawful: the parties to the settlement might be able to explain the apparent "missing" value for the patent-holder in a procompetitive way—and they will have an opportunity to do so under the rule-of-reason framework—in which case the reverse payment may turn out to be justified, or to be entirely illusory. But if otherwise unexplained, it "likely seeks to prevent the risk of competition. And . . . that consequence constitutes the relevant anticompetitive harm." *Id. at 2236*.

HN7[] Under *Actavis*, "the likelihood of a reverse payment bringing about anticompetitive effects depends upon its size, **[**43]** its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification." *Id. at 2237*. The plaintiffs here allege that the reverse payment was quite large, including a $4 million upfront cash payment and approximately $120 million in guaranteed royalties over time even in the absence of co-promotion efforts—and that being in addition to the up-to-$2.5 million per year of payments for those co-promotion efforts, which the plaintiffs also suggest exceeds the value of the services. The defendants argue that even those sums are small in relation to the value of the patent. That relation, by the logic of *Actavis*, may suggest confidence in the patent, but it does not mean that the alleged reverse payment is not "large." On the contrary, as the Supreme Court suggested in *Actavis, id. at 2236—37*, a patent-holder who has a high degree of confidence in a patent's strength may nevertheless be willing to share some portion of the monopoly profits in order to avoid even a small risk of invalidation if the patent is especially valuable, and even a small portion of the profits on an especially **[**44]** valuable patent might indeed be quite large in absolute terms. I agree with the defendants that ***HN8***[] payments smaller than avoided litigation costs are presumptively not large and unexplained under *Actavis*, and represent a *de facto* safe harbor, and also that payments exceeding avoided litigation costs are not automatically deemed unlawful for that reason alone. Even if the payments exceed avoided litigation costs, the *Actavis* factors—the size of the payments, their scale in relation to litigation costs, their independence from other services for which they might be fair consideration, and any other convincing justification—still matter. But I cannot conclude that the size of the reverse payments in relation to the anticipated value of the patent is dispositive of the lawfulness of the agreement. Large reverse payments that are not particularly large in relation to the value of the patent may show confidence in the patent, but if they represent payment *to avoid the risk of invalidation*, then they still run afoul of *Actavis*.

The plaintiffs allege that the total payment is far greater than the fair value of the services falling under the Co-Promotion Agreement, and therefore constitutes a large **[**45]** and unjustifiable reverse payment, which they allege is especially clear since payment is guaranteed even without the generation of additional sales. They **[*244]** also allege that Boehringer agreed not to launch its own "authorized generic" during Barr's 180-day exclusivity period under the Hatch-Waxman Act, which further enlarged the reverse payment by constituting an additional unexplained transfer of value to Barr. The defendants dispute those allegations, and the sufficiency of the pleading, with several arguments: They argue that the Co-Promotion Agreement, as part of a complex transaction that settled litigation over two drugs, was somehow separate from the Aggrenox settlement, and that the plaintiffs have failed to sufficiently plead that it was made as consideration for that settlement (or they cannot so plead) because they argued in prior litigation that it was made as consideration for delaying generic entry of the other drug. They argue that the plaintiffs fail to plead with sufficient specificity the fair value of the services, the excess of the payments over that value, or in some other way the total value of the alleged reverse payment. And they argue that any agreement not to **[**46]** introduce an authorized generic should not be considered part of a reverse payment because exclusive licenses are authorized by the Patent Act and are the kind of traditional form of settlement that *Actavis* permits, or because they only result in "payment" in the form of affirmative sales, or because they are otherwise procompetitive insofar as they represent an increase in competition compared to what competition otherwise would have been under the patent. I find none of those arguments persuasive.

First, and quite notably, the defendants do not agree among themselves whether the challenged settlement agreement actually does prevent Boehringer from introducing an authorized generic: by Boehringer's interpretation, it does not; but by Barr's reckoning it does. That disagreement is consonant with the plaintiffs' theory: Barr (the alleged infringer, and would-be generic manufacturer) sees a "no—authorized generic" agreement as a thing of value it received in the settlement and wishes to preserve it in this litigation, while Boehringer (the patent-holder and brand-name manufacturer) sees such an agreement as a cost it prefers not to incur and would happily disclaim. I need not determine **[**47]** now who is correct by ruling on the construction of the agreement, but the plaintiffs allege that there is such a provision and that it is very valuable, and at least on the latter point the defendants clearly agree.

The defendants are correct that the plaintiffs have not attempted to assign dollar values with significant precision or very obvious methodological justification to the various provisions of the settlement, and that is among the stronger of the defendants' arguments. Some other courts interpreting *Actavis*, while holding that reverse "payments" are not limited to cash transfers, have observed the importance of the court's ability to calculate the value of any nonmonetary payments or have held that pleading an estimate of the total monetary value and a reliable foundation for that value are necessary to establish the plausibility required by *Rule 12(b)(6)*. *See, e.g., In re Effexor XR Antitrust Litig., No. 3:11-CV-5479 PGS, 2014 U.S. Dist. LEXIS 142206, 2014 WL 4988410 (D.N.J. Oct. 6, 2014)*; *In re Lipitor Antitrust Litig., No. 3:12-CV-2389 PGS, 46 F. Supp. 3d 523, 2014 U.S. Dist. LEXIS 127877, 2014 WL 4543502 (D.N.J. Sept. 12, 2014)*. While I share the concerns expressed by those courts, it is also clear that very precise and particularized estimates of fair value and anticipated litigation costs may require evidence in the exclusive possession of the defendants, **[**48]** as well as expert analysis, and that these issues are sufficiently factual to require discovery. I cannot conclude simply from the absence of precise figures that the pleadings represent formulaic recitations of elements and allegations that fail to rise **[*245]** above the speculative; on the contrary, the complaints make specific allegations about the terms of the settlement and their relative value that are plausible on their face. Whether the plaintiffs can substantiate those allegations may be an issue for summary judgment or trial, but for purposes of the motions to dismiss, I must accept the allegations as true and draw all reasonable inferences in the plaintiffs' favor. While doing that, I cannot conclude that the plaintiffs fail to sufficiently plead a large and unjustified reverse payment.

Nor are the allegations of a large and unjustified reverse payment undermined by the permissibility of exclusive licensing under the Patent Act or in settlements generally. The defendants are surely correct that patent holders may legally grant exclusive licenses and that the particular restraint on competition such agreements represent is an exception to antitrust prohibition and expressly permissible **[**49]** by statute. That is not disputed. But such licenses can be worth money, and granting them can thus be the equivalent of transferring money. If some particular transfer of money would be unlawful—for whatever reason—its unlawfulness is not cured merely because the value is transferred in the form of exclusive licenses instead of cash, irrespective of whether the grant of an exclusive license would otherwise be valid. The statutory authority to grant exclusive licenses no more immunizes reverse-payment settlements that include them from antitrust scrutiny under *Actavis* than the statutory authority to use cash as legal tender immunizes reverse-payment settlements made in cash from such scrutiny. The issue is not whether the *form* of the payment was legal, but whether the *purpose* of the payment was legal. The plaintiffs do not appear to allege that "no—authorized generic" agreements are *per se* unlawful, nor that any individual feature of the settlement agreement would have necessarily constituted an antitrust violation as part of some other agreement. Rather, they allege that Boehringer gave much more than it got in the settlement agreement; and under *Actavis*, that can constitute an antitrust **[**50]** violation if it did so in order to avoid the risk of patent invalidation.

It may also be true that granting an exclusive licensing agreement is procompetitive relative to not granting it, but the anticompetitive harm described in *Actavis* is not measured by the exclusionary scope of the patent—that test was explicitly rejected. The question is whether a large and unjustifiable reverse payment was made in order to avoid the risk of patent invalidation. If a settlement that grants an exclusive license violates the rule of *Actavis*, it is not saved by comparison to the exclusionary scope of the unlicensed patent, or by the licensing arrangement being more competitive than a settlement agreement that lacked one.

HN9[] Rule-of-reason analysis proceeds in three steps:

> First, the plaintiff bears the initial burden of showing that the defendant's conduct had an actual adverse effect on competition as a whole in the relevant market. If plaintiff satisfies this burden, the burden then shifts to defendant to offer evidence that its conduct had procompetitive effects. If defendant is able to offer such proof, the burden shifts back to plaintiff, who must prove that any legitimate competitive effects could **[**51]** have been achieved through less restrictive alternatives.

Ark. Carpenters Health & Welfare Fund v. Bayer AG, 604 F.3d 98, 104 (2d Cir. 2010) (internal quotations and citations omitted). In the present context of a motion to dismiss, the plaintiffs need only allege plausible facts that, if true, raise a reasonable **[*246]** expectation that discovery will reveal sufficient evidence to prove their prima facie case. Under the treatment of reverse-payment settlements in *Actavis*, they have done so.

4. *Monopoly Power*

The defendants argue that the plaintiffs fail to state a claim because they do not sufficiently define a relevant product market, and the single-product market of Aggrenox alone (or of Aggrenox and potential generics) is overly narrow. Because Aggrenox is prescribed to reduce the risk of stroke, they suggest Plavix—an FDA-approved antiplatelet therapy—as an example of a pharmaceutical that shares the market with Aggrenox. The presence of that drug, they argue, means that the defendants could maintain a monopoly on Aggrenox alone without having monopoly power within a market sufficient to be governed by the Sherman Act. The plaintiffs contend that a market of Aggrenox and Aggrenox generics is sufficiently defined, and moreover that they need not define a market, because **[**52]** they plead actual detrimental effects, for which market power is merely a surrogate.

HN10[] Monopoly power is a necessary element of Sherman Act claims, *United States v. Grinnell Corp., 384 U.S. 563, 570, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*, and the Supreme court has defined that power as "the power to control prices or exclude competition." *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. The plaintiffs are correct, however, that when direct evidence is available that a party profitably charges supracompetitive prices, the existence of market power can be established from that fact alone. *Tops Markets, Inc. v. Quality Markets, Inc., 142 F.3d 90, 97-98 (2d Cir. 1998)* ("Monopoly power, also referred to as market power, is the power to control prices or exclude competition. It may be proven directly by evidence of the control of prices or the exclusion of competition or it may be inferred from one firm's large percentage share of the relevant market.").

The market for prescription pharmaceuticals is an unusual one, in part because consumers are typically insulated at least to some degree from both cost (which is often largely covered by an insurance plan) and choice (which is at least limited and more likely substantially directed by the prescribing physician), so market features such as cost-sensitivity and elasticity of demand might therefore defy reasonable expectations. It is nevertheless true ***HN11***[] in **[**53]** antitrust analysis that "as a general rule, the process of defining the relevant product market requires consideration of cross-elasticity of demand," *Hayden Pub. Co. v. Cox Broad. Corp., 730 F.2d 64, 71 (2d Cir. 1984)*, because the boundaries of a particular product market are determined by "the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Chapman v. New York State Div. for Youth, 546 F.3d 230, 237 (2d Cir. 2008)*. The plaintiffs allege that there is no such cross-elasticity of demand between Aggrenox and other drugs sufficient to define any broader antitrust market, and that because Boehringer is able to charge supracompetitive prices for Aggrenox without losing sales, it does not share a market defined by interchangeability. That is clearly a fact-intensive inquiry, and for that reason "courts hesitate to grant motions to dismiss for failure to plead a relevant product market." *Todd v. Exxon Corp., 275 F.3d 191, 199—200 (2d Cir. 2001)*; *see also* *Hayden Pub. Co. v. Cox Broad. Corp., 730 F.2d 64, 70 n.8 (2d Cir. 1984)* ("It frequently has been observed that a pronouncement as to market definition is not **[*247]** one of law, but of fact.") (quotation and citation omitted). The Supreme Court has been clear that market definitions can sometimes only be determined "after a factual inquiry into the commercial realities faced by consumers," *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (quotation omitted), and that "in some instances **[**54]** one brand of a product can constitute a separate market." *Id*. Perhaps because of the peculiar features of pharmaceutical markets, the Second Circuit has even held that the relevant market can sometimes be limited *to the generic* of a particular drug, excluding the chemically-identical brand-name version. *Geneva Pharms. Tech. Corp. v. Barr Labs., Inc.., 386 F.3d 485, 496-500 (2d Cir. 2004)*.

The plaintiffs' allegations that Boehringer is able to charge supracompetitive prices for Aggrenox in a market with no cross-elasticity of demand with other drugs are highly plausible. If that were not the case, it is not clear why Boehringer would have sued to prevent entry of Barr's generic. The defendants are free to argue otherwise on an eventual summary judgment motion or at trial, but it is premature on a motion to dismiss for the court to make a more probing factual inquiry than that, and the defendants cannot persuasively argue that the complaints should be dismissed for failure to plead monopoly power within a sufficiently defined market.

5. *Attempt and Conspiracy*

Attempt and conspiracy to monopolize under the Sherman Act require specific intent to monopolize, and the defendants argue that the plaintiffs' pleading on intent amounts to mere recitation of the element. The facts **[**55]** as alleged, the defendants argue, merely reflect an effort to enforce a valid patent and later to settle the litigation, which judicial policy favors; and even if the settlement agreement is unlawful under *Actavis*, it was lawful under the Second Circuit "scope of the patent" test that was controlling at the time, so there can have been no unlawful intent. The alleged anticompetitive conduct is described at length above, and I do not recite it again here; but the plaintiffs do plead an anticompetitive scheme in significant detail, as already discussed, and they allege that the scheme was intentional. Moreover, ***HN12***[] it is clearly the law in the Second Circuit that anticompetitive intent can be inferred from anticompetitive conduct. *Volvo North America Corp. v. Men's Int'l. Prof'l Tennis Council, 857 F.2d 55, 74 (2d Cir. 1988)*. The defendants' argument that unlawful intent is precluded by the lawfulness of the agreement under the now-abrogated test used in the Second Circuit at the time the agreement was made is compelling as an argument from basic fairness; but the defendants offer no support for the suggestion that the necessary intent under federal law is intent to monopolize *unlawfully*, rather than merely intent to monopolize (perhaps with a good-faith belief that patent law or **[**56]** some other antitrust exception provided safety from liability). If the settlement included a large and unjustified reverse payment that was made *in order* to avoid the risk of patent invalidation, then antitrust liability may attach under *Actavis*; and that particular anticompetitive harm is necessarily intentional (even if intent is proved by inference). The defendants offer no authority to suggest that that analysis changes because they believed they were acting lawfully at the time under the Second Circuit's rule.

C. State-Law Claims

This case is rendered much more complicated by the rules of *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061,* ***[*248]*** *52 L. Ed. 2d 707 (1977)*, and *California v. ARC America Corp., 490 U.S. 93, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*. In the former case, the Supreme Court held that only the overcharged direct purchaser, and no one else in the chain of distribution, can recover damages under federal ***antitrust law***; in the latter, the Supreme Court held that that "indirect-purchaser rule" does not prevent indirect purchasers from recovering damages under state antitrust laws where the state laws otherwise allow it (and many states have passed so-called "*Illinois Brick* repealers" in order to do so). Accordingly, the indirect purchaser complaint and the Humana complaint allege very many state-law claims; a few were withdrawn **[**57]** in the opposition memoranda to the defendants' motions to dismiss, but what remains includes claims under the law of nearly every state (and Washington, D.C. and Puerto Rico), including state antitrust claims, consumer-protection claims, and unjust-enrichment claims. The defendants move that all be dismissed, for a variety of reasons that respectively apply to individual claims or to particular subgroups of them.

1. *Statutes of Limitations*

The plaintiffs' theories of liability under the multiplicity of state claims do not significantly differ in substance from the theory underlying the federal claims; the allegedly unlawful conduct is the very same, and the multistate pleading headache appears to be a simple consequence of *Illinois Brick*'s bar on indirect purchaser recovery under the federal ***antitrust law***. The defendants argue that the claims are time-barred, but in most essentials they make common arguments that both state and federal claims are barred—the latter question has already been addressed above—and there is no argument that the analysis of the state statutes of limitations should differ materially from the federal one already discussed. The salient difference is just the number **[**58]** of years: the federal statute of limitations discussed above is four years, and the statutes of limitations under the state laws vary—mostly either three or four years, but some longer and some shorter. The defendants include several pages of tables that helpfully summarize that (and other) information as attachments to their memoranda in support of their motions to dismiss the indirect purchaser and Humana complaints (doc. # 152-1, pp. A-12 to A-16; doc. # 151-1, pp.A-15 to A-18). In the absence of any argument that the legislatures or courts of any particular states reject the reasoning in the *Berkey Photo* analysis above as it would apply to their particular statutes, I conclude that the same reasoning should apply, and that a new claim accrues with each alleged overcharge. Claims are therefore not time-barred that stem from alleged overcharges incurred within the relevant statutory period, whatever that period may be for a particular statute, measured backward from the filing of the claims.

a. Fraudulent Concealment

The indirect purchasers and Humana both initially alleged fraudulent concealment, presumably to reach overcharges otherwise outside the applicable statute of limitations. **[**59]** Partly in light of my ruling in *In re Publication Paper Antitrust Litigation, No. 3:04-md-1631 (SRU), 2005 U.S. Dist. LEXIS 19896, 2005 WL 2175139 (D. Conn. Sept. 6, 2005)*, the indirect purchasers dropped those allegations in their opposition brief (doc. # 182, p. 20 n.29), but Humana did not. Essentially for the reasons discussed in *Publication Paper*, I reject the argument that the statutes of limitations should be tolled because the defendants fraudulently concealed their allegedly unlawful conduct.

[*249] ***HN13***[] "[A]n antitrust plaintiff may prove fraudulent concealment sufficient to toll the running of the statute of limitations if he establishes (1) that the defendant concealed from him the existence of his cause of action, (2) that he remained in ignorance of that cause of action until some point within four years of the commencement of his action, and (3) that his continuing ignorance was not attributable to lack of diligence on his part." *State of New York v. Hendrickson Bros. Inc., 840 F.2d 1065, 1083 (2d Cir. 1988)*. Concealment can be shown in one of two ways: either by demonstrating that the defendant took affirmative steps to prevent discovery of the claim or injury, or by demonstrating that the violation itself was "self-concealing"—that is, by showing that it is the type of violation that by its very nature is designed to appear innocent, **[**60]** essentially establishing fraud-by-omission. *Id. at 1083—84*. As a claim of fraud, the allegations that provide the factual basis for fraudulent concealment must meet *Rule 9(b)*'s heightened pleading standard.

Humana plausibly alleges that the defendants did not publicly disclose the precise terms of the challenged settlement or their associated dollar values—despite overtly publicizing the settlement in more general terms, and despite an FTC investigation and other litigation challenging the agreement—and that Humana did not know it contained a large and unexplained reverse payment. Those allegations do not rise to the level of deliberate concealment, and do not suggest a self-concealing violation; nor has Humana sufficiently pleaded its own diligence. In short, Humana has failed to meet its pleading burden for tolling the statute of limitations. For the reasons discussed above, tolling is unnecessary for claims of alleged overcharges incurred within the relevant statutory period measured backward from the filing date; but any claims for overcharges outside of that window are untimely, and they are dismissed.

2. *Article III Standing*

The defendants argue that all indirect-purchaser claims under the laws of states **[**61]** where the named indirect-purchaser plaintiffs do not allege they incurred overcharges must be dismissed for lack of standing. In making that argument, the defendants rely most heavily on *Mahon v. Ticor Title Ins. Co., 683 F.3d 59 (2d Cir. 2012)*. The indirect purchasers disagree, contending that the defendants confuse Article III standing with "class" standing. They rely most heavily on *Gratz v. Bollinger, 539 U.S. 244, 123 S. Ct. 2411, 156 L. Ed. 2d 257 (2003)*, and *NECA-IBEW Health and Welfare Fund v. Goldman Sachs & Co., 693 F.3d 145 (2d Cir. 2012)*. Both sides are manifestly mistaken in their assertions that this is a straightforward question with an obvious answer. ***HN14***[] The Supreme Court acknowledged in *Gratz* that when there is "variation" between the claims of named plaintiffs and absent class members, "there is a question whether the relevance of this variation . . . is a matter of Article III standing at all or whether it goes to the propriety of class certification pursuant to *Federal Rule of Civil Procedure 23(a)*," *539 U.S. at 263*, and that "there is tension in our prior cases in this regard." *Id. at 263 n.15*; *see also* *Plumbers' Union Local No. 12 Pension Fund v. Nomura Asset Acceptance Corp., 632 F.3d 762, 768 (1st Cir. 2011)* ("The issue looks straightforward and one would expect it to be well settled; neither assumption is entirely true.").

The central question on this issue is what sort of "variation" matters. Some kinds of variation are not fatal to Article III standing, and some kinds are. The **[*250]** defendants point out that in virtually all of the cases relied upon **[**62]** by the indirect purchasers, including *Gratz* and *NECA-IBEW*, the variation between the respective claims of named plaintiffs and absent class members is variation of damages or of other facts, but not of the law under which the claims are brought. On the other side, the indirect purchasers point out that the cases relied upon by the defendants examine different and arguably more significant variation in claims than present here, most notably a variation of defendants. The question before the Second Circuit in *Mahon* was whether a plaintiff who alleged she was injured by at least one defendant therefore had Article III standing to pursue claims in a putative class action against *other* defendants she did not allege injured her but who allegedly did injure absent class members (the Court held that she did not). *683 F.3d at 60*. Here, the variation is of quite a different sort. Some of the claims of absent class members are brought under entirely different laws, and the laws of entirely different states, from the claims of the named plaintiffs. Still, the allegedly unlawful conduct is the same, and the different states' laws are versions of the same laws, or are least analogous laws that share essential **[**63]** similarities.

I generally agree with the indirect-purchaser plaintiffs' interpretation of class standing. ***HN15***[] The Second Circuit in *NECA-IBEW* announced a broad standard for class standing, consonant with *Gratz*, that turns on whether the "same set of concerns" is implicated by the defendants' allegedly injurious conduct toward the named plaintiffs and toward the absent class members. The named indirect-purchaser plaintiffs in the present case satisfy that standard, because the "same set of concerns" is implicated by the conduct of the defendants with respect to alleged overcharges incurred by indirect purchasers irrespective of the state of their residence. Still, there is a fundamental analytical distinction between class standing and Article III standing. And Article III standing, as a fundamental constitutional requisite of federal judicial power, presents a "threshold question in every federal case." *Warth v. Seldin, 422 U.S. 490, 498, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)*.

The indirect purchasers seem to analyze Article III standing on a case-wide basis. They argue that, once they have sufficiently pleaded that they have suffered harm as a result of unlawful conduct by the defendants, they have Article III standing to bring the case and are then over the threshold constitutional **[**64]** hurdle. Any subsequent claim-by-claim analysis, the argument goes, is properly the concern of class standing. The defendants offer forceful authority to the contrary. *E.g., Lewis v. Casey, 518 U.S. 343, 358 n.6, 116 S. Ct. 2174, 135 L. Ed. 2d 606 (1996)* ("But standing is not dispensed in gross."); *Davis v. Fed. Election Comm'n, 554 U.S. 724, 734, 128 S. Ct. 2759, 171 L. Ed. 2d 737 (2008)* ("[A] plaintiff must demonstrate standing for each claim he seeks to press and for each form of relief that is sought." (quotations omitted)). The indirect purchasers do not effectively rebut that authority. The pleadings plausibly allege that the indirect purchasers were harmed by the defendants' unlawful conduct, so it would be difficult to doubt that they present a live case or controversy for which they have standing under Article III. But the applicability to that case or controversy of the laws of states where the named plaintiffs do not (and perhaps cannot) plead harm is dependent upon harms caused to absent (and at this stage only putative) class members.

The indirect purchasers point to numerous cases that have interpreted *Ortiz v.* ***[*251]*** *Fibreboard Corp., 527 U.S. 815, 119 S. Ct. 2295, 144 L. Ed. 2d 715 (1999)*, and *Amchem Products, Inc. v. Windsor, 521 U.S. 591, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)*, to stand for the proposition that the question of Article III standing can be deferred until after class certification. In *Mahon*, however, the Second Circuit repudiated that interpretation of those cases, noting that the Article III **[**65]** issue was deferred in them not because it is always permissible to do so but because the class issue was dispositive. *683 F.3d at 63—66*. The Court reasoned that ***HN16***[] "[a] federal rule cannot alter a constitutional requirement," and therefore "*with respect to each asserted claim*, a plaintiff must always have suffered a distinct and palpable injury to herself." *Id. at 64* (emphasis in the original, quotation omitted).

I therefore grant without prejudice the defendants' motion to dismiss the indirect-purchaser complaints with respect to all claims under the laws of states (or territories) where the named indirect-purchasers do not allege to have suffered injury. The indirect purchasers have leave to replead claims for any state where the named plaintiffs specifically can allege to have incurred overcharges.

Humana makes (essentially) the same state-law claims as the indirect-purchaser plaintiffs, but standing is uncomplicated because Humana pleads that it has been an indirect purchaser of Aggrenox in all fifty states. Humana and the indirect-purchaser plaintiffs each incorporate by reference the relevant portions of the other's opposition memorandum, and I will thus discuss the remaining arguments on both motions to **[**66]** dismiss collectively.

3. *State Antitrust Claims*

a. Standing in *Illinois Brick* States

In the wake of *Illinois Brick*'s announcement of the indirect-purchaser rule, many states passed "*Illinois Brick* repealers" to allow indirect purchasers to recover under their respective state antitrust laws, and the Supreme Court endorsed the permissibility of that approach in *ARC America Corp. 490 U.S. at 105—06*. Of course, there are also states that continue to follow the rule of *Illinois Brick*, so indirect purchasers cannot recover for overcharges under those states' antitrust laws. The defendants argue that Florida, Massachusetts, and Puerto Rico are *Illinois Brick* jurisdictions, and that Rhode Island was, too, until it passed an *Illinois Brick* repealer in 2013, which should not be applied retroactively here. They initially included Utah in that list as well, before admitting that it did pass an *Illinois Brick* repealer, but one that permits indirect-purchaser claims only by citizens or residents of the state. In response, the indirect purchasers withdraw their claims under the antitrust laws of Florida and Massachusetts,[2] and dispute the plaintiffs' interpretation of the laws of the other jurisdictions.

i. Utah

HN17[] Utah has passed an *Illinois Brick* repealer, and its antitrust statute therefore does grant indirect purchasers the right to bring antitrust damages claims, but only if they are citizens or residents of Utah. *See Utah Code § 76-10-3109*. The indirect purchasers claim to be asserting claims under that law on behalf of residents of Utah, but they do not claim that any of the **[*252]** named plaintiffs are such residents. For the reasons discussed above, they lack Article III standing to assert such claims. Humana claims to be an indirect purchaser of Aggrenox in all fifty states, but does not claim to be a citizen or resident of Utah. All claims under the Utah antitrust statute are therefore dismissed without prejudice to repleading in the event that any named plaintiff is a citizen or resident of Utah.

ii. Puerto **[**68]** Rico

HN18[] Puerto Rico has not passed an *Illinois Brick* repealer, and its territorial courts have apparently not directly addressed the issue, but its ***antitrust law*** is generally construed "as essentially embodying the jurisprudence relevant to the parallel federal law." *Caribe BMW, Inc. v. Bayerische Motoren Werke Aktiengesellschaft, 19 F.3d 745, 754 (1st Cir. 1994)*. The defendants therefore urge the interpretation that *Illinois Brick* applies and bars indirect-purchaser actions, citing the persuasive authority of other district courts that have come to that conclusion. *See, e.g., United Food & Commercial Workers Local 1776 & Participating Employers Health & Welfare Fund v. Teikoku Pharma USA, Inc., No. 14-MD-02521-WHO, 74 F. Supp. 3d 1052, 2014 U.S. Dist. LEXIS 1610692014 WL 6465235, at *25—26 (N.D. Cal. Nov. 17, 2014)*; *In re Nexium (Esomeprazole) Antitrust Litig., 968 F. Supp. 2d 367, 409—10 (D. Mass. 2013)*; *In re Static Random Access Memory (SRAM) Antitrust Litig., No. 07-md-01819 CW, 2010 U.S. Dist. LEXIS 131002, 2010 WL 5094289, at *4 (N.D. Cal. Dec. 8, 2010)*; *In re Digital Music Antitrust Litig., 812 F. Supp. 2d 390, 413 (S.D.N.Y. 2011)* (citing *In re TFT - LCD (Flat Panel) Antitrust Litig., 599 F. Supp. 2d 1179, 1185—87 (N.D. Cal. 2009))*. The indirect purchasers cite *Rivera-Muñiz v. Horizon Lines Inc., 737 F. Supp. 2d 57 (D.P.R. 2010)*, a federal district court case that came to the contrary conclusion on the basis that Puerto Rico liberally construes its antitrust laws, and citing for that proposition *Pressure Vessels of Puerto Rico, Inc. v. Empire Gas de Puerto Rico, 137 P.R. Dec. 497, 1994 P.R.-Eng. 909,547 (P.R. 1994)*. As the defendants point out, however, *Pressure Vessels* did not address indirect-purchaser standing or the rule of *Illinois Brick*. And though I agree with the indirect purchasers' contention that the courts of a particular jurisdiction can authoritatively **[**69]** interpret their laws as allowing antitrust recovery by indirect purchasers even in the absence of an express *Illinois Brick* repealer by the legislature, I cannot conclude that *Pressure Vessels* is such an authoritative statement. In the absence of a clear decision—by either the legislature or by the jurisdiction's own courts—to allow indirect-purchaser recovery, the antitrust laws of a state (or territory) are interpreted as presumptively consistent with federal law. I therefore conclude that Puerto Rico follows the rule of *Illinois Brick* and all indirect-purchaser claims under its ***antitrust law*** are dismissed.

---

[2] In the opposition **[**67]** memoranda, the indirect-purchaser plaintiffs also withdraw unjust-enrichment claims under Pennsylvania law and claims under the antitrust laws of Kansas, New York, and Tennessee; and Humana withdraws its claims under the consumer-protection laws of Hawaii and Kansas, under the state antitrust laws of Florida, Ohio, and Texas, and under the Sherman Act (which includes all of its direct-purchaser claims).

iii. Rhode Island

HN19[] Rhode Island was an *Illinois Brick* state until its legislature enacted a repealer on July 15, 2013. *See* R.I. Gen. Laws § 6-36-7(d). The indirect purchasers urge (with little argument, and less authority) retroactive application, citing cases for the proposition that such application is *sometimes* permissible, but nothing to substantiate the claim that the Rhode Island statute is "entitled" (doc. # 182, p.19) to such application. On the contrary, in Rhode Island as elsewhere, "statutes and their amendments are presumed to apply prospectively." Hydro-Mfg., Inc. v. Kayser-Roth, 640 A.2d 950, 954 (R.I. 1994). Indeed, it is very widely recognized as an **[**70]** "almost universal rule that statutes are **[*253]** addressed to the future, not to the past." Winfree v. N. Pac. Ry., 227 U.S. 296, 301, 33 S. Ct. 273, 57 L. Ed. 518 (1913). In the absence of evidence of the Rhode Island legislature's intent to the contrary, I conclude that the law applies only prospectively. All indirect-purchaser claims under the Rhode Island antitrust statute alleging overcharges before July 15, 2013 are dismissed. The motions to dismiss claims involving Rhode Island indirect purchases are denied, however, with respect to alleged overcharges incurred after that date.

b. Intrastate Conduct or Effects Requirements

The defendants argue that the antitrust laws of Mississippi, New York, Tennessee, Wisconsin, and the District of Columbia "require that the challenged conduct take place, or that its effects occur, purely or primarily within the state" (doc. # 151-1, p.31).[3] None of the cited statutes contains so categorical a limitation by its plain text, however. It is true that all of the claims essentially allege national anticompetitive conduct, but it is not obvious why the *intrastate* effect of anticompetitive conduct would not be reached by the cited statutes merely because *interstate* conduct predominates. A few of the cases that the defendants cite include **[**71]** dicta about the possibility of state antitrust laws violating the dormant Commerce Clause or being preempted by federal ***antitrust law***, *e.g.*, H-Quotient, Inc. v. Knight Trading Grp., Inc., No. 03 CIV. 5889 (DAB), 2005 U.S. Dist. LEXIS 1924, 2005 WL 323750, at *4 (S.D.N.Y. Feb. 9, 2005); Sun Dun, Inc. of Washington v. Coca-Cola Co., 740 F. Supp. 381, 396—97 (D. Md. 1990), but the defendants do not make those arguments. I cannot conclude on the basis of the arguments that have been briefed that any claims should be dismissed for failure to allege "purely or primarily" intrastate conduct or effects.

c. Hawaii Antitrust Act

HN20[] Hawaii's antitrust statute has an "unfair or deceptive acts or practices" prong, and an "unfair methods of competition" prong. *See* Haw. Rev. Stat. § 480-2. Claims under the "unfair or deceptive acts or practices" prong can only be brought by "consumer[s], the attorney general or the director of the office of consumer protection," *id*. § 480-2(d), and the indirect purchasers do not allege that they are any of those things. Claims under the "unfair methods of competition" prong are not limited in that way, but class actions brought under that prong require pre-suit notice to the state attorney general, who has a right of first refusal **[**72]** to bring claims. *Id*. § 480-13.3. The indirect purchasers do not allege that they have satisfied that requirement, either, but they argue that they need not follow such pre-filing requirements because they are merely procedural and not necessary to maintain a class action in federal court.

The parties differ in their analysis of the applicability of *Shady Grove Orthopedic Associates v. Allstate Ins. Co., 559 U.S. 393, 130 S. Ct. 1431, 176 L. Ed. 2d 311 (2010)*, in which the Supreme Court held that Rule 23 applied in federal court to claims brought under New York law despite New York's general class action bar. It is difficult to isolate a holding in *Shady Grove* that is much broader than that, because the holding was announced by Justice Scalia in an opinion that garnered a majority only in part and a plurality in part. The fifth vote for the judgment was **[*254]** provided by Justice Stevens, who wrote a separate concurrence. When no single rationale garners a majority, the holding of the Court is "that position taken by those Members who concurred in the judgments on the narrowest grounds." Marks v. United States, 430 U.S. 188, 193, 97 S. Ct. 990, 51 L. Ed. 2d 260 (1977). The indirect

[3] The defendants also make this argument with respect to the ***antitrust law*** of Massachusetts, but as mentioned above, the indirect-purchaser plaintiffs withdraw their claims under that law. Humana did not plead claims under it.

purchasers argue for an expansive application of Justice Scalia's opinion, which would broadly eliminate state class-action restrictions in federal court. The defendants argue that the holding is narrowed by the scope **[**73]** of Justice Steven's concurrence, which would allow state procedural rules to control in federal court when they are "part of a State's framework of substantive rights or remedies." *Shady Grove, 559 U.S. at 419* (Stevens, J., concurring).

The defendants point out that many courts have adopted Justice Stevens's concurrence or found it to be controlling, and that they have held that state class-action bars apply in federal court if they are part of a state statute's substantive scope. The defendants have not, however, offered any authority for that conclusion as applied to Hawaii's law, or argued persuasively that the class-action prerequisites that it contains are part of Hawaii's "framework of substantive rights or remedies." ***HN21***[] From the language of the statute itself, it does not appear, for instance, to create a substantive right to recovery that only "vests" after some action or inaction of the state attorney general. Rather, it creates a right to "bring an action based on unfair methods of competition" in *section 480-2*, without any reference to notice, and delineates procedural prerequisites for class actions under the chapter in *section 480-13.3*. The defendants offer nothing from the legislative history or otherwise to complicate that plain **[**74]** reading. I need not wade any deeper into the difficult problem of what part of the reasoning in *Shady Grove* is or is not controlling, because I cannot conclude on the basis of the arguments before me that the *section 480-13.3* procedural prerequisites are sufficiently a "part of a State's framework of substantive rights or remedies" to be controlling in federal court even under the Stevens concurrence.

4. *State Consumer-Protection and Unjust-Enrichment Claims*

The defendants make many arguments that the unjust-enrichment claims and the claims brought under state consumer-protection or unfair-trade-practices laws should be dismissed. Some of those arguments apply to all such claims, others to particular subsets, and still others to the laws of individual states. They argue, for instance, that some state consumer-protection laws require pleading consumer deception or reliance; that some require pleading a specific consumer-oriented transaction or "nexus"; that some have been expressly held inapplicable to antitrust conduct; that some only allow suits in a consumer capacity; that some have unsatisfied pre-filing notice requirements; that some states require privity, a quasi-contractual or special relationship, **[**75]** or the absence of an adequate remedy at law in order to sustain the equitable remedy of an unjust-enrichment claim; and even that some states listed in the pleadings do not recognize an independent claim of unjust enrichment at all. The indirect payers and Humana respond with particular state-by-state arguments and caselaw, and the defendants reply with still more, disputing among themselves, for instance, whether particular states do or do not recognize independent unjust-enrichment claims, or whether there is a split of authority among California courts on whether a nonsemantic distinction exists between unjust enrichment, restitution, and quasi-contract (doc. # 182, p.66; doc. # 215, pp. 15—16).

[*255] Most of the defendants' arguments on this point can be reduced essentially to the assertion that the plaintiffs are not *really* pleading violations of all those state laws, which have various restrictions they ignore, because they are pleading a nation-wide antitrust case. The plaintiffs' argument in response is essentially that the state laws are exceedingly broad, the statutory ones generally written "in the disjunctive," and that they cover, very generally, all "*deceptive* acts, *unfair* practices **[**76]** or *unconscionable* acts" (doc. # 182, p.35). The defendants' arguments are persuasive on many particular points, but the more pressing issue is the broader one. The indirect purchasers and Humana have *listed* claims under very many state laws, but they have not truly *pleaded* claims under those laws sufficient to show their entitlement to recovery under them, as required by *Rule 8*. *See Iqbal, 556 U.S. at 678* (***HN22***[] "A pleading that offers labels and conclusions or formulaic recitation of the elements of a cause of action will not do."). Rather, they have pleaded federal antitrust claims and the factual foundation for them, viable under *Actavis*, and they merely allege that those claims are also actionable under general consumer-protection laws and as unjust enrichment.

The indirect-purchaser complaint, for instance, includes a paragraph alleging that the defendants "have violated the following state unfair trade practices and consumer fraud laws," followed by twenty-five subparagraphs, each of which begins "[d]efendants have engaged in unfair competition or unfair acts or practices in violation of" and ends with a citation to a different state's statute, with no elaboration (doc. # 120, ¶ 204). The same complaint includes a paragraph **[**77]** that begins "[i]t would be inequitable under unjust enrichment principles under the laws of" and then lists forty-eight states, the District of Columbia, and Puerto Rico before finishing the sentence, the end of which is similarly bare and conclusory (¶ 214). The Humana complaint fares no better. For instance, it begins each of paragraphs 142 through 178 with the words "[d]efendants have engaged in unfair competition or unfair, deceptive or fraudulent acts or practices in violation of" followed by a citation to a different state's statute, again with no elaboration (doc. # 93). Even the state antitrust claims partly take this copy-and-paste form that simply assumes that every one of the many cited statutes is the functional equivalent of the rest, but at least those claims benefit from the very extensive pleading of factual allegations to show entitlement to relief under federal ***antitrust law***. The pleadings fail not only to account for any consequential differences that may exist among the undifferentiated state-law claims, but they fail to show that any but the antitrust laws entitle the plaintiffs to relief from antitrust violations. The bald assertion that the alleged antitrust conduct violates **[**78]** dozens of non-antitrust laws, or the implication that there are no consequential differences between those laws, is not entitled to deference, because "the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions." *Iqbal, 556 U.S. at 678*.

The problem for the indirect purchasers is that the indirect-purchaser rule of *Illinois Brick* blocks them from recovery under federal ***antitrust law***. In an effort to get in on the *Actavis* game, they attempt to build a Frankensteinian equivalent of *Actavis* to reach the very same conduct but without that formidable obstacle, by stitching together a hodge-podge of state-law claims. But the plaintiffs cannot simply enumerate a long list of state-law claims for states where they might otherwise have no available antitrust recovery **[*256]** and rely on the defendants and the court to sort out whether or how those laws can act as surrogates for ***antitrust law***. I need not rule on the many particular arguments the defendants make for individual state claims or subsets of them, because the indirect-purchaser plaintiffs and Humana have not pleaded state-law consumer-protection or unjust-enrichment claims sufficient to satisfy **[**79]** *Rule 8* under *Twombly* and *Iqbal*. The defendants' motions to dismiss are granted with respect to all such claims, without prejudice to repleading in nonconclusory fashion.

D. Personal Jurisdiction Over Teva Israel

Teva Israel moves under *Rule 12(b)(2)* to dismiss all claims against it for lack of personal jurisdiction. It emphasizes that it is an Israeli company with no direct physical or corporate presence in the United States, and that it and its American subsidiaries vigorously maintain corporate formalities. The settlement agreement that is the subject of the plaintiffs' allegations was formed between Boehringer and Barr prior to Teva USA's acquisition of Barr, so no Teva entity was a party to it. And the presence of a subsidiary alone is not sufficient to establish personal jurisdiction over the parent company. *See Jazini v. Motor Co., 148 F. 3d 181 (2d Cir. 1998)*. Teva Israel therefore argues that, even if all the plaintiffs' allegations are true regarding the liability of the other defendants, and even if Teva USA is liable as a successor to Barr, the mere fact of Teva Israel's ownership of Teva USA is not sufficient to subject Teva Israel to personal jurisdiction in this case.

HN23[] The authority of a court to subject a particular defendant to personal **[**80]** jurisdiction has been analyzed as a constitutional question for well over a century. *See generally Pennoyer v. Neff, 95 U.S. 714, 24 L. Ed. 565 (1877)*. The *statutory* authority for jurisdiction, though a necessary condition of it, is not a sufficient one. The plaintiffs seem to conflate the statutory authority for jurisdiction under the Clayton Act with the constitutional propriety. They also blur the distinction between the two forms of personal jurisdiction in the constitutional analysis: general, or all-purpose, personal jurisdiction; and specific, or case-linked personal jurisdiction. In order to show that an exercise of personal jurisdiction comports with Due Process, the plaintiffs must plead facts sufficient to support either general or specific personal jurisdiction, in addition to showing statutory authority.

"A court may assert general jurisdiction over foreign (sister-state or foreign-country) corporations to hear any and all claims against them when their affiliations with the State are so continuous and systematic as to render them essentially at home in the forum State." *Goodyear Dunlop Tires Operations, S.A. v. Brown, 131 S. Ct. 2846, 2851, 180 L. Ed. 2d 796 (2011)* (quotation omitted). Being "essentially at home" in a place is a very high bar, almost never found for corporations where they are neither incorporated **[**81]** nor headquartered. "[E]ven a company's engagement in a substantial, continuous, and systematic course of business is alone insufficient to render it at home in a forum." *Sonera Holding B.V. v. Cukurova Holding A.S., 750 F.3d 221, 226 (2d Cir. 2014)* (quotation omitted). None of the complaints plead facts even close to a plausible claim of general jurisdiction over Teva Israel.

HN24[] "Specific jurisdiction, on the other hand, depends on an affiliation between the forum and the underlying controversy." *Goodyear Dunlop, 131 S. Ct. at 2851* (quotation omitted). Importantly, "[i]n contrast to general, all-purpose jurisdiction, **[*257]** specific jurisdiction is confined to adjudication of issues deriving from, or connected with, the very controversy that establishes jurisdiction." *Id*. (quotation omitted). Pleading specific jurisdiction does not present nearly so high a bar as pleading general jurisdiction, but unlike general jurisdiction, it depends on *case-specific* contacts. Even frequent, substantial contacts cannot confer jurisdiction in this case unless the contacts were made in connection with the specific controversy being litigated.

The plaintiffs emphasize how thoroughly entrenched in the American generic pharmaceutical industry Teva Israel is, and they cite SEC filings and corporate web pages to argue that the Teva entities **[**82]** play fast and loose with the "Teva" name. The broad general contacts that the plaintiffs describe do not rise to the very high "essentially at home" standard for general jurisdiction, and such generalized contacts are not useful for establishing specific personal jurisdiction, because they have nothing to do with the particular conduct giving rise to the claims here. Teva Israel's contacts with the United States are sufficient for specific personal jurisdiction to comport with constitutional requirements in *some* case, but this is not such a case. Apart from the bare, conclusory assertion that Teva Israel joined the antitrust conspiracy, the complaints do not allege any action by the Israeli company that is specifically in connection with this case. It is customary to analyze the issue of statutory jurisdictional authority before analyzing comportment with Due Process, but the pleadings are so obviously insufficient with respect to the latter that it is not necessary to examine the question of jurisdiction under the Clayton Act.

In their opposition memoranda, the plaintiffs argue that the conduct of Teva USA and Barr should be attributed to Teva Israel either because the latter is successor **[**83]** to the antitrust conspiracy or because it controls its American subsidiaries. Those arguments do not appear to correspond to a plausible factual foundation in the pleadings, and without more facts, the prospects for repleading either a veil-piercing theory or a successor-in-interest theory do not seem bright. Limited jurisdictional discovery of Teva Israel is not appropriate because the plaintiffs failed to make a prima facie case for personal jurisdiction. *See* *Ball v. Metallurgie Hoboken-Overpelt, S.A., 902 F.2d 194, 197 (2d Cir. 1990)*. If discovery taken from the other defendants should turn up evidence of Teva Israel's contacts *specifically* in connection with the controversy underlying this case, then the plaintiffs may seek leave of the court to replead their claims against it. Accordingly, Teva Israel's motion to dismiss under *Rule 12(b)(2)* is granted without prejudice.

III. Conclusion

In sum, for the reasons discussed above:

(1) Teva Israel's motion to dismiss all complaints against it under *Rule 12(b)(2)* (doc. # 150) is granted without prejudice; the plaintiffs may seek leave to replead claims against it in the event that evidence of its participation in the specific agreements underlying this case are revealed in discovery taken from the other defendants.

(2) The defendants' motion **[**84]** to dismiss the direct-purchaser complaint under *Rule 12(b)(6)* (doc. # 149; sealed mem., doc.168) is denied in substantial part. It is granted with respect only to any claims made in connection with overcharges allegedly incurred more than four years prior to the filing of the claims.

(3) The defendants' motion to dismiss the indirect-purchaser complaint under *Rule 12(b)(6)* (doc. # 151) is granted in **[*258]** part and denied in part. It is granted without prejudice with respect to all state-law consumer-protection and unjust-enrichment claims. It is granted with prejudice with respect to any claims made in connection with overcharges allegedly incurred before the filing of the claims by a longer period than the relevant statute of limitations. It is granted with prejudice with respect to claims under the antitrust statute of Puerto Rico, and with respect to claims under the antitrust statute of Rhode Island that are in connection with overcharges allegedly incurred before July 15, 2013. It is granted without prejudice with respect to claims under the antitrust statute of

Utah; the indirect purchasers have leave to replead those claims only if some named plaintiff is a citizen or resident of that state. It is granted without **[**85]** prejudice with respect to other claims under the laws of states where the named plaintiffs do not plead injury; the indirect purchasers have leave to replead those claims only to the extent they can plead sufficient facts to allege harm to named plaintiffs in particular states.

(4) The defendants' motion to dismiss the Humana complaint under *Rule 12(b)(6)* (doc. # 152) is granted in part and denied in part. It is granted without prejudice with respect to all state-law consumer-protection and unjust-enrichment claims. It is granted with prejudice with respect to any claims made in connection with overcharges allegedly incurred before the filing of the claims by a longer period than the relevant statute of limitations. It is granted with prejudice with respect to claims under the antitrust statute of Puerto Rico, and with respect to claims under the antitrust statute of Rhode Island that are in connection with overcharges allegedly incurred before July 15, 2013. It is granted without prejudice with respect to claims under the antitrust statute of Utah; Humana has leave to replead those claims only if it is a citizen or resident of that state.

So ordered.

Dated at Bridgeport, Connecticut, this 23rd day **[**86]** of March 2015.

Opinion

ORDER GRANTING DEFENDANT'S MOTION TO DISMISS; DENYING DEFENDANT'S MOTION TO STRIKE

Re: Dkt. Nos. 14, 15

Plaintiff David Yastrab ("Plaintiff") brings the instant putative class action against Defendant Apple Inc. ("Apple") in which he alleges his iPhone 4's Wi-Fi and Bluetooth capabilities stopped working after he downloaded a software update. Presently before the Court are two motions filed by Apple: one to dismiss Plaintiff's Complaint pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, and one to strike the class allegations from the Complaint under *Rule 12(f)*. See Docket Item Nos. 14, 15. Plaintiff has filed written **[*2]** opposition to both motions. See Docket Item Nos. 18, 19.

Federal jurisdiction arises pursuant to *28 U.S.C. § 1332*. Having carefully reviewed the parties' briefing and for the reasons explained below, the Motion to Dismiss will be granted while the Motion to Strike will be denied.

I. FACTUAL AND PROCEDURAL BACKGROUND

At the center of this case is Apple's popular iPhone product, which first debuted in 2007. See Compl., Docket Item No. 1, at ¶ 2. iPhones come equipped with a mobile operating system called iOS, which consists of a collection of software applications, or "apps." Id. at ¶ 3. These apps allow users to utilize the features of Apple products. Id. Since its first version in 2007, the iOS operating system has been updated several times by Apple. Id. at ¶ 4. When a new version of iOS is released, Apple prompts users to download the update via a message on their iPhone. Id. at ¶ 5.

Three iPhone models are implicated in the Complaint: the iPhone 4 released in 2010, the iPhone 4s released in 2011, and the iPhone 5 released in 2012. Id. at ¶¶ 2, 3. Also implicated is an update to the iOS software known iOS 7, which was unveiled by Apple on June 10, 2013. Id. at ¶¶ 1, 2, 3, 16. According to the Complaint, **[*3]** Apple described iOS 7 as "a platform for over a million mobile apps, iCloud,[1] and includes security features that prevent unauthorized access to Apple devices." Id. at ¶ 8. Plaintiff, however, contends that users of the iPhone 4, 4s, and 5 experienced reduced functionality as a result of installing iOS7, "essentially forcing consumers to render their iPhones obsolete." Id. at ¶ 1.

Plaintiff is a New York resident who acquired an iPhone 4s on or around April 30, 2012. Id. at ¶ 53. In doing so, Plaintiff alleges that he viewed Apple's representations regarding "the iPhone 4s's ability to download future iOS updates, Bluetooth[2] and Wi-Fi connection capabilities, ability to backup data via iCloud and the ability to run apps via a Wi-Fi connection," and would not have acquired the iPhone 4s had he not **[*4]** seen these representations. Id. at ¶ 35. Plaintiff believes these representations, as well as Apple's advertising and marketing campaigns, were designed to induce consumers to purchase the iPhone over other smartphones "because of their Bluetooth and Wifi connection capabilities, large library of apps, iCloud and Siri[3] - all of which require a Network connection or Wi-Fi connection to operate." Id. at ¶ 19.

Plaintiff received an alert from Apple in or about October 2013 notifying him that iOS 7 was available **[*5]** and he promptly downloaded it. Id. at ¶ 54. However, after the download was complete and the updated software installed, the Wi-Fi and Bluetooth connection capabilities on his iPhone 4s were disabled, or "grayed out." Id. at 55. Plaintiff alleges that the "grayed out" problem was experienced by a large number of users of the iPhone 4, 4s and 5, and that Apple received "thousands of comments" concerning the problem. Id. at ¶ 56. An updated version of iOS 7 was thereafter released on March 10, 2014 - iOS 7.1 - but that update did not resolve the "grayed out" problem.[4] Id. at ¶ 63. Nor was Plaintiff able to resolve the issue with his iPhone 4s after following instructions on Apple's website and

---

[1] iCloud is a free "cloud service" offered by Apple to a user of its products which allows the user "to automatically and wirelessly" store content and "automatically and wireless push" that content to all of the user's Apple devices. See Compl., at ¶ 12. In other words, iCloud allows users to backup data from their iPhone to the "cloud" and make it available to other Apple devices. Id. at ¶ 13.

[2] "Bluetooth allows users to '[e]xchange or synchronize data between Bluetooth enabled computers and devices', '[u]se a Bluetooth enabled wireless keyboard or mouse", '[c]onnect wirelessly to a Bluetooth compatible printer, headset, headphones, or speakers', and '[s]hare your internet connection with other Bluetooth enabled devices.'" Id. at ¶ 18.

[3] "Siri is speech-recognition software that comes standard on every iPhone 4 and iPhone 5 . . . . It allows users to verbally give their iPhones commands and takes to complete . . . . For example, if you ask Siri to add something to your personal calendar, if is programmed to make the addition to your calendar and verbally confirms that the task is completed." Id. at ¶ 9.

[4] According to Plaintiff, "grayed out" iPhone users would not have been able to download the updated version of iOS or any other resolution patches "because such downloads require a Wi-Fi connection and cannot be downloaded over a Network connection." Id. at ¶ 23.

visiting two Apple stores. Id. at ¶ 68. In addition, Apple would not allow iPhone users to downgrade their mobile software to a previous version of iOS. Id. at ¶¶ 69-71.

Plaintiff alleges that, because the Wi-Fi and Bluetooth connection capabilities **[*6]** were "grayed out" after installing iOS 7, users of the iPhone 4s were forced to use their cellular network connection for all features requiring an internet connection, such as iCloud and Siri. Id. at ¶¶ 19, 73. As a result, users incurred "unanticipated monthly data usage charges" with their cellular provider and were left with an iPhone "of significant reduced value and utility." Id. at 73.

Because the "grayed out" problem was wide-ranging, Plaintiff believes it is "reasonable and plausible" to infer that Apple had either actual or constructive knowledge of the shortcomings in the iPhone 4s and iOS 7 prior to their distribution, and that Apple withheld this material information from consumers. Id. at ¶¶ 75-76. He seeks to represent the following classes:

> GENERAL CLASS: All users who experienced loss or reduced functionality of their iPhone as a result of upgrading iOS.
>
> SUBCLASS: All users of Apple iPhone 4s in the United States who experienced a loss of Wi-Fi and/or Bluetooth functionality after downloading iOS 7.

Plaintiff filed the Complaint underlying this action on April 29, 2014. He asserts five claims under California law: (1) violation of the Consumer Legal Remedies Act ("CLRA"), *California Civil Code §§1750 et seq.*, (2) violation **[*7]** of the Unfair Competition Law ("UCL"), *California Business and Professions Code §§ 17200 et seq.*, (3) breach of express warranty, (4) intentional misrepresentation, and (5) negligent misrepresentation. These motions followed.

II. LEGAL STANDARD

A. Motion to Dismiss

On a *Rule 12(b)(6)* motion to dismiss for failure to state a claim, the complaint is construed in the light most favorable to the non-moving party, and all material allegations in the complaint are taken to be true. *Sanders v. Kennedy, 794 F.2d 478, 481 (9th Cir. 1986)*. This rule does not apply to legal conclusions, however - "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice" to state a claim. *Ashcroft v. Iqbal, 556 U.S. 662, 663, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. While a complaint does not need detailed factual allegations to survive a 12(b)(6) motion, plaintiffs must at least provide grounds demonstrating their entitlement to relief. *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. Thus, the plaintiff must allege sufficient factual allegations "to raise a right to relief above the speculative level." Id. This threshold is reached when the complaint contains sufficient facts to allow the court to draw a reasonable inference that the defendant is liable for the alleged misconduct. *Iqbal, 556 U.S. at 678*.

Fraud-based claims are subject to heightened pleading requirements under *Federal Rule of Civil Procedure 9(b)*. In that regard, a plaintiff alleging fraud "must state **[*8]** with particularity the circumstances constituting fraud." *Fed. R. Civ. Proc. 9(b)*. The allegations must be "specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong." *Semegen v. Weidner, 780 F.2d 727, 731 (9th Cir. 1985)*. To that end, the allegations must contain "an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations." *Swartz v. KPMG LLP, 476 F.3d 756, 764 (9th Cir. 2007)*. Averments of fraud must be accompanied by the "who, what, when, where, and how" of the misconduct charged. *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1106 (9th Cir. 2003)* (citation omitted). Additionally, "the plaintiff must plead facts explaining why the statement was false when it was made." *Smith v. Allstate Ins. Co., 160 F. Supp. 2d 1150, 1152 (S.D. Cal. 2001)* (citation omitted).

Mechanically speaking, the court "may not consider any material beyond the pleadings" when considering a motion to dismiss.[5] *Hal Roach Studios, Inc. v. Richard Feiner & Co., 896 F.2d 1542, 1555 n. 19 (9th Cir. 1990)*. However, the court may consider material submitted as part of the complaint or relied upon in the complaint, and may also consider material subject to judicial notice. See *Lee v. City of Los Angeles, 250 F.3d 668, 688-69 (9th Cir. 2001)*. Where a complaint or claim is dismissed, "[l]eave to amend should be granted unless the district court determines that the pleading could not possibly be cured **[*9]** by the allegation of other facts." *Knappenberger v. City of Phoenix, 566 F.3d 936, 942 (9th Cir. 2009)*.

B. Motion to Strike

Federal Rule of Civil Procedure 12(f) provides that a court "may order stricken from any pleading . . . any redundant, immaterial, impertinent or scandalous matter." *Fed. R. Civ. P. 12(f)*. "Immaterial matter is that which has no essential or important relationship to the claim for relief or the defenses being pleaded." *Fantasy, Inc. v. Fogerty, 984 F.2d 1524, 1527 (9th Cir. 1993)*. "Impertinent matter consists of statements that do not pertain, and are not necessary, to the issues in question." Id.

Rule 12(f) motions to strike are generally regarded with disfavor because of the limited importance of pleading in federal practice, and because they are often used as a delay tactic. See *Cal. Dept. of Toxic Substances Control v. Alco Pac., Inc., 217 F. Supp. 2d 1028, 1033 (C.D. Cal. 2002)*. They are "not granted unless it is clear that the matter sought to be stricken could have no possible bearing on the **[*10]** subject matter of the litigation." *Rosales v. Citibank, 133 F. Supp. 2d 1177, 1180 (N.D. Cal. 2001)*. Thus, any doubt concerning the import of the allegations weighs in favor of denying the motion to strike. See *In re 2TheMart.com, Inc. Sec. Litig., 114 F. Supp. 2d 955, 965 (C.D. Cal. 2000)*.

III. DISCUSSION

For the Motion to Dismiss, Apple argues that Plaintiff's Complaint is deficient because (1) the claims are not pled with particularity as required by *Rule 9(b)*, and *(2)* the causes of action do not contain sufficient factual matter to state a claim. For the Motion to Strike, Apple believes the class allegations should be stricken as overbroad and unascertainable. It also argues that individual questions will predominate under Plaintiff's class definition, and that Plaintiff's claims are atypical in any event. These motions are addressed in turn.

A. Motion to Dismiss

i. *Rule 9(b)*

Apple argues that Plaintiff's CLRA, UCL and misrepresentation claims must be plead with particularity under *Rule 9(b)*. For his part, Plaintiff does not necessarily dispute that *Rule 9(b)* applies to the UCL and misrepresentation claims, but argues that the CLRA falls outside of the particularity requirement. On this issue, the court agrees with Apple. The claims must meet the *Rule 9(b)* standard because they all stem from one basic claim grounded in fraud, specifically, that Apple **[*11]** misrepresented the iPhone's ability to download updates and retain functionality. See *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)* (holding that *Rule 9(b)*'s particularity requirement applies to causes of action under the UCL and CLRA); see also *Neilson v. Union Bank of Cal., N.A., 290 F. Supp. 2d 1101, 1141 (C.D. Cal. 2003)* ("It is well-established in the Ninth Circuit that both claims for fraud and negligent

[5] Plaintiff filed two declarations with over 200 pages of attachments along with his opposition to Apple's motions. See Docket Item Nos. 20-23. Apple objects to this evidence because it is neither subject to judicial notice nor specifically relied upon in the Complaint. The court agrees with Apple that consideration of this new information is improper. Accordingly, Apple's objection is sustained, and this information is disregarded for the purposes of this analysis.

misrepresentation must meet *Rule 9(b)*'s particularity requirements."). The CLRA claim is no different than its companion claims in that respect, since it is based on the same alleged misrepresentations. See Compl., at ¶ 90 ("Defendant violated and continues to violate the [CLRA] by . . . (a) Representing that the iPhone 4, iPhone 4s and/or iPhone 5 have characteristics and benefits which they do not have; (b) Representing that the iPhone 4, iPhone 4s and/or iPhone 5 are of a particular standard, quality, or grade, which they are not; (c) Advertising the iPhone 4, iPhone 4s and/or iPhone 5 with intent not to sell them as advertised; and (d) Representing that the iPhone 4, iPhone 4s and/or iPhone 5 has been supplied in accordance with previous representations when they have not."); ¶ 75 ("[I]ts [sic] reasonable and plausible to infer that Defendant had either actual or constructive knowledge of the iPhone 4s and iOS 7's shortcomings **[*12]** prior to their distribution."). Under his theory of liability, Plaintiff simply cannot state a CLRA claim without allegations based in fraud. See *Vess, 317 F.3d at 1105* ("[I]f particular averments of fraud are insufficiently pled under *Rule 9(b)*, a district court should 'disregard' those averments, or 'strip' them from the claim. The court should then examine the allegations that remain to determine whether they state a claim."); see also *Kearns, 567 F.3d at 1125* (holding that when a plaintiff alleges "a unified course of fraudulent conduct" and relies entirely on that conduct as a basis for the claim, "the claim is said to be 'grounded in fraud' or to 'sound in fraud,'" and must satisfy the particularity requirement of *Rule 9(b)*). Accordingly, the court will analyze the CLRA, UCL and misrepresentation claims under *Rule 9(b)*.

ii. CLRA

The CLRA makes unlawful "unfair methods of competition and unfair or deceptive acts or practices." *Cal. Civ. Code § 1770(a)*; *In re Actimmune Marketing Litig., No. C 08-02376 MHP, 2009 U.S. Dist. LEXIS 103408, at *47, 2009 WL 3740648 (N.D. Cal. Nov. 6, 2009)*. As relevant here, the CLRA prohibits a person from "[r]epresenting that goods or services have sponsorship, approval, characteristics, ingredients, uses, benefits, or quantities which they do not have," "[r]epresenting that goods or services are of a particular standard, quality, or grade . . . if they are of another," **[*13]** "[a]dvertising goods or services with intent not to sell them as advertised," and "[r]epresenting that the subject of a transaction has been supplied in accordance with a previous representation when it has not." *Cal. Civ. Code §§ 1770(a)(5)*, *(a)(7)*, *(a)(9)*, *(a)(16)*.

Three elements are necessary to state a claim under the CLRA: misrepresentation, reliance, and damages. *Marolda v. Symantec Corp., 672 F. Supp. 2d 992, 1003 (N.D. Cal. 2009)*. Apple argues the allegations are insufficient to plead misrepresentation and reliance for multiple reasons. Some of Apple's arguments have merit.

Examining the two elements in order, Plaintiff alleges that Apple misrepresented three characteristics of the iPhone in its marketing, advertising and promotional materials: (1) its ability to download and run iOS 7 effectively; (2) its Bluetooth and Wi-Fi connection capabilities; and (3) its ability to upgrade to new iOS software and run new applications and features. See Compl., at ¶¶ 19, 20, 27. None of these alleged misrepresentations are described with the particularity necessary to support a fraud-based CLRA claim under *Rule 9(b)*. Indeed, despite the Complaint's length, the misrepresentation allegations are made up of nothing more than unadorned references to Apple's advertising campaign and marketing materials, and do not describe even one specific **[*14]** item that Plaintiff allegedly viewed or where and when he viewed it. In other words, missing are allegations informing Apple of how its "extensive multi-million dollar advertising campaign showcasing the iPhone's ability to wirelessly download the latest features and apps from new versions of iOS" reached Plaintiff, and which part of it was seen by him before he decided to purchase the iPhone 4. See Compl., at ¶ 22. It cannot be, as Plaintiff argues, that it is enough under *Rule 9(b)* to nebulously reference a product's advertising package and just declare the campaign misleading for a claim under the CLRA. Although each alleged statement made by Apple need not be identified at this stage, Plaintiff must at the very least describe some specific statements, state where or on what medium those statements were made, and reveal how Plaintiff accessed them. See *Baltazar v. Apple, Inc., No. CV-10-3231-JF, 2011 U.S. Dist. LEXIS 13187, at *6, 2011 WL 588209 (N.D. Cal. Feb. 10, 2011)* ("At the least, Plaintiffs must identify the particular commercial or advertisement upon which they relied and must describe with the requisite specificity the content of that particular commercial or advertisement."); see also *In re iPhone 4s Consumer Litig., 2014 U.S. Dist. LEXIS 19363, at *17-18, 2014 WL 589388 (N.D. Cal. Feb. 14, 2014)* ("*Rule 9(b)* therefore requires Plaintiffs to aver specifically the **[*15]** statements they relied upon in making their purchases, what is false or misleading about the statements, and why those statements turned out to be false."). Only then can the court be satisfied that Plaintiff has met his burden "to conduct a precomplaint investigation in sufficient depth to assure that the charge of fraud is responsible and supported, rather than defamatory and extortionate." *Ackerman v. Nw. Mut. Life Ins. Co., 172 F.3d 467, 469 (7th Cir. 1969)*. Plaintiff's reliance on *Morgan v. AT&T Wireless Services, Inc., 177 Cal. App. 4th 1235, 99 Cal. Rptr. 3d 768 (2009)*, for the proposition that he has met his federal pleading obligations is unpersuasive, considering Morgan discusses only a California pleading standard and was addressing an amended complaint pled with much greater detail.

As to the second element, "consumers seeking to recover damages under the CLRA based on a fraud theory must prove 'actual reliance on the misrepresentation and harm.'" *Sateriale v. R.J. Reynolds Tobacco Co., 697 F.3d 777, 794 (9th Cir. 2012)* (quoting *Nelson v. Pearson Ford Co., 186 Cal. App. 4th 983, 1022, 112 Cal. Rptr. 3d 607 (2010))*. Although actual reliance can be presumed or inferred when an alleged misrepresentation is material, a plaintiff must still plausibly allege that the misrepresentation was material, such that a reasonable person "would attach importance to [the misrepresentation's] existence or nonexistence in determining his choice of action in the transaction in question." *In re Tobacco II Cases, 46 Cal. 4th 298, 327, 93 Cal. Rptr. 3d 559, 207 P.3d 20 (2009)*.

Actual reliance **[*16]** cannot be presumed or inferred from the Complaint's allegations because Plaintiff has not plausibly established materiality. Without more detail describing the marketing materials Plaintiff reviewed before purchase, left unanswered is whether it was reasonable for Plaintiff to believe based on what he saw or heard that his iPhone 4's Bluetooth and Wi-Fi capabilities would always work despite changes to the operating software, or that the phone would be able to download and run iOS 7 effectively when it was eventually released. See *In re iPhone 4s Consumer Litig., 2014 U.S. Dist. LEXIS 19363, at *20-21* (finding plaintiff's allegations insufficient when, in relation to a lawsuit claiming that the iPhone's Siri feature did not always function as advertised, Plaintiff's did not identify "any specific statement by Apple that expressly indicates that Siri would be able to answer every question, or do so consistently."). Notably, Plaintiff cannot plausibly assert that he relied on any promotional material related to iOS 7 for this purpose since that particular software upgrade is not alleged to have been unveiled until June 10, 2013. See Compl., at ¶ 16. Plaintiff purchased his phone more than one year earlier, on April 30, 2012. Id. at ¶ 35. **[*17]** Thus, any representations about the subsequently-released operating software, some of which are carefully and uncoincidentally mixed into the Complaint, do not aid Plaintiff in stating a CLRA claim concerning his previously-acquired mobile device. See, e.g., id. at ¶ 20 ("According to Apple, 'because iOS 7 is engineered to take full advantage of the advanced technologies built into Apple hardware, your devices are always years ahead - from day one to day whenever.'").

Apple's other arguments directed to the CLRA claim - that iOS 7 is not a "good" or "service" that was sold or leased under the statutory scheme, and that the Apple iOS 7 Software Licensing Agreement preclude reliance - are rejected. The court need to decide whether iOS 7 can support a CLRA cause of action because Plaintiff's claims are directed at the inoperability of his phone, not at problems with the iOS 7 software itself. The iPhone 4s is indisputably a "good" that was sold. See *In re iPhone 4s Consumer Litig., No. C 12-1127 CW, 2013 U.S. Dist. LEXIS 103058, at *45-46, 2013 WL 3829653 (N.D. Cal. July 23, 2013)* (explaining the distinction between cases alleging defects in software which do not support a CLRA claim, and those based on defects in the mobile **[*18]** device which do support a CLRA claim). Additionally, the Apple iOS 7 Software Licensing Agreement is of no moment to Plaintiff's decision to acquire the iPhone 4 since, again, the software was not released until well after Plaintiff's purchase. Presumably, the referenced licensing agreement came to Plaintiff at the time he updated the operating software, not before he bought the phone.

For these reasons, Plaintiff has not sufficiently alleged a violation of the CLRA. Accordingly, the claim will be dismissed with leave to amend.

iii. UCL

The UCL prohibits acts of unfair competition, including "any unlawful, unfair, or fraudulent business act or practice and unfair, deceptive, untrue, or misleading advertising." *Cal. Bus. & Prof. Code § 17200*. Plaintiff alleges that Apple's conduct violated all three "prongs" of the UCL.

A violation of the "unlawful" prong of the UCL may be established by a variety of unlawful acts, including those practices prohibited by law, whether "civil or criminal, federal, state, municipal, statutory, regulatory, or court-made." *Saunders v. Super. Ct., 27 Cal. App. 4th 832, 838-39, 33 Cal. Rptr. 2d 438 (1994)*. Plaintiff's claim under the "unlawful" prong is based on a violation of the CLRA. Since Plaintiff has not established a violation of the CLRA, he similarly has not established **[*19]** this prong of the UCL.

To state a claim under the "fraudulent" prong of the UCL, a plaintiff must allege that the challenged practice is likely to deceive members of the public. *Bardin v. Daimlerchrysler Corp., 136 Cal. App. 4th 1255, 1274, 39 Cal. Rptr. 3d 634 (2006)*. Reduced to elements, "plaintiffs must allege with specificity that defendant's alleged misrepresentations: (1) were relied upon by the named plaintiffs; (2) were material; (3) influenced the named plaintiffs' decision to purchase the product; and (4) were likely to deceive members of the public." *In re Apple In-App Purchase Litig., 855 F. Supp. 2d 1030, 1041 (N.D. Cal. 2012)*. The sufficiency of a UCL fraud claim is routinely analyzed with a corresponding CLRA claim. Id. (citing *Kowalsky v. Hewlett-Packard Co., 2011 U.S. Dist. LEXIS 89379, at *17-18, 2011 WL 3501715 (N.D. Cal. Aug. 10, 2011))*. Since Plaintiff has not adequately identified with sufficient particularity the misrepresentation or fraudulent statements made by Apple which he relied upon to purchase the iPhone 4s, he has failed state a claim under the "fraudulent" prong of the UCL.

The UCL also creates a cause of action for a business practice that is "unfair" even if not specifically proscribed by some other law. *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1143, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*. "Unfair" practices constitute "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, **[*20]** or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. To determine whether a practice is unfair in a consumer action, the court weighs the utility of defendant's conduct against the gravity of the harm to the alleged victim. *Bardin v. DaimlerChrysler Corp., 136 Cal. App. 4th 1255, 1268, 39 Cal. Rptr. 3d 634 (2006)*.

Here, Plaintiff's own description of his "unfair" claim establishes that it is based on the same conduct underlying the CLRA claim. See Opp'n, Docket Item No. 19, at p. 17 ("Plaintiff alleged, with specificity, that Defendant falsely and misleadingly represented to its customers that the iPhone's key capabilities of Wi-Fi and Bluetooth would be functional with routine software updates."). But as already explained, the allegations of misrepresentation are not sufficient to support this theory. Plaintiff has not pointed to anything specific within Apple's advertising or marketing of the iPhone which promises that the Wi-Fi and Bluetooth functions would operate without interruption through all software updates. He therefore has not stated a claim under this prong of the UCL.

Because the allegations are insufficient under all three prongs, the UCL claim will be dismissed with leave to amend.

iv. Breach of Express Warranty

To prevail on a breach of express warranty **[*21]** claim, "a plaintiff must prove (1) the seller's statements constitute an 'affirmation of fact or promise' [which relates to the goods] or a 'description of the goods'; (2) the statement was 'part of the basis of the bargain'; and (3) the warranty was breached." *Weinstat v. Dentsply Int'l, Inc., 180 Cal. App. 4th 1213, 1227, 103 Cal. Rptr. 3d 614 (2010)* (quoting *Keith v. Buchanan, 173 Cal. App. 3d 13, 20, 220 Cal. Rptr. 392 (1985))*.

Plaintiff alleges that a warranty was created between Apple and its customers who purchased an iPhone through "promises and affirmations of fact made by [Apple] on its website and through its marketing and advertising campaign." See Compl., at ¶ 107. This warranty apparently guaranteed that the iPhone's Wi-Fi and Bluetooth connection would perform as advertised, even after implementation of iOS 7. Id. Despite this description, Plaintiff's allegations do not establish the elements of an express warranty claim. To successfully do so, Plaintiff must "identify a 'specific and unequivocal written statement'" about the product that constitutes an 'explicit guarantee[].'" *In re iPhone 4S Consumer Litig., 2014 U.S. Dist. LEXIS 19363, at *29* (quoting *Maneely v. Gen. Motors Corp., 108 F.3d 1176, 1181 (9th Cir. 1997))*. The court has explained above why the allegations are not sufficiently detailed to provide Apple with meaningful notice of which particular advertisements and webpages are at issue. Without more information, the exact terms of **[*22]** the purported warranty are not established with the requisite level of clarity. The claim for breach of express warranty will be dismissed with leave to amend.

v. Misrepresentation Claims

The elements of intentional misrepresentation in California are: (1) misrepresentation; (2) knowledge of falsity; (3) intent to defraud or to induce reliance; (4) justifiable reliance; and (5) resulting damage. *Engalla v. Permanente Med. Group, Inc., 15 Cal. 4th 951, 974, 64 Cal. Rptr. 2d 843, 938 P.2d 903 (1997)*. The elements of negligent misrepresentation are similar except that a plaintiff need not show that the defendant knew of the falsity of the statement, but rather that the defendant lacked reasonable ground for believing the statement to be true. *Charnay v. Cobert, 145 Cal. App. 4th 170, 184, 51 Cal. Rptr. 3d 471 (2006)*.

As noted, the elements of any species of misrepresentation claim require Plaintiff to show, unsurprisingly, that Apple made some type of a misrepresentation to him. Here, Plaintiff has not done so with the level of specificity required by *Rule 9(b)*. In particular, Plaintiff has not pled the actual content of the alleged misrepresentations made by Apple in their advertising and marketing, either with respect to Wi-Fi or Bluetooth connectivity, nor has he alleged facts sufficient to show that he relied justifiably relied on those misrepresentations. See *Glen Holly Entm't, Inc. v. Tektronix, Inc., 352 F.3d 367, 379 (9th Cir. 2003)* (holding **[*23]** that reliance on "generalized, vague and unspecific assertions, constituting mere 'puffery'" is not reasonable). For these reasons, the misrepresentation claims will be dismissed with leave to amend.

B. Motion to Strike

Apple has filed a separate motion to strike the class allegations asserted in the Complaint. Essentially, Apple seeks a pre-certification decision on the sufficiency of these allegations under *Federal Rule of Civil Procedure 23*. This motion has not been brought at the appropriate time.

Federal Rule of Civil Procedure 23(c) authorizes the court to issue a class certification decision "[a]t an early practicable time after a person sues or is sued as a class representative." But in general, class allegations are not tested at the pleading stage and are instead scrutinized after a party has filed a motion for class certification. *Brown v. Hain Celestial Group, Inc., 913 F. Supp. 2d 881, 888 (N.D. Cal. 2012)*; see also *Thorpe v. Abbott Labs., Inc., 534 F. Supp. 2d 1120, 1125 (N.D. Cal. 2008)*. That is because a class certification decision usually involves considerations enmeshed in the factual and legal issues presented by the representative's claims. *Gen. Tel. Co. of the Sw. v. Falcon, 457 U.S. 147, 160, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)*. Thus, a motion to strike class allegations should only be seriously considered when "the issues are plain enough from the pleadings to determine whether the interests of the absent parties are fairly encompassed within the named plaintiff's claim." **[*24]** *Id*.

Here, it is not "plain enough from the pleadings" whether or not the interests of the unnamed class member are encompassed in Plaintiff's claims, especially when it is anticipated that Plaintiff will file an amended complaint with additional allegations. Under these circumstances, the pleadings have not been settled to the point that it is appropriate or efficient to test the class allegations. Moreover, the court does not believe it necessary to engage in a lengthy Rule 23 analysis now because it is unclear whether and in what form this case will ultimately proceed. The analysis presented by Apple through this motion is better suited in response to a motion for class certification, should one be filed in the future.

Because it is premature, Apple's Motions to Strike the Class Allegations will be denied.

IV. ORDER

Based on the foregoing, Apple's Motion to Dismiss (Docket Item No. 14) is GRANTED. All claims in the Complaint are DISMISSED WITH LEAVE TO AMEND. Any amended complaint filed in response to this order must be filed on or before **April 8, 2015**.

Apple's Motion to Strike (Docket Item No. 15) is DENIED.

IT IS SO ORDERED.

Dated: March 23, 2015

Opinion

[Docket Nos. 204 & 205]

BUMB, UNITED STATES DISTRICT JUDGE:

This matter comes before the Court upon a two motions for summary judgment filed by the Defendants in this matter, Virtua Health, Inc. and Virtua Memorial Hospital Burlington County ("Virtua") and The Cardiology Group, P.A. ("CGPA"), (collectively referred to as the "Defendants"). Plaintiff Deborah Heart and Lung Center ("Plaintiff" or "Deborah") has opposed both motions. This Court heard oral argument on September 22, 2014, and ordered the parties to submit supplemental briefing on the issue of anticompetitive effects. After reviewing the parties' submissions, this Court will grant the Defendants' respective motions for summary judgment for the **[*2]** reasons set forth below.

I. Background

A. Relevant Facts

The record in this matter is voluminous and complex, and the facts, both undisputed and disputed, are well known to the parties. Therefore, this Court will set forth only those facts necessary for resolution of the instant motions. As is required on a motion for summary judgment, this Court will draw all inferences in favor of Plaintiff as the non-moving party. *Kopec v. Tate, 361 F.3d 772, 775 (3d Cir. 2004)*(stating that where there are significant factual disputes between the parties, the facts should be construed in favor of the non-moving party).

For the reasons set forth below, resolution of the instant motions turns entirely on whether Plaintiff has presented sufficient evidence of anticompetitive effects. See discussion infra at 25-44. Therefore, the facts recited herein will focus on this issue, and the Court will provide a brief overview of other facts as they relate to the alleged conspiracy underlying this case.[1]

i. The Relevant Business Entities

Plaintiff Deborah is a specialty hospital located in Browns Mills, New Jersey. [Virtua's Statement of Facts ("VSOF") and Plaintiff's Response ("PR") at ¶ 1].[2] Deborah is one of only three hospitals in the United States that is exempt from having to collect co-pays, deductibles, or any other out-of-pocket expenses from patients because the federal government recognizes its special status as a charity hospital. [PSOF at ¶ 2]. CGPA was a cardiology practice that practiced in Burlington County at the time relevant to this law suit. [Plaintiff's Statement of Fact ("PSOF") and Virtua's Response ("VR") at ¶ 17]. In July 2012, Virtua purchased all of CGPA's assets but none of its liabilities. [Id.]. Virtua is a multi-hospital health system in southern New Jersey, which includes Virtua Memorial Hospital Burlington County. [VSOF & PR at ¶ 3]. At the relevant time period, under applicable regulations, Virtua was not authorized to provide cardiac surgery. [PSOF & VR at ¶ 27]. Penn Presbyterian Medical **[*4]** Center ("PPMC") is a hospital in West Philadelphia and is part of the University of Pennsylvania Health System. [PSOF & VR at ¶ 22]. PPMC is authorized to perform cardiac surgery.

ii. ACI & PCI Procedures & Affiliation Agreements

The term "ACI procedures," which are performed in hospitals, refers to advanced cardiac interventional procedures comprised of three types of services — angioplasties, electrophysiology, and cardiac surgery. [VSOF & PR at ¶ 6]. ACI procedures form two relevant product markets: emergency angioplasty and non-emergency ACI procedures. [VSOF and PR at ¶ 6]. A "PCI" refers to a "Percutaneous Coronary Intervention" and is a type of angioplasty.[3] See Expert Report of Evan Hoffman Schouten, Pl.'s Ex. 140 at 3. In Pennsylvania and New Jersey, hospitals may only provide facilities for procedures under a license from the state's Department of Health. [VSOF & PR at ¶ 8]. It is

---

[1] Much of the Statement of Facts submitted by Plaintiff focuses on establishing a "conspiracy" between Virtua and CGPA, see e.g., PSOF at ¶¶ 39-83, and between CGPA, Virtua and Penn, see PSOF at ¶¶ 87-113, to remove Deborah from the relevant market. The necessary facts surrounding **[*3]** the agreements are set forth herein only to the extent that the knowledge is necessary to understand the issue of anticompetitive effects, which is dispositive here.

[2] CGPA incorporated Virtua's response to the Plaintiff's Statement of Material Facts where relevant and Virtua incorporated CGPA's statement of material facts where relevant.

[3] For ease of reference, this Court will refer simply to ACI procedures throughout this Opinion as the term encompasses angioplasties and a PCI is a type of angioplasty.

undisputed that during the relevant time period Deborah and PPMC were licensed to provide cardiac surgery services whereas Virtua **[*5]** was not. [PSOF & VR at ¶ 27].

When a patient requires an ACI procedure and the physician lacks the expertise to provide the ACI procedure or where the hospital where the patient is seen is not licensed to provide the service, a physician must refer the patient to a more specialized interventional cardiologist or to a hospital where the interventional cardiologist can perform the service. [VSOR & PR at ¶¶ 7-10]. Prior to the transfer, patients must consent and the requirements of the New Jersey Patient's *Bill of Rights* must be fulfilled. [VSOF & PR at ¶¶ 7-10].[4]

ii. Deborah & CGPA

Because none of the CGPA cardiologists performed diagnostic invasive or interventional procedures before July 2006, patients in need of those procedures were referred to non-CGPA cardiologists who performed those types of specialty procedures, typically either to a Deborah-employed physician, or to physicians at Cooper University Hospital. [VSOF & PR at ¶ 15].

In 1992, Deborah approached CGPA about sending more CGPA patients to Deborah, which led to a growing **[*6]** referral relationship between Deborah and CGPA. [Id. at ¶ 16]. At this time, where a referral to a Deborah-employed physician was necessary for invasive diagnostic catheterization or ACI services and the CGPA patient was an inpatient or emergency patient at Virtua, the referral required the CGPA patient to be transferred from Virtua to Deborah for treatment by the Deborah-employed physician. [Id. at ¶ 17].

By 1999, the referral relationship between CGPA and Deborah-employed physicians had grown, and CGPA entered into five identical individual contracts (the "Deborah Physician Leases") with certain interventional cardiologists employed by Deborah, including Charles A. Dennis, M.D. [Id. at ¶ 18]. At the time CGPA entered into the Deborah Physician Leases, CGPA physicians primarily treated their patients at CGPA's own offices and at Virtua. [Id. at ¶ 22]. Although treated by Deborah-employed physicians, those patients remained patients of CGPA, and CGPA billed insurers and the patient for the services provided by the Deborah-employed physicians. [Id. at ¶ 21].

At the time of the 2002 Deborah Physician Leases between CGPA and Dr. Dennis, Dr. Dennis was the Chair of Deborah's Department of **[*7]** Cardiovascular Diseases, and had been employed at Deborah as an interventional cardiologist since 1991. [Id. at ¶ 25]. While still a Deborah employee in 2003, Dr. Dennis applied for and was granted medical staff privileges to perform low-risk catheterizations at Virtua, and Dr. Dennis became Virtua's first Cardiac Catheterization Laboratory Director, with Deborah's knowledge and consent. [Id. at ¶ 28].

On January 1, 2005, while the 2002 Deborah Physician Leases were in effect, CGPA entered into a Cardiology Services Agreement with Virtua (the "CSA") under which CGPA agreed to "provide all cardiac services to all patients in the Cardiovascular Department of the Hospital [Virtua]" on an exclusive basis . . . ." [Id. at ¶ 31]. The purpose of the CSA was "to promote control, cost, quality and efficiency of service in the performance of cardiac services" at Virtua, and its terms addressed CGPA's administrative and coverage obligations as the exclusive provider for cardiology services at Virtua. [Id. at ¶ 32]. In each year that the CSA was in effect, patients were transferred from Virtua to Deborah for procedures to be performed at Deborah, as follows: 2005, 627 patients; 2006, 652 patients; **[*8]** 2007, 392 patients; 2008, 157 patients; 2009, 169 patients; and between January 1, 2010 and July 15, 2010, 60 patients. [Id. at ¶ 37]. In 2006, Virtua became licensed by the New Jersey Department of Health and Senior Services to operate as a full-service adult diagnostic cardiac catheterization facility; the facility became operational in 2007. [Id. at ¶ 38].

iv. Dr. Dennis and His Suspension

[4] *N.J.S.A. §26:2H-12.8*.

Dr. Dennis was employed by Deborah from 1991 to 2006; he announced his resignation on February 21, 2006, providing notice of his intention to resign from Deborah effective June 30, 2006, in order to join CGPA and become a CGPA employee. [Id. at ¶ 41]. With Dr. Dennis employed by CGPA, it became unnecessary for CGPA to continue to lease Deborah-employed physicians to treat their patients in need of interventional services, so the Deborah Physician Leases were terminated in July 2006. [Id. at ¶ 46]. From July 2006 through February 2007, Dr. Dennis continued to perform angioplasties at Deborah. [Id. at ¶ 47].

Deborah alleges that as early as February 2006, Virtua executives were in contact with Dr. Dennis in an attempt to recruit him to help build Virtua's Cardiac Institute so that Virtua could obtain **[*9]** a cardiac surgery license. Deborah further contends that Virtua was part of a conspiracy with CGPA to force Deborah into either a merger or complete shutdown. [PSOF at ¶¶ 78-82].[5]

While the reasons precipitating his suspension are hotly disputed by the parties, it is undisputed that on February 20, 2007, Deborah suspended Dr. Dennis' privileges to perform interventional procedures at Deborah. [PSOF at ¶ 62]. This suspension caused an immediate rift between Deborah and CGPA. On the very same day as the suspension, Diane Hinkel, CGPA's administrator, wrote to Deborah and explained that CGPA would not sign the terms of a new Deborah-CGPA arrangement (called the "Deborah-EP **[*10]** Physician Lease") due to Deborah's suspension of Dr. Dennis's privileges. [VSOF & PR at ¶ 53]. Deborah attempted to persuade CGPA to sign the Deborah-EP Physician Lease, but CGPA declined. [Id. at ¶ 54]. Dr. Fish, a CGPA physician at that time, expressed CGPA's view that Deborah's suspension of Dr. Dennis's privileges was a "totally unfair" and "unjustified" "black mark" on Dr. Dennis' record, and stating that CGPA's physicians were united that Dr. Dennis "must be immediately granted unconditional interventional privileges at Deborah" for the relationship to continue. [Id. at ¶ 55]. Dr. Dennis was understood by Deborah to be the "bridge between the CGPA and Deborah." [Id. at ¶ 63]. Contrary to CGPA's "demands," Deborah ultimately terminated Dr. Dennis' interventional privileges entirely. [Id. at ¶ 58].

v. CGPA & PPMC

Following the suspension of Dr. Dennis' privileges, CGPA physicians began to refer their patients who could not be treated by CGPA physicians to Penn Cardiology physicians. [VSOF & PR at ¶ 72]. Because Penn Cardiology physicians were employed by Penn, they routinely transferred patients to Penn hospitals, including, most frequently, PPMC. [Id.] In November 2007, CGPA and **[*11]** Penn Cardiology formalized their relationship via what is referred to as the "Penn Cardiology Physician Lease." [Id. at ¶ 75]. In January and February of 2008, CGPA also entered into an Occupancy Agreement, Affiliation Agreement and a Cardiology Working Group Participation Agreement with University of Pennsylvania Health System and/or its affiliates, (collectively referred to as the "Affiliation Agreement").[6] [Id. at ¶¶ 76-77].

The Penn Cardiology Physician Lease provided for CGPA to pay an annual leasing fee to Penn Cardiology, in return for which Penn Cardiology leased interventional cardiologists to CGPA on a part-time basis to treat CGPA patients in need of diagnostic cardiac catheterization and interventional cardiac procedures that CGPA physicians could not provide. [Id. at ¶ 78].

The Penn Cardiology Physician Lease also provided that "[a]ll Services shall be performed at a hospital designated by [CGPA]" and that the Penn Cardiology physicians would "take all **[*12]** reasonable steps to ensure that any Physician providing Services [under the agreement] shall obtain or maintain medical staff privileges at the Hospital

---

[5] The factual record contains evidence in support of this point. See, e.g., Pl.'s Ex. 14 (October 2006 email from Dr. Dennis to Virtua Vice President, Matt Zuino, discussing a "white knight" strategy wherein Virtua could gain Deborah's cardiac surgery services); Pl.'s Ex. 31 (email from Dr. O'Neil to CGPA Executive Committee stating, "One of [Deborah's] accountants said he gives them 2 years before [its] doors close. We could speed that up when we no longer do [percutaneous transluminal coronary angioplasties] at [Deborah].").

[6] It is undisputed that Penn reached a settlement agreement with the United States to resolve alleged claims of violations of the Stark Act and Anti-Kickback Act as a result of its contractual relationships with CGPA. [Pl.'s Ex. 65].

at which the Services are to be performed." [Id. at ¶ 80]. When procedures could not be performed by Penn Cardiology physicians at Virtua, the Penn Cardiology physicians provided those services at PPMC. [Id. at ¶ 82].

Deborah contends that Penn wanted a commitment for a "100% referral" of patients from CGPA. [PSOF at ¶ 90]. Plaintiff further avers, as is critical to its antitrust claims here, that "although the Affiliation Agreement that was being negotiated was ostensibly a contract between CGPA and Penn, there is no doubt that Virtua was an unnamed party to the agreement and directly participated in its negotiation." [PSOF at ¶ 93].[7] Plaintiff alleges that Penn and Virtua officials met during this time period and exchanged promises about what procedures would be sent from Virtua to PPMC. [Id. at ¶ 96]. Relatedly, Section 1.1. of the Affiliation Agreement provides, in relevant part, that "the Clinical Practices of the University of Pennsylvania. . . will be the exclusive provider of cardiac catheterization services to [CGPA's] patients." [PSOF **[*13]** at ¶ 100]. Again, the crux of Plaintiff's allegations is that there was a conspiracy to cut Deborah out of the market that involved Virtua, CGPA and Penn.

vi. Geographic Markets & Alleged Anticompetitive Effects

It is undisputed that the relevant markets for ACI procedures in this case, as are as follows:

- Non-emergency ACI procedures: Burlington, Camden, Mercer, Monmouth, and Ocean Counties, and parts of Philadelphia;
- Emergency PCI services: Burlington, Monmouth, and Ocean Counties.

[VSOF & PR at ¶ 96].

Following the inception of the alleged conspiracy, there was a powerful shift in transfers away from Deborah — i.e., "prior to 2007 the ratio of transfers from Virtua to either Deborah or Penn Presbyterian was roughly 85% Deborah to 15% Penn. After the suspension of Dr. Dennis's privileges, the ratio flipped, such that by January 2008 when the Penn Affiliation Agreement was signed the ratio was roughly 30% Deborah to 70% Penn." [PSOF at ¶ 256].

As a result of the alleged conspiracy, Plaintiff avers that "patients who were pipelined to **[*14]** Penn suffered higher out-of-pocket costs, lower quality and diminished choice." See Doc. 265, Pl.'s Supp. Br. at 1. As part of its conspiracy allegations, Plaintiff further states that Virtua and CGPA "had a policy of not informing patients of their option of transferring to Deborah instead of [PPMC]," and such failure to inform patients that they could be transferred to Deborah violates the New Jersey Patient's *Bill of Rights*. [See PSOF ¶¶ 138-148].[8] Moreover, Plaintiff contends that this failure to inform negatively impacted patient choice. For example, Plaintiff states that:

> there is abundant evidence that even when patients stated a preference to go to Deborah, they were bullied and lied to in order to block the transfer. More than twenty patients and/or family members have given sworn testimony in this case telling horrifying stories of rank mistreatment and bullying at the hands of Virtua physicians, Virtua nurses, and CGPA physicians.

[PSOF at ¶ 149]. Plaintiff's Statement of Facts provides detail on the individual accounts of the twenty-plus patients cited and their experiences, which, Plaintiff contends, demonstrate that the doctrine of informed consent and the New Jersey Patients' *Bill of Rights* were violated. **[*15]** [PSOF at ¶¶ 151-225.][9]

---

[7] Plaintiff has pointed to record evidence in support of its point. See, e.g., Pl.'s Ex. 57 (email discussing "leakage" of patients from Virtua to Deborah).

[8] There is no private cause of action for violations of the New Jersey Patient *Bill of Rights*. See *Castro v. NYT Television, 370 N.J. Super. 282, 291, 851 A.2d 88 (N.J. App. Div. 2004)*.

[9] Plaintiff adds that it was unable to come forward with evidence of additional patients as state court discovery is not yet compete. It further contends that "anticompetitive effects were felt by all 3,100 patients pipelined to Penn." Doc. No. 265, Pl.'s Supp. Br. at 1, n. 2. For purposes of this motion, this Court will draw the inference in favor of Plaintiff that many more patients were "pipelined" to Penn beyond the 20-plus cited in the Plaintiff's Statement of Fact.

With respect to quality, Deborah and PPMC produced "door-to-balloon times," referring to the time lapse between a heart attack and the insertion of a catheter to the artery (a.k.a. "the balloon") to clear blockage. [PSOF at ¶ 248]. Shorter door to balloon times are preferable as "minutes are crucial [and] time is muscle." [Id. at ¶ 250]. Plaintiff alleges that the data demonstrates that Deborah beat PPMC's door-to-balloon times by, on average, eight minutes. [Id.] Thus, Plaintiff contends that one of the anticompetitive effects of the alleged conspiracy is that the patients experience inferior quality because of PPMC's **[*16]** higher door-to-balloon times. Pl.'s Supp. Br. at 1.

Finally, Plaintiff sets forth that "pipelined" patients "suffered higher out-of-pocket costs." The only factual allegation in Plaintiff's Statement of Facts with respect to this point is "all patients treated at Deborah pay less out-of-pocket costs than patients treated at Penn—even when the patients have the same insurances and undergo the same medical procedures." [PSOF at ¶ 23].

It is undisputed that Deborah's market share in the relevant markets as identified by Plaintiff was largely unchanged from 2006 to 2007: for ACI services, Deborah's 2007 market share was approximately 10 percent, based on data reported by Deborah and other hospitals to the State, and Deborah's 2007 market share for emergency PCI services was less than 9 percent. [VSOF & PR at ¶ 106]. Plaintiff admitted that "[e]ven if Deborah were to be driven out of the market altogether, which did not occur, there would have been no significant reduction in competition in any relevant market." [Id. at ¶ 106].[10]

B. Procedural ***[*17]*** *History*

Plaintiff's Complaint originally contained two claims: 1) that the Defendants conspired with one another in violation of *Section 1* of the Sherman Act to exclude Plaintiff from the market for certain advanced cardiac interventional procedures, thereby restricting consumers' choice of providers for these procedures, and forcing consumers to pay higher prices; and 2) that these efforts were part of an overlapping conspiracy by the Defendants, in violation of *Section 2* of the Sherman Act. During the pendency of this litigation, Plaintiff also has been simultaneously prosecuting a state court case again against the Defendants asserting common law claims for tortious interference and unfair competition. See Deborah Heart and Lung Center v. Virtua Health, Inc. et al., No. BUR-L-1487-09. That litigation is ongoing.

In a prior Opinion [Docket No. 56], this Court dismissed Plaintiff's *Section 2* count for failure to state a claim, but permitted the *Section 1* claim to proceed. In permitting that claim to proceed, this Court found that Plaintiff had sufficiently alleged anticompetitive effects within the relevant product and geographic markets. This Court also found that, because Plaintiff was alleging that it could demonstrate **[*18]** anticompetitive effects, it did not need to demonstrate market foreclosure. Docket No. 56 at 18-19.

II. Standard of Review

Summary judgment shall be granted if "the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A fact is "material" if it will "affect the outcome of the suit under the governing law . . . ." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A dispute is "genuine" if it could lead a "reasonable jury [to] return a verdict for the nonmoving party." Id.

When deciding the existence of a genuine dispute of material fact, a court's role is not to weigh the evidence; all reasonable "inferences, doubts, and issues of credibility should be resolved against the moving party." *Meyer v. Riegel Prods. Corp., 720 F.2d 303, 307 n.2 (3d Cir. 1983)*. However, a mere "scintilla of evidence," without more, will not give rise to a genuine dispute for trial. *Anderson, 477 U.S. at 252*. Further, a court does not have to adopt the version of facts asserted by the nonmoving party if those facts are "utterly discredited by the record [so] that no reasonable jury" could believe them. *Scott v. Harris, 550 U.S. 372, 380, 127 S. Ct. 1769, 167 L. Ed. 2d 686 (2007)*.

---

[10] At oral argument, Plaintiff clarified that it believed this statement to be a reference to market foreclosure, which is not at issue here. Sept. 22, Tr. at 73-74.

In the face of such evidence, summary judgment is still appropriate "where the record . . . could not lead a rational trier of fact to find for the nonmoving party . . **[*19]** . ." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*.

The movant "always bears the initial responsibility of informing the district court of the basis for its motion, and identifying those portions of 'the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any,' which it believes demonstrate the absence of a genuine issue of material fact." *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)* (quoting *Fed. R. Civ. P. 56(c)*). Then, "when a properly supported motion for summary judgment [has been] made, the adverse party 'must set forth specific facts showing that there is a genuine issue for trial.'" *Anderson, 477 U.S. at 250* (quoting *Fed. R. Civ. P. 56(e)*). The non-movant's burden is rigorous: it "must point to concrete evidence in the record"; mere allegations, conclusions, conjecture, and speculation will not defeat summary judgment. *Orsatti v. N.J. State Police, 71 F.3d 480, 484 (3d Cir. 1995)*; *Jackson v. Danberg, 594 F.3d 210, 227 (3d Cir. 2010)* (citing *Acumed LLC v. Advanced Surgical Servs., Inc., 561 F.3d 199, 228 (3d Cir. 2009))* ("[S]peculation and conjecture may not defeat summary judgment.").

III. Analysis

As set forth above, the only remaining claim in this matter is Plaintiff's claim pursuant to *Section 1* of the Sherman Act, which provides:

> Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several states or with foreign nations is hereby declared to be illegal.

15 U.S.C. § 1 (1994). To establish a violation of *Section 1*, a plaintiff must prove: **[*20]** "(1) concerted action by the defendants; (2) that produced anti-competitive effects within the relevant product and geographic markets; (3) that the concerted actions were illegal; and (4) that it was injured as a proximate result of the concerted action." *Gordon v. Lewistown Hosp., 423 F.3d 184, 207 (3d Cir. 2005)*; *Angelico v. Lehigh Valley Hosp., 184 F. 3d 268, 275 (3d Cir. 1999)*; *Black Box Corp. v. Avaya, Inc., No. 07-6161, 2008 U.S. Dist. LEXIS 72821, 2008 WL 4117844, at *7 (D.N.J. Aug. 29, 2008)*. For the reasons set forth below, resolution of the instant motions turns on the second prong of the test, and the Plaintiff's failure to present sufficient evidence of anticompetitive effect warrants summary judgment in favor of the Defendants.[11]

A. Quick Look v. Rule of Reason

As an initial matter, this Court must first resolve the appropriate analytical framework to apply to the purported evidence of anticompetitive effects — i.e., the "quick look" or traditional "rule of reason" analysis. Plaintiff contends that it has set forth sufficient evidence to prove anticompetitive effects under either standard, but argues that this Court should apply the quick look standard. Pl.'s **[*21]** Opp. Br. at 34.

The quick look analysis is an intermediate standard applied "where per se[12] condemnation is inappropriate, but where no elaborate industry analysis is required to demonstrate the anticompetitive character of an inherently suspect restraint." *United States v. Brown Univ., 5 F.3d 658, 669 (3d Cir. 1993)* (internal quotations and citations omitted). As stated by the Third Circuit, "the quick look approach may be applied only when an observer with even a rudimentary understanding of economics could conclude that the arrangement in question would have an anticompetitive effect on customers and markets." *Gordon, 423 F. 3d at 210* (citing *California Dental Ass'n v. FTC,*

---

[11] Because Plaintiff cannot demonstrate the requisite anticompetitive effects, it is not necessary for this Court to address the other prongs of the test. See *Tunis Bros. Co., v. Ford Motor Co., 952 F.2d 715, 722 (3d Cir. 1991)*(declining to address other prongs where plaintiff did not demonstrate adequate anticompetitive effects).

[12] The per se rule applies to "plainly anticompetitive agreements or practices." *United States v. Brown Univ., 5 F.3d 658, 669 (3d Cir. 1993)*. The Plaintiff does not contend that the per se rule applies here.

526 U.S. 756, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)). In applying this standard, "competitive harm is presumed and the defendant must set forth some justification for the restraints." Id.

In support of its argument that the quick look standard should be applied, Plaintiff contends that "[d]iscovery has yielded myriad facts which show that the conspiracy in which Virtua, CGPA and Penn engaged in is inherently suspect and has no legitimate competitive justification." Pl.'s Opp. Br. at 36. In response, the Defendants argue that there is no horizontal **[*22]** restraint present as the agreements at issue exist between Virtua and CGPA and Penn and CGPA, who are not market competitors. In addition, Defendants point to their expert's report, which found that 98% of the relevant markets were not impacted by the alleged restraint and that "such a de minimis restraint could have no impact on the market, either anticompetitive or procompetitive." Defs.' Reply Br. at 17.

Courts have applied the "quick look" analysis "in cases involving agreements not to compete in terms of price or output among members of professional associations," *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 459, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*, or cases "where the plaintiff has shown that the defendant has engaged in practices similar to those subject to per se treatment." *In re K-Dur Antitrust Litig., 686 F.3d 197, 209 (3d Cir. 2012)*. More recently, the Third Circuit has noted that in order to succeed under either a per se or quick look approach, a plaintiff must show "the existence of a horizontal agreement, that is, an agreement between 'competitors at the same market level.'" *In re Insurance Brokerage Antitrust Litigation, 618 F. 3d 300, 318 (3d Cir 2010)*(quoting *In re Pharmacy Benefit Managers Antitrust Litig., 582 F.3d 432, 436 n.5 (3d Cir. 2009))*. Overall, as stated by the Supreme Court, the "quick look analysis carries the day when the great likelihood of anticompetitive effects can easily be ascertained." *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*.

Even if this Court views the alleged restraint as viewed by Plaintiff— **[*23]** i.e., a horizontal agreement between Virtua, CGPA and Penn—for the reasons set forth in more detail below, this Court is unable to find that the anticompetitive effects can be so easily ascertained as to militate in favor of the quick look analysis. See *Orson, Inc. v. Miramax Film Corp., 79 F.3d 1358, 1367 (3d Cir. 1996)*(declining to apply quick look analysis where plaintiff stated that the "restraint's negative effect on competition is manifest given the abundance of record evidence showing . . . decreasing output and increasing process . . . [,] because plaintiff "failed. . . to substantiate its assertion with facts."). Therefore, this Court finds it appropriate to apply the rule of reason analysis, "[t]he usual standard applied to determine whether a challenged practice unreasonably restrains trade[.]" *In re Insurance Brokerage Antitrust Litigation, 618 F. 3d at 315*. In applying this standard, this Court is mindful that "[r]egardless of the standard used, the purpose of the inquiry is always to assess the effect of the conduct on competition[.]" *Deutscher Tennis Bund v. ATP Tour, Inc., 610 F.3d 820, 831 (3d Cir. 2010)*.

Even if this Court were to begin with a quick look analysis as urged by the Plaintiff, a rule of reason analysis would, nevertheless, become applicable. Where the quick look analysis is applied, "condemnation is proper only after assessing and rejecting the logic of proffered procompetitive **[*24]** justifications." *Deutscher, 610 F. 3d at 832*. In applying the quick look standard, "[i]f, after examining the competing claims of anti-and procompetitive effects, it remains plausible that the net effect is procompetitive or that there is no effect on competition, then '[t]he obvious anticompetitive effect that triggers abbreviated analysis has not been shown.'" Id. (emphasis added).

After reviewing the evidence propounded by the Defendants in support of their contention that the alleged restraint is neutral, i.e., "[has] no impact on the market either anticompetitive or procompetitive," Defs.' Reply Br. at 17, this Court finds that it remains plausible that there is no effect on competition by the alleged restraint. See Declaration of Gregory Vistnes, Virtua App. at 285 ("Deborah's loss of CGPA's ACI services referrals did not reduce competition in any relevant market, but was instead a manifestation of ongoing competition."); Expert Report of Gregory Vistnes, Virtua App. at 440 ("there is no evidence of anticompetitive effects in any relevant antitrust market — either direct or indirect.").[13] In finding that it remains plausible that there is no impact on competition, this Court must continue its

[13] See Pl.'s Ex. 112, Vistnes Deposition: 82:13-24 (noting, in response to various hypotheticals posed by Plaintiff's counsel that "the economic analysis that I've conducted remains fundamentally the same in all of the situations that you are hypothesizing about. That economic analysis leads me to conclude that there was no harm to competition.").

analysis and apply the **[*25]** rule of reason, even if it were to begin with a quick look framework. *Id. at 833* (noting that rule of reason analysis applies once the quick look presumption disappears).

B. Rule of Reason Analysis

The rule of reason test "requires that a factfinder look at the totality of the circumstances in order to determine whether a business combination constitutes an unreasonable restraint of trade." *Gordon, 423 F.3d at 210*. Moreover, under this standard, the plaintiff "bears the burden of showing that the alleged contract produced an adverse, anticompetitive effect within the relevant geographic market." Id. As stated in this Court's prior Opinion, [Docket No. 56], a plaintiff may demonstrate that concerted action produced adverse, anticompetitive effects within the relevant product and geographic markets in two ways: (1) through direct evidence of actual anticompetitive effects; or **[*26]** (2) through proof of the defendant's market power, which acts as a proxy for anticompetitive effect. *Deutscher, 610 F.3d at 830*.

While, in both cases, a plaintiff must make some showing of a relevant market, where a plaintiff demonstrates direct evidence of actual anticompetitive effects, the plaintiff's burden is diminished and it must only demonstrate "the rough contours of a relevant market." *In re Compensation of Managerial, Professional and Technical Employees Antitrust Litig., No. 02-CV-2924, 2008 U.S. Dist. LEXIS 63633, 2008 WL 3887619, at *7 (D.N.J. Aug. 20, 2008)*(quotation omitted). In this matter, Plaintiff has made clear that it is seeking to demonstrate direct evidence of actual anticompetitive effects. As stated by several courts in this Circuit, however, "proof that the concerted action actually caused anticompetitive effects is often impossible to sustain. . . ." *Gordon, 423 F. 3d at 210* (citing *Brown Univ., 5 F. 3d at 668*). As set forth above, the Defendants do not contest the relevant markets as identified by Plaintiff's expert, Evan Hoffman Schouten. These markets include:

- Emergency Angioplasties: Burlington, Monmouth and Ocean Counties.
- Non-emergent/Elective ACI Procedures: Burlington, Camden, Mercer, Monmouth, and Ocean counties, as well as parts of Philadelphia.

[VSOR & PR at ¶ 96]. This Court will, therefore, utilize the markets as defined by the Plaintiff for purposes of the anticompetitive effects analysis, and **[*27]** refers to both sets of procedures generally as "ACI Procedures."

Actual anticompetitive effects can be shown through reduced output, increased prices, decreased quality, and loss of consumer choice. *Tunis Bros. Co., Inc. v. Ford Motor Co., 952 F.2d 715, 728 (3d Cir. 1991)*("An antitrust plaintiff must prove that challenged conduct affected the prices, quantity or quality of goods or services")(quotation and citation omitted). Both Defendants have moved for summary judgment arguing that Plaintiff has failed to present evidence sufficient to create a genuine dispute of material fact that the alleged concerted action produced such anticompetitive effects within the relevant product and/or geographic markets.[14]

The Defendants advance the following arguments in support of their conclusion that Plaintiff has failed to provide direct evidence of actual anticompetitive effects in the relevant markets as a whole:[15]

- Plaintiff's expert offered no testimony demonstrating that prices have **[*28]** increased or that output or quality has decreased in the relevant market. Doc. No. 204 at 3.
- There is no evidence that Deborah was prevented from competing in the relevant markets as evidenced by CGPA's small market share. Doc. 205 at 23.
- Deborah has only demonstrated harm to itself as an individual competitor, which is insufficient to satisfy the required anticompetitive effects element. Id. at 25.

---

[14] Virtua also moves for summary judgment arguing that Plaintiff has failed to present sufficient direct or circumstantial evidence of concerted action. Because this Court finds that there is no genuine dispute of fact with respect to anticompetitive effects, it need not reach this argument. *Tunis Bros. Co., Inc., 952 F.2d at 722*.

[15] See discussion infra at 27-41 regarding applicability of the "market as a whole" language.

- Even if certain patients paid higher co-pays or deductibles or were deprived of their choice to be transferred to Deborah, those individuals' experience do not establish the harm to competition in the relevant markets. Id. at 29.

In its opposition papers, Plaintiff begins its argument by asserting what this Court determined at the motion to dismiss stage — i.e., that Plaintiff does not have to prove market power where it can present direct evidence of actual anticompetitive effects. Pl.'s Opp. Br. at 40-45. Again, this Court agrees that the demonstration of actual anticompetitive effects on the market as a whole obviates the need to demonstrate market power. [Docket No. 56 at 19, n.8]. After this Court's ruling on the Motion to **[*29]** Dismiss, the parties engaged in extensive discovery regarding Deborah's claim that it had evidence of actual anticompetitive effects on the market as a whole. Defendants contend that discovery failed to reveal any competent evidence of actual anticompetitive effects. See e.g., Virtua's Br. at 22 (stating that Plaintiff's expert offers no opinions on "whether or how CGPA's switch to Penn Cardiology injured competition in the relevant markets she has defined[.]").

In their joint reply brief, the Defendants further argue that Plaintiff's evidence is limited to only one hospital — Deborah - and its loss of a portion of the referrals from the twelve physicians practicing as CGPA, whose market share among cardiologists in the relevant markets is less than 8%. Defs.' Reply, Doc. 232 at 1-2. This evidence alone is insufficient as a matter of law. In addition, Defendants argue that "Deborah has presented absolutely no evidence about the pricing, output or quality of ACI procedures in the [m]arkets as a whole." Id. at 3. Finally, Defendants contend that Plaintiff had not even attempted to introduce evidence of market-wide harm and, instead seeks to rely on claims that CGPA patients, who fail to represent the **[*30]** remaining 92% of the relevant market, "did not experience 'Deborah's superior patient satisfaction scores and door-to-door balloon times,' and 'paid higher out-of-pocket costs.'" Defs.' Reply at 9 (quoting Pl's Opp. at 9). In sum, it is the Defendants' view that, in addition to failing to show market power and/or market foreclosure, Plaintiff has not presented any evidence demonstrating that there have been price increases, output reductions, or quality diminishment in the relevant markets as a whole. The Court agrees.

Initially, in reviewing the Plaintiff's opposition papers, this Court found that Plaintiff had failed to address the issue of actual anticompetitive effects, the very issue this Court found survived Defendants' motion to dismiss.[16] This Court held a hearing on this issue on September 22, 2014. At the hearing, it became apparent that the parties diverged on a central legal point that would need to be resolved by this Court: Plaintiff contends that it must only demonstrate "more than de minimis anti-competitive effects," Pl.'s Supp. Br., Doc. 25 at 1, whereas the Defendants assert that "any attempt by Deborah to demonstrate direct evidence of anticompetitive effects of a restraint must **[*31]** provide such evidence as to the market as a whole, not just an effect on Deborah or the patients of [CGPA]." Defs' Supp. Br., Doc. 264 at 1-2 (emphasis added). Because resolution of this issue would ultimately impact this Court's decision, the Court directed the parties to submit supplemental briefs addressing this issue.

At oral argument and in their supplemental submission, the Defendants argued that the case law supports their conclusion that Plaintiff must demonstrate that the alleged agreement at issue injured competition in the markets "as a whole." **[*32]** Defendants contend that the evidence introduced by Plaintiff fails to show that there was any anticompetitive effect on the market as a whole. For example, as stated in the declaration of Virtua's expert, Gregory Vistnes, harm to individual patient choice or having to incur a higher co-pay at another hospital "is not attributable to a reduction in competition in any relevant market." Vistnes Decl., Virtua App. at 284.

In response to the Defendants' position that failure to demonstrate harm on the market as a whole is fatal, Plaintiff contends that "[t]he canard is that the anticompetitive effects have to be market wide. That unto itself is erroneous.

---

[16] It is not enough to survive summary judgment to simply state that this Court found, at the motion to dismiss stage, that Plaintiff had adequately pled direct evidence of anticompetitive effects. Pleading and proof are distinct and summary judgment is the time Plaintiff is called on to put forth their evidentiary proof. *In re IKON Office Solutions, Inc., 277 F.3d 658, 666 (3d Cir. 2002)*("a party will not be able to withstand a motion for summary judgment merely by making allegations; rather, the party opposing the motion must go beyond its pleading and designate specific facts by use of affidavits, depositions, admissions, or answers to interrogatories showing there is a genuine issue for trial.").

There is no support for that in the case law." Sept. 22, 2014, Oral Arg. Tr. 56:22-24. Plaintiff instead argues that its burden with respect to presenting evidence of anticompetitive effects is to simply demonstrate that the effects are "more than de minimis." Plaintiff argues that the support for this proposition appears in *Tunis Bros. Co. v. Ford Motor Co., 952 F.2d 715 (3d Cir. 1991)*, discussed further infra, wherein the plaintiffs failed to demonstrate sufficient anticompetitive effects, not because they failed to demonstrate an injury on a market-wide basis, but because plaintiff had failed to demonstrate **[*33]** more than a de minimis injury. Sept. 22, 2014 Tr. at 59: 10-12. Plaintiff avers that, unlike the plaintiff in Tunis, it can demonstrate more than a de miminis injury because its patients who were "pipelined to Penn suffered higher-out-of-pocket costs, lower quality and diminished choice." Pl.'s Supp. Br. at 1. Importantly, Plaintiff does not point to any evidence that it has presented to this Court demonstrating anticompetitive effects as to the market as a whole. Instead, as set forth in its Statement of Facts, Plaintiff only presents evidence that Deborah or some patients of the CGPA were impacted as the relevant anticompetitive effects of the alleged conspiracy. See Doc. 265, Pl.'s Supp. Br. at 1.

This Court has reviewed the case law of this Circuit, other Circuits, and the cases cited by the parties, and it finds that, contrary to the Plaintiff's assertions at oral argument and in its submissions, the Third Circuit expressly requires a plaintiff to demonstrate that alleged anticompetitive effects impact the market at issue as a whole, as clearly set forth in *Eichorn v. AT&T Corp., 248 F. 3d 131 (3d Cir. 2001)*. In Eichorn, the Circuit discusses this requirement in two sections of its opinion: 1) as discussed by Plaintiff at oral **[*34]** argument, during its discussion of antitrust standing, and, 2) most critically as it applies to the instant case, in its analysis of the alleged anticompetitive activity under the rule of reason standard. In its standing discussion, the Court states:

> It is well established that an antitrust injury reflects an anti-competitive effect on the competitive market. . . . We have consistently held that an individual plaintiff personally aggrieved by an alleged anti-competitive agreement has not suffered an antitrust injury unless the activity has a wider impact on the competitive market.

Eichorn, 248 F. 3d at 140. Then, when discussing purported anticompetitive effects under the rule of reason analysis, the Court, again, notes "[t]he antitrust laws were not designed to protect every uncompetitive activity, but rather only those activities that have anti-competitive effects on the market as a whole." *Id. at 148* (emphasis added)(citing *Broad Music, Inc., v. Columbia Broadcasting Sys., 441 U.S. 1, 23, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*("Not all arrangements among actual or potential competitors that have an impact on price are per se violations of the Sherman Act or even unreasonable restraints.")). Thus, it is clear that under Third Circuit jurisprudence, anticompetitive effects must be shown *to impact the market as a whole*.[17] This **[*35]** is not, as Plaintiff urges, merely a requirement that the Plaintiff demonstrates only more than a de minimis market impact; that impact must extend to the whole defined market.

The Supreme Court's decision in *Jefferson Parish v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)* is instructive. The Jefferson Parish case involved an arrangement wherein East Jefferson hospital was party to a contract providing that all anesthesiological services required by the hospital's patients would be performed by Roux & Associates, a single group of anesthesiologists. *Id. at 5*. After finding that the agreement did not create a per se violation of the Sherman Act, the Court engaged in "an inquiry into the actual effect of the exclusive contract on competition among anesthesiologists." *Id. at 29*. Ultimately, the Court found that there was no antitrust violation, stating "there has been no showing that the market as a whole has been affected at all by the contract." (*Id. at 31*)(emphasis added).

While Plaintiff attempts to distinguish Jefferson Parish because it is a case involving a "tying" arrangement, such efforts are unsuccessful; the relevant **[*36]** portions on the analysis in Jefferson Parish are not undermined by the fact that the instant case does not involve tying. Instead, the Court's analysis of whether the contract between Roux and East Jefferson hospital unreasonably restrained competition is directly relevant here — i.e., the Court found "there is no evidence that any patient who was sophisticated enough to know the difference between two anesthesiologists was not also able to go to a hospital that would provide him with the anesthesiologist of his choice." *Id. at 30*. In so finding, the Court noted that there was "no showing that the market as a whole has been

---

[17] Notably, and tellingly, the Plaintiff fails entirely to address the language of Eichorn in its supplemental briefing to this Court on this very issue.

affected at all by the contract." *Id. at 31*. There is no indication that the Court's analysis on this point is relevant in tying cases only. Instead, the statement follows the Court's discussion of whether the arrangement at issue had an unreasonable impact on purchasers with respect to price, quality or supply and/or demand. The same line of reasoning applies in the instant case, and other courts engaging in a similar analysis have made the same determination with respect to the required scope of anticompetitive effects. See, e.g., *Capital Imaging Assocs., P.C., v. Mohawk Valley Medical Assocs., 996 F.2d 537, 543 (2d Cir. 1993)*("Under [the rule of reason] test plaintiff **[*37]** bears the initial burden of showing that the challenged action has had an actual adverse effect on competition as a whole in the relevant market; to prove it has been harmed as an individual competitor will not suffice. Insisting on proof of harm to the whole market fulfills the broad purpose of the ***antitrust law*** that was enacted to ensure competition in general, not narrowly focused to protect individual competitors.")(emphasis in original)[18]; *Med Alert Ambulance, Inc., v. Atlantic Health System, Inc., No. 04-1615, 2007 U.S. Dist. LEXIS 57083, at *29 (D.N.J. Aug. 6, 2007)*("Under the rule of reason theory, the plaintiff must establish that the challenged action had an actual adverse effect on competition as a whole in the relevant market.")(emphasis added)(internal quotations omitted).

Other sources previously quoted by this Court refer to the need to demonstrate injury to the market as a whole. For example, Jonathan Jacobson, former member of the Congressional Antitrust Modernization Commission, persuasively writes: "In all cases, the relevant question is . . . whether there has been an adverse effect on price, output, quality, choice, or innovation in the market as a whole." Jonathan M. Jacobson, Exclusive Dealing, "Foreclosure," And Consumer Harm, 70 ANTITRUST L.J. 311, 362 (2002)(emphasis added).

In addition to the persuasive authority discussed above, this Court's decision is bolstered by other reasoning. For example, the need for Plaintiff's expert to define the rough contours of the market begs a critical question: Why does a plaintiff need to define a market if, ultimately, that plaintiff need not be concerned with the impact on that market overall? It is unclear how the undisputed need for a plaintiff to define the rough contours of the market fits into Plaintiff's espoused theory that its burden with respect to anticompetitive effects only requires a demonstration of more than de minimis effects, even **[*39]** if those effects only impact one competitor and a portion of its customers.[19] Under Plaintiff's theory, it appears that no market definition is even necessary. The Court disagrees.

Moreover, language from cases cited to this Court by Plaintiff as authoritative further undermine the Plaintiff's position. For example, in *Angelico v. Lehigh Valley Hospital, Inc., 184 F. 3d 268, 276 (3d. Cir. 1999)*, the Court notes that a plaintiff can prove actual anticompetitive effects via an "increase in price or deterioration in quality and goods and services." Id. The Court goes on to note "[d]ue to the difficulty of isolating the market effects of the challenged conduct, however, such proof is often impossible to make." Id.; see also, *Orson, Inc. v. Miramax Film Corp., 79 F.3d 1358, 1367 (3d Cir. 1996)*(same). Again, if the burden were simply that a plaintiff must prove only a more than de minimis impact, a standard clearly more easily satisfied than the burden to show impact on the market as a whole, the case law would not refer to such proof as "often impossible **[*40]** to make." Plaintiff provides no explanation.

---

[18] Notably, Plaintiff cites to this case in its supplemental brief but fails to discuss the "to the whole market" language. In addition, Plaintiff contends that the Second Circuit does not require proof of a market-wide impact, citing *Eiberger v. Sony Corp., 622 F.2d 1068 (2d Cir. 1980)*, a case that pre-dates not only Capital Imaging (by 13 years), but also the Supreme Court's decision in *Jefferson Parish, 466 U.S. at 31-32* (finding no *Section 1* violation where "there has been no showing that the market as a whole has been affected at all . . . .")(emphasis added). In addition, the Second Circuit in *K.M.B. Warehouse Distribs. v. Walker Mfg. Co., 61 F.3d 123, 127 (2d Cir. 1995)* quotes *Capital Imaging* and **[*38]** its language with respect to demonstrating an adverse impact on the market "as a whole."

[19] As aptly stated by counsel for Virtua at oral argument, "Deborah went to the trouble of getting an expert to posit the rough contours of the market but there is no mention whatsoever of that market in Deborah's brief in opposition to summary judgment." Sept. 22, 2014 Hearing Tr. at 32:7-10.

In its supplemental brief and/or during oral argument,[20] the Plaintiff relied heavily on three cases: *Tunis Bros. Co. v. Ford Motor Co., 952 F.2d 715 (3d Cir. 1991)*; *Oltz v. Saint Peter's Community Hosp., 861 F.2d 1440 (9th Cir. 1988)*; and, *Rome Ambulatory Surgical Ctr. v. Rome Mem. Hosp., 349 F. Supp. 2d 389 (N.D.N.Y. 2004)*.[21] Plaintiff's central argument is that the Court in Tunis did not require harm to the market as a whole. Instead, the plaintiff's burden was only "to show more than a de minimis restraint." Sept. 22, 2014 Tr. at 59:10-12. While the Court in Tunis did note that "plaintiffs have a burden to show more than a de minimis restraint," the Plaintiff here cannot divorce this language from the language that follows in that same opinion: "The Sherman Act was designed to prohibit significant restraints of trade rather than to proscribe all unseemly business practices; and the plaintiffs must have demonstrated some harm to the competitive landscape from [defendant's] termination of the [plaintiff's] franchise." *Tunis, 952 F.2d at 728* (internal quotations and citations omitted). In addition, the very definitions of the relevant markets were at issue in Tunis, and the Court overturned the jury's finding as to the relevant product and geographic markets based on the evidence presented. *Id. at 725-727*. In the instant case, there is no dispute as to the relevant markets. Finally, the **[*41]** ultimate outcome of Tunis supports this Court's finding - i.e., a plaintiff's Sherman Act claim must fail where that plaintiff does not present evidence demonstrating that prices, quantity or quality for goods or services has been affected by the defendant's conduct. *Id. at 728*.

Plaintiff's reliance **[*42]** on *Oltz v. Saint Peter's Community Hosp., 861 F.2d 1440 (9th Cir. 1988)*, is similarly misplaced. As Plaintiff's counsel candidly acknowledged during oral argument, the contours of the market at issue in Oltz differed dramatically as the defendant in Oltz enjoyed a 84% market share of general surgical services in Helena, Montana, one of the relevant markets for purposes of that court's analysis. *Id. at 1442*. Notably, the Court in Oltz distinguished Jefferson Parish, finding that, in that case, "[t]he defendant was only one hospital of several in a large metropolitan area[,]" *Id. at 1447*, while the hospital in Oltz undisputedly dominated the relevant market. Finally, the plaintiff in Oltz was able to demonstrate that "the price of anesthesia services and the incomes of the MD anesthesiologists rose dramatically because of the challenged restraint." Id. Again, Deborah has set forth no evidence here that the price of ACI services rose dramatically because of the alleged restraint in this case.

Finally, this Court finds *Rome Ambulatory Surgical Ctr. v. Rome Mem. Hosp., 349 F. Supp. 2d 389 (N.D.N.Y. 2004)*, distinguishable. In Rome, the plaintiff, a freestanding ambulatory surgical facility, was forced to leave the market entirely as a result of the defendants' alleged conduct. In addition, the plaintiff was able to demonstrate that commercial payers paid 35% lower **[*43]** rates during its tenure. *Id. at 409*. Again, in the instant case, Deborah continues to operate as a choice for patients in the relevant markets and it has demonstrated no increase in prices in the market as a whole in contrast to the facts in Rome.

With the need for demonstrating effects on the market as a whole in mind, this Court finds that summary judgment is appropriate. Plaintiff has not offered any fact or expert evidence of anticompetitive effects on the market as a whole as defined by its own expert. Instead, Plaintiff's evidence is limited to impacts it alone felt along with a subset of patients of CGPA who were sent to Virtua over Deborah.

---

[20] See Sept. 22, 2014 Tr. 50:15-18.

[21] Plaintiff's counsel, in discussing the applicability of cases like Rome, Oltz, Tunis, and KMB Warehouse to its situation stated:

> If you are saying that the injury to competition was that consumers were harmed because they lost access to you, you know, because for one reason or another you, the plaintiff, [is] not an option for consumers anymore, then you have to show that you gave consumers something that everybody else in the market isn't giving them.

Sept. 22, 2014 Oral Arg. Tr. 50:10-15. This Court fails to understand Plaintiff's appeal to these cases to the extent Plaintiff admitted that there was nothing special or different that Deborah offered.

> THE COURT: Are you saying that there is something special or different about Deborah that takes it out of the normal antitrust cases?
>
> MR. KANE: No, that's not what I'm saying, your Honor.

Sept. 22, 2014 Oral Arg. Tr. 49:18-22.

Plaintiff offers no factual evidence regarding the specifics of the price increases other than to offer that patients who were treated at facilities other than Deborah would have higher out-of-pocket costs. [PSOF at ¶ 23 ("all patients treated at Deborah pay less out-of-pocket costs than patients treated at Penn—even when the patients have the same insurances and undergo the same medical procedures.")]. Even assuming that Plaintiff is correct, there is no evidence in front of this Court demonstrating that costs for ACI procedures in the relevant markets **[*44]** rose on the whole as a result of the alleged conspiracy and a reduction in competition. See e.g., Expert Report of Gregory Vistnes ("Vistnes Report"), Virtua App. at 480 ("I am aware of no such claims or evidence that prices are higher than what one would predict in an alternative scenario in which CGPA continued to refer most of its ACI patients to Deborah."). Again, Plaintiff is only able to point out that patients who were treated at facilities other than Deborah would have higher out of pocket costs than at other hospitals. Certainly, however, this was the case both before and after the institution of the alleged conspiracy due to Deborah's charity hospital status.

With respect to quality, Plaintiff's only factual support for its contention is that PPMC had higher door-to-balloon times than Deborah. Again, this evidence only deals with CGPA patients who wanted to be sent to Deborah; there is no evidence presented by Plaintiff demonstrating that the quality of ACI procedures in the relevant markets as a whole was impacted by the agreements — i.e., that as a result of the alleged conspiracy, patients at other hospitals or of other practices experienced higher door-to-balloon times. In short, Plaintiff **[*45]** has presented no evidence demonstrating that the quality of ACI procedures in the relevant markets as a whole was impacted by the alleged conspiracy.

Finally, with respect to patient choice, this Court will assume for purposes of this motion that many more patients than the 20-plus patients specifically cited in the Plaintiff's Statement of Facts were "pipelined" to PPMC from Virtua. That said, the fact remains that this alleged restriction on choice involved less than 2% of the market for ACI procedures and there is no evidence that patients who wanted to go to hospitals other than Deborah were impacted. Again, this evidence alone is insufficient. See *Jefferson Parish, 466 U.S. at 30* (finding, where there was an exclusive contract between a hospital and one firm of anesthesiologists, that "there is no evidence that any patient who was sophisticated enough to know the difference between two anesthesiologists was not also able to go to a hospital that would provide him with the anesthesiologist of his choice.").

In *K.M.B. Warehouse Distribs. v. Walker Mfg. Co., 61 F. 3d 123, 128 (2d Cir. 1995)*, K.M.B., an auto parts distributor, contended that Walker, an auto parts manufacturer, and its distributors, violated *Section 1* of the Sherman Act. Walker, facing pressure from other distributors who were competitors **[*46]** of K.M.B., refused to supply its products to K.M.B. The Court, in determining whether K.M.B. had demonstrated "an actual adverse effect on competition as a whole in the relevant market[,]" found that K.M.B. could not show that the impact on intrabrand competition was "anything but de minimis." *Id. at 128*. The Court went on to find that

> KMB's proof on this point consists almost entirely of affidavits from twelve of its current customers stating that they prefer both Walker products and KMB's superior service. Such isolated statements of preference are not a sufficient "empirical demonstration concerning the [adverse] effect of the [defendants'] arrangement on price or quality," *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 30 n.49, 104 S. Ct. 1551, 80 L. Ed. 2d 2 . . . (1984)*, to state a *§ 1* claim. See *id. at 30* (finding inadequate evidence of an actual adverse effect on competition even though "the evidence indicates that some surgeons and patients preferred respondent's [anesthesiology] services").

Id. The analysis employed in *K.M.B.* is instructive here with respect to whether Plaintiff has demonstrated anticompetitive effects. Again, this Court finds that reference to a subset of CGPA patients who preferred Deborah is insufficient.

III. Conclusion

"It is axiomatic that 'the antitrust laws . . . were **[*47]** enacted for the protection of competition, not competitors.'" *Tunis Bros. Co., 952 F.2d at 727* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*(emphasis in original)(internal quotations omitted). The Plaintiff has brought a claim for an antitrust violation and this Court must remain mindful of the underlying purposes of the antitrust laws, which "were not designed to protect every uncompetitive activity, but rather only those activities that have anti-competitive effects on the market as a whole." *Eichorn, 248 F.3d at 148*. Ultimately, Plaintiff has failed to demonstrate that the alleged agreements created an anticompetitive effect on the market as a whole. Instead, drawing all reasonable inferences in favor of the Plaintiff, its evidence demonstrates that, at most, there has been harm to Plaintiff and a portion of its customers. See *K.M.B. Warehouse, 61 F.3d at 128* (finding no evidence of adverse effects where plaintiff "failed to come forward with any evidence that defendants' actions adversely affected service, quality or price market-wide."). Indeed, Plaintiff has pursued a remedy for such harm in the pending parallel state court proceeding.

In sum, Plaintiff's detailed inventory of evidence related to an alleged conspiracy between Virtua, CGPA, and Penn does not create a genuine dispute of fact as to whether **[*48]** there has been a sufficient demonstration of anticompetitive effects. This failure to show an impact of the alleged conspiracy on the market as a whole is fatal to Plaintiff's *Section 1* claim under the Sherman Act. See *Eichorn, 248 F.3d at 148*. Thus, while Plaintiff may be able to pursue a remedy in state court, its remedy does not lie in federal court for an antitrust violation. For the reasons stated above, Defendants' respective motions for summary judgment are granted. An appropriate Order will issue this date.

/s/Renée Marie Bumb

RENEE MARIE BUMB

United States District Judge

Date: March 24, 2015

ORDER

THIS MATTER having come before the Court upon the Defendants' respective Motions for Summary Judgment [Docket Nos. 204 & 205]; and the Court having reviewed the parties' submissions and having heard oral argument; and for the reasons set forth in the Opinion issued this date;

IT IS HEREBY this **24th** day of **March 2015**,

ORDERED that the Defendants' Motions for Summary Judgment [Docket Nos. 204 & 205] are **GRANTED;** and it is further

ORDERED that the Clerk close the file.

/s/ Renée Marie Bumb

Opinion

ORDER

In this antitrust case, Plaintiff Methodist Health Services Corporation ("Methodist") complains that Defendant OSF Healthcare System d/b/a Saint Francis Medical Center ("Saint Francis") has reduced competition and raised prices at the expense of consumers for inpatient hospital services and outpatient surgical services in the relevant geographic market by forcing **[*2]** commercial health insurers to enter into provider agreements that effectively exclude Saint Francis' competitor providers from contracting with those insurers. Now before the Court is Saint Francis' Motion for Judgment on the Pleadings, ECF No. 82. For the reasons below, it is DENIED. Defendant's Motion for Leave to File a Reply, ECF No. 89, and Plaintiff's Motion for Leave to File a Surreply, ECF No. 92, are GRANTED.

BACKGROUND

Methodist's 188-paragraph complaint raises 11 claims against Saint Francis: exclusive dealing in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1* (Count I); attempted monopolization in violation of *Section 2* of the Sherman Act, *15 U.S.C. § 2* (Count II); monopolization in violation of *Section 2* of the Sherman Act, *15 U.S.C. § 2* (Count III); exclusive dealing in violation of the Illinois Antitrust Act, *740 ILCS 10/3* (Count IV); attempted monopolization in violation of the Illinois Antitrust Act, *740 ILCS 10/3* (Count V); monopolization in violation of the Illinois Antitrust Act, *740 ILCS 10/3* (Count VI); tortious interference with prospective economic advantage with respect to BCBS (Count VII); tortious interference with prospective economic advantage with respect to Aetna (Count VIII); tortious interference with prospective economic advantage with respect **[*3]** to Health Alliance (Count IX); tortious interference with prospective economic advantage with respect to Humana (Count X); and unfair and deceptive acts and practices in violation of the Illinois Consumer Fraud Act, *815 ILCS 505/10a* (Count XI).

Methodist seeks damages, fees and costs, and for this Court to enjoin Saint Francis from conduct which prevents Methodist from participating in any commercial health insurance network. Compl. 38, ECF No. 1.

I. The Parties

The Court accepts as true, as it must when considering a motion for judgment on the pleadings, the following facts alleged in Methodist's complaint. *Forseth v. Village of Sussex, 199 F.3d 363, 368 (7th Cir. 2000)*.

Defendant Saint Francis is a not-for-profit hospital located in Peoria, Illinois. *Id*. at ¶ 9. It is the fourth largest medical center in Illinois, *id*. at ¶ 38, and the only provider of certain essential medical services in the relevant geographic area, defined by Methodist as Peoria, Tazewell, and Woodford Counties, Illinois, *id*. at ¶¶ 10, 39.[1] These essential services include solid organ transplants, tertiary pediatric services, Level 3 neonatal intensive care ("NICU"), and Level 1 Trauma care. *Id*. at ¶ 39. Saint Francis is part of the OSF Healthcare System. *Id*. at ¶ 37.

Plaintiff Methodist is an integrated health care delivery system consisting of various operating divisions, including an acute care hospital. *Id*. at ¶ 10. It does not offer several of the essential services Saint Francis provides, including organ transplant, tertiary pediatric services, NICU, and Level 1 Trauma care. *Id*. at ¶ 40. Methodist is located in Peoria, Illinois. *Id*. at ¶ 10. In addition to Methodist and Saint Francis, there are four other hospitals in the relevant geographic area: Proctor Hospital, Pekin Memorial Hospital, Hopedale Medical Complex, and Advocate Eureka Hospital. *Id*. at ¶¶ 36, 44—47. None of these hospitals provides either Level 1 or Level 2 Trauma care. *Id*. at ¶¶ 44—47. There also are several non-hospital-based providers in the relevant geographic area that provide outpatient surgical services. *Id*. at ¶ 48.

Because Saint Francis is the largest hospital in the region and the only local provider of certain essential medical services, most health insurance companies doing business in the relevant geographic market consider Saint Francis a "must-have" participating hospital in their health insurance networks. *Id*. at ¶¶ 2, 39.

II. The [*5] Relevant Product Markets and Saint Francis' Market Power

---

[1] Saint Francis does not contest **[*4]** the relevant geographic market.

The Complaint defines two relevant product markets: (1) "the sale of inpatient hospital services to commercial health insurers," and (2) "the sale of outpatient surgical services to commercial health insurers." *Id*. at ¶¶ 14, 21.[2] Commercial health insurers include managed-care organizations, other HMOs or PPOs, and employer self-funded plans. *Id*. at ¶ 17. Government payers, such as Medicare, Medicaid, and TRICARE, are excluded from the relevant markets. *Id*. at ¶¶ 17—18.

Methodist has excluded government payers from its relevant product market because the price government payers pay for inpatient hospital services and outpatient surgical services does not significantly **[*6]** constrain the prices hospitals and other providers charge commercial health insurers for the same services. *Id*. at ¶ 19. This is because commercial health insurers negotiate their rates with providers individually, while the federal government and each state unilaterally sets the rates and schedules at which it will pay providers for services provided to individuals covered by Medicare and TRICARE and by Medicaid, respectively—rates that typically are lower than the rates negotiated by commercial health insurers. *Id*. Methodist also claims that, because government payers unilaterally set the prices they will pay for services, a hospital or other healthcare provider can impose a price increase for inpatient hospital and/or outpatient surgical services solely on commercial health insurers. *Id*. at ¶¶ 20, 24.

Methodist claims that Saint Francis has approximately 53 percent of the market share for inpatient hospital services sold to commercial health insurers, and more than a 50 percent share of the market for outpatient surgical services sold to commercial health insurers. *Id*. at ¶ 2. Methodist further claims that, on average, OSF's prices are significantly higher than those of the hospitals **[*7]** and other providers with which it competes. *Id*. at ¶¶ 8, 53—54, 57.

III. Saint Francis' Anticompetitive Conduct and the Resulting Harm

As alleged in the Complaint, Saint Francis has been able to maintain its degree of market power in the relevant markets, despite its significantly higher prices, by leveraging its size and status as a "must-have" hospital to prevent commercial health insurers with whom it has provider agreements from also entering into provider agreements with Methodist or other competitor providers. *Id*. at ¶¶ 3, 81. In particular, Methodist alleges that Saint Francis has threatened the insurers with whom it has provider agreements that, in the event one of those insurers includes a competing provider in its network, Saint Francis will withdraw from that insurer's provider network (taking along with it the essential services that only it can provide) and/or impose substantial pricing penalties on that insurer. *Id*. at ¶¶ 4, 60—61, 68—85.

According to Methodist, Saint Francis has entered into these exclusionary provider agreements with at least BCBS (the largest commercial health insurance company in the relevant geographic area), Humana, Aetna, and Health Alliance. *Id*. **[*8]** at ¶¶ 50, 64, 81, 86—88. Methodist complains that by doing so, Saint Francis has effectively foreclosed Methodist and other competitor providers from over 60 percent of the fully insured commercial health insurance market in the relevant geographic area. *Id*. at ¶ 99. According to Methodist, inclusion in health insurance networks is crucial to hospitals and other healthcare providers because patients nearly always choose in-network healthcare providers for non-emergency care. *Id*. at ¶ 90. Therefore, by foreclosing Methodist and other competitor providers the opportunity to become participating providers in commercial health insurance networks, Saint Francis has reduced the number of privately-insured patients who might otherwise seek inpatient and/or outpatient surgical services from them. *Id*. at ¶¶ 7, 92.

[2] According to the complaint, inpatient hospital services "are a broad group of medical and surgical diagnostic and treatment services that include an overnight stay in the hospital by the patient." *Id*. at ¶ 15. Outpatient hospital services "are a broad group of surgical and related services that generally do not require an overnight stay in a hospital." *Id*. at ¶ 22. Outpatient hospital services "are distinct from procedures routinely performed in a doctor's office." *Id*.

Methodist further complains, and Saint Francis judicially admits,[3] that this foreclosure of access to privately-insured patients threatens its long-term sustainability, as well as that of other provider hospitals in the relevant geographic area. *Id*. at ¶ 98; Def.'s Ans. ¶ 98, ECF No. 12. Patients covered by commercial health insurance plans pay significantly more than patients covered **[*9]** by Medicare, Medicaid, or TRICARE for inpatient hospital and outpatient surgical services, *id*. at ¶ 93; Def.'s Ans. ¶ 93, and hospitals depend on payments from commercial health insurers to compensate for the comparatively low payments they receive from government payers, *id*. at ¶ 94; Def.'s Ans. ¶ 94.

Methodist believes that Saint Francis has undertaken this conduct with the purpose and intent of monopolizing the markets for inpatient hospital and outpatient surgical services by driving Methodist from the market or at least reducing Methodist's competitive significance within the market. *Id*. at ¶¶ 7—8.

DISCUSSION

I. Motion for Judgment on the Pleadings Standard

Federal Rule of Civil Procedure 12(c) permits a party to move for judgment on the pleadings after the pleadings are closed, but early enough not to delay trial. A motion for judgment on the pleadings is reviewed under the same standard as a motion to dismiss under *Rule 12(b)(6)*. *Hayes v. City of Chicago, 670 F.3d 810, 813 (7th Cir. 2012)*. Thus, a court should grant a *Rule 12(c)* motion "only if it appears beyond doubt the plaintiff cannot prove **[*10]** any facts that would support his claim for relief." *Id*. (quoting *Thomas v. Guardsmark, Inc., 381 F.3d 701, 704 (7th Cir. 2004))*; *see also* *AMCO Ins. Co. v. Swagat Grp., LLC, No. 07-3330, 2009 U.S. Dist. LEXIS 9628, 2009 WL 331539, at *3 (C.D. Ill. Feb. 10, 2009)* ("Judgment on the pleadings is appropriate if undisputed facts appearing in a pleading clearly entitle the moving party to judgment as a matter of law.").

When considering a motion for judgment on the pleadings, a court must take all well-pled allegations as true and draw all reasonable inferences in favor of the non-moving party. *Forseth, 199 F.3d at 368 (7th Cir. 2000)*. A court, however, should not assign any weight to unsupported conclusions of law or ignore any facts set forth in the complaint that undermine the plaintiff's claims. *N. Ind. Gun & Outdoor Shows, Inc. v. City of S. Bend, 163 F.3d 449, 452 (7th Cir. 1998)* (quoting *R.J.R. Serv., Inc. v. Aetna Cas. & Sur. Co., 895 F.2d 279, 281 (7th Cir. 1989))*.

II. Federal Antitrust Claims (Counts I—III)

In its motion for judgment on the pleadings, Saint Francis argues that it is entitled to judgment on the pleadings because Methodist has failed to plead, and cannot adequately plead, plausible relevant product markets or substantial foreclosure in those markets. Def.'s Mot. J. Pleadings ¶¶ 1—3, ECF No. 82. The Court addresses Saint Francis' argument with respect to the relevant product markets first.

a. Whether Methodist Has Alleged Implausibly Narrow Relevant Product Markets

Methodist alleges that by entering into and enforcing anticompetitive exclusionary contracts **[*11]** with BCBS, Humana, Aetna, and Health Alliance, Saint Francis unreasonably restrained trade in violation *Section 1* of the Sherman Act, Compl. ¶¶ 63, 110—18, and committed the offenses of monopolization and attempt to monopolize in violation of *Section 2* of the Sherman Act, *id*. at ¶¶ 119—132. *Section 1* of the Sherman Act declares unlawful "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce

[3] Judicial admissions are binding upon the party making them, and have the effect of withdrawing a fact from contention. *Keller v. United States, 58 F.3d 1194, 1199 (7th Cir. 1995)* ("A judicial admission is conclusive, unless the court allows it to be withdrawn.").

among the several States, or with foreign nations." 15 U.S.C. § 1. Section 2 of the Sherman Act prohibits "monopoliz[ing], or attempt[ing] to monopolize, or combin[ing] or conspir[ing] with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations." 15 U.S.C. § 2.

Courts have made clear that not all exclusive dealing arrangements are unlawful under Section 1 of the Sherman Act, but only those that restrict competition unreasonably. *See* Dos Santos v. Columbus-Cueno-Cabrini Med. Ctr., 684 F.2d 1346, 1352 (7th Cir. 1982) (citing Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327—29, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)). Accordingly, whether an exclusive dealing arrangement imposes an unreasonable restraint on competition in violation of Section 1 is analyzed under a rule of reason approach. *Id.*; *see also* Collins v. Associated Pathologists, Ltd., 676 F. Supp. 1388, 1394 (C.D. Ill. 1987), *aff'd* 844 F.2d 473 (7th Cir. 1988). A plaintiff alleging an exclusive dealing claim can prevail under a rule of reason approach only by establishing that the agreement in question results in a substantial **[*12]** foreclosure of competition in the area of effective competition—that is, in the relevant market. Dos Santos, 684 F.2d at 1352 (citing Tampa Elec. Co., 365 U.S. at 327—29); *see also* Stop & Shop Supermarket Co. v. Blue Cross & Blue Shield, 373 F.3d 57, 66 (1st Cir. 2004) (finding it is "critical to any attack on [an] exclusive dealing arrangement . . . that plaintiffs establish a relevant market and harm within it"). A relevant market includes both product and geographic dimensions. Brown Shoe Co v. United States, 370 U.S. 294, 324, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962); *see also* United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 404, 76 S. Ct. 994, 100 L. Ed. 1264 ("Th[e] market is composed of products that have reasonable interchangeability for the purposes for which they are produced—price, use and qualities considered.").

Market definition also plays a critical role in Section 2 monopolization and attempted monopolization causes of action. In order to recover on a monopolization claim, a plaintiff must establish: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." United States v. Grinnell Corp., 384 U.S. 563, 570—71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966); *see also* Endsley v. City of Chicago, 230 F.3d 276, 282 (7th Cir. 2000). Similarly, to establish the offense of attempt to monopolize under Section 2 of the Sherman Act, a plaintiff must prove: "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) **[*13]** a dangerous probability of achieving monopoly power." Spectrum Sports v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993); *see also* Ind. Grocery, Inc. v. Super Valu Stores, Inc., 864 F.2d 1409, 1413 (7th Cir. 1989). "In order to determine whether there is a dangerous probability of monopolization, courts have found it necessary to consider the relevant market and the defendant's ability to lessen or destroy competition in that market." Spectrum Sports, 506 U.S. at 456; *see also* Lektro-Vend Corp. v. Vendo Co., 660 F.2d 255, 270 (7th Cir. 1981).

In the present case, Saint Francis argues that Methodist's federal antitrust claims cannot survive judgment on the pleadings because Methodist has pleaded impermissibly narrow relevant product markets. Def.'s Mem. 1—2, 6, ECF No. 82-1. Specifically, Saint Francis argues that Methodist's alleged product markets "improperly and arbitrarily" exclude government payers, which, like commercial health insurers, buy inpatient hospital services and outpatient surgical services from Saint Francis and its competitor providers. *Id*. at 6—7. Saint Francis cites Little Rock Cardiology Clinic PA v. Baptist Health, 591 F.3d 591 (8th Cir. 2009), and Marion Healthcare LLC v. Southern Illinois Healthcare, No. 12-CV-00871-DRH-PMF, 2013 U.S. Dist. LEXIS 120722, 2013 WL 4510168 (S.D. Ill. Aug. 26, 2013), in support of its position.

In Little Rock, the Eight Circuit Court of Appeals affirmed the lower court's dismissal of Little Rock Cardiology Clinic's ("LRCC") federal antitrust claims pursuant to Rule 12(b)(6) for failing to plausibly define the relevant product market. 591 F.3d at 596—98. After LRCC cardiologists, **[*14]** who had been on staff at Baptist Health hospital and in Blue Cross & Blue Shield of Arkansas' ("BCBSA") preferred provider network, split away from Baptist Health and developed the competing Arkansas Health Hospital, Blue Cross removed LRCC and its doctors from its network. Id. at 594. LRCC sued Baptist Health and BCBSA for conspiracy in restraint of trade in violation of Section 1 of the Sherman Act and for conspiracy to monopolize, attempted monopolization, and monopolization in violation of Section 2 of the Sherman Act. Id. at 595. Similar to the Complaint at issue in this case, LRCC's complaint limited the relevant product market to patients covered by private insurance and excluded patients covered by government insurance. Id. at 596. LRCC claimed that its alleged product market properly excluded patients covered by government insurance because patients using private insurance are not reasonably interchangeable with patients using government insurance. *Id. at 597*.

The Eighth Circuit, however, did not agree with LRCC, and rejected the argument that patients covered by private insurance and those covered by government insurance are not reasonably interchangeable in light of LRCC's allegations:

> The trouble with this theory is that it **[*15]** analyzes the issue from the wrong side of the transaction. It may be true that, from the patient's perspective, private insurance and Medicare/Medicaid are not reasonably interchangeable. . . . But this lawsuit is not about the options available to patients, it is about the options available to shut-out cardiologists. . . . The relevant question, then, is to whom might the cardiologists at LRCC potentially provide medical service?

Id. at 597. The Eighth Circuit concluded that LRCC "must look to alternative patients who are able to pay the required fees, not just those who pay using private insurance": "Patients able to pay their medical bill, regardless of the method of payment, are reasonably interchangeable from the cardiologist's perspective—the correct perspective from which to analyze the issue in this case." *Id*.

The Southern District of Illinois adopted and relied on *Little Rock*'s reasoning in *Marion*—a case presenting issues very similar to those in this case. In *Marion*, the plaintiff, a provider of outpatient surgical services, sued both Southern Illinois Healthcare ("SIH"), a nonprofit corporation that owned both hospitals which provided inpatient and outpatient medical services and **[*16]** several freestanding outpatient service providers, and BlueCross and BlueShield of Illinois ("BCBSI") for violation of federal and state ***antitrust law*** and for tortious interference with a business expectancy. *2013 U.S. Dist. LEXIS 120722, 2013 WL 4510168, at *1—2*. The plaintiff alleged that SIH and BCBSI substantially suppressed competition for outpatient surgical services in Southern Illinois through exclusionary agreements and other anticompetitive conduct, including exclusive dealing, price discrimination, and monopolization. *2013 U.S. Dist. LEXIS 120722, [WL] at *1*. The complaint defined two relevant product markets: "(1) the sale of general acute-care inpatient hospital services, including pediatric services and neonatal care services to commercial health insurers, and (2) the sale of outpatient surgical services to commercial health insurers." *2013 U.S. Dist. LEXIS 120722, [WL] at *2* (internal quotation marks omitted).

The *Marion* defendants moved to dismiss the complaint on a number of grounds, including that the plaintiff had failed to plead, and could not adequately plead, a plausible relevant product market. *2013 U.S. Dist. LEXIS 120722, [WL] at *4—5, 9*. BCBSI, like Defendants here, asserted that the alleged relevant product markets were deficient as a matter of law because they excluded government payers to whom the plaintiff could and did sell its **[*17]** services. *2013 U.S. Dist. LEXIS 120722, [WL] at *9*. The plaintiff opposed dismissal of its claims on such product market grounds, arguing that government payers are not interchangeable with commercial health insurers because government payers pay providers significantly lower prices than do commercial health insurers. *Id*.

But the Southern District of Illinois, like the Eighth Circuit in *Little Rock*, disagreed with the plaintiff's interchangeability argument, and found that the relevant product markets, as defined in the complaint, were not plausible because they failed to include all potential buyers of inpatient or outpatient services: "Although plaintiff has alleged that government payers pay less than commercial insurers, and that the government reimbursement amounts are not negotiable, plaintiff has not adequately alleged that Medicare or Medicaid patients are not significant sources of input to it as a supplier of outpatient services." *2013 U.S. Dist. LEXIS 120722, [WL] at *10—11*.

In opposing Saint Francis' motion for judgment on the pleadings, Methodist argues that *Little Rock* and *Marion* are at odds with the relevant market inquiry set out by the Supreme Court in *Brown Shoe*, or at least distinguishable on the pleadings from the instant case. Pl.'s Resp. 3—5, 11, **[*18]** ECF No. 84. In *Brown Shoe*, the Supreme Court established that "[t]he outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *370 U.S. at 325*. The Supreme Court, citing its decision in *E.I. du Pont de Nemours & Co., 353 U.S. at 593—95*, also established that within a product market, "well-defined submarkets may exist, which, in themselves, constitute product markets for antitrust purposes." *Id*. A court may determine the boundaries of such a submarket by examining "such practical indicia" as (i) industry or public recognition of the submarket as a separate economic entity, (ii) the product's peculiar characteristics and uses, (iii) unique production facilities, (iv) distinct customers, (v) distinct prices, (vi) sensitivity to price changes, and (vii) specialized vendors. *Id*. The same principles that are used to define a relevant market for products also are used to define a relevant market for services. *See Photovest Corp. v. Fotomat Corp., 606 F.2d 704, 712 n.11 (7th Cir. 1979)*.

Where a plaintiff seller complains that a competitor's exclusionary conduct foreclosed it selling opportunities, courts typically find, as *Little Rock* and *Marion* held and Saint Francis argues, that all buyers to whom the competitor's **[*19]** rivals might sell their services are reasonably interchangeable under the test set out in *Brown Shoe. See, e.g., Stop & Shop Supermarket Co., 373 F.3d at 67* (noting "the concern in an ordinary exclusive dealing claim by a shut-out supplier is with the available market *for the supplier*"—in that case, "presumptively *all* retail customers for prescription drugs—not just that smaller sub-group who are insured or reimbursed"); *Campfield v. State Farm Mut. Auto. Ins. Co., 532 F.3d 1111, 1119 (10th Cir. 2008)* ("When there are numerous sources of interchangeable demand, the plaintiff cannot circumscribe the market to a few buyers in an effort to manipulate those buyers' market share."); *see also* 2B Philip E. Areeda et al., ***Antitrust Law*** ¶ 570e, at 418 (3d ed. 2007) ("The relevant market for this purpose includes the full range of selling opportunities reasonably open to rivals, namely all of the product and geographic sales they may readily compete for . . . .").

But courts also recognize that "there might be some special circumstance that ma[kes] separate consideration of [a] sub-group [of buyers] appropriate." *Stop & Shop Supermarket Co., 373 F.3d at 67*. For example, where the loss of high-profit sales unusually impairs the foreclosed rivals' survivability, see Areeda, ***Antitrust Law*** ¶ 570e, at 424, or where there is an inelastic difference in price between sales **[*20]** of a single product to a particular group of customers and sales of that same product to other customers, *see United States v. Rockford Mem'l Corp., 898 F.2d 1278, 1284 (7th Cir. 1990)* (noting, in dicta, that "diet soft drinks sold to diabetics are not a relevant product market, but that is because the manufacturers cannot separate their diabetic customers from their other customers and charge the former a higher price"); *United States v. Archer-Daniels-Midland Co., 866 F.2d 242, 246 (8th Cir. 1988)* (finding that a large price differential as a result of a government price support raising the price of one product, but not a second product, to an artificially high level supported placing products in separate relevant product markets, despite that the products were otherwise similar in use and quality, "because of the inability of the price supported product to constrain the price of the other product").

Here, Methodist has alleged, and Saint Francis has admitted, that access to privately-insured patients is critical to a healthcare provider's long-term sustainability in light of the comparatively low prices providers are required to charge patients covered by government plans for the same services, Pl.'s Resp. 4 (citing Compl. ¶¶ 93—94, 98; Def.'s Ans. ¶¶ 93—94, 98)—prices that, in certain cases, may be below cost, Comment to Proposed Consent Judgment at 3, *United States v. United Reg'l Heathcare Sys*., No. 7:11-cv-00030-0 (N.D. Tex. June 6, 2011), **[*21]** ECF No. 8-1.[4] Methodist also has alleged that government reimbursement rates do not significantly constrain healthcare providers' pricing to commercial health insurers, *id*. at ¶ 19, and that providers can target a price increase for inpatient hospital and/or outpatient surgical services solely at commercial health insurers, *id*. at ¶¶ 20, 24.

In light of such allegations and admissions, the Court cannot find, as a matter of law, that the sales of inpatient hospital and outpatient surgical services to commercial health insurers are interchangeable with the sales of these same services to government payers. Dismissal of Methodist's federal antitrust claims for failing to plead plausible relevant product markets therefore is inconsistent with the standard of review the Court must apply when considering **[*22]** a motion for judgment on the pleadings under *Rule 12(c)*.

---

[4] While the consent judgment in *United Regional Healthcare System* is neither authoritative nor controlling, *see Beatrice Foods Co. v. F.T.C., 540 F.2d 303, 312 (7th Cir. 1976)*, the Court takes notice of the public comment submitted by the American Medical Association in that case as an example of evidence Methodist expects to be able to prove through fact and expert discovery, *see Geinosky v. City of Chicago, 675 F.3d 743, 745 n.1 (7th Cir. 2012)*.

Having found that Methodist's defined product markets are plausible based on the pleadings, the Court turns to Saint Francis' foreclosure argument.

b. Whether Methodist Has Failed to Plead Foreclosure

Saint Francis argues that judgment on the pleadings with respect to Methodist's federal antitrust claims is warranted because Methodist has failed to plead that Saint Francis' exclusive dealing has resulted in substantial foreclosure of competition in the relevant market, namely that Methodist only alleges foreclosure of a subset of patients covered by commercial health insurance plans (those covered by fully insured commercial plans). Def.'s Mem. 10—12; Def.'s Reply 3—4, ECF No. 89-1.

Saint Francis is correct that Methodist has alleged that Saint Francis' exclusionary conduct has foreclosed Methodist and other competitor providers from 60 percent of the fully insured commercial health market. *See, e.g.*, Compl. ¶¶ 114—115, 137—138. But its argument goes too far at this stage of the litigation. In particular, the argument ignores that, elsewhere in the Complaint, Methodist has pleaded factual allegations from which this Court can reasonably infer **[*23]** that, with the benefit of discovery, Methodist will be able to establish the extent to which it is foreclosed from the self-funded portion of the commercial health insurance market. *See Nat'l Fidelity Life Ins. Co. v. Karaganis, 811 F.2d 357, 358 (7th Cir. 1987)* (cautioning that motion for judgment on the pleadings may be granted only if, *inter alia*, the moving party clearly establishes that no material issue of fact remains to be resolved).

Moreover, Saint Francis has pointed to no authority, binding or otherwise, to suggest that dismissal of a plaintiff's antitrust claims for failing to allege an exact percentage foreclosure in its pleadings is appropriate under either *Rule 12(b)(6)* or *Rule 12(c)*, nor has the Court's own research uncovered a Seventh Circuit case saying as much. *Cf. In re Ductile Iron Pipe Fitting Direct Purchaser Antitrust Litig., No. 12-711, 2013 U.S. Dist. LEXIS 29865, 2013 WL 812143, at *19 (D.N.J. Mar. 5, 2013)* ("The question of whether the alleged exclusive dealing arrangements foreclosed a substantial share of the line of commerce is a merits question not proper for the pleading stage.").

The Court therefore finds that Methodist's allegations of substantial foreclosure are sufficient to survive Saint Francis' motion for judgment on the pleadings. Saint Francis' motion is DENIED with respect to Counts I—III.

III. State Law Claims (Counts IV—XI)

In addition to its federal antitrust claims, Methodist asserts state **[*24]** law claims for exclusive dealing, attempted monopolization, and monopolization under the Illinois Antitrust Act, *740 ILCS 10/3* (Counts IV—VI); for tortious interference with prospective economic advantage (Counts VII—X); and for unfair and deceptive acts and practices under the Illinois Consumer Fraud Act, *815 ILCS 505/10a* (Count XI). Saint Francis argues that Methodist cannot sustain these state causes of action absent the continuation of its antitrust causes of action, without asserting any independent bases for their dismissal. Def.'s Mem. 12. Therefore, because this Court has denied Saint Francis' motion with respect to Methodist's federal antitrust claims, the Court must also DENY Saint Francis' motion for judgment on the pleadings with respect to Methodist's state law claims.

CONCLUSION

For the above reasons, Saint Francis' Motion for Judgment on the Pleadings, ECF No. 82, is DENIED. Saint Francis' Motion for Leave to File a Reply, ECF No. 89, and Methodist's Motion in the Alternative for Leave to File Surreply, ECF No. 92, are both GRANTED. The Clerk is directed to file Defendant's Reply, ECF No. 89-1, and Plaintiff's Surreply, ECF No. 92-1.

Entered this 25th day of March, 2015.

UNITED **[*25]** STATES DISTRICT JUDGE

Cardoni v. Wells Fargo Bank, N.A.

Court of Appeal of California, Fourth Appellate District, Division One

March 26, 2015, Opinion Filed

D066351

Reporter

2015 Cal. App. Unpub. LEXIS 2117 *

MICHAEL CARDONI, Plaintiff and Appellant, v. WELLS FARGO BANK, N.A. et al., Defendants and Respondents.

Notice: NOT TO BE PUBLISHED IN OFFICIAL REPORTS. *CALIFORNIA RULES OF COURT, RULE 8.1115(a)*, PROHIBITS COURTS AND PARTIES FROM CITING OR RELYING ON OPINIONS NOT CERTIFIED FOR PUBLICATION OR ORDERED PUBLISHED, EXCEPT AS SPECIFIED BY *RULE 8.1115(b)*. THIS OPINION HAS NOT BEEN CERTIFIED FOR PUBLICATION OR ORDERED PUBLISHED FOR THE PURPOSES OF *RULE 8.1115*.

Prior History: **[*1]** APPEAL from judgment of the Superior Court of Riverside County, No. RIC1106554, Gloria Connor Trask, Judge.

Disposition: Affirmed.

Core Terms

modification, cause of action, borrower, judicial notice, foreclosure, lender, allegations, documents, trust deed, recorded, default, notice, permanent, parties, modification agreement, terms, trial court, mortgage, breach of contract, declaratory relief, sustain a demurrer, demurrer, promise, breached, capitalization, notice of default, leave to amend, accounting, foreclosure sale, trustee sale

Counsel: Andrews Law Group and Brian C. Andrews for Plaintiff and Appellant.

Palmer, Lombardi & Donohue and Roland P. Reynolds, Frederick A. Haist for Defendant and Respondent Wells Fargo Bank, N.A.

Hogan Lovells US and Neil R. O'Hanlon, David W. Skaar for Defendant and Respondent Provident Funding Associates, L.P.

Judges: O'ROURKE, J.; McCONNELL, P. J., IRION, J. concurred.

Opinion by: O'ROURKE, J.

Opinion

Michael Cardoni appeals from a judgment dismissing his action against Wells Fargo Bank, N.A. (Wells Fargo), Provident Funding Associates, L.P. (Provident), and NDEx West, LLC (collectively respondents), after the trial court sustained respondents' demurrer to his operative complaint on the ground it failed to state any cause of action.[1] Cardoni contends the court erred because he alleged sufficient facts to state causes of action for breach of contract, breach of implied covenant of good faith and fair dealing, slander of title, accounting, wrongful foreclosure, void or cancel assignment of deed of trust, declaratory relief, unjust enrichment/restitution, quiet title, promissory estoppel, civil conspiracy, violations **[*2]** of the unfair competition law (UCL; *Business & Professions Code sections 17200 et seq.*), and negligence.

We affirm the judgment as to all causes of action.

FACTUAL BACKGROUND

Most of the facts are taken from Cardoni's third amended complaint; others come from the first amended complaint. We accept as true the properly pleaded material allegations and facts that may properly be judicially noticed. (*Olszewski v. Scripps Health (2003) 30 Cal.4th 798, 806, 135 Cal. Rptr. 2d 1, 69 P.3d 927*; *Debrunner v. Deutsche Bank National Trust Co. (2012) 204 Cal.App.4th 433, 435, 138 Cal. Rptr. 3d 830*.)[2]

Cardoni financed his Sun City property with a promissory note for $304,000 from lender Provident, and the property was secured by a deed of trust that was recorded in November 2007.

In March 2009, a notice of default and election to sell was recorded under the deed of trust. That same month, MERS substituted for the original trustee.

In April 2009, the deed of trust was recorded in the Riverside County Recorder's office.

In August 2009, Cardoni began loan modification negotiations with Wells Fargo under the Home Affordable Mortgage Program (HAMP).[3] Cardoni completed the process to qualify for participation in the HAMP Trial Period Plan (TPP).

Under the TPP, from September to November 2009, Cardoni paid monthly installments of $1,926.03 to Wells Fargo. In December 2009, Cardoni spoke to Wells Fargo supervisor Suzi Peasley in the "loss mitigation" department, who confirmed Cardoni had met his obligations under the TPP, he would be receiving a HAMP loan modification for the duration of the loan and the paperwork would be forthcoming. Peasley told him to continue his monthly payments.

---

[1] Mortgage Electronic Registration Systems, Inc. (MERS) was dismissed as a defendant. NDeX West LLC (NDeX) filed a declaration of nonmonetary status under *Civil Code section 2924l, subdivision (d)*; accordingly, it has not filed briefs in this appeal, but it is bound by this court's decision relating to the deed of trust. Provident filed a separate reply brief arguing that none of Cardoni's allegations in the operative complaint relate to it, and otherwise joining Wells Fargo's arguments.

[2] At Wells Fargo's request, the trial court judicially noticed various documents including Cardoni's deed of trust recorded in November 2007, an assignment of the deed of trust recorded in April 2009, a notice of default recorded in January 2011, a notice of trustee's sale recorded in March 2011, and the trustee's deed upon sale recorded in December 2011. Other documents the court judicially noticed **[*3]** included minute orders, the parties' pleadings and other records properly admissible as court records under *Evidence Code section 452*.

[3] HAMP has been described thusly: "As authorized by Congress, the United States Department of the Treasury implemented . . . HAMP to help homeowners avoid foreclosure during the housing market crisis of 2008. 'The goal of HAMP is to provide relief to borrowers who have defaulted on their mortgage payments or who are likely to default by reducing mortgage payments to sustainable levels, without discharging any of the underlying debt.'" (*West v. JPMorgan Chase Bank, N.A. (2013) 214 Cal.App.4th 780, 785, 154 Cal. Rptr. 3d 285* (*West* **[*4]**).) Treasury guidelines set forth threshold criteria to define the class of eligible borrowers, and those guidelines set forth accounting steps using a standardized net present value test to determine whether it is more profitable to modify the loan or to allow it to proceed to foreclosure. (*Nungaray v. Litton Loan Servicing, LP (2011) 200 Cal.App.4th 1499, 1502, 135 Cal. Rptr. 3d 442*.) "Calculations under HAMP involve assigning values to certain variables that are largely within the servicers' discretion, thus precluding any entitlement to loan modifications." (*Id. at p. 1502, fn. 1*.)

On or around December 23, 2009, Cardoni sent Wells Fargo a letter stating he had not received the loan modification agreement paperwork as Peasley had promised. Cardoni enclosed another payment for $1,926.03. Cardoni's letter stated his understanding that after the trial period, Wells Fargo would offer him a loan modification at 2.37 percent interest for the first five years, and then following certain incremental increases, the interest rate would be capped **[*5]** at 5.25 percent from the eighth year and for the duration of the loan.

In January 2010, Cardoni spoke to Wells Fargo loss mitigation processor Audrey Mason, who said Wells Fargo had approved Cardoni's HAMP trial period loan modification and it would send him a copy of the agreement in about one week. On January 28, 2010, Cardoni wrote Wells Fargo a letter again seeking the loan modification paperwork for a loan at an initial 2.37 percent interest rate, and enclosing another check for $1,926.03.

In February 2010, Wells Fargo representative Josh Faber informed Cardoni he did not qualify for a HAMP permanent loan modification. That month, Cardoni started a new loan modification application process with Wells Fargo. However, its representative, Nathan Ziegel, spoke with Cardoni and said the loan could not be modified because Wells Fargo did not own the loan. Despite Cardoni's requests for an accounting of the combined total of $9,630.15 he had paid during the TPP and the subsequent loan modification program, Wells Fargo did not provide one.

In April 2010, Wells Fargo sent Cardoni a second modification agreement, which stated less favorable terms than Wells Fargo's oral offer. Specifically, **[*6]** the second loan modification agreement he entered into required him to pay 4.25 percent interest for the first 5 years and 5.25 percent interest thereafter. Cardoni signed the modified agreement and paid Wells Fargo monthly payments of $2,063.51 for five months. During that time, Cardoni repeatedly asked Wells Fargo for the final executed second modification agreement, but Wells Fargo stated it would take approximately four to six weeks to provide it to Cardoni. Wells Fargo never sent Cardoni the paperwork.

The notice of default was rescinded in June 2010.

Sometime after July 2010, Cardoni stopped paying on his loan. He explained the reason for his actions in his complaint: "After this long pattern and series of fraudulent, false, lying, and breaching acts and omissions by Wells Fargo, and after reading and watching many news stories, and investigative journalist reports, and other writings on the foreclosure crisis, [I] justifiably believed Wells Fargo had no real or true intention of ever modifying [my] loan, and that Wells Fargo was behaving in this manner because—by its own words!—it did not even own [my] loan and/or did not have authority to modify the terms of the loan or the note, **[*7]** and that Wells Fargo was simply attempting to induce [me] further and further into default, so that Wells Fargo could sell away [my] family home at foreclosure auction. [¶] . . . While media reports do not affect or change the contract, they certainly support the allegations that Wells Fargo has an unfair business practice of luring borrowers into default with false promises of loan modification with the intent to deny the modification application and foreclose." (Some capitalization omitted.)

On January 3, 2011, a second notice of default was recorded indicating Cardoni owed $7,868.00 on his loan.

On January 21, 2011, NDEx substituted as trustee under the deed of trust.

In March 2011, a notice of trustee sale was sent to Cardoni.

In August 2011, Cardoni filed a lis pendens in superior court.

On December 22, 2011, a trustee's deed upon sale was recorded of the property's sale to TDR Servicing, LLC.

PROCEDURAL BACKGROUND

In April 2011, Cardoni sued Wells Fargo, NDEx, MERS, Provident, and Doe defendants in a verified complaint for declaratory relief, accounting, unfair business practices, fraud, breach of contract, unjust enrichment and quiet title. Respondents demurred and the court sustained **[*8]** the demurrer with leave to amend.

Cardoni filed a first amended complaint against the same defendants and LSI Title Company and First American Loanstar Trustee Services, alleging sixteen causes of action: declaratory relief, accounting, breach of contract, breach of implied covenant of good faith and fair dealings, cancellation of contract, civil conspiracy, "to void or cancel assignment of deed of trust," violation of *Civil Code sections 2923.5*, *2924*, *2934a*, wrongful foreclosure, slander of title, negligence, the UCL, restitution/unjust enrichment, and quiet title.

Respondents again demurred. As to Wells Fargo, the court sustained the demurrer without leave to amend as to all causes of action except three: declaratory relief, breach of contract, and the UCL. The court dismissed MERS as a defendant.

Cardoni filed a second amended complaint for declaratory relief, breach of contract, and violation of the UCL. Respondents demurred, and the court sustained the demurrer with leave to amend.

Cardoni filed his third amended complaint for declaratory relief, breach of contract, and violations of the UCL. In his prayer for relief, Cardoni sought a declaration that Wells Fargo and he had entered into the loan modification agreements **[*9]** that he substantially performed upon, but Wells Fargo breached the agreements and also violated the laws regarding foreclosures; that his foreclosure was wrongful; that title to the subject property remained in his name; all sums he had paid should be credited to the loan; Wells Fargo should provide an accounting, and be bound by the terms agreed to as part of the TPP. Cardoni also sought cancellation of the deed of trust, a preliminary injunction, and an unwinding of the foreclosure on the property.

The court sustained respondents' demurrer to the third amended complaint without leave to amend, ruling Cardoni could not make out a cause of action for declaratory relief on his contract claim or on claims the court had previously dismissed, including those alleging violation of *Civil Code sections 2923.5*, *2932.5*, *2934a*, and *2924*. It also ruled Cardoni had not made out a cause of action for breach of either the TPP or the permanent loan agreement; finally, it ruled the UCL cause of action failed because no unlawful actions occurred, Cardoni had alleged no fraudulent actions, and no remedy was available. As to Provident, the court dismissed the lawsuit with prejudice.

DISCUSSION

I. *Standard of Review*

When reviewing a judgment dismissing **[*10]** a complaint after the court sustains a demurrer, the reviewing court must assume the truth of the complaint's properly pleaded or implied factual allegations, and also consider judicially noticeable matters. (*Schifando v. City of Los Angeles (2003) 31 Cal.4th 1074, 1081, 6 Cal. Rptr. 3d 457, 79 P.3d 569*.) "'[W]hen the allegations of the complaint contradict or are inconsistent with such facts, we accept the latter and reject the former.'" (*Hill v. Roll Internat. Corp. (2011) 195 Cal.App.4th 1295, 1300, 128 Cal. Rptr. 3d 109*.)

"'Because a demurrer both tests the legal sufficiency of the complaint and involves the trial court's discretion, an appellate court employs two separate standards of review on appeal.'" (*Filet Menu, Inc. v. Cheng (1999) 71 Cal.App.4th 1276, 1279, 84 Cal. Rptr. 2d 384*.) First, we review the complaint de novo to determine whether it alleges sufficient facts to state a cause of action under any legal theory. (*Id. at p. 1280*.) We treat the demurrer as admitting all properly pleaded and judicially noticeable material facts, "'but not contentions, deductions or conclusions of fact or law.'" (*Blank v. Kirwan (1985) 39 Cal.3d 311, 318, 216 Cal. Rptr. 718, 703 P.2d 58*.) We deem the properly pleaded facts "to be true, however improbable they may be." (*Del E. Webb Corp. v. Structural Materials Co. (1981) 123 Cal.App.3d 593, 604, 176 Cal. Rptr. 824*.) "[W]e give the complaint a reasonable interpretation, reading it as a whole and its parts in their context." (*Blank, at p. 318*.) "[I]ts allegations must be liberally construed, with a view to substantial justice between the parties." (*Code Civ. Proc., § 452*.) The plaintiff "bears the burden of demonstrating **[*11]** that the trial court erroneously sustained the demurrer as a matter of law" and "must show the complaint alleges facts sufficient to establish every element of [the] cause of action." (*Rakestraw v. California Physicians' Service (2000) 81 Cal.App.4th 39, 43, 96 Cal. Rptr. 2d 354*.)

"'Second, if a trial court sustains a demurrer without leave to amend, appellate courts determine whether or not the plaintiff could amend the complaint to state a cause of action.'" (*Filet Menu, Inc., v. Cheng, supra, 71 Cal.App.4th at p. 1280*.) If there is a reasonable possibility the defect can be cured by amendment, the trial court abused its discretion by sustaining the demurrer. (*Blank v. Kirwan, supra, 39 Cal.3d at p. 318*.) "The burden of proving such reasonable possibility is squarely on the plaintiff." (*Ibid.*)

II. *Wells Fargo's Judicial Notice Request*

Cardoni contends the trial court abused its discretion by taking judicial notice of the documents Wells Fargo submitted in support of its demurrer. Without specifying which judicially noticed documents he opposes, Cardoni states the operative complaint "genuinely disputes the authenticity of the recorded documents and many of other [*sic*] controversial documents in the Superior Court file." In turn, he asserts in his complaint: "The original note is the only legally binding document that can evidence chain of title, otherwise the instrument is faulty. **[*12]** [¶] . . . The original note was destroyed upon securitization because the note as a standalone, two-party, negotiable instrument and a tradable security instrument cannot exist at the same time. [¶] . . . Defendant Wells Fargo, the purported transferee, cannot acquire rights of a holder in due course by a transfer, directly or indirectly, from a holder in due course because the transferee engaged in fraud or illegality affecting the instrument . . . . [¶] . . . Therefore, all defendants lack standing to enforce the note." (Some capitalization omitted.)

In ruling on the request for judicial notice, the court stated: "I think the record should reflect that the court resolves any issue in the favor of the plaintiff in . . . resolving this demurrer. So every benefit of the doubt I give to [Cardoni]. However, I have granted the request for judicial notice. And there are documents in here that he cannot contradict. And that's I think wherein we have the problem, is that the—that the documents that the court has taken judicial notice of bind [Cardoni], and he can't contradict those documents."

We review the trial court's ruling on the request for judicial notice for abuse of discretion. """Judicial **[*13]** notice is the recognition and acceptance by the court, for use by the trier of fact or by the court, of the existence of a matter of law or fact that is relevant to an issue in the action without requiring formal proof of the matter.""" (*Poseidon Development, Inc. v. Woodland Lane Estates, LLC (2007) 152 Cal.App.4th 1106, 1117, 62 Cal. Rptr. 3d 59* (*Poseidon*).) *Evidence Code section 452, subdivisions (c)* and *(h)*, respectively, permit a court, in its discretion, to take judicial notice of "[o]fficial acts . . . of any state of the United States" and "[f]acts and propositions that are not reasonably subject to dispute and are capable of immediate and accurate determination by resort to sources of reasonably indisputable accuracy."

Pursuant to these provisions, courts have taken judicial notice of the existence and recordation of real property records, including deeds of trust, when the authenticity of the documents is not challenged. The official act of recordation and the common use of a notary public in the execution of such documents assure their reliability, and the maintenance of the documents in the recorder's office makes their existence and text capable of ready confirmation, thereby placing such documents beyond reasonable dispute. In addition, courts have taken judicial notice not only of the existence and recordation of documents but also of a variety **[*14]** of matters that can be deduced from the documents. In *Poseidon, supra, 152 Cal.App.4th 1106*, for example, the court affirmed the trial court's taking judicial notice, in sustaining a demurrer, of the parties, dates, and legal consequences of a series of recorded documents relating to a real estate transaction. Although the court recognized it would have been improper to take judicial notice of the truth of statements of fact recited within the documents, the trial court was permitted to take judicial notice of the legal effect of the documents' language when that effect was clear. Similarly, in *McElroy v. Chase Manhattan Mortgage Corp. (2005) 134 Cal.App.4th 388, 36 Cal. Rptr. 3d 176*, the court took judicial notice of the recordation of a notice of default under a deed of trust, the date of the notice's recording, and the amount stated as owing in the notice for the purpose of demonstrating the plaintiffs had notice of the amount claimed to be owing and the opportunity to cure a defective tender. (*Id. at p. 394*.)

"Strictly speaking, a court takes judicial notice of facts, not documents. (*Evid. Code, § 452, subds. (g)*, *(h)*.) When a court is asked to take judicial notice of a document, the propriety of the court's action depends upon the nature of the facts of which the court takes notice from the document. As noted in *Poseidon*,[*supra*, *152 Cal.App.4th at pp. 1117-1118*], for example, **[*15]** it was proper for the trial court to take judicial notice of the dates, parties, and legally operative language of a series of recorded documents, but it would have been improper to take judicial notice of the truth of various factual representations made in the documents. [Citations.] Taken together, the decisions discussed above establish that a court may take judicial notice of the fact of a document's recordation, the date the document was recorded and executed, the parties to the transaction reflected in a recorded document, and the document's legally operative language, assuming there is no genuine dispute regarding the document's authenticity. From this, the court may deduce and rely upon the legal effect of the recorded document, when that effect is clear from its face." (*Fontenot v. Wells Fargo Bank, N.A. (2011) 198 Cal.App.4th 256, 264-265, 129 Cal. Rptr. 3d 467* (*Fontenot*); accord, Simons, California Evidence Manual (2014 ed.) Judicial Notice, § 7:11.) "Where, as here, judicial notice is requested of a *legally operative* document—like a contract [or documents recorded in connection with a real property transaction]—the court may take judicial notice not only of the fact of the document and its recording . . . but also facts that clearly derive from its *legal effect* . . **[*16]** . [if] the fact is not reasonably subject to dispute." (*Scott v. JP Morgan Chase Bank, N.A. (2013) 214 Cal.App.4th 743, 754, 154 Cal. Rptr. 3d 394*; see *Jenkins v. JP Morgan Chase Bank, N.A. (2013) 216 Cal.App.4th 497, 537, 156 Cal. Rptr. 3d 912* (*Jenkins*) [court "may take judicial notice of the parties, dates, and legal significance of recorded documents relating to a real estate transaction"].)

Cardoni's attempt to demonstrate that the trial court abused its discretion in taking judicial notice as requested by Wells Fargo is not persuasive. His arguments do not raise any "genuine dispute regarding the document[s'] authenticity." (*Fontenot, supra, 198 Cal.App.4th at p. 265*.) Despite Cardoni's general objection to the court's ruling, we conclude he has offered no basis for a conclusion the court's action failed to accord with the principles set forth above regarding judicial notice. We conclude the court did not abuse its discretion in granting Wells Fargo's request for judicial notice.

III. *Breach of Contract*

Cardoni contends that he successfully completed the TPP; therefore, he was entitled to receive a HAMP modification of his loan, and Wells Fargo breached its contract with him by refusing to grant him that modification. He contends the permanent modification he entered into with Wells Fargo was not what he had bargained for.

The elements of a cause of action for breach of contract are (1) the existence **[*17]** and terms of the contract, (2) the plaintiff's performance or excuse for failing to perform, (3) the defendant's breach, and (4) plaintiff's damages. (*Amelco Electric v. City of Thousand Oaks (2002) 27 Cal.4th 228, 243, 115 Cal. Rptr. 2d 900, 38 P.3d 1120*; *Spinks v. Equity Residential Briarwood Apartments (2009) 171 Cal.App.4th 1004, 1031, 90 Cal. Rptr. 3d 453*.)

"The rules governing the role of the court in interpreting a written instrument are well established. The interpretation of a contract is a judicial function. [Citation.] In engaging in the function, the trial court 'give[s] effect to the mutual intention of the parties as it existed' at the time the contract was executed. (*Civ. Code, § 1636*.) Ordinarily, the objective intent of the contracting parties is a legal question determined solely by reference to the contract's terms. (*Civ. Code, § 1639* ['[w]hen a contract is reduced to writing, the intention of the parties is to be ascertained from the writing alone, if possible. . . .']; *Civ. Code, § 1638* [the 'language of a contract is to govern its interpretation . . .'].) [¶] The court generally may not consider extrinsic evidence of any prior agreement or contemporaneous oral agreement to vary or contradict the clear and unambiguous terms of a written, integrated contract. (*Code Civ. Proc., § 1856, subd. (a)*; *Cerritos Valley Bank v. Stirling (2000) 81 Cal.App.4th 1108, 1115-1116, 97 Cal. Rptr. 2d 432* . . . ; *Principal Mutual Life Ins. Co. v. Vars, Pave, McCord & Freedman (1998) 65 Cal.App.4th 1469, 1478, 77 Cal. Rptr. 2d 479* . . . [parol evidence may not be used to create a contract the parties did not intend to make or to insert language one or both parties now wish had been included].) **[*18]** Extrinsic evidence is admissible, however, to interpret an agreement when a material term is ambiguous. (*Code Civ. Proc., § 1856, subd. (g)*; *Pacific Gas & Electric Co.*[*v. G.W. Thomas Drayage & Rigging Co. (1968) 69 Cal.2d 33, 37, 69 Cal. Rptr. 561, 442 P.2d 641]* [if extrinsic evidence reveals that apparently clear language in the contract is, in fact, 'susceptible to more than one reasonable interpretation,' then extrinsic evidence may be used to determine the contracting parties' objective intent]." (*Wolf v. Walt Disney Pictures & Television (2008) 162 Cal.App.4th 1107, 1125-1126, 76 Cal. Rptr. 3d 585*.)

"A contract must receive such an interpretation as will make it lawful, operative, definite, reasonable, and capable of being carried into effect, if it can be done without violating the intention of the parties." (*Civ. Code, § 1643*.) "'The court must avoid an interpretation which will make a contract extraordinary, harsh, unjust, or inequitable.'" (*Powers v. Dickson, Carlson & Campillo (1997) 54 Cal.App.4th 1102, 1111-1112, 63 Cal. Rptr. 2d 261*.)

Because Cardoni's cause of action for breach of contract centers on the HAMP trial payments, we rely on *Wigod v. Wells Fargo Bank N.A. (7th Cir. 2012) 673 F.3d 547, 556* (*Wigod*) for a summary of the HAMP program: In response to the near collapse of the financial markets in 2008, Congress enacted the Troubled Asset Relief Program (TARP), which in part required the United States Department of the Treasury to implement a plan to minimize home foreclosures. (*Wigod, supra, 673 F.3d at p. 556*.) That plan, HAMP, enables certain homeowners who are in default or at risk of default **[*19]** to obtain permanent loan modifications, reducing their mortgage payments to no more than 31 percent of their gross monthly income for at least five years. Lenders receive a $1,000 incentive payment from the government for each HAMP modification, as well as other incentives. (*Bushell v. JPMorgan Chase Bank, N.A. (2013) 220 Cal.App.4th 915, 923, 163 Cal. Rptr. 3d 539* (*Bushell*).)

HAMP Supplemental Directive 09-01, issued April 6, 2009, by the United States Department of the Treasury (hereafter, Supplemental Directive 09-01), sets forth eligibility requirements and modification procedures under HAMP. Lenders must perform HAMP loan modifications in accordance with United States Department of the Treasury regulations. (*West, supra, 214 Cal.App.4th at p. 787*; *Wigod, supra, 673 F.3d at p. 556*.)

Under Supplemental Directive 09-01, before a lender offers a TPP to a distressed borrower, the lender (1) has already found that the borrower satisfies certain simple threshold requirements under HAMP regarding the basic nature of the loan obligation, (2) has already calculated a trial modification payment amount using a "waterfall" method of specified steps that drops the borrower's monthly mortgage payment to the HAMP figure of 31 percent of monthly gross income, and (3) has already determined that it is more profitable to modify the loan under HAMP than to **[*20]** foreclose upon it. (*West, supra, 214 Cal.App.4th at pp. 787-788*; *Wigod, supra, 673 F.3d at pp. 556-557, 565*; Supplemental Directive 09-01, *supra*, at pp. 2-5, 8-10, 14-18.)

After receiving the signed TPP from the borrower, with income verification documents, the lender must confirm that the borrower continues to meet the HAMP eligibility criteria, and if not, the lender should promptly notify the fact in writing to the borrower and consider the borrower for another foreclosure prevention alternative. (Supplemental Directive 09-01, *supra*, at pp. 15, 17-18.) In essence, when a lender offers a TPP to a distressed borrower, the lender effectively has already determined the borrower qualifies for HAMP, assuming the borrower's representations on which the modification is based remain true and correct. (*Bushell, supra, 220 Cal.App.4th at p. 924*; Supplemental Directive 09-01, *supra*, at pp. 15, 17-18.)

Once a lender determines the borrower qualifies for HAMP, the lender implements the HAMP modification process in two stages. In the first stage, the lender provides the borrower with a TPP setting forth the trial payment terms; instructs the borrower to sign and return the TPP, a financial hardship affidavit, and income verification documents; and requests the first trial payment. In the second stage, after the trial period, if the borrower has complied with all the terms of the TPP, including **[*21]** making all required trial payments and providing all required documentation, and if the borrower's representations on which the modification is based remain correct, the lender must offer the borrower a permanent loan modification. ""If the borrower complies with the terms and conditions of the [TPP], the loan modification will become effective on the first day of the month following the trial period."" (*Bushell, supra, 220 Cal.App.4th at p. 925*; *West, supra, 214 Cal.App.4th at pp. 796-797*; *Wigod, supra, 673 F.3d at p. 557*; Supplemental Directive 09-01, *supra*, at pp. 14-15, 18.)

Here, Cardoni sought and received from Wells Fargo a modification of his loan through the TPP. After he had successfully completed the TPP, he and Wells Fargo agreed to a permanent modification of his loan, requiring him to pay a lower interest rate—4.25 percent initially—than on his original loan. Although Cardoni claims in his lawsuit that the permanent loan's terms were less favorable than what Wells Fargo had orally promised, the only evidence he offers to support that claim are letters he wrote Wells Fargo stating his understanding the loan would be for an initial 2.37 percent interest rate. But, as noted, under established contract principles, we do not consider that extrinsic evidence because there is no ambiguity regarding the terms of **[*22]** the TPP or the permanent modification agreement, based on properly judicially noticed materials. The properly noticed TPP document states: "I understand that once [Wells Fargo] is able to determine the final amounts of unpaid interest and any other delinquent amounts (except late charges) to be added to my loan balance and after deducting from my loan balance any remaining money held at the end of the trial period . . . [Wells Fargo] will determine the new payment amount." Therefore, Wells Fargo complied with the TPP by offering Cardoni a permanent modification of the loan at the 4.25 percent initial interest rate.

Further, Cardoni continued repaying the loan for several months under the permanent modification agreement, thus accepting its terms. As this court has held, "[*Civil Code section] 1636* requires the court to interpret a contract to give effect to the parties' intentions at the time of contracting. 'The conduct of the parties after execution of the contract and before any controversy has arisen as to its effect affords the most reliable evidence of the parties' intentions. [Citations.]' [Citation.] Thus, courts will adopt and enforce the parties' practical construction when reasonable." (*Hernandez v. Badger Construction Equipment Co. (1994) 28 Cal.App.4th 1791, 1814, 34 Cal. Rptr. 2d 732*.)

Cardoni **[*23]** alleged in the complaint that he withheld loan payments to Wells Fargo based on news stories regarding the foreclosure crisis and his experience with Wells Fargo's loan modification department. Therefore, it was Cardoni who breached the permanent loan modification agreement, which had superseded any alleged oral agreement. Cardoni alleged in his complaint that Wells Fargo breached a contract by failing to provide him an executed copy of the second modification agreement. But Cardoni's complaint did not allege that any provision in the TPP states that requirement. Even assuming without deciding any such requirement exists, and liberally construing Cardoni's allegations as we must, we conclude Wells Fargo's failure to comply with it was a mere matter of failing to provide notice regarding the finalization of the modification, and not a material breach of the contract. Therefore, the court did not err in sustaining the demurrer as to this cause of action.

IV. *Breach of Implied Covenant of Good Faith and Fair Dealing*

Cardoni contends "Wells Fargo frustrated [his] rights to benefit from the HAMP loan modification when the [*sic*] stonewalled and would not provide [him] the promised HAMP loan." **[*24]**

The covenant of good faith and fair dealing is imposed upon each party to a contract. (*Carma Developers (Cal.), Inc. v. Marathon Development California, Inc. (1992) 2 Cal.4th 342, 371, 6 Cal. Rptr. 2d 467, 826 P.2d 710* (*Carma Developers*).) This fundamental covenant prevents the contracting parties from taking actions that will deprive another party of the benefits of the agreement. (*Id. at p. 372*.) The covenant also requires each party to do everything the contract presupposes the party will do to accomplish the agreement's purposes. (*Harm v. Frasher (1960) 181 Cal.App.2d 405, 417, 5 Cal. Rptr. 367*.)

"It is universally recognized the scope of conduct prohibited by the covenant of good faith is circumscribed by the purposes and express terms of the contract." (*Carma Developers, supra, 2 Cal.4th at p. 373*.) "Because contracts differ, the nature and extent of the duties owed under the implied covenant are also variable and 'will depend on the contractual purposes.'" (*Love v. Fire Ins. Exchange (1990) 221 Cal.App.3d 1136, 1147, 271 Cal. Rptr. 246*.) Thus, it is well settled the implied covenant does not extend so far as to impose enforceable duties that are beyond the scope of the contract, nor does the covenant prohibit actions that are expressly authorized by the contract's terms. (*Carma Developers, supra, at p. 374*.)

A party's breach of the implied covenant of good faith and fair dealing gives rise to a contract claim. (See *Storek & Storek, Inc. v. Citicorp Real Estate, Inc. (2002) 100 Cal.App.4th 44, 55-56, 122 Cal. Rptr. 2d 267*.) Importantly, it is also well settled "[t]he prerequisite for any action for breach of the implied **[*25]** covenant of good faith and fair dealing is the existence of a contractual relationship between the parties, since the covenant is an implied term in the contract." (*Smith v. City and County of San Francisco* (1990) 225Cal.App.3d 38, 49.) "Without a contractual underpinning, there is no independent claim for breach of the implied covenant." (*Fireman's Fund Ins. Co. v. Maryland Casualty Co. (1994) 21 Cal.App.4th 1586, 1599, 26 Cal. Rptr. 2d 762*.)

Here, having rejected Cardoni's claim of breach of contract, we also conclude he cannot make out a claim for breach of an implied covenant. Wells Fargo and he negotiated a modified permanent loan, which he breached by defaulting on his payments. These facts do not support a claim that respondents breached an implied covenant.

V. *Slander of Title*

Cardoni attempted to state a cause of action for damages for slander of title, arguing, "[T]he publication of the assignment, the deeds of trust, the notice of trustee's sale, and the trustee's deed upon sale are false because the original note was destroyed upon securitizations by Defendant Provident." (Capitalization omitted.) A basic requirement of this action is that the plaintiff's publication be "'*without privilege* or justification.'" (*Alpha & Omega Development, LP v. Whillock Contracting, Inc. (2011) 200 Cal.App.4th 656, 664, 132 Cal. Rptr. 3d 781*.) Cardoni's slander of title claim fails because the publication of **[*26]** the challenged documents was privileged under *Civil Code section 2924, subdivision (d)(1)* and the *Civil Code section 47* litigation privilege.

VI. *Accounting*

To state an accounting cause of action, a plaintiff must allege (1) a fiduciary relationship or other circumstances appropriate to the remedy, and (2) a "balance due from the defendant to the plaintiff that can only be ascertained by an accounting." (5 Witkin, Cal. Procedure (5th ed. 2008) Pleading, § 820, p. 236; see *Brea v. McGlashan (1934) 3 Cal.App.2d 454, 460, 39 P.2d 877* ["cause of action for accounting need only state facts showing the existence of the relationship which requires an accounting and the statement that some balance is due the plaintiff"].)

As to the first element, Cardoni did not allege sufficient facts to show Wells Fargo owed him a fiduciary duty. And he did not allege other circumstances appropriate to the remedy. No fiduciary duty exists between a borrower and lender in an arm's length transaction. (*Oaks Management Corporation v. Superior Court (2006) 145 Cal.App.4th 453, 466, 51 Cal. Rptr. 3d 561*; *Union Bank v. Superior Court (1995) 31 Cal.App.4th 573, 579, 37 Cal. Rptr. 2d 653*; *Price v. Wells Fargo Bank (1989) 213 Cal.App.3d 465, 476, 261 Cal. Rptr. 735*.) "[A]s a general rule, a financial institution owes no duty of care to a borrower when the institution's involvement in the loan transaction does not exceed the scope of its conventional role as a mere lender of money." (*Nymark v. Heart Fed. Savings & Loan Assn. (1991) 231 Cal.App.3d 1089, 1096, 283 Cal. Rptr. 53* (*Nymark*).) Cardoni having failed to allege facts supporting one of the elements of the cause of action, we conclude **[*27]** the court did not err by sustaining the demurrer without leave to amend.

VII. *Wrongful Foreclosure And Cancellation of Deed of Trust*

Cardoni argues he is exempt from the tender rule providing that a plaintiff generally may not challenge the propriety of a foreclosure on his or her property without offering to repay what he or she borrowed against the property. (*Karlsen v. American Sav. & Loan Ass'n (1971) 15 Cal. App. 3d 112, 117, 92 Cal. Rptr. 851* [judgment on the pleadings properly granted where plaintiff attempted to set aside trustee's sale for lack of adequate notice, because "[a] valid and viable tender of payment of the indebtedness owing is essential to an action to cancel a voidable sale under a deed of trust"].) Instead, Cardoni claims he made out a cause of action for wrongful foreclosure because Wells Fargo and Provident caused an "illegal, fraudulent, and willfully oppressive sale of [his] home. [He] was severely damaged because he was duped by defendants into defaulting on his loan and as a result lost title to his home and real property." (Some capitalization omitted.)

In addressing this and other contentions, it is helpful to begin with a summary of the law governing nonjudicial foreclosure: The power of sale in a deed of trust allows a beneficiary recourse **[*28]** to the security without the necessity of a judicial action. (See *Melendrez v. D & I Investment, Inc. (2005) 127 Cal.App.4th 1238, 1249, 26 Cal. Rptr. 3d 413*.) Absent any evidence to the contrary, a nonjudicial foreclosure sale is presumed to have been conducted regularly and fairly. (*Civ. Code, § 2924*.) However, irregularities in a nonjudicial trustee's sale may be grounds for setting it aside if they are prejudicial to the party challenging the sale. (See *Lo v. Jensen (2001) 88 Cal.App.4th 1093, 1097-1098, 106 Cal. Rptr. 2d 443*; see also *Angell v. Superior Court (1999) 73 Cal.App.4th 691, 700, 86 Cal. Rptr. 2d 657* ["'In order to challenge the sale successfully there must be evidence of a failure to comply with the procedural requirements for the foreclosure sale that caused prejudice to the person attacking the sale.'"].) Setting aside a nonjudicial foreclosure sale is an equitable remedy. (*Lo v. Jensen, at p. 1098* ["A debtor may apply to a court of equity to set aside a trust deed foreclosure on allegations of unfairness or irregularity that, coupled with the inadequacy of price obtained at the sale, mean that it is appropriate to invalidate the sale."].) A court will not grant equitable relief to a plaintiff unless the plaintiff does equity. (See *Arnolds Management Corp. v. Eischen (1984) 158 Cal.App.3d 575, 578-579, 205 Cal. Rptr. 15*; see also 13 Witkin, Summary of Cal. Law (10th ed. 2005) Equity, § 6, pp. 286-287.)

"It is settled that an action to set aside a trustee's sale for irregularities in sale notice or procedure should be accompanied **[*29]** by an offer to pay the full amount of the debt for which the property was security. [Citations.] This rule is premised upon the equitable maxim that a court of equity will not order that a useless act be performed. 'Equity will not interpose its remedial power in the accomplishment of what seemingly would be nothing but an idly and expensively futile act, nor will it purposely speculate in a field where there has been no proof as to what beneficial purpose may be subserved through its intervention.'" (*Arnolds Management Corp. v. Eischen, supra, 158 Cal.App.3d at pp. 578-579*.) "To hold otherwise would permit plaintiffs to state a cause of action without the necessary element of damage to themselves." (*Id. at p. 580*.) Moreover, as the court in *Stebley v. Litton Loan Servicing, LLP (2011) 202 Cal.App.4th 522, 526, 134 Cal. Rptr. 3d 604*, explained, "Allowing plaintiffs to recoup the property without full tender would give them an inequitable windfall, allowing them to evade their lawful debt."

"Recognized exceptions to the tender rule include when: (1) the underlying debt is void, (2) the foreclosure sale or trustee's deed is void on its face, (3) a counterclaim offsets the amount due, (4) specific circumstances make it inequitable to enforce the debt against the party challenging the sale, or (5) the foreclosure sale has not yet occurred." (*Chavez v. Indymac Mortgage Services (2013) 219 Cal.App.4th 1052, 1062, 162 Cal. Rptr. 3d 382*.) "Because the **[*30]** action is in equity, a defaulted borrower who seeks to set aside a trustee's sale is required to do equity before the court will exercise its equitable powers. [Citation.] Consequently, as a condition precedent to an action by the borrower to set aside the trustee's sale on the ground that the sale is voidable because of irregularities in the sale notice or procedure, the borrower must offer to pay the full amount of the debt for which the property was security. [Citations.] 'The rationale behind the rule is that if [the borrower] could not have redeemed the property had the sale procedures been proper, any irregularities in the sale did not result in damages to the [borrower].'" (*Lona v. Citibank, N.A. (2011) 202 Cal.App.4th 89, 112, 134 Cal. Rptr. 3d 622*; see *Pfeifer v. Countrywide Home Loans, Inc. (2012) 211 Cal.App.4th 1250, 1280-1281, 150 Cal. Rptr. 3d 673* [tender requirement applies to any action seeking to set aside a foreclosure sale].)

Cardoni did not allege he tendered the amount owed when he filed the operative complaint. Moreover, as we have noted, in his complaint he stated he had difficulty making his loan payments because his household income had dropped significantly. Thus, not only did he fail to allege he tendered the amount of his indebtedness, the complaint indicates he was financially unable to do so. In light of this failing, the court **[*31]** properly sustained respondents' demurrer to this cause of action.

Because Cardoni's cause of action to void or cancel the deed of trust is grounded on the same allegation and seeks the same relief, his failure to allege tender likewise precludes him from stating this cause of action.

VII. *Declaratory Relief*

Cardoni sought a declaration that "Defendant Wells Fargo breached the [TPP] and the [permanent] modification agreement by unilaterally rescinding the TPP and by refusing to tender an executed copy of the [permanent] modification agreement." (Some capitalization omitted.) Further, he sought a declaration that Wells Fargo had "fraudulently induced [him] to execute a[n] inferior and less favorable Wells Fargo internal modification agreement, by fraudulently representing to [him] that he did not qualify for HAMP loan modification." (Some capitalization omitted.) Finally, he sought a declaration that "Wells Fargo was not entitled to cause the subject property to be foreclosed upon and sold at trustee's sale, as [Cardoni] is the sole and true owner[] of the property and the defendants['] non-judicial foreclosure proceedings are illegal and void, and without authority of law." (Some capitalization **[*32]** omitted.)

To the extent Cardoni's declaratory relief claim relates to the question of Wells Fargo's alleged breach of contract, we have disposed of this matter above, and the court did not err in denying declaratory relief. To the extent Cardoni sought declaratory relief relating to his claim the foreclosure sale was improper, there was no basis for the court to grant his request. Declaratory relief is an equitable remedy (*City of L.A. v. City of Glendale (1943) 23 Cal. 2d 68, 81, 142 P.2d 289*; *Hartley v. Superior Court (2011) 196 Cal.App.4th 1249, 1258, 127 Cal. Rptr. 3d 174)*, and it is therefore subject to the equitable principle behind the tender requirement. (*Lona v. Citibank, N.A., supra, 202 Cal.App.4th at p. 112*.) A number of reported decisions have linked the availability of declaratory relief in a foreclosure challenge to satisfying the tender requirement. (*Abdallah v. United Savings Bank (1996) 43 Cal.App.4th*

1101, 1109, 51 Cal. Rptr. 2d 286 [tender requirement applies to "any cause of action for irregularity in the sale procedure"]; *McElroy v. Chase Manhattan Mortgage Corp., supra, 134 Cal.App.4th at p. 394*.) In the absence of a sufficient tender by Cardoni, the court did not err by sustaining the demurrer on this cause of action.

IX. *Unjust Enrichment/Restitution*

"[T]here is no cause of action in California for unjust enrichment." (*Melchior v. New Line Productions, Inc. (2003) 106 Cal.App.4th 779, 793, 131 Cal. Rptr. 2d 347*; *McKell v. Washington Mutual, Inc. (2006) 142 Cal.App.4th 1457, 1490, 49 Cal. Rptr. 3d 227*.) Unjust enrichment is synonymous with restitution. (*Dinosaur Development, Inc. v. White (1989) 216 Cal.App.3d 1310, 1314, 265 Cal. Rptr. 525*.)

"As a matter of law, an unjust enrichment claim does not lie where the parties have an enforceable express contract." (*Durell v. Sharp Healthcare (2010) 183 Cal.App.4th 1350, 1370, 108 Cal. Rptr. 3d 682*.) "'If the money is paid in satisfaction **[*33]** of an obligation actually owed by the plaintiff, he or she is obviously not entitled to restitution even though the performance was induced by mistake or fraud.'" (*Id. at p. 1371*.)

X. *Quiet Title*

The two elements of an ordinary cause of action to quiet title are the plaintiff's ownership and possession of the land and the defendant's claim of an adverse interest. (See *South Shore Land Co. v. Petersen (1964) 226 Cal.App.2d 725, 740-741, 38 Cal. Rptr. 392*, citing *Lucas v. Sweet (1956) 47 Cal.2d 20, 22, 300 P.2d 828* and *Ephraim v. Metropolitan Trust Co. (1946) 28 Cal.2d 824, 833, 172 P.2d 501*.) "A borrower may not . . . quiet title against a secured lender without first paying the outstanding debt on which the . . . deed of trust is based." (*Lueras v. BAC Home Loans Servicing, LP (2013) 221 Cal. App. 4th 49, 86, 163 Cal. Rptr. 3d 804*; accord, *Shimpones v. Stickney (1934) 219 Cal. 637, 649, 28 P.2d 673*.)

Cardoni cannot state such a cause of action because following the trustee's sale, Cardoni cannot allege he is the owner or in possession of the property. There are no allegations that Cardoni paid off the loan, or made a sufficient tender of payment. Thus, the court did not err by sustaining the demurrer on this cause of action.

XI. *Promissory Estoppel*

Cardoni contends in his opening brief that he "relied to his detriment that he would receive a HAMP loan modification under certain terms, however, Wells Fargo refused to provide [him] with such despite [his] faithful completion of the [TPP]. [¶] If [he] had known that he would not be provided a permanent HAMP **[*34]** loan modification on these express terms, [he] would have pursued other options." He adds this incomplete sentence: "The money put towards TPP agreements could have been used to[.]" His request for leave to amend his complaint to state this cause of action states in its entirety: "If given the opportunity, [I] can plead allegations that are sufficient to maintain a promissory estoppels [*sic*] cause of action. Leave to amend is requested to assert this viable cause of action."

The elements of promissory estoppel are (1) a promise, (2) the promisor should reasonably expect the promise to induce action or forbearance on the part of the promisee or a third person, (3) the promise induces action or forbearance by the promisee or a third person (which we refer to as detrimental reliance), and (4) injustice can be avoided only by enforcement of the promise. (*Kajima/Ray Wilson v. Los Angeles County Metropolitan Transportation Authority (2000) 23 Cal.4th 305, 310, 96 Cal. Rptr. 2d 747, 1 P.3d 63*; see *Rest.2d Contracts, § 90, subd. (1)*.)

"'[A] promise is an indispensable element of the doctrine of promissory estoppel. The cases are uniform in holding that this doctrine cannot be invoked and must be held inapplicable in the absence of a showing that a promise had been made upon which the complaining party relied to his prejudice.' [Citation.] The promise must, **[*35]** in addition, be 'clear and unambiguous in its terms.'" (*Garcia v. World Savings, FSB (2010) 183 Cal.App.4th 1031, 1044, 107 Cal. Rptr. 3d 683*.) For a promise to be enforceable, it need only be "'definite enough that a court can determine the scope of the duty[,] and the limits of performance must be sufficiently defined to provide a rational basis for the assessment of damages."' (*Bustamante v. Intuit, Inc. (2006) 141 Cal.App.4th 199, 209, 45 Cal. Rptr. 3d 692*.)

We have already concluded Cardoni cannot allege that he and Wells Fargo entered into a valid contract for the lower interest rate. Rather, his allegations demonstrate he accepted Wells Fargo's permanent loan modification agreement and started performing on it. By so doing, he undermined any claim that he was prejudiced by Wells Fargo's failure to grant him the loan at the lower interest rate he claims he was orally promised. It follows that he also cannot show detrimental reliance to make out a claim for promissory estoppel.

The plaintiff has the burden to show in what manner the pleadings may be amended and how such amendments will change the pleadings' legal effect. (*Careau & Co. v. Security Pacific Business Credit, Inc. (1990) 222 Cal.App.3d 1371, 1388, 272 Cal. Rptr. 387*.) This showing may be made for the first time on appeal, even if plaintiff made no request for leave to amend in the trial court. (*Code Civ. Proc., § 472c, subd. (a)*;[4] *Aubry v. Tri-City Hospital Dist. (1992) 2 Cal.4th 962, 971, 9 Cal. Rptr. 2d 92, 831 P.2d 317*.) Cardoni has not described, either in opposition to the demurrer motion below or on appeal, **[*36]** new or more specific facts, nor how those factual allegations would state a cause of action. Cardoni had three opportunities to amend his complaint in the trial court, and he does not meet his appellate burden of showing he can amend. We deny his request for leave to amend.

XII. *Civil Conspiracy*

Cardoni alleges he stated a cause of action for civil conspiracy, and refers to this allegation stated in his third amended complaint: "[Cardoni] was sold an alleged loan by [] Provident, which was not contemplated, scrutinized, underwritten, or designed by defendants to actually benefit [Cardoni], or to maximize [his] chances of maintaining possession of his real property, or to take into consideration [his] personal circumstances, including [his] income, assets, ability to pay, etc.; [he] was instead sold a loan that was contemplated, scrutinized, underwritten, and designed by defendants simply to feed secured paper into a Ponzi scheme (now known **[*37]** in knowledgeable circles as mortgage "securitization"), which scheme Defendants (including Wells Fargo) had designed and executed knowingly, all the while knowing it would almost surely cause [Cardoni] to lose possession of the subject real property, default on the subject loan, and would then allow the very foreclosure—fraudulently pre-conceived, pre-planned, and invalid though it is—which now threatens [him], and which is the primary subject and genesis of this civil action." (Emphasis and some capitalization omitted.)

Civil conspiracy is not an independent tort. Instead, it is a theory of vicarious legal liability under which certain defendants may be held liable for torts committed by others. That is, all parties to a conspiracy are jointly liable for tortious acts committed by any of them pursuant to the conspiracy. (*Okun v. Superior Court (1981) 29 Cal.3d 442, 454, 175 Cal. Rptr. 157, 629 P.2d 1369*.) The complaint must allege acts that give rise to a tort cause of action without the conspiracy; absent such allegation, the conspiracy allegation is meaningless. (*Manor Investment Company v. F. W. Woolworth Co. (1984) 159 Cal.App.3d 586, 595, 206 Cal. Rptr. 37*.) Thus, respondents' demurrer was properly sustained because the allegations of Cardoni's complaint do not show an independent potential for tort liability upon which the conspiracy claim is based. (*Chavers v. Gatke Corp. (2003) 107 Cal.App.4th 606, 614, 132 Cal. Rptr. 2d 198* **[*38]** ; *Abdallah v. United Savings Bank, supra, 43 Cal.App.4th at p. 1110*.)

XIII. *Unfair Competition Law Cause of Action*

In Cardoni's third amended complaint, he alleged Wells Fargo violated the UCL, in part by breaching the HAMP loan agreement, engaging in a "sham modification program" in which it informed persons with loans that they needed to default before they could get any loan modification assistance, and failing "to comply with consumer statutory protections under [*Civil Code sections] 2924 et seq.*, *2923.5*, *2923.6*, *2932.5*, *2934a* and *2936*, as well as [*Commercial Code sections] 3301-3312*, among other laws." (Italics omitted.) Cardoni also alleged respondents engaged in various other unlawful or unfair activities. Specifically, "executing and recording false and misleading

[4] *Code of Civil Procedure section 472c, subdivision (a)* states: "When any court makes an order sustaining a demurrer without leave to amend the question as to whether or not such court abused its discretion in making such an order is open on appeal even though no request to amend such pleading was made."

documents"; "acting as beneficiaries without the legal authority to do so"; "acting as trustee without the legal authority to do so"; "engaging in fraud, malfeasance, and perjury by utilizing an assignment of deeds of trust and other documents with forged signatures"; "improperly characterizing customers' accounts as being in default or delinquent to generate excessive and unwarranted payments and fees"; "instituting improper or unauthorized or unlawful foreclosure proceedings to generate unwarranted excessive payments and fees"; "misapplying or failing to apply customer payments"; **[*39]** "seeking to collect, and collecting, various improper fees, costs, and charges that are either not legally due under the mortgage contract or California law, or that are in excess of amounts legally due"; "mishandling borrower's loan payments and failing to timely or properly credit payments received, resulting in late charges, delinquencies, or default;" "treating borrower as in default on their loans even though the borrower have [*sic*] tendered timely and sufficient payments or have otherwise complied with mortgage payment requirements or California law." (Some capitalization omitted.)

In order to state a claim for a violation of the UCL, Cardoni must allege that respondents committed a business act or practice that is fraudulent, unlawful, or unfair. (See *Buller v. Sutter Health (2008) 160 Cal.App.4th 981, 986, 74 Cal. Rptr. 3d 47*.) A claim made under *Business and Professions Code section 17200* "'is not confined to anticompetitive business practices, but is also directed toward the public's right to protection from fraud, deceit, and unlawful conduct. [Citation.] Thus, California courts have consistently interpreted the language of [*Business and Professions Code] section 17200* broadly.'" (*South Bay Chevrolet v. General Motors Acceptance Corp. (1999) 72 Cal.App.4th 861, 877, 85 Cal. Rptr. 2d 301*.)

When a plaintiff predicates a claim of an unfair act or practice on public policy, it is not sufficient to merely allege the act violates public policy **[*40]** or is immoral, unethical, oppressive or unscrupulous. (*Durell v. Sharp Healthcare (2010) 183 Cal.App.4th 1350, 1365, 108 Cal. Rptr. 3d 682*.) This court has held on numerous occasions that to establish a practice is "unfair," a plaintiff must prove the defendant's "conduct is tethered to an[] underlying constitutional, statutory or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***." (*Id., at p. 1366*; *Levine v. Blue Shield of California (2010) 189 Cal.App.4th 1117, 1137, 117 Cal. Rptr. 3d 262*; *Scripps Clinic v. Superior Court (2003) 108 Cal.App.4th 917, 940, 134 Cal. Rptr. 2d 101*; *Byars v. SCME Mortgage Bankers, Inc. (2003) 109 Cal.App.4th 1134, 1147, 135 Cal. Rptr. 2d 796*.)

A.

In the first amended complaint, Cardoni alleged respondents had failed to contact him before the foreclosure as required by *Civil Code section 2923.5*, which states that a mortgagee or beneficiary may not record a notice of default until it (1) has contacted the borrower in person or by telephone to assess the borrower's financial situation and to explore options for the borrower to avoid foreclosure, or (2) has diligently tried to make such contact. (*Civ. Code, § 2923.5, subds. (a)(1)(A)*, *(2)* & *(e)*.)

However, elsewhere in that pleading, Cardoni alleged that Wells Fargo contacted him on August 18, 2009, after Cardoni's income fell significantly in 2008 and during the time he was seeking a HAMP loan modification. The timeline shows that the first notice of default was rescinded in June 2010. The second notice of default was not recorded until January 2011. **[*41]** Therefore, by Cardoni's own allegations, Wells Fargo in 2008 explained loan modification to him and gave him an opportunity to avoid foreclosure. Cardoni has not set forth facts to support his claim Wells Fargo violated *Civil Code section 2923.5*.

We also note that *Civil Code section 2923.5* provides Cardoni no relief at this late juncture: "There is nothing in [*Civil Code] section 2923.5* that even hints that noncompliance with the statute would cause any cloud on title after an otherwise properly conducted foreclosure sale. We would merely note that under the plain language of [*Civil Code] section 2923.5*, read in conjunction with [*Civil Code] section 2924g*, the *only* remedy provided is a postponement of the sale before it happens." (*Mabry v. Superior Court (2010) 185 Cal.App.4th 208, 235, 110 Cal. Rptr. 3d 201*.) Based on these considerations, we conclude Cardoni did not allege facts to state a cause of action under *Civil Code section 2923.5*, and therefore the court did not err in dismissing this cause of action without leave to amend.

Cardoni alleged in the first amended complaint that "First American was the true and rightful beneficiary, not the imposter beneficiary NDEx." He alleged that First American failed to comply with certain notice requirements contained in *Civil Code section 2924* before foreclosing on his property. We note that by its terms, this allegation does not apply to Wells Fargo or Provident. In any event, there was **[*42]** no statutory violation.

Civil Code sections 2924 through 2924k set forth a comprehensive framework for the regulation of nonjudicial foreclosure sales pursuant to a power of sale contained in a deed of trust. (See *Jenkins, supra, 216 Cal.App.4th at p. 508*.) *Civil Code section 2924* requires, inter alia, that the power of sale in a deed of trust "shall not be exercised" until a notice of default is recorded including "[a] statement that a breach of the obligation for which the mortgage or transfer in trust is security has occurred." (*Civ. Code, § 2924, subd. (a)(1)(B)*.) Here, the judicially noticed documents indicate that a notice of default was recorded with the accompanying statement. (*Jenkins, at p. 536* [judicial notice of fact or proposition within a recorded document that cannot reasonably be controverted].)

We conclude the trial court properly sustained the demurrer to this cause of action without leave to amend. *Civil Code section 2924, subdivision (a)(1)*—stating that a trustee, mortgagee, or beneficiary, or an agent of any of them, may initiate foreclosure—does not include a requirement that an agent demonstrate authorization by its principal. (*Fontenot, supra, 198 Cal.App.4th at p. 268*.)

Under *Civil Code section 2932.5*, where a power of sale for real property is given to a mortgagee or other encumbrancer to secure an obligation, such power of sale may be exercised by the assignee who is entitled to receive payment of the obligation **[*43]** "if the assignment is duly acknowledged and recorded." If the assignment has not been recorded, then the power cannot be exercised.

Civil Code section 2932.5 applies to mortgages in which the mortgagor or borrower has granted a power of sale to the mortgagee or lender. (*Herrera v. Federal Nat. Mortg. Assn. (2012) 205 Cal.App.4th 1495, 1509, 141 Cal. Rptr. 3d 326*.) It is well established that *Civil Code section 2932.5* does not apply to trust deeds, in which the power of sale is granted to a third party, the trustee. (*Calvo v. HSBC Bank USA, N.A., (2011) 199 Cal.App.4th 118, 123, 130 Cal. Rptr. 3d 815*.) This case involves a deed of trust; therefore, *Civil Code section 2932.5* does not apply and the court did not err in sustaining respondents' demurrer on this cause of action.

Cardoni alleged in his first amended complaint that "the new trustee NDEx . . . was not granted and did not succeed to the powers of the original trustee First American Loanstar," and thus NDEx did not have the authority to sell the property and initiate foreclosure proceedings.

Civil Code section 2934a provides that a trustee named in a recorded substitution of trustee is "deemed to be authorized to act as the trustee under the mortgage or deed of trust for all purposes from the date the substitution is executed by the mortgagee, beneficiaries, or by their authorized agents. . . . Once recorded, the substitution shall constitute conclusive evidence of the authority of the substituted trustee **[*44]** or his or her agents to act pursuant to this section." (*Civ. Code, § 2934a, subd. (d)*.) "That statute also provides a substituted trustee may record a notice of default *before* the substitution empowering the trustee to act is recorded," as long as notice of substitution is mailed to the appropriate parties in the manner provided in *Civil Code section 2924b* and an affidavit of mailing is attached. (*Rossberg v. Bank of America, N.A. (2013) 219 Cal.App.4th 1481, 1495, 162 Cal. Rptr. 3d 525*; *Civ. Code, § 2934a, subd. (b)*.) The judicially noticed documents in the record make clear that the process by which NDEx was substituted as trustee and recorded the notice of default was lawful. Therefore, Cardoni cannot base a UCL claim on a supposed violation of *Civil Code section 2934a*.

Civil Code section 2936 states: "The assignment of a debt secured by mortgage carries with it the security." This statute merely enunciates a legal principle. Cardoni does not explain how this statute was violated, and we find no basis for concluding that it supports a UCL claim.

B.

Wells Fargo argued in the trial court, and again on appeal, that some of Cardoni's allegations were a sham and made to assert improper claims. We agree, concluding Cardoni is bound by the contentions in his first amended complaint.

"'Generally, after an amended pleading has been filed, courts will disregard the original pleading. [Citation.] [¶] However, **[*45]** an exception to this rule is found . . . where an amended complaint attempts to avoid defects set forth in a prior complaint by ignoring them. The court may examine the prior complaint to ascertain whether the amended complaint is merely a sham.' [Citation.] . . . Moreover, any inconsistencies with prior pleadings must be explained; if the pleader fails to do so, the court may disregard the inconsistent allegations. [Citation.] Accordingly, a court is 'not bound to accept as true allegations contrary to factual allegations in former pleading in the same case.'" (*Vallejo Development Co. v. Beck Development Co. (1994) 24 Cal.App.4th 929, 946, 29 Cal. Rptr. 2d 669* (*Vallejo Development*); *State of California ex rel. Metz v. CCC Information Services, Inc. (2007) 149 Cal.App.4th 402, 412, 57 Cal. Rptr. 3d 156* ["'[U]nder the sham pleading doctrine, plaintiffs are precluded from amending complaints to omit harmful allegations, without explanation, from previous complaints to avoid attacks raised in demurrers or motions for summary judgment.'"].)

""'The principle is that of *truthful pleading*.'" [Citation.] When the plaintiff pleads inconsistently *in separate actions*, the plaintiff's complaint is nothing more than a sham that seeks to avoid the effect of a demurrer. [Citations.] Under such circumstances, the court will disregard the falsely pleaded facts and affirm the demurrer." (*Cantu v. Resolution Trust Corp. (1992) 4 Cal.App.4th 857, 877-878, 6 Cal. Rptr. 2d 151*.)

"The sham pleading doctrine is not **[*46]** 'intended to prevent honest complainants from correcting erroneous allegations . . . or to prevent correction of ambiguous facts.' [Citation.] Instead, it is intended to enable courts 'to prevent an abuse of process.'" (*Deveny v. Entropin, Inc. (2006) 139 Cal.App.4th 408, 42 Cal. Rptr. 3d 807*.) Plaintiffs therefore may avoid the effect of the sham pleading doctrine by alleging an explanation for the conflicts between the pleadings. (*Vallejo Development, supra, 24 Cal.App.4th at p. 946*.)

Cardoni alleged in his first amended complaint: "On August 18, 2009, Wells [Fargo] informed [him] that he was eligible for the [HAMP] and offered [him] a HAMP loan modification agreement which [he] promptly notarized, executed, and completed the automatic qualifying terms. [He] proceeded to tender his monthly mortgage payments, in the correct amount, for the next five . . . months." Cardoni further alleged that after he had satisfied the TPP requirements, Wells Fargo breached the contract by rescinding the permanent loan modification agreement.

By contrast, in the third amended complaint, Cardoni alleged for the first time: "Wells Fargo informed [him] that he could only get help if he missed three payments and fell into default. [He] indicated that he did not want to miss three payments, or to fall into default. Nevertheless, **[*47]** Wells Fargo indicated, consistently, that [he] must be in default or Wells Fargo was unable to help [him]." Cardoni elaborates on this allegation, referring to it as "an unfair and predatory business practice" and explaining he "gave consideration to Wells Fargo, to wit, including (among others) the destruction of [his] credit, and the exposure of his family and the subject property to the woes of potential foreclosure, all in reliance upon, and in exchange for, Wells Fargo's assurances that [he] would and did qualify for loan modification, and (at bare minimum) Wells [Fargo's] assurances that it would act in good faith in processing [his] application(s) for loan modification assistance, through HAMP or otherwise." (Some italics and capitalization omitted.)

Cardoni contends in his reply brief that he did not engage in sham pleadings, but rather, he "continues to assert the same allegations against respondents. [His] complaints do not omit harmful allegations from previous complaints, quite the opposite, [his] amendments continue to add more and more-harmful allegations against respondents each time." (Some capitalization omitted.)

The difference between Cardoni's pleadings is that the **[*48]** third amended complaint alleges a material difference, namely that Wells Fargo purportedly required Cardoni to default on his loan for three months before he would be eligible for a loan modification. This allegation is inconsistent with Cardoni's earlier pleading in which Wells Fargo was alleged to have unconditionally informed him he was eligible. Therefore, we disregard this allegation in the third amended complaint as sham.

As to Cardoni's remaining allegations regarding UCL violations, we conclude they fail to support a UCL cause of action either because they are encompassed by our analysis of the breach of contract cause of action or another cause of action addressed herein, or we do not consider them because they are not properly pleaded, but instead they are "contentions, deductions or conclusions of fact or law." (*Adelman v. Associated Internat. Ins. Co. (2001) 90 Cal.App.4th 352, 359, 108 Cal. Rptr. 2d 788*.)

XIV. *Negligence/Negligent Misrepresentation*

Relying on *Jolley v. Chase Home Finance, LLC (2013) 213 Cal.App.4th 872, 153 Cal. Rptr. 3d 546* (*Jolley*), Cardoni urges us to hold he has stated a cause of action for negligence, and that Wells Fargo owed him a duty of care not to make misrepresentations to him regarding the status of his loan modification.[5]

"The elements of negligent misrepresentation are (1) the misrepresentation of a past or existing material fact, (2) without reasonable ground for believing it to be true, (3) with intent to induce another's reliance on the fact misrepresented, (4) justifiable reliance on the misrepresentation, and (5) resulting damage. [Citation.] In contrast to fraud, negligent misrepresentation does not require knowledge of falsity. A defendant who makes false statements '"honestly believing that they are true, but without reasonable ground for such belief, . . . may be liable for negligent misrepresentation . . . . " [Citations.]' [Citation.] However, a positive assertion is required; an omission or an implied assertion or representation is not sufficient." (*Apollo Capital Fund LLC v. Roth Capital Partners, LLC (2007) 158 Cal.App.4th 226, 243, 70 Cal. Rptr. 3d 199*.)

"The existence of a duty of care owed by a defendant to a plaintiff is a prerequisite **[*52]** to establishing a claim for negligence." (*Nymark, supra, 231 Cal.App.3d at p. 1095*.) Whether a duty to use due care exists in a particular case is a question of law to be resolved by the court. (*Quelimane Co. v. Stewart Title Guaranty Co. (1988) 19 Cal.4th 26, 57-58, 77 Cal. Rptr. 2d 709, 960 P.2d 513*.)

---

[5] *Jolley* was decided in the context of a motion for summary judgment brought by JP Morgan Chase (Chase), **[*49]** which had assumed the assets of its predecessor, Washington Mutual Bank (WaMu). (*Jolley, supra, 213 Cal.App.4th at pp. 877-878*.) There, the plaintiff and WaMu had entered into a construction loan, which WaMu agreed to modify in 2006 to permit the plaintiff to complete construction. (*Id. at pp. 877-879*.) The plaintiff alleged that before the modification, WaMu made false representations about certain matters, and that there were irregularities in the loan disbursements, causing construction delays. (*Id. at p. 878*.) After Chase purchased WaMu's assets, the plaintiff continued to deal with the same people in the construction loan department and sought another loan modification. (*Id. at p. 880*.) He also dealt with a Chase employee who told him there was a '"high probability"' Chase would be able to modify the loan so as to avoid the foreclosure, the '"likelihood was good"', and that it was likely when construction was complete he could roll the construction loan into a fully amortized conventional loan. (*Id. at p. 881*.) According to plaintiff, he was induced by these representations to borrow heavily to finish the project, and he claimed construction delays during the loan modification negotiations prevented him from selling the property before the housing market collapsed. **[*50]** (*Ibid.*)

Rather than agree to a loan modification, Chase demanded payment in full and its trustee recorded a notice of default and then a notice of sale. (*Jolley, supra, 213 Cal.App.4th at p. 881*.) Plaintiff filed suit two days before the foreclosure sale, alleging causes of action for fraud, negligent misrepresentation, breach of contract/promissory estoppel, negligence, violation of the UCL, declaratory relief, accounting and reformation. (*Ibid.*) He also obtained a temporary restraining order prohibiting Chase from proceeding with the trustee's sale. (*Ibid.*)

The trial court granted Chase's ensuing motion for summary judgment on various grounds, including that Chase, a lender, did not owe the plaintiff a duty of care. (*Jolley, supra, 213 Cal.App.4th at pp. 884-885*.) The appellate court reversed, however, as to the causes of action for fraud, breach of contract/promissory estoppel, negligence, violation of the UCL, and reformation. (*Id. at pp. 893-908*.) In reversing summary judgment on the plaintiff's UCL cause of action, the Court of Appeal focused in part on allegations indicating Chase had subjected the plaintiff to dual tracking, the "common bank tactic" whereby the lender pursues foreclosure at the same time it engages in loan modification negotiations. (*Id. at pp. 901, 904*.) The court observed that **[*51]** the California Legislature made dual tracking illegal effective January 1, 2018. (*Id. at pp. 904-905*.) Though it acknowledged the law did not apply and dual tracking was not forbidden by statute at the time, the appellate court nevertheless held "the new legislation and its legislative history may still contribute to its being considered 'unfair' for purposes of the UCL." (*Id. at pp. 907-908*.)

We decline to impose a duty of due care on Wells Fargo in handling Cardoni's loan modification. (See *Wagner v. Benson (1980) 101 Cal.App.3d 27, 34-35, 161 Cal. Rptr. 516* [lender's liability to a borrower for negligence arises only when the lender "'actively participates' in the financed enterprise 'beyond the domain of the usual money lender'"]; *Ragland v. U.S. Bank Nat. Assn. (2012) 209 Cal.App.4th 182, 206, 147 Cal. Rptr. 3d 41* ["No fiduciary duty exists between a borrower and lender in an arm's length transaction"].) And we agree with federal district courts that have held that "offering loan modifications is sufficiently entwined with money lending so as to be considered within the scope of typical money lending activities. If money lending institutions were held to a higher standard of care by offering a service that could benefit borrowers whose circumstances have changed, the money lender would be discouraged from leniency and would assert their rights to reclaim the property upon the borrower's default. The conventional-moneylender test shall be sufficient to determine that there is no duty of care owed in servicing Plaintiff's mortgage loan and loan modification. As the **[*53]** Plaintiff is unable to establish a duty, it is unnecessary to discuss the elements of breach, causation, and damages." (*Alvarado v. Aurora Loan Services, LLC (C.D. Cal., Sept. 20, 2012, No. SACV 12-0524-DOC-(JPRx)) 2012 U.S. Dist. LEXIS 135637, 2012 WL 4475330 *6*; see also *Juarez v. Suntrust Mortgage, Inc. (E.D. Cal., May 13, 2013, No. CV F 13-0485 LJO SAB) 2013 U.S. Dist. LEXIS 67850, 2013 WL 1983111*.)

At oral argument, Cardoni also relied on *Alvarez v. BAC Home Loans Servicing, LP (2014) 228 Cal.App.4th 941, 176 Cal. Rptr. 3d 304* (*Alvarez*), which held that the defendant lenders "owed [plaintiffs] a duty to exercise reasonable care in the review of their loan modification applications once they had agreed to consider them." (*Id. at pp. 944-945*.) In *Alvarez*, the plaintiffs alleged that defendants breached this duty by (1) failing to consider their application in a timely manner, (2) foreclosing while plaintiffs were under consideration for a modification, and (3) mishandling their application by relying on incorrect salary information and apparently misplacing application documents. (*Ibid.*) The *Alvarez* court reaffirmed that "As a general rule, a financial institution owes no duty of care to a borrower when the institution's involvement in the loan transaction does not exceed the scope of its conventional role as a mere lender of money." (*Id. at p. 945*.) Nonetheless, the court held that on the facts of that case, **[*54]** the lender owed the borrower a duty of care. (*Id. at p. 949*.)

The *Alvarez* court also noted that the plaintiff's allegation in the complaint that defendants engaged in "dual tracking," a practice now prohibited by *Civil Code sections 2923.6*, and *2924.18*, increased the defendants' blameworthiness. The court added: "Much of the conduct that plaintiffs allege breached a duty of care in this case—failing to process the applications in a timely manner, dual tracking and losing documents—is conduct now regulated by the [*Home Owner's Bill of Rights*]. While the explicit articulation of the lender's duties was not available when plaintiffs applied for loan modification, these obligations fall well within the duty to use reasonable care in the processing of a loan modification. Recognizing this general duty will not place an undue burden on mortgage banks and servicers, nor will it have a chilling effect on borrowers' ability to obtain loan modifications." (*Alvarez, supra, 228 Cal.App.4th at p. 951*.)

Here, Cardoni's negligence claim in his first amended complaint is focused on his claim that respondents "owed [him] a duty of care to reasonably investigate whether statutory notice requirements were met before proceeding to auction the property and to comply with [*Civil Code sections] 2923.5*, *2932.5*, *2934*, *2934a*, and *2924 et seq.* [¶] . . . [Respondents] **[*55]** owed [him] and the public at large a duty of care to reasonably investigate the existence of any agreements, transactions, or conveyances concerning the property and thereby to not expose [him] to an unreasonable risk of harm, including deprivation of property." Cardoni alleged respondents conduct caused him harm: "As a direct and proximate result of [respondents'] failure to exercise reasonable care, [he] was placed in imminent peril as a foreclosure without any authority of law and without proper notice, completely void foreclosure proceedings, were instituted against [him.] [He] has suffered damages in an amount to be proved at trial, including reasonable attorneys' fees and costs. [He] has further suffered equitable harm for which legal damages are insufficient."

Having disposed of Cardoni's claims regarding alleged violations of the Civil Code sections, we further conclude Cardoni did not allege facts sufficient to distinguish Wells Fargo's conduct from "traditional money-lending activity," such as to impose a duty of care on Wells Fargo. Unlike in *Alvarez, supra, 228 Cal.App.4th 941*, Cardoni did not allege Wells Fargo engaged in dual tracking. Rather, as noted, the complaint established that Wells Fargo agreed **[*56]** to a loan modification, which Cardoni accepted. It was Cardoni who subsequently elected to stop payments on his mortgage. Accordingly, the trial court did not err in dismissing Cardoni's negligence claim.

DISPOSITION

The judgment is affirmed.

Dearman, Robbins Geller Rudman & Dowd LLP (FL), Boca Raton, FL; Patrick Joseph Coughlin, Robbins Geller Rudman & Dowd LLP, San Diego, CA; Paul Jeffrey Geller, Robbins Geller Rudman & Dowd LLP, Boca Raton, FL; Robert M. Rothman, Samuel Howard Rudman, Robbins Geller Rudman & Dowd LLP(LI), Melville, **[**3]** NY.

For Claridge Products and Equipment, Incorporated, individually and on behalf of all others similarly situated, Plaintiff: Edith M. Kallas, Whatley Kallas LLP(NYC), New York, NY; Joe R. Whatley, JR., Whatley, Drake & Kallas, LLC (NYC), New York, NY; John G. Emerson, Jr., PRO HAC VICE, Emerson Poynter LLP, Houston, TX; William T. Crowder, PRO HAC VICE, Emerson Poynter LLP, Little Rock, AR; Christopher Lovell, Lovell Stewart Halebian Jacobson LLP, New York, NY.

For Thule, Inc., individually and on behalf of all others similarly situated, Plaintiff: Bonny E. Sweeney, Carmen A. Medici, David W. Mitchell, PRO HAC VICE, Robbins Geller Rudman & Dowd LLP (SANDIEGO), San Diego, CA; Mark J. Dearman, Robbins Geller Rudman & Dowd LLP (FL), Boca Raton, FL; Patrick Joseph Coughlin, Robbins Geller Rudman & Dowd LLP, San Diego, CA; Paul Jeffrey Geller, Robbins Geller Rudman & Dowd LLP, Boca Raton, FL; Randi Dawn Bandman, Robbins Geller Rudman & Dowd LLP (LA), Los Angeles, CA; Robert M. Rothman, Samuel Howard Rudman, Robbins Geller Rudman & Dowd LLP(LI), Melville, NY; Christopher Lovell, Lovell Stewart Halebian Jacobson LLP, New York, NY.

For Ampal Inc., Plaintiff: Linda P. Nussbaum, LEAD ATTORNEY, **[**4]** Peter Anthony Barile, III, Grant & Eisenhofer P.A. (NY), New York, NY; Benjamin Martin Jaccarino, Lovell Stewart Halebian Jacobson LLP, New York, NY; Christopher Lovell, Lovell Stewart Halebian Jacobson LLP, New York, NY; David P. Germaine, Vanek, Vickers & Masini, P.C., Chicago, IL; Dean M Harvey, Lin Y Chan, PRO HAC VICE, Lieff Cabraser Heimann & Bernstein, San Francisco, CA; Eric B. Fastiff, PRO HAC VICE, Lieff, Cabraser, Heimann & Bernstein, LLP, San Francisco, CA; Harold Z. Gurewitz, Gurewitz & Raben, PLC, Detroit, MI; John Paul Bjork, PRO HAC VICE, Vanek Vickers & Masini, Chicago, IL; John D. Radice, Grant & Eisenhofer, PA, New York, NY; Joseph M Vanek, Vanek, Vickers & Masini, P.C., Chicago, IL; Peter Anthony Barile, III, Grant & Eisenhofer P.A. (NY), New York, NY.

For Custom Aluminum Products Inc., Plaintiff: Linda P. Nussbaum, LEAD ATTORNEY, James Joseph Sabella, Peter Anthony Barile, III, Grant & Eisenhofer P.A. (NY), New York, NY; Benjamin Martin Jaccarino, Lovell Stewart Halebian Jacobson LLP, New York, NY; Christopher Lovell, Lovell Stewart Halebian Jacobson LLP, New York, NY; Craig M. Essenmacher, Lovell Stewart Halebian Jacobson LLP, Northville, MI; David P. Germaine, **[**5]** Joseph M Vanek, Vanek, Vickers & Masini, P.C., Chicago, IL; Harold Gurewitz, Gurewitz & Raben, PLC, Detroit, MI; John Paul Bjork, PRO HAC VICE, Chicago, IL; Joseph M Vanek, Vanek, Vickers & Masini, P.C., Chicago, IL.

For Extruded Aluminum Inc., Plaintiff: Linda P. Nussbaum, LEAD ATTORNEY, Grant & Eisenhofer P.A. (NY), New York, NY; Benjamin Martin Jaccarino, Lovell Stewart Halebian Jacobson LLP, New York, NY; Christopher Lovell, Lovell Stewart Halebian Jacobson LLP, New York, NY; David P. Germaine, Vanek, Vickers & Masini, P.C., Chicago, IL; James Joseph Sabella, Grant & Eisenhofer P.A. (NY), New York, NY; John Paul Bjork, PRO HAC VICE, Vanek Vickers & Masini, Chicago, IL; Joseph M Vanek, Vanek, Vickers & Masini PC, Chicago, IL; Peter Anthony Barile, III, Grant & Eisenhofer P.A. (NY), New York, NY.

For International Extrusions Inc., Plaintiff: Linda P. Nussbaum, LEAD ATTORNEY, Grant & Eisenhofer P.A. (NY), New York, NY; Benjamin Martin Jaccarino, Lovell Stewart Halebian Jacobson LLP, New York, NY; Christopher Lovell, Lovell Stewart Halebian Jacobson LLP, New York, NY; Craig M. Essenmacher, Lovell Stewart Halebian Jacobson LLP, Northville, MI; David P. Germaine, Vanek, Vickers & Masini, **[**6]** P.C., Chicago, IL; Harold Z. Gurewitz, Gurewitz & Raben, PLC, Detroit, MI; James Joseph Sabella, Grant & Eisenhofer P.A. (NY), New York, NY; John Paul Bjork, PRO HAC VICE, Vanek Vickers & Masini, Chicago, IL; Joseph M Vanek, Vanek, Vickers & Masini PC, Chicago, IL; Peter Anthony Barile, III, Grant & Eisenhofer P.A. (NY), New York, NY.

For Team Ward Inc., individually and on behalf of all others similarly situated doing business as War Eagel Boats, Plaintiff: Edward W. Ciolko, John Quinn Kerrigan, Joseph H. Meltzer, Kimberly A. Justice, Terrence Scott Ziegler, PRO HAC VICE, Kessler Topaz Meltzer & Check, LLP (PA), Radnor, PA.

For Pierce Aluminum Company, Inc., Individually and on Behalf of All Others Similarly Situated, Plaintiff: Bonny E. Sweeney, Robbins Geller Rudman & Dowd LLP, San Diego, CA; Carmen A. Medici, Robbins Geller Rudman & Dowd LLP (San Diego), San Diego, CA; David W. Mitchell, PRO HAC VICE, Robbins Geller Rudman & Dowd LLP, San Diego, CA; Mark J. Dearman, Robbins Geller Rudman & Dowd LLP (FL), Boca Raton, FL; Patrick Joseph Coughlin, Robbins Geller Rudman & Dowd LLP, San Diego, CA; Paul Jeffrey Geller, Robbins Geller Rudman & Dowd LLP, Boca Raton, FL; Robert M. Rothman, **[**7]** Robbins Geller Rudman & Dowd LLP(LI), Melville, NY; Samuel Howard Rudman, Robbins Geller Rudman & Dowd LLP(LI), Melville, NY; Theodore M. Hess-Mahan Hutchings, Barsamian, Cross and Mandelcorn, LLP, Wellesley Hills, MA.

For David J Kohlenberg, David J Kohlenberg: Brian R. Strange, Strange and Carpenter, Los Angeles, CA; Brian Russell Strange, Starfield & Payne, P.C., Fort Washington, PA; Craig E. Hilborn, Hilborn & Hilborn, Birmingham, MI; John Theodore Ceglia, Keith Lawrence Butler, Strange & Carpenter, Los Angeles, CA.

For Welk-Ko Fabricators, Inc., Plaintiff: Brendan H. Frey, David M. Honigman, Mantese Honigman Rossman & Williamson, P.C., Troy, MI; David F. Hansma, Mantese and Rossman, Troy, MI; Gerard V. Mantese, Mantese Assoc., Troy, MI; Jessica Ann Perez, PRO HAC VICE, Pendley, Baudin & Coffin, L.L.P., Plaquemine, LA; Joel Davidow, Kile Goekjian Reed & McManus Pllc, Washington, DC; Jonathan Watson Cuneo, Cuneo Gilbert & LaDuca, LLP, New York, NY; Katherine Van Dyck, Cuneo Gilbert & Laduca, LLP, Washington D.C., DC; Patrick Wayne Pendley, PRO HAC VICE, Pendley, Baudin & Coffin L.L.P., Plaquemine, LA; Yifei Li, Cuneo Gilbert & Laduca, LLP, Washington D.C., DC; Joseph H. Meltzer, Kessler **[**8]** Topaz Meltzer & Check, LLP (PA), Radnor, PA.

For Tyler Sales Inc., Doing Business as Norther Metals, Inc., Plaintiff: Brendan H. Frey, David M. Honigman, Mantese Honigman Rossman & Williamson, P.C., Troy, MI; David F. Hansma, Mantese and Rossman, Troy, MI; Gerard V. Mantese, Mantese Assoc., Troy, MI; Jessica Ann Perez, PRO HAC VICE, Pendley, Baudin & Coffin, L.L.P., Plaquemine, LA; Joel Davidow, Kile Goekjian Reed & McManus Pllc, Washington, DC; Jonathan Watson Cuneo, Cuneo Gilbert & LaDuca, LLP, New York, NY; Katherine Van Dyck, PRO HAC VICE, Cuneo Gilbert & Laduca, LLP, Washington D.C., DC; Patrick Wayne Pendley, PRO HAC VICE, Pendley, Baudin & Coffin L.L.P., Plaquemine, LA; Yifei Li, Cuneo Gilbert & Laduca, LLP, Washington D.C., DC.

For Quicksilver Welding Services, Inc., Lexington Homes, Inc., Breezin Metal Works, Inc., Plaintiff: Brendan H. Frey, David M. Honigman, Mantese Honigman Rossman & Williamson, P.C., Troy, MI; David F. Hansma, Mantese and Rossman, Troy, MI; Gerard V. Mantese, Mantese Assoc., Troy, MI; Jessica Ann Perez, PRO HAC VICE, Pendley, Baudin & Coffin, L.L.P., Plaquemine, LA; Joel Davidow, Kile Goekjian Reed & McManus Pllc, Washington, DC; Jonathan Watson Cuneo, **[**9]** Cuneo Gilbert & LaDuca, LLP, New York, NY; Katherine Van Dyck, Cuneo Gilbert & Laduca, LLP, Washington D.C., DC; Patrick Wayne Pendley, PRO HAC VICE, Pendley, Baudin & Coffin L.L.P., Plaquemine, LA; Yifei Li, Cuneo Gilbert & Laduca, LLP, Washington D.C., DC; Joseph H. Meltzer, Kessler Topaz Meltzer & Check, LLP (PA), Radnor, PA.

For Talan Products, Inc., Plaintiff: W. Joseph Bruckner, LEAD ATTORNEY, PRO HAC VICE, Lockridge, Grindal, Nauen & Holstein, P.L.L.P., Minneapolis, MN; Adam James Pessin, Fine, Kaplan and Black, R.P.C., Philadelphia, PA; Alyson L. Oliver, Rochester, MI; Daniel E. Gustafson, David A Goodwin, Gustafson Gluek PLLC, Minneapolis, MN; Dianne M. Nast, Roda & Nast, P.C., Lancaster, PA; Erin C Burns, PRO HAC VICE, RodaNast P.C., Lancaster, PA; Roberta D. For Glencore Ltd., Defendant: Chelsea Rebekah McLean, Jacques Semmelman, Curtis, Mallet-Prevost, Colt & Mosle LLP, New York, NY; Eliot Lauer, Curtis, **[**18]** Mallet-Prevost, Colt & Mosle, LLP(NYC), New York, NY.

Judges: KATHERINE B. FORREST, United States District Judge.

Opinion by: KATHERINE B. FORREST

Opinion

[*427] OPINION & ORDER

KATHERINE B. FORREST, District Judge:

In August 2013 plaintiffs filed the first of what would be a large number of lawsuits alleging anticompetitive conduct impacting aluminum pricing. (See, e.g., 14-cv-217 ECF No. 1.[1] Numerous actions were filed in various jurisdictions across the country and eventually brought together in this District pursuant to an order of the U.S. Judicial Panel on Multidistrict Litigation. (ECF No. 1.)

This Court dismissed an initial set of pleadings in August and September 2014. (ECF Nos. 571 ("1st MTD Op."), 583, 586.) Certain plaintiffs—indirect purchasers—were dismissed because it was impossible for them to establish antitrust standing. (See 1st MTD Op. at 33-50.) The remaining plaintiffs then filed amended and proposed amended pleadings. Four plaintiffs who are self-styled "Direct Purchaser Plaintiffs," to whom the Court has referred as the "First Level Purchasers" or "FLPs," **[**19]** filed the Third Amended Complaint (the "TAC"). (ECF No. 631 ex. A ("TAC").) The remaining plaintiffs, Agfa Corporation, Agfa Graphics, N.V. (collectively, "Agfa"), Mag Instrument, Inc. ("Mag"), and Eastman Kodak Company ("Kodak"), filed the Joint Amended Complaint (the "JAC").[2] (ECF No. 608 ("JAC").) All defendants moved to dismiss and opposed the amendments. (ECF Nos. 650, 652, 654, 657-59, 662.)

Two recent decisions of this Court granted the motions to dismiss of four foreign defendants[3] due to a lack of personal jurisdiction, and certain other defendants[4] whose only tie to the events at issue was alleged to be a corporate affiliation with another defendant. (ECF Nos. 728, 731.) Now pending before the Court are defendants' motions to dismiss the JAC (ECF No. 649, 654) and plaintiffs' motions for leave to amend their complaint (ECF Nos. 608, 631.) This Opinion & Order addresses claims against the following defendants: Goldman, Sachs & Co.; Goldman Sachs International; Metro International Trade Services LLC ("Metro"); J. Aron & Company ("J. Aron");

---

[1] Unless otherwise specified by reference to a specific docket number, all citations in parentheses refer to the main docket in this case, 13-md-2481.

[2] Plaintiffs filed the JAC and the TAC in connection with two consolidated motions to amend in support thereof. (ECF Nos. 608, 631.)

[3] The four foreign defendants were: LME Holdings Limited; Hong Kong Exchanges and Clearing Limited; Henry Bath & Son Ltd.; and Glencore plc. (ECF No. 578 at 2.)

[4] These other defendants were: The Goldman Sachs Group, Inc.; JPMorgan Chase & Co.; and Pacorini Metals AG. (ECF No. 579 at 6-7.)

Mitsi Holdings **[**20]** LLC ("Mitsi"); Burgess-Allen Partnership Ltd. ("BAP"); Robert Burgess-Allen; JPMorgan Securities plc; Henry Bath LLC; Glencore AG; Glencore Ltd.; and Pacorini Metals USA LLC ("Pacorini USA").[5]

Each defendant seeks its own dismissal as well as the dismissal of each claim against it, essentially for the same reasons **[*428]** as during the initial round of motions to dismiss. However, with the benefit of the limited discovery permitted by the Court since its initial decisions, plaintiffs have now added sufficient factual detail to their complaints and have sharpened their story and substantive claims to overcome these arguments, such that they have now stated a plausible claim under *§ 1 of the Sherman Act* (and certain related state law claims) against defendants. The *§ 2* monopoly claim asserted in the TAC remains legally deficient, as are certain of the TAC's *§ 1* and other state law claims.

Accordingly, **[**21]** for the reasons set forth below, defendants' motions to dismiss the JAC are DENIED and plaintiffs' motion for leave to amend the JAC is GRANTED; plaintiffs' motion for leave to amend the TAC is GRANTED IN PART and DENIED IN PART. In sum, no defendant who is the subject of this Opinion & Order is dismissed entirely; the Court does, however, dismiss certain claims, specifically the FLPs' claim under *§ 2* of the Sherman Act as well as the FLPs' random state law claims that do not substantively mirror its remaining claim under *§ 1* of the Sherman Act.

I. THE HEART OF PLAINTIFFS' ALLEGATIONS

Plaintiffs have spent thousands of pages assembling (or, trying out) various versions of claims that defendants have engaged in anticompetitive conduct. To put it in colloquial terms, they alleged they "smelled a rat" but could neither identify its whereabouts nor its destination. The cats prowled, seeking the hole from which the alleged rat emanated and into which it may have crept. The metaphorical cats have now pointed to a point of origin and destination. Whether there is in fact a rat at all, or whether any rodent has, could or would take up the position indicated remains a question for another day.

Needless **[**22]** to say, it should never take thousands of pages to state a claim. Were it not for the legal standards governing when enough is deemed enough (which allow for more than what this Court might otherwise be inclined to tolerate), the trees felled in an effort to state a claim might be leafing even now.

Plaintiffs' initial pleadings alleged a conspiracy by operators of warehouses approved by the London Metal Exchange ("LME")[6] to delay the loading out of aluminum stored in those warehouses. (See ECF Nos. 226, 271-72; 14-cv-6849 ECF No. 1.) According to the initial pleadings, these delays restrained the supply of aluminum, thereby increasing its price. Plaintiffs generally cast these allegations as a conspiracy to fix the price of aluminum—notwithstanding that defendants do not sell aluminum and could not, strictly speaking, fix its price. (See, e.g., ECF No. 226 ¶¶ 47, 117, 124; ECF No. 271 ¶¶ 90, 94; ECF No. 272 ¶¶ 48, 127, 134.) The FLPs (but not Mag, Agfa and Kodak) also alleged that certain defendants had together monopolized various markets. (ECF No. 271 ¶¶ 91, 335-41, 407-413.) These initial pleadings focused on the creation and maintenance of warehouse queues as **[*429]** the core of the allegedly **[**23]** unlawful conduct, but failed to adequately explain how and why the defendant financial institutions participated in or benefitted from the conduct. Even as to Metro, the primary alleged wrongdoer, the creation and maintenance of queues was painted in terms that were economically profit-maximizing. What warehouse, paid for a term of storage, would not want the longest legally permissible terms possible? For similar reasons, the inclusion of defendant warehouse companies which were not alleged to themselves have had queues was inadequately explained. How, indeed, would such a warehouse have benefitted from queues it did not have,

[5] See notes 6 & 11-14, infra.

[6] The TAC names the LME as a defendant. (TAC ¶¶ 74-75.) However, the Court dismissed the LME from this action without leave to replead in an Opinion & Order dated August 25, 2014. (ECF No. 564.) The TAC also names as defendants LME Holdings Ltd. ("LME Holdings") (TAC ¶¶ 74, 77) and Hong Kong Exchanges & Clearing Ltd. ("HKEx") (TAC ¶¶ 74, 78). On March 3, 2015, the Court denied **[**24]** plaintiffs' motions for leave to amend their complaints to the extent that they seek to join LME Holdings and HKEx as defendants. (ECF No. 728.) Accordingly, the LME, LME Holdings, and HKEx have all been dismissed from this action.

but which its competitors did? And what were the financial institutions doing in the case? How were they a part of the alleged conspiracy? Plaintiffs' theories left much to the imagination.

For a variety of reasons—including incomplete and implausible theories and a lack of relevant factual allegations—this Court dismissed all of plaintiffs' claims, but granted the FLPs, Mag, and Agfa[7] leave to seek to amend. (1st MTD Op.) Plaintiffs then filed motions presenting more factually detailed and substantively focused proposed pleadings, and Kodak filed its amended complaint as of right.

The FLPs have been particularly unclear as to what they want to allege. They alleged a set of theories in a short-lived proposed Second Amended Complaint (ECF No. 618 ex. 1), another set in the TAC, and yet another in a proposed Fourth Amended Complaint (the "FAC") (ECF Nos. 688, 690-91). This Court has noted the additional materials that the FLPs propose to include in the FAC; defendants have not yet had an opportunity to respond to this additional **[**25]** material, and accordingly, the Court here focuses on the TAC when evaluating the FLPs' claims.[8]

As explained above, Mag, Agfa, and Kodak have filed the JAC. The JAC, and the briefing in support of the JAC, does a far better job of articulating and supporting clear theories of anticompetitive conduct than the TAC. For this reason, the Court has used the JAC as its primary reference point for claims which overlap with those of the FLPs, though ultimately each complaint and all claims raised therein must rise or fall on their own merits. In large part—with the notable exception of the FLPs' monopolization claim under *§ 2* of the Sherman Act (and a couple of alternative versions of a Section 1 claim)—the JAC and the TAC both allege a singular core claim directed at the same conduct. In sum, the primary theories alleged in both the JAC and the TAC are now as follows:

Defendants consist of two groups: financial institutions with commodities trading arms that trade financial instruments (such as warrants) tied to physical metals, and operators of warehouses **[**26]** that store metals. Working together, these entities allegedly engaged in a conspiracy to increase the financial institutions' commodities trading profits and warehouse companies' revenues. This was effected—at least in part—by using the financial firms' ability to obtain, retain, and strategically settle aluminum warrants along with their affiliated warehouses' ability to store or agreeing to accommodate storage requests for aluminum. According to plaintiffs, the effect of these concerted actions was to raise the Platts Midwest Premium, which **[*430]** is commonly used as a component of the stated price in contracts for the purchase of aluminum. (See JAC ¶ 2; TAC ¶¶ 468, 471.) These claims are premised on a description of price setting as follows:

The spot metal price for physically delivered aluminum has two standardized components: the LME cash price[9] and a regional premium (for example, the Platts Midwest Premium). (JAC ¶ 118; TAC ¶ 176.) Together, these components are referred to as the "all-in" price for physical delivery of primary aluminum. (JAC ¶ 118; TAC ¶ 176.) The LME cash price is determined by daily open outcry by the marginal buyer and seller at a specific moment in time using standardized **[**27]** LME contracts covering spot material located in LME warehouses. (JAC ¶ 119.)[10]

---

[7] Kodak filed its complaint later than the other plaintiffs and was not included in this initial round of motion practice.

[8] The Court has considered whether these additional materials and allegations would alter its conclusions as to the claims it dismisses herein; they do not.

[9] The TAC at times refers to the LME cash price as the "LME Settlement Price." (See TAC ¶ 176.)

[10] Plaintiffs allege that the LME certifies a global network of more than 700 warehouses, with close to 200 located in the United States. (JAC ¶ 127; TAC ¶ 188.) Defendants Metro, Henry Bath LLC and Pacorini are alleged collectively to operate more than 75-80% of the LME certified warehouses in the United States and throughout the world. (JAC ¶ 127; TAC ¶ 188.) In the United States, LME warehouses are located in Detroit, Baltimore, Chicago, Los Angeles, Mobile, New Orleans, Owensboro, St. Louis, and Toledo. (JAC ¶ 130; TAC¶ 190.) Defendants Metro and Pacorini are alleged to have warehouses in Detroit; Henry Bath is not. (JAC ¶ 130; TAC ¶ 190(a).) LME warehouses are alleged to be a critical **[**29]** part of the supply chain for aluminum in the United States because, inter alia, it is only in such warehouses that LME warrants can be issued and cancelled. (JAC ¶ 131; TAC ¶ 194.) An LME warrant is a standardized document issued by a warehouse upon delivery of a lot of aluminum into that warehouse, and it indicates who has the right of possession of that particular lot of aluminum. (JAC ¶ 132; TAC ¶ 195.)

The LME thus provides for a price discovery mechanism for a standard aluminum contract throughout the world. (JAC ¶ 119; TAC ¶ 177.) The LME cash price is a global price, and does not include the costs of delivery from a seller to a purchaser. (JAC ¶ 119; TAC ¶ 177.) To cover the costs of delivery to a customer, contracts incorporate various regional premiums. (JAC ¶ 120; TAC ¶ 178.) The regional premiums are compiled based on reporting of the preponderance of physical transactions between buyers and sellers of spot aluminum on a given day for delivery to relevant geographic points. (JAC ¶ 120; TAC ¶ 178.) Thus the regional premiums reflect current offers for immediately available aluminum for delivery from producers, traders and holders of warehoused aluminum. (JAC ¶ 120.) These offers incorporate the fluctuating delivery, storage, finance and insurance costs incurred by these competing suppliers or aluminum. (JAC ¶ 120.) The regional premiums are published by private companies including Platts and Metal Bulletin. (JAC ¶ 120; TAC ¶ 178.) There are other premiums including the Rotterdam Premium and CIF Japan **[**28]** Premium. (JAC ¶ 122; TAC ¶ 185.) Because industrial contracts for physical delivery of aluminum express the price using the LME cash price, which is allegedly a global price, regional premiums tend to move up and down together. (JAC ¶ 123; TAC ¶ 186.) If they did not, multinational aluminum purchasers, traders, and arbitrageurs could exploit pricing differences among regional premiums. (JAC ¶ 123; TAC ¶ 186.)

The vast majority of primary aluminum is purchased by industrial users such as plaintiffs. (JAC ¶ 124; TAC ¶ 166.) Their purchases are made pursuant to long-term contracts which typically include annual supply arrangements. (JAC ¶ 124; TAC ¶ 166.) The JAC alleges that the aluminum purchased in this manner would not **[*431]** typically ever be stored in an LME warehouse, but its pricing would still incorporate the spot metal price, which is the LME cash price plus the regional premium. (JAC ¶ 125.) The JAC also alleges that the pricing of aluminum for long-term industrial contracts, such as those to which Mag, Agfa, and Kodak are parties, is dependent upon the supply and demand in the LME warehouse system and immediate availability of aluminum for delivery. (JAC ¶ 125.) Agfa and Kodak also allege **[**30]** that as a result of recent sharp increases in regional premiums, they have sought to procure aluminum from suppliers via contracts that do not incorporate regional premiums as a component of pricing, and these efforts have been unsuccessful. (JAC ¶ 126.)

Warrants for aluminum traded on the LME are standardized and freely tradable. (JAC ¶ 133; TAC ¶ 195.) When a warrant nears expiration, a forward contract or futures contract price is alleged to move into line with prices for the physical commodity—a phenomenon known as price convergence. (JAC ¶ 134; see TAC ¶ 195.)

Mag, Agfa, and Kodak allege that from 1989 to 2008-2009, the LME warehouses fulfilled their represented mission of serving as a price-neutral storage place of last resort. (JAC ¶ 135.) These warehouses held primary aluminum that was available on a commercial basis to industrial and other consumers as a source of supply and received primary aluminum from producers and others. (JAC ¶ 136.) Thereby, the LME forward contracts achieved price convergence. (JAC ¶ 137.) That is, the LME price was equal to, or as equal as practicable with, the price of physical aluminum. (JAC ¶ 137.) The ability of industrial and other consumers to **[**31]** take delivery of and acquire primary aluminum through the LME gave them a way to obtain the primary aluminum they needed without paying the Midwest Premium and tended to cause price convergence. (JAC ¶ 139.) An active market existed for the trading and swapping of warrants for LME aluminum—allowing for warrant holders to obtain warrants for physical aluminum at preferred warehouse locations. (JAC ¶ 139.) This further allowed customers to obtain aluminum without having to pay the Midwest Premium and without experiencing significant delays. (JAC ¶ 139.)

Plaintiffs allege that defendants' actions caused supplies of aluminum stored in U.S. LME warehouses to increase dramatically starting during the recession of 2008-2009. (JAC ¶¶ 146-47; TAC ¶ 232.) However, even though supplies were increasing, so too was the Midwest Premium. (JAC ¶ 148; see TAC ¶¶ 567.) This was, according to plaintiffs, due to artificiality created by defendants' delays in loading-out aluminum in the LME warehouses. (See JAC ¶ 154; TAC ¶ 467.)

Plaintiffs do not allege that defendants have fixed a particular spot price for aluminum—but rather that they have taken a variety of actions that have caused the Midwest Premium **[**32]** to increase. As cast, this conspiracy does not fit into a traditional horizontal or vertical schema. Rather, affiliated entities are alleged to have worked with each other and with other co-conspirators at multiple levels, resulting in overlapping and mutually reinforcing actions. The conspirators are not alleged all to have been equal participants, but all are alleged to have benefitted from participation. For instance, the Goldman Sachs entities[11] and Metro are alleged to have **[*432]** been at the true center of the conspiracy, but as currently cast, they either needed or accepted the participation of other, third parties.

The structure of the alleged conspiracy consists of matching corporate groupings. Each co-conspirator financial institution is alleged to have or have had its own affiliated warehouse company. For instance, the Goldman Sachs entities were affiliated with Metro, the JPMorgan entities[12] with Henry Bath LLC, and the Glencore entities[13] with Pacorini.[14] Thus, plaintiffs allege that the conspiracy was both horizontal **[*433]** and vertical: the financial institutions are alleged to have engaged in a horizontal conspiracy with each other, and the warehouses are similarly alleged to have engaged in a conspiracy with other warehouses. But the alleged conspiracy is not solely vertical or **[**34]** solely horizontal—each corporate group interacted at various levels with the other corporate groups. The financial institutions are also alleged to have engaged in a vertical conspiracy with unaffiliated warehouses (for example, Goldman Sachs is alleged to have been in a conspiracy with warehouse operators Henry Bath LLC and Pacorini, which are not its corporate affiliates). (See JAC ¶¶ 2-3; TAC ¶ 473.) JP Morgan is alleged to have conspired with Metro. And on.

---

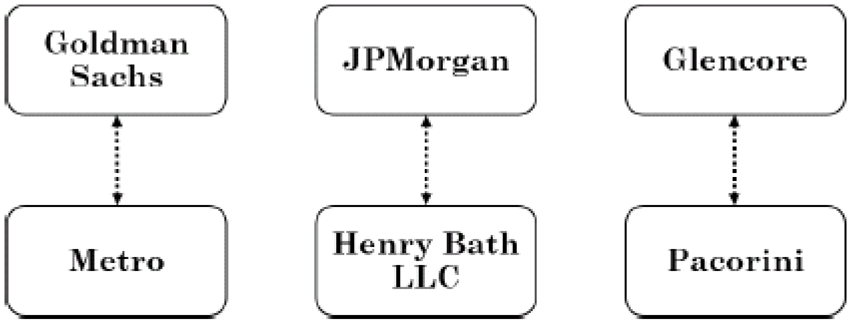
[11] The Goldman Sachs entities are the Goldman Sachs Group Inc. ("Goldman Sachs") and those entities affiliated with Goldman Sachs that are named as defendants in the JAC and/or TAC, which includes Goldman, Sachs & Co. (TAC ¶ 87), Goldman Sachs International (JAC ¶ 52; TAC ¶ 89), Metro (JAC ¶ 55; TAC ¶ 92), J. Aron (TAC ¶ 88), and Mitsi (TAC ¶ 93). The TAC also names as defendants alleged agents of Metro, BAP (TAC ¶ 88) and Robert Burgess-Allen (TAC ¶ 129). On August 29, 2014, the Court dismissed all claims against Goldman Sachs and all entities affiliated with Goldman Sachs that **[**33]** were named as defendants in plaintiffs' initial pleadings. (1st MTD Op.) On March 3, 2015, the Court granted Goldman Sachs' motion to dismiss and denied plaintiffs' motions for leave to amend their complaints to the extent that they seek to join Goldman Sachs as a defendant. (ECF Nos. 729, 731.) The following Goldman Sachs-related entities and agents have not to date been dismissed from this action (and remain in this action): Goldman, Sachs & Co.; Goldman Sachs International; Metro; J. Aron; Mitsi; BAP; and Burgess-Allen.

[12] The JPMorgan entities are JP Morgan Chase & Co. ("JPMorgan") and those entities affiliated with JPMorgan that are named as defendants in the JAC and/or TAC, which includes JPMorgan Securities plc (JAC ¶ 58; TAC ¶ 97), Henry Bath & Son Ltd. (JAC ¶ 61; TAC ¶ 100), and Henry Bath LLC (JAC ¶ 68; TAC ¶ 107). On August 29, 2014, the Court dismissed all claims against JPMorgan and all entities affiliated with JPMorgan that were named as defendants in plaintiffs' initial pleadings. (1st MTD Op.) On March 3, 2015, the Court granted Henry Bath & Son Ltd.'s motion to dismiss the JAC and denied plaintiffs' motions for leave to amend their complaints to the extent that they seek to add Henry Bath & Son Ltd. as a defendant. (ECF No. 728.) **[**35]** On March 4, 2015, the Court denied plaintiffs' motions for leave to amend their complaints to the extent that they seek to join JPMorgan as a defendant, and granted Henry Bath & Son Ltd.'s motion to dismiss the JAC. (ECF Nos. 729, 731.) The following JPMorgan entities have not to date been dismissed from this action (and remain in this action): JPMorgan Securities plc and Henry Bath LLC.

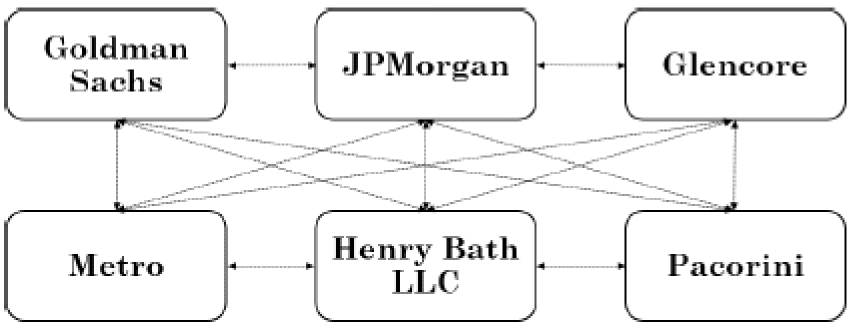
[13] The Glencore entities are Glencore plc ("Glencore") and those entities affiliated with Glencore that are named as defendants in the JAC and/or TAC, which includes Glencore International AG (TAC ¶¶ 110, 115), Glencore AG (TAC ¶¶ 110, 116), Glencore, UK Ltd. (TAC ¶¶ 110, 119), and Glencore Ltd. (JAC ¶ 77; TAC ¶¶ 110, 121). On August 29, 2014, the Court dismissed all claims against Glencore and all entities affiliated with Glencore that were named as defendants in plaintiffs' initial pleadings. (1st MTD Op.) On March 3, 2015, the Court granted denied plaintiffs' motions for leave to amend their complaints to the extent that they seek to join Glencore as a defendant. (ECF No. 728.) On March 4, 2015, the Court denied the FLPs' motion for leave to amend their complaints to the extent that they seek to join **[**36]** Glencore International AG and Glencore UK Ltd. as defendants. (ECF Nos. 729, 731.) The following Glencore entities have not to date been dismissed from this action (and remain in this action): Glencore AG and Glencore Ltd.

[14] Pacorini consists of the following two entities, which have been named as defendants in both the JAC and the TAC: Pacorini USA (JAC ¶ 78; TAC ¶¶ 110, 122) and its corporate parent Pacorini Metals AG (JAC ¶ 79; TAC ¶¶ 110, 123). Pacorini USA is alleged to own and operate LME-certified warehouses in the United States. (JAC ¶ 78; TAC ¶ 122.) In the TAC, plaintiffs group "Glencore," Pacorini Metals USA LLC, Pacorini Metals AG, and non-defendant Pacorini BV into the single collective term "Pacorini." (TAC ¶ 125.) On March 4, 2015, the Court denied plaintiffs' motions for leave to amend their complaints to the extent they seek to join Pacorini Metals AG as a defendant. (ECF No. 729.) Pacorini USA has not to date been dismissed from this action (and remains in this action).

Schematically, the players in the conspiracy are alleged to be:



The alleged conspiracy includes interconnections between these entities, resulting in a webbed structure:



Plaintiffs allege that the co-conspirators **[**37]** worked with each other to restrain a very specific piece of the aluminum supply comprising only a small portion of the total amount of available physical aluminum: aluminum traded by way of LME warrants. The trading of LME aluminum warrants is associated with establishing the Midwest Premium, which, as previously explained, plays a role in price-setting for physical aluminum contracts. This restraint is alleged to have led to increases in the spot price of physically delivered aluminum by way of increasing the Midwest Premium associated with an input into that price. (JAC ¶¶ 2-5; see TAC ¶¶ 461-627.) They **[*434]** allegedly did this by gaming the LME commodities trading system associated with the Midwest Premium. (JAC ¶ 3; TAC ¶¶ 532-49.) The key was that aluminum stored in LME-approved warehouses plays a unique role in setting the Midwest Premium. (JAC ¶ 2; TAC ¶ 5.) In a nutshell, the longer aluminum is stored in these LME warehouses, the higher the Midwest Premium. (See JAC ¶ 2; TAC ¶¶ 9(E), 10(e), 12.) As certain pricing of physical aluminum is contractually tied to the Midwest Premium. Plaintiffs allege that as a result, the higher the Midwest Premium, the higher the contract price.

As **[**38]** cast, (and despite loose language to the contrary,) this conspiracy was not a traditional "price fix"—no price was fixed. Instead, the conspiracy involved complicated interactions between participants who are alleged to have gained benefits primarily from trading activity. That defendants obtained increased warehouse rental revenues as a result of their conspiratorial acts was a necessary outcome, but not a key driver of defendants' behavior.

The conspiracy is alleged to have coalesced in 2010 and 2011. Plaintiffs allege that defendants used specific aspects of both their commodities trading and warehouse operations. First, each of the financial institutions acquired LME-approved warehouses in or around 2010. Then, the financial institutions worked with their affiliated warehouses to insure that stocks of aluminum were obtained and maintained at unusually high levels. This was done by (1) slowing the pace of load-outs of aluminum from warehouses, which was achieved by using the 1500-metric ton daily requirement for load-outs set by the LME as a de facto maximum for each warehouse owner (versus each warehouse), and not loading out more than that; (2) increasing the amount of aluminum **[**39]** stored in their warehouses by offering producers of aluminum (such as Alcoa) financial incentives to store with them; and (3) entering into agreements with each other and third parties to shuffle aluminum around so as to meet the 1500-

metric ton daily load-out requirement but without any other legitimate business purpose. (JAC ¶¶ 5, 10, 210-12, 246; TAC ¶¶ 467-68; 523-25, 559.)

The financial institutions' commodities trading arms allegedly assisted in the stockpiling by (1) obtaining large numbers of aluminum warrants on behalf of themselves or on behalf of clients; (2) strategically cancelling warrants and working with third parties to cancel warrants, for the purpose of putting the aluminum associated with cancelled warrants into the load-out queues, thereby delaying load-outs of aluminum legitimately seeking to exit the warehouses; and (3) lobbying and pressuring the LME not to alter its rules regarding required load-out amounts. (See JAC ¶¶ 11-15, 252-53; TAC ¶¶ 10, 360, 363, 468.)

As currently cast, the proposed complaints (particularly the JAC) now shed light on how and why the warehouse companies without queues in Detroit (specifically, Henry Bath LLC and Pacorini) can be part **[**40]** of a conspiracy that allegedly requires queues to succeed. Plaintiffs now allege, based on a number of emails and documents, that the conspiracy relied on give-and-take between the trading arms of several financial institutions and their affiliated warehouse companies in different parts of the country (and, as alleged in the TAC, around the world). Plaintiffs theorize that to drive trading profits, the various conspirators played different roles in different places to obtain what were perhaps different advantages. In short, they were not all doing the same thing but were united in obtaining benefits from their combined endeavors. Thus, while Pacorini and Henry Bath did not have warehouses **[*435]** with queues in the Detroit area, they (or their trading affiliates) are alleged to have assisted Metro in other ways; and the trading arms did likewise. (See, e.g., JAC ¶¶ 60, 160, 179, 197, 205-06; TAC ¶¶ 99, 473, 492, 510, 518-19.) For instance, Metro is alleged to have discussed an arrangement to "lock" Mobile and Long Beach with JPMorgan, with the anticipated result of higher premiums. (JAC ¶ 207; TAC ¶ 520.) JPMorgan is also alleged to have stored aluminum with Metro when to do so was contrary **[**41]** to its economic self-interest. (JAC ¶¶ 208, 221-22, 226; TAC ¶¶ 521, 534-35, 539.) In August 2011, Metro is alleged to have discussed a large warrant cancellation with JPMorgan and Henry Bath. (JAC ¶ 229; TAC ¶ 542; see also JAC ¶ 230; TAC ¶ 543.) In October 2011, Metro discussed with Goldman personnel giving all or substantially all of its aluminum stored in Mobile to JPMorgan. (JAC ¶ 231; TAC ¶ 544.)

With regard to Glencore and Pacorini, plaintiffs allege that Metro sent an email referring to Pacorini and Glencore not "nitpick[ing]" them in Detroit due to concerns regarding retaliation elsewhere. (JAC ¶ 197; TAC ¶ 510.) Plaintiffs also allege that Metro discussed re-warranting and refunding in connection with metal movement with Pacorini. (JAC ¶ 199; TAC ¶ 512.) In addition, plaintiffs allege that the defendant warehouse companies ignored information barriers imposed by LME rule, and shared information internally and across companies. (JAC ¶¶ 161-75, 202, 229; TAC ¶¶ 474-88, 515, 542.) Metro and Glencore are alleged to have engaged in swap discussions which ultimately benefitted the conspiracy. (JAC ¶¶ 233-36; TAC ¶¶ 546-49.) In addition, plaintiffs allege that all of the defendant warehouse **[**42]** companies, controlled by their trading affiliates, worked together to treat the minimum load out requirement as a maximum, thereby assisting in creating Metro's queues. (JAC ¶¶ 210-11; TAC ¶¶ 523-24; see JAC ¶ 218; TAC ¶ 531.)

Plaintiffs allege that this scheme benefited defendants in numerous ways. First, Mag, Agfa, and Kodak allege that the higher storage costs associated with unduly prolonged storage pushed up the Midwest Premium, enabling defendants to sell aluminum in the spot market at an inflated price. (JAC ¶ 17.) Second, plaintiffs allege that the trading arms of the financial institutions benefitted from the increased value of their holdings and increasing the profitability of certain futures and spot market transactions. (JAC ¶¶ 17, 289-96; TAC ¶¶ 602-09.) Third, defendants' warehousing operations were able to charge supra-competitive rents. (JAC ¶ 17; TAC ¶¶ 598-602.)

Reduced to its core, plaintiffs' theory posits that while defendants' actions impact the pricing industrial players may pay for aluminum, such is not at the heart of their intended financial play. Their goal, in other words, was not to fix the price of aluminum at a supra-competitive level or to fix the Midwest **[**43]** Premium at a particular level, but rather to be able to affect the price of (or inputs into the price) of aluminum in ways that made trades more profitable.[15]

[*436] But of course, commodities like aluminum are valuable primarily because they used by real world users to make real world products, and so the manipulation of a commodities market will necessarily result in real world effects. In this sense, plaintiffs' alleged payment of a higher Midwest Premium is theoretically necessary and central—but ultimately collateral damage. It is central and necessary **[**44]** because, as framed above, commodities can only be traded if they are used somewhere, by someone, to make real world goods or to provide real world services. It is collateral because impacting the price that real world users of aluminum may pay is not the focus of defendants' alleged financial play—it is merely the play's by-product. As alleged, the traders intend to impact other traders, but have to impact real world users in the process.

The law recognizes an important distinction between plausibility and probability at this stage of the case. In sum, and as discussed below, the allegations in the current proposed pleading are sufficient to support some—but not all—of plaintiffs' claims.[16]

II. MOTION TO DISMISS STANDARD

The Court undertakes its review of the proposed pleadings mindful of the standards governing a motion to dismiss under *Rule 12(b)(6)*.[17] The Court approaches all motions with the following two principles in mind: that the Court must accept as true—for purposes of this motion only—the facts as alleged in the pleadings, and the Court must draw all inferences in plaintiffs' favor. See *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Bell Atl. Corp. v. Twombly, 550 U.S. at 555-57*). Thus, if a fact (such as an email) is susceptible to two or more competing inferences, in evaluating these motions, the Court must draw the inference that favors the plaintiff so long as it is reasonable. *N.J. Carpenters Health Fund v. Royal Bank of Scotland Grp., PLC, 709 F.3d 109, 121 (2d Cir. 2013)*. "[T]he existence of other, competing inferences does not prevent the plaintiff's desired inference from qualifying as reasonable unless at least one of those competing inferences rises to the level of an obvious alternative explanation." Id. **[*437]** (internal quotation marks omitted).[18]

---

[15] Precisely how the trading operations obtained benefits is unclear—was it through, as plaintiffs allege, the exploitation of a contango? (See, e.g., JAC ¶¶ 295-96; TAC ¶¶ 608-09.) An ability to exploit differences between spreads or short and long positions? An ability to use warrants to advantage other trading opportunities such as equities or derivative positions? While the manifestation of the benefits is unclear, the economic plausibility of some advantage is sufficient at the pleading stage. The Court notes that in the absence of demonstrated tangible benefits by alleged conspirators following discovery, the case may well be narrowed.

[16] Defendants frequently and correctly quote this Court's prior decision dismissing prior pleadings. The Court believes its recitation of the law as set forth in that opinion was correct. The primary difference between the prior pleadings and the TAC and JAC is the refinement of the presentation of the alleged conspiracy (particularly in the JAC and its supporting papers). The addition of theoretical underpinnings to how and why the trading arms work with the warehouses, as well as the proffered factual **[**45]** support, alters the landscape.

[17] As the Court has previously noted, Kodak is in a different procedural posture from the other plaintiffs. That difference does not have substantive significance for purposes of the instant motions. The JAC is in fact an amended pleading for Kodak and motions to dismiss it are therefore **[**46]** evaluated under *Rule 12(b)(6)*. For the remaining plaintiffs, the pleadings are "proposed" and evaluated under the futility standard for amendments set forth in *Rule 15* and interpreting case law. See *Xiang Li. v. Morrisville State Coll., 434 Fed. App'x 34, 35 (2d Cir. 2011)* (summary order) (justice does not require a court to grant a plaintiff leave to amend a complaint under *Rule 15(a)(2)* "if amendment would be futile"). But at bottom, the *12(b)(6)* standard and the *Rule 15* futility standard are essentially the same. *Lucente v. Int'l Bus. Mach. Corp., 310 F.3d 243, 258 (2d Cir. 2002)* ("An amendment to a pleading is futile if the proposed claim could not withstand a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)*.") For convenience, and consistent with the manner of argument of the parties, the Court therefore refers to *Rule 12(b)(6)* and interpreting case law.

[18] Defendants assert that many of the quotes that plaintiffs set forth in the TAC and JAC are taken out of context, clearly misread the document, or support an opposite inference. The Court has reviewed the materials submitted. There is certainly support for

These standards do **[**47]** not require a court to accept conclusory assertions dressed up as facts. *Iqbal, 556 U.S. at 678*. Plaintiffs must allege sufficient factual content—which this Court must accept as true for purposes of this motion—to raise their asserted right to relief above the speculative level. *Twombly, 550 U.S. at 555*. A claim must have facial plausibility. *Iqbal, 556 U.S. at 678*.

A court must take care not to cloud its analysis of whether a claim is plausible with its views on whether ultimate success on that claim is probable. See *Twombly, 550 U.S. at 556*; *Anderson News, L.L.C. v. Am. Media, Inc., 680 F.3d 162, 184 (2d Cir. 2012)*. "Because plausibility is a standard lower than probability, a given set of actions may well be subject to diverging interpretations, each of which is plausible." *Anderson News, 680 F.3d at 184*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*.[19]

Mag, Agfa, and Kodak are, therefore, entirely correct when they argue on these motions that when the Court evaluates the adequacy of the JAC, it must draw in plaintiffs' favor all competing inferences that can be drawn from the many emails and other **[**48]** materials cited therein. Put another way, while there may be a myriad of explanations for the conduct described in emails, if the inference plaintiffs ask the Court to draw is not unreasonable, then that is the inference the Court must draw at this stage. *N.J. Carpenters, 709 F.3d at 121*. Mag, Agfa and Kodak are also correct when they argue that this Court may not weigh the evidence in the guise of a plausibility analysis. See *Twombly, 550 U.S. at 556*; *Anderson News, 680 F.3d at 184-85*. Instead, it is the Court's task here to ask whether the assembled facts "nudge[] [plaintiffs'] claims . . . across the line from conceivable to plausible." *Iqbal, 556 U.S. at 679-80* (quoting *Twombly, 550 U.S. at 570*). Once over the line, the strength of the claims is a question for another day. See id.

With these basic pleading principles in mind, the Court turns to the many motions.[20]

III. PLAINTIFFS' SECTION 1 CONSPIRACY CLAIMS

Section 1 of the Sherman Act prohibits "[e]very contract, combination **[*438]** . . . or conspiracy, in restraint of trade . . . ." *15 U.S.C. § 1*. Since all contracts necessarily restrain trade to some extent, this provision cannot be read literally: only "unreasonable" restraints of trade are unlawful. *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*; see also *In re Publ'n Paper Antitrust Litig., 690 F.3d 51, 61 (2d Cir. 2012)*. To run afoul of *§ 1*, the unreasonable restraint must result from an agreement between two or more entities. See *Twombly, 550 U.S. at 553-54*; *Theatre Enters., Inc. v. Paramount Film Distrib. Corp., 346 U.S. 537, 540, 74 S. Ct. 257, 98 L. Ed. 273 (1954)*; *Anderson News, 680 F.3d at 182*. A unilateral or independent business decision that results in a restraint of trade is not a violation of *§ 1*. *Copperweld Corp. v. Ind. Tube Corp., 467 U.S. 752, 775, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*.

Mag, Agfa, and Kodak allege in the JAC that the Goldman Sachs, JPMorgan and Glencore entities and their respective warehouse operations conspired with each other to restrain trade in violation of *§ 1*. (JAC ¶¶ 330-336.) The FLPs allege three separate § 1 violations in the TAC (TAC ¶¶ 444-636), only one of which, the Third Claim, is coherent. That Third Claim also approximates the JAC's § 1 claim. Plaintiffs have also asserted claims based on the same allegations under New York's Donnelly Act, codified at *N.Y. Gen. Bus. Law §§ 340 et seq*., and

---

defendants' positions in this regard, but the Court is mindful that at this stage plaintiffs are entitled to reasonable inferences being drawn in their favor. Discovery may make clear that there either is or is not a triable issue as to the proffered interpretations.

[19] If the Court can infer no more than "the mere possibility of misconduct" from the factual averments, dismissal is appropriate. *Iqbal, 556 U.S. at 679-80* (quoting *Twombly, 550 U.S. at 570*).

[20] The parties raise numerous arguments in their papers. This Court has reviewed all of them and addresses herein only those that are required for resolution of the instant motions. For instance, defendants argue that many alleged acts cannot themselves constitute violations of the antitrust laws. In this Opinion, the Court is not ruling otherwise (though it does not address each act seriatim). Instead, it bases its decision on the existence of a sufficient basis **[**49]** for plausibility for the pleadings to pass muster at this stage.

California's Cartwright Act, codified at *California Business and Professions Code §§ 16700 et seq*. (JAC ¶¶ 337-50, TAC ¶ 651(d).) In addition, the FLPs have **[**50]** asserted a claim under the Michigan Antitrust Reform Act (the "MARA"), codified at *M.C.L.A. §§ 445.771 et seq*. (TAC ¶¶ 637-42).

The FLPs' Second Claim is a porridge of conclusory statements sprinkled with various theories. A failure to achieve comprehensibility results in a failure to achieve plausibility. In this claim, plaintiffs allege that entities and people affiliated with Goldman Sachs conspired with the Glencore entities and entities affiliated with the LME (but not the JPMorgan entities). (TAC ¶¶ 444-60.) Plaintiffs allege that "Metro has made and performed a series of agreements in unreasonable restraint of trade for multiple anticompetitive purposes and with multiple anticompetitive effects." (TAC ¶ 445.) Included among these are agreements Metro made with the LME to reject a recommended change in the load-out rule, to reduce the amount of change in the rule, and to delay any implementation of such a change. (TAC ¶ 446.)

The FLPs allege that Metro conspired with its own agent, defendant Robert Burgess-Allen, to maintain and increase warehouse queues. (TAC ¶ 449.) Metro also agreed with the Glencore entities (as well as non-parties RK Capital Management LLP and Red Kite Group (collectively "Red **[**51]** Kite") and DB Energy Trading LLC ("DB Energy")) to cancel large numbers of warrants for the purpose of maintaining the load-out queue (demonstrated by the subsequent re-warranting of the same aluminum). (TAC ¶ 450.) Metro made and performed incentive payment agreements with its sister company, J. Aron. (TAC ¶ 451.) These agreements are alleged to have "foreclosed industrial and other users of aluminum, such as Plaintiffs, from sourcing aluminum on the LME," to have "ended LME forward contracts' role as a practicable source of aluminum for industrial and other consumers, including Plaintiffs," to have "caused the Midwest Premium in the primary aluminum market to reach supra-competitive levels," and to have destroyed pro-competitive price discipline as well as aluminum consumers' ability to hedge the price risks of physical aluminum. (TAC ¶ 459.)

[*439] In their Third Claim for relief, the FLPs allege that all defendants except for the LME-affiliated entities conspired to artificially raise prices "for purchases of aluminum for physical delivery by imposing a supra-competitive Midwest Premium." (TAC ¶ 463.) They also allege that the conspiracy allowed defendants' trading operations to engage **[**52]** in more profitable financial transactions. (TAC ¶¶ 603-09.) As part of this claim, plaintiffs assert that these defendants agreed that their warehouse operations would not compete against each other (TAC ¶ 510), agreed to use the minimum load out rules as a maximum (TAC ¶¶ 523-24), offered incentive payments to induce storage (TAC ¶¶ 550-56), shifted inventory between warehouses (TAC ¶¶ 559-66), and worked together strategically to cancel warrants (TAC ¶¶ 567-73).

In their Fourth Claim for relief, the FLPs allege a violation of *§ 1* by the "LME Combination," which consists of the LME, LME Holdings Limited, Hong Kong Exchanges and Clearing Limited ("HKEx"), Metro, Henry Bath LLC, and Pacorini. (TAC ¶¶ 20, 628-36.) According to the FLPs, the LME Combination systematically flouted the LME Charter, under which the LME has repeatedly assured that LME warehouses act as market participants of last resort and ensuring that the LME price stays in line with the physical/spot market price, and in doing so became "a combination in unreasonable restraint of trade." (TAC ¶¶ 6, 631-33.) The violations to which this claim refers include (1) the "failure to amend the unreasonable minimum load-out rule and **[**53]** the affirmative acts by which such rule was converted into a maximum output restriction that could be 'gamed' through anticompetitive contracts by Metro," (2) "the mix of consideration that Metro offered participants in the Primary Aluminum Market when it entered that market as a participant of first resort to divert aluminum into the LME, abused the LME Combination's power and to inflate prices," and (3) "all of the unlawful activity alleged in the Third Claim." (TAC ¶ 633.) The FLPs' state law claims rely upon the totality of the anticompetitive conduct alleged in their First through Fourth Claims. (See TAC ¶¶ 637, 643, 649, 653, 657.)

The FLPs' Third Claim for relief states an independent and cognizable claim, but the Second and Fourth claims do not. The FLPs' Second Claim is nearly incomprehensible and cannot withstand scrutiny as a standalone claim. There are no facts sufficient to support a restraint on the actual physical supply of aluminum sourced from the LME itself. (TAC ¶ 459.) The LME does not "source" physical supplies of aluminum to purchasers such as the FLPs; it is a commodities trading platform. The FLPs allege that they all purchased directly from producers and were **[**54]** not obtaining physical aluminum through the settlement of warrant positions.[21] The FLPs' short reference to hedging in the Fourth Claim (TAC ¶¶ 20(b), 630) is without factual support sufficient to render it a plausible basis for any element of a claim. The FLPs' Fourth Claim adds nothing substantive to the Third—the use or abuse of LME rules is inherent in the operations of the conspiracy alleged in the Third Claim; the Fourth Claim merely confuses the issues and is therefore dismissed as duplicative.

The Court now turns to those § 1 claims that remain. In sum, both Mag, Agfa, and Kodak and the FLPs have stated plausible **[*440]** and cognizable claims under *§ 1*, subject to the limitations set forth below.

A. Antitrust Standing[22]

Antitrust standing is "a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement [the court] must dismiss it as a matter of law." *Gatt Commc'ns Inc. v. PMC Assocs. L.L.C., 711 F.3d 68, 75 (2d Cir. 2013)* (quoting *NicSand, Inc. v. 3M Co., 507 F.3d 442, 450 (6th Cir. 2007)* (en banc)); see also *Paycom Billing Servs., Inc. v. MasterCard Int'l, Inc., 467 F.3d 283, 290-95 (2d Cir. 2006)* (dismissing a complaint under *Rule 12(b)(6)* for lack of antitrust standing).

Antitrust standing consists of three separate questions: have plaintiffs alleged injury in fact; have they alleged antitrust injury, and are they efficient enforcers of the antitrust laws? See *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 535 n.31, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*; *Port Dock & Stone Corp. v. Oldcastle Ne., Inc., 507 F.3d 117, 121 (2d Cir. 2007)*.

Plaintiffs in both the JAC and the TAC allege that they have paid prices for aluminum that are higher than they would have paid in the absence of defendants' actions. (See, e.g., JAC ¶¶ 18, 19, 313, 316, 318, 320, 325, 328; TAC ¶¶ 9, 14-15, 18-21, 42-43, 80, 130, 201, 227, 239-40, 244, 297, 321, 359, 408, 414, 418, 422, 425, 439, 442, 445, 451-53, 455-56, 458, 633, 647, 650, 652, 660-61.) Whether this is true is not an issue currently before the Court. Because this injury is concrete, particularized, and actual, each of the plaintiffs has sufficiently alleged that it has suffered injury in fact. See *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*.

The Court next turns to whether the JAC and the TAC adequately allege antitrust injury in connection with **[**56]** their § 1 claims. Antitrust injury is not simply the fact that a plaintiff may be able to allege some harm; rather, the issue is whether that harm is an "injury of the type the antitrust laws were intended to prevent." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Further, the harm must be causally related to that which makes defendants' acts unlawful. Id. Taking these two aspects of antitrust injury together, it is clear that although an injury may be causally related to an antitrust violation, it is not sufficient to support "antitrust injury" unless it is attributable to an anticompetitive aspect of the challenged conduct. *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. This requirement is derived from the principle that the antitrust laws were enacted for "the protection of competition, not competitors." *Brown Shoe Co. v. United States, 370 U.S. 294, 319, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*; see also *Gatt, 711 F.3d at 75* ("Absent such boundaries, the potent private enforcement tool that is an action for treble damages could be invoked without service to—and potentially in disservice of—the purpose of the antitrust laws: to protect competition.").

The questions of antitrust injury and whether a plaintiff is an efficient enforcer of the antitrust laws are often analyzed together. The Court is guided by the Supreme Court's decision in **[**57]** *Associated **[*441]** General Contractors of California, Inc. v. California State Council of Carpenters ("AGC"), 459 U.S. 519, 103 S. Ct. 897, 74 L.*

---

[21] One plaintiff, Ampal, states that it may have obtained aluminum directly from Glencore (TAC ¶ 49)—but it is not clear from the allegations in the TAC whether that was through a settled warrant, through owned physical stocks, or in some other manner.

[22] Plaintiffs must establish antitrust standing with respect to each antitrust claim pursued. See *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 436-38 (2d Cir. 2005)* (antitrust standing inquiry is injury-specific). Accordingly, the Court reviews standing with regard to the FLPs' *§ 1* and *§ 2* claims separately. **[**55]**

Ed. 2d 723. In AGC, the Supreme Court identified several factors a court should consider in determining whether a plaintiff has antitrust standing: (1) the causal connection between the violation and the harm; (2) the presence of an improper motive; (3) the type of injury and whether it was one Congress sought to address; (4) the directness of the injury, (5) the speculative nature of the damages; and (6) the risk of duplicative recovery or complex damage apportionment. *Id. at 537-44*.

The Second Circuit has "distilled" the AGC factors "into two imperatives": first, that a plaintiff plausibly allege that he suffered antitrust injury, and, second, that he plausibly allege facts that support his suitability as a plaintiff to pursue the alleged antitrust violation—and that he would therefore be an "efficient enforcer" of the antitrust laws. *Gatt, 711 F.3d at 76*; see also *Port Dock, 507 F.3d at 121*; *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 443 (2d Cir. 2005)*.

Whether a plaintiff is an efficient enforcer of the ***antitrust law*** depends on a balancing of the following factors:

> (1) the directness or indirectness of the asserted injury;
>
> (2) the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest **[**58]** in antitrust enforcement; (3) the speculativeness of the alleged injury; and (4) the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries.

Gatt, 711 F.3d at 76 (quoting *Paycom, 467 F.3d at 290-91*); see also *Port Dock, 507 F.3d at 121*; *Daniel, 428 F.3d at 443*.

To determine if a pleading adequately alleges antitrust injury as well as whether each plaintiff is an efficient enforcer of the antitrust laws, this Court analyzes whether a plaintiff's alleged injury constitutes injury to a competitive process, and not just injury to a competitor. Understanding where plaintiffs have positioned themselves in the competitive landscape is the most logical starting point for this question: are plaintiffs consumers of a product, and therefore injured when sellers engage in price fixing, allocating markets, or dividing customers, etc., because those actions have increased the prices the price paid? Or, do plaintiffs allege that they are competitors of a defendant, and injured when, for instance, they are deprived of customers as a result of an unlawful bargain struck between the defendants? Or, do plaintiffs allege that they are neither consumers nor competitors but nonetheless have suffered an injury of the type the antitrust **[**59]** laws are intended to address?

In *Blue Shield of Virginia v. McCready ("McCready"), 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*, the Supreme Court held that while plaintiff was not a competitor of the alleged conspirators, she had nevertheless suffered antitrust injury because "the injury she suffered was inextricably intertwined with the injury the conspirators sought to inflict," *id. at 484*;[23] see also *Crimpers Promotions Inc. v. Home Box Office, Inc., 724 F.2d 290, 294 (2d Cir. 1983)* (Friendly, J.) (plaintiff was trade show organizer, not direct participant in relevant **[*442]** market, but had antitrust standing); *Province v. Cleveland Press Publ'g Co., 787 F.2d 1047, 1052 (6th Cir. 1986)* (plaintiffs who are not "direct participants in the relevant market" can establish standing by showing that their injury is "inextricably intertwined" with the injury inflicted on the relevant market). "To be inextricably intertwined with the injury to competition, the plaintiffs must have been 'manipulated or utilized by [d]efendant as a fulcrum, conduit or market force to injure competitors or participants in the relevant product and geographical market.'" *Province, 787 F.2d at 1052* (quoting *Southaven Land Co. v. Malone & Hyde, Inc., 715 F.2d 1079, 1086 (6th Cir. 1983))* (finding plaintiffs' injury was not inextricably intertwined because their injury was "a result of—rather than a means or the cause of—the harm"). The term "fulcrum" is defined as "the support about which a lever turns," or alternatively, "one that supplies **[**60]** capability for action." Fulcrum, Merriam-Webster, *http://www.merriam-webster.com/dictionary/fulcrum* (last visited Mar. 25, 2015).

---

[23] A more complete description of McCready is set forth in the Court's Opinion & Order dated August 29, 2014. (1st MTD Op. at 35.)

Plaintiffs here are not competitors of any of these defendants: they do not operate warehouses, and they do not have commodities trading arms. Nor are they alleged to directly consume[24] any of defendants' trading products or aluminum warehouse-related products or services.[25] Rather, the core of plaintiffs' claims is that they have suffered necessary yet collateral damage from defendants' scheme. Plaintiffs are the real world users whose demand for aluminum creates the market for aluminum sales; thus, were it not for their need to use aluminum as an input in their production processes, it would not be possible for the financial trading defendants to trade aluminum as a commodity. Put another way, plaintiffs are central—they are the fulcrum—to the creation of the market opportunity underlying both metal storage and warrant trading for aluminum. As the real world buyers who—they allege—must pay prices for aluminum that incorporate Midwest Premium, they are necessarily directly impacted **[**61]** by the alleged conduct. That is, their purchases are inextricably intertwined with the competitive landscape in which defendants' alleged scheme ultimately played out. Plaintiffs argue that at the very least they therefore fall within the scope of antitrust injury contemplated by McCready. As now plead in the proposed pleadings, the Court agrees.

Here as in McCready, it is "not a question of the specific intent of the conspirators," but rather, "[w]here the injury alleged is so integral an aspect of the conspiracy alleged, there can be no question but that the loss was precisely the type of loss that the claimed violations . . . would be likely to cause." *457 U.S. at 479* **[*443]** (internal quotation marks omitted). Taken as a whole, plaintiffs' allegation is that defendants' actions altered the normal competitive price setting dynamic of aluminum, resulting in an abnormally high Midwest Premium; and they were forced to pay that premium as part of their purchases of physical aluminum. These allegations concern a dysfunction of the competitive process that—according to plaintiffs—would not have occurred but for defendants' actions. Defendants are the real world actors necessary for the effectuation of the conspiracy—the fulcrum, in the words of *McCready*. These allegations are, at this stage, sufficient to support "injury of the type **[**63]** the antitrust laws were intended to prevent." *Brunswick Corp., 429 U.S. at 489*.

Defendants contend (vigorously to be sure) that antitrust standing is lacking. The Court has examined these arguments with care. Defendants argue that plaintiffs are neither competitors nor consumers and that their arguments to the contrary are unsupportable. They are correct on both scores. However, McCready makes clear that the antitrust laws do not require a plaintiff fit neatly into a box of competitor or consumer, so long as "the injury [they] suffered was inextricably intertwined with the injury the conspirators sought to inflict." *457 U.S. at 484*. That is the case here. Ultimately, this case does not fit into any traditional box other antitrust cases involving commodities trading have not examined with precision market structure and anticompetitive acts analogous to those at issue here.[26] These are unusual facts for an antitrust case to be sure: where the commodity trading occurs at one level, warehousing is merely a means to an end, and the plaintiffs' injury is collateral damage. *McCready* also presented an unusual (and different) fact pattern and dictates that this Court examine whether plaintiffs have alleged facts that call for the application **[**64]** of analogous principles. They have.

---

[24] One of the FLPs, Ampal, Inc. ("Ampal"), alleges that it purchased aluminum directly from Glencore. (TAC ¶ 49.)

[25] In the JAC, Mag, Agfa, and Kodak assert that but for the defendants' anticompetitive conduct, they might consider purchasing and storing aluminum in an LME warehouse—that is, "but for" the conduct, some plaintiffs would be consumers of warehouse services. (JAC ¶ 4.) However, plaintiffs do not allege any facts to support this claim. For instance, the JAC is devoid of factual allegations in which plaintiffs assert that on certain dates they considered purchasing and storing aluminum but load-out delays prevented them from doing so. In the TAC, plaintiffs allege that but for defendants' conduct they might have hedged certain transactions. (See TAC ¶¶ 317, 319, 412.) This assertion is similarly devoid of sufficient factual support. The **[**62]** Court assumes that these assertions were included in the JAC and the TAC to assist with standing arguments. As the Court finds that plaintiffs have adequately plead standing for other reasons, it need not address these assertions.

[26] The cases in which alleged purposeful commodity trading inefficiency has led to collateral damage in physical markets are *Loeb Industries, Inc. v. Sumitomo Corp., 306 F.3d 469 (7th Cir. 2002)*; *In re Crude Oil Commodity Litig., No. 06 Civ. 6677(NRB), 2007 U.S. Dist. LEXIS 47902, 2007 WL 1946553 (S.D.N.Y. June 28, 2007)*; and *Ice Cream Liquidation, Inc. v. Land O'Lakes, Inc., 253 F. Supp. 2d 262 (D. Conn. 2003)*. This Court does not necessarily agree with the manner in which the courts in those cases described the anticompetitive condition, conduct or markets. Nevertheless, they are instructive.

Here, the structure of the parties and the coordination necessary to make the alleged conspiracy succeed is complex. According to plaintiffs, this case arises because traders have the financial ability to purchase and control warehouses, and to devise trading strategies that exploit the interplay between their affiliated operations. According to plaintiffs' theory, the winners and losers of defendants' scheme are not only the counterparties to their trades, but also those who actually need the physical commodity underpinning the trades. As now cast in their most recent proposed pleadings, this scheme is alleged to have substituted supply and demand based-pricing with pricing driven by the webbed conspiracy described above. These allegations, taken in the light most favorable to plaintiff, **[**65]** are sufficient to support antitrust injury. In short, if defendants have engaged in a conspiracy that caused dysfunction in the price-setting process, driving prices higher, and defendants then paid those higher prices, then defendants have suffered an injury of the type the antitrust laws were designed to prevent. See *Atl. Richfield, 495 U.S. at 337* (higher prices that do **[*444]** not work to a plaintiff's advantage cause plaintiff to suffer antitrust injury).

Defendants also argue that even if they are able to allege injury to the competitive process, plaintiffs have not alleged sufficient facts to demonstrate that they are efficient enforcers of the antitrust laws. The complexity of the alleged scheme creates a fair amount of smoke around who plays what role and who is situated where. However, at base, the same facts that support antitrust injury support plaintiffs' roles as efficient enforcers. The following allegations support this determination.

First, each plaintiff is alleged to buy aluminum directly from a producer (and, in one instance, from one of the defendants[27]), and the contracts between the producer-seller and plaintiff-buyer allegedly contain provisions tying the contract prices to the Midwest Premium. (JAC **[**66]** ¶¶ 32; 39, 44; TAC ¶¶ 35, 48, 57, 64, 71.) Mag, Agfa, and Kodak allege that in the United States it is not possible to negotiate spot or long-term aluminum contracts with major producer Alcoa that do not incorporate the Midwest Premium. (JAC ¶ 32, 44.) Under these circumstances, conduct that causes the Midwest Premium to be higher than it would be otherwise harms these plaintiffs directly.

Second, according to plaintiffs, no buyer of aluminum other than defendants is higher up or more direct in their respective distribution chains. (JAC ¶¶ 35, 41, 47; TAC ¶¶ 39-40, 48-50, 57-58, 64, 71.) Plaintiffs' allegations support directness as well as that damages would not be duplicative. Indeed, plaintiffs are not affected through a chain of transactions, or through side-effects of others' economic activity; rather, they are the first parties in the distribution chain to be affected by fluctuations in the Midwest Premium, because they are both the first to buy aluminum and the first to do so at a price that incorporates the Midwest Premium.

Third and finally, plaintiffs' allegations support damages as non-speculative. Plaintiffs allege that their damages are defined by the **[**67]** amount by which the Midwest Premium was inflated. (See JAC ¶¶ 24, 322; TAC ¶ 17.) Again, whether damages will ultimately be found to have been incurred and, if so, whether any amount is determinable, are questions left for another day. See *Gatt, 711 F.3d at 76* (whether plaintiff is efficient enforcer is based in part on a prospective analysis of the difficulty of identifying and apportioning damages); *Paycom, 467 F.3d at 291* (same).

Defendants argue that plaintiffs are not efficient enforcers of the antitrust laws because another group of potential plaintiffs is better positioned to prosecute the alleged antitrust violations: users of defendants' warehouse services. But any injury to these potential plaintiffs would concern inflated rents, inflated warehousing fees, or delayed load-outs, and as such would be entirely different from the injury alleged by plaintiffs here, which concern an inflated Midwest Premium. Contrary to defendants' arguments, the *Gatt* inquiry is focused on who most directly suffered the alleged injuries caused by the allegedly anticompetitive conduct—it is not concerned with which market participants are most proximate to the allegedly unlawful conduct itself. Plaintiffs here are the most efficient enforcers **[**68]** of claims that defendants' anticompetitive conduct caused injuries to economic actors who paid prices in the primary aluminum market that incorporated the Midwest Premium.

[*445] B. Agreement Between Separate Entities

[27] See note 24, supra.

Section 1 claims require an agreement, contract, or understanding in restraint of trade by separate entities. See *15 U.S.C. § 1*. As cast, various conspirators acting to carry out the § 1 violation are affiliated with one another. As a matter of law, only separate entities can conspire in violation of the antitrust laws. *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. Thus, a corporate parent and its wholly owned subsidiary are incapable of conspiring in violation of *§ 1* of the Sherman Act as a matter of law. *Id. at 767, 771*. "The coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1* of the Sherman Act." *Id. at 771*. "[A]n agreement between a parent corporations and its . . . agents is not a concerted action for purposes of the [Sherman] Act." *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 542 (2d Cir. 1993)*.

"[W]hen lower courts are faced with the question of whether an affiliated, but not wholly owned, corporation can conspire with its parent in violation of *§ 1*, they must draw from the analysis in Copperweld without the benefit of a bright line rule." **[**69]** *In re Term Commodities Cotton Futures Litig., Master Docket No. 12 Civ. 5126(ALC)(KNF), 2014 U.S. Dist. LEXIS 145955, 2014 WL 5014235, at *4 (S.D.N.Y. Sept. 30, 2014)*; see also *Geneva Pharms. Tech. Corp. v. Barr Labs., Inc., 201 F. Supp. 2d 236, 275 (S.D.N.Y. 2002)* (noting that lower courts have held that affiliated corporations that are less than wholly owned have been found incapable of conspiring under Copperweld), rev'd on other grounds, *386 F.3d 485 (2d Cir. 2004)*; *Shaw v. Rolex Watch, U.S.A., Inc., 673 F. Supp. 674, 677 (S.D.N.Y. 1987)* (suggesting that Copperweld can apply to non-wholly-owned affiliates); VII Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶¶ 1466-67 (3d ed. 2010) (suggesting that "two corporations could constitute a single economic unit for Sherman Act *§ 1* purposes even though they are not wholly owned in common"). The Supreme Court's reasoning in Copperweld focused on whether a parent and its subsidiary had a "complete unity of interest," such that they shared common objectives and their actions were "guided or determined not by two separate corporate consciousnesses, but one." *Copperweld, 467 U.S. at 771*. In a more recent decision, the Supreme Court further articulated this principle by putting it another way: entities can conspire under *§ 1* of the Sherman Act only if their competitive actions are determined by "independent centers of decision-making." *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 196, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* (quoting *Copperweld, 467 U.S. at 769*). Taken together, *Copperweld* and *American Needle* establish that a non-wholly owned affiliate cannot conspire with its parent **[**70]** in violation of *§ 1* of the Sherman Act if they are jointly controlled. The same principles apply to agents. To the extent agents are merely carrying out the decisions of principals, they are not separate entities for purposes of *Section 1*.

Plaintiffs allege that each defendant is affiliated with at least one other entity: the Goldman Sachs entities are affiliated with J. Aron[28] and Metro; the JPMorgan **[*446]** entities are affiliated with Henry Bath & Son LLC; and the Glencore entities are affiliated with Pacorini. (See JAC ¶¶ 51, 62, 64-66, 79, 208; TAC ¶¶ 88, 102, 104-06, 125, 253, 521.) Plaintiffs also provide specific allegations that the financial-firm conspirators—Goldman Sachs, JPMorgan, and Glencore—each control the warehousing entities with which they are affiliated. For instance, both the JAC and the TAC allege that Goldman Sachs controlled Metro's entire board of directors (JAC ¶ 176; TAC ¶ 489), and both allege that Metro frequently had to seek authorization from Goldman to execute routine warehousing transactions, including authority to offer specified incentives for storage deals (JAC ¶¶ 177-94; TAC ¶¶ 490-507). The JAC and the TAC also both allege that by controlling all of Henry Bath & Son **[**71]** Ltd.'s directors and 100% of its stock, JPMorgan had complete control over Henry Bath & Son Ltd., and its wholly owned U.S.-based subsidiary, Henry Bath LLC, including all of its aluminum warehouses. (JAC ¶¶ 62, 65-66; TAC ¶¶ 102, 105-06.) And both complaints allege that Glencore controls the operations of all of the Pacorini entities, including Pacorini AG, which operates in the United States through its wholly owned subsidiary, Pacorini USA. (JAC ¶¶ 79-80; TAC ¶¶ 123, 125.)

The FLPs also allege that defendants BAP and its director, Robert Burgess-Allen, were the sales agents of defendant Metro. (See TAC ¶¶ 128-29, 254, 449.) BAP and Burgess-Allen are alleged to have not had any independent economic role in the conspiracy beyond that which it undertook while working on behalf of Metro—they

[28] In the JAC, J. Aron is alleged to be a trading division of Goldman Sachs (JAC ¶ 51), and it is not named individually as a defendant. The TAC alleges that J. Aron is a wholly owned subsidiary of Goldman Sachs and names it as an individual defendant. (TAC ¶ 88.)

are alleged only to have introduced customers to Metro and consulted on and negotiated transactions with or for Metro. (See TAC ¶¶ 254, 449, **[**72]** 605.)

Plaintiffs have sufficiently alleged that the financial-firm co-conspirators had control over the warehousing defendants and agents affiliated with them. Accordingly, as a matter of law, each financial-firm co-conspirator cannot conspire with its agents or with the warehousing entities with which they are affiliated in violation of *§ 1* of the Sherman Act. This conclusion is particularly relevant to the FLPs' Second Claim, which alleges that the Goldman Sachs entities conspired with each other, J. Aron, Burgess-Allen, HKex, Glencore, and the LME in violation of *§ 1*. (TAC ¶¶ 444-457.) The Goldman Sachs entities cannot conspire amongst themselves or with J. Aron as a matter of law. Thus, based on the allegations in these pleadings, no agreement solely between members of the same corporate group states a claim.[29]

Notwithstanding the affiliations discussed above, plaintiffs have alleged sufficient facts to support an agreement between separate entities. The illustrations of the alleged conspiracy set forth earlier **[**73]** in this Opinion portray a web of alleged agreements or understandings between a number of entities from different corporate families. For instance, Metro and the Goldman Sachs entities are alleged to have had agreements or understandings with the JPMorgan entities and Henry Bath LLC, as well as the Glencore entities and Pacorini; and they with each other. The "web" of agreements or understandings alleged is sufficient to satisfy the separate entity requirement.

C. Noerr-Pennington

Defendants separately assert that the FLPs' claims that Metro and the Goldman **[*447]** Sachs entities violated *§ 1* by lobbying the LME in an effort to change the minimum load-out rule are barred by the Noerr-Pennington doctrine, citing *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*. The Court construes this argument as addressing the FLPs' Fourth Claim, which alleges a conspiracy involving the LME Combination, as well as myriad allegations that defendants' actions with regard to the LME load-out rule plays a role in carrying out the overall conspiracy. Indeed, the load-out rule is cast as an enabling tool for the conspiracy.

The Court need not, at this stage, reach the legal question of whether Noerr-Pennington precludes a conspiracy claim based on certain lobbying **[**74]** efforts. As an initial matter, as set forth above, the Court has already determined that the FLPs' Fourth Claim has other fatal flaws (incomprehensibility among them). Defendants' actions vis-à-vis the load-out rule are therefore only relevant as one part of an alleged fabric of conspiratorial behavior. As there is sufficient alleged behavior which is independent of any lobbying efforts, whether or not Noerr-Pennington might apply is a question for another day.

D. Relevant Market

Agreements that fall within the scope of *§ 1* are characterized as either "horizontal" or "vertical." See *United States v. Topco Assocs., Inc., 405 U.S. 596, 608, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*; *Anderson News, 680 F.3d at 182*. A horizontal agreement is an "agreement between competitors at the same level of the market structure," while a vertical agreement is a "combination[] of persons at different levels of the market structure." *Topco, 405 U.S. at 608*. The parties dispute whether the agreement plaintiffs allege is vertical, horizontal, or both. They also dispute whether the agreement is a price-fixing agreement, or something else. Both of these issues impact whether plaintiffs must allege a plausible relevant market.

Horizontal agreements between competitors are considered the most potentially pernicious and are generally treated as "per se" unlawful. **[**75]** See, e.g., *Topco, 405 U.S. at 608, 611* (noting that horizontal agreements to engage in price fixing or market allocation are per se illegal under *§ 1* of the Sherman Act). The per se rule is a presumption of unreasonableness based on "'business certainty and litigation efficiency.'" *Atl. Richfield, 495 U.S. at 342* (quoting *Arizona v. Maricopa Cnty. Med. Soc'y, 457 U.S. 332, 344, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982))*. "It represents a 'longstanding judgment that the prohibited practices by their nature have a substantial potential for

[29] This point may have more importance at a later stage of the case. If discovery reveals that only related and controlled entities were involved in certain conduct, a Section 1 claim would not lie.

impact on competition.'" Id. (quoting *FTC v. Superior Court Trial Lawyers Ass'n, 493 U.S. 411, 433, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)* (internal quotation marks omitted). Horizontal price fixing—that is, price fixing by competitors in the same market—is per se illegal. *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 223-24, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*; *Todd v. Exxon Corp., 275 F.3d 191, 198 (2d Cir. 2001)*.

To apply the per se rule, a court generally must have experience with the type of restraint at issue in order to predict with confidence that it would be condemned under the rule of reason; only when such predictability is present should the court apply the per se rule. *Maricopa County Med. Soc'y, 457 U.S. at 344*. A vertical restraint is not generally illegal per se unless it includes some agreement on price or price levels. *Bus. Elecs., 485 U.S. at 735-36*. "Vertical restraints that do not involve **[*448]** price-fixing are generally judged under the 'rule of reason, which requires a weighing of the relevant circumstances of a case to decide whether a restrictive practice constitutes an unreasonable restraint on competition.'" **[**76]** *Anderson News, 680 F.3d at 183* (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984))*. "Any combination which tampers with price structures is engaged in an unlawful activity." *Socony-Vacuum, 310 U.S. at 221*. Group efforts to raise, lower, or stabilize prices directly interfere with the free play of market forces and constitute unlawful price fixing. Id. "Where the means for price fixing are purchases or sales of the commodity in a market operation or, as here, purchases of a part of the supply of the commodity for the purpose of keeping it from having a depressive effect on the markets, such power may be found to exist though the combination does not control a substantial part of the commodity." *Id. at 224*.

Most antitrust claims are evaluated under the rule of reason. *Paycom, 467 F.3d at 289*. The "rule of reason" is the standard used to assess whether restraints not per se unlawful nonetheless violate *§ 1* of the Sherman Act. See *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 885-86, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*. A rule of reason analysis requires a court to weigh all of the circumstances surrounding the challenged conduct to determine whether the alleged restraint is unreasonable, taking into account the nature of the specific business, the industry, the restraint's history, and whether the defendant has market power. Id.; see also *Gatt, 711 F.3d at 75 n.8*. Thus, to engage in a rule of reason analysis, the Court must determine **[**77]** what the relevant market is, and then examine that market.

The purpose of a rule of reason analysis is to enable a finder of fact to first determine whether a restraint imposes an unreasonable restraint on competition. *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*; *Paycom, 467 F.3d at 290*. As a threshold matter, a plaintiff must allege the plausible existence of a combination that causes an unreasonable restraint of trade. The burden shifts to defendant to present the procompetitive value of the practice; if defendant carries that burden, then the burden shifts back to plaintiff, who must show that the same procompetitive effect could have been achieved by less restrictive means. *Virgin Atl. Airways Ltd., v. British Airways PLC, 257 F.3d 256, 264 (2d Cir. 2001)*. Under a rule of reason analysis, plaintiff can only recover if the challenged conduct reduced competition, thereby harming consumers. Id. In a *§ 1* case, therefore, defining a relevant market is required in order for the finder of fact to be able to assess whether the nature of conduct is consistent with a functional or dysfunctional competitive process.

Plaintiffs here allege a complicated scheme involving both horizontal as well as vertical conduct—with trading entities alleged to be in a conspiracy with each other as well as with their warehouse affiliates and those of others. **[**78]** The market for LME-certified warehouse services for aluminum is one area in which conduct is alleged to have occurred, and the primary aluminum market is another area in which dysfunction in the competitive process is alleged to have played out (the primary aluminum market is the one in which plaintiffs are buyers; defendants are alleged to have created dysfunction in pricing through trading). As described above, the scheme is atypical for an antitrust case **[*449]** with plaintiffs as neither competitors nor consumers in any relevant market.[30] Moreover, despite the FLPs' allegations to the contrary, the conspiracy alleged is not a conspiracy to fix the price of physical aluminum—that is, "x" amount per metric ton. The scheme is primarily aimed at increasing trading profits, which requires a necessary price impact—not a price fix. Variations in price may have as much or more benefit to

[30] Nor is the scheme alleged a type of monopoly leveraging claim; such a claim would present additional issues.

participants in such a scheme as a price certain. A conspiracy to fix the price of aluminum would involve different players (for example, producers) in different markets.

Here, an impact on the price of aluminum **[**79]** is necessary to effectuate the conspiracy; such an impact can be achieved by increasing the Midwest Premium. That premium is a component of the stated price in aluminum contracts—but there are many other inputs as well. The complexity here has implications for causation and proof of damage—issues for another day. The relevant question now before the Court is whether this alleged conspiracy is of the type the antitrust laws deem per se illegal—a question to be asked for purposes solely of determining adequacy of pleadings, not on the merits.

The conspiracy here is certainly not of the type which the antitrust laws have routinely dealt with. It is not one in which a single market may be examined for competitive or anticompetitive conduct. The antitrust cases which have dealt with allegations of anticompetitive conduct by traders injuring users of commodities have struggled with fitting such claims into traditional rubrics. (See section III.A. above.) That alone is not, however, fatal at the pleading stage. Rather, the Court must attend to whether each element has been plausibly alleged. Here, a defined relevant market is one of those questions. In the absence of familiarity with a type **[**80]** of business conduct and competitive impact, courts apply the rule of reason analysis. That is highly likely to be necessary here and the pleadings should therefore provide proper notice of the markets alleged.[31]

The current pleadings allege two markets: a primary aluminum market (JAC ¶¶ 116; TAC ¶ 157), and a market for LME-certified warehouse services for aluminum (JAC ¶ 144; TAC ¶¶ 203-04, 207, 209, 422).[32] Neither pleading alleges a market for financial products. Both **[*450]** pleadings now contain a number of paragraphs alleging, for each market, its particular product and geographic characteristics (JAC ¶¶ 98-107, 127-144; TAC ¶¶ 155-58, 164-67, 172-75, 188-200, 202-04) and facts regarding elasticities **[**81]** and substitutability (JAC ¶¶ 108-16, 144; TAC ¶¶ 157, 159-62, 208), including, for the primary aluminum market, domestic and foreign sources of supply (JAC ¶¶ 104, 106-07; TAC ¶¶ 168-70), the feasibility of transport (JAC ¶ 117; TAC ¶ 168-70) and pricing dynamics (JAC ¶¶ 118-26; TAC ¶¶ 176-87) (though plaintiffs differ somewhat in their views on these topics).

The FLPs also assert a monopolization claim, and the allegations in their proposed complaint are tailored to a national market for primary aluminum **[**82]** (which includes both the United States and Canada) (TAC ¶ 169); Mag, Agfa, and Kodak have alleged worldwide markets (JAC ¶ 117). They allege that primary aluminum is manufactured worldwide, that the U.S. is a net importer, and that there has been a global oversupply since the mid-2000s. (JAC ¶¶ 104-06; TAC ¶¶ 174-75.) The U.S. imports over 3 million metric tons from more than two dozen countries annually in order to meet domestic consumption requirements. (JAC ¶ 106; TAC ¶ 166.) Most aluminum is sold directly from producers such as Alcoa to industrial users. (JAC ¶ 102; TAC ¶ 166.) Producers also sell a certain amount of aluminum to traders and financial buyers who typically store it in warehouses. (JAC ¶ 103; TAC ¶ 167.) Most often these sales involve the LME warehouse system, which operates worldwide. (JAC ¶¶ 91, 103; TAC ¶¶ 167, 188.)

---

[31] If this Court were to agree with plaintiffs that the alleged restraints should be analyzed as per se violations of the antitrust laws, then plaintiffs' pleading burden as to market definition would be lower. See *State Oil, 522 U.S. at 10*; see also *Paycom, 467 F.3d at 289*.

The Court also notes that "[i]n this Circuit, a threshold showing of market share is not a prerequisite for bringing a § 1 claim." *Todd, 275 F.3d at 206*; *K.M.B. Warehouse Distribs., Inc. v. Walker Mfg. Co., 61 F.3d 123, 129 (2d Cir. 1995)* ("If a plaintiff can show an actual adverse effect on competition, such as reduced output . . . we do not require a further showing of market power.").

[32] The JAC describes this market as the "market for LME-certified warehouse services for aluminum." (JAC ¶ 144.) The TAC uses four distinct terms to refer to this market: the "market for warehouse services for LME aluminum" (TAC ¶ 203); the "market for aluminum warehouse services in LME-registered warehouses" (TAC ¶¶ 204, 209); the "market for warehouse services of aluminum in LME-registered warehouses" (TAC ¶ 207); and the "aluminum warehouse market for LME-registered warehouses" (TAC ¶ 422). The Court assumes for purposes of this motion that the JAC's term for this market, the "market for LME-certified warehouse services for aluminum," captures all of the TAC's conceptions of this market.

Plaintiffs allege that the demand for aluminum is generally inelastic. (JAC ¶ 108; TAC ¶ 161.) While there are some substitutes for certain applications, its price remains relatively inelastic. (JAC ¶¶ 108-15; see TAC ¶¶ 161-62.) There are lead times required to adjust production capacity, allowing prices to remain high if there is an unanticipated **[**83]** shortfall. (JAC ¶¶ 110; see also TAC ¶¶ 162.)

Defendants argue that these markets are inadequately defined and not cognizable markets for antitrust purposes. Defendants' arguments in this regard are better suited to a motion for summary judgment or class certification. In its prior decision on earlier pleadings, this Court laid out certain necessary prerequisites to pleading a relevant market. Plaintiffs have, in effect, checked the minimum boxes necessary to meet the required standard at the motion to dismiss stage.

Defendants' arguments reasonably follow traditional antitrust analysis: pleading relevant markets and measuring defendants' conduct and plaintiffs' harm in relation to those markets. In this regard, a market for LME-certified warehouse services for aluminum would appear to require conduct to drive up the price of renting warehouse storage space or constrain the availability of warehouse services. This is not, however, what plaintiffs are alleging. Instead, plaintiffs are alleging that—somewhat akin to McCready—actions in the market for LME-certified warehouse services for aluminum (including, inter alia, delays in load-out services) necessarily caused dysfunction in the **[**84]** price setting of aluminum. Thus, defendants' argument that allegations regarding the market for LME-certified warehouse services for aluminum are implausible because they do not provide sufficient detail on the substitutability of off-warrant storage at non-LME warehouses or on aluminum transportation costs is like a ship passing in the night with plaintiffs' theory of the market. The substitutability at issue would be load-out services for aluminum stored at LME warehouses that **[*451]** would and could, in turn, impact the Midwest Premium. Whether a particular load of aluminum can be stored in warehouse x or y is not, therefore, the issue. It all comes back to the factors that affect the Midwest Premium. Plaintiffs have not done the world's greatest job in explicating how all of the parts fit together, but they have done enough. They have alleged that only LME-certified warehouses store the aluminum corresponding with the warrants, the settling of which impacts the Midwest Premium. Thus, substitutability in the sense in which defendants argue does not meet this claim head on. This is not a case in which "warehouse services," strictly speaking, are at issue (though periodically plaintiffs' **[**85]** allegations are confused on this point). Rather, the issue as cast better by the JAC is the use of the particular market for LME-certified warehouse services for aluminum insofar as the services offered therein (such as load-outs) is a necessary and clear component of the Midwest Premium. Whether this market will survive the proverbial tire-kicking remains to be seen, but at this stage, the necessary allegations are present.

Defendants also argue that plaintiffs have failed to allege a plausible geographic market. In fact, both proposed pleadings now contain numerous allegations supporting their respective versions of the geographic market. (See JAC ¶ 117; TAC ¶ 208.) The Court views the JAC's allegations as more reasonable and more plausible—but it cannot now rule as a matter of law that what the TAC has asserted is either reasonable or plausible. Put differently, at this stage, plaintiffs need not show plausibility according to some sort of predominance (or probability) standard (that is, that their market is more likely than not correct). See *Twombly, 550 U.S. at 556*.

E. Concerted Action

In order for plaintiffs plausibly to allege coordinated conduct in violation of *§ 1*, they must allege plausible allegations **[**86]** of concerted action. Allegations merely consistent with unilateral action are insufficient. See *Twombly, 550 U.S. at 556-57*; *Copperweld, 467 U.S. at 768*; *Monsanto, 465 U.S. at 761*; *Anderson News, 680 F.3d at 183*. "[T]here is a basic distinction between concerted and independent action . . . ." *Monsanto, 465 U.S. at 761*. Allegations must support a unity of purpose, common design and understanding, or a meeting of the minds in an unlawful agreement. Cf. *Am. Tobacco Co. v. United States, 328 U.S. 781, 810, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*.

Plaintiffs need not, however, plead direct evidence of conspiracy. See *Anderson News, 680 F.3d at 183*. Conspiracies are rarely evidenced by explicit agreements—they must nearly always be proven through "'inferences that may fairly be drawn from the behavior of the alleged conspirators.'" Id. (quoting *Michelman v. Clark-Schwebel Fiber Glass Corp., 534 F.2d 1036, 1043 (2d Cir. 1976)*; see also *Mayor & City Council of Balt. v. Citigroup, Inc., 709*

F.3d 129, 136-37 (2d Cir. 2013) (in many antitrust cases, "smoking gun" evidence can be hard to come by, and thus a complaint must set forth sufficient circumstantial facts supporting an inference of conspiracy).

At the pleading stage, plaintiffs here must allege sufficient facts to support (not "prove" or even "demonstrate") a plausible inference that defendants reached an agreement; a complaint merely alleging parallel conduct alone is not sustainable. Twombly, 550 U.S. at 556; see also Mayor & City Council of Balt., 709 F.3d at 135-36 ("[A]lleging parallel conduct alone is insufficient, even **[*452]** at the pleading stage."); Anderson News, 680 F.3d at 184. In cases in which there is obvious parallel conduct and the question is whether it is **[**87]** the product of coordinated or unilateral decision making, a plaintiff must allege additional facts that point toward a meeting of the minds. Twombly, 550 U.S. at 557.

Even conscious parallelism in pricing among competitors is not itself unlawful. Id. at 553-54; In re Publ'n Paper, 690 F.3d at 62. By engaging in conscious parallelism, firms in a concentrated market may lawfully recognize shared economic interests and, in effect, lawfully exercise market power by setting their prices at a profit maximizing, supra-competitive level. Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227-28, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993). "Plus-factors" may provide the additional circumstances necessary to permit a fact-finder to infer a conspiracy. Examples of plus-factors are a common motive to conspire, actions taken against economic self-interest, and a high level of inter-firm communications. In re Publ'n Paper, 690 F.3d at 62; see also Apex Oil Co. v. DiMauro, 822 F.2d 246, 253-54 (2d Cir. 1987) (suggesting that allegations that are consistent only with market actors who are aware of and anticipate similar actions by competitors would be insufficient to support the existence of a tacit agreement).[33]

In both the JAC and the TAC plaintiffs cite a number of emails and documents from which they assert support an inference of an existing conspiracy. (E.g., JAC ¶¶ 2, 6, 7-8, 15; TAC ¶¶ 473, 476, 479-85, 488, 510, 512-22, 526-27, 529, 531, 533, 537-49, 565-66, 592-96, 605-07.) Plaintiffs cite documents which they assert show that Metro was at the heart of the alleged conspiracy and to have been more active than any other participant. The law does not require that all conspirators have the same level of involvement in a conspiracy, nor that they be involved at precisely the same time or for the same duration. See United States v. Nusraty, 867 F.2d 759, 763 (2d Cir. 1989).

Plaintiffs also cite documents they argue support an inference that Metro understood and intended that load-out delays would result in an increase in the Midwest **[*453]** Premium (e.g., JAC ¶¶ 187; TAC ¶¶ 291-94, 297,), and that JPMorgan's commodities unit understood that as well (JAC ¶ 152; TAC ¶ 465.)

[90]** Defendants argue that there are few allegations tying JPMorgan and its affiliated warehouse company Henry Bath LLC to the conspiracy. As to the number of allegations implicating JPMorgan, the Court agrees, but the

---

[33] In Mayor & City Council of Baltimore, the Second Circuit reviewed whether allegations of certain parallel conduct in the auction rate securities market were sufficient to support a § 1 conspiracy. Plaintiffs alleged that defendant banks conspired with each **[**88]** other to simultaneously stop buying auction rate securities for their own proprietary accounts, causing auctions to fail and the market to collapse. 709 F.3d at 131-32. The Court found that the allegations supported only parallel conduct. Id. at 138.

The Court began by noting that the crucial question in a § 1 case is whether the challenged conduct stems from an agreement, and that the existence of such an agreement is a legal conclusion to be determined by the court—and not a factual allegation. Id. at 135-36 (citing Starr v. Sony BMG Music Entm't, 592 F.3d 314, 319 n.2 (2d Cir. 2010)). The Court further stated that plaintiffs must allege additional circumstances supporting an inference of conspiracy; merely alleging that parallel conduct occurred is insufficient to overcome a motion to dismiss because it would "risk propelling defendants into expensive antitrust discovery on the basis of acts that could just as easily turn out to have been rational business behavior as they could a proscribed antitrust conspiracy." Id. at 136-37. The Court found that defendants' alleged actions—an en masse flight from a collapsing market in which they had significant downside exposure—made perfect sense in light of their business interests. Id. at 138. This made the case different from Starr, in which specific allegations **[**89]** supporting an inference that defendants' parallel conduct was against their own economic selfinterest led the Second Circuit to conclude that plaintiffs had plausibly alleged an antitrust conspiracy. See id. at 138-39 (citing Starr, 592 F.3d at 327.) Accordingly, the Court affirmed defendants' motion to dismiss. Id. at 140.

documents to which plaintiffs cite in the current versions of their pleadings add to the allegations previously made. The documents cited now support some inference that both these entities were connected to the alleged conspiracy and benefitting from it. Whether these inferences will withstand the test of time, further context, and cross-examination remains to be seen. For now, at the motion to dismiss stage, they are sufficient to support a conspiracy claim against Henry Bath LLC (JPMorgan having already been dismissed from this action).

Defendants urge this Court to look more closely at the documents, read them in context, and determine that such inferences would be unreasonable. On a motion to dismiss, there is a limited extent to which a Court may evaluate the content of documents incorporated in the parties' pleadings. To the extent that plaintiffs refer to a document, it then becomes incorporated by reference; and to the extent that the inference they ask the Court to **[**91]** draw is patently unreasonable, the Court need not simply accept the inference as fair. However, when two competing inferences are offered—even if one is stronger than the other—on a motion to dismiss, a Court cannot choose between them. See *Iqbal, 556 U.S. at 678*; *N.J. Carpenters, 709 F.3d at 121*.

IV. THE FLPS' SECTION 2 MONOPOLIZATION CLAIMS

Only the FLPs allege claims pursuant to *§ 2* of the Sherman Act. *Section 2* provides, in pertinent part: "[e]very person who shall monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several States . . . shall be deemed guilty of a felony." *15 U.S.C. § 2*. A violator of *§ 2* may be held civilly liable to any party suffering "injur[y] in his business or property" as a result of such a violation. *15 U.S.C. § 15*. Under *§ 2*, both the actions of a single firm to monopolize or to attempt to monopolize and conspiracies and combinations to monopolize or attempt to monopolize are unlawful. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 454, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*. In addition to adequately pleading facts supportive of the elements of a *§ 2* claim, plaintiffs must also adequately allege antitrust standing. See *Port Dock, 507 F.3d at 121-22*.

The FLPs assert that the Goldman Sachs entities have conspired with entities affiliated with the LME to monopolize the market for LME-certified warehouse services for aluminum in violation of *§ 2*. (TAC ¶¶ 435-43.) The Court reads this **[**92]** claim as asserting both a *§ 2* conspiracy and a *§ 2* monopolization claim. Both claims fail.

To state any claim under *§ 2*, a plaintiff must allege plausible facts that a defendant possesses market power (sometimes referred to as "monopoly power") in a relevant market, and the willful acquisition or maintenance of such power as "distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; see also *Heerwagen v. Clear Channel Commc'ns, 435 F.3d 219, 226 (2d Cir. 2006)*; *PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101, 105 (2d Cir. 2002)*. A firm possesses **[*454]** market power when it has the ability to raise price by restricting output. *PepsiCo., 315 F.3d at 107*. A plaintiff must also allege facts that the defendant has engaged in "'improper conduct that has or is likely to have the effect of controlling prices or excluding competition, thus creating or maintaining market power.'" *Heerwagen, 435 F.3d at 227* (quoting *PepsiCo, 315 F.3d at 108*).

Market power may be proven directly by evidence of the control of prices or the exclusion of competition. *PepsiCo, at 107*; *Todd, 275 F.3d at 206* ("If a plaintiff can show that a defendant's conduct exerted an actual adverse effect on competition, this is a strong indicator of market power."); *Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 98 (2d Cir. 1998)* (market power "may be proven directly by evidence of the control of prices"). However, in most cases this type of direct evidence is absent. "Indirect proof **[**93]** of market power, that is, proof that the defendant has a large share of the relevant market, is a surrogate for direct proof of market power." *Heerwagen, 435 F.3d at 227* (internal quotation marks omitted). "'In resolving market or 'monopoly' power issues, the courts have typically relied heavily on market definition and on the defendant firm's share of the market thus defined.'" *Id. at 227* (quoting 2A Phillip E. Areeda, Herbert Hovenkamp & John L. Solow, ***Antitrust Law*** ¶ 515, at 114 (2d ed. 2002)). Market power may be shown by one firm's large percentage share of a defined relevant market. *PepsiCo, 315 F.3d at 107*; *Tops Mkts., 142 F.3d at 98*. For instance, "a market share of over 70 percent is usually strong evidence of monopoly power." *Tops Mkts., 142 F.3d at 99* (internal quotation marks omitted). A showing of market power is a substantive element of a monopolization claim, and "plaintiff cannot escape proving her claims with reference to a particular market even if she intends to proffer direct evidence of controlling prices or excluding competition." *Heerwagen, 435 F.3d at 229*.

The relevant market is the "area of effective competition," which is determined by defining relevant product and geographic markets. *PepsiCo, at 105, 108*; *AD/SAT v. Associated Press, 181 F.3d 216, 226 (2d Cir. 1999)*. A relevant product market consists of "products that have reasonable interchangeability for the purposes **[**94]** for which they are produced—price, use and qualities considered." *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 404, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*; *Todd, 275 F.3d at 200*. Products are considered reasonably interchangeable if consumers treat them as acceptable substitutes. *PepsiCo, 315 F.3d at 105*. Cases are subject to dismissal when plaintiff fails to allege a plausible explanation as to why a market should be limited in a particular way. See *Todd, 275 F.3d at 200 nn.3-4* (collecting cases).

The court must also determine the boundaries of a relevant geographic market. *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1967)*; *United States v. Eastman Kodak Co., 63 F.3d 95, 104 (2d Cir. 1995)*. The geographic market encompasses the geographic area in which purchasers of the product can practicably turn for alternative sources of the product. *Tampa Elec., 365 U.S. at 327*. A geographic market is determined by "how far consumers will go to obtain the product or its substitute in response to a given price increase and how likely it is that a price increase for the product in a particular location will induce outside suppliers to enter that market and increase supply-side competition in that location." *Heerwagen, 435 F.3d at 227*. Factors relevant to geographic scope of a market "may include **[*455]** barriers to transactions between buyers and sellers of different locations, such as transportation costs to a particular location, as well as the relative preferences of consumers with respect to travel and price." *Id. at 228*. The **[**95]** geographic market for "goods sold nationwide is often the entire United States, though it need not be if purchasers cannot practicably turn to areas outside their own area for supply of the relevant product." Id. (citing *Standard Oil Co. v. United States, 337 U.S. 293, 299 n.5, 69 S. Ct. 1051, 93 L. Ed. 1371 (1949))*.

Finally, to state an attempted monopolization claim, a plaintiff must allege plausible facts supporting that the defendant has engaged in predatory or anticompetitive conduct, with a specific intent to monopolize a particular and defined market, and a dangerous probability of success. See *Spectrum Sports, 506 U.S. at 456*; *PepsiCo., 315 F.3d at 105*; *Tops, 142 F.3d at 99-100*. A plaintiff must also allege that anticompetitive conduct occurring in connection with obtaining or retaining a monopoly position is proximately related to plaintiffs' injuries. See *Litton Sys., Inc. v. Am. Tel. & Tel. Co., 700 F.2d 785, 802-03 (2d Cir. 1983)* (proximate cause required to establish monopolization charge); see also *Lexmark Int'l Inc. v. Static Control Components, Inc., 134 S. Ct. 1377, 1390, 188 L. Ed. 2d 392 (2014)* (a court should generally presume that a statutory cause of action is limited to plaintiffs whose injuries are proximately caused by violations of that statute).

There are a number of reasons the FLPs' First Claim cannot withstand scrutiny under *§ 2*.

First, the TAC alleges that Metro has a monopoly position. It is therefore Metro's position in a defined market that determines the viability of a *§ 2* claim.[34] Metro is alleged to have, **[**96]** or be about to achieve, a monopoly position in the market for LME-certified warehouse services for aluminum. (TAC ¶ 438.) The FLPs allege that "Metro intended to develop and did develop the market power to restrict output and set, control, and/or increase prices." (TAC ¶ 439.) Further, Metro is alleged to have "abused its monopoly power and discretion so as to impose the greatest restrictions on output that it could." (TAC ¶ 439.) Finally, Metro is alleged to have "knowingly and directly inflated the Midwest premium and other aluminum prices to increasingly higher levels." (TAC ¶ 439.) The LME, LME Holdings Limited, and HKEx along with other Goldman Sachs entities are alleged to have knowingly assisted Metro in its violations of the LME Charter so that it could monopolize the market. (TAC ¶ 441.)

[34] The Court notes that of the 146 LME-certified warehouses in the United States as of 2014, the warehouse defendants are alleged to own 123, or 84%. (See TAC ¶ 190.) The TAC is devoid of allegations regarding LME-certified warehouses not owned by defendants.

The FLPs' § 2 claim is incompatible with its § 1 claim. Moreover, in beefing up its § 1 claim between the prior pleadings and the instant ones, plaintiffs **[**97]** have cast conduct in warehouse services by many firms as an adjunct to trading activity by many firms—and it is both pieces together that allegedly caused competitive harm. The TAC does not support Metro and its Goldman financial affiliates alone being able to carry out the scheme (even assuming participation by the LME as alleged). Indeed, as discussed above, plaintiffs have alleged that Goldman and Metro needed and used conspirators in areas outside **[*456]** of Detroit to assist in the scheme. If, for instance, the JPMorgan entities and the Glencore entities and their affiliated companies were removed from this scheme, the FLPs would be proffering a different complaint that would require an altogether different analysis.

In addition, plaintiffs assert that Metro had or was on the cusp of achieving the ability to raise price or restrict output—that is, to exercise market power. The allegations as to Metro do not support this assertion. In this § 2 context in which the market alleged is the market for LME-certified warehouse services for aluminum, the "price" Metro can (even arguably) set concerns the cost of storage. That is the market in which Metro is alleged to have a monopoly position. Raising **[**98]** the price in this market would be raising the price for these services. But that is not plaintiffs' theory as laid out elsewhere in its complaint, and it is not the injury that plaintiffs claim to have suffered; the FLPs' injury is having paid more for aluminum due to an inflated Midwest Premium, in turn caused by an interaction between warehouse services and trading firm conduct.

Further, Metro is not alleged to have owned any aluminum as to which it could have increased price. Nor did it own aluminum warrants as to which it could control supply. At most, the allegations in the TAC support Metro's ability to slow-roll the supply of aluminum from its warehouses owned by others.

Even if the FLPs were able otherwise to allege plausible facts supportive of a § 2 claim, they do not have antitrust standing to pursue such a claim. Limited solely to actions taken in the market for LME-certified warehouse services for aluminum, the FLPs' antitrust standing is based solely on injuries they have sustained in connection with Metro's monopoly (or near-monopoly) position in that market. But the FLPs' allegations are not supportive. As cast, the FLPs' injury does not come from actions in that market **[**99]** alone. The FLPs themselves have not paid higher warehouse storage fees. Instead, the FLPs' injuries comes from a combination of actions relating to warehouse load-out delays and warrant trading—not solely the one and not solely the other. This interaction is not part of the § 2 claim.

The FLPs also fail the efficient enforcer test in connection with their § 2 claim.[35] It is only the combination of the coordinated actions of many different participants that spells out how plaintiffs' injury can be inextricably intertwined with the anticompetitive conduct. Analyzed on its own, as injury based solely on the monopolization of the market for LME-certified warehouse services for aluminum, the FLPs are not efficient enforcers. There are others more appropriately situated to pursue a monopoly claim in this market. The FLPs are simply too remote from the market for LME-certified warehouse services for aluminum to have antitrust standing to pursue a claim based on anticompetitive conduct in that market.

In sum, for the foregoing reasons, the FLPs' § 2 claim must be dismissed.

V. STATE LAW CLAIMS

Both the JAC and the TAC allege claims **[**100]** arising under the laws of various states. The JAC's Second Claim and the TAC's Sixth Claim seek relief under New York's Donnelly Act (JAC ¶¶ 337-43; TAC ¶¶ 643-48); the JAC's Third Claim seeks **[*457]** relief under California's Cartwright Act[36] (JAC ¶¶ 344-50); and the TAC's Fifth Claim seeks relief under Michigan's MARA (TAC ¶¶ 637-42). As explained in the Court's September 15, 2014 Memorandum Decision & Order (ECF No. 586 ("Prior State Law Op.")), the Donnelly Act and the Cartwright Act are modeled on § 1 of the Sherman Act, and the MARA is modeled on the Sherman Act generally (Prior State Law Op.

[35] The Court here incorporates the legal standard for standing set forth above.

[36] The TAC lists **[**101]** the Cartwright Act as a cause of action without breaking out its elements or explaining how they are met. (TAC ¶ 651(d).) Accordingly, the Court dismisses the FLPs' Cartwright Act claim under the Rule 8 analysis listed below.

at 4-6). The requirements for establishing claims under these statutes are essentially the same as those for doing so under the Sherman Act. (Prior State Law Op. at 4-7.) Accordingly, because plaintiffs have established plausible claims for relief under *§ 1* of the Sherman Act, their analogous claims for relief under the Donnelly Act, the Cartwright Act, and the MARA are also plausible, and may go forward. By the same token, because the FLPs have not alleged a plausible claim for relief under *§ 2* of the Sherman Act, to the extent that their claim under the MARA is predicated on unlawful monopolization, it must also be dismissed.

The FLPs, however, have not just asserted claims under state analogues for the Sherman Act; their Seventh and Eighth claims are a potpourri of antitrust, unfair competition, unfair trade practices, and unjust enrichment claims under the laws of 34 states and the District of Columbia. (TAC ¶¶ 651, 655, 658.) As explained in the Court's September 15, 2014 decision, a complaint that merely offers "a formulaic recitation of the elements of a cause of action will not do." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. Yet the FLPs simply provide lists of state causes of action, without even listing their elements or explaining how their factual allegations establish valid claims for relief under them. This is insufficient to meet even the basic requirements of *Rule 8*, and accordingly, these claims must be dismissed.[37] *Iqbal, 556 U.S. at 678* ("A pleading that offers labels and conclusions or formulaic recitation of the elements of a cause of action will not do.").

The FLPs' Ninth Claim for relief is an unjust enrichment claim. (TAC ¶¶ 657-63.) This claim is predicated on defendants' other federal and state law claims. To the extent that the FLPs' unjust enrichment claim relies upon other claims that are being dismissed by this Court, it too must be dismissed. (See Prior State Law Op. at 8 (collecting cases).) However, although plaintiffs cannot ultimately recover under both the antitrust laws and state unjust enrichment law, there is no bar to pleading both claims simultaneously at the pleading stage. *In re Credit Default Swaps Antitrust Litig., No. 13md2476 (DLC), 2014 U.S. Dist. LEXIS 123784, 2014 WL 4379112, at *18 (S.D.N.Y. Sept. 4, 2014)*. Accordingly, the Court will permit the FLPs' unjust enrichment claim to go forward.

In sum, all of plaintiffs' state law claims **[**103]** are dismissed, excepting plaintiffs' Donnelly Act claims, Mag, Agfa, and Kodak's **[*458]** Cartwright Act claim, the FLPs' MARA claim to the extent it does not concern monopolization, and the FLPs' unjust enrichment claim to the extent it is not predicated upon other claims that are being dismissed by this Court.

VI. CONCLUSION

For all of the reasons set forth above, defendants' motions to dismiss the JAC are DENIED and plaintiffs' motion for leave to amend the JAC is GRANTED; plaintiffs' motion for leave to amend the TAC is GRANTED IN PART and DENIED IN PART. The FLPs may assert the Third, Fifth, Sixth, and Ninth Claims for Relief stated in the TAC. Mag, Agfa, and Kodak may assert all claims in the JAC.

Discovery in this matter shall proceed immediately. The parties are directed to confer on a schedule for the remainder of this case including fact and expert discovery, briefing on class certification with regard to the TAC,[38] final motions for summary judgment (this Court takes motions for summary judgment, in whole or in part, at any time), and trial. The parties shall submit a joint proposed schedule within one week of the date of this Opinion.

The Clerk **[**104]** of Court is directed to close the motion at ECF No. 654.

SO ORDERED.

Dated: New York, New York

---

[37] The TAC does list the elements of the causes of action under New York's and Rhode Island's **[**102]** consumer protection and unfair competition laws. (TAC ¶ 655(s),(u).) However, these lists are presented in precisely the formulaic, conclusory manner no longer permitted under Iqbal. See *556 U.S. at 678*. Further, the TAC is devoid of the state-specific allegations regarding defendants' engagement in commerce, public statements, and effects on plaintiffs within those states required to establish that these claims are plausible. These claims are therefore also properly dismissed.

[38] The JAC does not contain class allegations.

March 26, 2015

LexisNexis® Headnotes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN1[] **Class Actions, Prerequisites for Class Action**

To be certified, a proposed class must satisfy the requirements of *Fed. R. Civ. P. 23(a)*, as well as one of the three alternatives in *Rule 23(b)*. *Rule 23(a)* requires plaintiffs to prove numerosity, typicality, commonality, and adequacy of representation. *Rule 23(b)(3)* also requires plaintiffs to prove that: (1) the questions of law or fact common to the members of the proposed class predominate over questions affecting only individual members; and (2) a class action is superior to other available methods of resolving the controversy.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > Burdens of Proof > Allocation

HN2[] Class Actions, Prerequisites for Class Action

Plaintiffs bear the burden of satisfying *Fed. R. Civ. P. 23*, which is not a mere pleading standard. To meet this burden, the plaintiffs must satisfy through evidentiary proof each of *Rule 23*'s elements. In deciding a class certification motion, a court must conduct a rigorous analysis before it can determine whether the plaintiffs have satisfied *Rule 23*'s requirements. This often means that a court must resolve issues that also bear on the merits of the claim, but only if those issues overlap with class certification issues.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > Burdens of Proof > Allocation

Evidence > Burdens of Proof > Preponderance of Evidence

HN3[] Class Actions, Prerequisites for Class Action

Despite the need for rigorous analysis, a court should not turn the class certification proceedings into a dress rehearsal for a trial on the merits. Instead, the court need only consider the evidence submitted by the parties and determine whether the plaintiffs have proven each of *Fed. R. Civ. P. 23*'s elements by a preponderance of the evidence.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN4[] Class Actions, Prerequisites for Class Action

When an expert's report or testimony is critical to class certification, a district court must make a conclusive Daubert ruling on any challenge to that expert's qualifications or submissions before it may rule on a motion for class certification.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN5[] Class Actions, Certification of Classes

Several courts have held evidentiary hearings prior to deciding a class certification motion, but such hearings are not required. Rather, the U.S. Supreme Court and the U.S. Court of Appeals for the Seventh Circuit have admonished district courts not to simply accept the plaintiffs' pleadings as true and to conduct a rigorous analysis of the plaintiffs' class certification claims.

Civil Procedure > Discovery & Disclosure > Disclosure > Mandatory Disclosures

HN6[] Disclosure, Mandatory Disclosures

Fed. R. Civ. P. 26(a)(2) governs expert discovery and requires a party to disclose to the other parties a written report of a retained expert that includes a complete statement of all opinions the witness will express and the basis and reasons for them. An expert rebuttal report is meant to contradict or rebut evidence disclosed in the initial report, *Fed. R. Civ. P. 26(a)(2)(D)(ii)*, and its proper function is to contradict, impeach or defuse the impact of the evidence offered by an adverse party. *Rule 26* does not address reply expert reports, but, much like reply briefs, parties may not advance new arguments for the first time in a reply expert report. If a reply expert report is truly rebuttal evidence, then it is admissible and the opposing party is not entitled to respond to it. If, however, the reply report contains new opinions that are not proper rebuttal testimony, the report must be stricken.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN7[] **Prerequisites for Class Action, Adequacy of Representation**

In order to warrant class certification, plaintiffs must prove numerosity, typicality, commonality, and adequacy of representation. *Fed. R. Civ. P. 23(b)*'s predominance standard often overlaps with typicality, commonality, and adequacy.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN8[] **Prerequisites for Class Action, Predominance**

Fed. R. Civ. P. 23(b)(3) requires that "questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN9[] **Regulated Practices, Private Actions**

The predominance inquiry under *Fed. R. Civ. P. 23(b)(3)* trains on the legal or factual questions that qualify each class member's case as a genuine controversy, with the purpose being to determine whether a proposed class is sufficiently cohesive to warrant adjudication by representation. Predominance is similar to *Rule 23(a)*'s typicality and commonality requirements, but the predominance criterion is far more demanding. And although the U.S. Supreme Court has said that predominance is a test readily met in antitrust cases, that simply means that in antitrust cases, *Rule 23*, when applied rigorously, will frequently lead to certification. This does not, however, make class certification automatic in antitrust cases.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN10[] **Prerequisites for Class Action, Predominance**

Generally, *Fed. R. Civ. P. 23(b)(3)* predominance is satisfied when common questions represent a significant aspect of a case and can be resolved for all members of a class in a single adjudication. In other words, common questions can predominate if a common nucleus of operative facts and issues underlies the claims brought by the proposed class. The presence of some individual questions is not fatal, but individual questions cannot predominate over the common ones. To determine if a question is common, a court must look to the evidence necessary to answer that question; if the members of a proposed class will need to present evidence that varies from member to member to answer the question, then the question is an individual one. Conversely, if the same evidence will suffice for each member to answer the question at issue, then the question is common.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN11[] **Regulated Practices, Private Actions**

Analysis of predominance under *Fed. R. Civ. P. 23(b)(3)* begins, of course, with the elements of the underlying cause of action. In the antitrust context, plaintiffs must prove: (1) that the defendants violated federal ***antitrust law***; and (2) that the antitrust violation caused them some injury. The plaintiffs must also show damages, but it is well established that the presence of individualized questions regarding damages does not prevent certification.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN12[] **Prerequisites for Class Action, Predominance**

Fed. R. Civ. P. 23(b)(3) does not require a plaintiff seeking class certification to prove that each individual element is susceptible to class wide proof. Rather, the inquiry is more holistic. And although predominance analysis is not simply bean counting, analyzing each element separately is useful in isolating what questions are common and determining whether those questions predominate.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN13[] **Prerequisites for Class Action, Predominance**

Whether a conspiracy exists is a common question that is thought to predominate over the other issues in the case and has the effect of satisfying the prerequisite in *Fed. R. Civ. P. 23(b)(3)*.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN14[] **Private Actions, Remedies**

"Impact" and "damages" are two separate elements in an antitrust claim. Impact is whether the plaintiffs were harmed, whereas damages quantify by how much. Oftentimes, demonstrating impact and damages involves comparing the but-for price — the price a customer would have paid in the absence of the conspiracy — and the actual price paid. When that happens, the single comparison establishes both impact and damages. Thus: One way of demonstrating predominance is to show that there is a common method for proving that the class plaintiffs paid higher actual prices than in the but-for world, such as using an econometric regression model incorporating a variety of factors to demonstrate that a conspiracy variable was at work during the class period, raising prices above the "but-for" level for all plaintiffs.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN15[] **Private Actions, Remedies**

Where other methods of common proof in an antitrust case exist to show class-wide impact such as lock-step increases of national price lists in an oligopolistic market, comparing but-for prices with actual transaction prices is not the only way for plaintiffs to succeed in an motion for class certification. For example, if it appears that plaintiffs may be able to prove at trial the price range was affected generally, then the plaintiffs can show impact without a but-for comparison, and this is so even if there are negotiated prices or a variety of prices.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN16[] **Conspiracy to Monopolize, Sherman Act**

Courts have long held that a plaintiff can demonstrate antitrust impact by showing that the conspiracy caused an increase to the standard market price of the product at issue.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN17[] **Sherman Act, Claims**

Demonstrating antitrust impact for class-certification purposes does not require that the plaintiffs prove antitrust impact. Instead, the plaintiffs need only to demonstrate that the element of antitrust impact is capable of proof at trial through evidence that is common to the class rather than individual to its members. The focus, then, is on the evidence necessary to establish antitrust impact, not on whether the plaintiffs have adequately proven it. The court's overriding concern is whether the plaintiffs have established that the proposed class is sufficiently cohesive to warrant adjudication by representation.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN18[] **Sherman Act, Claims**

A court looks to all the evidence to determine whether the plaintiffs have established that evidence common to the class is capable of proving antitrust impact.

Antitrust & Trade Law > Sherman Act > Claims

HN19[] **Sherman Act, Claims**

It is a well-accepted practice to look to industry events as a whole to determine whether a defendant's conduct is consistent with collusion in an antitrust case.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN20[] **Regulated Practices, Price Fixing & Restraints of Trade**

The prevailing view is that price-fixing affects all market participants, creating an inference of class-wide impact even when prices are individually negotiated.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN21[] **Prerequisites for Class Action, Predominance**

Damages are but one element that a court considers in determining predominance under *Fed. R. Civ. P. 23(b)(3)*. To establish predominance, a plaintiff must produce a reliable method of measuring class-wide damages based on common proof. But, it is well established that the presence of individualized questions regarding damages does not prevent certification.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN22[] **Prerequisites for Class Action, Predominance**

Comcast did not change the well-established rule that the existence of individual damage issues does not automatically defeat class certification.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN23[] **Expert Witnesses, Daubert Standard**

In some instances, inclusion or exclusion of a certain variable might be egregious enough to render an expert's report inadmissible altogether.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN24[] **Sherman Act, Claims**

To the extent that there are individualized damages issues, that alone will not defeat class certification, especially where common issues predominate the liability and impact elements of the plaintiffs' antitrust claim.

Civil Procedure > Settlements > General Overview

Civil Procedure > Settlements > Releases From Liability > General Releases

HN25[] **Civil Procedure, Settlements**

When parties settle a case, a court may release not only those claims alleged in the complaint and before the court, but also claims which could have been alleged in connection with any matter or fact set forth or referred to in the complaint. Such a general release is valid as to all claims of which a signing party has actual knowledge or that he could have discovered upon reasonable inquiry. In other words, a release applies only as long as the released conduct arises out of the identical factual predicate as the settled conduct.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN26[] **Class Actions, Certification of Classes**

A court has the authority under *Fed. R. Civ. P. 23(c)(1)(C)* to modify the class any time before final judgment.

Antitrust & Trade Law > Clayton Act > Scope

HN27[] **Antitrust & Trade Law, Clayton Act**

Generally speaking, a co-conspirator who joins a conspiracy with knowledge of what has gone on before and with an intent to pursue the same objectives may, in the antitrust context, be charged with the preceding acts of its co-conspirators.

Opinion

[*588] **MEMORANDUM OPINION AND ORDER**

Before the Court are Defendants' Motion to Strike [ECF No. 845], and Plaintiffs' Motion for Class Certification [ECF No. 657.] These Motions have resulted in a deluge of briefing; the Class Certification Motion alone spawned seven separate briefs that total more than 3 00 pages (not including the attached exhibits) and that include two sur-replies and several notices of supplemental authority. **[**8]** The Court has rigorously analyzed all of the parties' submissions, and for the following reasons, Defendants' Motion to **[*589]** Strike [ECF No. 845] is granted in part and denied in part, and Plaintiffs' Class Certification Motion [ECF No. 657] is granted.

I. BACKGROUND

Plaintiffs are a proposed class of entities that directly purchased Containerboard Products from Defendants. Containerboard Products include containerboard itself and the various products made out of containerboard, such as containerboard sheets, which are used to make corrugated products like displays, boxes, and other containers. Plaintiffs allege that Defendants engaged in a conspiracy to artificially manipulate the market in order to increase the price of Containerboard Products in violation of antitrust laws. *See*, 15 U.S.C. § 1. The crux of Plaintiffs' Complaint is that Defendants agreed "to restrict the supply of containerboard by cutting capacity, slowing back production, taking downtime, idling plants, and tightly restricting inventory." [Pl.'s Mot. for Class Cert, at 1, ECF No. 660.] According to Plaintiffs, these actions illegally increased the price of containerboard, which caused them to pay more for Containerboard Products than **[**9]** they otherwise would have paid absent the conspiracy.

Plaintiffs seek to certify as a class:

> All persons that purchased Containerboard Products directly from any of the Defendants or their subsidiaries or affiliates for use or delivery in the United States from at least as early as February 15, 2004 through November 8, 2010.

The proposed class definition also excludes certain groups from being class members:

> Specifically excluded from this Class are the Defendants; officers, directors, or employees of any Defendant; any entity in which any Defendant has a controlling interest; and any affiliate, legal representative, heir or assign of any Defendants. Also excluded from this Class are any federal, state or local governmental entities, any judicial officer presiding over this action and the members of his or her immediate family and judicial staff, and any juror assigned to this action.

Defendants oppose certification, arguing that Plaintiffs have not satisfied *Rule 23*.

II. LEGAL STANDARD

HN1[] "To be certified, a proposed class must satisfy the requirements of *Federal Rule of Civil Procedure 23(a)*, as well as one of the three alternatives in *Rule 23(b)*." *Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 811 (7th Cir. 2012)*. *Rule 23(a)* requires Plaintiffs to prove "numerosity, typicality, commonality, and adequacy of representation." **[**10]** *Id.* Plaintiffs in this case seek certification under *Rule 23(b)(3)*, which also requires them to prove that: (1) the questions of law or fact common to the members of the proposed class predominate over questions affecting only individual members; and (2) a class action is superior to other available methods of resolving the controversy. *Id.*

HN2[] Plaintiffs bear the burden of satisfying *Rule 23*, which is not "'a mere pleading standard.'" *Comcast Corp. v. Behrend, 133 S.Ct. 1426, 1432, 185 L. Ed. 2d 515 (2013)* (quoting *Wal-Mart Stores, Inc. v. Dukes, 131 S.Ct. 2541, 2551-52, 180 L. Ed. 2d 374 (2011))*. To meet this burden, Plaintiffs must "satisfy through evidentiary proof" each of *Rule 23*'s elements. *Id.* In deciding a class certification motion, the Court must conduct a "rigorous analysis" before it can determine whether Plaintiffs have satisfied *Rule 23*'s requirements. *Id.* (internal quotation marks omitted). This often means that a Court must resolve issues that also bear on the merits of the claim, but only if those issues overlap with class certification issues. *Id.*

HN3[] Despite the need for rigorous analysis, "the court should not turn the class certification proceedings into a dress rehearsal for a trial on the merits." *Messner, 669 F.3d at 811*. Instead, the Court need only consider the evidence submitted by the parties and determine whether Plaintiffs have proven each of *Rule 23*'s elements by a preponderance **[**11]** of the evidence. *Id.*

III. ANALYSIS

There are two preliminary issues the Court must address. First, the Seventh **[*590]** Circuit has held that "***HN4***[] [w]hen an expert's report or testimony is 'critical to class certification,' . . . a district court must make a conclusive [*Daubert*] ruling on any challenge to that expert's qualifications or submissions before it may rule on a motion for class certification." *Id. at 812* (quoting *Am. Honda Motor Co. v. Allen, 600 F.3d 813, 815-16 (7th Cir. 2010))*. Expert reports in this case are indeed critical to class certification, but no Defendant has yet challenged Plaintiffs' experts on *Rule 702* or *Daubert* grounds. To the contrary, Defendants have "expressly reserve[d] their right to move to exclude [Plaintiffs' experts] under *Daubert* and *Rule 702*." [Def.'s Mem. in Opp. to Pl.'s Mot. for Class Cert. ("Def.'s Opp. Br.") at 40 n.35, ECF No. 763.] Although Defendants vigorously challenge Plaintiffs' experts' methodology and conclusions in the context of arguing that Plaintiffs' have not satisfied *Rule 23*, none of those arguments are based on *Rule 702* or *Daubert*. Defendants have not challenged, for example, Plaintiffs' experts' education or qualifications. The Court therefore reserves ruling on Plaintiffs' experts' admissibility until Defendants raise and brief that issue.

Second, Defendants **[**12]** seek a full evidentiary hearing prior to the Court deciding whether to certify the class. Plaintiffs oppose such a hearing, arguing that it is unnecessary and would waste time and money. ***HN5***[] Several courts have held evidentiary hearings prior to deciding a class certification motion, *see, e.g., In re Groupon, Inc. Sec. Litig., No. 12 C 2450, 2014 U.S. Dist. LEXIS 67437, 2014 WL 2035853, at *2 (N.D. Ill. May 16, 2014)*, but as far as the Court is aware, such hearings are not required. Rather, the Supreme Court and Seventh Circuit have admonished district courts not to simply accept Plaintiffs' pleadings as true and to conduct a "rigorous analysis" of the Plaintiffs' class certification claims. *See, Comcast Corp., 133 S.Ct. at 1432* ("Repeatedly, we have emphasized that it may be necessary for the court to probe behind the pleadings before coming to rest on the certification question . . . .") (internal quotation marks omitted). As stated above, the parties have submitted an avalanche of briefing and opposing expert reports that set forth the parties' positions on the issues. Included in this briefing are thousands of pages of documents substantiating the parties arguments. Moreover, the parties' central dispute is legal, not factual. The dispute centers mainly on the proper legal standard under *Rule 23* and whether Plaintiffs' experts' reports are enough **[**13]** to satisfy that standard. For the most part, the parties agree on the basic facts, and both parties' experts rely upon the same data, so there are little if any factual disputes that the Court must resolve to decide class certification. Given the extensive paper record and the completeness of the parties' briefing, an evidentiary hearing would not add much to the Court's analysis. Thus, the Court is confident that it can determine class certification based on a careful examination of the evidentiary record the parties have submitted.

Having resolved those threshold issues, the Court must first decide Defendants' Motion to Strike some of the materials Plaintiffs submitted with their reply brief. Once that issue is decided, the Court can then determine whether Plaintiffs have satisfied *Rule 23*. All Defendants have joined in a single response to Plaintiffs' Class Certification Motion, to which Plaintiffs have replied. Defendant RockTenn joined in the combined response but also filed a separate response to the Class Certification Motion based on arguments that apply only to RockTenn. Plaintiff replied to RockTenn's response, to which RockTenn filed a Sur-reply, which prompted Plaintiffs to file **[**14]** a Sur-sur-reply. After deciding the Motion to Strike, the Court will first consider the joint opposition to class certification and then consider RockTenn's unique opposition.

A. Motion to Strike Plaintiffs' Reply Experts' Reports

Plaintiffs' initial Class Certification Motion contained expert reports from Drs. Mark Dwyer and Michael Harris. Defendants' combined response to the Motion included expert reports from Drs. Janusz Ordover and Dennis Carlton, who both criticized Plaintiffs' experts' reports in a number of ways, including a criticism of Plaintiffs' experts' choice of testing and methodology to prove class-wide injury. In response, Plaintiffs obtained reply **[*591]** expert reports from Drs. Dwyer and Harris, and also obtained a report from a new expert, Dr. Douglas Zona. Defendants have moved to strike certain portions of Dr. Dwyer's reply report and all of Dr. Zona's report.

HN6[] *Federal Rule of Civil Procedure 26(a)(2)* governs expert discovery and "requires a party to disclose to the other parties a written report of a retained expert that includes 'a complete statement of all opinions the witness will express and the basis and reasons for them.'" *Sloan Valve Co. v. Zurn Indus., Inc., No. 10 C 204, 2013 U.S. Dist. LEXIS 85897, 2013 WL 3147349, at *1 (N.D. Ill. June 19, 2013)* (quoting *Fed. R. Civ. P. 26 (a)(2)(B)(i)*). An expert rebuttal report is meant to "contradict or rebut **[**15]** evidence" disclosed in the initial report, *Fed. R. Civ. P. 26(a)(2)(D)(ii)*, and its "proper function . . . is to contradict, impeach or defuse the impact of the evidence offered by an adverse party." *Pearls v. Terre Haute Police Dep't, 535 F. 3d 621, 630 (7th Cir. 2008)*. *Rule 26* does not address reply expert reports, but, much like reply briefs, parties may not advance new arguments for the first time in a reply expert report. *Sloan Valve Co., 2013 U.S. Dist. LEXIS 85897, 2013 WL 3147349, at *1*. If a reply expert report is truly rebuttal evidence, then it is admissible and the opposing party is not entitled to respond to it. *2013 U.S. Dist. LEXIS 85897, [WL] at *4*. If, however, the reply report contains new opinions that are not proper rebuttal testimony, the report must be stricken. *2013 U.S. Dist. LEXIS 85897, [WL] at *2-3*.

1. Dr. Dwyer's Reply Report

Plaintiffs' disclosed Dr. Dwyer as an expert within the time frame outlined in the Court's scheduling order. The question is whether his reply report constitutes new and alternative opinion testimony or is instead proper rebuttal testimony in support of his original report.

Sloan Valve Co. is instructive. In that case, the plaintiff's initial expert report calculated damages based on "collateral unit sales ratios," and in that report the expert included data on both weighted and unweighted ratios. *2013 U.S. Dist. LEXIS 85897, [WL] at *2*. Despite including both sets of data, the expert's damages calculation relied **[**16]** solely on the weighted ratios. *Id.* In response, the defendant's expert attacked the plaintiff's expert for relying upon only the weighted ratios. *Id.* Consequently, the plaintiff's expert's reply report conducted a new calculation using the unweighted ratios in order to demonstrate that using the unweighted ratios would not change his initial conclusions. *Id.* The court found that this was proper reply expert testimony because, "rather than offering a new opinion and changing the basis for the calculation of the collateral unit sales, [the plaintiff's reply expert] included the [new] calculation . . . to refute [the defendant's expert's] criticisms." *Id.*

The plaintiff's reply expert report also included a "revised and increased estimate of incremental costs" based on data that the defendant first disclosed in its rebuttal expert's report. *2013 U.S. Dist. LEXIS 85897, [WL] at *3*. The court refused to strike that reply expert testimony because it was based on data that was previously unavailable to the plaintiff's expert due to the defendant's failure to disclose it. *Id.* Finally, the court struck a portion of the plaintiff's expert report that constituted "a new, alternative collateral sales calculation" based on data that was **[**17]** available to the plaintiff's expert when he filed his initial report. *Id.* The plaintiff argued that the new calculation was in response to the defendant's expert's criticism, but the court found that the opinion was new because it included a new opinion based on data that was not a part of the plaintiff's expert's initial report, though it was available to him. *Id.*

In this case, Dr. Dwyer's initial report concluded that "all or nearly all members of the proposed class were impacted by price increases implemented by the defendants," which is explored more thoroughly below in the Court's analysis regarding class certification. Dr. Dwyer's conclusion was based on "systematic, empirical comparisons of net prices paid by class members of Containerboard Products before and after price increase implementation dates previously announced by the defendants." Defendants' experts criticized Dr. Dwyer for conducting what Defendants call a "one penny more" analysis, where any increase in price is attributed to Defendants' alleged conduct. This, according to Defendants, means that **[*592]** Dr. Dwyer's methods did not account adequately for other factors that would have caused an increase in price even without **[**18]** a conspiracy. Defendants' experts argue that Dr. Dwyer should have done a "but-for" analysis to determine antitrust impact.

In his reply, Dr. Dwyer does the analyses that Defendants' experts argue he should have done initially. Importantly, Dr. Dwyer does not abandon his prior methods or conclusions. Rather, he conducted the additional analyses to refute Defendants' arguments and to show that his original conclusions and opinions are sound and a reliable method of assessing antitrust impact. This makes Dr. Dwyer's reply report remarkably similar to the reply report allowed in Sloan Valve Co. Much like the reply report in that case that included new calculations based on the same data included in the initial report, here Dr. Dwyer's reply report is based on the same data in his original report and does not seek to include new data. Instead of abandoning his prior methods in favor of the new ones, Dr. Dwyer's reply concludes that the new calculations support his initial methodology and opinions. Dr. Dwyer further concludes that Defendants' experts are wrong when they say that the additional testing and methods show that there is no antitrust impact. This is the very purpose of a reply **[**19]** report: to refute a defendant's expert's arguments and to provide further support, rather than abandoning, one's initial opinions. Dr. Dwyer will be held to the original methodology and opinions in his initial report, but that does not mean he cannot respond to Defendants' experts' criticisms in defending his initial conclusions. Thus, the Court denies Defendants' Motion to Strike to the extent that it seeks to strike portions of Dr. Dwyer's reply report.

2. Dr. Zona's Reply Report

Dr. Zona was not initially an expert disclosed before class certification briefing. Dr. Zona is an expert Plaintiffs hired to examine "the opening expert reports submitted by Drs. Harris and Dwyer, as well as the reports submitted by

Drs. Carlton and Ordover." He also conducted his own "but-for" analysis and concludes that Dr. Dwyer's "methodology and opinions on both impact and damages [is] reliable and valid."

Defendants are probably correct that Dr. Zona's report should be stricken. The Court need not engage in lengthy analysis, however, because Plaintiffs do not need Dr. Zona's report to satisfy *Rule 23*, a point Plaintiffs concede. Thus, the Court grants Defendants' Motion to Strike Dr. Zona's report.

B. Class [20] Certification — Combined Arguments**

Having narrowed the range of expert evidence to only the reports and deposition testimony of Drs. Dwyer, Harris, Ordover, and Carlton, the Court now considers whether to certify Plaintiffs' proposed class based on the parties' combined briefing.

1. Rule 23(a) Elements

HN7[] In order to warrant class certification, Plaintiffs must prove "numerosity, typicality, commonality, and adequacy of representation." *Messner, 669 F.3d at 811*. As Defendants correctly note, *Rule 23(b)*'s predominance standard often overlaps with typicality, commonality, and adequacy. Thus, Defendants have focused their arguments on predominance issues rather than individually attacking each of *Rule 23(a)*'s elements. Essentially, Defendants have conceded that typicality, commonality, and adequacy have been satisfied so long as Plaintiffs have adequately proven predominance.

As to numerosity, Defendants have not specifically challenged that element in their briefing, and the element is easily satisfied in this case. The sales data relied upon by both parties' experts establish that the proposed class numbers in the thousands. A potential class that large is sufficiently numerous for *Rule 23(a)* purposes. *See, Schmidt v. Smith & Wollensky LLC, 268 F.R.D. 323, 326 (N.D. Ill. 2010)*.

2. Rule 23 (b)(3) Elements

Plaintiffs seek certification under **[**21]** ***HN8***[] *Rule 23(b)(3)*, which requires that "questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly **[*593]** and efficiently adjudicating the controversy." The Court will discuss predominance first and then, if necessary, superiority.

i. Predominance

The parties' statements of the proper legal standard for determining predominance differ greatly. To read Plaintiffs' version, one would think that predominance naturally flows from the fact that this is an antitrust case. [Pl.'s Mot. for Class Cert. at 49, ECF No. 660.] Defendants' version, on the other hand, would lead one to believe that the Supreme Court's opinion in *Comcast* makes satisfying predominance nearly insurmountable. [Def.'s Opp. Br. at 23-27, ECF No. 763.] The truth is somewhere in the middle.

HN9[] The predominance inquiry under *Rule 23(b)(3)* "'trains on the legal or factual questions that qualify each class member's case as a genuine controversy,' with the purpose being to determine whether a proposed class is 'sufficiently cohesive to warrant adjudication by representation.'" *Messner, 669 F.3d at 814* (quoting *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 623, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997))*. Predominance is similar to *Rule 23(a)*'s typicality and commonality **[**22]** requirements, but "the predominance criterion is far more demanding." *Id.* (internal quotation marks omitted). And although the Supreme Court has said that "predominance is a test readily met" in antitrust cases, that simply means that "in antitrust cases, *Rule 23*, when applied rigorously, will frequently lead to certification." *Id. at 815* (internal quotation marks and citation omitted). This does not, however, make class certification automatic in antitrust cases. *See, id.*

HN10[] Generally, predominance is satisfied when "'common questions represent a significant aspect of [a] case and can be resolved for all members of [a] class in a single adjudication.'" *Id.* (quoting 7AA Wright and Miller, Federal Practice & Procedure § 1778 (3d Ed. 2011)). In other words, "common questions can predominate if a common nucleus of operative facts and issues underlies the claims brought by the proposed class." *Id.* (internal quotation marks omitted). The presence of some individual questions is not fatal, but individual questions cannot predominate over the common ones. *Id.* To determine if a question is common, the Court must look to the evidence necessary to answer that question; if "the members of a proposed class will need **[**23]** to present evidence that varies from member to member" to answer the question, then the question is an individual one. *Id.* (internal quotation marks omitted). Conversely, "if the same evidence will suffice for each member" to answer the question at issue, then the question is common. *Id.*

HN11[] "Analysis of predominance under *Rule 23(b)(3)* 'begins, of course, with the elements of the underlying cause of action.'" *Id.* (quoting *Erica P. John Fund, Inc. v. Halliburton Co., 563 U.S. 804, 131 S.Ct. 2179, 2184, 180 L. Ed. 2d 24 (2011))*. In the antitrust context, plaintiffs must prove: "(1) that [Defendants] violated federal ***antitrust law***; and (2) that the antitrust violation caused them some injury." *Id.* Plaintiffs must also show damages, but "[i]t is well established that the presence of individualized questions regarding damages does not prevent certification." *Id.* (citing *Wal-Mart, 131 S.Ct. at 2558*).

To provide a clearer analysis, the Court will discuss each antitrust element separately, keeping in mind that ***HN12***[] "*Rule 23(b)(3)* . . . does not require a plaintiff seeking class certification to prove" that each individual element is "susceptible to classwide proof." *Amgen Inc. v. Conn. Ret. Plans and Trust Funds, 133 S.Ct. 1184, 1196, 185 L. Ed. 2d 308 (2013)*. "Rather, the inquiry is more holistic." *In re High-Tech Employee Antitrust Litig., 985 F.Supp.2d 1167, 1184 (N.D. Cal. 2013)*. And although predominance analysis is not simply "bean counting," *Butler v. Sears, Roebuck and Co., 727 F.3d 796, 801 (7th Cir. 2013)*, analyzing each element separately is useful in isolating what questions are common **[**24]** and determining whether those questions predominate.

a. Plaintiffs' Liability Proof

Plaintiffs have established that common questions regarding liability predominate over any individual issues. Plaintiffs' **[*594]** theory of liability is based on Defendants' alleged conspiracy to coordinate supply restrictions and price increase announcements in order to cause the price of Containerboard Products to increase. To prove each element of a conspiracy, virtually all class members would be relying on the same evidence that Plaintiffs have submitted in support of class certification — namely the documents, emails, phone records, and other indirect evidence necessary to prove that Defendants conspired in violation of antitrust laws. This type of alleged conspiracy is the prototypical example of an issue where common questions predominate, because it is much more efficient to have a single trial on the alleged conspiracy rather than thousands of identical trials all alleging identical conspiracies based on identical evidence. *See*, 7AA Wright & Miller, Federal Practice & Procedure § 1781 (3d Ed. 2014) (***HN13***[] "[W]hether a conspiracy exists is a common question that is thought to predominate over the other issues in the case **[**25]** and has the effect of satisfying the prerequisite in *Rule 23(b)(3)*.").

Defendants' arguments on this issue go entirely to the merits of Plaintiffs' conspiracy claims. Defendants argue that Plaintiffs have not established a conspiracy, offering up several innocent reasons for their conduct. Defendants also attach great significance to Plaintiffs' failure to produce any explicit, direct agreement among Defendants to fix prices. Because Plaintiffs have not proven an actual conspiracy, Defendants argue that the Court should deny class certification.

But whether Defendants actually conspired is not the issue before the Court. The issue is whether the conspiracy question will be decided by evidence common to the class, and both parties have demonstrated that the evidence either proving or disproving a conspiracy will be common to the entire class. Defendants' arguments on this point are identical to the defendants' liability arguments in *In re Polyurethane Foam Antitrust Litigation, No. 1:10 MD 2196, 2014 U.S. Dist. LEXIS 161020, 2014 WL 6461355 (N.D. Ohio Nov. 17, 2014)*. In that case, the defendants argued that "the price-fixing conspiracy alleged in the Complaint did not exist," based on "the failure of discovery to yield evidence of any agreement among foam manufactures to fix **[**26]** the timing or content of price increase letters." *2014 U.S. Dist. LEXIS 161020, [WL] at *16* (internal quotation marks and alterations omitted). The defendants also argued that their conduct was "consistent with legal and economic theory predictions of behavior" in the relevant markets. *Id.* The court rejected those arguments at the class certification stage, noting that those arguments "do not succeed in showing liability questions — however answered — cannot be answered through common proof." *Id.*

Like the defendants in *In re Polyurethane Foam,* Defendants' arguments here do not demonstrate the lack of common proof; rather, Defendants' own evidence tending to disprove a conspiracy is common to the entire class. Defendants' arguments, if correct, might entitle them to summary judgment or a verdict in their favor, but such merits arguments are inapplicable at this stage. *Id.* Thus, Plaintiffs have established that common questions predominate the liability issue.

b. Plaintiffs' Impact Proof

The heart of the battle in this case lies in the second element, *i.e.*, causation, which is often referred to as antitrust impact. According to Defendants, individual issues overwhelm the common questions regarding impact because Plaintiffs' experts **[**27]** have not provided a just and reliable method of proving that the alleged antitrust violations harmed all or nearly all class members. Thus, according to Defendants, Plaintiffs' only avenue of proving causation is through individual proof relating to each of the thousands of class members, which makes class certification inappropriate.

Given the parties' overlapping arguments relating to impact and damages, the Court must first outline an important distinction: ***HN14***[] "impact" and "damages" are two separate elements in an antitrust claim. *In re Ethylene Propylene Diene Monomer (EPDM) Antitrust Litigation, 256 F.R.D. 82, 88 (D. Conn. 2009)*. Impact is "whether the plaintiffs were harmed," whereas "damages quantify *by how much*." *Id.* Parties and courts often conflate the two, leading to "confusion about what a plaintiff's burden precisely **[*595]** is at the motion for class certification stage." *Id.* Oftentimes, demonstrating impact and damages involves "comparing the 'but-for' price — the price a customer would have paid in the absence of the conspiracy — and the actual price paid." *Id.* When that happens, the single comparison establishes both impact and damages. *Id.* Thus:

> [O]ne way of demonstrating predominance is to show that there is a common method for proving that the class plaintiffs paid higher actual **[**28]** prices than in the but-for world, such as using an econometric regression model incorporating a variety of factors to demonstrate that a conspiracy variable was at work during the class period, raising prices above the "but-for" level for all plaintiffs.

Id. Defendants in this case base a large portion of their impact arguments on the perceived lack of a "but-for" analysis.

But, ***HN15***[] "where other methods of common proof exist to show class-wide impact such as lock-step increases of national price lists in an oligopolistic market, comparing 'but-for' prices with actual transaction prices is not the *only* way for plaintiffs to succeed in an motion for class certification." *Id.* For example, "'if it appears that plaintiffs may be able to prove at trial . . . the price range was affected generally,'" then the plaintiffs can show impact without a "but-for" comparison, and this is so even if there are negotiated prices or a variety of prices. *Id.* (quoting *In re NASDAQ Market-Makers Antitrust Litig., 169 F.R.D. 493, 523 (S.D.N.Y. 1996))*; *see also, In re Urethane Antitrust Litig., 768 F.3d at 1254-55*. The court in Hedges summed up this point succinctly:

> The proof necessary to demonstrate that the defendants conspired to maintain an inflated "base" from which all pricing negotiations began and that this "base" price was higher than **[**29]** the "base" price which would have been established by competitive conditions would be common to all members of the class. Proof of a conspiracy to establish a "base" price would establish at least the fact of damage, even if the extent of the actual damages suffered by the plaintiffs would vary. . . . [T]he proof with respect to the "base" price from which these negotiations began, or the structure of the conspiracy to affect individual negotiations, would be common to the class. Accordingly . . . the fact of damage is predominantly, if not entirely, a common question.

Hedges Enters., Inc. v. Cont'l Grp., Inc., 81 F.R.D. 461, 475 (E.D. Penn. 1979). ***HN16***[] Courts have long held that a plaintiff can demonstrate antitrust impact by showing that the conspiracy caused an increase to the standard market price of the product at issue. *See, e.g., In re Urethane Antitrust Litig., 768 F.3d at 1254-55* (finding impact satisfied for class certification purposes based in part on evidence of "parallel issuance of similar product . . . price-increase announcements"); *In re Urethane Antitrust Litig. (Urethane II), 251 F.R.D. 629, 638 (D. Kan. 2008)* ("[E]vidence of a standardized pricing structure, which (in light of the alleged conspiracy) presumably establishes an artificially inflated baseline from which any individualized negotiations would proceed, provides generalized proof of class-wide impact."); *In re Indust. Diamonds Antitrust Litig., 167 F.R.D. 374, 383 (S.D.N.Y. 1996)* ("[I]f a plaintiff proves that **[**30]** the alleged conspiracy resulted in artificially inflated list prices, a jury could reasonably conclude that each purchaser who negotiated an individual price suffered some injury.").

This distinction between impact and damages is crucial in a case like this, where Plaintiffs have presented (1) record and expert evidence independently showing impact and (2) an econometric model that attempts to prove both damages and therefore impact. Because Plaintiffs do not rely solely on their econometric damages model for their impact proof, Defendants' impact arguments based on the lack of a "but-for" comparison are ineffective. *See, e.g., In re EPDM Antitrust Litigation, 256 F.R.D. at 88-89*. Those arguments go to damages, not impact. With this distinction in mind, the Court now addresses impact.

HN17[] Demonstrating antitrust impact for class-certification purposes does not require that Plaintiffs *prove* antitrust impact. Instead, Plaintiffs need "only to demonstrate that the element of antitrust impact *is capable* ***[*596]*** *of proof at trial* through evidence that is common to the class rather than individual to its members." *Messner, 669 F.3d at 818* (internal quotation marks omitted). The focus, then, is on the evidence necessary to establish antitrust impact, not on whether Plaintiffs **[**31]** have adequately proven it. Again, the Court's overriding concern is whether Plaintiffs have established that the proposed class is "sufficiently cohesive to warrant adjudication by representation." *Amgen Inc., 133 S.Ct. at 1196* (internal quotation marks omitted).

Although Defendants have concentrated their impact arguments on the expert evidence, ***HN18***[] the Court looks to all the evidence to determine whether Plaintiffs have established that evidence common to the class is capable of proving antitrust impact. *See, In re Urethane Antitrust Litig., 768 F.3d 1245, 1255-56 (10th Cir. 2014)*. The evidence in this case that goes to antitrust impact consists of (1) record evidence, which Plaintiffs allege shows illegal and anticompetitive conduct that increased the base price for Containerboard Products, (2) testimony from Dr. Harris regarding Defendants' industry and its susceptibility to collusive conduct, and (3) testimony from Drs. Dwyer and Harris that purport to establish that all or nearly all class members suffered harm as a result of the conspiracy.

First, Plaintiffs' have mustered a large amount of record evidence relevant to impact, which is mostly duplicative of their conspiracy evidence. Specifically, Plaintiffs produced evidence of what appears to be coordinated price increases, coordinated **[**32]** supply reductions, and other similar conduct that, according to Plaintiffs, Defendants would not have engaged in unless acting as part of a conspiracy. Plaintiffs also point to memoranda, phone calls, and trade association meetings that show the ability for Defendants to communicate with and monitor each other regarding their allegedly collusive activity.

Defendants respond by pointing to other evidence showing that they added capacity and supply during the class period, which would negate some of Plaintiffs' factual claims. Defendants also argue there are innocent reasons for their conduct. The Court need not decide at this stage which evidence to believe, however, because regardless of these factual disputes, the evidence on both sides is common to all class members. The question is whether Defendants' industry made it possible for them to collude in a way that would allow them to harm all or nearly all class members, and the evidence that both parties rely on to answer that question is common to the class.

Second, Plaintiffs rely on Dr. Harris to establish that the Containerboard Products market was ripe for collusion during the class period, and that Defendants' conduct is more likely **[**33]** the result of collusion than independent behavior. Dr. Harris conducted a "structure, conduct, performance" ("SCP") analysis to determine whether "the structure, conduct, and performance of [Defendants'] industry [was] consistent with, and likely to facilitate, collusive conduct, thereby providing a motive to collude and suggesting that any collusion would be broadly successful."

[Declaration of Dr. Harris at 5, ECF No. 658-2.] Dr. Harris also considered whether Defendants' conduct during the class period was more consistent with "concerted action or their unilateral self-interest." [*Id.*] Ultimately, Dr. Harris concludes that (1) "the economic evidence shows that Defendants had the motive, opportunity, and means to collude and were they to do so, . . . they would have succeeded," and (2) "the conduct of the Defendants was more consistent with collusion than with independent economic decision-making." [*Id.*]

In support of these opinions, Dr. Harris looked at a variety of industry-wide figures like capacity, operating rates, inventory, demand, and pricing in the containerboard market. Importantly, Dr. Harris found that the "vast majority of sales of . . . Containerboard Products are pegged **[**34]** to published price indices," the most common of which is the price for "42# Kraft liner [published] in Pulp and Paper Weekly ("PPW")." The PPW index in this case is critical because Drs. Harris and Dwyer rely in part on the movement of that index in demonstrating that all or nearly all class members suffered antitrust impact, as discussed more thoroughly below.

[*597] As to the "structure" portion of the SCP analysis, Dr. Harris analyzed the extent to which the Containerboard Products market is highly concentrated and the barriers to entry in that market. The evidence shows that, in 2003, only six North American firms controlled 72% of the Containerboard Products market, and by 2007, those six firms became five and accounted for 74% of the market. The evidence also shows, and Defendants do not challenge, that there are significant barriers to any new firms entering the market, such as the enormous amount of capital necessary to start a new firm. Dr. Harris also analyzed Containerboard Products to determine whether they are homogenous, which would mean that class members would see all Defendants as essentially offering the same product. If this is so, then the primary method of competition **[**35]** in the Containerboard Products market is price, rather than some other factor. Dr. Harris concludes that product homogeneity makes collusion easier, and finds that Containerboard Products are interchangeable commodities that are highly homogenous. This conclusion is based on Defendants' own statements, presentations, and tax filings, which tend to show that Defendants admit the commodity nature of Containerboard Products.

Finally, Dr. Harris analyzed the frequency of Defendants' interactions amongst each other and their participation and membership in trade associations. A conspiracy is much less likely to exist, Dr. Harris concludes, if firms communicate rarely. On the other hand, constant communication and participation in trade association events provide a fertile ground for collusion. Dr. Harris relies on academic economic literature for his conclusion "that trade associations tend to facilitate collusive conduct," and the evidence indeed shows that Defendants frequently interacted with each other as a part of their business operations and at various trade association meetings. Based on all this evidence and his own expert experience and opinion, Dr. Harris concludes that the "structural **[**36]** characteristics of the industry . . . are consistent with and would facilitate successful collusion among the Defendants."

As to the conduct portion of the SCP analysis, Dr. Harris looked at mill closures, operating rates/inventories/trades, downtime/slowback, coordinated pricing, monitoring, direct communication among Defendants, and Defendants' prior history of antitrust violations. In general, Dr. Harris concludes that, in the face of constant and increasing demand during the class period, Defendants reduced capacity — and therefore supply — by closing or slowing down the rate of production at mills. Specifically, Dr. Harris points to strategic mill closures or "downtime" that reduced capacity and supply in the face of "strong growth in box demand." Also important to Dr. Harris's analysis are the various price increase announcements that occurred during the class period. Defendants collectively announced fifteen price increases during the class period, nine of which were fully implemented. Defendants made these various announcements at near-identical times and for near-identical amounts. These announcements often occurred very shortly after various trade association meetings. Dr. **[**37]** Harris concludes that this conduct runs contrary to what independent firms would do when faced with similar market conditions and that Defendants' conduct is more consistent with collusive behavior than with normal, unilateral activity.

As to the "performance" portion of the SCP analysis, Dr. Harris relies on Dr. Dwyer's report, which Dr. Harris concludes is sound and founded in accepted economic theory. Based on Defendants' actual economic performance, Dr. Harris concludes that Defendants' performance is consistent with collusion.

Defendants hurl several attacks at Dr. Harris's opinions. First, Defendants argue that Dr. Harris failed to define the relevant market for purposes of his SCP analysis. According to Defendants, this failure is fatal and makes Dr. Harris's analysis useless. Defendants contend that Containerboard Products cannot possibly be a single market, because Containerboard Products include containerboard and corrugated products, which are not interchangeable and thus are **[*598]** not part of the same market. *See,* *Sargent-Welch Scientific Co. v. Ventron Corp., 567 F.2d 701, 710 (7th Cir. 1977)*.

Dr. Harris correctly responds, however, that the Containerboard Products market is the relevant market, and this is so despite the fact that the market includes both **[**38]** containerboard and corrugated products. Defendants draw an analogy between components of a personal computer and the personal computer itself, arguing that the components and the computer could not possibly be the same market, and therefore containerboard and corrugated products likewise cannot comprise a single market. The analogy fails because the analogs are not truly analogous; containerboard is not a component that goes into a corrugated product, it is the component. As Dr. Harris points out, containerboard is simply a corrugated product that hasn't been folded yet. Moreover, containerboard has no other use except for being folded into a corrugated product. And, there are no substitutes for containerboard — that is, corrugated products cannot come from some other source other than containerboard. Perhaps most importantly, Defendants' businesses are vertically integrated such that "the firms who manufacture the containerboard are the very same firms who convert that containerboard into corrugated products." [Reply Declaration of Dr. Harris at 24, ECF No. 826-2.] This means that there is no useful or principled way to separate the two into separate markets; they appear to be part **[**39]** in parcel of the same market. Thus, the Court finds that Plaintiffs have established and defined the relevant market for antitrust purposes.

Defendants next criticize Dr. Harris for failing to conduct a "but-for" analysis for each event that Dr. Harris analyzed, such as mill closures and downtime. In short, Defendants argue that Dr. Harris should have looked to each individual event during that class period, such as each mill closure, and then determined whether that specific event would have occurred even absent a conspiracy, and then further analyzed whether that specific event caused all or nearly all class members to pay higher prices than they otherwise would have paid.

Aside from "but-for" analysis not being required to show antitrust impact, this argument fails because it sets the hurdle too high. Defendants have not pointed to any case law or economic theory that says an expert conducting a SCP analysis must look at all events in isolation, and then view each individual event to see if that event specifically is the one that caused antitrust impact. To the contrary, ***HN19***[] it is a well-accepted practice to look to industry events as a whole to determine whether a defendant's conduct **[**40]** is consistent with collusion, as Dr. Harris does with his SCP analysis. *See,* *In re Processed Egg Prods. Antitrust Litig., F.Supp.3d , No. 08-md-2002, 81 F. Supp. 3d 412, 2015 U.S. Dist. LEXIS 8329, 2015 WL 337224, at *11 (E.D. Penn. Jan. 26, 2015)*. Dr. Harris correctly notes that "[n]othing in economic theory suggests that individuals or firms act on the basis of a single reason or animating event." [Reply Declaration of Dr. Harris at 24, ECF No. 826-2.] Dr. Harris's analysis simply looked at all of Defendants' capacity-reducing decisions in total to determine whether they were more likely the result of collusion or not. Plaintiffs' theory of harm is that Defendants' collusive actions caused an increase in the market price of Containerboard Products, which harmed all or nearly all class members, and Dr. Harris's SCP analysis is consistent with and supports that theory. Several courts have relied on an expert's analysis on the structures and features of a market in certifying a class. *See, e.g.,* *In re EPDM Antirust Litig., 256 F.R.D. at 90* ("The plaintiffs have not merely alleged that these prices lists existed and that they affected all EPDM purchasers — they have . . . provided expert opinion that the structural characteristics of the EPDM market would support collusive increases of prices to artificially high levels.").

Third, Plaintiffs rely on Dr. Dwyer's analysis of Defendants' **[**41]** conduct and the corresponding movement of the PPW index to demonstrate impact. Dr. Dwyer looked at "industry-wide reflections of price and actual prices paid by class members before and after" Defendants' price increase announcements. [Report of Mark Joseph Dwyer, Ph.D., **[*599]** at 7, ECF No. 658-4.] Dr. Dwyer's analysis started with looking at the nature of Defendants' price increase announcements. Of those fifteen announcements, fourteen included all Defendants. For eleven of those fifteen, the announcements were made during the same month. And, for all fifteen, the amount of the increased price was either identical or near-identical across all Defendants. Because of the "lock-step" nature of these price increase announcements, Dr. Dwyer found that "[t]he extent to which the [Defendants'] price increase announcements are reflected — both in timing and in magnitude — in a published price index for linerboard is indicative of impact on prevailing market prices and therefore of the class-wide price impact of such announcements." [*Id.* at 8.] Such a method is a common way that courts have allowed experts to demonstrate impact. *See, In re Urethane Antitrust Litig., 768 F.3d at 1254-55*.

As briefly mentioned above, the PPW index is the price index Dr. Dwyer relied on for his analysis. PPW and its price **[**42]** index are published by "RISI," which is a private publisher that has been publishing the PPW index consistently for thirty years, including throughout the class period. As Dr. Dwyer explains:

> Every third week of the month, PPW publishes price indexes for a variety of paper products, including linerboard and corrugated medium. These transaction price indexes are based on surveys of buyers and sellers of a particular containerboard grade. RISI included in the prices it published in its surveys only those related to transactions between non-affiliated parties. Internal transfers and trades between producers were excluded. PPW also excludes transactions that were contractually tied to a price index. These filters make the indexes more representative of the prices class members actually paid.

[Report of Mark Joseph Dwyer, Ph.D., at 9, ECF No. 658-4.] Of the various products that PPW provides an index for, Dr. Dwyer relied on the price for "42 lb. unbleached kraft linerboard." [*Id.*] This index price, according to Dr. Dwyer, "is used as the industry linerboard price in [Defendants'] own analysis of industry pricing." [*Id.*] This is supported by evidence indicating that Defendants do indeed rely upon the PPW index in setting their **[**43]** prices for Containerboard Products, negotiating prices in individual contracts, and analyzing the market. [Pl.'s Mot. for Class Cert. at 9, ECF No. 660 (citing evidence ranging from Defendants' own documents to deposition testimony demonstrating the pervasive use of the PPW index in determining Containerboard Product pricing).]

In comparing the PPW index and Defendants' price increase announcements, Dr. Dwyer found that nine of the fifteen announcements "are reflected by increases in the PPW Index after the effective dates of those announced increases." [Report of Mark Joseph Dwyer, Ph.D., at 11, ECF No. 658-4.] Most importantly, in all nine instances, the dollar amounts that the PPW index increased matched Defendants' announced increase. According to Dr. Dwyer, "[i]f a substantial portion of survey participants had reported that they did not experience a price increase, the PPW Index would not reflect an increase identical to what the defendants had announced." [*Id.*] In other words, Defendants collectively announced near-identical price increases, and shortly following those announcements, the PPW index showed that most customers experienced an increase in price exactly equal to the price increase Defendants announced. Thus, **[**44]** the lock-step increase in the PPW index that followed and tracked Defendants' collective price-increase announcements demonstrates that nearly all class members suffered antitrust impact.

Defendants first counter Dr. Dwyer's PPW index assessment by arguing that there is nothing surprising about the fact that a published index price would increase once manufacturers in a market announce that prices are increasing. In logical terms, Defendants characterize Dr. Dwyer's analysis as running afoul of the *post hoc ergo propter hoc* fallacy: that the PPW index increased *after* Defendants announcements does not necessarily mean it increased *because* of those announcements.

[*600] But, as Dr. Dwyer states, there is more than simple correlation here. First, there is more to the relationship between Defendants' price increase announcements and the PPW index than, say, the relationship between a Chicagoan jumping on one foot and not being eaten by a wild lion. It would be absurd to say that, because the Chicagoan was not eaten by a lion after jumping on one foot, jumping on one foot must keep lions away. That is because there are several reasonable, common-sense alternatives for why the Chicagoan was not eaten **[**45]** by a lion — for one, the lack of wild lions roaming Chicago. But here, as Dr. Dwyer demonstrates, there does not appear to be any other reasonable explanation for such a close relationship between the PPW index and Defendants' price increase announcements. Moreover, the source of the PPW index is known; the index represents actual prices purchasers paid following Defendants' price increase announcements. This constitutes strong evidence that Defendants' price increase announcements caused the PPW index to increase. And this, in turn, constitutes strong evidence that all or nearly all class members were impacted by the increased price, given Plaintiffs' evidence regarding the paramount importance of the PPW index in setting prices.

Defendants also argue that Plaintiffs' reliance on the PPW index in analyzing impact is misplaced. Defendants argue that the index does not reflect class member's actual transaction prices because it is "not a mathematical reflection of actual transaction prices; it is a level that virtually nobody actually pays for tonnage within assessed specifications." [Def.'s Opp. Br. at 14, ECF No. 763.] Additionally, Defendants argue that a large number of class members **[**46]** individually negotiated a price rather than simply paying the index price. These arguments miss the mark because Plaintiffs have produced evidence showing that (1) Defendants largely rely on the PPW index in setting prices, and (2) in most individually negotiated contracts, the PPW index factored into the negotiated price. At the least, Plaintiffs have presented sufficient evidence that would allow a fact-finder to infer that, even for negotiated prices, the starting point for those negotiations would be higher if the market price for the product was artificially inflated. This comports with ***HN20***[] the "prevailing view" that "price-fixing affects all market participants, creating an inference of class-wide impact even when prices are individually negotiated." *In re Urethane Antitrust Litig., 768 F.3d at 1254*. Thus, Defendants' attempt to minimize the importance of the PPW index fails to defeat class certification. And, to the extent that Defendants' arguments regarding the merits of relying on the PPW index are correct, those arguments are still based on class-wide evidence, which supports a finding of predominance.

Although Plaintiffs have provided additional testimony from Drs. Dwyer and Harris to prove the merits of antitrust impact - **[**47]** that all or nearly all class members *actually* suffered antitrust harm — at this point the Court is satisfied that Plaintiffs demonstrated that the impact element of their antitrust claim is capable of proof at trial through evidence common to the class. Each class member, if forced to proceed on an individual basis, would be relying on the same evidence of the structure, conduct, and performance of Defendants' industry and their uniform price-increase announcements in order to show an elevated baseline price for the Containerboard Products they purchased during the class period. Thus, the impact evidence in this case is common to the class, and because the evidence, if true, establishes that Defendants' conspiracy caused a market-wide increase to the price of Containerboard Products, Plaintiffs have established impact for class certification purposes. Numerous cases have found that when a plaintiff produces evidence that the alleged conspiracy increased the baseline price of a product, "there is an inference of class-wide impact." *In re Urethane Antitrust Litig., 768 F.3d at 1254* (collecting cases across several jurisdictions). Evidence that multiple defendants issued "parallel price-increase announcements" especially supports the **[**48]** inference of class-wide impact, and this is true "even when prices are individually negotiated." *Id. at 1254-55*. Defendants' arguments that, in fact, most class members were not impacted by the alleged conspiracy may ultimately prove successful at trial or summary judgment. **[*601]** But at the class certification stage, those issues are not before the Court. Therefore, Plaintiffs have established that common questions predominate over individual issues as to impact.

c. Plaintiffs' Damages Proof

HN21[] Damages are but one element that the Court considers in determining predominance under *Rule 23(b)(3)*. *Roach v. T.L. Cannon Corp., 778 F.3d 401, 2015 WL 528125, at *6-7 (2nd Cir. 2015)*. To establish predominance, a plaintiff must produce a reliable method of measuring class-wide damages based on common proof. *See, id.* But, "[i]t is well established that the presence of individualized questions regarding damages does not prevent certification." *Messner, 669 F.3d at 815* (citing *Wal-Mart, 131 S.Ct. at 2558*). Thus, if Defendants are correct that Plaintiffs' multiple-regression model is not capable of proving class-wide damages, that alone will not defeat certification. *See, id.* Instead, the Court would need to consider whether the individual issues in calculating damages would overwhelm the common issues relating to liability and impact.

Defendants **[**49]** resist these principles, arguing that the Supreme Court changed the law in this area with its decision in *Comcast*. Defendants argue that, "since *Comcast*, a class should not be certified if the plaintiffs fail to present a damages model applicable to individual class members on a class-wide basis or through a simple computation." [Def.'s Opp. Br. at 55, ECF No. 763.] As several courts since *Comcast* have noted, however, ***HN22***[] *Comcast* did not change the well-established rule that the existence of individual damage issues does not automatically defeat class certification. *See, e.g., In re Nexium Antitrust Litig., 777 F.3d 9, 2015 WL 265548, at *8 (1st Cir. 2015)* (stating, *post-Comcast*, that "the Supreme Court . . . and the circuits in other cases have made clear that the need for some individualized determinations at the . . . damages stage does not defeat class certification").

The Seventh Circuit has also stated *Comcast's* meaning in the class certification context, explaining that *Comcast* was concerned with a damages methodology that measured the harm resulting from four theories of liability, three of which the district court had rejected. *In re IKO Roofing Shingle Prods. Liability Litig., 757 F.3d 599, 602 (7th Cir. 2014)*. Because the damages model did "not even attempt" to "measure only those damages attributable to" the remaining **[**50]** liability theory, *Comcast Corp., 133 S.Ct. at 1433*, "the class could not get anywhere," *In re IKO Roofing Shingle Prods. Liability Litig., 757 F.3d at 602*. Also, the plaintiffs relied solely on their damages model to also prove impact, rather than presenting separate evidence of impact. Finally, as several courts have noted, *Comcast* was based entirely on one key concession: the plaintiffs in that case inexplicably did not challenge the district court's conclusion that it could not certify the class unless damages were measurable "on a class-wide basis through use of a common methodology." *Comcast Corp., 133 S.Ct. at 1430*; *see also, In re Urethane Antitrust Litig., 768 F.3d at 1258* ("First, unlike the claimants in *Comcast*, our plaintiffs did not concede that class certification required a method to prove class-wide damages through a common methodology."). Plaintiffs in this case have not made a similar concession, and they have presented additional class-wide evidence showing that impact is capable of proof at trial, as discussed above. Thus, the Court will consider whether Plaintiffs' damages model is capable of quantifying damages on a class-wide basis. If so, Plaintiffs have established predominance as to each element of their antitrust claim and the class will be certified. If not, the Court will determine whether individual damages issues will overwhelm **[**51]** the common issues.

In establishing damages, Plaintiffs rely on Dr. Dwyer, who conducted a "preliminary analysis that demonstrates the feasibility of reliably estimating damages on a class-wide basis through the use of . . . multiple regression analysis." Although no expert in this case explains in simple terms what a "multiple regression analysis" entails, the method is common enough to understand through case law and references like the *Reference Manual on Scientific Evidence* by Professor Daniel Rubinfeld, which the Seventh Circuit has deemed a reliable source for understanding this type of technical evidence. *See, ATA Airlines, Inc. v. Fed. Express Corp., 665 F.3d 882, 889-90* ***[*602]*** *(7th Cir. 2011)*. "Multiple regression analysis is a statistical tool for understanding the relationship between or among two or more variables." Daniel L. Rubinfeld, *Reference Guide on Multiple Regression*, in Reference Manual on Statistical Evidence 305 (3d Ed. 2011)). The tool looks at a dependent variable, which is the variable to be explained, and independent variables, which are the variables "thought to influence the dependent variable." *In re EPDM Antitrust Litig., 256 F.R.D. at 95*. Here, the price of Containerboard Products is the dependent variable, and the independent variables are the various factors that might have an **[**52]** effect on price, like the alleged conspiracy and the costs involved in producing the products. This type of statistical tool "allows economists to estimate whether a certain market factor has an effect on the dependent variable and to what degree. By determining whether a particular variable in the equation influences the dependent variable, the economist can accept or reject that variable as having an influence on the dependent variable." *Id.* Multiple regression analysis is common in antitrust cases, where the plaintiffs use it to show that an alleged "conspiracy" has a statistically significant impact on the dependent variable — usually price. Rubinfeld, *Reference Guide on Multiple Regression* 305-07.

Dr. Dwyer purports to do precisely this type of analysis in measuring damages. But, the Court cannot simply accept Dr. Dwyer's report simply because it appears to do a multiple regression analysis. Rather, "as painful as it may be," *ATA Airlines, Inc., 665 F.3d at 896*, the Court must rigorously screen expert evidence when certifying a class to ensure that the damages model only seeks to prove damages that flow from the harm alleged, *Comcast Corp., 133 S.Ct. at 1435*.

The reliability of an expert's multiple regression analysis depends on the choices the **[**53]** expert makes in choosing variables and setting up the model. *See*, Daniel L. Rubinfeld, *Reference Guide on Multiple Regression* 311-17. In determining whether a model is set up correctly, courts consider several questions: "has the expert correctly identified the dependent variable; has he or she chosen the correct explanatory variable that is relevant to the question at issue; are the additional variables chosen all correct or are some missing [or] irrelevant; is the form of the analysis correct?" *In re EPDM Antitrust Litig., 256 F.R.D. at 95*. (citing a prior edition of Professor Rubinfeld's *Reference Guide on Multiple Regression*).

Here, Dr. Dwyer estimates the economic damages attributable to the alleged conspiracy by looking at prices class members actually paid and what they would have paid "but for" the alleged conspiracy. To do this, Dr. Dwyer created two categories of products: Intermediate Containerboard Products ("ICP"), which consists of roll stock and corrugated sheets, and Final Containerboard Products ("FCP"), which consists of all other Containerboard Products. [Report of Mark Joseph Dwyer, Ph.D., at 19, ECF No. 658-4.] Dr. Dwyer then selected a benchmark period of months before and after the class period to compare the prices class members paid during the **[**54]** class period to those prices outside the period. Next, Dr. Dwyer conducted a multiple regression analysis whereby he analyzed the change in the price of Containerboard Products during the class period. He included several independent variables to control for non-conspiratorial economic factors that normally influence price, and he also included a "dummy variable," which is the independent variable that tests whether the alleged conspiracy influenced price. "A positive estimated effect for this dummy variable indicates that prices during the class period are higher than can be explained by the economic factors serving as controls and therefore supports the inference that the elevation is attributable to the collusion alleged by plaintiffs." [*Id.*]

As the Court understands it, under Dr. Dwyer's model, if the non-conspiratorial economic factors fully explain the increase in price during the class period, then the dummy variable indicator would be close to zero, which means that the conspiracy had virtually no effect on price. If this is the case, there are no damages because the conspiracy did not increase prices above what the prices would have been absent the conspiracy. **[*603]** Conversely, if **[**55]** the increase in price is attributable solely to the conspiracy and no other economic factor, then the dummy variable would be close to one. If this is the case, the damages would be astronomical because the full amount of the price increases during the class period would be attributed solely to the conspiracy.

Dr. Dwyer accounted for numerous variables in an attempt control for economic factors that might explain the change in price during the class period. The Court need not list them all, but Dr. Dwyer grouped them into four categories: downstream demand; production and delivery; inflation; and seasonal factors. Importantly, these categories include independent variables that account for various costs that affect price like the price of pulp that goes into making containerboard, labor costs, and fuel costs associated with production and delivery.

With the potential variables selected, Dr. Dwyer ran regressions for the ICP and FCP categories. Dr. Dwyer used two different procedures to determine which independent variables, in addition to the dummy variable, would be included in the regression. Under the first procedure, the Alkaike Information Criterion (the "AICC method"), the dummy **[**56]** variable reflected an overcharge of 4.05% for the ICP product category and 3.61% for the FCP product category. Under the second procedure, the Bayesian Information Criterion (the "BIC method"), the ICP overcharge was 4.04% and the FCP overcharge was 2.38%.

Dr. Dwyer also attempted to assess the robustness of his results by including only the 10 independent variables "with the most explanatory power." [Id.] This regression shows an overcharge attributable to the conspiracy of 3.33% for the FCP products and 2.78% for the ICP products. Dr. Dwyer then used the average overcharge amounts mentioned above to calculate damages. The average overcharge was 2.92% for the FCP products and 3.81% for the ICP products.

To arrive at a total damages figure, Dr. Dwyer multiplied the average ICP and FCP overcharges by the dollar amount of purchases class members made during the class period. Dr. Dwyer also attempted to subtract out of the total purchases those that were made during the class period, but whose prices were part of a contract entered into before the class period. This method is consistent with Plaintiffs theory of harm that Defendants' conspiracy raised the market price that all class members **[**57]** paid for Containerboard Products during the class period. During the class period, class members paid $21.06 billion for ICP products. Based on Dr. Dwyer's overcharge of 3.81%, class members paid $801.27 million dollars more than they would have absent the conspiracy. Class members also paid $102.25 billion for FCP products. Based on Dr. Dwyer's overcharge of 2.92%, class members paid $2.991 billion dollars more than they would have absent the conspiracy. Dr. Dwyer's report also breaks down the total amount of damages caused by each Defendant. In sum, Dr. Dwyer's preliminary estimate of damages is $3.792 billion.

Defendants first argue briefly that Dr. Dwyer's report cannot be trusted because it only shows damages based on the class period reflected in Plaintiffs Amended Complaint, rather than the period initially alleged. Defendants cite no authority for disregarding an expert's methodology because he relied upon the class period as alleged in an amended complaint. Dr. Dwyer did what was asked of him based on the class period supplied to him by Plaintiffs.

That Plaintiffs amended their Complaint does not change the Court's analysis on whether Dr. Dwyer's model is capable of demonstrating **[**58]** class-wide damages. To the extent Defendants' arguments are relevant, they go to the weight a jury might give Dr. Dwyer's testimony, not its reliability or admissibility. *See, In re Urethane Antitrust Litig., 768 F.3d at 1263* (refusing to reverse district court based on the defendants' argument that the plaintiffs' expert moved the class period start date to maximize damages).

As to the substance of Dr. Dwyer's damages model, Defendants' experts first attack Dr. Dwyer's use of a technique called "principal components" to address a collinearity problem. The parties' experts appear to agree that running regressions in this case **[*604]** presents a collinearity problem, which occurs when two independent variables are highly correlated or related. Including collinear variables in a regression often skews the results.

To correct for collinearity, Dr. Dwyer inserted 150 independent variables into a computer program that would then select "principal components," which are those components that, according to the program, best explain the covariance across the independent variables. The program produced 133 principal components, which Dr. Dwyer then inserted into two different "stepwise regression" programs — AICC and BIC. Both programs operate the **[**59]** same way by starting "with a core model in which the variables that are entering into the model selection are absent." [Dwyer Dep. 137:25-138, Aug. 12, 2014, Ex. 3, ECF No. 763-2.] The programs then "consider[] adding a variable one step at a time," creating a model "until none of the remaining factors meet a certain threshold of explanatory power." [Dwyer Dep. 138:2-6, Ex. 3, ECF No. 763-2.] The only difference between AICC and BIC is the relevant threshold at which the program stops selecting new variables from the 133 available.

Defendants broadly claim that, according to economists, "'stepwise regression is to be avoided.'" [Def.'s Opp. Br. at 51 (quoting Peter Kennedy, *A Guide to Econometrics* 49 (6th Ed. 2008), ECF No. 763.] But as Dr. Dwyer points out in his reply report, the "stepwise regression" that "is to be avoided" is not the same regression that Dr. Dwyer performed, though admittedly economists often use "stepwise regression" to describe Dr. Dwyer's approach, a point Dr. Dwyer alluded to in his deposition. [Dwyer Dep. 120:3-5 ("Stepwise can sometimes have a particular meaning that would be inappropriate here."), Ex. 3, ECF No. 763-2.] Dr. Dwyer provides academic support **[**60]** for the type of model selection procedures he used, and the Court has compared the description of the stepwise method that is disfavored and Dr. Dwyer's method, and the two are indeed different. Furthermore, Dr. Dwyer notes that the model selection methods he used are included in most or all statistical software packages. The Court finds it unlikely that a model selection method that supposedly is rejected by the academic community would be included in all the software that same community uses to run regressions. Finally, Defendants have not cited any case law that rejects an expert's model solely because of the expert's use of Dr. Dwyer's model selection method. The Court therefore refuses to ignore Dr. Dwyer's report solely because he employed a stepwise regression.

Defendants next take issue with the way Dr. Dwyer used the AICC and BIC model selection methods. Defendants assert that, despite Dr. Dwyer's claim that his model is neutral, he did not allow either selection model to select variables in a neutral fashion. This is so, Defendants argue, because Dr. Dwyer "limited the variables the stepwise software could exclude so that the conspiracy dummy variable *had to be included*." **[**61]** [Def.'s Opp. Br. at 51, ECF No. 763.] Defendants interpret this method as forcing the model to assign the conspiracy variable a value even if the model would have otherwise excluded it as having no explanatory value. Defendants argue that Dr. Dwyer should have simply let the software select from all the available variables, and Defendants contend that, by doing so, the conspiracy variable would not have been selected.

Dr. Dwyer, however, had good reason for including the conspiracy variable in each of his regressions. As he correctly states, allowing the conspiracy variable to be omitted would tell the experts nothing about the conspiracy's effect on price. Moreover, Defendants are incorrect that forcing the model to test for the alleged conspiracy's effect on price necessarily means the model will find such an effect. Presumably, if the conspiracy had no effect on price, the model would show that the conspiracy variable had a zero or statistically insignificant effect on price. Because the independent variable at issue is the existence of a conspiracy, Dr. Dwyer reasonably included that variable in his regressions. Otherwise, his regressions would tell us nothing about the conspiracy's **[**62]** effect on price.

Additionally, Defendants' arguments are inconsistent. On the one hand, Defendants **[*605]** criticize Dr. Dwyer for using a stepwise regression to select which independent variables to include in each model, rather than using his own independent judgment to select those variables. On the other hand, they criticize him for using his economic judgment to use the conspiracy and inflation variables in each model, rather than letting the program pick all of the variables. Both experts state that the stepwise method can exclude variables that the program finds less explanatory, even though economic principles compel inclusion of the variable. Dr. Dwyer used his economic expertise to select certain factors that test for conspiracy and control for inflation, along with other factors selected by the stepwise programs. To the extent that Defendants challenge the specific factors included and excluded from his model, those arguments go to the weight and probative value of his testimony, not to the underlying methodology. *See, In re Urethane Antitrust Litig., 768 F.3d at 1260-61*.

Of course,**HN23**[] in some instances, inclusion or exclusion of a certain variable might be egregious enough to render an expert's report inadmissible altogether. *See, In re Scrap Metal Antitrust Litig., 527 F.3d 517, 530 (6th Cir. 2008)*. **[**63]** But that is not the case here. Defendants have not pointed to some specific, major factor that Dr. Dwyer excluded that shows his model is wholly without merit. To the contrary, Dr. Dwyer went to great lengths to include in his independent variables all sorts of factors that might otherwise explain the price increases during the class period. His methodology therefore appears to be firmly rooted in sound economic and econometric principles, and the large majority of Defendants' experts' criticisms go to the merits of whether the price of Containerboard Products "increased disproportionately to the cost of inputs as the result of a conspiracy to raise/maintain prices, or instead resulted from a non-collusive cause." *In re EPDM Antitrust Litig., 256 F.R.D. at 98*. This is a merits question that the Court does not need to resolve in order to decide whether to certify the class.

Defendants finally argue that Dr. Dwyer's damages calculations do not support class certification because his model "cannot be applied to individual plaintiffs, and Dwyer admitted that comparing a customer's price to the price predicted by his regression model would not indicate whether or not the customer had been damaged." [Def.'s Opp. Br. at 56, ECF No. 763.] **[**64]** But in a complicated antitrust case such as this, where the theory of harm is that the entire market price of a product was inflated as a result of a conspiracy, "plaintiffs are permitted to use estimates and analysis to calculate a reasonable approximation of their damages." *Loeb Indus., Inc. v. Sumitomo Corp., 306 F.3d 469, 493 (7th Cir. 2002)*; *See also, In re Scrap Metal Antitrust Litig., 527 F.3d 517 at 529* (approving a method of comparing a defendant's profits before and after a violation in "proving antitrust damages").

Moreover, **HN24**[] to the extent that there are individualized damages issues, that alone will not defeat class certification, especially where, as here, common issues predominate the liability and impact elements of Plaintiffs' claim. *Butler, 727 F.3d at 801*. And, should discovery demonstrate that individual damages issues indeed threaten to overwhelm the common issues such that class certification becomes inappropriate, Defendants may seek to decertify the class or modify the class so that only liability and impact are decided on a class-wide basis. *Messner, 669 F.3d at 826*. In light of the key, overwhelming common questions of liability and impact in this case, Defendants have not demonstrated that individual damages issues threaten to overwhelm the litigation.

In sum, the Court has poured over the parties submissions and accompanying evidentiary **[**65]** record and finds that Plaintiffs have satisfied the predominance requirement of *Rule 23(b)(3)* based on competent evidence common to the class.

ii. Superiority

Lastly, Plaintiffs must demonstrate that proceeding on a class basis is superior to other forms of resolving the dispute. Plaintiffs have made a sufficient showing that class treatment in this case is superior to individual cases. The overarching liability and impact issues are common to the class and can "be resolved in one stroke." *Butler, 727 F.3d at 801* (internal quotation marks **[*606]** omitted). And given the breadth and importance of the common issues, "the superiority requirement . poses no serious obstacle to class certification here." *Messner, 669 F.3d at 814 n.5*.

In attempting to defeat superiority, Defendants argue first that releases they obtained as a result of settling a prior antitrust lawsuit bar many class members' claims in this suit. Second, Defendants argue that many class members purchased Containerboard Products pursuant to contracts that include various "disqualifying clauses," such as forum selection clauses, jury waivers, and clauses that set the available time to bring a claim and the available damages. Defendants conclude that these issues make a class action unmanageable **[**66]** and create a "quagmire" that causes individual issues to predominate the common questions.

As to the first argument, ***HN25***[] when parties settle a case, a "court may release not only those claims alleged in the complaint and before the court, but also claims which could have been alleged . . . in connection with any matter or fact set forth or referred to in the complaint." *Wal-Mart Stores, Inc. v. Visa, 396 F.3d 96, 107 n.13 (2d Cir. 2005)* (internal quotation marks omitted). Such a "general release is valid as to all claims of which a signing party has actual knowledge or that he could have discovered upon reasonable inquiry." *Oberweis Dairy, Inc. v. Associated Milk Producers, Inc., 568 F.Supp. 1096, 1101 (N.D. Ill. 1983)* (citing *Goodman v. Epstein, 582 F.2d 388, 402-04 (7th Cir. 1978))*. In other words, "a release applies only as long as the released conduct arises out of the identical factual predicate as the settled conduct." *In re Digital Music Antitrust Litig., 812 F.Supp.2d 390, 399 (S.D.N.Y. 2011)* (internal quotation marks omitted).

Defendants settled with various opt-in and opt-out plaintiffs the *In re Linerboard Antitrust Litigation* lawsuit in the Eastern District of Pennsylvania. The lawsuit involved an alleged conspiracy that occurred between 1993 and 1995, although some individual cases did not settle until as late as 2008. According to Defendants, a "typical" settlement agreement from the *Linerboard* litigation released Defendants from all claims "relating in any way to **[**67]** any conduct prior to the Effective Date" of the agreement "concerning the purchase, sale, distribution, or pricing of linerboard, medium, corrugated containers [or] corrugated sheets." [Def.'s Opp. Br. at 64 n.59, ECF No. 763.] Defendants argue that such a broad agreement bars the claims at issue here, and that determining whether those claims are barred makes class action impracticable.

The Court disagrees. Although the release language is very broad, Plaintiffs' claims in this case are not based on an "identical factual predicate as the settled conduct." *In re Digital Music Antitrust Litig., 812 F.Supp.2d at 399*. The conduct at issue in the prior litigation was Defendants' allegedly collusive behavior in the mid-nineties. The actions at issue here are coordinated market manipulation and price-increase announcements that occurred nearly a decade later. And even though the collusive behavior that was alleged in the prior litigation is similar to the behavior alleged here, the claims in this case are not based on Defendants' alleged price-fixing behavior of the nineties. Under Defendants' argument, they are free to keep colluding in violation of antitrust laws so long as they conspire in the same way as they were alleged to have behaved in **[**68]** a prior settled case. The Court is unaware of any case supporting this argument; indeed, several cases are to the contrary. *See, id.* Because none of the *Linerboard* releases apply to this new case that is based on different facts, the Court finds that those releases do not defeat class certification.

Defendants' second argument is that several contractual provisions apply to disqualify some class members from participating in the class. According to Defendants, "the multitude of individualized issues (under the laws of multiple states) presented by the disqualifying clauses . . . render the class action mechanism inefficient." [Def.'s Opp. Br. at 72.]

The Court rejects this argument for several reasons. First, Defendants' argument relies on *Lozano*, in which the Seventh Circuit approved of a district court relying on class-action waivers in arbitration agreements to **[*607]** find class certification inappropriate. *Lozano v. AT&T Wireless Servs., Inc., 504 F.3d 718, 728 (7th Cir. 2007)*. Unlike the arbitration agreements in *Lozano*, however, none of the clauses here preclude class actions. *Lozano* therefore provides no support for Defendants' position.

Second, Defendants rely heavily on *In re Titanium Dioxide Antitrust Litigation*, in which the court enforced clauses contained **[**69]** within individual class members' contracts. *In re Titanium Dioxide Antitrust Litigation, 962 F.Supp.2d 840, 851-52 (D. Md. 2013)*. That case also fails to support Defendants' argument because there, the court *did not* find the existence of contractual provisions to be an impediment to class certification. *Id. at 846* (stating that the defendants' motion to modify the class definition to exclude class members who were subject to various contractual provisions was premature until "after the expiration of the class opt-out period"). Plaintiffs are correct that the majority of cases hold that the existence of contractual provisions does not automatically defeat class certification. *See, e.g., id.; Herkert v. MRC Receivables Corp., 254 F.R.D. 344, 350 (N.D. Ill. 2008)* ("[A] possibility that some of the putative class members could have cardmember agreements with varying terms . . . does not necessarily preclude class certification.").

In the alternative, Defendants ask that the Court at least modify the class definition to exclude those class members that purchased pursuant to a disqualifying clause. This may indeed be necessary, but the Court agrees with the court in *Titanium Dioxide* that the more appropriate time to address this issue is after the class is certified and Defendants can determine which specific class members are subject to potentially **[**70]** disqualifying contractual provisions. ***HN26***[] The Court has the authority under *Rule 23(c)(1)(C)* to modify the class any time before final judgment. To the extent that class members are not eligible to participate due to their specific contracts, Defendants may file a motion to modify the class to exclude those specific members once that information is known.

Because Plaintiffs have proven beyond mere pleading each of *Rule 23*'s elements, the Court finds that class certification is appropriate. The only remaining issue is Defendant RockTenn's arguments as to why a class action cannot proceed against it.

C. Class Certification — Defendant RockTenn's Argument

RockTenn's position in this case is unique. (The Court uses "RockTenn" for ease of reference, although RockTenn was formally known as Smurfit-Stone Container Corporation during its bankruptcy proceedings). Unlike any other Defendant, RockTenn filed for bankruptcy prior to this lawsuit, which resulted in a bankruptcy discharge order dated June 30, 2010 that released RockTenn from any claims predating the discharge order. Thus, according to RockTenn, Plaintiffs' must independently establish a separate, RockTenn-specific class with a period starting no earlier than **[**71]** June 30, 2010.

In all the briefing on this issue, both parties rely on the exact same source material to support their argument: Judge Milton Shadur's statements during a hearing on November 24, 2010. According to RockTenn, Judge Shadur made it crystal clear that Plaintiffs would need to define and seek certification on a wholly separate class applicable just to RockTenn. Plaintiffs, on the other hand, argue that Judge Shadur could not have stated in any plainer terms that such a separation was unnecessary. The Court can resolve this issue easily by simply referring to what Judge Shadur said, in light of case law that supports those statements.

Neither party really explains the context for the hearing before Judge Shadur, but from reading the entire transcript of that hearing, it appears that RockTenn asked the bankruptcy court to enjoin this Court from hearing a claim against RockTenn. Judge Shadur set the hearing to inform RockTenn of his position on RockTenn's motion and to provide an avenue for communicating his opinion to the bankruptcy court without having to get into a "tug-of-war" with that court. Judge Shadur informed RockTenn that he had read the complaint and its allegations **[**72]** and found that Plaintiffs were only seeking to hold RockTenn liable for its post-discharge conduct. Understandably, Judge **[*608]** Shadur found it inappropriate for RockTenn to ask the bankruptcy court to enjoin this Court from entertaining a cause of action that is founded on post-discharge conduct over which the bankruptcy court has no jurisdiction. Judge Shadur stated that he found it "flat-out misleading [for RockTenn] to characterize the lawsuit before [the Court] as seeking relief from [RockTenn] that is at odds with its discharge in bankruptcy." [Brig Tr. 6, Nov. 24, 2010, ECF No. 108.]

Judge Shadur acknowledged that the complaint's allegations "speak . . . of [RockTenn's] pre[-]discharge conduct," but he noted the key difference between *basing liability* on pre-discharge conduct and *relying* in part on pre-discharge conduct as evidence supporting a post-discharge conspiracy. RockTenn's argument, in other words, "conflates evidence with claims." [*Id.* at 7.] RockTenn is correct that the Court promised to hold Plaintiffs to their word that their complaint is about imposing liability based on post-discharge conduct. But, contrary to both parties' assertions, Judge Shadur did not mention or address **[**73]** any issues related to the proper size or scope of the class to be certified. That is the issue currently before the Court.

The issue presented by Plaintiffs' complaint is novel. Plaintiffs have provided evidence that RockTenn participated in the alleged conspiracy post-bankruptcy. If a fact-finder found this to be true, RockTenn's bankruptcy discharge order would not protect it, since that order applies only to pre-discharge conduct. Plaintiffs have also sued RockTenn's alleged co-conspirators, and co-conspirators are joint and severally liable "*for all damages* caused by the [entire] conspiracy." *Paper Sys. Inc. v. Nippon Paper Indus. Co., 281 F.3d 629, 632 (7th Cir. 2002)* (emphasis added). No problem so far. But, the conspiracy for which Plaintiffs seek to hold RockTenn's co-conspirators liable predates RockTenn's discharge from bankruptcy, and that pre-discharge conspiracy included RockTenn. The question, then, is whether RockTenn, based on its post-discharge conduct, can be jointly and severally liable for its co-conspirators' damages when the basis for the co-conspirators' liability is pre-discharge conduct that includes RockTenn. RockTenn argues that to hold it jointly liable is to punish it for pre-discharge conduct. Plaintiffs argue that such a result **[**74]** is the consequence of the general joint and several liability principles in the antitrust context.

Neither party has cited a case directly on point, nor can the Court find one. RockTenn cites cases that preclude class certification against defendants that emerged from bankruptcy, but in those cases liability was premised on solely pre-discharge conduct. *See, In re Travel Agent Comm'n Antitrust Litig., 583 F.3d 896, 901 (6th Cir. 2009)*. Plaintiffs cite cases involving joint and several liability, but none of the defendants in those cases had filed for bankruptcy. *See, e.g., Paper Sys. Inc., 281 F.3d at 632*. Moreover, the Court notes that important principles weigh on both sides of the issue. On the one hand, bankruptcy is meant to absolve a debtor of liability for its pre-discharge conduct. *In re Ruben, 774 F.3d 1138, 1141 (7th Cir. 2014)* ("A principal goal of bankruptcy is to provide the debtor with . . . a fresh start.") (internal quotation marks omitted). On the other hand, joint and several liability is a "vital instrument for maximizing deterrence." *Paper Sys. Inc., 281 F.3d at 633*.

In the absence of controlling, binding authority, the Court finds that holding RockTenn jointly and severally liable does not violate the bankruptcy discharge order for several reasons. Plaintiffs alleged that RockTenn joined (or more correctly, re-joined) the conspiracy post-bankruptcy. **[**75]** ***HN27***[] Generally speaking, "a co-conspirator who joins a conspiracy with knowledge of what has gone on before and with an intent to pursue the same objectives may, in the antitrust context, be charged with the preceding acts of its co-conspirators." *Havoco of Am., Ltd. v. Shell Oil Co., 626 F.2d 549, 554 (7th Cir. 1980)*. Although a debtor discharged in bankruptcy is indeed provided a clean slate, what the debtor does with that slate matters. Assuming that RockTenn did, in fact, re-join the conspiracy as alleged, RockTenn certainly would have had knowledge of what has gone on before and presumably would have had the intent to pursue the same objectives. *See, id.*, Seen properly, RockTenn would not **[*609]** be "held liable" for its pre-discharge conduct. Liability would be premised solely on its post-discharge conduct. It only *appears* that it is being held liable for pre-discharge conduct because of the joint and several liability rule, which makes RockTenn on the hook for its co-conspirators' actions. But it is the *co-conspirators'* liability that is based on pre-discharge conduct, not RockTenn's.

The distinction may be a fine one, but it is important. If, for example, RockTenn is ultimately correct on the merits, *i.e.*, its post-discharge conduct does not give rise to an **[**76]** antitrust violation, RockTenn will be absolved of all liability, despite its participation in the pre-discharge conspiracy. The Court has made clear that it will hold Plaintiffs to their burden of proof that RockTenn's post-discharge conduct gives rise to liability. But, once liability is established, the general rule of joint and several liability applies. It would be a windfall to defendants to allow them to join a conspiracy post-bankruptcy, with the perfect knowledge and intent to continue causing damages to vast numbers of consumers, and then refuse to enforce joint and several liability while the remaining co-conspirators are all subject to such liability. If RockTenn did in fact choose to rejoin the alleged conspiracy, it cannot be heard to complain that it may be on the hook for all the damages the conspiracy caused.

Admittedly, this creates potential problems for trial. For example, what is a jury to do with evidence of both pre-and post-discharge conduct in determining RockTenn's liability? For one, the Court may give a limiting instruction that explains to the jury that, in order to determine whether RockTenn violated antitrust laws, it must only consider RockTenn's post-discharge **[**77]** conduct and determine whether that conduct violated the law. These problems, however, can be addressed later if the case goes to trial. For now, the Court agrees with Plaintiffs that this case can proceed as a single class action.

IV. CONCLUSION

For the reasons stated herein, Defendants' Motion to Strike [ECF No. 845] is granted in part and denied in part. Plaintiffs' Class Certification Motion [ECF No. 657] is granted. Named Plaintiffs are hereby designated as class representatives, and Michael J. Freed of Freed Kanner London & Millen LLC and Daniel J. Mogin of The Mogin Law Firm, P.C., are hereby designated as Co-Lead Counsel.

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] Motions to Dismiss, Failure to State Claim

Courts may consider documents on a motion to dismiss, even if not incorporated by reference in a complaint, where the complaint relies heavily upon its terms and effect, thereby rendering the document integral to the complaint.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] Motions to Dismiss, Failure to State Claim

On a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)*, all factual allegations in the complaint are accepted as true, and all inferences are drawn in favor of the pleader. However, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A claim is facially plausible when the plaintiff pleads factual content that allows a court to draw the reasonable inference that the defendant is liable for the misconduct alleged. In other words, the factual allegations must possess enough heft to show that the pleader is entitled to relief.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

HN3[] Arbitration, Arbitrability

When determining whether parties have agreed to arbitrate a dispute, courts consider two questions: (1) whether a valid agreement to arbitrate under the contract in question exists and (2) whether the particular dispute in question falls within the scope of that arbitration agreement.

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Arbitration Agreements

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Scope

HN4[] Federal Arbitration Act, Arbitration Agreements

Arbitration is strictly a matter of contract. The Federal Arbitration Act (FAA) provides that an agreement in writing to submit to arbitration an existing controversy shall be valid, irrevocable, and enforceable. *9 U.S.C.S. § 2*. The FAA requires the federal courts to enforce arbitration agreements, reflecting Congress' recognition that arbitration is to be encouraged as a means of reducing the costs and delays associated with litigation. The Second Circuit has often and emphatically applied the strong federal policy in favor of arbitration. Because of this policy favoring arbitration, the burden of persuasion falls on the party attempting to escape an arbitration agreement, not the one attempting to enforce it. When the existence of an arbitration agreement is undisputed, doubts as to whether a claim falls within the scope of that agreement should be resolved in favor of arbitrability. Courts in the Second Circuit have held that, where a valid arbitration clause has been found to exist, they must abstain from adjudicating plaintiffs' claims.

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Scope

HN5[] Arbitration, Federal Arbitration Act

The Second Circuit has directed courts to classify arbitration clauses as either broad or narrow. Clauses requiring arbitration of disputes arising out of or in connection with underlying contracts are considered "broad" arbitration clauses. Indeed, an arbitration clause covering any claim or controversy arising out of or relating to an agreement is the paradigm of a broad clause -- broader than one covering all claims and disputes arising under the contract.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Evidence > Inferences & Presumptions > Presumptions > Creation

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Scope

HN6[] **Arbitration, Arbitrability**

A presumption of arbitrability arises from contracts containing broad arbitration clauses. In particular, a broad arbitration clause is presumptively applicable to disputes involving matters going beyond the interpretation or enforcement of particular provisions of the contract which contains the arbitration clause.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Arbitration Agreements

HN7[] **Arbitration, Arbitrability**

A challenge to the validity of a contract as a whole, and not specifically to an arbitration clause, must go to the arbitrator.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Torts > Intentional Torts > Breach of Fiduciary Duty > Remedies

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Scope

HN8[] **Arbitration, Arbitrability**

Claimed breaches of fiduciary duty arising out of agreements with broad arbitration clauses are subject to arbitration.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Scope

HN9[] **Arbitration, Arbitrability**

Unjust enrichment claims fall within the scope of broad arbitration clauses.

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Scope

Evidence > Burdens of Proof > Allocation

Evidence > Inferences & Presumptions > Presumptions > Creation

HN10[] **Arbitration, Federal Arbitration Act**

The Federal Arbitration Act (FAA) establishes a strong federal policy in favor of arbitration, and courts have long considered arbitration to be presumptively an appropriate and competent forum for federal statutory claims. Statutory claims may be arbitrated so long as the prospective litigant effectively may vindicate his or her statutory cause of action in the arbitral forum. The burden is on the party opposing arbitration to show that Congress intended to preclude a waiver of judicial remedies for the statutory rights at issue.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Scope

HN11[] **Arbitration, Arbitrability**

The United States Supreme Court has set forth a two-step inquiry for determining whether statutory claims arising out of a contract are arbitrable. First, courts must determine whether the parties' agreement to arbitrate reached the statutory issues. Second, courts must consider whether legal constraints external to the parties' agreement foreclosed the arbitration of those claims -- namely, if a party has made the bargain to arbitrate, it should be held to it unless Congress has evinced an intention to preclude a waiver of judicial remedies for the statutory rights at issue. Finally, where Congress has not clearly precluded arbitration, arbitration of a statutory claim will be compelled unless, as noted, the prospective litigant shows that it cannot effectively vindicate its statutory rights in the arbitral forum.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Copyright Law > ... > Assignments & Transfers > Licenses > Exclusive Licenses

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Scope

Copyright Law > ... > Assignments & Transfers > Licenses > Nonexclusive Licenses

HN12[] **Arbitration, Arbitrability**

Copyright claims asserted in connection with licensing disputes may be encompassed by broad arbitration clauses. In Kamazaki Music, the Second Circuit affirmed that an arbitration clause requiring the parties to arbitrate claims "arising out of, or relating to" their contract covered copyright claims.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Motion Practice > Opposing Memoranda

HN13[] **Motions to Dismiss, Failure to State Claim**

Claims that are raised for the first time in an opposition brief to a motion to dismiss are not properly before the court.

Copyright Law > Copyright Infringement Actions > Civil Infringement Actions > Indispensable Parties

Copyright Law > ... > Civil Infringement Actions > Secondary Liability > Vicarious Liability Actions

HN14[] **Civil Infringement Actions, Indispensable Parties**

Secondary infringement claims are often litigated without joinder of any alleged direct infringer.

Antitrust & Trade Law > Sherman Act > Claims

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN15[] **Sherman Act, Claims**

The United States Supreme Court has made clear that Sherman Act antitrust conspiracy claims are arbitrable. Indeed, the Court in Mitsubishi found no explicit support in either the Sherman Act or in the Federal Arbitration Act (FAA) for holding Sherman Act claims to be nonarbitrable. The Second Circuit has held that if the allegations underlying claims touch matters covered by the parties' contracts, those claims must be arbitrated whatever the legal labels attached to them. Conspiracy allegations may touch matters covered by a contract even if the alleged conspiracy includes non-parties to the contract or involves alleged wrongdoing that occurred before or after the formation of the contract.

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Scope

HN16[] **Arbitration, Federal Arbitration Act**

In dealing with broad arbitration clauses, the Second Circuit has not limited arbitration claims to those that constitute a breach of the terms of the contract at issue.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN17[] **Conspiracy to Monopolize, Sherman Act**

Alleged anti-trust co-conspirators are not necessary parties; a plaintiff can prove the existence of a Sherman Act conspiracy in an action against just one of the members of the conspiracy.

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Arbitration Agreements

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

HN18[] Federal Arbitration Act, Arbitration Agreements

Individuals not party to an arbitration agreement cannot be "indispensable" for Fed. R. Civ. 19 purposes.

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Arbitration Agreements

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Scope

HN19[] Federal Arbitration Act, Arbitration Agreements

A broad arbitration clause is presumptively applicable to disputes involving matters going beyond the interpretation or enforcement of particular provisions of the contract which contains the arbitration clause.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Evidence > Burdens of Proof > Allocation

HN20[] Private Actions, Sherman Act

The possibility that a party to an arbitration clause will be inconvenienced and will incur some extra expense does not necessarily mean that the party cannot effectively vindicate its statutory rights through arbitration. The antitrust laws do not guarantee an affordable procedural path to the vindication of every claim. It would be unwieldy to require courts to proceed case by case to tally costs and burdens to particular plaintiffs in light of their means. Additionally, uninformed speculation about cost is insufficient to carry the burden of proving that proceeding against antitrust defendants individually would prevent the plaintiffs from effectively vindicating their statutory rights.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN21[] Sherman Act, Claims

In order to state a claim against defendants under *§§ 1* and *3* of the Sherman Act, *15 U.S.C.S. §§ 1* and *3*, that will withstand a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, plaintiffs must allege sufficient facts to support a plausible inference that defendants took part in an agreement that unreasonably restrained trade.

Antitrust & Trade Law > Sherman Act > Claims

HN22[] Sherman Act, Claims

Section 3 of the Sherman Act, *15 U.S.C.S. § 3*, merely extends the reach of *15 U.S.C.S. § 1* to trade or commerce involving U.S. Territories and the District of Columbia. Substantively, however, *15 U.S.C.S. § 3* claims are analyzed in the same manner as *15 U.S.C.S. § 1* claims.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN23[] **Private Actions, Remedies**

Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN24[] **Standing, Requirements**

To have standing, a plaintiff must, among other things, be an "efficient enforcer" of the antitrust laws. The Second Circuit has identified four factors to determine whether a plaintiff is an efficient enforcer: (1) the directness or indirectness of the asserted injury; (2) the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement; (3) the speculativeness of the alleged injury; and (4) the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN25[] **Standing, Requirements**

Antitrust standing is a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement, a court must dismiss as a matter of law.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN26[] **Standing, Requirements**

In order to limit the class of plaintiffs with antitrust standing to the most efficient enforcers of the antitrust laws, courts have typically limited the types of individuals that may bring an antitrust action to direct competitors or consumers.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN27[] **Standing, Requirements**

Suppliers to direct market participants typically cannot seek recovery under the antitrust laws because their injuries are too secondary and indirect.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN28[] **Standing, Requirements**

With respect to the first "efficient enforcer" factor for standing, to satisfy the antitrust injury requirement, a plaintiff must plead facts showing that it has suffered injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The antitrust injury requirement obligates a plaintiff to demonstrate, as a threshold matter, that the challenged action has had an actual adverse effect on competition as a whole in the relevant market. In other words, a plaintiff must allege that its loss comes from acts that reduce output or raise prices to consumers.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN29[] **Standing, Requirements**

Underpayment of royalties is not an antitrust injury for purposes of standing because it has no adverse effect on competition or consumers.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN30[] **Standing, Requirements**

With respect to standing, antitrust injury is limited to injuries that are attributable to an anti-competitive aspect of the practice under scrutiny.

Antitrust & Trade Law > Sherman Act > Claims

HN31[] **Sherman Act, Claims**

An antitrust complaint under the Sherman Act must allege a relevant product market in which the anticompetitive effects of the challenged activity can be assessed.

Antitrust & Trade Law > Sherman Act > Claims

HN32[] **Sherman Act, Claims**

Generally, the distribution of a single brand, like the manufacture of a single brand, does not constitute a legally cognizable market because to define the market as that group of products over which a defendant exercises control would as an analytic matter read the market definition step out of the Sherman Act. Thus, the Second Circuit and courts in the Southern District of New York have often declined to recognize a relevant market defined by a single brand.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > Licenses

HN33[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

Because the benefits of exclusive licensing agreements are well-recognized, the Second Circuit has stated that these arrangements are presumptively legal. An exclusive licensing arrangement violates *Section 1* of the Sherman Act, *15 U.S.C.S. § 1*, only when it will foreclose competition in a substantial share of the line of commerce affected.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN34[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

In order to adequately plead foreclosure in a relevant market, a plaintiff first must properly define the relevant market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN35[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

Exclusive agreements do not harm competition when there is competition to obtain the exclusive contract. The Second Circuit has recognized that such a situation may actually encourage, rather than discourage, competition, because the incumbent and other competitors have a strong incentive continually to improve the services and prices they offer in order to secure the exclusive positions.

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > Licenses

HN36[] **Ownership & Transfer of Rights, Licenses**

An exclusive license, which merely confers upon the licensee the ability to exploit the licensor's exclusive intellectual property rights, does not violate the antitrust laws.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Evidence > Inferences & Presumptions > Presumptions > Rebuttal of Presumptions

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

HN37[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

Exclusive vertical arrangements are presumptively legal under the antitrust laws. To overcome that presumption at the pleading stage, a plaintiff must allege facts showing exceptional circumstances, such as evidence of predatory practices or a "unique" opportunity to leverage two distinct monopolies. A plaintiff that fails to allege such exceptional circumstances fails to state a claim under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, and its complaint must be dismissed under *Fed. R. Civ. P. 12(b)(6)*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

HN38[] **Vertical Restraints, Nonprice Restraints**

Exclusive vertical agreements of reasonable duration that are subject to a competitive award process do not violate the antitrust laws.

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Stay Pending Arbitration

HN39[] **Federal Arbitration Act, Stay Pending Arbitration**

A stay as to claims against a nonarbitrating defendant is properly granted where the arbitration of the plaintiff's claims against a defendant party to the arbitration would at least partially determine the issues which form the basis of the claim against that non-arbitrating defendant.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Copyright Law > ... > Assignments & Transfers > Licenses > Exclusive Licenses

Copyright Law > ... > Assignments & Transfers > Licenses > Nonexclusive Licenses

HN40[] **Defenses, Demurrers & Objections, Motions to Dismiss**

A copyright owner who grants an exclusive or nonexclusive license to use a work waives any right to assert an infringement claim against the licensee, or anyone whom the licensee is entitled to sublicense, for acts within the scope of the license or sublicense. A defendant may raise a complete defense to a copyright infringement claim by presenting the court with the license or sublicense on a motion to dismiss, and dismissal of a claim for copyright infringement is proper where a contract underlying the suit clearly and unambiguously demonstrates the existence of the defendant's license to exploit the plaintiff's copyrights and where plaintiff has not shown any limitation on that license.

Copyright Law > ... > Licenses > Rule Application & Interpretation > Ambiguity Resolution

Evidence > Burdens of Proof > Allocation

Copyright Law > ... > Assignments & Transfers > Licenses > Nonexclusive Licenses

Copyright Law > ... > Assignments & Transfers > Licenses > Exclusive Licenses

HN41[] **Rule Application & Interpretation, Ambiguity Resolution**

Copyright licenses are construed according to neutral principles of contract interpretation. In cases where only the scope of the license is at issue, it is the copyright owner's burden to prove that defendant's usage was unauthorized. The licensor who argues that there should be an exception or deviation from the meaning reasonably conveyed by the language of a license loses, because he or she should bear the burden of negotiating for language that would express the limitation or deviation.

Contracts Law > ... > Ambiguities & Contra Proferentem > Contract Ambiguities > Latent Ambiguities

Contracts Law > ... > Ambiguities & Contra Proferentem > Contract Ambiguities > Patent Ambiguities

HN42[] **Contract Ambiguities, Latent Ambiguities**

The doctrine of contra proferentum only applies where a contract is ambiguous.

Copyright Law > ... > Assignments & Transfers > Licenses > Exclusive Licenses

HN43[] **Licenses, Exclusive Licenses**

As a matter of copyright law, copyright owners and exclusive licensees are free to grant such licenses after the fact as they see fit.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

Copyright Law > ... > Assignments & Transfers > Licenses > Exclusive Licenses

Copyright Law > ... > Civil Infringement Actions > Elements > Ownership

HN44[] **Breach of Contract Actions, Elements of Contract Claims**

Second Circuit law is clear that where a licensee's use of a copyrighted work is authorized by a license, any claim for unpaid royalties for that use cannot form the basis of an infringement claim. Rather, a failure to pay royalties under a valid license agreement could only give rise to a breach of contract claim against the party with which the copyright owner has contracted to receive royalties.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Conditions Precedent

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Conditions Subsequent

HN45[] **Contract Conditions & Provisions, Conditions Precedent**

Under New York law, conditions are not favored, and in the absence of unambiguous language, a condition will not be read into a contract.

Contracts Law > ... > Ambiguities & Contra Proferentem > Contract Ambiguities > Latent Ambiguities

Contracts Law > ... > Ambiguities & Contra Proferentem > Contract Ambiguities > Patent Ambiguities

HN46[] **Contract Ambiguities, Latent Ambiguities**

The determination of whether a contract term is ambiguous is a threshold question of law for the court. An agreement is ambiguous only if it is capable of more than one meaning when viewed objectively by a reasonably intelligent person who has examined the context of the entire integrated agreement. Silence, or omission of a term, however, does not generally create ambiguity.

Contracts Law > Contract Interpretation > Parol Evidence > Course of Dealing

Contracts Law > ... > Ambiguities & Contra Proferentem > Contract Ambiguities > Patent Ambiguities

Contracts Law > ... > Ambiguities & Contra Proferentem > Contract Ambiguities > Latent Ambiguities

Contracts Law > Contract Interpretation > Parol Evidence > Custom & Usage

HN47[] **Parol Evidence, Course of Dealing**

An omission or mistake in a contract does not constitute an ambiguity, and the question of whether an ambiguity exists must be ascertained from the face of an agreement without regard to extrinsic evidence.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Copyright Law > ... > Civil Infringement Actions > Elements > Ownership

HN48[] **Complaints, Requirements for Complaint**

A plaintiff must identify, with specificity, the original works that are the subject of her copyright claim and which acts committed by defendants constitute infringement of her rights. *Fed. R. Civ. P. 8(a)(2)* has been construed to require a plaintiff to plead with specificity the acts by which a defendant has committed copyright infringement.

Civil Procedure > Sanctions > Baseless Filings > Certification Requirements

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN49[] **Baseless Filings, Certification Requirements**

Fed. R. Civ. P. 11(b) does not relieve a party of the obligation to meet basic pleading standards established by *Fed. R. Civ. P. 8(a)(2)* and Second Circuit *Fed. R. Civ. P. 12(b)(6)* case law.

Copyright Law > ... > Assignments & Transfers > Licenses > Exclusive Licenses

Copyright Law > ... > Assignments & Transfers > Licenses > Nonexclusive Licenses

HN50[] **Licenses, Exclusive Licenses**

Use of a copyrighted work within the scope of a valid license is non-infringing as a matter of law, and a valid license, either exclusive or non-exclusive, immunizes the licensee from a charge of copyright infringement, provided that the licensee uses the copyright as agreed with the licensor. The same holds true for a sublicensee's use that has been authorized by a licensee.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > License

Copyright Law > ... > Assignments & Transfers > Licenses > Exclusive Licenses

Copyright Law > ... > Assignments & Transfers > Licenses > Nonexclusive Licenses

HN51[] **Affirmative Defenses, License**

Under copyright law, the existence of a license is viewed as an affirmative defense to infringement claims.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN52[] **Breach of Contract Actions, Elements of Contract Claims**

A breach of contract claim must be dismissed where the unambiguous terms of the contract do not support a plaintiff's claim. The provisions of the parties' agreements establish the rights of the parties and prevail over conclusory allegations in the complaint. A court cannot supply a specific obligation the parties themselves did not spell out. Moreover, New York law and the Twombly-Iqbal standards of federal pleading require a complaint to identify, in non-conclusory fashion, the specific terms of the contract that a defendant has breached. Otherwise, the complaint must be dismissed.

Copyright Law > ... > Civil Infringement Actions > Standing > Beneficial Owners

Copyright Law > ... > Assignments & Transfers > Licenses > Exclusive Licenses

HN53[] **Standing, Beneficial Owners**

A licensee has the right to sue for infringement of its exclusive license rights. *17 U.S.C.S. § 501(b)*.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Integration Clauses

HN54[] **Contract Conditions & Provisions, Integration Clauses**

A general merger clause precludes extrinsic proof to add or to or vary the terms of the agreement.

Business & Corporate Law > ... > Causes of Action & Remedies > Breach of Fiduciary Duty > Defenses

Torts > Intentional Torts > Breach of Fiduciary Duty > Defenses

Torts > Intentional Torts > Breach of Fiduciary Duty > Elements

HN55[] **Breach of Fiduciary Duty, Defenses**

In disputes between a purported principal and purported agent, where the interests of third parties or government agencies are not in issue, the parties are bound by a contractual agreement that their relationship is not one of agency. Such a disclaimer bars a claim for breach of fiduciary duty.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

Torts > Intentional Torts > Breach of Fiduciary Duty > Elements

HN56[] **Breach of Contract Actions, Elements of Contract Claims**

A cause of action for breach of fiduciary duty that is merely duplicative of a breach of contract claim cannot stand.

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN57[] **Contract Interpretation, Good Faith & Fair Dealing**

While it is true that contracts include an implied covenant of good faith and fair dealing under New York law, a claim for breach of the implied covenant will be dismissed as redundant where the conduct allegedly violating the implied covenant is also the predicate for breach of covenant of an express provision of the underlying contract.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN58[] **Breach of Contract Actions, Elements of Contract Claims**

New York law does not recognize a separate cause of action for breach of the implied covenant of good faith and fair dealing when a breach of contract claim, based upon the same facts, is also pled.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN59[] **Types of Contracts, Quasi Contracts**

The existence of a valid and enforceable contract precludes an unjust enrichment claim relating to the subject matter of the contract.

Copyright Law > Constitutional Copyright Protections > Federal & State Law Interrelationships > Federal Preemption

HN60[] **Federal & State Law Interrelationships, Federal Preemption**

Under *17 U.S.C.S. § 301(a)*, all legal or equitable rights that are equivalent to any of the exclusive rights within the general scope of copyright as specified by *17 U.S.C.S. § 106* in works of authorship that are fixed in a tangible medium of expression and come within the subject matter of copyright as specified by *17 U.S.C.S. §§ 102* and *103*, whether created before or after that date and whether published or unpublished, are governed exclusively by this title. Thereafter, no person is entitled to any such right or equivalent right in any such work under the common law or statutes of any state.

Copyright Law > Constitutional Copyright Protections > Federal & State Law Interrelationships > Federal Preemption

HN61[] **Federal & State Law Interrelationships, Federal Preemption**

A state-law claim is preempted by *17 U.S.C.S. § 301(a)* when: (1) the particular work to which the claim is being applied falls within the type of works protected by the Copyright Act under *17 U.S.C.S. §§ 102* and *103*, and *(2)* the claim seeks to vindicate legal or equitable rights that are equivalent to one of the bundles of exclusive rights already protected by copyright law under *17 U.S.C.S. § 106*. The first prong of this test is called the subject matter requirement, and the second prong is called the general scope requirement.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Copyright Law > Constitutional Copyright Protections > Federal & State Law Interrelationships > Federal Preemption

HN62[] **Motions to Dismiss, Failure to State Claim**

A preempted Copyright Act claim fails to state a cause of action and is subject to immediate dismissal under *Fed. R. Civ. P. 12(b)(6)*.

Copyright Law > Constitutional Copyright Protections > Federal & State Law Interrelationships > Federal Preemption

HN63[] **Federal & State Law Interrelationships, Federal Preemption**

For a claim arising under state law to be preempted under *17 U.S.C.S. § 301(a)*, two tests must be met. The first, called the subject matter requirement, requires that the work in which the right is asserted must be fixed in tangible form and come within the subject matter of copyright as specified in *17 U.S.C.S. §§ 102* or *103* of the Copyright Act. The second prong of the test for copyright preemption is that the right asserted by a plaintiff's state-law claim must be equivalent to rights specified and protected in *17 U.S.C.S. § 106* of the Act. This is often called the "general scope" requirement. The general scope requirement is satisfied when the state-created right may be abridged by an act that would, by itself, infringe one of the exclusive rights provided by federal copyright law.

Copyright Law > Constitutional Copyright Protections > Federal & State Law Interrelationships > Federal Preemption

HN64[] **Federal & State Law Interrelationships, Federal Preemption**

For a state-law claim not to be considered equivalent to a copyright claim, the state claim must require an additional element that is qualitatively different from the elements of copyright infringement. The courts take a restrictive view of what extra elements transform an otherwise equivalent claim into one that is qualitatively different from a copyright infringement claim. For example, an action will not be saved from preemption by elements such as awareness or intent, which alter the action's scope but not its nature.

Copyright Law > Constitutional Copyright Protections > Federal & State Law Interrelationships > Federal Preemption

HN65[] **Federal & State Law Interrelationships, Federal Preemption**

Although enrichment is not an element of a copyright infringement claim, it does not constitute an extra element for the purposes of preemption analysis.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Copyright Law > Constitutional Copyright Protections > Federal & State Law Interrelationships > Federal Preemption

HN66[] **Complaints, Requirements for Complaint**

Fed. R. Civ. P. 8(d)(2) does not purport to override *17 U.S.C.S. § 301* preemption. Pleading a claim in the alternative does not resuscitate an otherwise unviable claim.

Counsel: [1]** For the Plaintiffs: Danial A. Nelson, Esq., Kevin Patrick McCulloch, Esq., NELSON & MCCULLOCH LLP, New York, NY.

Opinion by: ROBERT W. SWEET

Opinion

[*90] [EDITOR'S NOTE: THIS DOCUMENT IS MISSING TEXT. THE LEXIS SERVICE WILL PLACE THE TEXT ON-LINE UPON RECEIPT.]

REDACTED OPINION*

Sweet, D.J.

There are several motions currently pending in this action between plaintiffs Paul Spinelli, Scott Boehm, Paul Jasienski, George Newman Lowrance, David Stluka, David Drapkin, and Thomas E. Witte **[*91]** ("Plaintiffs") and defendants National Football League ("NFL"), NFL Properties, **[**2]** LLC, ("NFLP"), NFL Ventures, L.P., NFL

* The initial Opinion was filed under seal to protect any confidential information asserted by the parties.

Productions, LLC, NFL Enterprises, LLC (together with NFL, NFLP, NFL Ventures, L.P, and NFL Productions, "NFL Entities"), Arizona Cardinals Holdings, Inc., Atlanta Falcons Football Club LLC, Baltimore Ravens Limited Partnership, Buffalo Bills, Inc., Panthers Football LLC, Chicago Bears Football Club, Inc., Cincinnati Bengals, Inc., Cleveland Browns LLC, Dallas Cowboys Football Club, Denver Broncos Football Club, Detroit Lions, Inc., Green Bay Packers, Inc., Houston NFL Holdings LP, Indianapolis Colts, Inc., Jacksonville Jaguars Ltd., Kansas City Chiefs Football Club, Inc., Miami Dolphins, Ltd., Minnesota Vikings Football Club LLC, New England Patriots, LP, New Orleans Louisiana Saints, LLC, New York Football Giants, Inc., New York Jets Football Club, Inc., Oakland Raiders LP, Philadelphia Eagles Football Club, Inc., Pittsburgh Steelers Sports, Inc., San Diego Chargers Football Co., San Francisco Forty Niners Ltd., Football Northwest LLC, The Rams Football Co. LLC, Buccaneers Limited Partnership, Tennessee Football, Inc., and Washington Football Inc. (Arizona Cardinal Holdings, Inc. through Washington Football Inc., "NFL Clubs," and together with **[**3]** NFL Entities, "NFL Defendants"), Replay Photos, LLC ("Replay"), Getty Images (US), Inc. ("Getty"), and Associated Press ("AP," together with NFL Defendants, Replay, and Getty, "Defendants").

NFL Defendants, Replay and AP have moved to dismiss the amended complaint (the "AC"). Getty has moved to dismiss the AC and compel arbitration, or stay the action as to Getty.

For the reasons set forth below, NFL Defendants', Replays', and AP's motions to dismiss, and Getty's motion to compel arbitration, are granted.

Prior Proceedings

Plaintiffs filed their initial complaint ("Complaint") against the NFL Entities, Replay, Getty, and AP on October 21, 2013. On December 16, 2013, Getty moved to dismiss or, in the alternative, to stay the action as against it based on arbitration clauses contained within contracts at issue in this dispute. (See Dkt. Nos. 21, 22, 24.) At the same time, Getty filed a demand for arbitration with the American Arbitration Association ("AAA"). (See Bloom Decl. Ex. A.) On December 18, 2013, AP and the NFL Entities, and on December 26, 2013, Replay filed motions to dismiss the complaint.

On February 12, 2014, in lieu of opposing Defendants' motions to dismiss, Plaintiffs filed **[**4]** the AC against all currently named Defendants. (See Dkt. No. 42.) On March 31, 2014, Defendants renewed their motions to dismiss. (Dkt. No. 51.) Getty and Plaintiffs have agreed to hold the arbitration proceeding in abeyance pending resolution of Getty's motion to compel arbitration. (See Bloom Decl. Ex. B.)

The instant motions were heard and marked fully submitted on October 1, 2014. Subsequently, and while the motions to dismiss have been pending, motions to stay discovery were filed by Defendants and granted by the Court. (See Dkt. Nos. 99, 100.)

Facts

The following facts are taken from the Plaintiffs AC, which are taken to be true for the purposes of disposing of the instant motions, and the terms of certain agreements either directly referenced by Plaintiffs or integral to the AC.[1]

---

[1] Plaintiffs argue specifically that the Second AP Agreement and the Replay Agreement (defined below) should not be considered because Plaintiffs are not parties to the agreements, had no possession of the agreements, and had no "direct knowledge of the terms of these agreements." (Pls.' Opp'n to AP Mot. 15.) However, ***HN1***[] courts may consider documents on a motion to dismiss, even if not incorporated by reference **[**5]** in a complaint, "where the complaint 'relies heavily upon its terms and effect,' thereby rendering the document 'integral' to the complaint. *DiFolco v. MSNBC Cable LLC, 622 F.3d 104, 111 (2d Cir. 2010)* (citations omitted); see also *Chamberlain v. City of White Plains, 986 F. Supp. 2d 363 (S.D.N.Y. 2013)* (On a motion to dismiss, the Court may consider documents that are "integral" to Plaintiffs' AC, that is, documents "upon the terms and effect of which the complaint relies heavily . . . ."). The AC refers to and relies on these agreements (see AC ¶¶ 20, 25-26, 27, 28, 38, 54, 79, 92, 116, 136, 138, 139, 140, 141, 157, 166, 175, 181), the agreements were discussed and quoted in NFL's initial

[*92] Plaintiffs are seven "professional photographers who make their living taking and licensing sports-related photographs, including but not limited to content related to [NFL] practices, games, functions, and other events." (AC ¶ 1.)

Plaintiffs, collectively, have photographed "hundreds, if not thousands" of NFL and NFL Club games, practices and events, and have taken "literally hundreds of thousands of NFL-related photographs." (AC ¶ 31.) Among these photographs, Plaintiffs allege there are "tens of thousands of photos . . . that do[] not include any marks, logos, or other intellectual property owned by the NFL Entities."[2] (AC ¶¶ 34-35.)

The NFL has collectively licensed and protected NFL and NFL Club trademarks, including names, nicknames, logos, colors, designs, slogans, symbols, and other identifying indicia for decades. (See AC ¶¶ 44-45; NFL Def.'s Mot. 7) [TEXT REDACTED BY THE COURT] NFL and NFL Clubs, [TEXT REDACTED BY THE COURT] provided NFL with exclusive licensing rights for certain **[**7]** business operations [TEXT REDACTED BY THE COURT]

Prior to 2004, NFL maintained an in-house department that directly licensed the rights to NFL-related photographs. (AC ¶¶ 44-46.) For many years, Plaintiffs obtained media credentials - either through their agents, Getty and AP, or directly from the NFL Clubs via the NFL's in-house department, NFL Photos, to photograph events for the NFL and individual NFL Clubs. (AC ¶ 30.)[3]

In July 2004, NFL — through NFLP — entered into a five-year licensing agreement with Getty ("Getty Agreement"), whereby Getty acquired rights to license **[*93]** photographs of NFL content to: (i) NFL business partners (including sponsors and licensees of the NFL, and other NFL-approved companies) for commercial uses; and (ii) media organizations for editorial **[**8]** uses. (Getty Agreement [TEXT REDACTED BY THE COURT]; see also AC ¶ 46.) The rights granted under the Getty Agreement covered a "worldwide" territory (Getty Agreement [TEXT REDACTED BY THE COURT]), and became exclusive in 2007 when Getty acquired WireImage, another stock photography agency. (AC ¶ 46.)

Among the images covered by the Getty Agreement were photographs in which Getty owned the copyrights (Getty Agreement [TEXT REDACTED BY THE COURT]), and photographs from independent contributors such as Plaintiffs ("Contributor Photographs"), [TEXT REDACTED BY THE COURT] (Getty Agreement [TEXT REDACTED BY THE COURT]), [TEXT REDACTED BY THE COURT], Getty had entered into agreements with each of the Plaintiffs ("Getty Contributor Agreements"), pursuant to which Plaintiffs became contributing photographers for Getty, and Getty received the right to license Plaintiffs' works, including NFL photographs. (AC 1 47.)

The Getty Agreement authorized "NFL Entities" — defined to include the NFL (and its affiliates, subsidiaries, and successors in interest), and NFL Clubs (Getty Agreement [TEXT REDACTED BY THE COURT]) — to make royalty-free use of photographs owned by Getty for a wide variety of uses, **[**9]** including:

[TEXT REDACTED BY THE COURT]

---

unredacted motion to dismiss (see Dkt. No. 30) and copies of these two agreements were attached as exhibits to the declaration of Andrew L. Deutsch (see Deutsch Decl. Exs. A-D) in support of AP's first motion to dismiss Plaintiffs' Complaint. See *Chambers v. Time Warner, Inc., 282 F.3d 147, 153-54 & n. 4 (2d Cir. 2002)* (contracts properly considered on *Rule 12(b)(6)* motion where "the Amended Complaint [was] replete with references to the contracts" and requested adjudication related to their terms); see also *Feinman v. Schulman Berlin & Davis, 677 F. Supp. 168, 170 n. 3 (S.D.N.Y. 1988)* (finding document referred to in complaint, but not identified by name, incorporated by reference). The Court "need not credit . . . characterizations presented as factual allegations," *In re Livent, Inc. Noteholders Securities Litig., 151 F. Supp. 2d 371, 404 (S.D.N.Y. 2001)*, or "accept as true **[**6]** an allegation that is contradicted by documents on which the complaint relies," *In re Elan Corp. Securities Litig., 543 F. Supp. 2d 187, 206 (S.D.N.Y. 2008)* (quoting *In re Bristol-Myers Squibb Sec. Litig., 312 F. Supp. 2d 549, 555 (S.D.N.Y. 2004))*.

[2] "NFL Entities," as defined in the AC, refers to the same entities defined herein by the same abbreviation.

[3] Plaintiffs allege that they primarily photographed NFL events and games under "speculation agreements," or "on spec," meaning that instead of being paid flat fees for their work they retained ownership of the copyrights in the photos that they took during an event and then earned income by licensing their photos. (AC ¶ 32.) Plaintiffs note that this action only involve those photos that Plaintiffs created on spec. (AC ¶ 33.)

(Id.) The right of NFL Entities to make such uses extended to Photographs, [TEXT REDACTED BY THE COURT] (Getty Agreement [TEXT REDACTED BY THE COURT]) Plaintiffs each submitted images to Getty of NFL games and other NFL-related matters pursuant to the Getty Contributor Agreements. (AC ¶ 47.)

Plaintiffs allege that "[d]espite the fundamental obligations to license Plaintiffs' works . . . Getty . . . granted the NFL nearly unfettered access to Plaintiffs' photo collections and, either expressly or by inaction, allowed the NFL to make free or 'complimentary' use of Plaintiffs' copyrights photos." (AC ¶ 72.) Plaintiffs further allege that Getty "lacked authority to grant such unfettered usage rights or complimentary and indefinite use licenses to the NFL without obtaining separate and express permission from Plaintiffs for each such 'complimentary' license or use," (AC ¶ 77) and that the Getty Contributor Agreements "precluded Getty . . . from granting usage rights at no cost and Getty['s] . . . own standard terms and conditions for usage licenses pertaining to its Rights Managed collections photos prohibited such use." (AC ¶ 78.)]

The Getty Agreement expired **[**10]** on March 31, 2009. (Getty Agreement [TEXT REDACTED BY THE COURT])

In 2009, "[NFLP] entertained bids for exclusive commercial licensing rights for NFL and NFL Club photos and eventually selected AP to be the sole commercial licensor [of] such photographs." (AC ¶¶ 26, 54.) Under the resulting agreement (the "First AP Agreement"), AP became the NFLP's exclusive agent and distributor for licensing commercial uses of images of NFL content to NFL business partners, and a non-exclusive agent for licensing editorial uses of those images. (First AP Agreement [TEXT REDACTED BY THE COURT].) As a direct consequence of the switch to AP, Plaintiffs allege they lost their ability to sell higher-value commercial licenses (as opposed to editorial licenses) through Getty and thus were forced to transition their entire NFL collections to AP if they wished to continue offering commercial licenses for their NFL content. (AC ¶ 55.)

Plaintiffs also allege that because they owned the copyrights and licenses for other non-NFL sports-related content, and Getty had exclusive licensing deals and/or significant licensing partnerships with other sports entities, such as Major League Baseball and National Collegiate **[**11]** Athletic Association, they were presented with an **[*94]** "impossible choice." (AC ¶¶ 56, 58.) Getty, Plaintiffs allege, threatened to remove Plaintiffs' other sports content from its distribution networks and/or terminate its relationship with Plaintiffs entirely if they did not agree to continue licensing their NFL content through Getty even after its commercial licensing deal with the NFL expired, and made it clear that it would not "welcome back" any contributors who moved their NFL content to AP should Getty ever regain the rights to license NFL content in the future. (AC ¶ 57.) Because certain Plaintiffs had significant non-NFL content at Getty, Getty's position forced Plaintiffs to choose between losing commercial licensing opportunities for their NFL content by not going to AP or giving up commercial licensing opportunities for their non-NFL content by leaving Getty. (AC ¶ 58.)

Five of the Plaintiffs, Jasienski, Stluka, Spinelli, Witte, and Drapkin, ended their relationships with Getty (AC ¶ 62), entered into license agreements with AP ("AP Contributor Agreements"), and transferred their existing images of NFL content from Getty to the AP photo library. (AC ¶ 59.) Subsequently, Plaintiffs **[**12]** Lowrance and Boehm entered into license agreements with AP and moved their NFL images from Getty to AP. (AC ¶ 62.) As a result of terminating their relationships with Getty, Plaintiffs allege that they have lost significant revenue due to the loss of licensing opportunities for their non-NFL content. (AC ¶ 63.)

The First AP Agreement encompassed the use and licensing of images in which AP owned copyrights (First AP Agreement [TEXT REDACTED BY THE COURT]), as well as Contributor Photographs [TEXT REDACTED BY THE COURT] (First AP Agreement [TEXT REDACTED BY THE COURT]). The First AP Agreement covered a "worldwide" territory (First AP Agreement [TEXT REDACTED BY THE COURT]), and authorized the NFL (and its affiliates, subsidiaries, and successors) and NFL Clubs to make a wide range of editorial, charitable, and marketing uses of photographs owned by AP on a royalty-free basis. (First AP Agreement [TEXT REDACTED BY THE COURT])

When the First AP Agreement expired, "[NFLP] again entertained bids for the exclusive commercial licensing rights for NFL and NFL Club photos and eventually renewed its agreement with AP." (AC ¶ 27.) AP and the NFL thus entered into a new license agreement, with a **[**13]** term from April 1, 2012 through March 31, 2015 (the "Second

AP Agreement"). (Second AP Agreement [TEXT REDACTED BY THE COURT]) The Second AP Agreement, while not identical to the First AP Agreement, states that AP is: (i) the "exclusive" and "worldwide agent and distributor" for licensing commercial uses of NFL photographs to NFL business partners (Second AP Agreement [TEXT REDACTED BY THE COURT]); and (ii) a non-exclusive worldwide agent and distributor for licensing editorial uses. (Second AP Agreement [TEXT REDACTED BY THE COURT].)

The Second AP Agreement permits "NFL Entities," i.e., NFL (and its affiliates, subsidiaries, and successors) and the NFL Clubs, to make royalty-free use of AP-owned and Contributor Photographs for a wide range of editorial, charitable, and marketing uses, including:

[TEXT REDACTED BY THE COURT]

(Second AP Agreement [TEXT REDACTED BY THE COURT].) The Second AP Agreement expressly authorizes the foregoing uses of photographs by the NFL and NFL Clubs from April 1, 2009 through the end of the agreement's term. (Id.)

Plaintiffs allege that at one time they contacted the NFL to "demand that it cease and desist using their copyrighted works without permission and **[**14]** without paying the requisite licensing fees." (AC ¶ 83.) The NFL responded that the First AP Agreement included an express license that allowed complimentary use of any NFL-related photos licensed by AP. (Id.) **[*95]** Plaintiffs then contacted AP regarding the NFL's response and contend that AP denied the NFL's claim and "assured Plaintiffs that not only did the [First AP Agreement] . . . not include such a license, but the AP was currently renegotiating its agreement with the NFL to address the widespread misuse of photos by the NFL." (AC ¶ 84.) Subsequently, AP granted NFL a license that was "Royalty Free" and "retroactive" to 2009, which Plaintiffs contend was granted due to "threats and coercive pressure by the NFL, including the threat of moving its exclusive license back to Getty . . ., which also had submitted a bid to reacquire the NFL's business." (AC ¶ 86.)

Plaintiffs allege that despite repeated cease and desist demands, the NFL Defendants continue to use thousands of Plaintiffs' photographic works to promote the NFL's brand, sell-NFL related products, and "enhance the NFL's image" in order to generate revenue both as an independent entity and on behalf of the NFL Clubs. (AC ¶ 98.) **[**15]** To that end, Plaintiffs allege that NFL permits visitors to NFL.com to access large resolution copies of Plaintiffs' photos "without appropriate copyright management information or protection against illegal copying," as well as "encourage[] visitor to 'tweet' on Twitter.com or 'share' on Facebook.com copies of Plaintiffs' works." (AC ¶ 111.)

Plaintiffs allege that if it were not for "the NFL's illegal efforts to control the commercial licensing market for NFL-related stock photos, Plaintiffs' licensing agents would not have been forced to purportedly grant the NFL 'complimentary' usage of Plaintiffs' photos . . . [and], [i]nstead . . ., Plaintiffs' agents could have negotiated licensing agreements with individual NFL [Clubs] on better terms and/or Plaintiffs could have negotiated agreements with other licensing agents that precluded such unfair and inequitable terms." (AC ¶ 148.)

Effective as of April 1, 2012, AP entered into an "NFL Photo Store Services and License Agreement" with Replay ("Replay Agreement"), under which Replay agreed to operate the "NFL Photo Store" for AP and fulfill customer orders. (Replay Agreement; AC ¶ 114 ("AP and Replay . . . also sell copies of photographs directly **[**16]** to consumers through the NFL Photo Store.").) Plaintiffs allege that Replay is an online retailer that specializes in selling sports-related photographs, and that owns and operates the website located at *www.replayphotos.com*. (AC ¶ 19.) Plaintiffs contend that Replay "infringed Plaintiffs' copyrights by copying, publishing, displaying, exporting, and otherwise using and exploiting photographic works to which Plaintiffs own all copyrights without a valid license." (AC ¶ 166.) Plaintiffs further allege that AP requested that Plaintiffs agree to amendments in their contributor agreements to allow such sales and Plaintiffs expressly rejected AP's request. (AC ¶ 116.)

The AC sets forth seven counts: Count I alleges violations of the Sherman Act against NFL Defendants, Getty, and AP for conspiring to "restrain trade" through exclusive licensing agreements (AC ¶¶ 122-59); Count II alleges copyright infringement against all Defendants (AC ¶¶ 160-200); Counts III through VI allege vicarious copyright infringement, contributory copyright infringement, breach of contract, and breach of fiduciary duties against Getty and AP (AC ¶¶ 201-46); and Count VII alleges unjust enrichment against all Defendants **[**17]** (AC ¶¶ 247-55).

The Contributor Agreements

Central to the success of Plaintiffs' claims are the Getty Contributor Agreements and the AP Contributor Agreements. **[*96]** As such, the relevant terms of each will be briefly outlined below.

1. The Getty Contributor Agreements[4]

Each of the Getty Contributor Agreements requires arbitration of any disputes arising in connection with the agreements. Specifically, Section 9.5 of the Lowrance Agreement provides that "[a]ny dispute arising out of or in connection with the Agreement shall be finally settled under the Commercial Rules of the [AAA] or International Chamber of Commerce ('ICC') . . . ." (Lowrance Getty Contributor Agreement § 9.5.) In virtually identical language, Section 11.8 of the Getty Images Standard Terms and Conditions, which is incorporated into the remaining six Getty Contributor Agreements, provides that "[a]ny dispute arising out of or in connection with the Brand Agreement shall be finally settled under the Commercial Rules of the [AAA] or [ICC] . . . ." (See Lindquist Decl. Exs. B-G.)

2. The AP Contributor Agreements

a. The Relationship Between the Parties **[**18]**

The AP Contributor Agreements are all governed by New York law.[5] (AP Contributor Agreements § 10.) Each of the Plaintiffs agrees to "provide contributing photography services to AP." (Id. § 1 or § 1.1.) AP agrees to use commercially reasonable efforts to assign each Plaintiff to cover NFL events and to obtain NFL credentials for that photographer to permit him to take photographs at the NFL events. (Id., §§ 2 or 2.2-2.3). Each Plaintiff agrees to make a selection of photos from the event available to AP, and AP agrees to review these photos and reasonably limit the rejection of tendered photos. (Id., §§ 3 or 3.1-3.4).

While each Plaintiff retains copyright in his photos, he provides a broad copyright license to AP in all of his photos **[**19]** that are not rejected by AP. (AP Contributor Agreements, § 4 or §4.2). In exchange for the license, AP agrees to pay royalties to each Plaintiff for certain sublicenses that AP grants to third parties. (Id., §§ 5.1-5.2). Either AP or the Plaintiff is entitled to terminate an AP Contributor Agreement, with or without cause, upon thirty days written notice. (Id., §§ 7 or 7.1). Obligations under the license section of the AP Contributor Agreements survive termination. (Id.)

In the AP Contributor Agreements, each Plaintiff agrees that he is an independent contractor to AP and that he has no agency relationship with AP:

> Photographer shall be acting as an independent contractor and shall not represent himself or herself as an employee of AP, but only as an independent contractor. . . . Neither the making of this Agreement nor the performance of its provisions shall be construed to constitute either Party an agent, partner, joint venture, employee or legal representative of the other Party.

(AP Contributor Agreements, §1 or §1.3.)

[*97] b. The License Provisions

---

[4] Discussion of the Getty Contributor Agreements is limited to the terms relevant to Getty's motion to compel arbitration.

[5] "AP Contributor Agreements" as used herein collectively refers to all the AP Contributor Agreements between AP and Plaintiffs. Terms are substantially the same across AP Contributor Agreements, although in some AP Contributor Agreements, the terms are divided only by section numbers, while in others, section and subsection numbers are used. Citations reference both section and subsection numbers. References to a specific AP Contributor Agreement are prefaced by the particular Plaintiff's name.

Section 4 of each AP Contributor Agreement, with slight variation, contains a broad license to AP of the photographer's rights in his photos, which grants AP the right to copy, disseminate **[**20]** and otherwise use those photos, and permits AP to transfer and sublicense all these rights to "other entities":

> Photographer hereby provides to AP a perpetual, irrevocable, transferable, worldwide, right and license to reproduce, edit, translate the caption of, prepare derivative works of, publicly perform, publicly display, load into computer memory, cache, store and otherwise use the Event Photos and to transfer or sublicense these rights to other entities. With respect to NFL Event Photos taken at NFL Events for which AP directly or indirectly arranges for Photographer to obtain a credential, the foregoing rights shall be exclusive for so long as the NFL (or one of its affiliates) confers to AP (or one of its affiliates) the exclusive rights to operate as an NFL commercial use licensing agent, and non-exclusive thereafter. With respect to all other Event Photos, the foregoing rights shall be non-exclusive. AP shall present the Event Photos through AP's image database **[*98]** currently known as "AP Images" and other image databases at AP's discretion.[6]

(Boehm and Drapkin AP Contributor Agreements § 4.2.)

> Subject to Section 7.1, Photographer hereby provides to AP a perpetual, irrevocable, transferable, worldwide, **[**21]** right and license to reproduce, edit, translate the caption of, prepare derivative works of, publicly perform, publicly display, load into computer memory, cache, store and otherwise use the Final Photos and to transfer or sublicense these rights to other entities. With respect to NFL Event Photos taken at NFL Events for which AP directly or indirectly arranges for Photographer to obtain a credential, the foregoing rights shall be exclusive for so long as the NFL (or one of its affiliates) confers to AP (or one of its affiliates) the exclusive rights to operate as an NFL commercial use licensing agent, and non-exclusive thereafter. With respect to all other Event Photos and the Archival Event Photos, the foregoing rights shall be non-exclusive. AP shall present the Final Photos through AP's image database currently known as "AP Images" (the "AP Images Platform") and other image databases at AP's discretion.

(Spinelli, Stluka, Witte and Jasienski AP Contributor Agreements § 4.2.)

> Photographer hereby provides to AP a non-exclusive, transferable, perpetual, irrevocable, worldwide right and license to reproduce, edit, translate the caption of, prepare derivative works of, publicly perform, publicly **[**22]** display, load into computer memory, cache, store and otherwise use the Event Photos and to transfer or sublicense these rights to other entities. AP shall present the Final Photos through AP's image database currently known as "AP Images" and other image databases at AP's discretion.

(Lowrance AP Contributor Agreement § 4.2)

In all but Lowrance's AP Contributor Agreement, the photographer has granted AP an exclusive license for NFL Event Photos taken by him at an NFL event where AP directly or **[**23]** indirectly arranges for the photographer to be credentialed for the event. The license is to be exclusive for the period of time that AP remains the NFL's exclusive licensing agent, and is non-exclusive thereafter. The Lowrance AP Contributor Agreement grants AP the same broad rights as the other AP Contributor Agreements, but on a non-exclusive basis. As with the other AP Contributor Agreements, the Lowrance Contributor Agreement expressly authorizes AP to transfer and sublicense to other entities to the full extent of AP's own license rights.

c. The Royalty Provisions

Each of the AP Contributor Agreements sets forth AP's agreement to pay royalties to the contributor, "[i]n exchange for the license granted in Section 4." The Boehm, Drapkin, and Lowrance Agreements require AP to pay the photographer a royalty equal to a defined percentage of "Net Revenue" on "qualifying Event Photo Sales." "Event

---

[6] "Event Photos" are defined as the photographs taken by the contributor at an "Event," which have been selected by the contributor as his best photographs taken at the Event ("Best Cut Photos") (AP Contributor Agreements § 3.1) and which AP has not rejected. (Id. §3.4). "NFL Event Photos" are Event Photos taken at "NFL Events," which are Events credentialed, promoted, sponsored or requested by the NFL, its affiliates, and its member clubs. (Id.) Some AP Contributor Agreements also use the term "Final Photos," which refer to the contributor's Event Photos together with his "Archival Event Photos" (photos taken by the contributor at NFL games prior to the effective date of the AP Contributor Agreement). (Id. § 3.2.1.)

Photo Sales" are defined as "mean[ing] only the a la carte sale of licenses for Event Photos through AP's online database service, currently known as 'AP Images.'" "A la carte sales" are further defined as "the sale of licenses for individual photos for which a per-image price is established." "Net Revenue" is defined **[**24]** as "all cash actually collected by AP from the sale of copies of a particular Event Photo, less sales commission." The AP Contributor Agreements also recognize that AP may offer the Event Photos for a la carte sale at a "bulk rate" which may include the photographs of photographers other than the contributor. In such a case, to determine royalties, AP is to apportion the cash received on an equal pro-rata basis across all photos included in the a la carte bulk rate. (AP Contributor Agreements § 5.1).

Section 5.1 of the Jasienski, Spinelli, Stluka and Witte AP Contributor Agreements provide that upon a "qualifying Event Photo Sale," AP will provide the contributor with the greater of royalties calculated on the revenue-share basis described in the above paragraph, and "a royalty equal [to] twenty-five dollars ($25.00) per Final Photo." However, these AP Contributor Agreements also provide that these minimum royalties are only due on "qualifying Event Photo Sales," which means "the a la carte sale of licenses for Event Photos." (Id.)

The AP Contributor Agreements do not require AP to license the contributors' photographs to third parties only through a "sale" that would generate revenue and therefore **[**25]** royalties.[7] Nothing in the AP Contributor Agreements requires AP to issue only royalty-bearing sublicenses. Additionally there is nothing in the AP Contributor Agreements that compels AP to limit the uses that NFL (or any other sublicensed third party) makes of a sublicensed photo, or to "track and manage" such sublicensee uses. (Cf. AC ¶¶ 69-72).

Applicable Standard

HN2[] On a motion to dismiss pursuant to *Rule 12(b)(6)*, all factual allegations in the complaint are accepted as true, and all inferences **[*99]** are drawn in favor of the pleader. *Mills v. Polar Molecular Corp., 12 F.3d 1170, 1174 (2d Cir. 1993)*. However, a complaint must contain "sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 663, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*.

A claim is facially plausible when "the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 663* (quoting *Twombly, 550 U.S. at 556*). In other words, the factual allegations must "possess enough heft to show that the pleader is entitled to relief." **[**26]** *Twombly, 550 U.S. at 557* (internal quotation marks omitted).

HN3[] When determining whether parties have agreed to arbitrate a dispute, courts consider two questions: (1) whether a valid agreement to arbitrate under the contract in question exists and (2) whether the particular dispute in question falls within the scope of that arbitration agreement. See *Hartford Accident & Indem. Co. v. Swiss Reins. Am. Corp., 246 F.3d 219, 226 (2d Cir. 2001)* (quoting *Nat'l Union Fire Ins. Co. v. Belco Petrol. Corp., 88 F.3d 129, 135 (2d Cir. 1996))*.

I. The Motion To Compel Arbitration Of Plaintiffs' Claims Against Getty Is Granted

HN4[] Arbitration is "strictly a matter of contract." *Ross v. Am. Express Co., 478 F.3d 96, 99 (2d Cir. 2007)* (citing *Thomson-CSF, S.A. v. Am. Arbitration Ass'n, 64 F.3d 773, 779 (2d Cir. 1995))*. The Federal Arbitration Act (FAA) provides that "an agreement in writing to submit to arbitration an existing controversy . . . shall be valid, irrevocable and enforceable . . . ." *9 U.S.C. § 2*. The FAA "requires the federal courts to enforce arbitration agreements, reflecting Congress' recognition that arbitration is to be encouraged as a means of reducing the costs and delays associated with litigation." *Vera v. Saks & Co., 335 F.3d 109, 116 (2d Cir. 2003)* (citation omitted); see also *Am.*

---

[7] Some of the AC Contributor Agreements contain a "minimum royalty" provision. However, minimum royalties are due only where AP has made an "a la carte sale of licenses for Event Photos." (AP Contributor Agreements § 5.1.)

Express Co. v. Italian Colors Rest., 133 S. Ct. 2304, 2309, 186 L. Ed. 2d 417 (2013) (noting that courts "must 'rigorously enforce' arbitration agreements according to their terms") (citation omitted)). The Second Circuit has "often and emphatically applied" the strong federal policy in favor of arbitration. *Arciniaga v. Gen. Motors Corp., 460 F.3d 231, 234 (2d Cir. 2006)*.

Because of this policy favoring arbitration, "the burden of persuasion **[**27]** falls on the party attempting to escape an arbitration agreement, not the one attempting to enforce it." *Marubeni Am. Corp. v. M/V "OHFU" her Engines, No. 94 CIV. 6251 (SAS), 1996 U.S. Dist. LEXIS 2173, 1996 WL 84485, at *2 (S.D.N.Y. Feb. 27, 1996)*. When the existence of an arbitration agreement is undisputed, "doubts as to whether a claim falls within the scope of that agreement should be resolved in favor of arbitrability." *ACE Capital Re Overseas Ltd. v. Cent. United Life Ins. Co., 307 F.3d 24, 29 (2d Cir. 2002)* (citing *Moses H. Cone Mem'l Hosp. v. Mercury Constr. Corp., 460 U.S. 1, 24-25, 103 S. Ct. 927, 74 L. Ed. 2d 765 (1983)*). Courts in this Circuit have held that, where a valid arbitration clause has been found to exist, they must abstain from adjudicating plaintiffs' claims. See, e.g., *Robinson Brog Leinwand Greene Genovese & Gluck P.C. v. Quinn & Assoc. LLP, 523 F. App'x 761, 764 (2d Cir. 2013)*.

HN5[] The Second Circuit has directed courts to classify arbitration clauses as either broad or narrow. *JLM Indus., Inc.* ***[*100]*** *v. Stolt-Nielsen SA, 387 F.3d 163, 172 (2d Cir. 2004)* (quoting *Louis Dreyfus Negoce S.A. v. Blystad Shipping & Trading Inc., 252 F.3d 218, 224 (2d Cir. 2001)*). Clauses requiring arbitration of disputes "arising out of or in connection with" underlying contracts are considered "broad" arbitration clauses. See, e.g., *Googla Home Decor LLC v. Uzkiy, No. 09-CV-1049 (CPS)(RML), 2009 U.S. Dist. LEXIS 81195, 2009 WL 2922845, at *5 (E.D.N.Y. Sept. 8, 2009)* (finding clause requiring arbitration of "[a]ny dispute, controversy, or claim arising out of or in connection with this Agreement" to be broad). Indeed, an arbitration clause covering "any claim or controversy arising out of or relating to" an agreement is "the paradigm of a broad clause," *Collins & Aikman Prods. Co. v. Bldg. Sys., Inc., 58 F.3d 16, 20 (2d Cir. 1995)* (citation omitted) - broader than one covering all claims and disputes "arising under th[e] contract." **[**28]** *Genesco, Inc. v. T. Kakiuchi & Co., Ltd., 815 F.2d 840, 845, 848 (2d Cir. 1987)*.

HN6[] A "presumption of arbitrability" arises from contracts containing broad arbitration clauses. *ACE Capital, 307 F.3d at 34*. In particular, a broad arbitration clause is "presumptively applicable to disputes involving matters going beyond the 'interpret[ation] or enforce[ment of] particular provisions' of the contract which contains the arbitration clause." *JLM, 387 F.3d at 172* (citation omitted).

a. The Arbitration Clauses Are Enforceable

Plaintiffs contend that they should not be subject to arbitration because the Getty Contributor Agreements as a whole were procedurally and substantively unconscionable. (See Pls.' Opp'n to Getty Mot. 11-18.) The United States Supreme Court has, however, held that ***HN7***[] "a challenge to the validity of the contract as a whole, and not specifically to the arbitration clause, must go to the arbitrator." *Buckeye Check Cashing, Inc. v. Cardegna, 546 U.S. 440, 448-49, 126 S. Ct. 1204, 163 L. Ed. 2d 1038 (2006)*; see also *Preston v. Ferrer, 552 U.S. 346, 128 S. Ct. 978, 169 L. Ed. 2d 917 (2008)* (holding that a dispute concerning the legality of a contract must be resolved by an arbitrator since respondent sought invalidation of the contract as a whole, and made no discrete challenge to the validity of the arbitration clause); *Cole v. Pearson Educ., Inc., No. 10 Civ. 7523(JFK)(RLE), 2011 U.S. Dist. LEXIS 110603, 2011 WL 4483760, at *5 (S.D.N.Y. Sept. 28, 2011)* ("[a]n arbitration clause is not rendered invalid by a challenge to the contract as a whole") (citing *Rent-A-Center, West, Inc. v. Jackson, 561 U.S. 63, 71, 130 S. Ct. 2772, 177 L. Ed. 2d 403 (2010)* (holding that "basis of challenge [need] to be directed specifically to **[**29]** the agreement to arbitrate before the court will intervene")). Because Plaintiffs do not challenge the validity of the arbitration provision specifically, their arguments regarding the unenforceability of the arbitration provisions fail.

b. Breach Of Contract Claims Must Be Arbitrated

Plaintiffs' breach of contract claims are arbitrable. The allegation that Getty failed to honor its obligations under the Getty Contributor Agreements (see AC ¶¶ 219-20, 223-26) obviously "aris[es] out of or in connection with" the Getty Contributor Agreements. (See Lindquist Decl. Exs. A § 9.5, B-G § 11.8); *World GTL Inc. v. Petroleum Co. of Trinidad & Tobago Ltd., No. 10 Civ. 1542 (LMM), 2010 U.S. Dist. LEXIS 83244, 2010 WL 3291673, at *3-4*

(S.D.N.Y. Aug. 11, 2010) (holding that breach of contract claims were covered by broad arbitration clause). As stated above, Plaintiffs have not argued that the arbitration clauses themselves are unenforceable. Accordingly, the breach of contract claims must be arbitrated.

[*101] c. Breach Of Fiduciary Duties Claims Must Be Arbitrated

The breach of fiduciary duties claims also clearly arise out of and in connection with the Getty Contributor Agreements. ***HN8***[] Claimed breaches of fiduciary duty arising out of agreements with broad arbitration clauses are subject to arbitration. See, e.g., *Syncora Guar. Inc. v. HSBC Mexico, S.A., 861 F. Supp. 2d 252, 259 (S.D.N.Y. 2012)* ("This claim alleges that HSBC, as [t]rustee, owes Syncora a fiduciary duty under **[**30]** the Trust Agreement, and that HSBC breached its fiduciary duty owed to Syncora, and falls within the plain meaning of [a]ny controvers[y] arising pursuant to [the] Trust Agreement" (quotation marks and internal citations omitted) (alterations in original)). Plaintiffs base their allegation of fiduciary duties owed to them by Getty on the Getty Contributor Agreements. (See AC ¶¶ 229-30 ("Plaintiffs' contributor agreements with Getty Images expressly provided that Plaintiffs were permitted to select the licensing model of their photos at the time of submission . . . . Plaintiffs' contributor agreements with Getty Images expressly provided that Plaintiffs were permitted to specify any other restrictions on the licensing of any photos . . . and that Getty Images would honor such restrictions.").) Moreover, the allegation that Getty held itself out as Plaintiffs' agent (see AC ¶ 232) squarely implicates the provision in the Getty Contributor Agreements that the contributor "agrees that he/she is an independent contractor" and that the parties' relationship "is one of contract only and is not one of partnership, employment, joint venture, principal-agent or any other legal identity." (Getty Contributor Agreements **[**31]** §§ 9.3 (Lowrance), 11.7.)

In short, the breach of fiduciary duties claims are encompassed by the arbitration clauses and must be arbitrated.

d. Unjust Enrichment Claims Must Be Arbitrated

It is well established that ***HN9***[] unjust enrichment claims fall within the scope of broad arbitration clauses. See, e.g., *Grenawalt v. AT&T Mobility, LLC, 937 F. Supp. 2d 438, 459 (S.D.N.Y. 2013)* (compelling arbitration of unjust enrichment claim that cited agreement containing broad arbitration provision as "substantial support"). Plaintiffs' unjust enrichment claim is predicated on Getty allegedly having "used Plaintiffs' photos without paying any license fees, royalties, or other compensation to Plaintiffs" pursuant to the Getty Contributor Agreements. (AC ¶ 250.) This claim thus expressly "aris[es] out of or in connection with" the Getty Contributor Agreements and therefore, as in Grenawalt, must be arbitrated.

e. Federal Copyright Infringement Claims Must Be Arbitrated

As noted, ***HN10***[] the FAA establishes a strong federal policy in favor of arbitration, and courts have long considered arbitration to be "presumptively an appropriate and competent forum for federal statutory claims." *MBNA Am. Bank, N.A. v. Hill, 436 F.3d 104, 110 (2d Cir. 2006)*. Statutory claims may be arbitrated "so long as the prospective litigant effectively may vindicate his or her statutory **[**32]** cause of action in the arbitral forum." *Green Tree Fin. Corp.-Ala. v. Randolph, 531 U.S. 79, 90, 121 S. Ct. 513, 148 L. Ed. 2d 373 (2000)* (citation omitted). "The burden is on the party opposing arbitration . . . to show that Congress intended to preclude a waiver of judicial remedies for the statutory rights at issue." *Shearson/Am. Express, Inc. v. McMahon, 482 U.S. 220, 227, 107 S. Ct. 2332, 96 L. Ed. 2d 185 (1987)*; see also *Green Tree, 531 U.S. at 91-92* ("We have held that the party seeking to avoid arbitration bears the burden of establishing that Congress intended to **[*102]** preclude arbitration of the statutory claims at issue.").

HN11[] The Supreme Court has set forth a two-step inquiry for determining whether statutory claims arising out of a contract are arbitrable. First, courts must determine "whether the parties' agreement to arbitrate reached the statutory issues." *Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth, Inc., 473 U.S. 614, 628, 105 S. Ct. 3346, 87 L. Ed. 2d 444 (1985)*. Second, courts must consider whether legal constraints external to the parties' agreement foreclosed the arbitration of those claims - namely, if a party has "made the bargain to arbitrate," it "should be held to it unless Congress . . . has evinced an intention to preclude a waiver of judicial remedies for the statutory rights at issue." Id.; see also *Gilmer v. Interstate/Johnson Lane Corp., 500 U.S. 20, 26, 111 S. Ct. 1647, 114 L. Ed. 2d 26*

(1991) (holding that claims under federal statutes generally are arbitrable so long as the arbitration agreement is broad enough to encompass the statutory claim and Congress has not indicated its intent **[**33]** to prohibit arbitration of the claim). Finally, where Congress has not clearly precluded arbitration, arbitration of a statutory claim will be compelled unless, as noted, the prospective litigant shows that it "cannot effectively vindicate [its] statutory rights in the arbitral forum." *In re Cotton Yarn Antitrust Litig., 505 F.3d 274, 282 (4th Cir. 2007)*; see also *Italian Colors, 133 S. Ct. at 2314*. Under this test, Plaintiffs cannot avoid arbitration of their copyright infringement or Sherman Act claims.

It is well settled that ***HN12***[] copyright claims asserted in connection with licensing disputes are encompassed by broad arbitration clauses like those contained in the Getty Contributor Agreements. In *Kamazaki Music Corp. v. Robbins Music Corp., 684 F.2d 228 (2d Cir. 1982)*, the Second Circuit affirmed that an arbitration clause requiring the parties to arbitrate claims "arising out of, or relating to" their contract covered copyright claims. See *id. at 229-31*. Similarly, in Cole the arbitration clause at issue required that "[a]ny dispute in connection with this stock picture invoice including its validity, interpretation, performance, or breach shall be arbitrated . . . ." *2011 U.S. Dist. LEXIS 110603, 2011 WL 4483760 at *4* (emphasis added). The court held that the arbitration clause "include[d] disputes arising under the copyright law. Defendant licensed all of the works claimed by the Plaintiff to have been infringed, and any dispute **[**34]** about the publication of the licensed photographs [wa]s a 'dispute in connection' with the license agreements . . ." and dismissal of the claims was warranted. *2011 U.S. Dist. LEXIS 110603, [WL] at *6*.

The arbitration provisions in the Getty Contributor Agreements are substantially similar to those held in *Kamakazi* and *Cole* to encompass both contract and related copyright claims. Moreover, Plaintiffs' copyright claims clearly arise "out of or in connection with" their agreements with Getty, as they are predicated on Getty's alleged authorization of or failure to prevent the NFL from engaging in uses of Plaintiffs' images that purportedly fell outside the scope of the Getty Contributor Agreements. (See AC ¶¶ 71-78, 167-71, 203-06, 212-15.) In other words, the claimed infringements are defined by the scope of the Getty Contributor Agreements. The copyright claims therefore must be arbitrated.[8]

[*103] f. Sherman Act Claims Must Be Arbitrated

HN15[] The Supreme Court has made clear that Sherman Act antitrust conspiracy claims are arbitrable. See *Mitsubishi, 473 U.S. at 633-34*; *Gilmer, 500 U.S. at 28* (claims under the Sherman Act "are appropriate for arbitration"); see also *In re Cotton Yarn, 505 F.3d at 282* ("We . . . have no difficulty concluding that domestic antitrust claims, as a class, are suitable for arbitration."). Indeed, the Court in Mitsubishi found no "explicit support" in either the Sherman Act or in the FAA for holding Sherman Act claims to be nonarbitrable. *473 U.S. at 628-29*.

The Second Circuit has held that if the allegations underlying claims "touch matters covered by the parties' contracts," those claims must be arbitrated "whatever the legal labels attached to them." JLM*, 387 F.3d at 172* (emphasis added). Conspiracy allegations may "touch matters" covered by a contract even if the alleged conspiracy

---

[8] To the extent that Plaintiffs rely on agreements not pleaded in the AC (see Pls.' Opp'n to Getty Mot. 28 (arguing that Plaintiffs' claims arise under separate subsequent agreements with no arbitration clauses that are not mentioned in the AC)), their arguments are disregarded. See *Klauber Bros., Inc. v. Russell-Newman, Inc., 11 CIV. 4985 PGG, 2013 U.S. Dist. LEXIS 42758, 2013 WL 1245456, at *11 (S.D.N.Y. Mar. 26, 2013)* **[**35]** , aff'd sub nom *Klauber Bros., Inc. v. Bon-Ton Stores, Inc., 557 F. App'x 77 (2d Cir. 2014)* ("Allegations made outside of the complaint are not properly before the court on a motion to dismiss.") (citations omitted). ***HN13***[] Claims that are raised for the first time in an opposition brief are not properly before the court. *U.S. Bank Nat'l Ass'n v. PHL Variable Ins. Co., 12 CIV. 6811 CM JCF, 2013 U.S. Dist. LEXIS 38768, 2013 WL 791462, at *2 (S.D.N.Y. Mar. 5, 2013)*. Furthermore, Plaintiffs' assertions that the fact that NFL Defendants "are indispensable parties to Plaintiffs' claims against Getty involving secondary forms of liability" makes the secondary infringement claims against Getty are non-arbitrable must also fail. ***HN14***[] Secondary infringement claims are often litigated without joinder of any alleged direct infringer. See generally, *Viacom Int'l, Inc. v. YouTube, Inc., 676 F.3d 19 (2d Cir. 2012)*; *Capitol Records, Inc. v. MP3tunes, LLC, 821 F. Supp. 2d 627 (S.D.N.Y. 2011)*; *Capitol Records, LLC v. Vimeo, LLC, 972 F. Supp. 2d 537 (S.D.N.Y. 2013)*; *Arista Records LLC v. Lime Grp. LLC, 784 F. Supp. 2d 398 (S.D.N.Y. 2010)*.

includes non-parties to the contract or involves alleged wrongdoing that occurred before or after the formation of the contract. *Alghanim v. Alghanim, 828 F. Supp. 2d 636, 655-56 (S.D.N.Y. 2011)* ("independent conspiracies may lie within the scope of arbitration clauses").

In JLM, the plaintiffs alleged an antitrust conspiracy among owners of tankers **[**36]** in the business of shipping liquid chemicals. The plaintiffs - corporations in the business of shipping, buying, selling, and trading chemicals in bulk - had entered into contracts with the defendants that directed "[a]ny and all differences and disputes of whatsoever nature arising out of this Charter . . . be put to arbitration." See *387 F.3d at 167*. The plaintiffs argued that because the alleged conspiracy was formed independently of the contractual relationship between the parties, the Sherman Act claims were not covered by the broad arbitration clause. See *id. at 175*.

The Second Circuit disagreed:

> [T]he damages which JLM asserts it suffered as a result of the conspiracy among the Owners result from the fact that it entered into the charters, each of which specifies price terms which are variously characterized in the amended complaint as "artificially high" and as "overpayments." We therefore conclude that this is a dispute "arising out of" the charters, and is therefore within the scope of the [] arbitration clause.

Id. The court added that ***HN16***[] in dealing with broad arbitration clauses, it "ha[s] not limited arbitration claims to those that constitute a breach of the terms of the contract at issue," *id. at 176* (quoting *Mehler v. Terminix Int'l Co., 205 F.3d 44, 50 (2d Cir. 2000))*, and it **[**37]** cited earlier cases in which it had held claims based on alleged conspiratorial conduct by a party with **[*104]** whom the plaintiffs were in privity to be arbitrable. See *JLM, 387 F.3d at 176*.

Plaintiffs' Sherman Act conspiracy allegations against Getty are analogous to those at issue in *JLM*. Plaintiffs allege, for example, that

> [t]he NFL's illegal monopoly and NFL Properties' agreement to grant an exclusive license to Getty Images and then AP also artificially undermined Plaintiffs' ability to bargain fairly with Getty Images and AP to obtain more favorable terms in their contributor contracts. . . . Because other licensors could not offer commercial licenses for NFL photos, Plaintiffs were forced into an impossible dilemma of either accepting the contract terms being offered by the NFL's licensing partner or losing the ability to earn revenue from the sale of more lucrative commercial licenses.

(AC ¶ 144.) As in JLM, Plaintiffs contend that the damages they purportedly suffered as a result of the alleged conspiracy among the NFL Defendants and Getty flowed from the Getty Contributor Agreements. See *JLM, 387 F.3d at 175*. Given these allegations, any assertion that the antitrust claims are not sufficiently connected to Getty Contributor **[**38]** Agreements to be arbitrable must fail.

Nor are there any "legal constraints external to the parties' agreement," *Mitsubishi, 473 U.S. at 628*, that should prevent arbitration of the antitrust claims despite the agreement to arbitrate. In their response and objection to Getty's arbitration demand, Plaintiffs argued that the Sherman Act claims should not be arbitrated because Getty is "a necessary and indispensable party to several of [Plaintiffs'] claims against the Getty Images co-defendants," which are not subject to arbitration. (See Bloom Decl. Ex. C at 2.) However, ***HN17***[] alleged co-conspirators "are not necessary parties; a plaintiff can prove the existence of a conspiracy in an action against just one of the members of the conspiracy." *In re Cotton Yarn, 505 F.3d at 284* (citing *Georgia v. Pa. R.R. Co., 324 U.S. 439, 463, 65 S. Ct. 716, 89 L. Ed. 1051 (1945)* ("In a suit to enjoin a[n anti-trust] conspiracy not all the conspirators are necessary parties defendant."); Cf. *Doctor's Assocs., Inc. v. Distajo, 66 F.3d 438, 445-46 (2d Cir. 1995)* (noting that ***HN18***[] individuals not party to an arbitration agreement cannot be "indispensable" for *Rule 19* purposes); see also *Wilson P. Abraham Constr. Corp. v. Tex. Indus., Inc., 604 F.2d 897, 904 n. 15 (5th Cir. 1979)* ("A private plaintiff need not sue all co-conspirators but may choose to proceed against any one or more of them.")).

In In re Cotton Yarn, the plaintiffs sought to evade a broad arbitration clause by arguing that "the inability to join all defendants **[**39]** in a single proceeding [by virtue of a no-joinder clause in the arbitration agreements] prevent[ed] them from vindicating their statutory rights." *505 F.3d at 283*. They argued that "severing the conspiracy into separate parts would deprive [them] of the full benefit of their proof, and make the proving of the conspiracy, if not impossible, extremely difficult." Id. In rejecting this argument, the Fourth Circuit found that potential inconvenience to the plaintiffs was trumped by congressional intent:

> [C]o-conspirators are not necessary parties in an action against a single conspirator. There is nothing in the arbitration agreements that would prevent the plaintiffs from presenting evidence about the actions of non-party defendants in order to establish the existence of the price-fixing conspiracy alleged by the plaintiffs. Accordingly, the mere fact that the plaintiffs may not join the defendants in a single arbitration proceeding does not prevent the plaintiffs from effectively vindicating their statutory rights. While individual proceedings **[*105]** may be less efficient than a single proceeding, that inefficiency is a function of Congress's preference for resolution of disputes by arbitration and cannot be a basis for **[**40]** defeating the arbitration that Congress was seeking to encourage.

Id. at 285.

The same reasoning applies here. Plaintiffs' assertion of nonarbitrable claims against alleged co-conspirators should not prevent arbitration of the claims against Getty. Indeed, the principle that co-conspirators are not necessary parties applies in this case because the alleged conspiracy is based on separate, successive exclusive licenses between the NFL and Getty and AP, respectively. (See AC ¶ 134 (alleging the NFL granted exclusive licenses to "Getty Images and then AP").) Plaintiffs allege that Getty held exclusive NFL licensing rights until 2009, (AC ¶ 46) after which AP entered into its own exclusive license agreement with the NFL (AC ¶ 46). The lack of any alleged temporal overlap between these licensing deals undermines Plaintiffs' assertion that Getty is a necessary party to this litigation.

Plaintiffs argue that their antitrust claims are collateral to any contracts between Plaintiffs and Getty and that the claims do not depend on the interpretation of the Getty Contributor Agreements. (Pls.' Opp'n to Getty Mot. 24-26.) However, the AC expressly links the claimed conspiracy to the Getty Contributor Agreements **[**41]** by alleging that the purported adverse impact of the alleged conspiracy between NFL and Getty is manifested in the Getty Contributor Agreements. (See AC ¶ 144.) As such, the Sherman Act claims appear to "touch matters covered by the parties' contracts[.]" See *JLM, 387 F.3d at 172* ("[T]he damages which JLM asserts it suffered as a result of the conspiracy among the Owners result from the fact that it entered into the charters, each of which specifies price terms which are variously characterized in the amended complaint as 'artificially high' and as 'overpayments.' We therefore conclude that this is a dispute 'arising out of' the charters, and is therefore within the scope of the [] arbitration clause.").

Plaintiffs also argue that the Court is "required to determine whether the claims would actually require construction of contract terms or determining rights under contract provisions." (Pls.' Opp'n to Getty Mot. 24.) However, ***HN19***[] a broad arbitration clause is "presumptively applicable to disputes involving matters going beyond the 'interpret[ation] or enforce[ment of] particular provisions' of the contract which contains the arbitration clause." *JLM, 387 F.3d at 172* (citation omitted). Plaintiffs' reliance on *Collins & Aikman Prods. Co. v. Bldg. Sys., Inc., 58 F.3d 16 (2d Cir. 1995)* to assert otherwise is misplaced.[9]

In sum, because Plaintiffs' antitrust claims touch and concern the Getty Contributor Agreements, the antitrust claims are properly referred to arbitration.

g. Objections Based On Cost Do Not Bar Arbitration

Finally, Plaintiffs' objection that they will incur additional expense or inconvenience from having to arbitrate their claims against Getty (see Bloom Decl. Ex. C at 2) cannot defeat the strong federal policy in favor of enforcing

---

[9] Collins **[**42]** & Aikman did not involve an antitrust claim. At issue there was which of two contracts between the parties was implicated by the plaintiffs' state-law claims. See *58 F.3d at 23* ("the task of determining whether a clam or a set of claims 'arises out of or relates to' the particular contract in which the arbitration clause is found was properly determined by the district court") (emphasis added).

arbitration agreements. ***HN20***[] The "possibility that a party **[*106]** to an arbitration clause will be inconvenienced and will incur some extra expense . . . does not necessarily mean that the party cannot effectively vindicate its statutory rights through arbitration." *In re Cotton Yarn, 505 F.3d at 285*. As the Supreme Court stated in Italian Colors, the antitrust laws "do not guarantee an affordable procedural path to the vindication **[**43]** of every claim." *133 S. Ct. at 2309*. "It would be unwieldy . . . to require courts to proceed case by case to tally costs and burdens to particular plaintiffs in light of their means . . . ." *Vimar Seguros y Reaseguros, S.A. v. M/V Sky Reefer, 515 U.S. 528, 536, 115 S. Ct. 2322, 132 L. Ed. 2d 462 (1995)*.

Additionally, "uninformed speculation about cost" is insufficient to carry the burden of proving that proceeding against antitrust defendants individually would prevent the plaintiffs from effectively vindicating their statutory rights. *In re Cotton Yarn, 505 F.3d at 285*; see also *Green Tree, 531 U.S. at 90* (rejecting argument that statutory claims could not be arbitrated due to prohibitive costs as "too speculative to justify the invalidation of an arbitration agreement.") While Plaintiffs note the high costs of federal court litigation, they do not provide support for the proposition that arbitration would be more expensive (see Pls.' Opp'n to Getty Mot. 20), or that the expense would be so great as to impede prosecution of their claims. See *AT&T Mobility LLC v. Concepcion, 563 U.S. 333, 131 S. Ct. 1740, 1749, 179 L. Ed. 2d 742 (2011)* ("the informality of arbitral proceedings is itself desirable, reducing the cost and increasing the speed of dispute resolution"); see also *Vera, 335 F.3d at 116* (noting Congress' determination that arbitration "is to be encouraged as a means of reducing the costs and delays associated with litigation" (citation omitted).

Finally, Plaintiffs note in **[**44]** passing that "there is a tremendous risk that Plaintiffs will not be able to effectively vindicate their claims against Getty Images because the NFL Defendants certainly will not agree to participate in arbitration and thus Plaintiffs cannot be assured of necessary discovery from those parties." (Pls.' Opp'n to Getty Mot. 30 n. 16.) However, any limitations on discovery in arbitration do not establish grounds to defeat the agreement to arbitrate.

Because Plaintiffs have failed to adequately plead or establish their objections based on cost, these objections are disregarded.

II. The Motion To Dismiss Plaintiffs' Sherman Act Antitrust Claims (Count I) Against NFL Defendants and AP Is Granted

a. Antitrust Claims Against NFL Defendants

HN21[] In order to state a claim against the NFL Defendants, Getty, and AP under Sections 1 and 3 of the Sherman Act, 15 U.S.C. §§ 1 and 3, that will withstand a motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*, Plaintiffs must allege sufficient facts to support a plausible inference that NFL Defendants, Getty, and AP took part in an agreement that unreasonably restrained trade.[10] See *Twombly, 550 U.S. at 570*; *Port Dock & Stone Corp. v. Oldcastle **[*107]** Northeast, Inc., 507 F.3d 117, 121 (2d Cir. 2007)*; *In re Elevator Antitrust Litig., 502 F.3d 47, 50 (2d Cir. 2007)*.

The AC asserts that the NFL Defendants, in concert with Getty[11] and AP, "conspire[d] to create a monopoly in favor of NFL in order to illegally restrain trade and otherwise fix and control the market for commercial licensing of NFL-

[10] ***HN22***[] Section 3 of the Sherman Act merely extends the reach of Section 1 to trade or commerce involving U.S. Territories and the District of Columbia. Substantively, **[**45]** however, Section 3 claims are analyzed in the same manner as Section 1 claims. See *Dart Drug Corp. v. Parke, Davis & Co., 344 F.2d 173, 174 n. 1, 120 U.S. App. D.C. 79 (D.C. Cir. 1965)* ("Section 3 is, in terms of the substantive offense defined therein, an exact counterpart of Section 1, made expressly applicable to the Territories and the District of Columbia.").

[11] Consistent with the rest of this opinion, this section's mention of Getty does not serve as a determination with respect to Getty's antitrust liability but rather mentions Getty as an alleged participant in Plaintiffs' asserted antitrust conspiracy.

related 'stock' photos." (AC ¶¶ 28, 37.) According to Plaintiffs, the NFL Defendants conspired to restrain trade in two ways.

First, Plaintiffs allege that each NFL Club "authorized the NFL and/or [NFLP] to make decisions regarding [its] separately owned intellectual property [and] to grant an exclusive license to a single licensing company to market and sell commercial licenses for all stock photography of NFL-related photos." (Id. ¶ 24.) As such, according to Plaintiffs, in the absence of the alleged **[**46]** conspiracy, their "agents [i.e., Getty, AP or their competitors] could have negotiated licensing agreements with individual NFL Teams on better terms." (Id. ¶ 148.) Second, Plaintiffs allege that the NFLP and NFL granted "illegal" exclusive licenses to Getty in 2007 and then AP in 2009 and 2012 (id. ¶¶ 25-27, 136), which prevented Plaintiffs "from seeking or obtaining fair market value for commercial uses of their NFL photographs" and "undermined [their] ability to bargain fairly with Getty Images and AP to obtain more favorable terms in their contributor contracts." (Id. ¶¶ 143-44.) Plaintiffs also claim that they were harmed by the NFL's decision in 2009 to switch exclusive licensors from Getty to AP because Getty, with whom Plaintiffs had a continuing relationship, distributed their other photo collections (e.g., MLB and NCAA photos). (Id. ¶¶ 55-58, 147.)

As a threshold matter, ***HN23***[] "Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 534, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (quoting *Hawaii v. Standard Oil Co., 405 U.S. 251, 263, 92 S. Ct. 885, 31 L. Ed. 2d 184, n. l4 (1972)*). ***HN24***[] To have standing, a plaintiff must, among other things, be "an 'efficient enforcer' of the antitrust laws." *Gatt Commc'ns, Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 78 (2d Cir. 2013)*. The Second Circuit **[**47]** has identified four factors to determine whether a plaintiff is an "efficient enforcer:"

> (1) the directness or indirectness of the asserted injury; (2) the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement; (3) the speculativeness of the alleged injury; and (4) the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries.

Id. (quoting *Paycom Billing Servs., Inc. v. MasterCard Int'l, Inc., 467 F.3d 283, 290-91 (2d Cir. 2006))*. Here, all four factors weigh against Plaintiffs' ability to establish antitrust standing, requiring dismissal of Plaintiffs' antitrust claims. *Gatt Commc'ns, Inc., 711 F.3d at 75* (***HN25***[] "[A]ntitrust standing is a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement we must dismiss as a matter of law." (citation omitted)).

Generally speaking, ***HN26***[] "[i]n order to limit the class of plaintiffs with antitrust standing to the most efficient enforcers of the **[*108]** antitrust laws, courts have typically limited the types of individuals that may bring an antitrust action to direct competitors or consumers." *Port Dock & Stone Corp. v. OldCastle Ne., Inc., No. 05 Civ. 4294, 2006 U.S. Dist. LEXIS 69076, 2006 WL 2786882, at *3 (E.D.N.Y. Sept. 26, 2006)*, aff'd, *507 F.3d 117 (2d Cir. 2007)*; see also *Solent Freight Servs., Ltd. v. Alberty, 914 F. Supp. 2d 312, 319 (E.D.N.Y. 2012)* ("Generally, a plaintiff that is 'neither a consumer nor a competitor in the market **[**48]** in which trade was restrained' does not have standing to allege an antitrust injury to that market." (citation omitted)).

Plaintiffs are neither consumers nor competitors in the alleged market for commercial licensing of NFL-related photographs. Plaintiffs do not purchase the rights to use NFL-related photographs for commercial purposes. Nor do they enter into license agreements with commercial enterprises that wish to use NFL photographs. Instead, they supply photographs to stock photography agencies, like Getty and AP, which compete in the alleged market. See *Reading Int'l, Inc. v. Oaktree Capital Mgmt. LLC, 317 F. Supp. 2d 301, 335 (S.D.N.Y. 2003)* ("Under Associated General Contractors, courts have held that ***HN27***[] suppliers to direct market participants 'typically cannot seek recovery under the antitrust laws because their injuries are too secondary and indirect.'" (citation omitted)).

Plaintiffs contend in their opposition that they "directly competed with agencies such as Getty Images and AP," (Pls.' Opp'n to NFL Def.'s Mot. 28) and that "prior to the NFL's decision to restrict licensing rights to a single agency, Plaintiffs were permitted to and did license their works directly to the NFL Teams and the NFL's fans, as well as other typical customers and end users" (id., at 27-28). However, **[**49]** no such allegation is contained within the AC. The AC states that Plaintiffs are professional photographers who initially submitted their photos to NFL Photos, which then licensed those photos "to media outlets and commercial entities," and after the NFL outsourced licensing to Getty and AP, Plaintiffs supplied their NFL-related photos to those agencies for licensing to commercial end-users. (AC ¶¶ 1, 17-18, 36, 44, 145.) Indeed, the AC clearly states that Plaintiffs have always "licensed the photos that they shot 'on spec' through third-party licensing agents (formerly NFL Photos and then Getty Images and currently AP)." (AC ¶ 36.) As such, Plaintiffs argument on this point must fail.

Specifically, ***HN28***[] with respect to the first "efficient enforcer" factor, to satisfy the antitrust injury requirement, see *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*, a plaintiff must plead facts showing that it has suffered "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. "The antitrust injury requirement obligates a plaintiff to demonstrate, as a threshold matter, 'that the challenged action has had an actual adverse effect on competition as a whole in the relevant **[**50]** market.'" *George Haug Co. v. Rolls Royce Motor Cars Inc., 148 F.3d 136, 139 (2d Cir. 1998)* (emphasis in original) (citation omitted). In other words, a plaintiff must allege "that its loss comes from acts that reduce output or raise prices to consumers." *Chi. Prof'l Sports Ltd. P'ship v. NBA, 961 F.2d 667, 670 (7th Cir. 1992)*. Here, Plaintiffs' purported injury is at most an indirect result of the challenged agreements.

The AC contains no facts to suggest that the challenged conduct reduced output of commercial licenses for NFL photographs **[*109]** or raised prices for consumers. Plaintiffs do not allege that fewer commercial entities are licensed to use NFL photographs, nor do they allege that the prices those entities or consumers pay are higher because of the NFL Clubs' collective licensing or the exclusive licenses with Getty and AP. The injury alleged by Plaintiffs is damage to their personal economic interests, namely that they received from Getty and AP insufficient royalties for the commercial use of their NFL-related photographs. (See, e.g., AC ¶¶ 146-49.)

But ***HN29***[] "underpayment of royalties . . . is not an antitrust injury because it has no adverse effect on competition or consumers." *Elliott Indus. Ltd. P'ship v. BP Am. Prod. Co., 407 F.3d 1091, 1125 (10th Cir. 2005)* (affirming dismissal of complaint because it "makes no allegation of any harm other than the economic loss which [Appellant] itself allegedly **[**51]** suffered"). Because Plaintiffs' alleged injury amounts to personal economic loss, Plaintiffs have failed to allege antitrust injury. See *Carell v. Shubert Org., Inc., 104 F. Supp. 2d 236, 266-67 (S.D.N.Y. 2000)* (no antitrust injury because plaintiffs inability to license intellectual property "has had negligible effect on output and has chiefly prevented plaintiff from generating revenue"); *Nat'l Ass'n of Freelance Photographers v. Associated Press, No. 97 Civ. 2267, 1997 U.S. Dist. LEXIS 19568, 1997 WL 759456, at *10 (S.D.N.Y. Dec. 10, 1997)* (no antitrust injury when alleged "interfer[ence] with the ability of Freelance Photographers to compete in the commercial exploitation of their images" caused photographers "to lose substantial revenue" because the allegations "show at most that [photographers] personally were harmed by AP's actions toward them, and not that others in the market were thereby harmed" (citation omitted)).

Plaintiffs also have failed adequately to plead antitrust injury because their asserted injury was not the result of the challenged conduct. ***HN30***[] Antitrust injury is limited to injuries that are "attributable to an anti-competitive aspect of the practice under scrutiny." *Atl. Richfield Co., 495 U.S. at 334*. Plaintiffs challenge the NFL Clubs' collective licensing arrangement and the exclusive licensing agreements with Getty and AP, but acknowledge that any royalty payments for the commercial use of their NFL-related photographs stem from **[**52]** their contributor agreements with Getty and AP, and not any agreement to which the NFL or NFL Clubs are a party. (See, e.g., AC ¶¶ 51, 53, 68, 91, 144.) Put simply, Plaintiffs' claimed injury arises not from the allegedly anticompetitive agreements, but rather from the contributor agreements. See *Atl. Richfield Co., 495 U.S. at 344* (requiring injury to result from "competition-reducing aspect or effect of the defendant's behavior") (emphasis in original); *Granite Partners, L.P. v. Bear, Stearns & Co., 58 F. Supp. 2d 228, 245 (S.D.N.Y. 1999)* (holding plaintiff failed to allege antitrust injury when "there is a critical disjunction between the injuries suffered by the [plaintiffs] and the injuries to the relevant market").

Plaintiffs' claim that, absent the NFL Clubs' collective licensing arrangement, Getty and AP could have negotiated and secured better terms in agreements with individual NFL Clubs, and that, absent the exclusive licensing agreements, Plaintiffs could have negotiated and secured better terms with other stock photography agencies. (AC ¶ 148.) However, the AC alleges no facts to support these assertions, which themselves demonstrate and confirm the "critical disjunction" between Plaintiffs' asserted injuries and any alleged anticompetitive agreement. Indeed, the AC does not contain any facts **[**53]** to suggest that Getty or AP would have incorporated the benefit of any better terms they may have received from an individual NFL **[*110]** Club into Plaintiffs' contributor agreements, or that other stock photography agencies would have provided Plaintiffs with more advantageous terms in their contributor agreements.

Plaintiffs separately contend that they have adequately pled antitrust injury by alleging a per se "horizontal price fixing scheme." (Pls.' Opp'n to NFL Def.'s Mot. 25.) They also assert that "an adequate injury is alleged if the plaintiff is 'a participant in some capacity in the market in which the merger occurs,'" or "merely allege[s] an intent to enter the relevant market." (Pls.' Opp'n to NFL Def.'s Mot. 24.) However, antitrust injury is not as broadly defined as Plaintiffs contend, see *Brunswick, 429 U.S. at 489*, and, in any case, no merger is at issue here, and the AC does not allege that Plaintiffs ever intended to enter the market for commercial licensing of NFL photos.

In sum, because Plaintiffs fail to plead sufficient facts to demonstrate antitrust injury, they do not satisfy the first "efficient enforcer" factor and dismissal is warranted. See *Paycom, 467 F.3d at 293* (holding merchant lacked antitrust standing to challenge **[**54]** MasterCard's policy prohibiting banks from participating in competitor payment-card networks because it was those competitor networks, not the merchant, that were directly harmed); *Boyd v. A WB Ltd., 544 F. Supp. 2d 236, 250 (S.D.N.Y. 2008)* (holding wheat farmers did not have standing to challenge alleged conspiracy by certain wheat exporters because the farmers' injuries were derivative of the injury suffered by competitor wheat exporters).

With respect to the second factor, directly affected market participants could seek to enforce the antitrust laws on the basis of Plaintiffs' alleged violations. Specifically, Getty's and AP's competitors are potential plaintiffs with respect to the exclusive dealing claims, and Getty and AP themselves are potential plaintiffs with respect to the collective licensing claims. Because each constitutes "an identifiable class . . . whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement," Plaintiffs lack standing here. *Associated Gen. Contractors, 459 U.S. at 542*.[12]

With respect to the third factor, Plaintiffs' claimed injuries are too speculative to support antitrust standing. Plaintiffs have alleged that absent the NFL Clubs' agreement to collectively license their intellectual property, Getty and AP would have negotiated better terms in agreements with individual NFL Clubs, and that absent the exclusive licensing agreements with Getty and AP, Plaintiffs would have negotiated better terms in their contributor agreements. (AC ¶ 148.) Plaintiffs' theory is too speculative. See, e.g., *Paycom, 467 F.3d at 293* (affirming dismissal under *Rule 12(b)(6)* and rejecting as speculative claim that, absent MasterCard's policy prohibiting member banks from participating in competitor paymentcard networks, competition from Discover and American Express would have caused MasterCard to adopt policies more favorable to plaintiff).

Finally, Plaintiffs' claims raise complex and difficult issues of identifying and apportioning **[*111]** damages. "[Q]uantifying [plaintiffs'] damages wou1d require wholesale **[**56]** speculation," and "[i]t would be virtually impossible to apportion damages" between Getty, AP and their competitors, "which [allegedly] suffered direct injuries," and Plaintiffs, who "might have been indirectly harmed." *Paycom, 467 F.3d at 294*.

All four "efficient enforcer" factors weigh against a finding of antitrust standing. As such, Plaintiffs' antitrust claims are subject to dismissal.

However, even if Plaintiffs had adequately established standing, the AC would still fail to adequately set forth an antitrust claim. ***HN31***[] An antitrust complaint must allege a relevant product market in which the anticompetitive

---

[12] That these more direct entities have not filed suit is telling. As the Supreme Court has observed, "if there is substance to [plaintiffs'] claim, it is difficult to understand why the[] direct victims of the conspiracy have not asserted any claim **[**55]** in their own right." *Associated Gen. Contractors, 459 U.S. at 542 n. 47*; see also Phillip Areeda & Herbert Hovenkamp, Fundamentals of ***Antitrust Law***, § 3.01c (4th ed. 2011) ("If the 'superior' plaintiff has not sued, one may doubt the existence of any antitrust violation at all.").

effects of the challenged activity can be assessed. *City of New York v. Grp. Health, 649 F.3d 151, 155 (2d Cir. 2011)*; see also *In re Aluminum Warehousing Antitrust Litig., No. 13-md-2481 (KBF), 2014 U.S. Dist. LEXIS 121435, 2014 WL 4277510, at *21 (S.D.N.Y. Aug. 29, 2014)*; *Global Disc. Travel Servs., LLC v. Trans World Airlines, Inc., 960 F. Supp. 701, 704 (S.D.N.Y. 1997)* ("In order to survive a motion to dismiss, a claim under . . . the Sherman Act must allege a relevant geographic and product market in which trade was unreasonably restrained or monopolized." (citation omitted)). When the proposed relevant market is defined without "reference to the rule of reasonable interchangeability and cross-elasticity of demand," or "clearly does not encompass all interchangeable substitute products . . . the relevant market is legally insufficient and a motion **[**57]** to dismiss may be granted." *Linzer Prods. Corp. v. Sekar, 499 F. Supp. 2d 540, 554 (S.D.N.Y. 2007)* (citation omitted); see also *Global Disc. Travel Servs., LLC, 960 F. Supp. at 705* ("Plaintiffs' failure to define its market by reference to the rule of reasonable interchangeability is, standing alone, valid grounds for dismissal." (citations omitted)).

Plaintiffs have defined the relevant market as the "market for commercial licensing of NFL-related stock photographs." (AC ¶¶ 23, 126.) ***HN32***[] Generally, however, "the distribution of a single brand, like the manufacture of a single brand, does not constitute a legally cognizable market," *Global Disc. Travel Servs., LLC, 960 F. Supp. at 705* (citation omitted), because to define the market as that group of products over which a defendant exercises control would "as an analytic matter read[] the market definition step out of the Sherman Act." *Carell, 104 F. Supp. 2d at 265* (citation omitted); cf. *Adidas Am., Inc. v. NCAA, 64 F. Supp. 2d 1097, 1102 (D. Kan. 1999)* ("[A]n antitrust plaintiff may not 'define a market so as to cover only the practice complained of, this would be circular or at least result-oriented reasoning.'" (citation omitted)). Thus, the Second Circuit and courts in the Southern District have often declined to recognize a relevant market defined by a single brand. See *Skyline Travel, Inc. (NJ) v. Emirates, 476 F. App'x 480, 481 (2d Cir. 2012)* ("Where, as here, the complaint 'limit[s] a product market to a single brand, franchise, institution, or comparable entity that competes with **[**58]** potential substitutes' or fails to provide a 'plausible explanation as to why a market should be limited in a particular way,' the complaint is properly dismissed." (citations omitted)); *Major League Baseball Props., Inc. v. Salvino, Inc., 542 F.3d 290, 328-31 (2d Cir. 2008)* (rejecting a proposed relevant market limited to licenses for MLB intellectual property while excluding licenses such as those obtained by plaintiff for "football, boxing, basketball, ice skating, hockey, and NASCAR").[13]

[*112] In light of relevant Circuit case law, see, e.g., *Belfiore v. N.Y. Times Co., 826 F.2d 177, 180 (2d Cir. 1987)* (rejecting as "implausible" product market limited to the New York Times newspaper because substitutes reasonably included all "general circulation daily newspapers," at least some of which plaintiffs themselves distributed), the AC does not make sufficient factual allegations that would justify a product market limited to NFL-related photographs to the exclusion of, at a minimum, other sports-related photographs. Indeed, Plaintiffs contend that they "own the copyrights to and license other sports-related content, including photographs of Major League Baseball ('MLB') and National Collegiate Athletic Association ('NCAA') games and events, and Getty Images had exclusive licensing deals and/or significant licensing partnerships with these entities, including MLB." (AC ¶ 56.) However, Plaintiffs do not address why the commercial licensing of **[**60]** MLB- or NCAA-related photographs (or any other sports-related photographs) is not reasonably interchangeable with the commercial licensing of NFL-related photographs.

---

[13] See also *Hack v. President & Fellows of Yale Coll., 237 F.3d 81, 86-87 (2d Cir. 2000)*, abrogated on other grounds (concluding that plaintiff had failed to allege a plausible relevant product market confined to Yale education because other colleges and universities provided interchangeable substitutes); *Carell, 104 F. Supp. 2d at 264-66* (rejecting alleged "market for licensing Makeup Designs [for the Broadway musical Cats] and other Cats-related intellectual property"); *Global Disc. Travel Servs., LLC, 960 F. Supp. at 705* ("The rule of reasonable interchangeability dictates that the relevant product market in this case be at least the market for ail airline tickets between the relevant city pairs, not just tickets on [Trans World Airlines]."); *Re-Alco Indus., Inc. v. Nat'l Ctr. for Health Educ., Inc., 812 F. Supp. 387, 391-92 (S.D.N.Y. 1993)* (holding that one particular brand of health education materials was not a plausible relevant product market); *Deep S. PepsiCola Bottling Co. v. Pepsico, Inc., No. 88 Civ. 6243, 1989 U.S. Dist. LEXIS 4639, 1989 WL 48400, at *7-8 (S.D.N.Y. May 2, 1989)* ("Plaintiffs' proposed market - Pepsi-Cola bottling franchises in the United States - does **[**59]** not comprise a viable antitrust market" and the "relevant product market might more reasonably be drawn as national brand soft drinks"); *Shaw v. Rolex Watch, U.S.A., Inc.., 673 F. Supp. 674, 679 (S .D.N.Y. 1987)* ("This Court does not need protracted discovery to state with confidence that Rolex watches are reasonably interchangeable with other high quality timepieces.").

The court in *Weber v. National Football League, 112 F. Supp. 2d 667 (N.D. Ohio 2000)*, dismissed a Sherman Act claim for failure to allege a relevant market under similar circumstances. There, the plaintiff, who bought and sold many different kinds of domain names, alleged that NFLP, the Miami Dolphins and New York Jets had monopolized the market for the domain names "dolphins.com" and "jets.com." The court held that the plaintiff had failed to demonstrate why the relevant market should not be more broadly defined as domain names in general. *Id. at 674*. Similarly here, in the face of Plaintiffs' allegations identifying a potential broader market for licensing of sports-related photographs, Plaintiffs have failed to allege a plausible product market limited to NFL-related photographs at this juncture. See *Adidas Am., Inc., 64 F. Supp. 2d at 1103* (rejecting "market for the sale of NCAA Promotional Rights" because "Adidas has failed to explain [why] ... sponsorship agreements with teams or individuals competing in the National Football League, the National Basketball Association, the Women's National Basketball Association, Major League Baseball, **[**61]** Major League Soccer, or the Olympics, are not reasonably interchangeable with NCAA promotion rights or sponsorship agreements"); *Theatre Party Assocs., Inc. v. Shubert Org., Inc., 695 F. Supp. 150, 154-55 (S.D.N.Y. 1988)* ("Plaintiff has failed to explain why other forms of entertainment, namely other Broadway shows, the opera, ballet or even sporting **[*113]** events are not adequate substitute products.").

Plaintiffs contend that *American Needle v. New Orleans Louisiana Saints, 385 F. Supp. 2d 687 (N.D. Ill. 2005)* and *Dang v. San Francisco Forty Niners, 964 F. Supp. 2d 1097 (N.D. Cal. 2013)* support the market limited to commercial licenses for NFL-related photos that they have defined. However, Second Circuit precedent instructs that there exist available substitutes for the intellectual property of a professional sports organization. See *Salvino, 542 F.3d at 330*. Moreover, the relevant markets alleged in *American Needle* and *Dang* are distinguishable from the market Plaintiffs assert here. The product markets in those cases were potentially limited to NFL-related headwear and apparel because there was evidence suggesting that "for many people purchasing headwear and apparel with an NFL team's logo, they are purchasing the ability to be identified with a particular team - the right to be recognized as a fan." *New Orleans Louisiana Saints, 385 F. Supp. 2d at 694*. As a result, the courts concluded that "[i]f a store sold out of hats carrying the Chicago Bears logo, these individuals would not necessarily find caps carrying **[**62]** logos for Spongebob, the University of Michigan, or even the Chicago Bulls to be reasonable substitutes." Id.; *Dang, 964 F. Supp. 2d at 1108*. In short, the courts relied on fan loyalty to find a genuine dispute about reasonably interchangeable products in those markets.

The same cannot be said of the "market for commercial licensing of NFL-related stock photographs." The "consumers" in the market alleged here are commercial enterprises licensing NFL-related photos to promote their products. (AC ¶¶ 150-52.) Plaintiffs have not plausibly alleged, and the AC is devoid of any facts to suggest, that if the price of NFL-related photos were to increase, "national photo licensors, media outlets, online vendors, clothing retailers, and any other companies that sell advertisements or products" (AC ¶ 151) would not simply substitute different, less costly sports photographs to promote their products.

Adidas America is analogous to the instant case. In Adidas America, the court rejected plaintiff's proposed "market for the sales of NCAA promotional rights" because plaintiff had "failed to explain . . . why . . . sponsorship agreements with teams or individuals competing in the National Football League, the National Basketball **[**63]** Association, the Women's National Basketball Association, Major League Baseball, Major League Soccer, or the Olympics, are not reasonably interchangeable with NCAA promotion rights or sponsorship agreements." *Adidas Am., 64 F. Supp. 2d at 1103*. The court dismissed plaintiff's antitrust claims on the pleadings because it had "not explained why sponsorship agreements with teams or individuals in any of the above organizations would fail to satisfy Adidas' goal of enhancing the 'visibility of adidas' trademarks on the playing field' and authenticating Adidas as a 'high quality athletic brand, with products that serve the high performance needs of athletes.'" Id.

Additionally, Plaintiffs allege that the NFL Clubs conspired to restrain trade in the market for commercial licensing of NFL-related photographs by allowing the NFL to "control and make decisions relating to each NFL Team's independently owned intellectual property." (AC ¶ 127.) However, the court in *Washington v. National Football League, 880 F. Supp. 2d 1004 (D. Minn. 2012)* dismissed nearly identical claims.

In Washington, a putative class of former professional football players alleged that the NFL and NFL Clubs had monopolized the market for former players' likenesses in violation of Section 1 by not **[*114]** giving the players rights to historical game **[**64]** films and images from the games in which they played. *Id.at 1005*. In dismissing Plaintiffs' claims, the court carefully analyzed the implications of the Supreme Court's decision in *American Needle, Inc. v. National Football League, 560 U.S. 183, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)*, noting a clear distinction between intellectual property that each NFL Club separately owns and property that is collectively owned:

> Here, unlike in American Needle, the intellectual property involved is historical football game footage, something that the individual teams do not separately own, and never have separately owned. Rather, the NFL owns the game footage, either alone or in conjunction with the teams involved in the game being filmed. These entities must cooperate to produce and sell these images; no one entity can do it alone . . . . The NFL and its teams can conspire to market each teams' individually owned property, but not property the teams and the NFL can only collectively own.

Washington, 880 F. Supp. 2d at 1006.

Similarly here, many if not most of the photographs at issue contain intellectual property owned by the NFL and at least one NFL Club - e.g., photographs displaying both the NFL shield and NFL Club marks on a player's jersey and/or helmet, typically in NFL game-action settings or at NFL events. Plaintiffs claim that their **[**65]** photo libraries include "tens of thousands of photos . . . that do[] not include any marks, logos, or other intellectual property owned by the NFL Entities." (AC ¶¶ 34-35.) Yet the majority of photographs Plaintiffs have attached to the AC are game-action photographs displaying the marks of the NFL and at least one NFL Club, and in many cases two NFL Clubs, and Plaintiffs have not pleaded sufficient facts to suggest that this case is principally about anything other than these types of NFL game and event photographs. Such photographs necessarily contain the intellectual property of more than one entity, and constitute "collectively owne[d]" property under Washington; the NFL and NFL Clubs "must cooperate to produce and sell these images; no one entity can do it alone." *Washington, 880 F. Supp. 2d at 1006*. As such, Plaintiffs have not plausibly alleged collective action by the NFL Defendants, and their Section 1 claim fails as a matter of law.[14]

[*115] Plaintiffs argue that the **[**67]** decision in Washington is inapposite and that "Plaintiffs' claims relate to still photography which neither the NFL nor the NFL Teams have ever owned any copyright." (Pls.' Opp'n to NFL Def.'s Mot. 37.) Nowhere in Washington, however, did the court limit "collectively own[ed]" property to copyright holders. Rather, the court deemed historical game footage "collectively own[ed]" because "the intellectual property involved is . . . something that the individual teams do not separately own, and never have separately owned." *Washington, 880 F. Supp. 2d at 1006*. NFL and the NFL Clubs "must cooperate to produce and sell these images; no one entity can do it alone." Id. Likewise, the majority of photos at issue here are "collectively owned" because they contain the trademarks of the NFL and at least one NFL Club, or the trademarks of more than one NFL Club, and thus neither the NFL nor any individual NFL Club alone could license these photos.

---

[14] At a minimum, under American Needle the collective licensing of intellectual property for NFL-related photographs is reasonable as a matter of law because collective licensing is "essential if the product is to be available at all." *560 U.S. at 203*. In such cases, "the Rule of Reason may not require a detailed **[**66]** analysis; it 'can sometimes be applied in the twinkling of an eye.'" Id.; see also *Agnew v. NCAA, 683 F.3d 328, 341 (7th Cir. 2012)* (concluding that under American Needle, certain restraints, particularly necessary venture activities, may be held procompetitive, and thus lawful, in the "twinkling of an eye" - i.e., "at the motion-to-dismiss stage"). Here, without NFL and NFL Club cooperation, licensees would be unable to obtain from any one entity the rights to use photographs of NFL games and events, which exist only by virtue of that cooperation. See *American Needle, 560 U.S. at 202* ("The fact that NFL teams share an interest in making the entire league successful and profitable, and that they must cooperate in the production and scheduling of games, provides a perfectly sensible justification for making a host of collective decisions."). Moreover, the pro-competitive benefits of collectively licensing intellectual property rights in NFL-related photographs are abundantly clear. See *Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 18-23, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*. If a collective license were not available, a photo-by-photo assessment would be required to determine who may hold intellectual property rights in any given photograph, and individual licensing negotiations would be required for every single photograph.

With respect to those photographs that reflect the intellectual property of only a single NFL Club, Plaintiffs also fail to allege a viable antitrust claim challenging the NFL Clubs' collective licensing arrangement. As the Second Circuit held in Buffalo Broadcasting Co. v. American Society of Composers, **[**68]** Authors & Publishers, a collective licensing agreement does not constitute a "restraint" within the meaning of Section 1 when "an alternative opportunity to acquire individual rights is realistically available." *744 F.2d 917, 925 (2d Cir. 1984)*.[15] Plaintiffs assert that the NFL maintains exclusive control over each NFL Club's independently owned intellectual property in the commercial market for photographs. (AC ¶¶ 127, 130.) However, [TEXT REDACTED BY THE COURT] the NFL Clubs have not granted the NFL exclusive control or licensing rights over all NFL-related photographs [TEXT REDACTED BY THE COURT] Plaintiffs argue that the Court should not consider the [TEXT REDACTED BY THE COURT] limiting the exclusivity of the collective license to "game action photographs" in ruling on the NFL Defendants' motion to dismiss. However, the collective licensing agreement memorialized in [TEXT REDACTED BY THE COURT] may be considered without converting the NFL Defendants' motion to one for summary judgment because Plaintiffs have made clear, definite, and substantial reference to the collective licensing agreement in the AC (see, e.g., AC ¶¶ 24, 38, 127, 130, 133, 137, 149), and thus have incorporated that agreement into their pleadings. The **[**69]** collective licensing agreement may be interpreted as a matter of law, *Log On Am., Inc. v. Promethean Asset Mgmt. L.L.C., 223 F. Supp. 2d 435, 444 (S.D.N.Y. 2001)*, and the agreement plainly grants NFL exclusive licensing rights only to "game action photographs" and not to "photos taken at NFL Team practices, functions, and events" (AC ¶ 35).

Additionally, Plaintiffs' assertion that this case involves "tens of thousands of photos [in their photo libraries] that do[] not include any marks, logos, or other intellectual property owned by the NFL Entities" (AC ¶¶ 34-35) is contradicted **[**70]** by the exhibits that Plaintiffs attached to the **[*116]** AC, which depict a multitude of images, many of which, if not most, display the intellectual property of the NFL, for example, the NFL shield on players' jerseys and/or helmets, as well as the intellectual property of at least one NFL Club.

Thus, Plaintiffs have not adequately alleged that the NFL Clubs' collective licensing is a "restraint" within the meaning of Section 1. As such, on this basis, their claims relating to such collective licensing must be dismissed.

Plaintiffs further allege that the NFL Defendants' granting of exclusive licenses to Getty and then AP violates Section 1 of the Sherman Act. (AC ¶ 135.) They claim that this anticompetitive activity began in 2003, when the NFL decided to use third parties to license the commercial rights to NFL photographs rather than continuing to conduct such licensing in-house through NFL Photos. (Id. ¶¶ 44-46.) However, these agreements cannot harm competition; an exclusive license is something that the NFL can legally achieve without the aid of a licensee. See *E & L Consulting, Ltd. v. Doman Indus.., 472 F.3d 23, 30 (2d Cir. 2006)* (finding no harm to competition as a result of exclusive distributorship "because the alleged single source and price increase, even if monopolistic, **[**71]** is something [defendant] can achieve without the aid of a distributor"); cf. *Washington, 880 F. Supp. 2d at 1007* ("Plaintiffs also contend that, because the game footage involved here is owned collectively, the antitrust laws somehow prescribe how the collective can market and sell the intellectual property it owns. But this is precisely what the antitrust laws do not prohibit.").[16]

---

[15] The Second Circuit made clear that although it might be "difficult" to obtain licenses outside the joint venture, "realistic alternative[s]" to a collective license exist so long as individual licensing remains possible. *Buffalo Broad., 744 F.2d at 929*. The court reached this conclusion without any showing that alternatives to the blanket license were popular, or even that any such alternatives had ever been actively pursued. *Id. at 928* (finding no evidence that "any loca1 [television] station ever offered any composer a sum of money in exchange for the performing rights to his music"). Thus, so long as an individual venture member is not precluded from granting an individual license, a collective licensing agreement may not, as a matter of law, violate Section 1.

[16] Plaintiffs also take issue with NFLP's decision in 2009 to grant exclusive licensing rights to AP, rather than Getty. (AC ¶ 55.) But "freedom to switch suppliers lies close to the heart of the competitive process that the antitrust laws seek to encourage." *Nynex Corp. v. Discon, Inc., 525 U.S. 128, 137, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1997)*. Therefore, "[i]t is not 'a violation of the antitrust laws, without a showing of actual adverse effect on competition market-wide, for a manufacturer to terminate a distributor . . . and to appoint an exclusive distributor.'" *E & L Consulting, Ltd., 472 F.3d at 29* (alteration in original, citation omitted).

Moreover, ***HN33***[] because the benefits of exclusive licensing agreements are well-recognized, the Second Circuit has stated that these "arrangements are presumptively legal." *E & L Consulting, Ltd., 472 F.3d at 30*. An exclusive licensing arrangement violates Section 1 only when it "will foreclose competition in a substantial share of the line of commerce affected." *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*; see also U.S. **[**72]** Dep't of Justice and Federal Trade Comm'n, Antitrust Guidelines for the Licensing of Intellectual Property § 4.3 (1995) ("Absent extraordinary circumstances, the Agencies will not challenge a restraint in an intellectual property licensing arrangement if (1) the restraint is not facially anticompetitive and (2) the licensor and its licensees collectively account for not more than twenty percent of each relevant market significantly affected by the restraint.").

HN34[] In order to adequately plead foreclosure in a relevant market, a plaintiff first must properly define the relevant market. See, e.g., *Linzer Prods. Corp., 499 F. Supp. 2d at 554-55* (dismissing exclusive dealing claim because single patented product was not a relevant product market). As discussed above, Plaintiffs have failed to allege a properly defined product market. In fact, Plaintiffs allege that despite losing the NFL exclusive license to AP, Getty continued to hold commercial licensing rights to MLB- and NCAA-related **[*117]** photographs (AC ¶ 58), thus acknowledging that competition for commercial licensing of sports-related photographs is not foreclosed by the NFL's exclusive licensing agreements.

In addition, the challenged agreements are not "exclusive;" rather, as noted above, **[**73]** the agreements provide Getty and AP only with exclusive rights limited to licensing NFL photographs to [TEXT REDACTED BY THE COURT] not to individual NFL Club business partners. (Getty Agreement [TEXT REDACTED BY THE COURT], First AP Agreement [TEXT REDACTED BY THE COURT], Second AP Agreement [TEXT REDACTED BY THE COURT].) Once the relevant market is properly defined to include, at a minimum, the commercial licensing of all sports-related photographs (a market in which NFL-related photographs constitute only a small fraction) and takes into account the limited "exclusivity" granted to Getty and AP, Plaintiffs cannot allege foreclosure. See *Sterling Merch., Inc. v. Nestlé, S.A., 656 F.3d 112, 123-24 (1st Cir. 2011)* ("'[F]oreclosure levels are unlikely to be of concern where they are less than 30 or 40 percent,' and while high numbers do not guarantee success for an antitrust claim, 'low numbers make dismissal easy.'" (citation omitted)); *CDC Techs., Inc. v. Idexx Labs., Inc., 186 F.3d 74, 77, n. l, 80 (2d Cir. 1999)* (noting that for exclusivity agreement limited to a single product line, "[i]f competitors can reach the ultimate consumers of the product by employing existing or potential alternative channels of distribution, it is unclear whether exclusive dealing arrangements with distributors foreclose from competition any part **[**74]** of the relevant market" (citations omitted) (emphasis in original)).

It also is well established that ***HN35***[] exclusive agreements do not harm competition when there is competition to obtain the exclusive contract. The Second Circuit has recognized that "[s]uch a situation may actually encourage, rather than discourage, competition, because the incumbent and other [competitors] . . . have a strong incentive continually to improve the [services] and prices they offer in order to secure the exclusive positions." *Balaklaw v. Lovell, 14 F.3d 793, 799 (2d Cir. 1994)*; see also *Indeck Energy Servs., Inc. v. Consumers Energy Co., 250 F.3d 972, 977-78 (6th Cir. 2000)* (affirming dismissal of antitrust claims "in light of the fact that the exclusive contracts were of limited duration, and in light of the fact that the customers were free to seek other [suppliers] at the conclusion of the contracts"); *Paddock Publ'ns, Inc. v. Chi. Tribune Co., 103 F.3d 42, 45 (7th Cir. 1996)* ("Competition-for-the-contract is a form of competition that antitrust laws protect rather than proscribe.").

Here, the NFL's licensing agreements with Getty and AP had exclusivity periods of no more than three years, and the NFL "entertained bids for the exclusive commercial licensing rights for NFL and NFL Team photos" at the conclusion of each agreement's term. (AC ¶¶ 25-27.) These types of contracts do not foreclose competition and are not anticompetitive **[**75]** as a matter of law. See *Indeck Energy Servs., Inc., 250 F.3d at 975, 977-78* (dismissing Section l complaint and describing as a "limited exclusivity deal" five to ten-year exclusives with nineteen facilities); *Balaklaw, 14 F.3d at 799* (noting that "opportunities for competition remain[ed]" for three-year exclusive dealing contract with early termination provision); *Ferguson v. Greater Pocatello Chamber of Commerce, Inc., 848 F.2d 976, 982 (9th Cir. 1988)* (upholding an exclusive six-year lease because all competitors had an equal opportunity to bid for the lease and "[s]uch an opportunity for free competition shall presumably arise again at the end of the six-year lease"). In their opposition, Plaintiffs contend that the NFL's arguments "conflict with Plaintiffs' well-pleaded allegations **[*118]** that the bidding process was not open and competitive and did not promote competition." (Pls.' Opp'n to NFL Def.'s Mot. 40.) However, the AC itself alleges that each time NFL entered into an exclusive licensing agreement, it "entertained bids for the exclusive commercial licensing rights for NFL and NFL Team photos." (AC ¶¶ 25-27.) Indeed, because the AC plainly alleges that there was competition to obtain the exclusive contract and that the exclusive licenses granted by NFL were of limited duration (AC ¶¶ 25-27), Plaintiffs cannot plausibly allege market foreclosure and harm **[**76]** to competition stemming from the challenged agreements.

b. Antitrust Claims Against AP

As discussed above with respect to the NFL Defendants, Plaintiffs lack standing to recover damages for the alleged antitrust violation because (1) Plaintiffs' asserted injury is indirect; (2) other, better-positioned potential plaintiffs exist; (3) Plaintiffs' claimed injuries are speculative; and (4) identifying damages and apportioning them among Plaintiffs would be speculative. See *Gatt Commc'ns, 711 F.3d at 78*.

Additionally, Plaintiffs' AC does not allege that AP had any involvement in an alleged agreement between the NFL and the NFL Clubs to create NFLP and to manage all commercial licensing of NFL-related stock photographs through NFLP. (AC ¶¶ 23-24; see also AC ¶¶ 37-39, 126-128, 130, 133). Plaintiffs allege only two agreements involving AP in their antitrust claim: the First and Second AP Agreements, effective respectively April 1, 2009 and April 1, 2012, each of which granted AP the exclusive right to commercially license NFL and NFL Club photographs for a term of three years. (AC ¶¶ 26-27, 54.)

Plaintiffs do not allege facts supporting a plausible inference that these exclusive license agreements are unlawful. ***HN36***[] An exclusive **[**77]** license, which merely confers upon the licensee the ability to exploit the licensor's exclusive intellectual property rights, does not violate the antitrust laws. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 135-36, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*; *D.E. Virtue v. Creamery Package Mfg. Co., 227 U.S. 8, 36-37, 33 S. Ct. 202, 57 L. Ed. 393, 1913 Dec. Comm'r Pat. 519 (1913)*; *Genentech, Inc. v. Eli Lilly & Co., 998 F.2d 931, 949 (Fed. Cir. 1993)*, cert. denied, *510 U.S. 1140, 114 S. Ct. 1126, 127 L. Ed. 2d 434*, abrog. on other grounds, *515 U.S. 277, 115 S. Ct. 2137, 132 L. Ed. 2d 214 (1994)*; *U.S. v. Studiengesellschaft Kohle, m.b.H., 670 F.2d 1122, 1127, 216 U.S. App. D.C. 303 (D.C. Cir. 1981)*; *U.S. v. Westinghouse Elec. Corp., 648 F.2d 642, 647 (9th Cir. 1981)*; *SCM Corp. v. Xerox Corp., 463 F. Supp. 983, 1005 (D. Conn. 1978)*, aff'd on other grounds, *645 F.2d 1195 (2d. Cir. 1981)*. Moreover, the license agreements in this case are "vertical" arrangements, meaning that they occur between companies at different levels of the distribution chain. See *Bus. Elecs. Corp. v. Sharp Elecs. Corp, 485 U.S. 717, 730, 108 S. Ct. 1515, 99 L. Ed. 2d 808 and n. 4 (1988)*. ***HN37***[] Exclusive vertical arrangements of this nature are presumptively legal under the antitrust laws. See *E & L Consulting, 472 F.3d at 30* (citing *Elec. Comm's Corp. v. Toshiba Am. Consumer Prods., 129 F.3d 240, 245 (2d Cir 1997))*. To overcome that presumption at the pleading stage, a plaintiff must allege facts showing exceptional circumstances, such as evidence of predatory practices or a "unique" opportunity to leverage two distinct monopolies. *E & L Consulting, 472 F.3d at 30*. A plaintiff that fails to allege such exceptional circumstances fails to state a Section 1 claim under the Sherman Act and its complaint must be dismissed under *Rule 12(b)(6)*. Id.; *Elec. Comm's Corp., 129 F.3d at 242*.

[*119] In this case, Plaintiffs' AC fails to allege exceptional circumstances, or anything else that suggests that the First and Second AP Agreements were something other than standard exclusive licensing arrangements. As noted above, Plaintiffs' own factual allegations **[**78]** regarding the competitive bidding process conducted by NFL undercut claims of illegality. (AC ¶¶ 26-27, 54, 88; Deutsch Decl. Ex. A at 1 and Ex. B at 1.) ***HN38***[] Exclusive vertical agreements of reasonable duration that are subject to a competitive award process do not violate the antitrust laws. See *Balaklaw, 14 F.3d at 799* ("Such a situation may actually encourage, rather than discourage, competition, because the incumbent and other, competing [suppliers] have a strong incentive continually to improve the care and prices they offer in order to secure exclusive positions."); see also *Ferguson, 848 F.2d at 982* (six-year lease that is subject to competitive award is not unlawful).

Accordingly, Plaintiffs have not alleged facts that would support a finding of exceptional circumstances, and have not overcome the presumption that the NFL and AP's exclusive license agreements are legal. Plaintiffs' antitrust claim against AP must, on this basis, therefore be dismissed.

Furthermore, as discussed above with respect to the NFL Defendants, Plaintiffs have not alleged facts plausibly suggesting that they suffered anticompetitive injury from the existence or performance of the exclusive license agreements, a substantive element of every private antitrust **[**79]** claim. See *Atl. Richfield, 495 U.S. at 334* (citing *Brunswick, 429 U.S. at 489*); *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 441 (2d Cir. 2005)*; *USAirways Group, Inc. v. British Airways PLC, 989 F. Supp. 482, 488 (S.D.N.Y. 1997)*. The allegedly anticompetitive injury that Plaintiffs claim to have suffered is that Defendants "precluded Plaintiffs from seeking or obtaining fair market value for commercial uses of their NFL photographs." (AC ¶ 143.) However, the AC appears to allege that this injury does not arise from the fact that AP had an exclusive license with NFLP, but from the NFL Defendants' alleged exercise of market power conferred by an ostensible agreement between the NFL, the NFL Clubs, and NFLP to monopolize the market for commercial use of NFL-related photos.[17] (See AC ¶ 133.) However, the **[*120]** fact that NFLP gave an exclusive license to AP is irrelevant to Plaintiffs' alleged anticompetitive injury. Assuming, arguendo, that the NFL Defendants exercise monopoly power over the commercial use of NFL-related photographs, Plaintiffs would suffer the injury they allege regardless of whether the NFL Defendants (1) used an exclusive licensee such as AP or Getty Images, (2) used several non-exclusive licensees under terms similar to those of the AP agreements, or even (3) chose one NFL defendant to negotiate directly with the Plaintiffs and licensed their NFL-related photographs directly **[**80]** to commercial end-users. As such, there is a critical disjunction, as mentioned above, between the market injury asserted and the injury suffered. See *In re LIBOR-Based Fin. Instr. Antitrust Litig., 935 F. Supp. 2d 666, 690 (S.D.N.Y. 2013)*; *S.W.B. New England, Inc. v. R.A.B. Food Grp., LLC, 06 Civ. 15357, 2008 U.S. Dist. LEXIS 14892, 2008 WL 540091 (S.D.N.Y. Feb. 27, 2008)*; *Granite Partners, 58 F. Supp. 2d at 242*.

Because NFL's exclusive license to AP is not alleged to be the cause of Plaintiffs' alleged anticompetitive injury, the AC fails to allege an "antitrust injury" with respect to AP.

Neither is Plaintiffs' assertion that "[t]he NFL Teams and NFL Entities conspired to and did illegally restrain trade in concert with Getty Images and AP" (AC ¶ 129; see also AC ¶ 141) persuasive. There are no facts alleged to support this assertion of concerted action, and the conclusion itself does not state an antitrust claim against AP. *Twombly, 550 U.S. at 570*; *Iqbal, 556 U.S. at 678*; *Port Dock, 507 F.3d at 121*; *In re Elevator Antitrust Litig., 502 F.3d at 50*. In particular, Plaintiffs do not allege that AP was involved in the **[**82]** agreement between the NFL Defendants that is the alleged source of the anticompetitive harm.

Indeed, even if the NFL Defendants' alleged conduct violated the Sherman Act, the alleged violation would not allow Plaintiffs to sue in antitrust. As noted above, Plaintiffs are not participants in the relevant market and cannot recover for antitrust injury. See, e.g., *Reading Int'l, Inc. v. Oaktree Capital Mgmt., 317 F. Supp. 2d 301, 335*

---

[17] Specifically, Plaintiffs allege:

- "[T]he NFL Defendants leveraged their illegal monopoly to obtained [sic] unfettered access to Plaintiffs' works and force Plaintiffs' agents to purportedly grant 'complimentary' or 'non-royalty bearing" licenses." (AC ¶ 75.)
- "AP granted this retroactive 'license' to the NFL under threats of coercive pressure by the NFL, including the threat of moving its exclusive license back to Getty Images, which had submitted a bid to reacquire the NFL's business." (AC ¶ 88.)
- "The NFL exploited its illegal control and monopoly of the commercial licensing rights to NFL content to force Getty Images and now AP to grant the NFL unfettered access to Plaintiffs' image libraries and to rob Plaintiffs of their rightful compensation for such uses." (AC ¶ 95).
- "The NFL has been able to convince Plaintiffs' licensing agents to purportedly allow this rampant and blatant exploitation of Plaintiffs' works only because of its illegal monopoly over the commercial **[**81]** licensing rights to NFL content." (AC ¶ 96.)
- "The NFL Defendants' illegal conduct directly and proximately created the circumstances that forced Plaintiffs into a 'take-it-or-leave-it' scenario when negotiating license terms with the NFL's chosen exclusive licensing partner (first Getty Images until 2009 and then AP thereafter)." (AC ¶ 144.)
- "If it were not for the NFL's illegal efforts to control the commercial licensing market for NFL-related stock photos, Plaintiff's licensing agents would not have been forced to purportedly grant the NFL 'complimentary' usage of Plaintiffs' photos." (AC ¶ 148.)

(S.D.N.Y. 2003) (noting "suppliers to direct participants in relevant market 'typically cannot seek recovery under the antitrust laws because their injuries are too secondary and indirect . . . .'") (citing Associated Gen. Contractors, 459 U.S. at 541). Likewise, the antitrust claim against AP is not saved because Plaintiffs now allege that the First and Second AP Agreements "purport to grant an exclusive license to all NFL-related photos . . . even if the photos feature only individual players, individual team colors, individual team logos, or other team specific intellectual property that is individually owned by the respective NFL Team." (AC ¶ 136.) The allegedly anticompetitive bundling of those licenses does not stem from the fact that AP's license is exclusive, but rather, again, from the alleged agreement among the NFL Defendants to manage all of those rights together through **[**83]** a single entity, NFLP. As already stated, the NFL Defendants could achieve the same alleged anticompetitive effect without using a licensing intermediary at all.

Because Plaintiffs' alleged anticompetitive injury does not derive from AP's exclusive license, and the AC does not allege that AP was involved in any other anticompetitive agreement, Plaintiffs have failed to allege an antitrust injury with respect to AP. Additionally, for the reasons stated above, Plaintiffs also fail to allege a plausible relevant product market.

The antitrust claim against AP must be dismissed for failure to state a claim.

[*121] III. The Motions To Dismiss Plaintiffs' Copyright Infringement Claims (Count II) Against AP And NFL Defendants Are Granted[18]

[84]** a. Copyright Infringement Claims Against AP

In general, Plaintiffs allege that AP "exceeded the scope" of the limited rights granted to it under the AP Contributor Agreements by granting NFL an invalid sublicense, thereby infringing on Plaintiffs' copyrights. (AC ¶ 192.) They further allege that AP also infringed Plaintiffs' copyrights by offering copies of Plaintiffs' photos for sale through its "NFL Photo Store" that it operates jointly with Replay. (AC ¶ 195.)

In general, ***HN40***[] a copyright owner who grants an exclusive or nonexclusive license to use a work waives any right to assert an infringement claim against the licensee, or anyone whom the licensee is entitled to sublicense, for acts within the scope of the license or sublicense. Graham v. James, 144 F.3d 229, 236 (2d Cir. 1998); U.S. Naval Inst. v. Charter Commc'ns, Inc., 936 F.2d 692, 695 (2d Cir. 1991); Harris v. Simon & Schuster, Inc., 646 F. Supp. 2d 622, 630 (S.D.N.Y. 2009) (a "valid license, either exclusive or non-exclusive, immunizes the licensee from a charge of copyright infringement, provided that the licensee uses the copyright as agreed with the licensor") (citation and internal quotation marks omitted). A defendant may raise a complete defense to a copyright infringement claim by presenting the court with the license or sublicense on a motion to dismiss, and "[d]ismissal of a claim for copyright infringement is proper where **[**85]** a contract underlying the suit clearly and unambiguously demonstrates the existence of the defendant's license to exploit the plaintiff's copyrights and where plaintiff has not shown any limitation on that license." Ariel (UK) Ltd. v. Reuters Grp. PLC, No. 05 Civ. 9646, 2006 U.S. Dist. LEXIS 79319, 2006 WL 3161467, at *5 (S.D.N.Y. Oct. 31, 2006); see also Jasper v. Sony Music Entm't, Inc., 378 F. Supp. 2d 334, 338 (S.D.N.Y. 2005) (noting that document essential to a complaint's allegations may be considered on a motion to dismiss).

The license that each Plaintiff granted to AP in his AP Contributor Agreement is as broad as the Plaintiff's own copyright in his photos. For each photo at issue in the lawsuit, AP is given a "perpetual, irrevocable transferable

---

[18] Because Getty's motion to compel arbitration is granted, the claims regarding the NFL Defendants' uses of Plaintiffs' Getty photos will be stayed pending arbitration. See, e.g, Hikers Indus., Inc. v. William Stuart Indus. (Far East) Ltd., 640 F. Supp. 175, 178 (S.D.N.Y. 1986) (***HN39***[] "A stay as to claims against a nonarbitrating defendant is properly granted where the arbitration of the plaintiff's claims against a defendant party to the arbitration would at least partially determine the issues which form the basis of the claim against that non-arbitrating defendant.").

worldwide right and license to reproduce, edit, translate **the** caption of, prepare derivative works of, publicly perform, publicly display, load into computer memory, cache, store and otherwise use" the photos and the right to "transfer or sublicense these rights to other entities." (AP Contributor Agreements, § 4.2.) Thus, under the plain language of the AP Contributor Agreements, neither AP's license in the photos nor the sublicenses AP may grant appear to be limited as Plaintiffs allege.

Nothing in the license requires AP to issue only royalty-bearing sublicenses. AP acted within its licensed rights by granting the NFL Entities a sublicense **[**86]** giving them [TEXT REDACTED BY THE COURT] The NFL Entities' permissible uses include all those set forth in the Second AP Agreement's definition of "Scope of Use" (the "NFL Scope of Use").[19] (Second AP Agreement, § 4(a).)

[*122] The Second AP Agreement further states that [TEXT REDACTED BY THE COURT] Id. [TEXT REDACTED BY THE COURT]. Thelicense provisions of the AP Contributor Agreements show that when AP granted this sublicense, each Plaintiff had already given AP the rights to issue such a sublicense, as of the effective date of the Plaintiff's AP Contributor Agreement.

Plaintiffs contend that reading the AP Contributor Agreements to include a right to issue non-royalty-bearing sublicenses constitutes an "overly broad reading" and that there is no language that "expressly permit[s]" the issuance of retroactive or non-royalty-bearing sublicenses. (See Pis.' Opp'n to AP Mot. 26-27.) However, Plaintiffs fail to cite to authority holding that each right in a license must be specifically called out to exist.[20]

HN41[] Copyright **[**87]** licenses are construed according to neutral principles of contract interpretation. See *Boosey & Hawkes Music Publishers, Ltd. v. Walt Disney Co., 145 F.3d 481, 487 (2d Cir. 1998)*; *Wu v. Pearson Educ. Inc., No. 10 Civ. 6537, 2013 U.S. Dist. LEXIS 5289, 2013 WL 145666 at *4 (S.D.N.Y. Jan. 11, 2013)*; *Leutwyler v. Royal Hashemite Court of Jordan, 184 F. Supp. 2d 303, 306 (S.D.N.Y. 2001)*. In cases where only the scope of the license is at issue, it is the copyright owner's burden to prove that defendant's usage was unauthorized. *MAI Photo News Agency, Inc. v. Am. Broad. Co., Inc., 97 Civ. 8908, 2001 U.S. Dist. LEXIS 1680, 2001 WL 180020, at *4 (S.D.N.Y. Feb. 22, 2001)*. The licensor who argues that there should be an exception or deviation from the meaning reasonably conveyed by the language of a license loses, because he or she "should bear the burden of negotiating for language that would express the limitation or deviation." *Boosey & Hawkes Music Publishers, 145 F.3d at 487*.

As made plain by the language of the AP Contributor Agreements, the grant of rights made by Plaintiffs to AP, and AP's right to sublicense these rights to others is broad and unlimited. Section 4.2 of the AP Contributor Agreements state that AP is granted a "perpetual, irrevocable, transferable, worldwide, right and license to reproduce, edit, translate the caption of, prepare derivative works of, publicly perform, publicly display, load into computer memory, cache, store and otherwise use the [NFL-related photos at issue] and to transfer and sublicense these rights to other entities." (Emphasis added.) Non-royalty-bearing licenses are **[**88]** not excluded from this grant. If Plaintiffs wanted to exclude non-royalty-bearing sublicenses, such a term should have been negotiated and included explicitly, *Boosey & Hawkes, 145 F.2d at 491*, and cannot be read in by the Court. See, e.g., *Gentieu v. Tony Stone Images/Chicago, Inc., 255 F. Supp. 2d 838 (N.D. Ill. 2003)* (finding giving price discounts for images did not exceed the scope of a broad license).

In their opposition, Plaintiffs assert, among other things,[21] that the language of **[*123]** the AP Contributor Agreements supports their argument that non-royalty-bearing sublicenses constitute a breach of contract.

[19] [TEXT REDACTED BY THE COURT]

[20] Plaintiffs cite to *S.O.S., Inc. v. Payday, Inc., 886 F.2d 1081, 1088 (9th Cir. 1989)* to support their argument. However, S.O.S. merely states the standard rule that copyright licenses are presumed to "prohibit any use not authorized." *Id. at 1087*.

[21] Plaintiffs make several assertions which will be briefly addressed. First, Plaintiffs contend that AP did not contest the plausibility of their copyright claims. This, however, is clearly contradicted by AP's moving memorandum. (See AP Mot. 13-19.) Second, Plaintiffs make a passing assertion that the AP Contributor Agreements may be invalid due to "fraud." (Pls.' Opp'n to AP

Specifically, Plaintiffs contend that apart from two instances in which AP is not required to remit royalties (downloading of browse-quality preview or thumbnail images and where AP uses event photos for its publicity or advertising materials), every other kind of sublicense that AP issues must be royalty-bearing. (Pls.' Opp'n to AP Mot. 22-23.) However, Section 5 of the AP Contributor Agreements expressly specifies AP's duty to pay royalties to "qualifying Event Photo Sales." This, in turn, is defined to mean "only the a la carte sales of licenses for Event Photos through AP's online database service, currently known as 'AP Images.' A la carte sales shall mean the sale of licenses for individual **[**89]** photos for which a per-image price is established." (AP Contributor Agreements § 5.1 (emphasis added).) The AP Contributor Agreements also recognize that AP may offer the Event Photos for a la carte sale at a "bulk rate" which may include the photographs of photographers other than the contributor. In such a case, to determine royalties, AP is to apportion the cash received on an equal pro-rata basis across all photos included in the a la carte bulk rate. (Id.) In other words, the AP Contributor Agreements enumerate only that Plaintiffs are entitled to receive royalties when AP receives revenue from Event Photo Sales, and their royalties represent a share of this revenue.

The two instances Plaintiffs raise - thumbnails and AP use of event photos - are contained within this Event Photo Sales royalty provision. Those instances appear to constitute exceptions to AP's obligation to share revenue that it earns from Event Photo Sales. Thus, AP does not have to share revenue it earns from selling access to thumbnails of Plaintiffs' Event Photos, or earned from AP's own use of the Event Photos in advertising or promotion. Section 5 states, in sum, that AP must share revenue it earns from sublicensing with Plaintiffs, except in certain situations. The broad rights granted in Section 4 of the AP Contributor Agreements do not limit AP's ability to issue non-royalty-bearing sublicenses, and such a restriction may not be read in from Section 5, which deals only with AP's obligation to share revenues that it actually earns from sublicenses.[22]

Plaintiffs separately contend that AP was not entitled to grant sublicenses that covered periods before the issue date. Under § 4(a) of the Second AP Agreement, [TEXT REDACTED BY THE COURT].[23] Because the sublicense covers uses by the NFL Entities prior to the effective date of the Second AP Agreement, Plaintiffs term it "retroactive," and claim that it is improper because they did not authorize retroactive sublicenses. (AC ¶¶182-83).

Contrary to Plaintiffs' assertions, however, such a license is permissible. ***HN43***[] As a matter of copyright law, copyright owners and exclusive licensees are free to grant **[*124]** such licenses **[**92]** "after the fact" as they see fit. See *Wu, 2013 U.S. Dist. LEXIS 5289, 2013 WL 145666, at *4* ("[T]here is no legal prohibition to obtaining a retroactive license if it is authorized by the rights holder."); *Silberstein v. Fox Entm't Grp., Inc., 424 F. Supp. 2d 616, 629 (S.D.N.Y. 2004)* ("The retroactivity of the licensing agreement between DAS and Fox has no necessary effect on its power to immunize Fox against claims of infringement of the [] copyright."), aff'd sub nom. *Silberstein v. John Does 1-10, 242 F. App'x 720 (2d Cir. 2007)*.

Plaintiffs contend that the Second Circuit has held that "retroactive" licenses are unenforceable where one co-owner of a copyright unilaterally grants a license after the filing of an infringement complaint to "extinguish[ ] the accrued infringement claims of a non-consenting co-owner," *Davis v. Blige, 505 F.3d 90, 103 (2d Cir. 2007)* and that that precedent applies and thus precludes retroactive licensing in the instant case. However, the holding in

---

Mot. 18.) However, the AC does not allege fraud, so this contention will be disregarded. Last, Plaintiffs make mention of the doctrine of contra proferentum **[**90]** (Pls.' Opp'n to AP Mot. 22 n. 8), but ***HN42***[] that doctrine only applies where a contract is ambiguous which, as discussed below, the contracts do not appear to be, and only where there are no other interpretative tools to determine the parties' intent. See *Chesapeake Energy Corp. v. Bank Of New York Mellon Trust Co., N.A., 773 F.3d 110, 117 n. 3 (2d Cir. 2014)*; ***Int'l Multifoods Corp. v. Commercial Union Ins. Co., 309 F.3d 76, 88 n. 7 (2d Cir. 2002)***. Here, the AP Contributor Agreements' meaning may be clearly gleaned from their text.

[22] Plaintiffs further **[**91]** contend that if AP were correct that it was permitted to 'sublicense' its rights, "then it must follow that the NFL would be burdened with all of the responsibilities and limitations of the license grant." (Pls.' Opp'n to AP Mot. 24.) However, this assertion is without support.

[23] [TEXT REDACTED BY THE COURT] (§ the effective date of his AP Contributor Agreement, when AP acquired the right to license his photos. AP's sublicense to the NFL Entities thus covers their uses of each Plaintiff's photos for the period occurring on or after the effective date of that Plaintiff's AP Contributor Agreement.

Davis was a narrow one that does not apply to the facts here: "[a] 'retroactive' assignment or license that extinguishes the accrued infringement claims of a non-consenting co-owner by traveling back in time to 'undo' an unlawful infringement" may be held invalid. Davis, 505 F.3d at 103.

AP does not appear to have been a co-owner purporting to grant a license to which the other co-owner did not consent. Indeed, Plaintiffs make clear that AP is **[**93]** not a co-owner of Plaintiffs' copyrights. (AC ¶¶ 65, 131, 185.) Far from being a co-owner "extinguishing" Plaintiffs' rights behind their backs after Plaintiffs filed their infringement suit - which was the scenario in Davis - AP was expressly granted by Plaintiffs complete authority to sublicense their photographs as AP saw fit, and AP exercised those rights without "extinguishing" any legal action commenced by Plaintiffs.

Each AP Contributor Agreement licensed to AP all the rights comprised in copyright for each photo as of the effective date, and lasting "perpetual[ly]." AP had a co-extensive right to grant sublicenses. The AP Contributor Agreements do not limit AP's rights to issue a sublicense that covers any period while the AP Contributor Agreements are in effect. AP was therefore authorized and empowered to grant broad sublicenses for the use of Plaintiffs' copyrighted works and did so by issuing a sublicense to the NFL authorizing their uses of a Plaintiff's photos occurring after AP became a licensee of the Plaintiff, but before the issue date of the sublicense.[24]

Plaintiffs further contend that AP lacked **[**95]** authority to grant such a license with respect to "Archival Event Photos" because **[*125]** it purportedly holds only a non-exclusive license for those photographs, an allegation not found in the AC. However, even if the rights granted to AP were non-exclusive as Plaintiffs allege, Davis is still inapplicable. The court in Wu v. Pearson Education upheld as a matter of law the validity of a retroactive copyright license even though the licenses at issue apparently were non-exclusive and granted on a "rights managed" basis, just as Plaintiffs allege is the case with their AP Contributor Agreements. See Wu, No. 10 Civ. 6537, ECF No. 51 (Plaintiff's 56.1 Counter-Statement of Facts), at ¶¶ 7-8; ECF No. 54 (Summary Judgment Reply Br.), at 2.

In fact, the instant case bears a close resemblance to Wu. In Wu, the court distinguished and limited Davis to its specific facts by granting judgment as a matter of law to the defendant sublicensee based on a retroactive license granted by the plaintiff photographer's licensee. Id. At *4-5. As here, the plaintiff photographer in Wu had entered into licensing agreements with photography agencies that gave the agencies broad discretion to sublicense the photographs. **[**96]** The court determined that by granting the agencies discretion to confer upon the defendant "whatever licenses" were needed, the plaintiff "indisputably gave the Photo Agencies the discretion to enter into retroactive licenses." 2013 U.S. Dist. LEXIS 5289, [WL] at *5. As such, no copyright infringement claim could lie. Similarly here, each Plaintiff is an experienced sports photographer who individually negotiated his contract with AP and knowingly granted AP broad license and sublicense rights. Plaintiffs may not now attack AP for exercising those rights. See generally Wu, 2013 U.S. Dist. LEXIS 5289, 2013 WL 145666, at *4.

Plaintiffs' additional contention that the "retroactive" license (or the Second AP Agreement in general) was invalid because it was "illegal under the Sherman Act" is without basis. (AC ¶¶ 168, 181.) However, as discussed above, Plaintiffs' antitrust claims are insufficient. Because Plaintiffs do not adequately plead that the Second AP Agreement violates the Sherman Act, this contention must also fail.

---

[24] Furthermore, there are basic differences between Davis and the facts of this case. In Davis, there was no written agreement between **[**94]** the copyright co-owners. One of the co-owners assigned his interest (including, purportedly, all causes of action for infringement of the copyright) to a person who had been sued for infringement by the other co-owner. The assignee then claimed that he was immune from the second co-owner's infringement suit. Davis held that the assignment cannot be given retroactive effect to defeat the suing co-owner's vested infringement claim, because one co-owner has no power to grant an exclusive license or release another co-owner's accrued claims. Id., 505 F.3d at 103-04. Here, however, each Plaintiff is the sole owner of the copyright in his photos and AP's sublicense does not affect the rights of any copyright co-owner. Each Plaintiff granted AP all rights comprised within copyright for the full term of his written AP Contributor Agreement, and gave AP the right to license others to make any use of the photos that AP could make. Although the license from Plaintiff Lowrance to AP is technically non-exclusive (see Lowrance AP Contributor Agreement § 4.2), this fact does not limit AP's right to issue retroactive licenses in Lowrance's photos to the full extent of AP's licensed rights.

Plaintiffs also allege that AP was required to "track or monitor" the NFL's uses of photos, to limit the uses that the NFL could make of photos, and to pay Plaintiffs royalties for uses of their photos by the NFL or by Replay. They further contend that AP **[**97]** breached the AP Contributor Agreements by failing to perform these obligations. (AC ¶¶ 168-174, 220-26.) As shown above, the language of the AP Contributor Agreements imposes no such obligations on AP. However, even if the AP Contributor Agreements had contained such terms, and AP had breached those terms, AP would not be liable for copyright infringement, but only for breach of contract. See *Graham, 144 F.3d at 236-37*.

HN44[] Second Circuit law is clear that where a licensee's use of a copyrighted work is authorized by a license, any claim for unpaid royalties for that use cannot form the basis of an infringement claim. Rather, a failure to pay royalties under a valid license agreement could only give rise to a breach of contract claim against the party with which the copyright owner has contracted to receive royalties. See, e.g., *Graham, 144 F.3d at 236-37* (finding that "the payment of royalties" is a "covenant" giving rise to a breach of contract claim but not a claim of copyright infringement); 3 Melville B. Nimmer & David Nimmer, *Nimmer on Copyright § 10.15(A)(5)* (2013) ("Failure to pay royalties does not render past conduct an infringement of the copyright."); cf. *U.S. Naval Inst., 936 F.2d at 695* ("[A]n exclusive licensee of any of the rights comprised in the copyright, though it is **[**98]** capable of **[*126]** breaching the contractual obligations imposed on it by the license, cannot be liable for infringing the copyright rights conveyed to it."); *Russian Entm't Wholesale Inc. v. Close-Up Int'l, Inc., 767 F. Supp. 2d 392, 408 (E.D.N.Y. 2011)* ("A licensee's breach of a covenant in a copyright license does not rescind the authorization to use the copyright work, but rather provides the licensor with a cause of action for a breach of contract."), aff'd, *482 F. App'x 602 (2d Cir. 2012)*.

Plaintiffs contend that their AP Contributor Agreements differ from those in Graham because AP's obligations to pay royalties was a "condition" made "[i]n exchange for the license," and therefore breach of that condition could give rise to an infringement claim. (See Pls.' Opp'n to NFL Def.'s Mot. 32-33.) However, at least one court in this Circuit has held that language virtually identical to "in exchange for" is a covenant, not a condition. *Powlus v. Chelsey Direct, LLC, No. 09 Civ. 10461, 2011 U.S. Dist. LEXIS 3287, 2011 WL 135822, at *5 (S.D.N.Y. Jan. 10, 2011)* ("No court applying New York law has every construed the commonly used phrase '[i]n consideration for' as indicating a condition precedent."). Indeed, ***HN45***[] under New York law, "[c]onditions are not favored" and "in the absence of unambiguous language, a condition will not be read into [a contract]." *2011 U.S. Dist. LEXIS 3287, [WL] at *4*; see also *Graham, 144 F.3d at 237* ("New York respects a presumption that terms of **[**99]** a contract are covenants rather than conditions.") Plaintiffs offer no support for their assertion that the "in exchange for" language denotes a condition, rather than a covenant.

Plaintiffs finally argue that, "at worst," the AP Contributor Agreements are "ambiguous as to whether AP was permitted to grant 'non-royalty-bearing'" licenses to third parties, and that this creates a triable issue of fact that bars dismissal. (Pl. Opp'n to AP Mot. 31.) They assert generally that "a price term is an essential element of any binding agreement" and appear to argue that the absence of or silence regarding whether non-royalty-bearing licenses were permitted under the license constitutes an ambiguity in the contract necessitating the examination of extrinsic evidence. (Id.) This argument, however, is unavailing.

HN46[] "The determination of whether a contract term is ambiguous is a threshold question of law for the court." *Walk-In Med. Ctrs., Inc. Breuer Capital Corp., 818 F.2d 260, 263 (2d Cir. 1987)*. "An agreement is ambiguous only if it is 'capable of more than one meaning when viewed objectively by a reasonably intelligent person who has examined the context of the entire integrated agreement.'" *GSI Commerce Solutions, Inc. v. BabyCenter, L.L.C., 618 F.3d 204, 209 (2d Cir. 2010)* (citations omitted); see also *British Int'l Ins. Co. v. Seguros La Republica, S.A., 342 F.3d 78, 82 (2d Cir. 2003)*. Silence, or omission of a term, however, **[**100]** does not generally create ambiguity. See *Millgard Corp. v. E.E.Cruz/Nab/Fronier-Kemper, No. 99 CIV. 2952 (LBS), 2003 U.S. Dist. LEXIS 20928, 2003 WL 22741664, at *3 (S.D.N.Y. Nov. 18, 2003)* ("[U]nder New York law, the omission of terms in a contract does not create ambiguity."); *Kirschten v. Research Institutes of Am., Inc., No. 94 CIV. 7947 (DC), 1997 U.S. Dist. LEXIS 24037, 1997 WL 739587, at *9 (S.D.N.Y. Sept. 24, 1997)* (citing *Metropolitan Life Ins. Co. v. RJR Nabisco, Inc., 716 F. Supp. 1504, 1515 (S.D.N.Y. 1989)* ("While it may be true that no explicit provision either permits or prohibits an LBO, such contractual silence itself cannot create ambiguity to avoid the dictates of the parol evidence rule . . . ."); *Kaplan v. Cott Beverage Corp., 27 Misc.2d 655, 656-57, 212 N.Y.S.2d 103, 105 (Sup. Ct. 1961)* ("The written contract makes no mention of any adjustment in purchase price because of any variation in inventory **[*127]** and it is silent on the subject of any adjustments as to rent, taxes, etc. on closing of title. The plaintiff sought to overcome this apparent difficulty by asserting that the written contract is ambiguous and that the real intent of the parties may be shown by their conduct . . . . The written agreement is clear in its terms and purports to express the entire arrangement of the parties . . . . Therefore it may not be varied nor [sic] explained. All that can be said is that the plaintiff is the victim of his own circumstances.")

As noted above, on the face of the AP Contributor Agreements, the grant of rights made by Plaintiffs to AP is extremely broad, and nothing in the AP Contributor Agreements restricts AP from granting non-royalty-bearing **[**101]** sublicenses or retroactive sublicenses. See *Reiss v. Fin. Performance Corp., 97 N.Y.2d 195, 199, 764 N.E.2d 958, 961, 738 N.Y.S.2d 658 (2001)* (***HN47***[] "An omission or mistake in a contract does not constitute an ambiguity [and] * * * the question of whether an ambiguity exists must be ascertained from the face of an agreement without regard to extrinsic evidence") (citations omitted). The instant case does not qualify as an exception to the general rule that omission does not create ambiguity. See, e.g., *Chen-Oster v. Goldman, Sachs & Co., No. 10 CIV. 6950 LBSJCF, 2010 U.S. Dist. LEXIS 141813, 2011 WL 803101, at *3 (S.D.N.Y. Mar. 1, 2011)* (citing authority for the proposition that the missing term "must be one without which the contract is inherently ambiguous as to some issue material to defining the relationship between the parties" and "without which a contract could not be found.") (citations omitted).

Because the facts of the AC do not sufficiently allege direct copyright infringement by AP, Count II of the AC against AP is dismissed.

b. Claims Against NFL Defendants

Plaintiffs' copyright infringement claims are premised on a general allegation that the NFL has engaged in "unauthorized uses of Plaintiffs' copyrighted photographs." (AC ¶ 29.) Plaintiffs identify the following categories of alleged infringing uses of their images by the NFL:

1. Placement on NFL.com, including **[**102]** in "articles, as part of photo 'essays,' and also to create stand-alone photo 'galleries'" (id. ¶¶ 75, 99, 104, 107, 109, 111);

2. Publication on international websites such as nfljapan.com, nflmexico.com, and nfl.com/international (id. ¶¶ 75, 100, 107, 194);

3. Incorporation in printed publications such as NFL Magazine, Super Bowl programs, reports, newsletters, and game programs (id. ¶¶ 75, 101, 118);

4. Use in television programming on the NFL Network (id. ¶¶ 75, 102, 117);

5. Display of a "multi-story" image "draped" over facades of the Dallas Omni Hotel in Dallas and Cowboys Stadium to promote Super Bowl XLV (id. ¶ 103); and

6. Use of unspecified internet "links that allow and encourage visitors to buy copies of the photos through *www.nflshop.com*" (id. ¶ 113).

In addition to these alleged infringements, Plaintiffs also make reference to alleged "remov[al]" of "copyright management information" from photographs. (Id. ¶ 112.)

The purported basis of Plaintiffs' copyright claims, however, is not that the NFL lacked authority from Getty or AP to make the foregoing uses of Plaintiffs' photographs. (See id. ¶ 72.) Nor do Plaintiffs allege that Getty or AP lacked the authority and ability to grant a **[**103]** license to the NFL that would encompass all of the allegedly **[*128]** infringing uses identified in the AC. Rather, as set forth in detail below, Plaintiffs take issue only with the fact that they did not receive monetary compensation in the form of royalties for the NFL's uses - i.e., "the appropriate commercial licensing rates required for such uses" (AC ¶ 110) - to which Plaintiffs believe they are entitled pursuant to their licensing agreements with Getty and AP.

Although Plaintiffs bring copyright infringement claims against "all defendants," Plaintiffs fail to make allegations of specific instances of copyright infringement by any of the 32 NFL Clubs.[25] (See, e.g., id. ¶¶ 75, 94, 98-100, 164, 166, 176, 194.) None of the exhibits to the AC include any alleged uses of Plaintiffs' photographs by an individual NFL Club. (Id. Exs. 8-14.) Rather, substantive allegations in (and exhibits to) the AC relating to the infringement claims are made against the "NFL" or "NFL Defendants," which, in the AC, are defined to exclude the 32 individual NFL Clubs. (AC ¶ 16.) To the extent that the NFL Clubs are nominally included in the "catch all" infringement claim against "all defendants," this lack of specificity **[**104]** in the allegations fails to satisfy basic pleading standards, and therefore the infringement claim must be dismissed as to the NFL Clubs. See, e.g., *Broughel, 2009 U.S. Dist. LEXIS 35048, 2009 WL 928280, at *4* (***HN48***[] "[P]laintiff must identify, with specificity, the original works that are the subject of her copyright claim and which acts committed by defendants constitute infringement of her rights."); *Marvullo v. Gruner & Jahr, 105 F. Supp. 2d 225, 230 (S.D.N.Y. 2000)* ("*Rule 8(a)(2)* has been construed to require a plaintiff to plead with specificity the acts by which a defendant has committed copyright infringement.").[26]

As noted above, it is well established that ***HN50***[] use of a copyrighted work within the scope of a valid license is non-infringing **[**106]** as a matter of law, *Graham, 144 F.3d at 236*, and a "valid license, either exclusive or non-exclusive, immunizes the licensee from a charge of copyright infringement, provided that the licensee uses the copyright as agreed with the licensor." *Harris, 646 F. Supp. 2d at 630* (citation and **[*129]** internal quotation marks omitted). The same holds true for a sublicensee's use that has been authorized by a licensee. See *Ariel, 2006 U.S. Dist. LEXIS 79319, 2006 WL 3161467, at *9-10* (finding that "defendants' status as licensees or sub-licensees" precluded plaintiff from bringing copyright infringement claims as a matter of law), aff'd, *277 F. App'x 43 (2d Cir. 2008)*; *Major League Baseball Promotion Corp. v. Colour-Tex, Inc., 729 F. Supp. 1035, 1041 (D.N.J. 1990)* ("Under copyright law, a person is innocent of infringement if he possesses a sublicense issued by a licensee upon the due authority of the copyright owner." (citing *Pathe Exch. v. Int'l Alliance, 3 F. Supp. 63, 65 (S.D.N.Y. 1932)))*.

The various NFL uses challenged by Plaintiffs fall within three categories: the first category consists of the NFL's publication and display of the photographs for marketing purposes-specifically on (i) NFL.com, (ii) international websites, (iii) NFL-controlled print publications, (iv) the NFL Network, and (v) a "multi-story" image on buildings (AC ¶¶ 75, 99-104, 107, 109, 111); the second category is the NFL website "includ[ing] links that allow and encourage visitors to buy copies" of the Plaintiffs' photographs "through **[**107]** *www.nflshop.com*" (id. ¶ 113); the third

---

[25] The sole exception is a stray reference to "individual NFL Teams" distributing unspecified "game programs" that included Plaintiffs' works. (AC ¶ 101.) Even as to this purported use, however, it is "the NFL" that is alleged to have "copied and published" Plaintiffs' works. In their opposition, Plaintiffs, without disputing that the AC lacks specific allegations of infringement by any of the 32 NFL clubs, assert that they are permitted to plead infringement "upon information and belief." (Pls.' Opp'n to NFL Def.'s Mot. 22.) This, type of pleading, however, is precisely the sort that cannot survive a motion to dismiss. See *Palmer Kane LLC v. Scholastic Corp., No. 12 Civ. 3890, 2013 U.S. Dist. LEXIS 27196, 2013 WL 709276, at *3 (S.D.N.Y. Feb. 27, 2013)* (holding that a complaint must "contain some factual allegations to narrow the infringing acts beyond **[**105]** broad conclusory statements of infringement"); *Broughel v. Battery Conservancy, No. 07-cv-7755, 2009 U.S. Dist. LEXIS 35048, 2009 WL 928280, at *4 (S.D.N.Y. Mar. 30, 2009)* (noting that "it is axiomatic that plaintiff's claims cannot rest on inchoate and conclusory accusations of unauthorized copying"). Additionally, Plaintiffs' reliance on *Federal Rule of Civil Procedure 11(b)* is misplaced - ***HN49***[] the rule does not relieve a party of the obligation to meet basic pleading standards established by *Rule 8(a)(2)* and current Circuit 12(b)(6) case law.

[26] Even assuming arguendo that Plaintiffs had sufficiently alleged infringing acts by any of the NFL Clubs, any copyright claim would nevertheless fail for the same reasons that the copyright claim against the NFL fails (as discussed below), including that the alleged uses of Plaintiffs' photographs are fully authorized and that allegations that Plaintiffs have been deprived of royalties can only give rise to breach of contract claims against Getty and AP. In this regard, the Getty and AP Agreements expressly permit the NFL Clubs to make the me marketing uses of intiffs' photographs a NFL. (Getty Agreement ; First AP Agreement, Second AP Agreement .)

category is removal of "copyright management information" from photographs in purported violation of the Digital Millennium Copyright Act. (Id. ¶ 112.) Plaintiffs do not allege that the NFL itself is selling Plaintiffs' photographs.

With respect to the first category, all of the alleged uses from April 1, 2009 forward are included within the rights AP granted to the NFL and NFL Clubs. The Second AP Agreement authorizes the NFL and NFL Clubs to make royalty-free use of contributor photographs for a variety of editorial, charitable, and marketing purposes. (Second AP Agreement [TEXT REDACTED BY THE COURT].) That broad grant of rights, in and of itself, is sufficient to cover the challenged uses on the NFL's websites, publications, programming, and other marketing efforts. Furthermore: the Second AP Agreement permits use for [TEXT REDACTED BY THE COURT] and identifies specific permissible uses of Plaintiffs' photographs that encompass the uses now being challenged. For example, the NFL and NFL Clubs are expressly permitted to make royalty-free use of Plaintiffs' NFL images in [TEXT REDACTED BY THE COURT] Moreover, the Second AP Agreement (like the **[**108]** First AP Agreement) imposes no territorial limitations that render use of the images on foreign NFL websites outside the scope of the license. (Id. [TEXT REDACTED BY THE COURT].)

With respect to the second category - the NFL's alleged "allowing" and "encouraging" of visitors to the NFL website to buy copies of photos on *www.nflshop.com* - the copyright infringement claim must also fail. First, Plaintiffs' allegation is a fleeting reference to *www.nflshop.com*, and Plaintiffs do not provide any examples (in the AC or in any of the exhibits attached thereto) of a photograph that has been sold or offered for sale on that website. This sole conclusory allegation is neither sufficient to make out a plausible infringement claim based on alleged "encouragement" or "allowing" sales on that website, nor does it provide sufficient specificity of the alleged infringing use to survive a motion to dismiss. See, e.g., *Broughel, 2009 U.S. Dist. LEXIS 35048, 2009 WL 928280, at *4*; *Marvullo, 105 F. Supp. 2d at 230*. Second, the mere allegation that the NFL "include[d] links" to another website and "encouraged" purchase of Plaintiffs' photographs cannot give rise to a claim of copyright infringement. See, e.g., *Pearson Educ., Inc. v. Ishayev, 963 F. Supp. 2d 239, 2013 WL 3948505, at *8-10 (S.D.N.Y. 2013)* (holding that merely providing links to websites where copyrighted works are sold does not, **[**109]** as a matter of law, constitute copyright infringement).

[*130] With respect to the third category, the solitary reference to removal of "copyright management information" (AC ¶ 112) is vague and conclusory. To the extent the alleged removal of information is part of Plaintiffs' cause of action for copyright infringement, Plaintiffs do not allege when, where, or how such removal of information occurred. (See generally id. ¶¶ 160-200.) Accordingly, any claim based on such activity is dismissed.

Plaintiffs' contention that the Second AP Agreement constitutes a "retroactive" license (AC ¶ 87) with respect to alleged royalty-free uses of contributor photographs prior to the effective date of that agreement (April 1, 2012) does not alter the conclusion that the NFL's alleged uses were authorized and the infringement claims against the NFL and NFL Clubs should be dismissed. As discussed further above with respect to AP, the grant of a retroactive license can be permissible, and in fact is permissible when there is a broad grant of rights, as here.

Additionally, Plaintiffs do not allege that their contributor agreements foreclosed Getty and AP from licensing the use of their photographs to the NFL for **[**110]** editorial, charitable, or marketing purposes across a wide variety of media. Rather, Plaintiffs' complaint is that that they were not paid by Getty and AP - and that Getty and AP did not seek to collect from the NFL (or NFL Clubs) - "the appropriate commercial licensing rates required for such uses." (Id. ¶ 110.) For example, Plaintiffs claim that:

• Getty and AP "allowed the NFL to make free or 'complimentary' use," "failed to charge the NFL appropriate market value" (id. ¶ 72), and permitted the NFL to use Plaintiffs' photos "without paying for any usage rights and without reporting usages to Plaintiffs on their royalty statements" (id. ¶ 82);

• "[T]he NFL has never paid any fees or compensation to Plaintiffs . . . and none of [the challenged] uses has ever been reported by Getty Images or AP to Plaintiffs on any royalty report or otherwise" (id. ¶ 106);

• Plaintiffs' photographs were not included in Getty's or AP's existing "royalty-free collections or offerings" (id. ¶ 173) and should have been part of "Rights-Managed licensing" that "would require a higher license fee than a license granting more narrow usage rights" (id. ¶ 70);

• "The notion that AP was authorized to grant its customers **[**111]** complimentary or 'non-royalty bearing' licenses" without any "compensation to Plaintiffs is anathema to the fundamental purpose and objective" of the Plaintiffs' agreements (id. ¶ 80); and

• "Plaintiffs have never received any compensation in exchange for the NFL Defendants' prolific and ongoing use of thousands of Plaintiffs' photos." (Id. ¶ 76.)

However, even assuming arguendo that Plaintiffs are entitled to such royalties under their agreements with AP, such an allegation cannot form the basis for a copyright infringement claim. As discussed above, a failure to pay royalties under a valid license agreement can only give rise to a breach of contract claim, not a claim of copyright infringement and Plaintiffs have failed to adequately establish that the failure of royalties constituted a violation of a "condition." See, e.g., *Graham, 144 F.3d at 236-37*.

c. Copyright Infringement Claims Against Replay

As with NFL, AP had a right to grant broad sublicense to Replay to use Plaintiffs' photographs, and did, in fact, grant such a sublicense as part of the **[*131]** Replay Agreement. (See Zibas Decl. Ex. A; AC ¶ 114.); see also *Bourne v. Walt Disney Co., 68 F.3d 621, 631 (2d Cir. 1995)* (***HN51***[ ] under copyright law, "the existence of a license is viewed as an affirmative defense" to infringement **[**112]** claims); *Pathe Exch., 3 F. Supp. at 63* ("It may well be that an exhibitor would be innocent if he held a sublicense issued by a license upon due authority from the copyright owner"). Replay may not be held liable for direct copyright infringement when it possesses a sublicense issued by a license upon the due authority of the copyright owner. See *Colour-Tex, 729 F. Supp. at 1041*. As such, there has been no primary infringement by Replay.[27]

III. The Motion To Dismiss Plaintiffs' Vicarious Copyright(Count III) and Contributory Infringement Claims (Count IV) Against AP Is Granted

Counts III and IV of the AC do not state plausible claims for vicarious and contributory copyright infringement against AP, based on the NFL and Replay's asserted **[**113]** use of photos. AP's license from Plaintiffs permitted the uses of the photos by NFL and Replay alleged in the AC, and AP was entitled to sublicense those rights to the NFL and Replay. The alleged uses are not copyright infringement. See *Colour-Tex, 729 F. Supp. at 1041*. As discussed above, because Plaintiffs have not adequately alleged primary infringement by either the NFL or Replay, AP cannot be liable for either vicarious or contributory copyright infringement. See *Metro-Goldwyn-Mayer Studios Inc. v. Grokster, Ltd., 545 U.S. 913, 930, 125 S. Ct. 2764, 162 L. Ed. 2d 781 (2005)*; *Faulkner v. Nat'l Geographic Enters. Inc., 409 F.3d 26, 40 (2d Cir. 2005)*; see also *Russian Entm't Wholesale, 482 F. App'x. at 606*.

As such, Counts II through IV of the AC for direct or secondary copyright infringement against AP are dismissed.

IV. The Motion To Dismiss Plaintiffs' Breach Of Contract (Count V) Against AP Is Granted

---

[27] As with the Getty Agreement and First and Second AP Agreements, Plaintiffs' argument that the Court should not consider the Replay Agreement is unavailing. The Replay Agreement was attached as an exhibit to AP's original motion to dismiss the Complaint, which was incorporated by reference by Replay. (See Dkt. Nos. 26-28, 36-38.) Additionally, Plaintiffs' reliance on extraneous material to support contentions not found in the AC will be disregarded. See, e.g., *Adams v. Crystal City Mariott Hotel, 02 Civ. 10258 (PKL), 2004 U.S. Dist. LEXIS 5819 (S.D.N.Y. Apr. 5, 2004)*.

HN52[] A breach of contract claim must be dismissed where the unambiguous terms of the contract do not support a plaintiff's claim. *Soroof Trading Dev. Co. Ltd. v. GE Fuel Cell Sys. LLC, 842 F. Supp. 2d 502, 509-10 (S.D.N.Y. 2012)*. The provisions of the parties' agreements establish the rights of the parties and prevail over conclusory allegations in the complaint. *805 Third Ave. Co. v. M.W. Realty Assoc., 58 N.Y.2d 447, 451, 448 N.E.2d 445, 461 N.Y.S.2d 778, 780 (1983)*. The Court cannot "supply a specific obligation the parties themselves did not spell out." *Tonking v. Port Auth. Of New York and New Jersey, 3 N.Y.3d 486, 490, 821 N.E.2d 133, 787 N.Y.S.2d 708, 710 (2004)*. Moreover, New York law and the Twombly-Iqbal standards of federal pleading require a complaint to identify, in non-conclusory fashion, the specific terms of the contract that a defendant has **[**114]** breached. Otherwise, the complaint must be dismissed. *Swan Media Grp., Inc. v. Staub, 841 F. Supp. 2d 804, 807-08 (S.D.N.Y. 2012)*; *Orange Cnty. Choppers, Inc. v. Olaes Enter., Inc., 497 F. Supp. 2d 541, 554 (S.D.N.Y. 2007)*; *Highlands Ins. Co. v. PRG Brokerage, **[*132]** Inc., No. 01 Civ. 2272, 2004 U.S. Dist. LEXIS 83, 2004 WL 35439, at *8 (S.D.N.Y. Jan. 6, 2004)*.

These principles require dismissal of Plaintiffs' breach of contract claim against AP. Plaintiffs' nowhere allege specific contractual provisions that were allegedly breached by AP. Plaintiffs allege the following obligations on AP's part: (1) Plaintiffs' photos are subject to "rights managed" licensing (AC ¶ 69); (2) the agreements restricted AP's ability to retroactively or otherwise sublicense the photos to the NFL on a royalty-free basis (AC ¶ 223); (3) AP was required to notify Plaintiffs that it was granting the NFL Entities a royalty-free license to use the photos (AC ¶ 67); and (4) AP was required to report non-royalty bearing licenses of their photos (AC ¶¶ 68, 225). Plaintiffs have not shown any contractual language supporting these assertions.

In fact, Plaintiffs' conclusions are contradicted by the actual terms of the AP Contributor Agreements. While Plaintiffs retained all copyrights in their photos (AP Contribution Agreements § 4.1), this fact did not limit Plaintiffs' broad license to AP, which permitted AP to grant a sublicense to the NFL.[28] While Plaintiffs may have a right to sue for infringement for unauthorized **[**115]** uses of their photos, each Plaintiff authorized AP to issue sublicenses for uses of the Plaintiff's photos occurring after the effective date of the Plaintiff's AP Contributor Agreement. See id. AP did not breach the AP Contributor Agreements by exercising its right to grant those sublicenses. The AP Contributor Agreements contain no language requiring AP to "charge license fees" to the NFL and remit a percentage to the Plaintiffs, or requiring AP to "track or monitor" the activities of the NFL under their non-royalty-bearing sublicense. Plaintiffs' contrary conclusory statements are therefore disregarded. (Cf. AC ¶¶ 223-24).[29]

Finally, in their opposition to AP's motion to dismiss, Plaintiffs contend that the AP Contributor Agreements were obtained through "duress" or are "unconscionable." (**[**117]** See Pls.' Opp'n to AP Mot. 16-19.) However, while Plaintiffs cite to two paragraphs of the AC which would seem to support such claims (see AC ¶¶ 144-45), these contentions are not explicitly present or set forth as claims in the AC and at best **[*133]** more directly relate to

---

[28] Ownership of copyright in the photos does not give Plaintiffs the exclusive right to pursue claims for infringement. For all Plaintiffs except Lowrance, AP is an exclusive licensee, and **HN53**[] AP has the right to sue for infringement of its exclusive license rights. *17 U.S.C. §501(b)*; *Eden Toys, Inc. v. Florelee Undergarment Co.., 697 F.2d 27, 32 (2d Cir. 1982)*, superseded on other grounds by *Fed. R. Civ. P. 52(a)*.

[29] Plaintiffs' allegations regarding the content of the First and Second AP Agreements (AC ¶¶ 175-76) or a request by AP to amend the AP Contributor Agreements (AC ¶¶ 116, 196-97) are similarly unavailing. It is the AP Contributor Agreements, not alleged unconsummated amendments **[**116]** to those contracts, that govern AP's right to license and sublicense Plaintiffs' photos. As detailed above, the broad license granted in the AP Contributor Agreements is the operative provision with respect to Plaintiffs' copyright infringement and breach of contract claims. Plaintiffs' inclusion of allegations regarding "rights managed licensing" which constitute extrinsic evidence is not considered in light of the unambiguous terms of the AP Contributor Agreements and the agreements' merger clause, which states that each AP Contributor Agreement "incorporates the entire understanding of the Parties and supersedes any and all prior agreements, oral or written, relating to Photographer's relationship with AP and is intended as a complete and exclusive statement of the terms of the arrangement between the parties." (AP Contributor Agreements § 10); see also *Abha Int'l, LLC v. Clover Int'l Corp., 11 Civ. 6841, 2012 U.S. Dist. LEXIS 23089, 2012 WL 569187, at *3 (S.D.N.Y. Feb. 16, 2012)* (**HN54**[] "A 'general merger clause' . . . 'precludes extrinsic proof to add or to or vary' the terms of the agreement.").

Plaintiffs' first count for violations of the Sherman Act. To be sure, the facts as alleged by Plaintiffs tend to show that the precedents relating to broad licensing, combined with the power and capacity of the Defendants, and, by contrast, apparent relative lack of market power of Plaintiffs, lead to a difficult result, approaching unfairness, in this case. This reality alone, however, does not transform Plaintiffs' duress and unconscionability arguments into viable claims at this juncture. See *Fox v. Idea Sphere, Inc., 12 Civ. 1342, 2013 U.S. Dist. LEXIS 42674, 2013 WL 1191743, at *28 (Mar. 21, 2014)* (dismissing claims of unconscionability raised "for the first time" in plaintiff's opposition to defendant's motion to dismiss and where "the [complaint] contains no allegations of unconscionability.")

In sum, Plaintiffs have failed to plausibly plead a claim for breach of contract against AP. Their conclusory allegations as to the terms of the contracts allegedly breached by AP are contradicted by the plain language of their own **[**118]** AP Contributor Agreements. As such, Count V is dismissed.

V. The Motion To Dismiss Plaintiffs' Breach of Fiduciary Duties (Count VI) Against AP Is Granted

Count VII of the AC, which alleges that AP breached a fiduciary duty to Plaintiffs, is premised on the legal conclusion that AP "held itself out" as Plaintiffs' "agent" and therefore owes them a special fiduciary duty. (AC ¶¶ 235-45.) However, the assertion of agency is conclusively contradicted by the Plaintiffs' own agreements. Each Plaintiff's AP Contributor Agreement expressly states that:

> Photographer shall be acting as an independent contractor and shall not represent himself or herself as an employee of AP, but only as an independent contractor. . . . Neither the making of this Agreement nor the performance of its provisions shall be construed to constitute either Party an agent, partner, joint venture, employee or legal representative of the other Party.

(AP Contributor Agreements § 1 or § 1.3.) ***HN55***[] In disputes between a purported principal and purported agent, where the interests of third parties or government agencies are not in issue, the parties are bound by a contractual agreement that their relationship is not one of agency. Such a **[**119]** disclaimer bars a claim for breach of fiduciary duty. See, e.g., *In re Rezulin Prods. Liab. Litig., 392 F. Supp. 2d 597, 607 n. 67 (S.D.N.Y. 2005)* (parties' own characterization of their relationship as not an agency may be disregarded only where it is attacked by a "stranger to the relationship."); *New Millennium Consulting, Inc. v. United Healthcare Servs., Inc., 695 F.3d 854, 858 (8th Cir. 2012)* ("this Court affirmed the district court's determination that ABC Radio was not an agent . . . as a matter of law because the parties expressly disclaimed a principal-agent relationship in their contract"); *Children's Broad. Corp. v. Walt Disney Co., 245 F.3d 1008, 1021-22 (8th Cir. 2001)*; *Norsul Oil & Mining Co. v. Texaco, Inc., 703 F. Supp. 1520, 1545-46 (S.D. Fla. 1988)*. Where a contract contains a disclaimer that the defendants are not acting as a fiduciary or financial investment advisor for two financial institutions, such a disclaimer "preclude[s] a finding of a fiduciary or other special relationship, absent special circumstances." *BNP Paribas Mortg. Corp. v. Bank of America, N.A., 866 F. Supp. 2d 257, 269-70 (S.D.N.Y. 2012)*; see also *Cooper v. Parsky, 140 F.3d 433, 439, 442 (2d Cir. 1998)*; *Seippel v. Jenkens & Gilchrist, P.C., 341 F. Supp. 2d 363, 381-82 (S.D.N.Y. 2004)*; *Calvin Klein Trademark Trust v. Wachner, 129 F. Supp. 2d 248, 250 (S.D.N.Y. 2001)*.

[*134] There are no "special circumstances" here, and Plaintiffs' conclusory assertions that AP "held itself out as Plaintiffs' agent" and "artfully craft[ed] the language of their contributor agreements" does not change that fact. (AC ¶¶ 235, 238.) The AP Contributor Agreements appear to embody ordinary commercial transactions. See, e.g., *Rodgers v. Roulette Records, Inc., 677 F. Supp. 731, 738-39 (S.D.N.Y. 1988)* (record company did not owe fiduciary duty to recording artist although it collected royalties for him); *Van Valkenburgh, Nooger & Neville v. Hayden Publ'g Co., 33 A.D.2d 766, 766, 306 N.Y.S.2d 599, 600 (1st Dep't 1969)*, aff'd, *30 N.Y.2d 34, 281 N.E.2d 142, 330 N.Y.S.2d 329 (1972)* (book publisher did not have a fiduciary relationship **[**120]** to author).

Finally, the breach of fiduciary duty claim must be dismissed because it is duplicative of Plaintiffs' claim for breach of contract. Both claims are based on the same allegations and alleged duties owed to Plaintiffs: that AP, under its contracts with Plaintiffs, was required to track and monitor the NFL uses of Plaintiffs' photos and to charge the NFL licensing fees (compare AC ¶¶ 223 and 241) was not permitted to grant retroactive licenses (compare AC ¶¶ 222 and 242), and failed to provide allegedly required information to Plaintiffs (compare AC ¶¶ 225 and 244-45).[30] ***HN56***[] A cause of action for breach of fiduciary duty that is merely duplicative of a breach of contract claim cannot stand. *Granirer v. The Bakery, Inc., 54 A.D.3d 269, 863 N.Y.S.2d 396, 399 (1st Dep't 2008)*; *William Kaufman Org. v. Graham & James, 269 A.D.2d 171, 703 N.Y.S.2d 439, 442 (1st Dep't 2000)*. Accordingly, Count VI is dismissed.

Plaintiffs have also contended that the "terms" of the AP Contributor Agreements "demonstrate that the entire purpose for Plaintiffs to enter these agreements was to earn royalties from AP licensing their photos" and the "covenant of good faith and fair dealing thus precludes AP's self-serving reading of the contracts." (Pls.' Opp'n to AP Mot. 26.) However, the AC does not plead a breach of an implied covenant of good faith and fair dealing. At any rate, ***HN57***[] while it is true **[**122]** that contracts include an implied covenant of good faith and fair dealing under New York law, a claim for breach of the implied covenant will be dismissed as redundant "where the conduct allegedly violating the implied covenant is also the predicate for breach of covenant of an express provision of the underlying contract." *Usov v. Lazar, 13 Civ. 818, 2013 U.S. Dist. LEXIS 89257, 2013 WL 3199652, at *6 (S.D.N.Y. June 25, 2013)*(quotation marks and citation omitted); see also *Matsumura v. Benihana Nat'l Corp., 465 F. App'x 23, 29 (2d Cir. 2012)*; *Harris v. Provident Life & Accident Ins. Co., 310 F.3d 73, 81 (2d Cir. 2002)* (***HN58***[] "New York law . . . does not **[*135]** recognize a separate cause of action for breach of the implied covenant of good faith and fair dealing when a breach of contract claim, based upon the same facts, is also pled."). Because Plaintiffs have already sued for breach of contract, a breach of implied duty of fair dealing and good faith claim based on the same contract has not been adequately pled.

VI. The Motions To Dismiss Plaintiffs' Unjust Enrichment Claim(Count VII) Against NFL Defendants, AP, And Replay Are Granted

"In the alternative to their copyright claims" (AC ¶ 248), Plaintiffs have asserted a claim for unjust enrichment based on NLF Defendants, AP, and Replay's alleged uses of their photographs. This claim, too, must fail because enforceable contracts govern the use of Plaintiffs' photographs **[**123]** and because the claim is preempted by the Copyright Act.

a. Enforceable Contracts Govern The Use Of Plaintiffs' Photographs

It is well-settled that ***HN59***[] "the existence of a valid and enforceable contract precludes an unjust enrichment claim relating to the subject matter of the contract." *Morgan Stanley & Co. v. Peak Ridge Master SPC Ltd., 930 F. Supp. 2d 532, 545 (S.D.N.Y. 2013)*; see also *Keiler v. Harlequin Enters. Ltd., No. 12-CV-5558, 2013 U.S. Dist. LEXIS 47690, 2013 WL 1324093, at *3 (S.D.N.Y. Apr. 2, 2013)*, rev'd in part on other grounds, ("Plaintiffs can recover on an unjust enrichment theory only in the absence of an enforceable agreement."); *IDT Corp. v. Morgan Stanley Dean Witter & Co., 12 N.Y.3d 132, 142, 907 N.E.2d 268, 879 N.Y.S.2d 355 (2009)* ("Where the parties executed a valid and enforceable written contract governing a particular subject matter, recovery on a theory of unjust enrichment for events arising out of that subject matter is ordinarily precluded."). Here, the use of Plaintiffs' photographs - which forms the basis for Plaintiffs' theory that NFL Defendants were unjustly enriched - is subject matter clearly governed by the AP Contributor Agreements and by the license agreements between AP and NFLP

---

[30] Plaintiffs allege in their breach of contract count that the AP Contributor Agreements specifically provided that Plaintiffs retained the "exclusive right to pursue claims for infringements." (AC ¶ 221.) Plaintiffs then allege in their breach of fiduciary duty count that in AP's prior motion to dismiss, AP claimed that "it is entitled to pursue and settle infringement claims on plaintiffs' behalf" and that, as such, AP "must either claim such authority as **[**121]** co-owners of the underlying copyrights or as agents for the copyright owners." (AC ¶¶ 234, 236.) All Plaintiffs but Lowrance have issued exclusive licenses to AP encompassing all of their rights in copyright. This exclusive license gives AP the right to sue infringers as a matter of law - not for infringement of Plaintiffs' rights, but for infringement of AP's own rights. Were AP to sue for infringement, it would neither be acting as a co-owner of copyright nor as an agent of Plaintiffs. Thus, AP's right to sue for infringement does not bear on whether AP is an agent of Plaintiffs. Plaintiffs are bound by their own contractual agreements that unambiguously state that AP does not act as their agent, i.e., fiduciary.

(or, in the case of the Second AP Agreement, NFL Enterprises). Accordingly, any claim for unjust enrichment is precluded as a matter of law with respect to NFL Defendants.

They are similarly precluded as against AP. There is no dispute that every Plaintiff has entered into an AP Contributor **[**124]** Agreement, and that each AP Contributor Agreement deals with the subject matter which is the basis for the unjust enrichment claim, namely the extent to which Plaintiffs will be compensated for use of their photographs. As shown above, the AP Contributor Agreements do not prohibit AP from sublicensing Plaintiffs' photographs to NFLP for certain uses that will not result in the payment of royalties to the Plaintiffs. As such, Plaintiffs may not circumvent their contracts through the expedient of an unjust enrichment claim.

b. Copyright Act Preempts Unjust Enrichment Claims

Even if Plaintiffs' state-law claim for "unjust enrichment" were not precluded by the existence of written agreements, it still could not be maintained because it is preempted by *Section 301(a)* of the Copyright Act.

HN60[] Under *§ 301(a)*:

> all legal or equitable rights that are equivalent to any of the exclusive rights within the general scope of copyright as specified by *section 106* in works of authorship that are fixed in a tangible medium of expression and come within the subject matter of copyright as specified by *sections 102* and *103*, whether created before or after that date and whether published or unpublished, are governed exclusively by this title. **[*136]** Thereafter, no **[**125]** person is entitled to any such right or equivalent right in any such work under the common law or statutes of any State.

HN61[] A state-law claim is preempted by *§ 301(a)* when:

> (1) the particular work to which the claim is being applied falls within the type of works protected by the Copyright Act under *17 U.S.C. §§ 102* and *103*, and (2) the claim seeks to vindicate legal or equitable rights that are equivalent to one of the bundle[s] of exclusive rights already protected by copyright law under *17 U.S.C. § 106*. The first prong of this test is called the "subject matter requirement," and the second prong is called the "general scope requirement."

Briarpatch Ltd. v. Phoenix Pictures, Inc., 373 F.3d 296, 305 (2d Cir. 2004) (internal citations omitted). ***HN62***[] A preempted claim fails to state a cause of action and is subject to immediate dismissal under *Rule 12(b)(6)*. *Briarpatch Ltd., 373 F.3d at 308-09*.

HN63[] For a claim arising under state law to be preempted, two tests must be met. The first, called the "subject matter requirement," *Nat'l Basketball Ass'n v. Motorola, Inc., 105 F.3d 841, 848 (2d Cir. 1997)*, requires that the work in which the right is asserted must be fixed in tangible form and come within the subject matter of copyright as specified in *§§ 102* or *103* of the Copyright Act. Id. The second prong of the test for copyright preemption is that the right asserted by a plaintiff's state-law claim must be equivalent to rights specified and protected in *§ 106* of **[**126]** the Act. This is often called the "general scope" requirement. Id. The general scope requirement is satisfied when "the state-created right may be abridged by an act that would, by itself, infringe one of the exclusive rights provided by federal copyright law." *Briarpatch, 373 F.3d at 305*.

HN64[] For a state-law claim not to be considered 'equivalent' to a copyright claim, the state claim must require an additional element that is qualitatively different from the elements of copyright infringement. The courts "take a restrictive view of what extra elements transform an otherwise equivalent claim into one that is qualitatively different from a copyright infringement claim." *Briarpatch, 373 F.3d at 305*; *NBA, 105 F.3d at 851* ("[T]he 'extra element' test should not be applied so as to allow state claims to survive preemption easily."). For example, an "action will not be saved from preemption by elements such as awareness or intent, which alter 'the action's scope but not its nature.'" *Computer Assocs. Int'l, Inc. v. Altai, Inc., 982 F.2d 693, 717 (2d Cir. 1992)* (citation omitted).

Plaintiffs' Count VII alleges that Defendants were "unjustly enriched by the uncompensated use of Plaintiffs' photos." (AC ¶ 249.) However, both preemption elements are satisfied in this case regarding NFL Defendants. As to the first element, Plaintiffs allege, and it is **[**127]** therefore presumed for purposes of this motion, that their photographs are protected by the Copyright Act. As to the second element, the substantive allegations underlying Plaintiffs' unjust enrichment claim are identical to those underlying their infringement claims: that the NFL improperly copied, displayed, and distributed Plaintiffs' photographs without paying royalties. (See, e.g., AC ¶¶ 176, 250-251.) While "enrichment" is an element of unjust enrichment but not copyright infringement, the allegation that the NFL has been "unjustly enriched . . . at the expense of Plaintiffs" (AC ¶ 254) as a result of the alleged infringements is insufficient to avoid preemption. *Briarpatch Ltd., 373 F.3d at 306* ("While enrichment is not required for copyright infringement, we do not believe that it goes far enough to make the unjust enrichment claim qualitatively different **[*137]** from a copyright infringement claim."); *Gusler v. Fischer, 580 F. Supp. 2d 309, 316-17 (S.D.N.Y. 2008)* (***HN65***[] "[A]lthough enrichment is not an element of a copyright infringement claim, it does not constitute an 'extra element' for the purposes of preemption analysis" (citation omitted)); see also *Atrium Grp. De Ediciones Y Publicaciones, S.L. v. Harry N. Abrams, Inc., 565 F. Supp. 2d 505, 509 (S.D.N.Y. 2008)* (noting that plaintiffs' allegation that they failed to receive royalties "does not transform their copyright infringement claim into **[**128]** an unjust enrichment claim," and "[i]f the law were otherwise," it would "undermine *§ 301* preemption"); accord *Thompson v. V.E.W. Ltd, Coty, Inc., No. 06 Civ. 15336, 2007 U.S. Dist. LEXIS 43820, 2007 WL 1746739, at *3-4 (S.D.N.Y. June 15, 2007)* (holding that a claim for unjust enrichment based upon the unauthorized use of images was preempted). A claim for unjust enrichment arising from unauthorized use (i.e., reproduction, display, and distribution) of such works is within the general scope of copyright, because it seeks to vindicate legal and equitable rights that do not qualitatively differ from the rights protected under copyright law. *Briarpatch Ltd., 373 F.3d at 306-307*.

Moreover, no allegation is made suggesting that AP was unjustly enriched: Plaintiffs' claim only addresses the "NFL Defendants' uses of their photos" without paying royalties. (Id. ¶¶ 250, 252.) But even if this claim were read to assert that AP was somehow unjustly enriched, it would also fail on preemption grounds.[31]

[31] The fact that Plaintiffs allege unjust enrichment "in the alternative" to their copyright infringement claims does not save Count VII from dismissal. "The relevant question is whether Plaintiffs could bring their claims under the copyright law at all, not whether they will, nor even whether they will ultimately prevail **[**129]** on their copyright claim." *Moser Pilon Nelson Architects, LLC v. HNTB Corp., 05 Civ. 422, 2006 U.S. Dist. LEXIS 58334, 2006 WL 2331013, at *11 (D. Conn. Aug. 8, 2006)* (emphasis in original) (granting summary judgment on unjust enrichment claim "plead in the alternative" to claim of copyright infringement on preemption grounds); see also *Atrium Grp., 565 F. Supp. 2d at 510* (alternatively plead unjust enrichment claim based on same theory as copyright claim preempted and dismissed, as ***HN66***[] "*Rule 8(d)(2) of the Federal Rules of Civil Procedure* does not purport to override *§ 301* preemption."); *Eliya, Inc. v. Kohls Dep't Stores, 06 Civ. 195, 2006 U.S. Dist. LEXIS 66637, 2006 WL 2645196, at *13 (S.D.N.Y. Sept. 13, 2006)* ("[P]leading a claim in the alternative does not resuscitate an otherwise unviable claim. Regardless of whether Eliya's statutory copyright claim has merit, its common law copyright claim asserts rights in 'the general scope of copyright' and therefore, win or lose, those rights are 'governed exclusively by' the Copyright Act. *17 U.S.C. § 301(a)*. Accordingly, Eliya's common law copyright claim will be dismissed."); *Katz Dochrermann & Epstein, Inc. v. Home Box Office, 97 Civ. 7763, 1999 U.S. Dist. LEXIS 3971, 1999 WL 179603, at *5 (S.D.N.Y. Mar. 31, 1999)* ("The [unjust enrichment] claim is dismissed . . . as an alternative ground for recovery on KDE's copyright infringement and unfair competition claims."). In any event, none of the case law cited by Plaintiffs discusses "alternative" pleading or supports their contentions. **[**130]** *Levine v. Landy, 832 F. Supp. 2d 176 (N.D.N.Y. 2011)*, presented a situation not at issue here, where the plaintiff alleged infringement with respect to some works and unjust enrichment with respect to others (for which the uses were conceded by plaintiff to have been authorized), and the court addressed only the issue of Copyright Act preemption, not alternative pleading. *Levine, 832 F. Supp. 2d at 187-88*. The court was never presented with the issue of whether an unjust enrichment claim is precluded by the existence of valid and enforceable contracts. In *Astroworks, Inc. v. Astroexhibit, Inc., 257 F. Supp. 2d 609 (S.D.N.Y. 2003)*, Copyright Act preemption was not implicated; the court simply determined that because the existence of a contract could not be determined absent discovery, an unjust enrichment claim could survive the motion to dismiss stage. *Astroworks, 257 F. Supp. 2d at 620-21*.

Additionally, Plaintiffs assertion that "even if AP is correct that it was technically authorized to grant a complimentary, royalty-free, and retroactive license to the NFL, it was still unjustly enriched because it had an obligation in equity to obtain compensation for Plaintiffs or share with them the benefits of its bargain with the NFL" is unsupported by case law - Plaintiffs cite

Lastly, the Plaintiffs' unjust enrichment claim against Replay is similarly preempted. **[*138]** Plaintiffs seek to protect their alleged interests in their photos under the theory that Replay was unjustly enriched by offering Plaintiffs' photos for sale without compensating plaintiffs, and without appropriate attribution. (AC ¶¶ 250-54.) As with the other defendants, these rights are those which are protected by the Copyright Act and are therefore preempted.

Conclusion

For the reasons set forth above, Getty's motion to compel arbitration is granted and Defendants' motions to dismiss are granted. The AC is dismissed without prejudice with leave to replead within 20 days of this opinion.

It is so ordered.

New York, NY

LexisNexis® Headnotes

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN1[] **Amendment of Pleadings, Leave of Court**

A party may amend its pleading as a matter of course within the time limits imposed by *Fed. R. Civ. P. 15(a)(1)*. When a party seeks to amend its pleadings outside of the prescribed time frames, the opposing party must consent or the moving party must obtain leave of the court. *Fed. R. Civ. P. 15(a)(2)*. *Rule 15(a)(2)* provides that the court should freely give leave to amend the complaint when justice so requires. Summary disposition of all litigation, especially antitrust cases, is not favored and amendments should be freely and liberally granted to the end that all cases are decided on their merits. The decision to grant or deny a motion to amend rests within the sound judicial discretion of the trial court. A court may exercise its discretion to deny leave to amend a pleading where: (i) the movant has acted with undue delay, bad faith, or a dilatory motive; (ii) the movant has repeatedly failed to cure a deficient pleading; (iii) the amendment would unduly prejudice the opposing party; or (iv) the amendment would be futile. The same standard applies to motions to supplement the complaint pursuant to *Rule 15(d)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN2[] **Motions to Dismiss, Failure to State Claim**

An amendment is futile when the proposed changes would be subject to immediate dismissal for failure to state a claim or on some other ground. The party opposing an amendment has the burden to establish that a proposed amendment would be futile. When a defendant objects to a proposed amended complaint, therefore, the court may scrutinize that complaint as if it were subject to a motion to dismiss for failure to state a claim under Fed. R> Civ. P. 12(b)(6). In such a circumstance, the court must assume the truth of the well-pled factual allegations in the complaint and must draw all reasonable interests against the defendant. Under Rule 12(b)(6), a court must determine whether the well-pleaded factual allegations, assumed to be true, state a claim to relief that is plausible on its face.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Motions to Dismiss, Failure to State Claim**

Plausibility of a claim is not akin to a probability requirement, but rather requires more than a sheer possibility that a defendant has acted unlawfully. Courts do not make plausibility determinations in a vacuum; it is a context-specific task that requires the reviewing court to draw on its judicial experience and common sense. A claim is plausible when the factual allegations permit the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. A claim that pleads only facts that are merely consistent with a defendant's liability does not meet the plausibility requirement. A pleading that offers labels and conclusions or a formulaic recitation of the elements of a cause of action will not do. Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice. The pleadings must create the possibility of a right to relief that is more than speculative. Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN4[] **Standing, Clayton Act**

When considering whether amendment of an antitrust claim is appropriate, the court must determine if the proposed new allegations allege a plausible claim for damages under ***antitrust law***. Congress does not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation. The right to pursue private actions for treble damages under *15 U.S.C.S. § 15(a)* has developed limiting contours. These contours are embodied in the concept of antitrust standing. Antitrust standing is a threshold, pleading-stage inquiry. When a complaint fails to establish this requirement, a court must dismiss it as a matter of law.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN5[] **Standing, Requirements**

To plead antitrust standing, a plaintiff must allege that it suffered an antitrust injury and that it is an efficient enforcer of the antitrust laws. For the first requirement of antitrust injury, a plaintiff must identify the anticompetitive practice complained of and the reasons why such a practice is or might be anticompetitive, and link the anticompetitive practice to the actual injury suffered. The injury must be of the type of harm that antitrust laws were intended to prevent. The plaintiff must allege a direct antitrust injury, something more than just an injury causally linked to an antitrust violation. It is not sufficient to allege an injury that is indirect or derived from injury sustained by another entity with which the plaintiff has a business relationship.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN6[] **Regulated Practices, Private Actions**

While only a short plain statement of an antitrust claim is required to give notice to the opposing party, it is improper to assume that defendants have violated the antitrust laws in ways that have not been alleged.

Antitrust & Trade Law > Clayton Act > Scope

HN7[] **Antitrust & Trade Law, Clayton Act**

See *15 U.S.C.S. § 18*.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

HN8[] **Remedies, Damages**

See *15 U.S.C.S. § 15*.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN9[] **Clayton Act, Claims**

The relevant market definition shapes where a court must look to determine any actual anticompetitive effects. Without one, it is impossible to make that determination and identify any damages flowing from an antitrust violation. To state a claim under Section 7 of the Clayton Act, *15 U.S.C.S. § 18*, a plaintiff must allege a plausible relevant market in which competition will be impaired. The relevant market must be defined as all products reasonably interchangeable by consumers for the same purposes. The test for a relevant market considers what is reasonably interchangeable for consumers, not what a particular plaintiff considers to be interchangeable. In that way, alleging the product market is distinct from alleging antitrust injury, which requires allegations that are specific to the plaintiff. A plaintiff must provide at least a theoretically rational explanation for the boundaries it chooses for the relevant market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN10[] **Relevant Market, Product Market Definition**

For purposes of the relevant market definition in an antitrust claim, interchangeability looks to the use or function of the given product as compared to other products. Every product that can be substituted for the same use or purpose should be included within a single product market. Related to that, cross-elasticity looks at the extent to which a change in price of one product might alter demand for another product. If a change in the price of one product affects demand for the second product, they should be included in the same product market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN11[] **Relevant Market, Product Market Definition**

Where a plaintiff in an antitrust action fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient. Failure to define the market by reference to the rule of interchangeability is, standing alone, valid grounds for dismissal.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN12[] **Motions to Dismiss, Failure to State Claim**

A plaintiff must plead enough facts to state a claim to relief that is plausible on its face. Factual allegations must be enough to raise a right to relief above the speculative level.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN13[] **Standing, Requirements**

In addition to alleging a plausible antitrust claim and related injury, a plaintiff must establish that it is an efficient enforcer of the antitrust laws. As to this second requirement of an efficient enforcer, courts typically examine the following factors: (1) the directness or indirectness of the asserted injury; (2) the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement; (3) the speculativeness of the alleged injury; and (4) the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries.

Opinion

[*878] **MEMORANDUM OF DECISION**

SEAN H. LANE

UNITED STATES BANKRUPTCY JUDGE

Before the Court is the Plaintiffs' motion to amend and supplement the complaint (the "Motion") (ECF No. 106) in this civil antitrust action challenging the merger between American Airlines and US Airways that took place in December 2013. The Motion seeks to add a claim for treble damages under Section 4 of the Clayton Antitrust Act (*15 U.S.C. § 15(a)*) (the "Clayton Act") and a demand for a jury trial. This is the Plaintiffs' second attempt to add a damages claim and related jury demand. The Court denied the Plaintiffs' first motion to amend because the proposed amendments failed to assert a sufficient basis for the damages suffered by the individual Plaintiffs. *See Fjord v. AMR Corp. (In re AMR Corp.), 506 B.R. 368, 386 (Bankr. S.D.N.Y. 2014)*. The Defendants oppose this new Motion, contending that the proposed amendments still fail to state a damages claim for a variety of reasons. **[**2]** For the reasons explained below, the Court agrees and denies the Motion.

BACKGROUND

A detailed account of the Debtors' bankruptcy case and the early stages of this adversary proceeding can be found in the Court's decision on the Plaintiffs' first motion to amend, familiarity with which is assumed. *See generally Fjord, 506 B.R. at 373—76*. But some brief history is necessary to understand the issues raised by the Motion.

In November 2013, the Plaintiffs sought a temporary restraining order to block the proposed merger between American and US Airways, a merger that formed the basis of the Debtors' reorganization. At the hearing on the TRO motion, the Court asked Plaintiffs' counsel to provide information about the individual Plaintiffs and how they would be harmed by the merger. Nov. 25 Hr'g Tr. 35:21—22, 36:16—17 (ECF No. 79). Plaintiffs' counsel could not identify allegations in the complaint that addressed the harm to the named Plaintiffs. *Id.* at 36:18—22. After the hearing, the Court denied the request for a TRO and permitted consummation of the merger because Plaintiffs failed to demonstrate irreparable harm or a likelihood of success on the merits of their antitrust claims. *See Fjord v. AMR Corp. (In re AMR Corp.), 502 B.R. 23 (Bankr. S.D.N.Y. 2013)*. That decision highlighted **[**3]** examples of the deficiencies in the Plaintiffs' pleadings, including the lack of information regarding the individual Plaintiffs and the failure to articulate how they would be harmed by the merger. *Id. at 33—35*.

In January 2014, the Plaintiffs filed their first motion to amend the complaint. In that motion, the Plaintiffs sought to add new factual allegations, a claim for treble damages under *Section 4*, and a demand for a jury trial. They also sought to modify language regarding the divestiture and declaratory relief sought under *Section 16* of the Clayton Act, *15 U.S.C. § 26*. *See* Proposed First Amended Complaint at 1, 38-39, Prayer for Relief A—D (ECF No. 91—2).[1] The Court granted in part and **[*879]** denied in part the first motion to amend. *See Fjord, 506 B.R. 368*. On the one hand, the Court permitted amendment to include new factual allegations that arose after the merger and revisions of the proposed divestiture relief.[2] On the other hand, the Court denied the remainder of the requested relief, finding that the proposed amended complaint failed to assert a sufficient basis for treble damages allegedly suffered by the individual Plaintiffs. *Id. at 385—86*. Consistent with the Court's ruling, the Plaintiffs filed an amended complaint in April 2014 (the "Amended Complaint") **[**4]** (ECF No. 103).

The Plaintiffs filed a second motion to amend and supplement the complaint (ECF No. 105), again seeking to add a damages claim and a jury trial demand. In this motion, the Plaintiffs sought to add over 160 new paragraphs to the Amended Complaint, but their abbreviated papers contained only a cursory explanation about why the Plaintiffs

---

[1] The first motion to amend also included a request for a preliminary injunction requiring the Defendants to hold their assets separate during the pendency of the case. At the hearing on the first motion, the Plaintiffs clarified that they were not seeking such preliminary injunctive relief, notwithstanding the language of the proposed amended complaint. Feb. 13 Hr'g Tr. 35:11—38:11, 45:7—13 (ECF No. 100).

[2] The modifications regarding divestiture addressed the settlement between the Department of Justice (the "DOJ") and the airlines in the DOJ's antitrust action, which occurred after the filing of the Plaintiffs' original complaint. *See Fjord, 502 B.R. at 30*.

would be entitled to the relief sought.[3] The Court subsequently expressed concern about the boilerplate content of the motion, noting that it would be inappropriate for the Plaintiffs to raise new arguments **[**5]** for the first time in the reply brief. May 16 Hr'g Tr. 14:7—16:21 (ECF No. 107). To address these concerns, the Plaintiffs filed a revised motion to file a second amended complaint (ECF No. 106), which is the matter now before the Court.

The proposed second amended and supplemental complaint (the "PSASC") (ECF No. 106—1, Ex. A) identifies forty named Plaintiffs. In ruling on the Plaintiffs' first motion to amend the complaint, the Court observed that the complaint provided little, if any, information about the actual Plaintiffs. *See* *Fjord, 506 B.R. at 385-86*. In this second attempt to amend the complaint, the Plaintiffs propose extensive new allegations about individual Plaintiffs. But notwithstanding the additional text, the Plaintiffs still have failed to allege any information regarding twenty-seven of the Plaintiffs.[4] As to the remaining thirteen **[*880]** Plaintiffs, the alleged injuries can be generally grouped into three categories: personal injuries to the Plaintiffs regarding their own travel plans, *see, e.g.*, PSASC ¶ 248 (Ms. Fjord purchased tickets for her family departing **[**6]** from San Francisco rather than Sacramento); injuries to Plaintiffs' travel agencies or travel-related businesses, *see, e.g.*, PSASC ¶¶ 195, 198—200 (Ms. Jolly lost customers for her annual Paris group trips); and injuries suffered by the Plaintiffs' clients, *see, e.g.*, PSASC ¶¶ 257—62 (Mr. Fry's client has paid increased airfare on routes out of Philadelphia).[5]

DISCUSSION

I. Applicable Legal Standards

HN1[] A party may amend its pleading as a matter of course within the time limits imposed **[**8]** by *Rule 15(a)(1) of the Federal Rules of Civil Procedure*. When a party seeks to amend its pleadings outside of the prescribed time frames, the opposing party must consent or the moving party must obtain leave of the court. *Fed. R. Civ. P. 15(a)(2)*, incorporated in these proceedings by *Fed. R. Bankr. P. 7015*. *Rule 15(a)(2)* provides that "[t]he court should freely give leave [to amend the complaint] when justice so requires." *Id.* "[S]ummary disposition of all litigation, especially antitrust cases, is not favored and . . . amendments should be freely and liberally granted to the end that all cases are decided on their merits." *Food Basket, Inc. v. Albertson's, Inc., 383 F.2d 785, 788 (10th Cir. 1967)*. The decision to grant or deny a motion to amend rests within the "sound judicial discretion of the trial court." *Adelphia Recovery Trust v. FPL Grp., Inc. (In re Adelphia Commc'ns Corp.), 452 B.R. 484, 489 (Bankr. S.D.N.Y. 2011)*. A court may exercise its discretion to deny leave to amend a pleading where: (i) the movant has acted with undue delay, bad faith, or a dilatory motive; (ii) the movant has repeatedly failed to cure a deficient pleading; (iii) the

---

[3] The memorandum of law in support of the second motion to amend was only eight pages, consisting largely of boilerplate language (ECF No. 105—1).

[4] The PSASC provides no new allegations regarding the following Plaintiffs other than their respective addresses: Katherine R. Arcell, Keith Dean Bradt, Jose M. Brito, Robert D. Conway, Judy Crandall, Pamela Faust, Gabriel Garavanian, Harry Garavanian, Lee M. Gentry, Gail S. Kosach, Michael C. Malaney, Len Marazzo, Lisa McCarthy, Patricia Ann Meeuwsen, L. West Oehmig, Jr., Cynthia Prosterman, Dana L. Robinson, Bill Rubinsohn, Sylvia N. Sparks, June Stansbury, Clyde D. Stensrud, Wayne Taleff, Gary Talewsky, Annette M. Tippetts, Diana Lynn Ultican, J. Michael Walker, and Christine O. Whalen.

At the hearing on the Motion, the Court asked Plaintiffs' counsel whether there were additional allegations regarding personal injuries. July 17 Hr'g Tr. 76:2—20 (ECF No. 113). Plaintiffs' counsel explained that all forty individuals have likely **[**7]** suffered personal injuries. *See id.* at 76:19—20 ("I believe, Your Honor, that all, most, if not all, would be [alleging] both."). But when Plaintiffs' counsel could not point to specific paragraphs at the hearing, the Court suggested filing a letter after the hearing to highlight the personal injuries alleged by the Plaintiffs. The Plaintiffs submitted a letter to chambers, but many of the injuries described in the letter pertain to the Plaintiffs who were "undescribed" in the proposed supplemental complaint. (ECF No. 114). In any event, the allegations of the PSASC are the relevant touchstone for this Motion.

[5] There is one other Plaintiff who alleges a harm that is less clearly a personal injury: Ms. Pulfer bought her children tickets for their honeymoon to St. Lucia. PSASC ¶¶ 205—12. Additionally, several Plaintiffs allege prospective injuries that may or may not occur. *See, e.g.*, PSASC ¶¶ 289—90 (discussing expectation of Plaintiffs that the USAir Vacation practice of paying travel agent commissions will be terminated and the impact this would have on Ms. Davis).

amendment would unduly prejudice the opposing party; or (iv) the amendment would be futile. *See, e.g., Tronox Inc. v. Kerr McGee Corp. (In re Tronox Inc.), 503 B.R. 239, 340 (Bankr. S.D.N.Y. 2013)* (citing *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962))*.

The same standard applies to motions to supplement the complaint pursuant to *Rule 15(d)*. *See Music Deli & Groceries, Inc. v. I.R.S., Dist. of Manhattan, 781 F. Supp. 992, 997 (S.D.N.Y. 1991)* ("Although *Rule 15(d)* does not include *Rule 15(a)*'s mandate that leave to amend be freely given when justice so requires, the same standards apply to motions under both **[**9]** of these subdivisions . . . . Thus leave to supplement should be freely granted '[i]n the absence of any apparent or declared reason—such as undue delay, bad faith or dilatory motive . . . .'") (quoting *Foman, 371 U.S. at 182*) . It is well established that leave to amend or supplement should be denied if the amendment or supplement would be futile. *Houston Pipeline Co. LP v. Enron Corp. (In re Enron Corp.), 367 B.R. 373, 382 (Bankr. S.D.N.Y. 2007)*; *see also Kalimantano GmbH v. Motion in Time, Inc., 939 F. Supp. 2d 392, 403 (S.D.N.Y. 2013)*. ***HN2***[] An amendment is futile when the proposed **[*881]** changes would be subject to 'immediate dismissal' for failure to state a claim or on some other ground. *See Enron, 367 B.R. at 382*; *see also Health-Chem Corp. v. Baker, 915 F.2d 805, 810 (2d Cir. 1990)*. The party opposing an amendment has the burden to establish that a proposed amendment would be futile. *Velez v. Fogarty, 2008 U.S. Dist. LEXIS 96999, at *9 (S.D.N.Y. Nov. 20, 2008)* (citations omitted). When a defendant objects to a proposed amended complaint, therefore, the court may scrutinize that complaint as if it were subject to a motion to dismiss under *Rule 12(b)(6)*. *2008 U.S. Dist. LEXIS 96999 at *10*. In such a circumstance, the court must "assume the truth of the well-pled factual allegations in the complaint and must draw all reasonable interests against the defendant." *Penn Grp., LLC v. Slater, 2007 U.S. Dist. LEXIS 50651, at *11 (S.D.N.Y. 2007)*. Under *Rule 12(b)(6)*, a court must determine whether the well-pleaded factual allegations, assumed to be true, "state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*; *see also Hayden v. Paterson, 594 F.3d 150, 160 (2d Cir. 2010)* (citing *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009))*.

HN3[] Plausibility "is not akin to a probability requirement," but **[**10]** rather requires "more than a sheer possibility that a defendant has acted unlawfully." *Iqbal, 556 U.S. at 678* (citation and internal quotation marks omitted). Courts do not make plausibility determinations in a vacuum; it is a "context-specific task that requires the reviewing court to draw on its judicial experience and common sense." *Id. at 679* (citation omitted). A claim is plausible when the factual allegations permit "the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id. at 678* (citation omitted). A claim that pleads only facts that are "merely consistent with a defendant's liability" does not meet the plausibility requirement. *Id.* (quoting *Twombly, 550 U.S. at 557*). "A pleading that offers 'labels and conclusions' or 'a formulaic recitation of the elements of a cause of action will not do.'" *Id.* (quoting *Twombly, 550 U.S. at 555*). "Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Id.* (citation omitted). "The pleadings must create the possibility of a right to relief that is more than speculative." *Spool v. World Child Int'l Adoption Agency, 520 F.3d 178, 183 (2d Cir. 2008)* (citation omitted). "Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility **[**11]** and plausibility of entitlement to relief." *Iqbal, 556 U.S. at 678* (citation and internal quotation marks omitted).

II. The Motion to Amend Is Futile

HN4[] When considering whether amendment is appropriate, the Court must determine if the proposed new allegations allege a plausible claim for damages under ***antitrust law***. As explained by the Supreme Court in *Associated General Contractors*, Congress "did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." *Associated Gen. Contractors of Cal. v. Cal. State Council of Carpenters, 459 U.S. 519, 534, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (citation omitted). "The right to pursue private actions for treble damages under *Section 4* has [] developed limiting contours in the thirty years since *Associated General Contractors* was handed down. These contours are embodied in the concept of **[*882]** 'antitrust standing.'" *Gatt Commc'n, Inc., v. PMC Assocs., L.L.C., 711 F.3d 68, 75 (2d Cir. 2013)*. "'Antitrust standing is a threshold, pleading-stage inquiry. . . .'" *Id.* (quoting *NicSand, Inc. v. 3M Co., 507 F.3d 442, 450 (6th Cir. 2007)*). When a complaint fails to establish this requirement, a court must dismiss it as a matter of law. *Gatt, 711 F.3d at 75*.

HN5[] To plead antitrust standing, a plaintiff must allege that it suffered an antitrust injury and that it is an efficient enforcer of the antitrust laws. *Id. at 76*; *see also* *DNAML Pty, Ltd. v. Apple Inc., 25 F. Supp. 3d 422, 2014 U.S. Dist. LEXIS 77422, at *9 (S.D.N.Y. June 5, 2014)*. For the first requirement of antitrust injury, a plaintiff **[**12]** must identify the anticompetitive practice complained of and the reasons why such a practice is or might be anticompetitive, and link the anticompetitive practice to the actual injury suffered. *See* *Gatt, 711 F.3d at 76*. The injury must be of the type of harm that antitrust laws were intended to prevent. *Id.* The plaintiff must allege a direct antitrust injury, something more than just an injury causally linked to an antitrust violation. *IBM v. Platform Solutions, Inc., 658 F. Supp. 2d 603, 610—11 (S.D.N.Y. 2009)* (citing *G.K.A. Beverage Corp. v. Honickman, 55 F.3d 762, 767 (2d Cir. 1995))*. In the Second Circuit, it is not sufficient to allege an injury that is indirect or derived from injury sustained by another entity with which the plaintiff has a business relationship. *IBM, 658 F. Supp. at 609*.

HN6[] While only a short plain statement of an antitrust claim is required to give notice to the opposing party, it is improper to assume that defendants "have violated the antitrust laws in ways that have not been alleged." *Intellective, Inc. v. Massachusetts Mut. Life Ins. Co., 190 F. Supp. 2d 600, 607 (S.D.N.Y. 2002)*.

The Plaintiffs' original complaint alleged that the proposed merger between American and US Airways violated *Section 7* of the Clayton Act. *Section 7* of the Clayton Act provides:

> ***HN7***[] No person engaged in commerce or in any activity affecting commerce shall acquire the whole or any part of any of the stock . . . where the effect of such acquisition may be to substantially lessen competition **[**13]** or tend to create a monopoly.

15 U.S.C. § 18. For this alleged *Section 7* violation, the Plaintiffs sought to block the merger under *Section 16* of the Clayton Act. As the merger has now been consummated, the Plaintiffs' Motion seeks to add a claim for treble damages pursuant to *Section 4* of the Clayton Act, which provides:

> ***HN8***[] [A]ny person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States . . . and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

15 U.S.C. § 15. The Court must determine whether the proposed supplemental pleadings—the claim for treble damages—state a claim under *Section 4* of the Clayton Act. If the Plaintiffs fail to state a claim for treble damages, then the Court should deny leave to supplement the complaint. Analysis of the *Section 4* claim for treble damages, however, requires evaluation of the related underlying alleged substantive antitrust violation originally plead by the Plaintiffs under *Section 7*. So while the Court must analyze the proposed supplemental allegations, that analysis requires a review of the sufficiency of the original allegations as well.[6]

[*883] Applying the applicable legal standards here, the Court concludes that the PSASC suffers from two defects. First, the PSASC does not plausibly define a relevant market for the alleged antitrust violation and personal harm to the majority of the Plaintiffs. Most notably, it fails to allege cross-elasticity and interchangeability as required by applicable law and its allegations of a national market are flawed. Second, the Plaintiffs lack antitrust standing to the extent they seek damages as travel agents—rather than consumers—because they are not efficient enforcers for the alleged antitrust violations.

A. Plaintiffs Fail to Allege a Relevant Market and Harm to that Market from the Merger

[6] As previously noted by **[**14]** the Court, "the Plaintiffs' jury demand rests upon their proposed new treble damages claim" and therefore is contingent on whether the PSASC asserts a sufficient basis for the treble damages allegedly suffered by the individual Plaintiffs. *Fjord, 506 B.R. at 373*.

1. Failure to Define the Relevant Market is Fatal

HN9[] The relevant market definition shapes where the Court must look to determine any actual anticompetitive effects. Without one, it is impossible to make that determination and identify any damages flowing from an antitrust **[**15]** violation. *See Re-Alco Indus., Inc. v. Nat'l Ctr. For Health Educ., Inc., 812 F. Supp. 387, 392 (S.D.N.Y. 1993)* ("Absent an adequate market definition, it is impossible for a court to assess the anticompetitive effect of challenged practices."). To state a claim under *Section 7* of the Clayton Act, a plaintiff must allege a plausible relevant market in which competition will be impaired.[7] *City of New York v. Group Health Inc., 649 F.3d 151, 155 (2d Cir. 2011)*. "The relevant market must be defined as all products reasonably interchangeable by consumers for the same purposes . . . ." *Id.* (citations omitted). The test for a relevant market considers what is reasonably interchangeable for consumers, not what a particular plaintiff considers to be interchangeable. *See Grp. Health Inc., 2010 U.S. Dist. LEXIS 60196, 2010 WL 2132246, at *3*; *see also Queen City Pizza v. Domino's Pizza, Inc., 124 F.3d 430, 438 (3d Cir. 1997)*. In that way, alleging the product market is distinct from alleging antitrust injury, which requires allegations that are specific to the plaintiff. A plaintiff must provide "at least a theoretically rational explanation" for the boundaries it chooses for the relevant market. *Gianna Enterprises v. Miss World (Jersey) Ltd., 551 F. Supp. 1348, 1354 (S.D.N.Y. 1982)*.

Although the PSASC contains over 350 paragraphs, it devotes little time to the relevant market definition.[8] The definition of the market is contained in two short **[*884]** paragraphs: "The relevant product and geographic markets for purposes of this action are the transportation of airline passengers in the United States. Within the relevant market, well-defined submarkets exist which, in themselves, constitute geographic and/or product markets for antitrust purposes and include what are known as 'city pairs.'" PSASC ¶¶ 32—33.[9]

As a threshold matter, the PSASC does not contain any allegations about interchangeability and cross-elasticity, which is fatal to any claim of any market definition. Indeed, the words "interchangeability" and "cross-elasticity" do not appear anywhere in the PSASC. **HN10**[] "'Interchangeability' looks to the use or function of the given product as compared to other products. Every product that can be substituted for the same use or purpose should be included within a single product market." *Intellective, 190 F. Supp. 2d at 610*. Related to that, "cross-elasticity" looks at the extent to which a change in price of one product might alter demand for another product. *Id.* If a change in the price of one product affects demand for the second product, they should be included in the same product market. *Id.*

HN11[] "Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, **[**18]** or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient." *Grp. Health Inc., 649 F.3d at 155*;[10] *Intellective, 190 F. Supp. 2d at*

---

[7] The requirement to identify a relevant product market is the same across many antitrust statutes. *See City of New York v. Grp. Health Inc., 2010 U.S. Dist. LEXIS 60196, 2010 WL 2132246, at *2 (S.D.N.Y. May 11, 2010)*, *aff'd*, *649 F.3d 151 (2d Cir. 2011)* ("To state claims under any of the statutes identified above [the Clayton Act, the Sherman Act or the Donnelly Act], Plaintiffs must identify the product market in which competition will be impaired.") **[**16]** (collecting cases); *see also Kaplan v. Burroughs Corp., 611 F.2d 286, 292 n.2 (9th Cir. 1979)* (citing *15 U.S.C. § 18*) ("Generally, principles of market definition applicable to cases arising under Sherman Two are also applicable to Sherman One actions, and to merger cases arising under *[Section] 7* of the Clayton Act."); *Lektro-Vend Corp. v. The Vendo Corp., 500 F. Supp. 332, 349 (N.D. Ill. 1980)*. For this reason, the Court cites to cases arising under these statutes in addition to those under *Section 7* of the Clayton Act.

[8] Similarly, the Motion states merely that "Plaintiffs allege that they bought airline tickets and ancillary services from the defendants after the merger at the higher prices which were predicted to result from the lessening of competition caused by the merger." Pls.' Mem. of Law at 12 (ECF No. 106—1).

[9] By contrast, the DOJ dedicated **[**17]** almost three pages of its significantly shorter complaint to define the relevant product and geographic markets. *See* DOJ Compl. ¶¶ 24—31. The DOJ alleged that scheduled air passenger service was the relevant product market and that city-pairs were the relevant geographic market. *Id.*

610 ("'Interchangeability' and 'cross-elasticity of demand' are the critical components of a relevant product market."). Failure to define the market by reference to the rule of interchangeability is, standing alone, valid grounds for dismissal. Global Discount Travel Servs., LLC v. Trans World Airlines, Inc., 960 F. Supp. 701, 705 (S.D.N.Y. 1997) (finding that plaintiff failed to define the relevant product market where they alleged only that the market was "tickets for travel on TWA between certain city pairs ... [and that] when a 'consumer needs to fly from a TWA original city to one of TWA's destination cities, and wants a certain package (flight time and date, mileage, first class confirmed seat at full faire price, etc.), only a TWA ticket will do.'") (citing Ford Piano Supply Co. v. Steinway & Sons, 1988 U.S. Dist. LEXIS 523, **[*885]** 1988 WL 3488, at *2 (S.D.N.Y. Jan. 13, 1988) (dismissing claims relating to monopoly and exclusive dealing due to failure to define market)); *see also* Queen City Pizza, 124 F.3d at 436 (motion to dismiss may be granted for failure to define relevant market).

In their briefs and at argument, the Plaintiffs have been steadfast in insisting upon a national market for airline travel. *See, e.g.*, July 17 **[**20]** Hr'g Tr. 42:17—23; Reply ¶¶ 16, 22—23 (ECF No. 112). But the definition of a national market is problematic for airfare. An airline passenger cannot buy a ticket that acts as a pass for travel anywhere within the country. They must buy a ticket with a specific origin and destination. As the Court noted in the TRO Opinion issued well before the instant Motion was filed, "Plaintiffs' theory of a national market would require a conclusion that all flights compete with each other. For example, a flight from Los Angeles to New York would compete with a flight from Detroit to Seattle. Plaintiffs have not explained why that would be true here . . . ." Fjord, 502 B.R. at 40. Over eight months later, on Plaintiffs' second attempt to amend the complaint, the PSASC still has not alleged why that might be true. *See* Bayer Schering Pharma AG v. Sandoz, Inc., 813 F. Supp. 2d 569, 575 (S.D.N.Y. 2011) ("'The relevant market is defined as all products reasonably interchangeable by consumers for the same purposes because the ability of consumers to switch to a substitute restrains a firm's ability to raise prices above the competitive level.'") (quoting Geneva Pharms. Tech. Corp. v. Barr Labs., Inc., 386 F.3d 485, 496 (2d Cir. 2004) (additional internal quotes omitted); Intellective, 190 F. Supp. 2d at 610 ("Every product that can be substituted for the same use or purpose should be included within a single product market."); **[**21]** Pepsico, Inc. v. The Coca-Cola Co., 315 F.3d 101, 105 (2d Cir. 2002) (per curiam) ("Products will be considered to be reasonably interchangeable if consumers treat them as 'acceptable substitutes.'") (internal citations and quotations omitted); Commer. Data Servers, Inc. v. IBM Corp., 166 F. Supp. 2d 891, 896 (S.D.N.Y. 2001) (plaintiff must offer "a theoretically rational explanation" for why the market boundaries are defined as they are) (quoting Int'l Audiotext Network, Inc. v. Am. Tel. & Tel. Co., 893 F. Supp. 1207, 1213 (S.D.N.Y. 1994)).[11]

Indeed, the Plaintiffs' national market theory for the airline industry has been rejected by another court for a similar failure. In Malaney v. UAL Corp., 2011 U.S. Dist. LEXIS 150386, 2011 WL 6845773 (N.D. Cal. Dec. 29, 2011), the court dismissed the complaint, noting that:

---

[10] In *Group Health Inc.*, the City of New York sued several insurance providers under the Clayton Act, the Sherman Act, and the **[**19]** Donnelly Act, seeking to prevent them from merging. *See* Grp. Health, 649 F.3d at 154. The City's complaint defined the relevant market as the "low-cost municipal health benefits market" which included "only those insurance plans that are inexpensive and that the City selects for inclusion in the Health Benefits Program." *Id.* The Court of Appeals for the Second Circuit found that that the market alleged in the City's complaint was "legally insufficient because it [was] defined by the City's preferences, not according to the rule of reasonable interchangeability and cross-elasticity of demand." Id. at 156. The Court of Appeals noted that "[t]he market alleged in the City's complaint ignores the competition existing among insurance providers for the City's business, as well as the health insurance market for other large employers in the region. The City does not allege an factor that would prevent insurance companies other than those it selects for the Health Benefits Program from proposing competitive products should the merged firm raise its premiums to supracompetitive prices." *Id.*

[11] The Plaintiffs allege that both USAir and American have stated that they compete only in a national market. *See* PSASC ¶¶ 43—45. But this does not change the fact that the Plaintiffs must make appropriate allegations of a market for purposes of stating an antitrust complaint and the statements they cite are not determinative of the relevant market. *See* United States v. Oracle Corp., 331 F. Supp. 2d 1098, 1166 (N.D. Cal. 2004) (discounting statements in company's internal documents about competition where inconsistent with evidence in the marketplace); *c.f.* A.A. Poultry Farms, Inc. v. Rose Acre Farms, Inc., 881 F.2d 1396, 1402 (7th Cir. 1989) (downplaying utility of statements of senior executives regarding competitive intent).

> [P]laintiffs have already enjoyed ample opportunity to develop a substantial record on this question, yet both this Court and the Ninth Circuit have held **[**22]** that their pleadings, at least in their current form, fail to state a viable market. As both courts have explained, the national market for air transportation does [not] meet *Brown Shoe*'s standard because flights between distant cities are simply not reasonably interchangeable. . . . **[*886]** Plaintiffs have expressly refused to amend their pleadings to cure this defect since denial of the preliminary injunction.

2011 U.S. Dist. LEXIS 150386, [WL] at *4; *see* 2011 U.S. Dist. LEXIS 150386, [WL] at *1 (court referring to prior denial of preliminary injunction where it found, among other things, "no evidentiary support for plaintiffs' position that a New York—Los Angeles flight is a substitute for a Miami—Seattle flight."). Plaintiffs' counsel in this case also represented the Plaintiffs in *Malaney*. Thus, these same issues regarding a national market for airline travel should come as no surprise to Plaintiffs' counsel here, particularly as this Court has previously identified this as a problem. Fjord, 502 B.R. at 40.[12]

At oral argument, Plaintiffs' counsel suggested that a national market was evidenced from the "supply side." *See* July 17 Hr'g Tr. 39:13—40:12. He posited that most airports do not use slots, and therefore have low barriers to entry. If a company owns a plane, therefore, an airline simply needs to find a profitable route, "turn [its] airplane and go there." *Id.* But this argument goes against logic. If it is truly this easy to enter the market, the logical conclusion is that there will be low barriers to entry and therefore robust competition in the market. *See* July 17 Hr'g Tr. 90:22—90:24. If city-pairs have low barriers to entry and cannot sustain lasting market power, therefore, it is hard to follow Plaintiffs' logic that aggregating the city-pairs would amount to lasting market power nationally.[13]

While alleging a national market, the PSASC does make numerous references to city-pairs. Plaintiffs explain that "the relevant product and geographic markets alleged in the complaint are the transportation of airline passengers in the United States, within which well-defined city-pair submarkets also exist."[14] Reply ¶ 9. The Plaintiffs' allegations regarding price increases use city-pairs as a reference. *See, e.g.*, PSASC ¶ 248 (Ms. Fjord booked tickets from San Francisco to St. Louis, and compared them to Sacramento-St. Louis tickets). The Plaintiffs also rely heavily on the antitrust action filed—and eventually settled—by the DOJ, which defined the market by city-pairs. The Plaintiffs even attach the DOJ's chart of relevant city-pairs to the PSASC, although not all of the city-pairs discussed in the allegations correlate to city-pairs on the chart. *See* Opp'n at 21—22 (ECF No. 108).

Unlike a national market, the case law recognizes that city pairs are an appropriate way to define the market for antitrust purposes **[**25]** in the airline industry. The court in *Global Discount Travel Services*, recognized city-pairs for all airline tickets as the relevant product market. 960 F. Supp. at 705; *see also* In re Northwest Airlines Corp., 208 F.R.D. 174, 220 (E.D. Mich. 2002) (noting that "any broader **[*887]** attack on the use of city-pairs [as the relevant market] surely cannot succeed, where the airlines themselves, as well as numerous government and academic reports, have adopted this same general approach to analyzing the air travel industry."). With city-pairs as the relevant market, "[f]light times, dates, mileage, and other factors [can be understood as] features that enhance the enjoyment of the product." Global Discount, 960 F. Supp. at 705. While a consumer might prefer a certain airline based on flight times or frequent flyer programs, those factors were not a basis to restrict the product market in the *Global Discount* case. *Id.*

---

[12] Plaintiffs cite to items such as baggage fees and frequent flyer awards. *See, e.g.*, PSASC ¶¶ 220. Policies for such items may be set at a national level, *see, e.g.*, July 17 Hr'g Tr. 93:18—20, but they are not stand-alone products that are purchased without having first purchased an **[**23]** airline ticket. In fact, the Plaintiffs characterize changes in these policies, such as increased baggage fees, as "tantamount to fare increases . . . ." PSASC ¶ 221.

[13] At the time, the Court also observed that the "Defendants have raised a legitimate question regarding why, even if a national market existed, such a market would not be deemed 'highly concentrated' using the prevailing industry **[**24]** standards." Fjord, 502 B.R. at 40.

[14] As courts have noted, submarkets are essentially their own product market for antitrust purposes. *See* Oracle, 331 F. Supp. 2d at 1118-19 (discussing "the rise (and fall) of the 'submarkets' doctrine.")

Despite the recognized use of city pairs as a relevant market in the case law, the Plaintiffs do not explain how the city-pair "submarkets" are relevant to their proposed national market. Indeed, the Plaintiffs make a point of rejecting a market based on city-pairs by stating that "the effects of the merger have been direct and immediate across the entire country and have not been limited to the 'city pair' submarkets **[**26]** in which the defendants seek to cabin their latest view of the relevant market." Reply ¶ 23. Perhaps not surprisingly then, the Plaintiffs never identify what city-pairs are at issue here. While the PSASC attaches a chart from the DOJ antitrust litigation, it does not explain if the city-pairs in the chart are where the alleged antitrust injuries to the named Plaintiffs took place. The Plaintiffs make some modest allegations that suggest that certain city-pairs are relevant, but they do not define which city-pairs are at issue here, much less analyze the impact on competition in those city-pairs. *See, e.g.*, PSASC ¶¶ 259—62 (describing fare increases paid by Mr. Fry's client for tickets in the city-pairs for Philadelphia-Portland, Philadelphia-San Francisco, Philadelphia-Minneapolis, and Philadelphia-Louisville). As Defendants' counsel has articulated, the complaint lacks "that middle content about what on a market level transpired in this particular [city-pair] market." July 17 Hr'g Tr. 63:8—13. Moreover, many of the allegations relate to city-pairs that are not identified on the DOJ chart, further confusing what city-pairs might be at issue in this litigation. *Compare* PSASC ¶¶ 206—08 **[**27]** (discussing city-pair of Columbus, Ohio to St. Lucia), PSASC ¶¶ 216—18 (discussing city-pair of Dallas—Ft. Worth to Ft. Lauderdale), PSASC ¶ 226 (discussing city-pair of Burbank, California to Ft. Lauderdale, Florida), PSASC ¶ 227 (discussing city-pair of Santa Barbara, California to Ft. Lauderdale), *with* DOJ chart attached as Appendix A to PSASC (ECF No. 106—1). Thus, their allegations regarding city-pair markets are insufficient.

Even assuming a city-pair market has been identified—which it has not—such a market in the PSASC would also suffer from the flaw of not alleging cross-elasticity and interchangeability. Some allegations in the PSASC hint at cross-elasticity for city-pairs but appear inconsistent with the Plaintiffs' claims for damages. For example, Ms. Fjord, based in Winters, California, bought her family tickets to St. Louis departing from San Francisco because the airfare from Sacramento was more expensive. *See* PSASC ¶¶ 243, 248. Although the complaint alleges that this was "a great inconvenience," PSASC ¶ 248, and is grounds for damages, it suggests that Sacramento-St. Louis and San Francisco-St. Louis might be included in the same market due to cross-elasticity. But **[**28]** if the product market includes the Sacramento-St. Louis and San Francisco-St. Louis flights, then it remains unclear how Ms. Fjord suffered any injury by choosing to fly from the less expensive airport within that market. *See Hack v. President & Fellows of Yale College, 237 F.3d 81, 86 (2d Cir. 2000)*, *abrogated on other grounds by* **[*888]** *Swierkiewicz v. Sorema N.A., 534 U.S. 506, 122 S. Ct. 992, 152 L. Ed. 2d 1 (2002)* (allegations of interchangeability and cross-elasticity must be plausible).

In fact, much of the Plaintiffs' supplemental allegations boil down to recitations of price fluctuations for tickets on American. For example, Ms. Russell complains of price increases for tickets from Dallas-Fort Worth to Fort Lauderdale. In October 2013, Ms. Russell purchased a round-trip ticket on American for travel in March that cost $425.80. PSASC ¶ 216. In March 2014, she purchased a ticket on American for travel in June that cost $626. PSASC ¶ 217. But the Plaintiffs do not offer any explanation regarding other flight options on the same route, such as comparable flights on another airline and their cost.[15] As other antitrust decisions involving airlines make clear, such allegations do not suffice to define a relevant market. *See Global Discount, 960 F. Supp. at 705-06* ("The rule of reasonable interchangeability dictates that the relevant product market in this case be at least the market **[**29]** for all airline tickets between the relevant city pairs, not just tickets on TWA. . . . Because [Plaintiff] cannot define a relevant product market in a single brand product, it is impossible to assess the anticompetitive effects of the challenged practices . . . . Plaintiff has made no reasonable showing why TWA airline tickets for travel between certain cities should be considered a market unto itself, as distinguished from the market consisting of all airline tickets for travel between the paired cities."); *Grp. Health Inc., 649 F.3d at 156* ("A single purchaser's preferences . . . cannot define a market.")[16]

---

[15] Some discrepancies in price fluctuations are alleged in a way that makes comparison problematic. The price comparison for Ms. Russell, for example, compares one ticket purchased six months in advance against another ticket purchased only three months in advance, with one ticket for spring travel and the other for summer travel. PSASC ¶¶ 216—17.

[16] Some allegations focus on specific airports within a city. *See, e.g.*, PSASC ¶ 140 (discussing airport pair routes); ¶¶ 216—18 (Ms. Russell purchased tickets from Dallas-Fort Worth to Fort Lauderdale). The Defendants argue that this is an impermissible

Finally, the Plaintiffs have at times also seemed to suggest that there is also an international market. For example, Ms. Pulfer alleges price increases on flights from Columbus, Ohio to St. Lucia, PSASC ¶¶ 205—13, and Mr. Fry complains of increases on flights from Denver to Tel Aviv and Denver to Delhi. PSASC ¶¶ 267—71. In another part of the PSASC, however, the Plaintiffs define the relevant market as "the transportation of airline passengers *in the United States*." PSASC ¶ 32 (emphasis added). Thus, the PSASC does not allege the existence of an international market, nor does it provide any facts about that potential market. There are no allegations about how the merger adversely impacted this international market, other than a complaint of higher fares, and there are no allegations regarding interchangeability or cross-elasticity.

2. Failure [**31] to Allege Causal Connection Does Not Satisfy Twombly *Pleading Standard*

Even assuming that the Plaintiffs had properly defined any market, many of their complaints fail to allege a plausible chain of causation for many of the alleged **[*889]** harms arising out of the merger. Simply put, they fail to connect the dots.

As counsel for the airlines explained at the hearing, the PSASC contains allegations regarding the merger and hundreds of allegations of harm without "any explanation for why in *Twombly* terms it is plausible to believe that that is the anticompetitive effects of this merger, as opposed to the millions of other things it might be." July 17 Hr'g Tr. 63:24—64:5. Under *Twombly*, ***HN12***[] a plaintiff must plead "enough facts to state a claim to relief that is plausible on its face." *550 U.S. at 570*. In *Twombly*, the Supreme Court considered an antitrust claim for violation of the Sherman Act, and concluded that the complaint's allegations of parallel conduct and a bare assertion of conspiracy were insufficient. *Id. at 556—57*. "Factual allegations must be enough to raise a right to relief above the speculative level." *Id. at 555*. The Court dismissed the complaint in *Twombly* because the plaintiffs did not "nudge[] their claims across **[**32]** the line from conceivable to plausible." *Id. at 570*.

The PSASC suffers from the same problem in many instances, often failing to move beyond the realm of possible claims. As one example, the Court turns to the allegations regarding Mr. Fry. The PSASC details how Mr. Fry and his wife have been inconvenienced since the US Air merger with America West, which has forced them to fly out of Denver rather than Colorado Springs. *See* PSASC ¶¶ 265—70. Most of these allegations concern a flight from Denver to Tel Aviv in October 2013. *Id.* But all of these alleged harms occurred before the American merger. Despite the lengthy description of pre-merger inconveniences, Plaintiffs have failed to allege any plausible explanation as to how the American merger relates to this harm.

Additionally, there are many instances where the PSASC complains of fare increases where no one is alleged to have even purchased a ticket. *See, e.g.*, PSASC ¶¶ 246—47 (discussing increased airfare between Sacramento and Toledo, as well as Sacramento to Caracao [sic], without mention of tickets purchased). The PSASC also fails to allege higher prices for the same product. For instance, the complaint alleges that Ms. Russell "plans **[**33]** to fly on American Airlines again in the foreseeable future . . . . As of April 29, 2014, a ticket which is the same as the one she purchased in March 2014 [for travel in June] on American Airlines, sells for $951.01, and the same ticket if priced using the USAir-American Airlines code share costs $1517.00." PSASC ¶ 218. But as the two tickets were not the same number of days from the proposed travel—the more expensive ticket was closer—the two tickets are not necessarily comparable. Without a comparison of like products, an antitrust injury is not plausibly pled. *See Gatt, 711 F.3d at 77* (no *Section 4* standing where plaintiff did not allege that it paid higher, anticompetitive prices for a product).

Moreover, the Plaintiffs often allege injury to the public at large, rather than harm to any named plaintiff. For example, in the supplemental allegations, the Plaintiffs include a discussion of how flight delays and cancellations have increased as a result of decrease in competition between carriers. PSASC ¶¶ 342—46.[17] "Damages claimed

market as well, because **[**30]** it ignores alternate airports that might be interchangeable. *See* Opp'n at 20. An airport-pair market may be very difficult to define because of interchangeability, although airline tickets are booked this way as a practical matter. But the Plaintiffs do not allege an airport market, or interchangeability and cross-elasticity for such a market.

in a private antitrust **[*890]** suit must be different from those suffered by the general public—i.e. they must be special to the claimant." *Highland Supply Corp. v. Reynolds Metals Co., 327 F.2d 725, 732 (8th Cir. 1964)*; *see also* *United States v. Borden Co., 347 U.S. 514, 518, 74 S. Ct. 703, 98 L. Ed. 903 (1954)* ("The Government seeks its injunctive remedies **[**34]** on behalf of the general public; the private plaintiff . . . may be expected to exercise it only when his personal interest will be served."); *Burkhead v. Phillips Petroleum Co., 308 F. Supp. 120, 123 (N.D. Cal. 1970)* (Whether private litigant seeks relief in form of injunction or damages, "suit may not be maintained by the private litigation merely because of violations of the antitrust laws which have resulted in injury to the public.").

The Court previously highlighted this problem in ruling on Plaintiffs' first motion to amend, noting that the alleged *Section 4* injuries must be personal to the Plaintiffs and cannot simply be harm suffered by the general public. *See* *Fjord, 506 B.R. at 386* ("Plaintiffs' counsel agreed that a pleading for injury requires allegations that something happened . . . Yet the PAC is devoid of any such allegations . . . In fact, many allegations in the PAC refer to harm to the general public or to 'millions of customers,' rather than any specific harm **[**35]** to these individual plaintiffs.") (internal citations omitted); *Fjord, 502 B.R. at 33-34* ("The Court has no evidence whatsoever regarding who the Plaintiffs are, what the nature of their interest in the airline industry is, or how they will be individually harmed by the proposed merger. . . . [T]he Court need only consider those injuries plaintiffs advance that are personal to them . . . and cannot consider any injuries that plaintiffs allege would be suffered by the general air carrier flying public as a whole. . . .") (internal citations and quotations omitted). Counsel for the Plaintiffs has received the same guidance in at least one other antitrust case. *See* *Malaney v. UAL Corp., 2010 U.S. Dist. LEXIS 106049, 2010 WL 3790296, at *13 (N.D. Cal. Sept. 27, 2010)* ("In evaluating plaintiffs' purported irreparable harm as well as the balance of equities, the Court must only consider those injuries plaintiffs advance that are personal to them were defendants to merge, and cannot consider any injuries that plaintiffs allege would be suffered by the general air carrier flying public as a whole."). Despite these repeated admonitions, the Plaintiffs here again level allegations of general harm without connecting such harms to any named plaintiff.

There are numerous other allegations that similarly do not state a personal **[**36]** harm to Plaintiffs, including harm from prior mergers, *see e.g.*, PSASC ¶¶ 274, 281, 291 (discussing results of previous airline mergers); and injuries yet to occur, *see, e.g.*, PSASC ¶¶ 289—90 (discussing expectation of Plaintiffs that the USAir Vacation practice of paying travel agent commissions will be terminated and the impact this would have on Ms. Davis). It would be improper to permit amendment of the complaint to add such deficient allegations. *See* *Reading Int'l, Inc. v. Oaktree Capital Mgmt. LLC, 317 F. Supp. 2d 301, 313 (S.D.N.Y. 2003)* ("[I]t is hardly 'absurd' to require that someone in the class of persons that would have standing if injured actually *be* injured in order for a suit to proceed.").

B. Plaintiffs Are Not an Efficient Enforcer of Antitrust Laws for the Majority of Their Claims

HN13[] In addition to alleging a plausible antitrust claim and related injury, *see supra* Section A, a plaintiff must establish that it is an efficient enforcer of the antitrust **[*891]** laws. As to this second requirement of an efficient enforcer, courts typically examine the following factors:

> (1) the directness or indirectness of the asserted injury;
>
> (2) the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust **[**37]** enforcement;
>
> (3) the speculativeness of the alleged injury; and
>
> (4) the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries.

---

[17] *See also* PSASC ¶¶ 347—51 (alleging that since the merger, American and USAir have begun to sell tickets to customers on the same planes, routes and departure times at substantially different fares, depending on which carrier the flight was booked through); PSASC ¶¶ 220—21 (discussing changes to baggage programs).

Gatt, 711 F.3d at 78 (citations omitted).

The Plaintiffs here have not shown that they are efficient enforcers of the antitrust laws for many of their alleged harms. Of the forty named Plaintiffs, the PSASC only contains specific allegations as to thirteen. For these thirteen Plaintiffs, the PSASC includes three classes of allegedly injured parties who could serve as antitrust plaintiffs: travel agents, *see, e.g.*, PSASC ¶¶ 195, 198—200 (Ms. Jolly lost customers for her annual Paris group trips); clients of the travel agents, *see, e.g.*, PSASC ¶¶ 257—62 (Mr. Fry's client has paid increased airfare on routes out of Philadelphia); and personal injuries to the Plaintiffs, *see, e.g.*, PSASC ¶ 248 (Ms. Fjord purchased tickets for her family departing from San Francisco rather than Sacramento). Thus, the individuals who could serve as plaintiffs for such harms are airline passengers or the travel agents who act on their behalf. Of these, airline passengers are the more efficient enforcer of the alleged antitrust violation **[**38]** here. Examination of the four relevant factors leads the Court to this conclusion: directness of the injury; existence of an identifiable class motivated to vindicate the public interest; speculativeness of the injury; and difficulty apportioning damages to avoid duplicative recoveries.

With respect to the first factor, "[d]irectness in the antitrust context means close in the chain of causation." *Gatt, 711 F.3d at 78* (citation omitted). Here, the Plaintiffs' complaint alleges that due to higher travel costs, consumers are choosing to book directly through airlines to avoid paying a travel agent's fee. PSASC ¶¶ 237, 291. If a consumer books a ticket and absorbs the higher cost, therefore, it does not appear that the travel agent would suffer any harm. The travel agents' loss of commissions or fees paid by consumers is further down the chain than any harm suffered directly by the consumers. Thus, it is clear that the injury alleged by the passengers is more direct.

As to the second factor, Plaintiffs' counsel argued that no other party was suing, and that, therefore, these parties were the proper plaintiffs. July 17 Hr'g Tr. 14:5—8 ("[W]e are the only ones challenging this merger for damages. So there is no one else . . **[**39]** . ."). But the fact that no other party is presently bringing suit "does not support recognizing [the travel agents'] standing." *Gatt, 711 F.3d at 79* (citing *Daniel v. Am. Bd. Of Emergency Med., 428 F.3d 408, 444 (2d Cir. 2005)*); *see also* *Associated General Contractors, 459 U.S. at 542 n.47* ("[I]f there is substance to [the plaintiff's] claim, it is difficult to understand why the[] direct victims of the conspiracy have not asserted any claim in their own right."). Given that customers exist to challenge any anti-competitive conduct, this second factor weighs against the standing of Plaintiffs to sue as travel agents.

The third factor also weighs against the travel agents. Their alleged damages are highly speculative when compared to customers. *See* *Gatt, 711 F.3d at 79* (concluding **[*892]** that damages were highly speculative where the plaintiff did not plausibly allege that "in the absence of the alleged scheme, its bids—rather than some other party—would have prevailed."). Where a travel agent has lost business, it is much more difficult to trace that loss of business to the challenged merger, as compared to a more direct and definable loss suffered by a customer paying a higher fare. *See, e.g.*, PSASC ¶¶ 224—37 (alleging loss of income and business to Ms. Brown—who works as a travel agent and travel consultant—due to increased fares and fees and decreased **[**40]** service resulting from lessening competition in airline industry due to Defendants' merger). Other economic factors could greatly affect any losses suffered by travel agents, a concern reflected by allegations in the complaint itself. *Cf.* *Gatt, 711 F.3d at 79* ("[T]he profits Gatt earned under a bid-rigging scheme shed little light on how much Gatt would earn in a competitive bidding environment. Moreover, Vertex had no obligation to authorize Gatt to sell Vertex products in the first place. It is thus entirely uncertain whether, absent the scheme, Vertex would have entered into the Dealer Agreement with Gatt at all.").

Fourth and finally, the issue of apportioning damages and the risk of duplicative recoveries are problematic for any travel agent claim. It is unclear from the PSASC how payments to travel agents are apportioned. But it seems clear that if the travel agent booked and paid for a ticket, the passenger reimbursed the travel agent for the cost of the ticket and paid the agent's fee on top of that. As such, it is unclear how to determine what damages are suffered by a travel agent as distinct from the harm suffered by the passenger. Allowing travel agents to pursue claims based on customers also risks **[**41]** duplicative recovers as passengers have four years to bring such an action on their own behalf. *See* July 17 Hr'g Tr. 35:21—23 (noting that statute of limitations for passenger claims would be four years); *see also* *Gatt, 711 F.3d at 79-80* ("[T]he risk of multiple and duplicative recoveries, while perhaps not of primary concern here, provides additional support for rejecting Gatt as an efficient enforcer. As we have observed, other Vertex dealers could assert—just as plausibly as Gatt has asserted in this case—that, had the bidding been independent, they would have bid on and won the . . . contracts. We recognize that other Vertex dealers may not file suit, and that future actions may well be time barred. *See* *15 U.S.C. § 15(b)* (establishing four-year statute of limitations for private antitrust suits under *15 U.S.C. § 15*). Regardless, this factor too works against Gatt.").

None of these factors weighs in favor of the travel agent Plaintiffs. The Court finds that the travel agent Plaintiffs would not be efficient enforcers and could not sustain a private action for lack of antitrust standing. Accordingly, the request to supplement the pleadings with respect to any allegations regarding the travel agent Plaintiffs would be futile.

CONCLUSION

For the **[**42]** reasons set forth above, the Motion is denied. The Defendants are directed to settle an order on three days' notice.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Under *Fed. R. Civ. P. 12(b)(6)*, a party may move to dismiss a complaint for failure to state a claim upon which relief can be granted. Such a motion tests the legal sufficiency of a complaint. In considering whether the complaint is sufficient, the court must accept as true all of the factual allegations contained in the complaint. However, the court need not accept as true allegations that contradict matters properly subject to judicial notice or by exhibit or allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences. While a complaint need not allege detailed factual allegations, it must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Mistake

HN2[] **Heightened Pleading Requirements, Fraud Claims**

Claims sounding in fraud or mistake are subject to the heightened pleading requirements of *Fed. R. Civ. P. 9(b)*, which require that a plaintiff alleging fraud must state with particularity the circumstances constituting fraud. *Fed. R. Civ. P. 9(b)*. To satisfy the heightened standard under *Rule 9(b)*, the allegations must be specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong. Thus, claims sounding in fraud must allege an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations. A plaintiff must set forth what is false or misleading about a statement, and why it is false. However, intent, knowledge, and other conditions of a person's mind need not be stated with particularity, and may be alleged generally. *Fed. R. Civ. P. 9(b)*.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN3[] **Amendment of Pleadings, Leave of Court**

If a court concludes that a complaint should be dismissed, it must then decide whether to grant leave to amend. Under *Fed. R. Civ. P. 15(a)*, leave to amend shall be freely given when justice so requires, bearing in mind the underlying purpose of *Rule 15* is to facilitate decision on the merits, rather than on the pleadings or technicalities. Nonetheless, a district court may deny leave to amend a complaint due to undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, and futility of amendment.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

HN4[] **Sherman Act, Defenses**

See *15 U.S.C.S. § 15b*.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Governments > Legislation > Statute of Limitations > Time Limitations

HN5[] **Private Actions, State Regulation**

See *Cal. Bus. & Prof. Code § 16750.1*.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > State Regulation

Governments > Legislation > Statute of Limitations > Time Limitations

HN6[] **Trade Practices & Unfair Competition, State Regulation**

See *Cal. Bus. & Prof. Code § 17208*.

Governments > Legislation > Statute of Limitations > Time Limitations

HN7[] **Statute of Limitations, Time Limitations**

Under California law the general accrual rule is the last element rule, where a claim accrues when it is complete with all of its elements—those elements being wrongdoing, harm, and causation. The discovery rule is an exception to the common law accrual rule.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

HN8[] **Sherman Act, Defenses**

Generally, an antitrust cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business. This much is plain from the treble-damage statute itself. Each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act and that, as to those damages, the statute of limitations runs from the commission of the act. In antitrust actions governed by *15 U.S.C.S. § 15b*, the plaintiff's knowledge is generally irrelevant to accrual, which is determined according to the date on which injury occurs.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

HN9[] **Sherman Act, Defenses**

The U.S. Supreme Court and the U.S. Court of Appeals for the Ninth Circuit have clearly held that claims under the Sherman Act are subject to an injury rule, rather than a discovery rule.

Antitrust & Trade Law > Clayton Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

HN10[] **Clayton Act, Defenses**

The ordinary Clayton Act rule, applicable in private antitrust treble damages actions, is where a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business.

Antitrust & Trade Law > Procedural Matters

Governments > Legislation > Statute of Limitations > Time Limitations

HN11[] **Antitrust & Trade Law, Procedural Matters**

The U.S. Court of Appeals for the Ninth Circuit does not require a plaintiff to actually discover its antitrust claims before the statute of limitations begins to run.

Antitrust & Trade Law > Procedural Matters

Governments > Legislation > Statute of Limitations > Time Limitations

HN12[] Antitrust & Trade Law, Procedural Matters

Both the U.S. Court of Appeals for the Ninth Circuit and the U.S. Supreme Court have long assumed as a basic principle of ***antitrust law*** that antitrust claims accrue at the time of injury.

Antitrust & Trade Law > Procedural Matters

Governments > Legislation > Statute of Limitations > Time Limitations

HN13[] Antitrust & Trade Law, Procedural Matters

Clear U.S. Supreme Court authority and the overwhelming majority of circuits have explicitly held that antitrust claims are subject to a pure injury rule, not a discovery rule.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > State Regulation

Governments > Legislation > Statute of Limitations > Time Limitations

HN14[] Trade Practices & Unfair Competition, State Regulation

California's Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200 et seq.*, does not categorically forbid the application of the discovery rule under appropriate circumstances. The UCL is a chameleon. The discovery rule might be appropriate for misrepresentation or fraud claims, but not in unfair competition claims.

Antitrust & Trade Law > Procedural Matters

Governments > Legislation > Statute of Limitations > Extensions & Revivals

HN15[] Antitrust & Trade Law, Procedural Matters

Under the continuing violation doctrine, each overt act that is part of the antitrust violation and that injures the plaintiff starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier times. A continuing violation is one in which the plaintiff's interests are repeatedly invaded and a cause of action arises each time the plaintiff is injured. In the Ninth Circuit, an overt act restarts the statute of limitations if it: (1) is a new and independent act that is not merely a reaffirmation of a previous act; and (2) inflicts new and accumulating injury on the plaintiff.

Governments > Legislation > Statute of Limitations > Extensions & Revivals

HN16[] Statute of Limitations, Extensions & Revivals

A continuing violation is one in which the plaintiff's interests are repeatedly invaded and a cause of action arises each time the plaintiff is injured. However, even when a plaintiff alleges a continuing violation, an overt act by the defendant is required to restart the statute of limitations and the statute runs from the last overt act. Plaintiffs' bare allegation that their interests were repeatedly invaded is therefore insufficient as a matter of law. Rather, plaintiffs must plead that defendants engaged in an overt act, e.g., that defendants engaged in a new and independent act that is not merely a reaffirmation of a previous act, which inflicted new and accumulating injury on plaintiffs.

Governments > Legislation > Statute of Limitations > Extensions & Revivals

HN17[] **Statute of Limitations, Extensions & Revivals**

The continuing violations doctrine requires both continuing invasions of a plaintiff's interests and an overt act by the defendant.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Governments > Legislation > Statute of Limitations > Equitable Estoppel

Evidence > Burdens of Proof > Allocation

Governments > Legislation > Statute of Limitations > Tolling

HN18[] **Tolling of Statute of Limitations, Fraudulent Concealment**

A statute of limitations may be tolled if the defendant fraudulently concealed the existence of a cause of action in such a way that the plaintiff, acting as a reasonable person, did not know of its existence. The plaintiff bears the burden of pleading and proving fraudulent concealment. To plead fraudulent concealment, the plaintiff must allege that: (1) the defendant took affirmative acts to mislead the plaintiff; (2) the plaintiff did not have actual or constructive knowledge of the facts giving rise to its claim as a result of the defendant's affirmative acts; and (3) the plaintiff acted diligently in trying to uncover the facts giving rise to its claim. Moreover, allegations of fraudulent concealment must be pled with particularity.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Governments > Legislation > Statute of Limitations > Equitable Estoppel

Governments > Legislation > Statute of Limitations > Tolling

HN19[] **Tolling of Statute of Limitations, Fraudulent Concealment**

In the context of fraudulent concealment, the fact that a defendant's acts are by nature self-concealing is insufficient to show that the defendant has affirmatively misled the plaintiff as to the existence of the plaintiff's claim. Passive concealment of information is not enough to toll the statute of limitations, unless the defendant had a fiduciary duty to disclose information.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Governments > Legislation > Statute of Limitations > Equitable Estoppel

Governments > Legislation > Statute of Limitations > Tolling

HN20[] **Tolling of Statute of Limitations, Fraudulent Concealment**

Fraudulent concealment requires some affirmative acts of misconduct above and beyond the conduct inherent to the underlying claims themselves. The "above and beyond" language has been cited by the U.S. Court of Appeals for the Ninth Circuit approvingly in cases as an element of fraudulent concealment claims.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Governments > Legislation > Statute of Limitations > Equitable Estoppel

Governments > Legislation > Statute of Limitations > Tolling

HN21[] **Tolling of Statute of Limitations, Fraudulent Concealment**

In the context of fraudulent concealment, merely passively concealing material information is insufficient to toll the statute of limitations.

Opinion

[*1198] ORDER GRANTING DEFENDANTS' JOINT MOTION TO DISMISS

Re: Dkt. No. 75

Defendants DreamWorks Animation SKG, Inc.; The Walt Disney Company; Lucasfilm Ltd., LLC; Pixar; ImageMovers, LLC.; Two Pic MC LLC (f/k/a ImageMovers Digital); Sony Pictures Animation Inc.; Sony Pictures Imageworks Inc.; and Blue Sky Studios have filed a joint motion to dismiss the consolidated amended complaint. ("MTD"), ECF No. 75. Having considered the parties' submissions, the relevant law, and the record in this case, the Court GRANTS Defendants' motion.

I. BACKGROUND

This is a consolidated class action brought by former employees alleging antitrust claims against their former employers, various animation studios with principal places of business in California.[1] Plaintiffs contend that Defendants engaged in a conspiracy to fix and suppress employee compensation and to restrict employee mobility.

A. Factual Background

The Court draws the following factual background from the uncontroverted allegations in the Consolidated Amended Complaint ("CAC"), and from judicially noticed documents.[2] Unless otherwise **[*1199]** noted, Plaintiffs' allegations are presumed to be true for purposes of ruling on Defendants' motion to dismiss. *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

1. The Parties

Defendants include the following animation and visual effects studios: Blue Sky Studios, Inc. ("Blue Sky"), a Delaware corporation with its principal place of business in Greenwich, CT; DreamWorks Animation SKG, Inc. ("DreamWorks"), a Delaware corporation with its principal place of business in Glendale, CA; ImageMovers LLC, a

---

[1] Defendant Blue Sky Studios, Inc. has its principal place of business in Greenwich, CT, but Plaintiffs allege that it is owned by Twentieth Century Fox **[**4]** Film Corporation, which has its principal place of business in Los Angeles, California. Consol. Am. Compl. ("CAC"), ¶ 21.

[2] The Court grants Defendants' unopposed request for judicial notice, ECF No. 76, and has taken notice of the adjudicative facts contained therein. Defendants request that the Court take judicial notice of the Civil Investigative Demands issued by the Department of Justice; public records from the State of Delaware; the expert report of Edward E. Leamer, as filed in *In re High-Tech Antitrust Litig.*, Case No. 11-CV-2509-LHK, ECF No. 856-8; media articles regarding the DOJ investigation; and an advertisement published by Plaintiffs' counsel. *See United States ex rel. Robinson Rancheria Citizens Council v. Borneo, Inc., 971 F.2d 244, 248 (9th Cir. 1992)* (holding a court may take notice of proceedings in other courts); *Lee v. City of Los Angeles, 250 F.3d 668, 689—90 (9th Cir. 2001)* (matters of public record); *MGIC Indem. Co. v. Weisman, 803 F.2d 500, 505 (9th Cir. 1986)* (court records); ***Von Saher v. Norton Simon Museum of Art at Pasadena, 592 F.3d 954, 960 (9th Cir. 2010)***, *overruled on other grounds by Galbraith v. Cnty. of Santa Clara, 307 F.3d 1119, 1125—26 (9th Cir. 2002)* (media publications); *see also Fed. R. Evid. 201(d)*.

The Court grants Plaintiffs' unopposed **[**5]** request for judicial notice, ECF No. 97 at 37, and has taken notice of the adjudicative facts contained therein. Plaintiffs request that the Court take judicial notice of two sealing orders from the *High-Tech* litigation and a media report. *See Lee, 250 F.3d at 689—90*; ***Von Saher, 592 F.3d at 960***.

California corporation with its principal place of business in Los Angeles, CA; ImageMovers Digital LLC, a Delaware corporation with its principal place of business in Burbank, CA; Lucasfilm Ltd., LLC ("Lucasfilm"), a California corporation with its principal place of business in San Francisco, CA;[3] Pixar, a California corporation with its principal place of business in Emeryville, CA;[4] Sony Pictures Animation, Inc. and Sony Pictures Imageworks, Inc. (collectively, "the Sony Defendants"), California corporations with their principal places of business in Culver City, CA; and The Walt Disney Company ("Disney") **[**6]** is a Delaware corporation with its principal place of business in Burbank, CA.[5] CAC ¶¶ 21—29.

Plaintiffs Robert A. Nitsch, Jr., Georgia Cano, and David Wentworth (collectively, "Plaintiffs"), are artists and engineers that were previously employed by four of the named Defendants. *Id.* ¶¶ 18—20. Nitsch worked for Sony Picture Imageworks in 2004 and DreamWorks from 2007 to 2011. *Id.* ¶ 18. Cano worked for Walt Disney Feature Animation from 2004 to 2005, ImageMovers Digital in 2010, and at various other visual effects and animation studios. *Id.* ¶ 19. Wentworth worked at ImageMovers Digital from 2007 to 2010. *Id.* ¶ 20. Nitsch is a resident of Massachusetts, and Cano and Wentworth are residents of California. *Id.* ¶¶ 18—20.

Plaintiffs seek to represent the following class:

> All persons who worked at any time from 2004 to the present for Pixar, Lucasfilm, DreamWorks **[**7]** Animation, Walt Disney Animation Studios, Walt Disney Feature Animation, Blue Sky Studios, Digital Domain, ImageMovers Digital, Sony Pictures Animation or Sony Pictures Imageworks in the United States. Excluded from the Class are officers, directors, senior executives and personnel in the human resources and recruiting departments of the Defendants.

Id. ¶ 113.[6]

2. *In re High-Tech Employees Litigation* and the Department of Justice Investigation

There is significant factual overlap between Plaintiffs' allegations and the related action *In re High-Tech Employees Litigation*, No. 11-CV-02509-LHK, as well as the civil complaints filed by the Department of Justice ("DOJ") against several **[*1200]** Silicon Valley technology companies, Pixar, and Lucasfilm. As both the factual and procedural history of the related action, *In re High-Tech*, and the DOJ investigations and complaints are relevant to the substance **[**8]** of Defendants' motion to dismiss, the Court briefly summarizes the background of that litigation below.

From 2009 to 2010, the Antitrust Division of the DOJ investigated the employment and recruitment practices of various Silicon Valley technology companies, including Adobe Systems, Inc., Apple, Inc., Google, Inc., Intel Corp., and Intuit, Inc. *See* *In re High-Tech Employee Antitrust Litig., 856 F. Supp. 2d 1103, 1109 (N.D. Cal. 2012)*. In September of 2010, the DOJ then filed civil complaints against the above-mentioned technology companies, in addition to Pixar and Lucasfilm. *Id.* The DOJ filed its complaint against Adobe, Apple, Google, Intel, Intuit, and Pixar on September 24, 2010. *Id.* On December 21, 2010, the DOJ filed another complaint against Lucasfilm and Pixar. CAC ¶ 94. The defendants, including Pixar and Lucasfilm, stipulated to proposed final judgments in which they agreed that the DOJ's complaints had stated claims under federal ***antitrust law*** and agreed to be "enjoined from

---

[3] Plaintiffs aver that Industrial Light & Magic ("ILM") is a division of Lucasfilm.

[4] According to Plaintiffs, ILM, Lucasfilm, and Pixar have been owned by Defendant The Walt Disney Company since 2012. CAC ¶¶ 25—26.

[5] Disney also "oversees the operations of" Walt Disney Animation Studios, formerly known as Walt Disney Feature Animation. CAC ¶ 29.

[6] Plaintiffs also allege that "[t]he members of the Settlement Class under the September 20, 2013 Settlement Agreement with Pixar and Lucasfilm [in *High-Tech]* . . . do not bring in this complaint any claims against Pixar, Lucasfilm, and Disney that were released pursuant to the Settlement Agreement." *Id.* ¶ 114.

attempting to enter into, maintaining or enforcing any agreement with any other person or in any way refrain from . . . soliciting, cold calling, recruiting, or otherwise competing for employees of the other person. 856 F. Supp. 2d at 1109—10. (quoting Adobe Proposed Final Judgment at 5). The D.C. District Court entered the stipulated proposed **[**9]** final judgments in March and June of 2011. *Id.*

The *High-Tech* plaintiffs filed five separate state court actions between May and July of 2011. Following removal, transfer to San Jose to the undersigned judge, and consolidation, the *High-Tech* plaintiffs filed a consolidated amended complaint on September 13, 2011. *Id. at 1113*. In their complaint, the *High-Tech* plaintiffs alleged antitrust claims against their employers, claiming that the defendants had conspired "to fix and suppress employee compensation and to restrict employee mobility." *Id. at 1108*. More specifically, the *High-Tech* plaintiffs alleged a conspiracy comprised of "an interconnected web of express bilateral agreements." *Id. at 1110*. One agreement, the "Do Not Cold Call" agreement involved one company placing the names of the other company's employees on a "Do Not Cold Call" list and instructing its recruiters not to cold call the employees of the other company. *Id.* In addition to the "Do Not Cold Call" agreements, the *High-Tech* plaintiffs also alleged that Pixar and Lucasfilm, defendants in both *High-Tech* and the instant action, entered into express, written agreements to (1) not cold call each other's employees, (2) to notify the other company **[**10]** whenever making an offer to an employee of the other company, and (3) not to engage in "bidding wars." *Id. at 1111*.

3. Alleged Conspiracy in the Instant Action

Here, Plaintiffs allege that Defendants conspired to suppress compensation in two ways. First, Defendants allegedly entered into a scheme not to actively solicit each other's employees. CAC ¶ 41. Second, Defendants allegedly engaged in "collusive discussions concerning competitively sensitive compensation information and agreed upon compensation ranges," which would artificially limit compensation offered to Defendants' current and prospective employees. *Id.*

a. Anti-Solicitation Scheme

According to Plaintiffs, "Defendants agreed not to contact their coconspirators' employees to inform them of available positions unless that individual employee had applied for a job opening on his or her own **[*1201]** initiative." *Id.* ¶ 42. This solicitation, also known as "cold calling," is "a key competitive tool in a properly functioning labor market, especially for skilled labor." *Id.* ¶ 42. Plaintiffs aver that employees of competitor studios represent "one of the main pools of potential hires," and that employees of competitor studios that are not actively searching **[**11]** for new employment are "more likely to be among the most sought after employees." *Id.* ¶ 43. Hiring an employee from a competitor studio "can save costs and avoid risks." *Id.* Absent active solicitation, these employees are also difficult to reach. *Id.* Defendants' anti-solicitation scheme also allegedly included "notifying each other when an employee of one Defendant applied for a position with another Defendant, and agreeing to limit counteroffers in such situations." *Id.* ¶ 44. Moreover, Defendants allegedly "often refrained from hiring other Defendants' employees at all without the permission of the current employer," and would sometimes decline to make offers of employment to an unemployed prospective hire if that individual had an outstanding offer from another Defendant. *Id.* ¶ 45.

Pixar and Lucasfilm: According to Plaintiffs, "the roots of the conspiracy reach back to the mid-1980s," when George Lucas, the former Lucasfilm Chairman of the Board and CEO, sold Lucasfilm's "computer division" to Steve Jobs, who had recently left Apple. *Id.* ¶ 46. Jobs named his new company Pixar. *Id.* Pixar's President, Ed Catmull, Lucas, and "other senior executives, subsequently reached an agreement **[**12]** to restrain their competition for the skilled labor that worked for the two companies." *Id.* Pixar drafted the terms of the agreement, which both Defendants communicated to their senior executives and "select human resources and recruiting employees." *Id.* Lucas stated in an email that Pixar and Lucasfilm "have agreed that we want to avoid bidding wars," and that the agreement prevented the two companies from "raid[ing] each other's companies." *Id.* Pixar and Lucasfilm allegedly agreed to the following terms: (1) not to cold call each other's employees; (2) to notify each other when making an offer to the other company's employee; and (3) that any offer by the other company would be "final," i.e., neither Pixar nor Lucasfilm would engage in counteroffers. *Id.* ¶¶ 46—48 (citing internal Pixar email sent on January 16, 2006).

Plaintiffs further allege that while the conspiracy originated with Pixar and Lucasfilm, Catmull brought additional studios into the fold. *Id.* ¶ 49. In a 2005 email, then Vice President of Human Resources at Pixar, Lori McAdams, wrote "With regard to ILM, Sony, Blue Sky, etc., we have no contractual obligations, but we have a gentleman's agreement not to directly solicit/poach **[**13]** from their employee pool." *Id.* ¶ 50. Pixar also drafted an internal "competitors list" that "listed anti-solicitation rules for each of the Defendants . . . ." *Id.* According to Plaintiffs, Blue Sky, DreamWorks, ImageMovers Digital, Sony Pictures Imageworks, and Walt Disney Animation Studios were "all listed with directions not to 'recruit directly' or 'solicit or poach employees.'" *Id.* Plaintiffs' allegations as to each Defendants' alleged role and participation in the anti-solicitation scheme is detailed below.

DreamWorks: Jobs and DreamWorks CEO, Jeffrey Katzenberg, "personally discussed DreamWorks joining into the conspiracy." *Id.* ¶ 52. In a February 18, 2004 email from Catmull to Jobs, Catmull stated that the mutual agreement "worked quite well." *Id.* A January 14, 2007 email from Catmull to Disney's Chairman Dick Cook, also provided that "we have an agreement with Dreamworks not to actively pursue each other's employees." *Id.* In **[*1202]** further emails between Catmull, McAdams, and DreamWorks' head of human resources, Kathy Mandato, Pixar and DreamWorks reiterated their "non-poaching practices." *Id.* ¶ 53. When a Pixar recruiting email was sent to a DreamWorks employee, Mandato reached out **[**14]** to McAdams, and McAdams responded that she'd "put a stop to it!" *Id.* ¶ 54.

Disney: A 2005 Pixar email "confirmed that Pixar would not recruit workers out of Disney or other studios." *Id.* ¶ 56. In 2006, Disney purchased Pixar, and Catmull assumed responsibility for Walt Disney Animation Studios. *Id.* In communications between Disney Chairman Cook and Catmull, Cook agreed that "avoid[ing] raiding each other" was necessary to avoid "seriously mess[ing] up the pay structure." *Id.* Cook allegedly promised to "reaffirm our position again" with ImageMovers Digital, which Plaintiffs contend is a joint venture Disney launched with ImageMovers.[7] *Id.* In 2006, Disney's Director of Animation Resources apparently asked ILM, a division of Lucasfilm, to "observe 'the Gentlewomen's agreement'" that ILM not recruit Disney digital artists. *Id.* ¶ 57.

Sony Defendants: Beginning in 2002, Sony Pictures Imageworks expanded significantly by offering higher salaries to lure workers away from other studios. *Id.* ¶ 58. In response, Catmull allegedly met with Sony executives in person in 2004 or 2005 to "ask[] them to quit calling our employees." *Id.* ¶ 59. Plaintiffs allege that Catmull reached an agreement with Sony at that time that the companies would not directly solicit or poach from each other. *Id.* Moreover, Sony allegedly then began to "restrain its relatively higher-wage practices to levels below what would otherwise have existed in a competitive market." *Id.* ¶ 62.

Blue Sky Studios: Plaintiffs aver that Blue Sky "similarly entered the conspiracy," did not recruit from other studios, and requested that other studios not recruit from Blue Sky. *Id.* ¶ 63. In 2005, Blue Sky allegedly declined to pursue a DreamWorks employee that would have been "an amazing addition," because Blue Sky did not "want to be starting anything with [Katzenberg, the DreamWorks **[**16]** CEO] over one story guy." *Id.* Blue Sky's Director of Human Resources, Linda Zazza, also allegedly spoke with Pixar's McAdams to discuss "our sensitive issue of employee retention," and McAdams assured Blue Sky that Pixar was not attempting to poach Blue Sky employees. *Id.* ¶ 64.

---

[7] Defendants submit that Exhibit F in their request for judicial notice, consisting of Certificates of Corporate Formation and Amendment filed with the Secretary of State of the State of Delaware, Division of Corporations, disproves Plaintiffs' allegation that ImageMovers LLC was a party to the joint venture that created ImageMovers Digital. *See* ECF No. 76. Plaintiffs voluntarily dismissed ImageMovers LLC from this action after **[**15]** Defendants filed their motion to dismiss and request for judicial notice. Consequently, the Court concludes that ImageMovers' involvement in the purported joint venture is not relevant.

ImageMovers Defendants:[8] The ImageMovers Defendants allegedly also joined the conspiracy. Catmull wrote in a January 2007 email to Disney Chairman Cook that Catmull knew ImageMovers would "not target Pixar." *Id.* ¶ 65. Plaintiffs allege, however, that ImageMovers continued to recruit from other conspiring studios, including DreamWorks, by "offering higher salaries." *Id.* ¶ 66. Catmull then met with one of the founders of ImageMovers, Steve Starkey. Starkey allegedly told Catmull that ImageMovers had informed **[*1203]** Lucas that ImageMovers would "not raid ILM." *Id.* ¶ 67. Catmull then contacted Disney Studio's President, Alan Bergman, and Senior Vice President of Human Resources, Marjorie Randolph, requesting that they require the ImageMovers Defendants to comply with the anti-solicitation scheme. *Id.* ¶ 68. According to Plaintiffs, Randolph "responded that Disney had in fact gotten the ImageMovers Defendants to agree to the **[**17]** 'rules' of the anti-solicitation scheme." *Id.*

Digital Domain[9]: Digital Doman allegedly joined the conspiracy and had anti-solicitation agreements with "at least" DreamWorks, Lucasfilm/ILM and the Sony Defendants. *Id.* ¶ 69. According to Plaintiffs, starting in 2007, Digital Domain's Head of Human Resources was Lala Gavgavian, who had previously worked at Lucasfilm's ILM division "in senior roles in talent acquisition . . . during which time Pixar President Jim Morris explicitly informed her that Pixar and Lucasfilm" had an anti-solicitation/no-poaching agreement. *Id.* ¶ 70. Gavgavian and other senior personnel at Digital Domain allegedly "specifically instructed employees not to cold call or otherwise solicit other Defendants' employees." *Id.* ¶ 71.

As to all Defendants, Plaintiffs contend that Defendants "repeatedly sought to recruit" new studios into the scheme, including a small studio in 2008. *Id.* ¶ 72.

b. Compensation Ranges

In addition to the anti-solicitation scheme, **[**18]** Plaintiffs further allege that Defendants "directly communicated and met regularly to discuss and agree upon compensation ranges." *Id.* ¶ 74. According to Plaintiffs, Defendants met at least once a year in California at meetings organized by the Croner Company, a third-party that apparently collects industry-specific salary information. At the official meetings, the Defendants "set the parameters of a compensation survey" that "provides wage and salary ranges for the studios' technical or artistic positions, broken down by position and experience level." *Id.* ¶ 75. Senior human resources and recruiting personnel from DreamWorks, Pixar, Lucasfilm/ILM, Disney, ImageMovers Digital, the Sony Defendants, Blue Sky, and Digital Domain attended these survey meetings, in addition to other studios. *Id.* ¶ 76. Plaintiffs aver that Defendants used the Croner meetings to "go further than their matching of job positions across companies; they discussed, agreed upon and set wage and salary ranges during meals, drinks and other social gatherings that they held outside of the official Croner meetings." *Id.* ¶ 77. Defendants' human resources and recruiting personnel also allegedly held "side" meetings at **[**19]** the Siggraph conference, a major visual effects industry conference, which senior personnel from Blue Sky, Pixar, DreamWorks, Lucasfilm, and Sony Picture ImageWorks attended. *Id.* ¶ 79.

Defendants' Directors of Human Resources also allegedly "frequently sought to create new relationships when one of their counterparts was replaced at a co-conspirator to ensure the efficacy of communications about the conspiracy," and met with each other one-on-one "on many occasions." *Id.* ¶¶ 79—80. Plaintiffs further allege that Defendants regularly emailed each other with specific salary ranges. On May 13, 2005, DreamWorks requested that Disney provide salary information on three positions, and Disney promptly responded. *Id.* ¶ 81. The following **[*1204]** spring, DreamWorks also requested similar information from Pixar and Disney, and "made clear it was surveying multiple studios." *Id.* ¶ 82. On September 2, 2009, Blue Sky's Director of Human Resources requested salary range information from Pixar. *Id.* ¶ 83. In a 2007 email, DreamWorks' Head of Compensation explained that "we do sometimes share general comp information (ranges, practices) in order to maintain the relationships with other studios and to be able **[**20]** to ask for that kind of information ourselves when we need it." *Id.* ¶ 84.

---

[8] Plaintiffs dismissed ImageMovers LLC without prejudice pursuant to a tolling agreement on January 14, 2015. ECF No. 83.

[9] Plaintiffs also dismissed Digital Domain 3.0 without prejudice pursuant to a tolling agreement. *See* CAC at 16 n.3.

According to Plaintiffs, Defendants' communications regarding salary ranges were not limited to bilateral "one off" exchanges, but rather Defendants would "openly email[] each other in large groups with competitively sensitive confidential current and future compensation information." *Id.* ¶ 85. On November 17, 2006, Pixar's McAdams emailed senior human resources personnel at DreamWorks, Sony Pictures Imageworks, Lucas Film, Walt Disney Animation Studios, and others:

> Quick question from me, for those of you who can share the info.
> What is your salary increase budget for FY '07? Ours is [REDACTED] but we may manage it to closer to [REDACTED] on average. Are you doing anything close, more, or less?

Id. ¶ 86. In January 2009, DreamWorks' Head of Production Technology emailed the heads of human resources at Pixar, ILM, Sony Pictures Animation, and Disney to "learn how they handled overtime." More specifically, DreamWorks wanted to "see if the other companies were 'as generous.'" *Id.* ¶ 88.

Defendants' human resources and recruiting personnel also allegedly regularly communicated via telephone. *Id.* ¶ 89. Plaintiffs quote **[**21]** emails from Pixar's McAdams to Sony Pictures Imageworks, ILM, DreamWorks, Disney, and Blue Sky "in early 2007" stating "[c]hatting with all of you each day is really becoming a fun habit," and an email response from Walt Disney Animation Studios Vice President of Human Resources also commenting that "[i]t is fun to hear from you all on a daily basis." *Id.* ¶ 90.

As Plaintiffs describe it, the Croner survey meetings, side meetings, emails, and telephone calls "provided the means and opportunities for Defendants to collude and to implement and enforce the conspiracy to suppress workers' compensation." *Id.* ¶ 91. Plaintiffs further allege that while press reports in 2009 noted that the DOJ was investigating anti-solicitation agreements among high-tech companies, including Google and Apple, there was no indication that the DOJ was also investigating Pixar, Lucasfilm, or any other animation company. *Id.* ¶ 95. Plaintiffs aver that September 17, 2010 marked the first news story naming Pixar as a company under investigation, but that there was no public disclosure that any other Defendant in the instant action was part of the conspiracy. *Id.* According to Plaintiffs, Lucasfilm was implicated in the Pixar investigation **[**22]** in December 2010, but until the Court unsealed certain filings in the *High-Tech* case, there was no public information that the other Defendants in this action had engaged in similar conduct. *Id.*

4. Claims

Plaintiffs' CAC contains three claims for relief under the following statutes: (1) *Section 1* of the Sherman Act, *15 U.S.C. § 1*; (2) California's Cartwright Act, *Cal. Bus. & Prof. Code § 16720*; and (3) California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code §§ 17200 et seq.* Plaintiffs seek damages, pre- and post-judgment interest, attorney's fees and expenses, and a permanent injunction. *Id.* ¶ 147.

[*1205] B. Procedural Background

In light of the relationship between the instant case and the *High-Tech* case, the Court briefly summarizes the relevant procedural history in *High-Tech* in addition to the instant case.

1. *High-Tech* Procedural Background

The *High-Tech* defendants removed the first state-court action on May 23, 2011. No. 11-2509, ECF No. 1. On April 18, 2012, the Court granted in part and denied in part the *High-Tech* defendants' joint motion to dismiss and denied Lucasfilm's motion to dismiss. No. 11-2509, ECF No. 119. On April 5, 2013, the Court granted in part and denied in part the *High-Tech* plaintiffs' motion for class certification with leave to amend. No. **[**23]** 11-2509, ECF No. 382. The Court granted the *High-Tech* plaintiffs' supplemental motion for class certification on October 24, 2013. No. 11-2509, ECF No. 531. On November 13, 2013, the *High-Tech* defendants filed a Rule 23(f) petition before the Ninth

Circuit, requesting permission to appeal this Court's October 24, 2013 class certification order. No. 13-80223, ECF No. 1. The Ninth Circuit denied the defendants' petition on January 14, 2014. No. 13-80223, ECF No. 18.

In the interim, three of the *High-Tech* defendants, Intuit, Lucasfilm, and Pixar, reached an early settlement with the plaintiffs. On September 21, 2013, the *High-Tech* plaintiffs filed a motion for preliminary approval of a proposed class action settlement as to defendants Intuit, Lucasfilm, and Pixar. No. 11-2509, ECF No. 501. On October 30, 2013, the Court preliminarily approved the proposed settlement with Intuit, Lucasfilm, and Pixar. No. 11-2509, ECF No. 540. The Court granted final approval as to that settlement on May 16, 2014. No. 11-2509, ECF No. 915. The Court entered a final judgment with regards to Lucasfilm, Pixar, and Intuit on June 9, 2014. No. 11-2509, ECF No. 936. At the request of Intuit, the Court entered an amended **[**24]** final judgment on June 20, 2014. No. 11-2509, ECF No. 947.

The remaining *High-Tech* defendants, Adobe, Apple, Google, and Intel, filed individual motions for summary judgment, and joint motions for summary judgment and to strike certain expert testimony on January 9, 2014. No. 11-2509, ECF Nos. 554 (Intel), 556—57 (joint motions), 560 (Adobe), 561 (Apple), 564 (Google). The Court denied the *High-Tech* defendants' individual motions for summary judgment on March 28, 2014. No. 11-2509, ECF No. 771. On April 4, 2014, the Court granted in part and denied in part the *High-Tech* defendants' motion to strike, and denied the defendants' joint motion for summary judgment. No. 11-2509, ECF No. 778.

On May 22, 2014, the *High-Tech* plaintiffs filed a motion for preliminary approval of class action settlement as to the remaining defendants. No. 11-2509, ECF No. 920. On August 8, 2014, the Court denied the *High-Tech* plaintiffs' motion for preliminary approval, concluding that the proposed settlement did not fall "within the range of reasonableness." No. 11-2509, ECF No. 974, at 30. On September 4, 2014, the *High-Tech* defendants filed a petition for a writ of mandamus with the Ninth Circuit. No. 14-72745, **[**25]** ECF No. 1. On January 13, 2015, the *High-Tech* defendants filed correspondence with the Ninth Circuit referring to a new proposed settlement agreement. No. 14-72745, ECF No. 21. On January 30, 2015, the defendants filed an unopposed motion to dismiss the petition, which the Ninth Circuit granted on February 2, 2015. No. 14-72745, ECF Nos. 23, 24.

On January 15, 2015, the *High-Tech* plaintiffs filed a motion for preliminary **[*1206]** approval of class action settlement as to the remaining defendants. No. 11-2509, ECF No. 1032. In this second proposed class action settlement, the parties had reached a settlement amount exceeding the previously rejected settlement by approximately $90.5 million dollars. *Id.* at 1. Following a fairness hearing on March 2, 2015, the Court granted preliminary approval to the January 2015 settlement agreement on March 3, 2015. No. 11-1509, ECF Nos. 1051, 1054. A final approval hearing is scheduled for July 9, 2015.

2. Procedural Background in the Instant Action

Plaintiff Nitsch filed the first complaint against all Defendants but Blue Sky on September 8, 2014. ECF No. 1. The Court related Nitsch's action to *In re High-Tech Employee Antitrust Litigation*, No. 11-2509, on September **[**26]** 23, 2014. Plaintiff Cano filed the second complaint against all Defendants on September 17, 2014, which the Court related to *High-Tech* on October 7, 2014. *See* Case No. 14- 4203, ECF Nos. 1, 9. Plaintiff Wentworth filed the third complaint against all Defendants but Blue Sky on October 2, 2014, which the Court related to *High-Tech* on October 28, 2014. *See* Case No. 14-4422, ECF Nos. 1, 26. On November 5, 2014, the Court granted Plaintiffs' motion to consolidate the above-mentioned three cases into a single action, *In re Animation Workers Antitrust Litigation. See* Case No. 14-4062, ECF No. 38.

Pursuant to the Court's case management order, Plaintiffs filed their CAC on December 2, 2014. ECF No. 63. On January 9, 2015, Defendants filed the instant joint motion to dismiss, and a request for judicial notice. ECF Nos. 75, 76. Defendants also filed an administrative motion to seal exhibits in support of their motion to dismiss. ECF No. 79. Plaintiffs filed a timely opposition, ECF No. 97, and Defendants replied, ECF No. 100.

Also pending before the Court is Defendants' January 9, 2015, motion to compel arbitration. ECF No. 71. As that motion is set for hearing on April 23, 2015, the Court does **[**27]** not address that motion in the instant order.

II. LEGAL STANDARD

A. *Rule 12(b)(6)*

HN1[] Under *Federal Rule of Civil Procedure 12(b)(6)*, a party may move to dismiss a complaint for failure to state a claim upon which relief can be granted. Such a motion tests the legal sufficiency of a complaint. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. In considering whether the complaint is sufficient, the Court must accept as true all of the factual allegations contained in the complaint. *Iqbal, 556 U.S. at 678*. However, the Court need not accept as true "allegations that contradict matters properly subject to judicial notice or by exhibit" or "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)* (citation omitted). While a complaint need not allege detailed factual allegations, it "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted **[*1207]** unlawfully." *Iqbal, 556 U.S. at 678* (internal citation omitted). **[**28]**

B. *Rule 9(b)*

HN2[] Claims sounding in fraud or mistake are subject to the heightened pleading requirements of *Federal Rule of Civil Procedure 9(b)*, which require that a plaintiff alleging fraud "must state with particularity the circumstances constituting fraud." *Fed. R. Civ. P. 9(b)*; *see* *Kearns v. Ford Motor Co., 567 F.3d 1120, 1124 (9th Cir. 2009)*. To satisfy the heightened standard under *Rule 9(b)*, the allegations must be "specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong." *Semegen v. Weidner, 780 F.2d 727, 731 (9th Cir. 1985)*. Thus, claims sounding in fraud must allege "an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations." *Swartz v. KPMG LLP, 476 F.3d 756, 764 (9th Cir. 2007)* (per curiam) (internal quotation marks and citation omitted). A plaintiff must set forth what is false or misleading about a statement, and why it is false." *In re GlenFed, Inc. Sec. Litig., 42 F.3d 1541, 1548 (9th Cir. 1994)* (en banc), *superseded by statute on other grounds as stated in* *Marksman Partners, L.P. v. Chantal Pharm. Corp., 927 F. Supp. 1297, 1309 (C.D. Cal. 1996)*. However, "intent, knowledge, and other conditions of a person's mind" need not be stated with particularity, and "may be alleged generally." *Fed. R. Civ. P. 9(b)*.

C. Leave to Amend

HN3[] If the court concludes that the complaint should be dismissed, it must then decide whether to grant leave to amend. **[**29]** Under *Rule 15(a) of the Federal Rules of Civil Procedure*, leave to amend "shall be freely given when justice so requires," bearing in mind "the underlying purpose of *Rule 15* . . . [is] to facilitate decision on the merits, rather than on the pleadings or technicalities." *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)* (en banc) (internal quotation marks and citation omitted). Nonetheless, a district court may deny leave to amend a complaint due to "undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, [and] futility of amendment." *See* *Leadsinger, Inc. v. BMG Music Publ'g, 512 F.3d 522, 532 (9th Cir. 2008)*.

III. DISCUSSION

Defendants move to dismiss on the following grounds: that (1) Plaintiffs' claims are barred under the relevant statutes of limitations; (2) Plaintiffs fail to sufficiently allege a *per se* antitrust claim based on wage-fixing agreements; (3) Plaintiffs fail to state plausible claims against Blue Sky, the Sony Defendants, and the ImageMovers Defendants; (4) Plaintiffs' requested remedies are not unavailable under the UCL; and (5) Plaintiffs lack standing to seek injunctive relief. The Court begins by addressing whether Plaintiffs' claims are time barred.

A. Statute of Limitations [30]**

In the instant case, Defendants contend that Plaintiffs' claims are time barred. The parties agree that Plaintiffs' claims are subject to a four year statute of limitations. The parties dispute when Plaintiffs' claims accrued, whether Plaintiffs have adequately alleged a continuing violation, and whether Plaintiffs have sufficiently alleged fraudulent concealment so as to toll the statute of limitations.

[*1208] As a threshold matter, the Court agrees that Plaintiffs' claims under the Sherman Act, Cartwright Act, and UCL are all subject to a four year statute of limitations. *See* *15 U.S.C. § 15b* (Sherman Act); *Cal. Bus. & Prof. Code § 16750.1* (Cartwright Act); *Cal. Bus. & Prof. Code § 17208* (UCL). The statute of limitations provision in the Sherman Act provides:

> ***HN4***[] Any action to enforce any cause of action under section 15, 15a, or 15c of this title shall be forever barred unless commenced within four years after the cause of action accrued. No cause of action barred under existing law on the effective date of this Act shall be revived by this Act.

15 U.S.C. § 15b. The statute of limitations provision under California's Cartwright Act is functionally identical:

> ***HN5***[] Any civil action to enforce any cause of action for a violation of this chapter shall be commenced within four years after the cause of action accrued. **[**31]** No cause of action barred under existing law on the effective date of the amendment of this section at the 1977-78 Regular Session of the Legislature shall be revived by such amendment.

Cal. Bus. & Prof. Code § 16750.1. California's UCL similarly provides for a four-year statute of limitations:

> ***HN6***[] Any action to enforce any cause of action pursuant to this chapter shall be commenced within four years after the cause of action accrued. No cause of action barred under existing law on the effective date of this section shall be revived by its enactment.

Cal. Bus. & Prof. Code § 17208 (UCL). The Court begins by addressing the accrual rule applicable to Plaintiffs' Sherman Act claim, which the parties do not dispute would also apply to Plaintiffs' Cartwright Act claim.[10] *See* MTD at 4; Opp. at 10 n.36. The Court then addresses Plaintiffs' UCL claim.

1. Accrual Rule

---

[10] As Defendants note, ***HN7***[] under California law the general accrual rule is the "last element rule," where a claim accrues "'when [it] is complete with all of its elements'—those elements being wrongdoing, harm, and causation." *Pooshs v. Philip Morris USA, Inc., 51 Cal. 4th 788, 797, 123 Cal. Rptr. 3d 578, 250 P.3d 181 (2011)* (quoting *Norgart v. Upjohn Co., 21 Cal. 4th 383, 397, 87 Cal. Rptr. 2d 453, 981 P.2d 79 (1999))*. The "discovery rule" is an exception to the common law accrual rule. *Id.* In light of the fact that the discovery rule is an exception and not the default rule, the *Aryeh* court's holding that federal interpretation **[**32]** of the Sherman Act is instructive in interpreting the Cartwright Act, and the absence of any contrary argument from Plaintiffs, the Court focuses on the Sherman Act to resolve whether both Plaintiffs' Sherman and Cartwright Act claims are time barred. *See* *Aryeh v. Canon Bus. Solutions, Inc., 55 Cal. 4th 1185, 1196, 151 Cal. Rptr. 3d 827, 292 P.3d 871 (2013)*. Moreover, as stated above, the parties do not dispute that resolution of Plaintiffs' Sherman Act claim would also resolve Plaintiffs' Cartwright Act claim.

As an initial matter, the parties dispute whether Plaintiffs' claims accrued at the time of Plaintiffs' injuries (the "injury rule") or at the time that Plaintiffs discovered, or reasonably should have discovered their injuries (the "discovery rule"). Under controlling Supreme Court and Ninth Circuit authority, Plaintiffs' antitrust claims began to accrue at the time of injury.

> ***HN8***[] Generally, [an antitrust cause] of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business. . . . This much is plain from the treble-damage statute itself. . . . [E]ach time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act and that, as to those damages, the statute **[**33]** of **[*1209]** limitations runs from the commission of the act.

Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971); *see also* P. Areeda and H. Hovencamp, ***Antitrust Law*** ¶ 320a—b. As the Ninth Circuit explained in *Beneficial Standard Life Insurance Co. v. Madariaga, 851 F.2d 271, 274—75 (9th Cir. 1988)*, "In [antitrust] actions governed by *15 U.S.C. § 15b*, the plaintiff's knowledge is generally irrelevant to accrual, which is determined according to the date on which injury occurs."

While Plaintiffs are correct that some of the authorities Defendants cite are discussing accrual rules in the civil RICO context, the Court concludes that ***HN9***[] the U.S. Supreme Court and Ninth Circuit have clearly held that claims under the Sherman Act are subject to an injury rule, rather than a discovery rule. For example, although *Klehr v. A.O Smith Corp., 521 U.S. 179, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)*, addressed accrual rules in the civil RICO context, the *Klehr* Court explicitly noted that ***HN10***[] "the ordinary Clayton Act rule, applicable in private antitrust treble damages actions, [is where] a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business." *Id. at 188*. The *Klehr* Court explicitly distinguished the "pure injury accrual rule . . . [as] it applies in traditional antitrust cases," from the possible discovery accrual rules in the civil RICO context. *See id.; see also id. at 191* ("The use of a **[**34]** discovery rule may reflect the fact that a high percentage of civil RICO cases, unlike typical antitrust cases, involve fraud claims."). If there were any remaining doubts, Justice Scalia's concurrence in *Klehr* explicitly listed the potential accrual rules to be applied in RICO cases: "last predicate act, injury discovery, and injury and pattern discovery . . . [and] the fourth accrual rule—the Clayton Act 'injury' rule." *Id. at 197 n.1* (Scalia, J., concurring in part and concurring in the judgment).

Plaintiffs also take issue with Defendants' reliance on *Hexcel Corp. v. Ineos Polymers, Inc., 681 F.3d 1055 (9th Cir. 2012)*. Plaintiffs contend that the Ninth Circuit did not apply an injury rule, but rather addressed whether the plaintiff had sufficient actual or constructive knowledge of its injuries so as to defeat its fraudulent concealment claim. *Id. at 1060—61*. What Plaintiffs fail to recognize, however, is that the Ninth Circuit began with the basic statement of law: ***HN11***[] "We do not require a plaintiff to actually discover its antitrust claims before the statute of limitations begins to run." *Id. at 1060* (citing *Beneficial Life Ins., 851 F.2d at 274—75*). Plaintiffs may be correct in a hypertechnical sense that Defendants cite no Ninth Circuit authority explicitly "rejecting" the discovery rule for antitrust **[**35]** claims, but that appears to be a function of the fact that the Ninth Circuit has consistently interpreted *15 U.S.C. § 15b* as requiring an injury rule since 1950. *See* *Suckow Borax Mines Consol. v. Borax Consol., 185 F.2d 196, 208 (9th Cir. 1950)* (cited approvingly in *Zenith, 401 U.S. at 338*). Simply put, ***HN12***[] both the Ninth Circuit and the U.S. Supreme Court have long assumed as a basic principle of ***antitrust law*** that antitrust claims accrue at the time of injury. In light of that established assumption, there has been no need for the Ninth Circuit to explain why a different accrual rule does not apply.

Plaintiffs' reliance on the general proposition that "in general, the discovery rule applies to statutes of limitations in federal litigation," is unavailing. *See* Opp. at 6 (quoting *Mangum v. Action Collection Serv., Inc., 575 F.3d 935, 940 (9th Cir.* ***[*1210]*** *2009))*. In light of explicit, longstanding U.S. Supreme Court and Ninth Circuit authority specifically holding that antitrust claims accrue at the time of injury, the Court declines to rely on general policy justifications for the discovery rule. Moreover, while the Seventh Circuit may have applied the discovery rule to antitrust claims in *In re Copper Antitrust Litigation, 436 F.3d 782 (7th Cir. 2006)*, this Court is bound by contrary Ninth Circuit authority. Insofar as Plaintiffs contend that the Ninth Circuit has not directly rejected the discovery rule, the Court further concludes that ***HN13***[] clear U.S. Supreme **[**36]** Court authority and the overwhelming majority of Circuits have explicitly held that antitrust claims are subject to a pure injury rule, not a discovery rule. *See* [Johnson v. Nyack Hosp., 86 F.3d 8, 11 (2d Cir. 1996)](#) ("An antitrust cause of action accrues as soon as there is injury to competition."); [Mathews v. Kidder, Peabody & Co., Inc., 260 F.3d 239, 246 n.8 (3d Cir. 2001)](#) ("[A]ntitrust claims are subject to the less plaintiff-friendly 'injury occurrence' accrual rule" as opposed to "a more lenient 'injury discovery' rule"); [Detrick v. Panalpina, Inc., 108 F.3d 529, 538 (4th Cir. 1997)](#) (agreeing that "under the antitrust accrual rule, the statute of limitations is triggered by the date of the injury alone"); [Bell v. Dow Chem. Co., 847 F.2d 1179, 1186 (5th Cir. 1988)](#) ("The general rule in our Circuit is that an antitrust cause of action accrues each time a defendant commits an act that injures plaintiff."); [DXS, Inc. v. Siemens Med. Sys., Inc., 100 F.3d 462, 467 (6th Cir. 1996)](#) (holding that "[f]or statute of limitations purposes . . . the focus is on the timing of the causes of injury . . .") (internal quotation marks omitted); [Granite Falls Bank v. Henrikson, 924 F.2d 150, 153 (8th Cir. 1991)](#) ("[A]ccrual in antitrust actions depends on the commission of the defendant's injurious act rather than on the plaintiff's knowledge of that act or the resulting injury . . . ."), *disapproved on other grounds by* [Rotella v. Wood, 528 U.S. 549, 120 S. Ct. 1075, 145 L. Ed. 2d 1047 (2000)](#); [Robert L. Kroenlein Trust ex rel. Alden v. Kirchhefer, 764 F.3d 1268, 1276 (10th Cir. 2014)](#) (noting that "the Clayton Act . . . employs the injury-occurrence rule" as opposed to the "the injury-discovery rule"); [Connors v. Hallmark & Son Coal Co., 935 F.2d 336, 342 n.10, 290 U.S. App. D.C. 170 (D.C. Cir. 1991)](#) ("[I]n the area of antitrust, . . . the Supreme Court has **[**37]** held, as a matter of statutory interpretation, that a cause of action accrues at the time of injury.").

Plaintiffs also rely on a recent decision from this District, [Fenerjian v. Nongshim Co., Ltd., No. 13-CV-04115-WHO, 72 F. Supp. 3d 1058, 2014 U.S. Dist. LEXIS 156229, 2014 WL 5685562 (N.D. Cal. Nov. 4, 2014)](#). While the *Fenerjian* court applied the discovery rule to Sherman Act claims, for the reasons stated above, this Court respectfully disagrees. In *Fenerjian*, the parties *did not dispute* that the discovery rule applied to Sherman Act claims, and the *Fenerjian* court therefore did not have the benefit of briefing on the question. *See* [2014 U.S. Dist. LEXIS 156229, 2015 WL 585562, at *12 n.27](#) ("Defendants do not dispute that the 'discovery rule' or fraudulent concealment are available to toll [the antitrust] statutes of limitation."). In the instant case, the Court agrees with Defendants that Plaintiffs' antitrust claims began to accrue at the time Plaintiffs suffered their injury, regardless of whether or not Plaintiffs knew of their injury at the time it occurred.

Moreover, the Court also concludes that Plaintiffs' UCL claim based on Defendants' alleged anticompetitive conduct also began to accrue at the time Plaintiffs suffered their injury. Plaintiffs assert that the discovery rule applies as a matter of law to their UCL claim under **[**38]** **[*1211]** [Aryeh v. Canon Bus. Solutions, Inc., 55 Cal. 4th 1185, 1196, 151 Cal. Rptr. 3d 827, 292 P.3d 871 (2013)](#). However, the Court agrees with Defendants that Plaintiffs mischaracterize the breadth of *Aryeh*. The *Aryeh* court held only that **HN14**[] the UCL does not categorically *forbid* the application of the discovery rule under appropriate circumstances, not that the UCL requires application of the discovery rule to every cause of action.[11] *See* [id. at 1196—97](#). More specifically, the *Aryeh* court explained that the "UCL is a chameleon," and that the discovery rule might be appropriate for misrepresentation or fraud claims, but not in unfair competition claims. *See id.* (citing approvingly [M&F Fishing, Inc. v. Sea-Pac Ins. Managers, Inc. 202 Cal. App. 4th 1509, 1531—32, 136 Cal. Rptr. 3d 788 (Ct. App. 2012)](#) (nature of UCL unfair competition claim rendered discovery rule inappropriate)). As Plaintiffs' UCL claim here is based purely on Defendants' alleged anticompetitive conduct, the Court concludes that Plaintiffs' UCL claim is also subject to the injury rule.

Here, Plaintiffs' claims began to accrue as early as 2004—05, when Plaintiff Cano worked for Defendant Disney and Plaintiff Nitsch worked for Sony. *See* CAC ¶¶ 19, 49—50, 56—57. At the latest, Plaintiffs' claims began to accrue in 2007 when Plaintiff Nitsch worked for DreamWorks and Plaintiff Wentworth worked at ImageMovers

---

[11] Plaintiffs cite this Court's order in [Plumlee v. Pfizer, No. 13-CV-414-LHK, 2014 U.S. Dist. LEXIS 23172, 2014 WL 695024, at *8 (N.D. Cal. Feb. 21, 2014)](#), for the proposition that the delayed discovery rule applies to UCL claims as a matter of law. However, the UCL claims at issue in *Plumlee* were based on alleged fraudulent misrepresentations to consumers, precisely the type of UCL claim the *Aryeh* court recognized might be subject to the delayed discovery rule. **[**39]** *See* [Aryeh, 55 Cal. 4th at 1195—96](#). Thus in the fraud context, the Court observed that under *Aryeh*, the delayed discovery rule was "*available* to toll the statute of limitations" for a UCL claim. The Court did not hold that the discovery rule applied to all UCL claims. *See* [2014 U.S. Dist. LEXIS 23172, [WL] at *8 n.6](#) (emphasis added).

Digital. *Id.* ¶¶ 18, 20. As a result, the four-year statute of limitations ran on Plaintiffs' claims as early as 2008, and at best in 2011. The Court therefore concludes that Plaintiffs' claims are time barred absent sufficient allegations that Defendants engaged in "continuing violations" after September 8, 2010, i.e., four years prior to the first-filed complaint in this consolidated action, or that Defendants' fraudulent concealment should toll the statute of limitations.[12]

2. Continuing Violations

Plaintiffs contend that even if the injury rule applies to antitrust claims, Plaintiffs have alleged that Defendants engaged in "continuing violations," that would render Plaintiffs' claims timely. Defendants argue that Plaintiffs have failed to allege that Defendants took any "overt acts" that would restart the statute of limitations. According to Defendants, Plaintiffs' allegations are both insufficient under *Twombly* and also implausible in light of the 2009 DOJ investigation and 2011 stipulated final judgments.

HN15[] Under the "continuing violation" doctrine, "each overt act that is part of the [antitrust] violation and that injures the plaintiff . . . starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier times." *Klehr, 521 U.S. at 189* (internal citations and quotations omitted); *Pace Indus. v. Three Phoenix **[*1212]** Co., 813 F.2d 234, 237 (9th Cir. 1987)* ("A continuing violation is one in which the plaintiff's interests are repeatedly invaded and a cause of action arises each time the plaintiff is injured."). In the Ninth Circuit, an overt act restarts the statute of limitations if it: (1) is "a new and independent act **[**41]** that is not merely a reaffirmation of a previous act"; and (2) "inflict[s] new and accumulating injury on the plaintiff." *Pace, 813 F.2d at 237*; *see also* *Samsung Elecs. Co., Ltd. v. Panasonic Corp., 747 F.3d 1199, 1202—03 (9th Cir. 2014)*.

Here, the Court concludes that the bald assertion that "Defendants repeatedly invaded Plaintiffs' . . . interests," is insufficient to show a continuing violation. *See* CAC ¶ 123. Plaintiffs allege that "Defendants' conspiracy was a continuing violation in which Defendants repeatedly invaded Plaintiffs' and class members' interest by adhering to, enforcing and reaffirming the anticompetitive agreements described herein." CAC ¶ 123. A review of the specific factual allegations in Plaintiffs' CAC, however, reveals no alleged wrongful communications or specific conduct during the limitations period. The Court observes the rather conspicuous absence of specific dates for many of Plaintiffs' factual allegations, but those allegations that do contain specific dates all pre-date 2009, with the vast majority occurring between 2004 and 2007. *See* CAC ¶¶ 4—7, 12—14, 48, 50, 52—73, 78, 82, 84—86, 90 (2004—2007 communications and conduct); *id.* ¶ 83 (September 2, 2009 email); *id.* ¶ 88 (January 2009 email). Plaintiffs do not allege that any Defendant abided by, attempted to enforce, **[**42]** or otherwise "reaffirmed" the anti-solicitation scheme or salary range setting on or after September 8, 2010, i.e., four years prior to the first-filed complaint in this consolidated action. There are no allegations of any new or independent actions taken by the Defendants after September 8, 2010 that caused Plaintiffs any new or accumulating injury. *See* *Pace, 813 F.2d at 237*. Plaintiffs fail to allege any new or accumulating injuries within the limitation period. The remainder of Plaintiffs' allegations in the "Statute of Limitations" portion of the CAC focus on Plaintiffs' fraudulent concealment claim. *See* CAC ¶¶ 124—32.

In opposition, Plaintiffs appear to concede that the CAC lacks factual allegations that Defendants engaged in any new and independent wrongful conduct after September 8, 2010, but instead rely on a price-fixing analogy. *See* Opp. at 20—21. Plaintiffs put forward the novel theory that because they entered into employment agreements with Defendants during the alleged conspiracy, and because Plaintiffs received artificially depressed compensation as a result, Plaintiffs suffered antitrust injury each time they received "price-fixed" compensation. As Plaintiff Nitsch worked for DreamWorks through 2011, **[**43]** Plaintiffs' theory is that Nitsch continued to be injured through 2011. According to Plaintiffs, their injuries are no different than consumers who suffer antitrust injury when purchasing artificially higher priced goods as a result of a price-fixing conspiracy. *Id.*

[12] The Court notes that Defendants contend that Blue Sky was not named in the first-filed complaint, the *Nitsch* complaint, but rather **[**40]** was only named on September 17, 2014 in the *Wentworth* complaint. *See* MTD at 4 n.3.

However, the Court is not persuaded that Plaintiffs' "price-fixed compensation" theory, as put forth in Plaintiffs' opposition, satisfies the "overt act" requirement. As a threshold matter, Plaintiffs need to do more than merely allege a continuing violation—they must also allege an overt act:

> ***HN16***[] A continuing violation is one in which the plaintiff's interests are repeatedly invaded and a cause of action arises each time the plaintiff is injured. *However, even when a plaintiff alleges a continuing violation, an overt act by the defendant is required* to restart the statute of **[*1213]** limitations and the statute runs from the last overt act.

Pace, 813 F.2d at 237 (emphasis added). Plaintiffs' bare allegation that their interests were "repeatedly invaded" is therefore insufficient as a matter of law. Rather, Plaintiffs must plead that Defendants engaged in an overt act, e.g., that Defendants engaged in a "new and independent act that is not merely a reaffirmation **[**44]** of a previous act," which "inflict[ed] new and accumulating injury" on Plaintiffs. *Id. at 238*.

Here, even assuming that Plaintiff's "price-fixed" compensation theory is viable, the Court concludes that Plaintiffs have failed to sufficiently allege that Defendants took any overt act that would restart the statute of limitations. Plaintiffs do not allege that their compensation was permanently depressed or otherwise continued to be affected by Defendants' wrongful conduct, which allegedly took place from 2004 to, at best, 2009. In other words, while Plaintiffs may have sufficiently pled facts showing Defendants' wrongful conduct from 2004 to 2009 prevented employees from receiving higher pay during that period of time, Plaintiffs have not pled any facts showing that Defendants continued to engage in the wrongful conduct which would have resulted in "artificially depressed compensation" on or after September 8, 2010. While Plaintiffs are correct that the Court generally takes as true factual allegations made in the complaint, *see* *Iqbal, 556 U.S. 678*, Plaintiffs have failed to allege any facts showing that their compensation was at all impacted at any point after September 8, 2010. This is unsurprising in light of Plaintiffs' **[**45]** failure to allege any wrongful conduct post-2009.

To be clear, the Court does not rely on Defendants' arguments regarding the plausibility of Plaintiffs' factual allegations. For instance, Defendants' reliance on the fact that the DOJ chose not to bring complaints against certain Defendants is irrelevant on a motion to dismiss, as that goes to the weight and veracity of Plaintiffs' factual allegations. *See* *Iqbal, 556 U.S. at 678*. Nor does the fact that an expert in *High-Tech* assumed that the anti-solicitation agreements at issue in that litigation stopped affecting wages in 2010 affect the adequacy of Plaintiffs' allegations in the instant case. *See* MTD at 8 n.6. Whether or not Defendants continued to engage in anticompetitive behavior in the four year period preceding the filing of the first complaint in this action is a factual question that the Court does not resolve on a motion to dismiss. Rather, the Court concludes that Plaintiffs have failed to state any such allegations in the first instance. In opposition, Plaintiffs rely on a single paragraph in the CAC, where Plaintiffs allege: "Nor did DreamWorks make any changes to its practices in the wake of the entrance of the Lucasfilm consent decree in 2011 that might **[**46]** have alerted its workers to the company's prior misconduct." CAC ¶ 129. Even construing this allegation broadly, the Court concludes this allegation has nothing to do with whether DreamWorks, or any other Defendant, continued to engage in anticompetitive behavior within the limitations period.

Furthermore, Plaintiffs cite *Oliver v. SD-3C LLC, 751 F.3d 1081, 1086—87 (9th Cir. 2014)*, in support of their price-fixing analogy, but that case is distinguishable. As *Oliver* relied on the factual background of the related case *Samsung Electronics Co., Ltd. v. Panasonic Corp., 747 F.3d at 1201—02*, the Court also relies on *Samsung*. In both *Oliver* and *Samsung*, the price-fixing conspiracy involved a group of defendants that had adopted two license agreements, in 2003 and 2006, which imposed **[*1214]** royalties on non-group member manufacturers of flash memory storage cards ("SD cards"). *Id.* Subsequently, in late 2006, the defendants attempted to enforce the royalty term on the plaintiff, a non-group member. *Id.* In *Samsung*, the Ninth Circuit held that the defendants' 2006 amended license agreement and the defendants' subsequent efforts to enforce the royalty agreement against the plaintiff constituted overt acts that restarted the statute of limitations, notwithstanding **[**47]** the fact that the alleged conspiracy began in 2003. *Id.* In *Oliver*, consumers of the SD cards sued the *Samsung* defendants, alleging, among other theories, a price-fixing conspiracy. *751 F.3d at 1086*. The *Oliver* plaintiffs alleged that they purchased SD cards within four years of filing their complaint and that they had been injured by the unlawfully high priced sales at the time of purchase.[13] *Id. at 1086—87*. Applying *Klehr*, the Ninth Circuit concluded that the *Oliver* plaintiffs had alleged both a continuing violation and an overt act within the limitations period. *Id. at 1086—87*.

Here, in contrast, there is no allegation that Defendants continued to compensate Plaintiffs at an artificially depressed rate. Unlike in *Samsung* and *Oliver*, where the defendants had continued to enforce the allegedly anticompetitive agreement such that prices continued to be artificially high, the CAC is bereft of any allegations that Defendants continued to abide by or enforce the anti-solicitation scheme or salary ranges such that compensation **[**48]** continued to be artificially low. ***HN17***[] The continuing violations doctrine requires *both* continuing invasions of a plaintiff's interests *and* an overt act by the defendant. "Any other holding would destroy the function of the statute, since parties may continue indefinitely to receive some benefit as a result of an illegal act performed in the distant past." *Aurora Enterprises v. National Broadcasting Co., 688 F.2d 689, 694 (9th Cir. 1982)*. Absent a showing that Defendants took some "new and independent act" that "inflict[ed] new and accumulating injury," the Court concludes that Plaintiffs have failed to adequately allege a continuing violations theory.

As a result, the Court concludes that Plaintiffs' claims, as currently alleged, are time barred.

3. Fraudulent Concealment

Plaintiffs' final argument is that the statute of limitations should be tolled under the fraudulent concealment doctrine.

HN18[] "A statute of limitations may be tolled if the defendant fraudulently concealed the existence of a cause of action in such a way that the plaintiff, acting as a reasonable person, did not know of its existence." *Hexcel, 681 F.3d at 1060*. The plaintiff bears the burden of pleading and proving fraudulent concealment. *Id.; see also Conmar, 858 F.2d at 502*. To plead fraudulent concealment, the plaintiff must allege that: (1) the defendant took **[**49]** affirmative acts to mislead the plaintiff; (2) the plaintiff did not have "actual or constructive knowledge of the facts giving rise to its claim" as a result of defendant's affirmative acts; and (3) the plaintiff acted diligently in trying to uncover the facts giving rise to its claim. *Hexcel, 681 F.3d at 1060*; *see also Conmar, 858 F.2d at 502*; *Beneficial Life Ins., 851 F.2d at 276*. Moreover, allegations of fraudulent concealment must be pled with particularity. *Conmar, 858 F.2d at 502*.

[*1215] Here, Defendants contend that Plaintiffs have failed to adequately allege any of the three elements of a fraudulent concealment claim. As the Court concludes that Plaintiffs have failed to adequately allege affirmative acts, the Court does not reach Defendants' arguments as to knowledge and diligence.

In the instant case, Plaintiffs contend that they have alleged three categories of conduct that satisfy the element of "affirmative acts": (1) Defendants' secret meetings; (2) Defendants' efforts to "minimize any written record of the conspiracy"; and (3) Defendants' efforts to mislead the public through use of the Croner survey. As to Plaintiffs' three categories of conduct, the Court concludes that these allegations fail to show affirmatively misleading conduct "above and beyond" the alleged conspiracy itself. **[**50]** *See Guerrero v. Gates, 442 F.3d 697, 706—07 (9th Cir. 2003)* (quoting *Santa Maria v. Pac. Bell, 202 F.3d 1170, 1176 (9th Cir. 2000)*).[14] As the Ninth Circuit explained in

---

[13] Plaintiffs also neglect to mention that the Ninth Circuit in *Oliver* explicitly held that the four year statute of limitation in *15 U.S.C. § 15b* did not apply to the plaintiffs' claims, as they sought only injunctive relief. *751 F.3d at 1084*.

[14] While Plaintiffs are correct that the Ninth Circuit overruled *Santa Maria* in *Socop-Gonzalez v. INS, 272 F.3d 1176,1194—95 (9th Cir. 2001)*, the Ninth Circuit did so on other grounds. In *Socop-Gonzales*, the Ninth Circuit held that *Santa Maria*'s suggestion that "courts should not apply equitable tolling in situations where a plaintiff discovers the existence of a claim before the end of a limitations period and the court believes that the plaintiff reasonably could have been expected to bring a claim within the remainder of the limitations period," was contrary to Supreme Court precedent. *Id.*

The *Socop-Gonzales* court did not, however, overrule the general proposition that ***HN20***[] fraudulent concealment requires some affirmative acts of misconduct "above and beyond" the conduct inherent to the underlying **[**51]** claims themselves. The "above and beyond" language has been cited by the Ninth Circuit approvingly in subsequent cases as an element of fraudulent

Conmar, **HN19**[] the fact that a defendant's acts are "by nature self-concealing" is insufficient to show that the defendant has affirmatively misled the plaintiff as to the existence of the plaintiff's claim. *See* 858 F.2d at 505. In doing so, the *Conmar* court concluded that "[p]assive concealment of information is not enough to toll the statute of limitations, unless the defendant had a fiduciary duty to disclose information." *Id.* (internal citation omitted).

Here, the Court finds that the allegation that "Defendants engaged in a secret conspiracy" does not show that Defendants took "affirmative steps to mislead." *See* *Volk v. D.A. Davidson & Co., 816 F.2d 1406, 1415—16 (9th Cir. 1987)*. Plaintiffs allege that Defendants' senior human resources directors and senior management discussed the conspiracy in small in-person group meetings, avoided memorializing the scheme in writing, and attempted to keep the conspiracy secret from Plaintiffs. In *Volk*, however, the Ninth Circuit held that **HN21**[] merely "passively conceal[ing]" material information is insufficient to toll the statute of limitations. In the instant action, it may be the case that Defendants engaged in a secret conspiracy, but that allegation alone does not show that Defendants affirmatively and fraudulently concealed the existence of Plaintiffs' claims. As in *Volk*, Plaintiffs have failed to "represent any facts indicating an affirmative effort on the part of any [defendant] to mislead them or to conceal the fraud." *Id.*

Moreover, Plaintiffs' failure to aver any affirmative attempts **[**52]** to mislead "above and beyond" the existence of the conspiracy itself is illustrated by *Conmar*. In *Conmar*, the Ninth Circuit found that the defendant's creation and dissemination of false customs forms to mislead the plaintiff, **[*1216]** and the "direct public denial of any wrongdoing" could constitute affirmative actions to conceal anticompetitive behavior. *858 F.2d at 505*. Here, while Plaintiffs do provide detailed allegations of when and where certain Defendants met and conspired, these allegations do not support the conclusion that Defendants took active, affirmative steps to mislead Plaintiffs about the existence of Plaintiffs' claims. Instead, Plaintiffs' allegations show only that Defendants engaged in a conspiracy, that "by nature [is] self-concealing." *Conmar, 858 F.2d at 505*. That Defendants did not affirmatively disclose the details of their allegedly unlawful conspiracy to Plaintiffs is neither surprising nor sufficient to constitute "affirmative steps to mislead." *See id.* If the mere fact of a secret conspiracy were sufficient to toll the statute of limitations under the fraudulent concealment doctrine, there would be little point in imposing a period of limitation in the first instance. *See, e.g.*, Areeda and Hovencamp, **[**53]** ***Antitrust Law*** § 320e ("Of course, regarding every secret conspiracy as sufficiently self-concealing to toll the statute would often force the courts to deal with stale, if not ancient, evidence.").

Moreover, Plaintiffs cite *In re Lithium Ion Batteries Antitrust Litigation, No. 13-MD-2420, 2014 U.S. Dist. LEXIS 7516, 2014 WL 309192, at *16 (N.D. Cal. Jan. 21, 2014)*, but that case only highlights the insufficiency of Plaintiffs' factual allegations. In *Lithium Ion*, the plaintiffs alleged both that the defendants had made "public, putatively false statements . . . affirming their compliance with applicable antitrust laws, as well as the existence of vigorous price competition in the . . . market," on which plaintiffs could have reasonably relied, and that the defendants had taken affirmative steps to destroy evidence of the conspirators' secret meetings, avoided memorializing conversations, and used secret codes to refer to coconspirators and topics. *Id.; see also* *In re TFT-LCD (Flat Panel) Antitrust Litig., 586 F. Supp. 2d 1109, 1119 (N.D. Cal. 2008)* (defendants provided "numerous specific pretextual reasons for inflated prices" and also kept conspiracy secret); *In re Cathode Ray Tube (CRT) Antitrust Litig., 738 F. Supp. 2d 1011, 1024-25 (N.D. Cal. 2010)* (defendants gave "pretextual reasons for price increases, and coordinated their misleading announcements" and also kept conspiracy secret). These cases, *Lithium Ion, TFT-LCD*, and *Cathode Ray*, entailed **[**54]** affirmative, public misrepresentations by the defendants that they were not engaging in anticompetitive conduct, which allegedly misled the plaintiffs as to the existence of the plaintiffs' claims. It was the combination of those misleading, pretextual statements *and* the affirmative efforts taken to destroy evidence of the conspiracy or otherwise keep the conspiracies secret that supported the respective plaintiffs' fraudulent concealment allegations.

The above-mentioned cases also illustrate why Plaintiffs' allegations with regards to the Croner survey are lacking. In their opposition, Plaintiffs argue for the first time that because the Croner survey describes itself as providing

---

concealment claims. *See, e.g., Guerrero, 442 F.3d at 706—07*; *Lukovsky v. City and Cnty. of San Francisco, 535 F.3d 1044, 1052 (9th Cir. 2008)*; *Coppinger-Martin v. Solis, 627 F.3d 745, 751 (9th Cir. 2010)*.

"competitive compensation information," when the survey actually reported "anticompetitive compensation," Defendants "deliberately misrepresent[ed] their suppressed compensation data as 'competitive.'" Opp. at 17. However, the Court concludes that this allegation is qualitatively different from the public misrepresentations that the defendants made in *Lithium Ion, TFT-LCD*, and *Cathode Ray. See Lithium Ion, 2014 U.S. Dist. LEXIS 7516, 2014 WL 309192, at *16* (noting "public, putatively false statements by various defendants affirming their compliance with applicable antitrust laws"); *TFT-LCD, 586 F. Supp. 2d at 1119* (allegations **[**55]** that defendants provided "numerous specific pretextual reasons for the inflated **[*1217]** prices"); *Cathode Ray, 738 F. Supp. 2d at 1024—25* (allegations that defendants used "misleading announcements" and "gave pretextual reasons for price increases"). As a threshold matter, there are no allegations in the CAC that the compensation information in the Croner survey was publicly accessible, that Defendants were responsible for publishing the Croner survey, or that Defendants publicized the Croner survey as "affirming their compliance with applicable antitrust laws . . . ." *See Lithium Ion, 2014 U.S. Dist. LEXIS 7516, 2014 WL 309192, at *16*. Nor do Plaintiffs allege that Defendants' participation in the Croner survey involved the type of "public statements" at issue in *Cathode Ray*, where the defendants allegedly agreed "on what to tell customers about price changes," and published misleading or pretextual statements on "capacity and supply." *738 F. Supp. 2d at 1025*. At bottom, Plaintiffs simply offer no factual allegations with regards to the information in the Croner survey itself, or Plaintiffs' reliance on such information.

Moreover, to the extent Plaintiffs rely on the bare allegation that "Defendants provided pretextual, incomplete or materially false and misleading explanations for hiring, recruiting and compensation **[**56]** decisions made pursuant to the conspiracy," CAC ¶ 130, the Court finds this conclusory allegation insufficient under *Rule 9(b)*. Plaintiffs offer no specific facts showing the "who, what, where, when" of these alleged incomplete or materially false statements. *See Swartz, 476 F.3d at 764*. This allegation would not satisfy *Twombly*, much less the heightened pleading standard in *Rule 9(b)*.

In sum, the Court concludes that Plaintiffs have failed to allege that Defendants took affirmative steps to mislead Plaintiffs as to the factual basis for Plaintiffs' claims. While Plaintiffs are correct as a general matter that Plaintiffs' allegations that Defendants attempted to avoid memorializing the anti-solicitation scheme in order to keep the conspiracy secret may be relevant to Plaintiffs' fraudulent concealment claim, those allegations alone as currently pled are insufficient.[15] Here, the Court finds that Plaintiffs fail to allege facts showing that Defendants did more than passively conceal information. *See Volk, 816 F.2d at 1416*.

As Plaintiffs have failed to allege an essential element of fraudulent concealment, and the Court has also concluded that Plaintiffs' claims, as currently alleged, are time barred, the Court grants Defendants' motion to dismiss Plaintiffs' CAC. This dismissal is without prejudice, as the Court concludes that amendment would not necessarily be futile, as Plaintiffs may be able to allege sufficient facts to support their continuing violations claim and their equitable tolling claim. *See Leadsinger, 512 F.3d at 532*.

In light of this conclusion, the Court does not reach the remainder of Defendants' arguments in support of their motion to dismiss Plaintiffs' CAC.[16]

---

[15] Plaintiffs, in their opposition, raise for the first time the claim that some of the Defendants' requests to seal certain information in the *High-Tech* litigation constituted affirmative efforts to conceal information. As this theory **[**57]** is not pled anywhere in the CAC, the Court declines to entertain this new argument. *See Barnes v. Campbell Soup Co., No. 12-05185, 2013 U.S. Dist. LEXIS 118225, 2013 WL 5530017, at *2 (N.D. Cal. July 25, 2013)*.

[16] The Court notes that Defendants request that the Court dismiss or strike Plaintiffs' claim for wage-fixing in the event that the Court does not grant their motion to dismiss. MTD at 18 n.21. That request is denied. Moreover, the Court is concerned by Defendants' contention that "the claim regarding wage-fixing . . . . should not proceed into the discovery phase." *Id.* The Court has not stayed discovery in this action, and at the initial case management conference on November 5, 2014, **[**58]** the Court explicitly denied both Plaintiffs' request to expedite discovery and Defendants' request to stay discovery. ECF No. 39. To the extent Plaintiffs have properly served discovery requests to Defendants regarding Plaintiffs' wage-fixing claims, Defendants must promptly respond.

[*1218] IV. CONCLUSION

For the reasons stated above, the Court GRANTS Defendants' motion to dismiss Plaintiffs' CAC. Should Plaintiffs elect to file a Second Amended Complaint curing the deficiencies identified herein, Plaintiffs shall do so within 30 days of the date of this Order. Failure to meet the 30-day deadline to file a Second Amended Complaint or failure to cure the deficiencies identified in this Order will result in a dismissal with prejudice. Plaintiffs may not add new causes of action or parties without leave of the Court or stipulation of the parties pursuant to *Federal Rule of Civil Procedure 15*.

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Appellate Review

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN1[] **Standards of Review, Abuse of Discretion**

A court of appeals reviews a grant of class certification for an abuse of discretion, which occurs if the certification rests upon a clearly erroneous finding of fact, an errant conclusion of law or an improper application of law to fact. Whether an incorrect legal standard has been used is an issue of law to be reviewed de novo.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Preponderance of Evidence

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN2[] **Class Actions, Certification of Classes**

The proper task of the trial court is to consider carefully all relevant evidence and make a definitive determination that the requirements of *Fed. R. Civ. P. 23* have been met before certifying a class. Class certification requires a finding that each of the requirements of *Rule 23* has been met; factual determinations must be made by a preponderance of the evidence. Actual, not presumed, conformance with the *Rule 23* requirements remains necessary, and a party's assurance to the court that it intends or plans to meet the requirements is insufficient.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN3[] **Class Actions, Certification of Classes**

Under the present structure of *Fed. R. Civ. P. 23(c)*, a district court is no longer permitted to issue a "conditional certification" because a trial court must make a definitive determination that the requirements of *Rule 23* have been met before certifying a class.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN4[] **Class Actions, Certification of Classes**

A plaintiff cannot rely on challenged expert testimony, when critical to class certification, to demonstrate conformity with *Fed. R. Civ. P. 23* unless the plaintiff also demonstrates, and the trial court finds, that the expert testimony satisfies the standard set out in Daubert.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN5[] **Class Actions, Certification of Classes**

The class certification analysis must be "rigorous." This "rigorous analysis" applies to expert testimony critical to proving class certification requirements. As part of the "rigorous analysis," a party seeking class certification must affirmatively demonstrate his compliance with *Fed. R. Civ. P. 23*. This means that the party seeking certification must be prepared to prove that there are in fact sufficiently numerous parties, common questions of law or fact, typicality of claims or defenses, and adequacy of representation, as required by *Rule 23(a)*. The party must also satisfy through evidentiary proof at least one of the provisions of *Rule 23(b)*. Expert testimony that is insufficiently reliable to satisfy the Daubert standard cannot "prove" that the *Rule 23(a)* prerequisites have been met "in fact," nor can it establish "through evidentiary proof" that *Rule 23(b)* is satisfied. When an expert's report or testimony is critical to class certification, a district court must make a conclusive ruling on any challenge to that expert's qualifications or submissions before it may rule on a motion for class certification.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN6[] **Class Actions, Certification of Classes**

Both the U.S. Courts of Appeals for the Seventh and Eights Circuit limit the Daubert inquiry for class certification to expert testimony offered to prove satisfaction of *Fed. R. Civ. P. 23*'s requirements. A Daubert hearing is necessary only if the witness's opinion is "critical" to class certification. A trial court must resolve challenges to an expert's qualifications as well as any challenge to the reliability of information provided by an expert if that information is relevant to establishing any of the *Rule 23* requirements for class certification.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN7[] **Class Actions, Certification of Classes**

Opinion testimony should not be uncritically accepted as establishing a *Fed. R. Civ. P. 23* requirement merely because the court holds the testimony should not be excluded, under Daubert or for any other reason. Under *Rule 23* the district court must be "satisfied," or "persuaded," that each requirement is met before certifying a class. Like any evidence, admissible expert opinion may persuade its audience, or it may not. This point is especially important to bear in mind when a party opposing certification offers expert opinion. The district court may be persuaded by the testimony of either (or neither) party's expert with respect to whether a certification requirement is met. Weighing conflicting expert testimony at the certification stage is not only permissible; it may be integral to the rigorous analysis *Rule 23* demands.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Admissibility > Expert Witnesses

HN8[] **Class Actions, Certification of Classes**

That weighing expert opinions is proper does not make it necessary in every case or unlimited in scope. In its sound discretion, a district court may find it unnecessary to consider certain expert opinion with respect to a certification requirement, but it may not decline to resolve a genuine legal or factual dispute because of concern for an overlap with the merits.

Opinion

[*184] OPINION OF THE COURT

SCIRICA, *Circuit Judge*.

The principal issues in this appeal under *Federal Rule of Civil Procedure 23(f)* in this antitrust action are (1) whether *Rule 23* requires scrutiny under *Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*, of challenged expert testimony and (2) the propriety of class certification in light of the Supreme Court's decision in *Comcast Corp. v. Behrend, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* (*Comcast*), which reversed **[*185]** *Behrend v. Comcast Corp., 655 F.3d 182 (3d Cir. 2011)* (*Behrend*), after the District Court relied on *Behrend* in granting class certification. Because we find that the District Court had no opportunity to consider the implications of *Comcast* and hold that, if applicable, a court must resolve any *Daubert* challenges to expert testimony offered to demonstrate conformity with *Rule 23*, we vacate and remand.[1]

I.[2]

Plaintiffs are direct purchasers of traditional blood reagents, products used to test blood compatibility between donors and recipients, from two companies, defendants Immucor, Inc., which has settled with plaintiffs, and Ortho-Clinical Diagnostics, Inc., the appellant here. Plaintiffs claim Ortho and Immucor violated federal ***antitrust law*** by conspiring to fix traditional blood reagent prices.

By 1999, the entire domestic supply of traditional blood reagents had come under the control of Ortho and Immucor in a duopoly in which both companies anticipated they could raise their prices and increase their profits.[3] In November 2000, **[**3]** Ortho and Immucor executives attended an annual trade meeting at which plaintiffs assert the conspiracy began. Soon thereafter, both Ortho and Immucor began increasing traditional blood reagents prices in rapid succession, and by 2009, many prices had risen more than 2000%. Following a Department of Justice

---

[1] The District Court **[**2]** had jurisdiction under *15 U.S.C. § 15(a)* and *28 U.S.C. § 1331*. We have appellate jurisdiction under *28 U.S.C. § 1292(e)* and *Rule 23(f)*. ***HN1***[] We review the grant of class certification for an abuse of discretion, which occurs if the certification "rests upon a clearly erroneous finding of fact, an errant conclusion of law or an improper application of law to fact." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 312 (3d Cir. 2008)* (citation omitted). "Whether an incorrect legal standard has been used is an issue of law to be reviewed *de novo*." *Id.* (alteration and citation omitted).

[2] The District Court's Memorandum provides a more detailed description of the alleged facts in this case. *See In re Blood Reagents Antitrust Litig., 283 F.R.D. 222 (E.D. Pa. 2012)*.

[3] During the 1980s and 1990s, the traditional blood reagent market was highly competitive. Faced with more than a dozen competing companies and low profit margins, Ortho considered abandoning the industry while Immucor approached bankruptcy. At some point in the 1990s, Immucor began to acquire competing producers and by 1999, Immucor and Ortho were the only remaining firms in the U.S. market.

probe, a number of private suits were filed and transferred by the Judicial Panel on Multidistrict Litigation to the District Court, which consolidated them in December 2009.

Plaintiffs seek damages under the Clayton Act, *see* *15 U.S.C. § 15*, for alleged horizontal price fixing in violation of the Sherman Act, *see* *15 U.S.C. § 1*. In July 2012, after preliminary approval of plaintiffs' settlement with Immucor, the court held a hearing to determine whether to certify plaintiffs' class of "[a]ll individuals and entities who purchased **[**4]** traditional blood reagents in the United States directly from Defendants Immucor, Inc., and Ortho-Clinical Diagnostics, Inc. at any time from January 1, 2000 through the present." *283 F.R.D. at 247*. The court then certified the class over Ortho's objection. We granted Ortho's petition to appeal under *Rule 23(f)*.

II.

Plaintiffs relied in part on expert testimony to produce their antitrust impact analyses and damages models. The District Court evaluated the testimony, the reliability of which Ortho consistently challenged, **[*186]** and, in part by holding that the testimony "could evolve to become admissible evidence" at trial, determined that plaintiffs had met *Rule 23(b)(3)*'s predominance requirement. *See* *283 F.R.D. at 243-45* (quoting *Behrend, 655 F.3d at 204 n.13*). Relying on our decision in *Behrend*, the court rejected Ortho's challenges to plaintiffs' damages models as irrelevant to class certification because, the court reasoned,

> [v]irtually all of Ortho's arguments go to the merits of the models [plaintiffs' expert] has constructed: the question whether the models give rise to "a just and reasonable inference or [are] speculative." *Behrend, 655 F.3d at 206*. These merits questions have some force, and they may prove persuasive at the summary judgment stage. However, they do not overlap with the *Rule 23* requirements, because **[**5]** they neither implicate a need for individual proof nor convince the Court that [the] models could not "evolve to become admissible evidence." *Id. at 204 n.13*.

Blood Reagents, 283 F.R.D. at 240-41 (third alteration in original).

On appeal, Ortho contends the trial court failed to rigorously scrutinize whether "questions of law or fact common to class members predominate over any questions affecting only individual members." *Fed. R. Civ. P. 23(b)(3)*. In particular, pointing to *Comcast*, Ortho asserts the trial court erred by declining to address at class certification whether plaintiffs' damages models were capable of producing just and reasonable damage estimates at trial and by accepting plaintiffs' theory as capable of proving classwide antitrust impact.[4] Ortho also argues that, under the class certification standard, the trial court should have scrutinized the plaintiffs' expert's testimony under *Daubert*.

III.

A.

---

[4] More specifically, Ortho contends that plaintiffs' expert's methodologies cannot prove antitrust impact as a matter of law because they are incapable of distinguishing lawful price increases resulting from the creation of a duopoly from price increases resulting from the alleged price-fixing conspiracy. Ortho bases this argument in part on statements in **[**6]** *Comcast* such as, "Prices whose level above what an expert deems 'competitive' has been caused by factors unrelated to an accepted theory of antitrust harm are not 'anticompetitive' in any sense relevant here," *133 S. Ct. at 1435*, and the suggestion that a damages model must be able "to bridge the differences between supra-competitive prices in general and supra-competitive prices attributable to" the antitrust violation, *id. See also, e.g., id. at 1433* (stating that "a model purporting to serve as evidence of damages . . . must measure only those damages attributable to" the "theory of antitrust impact accepted for class-action treatment," and those damages must be "susceptible of measurement across the entire class"); *id. at 1435* ("The first step in a damages study is the translation of the *legal theory of the harmful event* into an analysis of the economic impact *of that event*.'" (quoting Federal Judicial Center, *Reference Manual on Scientific Evidence* 432 (3d ed. 2011))).

Because the District Court did not have the opportunity to consider *Comcast*'s later-issued guidance in the first instance, we will vacate the class certification order and remand for reconsideration. Without foreclosing what other conclusions **[**7]** the District Court might reach regarding *Comcast*'s ramifications for antitrust damages models[5] or proving antitrust impact,[6] we believe *Behrend*'s "could evolve" formulation of the Rule 23 standard did not survive *Comcast. See* *Comcast, 133 S. Ct. at 1433* (criticizing *Behrend* for "finding it **[*187]** unnecessary to decide 'whether the [expert's damages] methodology [was] a just and reasonable inference or speculative'" and indicating that such a methodology is not "acceptable so long as it can be applied classwide, no matter how arbitrary the measurements may be" (second alteration in original) (quoting *Behrend, 655 F.3d at 206*)). As we stated in *In re Hydrogen Peroxide Antitrust Litigation*, ***HN2***[] the "proper task" of the trial court is "to consider carefully all relevant evidence and make a definitive determination that the requirements of *Rule 23* have been met before certifying a class." *552 F.3d 305, 320 (3d Cir. 2008)*. "Class certification requires a finding that each of the requirements of *Rule 23* has been met," *id.*; factual determinations "must be made by a preponderance of the evidence," *id. at 307*. "'[A]ctual, not presumed, conformance' with the *Rule 23* requirements remains necessary," *id. at 322* (quoting *Gen. Tel. Co. of Sw. v. Falcon, 457 U.S. 147, 160, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982))*, and "[a] party's assurance to the court that it intends or plans to meet the requirements is insufficient," *id. at 318*.[7]

B.

We join certain of our sister courts to hold that ***HN4***[] a plaintiff cannot rely on challenged expert testimony, when critical to class certification, to demonstrate conformity with *Rule 23* unless the plaintiff also demonstrates, and the trial court finds, that the expert testimony satisfies the standard set out in *Daubert*. The Supreme Court has emphasized that ***HN5***[] the class certification analysis must be "rigorous." *Comcast, 133 S. Ct. at 1432* (quoting *Wal-Mart Stores, Inc. v. Dukes, 131 S. Ct. 2541, 2551, 180 L. Ed. 2d 374 (2011))*. This "rigorous analysis" applies to expert testimony critical to proving class certification requirements. *See, e.g., Comcast, 133 S. Ct. at 1433* (citing *Dukes, 131 S. Ct. at 2551-52*); *Hydrogen Peroxide, 552 F.3d at 323*. As part of the "rigorous analysis," the Court has clarified, "[a] party seeking class certification must affirmatively demonstrate his compliance" with *Rule 23*. *Dukes, 131 S. Ct. at 2551*. This means that the party seeking certification must "be prepared to prove that there are *in fact* sufficiently **[**9]** numerous parties, common questions of law or fact, typicality of claims or defenses, and adequacy of representation, as required by *Rule 23(a)*. The party must also satisfy through evidentiary proof at least one of the provisions of *Rule 23(b)*." *Comcast, 133 S. Ct. at 1432* (emphasis in original) (quotation marks and citation omitted). Expert testimony that is insufficiently reliable to satisfy the *Daubert* standard cannot "prove" that the *Rule 23(a)* prerequisites have been met "in fact," nor can it establish "through evidentiary proof" that *Rule 23(b)* is satisfied. Other courts of appeals have reached this conclusion. *See* *Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 812 (7th Cir. 2012)* ("When an expert's report or testimony is 'critical to class certification,' we have held that a district court must make a conclusive ruling on any challenge to that expert's qualifications or submissions before it may rule on a motion for class certification." (quoting *Am. Honda Motor Co. v. Allen, 600 F.3d 813, 815 (7th Cir. 2010)* (per curiam))); *In re Zurn Pex **[*188]** Plumbing Prods. Liab. Litig., 644 F.3d 604, 614 (8th Cir. 2011)* (approving "a focused *Daubert* analysis which scrutinized the reliability of the expert testimony in light of the criteria for class certification and the current state of the evidence");[8] *see also* *Ellis v. Costco Wholesale Corp.,*

---

[5] *See generally **[**8]*** *Comcast, 133 S. Ct. at 1433-35*.

[6] *See supra* note 4 and accompanying text.

[7] Similarly, ***HN3***[] "[u]nder the present structure of *Rule 23(c)*, . . . a district court [is] no longer permitted to issue a 'conditional certification' . . . because [a] trial court must 'make a definitive determination that the requirements of *Rule 23* have been met before certifying a class.'" *In re NFL Players Concussion Injury Litig., 775 F.3d 570, 580, 2014 WL 7331936, at *6 (3d Cir. 2014)* (third alteration in original) (citation and internal quotation marks omitted) (quoting *Hydrogen Peroxide, 552 F.3d at 320*).

[8] We have no occasion to examine whether there might be some variation between the Seventh and Eighth Circuit formulations. Consistent with our holding here, ***HN6***[] both courts limit the *Daubert* inquiry to expert testimony offered to prove satisfaction of Rule 23's requirements. *See* *Zurn Pex, 644 F.3d at 614* (approving the district court's "focused *Daubert* analysis which

657 F.3d 970, 982 (9th Cir. 2011) (citing the Supreme Court's dictum in *Dukes* and stating, "In its analysis of Costco's motions to strike [expert testimony at the class certification stage], **[**10]** the district court correctly applied the evidentiary standard set forth in *Daubert*"). Furthermore, we believe the Supreme Court's dictum in *Dukes* buttresses our decision. *See* Dukes, 131 S. Ct. at 2553-54 ("doubt[ing]" a district court's "conclu[sion] that *Daubert* did not apply to expert testimony at the certification stage of class-action proceedings").

In the District Court, plaintiffs **[**11]** relied on expert testimony to produce most of their antitrust impact analyses and damages models, which they offered to demonstrate that common questions predominated over individual questions as required by Rule 23(b)(3). The court evaluated the expert testimony and, in part because it held the testimony "could evolve to become admissible evidence" at trial, determined that it satisfied Rule 23. 283 F.R.D. at 243-45 (quoting Behrend, 655 F.3d at 204 n.13). The court also stated that "[a]t the present stage of the litigation, the Court also rejects Ortho's arguments regarding the reliability of plaintiffs' damages models." Id. at 243.[9]

Because Ortho consistently challenged the reliability of plaintiffs' expert's methodologies and the sufficiency of his testimony to satisfy Rule 23(b)(3), we leave it to the District Court on remand to decide in the first instance which of Ortho's reliability attacks, if any, challenge those aspects of plaintiffs' expert testimony offered to satisfy Rule 23 and then, if necessary, to conduct a *Daubert* inquiry before **[**12]** assessing whether the requirements of Rule 23 have been met.[10]

[*189] IV.

For the foregoing reasons, we will vacate the class certification order and remand for proceedings consistent with this opinion.

End of Document

---

scrutinized the reliability of the expert testimony in light of the criteria for class certification and the current state of the evidence"); Messner, 669 F.3d at 814 ("[A] *Daubert* hearing is necessary under *American Honda* only if the witness's opinion is 'critical' to class certification."); Am. Honda, 600 F.3d at 816 (holding that a trial court must resolve challenges to an expert's qualifications as well as "any challenge to the reliability of information provided by an expert if that information is relevant to establishing any of the Rule 23 requirements for class certification").

[9] Plaintiffs contend Ortho waived the opportunity to bring a *Daubert* challenge. But in the trial court proceedings, Ortho consistently challenged the reliability of plaintiffs' expert's models and the sufficiency of his testimony to satisfy Rule 23(b)(3).

[10] As we explained in *Hydrogen Peroxide*,

> **HN7**[] [O]pinion testimony should not be uncritically accepted as establishing a Rule 23 requirement merely because the court holds the testimony should not be excluded, under *Daubert* or for any other reason. Under Rule 23 the district court must be "satisfied," Falcon, 457 U.S. [147,] 161, 102 S. Ct. 2364, 72 L. Ed. 2d 740 [(1982)], or "persuaded," [*In re Initial Pub. Offering Sec. Litig.*], 471 F.3d [24,] 41 [(2d Cir. 2006)], that each requirement is met before certifying a class. Like any evidence, admissible expert opinion may persuade its audience, or it may not. This point is especially important to bear in mind when a party opposing certification offers expert opinion. The district court may be persuaded by the testimony of either (or neither) party's expert with respect to whether a certification requirement is met. Weighing conflicting expert testimony at the certification stage is not only permissible; it may be integral to the rigorous analysis Rule 23 demands.

Hydrogen Peroxide, 552 F.3d at 323 (citations and footnote omitted). *See also generally* id. at 324 (**HN8**[] "That weighing expert opinions is proper does not make it necessary in every case or unlimited in scope. . . . In its sound discretion, a district court may find it unnecessary to consider certain expert opinion with respect to a certification requirement, **[**13]** but it may not decline to resolve a genuine legal or factual dispute because of concern for an overlap with the merits.").

LexisNexis® Headnotes

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN1[] **Cartels & Horizontal Restraints, Price Fixing**

Express collusion violates ***antitrust law***; tacit collusion does not. In a highly concentrated market, seizing an opportunity to gouge consumers need not imply express collusion.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN2[] **Cartels & Horizontal Restraints, Sherman Act**

The Sherman Act, *15 U.S.C.S. § 1 et seq.*, imposes no duty on firms to compete vigorously, or for that matter at all, in price.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN3[] **Cartels & Horizontal Restraints, Price Fixing**

It is not a violation of ***antitrust law*** for a firm to raise its price, counting on its competitors to do likewise (but without any communication with them on the subject) and fearing the consequences if they do not.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Evidence > Types of Evidence > Circumstantial Evidence

HN4[] **Cartels & Horizontal Restraints, Price Fixing**

The existence of express collusion can sometimes be inferred from circumstantial evidence. Circumstantial evidence of such collusion might be a decline in the market shares of the leading firms in a market, for their agreeing among themselves to charge a high fixed price might have caused fringe firms and new entrants to increase output and thus take sales from the leading firms. Circumstantial evidence might be inflexibility of the market leaders' market shares over time, suggesting a possible agreement among them not to alter prices, since such an alteration would tend to cause market shares to change. Or one might see a surge in nonprice competition, a form of competition outside the scope of the cartel agreement and therefore a possible substitute for price competition. Other evidence of express collusion might be a high elasticity of demand (meaning that a small change in price would cause a substantial change in quantity demanded), for this might indicate that the sellers had agreed not to cut prices even though it would be to the advantage of each individual seller to do so until the market price fell to a level at which the added quantity sold did not offset the price decrease. But these phenomena are consistent with tacit as well as express collusion; their absence tends to negate both, but their presence does not point unerringly to express collusion.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN5[] **Cartels & Horizontal Restraints, Price Fixing**

It is difficult to prove illegal collusion without witnesses to an agreement. A court can, moreover, without suspecting illegal collusion, expect competing firms to keep close track of each other's pricing and other market behavior and often to find it in their self-interest to imitate that behavior rather than try to undermine it—the latter being a risky strategy, prone to invite retaliation.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Types of Evidence > Circumstantial Evidence

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN6[] **Sherman Act, Claims**

Tacit collusion, also known as conscious parallelism, does not violate Sherman Act *§ 1*, *15 U.S.C.S. § 1*. Collusion is illegal only when based on agreement. Agreement can be proved by circumstantial evidence.

Opinion by: POSNER

Opinion

[*869] POSNER, *Circuit Judge*. This class action antitrust suit is before us for the second time. More than four years ago we granted the defendants' petition to take an interlocutory appeal (see *28 U.S.C. § 1292(b)*) from the district judge's refusal to dismiss the complaint for failure to state a claim. But we upheld the judge's ruling. *In re Text Messaging Antitrust Litigation, 630 F.3d 622 (7th Cir. 2010)*. Three years of discovery ensued, culminating in the district judge's grant of the defendants' motion for summary judgment, followed by entry of final judgment dismissing the suit, precipitating this appeal by the plaintiffs.

The suit is on behalf of customers of text messaging—the sending of brief electronic messages between two or more mobile phones or other devices, over telephone systems (usually wireless systems), mobile communications systems, or the Internet. (The most common method of text messaging today is to type the message into a cellphone, which transmits it instantaneously over a telephone or other **[**3]** communications network to a similar device.) Text messaging is thus an alternative both to email and to telephone calls. The principal **[*870]** defendants are four wireless network providers—AT&T, Verizon, Sprint, and T-Mobile—and a trade associa-tion, The Wireless Association, to which those companies belong. The suit claims that the defendants, in violation of section 1 of the Sherman Act, *15 U.S.C. §§ 1 et seq.*, conspired with each other to increase one kind of price for text messaging service—price per use (PPU), each "use" being a mes-sage, separately priced. This was the original method of pricing text messaging; we'll see that it has largely given way to other methods, but it still has some customers and they are the plaintiffs and the members of the plaintiff class.

The defendants' unsuccessful motion to dismiss the complaint—the motion the denial of which we reviewed and upheld in the first appeal—invoked *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, which requires a complaint to pass a test of "plausibility" in order to avoid dismissal. The reason for this requirement is to spare defendants the burden of a costly defense against charges likely to prove in the end to have no merit. We decided that the plaintiffs' second amended complaint passed the **[**4]** test; we noted that the complaint

> alleges a mixture of parallel behaviors, details of industry structure, and industry practices, that facilitate collusion. There is nothing incongruous about such a mixture. If parties agree to fix prices, one expects that as a result they will not compete in price—that's the purpose of price fixing. Parallel behavior of a sort anomalous in a competitive market is thus a symptom of price fixing, though standing alone it is not proof of it; and an industry structure that facilitates collusion constitutes supporting evidence of collusion. ... [T]he complaint in this case alleges that the four defendants sell 90 percent of U.S. text messaging services, and it would not be difficult for such a small group to agree on prices and to be able to detect "cheating" (underselling the agreed price by a member of the group) without having to create elaborate mechanisms, such as an exclusive sales agency, that could not escape discovery by the antitrust authorities.
>
> Of note is the allegation in the complaint that the defendants belonged to a trade association and exchanged price information directly at association meetings. This allegation identifies a practice, not illegal **[**5]** in itself, that facilitates price fixing that would be difficult for the authorities to detect. The complaint further alleges that the defendants, along with two other large sellers of text messaging services, constituted and met with each other in an elite "leadership council" within the association—and the leadership council's stated mission was to urge its members to substitute "co-opetition" for competition.
>
> The complaint also alleges that in the face of steeply falling costs, the defendants increased their prices. This is anomalous behavior because falling costs increase a seller's profit margin at the existing price, motivating him, in the absence of agreement, to reduce his price slightly in order to take business from his competitors, and certainly not to increase his price. And there is more: there is an allegation that all at once the defendants changed their pricing structures, which were heterogeneous and complex, to a uniform pricing structure, and then simultaneously jacked up their prices by a third. The change in the industry's pricing structure was so rapid, the complaint suggests, that it could not have been accomplished without agreement on the details of the new **[**6]** structure, the timing of its adoption, and the specific, uniform price **[*871]** increase that would ensue on its adoption. ...
>
> What is missing, as the defendants point out, is the smoking gun in a price-fixing case: direct evidence, which would usually take the form of an admission by an employee of one of the conspirators, that officials of the defendants had met and agreed explicitly on the terms of a conspiracy to raise price. The second amended complaint does allege that the defendants "agreed to uniformly charge an unprecedented common per-unit price of ten cents for text messaging services," but does not allege direct evidence of such an agreement; the allegation is an inference from circumstantial evidence. Direct evidence of conspiracy is not a sine qua non, however. Circumstantial evidence can establish an antitrust conspiracy. ... We need not decide whether the circumstantial evidence that we have summarized is sufficient to *compel* an inference of conspiracy; the case is just at the complaint stage and the test for whether to dismiss a case at that stage turns on the complaint's "plausibility." ...
>
> The plaintiffs have conducted no discovery. Discovery may reveal the smoking gun or bring **[**7]** to light additional circumstantial evidence that further tilts the balance in favor of liability.

In re Text Messaging Antitrust Litigation, supra, 630 F.3d at 627—29; see also, for example, *White v. R.M. Packer Co., 635 F.3d 571 (1st Cir. 2011)*.

In short, we pointed to the small number of leading firms in the text messaging market, which would facilitate concealment of an agreement to fix prices; to the alleged exchanges of price information, orchestrated by the firms' trade association; to the seeming anomaly of a price increase in the face of falling costs; and to the allegation of a sudden simplification of pricing structures followed very quickly by uniform price increases.

With dismissal of the complaint refused and the suit thus alive in the district court, the focus of the lawsuit changed to pretrial discovery by the plaintiffs, which in turn focused on the alleged price exchange through the trade association and the sudden change in pricing structure followed by uniform price increases. Other factors mentioned in our first opinion—the small number of firms, and price increases in the face of falling costs—were conceded to be present but could not be thought dispositive. It is true that if a small number of competitors dominates a market, they will **[**8]** find it safer and easier to fix prices than if there are many competitors of more or less equal size. For the fewer the conspirators, the lower the cost of negotiation and the likelihood of defection; and provided that the fringe of competitive firms is unable to expand output sufficiently to drive the price back down to the competitive level, the leading firms can fix prices without worrying about competition from the fringe. But the other side of this coin is that the fewer the firms, the easier it is for them to engage in "follow the leader" pricing ("conscious parallelism," as lawyers call it, "tacit collusion" as economists prefer to call it)—which means coordinating their pricing without an actual agreement to do so. As for the apparent anomaly of competitors' raising prices in the face of falling costs, that is indeed evidence that they are not competing in the sense of trying to take sales from each other. However, this may be not because they've agreed not to compete but because all of them have determined independently that they may be better off with a higher price. That higher price, moreover—the consequence of parallel but independent decisions to raise prices—may generate **[**9]** even greater profits (compared to competitive **[*872]** pricing) if costs are falling, provided that consumers do not have attractive alternatives.

Important too is the condition of entry. If few firms can or want to enter the relevant market, a higher price generating higher profits will not be undone by the output of new entrants. Indeed, prospective entrants may be deterred from entering by realization that their entry might lead simply to a drastic fall in prices that would deny them the profits from having entered. And that drastic fall could well be the result of parallel but independent pricing decisions by the incumbent firms, rather than of agreement.

The challenge to the plaintiffs in discovery was thus to find evidence that the defendants had colluded expressly—that is, had explicitly agreed to raise prices—rather than tacitly ("follow the leader" or "consciously parallel" pricing). The focus of the plaintiffs' discovery was on the information exchange orchestrated by the trade association, the change in the defendants' pricing structures and the defendants' ensuing price hikes, and the possible existence of the smoking gun—and let's begin there, for the plaintiffs think they have found **[**10]** it, and they have made it the centerpiece—indeed, virtually the entirety—of their argument.

Their supposed smoking gun is a pair of emails from an executive of T-Mobile named Adrian Hurditch to another executive of the firm, Lisa Roddy. Hurditch was not a senior executive but he was involved in the pricing of T-Mobile's products, including its text messaging service. The first of the two emails to Roddy, sent in May 2008, said "Gotta tell you but my gut says raising messaging pricing again is nothing more than a price gouge on consumers. I would guess that consumer advocates groups are going to come after us at some point. It's not like we've had an increase in the cost to carry message to justify this or a drop in our subscription SOC rates? I know the other guys are doing it but that doesn't mean we have to follow." ("SOC" is an acronym for "system on a chip," a common component of cellphones.) The second email, sent in September 2008 in the wake of a congressional investigation of alleged price gouging by the defendants, said that "at the end of the day we know there is no higher cost associated with messaging. The move [the latest price increase by T-Mobile] was colusive [*sic*] and **[**11]** opportunistic." The misspelled "collusive" is the heart of the plaintiffs' case.

It is apparent from the emails that Hurditch disagreed with his firm's policy of raising the price of its text messaging service. (The price increase, however, was limited to the PPU segment of the service; we'll see that this is an important qualification.) But that is all that is apparent. In emphasizing the word "col[l]usive"—and in arguing in their opening brief that "Hurditch's statement that the price increases were collusive is thus dispositive. Hurditch's statement is a party admission and a co-conspirator statement"—the plaintiffs' counsel demonstrate a failure to understand the fundamental distinction between express and tacit collusion. *HN1*[] Express collusion violates ***antitrust law***; tacit collusion does not. There is nothing to suggest that Hurditch was referring to (or accusing his company of) express collusion. In fact the first email rather clearly refers to tacit collusion; for if Hurditch had thought that his company had agreed with its competitors to raise prices he wouldn't have said "I know the other guys are doing it but *that doesn't mean we have to follow*" (emphasis added). They would have to follow, **[**12]** or at least they would be under great pressure to follow, if they had agreed to follow.

[*873] As for the word "opportunistic" in the second email, this is a reference to the remark in the first email that T-Mobile and its competitors were seizing an opportunity to gouge consumers—and in a highly concentrated market, seizing such an opportunity need not imply express collusion.

Consider the last sentence in the second, the "colusive," email: "Clearly get why but it doesn't surprise me why public entities and consumer advocacy groups are starting to groan." This accords with another of Hurditch's emails, in which he predicted that the price increase would cause "bad PR [public relations]." Those concerns would be present whether the collusion among the carriers was tacit or express.

Nothing in any of Hurditch's emails suggests that he believed there was a conspiracy among the carriers. There isn't even evidence that he had ever communicated on any subject with any employee of any of the other defendants. The reference to "the other guys" was not to employees of any of them but to the defendants themselves—the companies, whose PPU prices were public knowledge.

The plaintiffs make much of the fact **[**13]** that Hurditch asked Roddy to delete several emails in the chain that culminated in the "colusive" email. But that is consistent with his not wanting to be detected by his superiors criticizing their management of the company. The plaintiffs argue that, no, the reason for the deletion was to destroy emails that would have shown that T-Mobile was conspiring with the other carriers. If this were true, the plaintiffs would be entitled to have the jury instructed that it could consider the deletion of the emails to be evidence (not conclusive of course) of the defendants' (or at least of T-Mobile's) guilt. But remember that there is no evidence that Hurditch was involved in, or had heard about, any conspiracy, and there is as we've just seen an equally plausible reason for the deletion of the emails in question. There's nothing unusual about sending an intemperate email, regretting sending it, and asking the recipient to delete it. And abusing one's corporate superiors—readily discernible even in Hurditch's emails that were not deleted—is beyond intemperate; it is career-endangering, often career-ending. Hurditch and Roddy acknowledged in their depositions that at least one of the deleted **[**14]** emails had criticized T-Mobile's senior management in "emotional" terms. Furthermore, if T-Mobile destroyed emails that would have revealed a conspiracy with its competitors, why didn't it destroy the "smoking gun" email—the "colusive" email?

Even if the district judge should have allowed the jury to draw an adverse inference from the destruction of the emails, this could not have carried the day for the plaintiffs or even gotten them a trial. T-Mobile's Record Retention Guidelines indicate that Hurditch and Roddy had no obligation to retain their correspondence, because the guidelines state that employees need not retain "routine letters and notes that require no acknowledgment or follow-up" as distinct from "letters of general inquiry and replies that complete a cycle of correspondence." Hurditch's emails to Roddy were not inquiries; they were gripes and worries. Nor can a subordinate employee's destruction of a document, even if in violation of company policy, be automatically equated to a bad-faith act by the company.

The problems with the plaintiff's case go beyond the inconclusiveness of the "colusive" email on which their briefs dwell at such length. The point that they have particular **[**15]** difficulty accepting is that ***HN2***[] the Sherman Act imposes no duty on firms to compete vigorously, or for that matter at all, in price. This troubles some antitrust **[*874]** experts, such as Harvard Law School Professor Louis Kaplow, whose book *Competition Policy and Price Fixing* (2013) argues that tacit collusion should be deemed a violation of the Sherman Act. That of course is not the law, and probably shouldn't be. A seller must decide on a price; and if tacit collusion is forbidden, how does a seller in a market in which conditions (such as few sellers, many buyers, and a homogeneous product, which may preclude nonprice competition) favor convergence by the sellers on a joint profit-maximizing price without their actually agreeing to charge that price, decide what price to charge? If the seller charges the profit-maximizing price (and its "competitors" do so as well), and tacit collusion is illegal, it is in trouble. But how is it to avoid getting into trouble? Would it have to adopt cost-plus pricing and prove that its price just covered its costs (where cost includes a "reasonable return" to invested capital)? Such a requirement would convert ***antitrust law*** into a scheme resembling public utility **[**16]** price regulation, now largely abolished.

And might not entry into concentrated markets be deterred because an entrant who, having successfully entered such a market, charged the prevailing market price would be a tacit colluder and could be prosecuted as such, if tacit collusion were deemed to violate the Sherman Act? What could be more perverse than an antitrust doctrine that discouraged new entry into highly concentrated markets? Prices might fall if the new entrant's output increased the market's total output, but then again it might not fall; the existing firms in the market might reduce their output in order to prevent the output of the new entrant from depressing the market price. If as a result the new entrant found itself charging the same price as the incumbent firms, it would be tacitly colluding with them and likewise even if it set its price below that of those firms in order to maximize its profit from entry yet above the price that would prevail were there no tacit collusion.

Further illustrating the danger of the law's treating tacit collusion as if it were express collusion, suppose that the firms in an oligopolistic market don't try to sell to each other's sleepers, **[**17]** "sleepers" being a term for a seller's customers who out of indolence or ignorance don't shop but instead are loyal to whichever seller they've been accustomed to buy from. Each firm may be reluctant to "awaken" any of the other firms' sleepers by offering them discounts, fearing retaliation. To avoid punishment under ***antitrust law*** for such forbearance (which would be a form of tacit collusion, aimed at keeping prices high), would firms be *required* to raid each other's sleepers? It is one thing to prohibit competitors from agreeing not to compete; it is another to order them to compete. How is a court to decide how vigorously they must compete in order to avoid being found to have tacitly col-luded in violation of ***antitrust law***? Such liability would, to repeat, give antitrust agencies a public-utility style regulatory role.

Or consider the case, of which the present one may be an exemplar, in which there are four competitors and one raises its price and the others follow suit. Maybe they do that because they think the first firm—the price leader—has in-sights into market demand that they lack. Maybe they're afraid that though their sales will increase if they don't follow the leader **[**18]** up the price ladder, the increase in their sales will induce the leader to reduce his price, resulting in increased sales by him at the expense of any firm that had refused to increase its price. Or the firms might fear that the price leader had raised his price in order to finance product improvements that would enable him to hold **[*875]** on to his existing customers—and win over customers of the other firms. If any of these reflections persuaded the other firms—without any communication with the leader—to raise their prices, there would be no conspiracy, but merely tacit collusion, which to repeat is not illegal despite the urging of Professor Kaplow and others.

Competitors in concentrated markets watch each other like hawks. Think of what happens in the airline industry, where costs are to a significant degree a function of fuel prices, when those prices rise. Suppose one airline thinks of and implements a method for raising its profit margin that it expects will have a less negative impact on ticket sales than an increase in ticket prices—such as a checked-bag fee or a reservation-change fee or a reduction in meals or an increase in the number of miles one needs in order to earn a free **[**19]** ticket. The airline's competitors will monitor carefully the effects of the airline's response to the higher fuel prices afflicting the industry and may well decide to copy the response should the responder's response turn out to have increased its profits.

The collusion alleged by the plaintiffs spanned the period 2005 to 2008 (the year the suit was filed), and we must consider closely the evolution of the text messaging market in that period. Text messaging (a descendant of the old telex service) started in the 1990s and started slowly. In 2005, 81 billion text messages were sent in the United States, which sounds like a lot; in fact it was peanuts—for by 2008 the number had risen to a trillion and by 2011 to 2.3 trillion. One reason for the rapid increase was the advent and increasing popularity of volume-discounted text messaging plans. These plans entitled the buyer to send a large number of messages (often an unlimited number) at a fixed monthly price that made each message sent very cheap to the sender. We'll call these plans "bundles," and ignore the fact that often a text messaging bundle includes services in addition to text messaging, such as voice and video messaging. The **[**20]** pricing of text messaging bundles (for example charging a fixed monthly rate for unlimited messaging) largely replaced the original method of pricing text messages, which had been price per use (PPU), that is, price per individual message, not per month or per some fixed number of messages. Once text messaging bundles became popular, the PPU market shrunk to the relative handful of people who send text messages infrequently. The collusion alleged in this case is limited to that market.

In 2005 the price per use was very low—as low as 2 cents, though more commonly 5 cents. But between then and late 2008 all four defendant companies, in a series of steps (10 steps in all for the four companies), raised each of their PPUs to 20 cents. The increase attracted congressional concern and an investigation by the Justice

Department's antitrust division, but neither legislative nor prosecutorial action resulted—only the series of class actions suits consolidated in 2009 in the suit before us.

The popularity of text messaging bundles took a big bite out of the PPU market. The consumers left in that market were as we said those who sent very few messages. The total cost to such users was very low. **[**21]** Each defendant company made, so far as appears, an independent judgment that PPU usage per customer was on average so low that the customer would not balk at, if he would even notice, an occasional increase of a few cents per message. Suppose a grandparent living in Florida sends one text message a week to his grandchild in Illinois at a cost of 5 cents a message. That adds up to roughly **[*876]** 4 messages a month, for a total of 20 cents. The text messaging service now doubles the price, to 10 cents a message. The monthly charge is now 40 cents. Is the customer likely to balk? When in 2006 Sprint raised its PPU from 10 cents to 15 cents, it estimated that the average result would be an increase of 74 cents a month in the cost of the service for the vast majority of its PPU customers. Neither in our hypothetical example nor in Sprint's real-world analysis is a competing carrier likely to spend money advertising that its PPU price is 5 cents lower than what the competition is charging.

Our earlier discussion of "sleepers" is relevant here. As heavy users of text messaging switched from PPU to bundles, the PPU market was left with the dwindling band of consumers whose use of text messaging was **[**22]** too limited to motivate them to switch to bundles or to complain about small increases in price per message. And they certainly weren't going to undergo the hassle of switching companies just because they would be paying a few dollars a year more for text messaging. This is no more than a plausible interpretation of the motive for and character of the price increases of which the plaintiffs complain, but the burden of establishing a prima facie case of explicit collusion was on the plaintiffs, and as the district judge found in his excellent opinion they failed to carry the burden.

Granted, the defendants overstate their case in some respects. They point out that each company conducted independent evaluations of the profitability of raising their PPUs, but one would expect such "independent" evaluations even if the firms were expressly colluding, as the "independent" evaluations would disguise what they were doing. The firms contend unnecessarily that the evaluations showed that the contemplated price increases would be profitable even if none of the other three carriers raised its PPU. That is overkill because ***HN3***[] it is not a violation of ***antitrust law*** for a firm to raise its price, counting **[**23]** on its competitors to do likewise (but without any communication with them on the subject) and fearing the consequences if they do not. In fact AT&T held back on raising its PPU for several months, fearing that Sprint's increase would have a bad effect on public opinion, and raised its own price only when the bad effect did not materialize.

The plaintiffs point out that ***HN4***[] the existence of express collusion can sometimes be inferred from circumstantial evidence, and they claim that they produced such evidence, along with Hurditch's emails, which they term direct evi-dence of such collusion—which, as we know, they are not. Circumstantial evidence of such collusion might be a decline in the market shares of the leading firms in a market, for their agreeing among themselves to charge a high fixed price might have caused fringe firms and new entrants to increase output and thus take sales from the leading firms. Circumstantial evidence might be inflexibility of the market leaders' market shares over time, suggesting a possible agreement among them not to alter prices, since such an alteration would tend to cause market shares to change. Or one might see a surge in nonprice competition, a form **[**24]** of competition outside the scope of the cartel agreement and therefore a possible substitute for price competition. Other evidence of express collusion might be a high elasticity of demand (meaning that a small change in price would cause a substantial change in quantity demanded), for this might indicate that the sellers had agreed not to cut prices even though it would be to the advantage of each individual seller to do so until the market price fell to a level at which the added quantity sold did not offset the price decrease.

[*877] The problem is that these phenomena are consistent with tacit as well as express collusion; their absence would tend to negate both, but their presence would not point unerringly to express collusion. And anyway these aren't the types of circumstantial evidence on which the plaintiffs rely. Rather they argue that had any one of the four carriers not raised its price, the others would have experienced costly consumer "churn" (the trade's term for losing customers to a competitor), and therefore all four dared raise their prices only because they had agreed to act in concert. For that would minimize churn—PPU customers would have no place to turn for a lower **[**25]** price. There is, however, a six-fold weakness to this suggested evidence of express collusion:

First, a rational profit-maximizing seller does not care about the number of customers it has but about its total revenues relative to its total costs. If the seller loses a third of its customers because it has doubled its price, it's ahead of the game because twice two-thirds is greater than one (4/3 > 3/3).

Second, in any case of tacit collusion the colluders risk churn, because no one would have committed to adhere to the collusive price. And yet tacit collusion appears to be common, each tacit colluder reckoning that in all likelihood the others will see the advantages of hanging together rather than hanging separately.

Third, the four defendants in this case did not move in lockstep. For months on end there were price differences in their services. For example, during most of the entire period at issue (2005 to 2008) T-Mobile's PPU was 5 cents below Sprint's. To eliminate all risk of churn the defendants would have had to agree to raise their prices simultaneously, and they did not.

Fourth, while there was some churn, this does not imply that each defendant had decided to raise its price **[**26]** so high as to drive away droves of customers had the other defendants not followed suit. T-Mobile, for example, appears not to have gained a significant number of customers from charging less for PPU service than Sprint. (As one internal T-Mobile email puts it, "we should seriously consider raising our pay per message rate ... . [F]or having the lowest messaging rates on the planet, we are not necessarily receiving a more favorable share of the market. I'm thinking we can move to 10c[ents] with little erosive concerns.") One reason is that, as noted earlier, while 5 cents can make a large percentage difference in this market, it is such a small absolute amount of money that it may make no difference to most consumers, especially when a nickel or a dime or 20 cents is multiplied by a very small number of monthly messages. More important, as a customer's monthly messaging increases, and also the price per message (as was happening during this period), the alternative of a text messaging bundle plan becomes more attractive. A company that stands to lose some PPU customers because of a price increase may be confident that they will not abandon the company for another but instead sign on to the company's **[**27]** text messaging bundle plan. Put differently, there is no evidence that PPU pricing is a major determinant of consumers' choice of carrier.

Fifth, the period during which the carriers were raising their prices was also the period in which text messaging caught on with the consuming public and surged in volume. Many PPU customers would have found that they were text messaging more, and the more one text messages the more attractive the alternative of a bundle plan. The defendants *wanted* their PPU customers to switch to bundles; as an internal T-Mobile email in the plaintiffs' **[*878]** appendix explains, "the average cost to serve an 'Unlimited SMS' [i.e., a bundled short-message service at a fixed price regardless of the number of messages, "short message" referring to a simple text message, rather than a message having voice or video content] customer paying $9.99 [per month] is $1.90 per month and [we make] a profit of $8.09 per sub[scriber]."

And sixth, if the carriers were going to agree to fix prices, they wouldn't have fixed their PPU prices; why risk suit or prosecution for fixing such prices when the PPU market was generating such a slight—and shrinking—part of the carriers' overall revenues? The possible **[**28]** gains would be more than offset by the inevitable legal risks. Furthermore, since an agreement to fix prices in the PPU market would have left the carriers free to cut prices on the bulk of their business (for they are not accused of fixing bundle prices), the slight gains from fixing PPU prices would be negated by increased competition in the carriers' other markets.

The plaintiffs argue that many of the price increases were forced by senior management on the middle managers who would ordinarily be responsible for pricing decisions. The claim is that it would be the senior officials, few in number, at each company who would have negotiated the actual collusive agreement that the plaintiffs must prove. But what the record shows is merely (as in the Hurditch emails) that there was disagreement within each company about the optimal price to charge, obviously a speculative matter since no one could be certain how either competitors or consumers would react to any price change. There was plenty of evidence that proposals for price increases came from middle management. An economist would say (one of the defendants' economic experts did say) that as the price-sensitive users moved off PPU **[**29]** to bundles, leaving PPU to the sleepers, the overall demand for PPU became less elastic, meaning that a given percentage increase in the price of PPU service had a smaller negative effect on the demand for the service. That made raising the PPU a revenue winner.

It remains to consider the claim that the trade association of which the defendants were members, The Wireless Association (it has a confusing acronym—CTIA, reflecting the original name of the association, which was Cellular Telephone Industries Association), and a component of the association called the Wireless Internet Caucus of CTIA, were forums in which officers of the defendants met and conspired to raise PPU prices. Officers of some of the defendants attended meetings both of the association and of its caucus, but representatives of companies not alleged to be part of the conspiracy frequently were present at these meetings, and one of the plaintiffs' expert witnesses admitted that in the presence of non-conspirators "the probability of collusion would go away." Still, opportunities for senior leaders of the defendants to meet privately in these officers' retreats abounded. And an executive of one of the defendants (AT&T) **[**30]** told the president of the association that "we all try not to surprise each other" and "if any of us are about to do something major we all tend to give the group a heads up"—"plus we all learn valuable info from each other." This evidence would be more compelling if the immediate sequel to any of these meetings had been a simultaneous or near-simultaneous price increase by the defendants. Instead there were substantial lags. And as there is no evidence of what information was exchanged at these meetings, there is no basis for an inference that they were using the meetings to plot prices increases.

[*879] This and other circumstantial evidence that the plaintiffs cite are almost an afterthought. They have staked almost their all on Hurditch's emails—the name "Hurditch" recurs more than 160 times in the plaintiffs' opening and reply briefs. It's a mystery to us that the plaintiffs have placed such weight on those emails, thereby wasting space in their briefs that might have been better used. The plaintiffs greatly exaggerate the significance of the emails, but apart from the emails the circumstantial evidence that they cite provides insufficient support for the charge of express collusion.

[31]** ***HN5***[] It is of course difficult to prove illegal collusion without witnesses to an agreement. And there are no such witnesses in this case. We can, moreover, without suspecting illegal collusion, expect competing firms to keep close track of each other's pricing and other market behavior and often to find it in their self-interest to imitate that behavior rather than try to undermine it—the latter being a risky strategy, prone to invite retaliation. The plaintiffs have presented circumstantial evidence consistent with an inference of collusion, but that evidence is equally consistent with independent parallel behavior.

We hope this opinion will help lawyers understand the risks of invoking "collusion" without being precise about what they mean. ***HN6***[] Tacit collusion, also known as conscious parallelism, does not violate *section 1 of the Sherman Act*. Collusion is illegal only when based on agreement. Agreement can be proved by circumstantial evidence, and the plaintiffs were permitted to conduct and did conduct full pretrial discovery of such evidence. Yet their search failed to find sufficient evidence of express collusion to make a prima facie case. The district court had therefore no alternative to granting **[**32]** summary judgment in favor of the defendants.

AFFIRMED.

End of Document

Ryan v. Microsoft Corp.

United States District Court for the Northern District of California, San Jose Division

April 10, 2015, Decided; April 10, 2015, Filed

Case No. 14-CV-04634-LHK

Reporter
2015 U.S. Dist. LEXIS 47753 *; 2015-2 Trade Cas. (CCH) P79,374; 2015 WL 1738352

DESERAE RYAN, et al., Plaintiffs, v. MICROSOFT CORPORATION, Defendant.

Subsequent History: Motion denied by *Ryan v. Microsoft Corp., 2015 U.S. Dist. LEXIS 73955 (N.D. Cal., June 8, 2015)*

Dismissed by, Request granted, Judgment entered by *Ryan v. Microsoft Corp., 147 F. Supp. 3d 868, 2015 U.S. Dist. LEXIS 158944 (N.D. Cal., Nov. 23, 2015)*

Prior History: *In re High-Tech Emple. Antitrust Litig., 856 F. Supp. 2d 1103, 2012 U.S. Dist. LEXIS 55302 (N.D. Cal., Apr. 18, 2012)*

Core Terms

Plaintiffs', statute of limitations, court concludes, employees, factors, parties, forum selection clause, hiring, anti-solicitation, damages, cause of action, Cartwright Act, employment agreement, venue, weigh, allegations, conspiracy, choice of forum, accrual, Sherman Act, anticompetitive, four year, settlement, witnesses, continuing violation, discovery rule, quotation, tolling, accrue, time barred

Counsel: **[*1]** For Deserae Ryan, individually and on behalf of all others similarly situated, Trent Rau, individually and on behalf of all others similarly situated, Plaintiffs: Jeffrey Lee Hogue, LEAD ATTORNEY, Hogue Belong, San Diego, CA; Tyler Jay Belong, LEAD ATTORNEY, Bryce Aaron Dodds, Hogue and Belong, San Diego, CA; David Roger Markham, Maggie K Realin, Peggy J Reali, Janine Renee Menhennet, The Markham Law Firm, San Diego, CA.

For Microsoft Corporation, a Washington corporation, Defendant: Robert J Maguire, LEAD ATTORNEY, PRO HAC VICE, Davis Wright Tremaine, Seattle, WA; Stephen Michael Rummage, LEAD ATTORNEY, PRO HAC VICE, Davis Wright Tremaine LLP, Seattle, WA; Allison Ann Davis, Sanjay Mohan Nangia, Davis Wright Tremaine LLP, San Francisco, CA; Candice M. Tewell, PRO HAC VICE, Davis Wright Tremaine LLP, Seattle, WA.

Judges: LUCY H. KOH, United States District Judge.

Opinion by: LUCY H. KOH

Opinion

ORDER DENYING MOTION TO TRANSFER VENUE; GRANTING MOTION TO DISMISS

Re: Dkt. No. 26, 32

Before the Court are Defendant Microsoft Corporation's motions to transfer venue and to dismiss. ECF Nos. 26, 32. Having considered the submissions of the parties, the relevant law, and the record in this case, the Court hereby DENIES Defendant's **[*2]** motion to transfer venue and GRANTS Defendant's motion to dismiss.

I. BACKGROUND

A. Factual Background

1. The Parties

Plaintiff Deserae Ryan ("Ryan") and Plaintiff Trent Rau ("Rau"), (collectively, "Plaintiffs"), bring this putative class action against Defendant Microsoft Corporation ("Defendant" or "Microsoft") for alleged violations of state and federal antitrust laws. Plaintiff Ryan, an individual, is a resident of the State of California. Compl. ¶ 16. Plaintiff Ryan worked for Microsoft as a "Senior Product Manager" from April 2007 to September 2012 in Redmond, Washington. *Id.* ¶ 16. Plaintiff Rau, an individual, is a resident of the State of Washington. *Id.* ¶ 19. Plaintiff Rau worked for Microsoft as a "Lead Systems Engineer Senior" from June 2006 to June 2010.

Defendant Microsoft is a Washington corporation with its principal place of business in Redmond, Washington. *Id.* ¶ 20.

B. *In re High-Tech Employees Litigation*

Here, Plaintiffs allege that Defendant Microsoft conspired with "several other technology companies" in both a "Do Not Cold Call" agreement and a "Restricted Hiring" agreement. There appears to be significant factual overlap between Plaintiffs' allegations and the related **[*3]** action *In re High-Tech Employees Litigation*, No. 11-CV-02509-LHK. As both the factual and procedural history of the related action, *In re High-Tech*, and the DOJ investigations and complaints are relevant to this action; the Court briefly summarizes the background of that litigation below.

From 2009 to 2010, the Antitrust Division of the DOJ investigated the employment and recruitment practices of various Silicon Valley technology companies, including Adobe Systems, Inc., Apple, Inc., Google, Inc., Intel Corp., and Intuit, Inc. *See* *In re High-Tech Emple. Antitrust Litig., 856 F. Supp. 2d 1103, 1109 (N.D. Cal. 2012)*. In September of 2010, the DOJ then filed civil complaints against the above-mentioned technology companies, in addition to Pixar and Lucasfilm. *Id.* The DOJ filed its complaint against Adobe, Apple, Google, Intel, Intuit, and Pixar on September 24, 2010. *Id.* On December 21, 2010, the DOJ filed another complaint against Lucasfilm and Pixar. CAC ¶ 94. The defendants, including Pixar and Lucasfilm, stipulated to proposed final judgments in which they agreed that the DOJ's complaints had stated claims under federal ***antitrust law*** and agreed to be "enjoined from attempting to enter into, maintaining or enforcing any agreement with any other person or in any way **[*4]** refrain from . . . soliciting, cold calling, recruiting, or otherwise competing for employees of the other person. *856 F. Supp. 2d at 1109-10*. (quoting Adobe Proposed Final Judgment at 5). The D.C. District Court entered the stipulated proposed final judgments in March and June of 2011. *Id.*

The *High-Tech* plaintiffs filed five separate state court actions between May and July of 2011. Following removal, transfer to San Jose to the undersigned judge, and consolidation, the *High-Tech* plaintiffs filed a consolidated amended complaint on September 13, 2011. *Id. at 1113*. In their complaint, the *High-Tech* plaintiffs alleged antitrust claims against their employers, claiming that the defendants had conspired "to fix and suppress employee compensation and to restrict employee mobility." *Id. at 1108*. More specifically, the *High-Tech* plaintiffs alleged a conspiracy comprised of "an interconnected web of express bilateral agreements." *Id. at 1110*. One agreement, the "Do Not Cold Call" agreement involved one company placing the names of the other company's employees on a "Do Not Cold Call" list and instructing its recruiters not to cold call the employees of the other company. *Id.* In addition to the "Do Not Cold Call" agreements, the *High-Tech* plaintiffs also alleged that Pixar **[*5]** and Lucasfilm entered into express, written agreements to (1) not cold call each other's employees, (2) to notify the other company whenever making an offer to an employee of the other company, and (3) not to engage in "bidding wars." *Id. at 1111*.

2. Alleged Conspiracy in the Instant Action

Here, Plaintiffs allege that Microsoft conspired with unnamed "technology companies" to suppress compensation in two ways. First, Microsoft allegedly "was one of several parties to an Anti-Solicitation Agreement otherwise known as the 'Do Not Cold Call' list." Compl. ¶ 28. Second, Microsoft allegedly entered into a "Restrictive Hiring Agreement"[1] with "several other technology companies." *Id.* ¶ 36. According to Plaintiffs, the effect of both agreements was to restrict competition in the labor market and artificially depress compensation. *Id.* ¶¶ 33, 37, 40.

a. Anti-solicitation scheme

Plaintiffs allege that "[a]round May 2007, Microsoft agreed to be **[*6]** a party to the Anti-Solicitation Agreement," which provided that Microsoft "and each of the other parties" to the agreement, would "'[n]ot . . . directly cold call into those companies [or their respective subsidiaries.]'" *Id.* ¶ 28. According to Plaintiffs, "[c]old calling serves as an essential and effective recruiting method," because current employees of competitors are "often the most highly qualified," but also "often unresponsive to other recruiting strategies." *Id.* ¶ 30. Plaintiffs allege that restrictions on cold calling have the effect of "limit[ing] an employee's leverage when negotiating his or her salary with his or her current employer," and, consequently, negatively "impact[s] all salaried employees of participating companies." *Id.* ¶ 32. More specifically, Plaintiffs contend that anti-solicitation agreements "alleviate[] pressure to retain good employees by paying higher salaries," and "suppress[] wages because other rivals are not actively soliciting employees through promises of higher salaries and benefits." *Id.* ¶ 33.

b. Restricted Hiring Agreement

In addition to the alleged anti-solicitation agreement, Plaintiffs further allege that "around May 2007, Microsoft, along with several other technology **[*7]** companies, entered into a Restrictive Hiring Agreement." *Id.* ¶ 36. Under this alleged restricted hiring agreement, Microsoft and some number of unknown technology companies allegedly agreed "[n]ot to pursue manager level and above candidates for Product, Sales, or G&A roles - even if they have applied" to any of the other "parties to the Anti-Solicitation Agreement." *Id.* According to Plaintiffs, Microsoft entered into the restricted hiring agreement with "the intent and effect of suppressing the compensation and mobility of [its] employees." *Id.* ¶ 37. Other than "the most senior executives, managerial employees and above at these companies were not aware of, and did not agree to, these restrictions." *Id.*

3. Claims

Plaintiffs' complaint contains four claims for relief under the following statutes: (1) Section 1 of the Sherman Act, *15 U.S.C. § 1*; (2) California's Cartwright Act, *Cal. Bus. & Prof. Code § 16720*; (3) California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code §§ 17200 et seq.*; and (4) *California Business & Professions Code § 16600 et seq.* Plaintiffs seek damages, pre- and post-judgment interest, attorney's fees and expenses, and injunctive relief. Compl. at 18.

---

[1] Plaintiffs alternate between referring to this alleged agreement as the "Restrictive Hiring Agreement" and the "Restricted Hiring Agreement." The Court will refer to the agreement as the "restricted hiring agreement," other than when quoting Plaintiffs' inconsistent usage.

C. Procedural History

In light of the relationship between the instant case and the *High-Tech* case, the Court briefly summarizes the relevant **[*8]** procedural history in *High-Tech* in addition to the instant case.

1. *High-Tech* Procedural Background

The *High-Tech* defendants removed the first state-court action on May 23, 2011. No. 11-2509, ECF No. 1. On April 18, 2012, the Court granted in part and denied in part the *High-Tech* defendants' joint motion to dismiss and denied Lucasfilm's motion to dismiss. No. 11-2509, ECF No. 119. On April 5, 2013, the Court granted in part and denied in part the *High-Tech* plaintiffs' motion for class certification with leave to amend. No. 11-2509, ECF No. 382. The Court granted the *High-Tech* plaintiffs' supplemental motion for class certification on October 24, 2013. No. 11-2509, ECF No. 531. On November 13, 2013, the *High-Tech* defendants filed a Rule 23(f) petition before the Ninth Circuit, requesting permission to appeal this Court's October 24, 2013 class certification order. No. 13-80223, ECF No. 1. The Ninth Circuit denied the defendants' petition on January 14, 2014. No. 13-80223, ECF No. 18.

In the interim, three of the *High-Tech* defendants, Intuit, Lucasfilm, and Pixar, reached an early settlement with the plaintiffs. On September 21, 2013, the *High-Tech* plaintiffs filed a motion for preliminary approval **[*9]** of a proposed class action settlement as to defendants Intuit, Lucasfilm, and Pixar. No. 11-2509, ECF No. 501. On October 30, 2013, the Court preliminarily approved the proposed settlement with Intuit, Lucasfilm, and Pixar. No. 11-2509, ECF No. 540. The Court granted final approval as to that settlement on May 16, 2014. No. 11-2509, ECF No. 915. The Court entered a final judgment with regards to Lucasfilm, Pixar, and Intuit on June 9, 2014. No. 11-2509, ECF No. 936. At the request of Intuit, the Court entered an amended final judgment on June 20, 2014. No. 11-2509, ECF No. 947.

The remaining *High-Tech* defendants, Adobe, Apple, Google, and Intel, filed individual motions for summary judgment, and joint motions for summary judgment and to strike certain expert testimony on January 9, 2014. No. 11-2509, ECF Nos. 554 (Intel), 556-57 (joint motions), 560 (Adobe), 561 (Apple), 564 (Google). The Court denied the *High-Tech* defendants' individual motions for summary judgment on March 28, 2014. No. 11-2509, ECF No. 771. On April 4, 2014, the Court granted in part and denied in part the *High-Tech* defendants' motion to strike, and denied the defendants' joint motion for summary judgment. No. 11-2509, **[*10]** ECF No. 778.

On May 22, 2014, the *High-Tech* plaintiffs filed a motion for preliminary approval of class action settlement as to the remaining defendants. No. 11-2509, ECF No. 920. On August 8, 2014, the Court denied the *High-Tech* plaintiffs' motion for preliminary approval, concluding that the proposed settlement did not fall "within the range of reasonableness." No. 11-2509, ECF No. 974, at 30. On September 4, 2014, the *High-Tech* defendants filed a petition for a writ of mandamus with the Ninth Circuit. No. 14-72745, ECF No. 1. On January 13, 2015, the *High-Tech* defendants filed correspondence with the Ninth Circuit referring to a new proposed settlement agreement. No. 14-72745, ECF No. 21. On January 30, 2015, the defendants filed an unopposed motion to dismiss the petition, which the Ninth Circuit granted on February 2, 2015. No. 14-72745, ECF Nos. 23, 24.

On January 15, 2015, the *High-Tech* plaintiffs filed a motion for preliminary approval of class action settlement as to the remaining defendants. No. 11-2509, ECF No. 1032. In this second proposed class action settlement, the parties had reached a settlement amount exceeding the previously rejected settlement by approximately $90.5 **[*11]** million dollars. *Id.* at 1. Following a fairness hearing on March 2, 2015, the Court granted preliminary approval to the January 2015 settlement agreement on March 3, 2015. No. 11-1509, ECF Nos. 1051, 1054. A final approval hearing is scheduled for July 9, 2015.

2. Procedural Background in the Instant Action

Plaintiffs filed their complaint on October 16, 2014. ECF No. 1. The Court related this action to *In re High-Tech Employees Litigation*, No. 11-CV-2509-LHK, on November 19, 2014. ECF No. 24. Defendant Microsoft filed the instant motions to transfer venue and to dismiss on December 15, 2014. ECF Nos. 26, 31. Microsoft also filed a request for judicial notice in connection with its motion to dismiss.[2] ECF No. 33. Plaintiffs filed oppositions to Defendant's motions on January 15, 2015. ECF Nos. 37, 38. Defendant filed replies on January 28, 2015. ECF Nos. 40, 41.

II. MOTION TO TRANSFER VENUE

The Court begins by addressing Defendant's motion to transfer venue pursuant to *28 U.S.C. § 1404(a)*. The Court then turns to Defendant's motion to dismiss under *Rule 12(b)(6)*.

In its motion to transfer venue, Microsoft contends that the Court should transfer this action to the Western District of Washington because (1) Plaintiffs' employment agreements "select the Western District of Washington forum" and (2) the convenience of the parties and witnesses, and the interest of justice favor transfer.

"For the convenience of parties and witnesses, in the interest of justice, a district court may transfer any civil action to any other district or division where it might have been brought." *28 U.S.C. § 1404(a)*. In the Ninth Circuit, the district court has discretion to transfer under *§ 1404(a)*, depending on a "case-by-case consideration of convenience and fairness." *Jones v. GNC Franchising, Inc., 211 F.3d 495, 498 (9th Cir. 2000)* (internal citation and quotation marks omitted). The Court must consider public factors relating to "the interest of justice" and private factors relating to "the convenience of the parties and **[*13]** witnesses." *See Decker Coal Co. v. Commonwealth Edison Co., 805 F.2d 834, 843 (9th Cir. 1986)*. Such factors may include: (1) the location where relevant agreements were negotiated and executed; (2) the state that is most familiar with the governing law; (3) the plaintiff's choice of forum; (4) the parties' contacts with the forum; (5) the contacts relating to the plaintiff's cause of action in the chosen forum; (6) the differences in the costs of litigation in the two forums; (7) the availability of compulsory process to compel attendance of unwilling non-party witnesses; (8) the ease of access to sources of proof; (9) the presence of a forum selection clause; and (10) the relevant public policy of the forum state, if any. *Jones, 211 F.3d at 498-99*. The moving party bears the burden of showing that transfer is appropriate. *Jones, 211 F.3d at 499*.

Transfer under *§ 1404(a)* is only appropriate if the action could properly have been brought in the transferee venue. When deciding whether to transfer venue, the Court "must balance the preference accorded plaintiff's choice of forum with the burden of litigating in an inconvenient forum." *Id.* Plaintiffs do not contest that this action could have been brought in the Western District of Washington. However, Plaintiffs have chosen to bring this action in this District because **[*14]** the alleged anti-solicitation and restricted hiring agreements were made and performed "in Silicon Valley," and the related *High-Tech* action is currently being litigated in this District. Generally, the plaintiff's choice of forum is treated with great deference, and only significant inconvenience or unfairness will justify transfer. *See Shultz v. Hyatt Vacation Mktg. Corp., No. 10-4568, 2011 U.S. Dist. LEXIS 24692, 2011 WL 768735, at *3 (N.D. Cal. Feb. 28, 2011)*. As discussed below, however, Defendant contends that Plaintiffs' choice of forum warrants no deference.

---

[2] The Court GRANTS Defendant's unopposed request for judicial notice and has taken judicial notice of the adjudicative facts contained therein. *See* ECF No. 33. Defendants request that the Court take judicial notice of documents issued by the Department of Justice; public records; and media articles regarding the DOJ investigation. *See United States ex rel. Robinson Rancheria Citizens Council v. Borneo, Inc., 971 F.2d 244, 248 (9th Cir. 1992)* (holding **[*12]** a court may take notice of proceedings in other courts); *Lee v. City of Los Angeles, 250 F.3d 668, 689-90 (9th Cir. 2001)*, *overruled on other grounds by Galbraith v. Cnty. of Santa Clara, 307 F.3d 1119, 1125-26 (9th Cir. 2002)* (matters of public record); *MGIC Indem. Co. v. Weisman, 803 F.2d 500, 505 (9th Cir. 1986)* (court records); ***Von Saher v. Norton Simon Museum of Art at Pasadena, 592 F.3d 954, 960 (9th Cir. 2010)*** (media publications); *see also Fed. R. Evid. 201(d)*.

A. Forum Selection Clause

Here, Microsoft contends that Plaintiffs' employment agreements contain valid forum selection clauses that require Plaintiffs to litigate the instant action in the Western District of Washington. A forum selection clause "may be enforced through a motion to transfer under *§ 1404(a)*." *Atl. Marine Constr. Co., Inc. v. U.S. Dist. Ct. for W. Dist. of Tx., 134 S. Ct. 568, 579, 187 L. Ed. 2d 487 (2013)*. Where a valid forum selection clause applies, it must "be given controlling weight in all but the most exceptional cases." *Id.* (internal quotation marks omitted). More specifically, where a valid forum selection clause preselects a different forum than the one selected by the plaintiff, the *§ 1404(a)* analysis is altered in three ways: (1) the plaintiff's choice of forum "merits no weight," and the burden shifts to the plaintiff to show why the action should not be transferred to **[*15]** the preselected forum; (2) the court "must deem the private-interest factors to weigh entirely in favor of the preselected forum"; and (3) a *§ 1404(a)* transfer of venue "will not carry with it the original venue's choice-of-law rules." *Id. at 582*.

In support of its motion to transfer venue based on a forum selection clause, Microsoft relies on two provisions of Plaintiffs' employment agreements: the noncompetition clauses and the forum selection clauses. The identical noncompetition clauses in Plaintiff Ryan's and Plaintiff Rau's employment agreements provide:

> While employed at MICROSOFT and for a period of one year thereafter, I will not (a) engage in any competitive activities or accept employment by or agree to provide services to any person or entity that engages in competitive activities ("competitive activities" meaning the development, production or provision of any product, service, technology, product feature or project that is or is intended to be competitive with one or more products, services, technologies, product features or projects, including actual or demonstrably anticipated research or development, on which I worked or about which I learned confidential or proprietary information **[*16]** or trade secrets while employed at MICROSOFT or a MICROSOFT subsidiary) . . . .

Declaration of Rob Greenall in support of Microsoft's motion to transfer ("Greenall Decl."), Exh. A, ECF No. 28-1, at 7; Greenall Decl, Exh. B, ECF No. 28-2 at 4. The identical forum selection clauses provide:

> I agree that this Agreement shall be governed for all purposes by the laws of the State of Washington as such laws apply to contracts performed within Washington by its residents and that exclusive venue and exclusive personal jurisdiction **for any action arising out of this Agreement** shall lie in state or federal court located in King County, Washington.

Greenall Decl., Exh. A, ECF No. 28-1, at 8 (emphasis added); Greenall Decl, Exh. B, ECF No. 28-2 at 5 (emphasis added).

As a general matter, forum selection clauses covering disputes "arising out of" a contract are narrower than those covering disputes "arising out of or relating to" a contract. *Mediterranean Enters., Inc. v. Ssangyong Corp., 708 F.2d 1458, 1464 (9th Cir. 1983)*. Where a forum selection clause covers only disputes "arising out of" a contract, the Ninth Circuit has held that the forum selection clause should be "narrowly construed." *Cape Flattery Ltd. v. Titan Maritime, LLC, 647 F.3d 914, 922 (9th Cir. 2011)*. These "arising out of" and "arising under" forum selection clauses apply only to "disputes **[*17]** and controversies relating to the interpretation of the contract and matters of performance." *Mediterranean Enters., 708 F.2d at 1464*. In contrast, a forum selection clause which covers disputes "arising out of or relating to" a contract applies much more broadly, as "the inclusion of the phrase 'relating to' should lead to a 'broad[er]' interpretation." *Perry v. AT&T Mobility LLC, No. C 11-01488 SI, 2011 U.S. Dist. LEXIS 102334, 2011 WL 4080625, at *4 (N.D. Cal. Sept. 12, 2011)* (quoting *Cape Flattery, 647 F.3d at 922-23*).

Here, the relevant forum selection clauses cover "any action arising out of" Plaintiffs' employment agreements. As such, the scope of the forum selection clauses is limited to disputes which require "interpretation of the contract." *Mediterranean Enters., 708 F.2d at 1464*. Microsoft contends that because Plaintiff Ryan and Plaintiff Rau agreed to noncompetition clauses that prevented Plaintiffs from working for competitor companies for a period of one year following the termination of Plaintiffs' employment with Microsoft, those noncompetition clauses "create[d] a powerful disincentive for competing companies to 'poach' them." ECF No. 26 at 8. According to Microsoft, this "powerful disincentive" will be material to adjudicating Plaintiffs' claims against Microsoft. However, Microsoft does not explain why resolution of Plaintiffs' antitrust claims will require interpretation of **[*18]** the scope of Plaintiffs' noncompetition agreements. In the instant case, the Court concludes that Plaintiffs' claims do not "arise out of" Plaintiffs' employment contracts because whether Defendant violated federal and state antitrust laws does not require interpretation of Plaintiffs' employment agreements.

More specifically, Plaintiffs aver that Microsoft engaged in anticompetitive behavior by conspiring with other technology companies to suppress employee compensation and restrict mobility. *See* Compl. ¶¶ 28, 33, 36, 40-44. It may be the case that Plaintiffs were less likely to have been "poached" as a result of the noncompetition clauses, but that argument alone does not establish that adjudication of Plaintiffs' claims will require interpretation of their employment agreements. Microsoft assumes that resolving Plaintiffs' claims will require a finding that but-for Microsoft's alleged anticompetitive behavior, Plaintiffs would have taken positions at competing companies in breach of Plaintiffs' employment agreements. This straw-man argument is both incorrect and not determinative to the scope of the forum selection clause. *See Cape Flattery, 647 F.3d at 922* ("The fact that the tort claim would not have arisen **[*19]** 'but for' the parties' licensing agreement is not determinative [to the scope of the arbitration clause].") (internal quotation marks omitted).[3]

Here, Plaintiffs allege that Microsoft participated in a conspiracy which resulted in artificially depressed compensation for all employees at "high technology" companies, and restricted employee mobility because Microsoft and its co-conspirators agreed not to solicit each other's employees and restricted their hiring practices for certain types of employees. *See* Compl. ¶¶ 42-43. Whether Microsoft did in fact engage in a conspiracy that had the effect of depressing employee wages and restricting mobility does not require determining whether Plaintiffs' employment agreements were breached, or the scope of the rights and responsibilities of the parties under Plaintiffs' employment agreements. *See, e.g., Hopkins & Carley, ALC v. Thomson Elite, No. 10-CV-05806-LHK, 2011 U.S. Dist. LEXIS 38396 2011 WL 1327359, at *6 (N.D. Cal. Apr. 6, 2011)* (plaintiff's claims "arose under" contract where the claims required "interpretation of the obligations **[*20]** [defendant] owed [plaintiff] under the contract, the services [defendant] agreed to perform under the contract, and the product and services [plaintiff] contracted to receive"). Nor are Plaintiffs' claims related to the conditions under which Plaintiffs agreed to work for Microsoft. Rather, Plaintiffs' claims are based on Microsoft's alleged illegal conduct that is wholly independent of Plaintiffs' agreements not to seek employment with a competitor for a period of one year.

In sum, the Court concludes that the forum selection clauses in Plaintiffs' employment agreements do not apply to the instant litigation as Plaintiffs' claims do not "arise out of" the employment agreements. Microsoft has failed to show that Plaintiffs' claims "cannot be adjudicated without analyzing whether the parties were in compliance with the contract." *See* *Manetti-Farrow, 858 F.2d at 514*. As such, Plaintiffs' claims do not "arise out of" their employment agreements, and the forum selection clauses do not cover the instant dispute. As such, the burden of showing why transfer is warranted in this action remains with Defendant Microsoft, and the Court evaluates Microsoft's motion under the normal *§ 1404(a)* framework. *See* *Jones, 211 F.3d at 499*; *Atl. Marine, 134 S. Ct. at 582*.

1. Private Factors

Microsoft **[*21]** argues, in the alternative, that even if the forum selection clauses do not apply, the private factors under *§ 1404(a)* weigh in favor of transfer. Under *Jones*, the private factors to be considered in a *§ 1404(a)* analysis include, where relevant: (1) the location where relevant agreements were negotiated and executed; (2) the plaintiff's choice of forum; (3) the parties' contacts with the forum; (4) the contacts relating to the plaintiff's cause of action in the chosen forum; (5) the differences in the costs of litigation in the two forums; (6) the availability of compulsory process to compel attendance of unwilling non-party witnesses; and (7) the ease of access to sources of proof. *Jones, 211 F.3d at 498-99*.

[3] As the Ninth Circuit explained in *Manetti-Farrow, Inc. v. Gucci Am., Inc, 858 F.2d 509, 514 n.4 (9th Cir. 1988)*, "an agreement to arbitrate is actually a specialized forum selection clause," and the analysis of one is therefore applicable to the analysis of the other.

Relevant agreements: Here, Microsoft argues that the "relevant agreements" are Plaintiffs' employment agreements, which the parties entered into in the State of Washington. See ECF No. 26 at 10-11. However, as the Court concluded above, the "relevant agreements" at issue in this litigation are not Plaintiffs' employment agreements, but rather the alleged anti-solicitation and restricted hiring agreements. Plaintiffs argue in opposition to Defendant's motion that Defendant negotiated and entered into the anti-solicitation **[*22]** and restricted hiring agreements in Silicon Valley, i.e., within the geographic boundaries of this District. According to Plaintiffs, the anti-solicitation and restricted hiring agreements were "discussed, negotiated, agreed upon, performed, and enforced by Microsoft and others in California - particularly in Silicon Valley." Compl. ¶ 12. This factor therefore weighs against transfer.

Plaintiffs' Choice of Forum, the Parties' Contacts, and the Contacts Relating to Plaintiffs' Claims in the Chosen Forum: The Court concludes that these factors also weigh against transfer of venue. As to Plaintiffs' choice of forum in the Northern District of California, the Court agrees with Microsoft that Plaintiffs' choice is not entitled to the "substantial consideration generally given to a plaintiff's choice of forum." *Park v. Dole Fresh Vegetables, Inc., 964 F. Supp. 2d 1088, 1094 (N.D. Cal. 2013)*. As Microsoft notes, a plaintiff's choice of forum is afforded less deference where "(1) the plaintiff's venue choice is not its residence, (2) the conduct giving rise to the claims occurred in a different forum; (3) the plaintiff sues on behalf of a putative class; or (4) plaintiff's choice of forum was plaintiff's second choice." *Id.* (internal quotation marks and citations omitted); **[*23]** *see also Lou v. Belzberg, 834 F.2d 730, 739 (9th Cir. 1987)*. In the instant case, Plaintiffs bring suit on behalf of a putative class, a fact that detracts from the deference given to Plaintiffs' choice of venue. Neither Plaintiff is a resident of this District, though Plaintiff Ryan is a resident of California. These factors call for less deference. However, Plaintiffs allege that the anticompetitive conduct giving rise to their claims took place in the Northern District of California. Compl. ¶¶ 16, 12. Moreover, there is no indication that this District is Plaintiffs' second choice. *See, e.g., Glaxo Grp. Ltd. v. Genentech, Inc., No. 10-00675, 2010 U.S. Dist. LEXIS 46440, 2010 WL 1445666, at *4 (N.D. Cal. Apr. 12, 2010)* (plaintiffs first filed in Florida before filing in transferor district). These two factors would therefore weigh in favor of deferring to Plaintiffs' choice of forum. Balancing these factors, the Court finds that Plaintiffs' choice of forum is entitled to some deference, though not the "substantial deference" normally afforded to a plaintiff's choice of forum.

Moreover, in addition to Plaintiffs' decision to file the instant action in this District, the Court finds that the parties have substantial contacts with this District. Plaintiffs point to Microsoft's extensive contacts with this forum, including Microsoft's offices in Mountain View, **[*24]** CA and San Francisco, CA. ECF No. 37 at 3. While Microsoft argues that its corporate headquarters and the majority of its employees are located in Washington, Microsoft does not contest that it has extensive contacts with the Northern District of California, including the aforementioned corporate offices and several hundred California employees. ECF No. 37 at 7; ECF No. 40 at 7. Furthermore, Plaintiffs contend that the conspiracy at issue in the instant litigation is the "same anti-poaching agreement being litigated in the *In re High Tech* case," and involves the same conspirators. ECF No. 37 at 3. The Court therefore concludes that these factors weigh against transfer.

Differences in Costs, Compulsory Process, and Availability of Witnesses and Evidence: The Court finds that these factors weigh in favor of transfer. Here, Microsoft contends that its personnel management records are located in Washington. Greenall Dec. ¶ 3. These documents will be relevant evidence as to Microsoft's "recruiting, hiring, and compensation of the proposed class members." ECF No. 26 at 10. As Microsoft concedes, however, the availability of electronic records and methods of electronic conveyance have substantially **[*25]** reduced the costs of transferring documents from one locale to another. *See Park, 964 F. Supp. 2d at 1095*. This factor therefore only weighs slightly in favor of transfer.

Microsoft also argues that several potential witnesses, including Plaintiffs' former supervisors, and Microsoft's "Senior Personnel Management Manager," and "Staffing Director," live in Washington. ECF No. 26 at 9. According to Microsoft, two former employees that managed and supervised Plaintiffs' work at Microsoft would not be subject to compulsory process in this District. Plaintiffs dispute whether Plaintiffs' former supervisors' testimony will be relevant to whether Microsoft was part of a conspiracy to suppress employee compensation and restrict employee mobility. The Court agrees that this may be true. However, Plaintiffs' individual performances may be relevant to determining damages and Plaintiffs' ability to represent the class. Moreover, Plaintiffs concede that Microsoft and its witnesses would incur travel expenses and be inconvenienced by venue in the Northern District of California, and that certain nonparty witnesses may not be available for live testimony outside of Washington. Balancing the costs and inconvenience to potential **[*26]** witnesses and the possibility that some of Microsoft's purported witnesses are unlikely to offer relevant testimony, the Court concludes that these factors weigh somewhat in favor of transfer.

On balance, the Court finds that the private factors weigh slightly against transfer of this action to the Western District of Washington. Plaintiffs' choice of forum is entitled to some deference, and Plaintiffs have alleged that the relevant agreements implicated by Plaintiffs' state and federal antitrust claims were negotiated, entered into, and enforced within this District. Moreover, Microsoft has substantial contacts with this District, and Plaintiff Ryan is a resident of California. While the Court concludes that Microsoft has shown that certain witnesses would be inconvenienced by Plaintiffs' choice of venue and that the cost of litigation may be higher in this District, these factors alone are not determinative. In sum, the private factors weigh slightly against transfer.

2. Public Factors

In evaluating whether transfer would serve the interest of justice, a court may consider "public interest factors such as court congestion, local interest in deciding local controversies, conflicts of **[*27]** laws, and burdening citizens in an unrelated forum with jury duty." *Decker Coal, 805 F.2d at 843*.

Here, Plaintiffs contend that venue is appropriate in the instant District because of the related action *In re High-Tech*. As discussed above, there is substantial factual overlap between the instant case and the alleged conspiracies in *High-Tech*. Plaintiffs allege that Microsoft was a party to the same anti-solicitation agreements at issue in the *High-Tech* litigation. Based on this apparent factual overlap, the Court related the instant case to *High-Tech* on November 19, 2014. ECF No. 24. Microsoft disputes the veracity of Plaintiffs' allegations and contends that the record in *High-Tech* illustrates the implausibility of Plaintiffs' claims. *See* ECF No. 26 at 15. However, whether or not Plaintiffs will ultimately prevail on their claims does not impact whether it would best conserve judicial resources for this Court to retain jurisdiction over this action in light of its familiarity with the *High-Tech* litigation. The Court concludes that the significant overlap between Plaintiffs' claims in the instant action and the related action *High-Tech* weigh against transfer. *See, e.g., FTC v. Watson Pharms., Inc., 611 F. Supp. 2d 1081, 1089 (C.D. Cal. 2009)* (familiarity with underlying facts weighed **[*28]** against transfer). Additionally, court congestion weighs in favor of transfer, as Defendant argues that the Western District of Washington has "materially fewer pending cases" than the Northern District of California. However, in light of this District's familiarity with alleged underlying agreements, the Court concludes that court congestion is of less importance here.

Moreover, Microsoft argues that Washington has a significant interest in resolving controversies between its citizens, including Microsoft, putative class members, and Plaintiff Rau. ECF No. 26 at 14. However, as Plaintiffs note, Plaintiff Ryan is a citizen of California, and Plaintiffs have alleged that a number of potential class members reside in California. Furthermore, to the extent Plaintiffs contend that the relevant, alleged anticompetitive agreements were negotiated, entered into, and performed in this District, this would support California's interest in this action. On balance, the Court concludes that this factor is neutral.

Defendant also contends that Washington law governs Plaintiffs' employment agreements and will therefore be "central" to this dispute. As discussed above, the Court is not persuaded that **[*29]** the enforceability or terms of Plaintiffs' employment agreements are material to Plaintiffs' claims in the instant action. Moreover, Plaintiffs also assert claims under California law, and have alleged negative effects of Microsoft's alleged anticompetitive behavior within the State of California. Whether or not the Court has to apply California or Washington law, the Court notes that both the Western District of Washington and the Northern District of California are capable of applying both Washington and California law. *Cf. Foster v. Nationwide Mut. Ins. Co., No. 07-04928, 2007 U.S. Dist. LEXIS 95240, 2007 WL 4410408, at *6 (N.D. Cal. Dec. 14, 2007)* (noting that federal courts are "fully capable" of applying the laws of different states). While each District may be more familiar with the law of the state in which it sits, here the parties assert that both California and Washington state law may be implicated. As such, the Court finds that the "familiarity of each forum with the applicable law" factor neither weighs for nor against transfer.

In sum, the Court finds that the "interest of justice" would not be best served by transfer of the instant litigation to the Western District of Washington. While court congestion might weigh in favor of transfer, this District's familiarity with the related *High-Tech* **[*30]** litigation would also conserve judicial resources. The "applicable state law" and "local interest" factors are neutral, as both California and Washington have interests in this litigation, and both the Western District of Washington and Northern District of California are fully capable of applying either or both California and Washington law. Having evaluated these factors, the Court concludes that the public factors do not weigh in favor of transfer.

3. Conclusion

The Court therefore concludes that Defendant Microsoft has failed to carry its burden of showing that transfer of venue to the Western District of Washington is warranted in the instant action. Viewing the totality of the circumstances, the Court concludes that while this action could have been brought in the Western District of Washington, the interest of justice and the convenience of the parties do not call for transfer of the instant action to Washington. Accordingly, Microsoft's motion to transfer venue is denied.

III. MOTION TO DISMISS

In addition to its motion to transfer venue, Microsoft also moves to dismiss Plaintiffs' complaint. The Court turns to this motion below.

A. Legal Standard

1. *Rule 12(b)(6)*

Under *Federal Rule of Civil Procedure 12(b)(6)*, a party may move to dismiss **[*31]** a complaint for failure to state a claim upon which relief can be granted. Such a motion tests the legal sufficiency of a complaint. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. In considering whether the complaint is sufficient, the Court must accept as true all of the factual allegations contained in the complaint. *Iqbal, 556 U.S. at 678*. However, the Court need not accept as true "allegations that contradict matters properly subject to judicial notice or by exhibit" or "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)* (citation omitted). While a complaint need not allege detailed factual allegations, it "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Iqbal, 556 U.S. at 678* (internal citation omitted).

2. *Rule 9(b)*

Claims sounding in fraud or mistake are subject to the heightened pleading requirements of **[*32]** *Federal Rule of Civil Procedure 9(b)*, which require that a plaintiff alleging fraud "must state with particularity the circumstances constituting fraud." *Fed. R. Civ. P. 9(b)*; *see Kearns v. Ford Motor Co., 567 F.3d 1120, 1124 (9th Cir. 2009)*. To satisfy the heightened standard under *Rule 9(b)*, the allegations must be "specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong." *Semegen v. Weidner, 780 F.2d 727, 731 (9th Cir. 1985)*. Thus, claims sounding in fraud must allege "an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations." Swartz v. KPMG LLP, 476 F.3d 756, 764 (9th Cir. 2007) (per curiam) (internal quotation marks and citation omitted). A plaintiff must set forth what is false or misleading about a statement, and why it is false." In re GlenFed, Inc. Sec. Litig., 42 F.3d 1541, 1548 (9th Cir. 1994) (en banc), *superseded by statute on other grounds as stated in* Marksman Partners, L.P. v. Chantal Pharm. Corp., 927 F. Supp. 1297, 1309 (C.D. Cal. 1996). However, "intent, knowledge, and other conditions of a person's mind" need not be stated with particularity, and "may be alleged generally." Fed. R. Civ. P. 9(b).

3. Leave to Amend

If the court concludes that the complaint should be dismissed, it must then decide whether to grant leave to amend. Under Rule 15(a) of the Federal Rules of Civil Procedure, leave to amend "shall be freely given when justice so requires," bearing in mind "the **[*33]** underlying purpose of Rule 15 . . . [is] to facilitate decision on the merits, rather than on the pleadings or technicalities." Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000) (en banc) (internal quotation marks and citation omitted). Nonetheless, a district court may deny leave to amend a complaint due to "undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, [and] futility of amendment." *See* Leadsinger, Inc. v. BMG Music Publ'g, 512 F.3d 522, 532 (9th Cir. 2008).

B. Discussion

Defendant moves to dismiss Plaintiffs' complaint on five grounds: (1) Plaintiffs' claims are time barred; (2) Plaintiffs fail to adequately allege facts supporting their antitrust claims; (3) Plaintiffs fail to plead facts to support the application of California law; (4) Plaintiffs have no right to restitution as a remedy under California's Unfair Competition Law ("UCL"); and (5) Plaintiffs lack standing to assert a claim under *California Business & Professions Code § 16600*. As the Court concludes that Plaintiffs' claims are time barred, the Court does not reach the remainder of Defendant's arguments.

Microsoft contends that Plaintiffs' claims are time barred. The parties agree that Plaintiffs' Sherman Act, Cartwright **[*34]** Act, and UCL claims are subject to a four year statute of limitations. The parties dispute: (1) whether Plaintiffs' *California Business & Professions Code § 16600* claim is subject to a four year statute of limitations; (2) when Plaintiffs' federal and state law claims accrued; and (3) whether Plaintiffs have sufficiently alleged fraudulent concealment so as to toll the statute of limitations.

1. Statutes of Limitations

As a threshold matter, the Court agrees that Plaintiffs' claims under the Sherman Act, Cartwright Act, and UCL are all subject to a four year statute of limitations. *See* 15 U.S.C. § 15b (Sherman Act); Cal. Bus. & Prof. Code § 16750.1 (Cartwright Act); Cal. Bus. & Prof. Code § 17208 (UCL). The statute of limitations provision in the Sherman Act provides:

> Any action to enforce any cause of action under section 15, 15a, or 15c of this title shall be forever barred unless commenced within four years after the cause of action accrued. No cause of action barred under existing law on the effective date of this Act shall be revived by this Act.

15 U.S.C. § 15b. The statute of limitations provision under California's Cartwright Act is functionally identical:

> Any civil action to enforce any cause of action for a violation of this chapter shall be commenced within four years after the cause of action accrued. No cause of action barred under **[*35]** existing law on the effective date of the amendment of this section at the 1977-78 Regular Session of the Legislature shall be revived by such amendment.

Cal. Bus. & Prof. Code § 16750.1. California's UCL similarly provides for a four-year statute of limitations:

> Any action to enforce any cause of action pursuant to this chapter shall be commenced within four years after the cause of action accrued. No cause of action barred under existing law on the effective date of this section shall be revived by its enactment.

Cal. Bus. & Prof. Code § 17208 (UCL).

As to the *California Business & Professions Code § 16600* claim, Microsoft argues that *§ 16600* is part of the Cartwright Act and therefore subject to the Cartwright Act's four year statute of limitations. *See* *Cal. Bus. & Profs. Code §16750.1*. Microsoft relies on references to the Cartwright Act as "*California Business and Professions Code §§ 16600 et seq.*" *See* ECF No 41 at 2 (citing *ABC Int'l Traders v. Yamaha Corp. of Am., No. CV-86-7892, 1993 U.S. Dist. LEXIS 20947, at *20 (N.D. Cal. Jan. 27, 1993)*; *Cal. ex rel. Lockyer v. Mirant Corp., No. 2-1787, 2002 U.S. Dist. LEXIS 15733, at *17 (N.D. Cal. Aug. 6, 2002))*. However, that part of the California Business & Professions Code, part 2 of division 7 (titled "General Business Regulations"), includes the Cartwright Act, *§§ 16700-16770*, the Unfair Practices Act, *§§ 17000-17101*, and the Unfair Competition Act, *§§ 17200-17210*, in addition to other statutory restrictions on covenants not to compete.

Moreover, the language of *§ 16750.1*, the Cartwright **[*36]** Act's statute of limitations, expressly provides that "[a]ny civil action to enforce any cause of action for *a violation of this chapter* shall be commenced within four years after the cause of action accrued." The chapter to which *§ 16750.1* refers is "Chapter 2. Combinations in Restraint of Trade," which includes *§§ 16700-16770*, i.e., the Cartwright Act. *See* *Cal. Bus. & Profs. Code § 16750.1*. As Microsoft cites no authority actually concluding that the express language of *§ 16750.1* has been interpreted to apply to "Chapter 1. Contracts in Restraint of Trade," which includes *§§ 16600-16607*, the Court concludes that *§ 16600* is neither a part of the Cartwright Act nor governed by the Cartwright Act's four year statute of limitations.

However, Plaintiffs are incorrect in stating that there is no applicable statute of limitations for *§ 16600* whatsoever. *Section 343* of the California Code of Civil Procedure provides that "[a]n action for relief not hereinbefore provided for must be commenced within four years after the cause of action shall have accrued." While *§ 16750.1* of the Cartwright Act may not apply to Plaintiffs' *§ 16600* claim, the Court finds no reason why California's catch-all statute of limitations provision in California Code of Civil Procedure *§ 343* would not apply to this action. *See, e.g.,* *Bd. of Trustees of Leland Stanford Junior Univ. v. Roche Molecular Sys., Inc., 583 F.3d 832, 846 (Fed. Cir. 2009)* (noting that **[*37]** *§ 343* is a "residuary four-year limitation period to all causes of action that do not fall under specific statutes of limitation").

In sum, the Court concludes that each of Plaintiffs' four claims is subject to a four year statute of limitations.

2. Accrual Rule

As the parties separately dispute when Plaintiffs' federal and state law claims accrued, the Court begins by addressing Plaintiffs' federal Sherman Act claim before turning to Plaintiffs' state law claims.

a. Sherman Act

Under the Sherman Act, Plaintiffs' claims began to accrue at the time Microsoft allegedly injured Plaintiffs. *See* *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)* ("Generally, [an antitrust cause] of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business. . . ."). As the Ninth Circuit explained in *Beneficial Standard Life Insurance Co. v. Madariaga, 851 F.2d 271, 274-75 (9th Cir. 1988)*, "In [antitrust] actions governed by *15 U.S.C. § 15b*, the plaintiff's knowledge is generally irrelevant to accrual, which is determined according to the date on which injury occurs." Plaintiffs concede, as they must, that the "injury rule" of accrual applies to their Sherman Act claims. *See also* *In re Animation Workers Antitrust Litig., __ F. Supp. 2d. __, 2015 U.S. Dist. LEXIS 44922, 2014 WL 1522368, at *10-11 (N.D. Cal. April 3, 2015)*.

Here, Plaintiffs' claim began to accrue in 2007, when Plaintiff Ryan worked for Microsoft as a Senior Product Manager, and Plaintiff **[*38]** Rau worked for Microsoft as a Lead Systems Engineer Senior. Compl. ¶¶ 16, 18. Plaintiffs further allege that Microsoft entered into the anti-solicitation agreement and restricted hiring agreement "around May 2007." *Id.* ¶¶ 28, 36. Consequently, the four year statute of limitations ran on Plaintiffs' claim in 2011. As Plaintiffs filed their complaint on October 16, 2014, Plaintiffs' claim is time barred unless Plaintiffs have sufficiently alleged that their claim falls within two narrow statute of limitations exceptions or that a tolling doctrine applies. The Court first addresses the applicability of: (1) an exception for unascertainable damages; and (2) an exception for "continuing violations" by Defendant. The Court then addresses whether Defendant's alleged fraudulent concealment should toll the statute of limitations.

First, Plaintiffs contend that their Sherman Act claim is subject to the narrow exception for unascertainable damages. *See* *Zenith, 401 U.S. at 340*. As the Ninth Circuit has explained, if "harm is uncertain or speculative at the time of the antitrust violation, the statute of limitations period begins on the date that the plaintiff's damages first accrued and became ascertainable." *Samsung Elecs. Co., Ltd. v. Panasonic Corp., 747 F.3d 1199, 1204 (9th Cir. 2014)* (internal **[*39]** quotation marks omitted). Here, Plaintiffs argue that their damages were "unascertainable" until May 2013, when Plaintiffs first discovered Microsoft's alleged involvement in the anti-solicitation and restricted hiring agreements, because Plaintiffs "did not know" the terms, existence, parties, or scope of the agreements. ECF No. 38 at 6. This argument fails as a matter of law.

As an initial matter, Plaintiffs misunderstand the scope of the speculative damages exception. The unascertainable damages exception is not related to whether Plaintiffs were aware of the existence of their injuries. *See* P. Areeda and H. Hovencamp, ***Antitrust Law*** § 320d ("The question of whether there is a right to recovery is not to be confused with the difficulty in ascertaining the scope or extent of the injury."). Instead, the unascertainable damages exception addresses situations where it is not certain that a plaintiff has been injured at the time a defendant commits the relevant anticompetitive act. More specifically, "the key question in determining whether damages were overly speculative such that recovery would be unavailable at the time of the initial act is whether the existence of the harm is determinable, **[*40]** not the specific dollar value of that harm." *Samsung, 747 F.3d at 1204* (citing *Pace, 813 F.2d at 240*). That Plaintiffs "did not 'know for certain' whether or to what extent they had been damaged prior to May 2013," does not show Plaintiffs would not have been able to allege the fact of damages at the time Microsoft allegedly entered into the anticompetitive agreements.

Plaintiffs rely on *Samsung*, but that case is distinguishable. In *Samsung*, the Ninth Circuit concluded that the unascertainable damages exception applied to Samsung's claims because at the time the defendants entered into the illegal conspiracy, whether or not Samsung would actually suffer damages was too speculative to support a claim. *Samsung, 747 F.3d at 1205*. More specifically, the Ninth Circuit noted that at the time the defendants allegedly conspired and entered into their anticompetitive agreement in 2003, Samsung was not in the same market as the defendants, and no one could have predicted that Samsung would enter that market in late 2006. *Id. at 1202, 1204-05*. As such, Samsung's damages were unascertainable in 2003, that is, at the time defendants entered into the alleged anticompetitive conspiracy. Here, in contrast, at the time of the alleged "initial wrong," e.g., Microsoft becoming a party to the **[*41]** anti-solicitation and restricted hiring agreements in 2007, Plaintiffs allegedly suffered ascertainable damages as Microsoft employees who were injured by Microsoft's alleged illegal conduct. Unlike in *Samsung*, where Samsung could not have alleged an actual injury in 2003 when the defendants entered into their conspiracy, here Plaintiffs could have alleged actual damages and injury in 2007 when Microsoft allegedly entered into the anti-solicitation and restricted hiring agreements. *See id.* That Plaintiffs were unaware of the scope or precise amount of damages in 2007 is not relevant to whether Plaintiffs suffered an ascertainable injury in 2007. *See* *Samsung, 747 F.3d at 1204*; *Pace, 813 F.2d at 240*.

The Court therefore concludes that Plaintiffs' claims do not fall within the unascertainable damages exception.

Second, Plaintiffs further argue that even if their claim would otherwise be time barred, Microsoft engaged in "continuing violations" that would render Plaintiffs' claim timely. Defendant argues that Plaintiffs have failed to allege any facts showing that Defendant engaged in any "overt acts" that would restart the statute of limitations.

Under the "continuing violation" doctrine, "each overt act that is part of the [antitrust] **[*42]** violation and that injures the plaintiff . . . starts the statutory period running again, regardless of the plaintiff's knowledge of the alleged illegality at much earlier times." *Klehr v. A.O Smith Corp., 521 U.S. 179, 189, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)* (internal citations and quotations omitted); *Pace Indus. v. Three Phoenix Co., 813 F.2d 234, 237 (9th Cir. 1987)* ("A continuing violation is one in which the plaintiff's interests are repeatedly invaded and a cause of action arises each time the plaintiff is injured."). In the Ninth Circuit, an overt act restarts the statute of limitations if it: (1) is "a new and independent act that is not merely a reaffirmation of a previous act"; and (2) "inflict[s] new and accumulating injury on the plaintiff." *Pace, 813 F.2d at 237*; *see also* *Samsung, 747 F.3d at 1202-03*.

Here, the Court concludes that the bald assertion that "Microsoft's conspiracy was a continuing violation through which Microsoft repeatedly invaded Plaintiffs' and Plaintiff Classes' interests by adhering to, enforcing, and reaffirming the anticompetitive agreements described herein" is insufficient to show a continuing violation. *See* Compl. ¶ 55. A review of the specific factual allegations in Plaintiffs' complaint reveals no alleged wrongful communications or specific conduct during the limitations period. Other than the two allegations that Microsoft entered into the anti-solicitation **[*43]** and restricted hiring agreements in or around May 2007, the complaint is bereft of *any* dates or details with regards to Microsoft's specific conduct. *See generally* Compl. There are no allegations of any new or independent actions taken by the Defendants after October 16, 2010, i.e., within four years of the filing date of this complaint, that caused Plaintiffs any new or accumulating injury. *See* *Pace, 813 F.2d at 237*. This is not entirely surprising given the complaint's conspicuous absence of specific factual allegations regarding Microsoft's alleged conduct before, during, or after the limitations period, with the exception of the two allegations that Microsoft entered into the anti-solicitation and restricted hiring agreements in May 2007.

In opposition, Plaintiffs rely on their allegations that Microsoft "communicated by phone and e-mail and through in-person meetings to further the conspiracy," and the use of the present tense in describing the effect of the alleged anti-solicitation and restricted hiring agreements. *See* ECF No. 38 at 15. The Court finds these allegations woefully lacking. Plaintiffs have pled no facts supporting their allegations. At a minimum, under *Twombly*, a complaint "must contain **[*44]** sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678*. Plaintiffs offer no facts detailing who Microsoft's alleged co-conspirators were, much less any facts showing when, where, or with whom these alleged phone calls, emails, and in-person meetings took place. Similarly, allegations that the anti-solicitation agreement "suppresses wages," or that "[a]s additional companies joined the conspiracy . . . competition among participating companies for skilled labor continued to drop," do not show that Microsoft took any overt act within the limitations period. As a threshold matter, Plaintiffs need to do more than merely allege a continuing violation—they must also allege an overt act:

> A continuing violation is one in which the plaintiff's interests are repeatedly invaded and a cause of action arises each time the plaintiff is injured. *However, even when a plaintiff alleges a continuing violation, an overt act by the defendant is required* to restart the statute of limitations and the statute runs from the last overt act.

Pace, 813 F.2d at 237 (emphasis added). Plaintiffs' bare allegation that their interests were "repeatedly invaded" is therefore insufficient as **[*45]** a matter of law. Here, the Court finds that Plaintiffs have failed to plead that Microsoft engaged in an overt act, e.g., that Microsoft engaged in a "new and independent act that is not merely a reaffirmation of a previous act," which "inflict[ed] new and accumulating injury" on Plaintiffs. *Id. at 238*.

In sum, Plaintiffs have failed to allege a continuing violation.

Third, Plaintiffs also argue that the statute of limitations on their Sherman Act claim should be tolled under the fraudulent concealment doctrine. Defendant contends that Plaintiffs' allegations are insufficient under *Rule 9(b)*, Plaintiffs have failed to plead diligence, and Plaintiffs were on inquiry notice of their claims.

"A statute of limitations may be tolled if the defendant fraudulently concealed the existence of a cause of action in such a way that the plaintiff, acting as a reasonable person, did not know of its existence." *Hexcel Corp. v. Ineos Polymers, Inc., 681 F.3d 1055, 1060 (9th Cir. 2012)*. The plaintiff bears the burden of pleading and proving fraudulent concealment. *Id.*; *see also* *Conmar v. Mitsui & Co. (U.S.A.), Inc., 858 F.2d 499, 502 (9th Cir. 1988)*. To plead fraudulent concealment, the plaintiff must allege that: (1) the defendant took affirmative acts to mislead the plaintiff; (2) the plaintiff did not have "actual or constructive knowledge of the facts giving rise to its **[*46]** claim" as a result of defendant's affirmative acts; and (3) the plaintiff acted diligently in trying to uncover the facts giving rise to its claim. *Hexcel, 681 F.3d at 1060*; *see also* *Conmar, 858 F.2d at 502*; *Beneficial Life Ins., 851 F.2d at 276*. Moreover, allegations of fraudulent concealment must be pled with particularity. *Conmar, 858 F.2d at 502*.

As a threshold matter, Plaintiffs contend that they do not need to plead affirmative acts of concealment because Microsoft had a duty to disclose its participation in the alleged anticompetitive conspiracy to Plaintiffs. *See* ECF No. 38 at 7 ("Defendant absolutely had a duty to disclose to Plaintiffs its unlawful Agreement . . . ."). In the Ninth Circuit, "passive concealment of information is not enough to toll the statute of limitations, unless the defendant had a fiduciary duty to disclose information to the plaintiff." *Conmar, 858 F.2d at 505* (internal citation omitted). Plaintiffs rely on a single case, *Harris v. Duty Free Shoppers Ltd. Partnership, 940 F.2d 1272, 1276 (9th Cir. 1991)*, for the proposition that Microsoft owed Plaintiffs, and all of Microsoft's employees, a fiduciary duty. *Harris*, however, is inapposite. In *Harris*, the Ninth Circuit held that tour guides did not owe fiduciary duties to tourists under California law. *Id. at 1275*. Moreover, as a general matter, the fact of an employer-employee relationship alone is insufficient to create **[*47]** a fiduciary relationship. *See, e.g.,* *Salsgiver v. Am. Online, Inc., 32 F. App'x 894 (9th Cir. 2002)* (citing *O'Dell v. Freightliner Corp., 10 Cal. App. 4th 645, 659, 12 Cal. Rptr. 2d 774 (Ct. App. 1992))* ("[T]here is generally no fiduciary relationship between employee and employer."); *see also* *Amid v. Hawthorne Comm. Medical Grp., Inc., 212 Cal. App. 3d 1383, 1391, 261 Cal. Rptr. 240 (Ct. App. 1989)* ("A bare employee-employer relationship does not create a confidential relationship."). Plaintiffs offer no other argument or authority for the proposition that Microsoft owes fiduciary duties to Plaintiffs, much less to all of Microsoft's employees. As Plaintiffs have provided no basis for the Court to conclude that Defendant owed Plaintiffs fiduciary duties, the Court concludes that Microsoft had no obligation to affirmatively disclose its alleged illicit conduct.

Moreover, having reviewed Plaintiffs' complaint, the Court concludes that Plaintiffs' allegations with respect to Microsoft's alleged fraudulent concealment of Plaintiffs' claims fail to pass muster under *Rule 9(b)*. To satisfy the heightened standard under *Rule 9(b)*, Plaintiffs must allege "an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations." *Swartz, 476 F.3d at 764 (9th Cir. 2007)*. Plaintiffs fail to allege any facts whatsoever showing the "who, what, where, when, and how" of Microsoft's alleged fraudulent concealment. For example, Plaintiffs allege **[*48]** that "Microsoft also provided pretextual, incomplete, or materially false and misleading explanations for hiring, recruiting, and compensation decisions made under the conspiracy." Compl. ¶ 59. Plaintiffs do not allege when, where, or to whom Microsoft allegedly provided these false and misleading explanations, or the content of these allegedly misleading explanations. This conclusory allegation devoid of factual content does not satisfy *Rule 12(b)(6)*'s pleading standard, much less *Rule 9(b)*'s heightened pleading standard. In the absence of any factual allegations regarding Microsoft's alleged wrongful conduct in fraudulently concealing the existence of Plaintiffs' claims, the Court concludes that Plaintiffs have failed to adequately allege an essential element of fraudulent concealment. *See* *Hexcel, 681 F.3d at 1060*.

In sum, the Court finds that Plaintiffs' Sherman Act claim is time barred, and that Plaintiffs have failed to adequately allege an applicable exception to the normal accrual rule or a plausible tolling theory. This dismissal is without prejudice, as the Court concludes that amendment would not necessarily be futile, as Plaintiffs may be able to allege sufficient facts to support their claims of continuing violations **[*49]** and equitable tolling. *See* *Leadsinger, 512 F.3d at 532*.

b. Cartwright Act, UCL, and *California Business & Professions Code § 16600*

While Plaintiffs concede that the injury rule applies to Sherman Act claims, Plaintiffs contend that the Ninth Circuit has applied the "discovery rule" to Cartwright Act and UCL claims. Plaintiffs rely on *Oliver v. SD-3C LLC, 751 F.3d 1081, 1086-87 (9th Cir. 2014)*, and *Samsung Electronics Co., Ltd. v. Panasonic Corp., 747 F.3d 1199, 1201-02 (9th Cir. 2014)*. According to Plaintiffs, their California state law claims did not begin to accrue until they "discovered" their claims on May 17, 2013, rather than in May 2007 when Microsoft allegedly entered into the anticompetitive agreements and injured the Plaintiffs. Compl. ¶ 57.

As a general rule, under California law the default accrual rule is the "last element rule," where a claim accrues "'when [it] is complete with all of its elements'—those elements being wrongdoing, harm, and causation." *Pooshs v. Philip Morris USA, Inc., 51 Cal. 4th 788, 797, 123 Cal. Rptr. 3d 578, 250 P.3d 181 (2011)* (quoting *Norgart v. Upjohn Co., 21 Cal. 4th 383, 397, 87 Cal. Rptr. 2d 453, 981 P.2d 79 (1999))*. The "discovery rule" is an exception to the common law accrual rule. *Id.* In California, the discovery rule postpones accrual of a claim until the plaintiff discovers, or has reason to discover, the cause of action." *Clemens v. DaimlerChrysler Corp., 534 F.3d 1017, 1024 (9th Cir. 2008)* (internal quotation marks omitted). The discovery rule "may be expressed by the Legislature or implied by the courts." *Norgart, 21 Cal. 4th at 397*. By statute, the discovery rule applies to fraud actions. *See E-Fab, Inc. v. Accountants, Inc. Servs., 153 Cal. App. 4th 1308, 1318, 64 Cal. Rptr. 3d 9 (Ct. App. 2007)*.

As an initial **[*50]** matter, the Court concludes that neither *Oliver* nor *Samsung* applied the discovery rule to California antitrust and unfair competition claims, much less to *§ 16600* claims.[4] Plaintiffs overstate the breadth of the Ninth Circuit's decisions in *Oliver* and *Samsung*. In both Oliver and Samsung, the Ninth Circuit concluded that the district court had erred in finding that the plaintiffs' federal antitrust claims were time barred. *See Oliver, 751 F.3d at 1086-87*; *Samsung, 747 F.3d at 1204-05*. As the district court had assumed that resolution of the federal claims was dispositive as to the plaintiffs' California antitrust and unfair competition claims, the district court had not specifically addressed the timeliness of the state law claims. *See Oliver, 751 F.3d at 1087*. The Ninth Circuit vacated and remanded for the district court to "apply the California Supreme Court's [intervening] decision in *Aryeh v. Canon Business Solutions, Inc., 55 Cal. 4th 1185, 151 Cal. Rptr. 3d 827, 292 P.3d 871 (2013)*[,] in determining whether Plaintiffs' Cartwright Act claim was timely filed." *Id.* The Ninth Circuit did not hold that the discovery rule applied to the plaintiffs' state law claims. Instead, the Ninth Circuit noted that *Aryeh* had changed the law in California by holding that interpretations of federal ***antitrust law*** were only instructive and not conclusive with respect to state ***antitrust*** **[*51]** ***law***. *Samsung, 747 F.3d at 1205 n.4*.

Plaintiffs further assert that *Aryeh* held that the discovery rule applies to their Cartwright Act, UCL, and § 16600 claims. *See* ECF No. 38 at 5. However, the California Supreme Court did not hold so broadly in *Aryeh*. The *Aryeh* Court specifically addressed the issue of whether the "common law theory of continuous accrual" could "apply to actions under the [UCL]." *292 P.3d at 873*. The *Aryeh* Court began with the premise that the traditional common law accrual rule is the "last element" accrual rule, where "the statute of limitations runs from the occurrence of the last element essential to the cause of action." *Id. at 875* (internal quotation marks omitted). In deciding whether equitable exceptions to the "last element rule" apply to the UCL, the *Aryeh* Court held only that the UCL does not categorically *forbid* the application of equitable exceptions like the discovery rule under appropriate circumstances. *See id. at 878-79*. The *Aryeh* Court did not hold that the UCL *requires* application of particular equitable exceptions to every cause of action. *See id.* More specifically, the *Aryeh* court explained that the "UCL is a chameleon," and that "a UCL claim in some circumstances **[*52]** might support the application of one or another exception, and in others might not." *Id. at 878* (internal citations omitted). Accordingly, "the nature of the right sued upon and the circumstances attending its invocation control the point of accrual." *Id.* (internal quotation marks and citation omitted).

Here, the Court finds that Plaintiffs have failed to identify any circumstances warranting a deviation from the default common law last element accrual rule. *See id. at 878*. Unlike the exemplar UCL claims involving fraudulent misrepresentations and deceptive practices, which the Aryeh Court identified as instances where equitable exceptions might apply, Plaintiffs' UCL claim appears to rely solely on Microsoft's alleged anticompetitive conduct. *See id.*; Compl. ¶¶ 77-84. More specifically, Plaintiffs allege that Microsoft entered into an unlawful trust in restraint of trade and commerce as the basis of their UCL claim. *See* Compl. ¶¶ 69-72. Plaintiffs have presented no argument or authority as to why the circumstances of Plaintiffs' particular UCL claim support the application of any equitable exception, including the delayed discovery rule. As the "last element" accrual rule functions as the

---

[4] Plaintiffs fail to mention that neither *Oliver* nor *Samsung* involved ***California Business & Professions Code § 16600*** claims.

default **[*53]** accrual rule under California law, and Plaintiffs have failed to make any showing as to why the Court should deviate from the default rule, the Court concludes that Plaintiffs' UCL claim began to accrue in 2007 and is now time barred.

Plaintiffs cite only to *Aryeh* in support of their assertion that the discovery rule also applies to their Cartwright Act and *§ 16600* claims. As discussed above, however, *Aryeh* addressed only whether certain equitable exceptions could apply to UCL claims such as UCL claims based on misrepresentation and fraud. Moreover, the *Aryeh* Court specifically rejected the notion that Cartwright Act claims are equivalent to unfair competition claims under the UCL, and the California Supreme Court limited its analysis to UCL claims. *See* *id. at 877-78*. Plaintiffs' reliance on *Aryeh* is therefore misplaced.

In California, the default accrual rule is the "last element rule." *Id. at 875*; *see also* *Consortium Info. Servs., Inc. v. Experian Info. Solutions, Inc., No. G043781, 2011 Cal. App. Unpub. LEXIS 3511 , 2011 WL 1782114, at 5 (Cal. Ct. App. May 10, 2011)* (applying last element rule to Cartwright Act claim). Under that rule, Plaintiffs' claims began to accrue in 2007, when Microsoft allegedly injured Plaintiffs by entering into anticompetitive conspiracies that had the effect **[*54]** of suppressing Plaintiffs' wages and restricting their mobility. Compl. ¶¶ 28, 36, 44. At that point, the elements of Plaintiffs' claims, "wrongdoing, harm, and causation," were complete. *See* *Pooshs, 51 Cal. 4th 788, 797, 123 Cal. Rptr. 3d 578, 250 P.3d 181*.

The Court therefore concludes that all of Plaintiffs' state law claims began to accrue in 2007 and are time barred. Moreover, Plaintiffs have failed to adequately allege an equitable exception or tolling doctrine that would render Plaintiffs' state law claims timely. As such, the Court grants Microsoft's motion to dismiss Plaintiffs' Cartwright Act, UCL, and § 16600 claims. This dismissal is without prejudice, as the Court concludes that amendment would not necessarily be futile, as Plaintiffs may be able to allege sufficient facts to support their claims of continuing violations and equitable tolling. *See* *Leadsinger, 512 F.3d at 532*.

3. Conclusion

In sum, the Court finds that Plaintiffs' Sherman Act, Cartwright Act, UCL, and *California Business & Professions Code § 16600* claims are time barred. As Plaintiffs have failed to adequately allege an applicable exception or tolling doctrine, the Court grants Defendant's motion to dismiss Plaintiff's complaint.

IV. CONCLUSION

For the foregoing reasons, the Court DENIES Defendant's motion to transfer venue and GRANTS Defendant's motion to dismiss. Should Plaintiffs elect **[*55]** to file an Amended Complaint curing the deficiencies identified herein, Plaintiffs shall do so within 30 days of the date of this Order. Failure to meet the 30-day deadline to file an Amended Complaint or failure to cure the deficiencies identified in this Order will result in a dismissal with prejudice. Plaintiffs may not add new causes of action or parties without leave of the Court or stipulation of the parties pursuant to *Federal Rule of Civil Procedure 15*.

IT IS SO ORDERED.

Opinion

ORDER REGARDING VARIOUS MOTIONS IN LIMINE

I. BACKGROUND

This matter **[*2]** is before the Court on various Motions in Limine filed by the parties. Briefs have been filed and the Court now issues its order.

Aetna filed a two-count Complaint against Blue Cross alleging: Unlawful Agreement in Violation of *Sherman Act § 1* (Count One); and, Violation of *M.C.L. § 445.772*, Michigan Antitrust Reform Act (Count Two). Aetna alleges that Blue Cross, the dominant provider of health insurance and administrative services to managed care plans in Michigan, has implemented a scheme to use ever-increasing premiums from the patients and employers it serves in order to protect its dominant position and thwart competition from Aetna and other competitors. (Comp., P 1) Aetna claims that Blue Cross entered into exclusionary contracts with hospitals under which Blue Cross agreed to pay hospitals more money if the hospitals increased the rates they demanded to treat patients covered by its competitors' health plans. (*Id.*) Aetna claims that Blue Cross' use of most favored nations clauses ("MFNs") reduced competition.

II. ANALYSIS

A. Motion in Limine Standard of Review

The Federal Rules of Evidence does not explicitly authorize in limine rulings, but the practice was developed pursuant to a district court's **[*3]** inherent authority to manage the course of trials. *Luce v. United States, 469 U.S. 38, 41, 105 S. Ct. 460, 83 L. Ed. 2d 443 (1984)*. It is within the district court's discretion to make an in limine ruling on evidentiary matters, but there is no right to an in limine ruling. *Huddleston v. United States, 485 U.S. 681, 688-89, 108 S. Ct. 1496, 99 L. Ed. 2d 771 (1988)*. A motion in limine ruling is nothing more than a preliminary opinion which allows the parties to formulate trial strategy. *United States v. Yannott, 42 F.3d 999, 1007 (6th Cir. 1994)*. The trial court is not bound by an in limine ruling and can change its determination during the trial where sufficient facts have developed to warrant the change or even if nothing unexpected happens at trial. *Id.*; *Luce, 469 U.S. at 41-42*). In analyzing a motion in limine, the trial court first considers issues of relevance, admissibility and prejudice.

Rule 401 of the Rules of Evidence defines relevant evidence as "evidence having any tendency to make the existence of any fact that is of consequence to the determination of the action more probable or less probable that it would be without the evidence." The standard set forth in *Rule 401* is a liberal one. *Churchwell v. Bluegrass Marine, Inc., 444 F.3d 898, 905 (6th Cir. 2006)*. *Rule 402* states that "all relevant evidence is admissible, except as otherwise provided ..." and that "evidence which is not relevant is not admissible." *Rule 403* states that "although relevant, evidence may be excluded if its probative value is substantially outweighed **[*4]** by the danger of unfair prejudice, confusion of the issues, or misleading the jury, or by considerations of undue delay, waste of time, or needless presentation of cumulative evidence." Trial courts have broad discretion in determining whether to admit evidence based on considerations of relevance, materiality and prejudice. *United States v. Jackson-Randolph, 282 F.3d 369, 376 (6th Cir. 2002)*.

B. Evidence Required in *Antitrust Law*

The Sherman Act, *15 U.S.C. § 1*, provides that a contract, combination in the form of trust, *or* conspiracy, in restraint of trade or commerce is illegal. *15 U.S.C. § 1*. *Section 1* has been interpreted to prohibit "unreasonable agreements in restraint of trade. *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. *Section 1* provides that a contract, combination in the form of trust, *or* conspiracy, in restraint of trade or commerce is illegal. *15 U.S.C. § 1*. A plaintiff must prove that defendant 1) contracted, combined or conspired among each other, that such 2) unreasonably restrained trade in the relevant market. *Nat'l Hockey League Players' Assoc. v. Plymouth Whalers Hockey Club, 325 F.3d 712, 718 (6th Cir. 2003)*; *Expert Masonry, Inc. v. Boone County, Ky, 440 F.3d 336, 342 (6th Cir. 2006)*. The antitrust plaintiff "must show (1) that the alleged violation tends to reduce competition in some market and (2) that the plaintiff's injury would result from a decrease in that competition rather than from some other consequence of the defendant's actions." *Tennessean Truckstop v. NTS, Inc., 875 F.2d 86,* 88 (6th Cir. 1989). A private antitrust plaintiff, in addition to having to **[*5]** show injury-in-fact and proximate cause, must eventually prove "antitrust injury." *In re Cardizem CD Antitrust Litigation, 332 F.3d 896, 909 (6th Cir. 2003)*. "Antitrust injury" is (1) "injury of the type the antitrust laws were intended to prevent" and (2) injury "that flows from that which makes defendants' acts unlawful." *Id.* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. The relevant antitrust laws "were enacted for the protection of *competition* not *competitors*." *Id. at 488 (1977)*; *Indeck Energy Servs., Inc. v. Consumers Energy Co., 250 F.3d 972, 977 (6th Cir. 2000)*. A plaintiff's showing of harm only as to its capacity as a competitor in the marketplace, not as a defender of marketplace competition, is insufficient to establish an antitrust claim. *Valley Products Co., Inc. v. Landmark, 128 F.3d 398, 403 (6th Cir. 1997)*.

C. Blue Cross' Motion in Limine to Exclude At Trial Aetna's Written Expert Reports (Doc. No. 317)

Blue Cross seeks to exclude two written expert reports submitted by Aetna authored by Dr. Christopher Vellturo and Dr. Gustavo Bamberger asserting these reports are hearsay. No written opposition was filed to this motion by Aetna.

Generally, the written report of expert witnesses prepared in anticipation of trial are inadmissible because they are considered hearsay. *Fed. R. Evid. 702*, *703*, *1006*; *Engebretsen v. Fairchild Aircraft Corp., 21 F.3d 721, 729 (6th Cir. 1994)*. The expert reports will be excluded at trial and Blue Cross' Motion in Limine to Exclude at Trial Aetna's Written Expert Reports is granted.

D. Blue Cross' Motion in Limine [*6] to Exclude Evidence of Supposed Antitrust or Other Legal Concerns (No. 318)

Blue Cross seeks to exclude evidence of and all references to any "antitrust concerns" or other legal concerns relating to the use of MFNs that Michigan hospital executives or Blue Cross witnesses expressed or considered, including but not limited to: 1) internal Blue Cross communications; 2) internal hospital communications; and 3) communications between Blue Cross witnesses and hospital executives. Blue Cross claims that such evidence lacks probative value since these opinions do not answer the question of whether the conduct was illegal. Even if these documents or witnesses' testimony had probative value, prejudice to Blue Cross far outweighs any probative value of this evidence. Blue Cross claims that the mere expression of "antitrust concerns" would confuse and mislead the jury that there would be a legal basis for that concern.

Aetna responds that the statements Blue Cross seeks to exclude are central to explain to the jury that even though numerous parties raised concerns that these contracts violated federal antitrust laws, that Blue Cross continued to pursue these contracts in the face of these concerns. **[*7]** Aetna claims these concerns speak volumes about Blue Cross' intentions and the importance of these contracts in Blue Cross' eyes. Aetna asserts that this evidence is relevant to show that Blue Cross had to pay millions of dollars to hospitals to accept the MFNs because these hospitals resisted the contracts based on antitrust concerns. The evidence is also relevant according to Aetna because it casts doubt on the credibility of testimony that Blue Cross will likely present at trial, that the MFNs were adopted with the support of hospitals or to further Blue Cross' "social mission." Aetna argues that this evidence shows that the witnesses were well aware of the risk. Aetna claims that this evidence also goes to the issue of Blue Cross' market power in that despite the risks, Blue Cross had the ability to control the behavior of the hospitals. Aetna asserts that the evidence also shows Blue Cross' coercive behavior which undermines Blue Cross' argument that the MFNs were procompetitive. Aetna claims that the jury is entitled to know the setting of the case and how the MFNs came into effect.

Blue Cross replies that Aetna wants the jury to conclude that because some hospitals and their **[*8]** lawyers questioned whether MFNs raised issues under the antitrust laws, the MFNs must have been illegal and had anticompetitive effects. Blue Cross claims this is improper and Aetna's various arguments as to why such evidence might be relevant should fail. Blue Cross argues that it is the Court's role to instruct the jury as to the law, and the jury's role to determine the relevant facts. Blue Cross argues that Aetna should not be allowed to obscure or usurp either or both of those functions through non-party lawyer and/or hospital remarks expressing "antitrust concerns" about MFNs before the MFNs went into effect. Blue Cross asserts that evidence of antitrust concerns does not demonstrate anticompetitive effect and whether the MFNs actually had such anticompetitive effect. Blue Cross claims that Aetna's conspiracy arguments and rule of reason arguments are not relevant in this case because there are no allegations of conspiracy and the rule of reason arguments apply to monopoly and RICO cases. Aetna's argument in seeking to allow the evidence is premised on the theory that hospital lawyers and executives knowingly entered into illegal contracts because they were coerced by Blue Cross. **[*9]** The hospital executives' concerns demonstrate that they were doing their jobs during the negotiations of the contracts.

The Court finds that the proposed evidence sought by Aetna to be admitted—documents as to a hospital's concern about antitrust violations—is not relevant to the issues to be tried by the jury. These concerns were raised during the various negotiations between Blue Cross and the hospitals. The issue is whether the contracts entered into by Blue Cross and the hospitals, with the MFN provisions, reduced the competition in some markets and whether Aetna's injury, if any, resulted from a decrease in that competition rather than from some other consequence of Blue Cross' actions, including any alleged coercive actions by Blue Cross to make the hospitals sign the contracts. *See, Tennessean Truckstop, 875 F.2d at 88*. The illegality at issue is not whether the contracts themselves were illegal, but whether the contracts, specifically the MFN provisions, illegally affected competition. This means that the relevant evidence to be focused on is what occurred after the MFNs went into effect, not whether there were concerns that the contracts were illegal before entering into the contracts. As noted by Blue Cross, **[*10]** there is no conspiracy claim before this Court, which means the hospitals' concerns before entering into the contracts with Blue Cross are not relevant. Even though Aetna claims that the hospitals were "coerced" into entering into the contracts, the fact is that they did so. The issue before the jury is not whether such contracts exist. Here, there is no dispute that the hospitals entered into the MFN contracts with Blue Cross, therefore any concerns raised either by the hospital or Blue Cross officials during the negotiations of the contracts are not relevant to how the MFN contracts affected competition after the contracts went into effect. Blue Cross' Motion In Limine to Exclude Evidence of Supposed Antitrust or Other Legal Concerns prior to the applicable parties entering into the MFN contracts is granted.

E. Blue Cross' Motion in Limine to Exclude Evidence of and all References to MFN Hearsay and Speculation (No. 319)

Blue Cross seeks to exclude evidence, mostly from Aetna employees, that Blue Cross' MFNs had effects on Aetna's business as hearsay and based on lack of personal knowledge. Blue Cross cited three examples of this type of testimony. The first was the testimony of Aetna **[*11]** employees, Ms. Lantzy-Talpos who testified that Blue Cross' MFN caused Aetna's rate at Beaumont to increase, but she also admitted that no one at Beaumont told her that and that her conclusion was based on newspaper accounts. Kelly Wright, a Cofinity employee, testified that the MFN contracts caused harm to Cofinity's business, but admitted that she did not know exactly how the MFN contracts affected the business. Mr. Winters, an Aetna employee, testified that he thought it was possible that a hospital with an MFN contract with Blue Cross could affect Aetna's rate at that hospital, but that he did not know how. Daniel Fishbein, an Aetna employee, testified that it was a reasonable theory that if Humana was seeing some decrease it was because of the Blue Cross MFNs. He claims that this affected all discounts including the Cofinity discounts. Mr. Fishbein conceded this information came from communications with Humana about discount degradation, but not specifically about MFN contracts.

Blue Cross argues that the only person who would have first-hand knowledge whether the MFNs affected the rate a hospital gave Aetna would be that hospital. This non-expert testimony as to why Aetna received **[*12]** a certain rate from a certain hospital is not based on personal knowledge and because these witnesses are not expert witnesses, Blue Cross argues they cannot speculate as to the reason why Aetna received such a rate.

Aetna responds that Blue Cross merely cited snippets of the witnesses' testimony. Aetna claims that these witnesses have the experience and personal knowledge of whether the MFNs affected Aetna. Some of these witnesses are contract negotiators who have ample foundation, experience and personal knowledge to testify about the impact of the MFNs on Aetna's business. Aetna claims that Blue Cross' request for a broad, categorical and blanket exclusion of its witnesses without any inquiry into the purpose for each testimony offered or whether the testimony is relevant hearsay should be denied at this time.

The Court at this time declines to exclude Aetna's non-expert witnesses from testifying at trial given that they may have the experience and personal knowledge of Aetna contracts with the hospitals and the impact of the MFNs. Although the testimonies cited by Blue Cross, without more, may indicate that the witnesses' testimonies are based on hearsay or lack of personal knowledge, **[*13]** the Court will not order a blanket exclusion of these witnesses' testimony at trial. However, if at trial a hearsay statement or testimony based on lack of personal knowledge will be offered, Blue Cross may certainly object to such at trial. The Court will then rule on the admissibility of such testimony to be offered at trial. Blue Cross' Motion in Limine to Exclude Evidence of and all References to Alleged Effects of MFNs by Aetna non-expert witnesses is denied without prejudice.

F. Blue Cross' Motion in Limine to Exclude Evidence of Changes to Michigan Law (No. 321)

Blue Cross moves to exclude any reference at trial regarding the enactment of *M.C.L. §§ 550.1400* and *500.3405a* and OFIR Order No. 12-035-M, all of which address the legality of MFNs, including any statement that MFNs are illegal or prohibited. Blue Cross claims the changes to the law are not relevant to the issues in this case and do not add to any fact Aetna is required to prove at trial. Blue Cross argues that the primary law at issue is *15 U.S.C. § 1*. The changes in Michigan law are irrelevant since they were enacted after Aetna filed its complaint and were not in effect during the relevant period. Blue Cross claims the changes in the law are irrelevant and **[*14]** inadmissible under *Rules 401* and *402* and unduly prejudicial to Blue Cross.

Aetna claims that Blue Cross' motion to exclude references to related litigation, investigations and legislation regarding MFNs is a key part of its effort to conceal critical facts from the jury and tilt the case in its favor. Aetna asserts that Blue Cross' defense is that the MFNs did not prevent Aetna from securing better rates from hospitals. Aetna claims that the evidence at issue will show that Blue Cross' MFN contracts accomplished their intended goal to keep competitors from eroding Blue Cross' hospital discount advantage. Aetna will show that before the MFNs took effect, Aetna had improved its hospital rates and when the MFNs took effect, Aetna was unable to make further progress. Aetna claims that Blue Cross' MFN grip loosened in October 2010 when the government and private plaintiffs filed lawsuits challenging the MFNs. Aetna states that Blue Cross' "chokehold" was finally broken when the MFNs were banned in Michigan in early 2013. Aetna asserts that Aetna began experiencing success in achieving hospital rate improvements as a direct result of this litigation and legislation. Aetna claims that the related lawsuits **[*15]** and legislative ban on MFNs are highly relevant to the antitrust impact and causation to show the "before-during-after" scenario.

Blue Cross replies that Aetna does not discuss the change in Michigan law in 2013 without "burying" that issue in a list of other evidence Blue Cross has moved to exclude in other motions. Blue Cross claims Aetna has not connected the post-Complaint changes in Michigan law and its asserted injury because of the MFNs. Blue Cross asserts that Aetna cannot really expect the Court to believe that changes in Michigan law in 2013 allowed Aetna to achieve contracting successes after October 2010. Blue Cross claims that Aetna in fact has told the Court that evidence of changes in Michigan law that allowed Blue Cross to reorganize as a non-profit mutual company should be excluded because they are irrelevant. (Doc. No. 324) Blue Cross asserts that Aetna wants to tell the jury that the law was changed in 2013 prohibiting MFNs so that the jury will assume that MFNs had illegal effects which Michigan needed to remedy. Blue Cross claims there is serious prejudice from that improper inference which substantially outweighs any probative value Aetna can attempt to raise.

[*16] The Nonprofit Health Care Corporation Reform Act, *M.C.L. § 550.1400 et seq.*, became effective on March 18, 2013. P.A. 2013, No. 4, Imd. Eff. March 18, 2013; *M.C.L. § 550.1400*. The statute applies "to the use of a most favored nation clause in a provider contract on and after February 1, 2013." *M.C.L. § 550.1400(1)*. However, contracts with MFNs beginning February 1, 2013, may still be used if approved by the commissioner. *M.C.L. § 550.1400(2)*. Beginning January 1, 2014, a health care corporation "shall not use a most favored nation clause in any provider contract, including a provider contract in effect on January 1, 2014." (*M.C.L. § 550.1400(3)*)

Based on the language of the statute, the Court finds that the change in the law in 2013 prohibiting MFNs is not relevant to whether the MFN contracts at issue caused injury to Aetna. The 2013 change in the law does not establish any material fact at issue. Most statutes are meant to regulate primary conduct, and will not be applied in trials involving conduct that occurred before their effective date. *See* *Landgraf v. USI Film Prods., 511 U.S. 244, 291, 114 S. Ct. 1483, 128 L. Ed. 2d 229 (1994)*. The claim in this case involves violations of the Sherman Antitrust Act and Michigan statute effective in 2010, not a claim under the Michigan statute enacted in 2013. The Court finds any reference to the new law enacted in 2013 is not relevant. The Court grants Blue Cross' Motion in Limine to Exclude Evidence of Changes to Michigan Law.

G. Aetna's Motion in Limine to Preclude Evidence or Argument Regarding Blue Cross' Purported Social Mission and Nonprofit Status (No. 322)

Aetna seeks to exclude any reference at trial to Blue Cross' status as a nonprofit and any evidence or argument regarding Blue Cross' social mission as a justification for entering into MFNs. Aetna claims that this evidence is irrelevant because it would **[*17]** result in a trial within a trial regarding Blue Cross' social mission, the benefits it receives from the State for performing that mission and whether it is necessary for Blue Cross to harm competition to perform any such mission. Aetna claims that as an insurer of last resort, Blue Cross enjoys an exemption from state and local taxes, which Aetna claims outstripped the burdens of fulfilling its social mission. Aetna asserts that Blue Cross' own witnesses testified that the MFN contracts had nothing to do with Blue Cross' social mission. Aetna claims that any such evidence would unfairly prejudice Aetna. Aetna asserts that Blue Cross' status as a non-profit is irrelevant because non-profits may be held liable under antitrust laws. Aetna claims that any reference to Blue Cross' status would be prejudicial in that the jury might be influenced to decide the case based on improper grounds.

Blue Cross responds that Aetna's motion is based on the false premise that the only purpose for introducing evidence of Blue Cross' nonprofit status and social mission is to excuse allegedly anticompetitive conduct by Blue Cross. Blue Cross claims that its nonprofit status and social mission is material **[*18]** in at least three ways. First, Blue Cross argues that this evidence is directly relevant to refuting Aetna's key contention that the MFNs were the cause of Blue Cross' success and Aetna's struggles in obtaining contracts with both hospitals and downstream insurance customers. Blue Cross claims the evidence shows that the Michigan's nonprofit hospitals did not trust for-profit Aetna, but instead valued Blue Cross' social mission's contributions to Michigan's healthcare system. Blue Cross asserts that other customers, including union locals, businesses and others, also preferred Blue Cross to Aetna for this same reason. Blue Cross claims that if it cannot present this evidence to the jury, the jury will only have before it Aetna's reason for its failure to obtain contracts with the hospitals was because of the MFNs. Blue Cross asserts that the jury should be able to hear the evidence that there are other reasons why Aetna was unable to obtain contracts with hospitals besides the MFNs.

Blue Cross' second argument is that this evidence refutes a number of Aetna's claims that Blue Cross is inefficient, overpaid small rural hospitals to secure MFNs and has earned massive profits. As a nonprofit, **[*19]** Blue Cross argues it cannot earn profits, but is required under the statute to have reserves. Aetna as a for profit is able to raise capital by selling equity in order to pay claims when its premium levels are too low. Blue Cross claims that unlike a for-profit like Aetna, it is unable to raise capital. Blue Cross is required under the statute to maintain surplus to cushion against periods when claims exceed premiums. The surplus amount may seem large, but when compared to other Blue plans or when one considers the number of insureds whom Blue Cross must protect, the number is not so large. If Blue Cross' nonprofit status is not raised before the jury, it would not be able to assess Aetna's claim of "massive profits" without understanding nonprofits and Blue Cross' status as a nonprofit.

The third argument is that Blue Cross' unique structure established by the Michigan legislature, is a central fact in the framework and competitive landscape of Michigan health care and health insurance for the relevant time period. Blue Cross claims it would be impossible for the jury to understand Blue Cross' conduct, including the legitimate business justifications, without knowing the central fact **[*20]** of Blue Cross' existence. Blue Cross asserts that its status a nonprofit with a social mission is material evidence, although it may not be dispositive on whether the MFNs violated the antitrust statute. Blue Cross claims that Aetna's argument that a nonprofit is not allowed to violate the ***antitrust law*** *because* it is a nonprofit, is not the same as whether the nonprofit status is relevant to its actions and conduct as it pertains to any violation of the Sherman Act. The fact that Blue Cross is a nonprofit is central to its expert's economic analysis, Blue Cross claims this evidence is relevant. Blue Cross' expert shows that the nonprofits spend more of each premium dollar on medical care than for profits, including Aetna, and have higher customer satisfaction ratings. This evidence, Blue Cross argues, is relevant to how Blue Cross and Aetna act and the customers' reactions to those actions. Blue Cross asserts that its social mission is not a pretext for the MFN as argued by Aetna. Instead, Blue Cross claims that its witnesses recognize the link between hospital discount advantage and the social mission. Without the discount, Blue Cross claims it would be at a disadvantage because as **[*21]** recognized by the Michigan legislature, its population is unhealthier which exposes Blue Cross to a higher risk. As an insurer of last resort, Blue Cross claims it cannot cut unhealthy patients, whereas Aetna, as a for-profit, is able to do so.

Most claims under *Section 1 of the Sherman Act*, as in this case, are evaluated using a "rule of reason" approach where the "finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature and effect." *In re Cardizem, 332 F.3d at 906* (quoting *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997))*. The Court finds that Blue Cross' status as a nonprofit with a social mission is relevant to the issue of why Blue Cross sought MFNs from hospitals and as a defense to Aetna's claim that Blue Cross sought MFNs to crush the competition. Without evidence as to the statute-mandated Blue Cross nonprofit status and the requirements on Blue Cross set forth in the statute, including as an insurer of last resort, Blue Cross would be unable to present any evidence that it sought the MFNs because of its status. In order **[*22]** for the jury to have sufficient information to decide whether the MFNs are illegal, as opined by the Supreme Court and the Sixth Circuit, the jury must "take into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature and effect." *Id.* It is relevant for the jury to have facts before it as to Michigan's health insurance business, which includes statute-mandated non-profit insurer Blue Cross, and the nature of such business in Michigan.

The status of Blue Cross and how the hospitals perceive Blue Cross and Aetna is also relevant to Aetna's claim of antitrust injury since Aetna must establish that its injury "flowed" because of the anticompetitive effects of the MFNs and not from other reasons such as the hospitals' desire to contract with Blue Cross instead of Aetna. *Id. at 911* ("[n]o antitrust injury because the plaintiff's injury did not "flow" from the anticompetitive effects of the alleged antitrust violation.") Aetna's Motion in Limine to Preclude Evidence or Argument Regarding Blue Cross' Purported Social Mission and Nonprofit Status is denied.

H. Aetna's Motion in [*23] Limine to Preclude Blue Cross from Informing the Jury that Compensatory Damages will be Trebled (No. 323)

Aetna seeks to preclude Blue Cross from informing the jury that any damages found would be trebled under the Clayton Act, *15 U.S.C. § 15(a)*. Aetna claims that Blue Cross has indicated it intends to inform the jury of the mandatory trebling provision in the apparent hope that the jury will artificially reduce its damage calculation.

Blue Cross responds that it has no intention of arguing that the jury should reach a lower damages number because the Court will automatically treble any damage award, but opposes a blanket exclusion of the information. Blue Cross claims that a jury instruction would protect Aetna and Blue Cross from the potential prejudice both may encounter during the trial. Blue Cross claims the case has received some press attention and so potential jurors may be aware of the treble provision in the antitrust laws. Blue Cross also argues that such information may be necessary to counter Aetna's attempts to play on the jury's sympathy that damages would somehow enhance the public good by helping Aetna to compete.

The Court finds at this time that the issue of trebling the damages is **[*24]** not relevant to the issues to be tried by the jury. In light of Blue Cross' intention not to argue that the jury should reach a lower damages amount because of the treble damage provision, the Court will not allow any evidence or argument regarding the trebling the damages. If a party believes the treble damage provision becomes relevant at trial, the parties should then seek to confer with the Court at side bar prior to any mention of the treble damage provision. As to the jury instruction issue, the Court will consider such if it is required at trial. The Court grants Aetna's Motion in Limine to Preclude Blue Cross from Informing the Jury that Compensatory Damages will be Trebled.

I. Aetna's Motion in Limine to Preclude References to Blue Cross' Mutual Ownership Status (No. 324)

Aetna seeks to preclude at trial references of Blue Cross' mutual ownership status as of January 1, 2014. Aetna argues that Blue Cross' status as a mutual insurance company has no connection to any fact of consequence in this litigation. If introduced, Aetna claims that it would most likely be employed as an emotional appeal to shift the focus of the damages inquiry from the extent of Aetna's injuries to a **[*25]** purported effect of the verdict on Blue Cross and its policyholders. Aetna claims that this is irrelevant to the jury's function and should be precluded.

Aetna further argues that if Blue Cross were to introduce evidence or present argument about its mutual status, this would serve as an improper appeal to the jury's self-interests. Aetna claims Blue Cross controls approximately 60-70% of the commercial health insurance market in Michigan. Aetna asserts that it is almost certain that members of the jury pool, or at the very least some of their family members, friends, or co-workers, will be Blue Cross policyholders. Aetna claims that allowing Blue Cross to present evidence of its mutual structure would seriously prejudice the jury against awarding damages in this case.

Blue Cross responds that it will not argue to the jury that it should not award Aetna damages because the jurors, who may be current Blue Cross policy holders, will bear the financial brunt of the judgment. Blue Cross notes that Aetna in its brief admits the fact that Blue Cross and the State of Michigan agreed that Blue Cross' policyholders do not have any residual rights to surplus in the case of dissolution and that **[*26]** any potential concerns about harms unique to insurance policyholders are not present in this case. Blue Cross claims that the mere fact of its structure is nothing more than a true statement of its identity. Blue Cross asserts that Aetna's arguments in this motion is inconsistent with Aetna's position opposing Blue Cross' motion seeking to exclude statements of the post-Complaint changes in Michigan law prohibiting MFNs. Blue Cross claims Aetna cannot have it both ways—prohibiting mention of Blue Cross' current status as a mutual company and allowing statements that MFNs are now illegal.

The legislature provided for a merger of a healthcare corporation with a nonprofit mutual disability insurer; the surviving entity of a merger being the nonprofit mutual disability insurer. *M.C.L. § 550.1220(1)*. A healthcare corporation shall not be formed on or after January 1, 2014. *M.C.L. § 550.1201a*. As of January 1, 2014, Blue Cross became a nonprofit mutual company. P.A. 2013, No. 4, Imd. Eff. March 18, 2013. For the same reasons set forth in the Court's ruling prohibiting statements regarding the post-Complaint changes in the law as to MFNs, the Court will not allow mention of Blue Cross' post-Complaint change in status to a non-profit **[*27]** mutual company. The Court finds Blue Cross' change of status to a non-profit effective in 2014 is not relevant to the facts the jury has to decide. Blue Cross' status in 2014 has no bearing on how Blue Cross acted when the Complaint was filed. The Court grants Aetna's Motion to Preclude References to Blue Cross' Mutual Ownership Status. However, the issue Aetna raises regarding the jury pool may be an issue the parties need to address with the Court at the final pretrial conference.

J. Blue Cross' Motion in Limine to Exclude References to Other Lawsuits (No. 325) and Motion in Limine to Exclude Reference to Government Investigations and Lawsuits (Doc. No. 332)

Blue Cross seeks to exclude any reference to other lawsuits against Blue Cross including, but not limited to: *The Shane Group, Inc. v. Blue Cross Blue Shield of Michigan*, No. 2:10-cv-14360, 2011 U.S. Dist. LEXIS 114956 (E.D. Mich.), *Michigan Regional Council of Carpenters Employee Benefits Fund v. Blue Cross Blue Shield of Michigan*, No. 2:10-cv-14887, 2011 U.S. Dist. LEXIS 114956 (E.D. Mich.), *Scott Steele v. Blue Cross Blue Shield of Michigan*, No. 2:11-cv-10375, 2011 U.S. Dist. LEXIS 114956 (E.D. Mich.), *City of Pontiac v. Blue Cross Blue Shield of Michigan*, No. 2:11-cv-10276 (E.D. Mich.), *Frankenmuth Mutual Ins. Co.* ***[*28]*** *v. Blue Cross Blue Shield of*

Michigan, No. 1:10-cv-14633 (E.D. Mich.), and *In re: Blue Cross Blue Shield Antitrust Litigation* (MDL No. 2406), No. 2:13-cv-20000, and a series of cases about administrative services contracts referred to as the "Access Fee cases," including *Hi-Lex Corp. v. Blue Cross Blue Shield of Michigan*, Case No. 2:11-cv-12557 (E.D. Mich.). Blue Cross also seeks to exclude any reference to the United States and State of Michigan's investigations and lawsuits against Blue Cross in *United States, et al. v. Blue Cross Blue Shield of Michigan*, Case No. 2:10-cv-14155 (E.D. Mich).

Blue Cross argues that as to the class action cases, with the lead case being *The Shane Group* case, these cases are not relevant to the issues before the jury in Aetna. Blue Cross claims that in *The Shane Group* case, other than allegations, there have been no findings of liability against Blue Cross.

Blue Cross asserts that in *The Shane Group* case the putative class amended its proposed class definition to focus on discrete effects at particular hospitals with MFNs, which does not reconcile with Aetna's theory that Blue Cross' MFN program had a market-wide uniform effect. As to the Access Fee cases **[*29]** and the MDL antitrust case, Blue Cross argues that these cases do not involve the MFN provisions at issue and, are therefore, not relevant. Blue Cross also argues that reference to other lawsuits is hearsay and would prejudice Blue Cross because it would appear that Blue Cross had violated the law based on all these lawsuits against it.

Regarding the lawsuit brought by the Department of Justice of the United States and the Attorney General of the State of Michigan, which was later voluntarily dismissed, Blue Cross argues that the claims brought by the DOJ and the Michigan AG were not based on the same theory of causation as Aetna's lawsuit. Blue Cross claims that the DOJ and the Michigan AG's theory of liability was based on examination of rates at individual hospitals with Blue Cross MFNs, but they did not assert any liability for hospitals without MFNs. Blue Cross argues no facts were established in the suit brought by the DOJ/Michigan AG and in the MDL.

In its response, Aetna agreed it would not refer to the MDL case and the Access Fee cases, with the lead case being the *Hi-Lex* case. As to *The Shane Group* and the DOJ and Michigan AG cases, Aetna claims that these cases are highly **[*30]** relevant to the central issues of this case: whether Blue Cross' MFNs harmed Aetna and competition, and the extent to which Aetna's hospital rates and competitive positioning would have improved had Blue Cross not implemented its MFNs across the Michigan healthcare market. Aetna claims that evidence regarding these civil suits is relevant because it casts doubt on testimony by certain hospital executives that have adopted what Aetna claims is Blue Cross' "no harm, no foul" story. Aetna asserts that its fortunes changed significantly after the private plaintiffs filed their suit and even more following the ban on MFNs in provider contracts.

The Court finds that because the DOJ, the Michigan AG and *The Shane Group* class action cases have been resolved without any finding of liability against Blue Cross in those cases, any reference to those cases would be more prejudicial than probative to show that Blue Cross's MFNs harmed competition because cases involving MFNs were filed against Blue Cross. This would result in litigating the issues brought by the DOJ, the Michigan AG and the plaintiffs in *The Shane Group* class action case. There are sufficient issues raised in the instant case without **[*31]** litigating the issues brought in the other cases. The alleged anti-competitive acts at issue are the MFN provisions effective when Aetna brought the lawsuit and whether competition was harmed because of those provisions. If such MFN provisions were later taken out of the contracts for one reason or another and Aetna shows that since the filing of those suits it was able to secure contracts with better rates, then it matters not the reason why the MFNs were removed from the contracts. Aetna is still able to show that without the MFNs it was able to obtain better rates, which goes to prove Aetna's point that with the MFNs it was unable to obtain better rates. Since the facts after 2010, as argued by Aetna, show that the MFNs were no longer at issue in the contracts, Aetna is still able to argue that the MFNs in effect when it filed the lawsuit harmed competition. Aetna's burden is to show that the MFNs in effect when they filed the lawsuit harmed competition, and therefore, Aetna. It is the MFNs which Aetna alleges harmed competition. The lack of MFNs in contracts after the DOJ, the Michigan AG and the other plaintiffs filed their lawsuits against Blue Cross is not relevant to whether **[*32]** the MFNs in effect at the time Aetna filed the lawsuit harmed competition. The issue that Aetna received better rates after the other lawsuits were filed and after the MFNs were banned goes to how far out Aetna's damages flow from the time Aetna is found to be harmed. However, testimony about the other lawsuits is not relevant to show such, because the calculation of damages does not require evidence of the reason why the MFNs were no longer at issue; only that the MFNs were no longer part of the contracts. This testimony can be presented from those familiar with the contracts, not from the fact that lawsuits were filed.

As to Aetna's claim that the hospital executives' testimony were biased and not credible because of the lawsuits brought by the DOJ, the Michigan AG and *The Shane Group* plaintiffs, Blue Cross claims all the hospital executives were deposed and it was Aetna who failed to ask the executives any question about how these lawsuits impacted the executives' decisions. Blue Cross asserts Aetna had knowledge of these lawsuits at the time the depositions were taken. If at trial, Aetna can establish bias by hospital executives because of these lawsuits against Blue Cross, Aetna **[*33]** may raise the issue at that time. Without hearing the executives' testimony in context and without being able to judge their credibility at this time, the Court cannot make a determination whether the hospital executives were biased in their responses to their depositions. The Court grants Blue Cross' Motions in Limine to Exclude References to Other Private and Government Lawsuits against Blue Cross.

K. Blue Cross' Motion in Limine to Bar Use of Irrelevant and Prejudicial Terms Monopoly, Collusion, Conspiracy and their Derivatives (No. 326)

Blue Cross seeks to exclude any reference to the terms monopoly, collusion, conspiracy and their derivatives. Blue Cross asserts that these terms are not relevant in this lawsuit which only involves an anticompetitive contract MFN claims. Blue Cross argues, as Aetna affirmed to the Court, that this case involves 67 MFN contracts. (Doc. No. 314) Blue Cross argues Aetna did not plead a claim under the Sherman Act based on monopoly, collusion or conspiracy.

Aetna responds that it should be able to refer to Blue Cross as a "monopolist" and that it "colluded" and "conspired" with others as to the MFN contracts. Aetna claims the testimony by hospital executives **[*34]** and others, including Blue Cross personnel, show that Blue Cross is a monopolist and the reason for the MFNs was to keep its monopoly of the healthcare insurance industry. Aetna also claims that Blue Cross colluded and conspired with the hospitals to include the MFNs in the contracts to minimize competition.

As noted above, *Section 1 of the Sherman Act* provides that a contract, combination in the form of trust, *or* conspiracy, in restraint of trade or commerce is illegal. *15 U.S.C. § 1*. A plaintiff in a *Section 1* claim must prove that defendant 1) contracted, combined or conspired among each other, that such 2) unreasonably restrained trade in the relevant market. *Nat'l Hockey League, 325 F.3d at 718 (6th Cir. 2003)*. The Sherman Act, *15 U.S.C. § 2*, declares that a firm shall not "monopolize" or "attempt to monopolize" or "combine or conspire" with any other person to "monopolize" any part of the trade or commerce. *15 U.S.C. § 2*. A claim under *Section 2* requires proof of two elements: 1) the possession of monopoly power in a relevant market; and 2) the willful acquisition, maintenance or use of that power by anti-competitive or exclusionary means as opposed to growth or development resulting from a superior product, business acumen, or historic accident. *Conwood Co., L.P. v. U.S. Tobacco Co., 290 F.3d 768, 782 (2002)*. A plaintiff must demonstrate that a defendant **[*35]** either unfairly attained or maintained monopoly power. *Id.*

In the Sherman Act, the terms monopolization and conspiracy are terms of art and are expressly noted in the Act. As alleged by Aetna in the Complaint, it alleges violations by Blue Cross of *Section 1of the Sherman Act* , *15 U.S.C. § 1* based on exclusionary contracts with hospitals. (Comp., Doc. 1) As stated by Aetna on the record, the case involves 67 MFN contracts. *Section 1* sets forth three ways a violation could occur—by contract, or combination, or conspiracy. Here, Aetna has alleged a violation by way of contracts with MFN provisions. *Section 2* of the Sherman Act involves monopolies. Aetna's Complaint includes no such claim. Because the terms "monopoly" and "conspiracy" are specific terms in the Sherman Act, which Aetna does not assert any claims under *Section 2*, those terms should not be used by Aetna to argue that Blue Cross violated the Act because of a "conspiracy" or because of a "monopoly." Although "collusion" is not an express term under the Sherman Act, it infers a strong conspiracy. Aetna cannot argue that Blue Cross "colluded" with others to violate the Sherman Act.

However, inasmuch as those terms were used by witnesses during depositions, without prompting **[*36]** by the plaintiffs' counsel and without objections by the defense during the deposition, those terms can remain in any deposition testimony presented to the jury . Aetna cannot argue during opening or closing statements, or by way of questions, that Blue Cross violated the Sherman Act because of a "conspiracy," a "monopoly" or a "collusion." Aetna can argue the facts, such as whether Blue Cross was a "dominant" figure in the market or that Blue Cross and the hospitals "agreed" to the terms of the contracts. Blue Cross' Motion in Limine to Bar Use of the Terms Monopoly, Collusion, Conspiracy and their derivatives is granted as set forth above.

L. Blue Cross' Motion in Limine to Exclude at Trial Evidence of All References to MFN Programs (No. 328)

Blue Cross seeks to exclude evidence from the jury of any form of labeling (mostly by the experts) the contracts at issue or Blue Cross' conduct as "MFN program," "scheme," "contracting scheme," "contracting program," and "contracting strategy." Blue Cross claims that Aetna's case is based solely on the harm from 67 MFN contracts and Blue Cross' efforts to enforce those contracts. Blue Cross argues that it cannot be held liable for rate decisions **[*37]** made by hospitals without MFNs because those are unilateral decisions by those hospitals. Blue Cross argues that evidence of other hospitals' decision-making does not prove anything about Blue Cross' actions. Blue Cross claims that Aetna made the same arguments in another antitrust case which was accepted by the district judge, citing, *Rheumatology Diagnostics Lab., Inc. v. Aetna, Inc., No. 12-cv-05847-JST, 2013 U.S. Dist. LEXIS 89208, 2013 WL 3242245 (N.D. Cal. June 25, 2013)*. Blue Cross also argues that reference to other hospitals' decision-making outside the 67 MFN contracts at issue would confuse the jury because it would be difficult for the jury to keep track of which hospitals had MFNs and which did not. Blue Cross claims that the decision-making of other hospitals as to rates outside the 67 MFN contracts is not relevant as to the effects of the 67 MFN contracts on competition.

Aetna responds that Blue Cross is in reality seeking to exclude broad categories of critical evidence and the motion is a thinly veiled argument for summary judgment. Aetna claims that Blue Cross' motion is premised on a gross distortion of Aetna's claims and legal theory. Aetna asserts that there is a disconnect in that Blue Cross refuses to acknowledge that its MFN contracts **[*38]** caused an array of anticompetitive harms, including harming Aetna's business and altering the incentives of Michigan hospitals, which adversely affected Aetna's ability to secure the improved rates it would have experienced at hospitals throughout Michigan, had Blue Cross not implemented its anticompetitive contracts. Aetna is not seeking to recover for "unilateral conduct" as argued by Blue Cross. Aetna argues that one of the effects of Blue Cross' contracts is that they harmed competition, and that Aetna's business was harmed. Aetna asserts that because of the MFN contracts, Aetna became less attractive for others to deal with, including both customers and hospitals. Aetna argues that the impact on competition from Blue Cross' 67 MFN contracts included adverse effects on Aetna's (and other insurers') ability to secure improved rates from both MFN and non-MFN hospitals.

The Court finds that Blue Cross is seeking more than exclusion of labels and words to be used before the jury. Blue Cross is instead seeking to exclude evidence from hospital executives or the experts as to the reasons why the hospitals would not or could not give Aetna better rates. The Court agrees that the issue **[*39]** in a Sherman Act, *section 1* anti-trust action is to show how the contracts at issue harmed competition. Aetna is attempting to show this harm by showing that even though hospitals were not parties to the MFN agreement and made "unilateral" decisions, those hospitals' decisions were materially impacted by the MFN agreements. As an example, Aetna proffered a statement from a non-MFN hospital witness that the hospital was hesitant to agree to provide Aetna with a discount improvement until Aetna could attest to commitments from other facilities or other key providers to provide a "Blues-competitive rate" to Aetna. (Doc. 349, Pg ID 22798-99) The Court finds statements like these relevant to the issue of whether the MFN agreements impacted competition. As to confusion, the Court finds that counsel will be able to provide the jury the information as to whether the hospital witness is a hospital that has an MFN contract with Blue Cross. The *Rheumatology* case cited by Blue Cross involving Aetna is not applicable to this motion in limine since that case involved the issue of whether the plaintiff stated a claim under *Rule 12(b)(6)*, and did not involve the types of evidence a party may present at trial to show whether **[*40]** a certain contract harmed competition. Blue Cross' Motion in Limine to Exclude at Trial Evidence of and All References to Blue Cross' alleged "MFN Program" is denied.

M. Blue Cross' Motion in Limine to Exclude Evidence Quantifying the Alleged Effect of MFNs on Rates at Peer Group 1-4 Hospitals, Peer Group 5 Hospitals Not Listed on Vellturo Exhibit 17A, or Premiums (No. 329)

Blue Cross seeks to exclude evidence from the jury which was never produced to Blue Cross quantifying the impact of MFNs on Aetna's or other competitors' hospital rates and premiums. The only such evidence Blue Cross claims Aetna provided during discovery was figures for Peer Group 5 hospitals on the expert, Vellturo's Exhibit 17A. Blue Cross claims Aetna never provided such evidence as to hospital rates and premiums on Peer Group 1-4 Hospitals. Blue Cross further claims that the *Rule 30(b)(6)* deposition of Dr. Vellturo (not in his capacity as an expert) taken after the close of discovery where he testified that Aetna's rates were $80-$100 million lower as a result of the MFNs should also be excluded. Blue Cross asserts that Dr. Vellturo was not testifying as an expert, but as a representative of Aetna. Blue Cross claims that **[*41]** the $80-$100 million figure is not based on facts known to Aetna, and that Dr. Vellturo, as a fact witness, did not have personal knowledge of the amount. Blue Cross asserts that the underlying document Dr. Vellturo relied on to reach this amount is an internal Blue Cross one page undated document based on rates in other states to quantify the effects of alleged anticompetitive conduct. Blue Cross claims this document was from a third-party vendor about hospital discounts in various areas in the country. Blue Cross claims that this document was never seen or used by Aetna personnel in the course of conducting Aetna's business. Dr. Vellturo also cannot testify to this amount as an expert since he has no data or written calculations to support the figure. Blue Cross notes that Aetna's damages expert, Dr. Bamberger, did not rely on this document.

Aetna responds that Dr. Vellturo was not Aetna's Rule 30(b)(6) designee regarding premium-setting. Aetna's designee, Michael Sipos, a senior actuary at Aetna, answered all the questions posed by Blue Cross. Aetna claims that Dr. Vellturo, in his expert report, described his extensive empirical analysis of the impact of Blue Cross' anticompetitive contracts **[*42]** at hospitals throughout Michigan, not merely those listed in Exhibit 17A. Aetna claims Dr. Vellturo also quantified the impact on reimbursement rates at Peer Group 1-4 hospitals with and without MFN provisions in his report at Figure 4.

Blue Cross is seeking to exclude evidence at trial that was not provided during discovery. As a Rule 30(b)(6) designee fact witness, the Court finds that Dr. Vellturo cannot offer any opinion as to calculations of the MFNs' impact on Aetna which are not based on his personal knowledge of Aetna's business and which were not produced to Blue Cross during discovery. Specifically, Dr. Vellturo's calculations as a Rule 30(b)(6) witness of the $80-$100 million impact are not based on any documents Aetna obtained during its course of business. Aetna's fact witnesses may testify as to documents and calculations the witnesses may have performed during Aetna's conduct of its business if such calculations and underlying documents were produced to Blue Cross during discovery, including the discovery conducted by the parties ordered by this Court in 2014. Any calculations by Aetna's witnesses must either be based on personal knowledge as representatives of Aetna or as an expert with proper **[*43]** notice in the experts' reports. Also, Dr. Vellturo, as an expert, cannot testify to the $80-$100 million impact because this calculation and the underlying document were not identified in his expert report. Blue Cross' Motion in Limine to Exclude Evidence Quantifying Alleged Impact of MFNs on Rates at Peer Group 1-4 Hospitals, Peer Group 5 Hospitals Not Listed on Vellturo Exhibit 17A, or Premiums is granted as set forth above, unless Aetna can show at trial that this information was produced during the 2014 Court-ordered discovery.

N. Blue Cross' Motion in Limine Regarding References to Government or Non-Aetna Plaintiff's Lawyers (No. 330)

Blue Cross seeks to exclude at trial all references to non-Aetna plaintiffs' attorneys, most notably government lawyers, conducting depositions and other references (such as exhibit stickers). Blue Cross claims that such notifications would prejudice Blue Cross in that Aetna can argue that it was on the "same team" as the United States and the State of Michigan.

Aetna's response focuses on its previous arguments relating to Blue Cross' motion in limine regarding exclusion of other lawsuits. As to this specific request by Blue Cross, Aetna only argues **[*44]** that it is burdensome, without specifics.

Because the Court has ruled above that no reference should be made to other lawsuits, the Court finds that documents, including deposition transcripts referring to any government counsel would confuse the jury and would be prejudicial to Blue Cross. The parties must meet and confer to redact any reference to any government lawyers in any documents or depositions to be used at trial. If a government or non-Aetna counsel's name appears, those names need not be redacted. Only any reference that the government or non-Aetna counsel's name works for or represents the government or another plaintiff party other than Aetna should be redacted. Blue Cross' Motion In Limine Regarding References to Government or Non-Aetna Plaintiffs' Lawyers is granted.

O. Blue Cross' Motion in Limine to Exclude Evidence Of or References to the Factors Used to Determine Employee Compensation (No. 331)

Blue Cross seeks to exclude from trial all evidence of and references to the factors used by Blue Cross to determine employee compensation as irrelevant and prejudicial. Blue Cross argues that the compensation and benefit information of its executives is not relevant to whether **[*45]** Blue Cross operated as a nonprofit and charitable institution as required by the statutes. Blue Cross claims that non-profits and for-profits entities have compensation packages which include incentives.

Aetna claims that the Magistrate Judge has ruled the evidence is relevant. Aetna argues that the issue of compensation is relevant since Blue Cross claims that it has a social mission and the evidence would show that Blue Cross' executives were "incentivized" to protect Blue Cross' market share and operating profits. Aetna claims that this information is relevant to rebut Blue Cross' motive for seeking MFNs; that it was not because of Blue Cross' status as a nonprofit but because of Blue Cross' executives' incentives.

As noted by the Magistrate Judge in the order regarding discovery issues, the compensation information was relevant. The Magistrate Judge specifically noted that the detailed compensation and benefit information sought in Request No. 18 was *not* relevant to whether Defendant operated as a nonprofit, charitable and benevolent institution. (Doc. No. 92, Pg ID 1535) (italics added). However, the Magistrate Judge found *relevant* the information sought in Request No. 19 for documents **[*46]** which show *all targets, goals or formulas* concerning any form of compensation for certain Blue Cross employees. *Id.* It is noted that the *amount* of such compensation was not ordered to be produced by the Magistrate Judge. The Court finds that the "targets, goals or formulas" concerning the executives' compensation may be relevant to rebut Blue Cross' claim that it sought MFNs because of its statutory mission. However, before presenting this information at trial, Aetna must show that the executives about whom it seeks to present such information had input into the MFN contracting process and that the executives in fact had a compensation package which was tied to these "targets, goals or formulas." Aetna must not seek information regarding the amount of the executives' compensation. Blue Cross' Motion in Limine to exclude Evidence of or References to the Factors Used to Determine Employee Compensation is denied as more specifically noted above.

III. CONCLUSION

For the reasons set forth above,

IT IS ORDERED that Blue Cross' Motion in Limine to Exclude At Trial Aetna's Written Expert Reports **(Doc. No. 317)** is GRANTED.

IT IS FURTHER ORDERED that Blue Cross' Motion in Limine to Exclude Evidence **[*47]** of Supposed Antitrust or Other Legal Concerns **(Doc. No. 318)** is GRANTED.

IT IS FURTHER ORDERED that Blue Cross' Motion in Limine to Exclude at Trial Evidence of and all References to MFN Hearsay and Speculation **(Doc. No. 319)** is DENIED without prejudice.

IT IS FURTHER ORDERED that Blue Cross' Motion in Limine to Exclude Evidence of Changes to Michigan Law **(Doc. No. 321)** is GRANTED.

IT IS FURTHER ORDERED that Aetna's Motion in Limine to Preclude Evidence or Argument Regarding Blue Cross' Purported Social Mission and Nonprofit Status **(Doc. No. 322)** is DENIED.

IT IS FURTHER ORDERED that Aetna's Motion in Limine to Preclude Blue Cross from Informing the Jury that Compensatory Damages will be Trebled **(Doc. No. 323)** is GRANTED.

IT IS FURTHER ORDERED that Aetna's Motion in Limine to Preclude References to Blue Cross' Mutual Ownership Status **(Doc. No. 324)** is GRANTED.

IT IS FURTHER ORDERED that Blue Cross' Motion in Limine to Exclude References to Other Lawsuits **(Doc. No. 325)** is GRANTED.

IT IS FURTHER ORDERED that Blue Cross' Motion in Limine to Bar Use of Irrelevant and Prejudicial Terms Monopoly, Collusion, Conspiracy and their Derivatives **(Doc. No. 326)** is GRANTED.

IT IS FURTHER ORDERED that Blue **[*48]** Cross' Motion in Limine to Exclude At Trial Evidence of and All References to Blue Cross' Alleged "MFN Program" **(Doc. No. 328)** is DENIED.

IT IS FURTHER ORDERED that Blue Cross' Motion in Limine to Exclude Evidence Quantifying the Alleged Effect of MFNs on Rates at Peer Group 1-4 Hospitals, Peer Group 5 Hospitals Not Listed on Vellturo Exhibit 17A, or Premiums **(Doc. No. 329)** is GRANTED.

IT IS FURTHER ORDERED that Blue Cross' Motion in Limine Regarding References to Government or Non-Aetna Plaintiffs' Lawyers **(Doc. No. 330)** is GRANTED.

IT IS FURTHER ORDERED that Blue Cross' Motion in Limine to Exclude Evidence of or References to the Factors Used to Determine Employee Compensation **(Doc. No. 331)** is DENIED.

IT IS FURTHER ORDERED that Blue Cross' Motion in Limine to Exclude Reference to Government Investigations and Lawsuits **(Doc. No. 332)** is GRANTED.

LexisNexis® Headnotes

Administrative Law > Judicial Review > Standards of Review > Substantial Evidence

HN1[] **Standards of Review, Substantial Evidence**

The United States Court of Appeals for the Eleventh Circuit reviews the Federal Trade Commission's findings of fact and economic conclusions under the substantial evidence standard. Substantial evidence is more than a mere scintilla, and the Eleventh Circuit requires such relevant evidence as a reasonable mind might accept as adequate to support a conclusion. This standard forbids a court to make its own appraisal of the testimony, picking and choosing for itself among uncertain and conflicting inferences. Indeed, the possibility of drawing two inconsistent conclusions from the evidence does not prevent an administrative agency's finding from being supported by substantial evidence.

Administrative Law > Judicial Review > Standards of Review > De Novo Standard of Review

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

Administrative Law > Judicial Review > Standards of Review > Deference to Agency Statutory Interpretation

HN2[] Standards of Review, De Novo Standard of Review

The United States Court of Appeals for the Eleventh Circuit reviews de novo the Federal Trade Commission's (FTC's) legal conclusions and the application of the facts to the law. However, the Eleventh Circuit affords the FTC some deference as to its informed judgment that a particular commercial practice violates the Federal Trade Commission Act.

Administrative Law > Judicial Review > Standards of Review > Substantial Evidence

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Federal Trade Commission Act > Scope

HN3[] Standards of Review, Substantial Evidence

The United States Court of Appeals for the Eleventh Circuit's case law makes clear that the definition of the relevant market is essentially a factual question. Thus, the Eleventh Circuit reviews the Federal Trade Commission's determination of market definition, like all its factual findings, for substantial evidence.

Administrative Law > Judicial Review > Standards of Review > Substantial Evidence

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Federal Trade Commission Act > Scope

HN4[] Standards of Review, Substantial Evidence

The Federal Trade Commission's determination that a defendant possesses monopoly power is a factual or economic conclusion that the United States Court of Appeals for the Eleventh Circuit reviews for substantial evidence. No prior case of the Eleventh Circuit appears to hold this specifically, but this conclusion follows from previous cases that have treated a determination that a defendant possesses market power, a lesser-included element of monopoly power, as a factual finding.

Administrative Law > Judicial Review > Standards of Review > De Novo Standard of Review

Antitrust & Trade Law > Federal Trade Commission Act > Scope

Administrative Law > Judicial Review > Standards of Review > Substantial Evidence

Administrative Law > Judicial Review > Standards of Review > Deference to Agency Statutory Interpretation

HN5[] Standards of Review, De Novo Standard of Review

The ultimate legal conclusion that a defendant's conduct violates the Federal Trade Commission Act is an application of the facts to the law, which the United States Court of Appeals for the Eleventh Circuit reviews de novo, except for the limited deference prescribed by judicial precedent. But the Federal Trade Commission's factual building blocks and economic conclusions, findings of market definition, monopoly power, and harm to competition, are reviewed for substantial evidence.

Antitrust & Trade Law > Federal Trade Commission Act > Scope

HN6[] **Antitrust & Trade Law, Federal Trade Commission Act**

Section 5, 45 U.S.C.S. § 45, of the Federal Trade Commission Act prohibits unfair methods of competition in or affecting commerce. Although exclusive dealing arrangements are common and can be pro-competitive, particularly in competitive markets, these arrangements can harm competition in certain circumstances. When a market is competitive, the competition for the exclusive contract is a vital form of rivalry that can induce the offering firm to provide price reductions or improved services to buyers, to the ultimate benefit of consumers. But, notably, in the absence of such competition, a dominant firm can impose exclusive deals on downstream dealers to strengthen or prolong its market position. Thus, while such arrangements are not illegal in themselves, they can run afoul of antitrust laws as an improper means of maintaining a monopoly.

Antitrust & Trade Law > Federal Trade Commission Act > Scope

HN7[] **Antitrust & Trade Law, Federal Trade Commission Act**

A violation of § 5, *15 U.S.C.S. § 45*, of the Federal Trade Commission Act premised on monopolization requires proof of (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN8[] **Relevant Market, Product Market Definition**

Defining the market is a necessary step in any analysis of market power and thus an indispensable element in the consideration of any monopolization case arising under *15 U.S.C.S. § 2*. A product market consists of products that have reasonable interchangeability for the purposes for which they are produced. The reasonable interchangeability of use or the cross-elasticity of demand between a product and its substitutes constitutes the outer boundaries of a product market for antitrust purposes. Cross-elasticity of demand measures the extent to which modest variations in the price of one good affect customer demand for another good. A high cross-elasticity of demand indicates that the two products in question are reasonably interchangeable substitutes for each other and hence are part of the same market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN9[] **Relevant Market, Product Market Definition**

In defining product markets, the United States Court of Appeals for the Eleventh Circuit has long looked to the factors set forth in judicial precedent, including industry or public recognition of the sub-market as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN10[] Relevant Market, Geographic Market Definition

To consider monopolization, a relevant geographic market must be defined.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN11[] Relevant Market, Product Market Definition

Judicial precedent specifically identifies distinct prices as a factor indicating a separate product market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN12[] Relevant Market, Product Market Definition

It is true that in some circumstances the United States Court of Appeals for the Eleventh Circuit has said that a market definition must be based on expert testimony. Such testimony can be insufficient when conclusory or based upon insufficient economic analysis.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN13[] Actual Monopolization, Monopoly Power

As a legal matter, *15 U.S.C.S. § 2* requires that the defendant either have monopoly power or a dangerous probability of achieving it. Monopoly power is the ability to control prices or exclude competition. However, because direct proof of the ability to profitably raise prices substantially above the competitive level is only rarely available, courts more typically examine market structure in search of circumstantial evidence of monopoly power. Courts regularly ask whether the firm has a predominant market share and look to other circumstantial factors such as the size and strength of competing firms, freedom of entry, pricing trends and practices in the industry, ability of consumers to substitute comparable goods, and consumer demand.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN14[] Monopolies & Monopolization, Actual Monopolization

Exclusive dealing arrangements are not per se unlawful, but they can run afoul of the antitrust laws when used by a dominant firm to maintain its monopoly. An exclusive dealing arrangement can be harmful when it allows a monopolist to maintain its monopoly power by raising its rivals' costs sufficiently to prevent them from growing into effective competitors.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN15[] Actual Monopolization, Anticompetitive & Predatory Practices

Neither the United States Supreme Court nor the United States Court of Appeals for the Eleventh Circuit has provided a clear formula with which to evaluate an exclusive dealing monopoly maintenance claim, but the United States Court of Appeals for the District of Columbia Circuit has synthesized a structured, rule of reason-style approach to monopolization cases that has been cited with approval. First, the government must show that the monopolist's conduct had the anticompetitive effect of harming competition, not just a competitor. If the government succeeds in demonstrating this anticompetitive harm, the burden then shifts to the defendant to present pro-competitive justifications for the exclusive conduct, which the government can refute. If the court accepts the defendant's proffered justifications, it must then decide whether the conduct's pro-competitive effects outweigh its anticompetitive effects. This approach mirrors rule of reason analysis.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN16[] Actual Monopolization, Anticompetitive & Predatory Practices

The Federal Trade Commission adopts a case-by-case approach in evaluating exclusive dealing arrangements, looking to the reality of the marketplace and the practical effect of the arrangement. The United States Court of Appeals for the Eleventh Circuit agrees with this approach.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN17[] Actual Monopolization, Anticompetitive & Predatory Practices

The United States Court of Appeals for the Eleventh Circuit, without specifically citing judicial precedent, has joined the consensus that exclusive dealing arrangements are reviewed under the rule of reason.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN18[] Actual Monopolization, Anticompetitive & Predatory Practices
