But the appellants' success on this factor does not establish antitrust standing. In *AGC* itself, the fourth factor was non-dispositive. *AGC, 459 U.S. at 545 n.52*. Even though the Court recognized that the "policy against duplicative recoveries may not apply" to a harm the plaintiffs allegedly suffered, "the remote and obviously speculative character of that harm [was] plainly sufficient to place it beyond the reach of *§ 4*." *Id.* ***HN13***[] While the fourth factor addresses a "strong interest ... in keeping the scope of complex antitrust trials within judicially manageable limits," *id. at 543*, the efficient-enforcer inquiry remains, fundamentally, one into proximate cause, *Lotes, 753 F.3d at 412*; *McCready, 457 U.S. at 476-77*. Here, as in *AGC*, that the line between the Amex plaintiffs' and non-Amex plaintiffs' damages presents no additional difficulties does not pull back the appellants' injury from "beyond the reach of *§ 4*." *459 U.S. at 545 n.52*. We therefore conclude that, given the allegations of the SAC, the four efficient-enforcer factors do not establish antitrust standing. **[**23]** [10]

In short, it is not the appellants' status as umbrella plaintiffs or otherwise that resolves the antitrust standing question but "the relationship between the defendant's alleged unlawful conduct and the resulting harm to the plaintiff." *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1058 (9th Cir. 1999)*. We employ the efficient-enforcer test to evaluate the relevant relationship. The key principle underlying that test is proximate cause, and here the appellants fail to show the required direct connection between the harm and the alleged antitrust violation. The appellants are not efficient enforcers of the antitrust laws and therefore lack antitrust standing.[11]

[*144] II

---

[9] The district court held that this fourth factor counseled against antitrust standing, and in its discussion of the factor expressed concern over the "obvious risk of disproportionate damages." *Am. Express Anti-Steering, 433 F. Supp. 3d at 412* (quoting *In re London Silver Fixing, Ltd., Antitrust Litig., 332 F. Supp. 3d 885, 906 (S.D.N.Y. 2018)*). Yet the fourth efficient-enforcer factor concerns not the size of the damages awarded but the difficulty courts might face in dividing an award. We do not see such difficulty here.

[10] The appellants also seek injunctive relief under *§ 16 of the Clayton Act*, *15 U.S.C. § 26*. The appellants must demonstrate antitrust standing for that requested relief. *Eastman Kodak Co. v. Henry Bath LLC, 936 F.3d 86, 94 (2d Cir. 2019)*. The Supreme Court has said that "the difference in the remedy each section provides means that certain considerations relevant to a determination of standing under *§ 4* are not relevant under *§ 16*." *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 111 n.6, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. In particular, "standing under *§ 16* raises no threat of multiple lawsuits or duplicative recoveries." *Id.* Given that no damages are awarded under *§ 16*, the third factor's inquiry into whether there is a "high degree of speculation in a damages calculation" is inapplicable. *IQ Dental Supply, 924 F.3d at 66*. Because the difference in remedies does not affect the proximate clause analysis, we hold that the appellants lack antitrust standing for the request for injunctive relief.

[11] This result does not mean that Amex could never be liable for allegedly raising prices throughout the market. As the district court noted, the Amex Class members can still litigate the Anti-Steering Rules through the arbitration process. *Am. Express Anti-Steering, 433 F. Supp. 3d at 411*. In addition, at least one circuit court has held that an antitrust defendant may be held liable for umbrella effects on prices. *See In re Processed Egg Prods. Antitrust Litig., 881 F.3d 262, 276 (3d Cir. 2018)*.

Dismissal of the appellants' federal antitrust claims does not necessarily require the dismissal of their claims under the California Unfair Competition Law ("UCL") and California ***antitrust law***, known as the *Cartwright Act*. *See Aryeh v. Canon Bus. Sols., Inc., 55 Cal. 4th 1185, 151 Cal. Rptr. 3d 827, 292 P.3d 871, 877 (Cal. 2013)* ("Interpretations of federal ***antitrust law*** are at most instructive, not conclusive, when construing the Cartwright Act."). Still, we conclude that the appellants' California law claims fail for similar reasons as the federal claims.

HN14[] "[W]e consider the language of the state intermediate appellate courts to be helpful indicators of how the state's highest court would **[**24]** rule." *DiBella v. Hopkins, 403 F.3d 102, 112 (2d Cir. 2005)*. The California district courts of appeals have discussed antitrust standing under the Cartwright Act at length. In *Kolling v. Dow Jones & Co.*, the California court noted that "[t]he plaintiff in a Cartwright Act proceeding must show that an antitrust violation was the proximate cause of his injuries." *137 Cal. App. 3d 709, 187 Cal. Rptr. 797, 807 (Cal. Ct. App. 1982)*. In the same opinion, that court described the "standing to sue" requirement as preventing suits from parties only "incidentally injured" by an antitrust violation. *Id.* More recently, a California court observed that "[o]ne of the elements of standing to seek antitrust damages ... is a sufficient showing of injury with respect to," among other things, "the directness of the injury," "the speculative measure of the harm," and "the risk of duplicative recovery." *Wholesale Electricity Antitrust Cases I & II, 147 Cal. App. 4th 1293, 55 Cal. Rptr. 3d 253, 265 (Cal. Ct. App. 2007)*.

These decisions indicate that the California legislature, like Congress, was "familiar with the common-law rule" of proximate cause, and California courts will not assume that the legislature intended "to displace it *sub silentio*." *Lexmark, 572 U.S. at 132*. Accordingly, the lack of proximate cause in this case means that the appellants cannot state a claim under the Cartwright Act.[12]

* * *

For these reasons, we **AFFIRM** the judgment of the district **[**25]** court.

End of Document

[12] The district court properly concluded that "dismissal of an underlying antitrust claim mandates dismissal of the UCL claim as well." *Am. Express Anti-Steering, 433 F. Supp. 3d at 416*. "The UCL permits any person acting for the interests of itself, its members or the general public to initiate an action ... against a person or business entity who has engaged in any unlawful, unfair, or fraudulent business act or practice." ***Quelimane Co. v. Stewart Title Guar. Co., 19 Cal. 4th 26, 77 Cal. Rptr. 2d 709, 960 P.2d 513, 521-22 (Cal. 1998)*** (internal quotation marks and citations omitted). Because the UCL claim is predicated on violations of the Sherman and Cartwright Acts, we affirm the dismissal of that claim as well.

Abuelhawa v. Santa Clara Univ.

United States District Court for the Northern District of California, San Jose Division

November 29, 2021, Decided; November 29, 2021, Filed

Case No. 20-CV-04045-LHK

Reporter
2021 U.S. Dist. LEXIS 229335 *; 2021 WL 5584759

LILAS ABUELHAWA, et al., Plaintiffs, v. SANTA CLARA UNIVERSITY, Defendant.

Subsequent History: Appeal dismissed by *Abuelhawa v. Santa Clara Univ., 2022 U.S. App. LEXIS 6646 (9th Cir. Cal., Mar. 15, 2022)*

Prior History: *Abuelhawa v. Santa Clara Univ., 529 F. Supp. 3d 1059, 2021 U.S. Dist. LEXIS 61263, 2021 WL 1176689 (N.D. Cal., Mar. 29, 2021)*

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **Motions to Dismiss, Failure to State Claim**

A defendant may move to dismiss for lack of subject matter jurisdiction pursuant to *Fed. R. Civ. P. 12(b)(1)*. While lack of statutory standing requires dismissal for failure to state a claim under *Rule 12(b)(6)*, lack of U.S. Const. art. III standing requires dismissal for want of subject matter jurisdiction under *Rule 12(b)(1)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN2[] Motions to Dismiss, Failure to State Claim

A *Fed. R. Civ. P. 12(b)(1)* jurisdictional attack may be facial or factual. In a facial attack, the challenger asserts that the allegations contained in a complaint are insufficient on their face to invoke federal jurisdiction. The court resolves a facial attack as it would a motion to dismiss under *Rule 12(b)(6)*. Accepting the plaintiff's allegations as true and drawing all reasonable inferences in the plaintiff's favor, the court determines whether the allegations are sufficient as a legal matter to invoke the court's jurisdiction. In a factual attack, on the other hand, the challenger disputes the truth of the allegations that, by themselves, would otherwise invoke federal jurisdiction. In resolving a factual attack on jurisdiction, the court may review evidence beyond the complaint without converting the motion to dismiss into a motion for summary judgment. The court need not presume the truthfulness of the plaintiff's allegations in deciding a factual attack. Once the defendant has moved to dismiss for lack of subject matter jurisdiction under *Rule 12(b)(1)*, the plaintiff bears the burden of establishing the court's jurisdiction.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] Motions to Dismiss, Failure to State Claim

Fed. R. Civ. P. 8(a)(2) requires a complaint to include a short and plain statement of the claim showing that the pleader is entitled to relief. A complaint that fails to meet this standard may be dismissed pursuant to *Fed. R. Civ. P. 12(b)(6)*. *Rule 8(a)* requires a plaintiff to plead enough facts to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully. For purposes of ruling on a *Rule 12(b)(6)* motion, the court accepts factual allegations in the complaint as true and construes the pleadings in the light most favorable to the nonmoving party. The court, however, need not assume the truth of legal conclusions merely because they are cast in the form of factual allegations. Additionally, mere conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN4[] Motions to Dismiss, Failure to State Claim

If a court determines that a complaint should be dismissed, it must then decide whether to grant leave to amend. Under *Fed. R. Civ. P. 15(a)*, leave to amend shall be freely given when justice so requires, bearing in mind the underlying purpose of *Rule 15* to facilitate decisions on the merits, rather than on the pleadings or technicalities. When dismissing a complaint for failure to state a claim, a district court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN5[] **Judges, Discretionary Powers**

Leave to amend generally shall be denied only if allowing amendment would unduly prejudice the opposing party, cause undue delay, or be futile, or if the moving party has acted in bad faith. At the same time, a court is justified in denying leave to amend when a plaintiff repeatedly fails to cure deficiencies by amendments previously allowed. Indeed, a district court's discretion to deny leave to amend is particularly broad where plaintiff has previously amended the complaint.

Evidence > Judicial Notice > Adjudicative Facts > Facts Generally Known

Evidence > Judicial Notice > Adjudicative Facts > Public Records

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

HN6[] **Adjudicative Facts, Facts Generally Known**

The court may take judicial notice of matters that are either generally known within the trial court's territorial jurisdiction or can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned. *Fed. R. Evid. 201(b)*. Moreover, courts may consider materials referenced in the complaint under the incorporation by reference doctrine, even if a plaintiff failed to attach those materials to the complaint. Documents on publicly available websites and public records are proper subjects of judicial notice.

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

Evidence > Burdens of Proof > Allocation

HN7[] **Preclusion of Judgments, Law of the Case**

Under the law of the case doctrine, a court will generally refuse to reconsider an issue that has already been decided by the same court or a higher court in the same case. Under this standard, the prior decision should be followed unless: (1) the decision is clearly erroneous and its enforcement would work a manifest injustice; (2) intervening controlling authority makes reconsideration appropriate; or (3) substantially different evidence was adduced at a subsequent trial. Put another way, the law of the case doctrine allows the court to impose a heightened burden on the plaintiff—to show clear error, changed law, new evidence, changed circumstances, or manifest injustice.

Civil Procedure > Judgments > Preclusion of Judgments > Law of the Case

HN8[] **Preclusion of Judgments, Law of the Case**

The law of the case doctrine is inapplicable when the district court dismisses a claim without prejudice. The amended complaint is a new complaint, entitling the plaintiff to judgment on the complaint's own merits. In these circumstances, the district court is not bound by any law of the case. Although the district court is not so bound, if it determines the amended complaint is substantially the same as the initial complaint, the district court is free to follow the same reasoning and hold that the amended claims suffer from the same legal insufficiencies. Doing so allows the district court to correct any errors or misunderstandings without having to find that its prior decision was clearly erroneous.

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN9[] Contract Interpretation, Good Faith & Fair Dealing

Under California law, every contract imposes on each party a duty of good faith and fair dealing in each performance and in its enforcement. The covenant is based on general contract law and the long-standing rule that neither party will do anything which will injure the right of the other to receive the benefits of the agreement. To establish a breach of the covenant of good faith and fair dealing, a plaintiff must show: (1) the parties entered into a contract; (2) the plaintiff fulfilled his obligations under the contract; (3) any conditions precedent to the defendant's performance occurred; (4) the defendant unfairly interfered with the plaintiff's rights to receive the benefits of the contract; and (5) the plaintiff was harmed by the defendant's conduct.

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN10[] Subject Matter Jurisdiction, Jurisdiction Over Actions

In resolving a factual attack on jurisdiction, the court may review evidence beyond the complaint without converting the motion to dismiss into a motion for summary judgment. The court need not presume the truthfulness of the plaintiff's allegations in deciding a factual attack.

Civil Procedure > ... > Justiciability > Mootness > Real Controversy Requirement

HN11[] Mootness, Real Controversy Requirement

A case becomes moot only when it is impossible for a court to grant any effectual relief whatever to the prevailing party. As long as the parties have a concrete interest, however small, in the outcome of the litigation, the case is not moot. If an intervening circumstance deprives the plaintiff of a personal stake in the outcome of the lawsuit, at any point during litigation, the action can no longer proceed and must be dismissed as moot. Put another way, a claim becomes moot when a plaintiff actually receives complete relief on a claim. Complete relief includes requested interest, attorney's fees, or costs.

Civil Procedure > ... > Justiciability > Mootness > Real Controversy Requirement

HN12[] Mootness, Real Controversy Requirement

The mootness inquiry based on plaintiff obtaining relief changes when a refund is provided after the lawsuit is filed. In these circumstances, courts look to the complaint to determine what relief plaintiff is seeking beyond simply damages.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

HN13[] Breach of Contract Actions, Elements of Contract Claims

In order to state a claim for breach of contract, a plaintiff must plead the existence of a contract, his performance of the contract or excuse for nonperformance, the defendant's breach and resulting damages. In addition, the complaint must identify the specific provision of the contract allegedly breached by the defendant.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Motion Practice > Opposing Memoranda

HN14[] **Motions to Dismiss, Failure to State Claim**

In determining the propriety of a *Fed. R. Civ. P. 12(b)(6)* dismissal, a court may not look beyond the complaint to a plaintiff's moving papers, such as a memorandum in opposition to a defendant's motion to dismiss.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN15[] **Trade Practices & Unfair Competition, State Regulation**

California's Unfair Competition Law prohibits unlawful, unfair or fraudulent business acts or practices. *Cal. Bus. & Prof. Code § 17200*. Each adjective, or prong, captures a separate and distinct theory of liability. The unlawful prong borrows violations of other laws and treats them as unlawful practices independently actionable. The unfair prong is more complicated, consisting of three distinct tests: (1) whether the challenged conduct is tethered to any underlying constitutional, statutory or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***; (2) whether the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers; or (3) whether the practice's impact on the victim outweighs the reasons, justifications and motives of the alleged wrongdoer.

Governments > Legislation > Interpretation

HN16[] **Legislation, Interpretation**

When the legislature has permitted certain conduct or considered a situation and concluded no action should lie, courts may not override that determination.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

Governments > Courts > Judicial Precedent

HN17[] **Federal & State Interrelationships, Erie Doctrine**

A federal district court sitting in diversity must follow the decision of the intermediate appellate courts of the forum state unless there is convincing evidence that the highest court of the state would decide differently.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN18[] **State Regulation, Claims**

Because California's Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200 et seq.*, borrows violations from other laws, the violation of another law is a predicate for stating a cause of action under the UCL's unlawful prong.

Opinion

ORDER GRANTING MOTION TO DISMISS PLAINTIFFS' SECOND AMENDED COMPLAINT WITH PREJUDICE

Re: Dkt. No. 58

Plaintiffs, on behalf of themselves and others similarly situated, allege that Defendant Santa Clara University ("SCU") violated California law by halting in-person education in response to the COVID-19 pandemic. Plaintiffs specifically claim that SCU (1) breached an implied-in-fact contract; and (2) violated the "unfair" and "unlawful" prongs of *California's Unfair Competition Law, Cal. Bus. & Profs. Code §§ 17200 et seq.* ECF No. 52. Before the Court is SCU's motion to dismiss Plaintiffs' second amended complaint. ECF No. 58. Having considered the parties' submissions, the relevant law, and the record in this case, the Court GRANTS SCU's motion to dismiss with prejudice.

I. BACKGROUND

A. Factual Background

On February **[*2]** 7, 2020, a woman in Santa Clara County died of COVID-19, becoming the first known COVID-19 death in the United States. *See* *Abuelhawa v. Santa Clara University, 529 F. Supp. 3d 1059, 1061 (N.D. Cal. 2021) (hereafter "Abuelhawa I")*. On March 4, 2020, Governor Gavin Newsom declared a state of emergency in California. *Id. at 1061-62*. Thus, on March 10, 2020, SCU temporarily suspended in-person classes and moved to online instruction. *See* Second Am. Compl. ("SAC") ¶ 4, ECF No. 52.

Days later, on March 16, 2020, the Santa Clara County Health Officer issued a shelter-in-place order. *Abuelhawa I, 529 F. Supp. 3d at 1062*. Under the order, schools such as SCU could open only "for purposes of facilitating distance learning or performing essential functions," not in-person instruction. Request for Judicial Notice ("RJN") No. 10 at §10(f)(xi), ECF No. 59. To follow the order, SCU announced on March 16, 2020 that its educational experience would remain online for the Spring 2020 term. SAC ¶ 4. SCU's announcement preceded the March 30, 2020 start of SCU's Spring 2020 Quarter for all SCU schools except SCU's Law School and SCU's Jesuit School of Theology. Those two schools operate on the semester system rather than the quarter system. Thus, except for students of the Law School and the Jesuit School of Theology, SCU students had over two-weeks' **[*3]** notice that the Spring 2020 Quarter would be held remotely.

Plaintiffs are three SCU law students who bring a putative class action against SCU for SCU's temporary suspension of in-person instruction. Specifically, Plaintiffs Lilas Abuelhawa, Kelly Wynne, and Leonardo Kim seek to represent the following class: "all SCU law students who paid SCU Spring 2020 Semester tuition and/or fees for in-person educational services that SCU failed to provide, and whose tuition and fees have not been refunded."[1] SAC ¶ 46.

At first, Plaintiffs sought to represent all SCU students, not just those on the semester system. *See id.* ¶ 3 (defining "semester" to include "quarter" and "any academic period"). However, Plaintiffs abandoned their claims on behalf of all SCU students after SCU moved to dismiss the first amended complaint. Instead, Plaintiffs sought to represent a class and subclass of only "those students on the semester system"—that is, students of the Law School and the Jesuit School of Theology. ECF No. 33 at 11 n.3. Now, in the SAC that class definition is further narrowed to include only students of the Law School. SAC ¶ 46.

Plaintiffs do not challenge the allegedly "inferior learning experience" **[*4]** of online classes. SAC ¶ 46. The "gravamen of this action" is instead that Plaintiffs "paid SCU for in-person classes and the availability of on-campus facilities and experiences, and did not receive what they paid for." *Id.* Under this theory of the case, Plaintiffs assert two claims: (1) breach of an alleged implied-in-fact contract; and (2) violation of *California's Unfair Competition Law ("UCL"), Cal. Bus. & Profs. Code §§ 17200 et seq.*, as the result of SCU's alleged "unfair" or "unlawful" practices. *Id.* ¶¶ 56-67, 68-74. The breach of implied-in-fact contract claim is based on three theories: (i) SCU broke its alleged promises to provide in-person instruction, SAC ¶¶ 59-61; (2) a breach of the implied covenant of good faith and fair dealing based on SCU denying law students access to on-campus facilities while allowing undergraduate students to use the same facilities, *id.* ¶ 62; and (3) a breach of an implied parking contract, *id.* ¶¶ 6, 63. The UCL claim in turn is based on two theories: (i) violation of the "unfair prong" due to SCU breaking its alleged promises to provide in-person instruction, *id.* ¶ 71; and (ii) violation of the "unfair" and "unlawful" prongs due to SCU violating *California Education Code § 94897(d)*.

Plaintiffs allege that SCU promised **[*5]** in-person instruction in its course materials, student bulletins, and website. *See id.* at ¶¶ 17, 21-34. Course materials allegedly promised in-person instruction by distinguishing between in-person and online instruction. If SCU offered a course in person, SCU allegedly identified the on-campus location of the course and sometimes required a "mandatory in-person class session" to confirm a student's enrollment in the class. *Id.* ¶¶ 21, 31.

Student bulletins allegedly "refer to the in-person nature of the Spring 2020 semester." *Id.* ¶ 23. Plaintiffs specifically cite certain statements in the law student bulletin. That bulletin notifies students that they must complete 64 credit hours "at the law school" and that teachers "may utilize class attendance" in grading. *Id.* The law student bulletin also mentions certain on-campus facilities. *Id.*

Lastly, SCU's website advertises SCU's on-campus experience. *Id.* ¶ 24. Specifically, the website praises SCU's faculty, libraries, and campus life. As for faculty, the website touts SCU's "connected & engaged faculty." *Id.* As for libraries, SCU's website describes libraries as "much more than book repositories; they're inspiring spaces for research, collaboration, **[*6]** and reflection." *Id.* ¶ 25. As to campus life, the website advertises "special places on campus" and "organization[s] on campus." *Id.* ¶¶ 26-28.

---

[1] "Specifically excluded from the Class are Defendant, Defendant's officers, directors, agents, trustees, parents, children, corporations, trusts, representatives, employees, principals, servants, partners, joint ventures, or entities controlled by Defendant, and their heirs, successors, assigns, or other persons or entities related to or affiliated with Defendant and/or Defendant's officers and/or directors, the judge assigned to this action, and any member of the judge's immediate family." SAC ¶ 48.

In sum, Plaintiffs' claims rely on these statements in course materials, student bulletins, and SCU's website. Plaintiffs allege that these statements constitute SCU's promises to either (1) hold in-person instruction; or (2) to refund Plaintiffs' tuition. FAC ¶¶ 35-46.

Yet Plaintiffs fail to mention other statements in SCU's course materials or student bulletins. As for course materials, the "online course portal" that Plaintiffs allege viewing contains financial terms and conditions. SAC ¶ 17. "Students are required to accept the financial terms and conditions outlined by the University in order to continue their enrollment at SCU." RJN No. 2. These terms and conditions specifically provide that SCU's hyperlinked "tuition refund schedule" governs refunds:

> I accept full responsibility to pay all tuition, room and board, fees, and other associated costs as a result of enrollment at Santa Clara University . . . . I have reviewed the published tuition refund schedule at www.scu.edu/bursar/refund and understand that if I drop or withdraw from some **[*7]** or all of the classes for which I enroll, *I will be responsible for paying all or a portion of tuition and fees in accordance with the University's tuition refund schedule*. . . . I have read the above and agree to assume all financial responsibility associated with my enrollment at Santa Clara University.

RJN No. 2 (emphasis added). As for student bulletins, all bulletins except for the Jesuit School of Theology's bulletin state that "*[n]o tuition refunds* are made because of curtailed services resulting from strikes, *acts of God*, civil insurrection, riots or threats thereof, *or other causes beyond the control of the University*." RJN No. 4 (emphasis added). Thus, this language is in the law student bulletin.

B. Procedural History

Plaintiffs filed their initial complaint on June 17, 2020. ECF No. 1. On September 28, 2020, SCU moved to dismiss that complaint. ECF No. 21.

On October 12, 2020, Plaintiffs filed the first amended complaint. The parties then stipulated to SCU filing a new motion to dismiss the first amended complaint, and on October 23, 2020, the Court granted that stipulation. ECF No. 27.

On November 9, 2020, SCU again moved to dismiss. ECF No. 32. Plaintiffs filed their opposition **[*8]** on December 14, 2020. ECF No. 33. On January 8, 2021, SCU filed its reply. ECF No. 35. On March 29, 2021, the Court granted SCU's motion, but gave Plaintiffs leave to amend the breach of implied-in-fact contract and UCL claims. *See* *Abuelhawa I, 529 F. Supp. 3d at 1072*.

On April 27, 2021, Plaintiffs filed the SAC. ECF No. 52. SCU filed the instant motion to dismiss and an unopposed request for judicial notice on May 28, 2021. ECF Nos. 58 ("Mot."), 59 ("RJN"). On June 25, 2021, Plaintiffs filed their opposition to the instant motion to dismiss. ECF No. 60 ("Opp'n"). In their opposition, Plaintiffs requested judicial notice of a state court decision. Opp'n at 1 n.1. SCU filed its reply supporting the instant motion, and another unopposed request for judicial notice on July 12, 2021. ECF Nos. 61 ("Reply"), 62 ("Reply RJN"). SCU also filed a statement of recent decision on August 2, 2021. ECF No. 66.

II. LEGAL STANDARD

A. Motion to Dismiss under *Rule 12(b)(1)*

HN1[] A defendant may move to dismiss for lack of subject matter jurisdiction pursuant to *Rule 12(b)(1) of the Federal Rules of Civil Procedure*. While lack of statutory standing requires dismissal for failure to state a claim under *Rule 12(b)(6)*, lack of Article III standing requires dismissal for want of subject matter jurisdiction under *Rule 12(b)(1)*. *See* *Maya v. Centex Corp., 658 F.3d 1060, 1067 (9th Cir. 2011)*.

HN2[] "A *Rule 12(b)(1)* jurisdictional **[*9]** attack may be facial or factual." *Safe Air for Everyone v. Meyer, 373 F.3d 1035, 1039 (9th Cir. 2004)*. "In a facial attack, the challenger asserts that the allegations contained in a complaint are insufficient on their face to invoke federal jurisdiction." *Id.* The court "resolves a facial attack as it would a motion to dismiss under *Rule 12(b)(6)*: Accepting the plaintiff's allegations as true and drawing all reasonable inferences in the plaintiff's favor, the court determines whether the allegations are sufficient as a legal matter to invoke the court's jurisdiction." *Leite v. Crane Co., 749 F.3d 1117, 1121 (9th Cir. 2014)*. "[I]n a factual attack," on the other hand, "the challenger disputes the truth of the allegations that, by themselves, would otherwise invoke federal jurisdiction." *Safe Air for Everyone, 373 F.3d at 1039*. "In resolving a factual attack on jurisdiction," the court "may review evidence beyond the complaint without converting the motion to dismiss into a motion for summary judgment." *Id.* The court "need not presume the truthfulness of the plaintiff's allegations" in deciding a factual attack. *Id.* Once the defendant has moved to dismiss for lack of subject matter jurisdiction under *Rule 12(b)(1)*, the plaintiff bears the burden of establishing the court's jurisdiction. *See Chandler v. State Farm Mut. Auto Ins. Co., 598 F.3d 1115, 1122 (9th Cir. 2010)*.

B. Motion to Dismiss Under *Rule 12(b)(6)*

HN3[] *Rule 8(a)(2) of the Federal Rules of Civil Procedure* requires a complaint to include "a short and plain **[*10]** statement of the claim showing that the pleader is entitled to relief." A complaint that fails to meet this standard may be dismissed pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. The United States Supreme Court has held that *Rule 8(a)* requires a plaintiff to plead "enough facts to state a claim to relief that is plausible on its face." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. "The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (internal quotation marks omitted). For purposes of ruling on a *Rule 12(b)(6)* motion, the Court "accept[s] factual allegations in the complaint as true and construe[s] the pleadings in the light most favorable to the nonmoving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. The Court, however, need not "assume the truth of legal conclusions merely because they are cast in the form of factual allegations." *Fayer v. Vaughn, 649 F.3d 1061, 1064 (9th Cir. 2011)* (per curiam) (internal quotation marks omitted). Additionally, mere "conclusory allegations of law and unwarranted inferences are insufficient to defeat a motion to dismiss." *Adams v. Johnson, 355 F.3d 1179, 1183 (9th Cir. 2004)*.

C. Leave to Amend [*11]

HN4[] If a court determines that a complaint should be dismissed, it must then decide whether to grant leave to amend. Under *Rule 15(a) of the Federal Rules of Civil Procedure*, leave to amend "shall be freely given when justice so requires," bearing in mind "the underlying purpose of *Rule 15* to facilitate decisions on the merits, rather than on the pleadings or technicalities." *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)* (en banc) (alterations and internal quotation marks omitted). When dismissing a complaint for failure to state a claim, "a district court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts." *Id. at 1130* (internal quotation marks omitted).

Accordingly, *HN5*[] leave to amend generally shall be denied only if allowing amendment would unduly prejudice the opposing party, cause undue delay, or be futile, or if the moving party has acted in bad faith. *Leadsinger, Inc. v. BMG Music Publ'g, 512 F.3d 522, 532 (9th Cir. 2008)*. At the same time, a court is justified in denying leave to amend when a plaintiff "repeated[ly] fail[s] to cure deficiencies by amendments previously allowed." *See Carvalho v. Equifax Info. Servs., LLC, 629 F.3d 876, 892 (9th Cir. 2010)*. Indeed, a "district court's discretion to deny leave to amend is particularly broad where plaintiff has previously amended the complaint." *Cafasso, U.S. ex rel. v. Gen. Dynamics C4 Sys., Inc., 637 F.3d 1047, 1058 (9th Cir. 2011)* (quotation marks **[*12]** omitted).

III. JUDICIAL NOTICE

SCU requests judicial notice of materials from SCU's website, government orders on the COVID-19 pandemic, and court filings. ECF Nos. 59, 62 ("RJNs"). Plaintiffs request judicial notice of a state court decision, *Grant v. Chapman Univ.*, Orange Cty. Superior Ct. Case No. 30-2020-01146699, Jan. 22, 2021. Opp'n at 1 n.1. All requests for judicial notice are unopposed. The Court previously granted SCU's request for judicial notice for RJN Nos. 1-4, ECF No. 59. *See Abuelhawa v. Santa Clara University, 529 F. Supp. 3d 1059, 1061 n.1 (N.D. Cal. 2021)*. ***HN6***[] The Court may take judicial notice of matters that are either "generally known within the trial court's territorial jurisdiction" or "can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned." *Fed. R. Evid. 201(b)*. Moreover, courts may consider materials referenced in the complaint under the incorporation by reference doctrine, even if a plaintiff failed to attach those materials to the complaint. *Knievel v. ESPN, 393 F.3d 1068, 1076 (9th Cir. 2005)*. Documents on "publicly available websites" and public records are proper subjects of judicial notice. *See, e.g., Calhoun v. Google LLC, 526 F. Supp. 3d 605, 2021 WL 1056532, at *5 (N.D. Cal. 2021)* (collecting cases).

Accordingly, the Court GRANTS the parties' unopposed requests for judicial notice.

IV. DISCUSSION

Plaintiffs allege two causes of action in the Second **[*13]** Amended Complaint against SCU: (1) breach of implied-in-fact contract and (2) violation of California's Unfair Competition Law ("UCL") under the "unfair" and "unlawful" prongs. SCU moves to dismiss the SAC because SCU contends the claims (1) are identical to claims this Court has previously dismissed and thus either the law of the case applies or the claims should again be dismissed for the same reasons; (2) are moot because the Plaintiffs and the proposed class have already received the relief they are requesting; or (3) fail to state a cognizable claim for relief. Mot. at 1. The Court first considers whether the law of the case doctrine applies and then considers in turn whether Plaintiffs' breach of contract claim and UCL claim survive SCU's motion to dismiss.

A. The Law of the Case Doctrine Does Not Apply

SCU moves to dismiss because "[t]he vast majority of the SAC realleges the very same allegations that this Court previously rejected as insufficient to state a claim for breach of contract or for a violation of the UCL." Mot. at 9. SCU argues that "this Court's prior decision is law of the case and none of the factors that would warrant departure from that decision apply here." **[*14]** Mot. at 10. In opposition, Plaintiffs argue the law of the case doctrine is inapplicable here under Ninth Circuit law. Opp'n at 1-2. On reply, SCU contends that Plaintiffs "mischaracterize SCU's position" on law of the case doctrine and argues that Plaintiff's opposition is a stealth motion for reconsideration and should be rejected. Reply at 2-4. Although SCU appears to abandon its law of the case argument on reply, the Court briefly addresses whether the law of the case doctrine applies before analyzing whether the standard for a motion for reconsideration applies.

HN7[] "Under the law of the case doctrine, a court will generally refuse to reconsider an issue that has already been decided by the same court or a higher court in the same case." *Gonzalez v. Arizona, 677 F.3d 383, 390 n.4 (9th Cir. 2012)*, *aff'd sub nom. Arizona v. Inter Tribal Council of Arizona, Inc., 570 U.S. 1, 133 S. Ct. 2247, 186 L. Ed. 2d 239 (2013)* (citing *Jeffries v. Wood, 114 F.3d 1484, 1488-89 (9th Cir. 1997)* (en banc)). Under this standard, the prior decision should be followed unless: (1) "the decision is clearly erroneous and its enforcement would work a manifest injustice;" (2) "intervening controlling authority makes reconsideration appropriate"; or (3) "substantially different evidence was adduced at a subsequent trial." *Id.* (quoting *Jeffries, 114 F.3d at 1489*). Put another way, "the law of the case doctrine allows the court to impose a heightened **[*15]** burden on the plaintiff—to show clear error, changed law, new evidence, changed circumstances, or manifest injustice." *Atkins v. U.S. Dep't of Homeland Sec., 899 F.3d 1035, 1043 (9th Cir. 2018)*

However, *HN8*[] the law of the case doctrine is inapplicable when the district court dismisses a claim without prejudice. *See id.* ("The amended complaint is a new complaint, entitling the plaintiff to judgment on the complaint's own merits."). In these circumstances, "[t]he district court is not . . . bound by any law of the case." *Id.* Although the district court is not so bound, if it "determines the amended complaint is substantially the same as the initial complaint, the district court is free to follow the same reasoning and hold that the amended claims suffer from the same legal insufficiencies." *Id.* Doing so allows "the district court . . . to correct any errors or misunderstandings without having to find that its prior decision was "clearly erroneous."' *Id.* (quoting *United States v. Cuddy, 147 F.3d 1111, 1114 (9th Cir. 1998)*).

Here, the Court is not bound "by any law of the case" because, like the district court in *Atkins*, the Court dismissed Plaintiff's breach of implied-in-fact contract and UCL claims without prejudice. *Abuelhawa I, 529 F. Supp. 3d at 1072*; *Atkins, 899 F.3d at 1043*. SCU's arguments that Plaintiffs have submitted a stealth motion for reconsideration are similarly unavailing **[*16]** because viewing the Plaintiff's opposition through that lens would similarly impose "a heightened burden on the plaintiff," contrary to the Ninth Circuit's directive in *Atkins*. *Id.*

As such, the Court will review the SAC and Plaintiff's opposition without imposing a "heightened burden on the plaintiff," but mindful that it may "follow the same reasoning and hold that the amended claims suffer from the same legal insufficiencies." *Id.*

B. Plaintiffs Fail to State a Breach of Implied-in-Fact Contract Claim

Plaintiffs allege a single breach of implied-in-fact contract claim under three distinct theories: (1) SCU broke its alleged promises to provide in-person instruction, SAC ¶¶ 59-61; (2) a breach of the implied covenant of good faith and fair dealing based on SCU denying law students access to on-campus facilities while allowing undergraduate students to use the same facilities, *id.* ¶ 62; and (3) a breach of an implied parking contract, *id.* ¶¶ 6, 63. SCU moves to dismiss Plaintiffs' contract claim because the claim inadequately alleges a specific promise, and is mooted, inadequately pled, or duplicative. Mot at 9, 12-18. The Court considers each theory for breach of implied-in-fact contract in **[*17]** turn.

1. Plaintiffs again inadequately plead a specific promise.

On March 29, 2021, the Court granted SCU's motion to dismiss Plaintiffs' first amended complaint ("March 29, 2021 Order"). *Abuelhawa I, 529 F. Supp. 3d at 1072*. In the March 29, 2021 Order, the Court held that Plaintiffs' breach of implied-in-fact contract claim failed because Plaintiffs inadequately pled a specific promise by SCU to provide in-person instruction. *Id. at 1065-70*. The Court concluded that the statements identified by Plaintiffs were at most "'general promises or expectations,' which do not create contractual obligations." *Id. at 1066* (quoting *Kashmiri v. Regents. of the Univ. of Cal., 156 Cal. App. 4th 809, 828, 67 Cal. Rptr. 3d 635 (2007)*).

SCU moves to dismiss because it argues that Plaintiffs failed to include in the SAC any new factual allegations about specific promises "that SCU made to provide in-person instruction or services." Mot. at 10. Because Plaintiffs have merely re-pled the same statements that the Court previously found inadequate, SCU contends the breach of implied-in-fact contract claim should again be dismissed for the same reasons. *Id.* at 9-10.

Instead of identifying new statements by SCU about in-person instruction in the SAC, Plaintiffs' opposition to the instant motion to dismiss asks for reconsideration of the Court's March 29, 2021 Order **[*18]** in light of new authorities and three alleged errors in the Order. Opp'n at 1-5 (asking "the Court to review the issue again in light of the additional authorities and arguments briefly presented here."). Plaintiffs effectively concede that the SAC pleads no new facts that SCU made a specific promise to provide in-person instruction. Plaintiffs' redline comparison of the SAC to Plaintiffs' first amended complaint also confirms that the SAC contains no new factual allegations to support Plaintiff's theory that SCU made a specific promise to provide in-person instruction. *See* ECF No. 53. The Court first determines whether Plaintiffs have adequately pled a specific promise in the SAC, and then addresses Plaintiffs' three claims of error and new authorities.

As with Plaintiffs' first amended complaint, the Court finds that none of the statements identified by Plaintiffs in the SAC "constitutes a 'definite, specific, or explicit' promise that SCU would continue on-campus instruction despite a global pandemic." *Abuelhawa I, 529 F. Supp. 3d at 1066* (quoting *Kashmiri, 156 Cal. App. 4th at 828* (cleaned up)). "At most, these statements are 'general promises or expectations,' which do not create contractual obligations." *Id.* (quoting *Kashmiri, 156 Ca. App. 4th at 828*). Plaintiffs thus inadequately **[*19]** plead a specific promise to provide in-person instruction for the same reasons the Court articulated in the March 29, 2021 Order. *See generally id. at 1065-70*.

Plaintiff's opposition arguments fare no better. Plaintiffs' unpersuasive opposition to the instant motion to dismiss relies on three purported errors in the March 29, 2021 Order. Opp'n at 2-5. Plaintiffs first argue that "the question of whether SCU made a specific promise to provide an on-campus education though its conduct, course of dealings, and custom is a question of fact that cannot be resolved on the pleadings." Opp'n at 2-3. Second, Plaintiffs argue that the Court erroneously concluded that Plaintiffs' position leads to absurd results. *Id.* at 3-4. Lastly, Plaintiffs contend that the Court misconstrued Plaintiffs' specific promise allegations by concluding that Plaintiffs failed to allege a specific promise by SCU to provide on-campus instruction during a pandemic. *Id.* at 4-5.

On the first point, "an issue of fact can only arise if Plaintiffs first meet their obligation to plead the terms of the alleged contract." *UC Remote Cases*, No. JCCP5112, at 16-17 (Cal. Super. Ct. Jul. 29, 2021) (slip op.) (collecting state law cases sustaining dismissals for failure to plead breach of implied contract claims). **[*20]** Here Plaintiffs inadequately pled a specific promise, and thus there is no triable issue of fact. Plaintiffs moreover misstate the law in arguing that *Kashimiri* "held that 'custom and usages can also become specific terms by implication.'" Opp'n at 2 (quoting *Kashmiri, 156 Cal. App. 4th at 828*). In *Kashmiri*, the court stated that "state courts in other jurisdictions," not California, concluded custom and usage may be relevant. *156 Cal. App. 4th at 828, 831-33*. In fact, the *Kashmiri* Court had no occasion to consider any relevant custom and usages. *Id. Kashmiri* thus does not support Plaintiff's argument that custom and usages can become specific terms under California law. However, even if custom and usage were relevant here, the custom and usage references Plaintiffs identify "merely memorialize the pre-pandemic practice; they offer[] no guarantee that it would continue indefinitely," *In re Columbia Tuition Refund Action, 523 F. Supp. 3d 414, 423 (S.D.N.Y. 2021)*. As such, no issue of fact exists on these pleadings.

Plaintiffs' second argument also misses the mark. In the March 29, 2021 Order, the Court quoted a portion of SCU's prior motion to dismiss that Plaintiffs *did not contest* in Plaintiffs' prior opposition, *see* ECF No. 33. The Court explained that "under Plaintiff's contractual theory, 'students would have a contractual claim if their **[*21]** course was later reassigned to a different classroom or building' than the one listed in the course catalog." *Abuelhawa I, 529 F. Supp. 3d at 1066* (quoting ECF No. 32 at 16). Plaintiffs argue this conclusion is erroneous because their position is defensible under "the doctrine that courts do not consider trifling matters." *Id.* at 3. Setting aside that Plaintiffs did not raise this argument in response to SCU's prior motion to dismiss, Plaintiffs' argument fails to cure the central flaw identified by the Court in Plaintiffs' pleadings—a failure to identify a *specific* promise about in-person instruction by SCU.

Even if the Court should not consider trifling matters, the breach of implied-in-fact contract claim must still be anchored in a *specific* promise SCU breached. *Abuelhawa I, 529 F. Supp. 3d at 1065* (noting the parties agree the breach of implied-in-fact contract claim "must identify a *specific* promise that SCU breached.") Plaintiffs failed to identify such a promise in the first amended complaint. Lacking any new factual allegations, Plaintiffs again fail to identify such a promise in the SAC. At best, the statements on which Plaintiffs rely merely show SCU's general expectation that in-person classes are the norm. *See In re Columbia, 523 F. Supp. 3d at 423* (explaining school statements **[*22]** about in-person instruction "merely memorialize the pre-pandemic practice") Furthermore, Plaintiffs' attempt to rely on these statements is what the California Supreme Court cautioned against—an "attempt to use catalogues or similar published material to freeze the academic relationship into a rigid mold.'" *Paulsen v. Golden Gate Univ., 25 Cal. 3d 803, 812, 159 Cal. Rptr. 858, 602 P.2d 778 (1979)*. Thus, even if Plaintiffs' position does not lead to absurd results, Plaintiffs still fail to identify any specific promises that unequivocally promise in-person instruction.

Plaintiffs' last argument also fails for similar reasons. Plaintiffs argue that the "Court erred by framing the issue not simply in terms of whether SCU promised to provide on-campus instruction." Opp'n at 4. Plaintiffs read the Court's prior order to hold that Plaintiffs must allege a specific promise by SCU to "continue on-campus instruction *despite a global pandemic*." *Id.* at 4 (quoting *Abuelhawa I, 529 F. Supp. 3d at 1066*). Not so. The flaw the Court previously identified in Plaintiffs' first amended complaint is that the statements Plaintiffs rely on "are 'general promises or expectations' which do not create contractual obligations." *Abuelhawa I, 529 F. Supp. 3d at 1066*. Or said another way, "the statements Plaintiffs cite are too general to impose contractual duties on SCU." **[*23]** *Id.* These statements impose *no* contractual duties, including for in-person instruction. Moreover, the Court's March 29, 2021 Order specifically concluded that the statements Plaintiffs identify in the "course catalog and policy *fail to promise in-person instruction*." *Id.* at 10-11 (emphasis added). The Court did not condition this conclusion on the existence of a global pandemic.

In addition, the Court explained that the "purported promises that Plaintiffs cite here are vaguer than those found inadequate in" *Regents of University of California v. Superior Court, 240 Cal. App. 4th 1296, 193 Cal. Rptr. 3d 447, 471 (Ct. App. 2015)*, *rev'd on other grounds*, *4 Cal. 5th 607, 634 n.8, 230 Cal. Rptr. 3d 415, 413 P.3d 656 (2018)*. *Abuelhawa I, 529 F. Supp. 3d at 1068*. In *Regents*, the California Court of Appeal found statements made by the University of California, Los Angeles ("UCLA") about on-campus student safety to be insufficient to support an implied-in-fact contract between a UCLA student and UCLA. *Abuelhawa I, 529 F. Supp. 3d at 1068*. The UCLA student relied on two UCLA statements and a surcharge as the sources of the implied-in-fact contractual duties. *Id.* The student alleged that UCLA had: (1) stated in a school publication that the school was "committed to providing a safe work environment for all faculty, staff and students—one that is free from violence or threats of harm." *Id.* (quoting *Regents, 193 Cal. Rptr. 3d at 471*); (2) stated in the Student Conduct Code that "any individual **[*24]** who commits an act of violence or has threatened to commit such an act may be suspended from the university and barred from its property." *Id.* (quoting *Regents, 193 Cal. Rptr. 3d at 471 n.12*); and (3) imposed "an individual surcharge to pay for student mental health services." *Id.* (quoting *Regents, 193 Cal. Rptr. 3d at 471-72*). The *Regents* Court, applying *Kashmiri*, analyzed each source and rejected the implied-in-fact contract claim. *Id.*

In the March 29, 2021 Order, the Court compared the alleged statements made by SCU to the statements made by UCLA in *Regents* and found that "[n]one of [SCU's] statements are as specific as UCLA's." *Id.* Plaintiffs fail to distinguish, or even address, *Regents* in their opposition to the instant motion.

To avoid any doubt, the Court construes the SAC to allege that SCU made a specific promise to provide in-person instruction for the Spring 2020 semester. *See* SAC ¶ 47 (defining the class as "all SCU law students who paid SCU Spring 2020 Semester tuition and/or fees for in-person educational services that SCU failed to provide, and whose tuition and fees have not been refunded"). However, this construction is substantially similar to the Court's construction of the allegations in the first amended complaint. *See* ECF No. 25 ¶ 45 (Plaintiffs sought to represent **[*25]** students, including law students, "who paid SCU Spring 2020 Semester tuition and/or fees for in-person educational services that SCU failed to provide."). As such, the Court follows its prior reasoning in the March 29, 2021 Order to conclude that Plaintiffs again inadequately plead a specific promise by SCU to provide in-person instruction. *See* *Abuelhawa I, 529 F. Supp. 3d at 1065-70*. Plaintiffs' argument thus lacks merit.

Lastly, Plaintiffs also argue that the "weight of authority" points in favor of "students on 12(b)(6) motions or demurrers" and string cite several California district court and state court decisions, including cases the Court already found unpersuasive in its prior order, as well as one out-of-state decision. Opp'n at 1. SCU in turn points to a state court decision that agreed with the Court's prior order, as well as multiple out-of-state decisions ruling against students in Covid-19 tuition related cases. Reply at 3, 3 n.2. The Court's view remains unchanged. None of the California district or state court cases Plaintiffs discuss *Regents of University of California v. Superior Court, 240 Cal. App. 4th 1296, 193 Cal. Rptr. 3d 447 (Ct. App. 2015)*, or even the Court's March 29, 2021 Order.

For all the above reasons, Plaintiffs' theory of breach of implied-in-fact contract fails.

2. Plaintiffs Fail to Plead a Breach of [*26] the Implied Covenant of Good Faith and Fair Dealing.

Plaintiffs' second theory for breach of implied-in-fact contract flows from the covenant of good faith and fair dealing. Plaintiffs allege that SCU "breach[ed] the implied covenant of good faith and fair dealing by denying SCU law students access to on-campus law school facilities and buildings, while making those same law school facilities and buildings available to undergraduate students." *Id.* ¶¶ 7, 45. SCU moves to dismiss this theory for two reasons. First, SCU argues the "claim for breach of covenant of good faith and fair dealing should be dismissed because it is duplicative of Plaintiffs' breach of contract claim." Mot. at 15-16. Second, SCU argues that Plaintiffs fail to plead "that SCU unfairly interfered with Plaintiffs' rights to receive contractual benefits." Mot. at 16-18. Because the Court agrees with SCU that Plaintiffs fail to plead a breach of the covenant of good faith and fair dealing, the Court need not determine whether this theory is duplicative.

HN9[] Under California law, "[e]very contract imposes on each party a duty of good faith and fair dealing in each performance and in its enforcement." *Carson v. Mercury Ins. Co., 210 Cal. App. 4th 409, 429, 148 Cal. Rptr. 3d 518 (Ct. App. 2012)* (internal quotation **[*27]** marks and citations omitted). "The covenant 'is based on general contract law and the long-standing rule that neither party will do anything which will injure the right of the other to receive the benefits of the agreement.'" *Rosenfeld v. JPMorgan Chase Bank, N.A., 732 F. Supp. 2d 952, 968 (N.D. Cal. 2010)* (*quoting* *Waller v. Truck Ins. Exchange, Inc., 11 Cal. 4th 1, 36, 44 Cal. Rptr. 2d 370, 900 P.2d 619 (1995)*). To establish a breach of the covenant of good faith and fair dealing, a plaintiff must show: "(1) the parties entered into a contract; (2) the plaintiff fulfilled his obligations under the contract; (3) any conditions precedent to the defendant's performance occurred; (4) the defendant unfairly interfered with the plaintiff's rights to receive the benefits of the contract; and (5) the plaintiff was harmed by the defendant's conduct." *Rosenfeld, 732 F. Supp. 2d at 968* (citing Judicial Council of California Civil Jury Instruction 325).

In the SAC Plaintiffs allege that SCU "breached and continues to breach the implied covenant of good faith and fair dealing by denying SCU law students access to on-campus law school facilities and buildings while making those same law school facilities and buildings available to undergraduate students." SAC ¶ 62. Effectively, Plaintiffs allege that SCU breached the covenant by treating law and undergraduate students unequally. Not so. Plaintiffs fail **[*28]** to plead any facts in the SAC showing that SCU treated undergraduate and law school students unequally during the Spring 2020 semester—the relevant period of time that SCU Law Students paid "SCU Spring 2020 Semester tuition and/or fees for in-person educational services that SCU failed to provide." *Id.* ¶ 47 (defining representative class). In fact, the SAC contains no allegations that undergraduate students used campus facilities during Spring 2020.

SCU explains why. During Spring 2020 shelter-in-place orders "prevented SCU from holding *any* classes in person from mid-March 2020 until the end of the Spring 2020 semester or quarter." Mot at 18. Accordingly, during the relevant period, neither law students nor undergraduate students used on-campus facilities. With no factual allegations that such unequal treatment occurred, Plaintiffs' theory lacks merit.

To salvage their claim, Plaintiffs argue in their opposition to the instant motion to dismiss that SCU misconstrues Plaintiffs' breach of the implied covenant of good faith and fair dealing theory. Plaintiffs point to the SAC's allegation that SCU "*continues* to breach the implied covenant of good faith and fair dealing" and thus contend **[*29]** the SAC sufficiently alleges that Plaintiffs' breach of the implied covenant of good faith and fair dealing theory is not limited to the Spring 2020 term. Opp'n at 8-9 (citing SAC ¶ 62). However, this argument also lacks factual support because Plaintiffs fail to plead any factual allegations for the Fall 2020 and Spring 2021 terms. For example, Plaintiffs fail to plead that they "entered into a contract" with SCU for the Fall 2020 or Spring 2021 semesters and that they "fulfilled [their] obligations under the contract" for the Fall 2020 and Spring 2021 semesters, such as paying the required fees. Reply at 10. Both are necessary elements to establish that defendant breached the covenant of good faith and fair dealing. *See* *Rosenfeld, 732 F. Supp. 2d at 968* (plaintiff in part must show that "the parties entered into a contract" and that "the plaintiff fulfilled his obligations under the contract"). SCU again explains why. For Fall 2020 and Spring 2021 semesters, SCU expressly specified that courses would take place online. Reply at 10; Reply RJN No. 13-14. As such, there could be no unequal treatment when SCU made no promise to law students about on-campus facility use for these semesters. Moreover, Plaintiffs limit **[*30]** the class definition in the SAC to law students who paid the Spring 2020 semester tuition and in exchange did not receive the allegedly promised in-person services during the Spring 2020 semester. SAC ¶ 47. The SAC does not allege that SCU made any promises for Fall 2020 or Spring 2021 to law students who paid Spring 2020 tuition fees.

Because Plaintiffs fail to plead the necessary elements of a claim for breach of the covenant of good faith and fair dealing, Plaintiffs' theory of breach of the covenant of good faith and fair dealing must fail.

3. Plaintiffs' parking claim is inadequately pled.

Plaintiffs' third theory for breach of implied-in-fact contract focuses on parking permit fees. Plaintiffs allege that SCU breached "an implied contract to provide parking" by denying "Plaintiffs Abuelhawa and Wynne [who] paid $400 for a year-long parking pass" the benefit of their bargain. SAC ¶¶ 44; *see also id.* ¶ 6. Plaintiff Kim did not buy a parking permit during the relevant time period, ECF No. 58-2 ("Kenney Decl.") ¶ 10, and thus cannot allege this breach of implied-in-fact contract theory. SCU moves to dismiss because: (1) the claim is moot because Plaintiffs Abuelhawa and Wynne received **[*31]** a refund for Spring 2020; (2) the refund policy bars the claim; and (3) Plaintiffs fail to plead a breach because they do not allege they were prohibited from parking on campus during Spring 2020. Mot. at 12-14. The Court first addresses mootness, and concludes on this record that the claims are not moot. Because the Court ultimately concludes that Plaintiffs failed to plead a breach of implied-in-fact contract for the parking fees, the Court need not decide whether SCU's refund policy bars the claim.

a. Plaintiffs' parking claims are not moot.

SCU moves to dismiss for lack of federal court jurisdiction under *Federal Rule of Civil Procedure 12(b)(1)* because the parking claim is moot. *See* *Nance v. Miser, No. CV 14-00500-PHX-SMM, 2018 U.S. Dist. LEXIS 57519, 2018 WL 10667052, at *3 (D. Ariz. Apr. 3, 2018)*, *aff'd*, *768 Fed. Appx. 742 (9th Cir. 2019)* (explaining that "a mootness defense equates to a lack of subject-matter jurisdiction defense under Federal *Rule 12(b)(1)*"). SCU argues the parking claim is moot because "Plaintiffs have received what they are requesting: a refund for the fees they paid for parking they 'could not use.'" Mot at 13. Plaintiffs disagree. Opp'n at 5-6 (arguing that Plaintiffs did not obtain "a full refund of parking fees paid.").

To show that Plaintiffs have received a refund for the parking fees and the claim is moot, SCU submits evidence challenging the factual **[*32]** allegations in the SAC that Plaintiffs did not obtain a full refund. SCU thus brings a factual attack on jurisdiction. *See* *Safe Air for Everyone, 373 F.3d at 1039* (explaining that in a factual attack "the challenger disputes the truth of the allegations that, by themselves, would otherwise invoke federal jurisdiction."). ***HN10***[] "In resolving a factual attack on jurisdiction," the court "may review evidence beyond the complaint without converting the motion to dismiss into a motion for summary judgment." *Id.* The court "need not presume the truthfulness of the plaintiff's allegations" in deciding a factual attack. *Id.* The Court first explains when a claim is moot, then briefly summarizes the parties' relevant allegations and evidence, and finally discusses the parties' legal arguments.

HN11[] "A case becomes moot only when it is impossible for a court to grant any effectual relief whatever to the prevailing party." *Knox v. Serv. Employees Int'l Union, Local 1000, 567 U.S. 298, 307, 132 S. Ct. 2277, 183 L. Ed. 2d 281 (2012)* (internal quotation marks omitted). "As long as the parties have a concrete interest, however small, in the outcome of the litigation, the case is not moot." *Chafin v. Chafin, 568 U.S. 165, 173, 133 S. Ct. 1017, 185 L. Ed. 2d 1 (2013)* (internal quotation marks and citations omitted). "If an intervening circumstance deprives the plaintiff of a personal stake in the outcome of the lawsuit, at any point **[*33]** during litigation, the action can no longer proceed and must be dismissed as moot." *Genesis Healthcare Corp. v. Symczyk, 569 U.S. 66, 72, 133 S. Ct. 1523, 185 L. Ed. 2d 636 (2013)* (internal quotation marks omitted). Put another way, "a claim becomes moot when a plaintiff *actually receives* complete relief on [a] claim." *Chen v. Allstate Ins. Co., 819 F.3d 1136, 1138 (9th Cir. 2016)* (emphasis added). Complete relief includes "requested interest, attorney's fees, or costs." *T.K. v. Adobe Sys. Inc., No. 17-CV-04595-LHK, 2018 U.S. Dist. LEXIS 65557, 2018 WL 1812200, at *10-12 (N.D. Cal. Apr. 17, 2018)* (collecting cases).

Plaintiffs' allegations are simple. In the SAC Plaintiffs allege that: (1) "Plaintiffs Abuelhawa and Wynne paid $400 for a year-long parking pass"; (2) "SCU told Plaintiff Abuelhawa she would receive a $117 refund, and told Plaintiff Wynne she would receive a $120 credit"; and (3) Plaintiffs Abuelhawa and Wynne "have not received those credits." SAC ¶¶ 63, 44. Plaintiffs also seek money damages for the breach of implied-in-fact contract claim, *id.* ¶¶ 64, 67 and also "prejudgment interest" and "attorney's fees and expenses and costs of suit," *id.* at 14-15 ("Prayer For Relief").

SCU's evidence and explanation of its parking permit refund and credit policy is more complicated. SCU seeks to show that Plaintiffs Abuelhawa and Wynne obtained a full refund of the parking fees, thus mooting the breach of implied-in-fact contract claim based on the parking permits. **[*34]** SCU's evidence shows that two types of credits were provided by SCU and the Law School at different times. The key issue is when these credits were provided to Plaintiffs and whether the credits constituted a full refund.

As relevant here, SCU first provided students a credit based on the length of time students held the parking permit, and the type of permit owned (e.g. annual). Mot. at 7. Based on this formula, Plaintiff Abuelhawa received a $50 credit and Plaintiff Wynne received a $120 credit, and both were notified of their credits on June 11, 2020. Kenney Decl. ¶ 8. These credits could be used "toward a future parking permit." Mot. at 7. These credits would also be refunded to the student upon graduation. Kenney Decl. ¶ 9. The Court will refer to these credits as "parking credits."

SCU's Law School later provided additional credits to law students because some law students were unhappy with the amount of parking credit they received from SCU. ECF No. 58-3 ("Wang Decl.") ¶ 4. The Court will refer to these credits as "pro-rata credits." As relevant here, using a different formula than SCU, the Law School determined that law students with annual permits, like Plaintiffs Abuelhawa **[*35]** and Wynne, were entitled to a credit value of up to $117. Wang Decl. ¶ 5-6. Thus, Plaintiff Abuelhawa received a $67 pro-rata credit on top of the $50 parking credit she already obtained. *Id.* ¶ 7. Plaintiff Wynne did not receive a pro-rata credit because her $120 parking credit was more than the Law School's $117 credit value. *Id.* ¶ 8. Unlike the parking credits, the pro-rata credits were posted to a student's financial account and would be immediately paid to the student upon the student's request. *Id.* ¶¶ 6-7, 10. The Law School notified Plaintiff Abuelhawa of her pro-rata credit on April 23, 2021. *Id.* ¶ 6-7.

To further complicate matters, in early June 2021, SCU's Law School effectively converted all law students' parking credits to pro-rata credits. ECF No. 61-2 ("Kenney Reply Decl.") ¶ 4. Plaintiffs Abuelhawa and Wynne received their converted pro-rata credits on June 17, 2021. ECF No. 61-1 ("Calderone Decl.") ¶ 6-7. This meant that as of June 17, 2021, Plaintiffs Abuelhawa and Wynn could immediately seek a refund of the full $117 and $120 credit amounts in their financial accounts, rather than wait upon graduation to seek a refund of the parking credits.

To sum up, on June 17, 2021, **[*36]** Plaintiffs Abuelhawa and Wynne each received a $117 and $120 pro-rata credit, respectively, in their financial accounts. This credit amount would be immediately paid to the student upon the student's request. The Court now turns to the parties' legal mootness arguments.

SCU's mootness argument fails because the record does not show that Plaintiffs have obtained complete relief. Here, Plaintiffs seek not just damages for the breach of implied-in-fact contract, SAC ¶ 67, but also at minimum, "prejudgment interest" and "attorney's fees and expenses and costs of suit," *id.* at 14-15 ("Prayer For Relief"). SCU has not "paid the requested interest, attorney's fees, or costs" and thus have not offered Plaintiffs "complete relief." *Adobe Sys. Inc., 2018 U.S. Dist. LEXIS 65557, 2018 WL 1812200, at *12*. Plaintiffs' parking claims are therefore not moot based on evidence in the record.

SCU's argument to the contrary lacks merit because SCU relies on inapplicable case law. SCU argues that "[w]hen a defendant provides a full refund for a product or service, and the plaintiff is entitled to no other relief, courts dismiss the plaintiff's claims as moot." Mot. at 12. True, but irrelevant. SCU relies on case law where the defendant provided the refund *prior* to plaintiff **[*37]** filing suit. *See, e.g., Lepkowski v. CamelBak Prods., LLC, No. 19-CV-04598-YGR, 2019 U.S. Dist. LEXIS 214555, 2019 WL 6771785, at *2-4 (N.D. Cal. Dec. 12, 2019)* (finding plaintiff "was fully compensated . . . prior to the initiation of any lawsuit"). However, ***HN12***[] the inquiry changes when a refund is provided after the lawsuit is filed. In these circumstances, courts look to the complaint to determine what relief Plaintiff is seeking beyond simply damages. *See, e.g., Adobe Sys. Inc., 2018 U.S. Dist. LEXIS 65557, 2018 WL 1812200, at *11* (finding a claim was not mooted in part because plaintiff sought interest, attorney's fees, or costs).

Here the record shows that SCU did not provide a full refund of the parking fees until Plaintiffs Abuelhawa and Wynne obtained the converted pro-rata credits on June 17, 2021. Prior to that date, Plaintiffs Abuelhawa and Wynne had $50 and $120 in parking credits that SCU concedes could not be immediately paid to the Plaintiffs. Mot. at 7. Accordingly, the record shows that at best Plaintiffs received a full refund almost two months after Plaintiffs filed the SAC, and at worst a full year after Plaintiffs initially filed their lawsuit. ECF Nos. 53, 1. Either date renders the cases on which SCU relies inapplicable.

The Court thus cannot conclude on this record that Plaintiffs' parking claims are moot.

b. Plaintiffs inadequately plead a breach of implied parking [*38] contract claim.

Although Plaintiffs' parking claims are not moot, the claims are inadequately pled. SCU moves to dismiss because it argues that Plaintiffs "have failed to plead facts indicating that SCU breached its agreement with students by revoking their permission to park on campus." Mot. at 14-15. Plaintiffs have no reply and thus implicitly concede this point. Instead, Plaintiffs argue that "[t]his argument defies common sense" because "[t]he only rational reason to buy on-campus parking is to use it while on the campus" and contend that Plaintiffs "have been deprived of the benefits of the parking contract" because "Plaintiffs and other law students have been singled out from the rest of the student body for continued remote learning." Opp'n at 7.

HN13[] "In order to state a claim for breach of contract, a plaintiff must plead the existence of a contract, his performance of the contract or excuse for nonperformance, the defendant's breach and resulting damages." *Donohue v. Apple, Inc., 871 F. Supp. 2d 913, 930 (N.D. Cal. 2012)* (citing *Otworth v. Southern Pac. Transp. Co., 166 Cal. App. 3d 452, 458, 212 Cal. Rptr. 743 (Ct. App. 1985)*). In addition, "[t]he complaint must identify the specific provision of the contract allegedly breached by the defendant." *Id.* (citing *Progressive West Ins. Co. v. Superior Court, 135 Cal.App.4th 263, 281, 37 Cal.Rptr.3d 434 (2005)*).

Plaintiffs fail to identify any specific provisions of the contract in the SAC, **[*39]** only alleging that Plaintiffs Abuelhawa and Wynne entered into an implied parking contract with SCU and paid "$400 for a year-long parking pass." SAC ¶ 63. SCU includes relevant provisions of the parking contract, which is entitled the Parking & Transportation Plan ("Parking Plan"), with its motion to dismiss.[2] The Court finds the Parking Plan is incorporated by reference because Plaintiffs' parking claim relies on Plaintiffs' purchase of a parking permit, which is governed by the Parking Plan. *See Parrino v. FHP, Inc., 146 F.3d 699, 706 (9th Cir. 1998)* (explaining that the purpose of the incorporation by reference doctrine is to "[p]revent[] plaintiffs from surviving a *Rule 12(b)(6)* motion by deliberately omitting references to documents upon which their claims are based.").

In the Parking Plan SCU explains that "Parking at [SCU] and on lands owned or controlled by the University is regulated by this Parking and Traffic Plan and is enforced through the issuance of parking permits." RJN No. 5 ("Chapter 2: Parking Permits" heading). The Plan further explains that "[a]n SCU parking permit is just that; permission to park in designated areas on campus and on University lands." ECF No. 58-1 at 132. SCU argues that Plaintiffs failed to allege that **[*40]** SCU revoked permission to park on campus, "in contravention of the Parking Plan." Mot. at 14. SCU points out that allegations that "SCU closed all residence halls, closed campus facilities and cancelled all on-campus events" do not allege that SCU prohibited Plaintiffs from parking on campus. *Id.*

Plaintiffs do not contest this characterization or cite any factual allegation in the SAC showing that SCU prohibited students from parking on campus after classes shifted to remote instruction. Rather, Plaintiffs argue the "only rational reason to buy on-campus parking is to use it while on the campus." Opp'n at 7. Maybe so, but under

---

[2] The Court granted SCU's unopposed request for judicial notice of this document. *See* Section III, *supra*. 23

California law Plaintiffs must plead that SCU breached the parking contract. Here, Plaintiffs allege in the SAC that "SCU . . . breached an implied contract to provide parking" because "SCU was to provide a year of on-campus parking" and "[a]s a result of closure, SCU did not provide a year of on-campus parking." SAC ¶ 63. Plaintiffs also allege in the SAC that "[w]hen SCU shut down its campus, it charged students for parking they could not use." *Id.* ¶ 44. However, the Plan, which Plaintiffs do not contest governs the contract between Plaintiffs and SCU, does **[*41]** not make such guarantees or promises, ECF No. 58-1 at 132. *See* *Herskowitz v. Apple Inc., 940 F. Supp. 2d 1131, 1141 (N.D. Cal. 2013)* ("Under California contract law, 'if the language [of a contract] is clear and explicit, and does not involve an absurdity,' the language must govern the contract's interpretation."). The permit merely allows Plaintiffs to park on SCU property. *Id.* Plaintiffs have not alleged that SCU prohibited Plaintiffs from parking, or interfered with Plaintiffs' ability to park, on-campus.

Lastly, Plaintiffs attempt to save the parking claim by alleging in their opposition to the instant motion to dismiss that SCU violated "the duty of good faith and fair dealing" regarding the parking permit fees. Opp'n at 7. But this allegation does not appear in the SAC. Plaintiffs only plead in the SAC that SCU breached the implied covenant of good faith and fair dealing "by denying SCU law students access to buildings and facilities at SCU's law school." SAC ¶¶ 7, 62. The SAC makes no mention of parking fees when alleging SCU's breach of the implied covenant. The Court cannot look beyond the pleadings. *See* *Schneider v. Cal. Dep't of Corrs., 151 F.3d 1194, 1197 n.1 (9th Cir. 1998)* (***HN14***[] "In determining the propriety of a *Rule 12(b)(6)* dismissal, a court may not look beyond the complaint to a plaintiff's moving papers, such as a memorandum **[*42]** in opposition to a defendant's motion to dismiss.").

Accordingly, Plaintiffs fail to state a breach of implied-in-fact contract based on the parking permit fees.

C. Plaintiffs Fail to Plead a UCL Claim

Plaintiffs allege that SCU violated the "unfair" and "unlawful" prongs of California's Unfair Competition Law ("UCL"). *See* SAC ¶¶ 71-72. ***HN15***[] "The UCL prohibits 'unlawful, unfair or fraudulent business act[s] or practices[s].'" *Doe v. CVS Pharmacy, Inc., 982 F.3d 1204, 1214 (9th Cir. 2020)* (quoting *Cal. Bus. & Prof. Code § 17200*). Each adjective, or prong, "captures a separate and distinct theory of liability." *Id.* (internal quotation marks and citation omitted). The "unlawful" prong "borrows violations of other laws and treats them as unlawful practices independently actionable." *Id.* (cleaned up). The "unfair" prong is more complicated, consisting of three distinct tests: "(1) whether the challenged conduct is tethered to any underlying constitutional, statutory or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***; (2) whether the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers; or (3) whether the practice's impact on the victim outweighs the reasons, **[*43]** justifications and motives of the alleged wrongdoer." *Id. at 1214-15* (cleaned up).

Plaintiffs contend SCU violated the "unfair" prong of UCL by "charging students full tuition and fees without providing the on-campus services and facilities SCU was required to provide," SAC ¶ 71, and by "violating *Cal. Education Code § 94897(d)*," *id.* ¶ 72. Plaintiffs also allege that SCU violated the UCL "unlawful" prong by "violating *Cal. Education Code § 94897(d)*." *Id.* ¶ 72. SCU moves to dismiss the UCL claim because the Court already dismissed this claim previously and because SCU is exempted from *California Education Code § 94897(d)*. Mot. at 19-20. The Court addresses each UCL prong below.

1. Plaintiffs fail to plead an "unfair" practice.

Plaintiffs allege a violation of the "unfair" prong of the UCL under two distinct theories: (1) failure to provide in-person instruction, and (2) violation of *California Education Code § 94897(d)*, which requires certain educational entities to disclose if the "educational programs are delivered by means of distance education" in their advertising and promotional materials. SCU argues the first theory is identical to the one dismissed by the Court in the March 29, 2021 Order and the second theory fails because SCU is exempt from *California Education Code § 94897(d)*. Mot. at 19-20. The Court agrees.

In the March 29, 2021 Order, the Court dismissed **[*44]** Plaintiffs' failure to provide in-person instruction theory under the UCL because Plaintiffs failed to allege a specific promise by SCU to provide such instruction. *Abuelhawa I, 529 F. Supp. 3d at 1070*. Here, the Court has again found that Plaintiffs inadequately pled a specific promise by SCU to provide in-person instruction. *See* Section IV-B *supra*. Accordingly, Plaintiffs once again fail to plead a violation of the UCL under the failure to provide on-campus instruction theory.

Plaintiffs have no response and effectively concede that lack of a specific promise dooms their UCL claim based on the same theory. Plaintiffs instead contend that a breach of contract claim is sufficient to support a claim under the "unfairness" prong of the UCL. Opp'n at 12-13 (quoting *In re Facebook PPC Advertising Litig., 2010 U.S. Dist. LEXIS 87769, 2010 WL 3341062, at *8 (N.D. Cal. Aug. 25, 2010)*. However, Plaintiffs' UCL claim fails here precisely because Plaintiffs have failed to state a breach of implied-in-fact contract claim. *See* Section IV-B *supra*.

Plaintiff's second theory, premised on a violation of *California Education Code § 94897(d)*, also fails. Plaintiffs argue that the statute prohibits the behavior that "occurred here." Opp'n at 12. Plaintiffs further contend that under the "tethering test" of the UCL "unfair prong" Plaintiffs need not plead any direct violations of the statute. **[*45]** Opp'n at 11-12. According to Plaintiffs, they "need merely show that the effects of [defendant]'s conduct are comparable to or the same as a violation of the law, or otherwise significantly threaten or harm competition." *Id.* (quoting *In re Zoom Video Comms. Inc. Privacy Litig., 525 F. Supp. 3d 1017, 2021 WL 930623, at *23 (N.D. Cal. 2021)*).

SCU argues that SCU is exempt from the *California Private Postsecondary Education Act of 2009*, which includes *California Education Code § 94897(d)*, because SCU falls within two exemptions in the Act. Mot. at 19-20 (noting the Act exempts accredited law schools and accredited post-secondary institutions); RJN Nos. 6-9. As such, SCU contends that it cannot violate the UCL claim "tethered" to the underlying statute because SCU is exempt from *California Education Code § 94897(d)*. In their opposition brief, Plaintiffs do not dispute that SCU is exempt from *Section 94897(d)*, and thus concede this point. Accordingly, for the reasons below, Plaintiffs' theory fails because SCU is exempt from *Section 94897(d)*, the "tethered" statute.

The California Court of Appeal's analysis in *Lori Rubinstein Physical Therapy, Inc. v. PTPN, Inc., 148 Cal. App. 4th 1130, 1142, 56 Cal. Rptr. 3d 351 (2007)*, is instructive. In *Lori Rubinstein*, like here, plaintiffs alleged that defendant's conduct was "unfair" under the UCL because this conduct violated "the policy or spirit of the" relevant statute. *Id.* Thus, the *Lori Rubinstein* plaintiffs, like Plaintiffs here, argued that even if their claim under the relevant statute "fails, they have stated **[*46]** an unfair competition claim because the conduct they allege violates the policy and spirit of" the relevant statute and thus is "unfair" under the UCL. *Id.* The *Lori Rubinstein* Court rejected this argument. *Id.* The *Lori Rubinstein* Court explained that the Legislature may "limit the judiciary's power to declare conduct unfair" under the UCL. *Id. at 1142*. Specifically, ***HN16***[] when "the Legislature has permitted certain conduct or considered a situation and concluded no action should lie, courts may not override that determination." *Id.* The *Lori Rubinstein* Court explained that the Legislature exempted the alleged conduct from enforcement under the relevant statute. *Id.* Accordingly, defendants could not be liable under the "general unfair competition law" because defendant's conduct was expressly exempted from the relevant "tethered" statute. *Id.*

So too here. Plaintiffs allege that SCU violated the "policy or spirit of" *California Education Code § 94897(d)* and thus have adequately pled that SCU violated the "unfair" prong of the UCL. Opp'n at 11-12. However, just like in *Lori Rubeinstein*, the California Legislature expressly exempted SCU's conduct from the prohibitions in *section 94897(d)*. Because SCU, like defendants in *Lori Rubinstein*, is exempt from the **[*47]** prohibited conduct in the "tethered" statute, Plaintiffs cannot show that SCU's conduct was "unfair" under the UCL. *See* *Lori Rubinstein, 148 Cal. App. 4th at 1142*.

Plaintiffs' reliance on *In re Zoom Video Comms. Inc. Privacy Litig., 525 F. Supp. 3d 1017 (N.D. Cal. 2021)*, and *In re Adobe Systems, Inc. Privacy Litig., 66 F. Supp. 3d 1197 (N.D. Cal. 2014)*, is unpersuasive. Opp'n at 11-12. In both cases, this Court explained that "Plaintiffs do not need to plead any direct violations of a statute" to successfully allege a claim under the "unfair" prong of the UCL. *In re Zoom, 525 F. Supp. 3d at 1047-48* (quoting *In re Adobe, 66 F. Supp. 3d at 1227*). However, the Court did not hold in either case that plaintiffs can successfully allege a UCL claim under the "unfair" prong when the defendant is expressly exempt from the "tethered" statute. Neither the *In re*

Zoom defendant, nor the *In re Adobe* defendant, argued it was exempt from the relevant statutes and thus the issue was not before the Court. Accordingly, these cases are inapposite.

Moreover, as published Ninth Circuit precedents have long required, ***HN17***[] this Court sitting in diversity "must follow the decision of the intermediate appellate courts of the state unless there is convincing evidence that the highest court of the state would decide differently." *Daniel v. Ford Motor Co., 806 F.3d 1217, 1222 (9th Cir. 2015)* (quoting *In re Schwarzkopf, 626 F.3d 1032, 1038 (9th Cir. 2010)*); *accord, e.g., Cmty. Nat. Bank v. Fid. & Deposit Co. of Maryland, 563 F.2d 1319, 1321 n.1 (9th Cir. 1977)* (same). Plaintiffs present no evidence that the California Supreme Court would disagree with the *Lori Rubinstein* Court.

Plaintiffs **[*48]** thus fail to state a claim under the "unfair" prong of the UCL.

2. Plaintiffs fail to plead "unlawful" conduct.

Plaintiffs' claim that SCU violated the "unlawful" prong of the UCL similarly fails. Plaintiffs allege that SCU violated the "unlawful" prong of the UCL because SCU violated *California Education Code § 94897(d)*. SCU argues that there can be no violation because SCU is exempt from that statute. Mot. at 19. Plaintiffs have no rejoinder and have thus abandoned this claim. *See Diamond S.J. Enter., Inc. v. City of San Jose, No. 18-CV-01353-LHK, 2018 U.S. Dist. LEXIS 185066, 2018 WL 5619746, at *4 (N.D. Cal. Oct. 29, 2018)* ("An opposition brief's failure to address a motion to dismiss' challenges to a claim constitutes abandonment of that claim.").

Moreover, SCU is correct on the law. ***HN18***[] Because the UCL borrows violations from other laws, the "violation of another law is a predicate for stating a cause of action under the UCL's unlawful prong." *Berryman v. Merit Property Mgmt., Inc., 152 Cal. App. 4th 1544, 1554-55, 62 Cal. Rptr. 3d 177 (Ct. App. 2007)*. Here, as discussed above, SCU is exempt from *California Education Code § 94897(d)*. Therefore, there can be no predicate violation under *section 94897(d)*, and without such a violation Plaintiffs fail to plead a cause of action under the "unlawful" prong of the UCL.

Perhaps realizing the futility of their *section 94897(d)* arguments, Plaintiffs pivot and instead argue in their opposition brief that a "breach of an implied contract can support a claim under the unlawful prong of the UCL." Opp'n **[*49]** at 12. Even if true, Plaintiffs have inadequately pled breach of implied-in-fact contract. *See* Section IV-B, *supra*. With no breach of implied-in-fact contract, Plaintiffs cannot show a violation of the UCL under the "unlawful" prong.

Plaintiffs also face two additional hurdles. First, Plaintiffs already abandoned this exact theory in their opposition to SCU's prior motion to dismiss. Plaintiffs' first amended complaint alleged that SCU violated the "unlawful" prong of the UCL because SCU breached the implied-in-fact contract, and was liable for conversion and unjust enrichment. *See* ECF No. 25 ¶ 68. However, Plaintiffs then withdrew Plaintiffs' unlawful prong UCL claim in its opposition to SCU's prior motion to dismiss. *See* ECF No. 33 at 2 (stating that Plaintiffs "withdraw . . . the "claim under the 'unlawful' prong of the UCL.")

Second, and more important, Plaintiffs *have not* alleged in the SAC that SCU violated the "unlawful" prong of the UCL by breaching an implied-in-fact contract. The Court cannot look to the opposition for new allegations. *See Schneider, 151 F.3d 1194 at n.1* ("In determining the propriety of a *Rule 12(b)(6)* dismissal, a court may not look beyond the complaint to a plaintiff's moving papers, such as a memorandum **[*50]** in opposition to a defendant's motion to dismiss.").

As such, Plaintiffs inadequately plead a UCL claim.

V. CONCLUSION

Plaintiffs' three complaints have all alleged the same two claims: (1) SCU breached an implied-in-fact contract; and (2) SCU violated the UCL under the "unfair" and "unlawful" prongs. *See* ECF Nos. 1, 25, 52. Prior to the Court's March 29, 2021 Order, SCU twice pointed out the deficiencies in Plaintiff's breach of implied-in-fact contract and UCL claims in two separate motions to dismiss. *See* ECF Nos. 21, 32. Subsequently, in the March 29, 2021 Order, the Court dismissed Plaintiff's first amended complaint with leave to amend the breach of implied-in-fact contract and UCL claims. *See* *Abuelhawa I, 529 F. Supp. 3d at 1072*. However, the Court warned Plaintiffs that "failure to cure the deficiencies identified in this order or SCU's motion to dismiss will result in dismissal of the deficient claims with prejudice." *Id.*

SCU's third motion to dismiss persuasively points out that the SAC, which is Plaintiffs' third complaint, fails to cure the deficiencies identified in the Court's March 29, 2021 Order. In the SAC, Plaintiffs made *no* new factual allegations about SCU's specific promises to provide in-person instruction, **[*51]** the only theory Plaintiffs pled in the first amended complaint to support the breach of implied-in-fact contract and UCL claims. *See* ECF No. 53 (Plaintiffs' redline comparing SAC to prior complaint). Instead, Plaintiffs' SAC pleads new, unpersuasive theories to support the breach of implied-in-fact contract and UCL claims. In their opposition to the instant motion to dismiss, Plaintiffs also largely request reconsideration of the March 29, 2021 Order. Opp'n at 1. However, none of Plaintiffs' new theories cure the deficiencies in the breach of implied-in-fact contract or UCL claims. Thus far, Plaintiffs have already filed three complaints, and SCU has already filed three motions to dismiss. Plaintiffs' failure to adequately plead their claims in three attempts shows that further amendment is futile. *See Carvalho, 629 F.3d at 892* (courts may deny leave to amend when Plaintiff "repeated[ly] fail[s] to cure deficiencies by amendments previously allowed."); *see also* *Leadsinger, 512 F.3d at 532* (leave to amend generally shall be denied if further amendment would be futile). Allowing further amendment would also result in undue delay and prejudice to SCU by making SCU file and litigate a *fourth* motion to dismiss when Plaintiffs effectively **[*52]** failed to allege any new facts in its third complaint, *see* ECF No. 53. *See* *Leadsinger, 512 F.3d at 532* (leave to amend generally shall be denied if allowing further amendment would result undue delay and prejudice to the defendant).

For the foregoing reasons, the Court GRANTS SCU's motion to dismiss Plaintiffs' Second Amended Complaint with prejudice.

IT IS SO ORDERED.

Opinion

MEMORANDUM OPINION AND ORDER

Pending before the Court is Defendant Neeraj Jindal's Motion to Dismiss Count One of the First Superseding Indictment (Dkt. #36), and Defendant John Rodgers' Motion to Dismiss the Superseding Indictment (Dkt. #45). Having considered the motions and the relevant pleadings, the Court finds the motions should be **DENIED**.

FACTUAL BACKGROUND

One December 12, 2020, the Government filed an indictment against Neeraj Jindal ("Jindal") (Dkt. #1), and on April 15, 2021, the Government filed the First Superseding Indictment (hereinafter "Indictment") as to Neeraj Jindal and John Rodgers ("Rodgers") (Dkt. #21). Pursuant **[*2]** to the Indictment, Defendants were charged with violating the following statutes: 1) *15 U.S.C. § 1* (Antitrust Conspiracy: Price Fixing under the *Sherman Act*); 2) *18 U.S.C. § 371* (Conspiracy to Commit Offense); and 3) *18 U.S.C. §§ 1505* and *2* (Obstruction of Proceedings before the Federal Trade Commission).

The complexity of this case warrants a recitation of the events leading up to the Indictment. Jindal owned a therapist staffing company, which the Indictment refers to as "Company A" (Dkt. #21 ¶ 5). Rodgers was a physical therapist who contracted with Company A and was a clinical director of Company A (Dkt. #21 ¶ 6). Rodgers reported to Jindal in his work (Dkt. #21 ¶ 6).

Company A contracted with physical therapists ("PTs") and physical therapist assistants ("PTAs") to provide in-home physical therapy to patients (Dkt. #21 ¶ 7). Therapist staffing companies such as Company A receive patient referrals from home health agencies and act as "middlemen," staffing their PTs or PTAs to provide in-home patient care (Dkt. #21 at ¶¶ 1-2). Therapist staffing companies compete with each other to contract with or employ PTs and PTAs (Dkt. #21 ¶ 4). Each PT and PTA who contracted with Company A had set prices (a "rate" or "pay rate") that Company A paid **[*3]** them for providing in-home care visits (Dkt. #21 ¶ 7). Company A billed home health agencies set prices (the "bill rate") for providing the services (Dkt. #21 ¶ 7). The difference between the pay rates that Company A paid to its PTs and PTAs and the bill rates that it billed to the home health agencies constituted Company A's margin (Dkt. #21 ¶ 7).

Count One of the Indictment charges Defendants with violating *15 U.S.C. § 1 of the Sherman Act*. More specifically, Count One states:

> From in or around March 2017 to in or around August 2017 (the Relevant Period"), in the Eastern District of Texas and elsewhere, Jindal, Rodgers, and co-conspirators knowingly entered into and engaged in a conspiracy to suppress competition by agreeing to fix prices by lowering the pay rates to PTs and PTAs. The conspiracy engaged in by Jindal, Rodgers, and co-conspirators was a *per se* unlawful, and thus unreasonable, restraint of interstate trade and commerce in violation of *Section 1 of the Sherman Act* (*15 U.S.C. § 1*).

(Dkt. #21 ¶ 11).

The Indictment alleges that on March 10, 2017, Rodgers, acting on behalf of Jindal and Company A, texted with the owner of a competing staffing company, Individual 2, regarding the rates that Company A and Individual 2's staffing company paid **[*4]** their PTs and PTAs (Dkt. #21 ¶ 12(a)). During the text exchange, Rodgers texted Individual 2, asking, "[h]ave you considered lowering PTA reimbursement" and stating, "I think we're going to lower PTA rates to $45" (Dkt. #21 ¶ 12(a)). Individual 2 responded, "[y]es I agree" and "I'll do it with you" (Dkt. #21 ¶ 12(a)). Rodgers responded with a "thumbs up" emoji and texted, "I feel like if we're all on the same page, there won't be a bunch of flip flopping and industry may stay stable" (Dkt. #21 ¶ 12(a)). According to the Indictment, Rodgers reported back to Jindal regarding this text message conversation with Individual 2 (Dkt. #21 ¶ 12(a)).

The Indictment further alleges that, following the text exchange between Rodgers and Individual 2, Jindal texted the owners of other therapist staffing companies to recruit additional competitors to join the conspiracy to collectively lower rates (Dkt. #21 ¶ 12(b)). Specifically, on March 10, 2017, Jindal separately texted at least four other owners of therapist staffing companies, saying "I am reaching out to my counterparts about lowering PTA rates to $45. What are your thoughts if we all collectively do it together?" (Dkt. #21 ¶ 12(b)). Jindal **[*5]** further texted each owner that he had Individual 2's company "on board" (Dkt. #21 ¶ 12(b)).

The Indictment then references another text exchange between Rodgers and Individual 2 that took place on March 17, 2017 (Dkt. #21 ¶ 12(c)). Rodgers stated: "FYI we made rate changes effective next payroll Monday decreasing PT's and PTA's" (Dkt. #21 ¶ 12(c)). Individual 2 responded: "Well I can join in where did u go" (Dkt. #21 ¶ 12(c)). According to the Indictment, Rodgers and Individual 2 subsequently exchanged text messages regarding their companies' pay rates for PTs and PTAs (Dkt. #21 ¶ 12(c)). And, pursuant to the agreement, Company A thereafter paid lower rates to certain PTs and PTAs (Dkt. #21 ¶ 12(d)).

On May 25, 2021, Jindal filed his Motion to Dismiss Count One of the First Superseding Indictment (Dkt. #36). On June 18, 2021, Rodgers filed his Motion to Dismiss the Superseding Indictment (Dkt. #45). In Rodgers' motion, he incorporated the arguments in Jindal's motion and added a separate argument alleging the Government's prosecution of him breached an oral agreement (Dkt. #45). The United States Responded to Jindal's Motion on June 22, 2021 (Dkt. #46) and responded to Rodgers' Motion **[*6]** on July 16, 2021 (Dkt. #48). Jindal filed a Reply on July 6, 2021 (Dkt. #47). Rodgers filed a Reply on July 30, 2021 (Dkt. #50).

STATUTORY BACKGROUND

Since Count One of the Indictment charges Defendants with violating *§ 1 the Sherman Act*, the Court finds it helpful to provide an overview of the Sherman Act before turning to Defendants' arguments. The Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. The Supreme Court, however, "has not taken a literal approach" in interpreting this language. *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*. Instead, the Supreme Court has found *§ 1* "outlaw[s] only *unreasonable* restraints." *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)* (emphasis added). In determining whether a restraint is unreasonable, and thus unlawful, courts use one of two rules of decision. *MM Steel, L.P. v. JSW Steel (USA) Inc., 806 F.3d 835, 848 (5th Cir. 2015)*.

Most restraints under *§ 1* are analyzed under the so-called rule of reason. *Arizona v. Maricopa Cnty. Med. Soc'y, 457 U.S. 332, 343, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*. As its name suggests, the rule of reason requires a context-specific inquiry to "distinguish[] between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest." *Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*. Rule of reason analysis involves "analyzing the facts peculiar to the business, **[*7]** the history of the restraint, and the reasons why it was imposed." *Nat'l Soc'y of Prof. Eng'r v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*.

A smaller group of restraints under *§ 1* are at the outset "deemed unlawful *per se*" dispensing with the need for case-by-case evaluation. *Kahn, 522 U.S. at 10*. These restraints are unreasonable *per se* because the conduct at issue is "manifestly anticompetitive" and "always or almost always tend[s] to restrict competition and decrease output." *Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)* (internal citations omitted). *Per se* treatment is reserved for "only those agreements that are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality." *Dagher, 547 U.S. at 5* (internal citations omitted). Thus, "the *per se* rule is appropriate only after courts have had considerable experience with the type of restraint at issue" in order to determine whether it has the requisite "manifestly anticompetitive effect[]." *Leegin, 551 U.S. at 886* (quotation omitted).

"Typically only 'horizontal' restraints—restraints 'imposed by agreement between competitors'—qualify as unreasonable *per se*." *Ohio v. Am. Express Co., 138 S.Ct. 2274, 2283-84, 201 L. Ed. 2d 678 (2018)* (quoting *Bus. Elecs., 485 U.S. at 730*). Courts have found three types of horizontal restraints to be *per se* violations of the Sherman Act: price fixing, market allocation, and bid rigging.[1] *See, e.g., Dagher, 547 U.S. at 5* (price fixing); *Palmer v. BRG of Ga, Inc., 498 U.S. 46, 49-50, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)* (market allocation); *United States v. Young Brothers Inc., 728 F.2d 682, 687 (5th Cir. 1984)* (bid rigging). **[*8]** If a naked trade restraint falls in one of these forms, it is summarily condemned *per se* illegal.

The Sherman Act is enforced both criminally and civilly. *See United States v. U.S. Gypsum Co., 438 U.S. 422, 438, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)* ("Both civil remedies and criminal sanctions are authorized with regard to

---

[1] Certain types of group boycotts have also been found to be *per se* illegal, but "precedent limits the per se rule in the boycott context to cases involving horizontal agreements among direct competitors." *NYNEX Corp. v. Discon, Inc. 525 U.S. 128, 135, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*.

the same generalized definitions of the conduct proscribed."). But the Department of Justice has a longstanding policy of only bringing criminal antitrust prosecutions based on *per se* violations of the Act. *See* *United States v. Kemp & Assocs, Inc. 907 F.3d 1264, 1274 (10th Cir. 2018)* (noting that the United States Attorney's Antitrust Manual states that "current Antitrust Division policy is to proceed by criminal investigation and prosecution in cases involving horizontal, per se unlawful agreements."). Whether the allegations in an Indictment constitute a *per se* violation is a legal question for the court. *MM Steel, 806 F.3d at 847* ("The decision to analyze the conspiracy under a per se theory of liability is a question of law . . . ."); *see also* *Maricopa Cnty, 457 U.S. at 337 n.3, 354*.

LEGAL STANDARD

An indictment is subject to dismissal for the Government's failure to state an offense. *See* *FED. R. CRIM. P. 12(b)(3)(B)*. This means that, taking the Government's allegations as true, *United States v. Fontenot, 665 F.3d 640, 644 (5th Cir. 2011)*, the indictment must state the elements of each offense and facts "sufficient to permit the defendant to plead former jeopardy in a subsequent **[*9]** prosecution." *United States v. Contris, 592 F.2d 893, 896 (5th Cir. 1979)*. Indictments are read as a whole, and "[t]he sufficiency of an indictment is to be tested by practical rather than technical considerations." *Id.* Indeed, "the law does not compel a ritual of words." *United States v. Ratcliff, 488 F.3d 639, 643 (5th Cir. 2007)* (citation omitted). As such, an indictment will not be dismissed based on minor deficiencies or because it "could have been more artfully or precisely drawn." *Contris, 592 F.2d at 896*. Courts generally measure the sufficiency of an indictment "by whether (1) each count contains the essential elements of the offense charged, (2) the elements are described with particularity, without any uncertainty or ambiguity, and (3) the charge is specific enough to protect the defendant against a subsequent prosecution for the same offense." *United States v. Threadgill, 172 F.3d 357, 366 (5th Cir. 1999)* (citation omitted).

ANALYSIS: JINDAL'S MOTION

In the present motion, Jindal argues that Count One of the Indictment should be dismissed for two main reasons (Dkt. #36). First, he argues that Count One fails to state an offense under *Federal Rule of Criminal Procedure 12(b)(3)(B)(v)* because it does not identify a *per se* Sherman Act violation (Dkt. #36 at p. 1). Second, Jindal argues that Count One violates due process under the *Fifth* and *Sixth Amendments* because he did not receive "fair warning" the conduct was criminal, and the *per se* designation **[*10]** improperly promotes a presumption of intent (Dkt. #36 at pp. 13-14). Rodgers adopts Jindal's arguments for Count One and also moves to dismiss the Indictment on the basis that the Government has breached an alleged oral agreement not to prosecute him. Because both Defendants move to dismiss Count One on the same grounds, the Court will address the arguments pertaining to Count One in Jindal's motion first before addressing Rodgers' separate argument.

I. Sufficiency of the Indictment—Do the Allegations in the Indictment Constitute a *Per Se* Violation of the Sherman Act?

In Count One of the Indictment, Defendants were charged with conspiracy to fix prices in violation of *§ 1 of the Sherman Act*. The Indictment further alleges that the alleged conspiracy was a *per se* violation of the Sherman Act (Dkt. #21 ¶ 11) ("The conspiracy engaged in by Jindal, Rodgers, and co-conspirators was a *per se* unlawful, and thus unreasonable, restraint of interstate trade and commerce in violation of *Section 1 of the Sherman Act*."). Accordingly, in the Government's view, to obtain conviction, it does not need to prove market power, intent, or any anticompetitive effects on trade—it simply must prove the bare fact that an agreement existed. This is further reflected by the Indictment—it does not allege any of the elements of a rule-of-reason offense. Thus, the Indictment can only stand if the allegations in it constitute a *per se* violation of the Sherman Act. Stated **[*11]** differently, the Indictment must be dismissed if it fails to state a cognizable *per se* offense under the Sherman Act. Whether the allegations in the Indictment constitute a *per se* violation is a question of law for the Court. *MM Steel, 806 F.3d at 847*.

For over 100 years, the Supreme Court has consistently held that price-fixing agreements are unlawful *per se* under the Sherman Act. *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 218, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*. In fact, the Supreme Court has stated that "[n]o antitrust offense is more pernicious than price fixing." *Fed. Trade Comm'n v. Ticor Title Ins. Co., 504 U.S. 621, 639, 112 S. Ct. 2169, 119 L. Ed. 2d 410 (1992)*. Defendants do not dispute that the Supreme Court has designated price fixing as a *per se* Sherman Act violation (Dkt. #47 at p. 3). But Defendants do dispute that the Indictment in-fact alleges a price-fixing agreement (Dkt. #47 at p. 4).

The core of Defendants argument is that the Indictment does not allege a price-fixing agreement because it "[a]t most[] alleges an agreement to fix wages" (Dkt. #36 at p. 13). According to Defendants, though the Indictment uses the word "prices" to refer to the "pay rates" for the PTs and PTAs, the "appropriate word" to describe the "pay rates" is "wages" because the rates constitute compensation for the PTs' and PTAs' labor (Dkt. #36 at p. 13). Thus, Defendants argue that the "Indictment does not allege any agreement to **[*12]** fix 'prices'" because "[w]ages do not fall within the definition of 'price fixing,' which is defined as 'fixing . . . the price of a commodity'" (Dkt. #36 at p. 12-13). Further, according to Defendants, "[m]erely substituting the word 'prices' for 'wages' does not transform the factual allegations from alleging a wage-fixing agreement to alleging a price-fixing agreement" (Dkt. #47 at p. 4). But Defendants' narrow view of horizontal price-fixing agreements reveals the flaw in their arguments.

A. Price-Fixing Agreements Come in Many Forms.

The scope of conduct found to constitute horizontal price-fixing agreements warranting application of the *per se* rule is broad. For example, courts have applied the *per se* rule to price-fixing agreements: 1) establishing minimum prices, *United States v. Trenton Potteries Co., 273 U.S. 392, 401, 47 S. Ct. 377, 71 L. Ed. 700 (1927)*; 2) setting maximum prices, *Maricopa Cnty., 457 U.S. at 335*; 3) fixing credit terms, *Catalano, Inc. v. Target Sales Inc., 446 U.S. 643, 648, 100 S. Ct. 1925, 64 L. Ed. 2d 580 (1980)*; 4) setting fee schedules, *Goldfarb v. Va. State Bar, 421 U.S. 773, 783, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)*; 5) purchasing surplus product to keep it off the market, *Socony-Vacuum, 310 U.S. at 167*; 6) refusing to advertise prices, *United States v. Gasoline Retailers Ass'n, 285 F.2d 688, 691 (7th Cir. 1961)*; and 7) excluding purchasers unless they increased the price they paid for a service, *FTC v. Superior Court Trial Lawyers Ass'n, 493 U.S. 411, 436 n.19, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)*. Thus, contrary to Defendants' argument, "price fixing" has not been limited to conduct that literally directly "fix[es] . . . the price of a commodity." (**[*13]** *See* Dkt. #36 at p. 13). Instead, as the above cases and many more have recognized, the definition of horizontal price-fixing agreements cuts broadly. As such, any naked agreement among competitors—whether by sellers or buyers—that fixes components that affect price meets the definition of a horizontal price-fixing agreement. *See* *Socony-Vacuum, 310 U.S. at 221* ("Any combination which tampers with price structures is engaged in an unlawful activity."); *Jacobi v. Bache & Co., Inc., 377 F. Supp 86, 95-96 (S.D.N.Y 1974)* ("When the purpose of an agreement is to fix or stabilize prices, even if the means used affects only one element of the price structure, or only indirectly affects prices, the agreement is illegal per se . . . .")

The Court recognizes that the facts of this case do not present those typical of a price-fixing agreement. For example, the classic horizontal price-fixing scheme involves an agreement among sellers to fix the prices of goods they sell. But just because the typical price-fixing conspiracy involves certain hallmarks does not mean that other less prevalent forms of price-fixing agreements are not likewise unlawful. Indeed, Courts have not limited price-fixing conspiracies to agreements concerning the purchase and sale of goods but have found them to cover the **[*14]** purchase and sale of services. *See* *Goldfarb, 421 U.S. at 783* (finding that minimum fee schedule for lawyers services' "constitute[d] a classic illustration of price fixing"); *Superior Ct. Trial Laws. Ass'n, 493 U.S. at 423* (finding that lawyers' boycott aimed at forcing increase of compensation paid to them was "the essence of 'price fixing[.]'"). More importantly, courts have also not only found price-fixing agreements among sellers, but also among buyers. *See* *Mandeville Island Farms, Inc. v. Am. Crystal Sugar Co., 334 U.S. 219, 235, 68 S. Ct. 996, 92 L. Ed. 1328 (1948)* ("It is clear that the agreement is the sort of combination condemned by the Act, even though the price-fixing was by purchasers, and the persons specially injured . . . are sellers, not customers or consumers."); *Nat'l Macaroni Mfrs. Ass'n v. Fed. Trade Comm'n., 345 F.2d 421, 426-27 (7th Cir. 1995)* (finding a price-fixing agreement among manufacturers to standardize the composition of their product in an effort to depress the price of an essential raw material to be illegal *per se*). In sum, price-fixing agreements come in many forms and include agreements among competing buyers of services.

B. The Sherman Act Prohibits Conspiracies Among Buyers of Labor.

The Supreme Court has made clear that the Sherman Act applies equally to all industries and markets—to sellers and buyers, to goods and services, and consequently to buyers of services—otherwise known as employers in the labor market. *See* *Anderson v. Shipowners' Ass'n of Pac. Coast, 272 U.S. 359, 361-65 , 47 S. Ct. 125, 71 L. Ed. 298(1926)*. More than **[*15]** a century ago, the Supreme Court recognized that the Sherman Act applies to labor markets. *Id.* In *Anderson*, along with other restraints that were imposed on the seamen to control their employment, the "[shipowners] fix[ed] the wages which shall be paid to the seamen." *272 U.S. at 362*. The Court found that this conduct, along with the other restraints on labor by the employers, violated the Sherman Act. *Id. at 365*. Thus, there is little doubt that "[t]he Sherman Act . . . applies to abuse of market power on the buyer side . . . ." *Todd v. Exxon Corp., 275 F.3d 191, 201 (2d Cir. 2001)* (Sotomayor, J); *see also* *All Care Nursing Serv., Inc. v. High Tech Staffing Servs., Inc., 135 F.3d 740, 747 (11th Cir. 1998)* ("That price fixing is equally violative of antitrust laws whether it is done by buyers or sellers is also undisputed.").

C. The Indictment Alleges a Price-Fixing Agreement That Is *Per Se* Illegal.

With these principles in mind, the Court turns to the Indictment to determine if it alleges a price-fixing agreement that is *per se* illegal. *MM Steel, 806 F.3d at 847*. The Indictment alleges that "Jindal, Rodgers, and co-conspirators knowingly entered into and engaged in a conspiracy to suppress competition by agreeing to fix prices by lowering the pay rates to PTs and PTAs" (Dkt. #21 ¶ 11). The Indictment thus alleges a naked price-fixing conspiracy among buyers in the labor market to fix the pay rates of the PTs and PTAs. As **[*16]** such, the Indictment describes a price-fixing conspiracy that is *per se* unlawful. *See* *Socony-Vacuum, 310 U.S. at 222* ("[T]he Sherman Act, so far as price-fixing agreements are concerned, establishes one uniform rule applicable to all industries alike."). In other words, to summarize, the scope of anticompetitive conduct that constitutes price fixing is broad—it covers agreements among buyers in the labor market. And the *per se* rule applies to naked price-fixing agreements categorically. Accordingly, the Indictment sufficiently alleges a price-fixing conspiracy that warrants the *per se* rule.

D. Fixing the Price of Labor, or Wage Fixing, is a Form of Price Fixing and Thus Illegal *Per Se*.

Defendants do not dispute that price-fixing agreements are *per se* illegal; they do, however, challenge how the Government labeled the offense and whether the charged conduct constitutes a *per se* offense (Dkt. #36 at p. 8). But, contrary to Defendants' argument, whether the Indictment refers to the "pay rates" of the PTs and PTAs as "prices" or "wages" does not affect the outcome. *See* L. Sullivan, Handbook of the Law of Antitrust, s 74, at 198 (1977) ("The antitrust laws concern substance, not form, in the preservation of competition."). The antitrust **[*17]** laws fully apply to the labor markets, and price-fixing agreements among buyers—like therapist staffing companies—are prohibited by the Sherman Act. *See* *Anderson, 272 U.S. at 361-65*. At bottom, the alleged agreement between Defendants and co-conspirators had the purpose and effect of fixing the pay rates of the PTs and PTAs—the price of labor. When the price of labor is lowered, or wages are suppressed, fewer people take jobs, which "always or almost always tend[s] to restrict competition and decrease output." *See* *Bus. Elecs. Corp., 485 U.S. at 723*. This type of agreement is plainly anticompetitive and has no purpose except stifling competition. *See* *All Care Nursing Serv., Inc, 135 F.3d at 748* ("The key to per se treatment is whether the conduct is of the kind that can only be anticompetitive."). Indeed, "[b]uyers' cartels engaged in price fixing have been held to be illegal under the Sherman Act even though their goal is to lower the price of the input." *Int'l Outsourcing Servs, LLC v. Blistex, Inc., 420 F. Supp. 2d. 860, 864 (N.D. Ill. 2006)*.

Additionally, contrary to Defendants' argument, that the Indictment lacks allegations that Defendants "made any agreement to fix prices paid by consumers" does not mean the Indictment fails to state a price-fixing agreement (*see* Dkt. #36 at p. 13). The Sherman Act "does not confine its protection to consumers, or to purchasers, or to competitors, or sellers." *Mandeville, 334 U.S. at 236*. Rather, **[*18]** the statute protects "all who are made victims of the forbidden practices by whomever they may be perpetrated," and those protections extend to sellers of goods and services—such as the PTs and PTAs—to the same extent they do buyers, consumers, or competitors. *Id.* Besides, "[j]ust as ***antitrust law*** seeks to preserve the free market opportunities of buyers and sellers of goods, so also it seeks to do the same for buyers and sellers of employment services." *Roman v. Cessna Aircraft Co., 55 F.3d 542, 544 (10th Cir. 1995)* (quoting II Phillip Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 377c (rev. ed. 1995)). As *Anderson* makes clear, employees are no less entitled to the protection of the Sherman Act than are consumers. *See 272 U.S. at 364-65*.

Justice Kavanaugh's recent concurrence in *National Collegiate Athletic Ass'n v. Alston* provides further support for the conclusion that fixing the price of labor, or wage fixing, is a form of price fixing. *141 S. Ct. 2141, 210 L. Ed. 2d 314 (2021)*. In *Alston*, the Supreme Court addressed wage fixing by the NCAA—namely the NCAA's cap on education-related compensation that student-athletes are eligible to receive. *Id. at 2147*. In his concurrence, Justice Kavanaugh unequivocally asserts: "Price-fixing labor is price-fixing labor. And price-fixing labor is ordinarily a textbook antitrust problem because **[*19]** it extinguishes the free market in which individuals can otherwise obtain fair compensation for their work." *Id. at 2167-68* (Kavanaugh, J., concurring) (citations omitted). Thus, in Justice Kavanaugh's mind, wage fixing is price fixing—price fixing of labor. *See id.*

While Defendants correctly state that *Alston* does not classify wage fixing as a *per se* violation,[2] Justice Kavanaugh's concurrence is significant because he characterizes wage fixing as price fixing. *See id.* And, "[i]t has long been settled that an agreement to fix prices is unlawful *per se*." *Catalano, 446 U.S. at 647*. Thus, outside the extraordinary context at issue in *Alston*, naked horizontal agreements to fix the price of labor, like the agreement here, are ordinarily *per se* illegal.

E. Other Courts Have Recognized that Wage-Fixing Conspiracies Are *Per Se* Unlawful as Price-Fixing Agreements.

Other courts have also recognized that wage-fixing conspiracies—or horizontal agreements among buyers in the labor market—are illegal *per se* like other price-fixing agreements. *See Todd, 275 F.3d at 198* ("If the plaintiff in this case could allege that defendants actually formed an agreement to fix [] salaries, [the] *per se* rule would likely apply."); *Law v. NCAA, 134 F.3d 1010, 1017 (10th Cir. 1998)* (finding that NCAA rule **[*20]** limiting salary of basketball coaches would ordinarily be a *per se* violation of *§ 1 of the Sherman Act*); *In re Animation Workers Antitrust Litig., 123 F. Supp. 3d 1175, 1179-84 (N.D. Cal. 2015)* ("[T]he Court concludes that [p]laintiff[-employees] have alleged sufficient facts to support a plausible *per se* claim that [d]efendant[-employers] allegedly conspired to suppress the compensation of the putative class."); *Cason-Merenda v. Detroit Med. Ctr., 862 F. Supp. 2d 603, 624-25 (E.D. Mich. 2012)* (noting plaintiffs and defendants agreed that wage fixing "like an analogous horizontal price-fixing conspiracy" should be characterized as a *per se* violation); *Fleischman v. Albany Med. Ctr., 728 F. Supp. 2d. 130, 157 (N.D.N.Y. 2010)* ("Generally, price-fixing [or in this case wage-fixing] agreements are considered a per se violation of the Sherman Act.") (alterations in original) (internal quotations and citations omitted); *Doe v. Ariz. Hosp. & Healthcare Ass'n, No. CV07-1292, 2009 U.S. Dist. LEXIS 42871, 2009 WL 1423378, at *3-4 (D. Ariz. Mar. 19, 2009)* (finding complaint that alleged defendant-hospitals conspired to keep temporary nursing wages below free market level should survive motion to dismiss because agreement was a *per se* illegal price-fixing agreement);

---

[2] In *Alston*, the Supreme Court affirmed a judgment that evaluated the NCAA's limit on education-related compensation under the rule of reason. *Id at 10-11* (majority opinion). However, for many years, the Supreme Court has declined to condemn the NCAA's restraints as illegal *per se* because the "horizontal restraints on competition are essential if the product is to be available at all." *Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Okla., 468 U.S. 85, 101, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*. In these situations—where collaboration is essential among certain actors for there to be a product at all—the rule of reason applies regardless of the nature of the restraint at issue. *See id. at 103*. Accordingly, contrary to Defendants' argument, that the Supreme Court evaluated the NCAA's wage-fixing under the rule of reason does not justify the rule of reason in this case.

Cordova v. Bache & Co., 321 F. Supp. 600, 606 (S.D.NY. 1970) ("There can be little doubt about the fact that if a group of employers, as the complaint here alleges, were allowed . . . to agree together to reduce the commissions paid to their respective employees, they would have the same power to restrain competition as is inherent in a price-fixing agreement.").

Though Defendants **[*21]** take issue with the fact that all the cases that have labeled wage fixing as a *per se* violation are civil cases, (*see* Dkt. #47 at p. 5), the distinction is irrelevant. Just because this is the first time the Government has prosecuted for this type of offense does not mean that the conduct at issue has not been illegal until now. Rather, as these cases indicate, price-fixing agreements—even among buyers in the labor market—have been *per se* illegal for years.

F. There is Sufficient Judicial Experience with Price Fixing to Justify a *Per Se* Designation.

Defendants misapprehend the role of judicial experience in applying a *per se* designation to certain conduct. Defendants contend that agreements are deemed unlawful *per se* "only after courts have had considerable experience with the type of restraint at issue" (Dkt. #36 at p. 10) (quoting *Leegin, 551 U.S. at 886*). As a result, because neither the Supreme Court nor any Court of Appeals has ever determined whether a purported wage-fixing agreement is *per se* unlawful under *§ 1 of the Sherman Act*, Defendants argue there is insufficient judicial experience with wage fixing to justify a *per se* designation (Dkt. #36 a p. 9). Defendants are mistaken.

Judicial experience informs the decision **[*22]** to recognize a "*new per se* rule." *See* *Maricopa Cnty., 457 U.S. at 350 n.19* (emphasis in original). Price-fixing agreements, as horizontal restraints, have long been held to merit a *per se* designation. *Socony-Vacuum, 310 U.S. at 218*. Thus, courts "have [] considerable experience with the *type of restraint* at issue"—price-fixing agreements. See *Leegin, 551 U.S. at 886* (emphasis added). As courts have recognized, price-fixing agreements come in many forms. *See supra* pp. 8-10. And though no appellate court has ever specifically found that a price-fixing agreement among employers in the labor market is *per se* illegal does not mean the Court is recognizing a new *per se* rule. *See* *United States v. Andreas, 216 F.3d 645, 667 (7th Cir. 2000)* ("Yet the fact that the lysine producers' scheme did not fit precisely the characterization of a prototypical *per se* practice does not remove it from *per se* treatment."). Rather, a restraint that is "tantamount to" *per se* unlawful conduct "falls squarely within the tradition *per se* rule." *Catalano, 446 U.S. at 648*. Similarly, here, an agreement to fix the price of labor is "tantamount" to an agreement to fix prices, and "thus falls squarely within the traditional *per se* rule against price fixing." *See id.* Besides, the Supreme Court has explicitly rejected arguments like Defendants': "[T]he argument that the *per se* rule must **[*23]** be rejustified for every industry that has not been subject to significant antitrust litigation ignores the rationale for *per se* rules . . . ." *Maricopa Cnty., 457 U.S. at 351*.

Moreover, Defendants further argue that "[t]he need for further judicial experience and analysis is also evident" in light of the possibility that wage-fixing could "benefit[] consumers downstream through lower prices" and "encourage, rather than discourage, competitors" (Dkt. #36 at p. 11). In other words, *per se* designation is not appropriate because Defendants' conduct cannot be said to "lack any redeeming virtue" (Dkt. #36 at p. 11) (internal citations omitted). But the Supreme Court has also rejected similar arguments.

For example, in *Catalano*, the Supreme Court explicitly rejected similar procompetitive justifications that the court of appeals had relied upon—namely that the anticompetitive behavior at issue might actually decrease prices for consumers and increase competition by removing a barrier to market entry. *Id. at 649-50*. The Court stated that "[w]hile it may be that the elimination of a practice of giving variable discounts" may ultimately lead to a decrease in the invoice price, "[i]t is more realistic to view an agreement to eliminate credit sales **[*24]** as extinguishing one form of competition among the sellers." *Id. at 649*. Similarly, here, though an agreement to fix the price of labor could benefit consumers, "that is surely not necessarily to be anticipated" and that will not prevent it from being declared unlawful *per se. See id.* Undeniably, "Supreme Court jurisprudence is clear: where the per se rule applies, it is of no consequence that an agreement could potentially bring net economic benefits to some part of the market . . . ." *Kemp & Assocs., Inc. 907 F.3d at 1277*.

Further, in *Catalano*, the Supreme Court rejected the justification that an agreement to eliminate the practice of giving credit could actually enhance competition by removing a barrier to entry for other sellers. *446 U.S. at 649*. The Court reasoned, "it would seem to follow that the more successful an agreement is in raising the price level [or curtailing production], the safer it is from antitrust attack. Nothing could be more inconsistent with our cases." *Id.* Again, similarly, Defendants' argument that an agreement to fix the price of labor may "encourage, rather than discourage, competitors" misses the mark (*see* Dkt. #36 at p. 11). Time and time again, the Supreme Court has reiterated, "when a particular concerted activity entails **[*25]** an obvious risk of anticompetitive impact with no apparent potentially redeeming value, the fact that a practice may turn out to be harmless in a particular set of circumstances will not prevent its being declared unlawful *per se*." *Catalano, 446 U.S. at 649*.

G. Count One of the Indictment Sufficiently Charges a Conspiracy to Fix Price.

Since the Court has found that the allegations in the Indictment constitute a *per se* offense, the Court must next review the Indictment to determine whether it is legally sufficient on its face. To prove a *per se* violation of *15 U.S.C. § 1*, the Government must prove that (1) the defendant knowingly formed, joined, or participated in a contract, combination, or conspiracy; (2) its purpose was to fix, raise, maintain, or stabilize prices; and (3) the activities subject to the conspiracy occurred in the flow of interstate commerce or substantially affected interstate commerce. *15 U.S.C. § 1*; *Socony-Vacuum., 310 U.S. at 219-20, 223*; *United States v. Cargo Serv. Stations, Inc., 657 F.2d 676, 679, 681 (5th Cir. 1981)*.

Count One tracks the elements of a *per se* violation of *15 U.S.C. § 1*. It alleges that Defendants knowingly formed, joined, or participated in a conspiracy, that the conspiracy was meant to suppress competition by agreeing to fix prices,[3] and that the business activities occurred within the flow of, and substantially affected, interstate **[*26]** trade and commerce.[4] The Indictment therefore is legally sufficient on its face. It contains the "essential elements of the offense charged, [] the elements are described with particularity, without any uncertainty or ambiguity, and [] the charge is specific enough to protect Defendants against a subsequent prosecution for the same offense." *United States v. Lavergne, 805 F.2d 517, 521 (5th Cir. 1986)*.

Thus, Count One of the Indictment sufficiently alleges facts constituting a *per se* violation of the Sherman Act. Because the Court has found that the Indictment properly alleges a *per se* violation of the Sherman Act, the Court now turns to Defendants' next argument as to why the Court should dismiss Count One.

II. Constitutional Issues

Defendants argue that application of the *per se* rule is unconstitutional because it violates the *Fifth* and *Sixth Amendments of the U.S. Constitution* (Dkt. #36 at p. 15). Specifically, first, Defendants argue the Indictment violates the *Fifth Amendment* because it "violates the rule of lenity and fails to give fair warning of the prohibited conduct" (Dkt. #36 at pp. 15-16). Second, Defendants argue the Indictment violates the *Sixth Amendment* because it "improperly promotes a presumption of intent, vitiating the requirement of proof of state of mind in the criminal context" (Dkt. #36 at p. 16). The Court will address **[*27]** each argument in turn.

---

[3] ". . . Jindal, Rodgers, and co-conspirators knowingly entered into and engaged in a conspiracy to suppress competition by agreeing to fix prices by lowering the pay rates to PTs and PTAs" (Dkt. #21 at pp. 3-4).

[4] "During the Relevant Period, the business activities of Jindal, Rodgers, and their co-conspirators that are the subject of the conspiracy charged in this Count were within the flow of, and substantially affected, interstate trade and commerce. For example, during the Relevant Period: (a) Insurance funds, including federal Medicare funds, traveled from banks or companies located in states outside of Texas through a home health agency to Company A in Texas, and from Company A to its PTs and PTAs to pay them for providing care to patients; (b) To provide care in patients homes and assisted living facilities, PTs and PTAs used equipment and vehicles purchased in interstate commerce; and (c) The conspiracy was intended to lower rates paid to PTs and PTAs, which would lessen their purchases in interstate trade and commerce" (Dkt. #21 at p. 6).

A. Defendants' *Fifth Amendment* Challenges Fail.

The *Fifth Amendment* provides that "[n]o person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a Grand Jury . . . nor be deprived of life, liberty, or property without due process of law . . . ." *U.S. CONST. amend. V*. As embodied by the "fair warning requirement," due process requires that "no man shall be held criminally responsible for conduct which he could not reasonably understand to be proscribed." *United States v. Lanier, 520 U.S. 259, 265, 117 S. Ct. 1219, 137 L. Ed. 2d 432 (1997)* (internal quotations omitted).

The Supreme Court has identified "three related manifestations of the fair warning requirement." *Id. at 266*. "First, the vagueness doctrine bars enforcement of a statute which either forbids or requires the doing of an act in terms so vague that men of common intelligence must necessarily guess at its meaning and differ as to its application." *Id.* (internal quotations omitted). Second, the rule of lenity "ensures fair warning by so resolving ambiguity in a criminal statute as to apply it only to conduct clearly covered." *Id.* (citations omitted). And third, "due process bars courts from applying a novel construction of a criminal statute to conduct that neither the statute nor any prior **[*28]** judicial decision has fairly disclosed to be within its scope." *Id.* (citations omitted). To satisfy each of these requirements, a criminal statute, "standing alone or as construed" must "ma[k]e it reasonably clear at the relevant time that the defendant's conduct was criminal." *Id. at 267*.

Defendants do not contend that the Sherman Act itself is unconstitutionally vague; rather, they argue that the Indictment violates the second and third manifestations of the fair warning requirement (Dkt. 47 at pp. 10-11). According to Defendants, because no court has found that purported wage-fixing agreements constitute criminal conduct and neither the Supreme Court nor any Court of Appeals has held wage fixing to be *per se* unlawful, then Defendants "could not possibly have had fair warning that the conduct alleged in the Indictment may be criminal" (Dkt. #36 at p. 18). Further, Defendants argue that because there is "a grievous uncertainty as to whether the Supreme Court condemns wage fixing as a *per se* antitrust violation," the rule of lenity mandates dismissal (Dkt. #47 at p. 11). In response, the Government argues "[t]his is not even close" because "the Supreme Court has long recognized that wage fixing is price **[*29]** fixing" (Dkt. #46 at p. 15 (citing *Anderson, 272 U.S. at 361-63*; *Superior Ct., 493 U.S. at 423, 427, 432, 436 n.19*)). While the issue is not as clear-cut as the Government suggests, Defendants' constitutional arguments fail.

i. The Defendants Received Fair Notice That Their Conduct Was Illegal.

The Indictment charges Defendants with price fixing. For more than 100 years, courts have repeatedly held price fixing as *per se* illegal under the Sherman Act. *Socony-Vacuum., 310 U.S. at 218*. Thus, Defendants could not have had any reasonable doubt that any price-fixing agreement was *per se* illegal. Defendants do not dispute this conclusion and instead insist that the "novel construction of the statute to construe '*wage fixing*' as *per se* unlawful . . . fails to give fair warning of the prohibited conduct" (Dkt. #36 at p. 15) (emphasis added). But this argument relies on the same semantical arguments this Court already rejected. *See supra* Part I.

Regardless of whether the Indictment characterizes Defendants' conduct as wage fixing or price fixing, the Sherman Act, in conjunction with the decades of case law, made it "reasonably clear" that Defendants' conduct was unlawful. *See Lanier, 520 U.S. at 267*. Indeed, most criminal statutes "deal with untold and unforeseen variations in factual situations," so "no more than a reasonable degree of certainty **[*30]** can be demanded." *Boyce Motor Lines v. United States, 342 U.S. 337, 340, 72 S. Ct. 329, 96 L. Ed. 367 (1950)*. Belaboring the point discussed in Part I, the Supreme Court has long recognized that price-fixing agreements come in many forms. *See Catalano, 446 U.S. at 647-50*; *see also supra* Part I pp. 8-10. And the Supreme Court has long recognized that *§ 1* categorically prohibits *per se* unlawful restraints across all markets and industries—including restraints on the buyer side and in the labor market. *See Mandeville, 334 U.S. at 235-36*; *Anderson, 272 U.S. at 361-63*; *see also supra* Part I pp. 9-11. Thus, decades of precedent gave Defendants more than sufficient notice that agreements among competitors to fix the price of labor are *per se* illegal. Moreover, the numerous district court decisions holding that agreements to fix the compensation of employees are *per se* unlawful reinforce this conclusion. *See supra* Part I. p. 14. At a minimum, these decisions foreclose Defendants' argument because it cannot be said that "no[] [] prior judicial decision has fairly disclosed [Defendants' conduct] to be within [the] scope [of the Sherman Act]." *See* *Lanier, 520 U.S. at 266*.

Moreover, the holding today is not a "novel" construction of the Sherman Act—it comports with previous broad interpretations of the Act and is a logical application of precedent. Similarly, that "no court has found that purported wage-fixing agreements **[*31]** constitute criminal conduct under the Sherman Act" does not mean that Defendants' did not have fair notice. *See* *United States v. Kinzler, 55 F.3d 70, 74 (2d Cir.1995)* ("The claimed novelty of this prosecution does not help [defendant's fair notice argument], for it is immaterial that there is no litigated fact pattern precisely on point.") (internal quotations omitted). Rather, the lack of criminal judicial decisions only indicates Defendants' unlucky status as the first two individuals that the Government has prosecuted for this type of conduct before.

But, "[t]o find unfair notice whenever a court specified new types of acts to which a criminal statute applied would stifle courts' ability to interpret and fairly apply criminal statutes." *United States v. Kay, 513 F.3d 432, 444-45*. Rather, "as *Lanier* points out, lack of prior court interpretations 'fundamentally similar' to the case in question does not create unfair notice." *Id. at 444*. Instead, "so long as the prior decisions gave reasonable warning" that the conduct was unlawful, then fair notice was satisfied. *See id.* And, here, decades of judicial interpretations gave Defendants more than "reasonably clear" notice that their conduct was unlawful. *See* *Lanier, 520 U.S. at 267*.

Even where the Supreme Court has considered certain conduct "not price fixing as such," it has affirmed **[*32]** the district court's application of the *per se* rule. *National Soc. of Professional Engineers v. United States, 435 U.S. 679, 681, 692-699, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. Thus, even accepting Defendants' argument that their conduct was not literally price fixing, Defendants were still on notice that their conduct was "perilously close" to a line that subjected them to criminal prosecution. *See* *Boyce, 342 U.S. at 341*; *Id.* ("Nor is it unfair to require that one who deliberately goes perilously close to an area of proscribed conduct shall take the risk that he may cross the line."). Thus, Defendants received fair notice that their conduct was illegal.

ii. The Rule of Lenity Does Not Apply.

Defendants also argue that the rule of lenity requires dismissal of Count One because there remains a "grievous uncertainty as to whether the Supreme Court condemns wage fixing as a *per se* antitrust violation" since "it has never evaluated it as such" (Dkt. #47 at p. 11). The Government responds by arguing that the rule of lenity is inapplicable here because "[t]here is no grievous ambiguity or uncertainty in this case" (Dkt. #46 at p. 15).

The rule of lenity is a principle of statutory construction that "applies primarily to the interpretation of criminal statutes." *Kasten v. Saint-Gobain Performance Plastics Corp., 563 U.S. 1, 16, 131 S. Ct. 1325, 179 L. Ed. 2d 379 (2011)*. It dictates that courts resolve ambiguities in criminal statutes in favor **[*33]** of defendants. *See* *Crandon v. United States, 494 U.S. 152, 168, 110 S. Ct. 997, 108 L. Ed. 2d 132 (1990)*. But "[c]ourts do not resort to the rule of lenity every time a difficult issue of statutory interpretation arises." *United States v. Bittner, 469 F. Supp. 3d. 709, 723 (E.D. Tex. 2020)* (citation and internal quotation marks omitted). "[T]he rule of lenity only applies if, after considering text, structure, history, and purpose, there remains a grievous ambiguity or uncertainty in the statute such that the Court must simply guess as to what Congress intended." *Barber v. Thomas, 560 U.S. 474, 488, 130 S. Ct. 2499, 177 L. Ed. 2d 1 (2010)* (citation and internal quotation marks omitted).

Here, the rule of lenity has no application. As discussed, the rule of lenity applies only if a court can make "no more than a guess as to what Congress intended." *Ladner v. United States, 358 U.S. 169, 178, 79 S. Ct. 209, 3 L. Ed. 2d 199 (1958)*. Here, the Court can do much better than "guess." *See id.* Indeed, the Supreme Court has recognized that "Congress intended to strike as broadly as it could in *§ 1 of the Sherman Act* . . . ." *Goldfarb, 421 U.S. at 787*. And price-fixing agreements—in many forms—have long been held to be *per se* violations of the Act. *See* *Catalano, 446 U.S. at 647-50*; *see also supra* Part I pp. 8-10. The Supreme Court has also long held that the Sherman Act applies equally to all industries and markets—including to agreements made by buyers in the labor market. *See*

Mandeville, 334 U.S. at 235-36; *Anderson, 272 U.S. at 361-63*; *see also* supra Part I pp. 9-11. Thus, these cases leave no room for application of the rule of **[*34]** lenity. Put bluntly, "the rule of lenity cannot be used to create ambiguity when the meaning of a law, even if not readily apparent, is, upon inquiry, reasonably clear." *United States v. Nippon Paper Industries Co., 109 F.3d 1,8 (1st Cir. 1997)*. Though Defendants disagree with this Court's interpretation of the Sherman Act, that does not mean there is a "grievous ambiguity." *See* *Barber, 560 U.S. at 488*. Rather, decades of precedent make it clear that agreements to fix the price of labor—like all other price-fixing agreements—are *per se* illegal. Thus, the rule of lenity does not apply.

B. Defendants' *Sixth Amendment* Challenge Also Fails.

The *Sixth Amendment* provides that "[i]n all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury . . . ." *U.S. CONST. amend. VI*. Defendants argue that the Indictment's *per se* designation violates the *Sixth Amendment* because it "improperly suggest[s] that intent could be presumed without further evidence" (Dkt. #36 at p. 20). According to Defendants, such a presumption would unconstitutionally take from the jury the determination of intent—thus depriving Defendants of their right to trial by jury (Dkt. #36 at p. 20). The basis of Defendants' argument stems from *United States v. U.S. Gypsum Co.*, where the Supreme Court held "that a defendant's state of mind or intent is an element of a criminal antitrust **[*35]** offense" which "cannot be taken by the trier of fact through reliance on a legal presumption of wrongful intent from proof of an effect on prices." *438 U.S. at 435*. But Defendants' cursory *Sixth Amendment* argument also fails.

Decades ago, the Fifth Circuit rejected essentially the same argument that Defendants now make. *United States v. Cargo Serv. Stations, Inc., 657 F.2d 676, 681-84 (5th Cir. 1981)*. Defendants fail to acknowledge, much less distinguish, this precedent. In *Cargo Service*, defendants were charged with a conspiracy to fix prices and subsequently found guilty after a jury trial. *Id. at 678*. On appeal, relying on *Gypsum*, defendants argued that they were denied due process of law because the district court's jury instruction "improperly allowed the jury to convict absent a finding of intent" *Id. at 684*. The Fifth Circuit rejected this argument: "Neither a conclusive nor a permissive presumption is at issue here" because "a finding of intent to fix prices [equates to] an intent to unreasonably restrain trade." *Id. at 683 n.7*. Thus, "a finding that [defendants] intended to fix prices supplies the criminal intent necessary for a conviction of a criminal antitrust offense." *Id. at 684*. Further, the Fifth Circuit found the Defendants' reliance on *Gypsum* was misplaced—*Gypsum* was "easily distinguishable" because it involved the mere **[*36]** exchange of price information, not price fixing itself, and thus was a rule of reason case. *Id. at 683*. This Court thus finds that *Cargo Service* forecloses Defendants' argument.[5] Accordingly, application of the *per se* rule does not violate the *Sixth Amendment*.

Since the Court has addressed both Defendants' arguments pertaining to Count One, the Court will now turn to Rodgers' separate argument.

ANALYSIS: RODGERS' MOTION

In addition to adopting Jindal's arguments for Count One, Rodgers moves to dismiss the entire Indictment against him on another ground (Dkt. #45). Specifically, Rodgers argues the Indictment should be dismissed because the Government's prosecution breaches an oral non-prosecution agreement between Rodgers and the Government (Dkt. #45). In response, the Government denies the existence of an oral non-prosecution agreement (Dkt. #48). In fact, the Government contends that the only agreements between Rodgers and the Government were two no-direct use agreements ("NDU's"), commonly referred to as "proffer letters" (Dkt. #48 at p.3).

---

[5] Moreover, every other circuit to address this issue has agreed. *United States v. Giordano, 261 F.3d 1134, 1143-44 (11th Cir. 2001)*; *United States v. Fischbach & Moore, Inc., 750 F.2d 1183, 1195-96 (3d. Cir. 1984)*; *United States v. Koppers Co., 652 F.2d 290, 293-95 (2d Cir. 1981)*; *United States v. Brighton Bldg. & Maint. Co., 598 F.2d 1101, 1106 (7th Cir. 1979)*; *United States v. Mfrs.' Ass'n, 462 F.2d 49, 52 (9th Cir. 1972)*.

I. Rodgers' Background

Details of the events between Rodgers, his attorney, and the Government are helpful for context regarding the alleged non-prosecution agreement. Based **[*37]** on a declaration from Brian Poe ("Poe"), Rodgers' attorney, and a declaration from Ryan Danks ("Danks"), Acting Chief of the Washington Criminal I Section of the Antitrust Division, the Court summarizes the following background information (Dkt. #45-8; Dkt. #48-1).

On November 26, 2019, DOJ Trial Attorney Katie Stella ("Stella") contacted Poe and the two spoke on the phone following a brief email exchange (Dkt. #45-8 ¶ 2). During the phone call, Stella stated that the Government considered Rodgers to be a "subject" of a criminal investigation and wanted to interview Rodgers in connection with an antitrust investigation. (Dkt. #45-8 ¶ 2). According to Poe's declaration, Stella also stated that "she did not anticipate Rodgers being charged if he continued to cooperate with the government's investigation" (Dkt. #45-8 ¶ 2). Danks' declaration does not mention this phone call.

On December 12, 2019, Rodgers and Poe met with the Government in Fort Worth for an interview or "proffer" (Dkt. #45-8 ¶ 4). A written NDU was executed before the interview on the same day, setting out the terms of the interview (Dkt. #48-1 ¶ 6; Dkt. #48, Exhibit 2). Poe's declaration does not mention the written NDU. **[*38]** Following Rodgers' proffer, Poe and the Government communicated several times via phone and email (Dkt. #45-8 ¶ 6). On May 22, 2020, Poe received a phone call from Stella concerning Rodgers (Dkt. #45-8 ¶ 7). During the call, Poe claims that Stella confirmed that Rodgers was still considered a "subject" of the criminal investigation and stated again that Rodgers would not be charged criminally if he continued to cooperate with the Government's investigation (Dkt. #45-8 ¶ 7). Again, Danks' declaration contains no mention of this call.

On or about December 9, 2020, Poe states he received a phone call from DOJ Antitrust Trial Attorney Megan Lewis ("Lewis") regarding Rodgers (Dkt. #45-8 ¶ 9). The purpose of the call was to inform Poe that a Grand Jury had indicted Jindal and that the Government anticipated Rodgers would need to testify at trial (Dkt. #45-8 ¶ 9; Dkt. #45-1 ¶ 7). Poe claims that while he had been previously assured by Stella that Rodgers would not be charged if he continued to cooperate, he took the opportunity to confirm this with Lewis since she was Stella's supervisor (Dkt. #45-8 ¶ 9). According to Poe's declaration, "Lewis unequivocally stated that Rodgers would not be **[*39]** charged if he continued to cooperate with the [G]overnment" (Dkt. #45-8 ¶ 9). Danks admits the Government contacted Poe on that day, but his declaration contains no further details of the substance of the conversation (Dkt. #48-1 ¶ 7). He does state, however, that the Government attorney with whom Poe spoke was not Lewis, nor was the attorney a supervisor of another attorney who worked on the investigation (Dkt. #48-1 ¶ 7).

On January 27, 2021, Rodgers and Poe attended a virtual proffer with the Government (Dkt. #45-8 ¶ 11). As with the first proffer, another NDU was executed setting out terms of the interview (Dkt. #48-1 ¶ 9; Dkt. #48, Exhibit 3). Again, Poe's declaration contains no mention of the written agreement that was executed that day. Subsequently, on a March 1, 2021 phone call, the Government notified Poe that it was recommending prosecution for Rodgers because, in the Government's view, Rodgers had not been truthful during the proffer on January 27, 2021 (Dkt. #45-8 ¶ 12; Dkt. #48-1 ¶ 10). Rodgers was indicted on April 15, 2021 (Dkt. #45-8 ¶ 14).

II. Non-Prosecution Agreement Legal Standard

"Non[-]prosecution agreements, like plea bargains, are contractual in nature, and are **[*40]** therefore interpreted in accordance with general principles of contract law." *United States v. Castaneda, 162 F.3d 832, 835 (5th Cir. 1998)*. Applying contract law, Rodgers "bears the burden of proving that there was a mutual manifestation of assent—either verbally, or through conduct—to the agreement's essential terms." *United States v. Jimenez, 256 F.3d 330, 347 (5th Cir. 2001)*.

If Rodgers proves that there was a non-prosecution agreement and "lives up to his end of the bargain, the government is bound to perform its promises." *Castaneda, 162 F.3d at 835-36*. If Rodgers "'material breaches' his commitments under the agreement, however, the government can be released from its reciprocal obligations." *Id. at*

836. To be relieved of its obligations, the Government must "prove to the court by a preponderance of the evidence that (1) the defendant breached the agreement, and (2) the breach is sufficiently material to warrant rescission." *Id.*

III. Analysis

Armed with a better understanding of the communication between Rodgers' counsel, Poe, and the Government, the Court turns back to Rodgers' argument. Rodgers claims there was an oral non-prosecution agreement that was "reached on or about December 9, 2020" "that Rodgers would not be charged if [he] continued to cooperate, which included testifying at trial" (Dkt. #50 at p. 6). Rodgers further contends **[*41]** that the Government has not proved that Rodgers breached the terms of his non-prosecution agreement (Dkt. #45 at p. 9). Accordingly, Rodgers argues the Government cannot rescind the agreement (Dkt. #45 at p. 9). The Government counters by arguing that no oral agreement was ever reached (Dkt. #48 at p. 10). The Government also argues that two written NDUs "conclusively establish that Rodgers did not have a non-prosecution agreement" "[b]ecause parol evidence is inadmissible to prove the meaning of the unambiguous NDUs" (Dkt. #48 at p. 10). Further, while the Government has not come forward with any evidence proving Rodgers violated any alleged oral agreement, it argues that "[i]f necessary" it "could readily show a material violation of any non-prosecution agreement" (Dkt. #48 at p. 13).

Applying basic contract principles to the alleged agreements in this case, in order to dismiss the Indictment, the Court must 1) find that the parol evidence rule does not bar the enforcement of the alleged oral non-prosecution agreement; 2) an oral non-prosecution agreement was in fact reached; 3) Rodgers performed his part of the agreement; and 4) the Government has breached the agreement.[6] *See* *Jimenez, 256 F.3d at 347 n.23* (noting **[*42]** that before considering whether any alleged agreement was breached, it must first be determined whether an agreement ever existed). Thus, the Court will first consider the effect of the written NDUs as part of its inquiry into whether an oral non-prosecution agreement was ever reached.

A. The Two Written NDUs Do Not Bar Enforcement of Any Alleged Oral Agreement.

As previously stated, the Government argues that two written NDUs between the Government and Rodgers trigger the parol evidence rule and thus "conclusively establish that Rodgers did not have a non-prosecution agreement" (Dkt. #48 at p. 10). According to the Government, because the NDUs contemplate Rodgers' potential prosecution and contain merger clauses, they "foreclose any contention that there was a non-prosecution agreement at the time of their signing" (Dkt. #48 at p. 10). In his motion to dismiss the Indictment, Rodgers does not mention the written NDUs. In his reply, however, Rodgers concedes that the written NDUs exist, but cites no law on the parol evidence rule and instead just repeatedly asserts that the Government "misconstrue[s] the language of these agreements" (Dkt. #50 at p. 5).

In construing a written contract, **[*43]** the primary concern of the court is to ascertain the true intentions of the parties as expressed in the writing itself. *J.M. Davidson, Inc. v. Webster, 128 S.W.3d 223, 229 (Tex. 2003)*. Parties may not rely on extrinsic evidence to create an ambiguity or give the contract a different meaning from that which its language imports. *First Bank v. Brumitt, 519 S.W.3d 95, 110 (Tex. 2017)*. "If the written instrument is so worded that it can be given a certain or definite legal meaning or interpretation, then it is not ambiguous and the court will construe the contract as a matter of law." *Coker v. Coker, 650 S.W.2d 391, 393 (Tex. 1983)*. Likewise, "when a contract is unambiguous, [courts] generally will not look beyond the four corners of the document." *United States v. Long, 722 F.3d 257, 262 (5th Cir. 2013)* (internal quotations omitted). Further, when there is valid integrated agreement with respect to a particular subject matter, the parol evidence rule "precludes the enforcement of inconsistent prior or contemporaneous agreements." *Jack H. Brown & Co. v. Toys "R" Us, Inc., 906 F.2d 169, 173*

---

[6] The parties did not address choice of law questions. The Court, however, is bound by *Erie R. Co. v. Tompkins, 304 U.S. 64, 58 S. Ct. 817, 82 L. Ed. 1188 (1938)* to apply the contract law of the State of Texas, where was the agreement was allegedly executed and where it would be performed. *United States v. McBride, 571 F. Supp. 596, 604 n.3 (S.D. Tex. 1983)*, *aff'd*, *915 F.2d 1569 (5th Cir. 1990)*

(5th Cir. 1990). However, the parol evidence rule "does not preclude enforcement of prior or contemporaneous agreements which are collateral to an integrated agreement and which are not inconsistent with and do not vary or contradict the express or implied terms or obligations thereof." Hubacek v. Ennis State Bank, 159 Tex. 166, 317 S.W.2d 30, 32 (Tex. 1958).

As a starting point, only the second NDU—executed on January 22, 2021—would trigger the parol evidence **[*44]** rule and thus bar enforcement of the alleged oral non-prosecution agreement. The first NDU was executed on December 12, 2019, (Dkt. #48, Exhibit 2), and Rodgers claims the oral agreement was not reached until about one year later—on or about December 9, 2020 (Dkt. #50 at p. 6). Yet, the parol evidence rule only bars enforcement of prior or contemporaneous agreements; it does not apply to agreements made *subsequent* to the written agreement. Brumitt, 519 S.W.3d at 111. Thus, only the second written NDU, executed on January 22, 2021, could trigger the parol evidence rule since the oral agreement was allegedly formed before the second written NDU was signed.

Moreover, the second NDU is the type of agreement that triggers the parol evidence rule. It is a written agreement that is "integrated." Indeed, it contains an integration or "merger" clause. *See* People's Cap. & Leasing Corp. v. McClung, No. 4:18-CV-00877, 2020 U.S. Dist. LEXIS 138839, 2020 WL 4464503, at *8 (E.D. Tex. Aug. 4, 2020) ("A merger clause is a provision in a contract to the effect that the written terms may not be varied by prior or oral agreements because all such agreements have been merged into the written document.") (internal quotations omitted). But, as well, by its own terms, it is integrated only as to the parties' agreements relating to the subject matter it addresses—not **[*45]** as to all prior or contemporaneous agreements between the parties related to other matters. *See* West v. Quintanilla, 573 S.W.3d 237, 244 (Tex. 2019) ("Although it is complete and final as to its subject matter, it does not purport to address or supersede agreements related to other matters."). In this sense, the NDU is only partially integrated. The language in the NDU makes this clear. For example, it states:

> It is understood that this agreement is limited to statements made during the interview on January 27, 2021, and does not apply to any oral, written, or recorded statements made by you at any other time. This letter and the attached Addendum constitute the entire understanding between the United States and you *in connection with this interview*.

(Dkt. #48, Exhibit 3) (emphasis added). Accordingly, though the NDU unambiguously states that it "constitute[s] the entire understanding between the United States and [Rodgers,]" it does so only in connection with the terms of the January 22, 2021, proffer meeting (*See* Dkt. #48, Exhibit 3). Thus, even though the NDU contains an integration clause, it does not foreclose the possibility that Rodgers and the Government reached another separate, unrelated agreement.

This is significant because **[*46]** under the parol evidence rule, the written, integrated NDU only "precludes enforcement of any prior or contemporaneous agreement that addresses the same subject matter and is inconsistent with [the NDUs'] terms." Id. at 244-45. Stated differently, the parol evidence rule does not preclude enforcement of a prior agreement that is "collateral to and not inconsistent" with the NDU. Id. at 245. Therefore, to determine if the parol evidence rule bars enforcement of the oral agreement, the Court must determine whether the alleged oral agreement was "collateral" to the NDU and whether it was "not inconsistent" with it. *See id.*

Here, the Court finds that any alleged oral non-prosecution agreement was "collateral" to the second NDU. To be collateral, the agreement must be one the parties might naturally make separately and would not be ordinarily be expected to be embodied in or integrated with the written agreement and not so clearly connected with the principal transaction as to be part and parcel of it. Boy Scouts of Am. v. Responsive Terminal Sys., Inc., 790 S.W.2d 738, 745 (Tex. App.—Dallas 1990, writ withdrawn). Here, the NDU and the oral agreement addressed different subject matters. An NDU is generally "an agreement between an [individual] and the government in a criminal case that sets forth the terms under which the **[*47]** [individual] will provide information to the government during an interview, commonly referred to as a 'proffer session.'" United States v. Lopez, 219 F.3d 343, 345 n.1 (4th Cir. 2000). On the other hand, a non-prosecution agreement is exactly what it sounds like—it is an agreement that states the Government will agree not to prosecute an individual if certain conditions are met (Dkt. #48-1 ¶3). Thus, the NDU agreement addressed the terms of the proffer session, while the alleged oral agreement would have addressed the terms of any protection from prosecution. Even in the Government's own words, "[n]on-prosecution agreements differ markedly from NDUs" (Dkt. #48 at p. 4). Consequently, because the oral non-prosecution agreement was collateral to the written NDU, the Court must resolve whether the oral non-prosecution agreement was inconsistent with the terms of the NDU. *See* *Quintanilla, 573 S.W.3d at 244-45*. If the oral non-prosecution agreement was "not inconsistent" with the NDU, then the parol evidence rule will not preclude enforcement of the oral agreement. *Id.*

The Court turns to the language of the NDU to determine if it is consistent with the alleged oral agreement that Rodgers would not be prosecuted if he continued to cooperate. In relevant part, the agreement states: **[*48]**

> 3. The United States agrees that no statement made by you during the interview will be used directly against you in any legal proceeding, except that your statements may be offered in any such proceeding to impeach your testimony or to rebut evidence offered on your behalf. In addition, the United States may use any statements made in the interview in a prosecution of you for making a false statement or declaration (*18 U.S.C. §§ 1001*, *1623*), obstruction of justice (*18 U.S.C. § 1503, et seq.*), or perjury (*18 U.S.C. § 1621*).
> 4. The United States is free to use any information directly or indirectly derived from the interview to pursue its investigation and in any subsequent prosecution of you or others.

(Dkt. #48, Exhibit 3). The language, particularly in paragraph four, broadly contemplates future prosecution of Rodgers. At first glance, this broad language appears to be inconsistent with the Government's oral promise not to prosecute Rodgers. But, after a closer examination of the language, the Court reaches a different conclusion. Instead, the Court finds that the collateral oral agreement at issue is "not inconsistent" with the written NDU—even though the NDU contemplates future prosecution of Rodgers. Indeed, in *Quintanilla*, the Texas Supreme Court explored **[*49]** what "inconsistent" means in this context and found that when the oral agreement contradicts or varies the parties' obligations under the written agreement, the oral agreement is an inconsistent collateral agreement. *Id. at 247*.

Here, the alleged oral agreement does not vary the parties' obligations under the written NDU. For one thing, the NDU does not specifically state that Rodgers is subject to a future prosecution; it simply states the Government can use the information from the interview in any subsequent prosecution (Dkt. #48, Exhibit 3). Further, the alleged oral agreement was not simply an agreement to not prosecute Rodgers—it was conditioned on his continued cooperation. Thus, just like the NDU contemplates future prosecution of Rodgers, so, too, does the alleged oral agreement—if Rodgers fails to continue to cooperate. As such, the oral agreement does not alter fundamental terms of the NDU.

Consequently, because the alleged oral non-prosecution agreement is "collateral to and not inconsistent" with the second NDU, the parol evidence rule does not preclude enforcement of it. *See* *id. at 245*. Accordingly, since the parol evidence rule is not applicable, the Court now turns to whether Rodgers has **[*50]** proved that there was a legally enforceable oral non-prosecution agreement.

B. No Legally Enforceable Oral Non-Prosecution Agreement Was Reached.

A defendant claiming to have a non-prosecution agreement bears the burden of "prov[ing] that such an agreement existed." *Jimenez, 256 F.3d at 347*. "Non-prosecution agreements . . . are contractual in nature, and are therefore interpreted in accordance with general principles of contract law." *Castaneda, 162 F.3d at 835*. Any "ambiguities" in a non-prosecution agreement "must be construed against the government." *McBride, 571 F. Supp. at 605*. Because a non-prosecution agreement is governed by contract law standards, whether the parties reached an agreement is question of fact. *Westlake Petrochemicals, L.L.C. v. United Polychem, Inc., 688 F.3d 232, 238-39 (5th Cir. 2012)*. However, whether an agreement has all the essential terms to be an enforceable agreement is a question of law. *Coe v. Chesapeake Expl., L.L.C., 695 F.3d 311, 320 (5th Cir. 2012)*. In other words, Rodgers' contention has both a factual dimension—namely, whether Rodgers and the Government agreed that the Government would not prosecute him if he cooperated—and a legal dimension—whether there was a meeting of minds on the agreement's essential terms.

Rodgers claims the oral agreement "that Rodgers would not be charged if Rodgers continued to cooperate, which included testifying at trial" was reached "on or about December **[*51]** 9, 2020" (Dkt. #50 at p. 6). In other words, Rodgers argues that the basis for the oral agreement was Poe's phone call with Lewis. Further, Rodgers asserts that the Government's failure to deny the occurrence of the oral conversation and the Government's failure to deny that an agreement was reached "is further proof to corroborate counsel's declaration" (Dkt. #50 at p. 6). Indeed, the Court does find that the absence of any explicit denial of an oral agreement in Danks' declaration is telling. But the Court also notes that Rodgers bears the burden of proving an agreement existed, and he faces some difficult challenges.

For example, contrary to Poe's declaration, Danks declares that Lewis was *not* the attorney on the phone call on December 9, 2021, and the attorney on the phone call was *not* a supervisor of another attorney who worked on the investigation (Dkt. #48-1 ¶ 7). These statements both directly contradict Poe's statements. While the name of the Government attorney who made the alleged agreement might seem like a minor detail, it does cast doubt on Poe's "unequivocal[]" recollection of the events. *See* *United States v. Casares, No. 2:14-653, 2019 U.S. Dist. LEXIS 44324, 2019 WL 1243617, at *4 (S.D. Tex. Mar. 18, 2019)* (singling out Defendant's failure to **[*52]** "specify with whom he entered into this alleged agreement" in holding no oral non-prosecution agreement existed). Further, while Poe asserts an oral agreement was made, Danks declares that "[t]he Division's general practice is that both NDUs and NPAs are written" (Dkt. #48-1 ¶ 3). Moreover, while Poe claims an oral non-prosecution was reached around December 9, 2020, Rodgers entered into a second written NDU with the Government after this that contained no mention of the oral agreement. The execution of the written NDU not only reinforces the Government's claim that agreements like this are in writing, but it also indicates that the course of dealing between the parties was to put important agreements in writing.

Even more telling, the Court finds it odd that Poe's declaration does not mention that two written NDUs were executed. And, finally, looking at Poe's declaration, the Court finds it noteworthy that when Poe was notified that the Government was now recommending prosecution, he never asserted that the change violated any alleged agreement. *See* *United States v. Sattar, No. 02-CR-395, 2003 U.S. Dist. LEXIS 19770, 2003 WL 22510398, *3 (S.D.N.Y Nov. 5, 2003)* (noting that if a non-prosecution agreement had been reached then Poe's response upon learning of the indictment "should have been an **[*53]** anguished howl of protest over the breach of the agreement.") (internal quotations omitted).

Nonetheless, even fully crediting Poe's declaration and assuming *arguendo* that Rodgers has demonstrated the factual aspect of the alleged agreement, the Court finds that no agreement was reached as a matter of law. *See* *Coe, 695 F.3d at 320* ("Whether an agreement fails for indefiniteness is a question of law."). Indeed, a contract is "legally binding only if its terms are sufficiently definite to enable a court to understand the parties' obligations." *Liberto v. D.F. Stauffer Biscuit Co., 441 F.3d 318, 323 (5th Cir. 2006)* (internal quotations omitted). Stated differently, "when an agreement leaves material matters open for future adjustment and agreement that never occur, it is not binding upon the parties and merely constitutes an agreement to agree." *Coe, 695 F.3d at 320*. To determine whether essential terms were sufficiently settled to find a contract, "[c]ourts look not only at any relevant written agreements but also at the relationship of the parties, [and] their course of dealings . . . ." *APS Cap. Corp. v. Mesa Air Grp., Inc., 580 F.3d 265, 272-73 (5th Cir. 2009)*.

Here, no legally enforceable agreement was reached because there was no "meeting of the minds" on all essential terms. Even accepting Rodgers' Poe's declaration as the truth—"that Rodgers would not be charged **[*54]** if Rodgers continued to cooperate, which included testifying at trial"—the agreement nevertheless fails to contain essential terms. *See* *id. at 272* ("[A]n agreement is not enforceable unless it resolves all essential terms and leaves no material matters open for future negotiation."). Indeed, not every "meeting of the minds" is a contract. The minds may not have met on essential terms. When the parties leave an essential term open for future negotiation, there is no binding contract. *T.O. Stanley Boot Co. v. Bank of El Paso, 847 S.W.2d 218, 221 (Tex. 1992)*. Here, the alleged agreement contains no mention of essential terms like "what level of cooperation would be required of [Rodgers] in order for h[im] to satisfy the purported [non-prosecution] agreement [and] who would determine whether [Rodgers] had fulfilled [his] part of the [] agreement." *See* *United States v. Lua, 990 F. Supp. 704, 711 (N.D. Iowa 1998)*; *see also* *Commonwealth v. Stewart, 66 Va. Cir. 135, 2004 WL 3455442, at *17 (Va. Cir. Ct. 2004)* (finding an absence of sufficient detail to prove a meeting of the minds). Absent such essential terms, there could be no meeting of the minds. That Rodgers now argues that he has lived up to his end of the agreement—by cooperating—and the Government disagrees illustrates how these details were material terms to the agreement. Undeniably, these details could change the outcome of the case. *See* *United States v. Aleman, 286 F.3d 86, 92 (2d. Cir. 2002)* ("A critical **[*55]** factual element of the alleged agreement will be who determines [Defendant]'s truthfulness and willingness to testify-the government, the court, or some other party.").

Further, examining the written NDUs, the relationship of the parties, their course of dealings, and other evidence only confirms there was no meeting of the minds as to the essential terms of the non-prosecution agreement. *See* *Mesa, 580 F.3d 272-73*. Indeed, when the agreement is oral, the court "must consider the possibility that immunity discussions . . . never progressed to a meeting of the minds and formation of an enforceable bargain." *Aleman, 286 F.3d at 89*. That a final oral agreement was never reached is bolstered by the existence of two written NDUs. These objectively show the course of dealing between the parties—when the parties agreed to final and essential terms of a contract, they did so in writing. By contrast, the only evidence that Rodgers offers to show that an oral agreement was reached is subjective evidence—Poe's declaration. But even Poe's declaration supports the conclusion that no final agreement was ever reached. Indeed, Poe's repeated conversations with the Government indicate that there was a possibility a deal could be made in the future, **[*56]** not that a final agreement already existed as to all essential terms. *See* *Lua, 990 F. Supp at 711*. For example, Poe acknowledges that he asked the Government about Rodgers' status several times. However, if there had been a prior meeting of the minds on all essential terms, then Poe's inquiries would have been unnecessary. Thus, his repeated inquiries highlight that even he might have been unsure that there was a final agreement on the table.

In short, the Court finds that Rodgers has failed to prove that essential terms of the agreement were sufficiently settled and definite. Indeed, the lack of detail regarding the terms of the alleged agreement highlight that the parties never reached a final agreement. And a court may not create an agreement where none exists. *See* *Lamajak, Inc. v. Frazin, 230 S.W.3d 786, 793 (Tex. App.—Dallas 2007, no pet.)*. A defendant must establish something "more than an unfounded and unilateral belief" that the government made a claimed promise in exchange for his cooperation. *United States v. Williams, 198 F.3d 988, 992 (7th Cir. 1999)*. Rodgers has not done so. Accordingly, because the Court concludes that there was no meeting of the minds as to the essential terms, the Court finds no non-prosecution agreement exists for the Court to enforce. Therefore, the Court denies Rodgers' motion to dismiss on this ground.

[*57] CONCLUSION

It is therefore **ORDERED** that Defendant Neeraj Jindal's Motion to Dismiss Count One of the First Superseding Indictment (Dkt. #36) and Defendant John Rodgers' Motion to Dismiss the Superseding Indictment (Dkt. #45) are hereby **DENIED**.

IT IS SO ORDERED.

SIGNED this 29th day of November, 2021.

Opinion

ORDER GRANTING DEFENDANT'S MOTION TO DISMISS, AND DENYING PLAINTIFFS' MOTIONS FOR PRELIMINARY INJUNCTION, TO STRIKE, AND TO APPEND CLAIM

Docket Nos. 20, 45, 51, 52, 74

I. INTRODUCTION

Plaintiffs bring this action for antitrust and RICO violations, and breach of contract and fraud against Apple, Inc. ("Apple") to challenge Apple's allegedly monopolist operation of its "App Store" through "curation" and "censor[ship]" of smartphone apps. Docket No. 41 ("FAC") ¶ 1-2. Plaintiffs seek to vindicate the right of "the end users of Apple's iPhone" to "enjoy unrestricted use of their smartphones" to run "innovative applications, written by third party developers." *Id.* ¶ 5.

Now pending is Apple's motion to dismiss all of Plaintiffs' claims against Apple. Docket No. 45. Additionally, **[*2]** Plaintiffs two motions for preliminary injunction, Docket Nos. 20, 52, motion to strike Apple's motion to dismiss, Docket No. 51, and request to append a claim to its FAC, Docket No. 52, are also pending. Finally, Apple's motion to quash Plaintiffs' subpoena request, Docket No. 74, is pending. For the reasons explained below, the Court **GRANTS** Apple's motion to dismiss all of Plaintiffs' claims against Apple, and **DENIES AS MOOT** each of Plaintiffs' pending motions and Apple's motion to quash.

II. BACKGROUND

A. Summary of Allegations

Plaintiffs bring this antitrust and breach of contract action against Apple, Inc. ("Apple") to challenge Apple's allegedly monopolist operation of its "App Store" through "curation" and "censor[ship]" of smartphone apps. Docket No. 41 ("FAC") ¶ 1-2. Plaintiffs seek to vindicate the right of "the end users of Apple's iPhone" to "enjoy unrestricted use of their smartphones" to run "innovative applications, written by third party developers." *Id.* ¶ 5.

1. Apple's App Approval Process

Apple launched the iPhone and its proprietary iOS ecosystem in 2007. *See Epic Games, Inc. v. Apple Inc., 559 F. Supp. 3d 898, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *17 (N.D. Cal. Sept. 10, 2021)*. Apple introduced the App Store the following year. *2021 U.S. Dist. LEXIS 172303, [WL] at *19*. App developers wishing to distribute apps on the App Store **[*3]** must enter into two agreements with Apple: the Developer Agreement and the Developer Program License Agreement ("DPLA"). Developers must also abide by the App Store Review Guidelines (the "Guidelines").[1] The Developer Agreement governs the relationship between a developer and Apple, *see* Docket No. 42 ("Brass Decl."), Exh. 1 ("Developer Agreement"), while the DPLA governs the distribution of apps created using Apple's proprietary tools and software, *see id.*, Exh. 2 ("DPLA"). By signing the DPLA, developers "understand and agree" that Apple may reject apps in its "sole discretion." *Id.* § 6.9(b). The Guidelines set out the standards Apple applies when exercising that discretion to review and approve apps for distribution on the App Store, a process known as "App Review." *See generally id.*, Exh. 3 ("Guidelines").

2. Plaintiffs' Apps

Plaintiffs allege they are developers of "a diverse group" of apps: Coronavirus Reporter, Bitcoin Lottery, CALID, WebCaller, and Caller-ID. FAC ¶¶ 8, 27-30. Two of these apps, Coronavirus Reporter and Bitcoin Lottery, were never approved for distribution on the App Store. *Id.* ¶¶ 29, 53.

Coronavirus Reporter sought to collect "bioinformatics data" from users **[*4]** about COVID-19 symptoms that it would then share with "other users and [unidentified] epidemiology researchers." FAC ¶¶ 48, 52. The Coronavirus Reporter team allegedly included Dr. Robert Roberts, a former cardiologist for NASA. *Id.* ¶ 47. The Coronavirus Reporter app was developed in February 2020, and, if approved, "this startup COVID app" would allegedly have been "first-to-market." *Id.* The Coronavirus Reporter app was rejected by Apple on March 6, 2020, under Apple's policy requiring that any apps related to COVID-19 be submitted by a recognized health entity such as a government organization or medical institution. *Id.* ¶¶ 54, 56, 69, 94, 96, 98; *see also* Guidelines § 5.1.1(ix) ("Apps that provide services in highly-regulated fields (such as banking and financial services, healthcare, and air travel) or that require sensitive user information should be submitted by a legal entity that provides the services, and not by an individual developer"). Apple allegedly denied Coronavirus Reporter's appeal from rejection on March 26, 2020,

---

[1] The agreements and Guidelines are "central" to Plaintiffs' claims, FAC ¶ 273, and are incorporated by reference in the FAC. *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)*; *see also* FAC ¶¶ 19, 24, 56, 74, 113-14, 135, 145, 165, 186, 195-206, 245, 254-55, 258-59, 269-71.

which Plaintiffs alleged was concurrent with "Apples internal discussions with its own partners" in order to "further cement Apple's own monopolistic trust **[*5]** and medi[c]al endeavors." FAC ¶ 56.

Similarly, Apple allegedly rejected Plaintiff Primary Productions' Bitcoin Lottery, a "blockchain app" developed by Plaintiff Primary Productions, under its alleged policy "generally block[ing] blockchain apps." FAC ¶¶ 85-86.

Plaintiffs' other apps (CALID, Caller-ID, and WebCaller) allegedly were approved for distribution on Apple's App Store. FAC ¶¶ 97, 103. CALID, "a cross-platform scheduling platform with an initial focus on telehealth," *id.* ¶ 94, was approved after the developer addressed several violations of Apple's Guidelines, including Apple's requirement that developers use Apple's payment system for in-app purchases. *Id.* ¶¶ 95, 97. Although Plaintiffs state that they later "abandoned" the app, *id.* ¶ 97, they allege "CALID was subject to ranking suppression," *id.* ¶ 28. Through "ranking suppression," Plaintiff allege that Apple rendered the app "invisible on App Store searches" by end users. *Id.* Plaintiffs similarly allege that Apple "suppressed" Caller-ID and WebCaller because it competed with Apple's own Facetime app and because Apple retaliated against Plaintiff Isaacs after he "informed Apple he held a patent on web caller ID, and that **[*6]** [Apple's] crony, Whitepages . . . violated his patent." *Id.* ¶¶ 104-07, 305. Plaintiffs concede, however, that Isaac's patent was invalidated. *Id.* ¶ 305.

3. Plaintiffs' Antitrust Claim Theory

The core of Plaintiffs antitrust claims are challenges to Apple's alleged exercise of market power in reviewing proposed apps and to Apple's unilateral authority to approve or deny which apps are allowed on the App Store. Plaintiffs challenge Apple's unilateral control over the ability of developers to access and provide apps to iOS users, including Apple's alleged practice of suppressing the visibility of apps which compete with Apple's own apps or apps of Apple's "cronies." FAC ¶ 21-23, 127, 199.

Plaintiffs' FAC articulates at least fifteen different relevant markets to its antitrust claims against Apple:

(1) a "Smartphone Enhanced National Internet Access Devices" market;
(2) a "smartphone market";
(3) a "single-product iOS Smartphone Enhanced Internet Access Device" market;
(4) "[t]he iOS market";
(5) the "market for smartphone enhanced commerce and information flow (devices and apps) transacted via the national internet backbone";
(6) the "institutional app market";

(7) the "iOS institutional app market"; **[*7]**
(8) the "iOS notary stamps" market;
(9) the "iOS onboarding software" market;
(10) the market for access rights to the iOS userbase;
(11) the "national smartphone app distribution market";
(12) the "iOS App market";
(13) the "US iOS Device App market";
(14) the "market of COVID startups"; and
(15) "the App Market."

FAC ¶¶ 8 n.1, 11, 12, 17-18, 81, 121, 135-37, 142, 165-66, 168, 233, 235. Plaintiffs' Opposition brief attempts to clarify that certain of the alleged markets are synonyms for other alleged markets, and that, to simplify for purposes of the instant motion, Plaintiffs are focused on "two relevant foremarkets" (apparently the "US smartphone market" and the "US iOS smartphone market" which "is an alternative single-produce market to the US smartphone market") and "five downstream markets":

(1) the institutional app market (i.e. wholesale app competition);

(2) the iOS institutional app market (iPhone app single-product wholesale marketplace);

(3) iOS notary stamps market (permission tokens to launch iOS apps);

(4) iOS onboarding software ('Mac Finder' capability disabled on all nonenterprise iOS devices); and

(5) access rights to the iOS userbase").

Docket No. 55 ("Opp.") at 7 (citing FAC **[*8]** ¶¶ 8 n.1, 16, 18). Plaintiffs allege that its market definitions cover and "equally apply to free apps - a major component of the ecosystem" of iOS app purchases. FAC ¶ 16.

Plaintiffs' antitrust theory allegedly "flow[s] logically" from the key fact that "the only marketplace, the only seller of apps to end-users, is Apple itself" and thus Apple monopolizes an "institutional smartphone application software marketplace" in which Apple "purchase[s]" apps from developers—by approving or rejecting them through the App Review process—and then resells them to consumers on its own terms. *Id.* ¶¶ 9-11, 19.

Plaintiffs allege that "Apple's App Store retails approximately 80% of the apps in the US consumer-facing market for smartphone apps," but that the relevant market for its antitrust claims is the "national institutional app market" where Apple "is a monopsony buyer of developers' apps." *Id.* ¶ 121. Plaintiffs allege that "Apple has complete control of pricing and contractual terms in [the national institutional app market]" and, accordingly, "they can reject apps simply because the app competes with Apple's own competitor app, or its cronies." *Id.* ¶ 127. Plaintiffs allege that Apple monopolizes **[*9]** three additional downstream markets, (a) iOS notary stamps market (permission tokens to launch iOS apps), (b) iOS onboarding software, and (c) access rights to the iOS userbase, through Apple's unilateral control of access to those markets. FAC ¶¶ 135-41.

4. Class Allegations

Plaintiffs propose to represent various classes pursuant to "*Fed R. Civ. P. 23(b)(1)*, *(2)*, and *(3)*," including for "All U.S. iOS developers of any app that was excluded through disallowance and/or ranking suppression on the App Store," and "Any iOS developer who paid a $99 annual subscription fee[] to Apple for access to the iOS userbase and/or 'app notarization.'" FAC ¶¶ 148-51. Plaintiffs allege that the $99 annual fee is required for app developers to access the "App Store Connect developer portal" to develop and test apps on Apple's software, and to submit apps to for Apple to consider for inclusion on the App Store. *Id.* ¶ 135.

5. Causes of Action

Plaintiffs allege eleven causes of action against Apple:

(1) Violation of *§ 2 of the Sherman Act* for "interstate restriction of smartphone enhanced internet userbase access services, iOS notary stamp and iOS onboarding software markets." FAC ¶¶ 160-172.

(2) Violation of *§ 2 of the Sherman Act* for "denial of essential facility **[*10]** in the institutional app markets" for Apple's "exclusionary behavior that denies essential facilities" that are necessary to compete in the smartphone market, such as denying "notary stamps." *Id.* ¶¶ 180-88.

(3) Violation of *§ 1 of the Sherman Act* because the "DPLA [is an] unreasonable restraint of trade" by "limiting competition in the critically important US institutional app marketplace." *Id.* ¶¶ 195-206.

(4) Violation of *§ 2 of the Sherman Act* for "ranking suppression as restraint of interstate trade." *Id.* ¶¶ 207-212.

(5) Violation of *§ 1 of the Sherman Act* for "tying the App Store, Notary Stamps and Software Onboarding to the iOS device market." *Id.* ¶¶ 213-217. Plaintiffs allege that "Apple is able to unlawfully condition access to iOS device to the use of a second product—App Store app marketplace." *Id.* ¶ 217.

(6) Violation of *§ 2 of the Sherman Act* for "$99 fee illegality." FAC ¶¶ 231-234. Plaintiffs allege "Apple unlawfully maintains is monopoly powers in the aforementioned markets" by "issuing an illegal demand of money from 20 million aspiring developers" of $99 each year "if they wish to access the iOS userbase or get their software notarized on an iOS device." *Id.* ¶ 235.

(7) "*Cameron* Antitrust Class Action Opt Out:" Plaintiffs CALID **[*11]** and Jeffrey Isaacs "assert claims for non-zero price apps as specified in the already docketed complaint *Cameron v. Apple*." *Id.* ¶¶ 241-43. Plaintiffs allege the *Cameron* case, No. 19-cv-3074-YGR (N.D. Cal.) is a "developer class-action antitrust suit" where the "class is restricted to app developers who sold apps for non-zero prices." *Id.* ¶ 36. Plaintiffs allege that certain Plaintiffs in this case are *Cameron* class action opt-outs, and state the *Cameron* causes of action in this suit through "reference to the *Cameron* complaint." *Id.* ¶ 132. Plaintiffs allege that Judge Gonzalez Rogers deemed this litigation not subject to consolidation with *Cameron. Id.* ¶ 243.

(8) Breach of Contract for Apple's pretextual refusal to approve the Coronavirus Reporter app for distribution on the App Store in violation of the DPLA and Developer Agreement. *Id.* ¶¶ 244-260.
(9) Breach of the Covenant of Good Faith and Fair Dealing for Apple's refusal to approve the Coronavirus Reporter app. FAC ¶¶ 261-66.

(10) Violation of the *Racketeer Influenced Corrupt Organization Act*, *18 U.S.C. § 1962(c)* because "Apple and its cronies formed an enterprise meant to exploit the work of developers by screening their ideas for purported compliance **[*12]** with DPLA, meanwhile lifting and appropriating their ideas for their own competing apps[.]" *Id.* ¶ 269.

(11) Fraud for improper rejections of and ranking suppression of disfavored apps. *Id.* ¶¶ 309-23.

Plaintiffs initially alleged a twelfth claim against the Federal Trade Commission ("FTC") under the *Administrative Procedure Act*, FAC ¶¶ 324-25, but voluntarily dismissed and withdrew that claim on November 23, 201, *see* Docket No. 83.

Plaintiffs seek damages of an estimated $200 billion and a permanent injunction restraining Apple from "denying developers access to the smartphone enhance Internet userbase." FAC at 106-07.

B. Procedural Background

On January 19, 2021, Plaintiff Coronavirus Reporter filed the first iteration of this lawsuit in the District of New Hampshire. *Coronavirus Reporter v. Apple, Inc.* ("DNH Docket."), No. 21-cv-47, Docket No. 1 (D.N.H.). Coronavirus Reporter twice amended its complaint in response to then-pending motions to dismiss, and then voluntarily dismissed the case when the court ordered it transferred to this jurisdiction. DNH Docket Nos. 17, 19, 26-27, 32-33, 39-40.

On May 17, 2021, Plaintiff Primary Productions—represented by the same counsel—filed a separate, **[*13]** nearly identical lawsuit in the District of Maine. *Primary Prods. LLC v. Apple Inc.* ("D. Me. Docket."), No. 21-cv-137, Docket No, 1 (D. Me.). There, Primary Productions amended its complaint in response to Apple's motion to dismiss. D. Me. Docket Nos. 17, 21. That case was then transferred to this Court, and Apple moved to dismiss the action. *See Primary Prods. LLC v. Apple Inc.*, No. 3:21-cv-6841-EMC, Docket Nos. 27 & 32 (N.D. Cal.). Thereafter, Plaintiff Primary Productions voluntarily dismissed that action. *Primary Prods.*, No. 3:21-cv-6841-EMC, Docket. 36.

Plaintiffs Coronavirus Reporter and CALID filed this putative class action on July 20, 2021, raising substantially similar claims to the prior two actions. Docket. 1. They then moved for a preliminary injunction. Docket No. 20. Apple moved to dismiss the complaint, and Plaintiffs again amended their complaint in response. Docket No. 41. The FAC—a putative class action was brought on behalf of Coronavirus Reporter, CALID, Primary Productions LLC, Jeffrey Isaacs, and two different classes of app developers affected by Apple's practices—is thus the seventh complaint filed by one or more of these related plaintiffs, all making similar **[*14]** allegations and claims.

Apple moves to dismiss the FAC. Docket No. 45 ("Motion to Dismiss"). After amending their complaint, Plaintiffs did not withdraw their motion for preliminary injunction, Docket No. 20, which remains pending. Instead, Plaintiff's filed a *second* motion for preliminary injunction, which is also pending. Docket No. 52. In that motion, Plaintiffs also request "appending" another claim to their FAC, under the California Unfair Competition Law (although Plaintiffs did not seek leave to amend their complaint as required under *Fed. R. Civ. P. 15(a)(2)*). *Id.*

Finally, in response to Apple's motion to dismiss the FAC, Plaintiffs filed a "motion to strike" Apple's motion to dismiss (although Plaintiffs did not cite any legal authority authorizing them to move to strike Apple's motion to dismiss). Docket No. 51 ("MTS"). *Cf.* 5C Wright & Miller, Fed. Prac. & Proc. Civ. § 1380 (3d ed.) ("*Rule 12(f)* motions [to strike] only may be directed towards pleadings as defined by *Rule 7(a)*; thus motions, affidavits, briefs, and other documents outside of the pleadings are not subject to *Rule 12(f)*.").

III. LEGAL STANDARD

A. Failure to State a Claim (*Rule 12(b)(6)*)

Federal Rule of Civil Procedure 8(a)(2) requires a complaint to include "a short and plain statement of the claim showing that the **[*15]** pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. A complaint that fails to meet this standard may be dismissed pursuant to *Rule 12(b)(6)*. *See* *Fed. R. Civ. P. 12(b)(6)*. To overcome a *Rule 12(b)(6)* motion to dismiss after the Supreme Court's decisions in *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* and *Bell Atlantic Corporation v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, a plaintiff's "factual allegations [in the complaint] 'must . . . suggest that the claim has at least a plausible chance of success.'" *Levitt v. Yelp! Inc., 765 F.3d 1123, 1135 (9th Cir. 2014)*. The court "accept[s] factual allegations in the complaint as true and construe[s] the pleadings in the light most favorable to the nonmoving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. But "allegations in a complaint . . . may not simply recite the elements of a cause of action [and] must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively." *Levitt, 765 F.3d at 1135* (quoting *Eclectic Props. E., LLC v. Marcus & Millichap Co., 751 F.3d 990, 996 (9th Cir. 2014)*). "A claim has facial plausibility when the Plaintiff pleads factual content that allows the court to draw the reasonable inference that the Defendant is liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (quoting *Twombly, 550 U.S. at 556*).

IV. ANALYSIS

A. Antitrust Claims (Counts 1-7)

Apple argues that all seven of Plaintiffs' antitrust claims **[*16]** should be dismissed because Plaintiffs fail to allege facts sufficient to meet two threshold conditions to proceed on any antitrust theory: (1) Plaintiffs fail to allege a plausible relevant market for their claims, and (2) Plaintiffs fail to allege antitrust injury.

As explained below, the Court dismisses all of the antitrust claims for Plaintiffs' failure to satisfy these threshold conditions. As such, the Court cannot and does not address whether Plaintiffs have sufficiently plead facts to state substantive antitrust claims.

1. Relevant Market for Antitrust Claims

"A threshold step in any antitrust case is to accurately define the relevant market, which refers to 'the area of effective competition.'" *Fed. Trade Comm'n v. Qualcomm Inc., 969 F.3d 974, 992 (9th Cir. 2020)* (citation omitted); *see also* *Image Tech. Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1202 (9th Cir. 1997)* ("The relevant market is the field in which meaningful competition is said to exist." (citing *United States v. Continental Can Co., 378 U.S. 441, 449, 84 S. Ct. 1738, 12 L. Ed. 2d 953 (1964)*)). Market definition is an essential predicate to the entire case, for "[w]ithout a definition of [the] market there is no way to measure [the defendant's] ability to lessen or destroy competition.'" *Ohio v. American Express Co., 138 S. Ct. 2274, 2285, 201 L. Ed. 2d 678 (2018)*.

Typically, the relevant market is the "arena within which significant substitution in consumption or production occurs." *Id.* (citation omitted). But courts should **[*17]** "combine different products or services into 'a single market' when "that combination reflects commercial realities." *Id.* (citing *Brown Shoe Co. v. United States, 370 U.S. 294,* 336-337, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962) (pointing out that "the definition of the relevant market" must "'correspond to the commercial realities' of the industry")). "The principle most fundamental to product market definition is 'cross-elasticity of demand' for certain products or services." Kaplan v. Burroughs Corp., 611 F.2d 286, 291-92 (9th Cir. 1979). "Commodities which are 'reasonably interchangeable' for the same or similar uses normally should be included in the same product market for antitrust purposes." *Id.* "This interchangeability is largely gauged by the purchase of competing products for similar uses considering the price, characteristics and adaptability of the competing commodities." United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 380-81, 76 S. Ct. 994, 100 L. Ed. 1264 (1956). "In defining the relevant market, the court must look beyond the particular commodity produced by an alleged monopolist because the relevant product market for determining monopoly power, or the threat of monopoly control, depends upon the availability of alternative commodities for buyers." Kaplan, 611 F.3d at 292 (citing Fount-Wip, Inc. v. Reddi-Wip, Inc., 568 F.2d 1296, 1301 (9th Cir. 1978)). A plaintiff cannot ignore economic reality and "arbitrarily choose the product market relevant to its claims"; rather, the plaintiff must "justify any proposed **[*18]** market by defining it with reference to the rule of reasonable interchangeability and cross-elasticity of demand." Buccaneer Energy (USA) v. Gunnison Energy Corp., 846 F.3d 1297, 1313 (10th Cir. 2017) (internal quotation marks and citation omitted).

Where a complaint fails to adequately allege a relevant market underlying its antitrust claims, those claims must be dismissed. Pistacchio v. Apple Inc., 2021 U.S. Dist. LEXIS 47071, 2021 WL 949422, at *2 (N.D. Cal. Mar. 11, 2021).

a. Unclear Market Definitions

First, Apple correctly observes that the FAC lacks clarity as to the relevant product markets for Plaintiffs' antitrust claims. The FAC articulates and references at least fifteen different markets and does not always define the boundaries of or differences between those markets. *See e.g.*, FAC ¶¶ 8 n.1, 11, 12, 17-18, 81, 121, 135-37, 142, 165-66, 168, 233, 235; Motion to Dismiss at 7-9. For example, Plaintiffs mention the "the App Market" twice in the complaint but do not define it. FAC ¶¶ 109, 183. It is not clear whether this is the same as, distinct from or overlapping with the "national market of apps for smartphone enhanced internet access devices," *id.* ¶ 121; "the US consumer-facing market for smartphone apps," *id.*; or the undefined "app submarkets" referenced elsewhere, *id.* ¶¶ 168, 235. Plaintiffs suggest at one point that these "app markets . . . are downstream **[*19]** from the smartphone enhanced device market." *Id.* ¶ 183. But this articulation would seem to contradict Plaintiffs' allegations that hardware and software are "bundle[d]" together in a single "Smartphone Enhanced Internet Information and Commerce Access Device" market, *id.* ¶¶ 15-16, which itself is an apparent sub-market of the "market for smartphone enhanced commerce and information flow (devices and apps) transacted via the national internet backbone," *id.* ¶ 234. The FAC does not define these terms. And, depending on the boundaries of the alleged markets, they do not seem to correspond with the products subject to the alleged antitrust conduct. For instance, it is not clear why the Coronavirus Reporter is an app or program that can only be used on Apple smartphones and not on other smartphone enhanced Internet access devices, or any other device that has access to the internet. Why can the app not be used on laptops and desktops?

Plaintiffs attempt to bring clarity to the FAC through its briefing by seeking to narrow the relevant markets upon which it relies, and abandoning many markets alleged in the FAC. However, it is not permissible for Plaintiffs to amend their complaint through **[*20]** motion practice. Tietsworth v. Sears, 720 F. Supp. 2d 1123, 1145 (N.D. Cal. 2010). But even if the Court were to credit Plaintiffs' attempt at clarifying the scope of the FAC through briefing, Plaintiffs' newly proposed relevant markets still rely on inconsistent explanations regarding the relevant product markets.

Plaintiffs now argue that the principal markets on which their antitrust claims are two foremarkets - "US Smartphones" or "an alternative single brand foremarket" of "US iOS Smartphones" - and *four* downstream markets, "which by definition, Apple has 100% control over: the iOS institutional App Market, the iOS notary stamp market, the iOS application loader market and the iOS userbase market." MTS ¶¶ 11-12. But then, in Plaintiffs' Opposition to Apple's Motion to Dismiss, they contend that, notwithstanding the various references to other markets throughout the complaint, their antitrust claims are predicated on two foremarkets and *five* downstream markets.

Docket No. 45 ("Opposition") at 7. More notably, the term "foremarket" does not appear in Plaintiffs' FAC; it is an entirely new concept unanchored to the FAC.

Even if the Court were to proceed from Plaintiffs' narrowest formulation of the relevant markets for its claims - the two foremarkets **[*21]** and four downstream markets to which Plaintiffs refer in their Motion to Strike, MTS ¶¶ 11-12 - this attempt at creating a narrower framework for the product market analysis fails to provide sufficient clarity to pass muster. Does the "market for smartphone enhanced commerce and information flow (devices and apps) transacted via the national internet backbone," FAC ¶ 234, correspond to Plaintiffs' now asserted "US smartphones" foremarket or to one of Plaintiffs' single-brand downstream markets? What is included in the market for U.S. smartphones? All brands? What about devices such as tablets? Do the included products have to be Internet-enabled? What if they access the Internet only through a Wi-Fi connection? And where do Plaintiffs' allegations about Apple's monopoly over "the iOS market," *id.* ¶ 124 fit into its proposed framework of two foremarkets and four downstream markets? How do the newly asserted markets relate to Plaintiffs' allege antitrust injury in the "market of COVID startups"? *Id.* ¶ 81.

In summary, the FAC does not provide sufficient clarity for the Court to assess the threshold question of whether there is a relevant market for Plaintiffs antitrust claims. One cannot **[*22]** discern what is included and what is not, and thus analysis of cross-elasticity of demand is not possible. Nor do the newly asserted markets appear to correspond to the markets and allegations pleaded in the FAC.

The Court may dismiss Plaintiffs' antitrust claims based on these findings alone. *Sumotext Corp. v. Zoove, Inc., No. 16-CV-01370-BLF, 2016 U.S. Dist. LEXIS 152927, 2016 WL 6524409, at *3 (N.D. Cal. Nov. 3, 2016)* ("The Court also finds the allegations of the relevant market to be unclear, and it disagrees with Sumotext that the relevant market need not be alleged at the pleading stage."); *Newcal Indus., Inc. v. Ikon Office Sol., 513 F.3d 1038, 1044 & n.3 (9th Cir. 2008)* (a plaintiff alleging a claim under either *Section 1* or *Section 2 of the Sherman Act* must allege the existence of a relevant market and that the defendant has power within that market); *Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1064 (9th Cir. 2001)* (affirming dismissal based on contradictory market definitions).

b. Plausibility of Alleged Product Markets

In light of the foregoing analysis that Plaintiffs' alleged product markets lack clarity, the Court need not analyze the plausibility of any of the product markets which Plaintiffs allege. Nonetheless, the Court will assume *arguendo* Plaintiffs' attempt to narrow the relevant markets to two foremarkets and four downstream markets are defined with sufficient clarity, MTS ¶¶ 11-12, and thus analyzes the plausibility of those six markets (while ignoring other markets **[*23]** that Plaintiffs alleged in the FAC and now seem to abandon). The Court finds that these alleged markets do not satisfy *Rule 12(b)(6)*'s plausibility standard.

Plaintiffs' Motion to Strike proposes the following six markets to underlie Plaintiff's antitrust claims:

> (1) Foremarket 1: "US Smartphones." MTS ¶ 11; FAC ¶ 15 ("Smartphone Enhanced Internet Information and Commerce Access Device Marketplace"); *id.* ("A smartphone is an ecosystem of hardware AND software. . . The iPhone exists within the marketplace for smartphones."); *id.* ¶ 16 ("The marketplace here is the smartphone internet access device."); *id.* ¶ 121 ("There is a relevant national market of apps for smartphone enhance internet access devices, which are critical to the flow of information and commerce.").
>
> (2) Foremarket 2: "an alternative single brand foremarket" of "US iOS Smartphones." MTS ¶ 12; FAC ¶ 18 ("Lastly, we define the single-product marketplace for iOS devices, a subset (80%) of the US smartphone internet access device marketplace."); *id.* ¶ 124 ("the iOS smartphone internet access device market is a relevant market under Sherman.").
>
> (3) Downstream Market 1: "iOS institutional App Market." MTS ¶ 12; FAC ¶ 18 ("iOS Device Application **[*24]** Institutional Marketplace. . . Distributors buy apps, like film studios buy movie rights. . . Largely Theoretical Marketplace: Apple does not recognize it as a legitimate market in their DPLA agreement. Nonetheless, Apple monopsony "buys" millions of apps at a price of zero."). Plaintiffs allege that "by definition, Apple controls

nearly 100% of the iOS institutional App marketplace . . . and hence no competing institutional app buyers." FAC ¶ 126.

(4) Downstream Market 2: "iOS notary stamp market." MTS ¶ 12. Plaintiffs allege that "Apple must issue a 'notarization' or digital encryption signature, in order for an app to launch . . . Apple is the sole producer of these notarizations stamps." FAC ¶ 135.

(5) Downstream Market 3: "iOS application loader market." MTS ¶ 12. Plaintiffs allege that "like the iOS app notarization stamp, the iOS app onboarding software is a critical component to access the critical infrastructure that is the national iOS 'network effect.'" FAC ¶ 136.

(6) Downstream Market 4: "iOS userbase market." MTS ¶ 12. Plaintiffs allege that there is a market "for access rights to the smartphone enhanced internet userbase" and "Apple. . . charges developers $99 for these **[*25]** (partial, selectively limited) access rights." FAC ¶ 140.

There are several problems under *Rule 12(b)(6)* with the relevant markets which Plaintiffs propose.

First, Plaintiffs do not plead facts sufficient to justify their proposed relevant markets. Recall that the "principle most fundamental to product market definition is 'cross-elasticity of demand' for certain products or services." *Kaplan, 611 F.2d at 291-92*. The FAC lacks any discussion of cross-elasticity of demand for certain products or services (a point Plaintiffs concede, Opp. at 7). Moreover, five of the six markets that Plaintiffs allege are single-brand markets in which Plaintiffs have drawn the definitional lines to such that the *only market participant* is inherently and necessarily Apple, MTS ¶¶ 11-12, however, Plaintiffs have not alleged facts required to justify defining these markets as *single-brand* markets.

"Single-brand markets are, at a minimum, extremely rare" and courts have rejected such market definitions "[e]ven where brand loyalty is intense." *Apple, Inc. v. Psystar Corp., 586 F. Supp. 2d 1190, 1198 (N.D. Cal. 2008)* (internal quotation marks and citation omitted). *But see id.* "It is an understatement to say that single-brand markets are disfavored. From nearly the inception of modern ***antitrust law***, the Supreme Court has **[*26]** expressed skepticism of single-brand markets[.]" *In re Am. Express Anti-Steering Rules Antitrust Litig., 361 F. Supp. 3d 324, 343 (E.D.N.Y. 2019)*; Herbert J. Hovenkamp, *Markets in IP & Antitrust*, *100 Geo. L.J. 2133, 2137 (2012)* ("[A]ntitrust law has found that a single firm's brand constitutes a relevant market in only a few situations."). To be sure, "[a]ntitrust markets consisting of just a single brand, however, are not per se prohibited. . . . In theory, it may be possible that, in rare and unforeseen circumstances, a relevant market may consist of only one brand of a product." *Apple, Inc. v. Psystar Corp. at 1198*. On the other hand, as the court in *Epic v. Apple* recently reiterated, "[a] single brand is *never* a relevant market when the underlying product is fungible." *Epic Games, Inc. v. Apple Inc., No. 4:20-CV-05640-YGR, 559 F. Supp. 3d 898, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *87 (N.D. Cal. Sept. 10, 2021)* (citation omitted, emphasis in the original).

Despite the foregoing, "in some instances one brand of a product can constitute a separate market." *Eastman Kodak Co. v. Image Tech. Servs., 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* ("*Eastman Kodak*"). Determining whether a single-brand market is proper requires "a factual inquiry into the 'commercial realities' faced by consumers." *Id.* (quoting, *Grinnell Corp., 384 U.S. at 572*). In *Eastman Kodak*, the Supreme Court considered whether summary judgment was appropriate for Kodak on *Sections 1* and *2* claims where the plaintiffs had argued that Kodak possessed monopoly power in the *aftermarket* of sales of parts and repair services, despite not **[*27]** having such power in the foremarket of equipment sales. *504 U.S. at 466-471*. In affirming the Ninth Circuit's reversal of summary judgment, the Supreme Court identified two factors that supported the aftermarket framework: the existence of significant (i) "information" costs and (ii) "switching costs." *Id. at 473*.

Since then, the Ninth Circuit in *Newcal Industries Inc. v. Ikon Office Solution* outlined four factors that could indicate whether an alleged market is a properly defined single-brand aftermarket under *Eastman Kodak* at the motion to dismiss stage. *See 513 F.3d 1038, 1049-50 (9th Cir. 2008)*. The first indicator of an aftermarket is that the market is "wholly derivative from and dependent on the primary market." *Id. at 1049*. The second indicator is that the "illegal restraints of trade and illegal monopolization relate only to the aftermarket, not to the initial market." *Id. at 1050*. The third indicator is that the defendant's market power "flows from its relationship with its consumers" and the defendant did "not achieve market power in the aftermarket through contractual provisions that it obtains in the initial market." *Id.* The fourth indicator is that "[c]ompetition in the initial market. . . does not necessarily suffice to discipline anticompetitive practices in the aftermarket." **[*28]** *Id.*

"[T]o establish a single-brand aftermarket under *Kodak* and *Newcal*, the restriction in the aftermarket must not have been sufficiently disclosed to consumers in advance to enable them to bind themselves to the restriction knowingly and voluntarily." *Datel Holdings Ltd. v. Microsoft Corp., 712 F. Supp. 2d 974, 987 (N.D. Cal. 2010)*. Indeed, "[m]arket imperfections" may "prevent consumers from discovering" that purchasing a product in the initial market could restrict their freedom to shop in the aftermarket. *Newcal, 513 F.3d at 1048*. In other words, a plaintiff must show evidence "to rebut the economic presumption that [defendant's] consumers make a knowing choice to restrict their aftermarket options when they decide in the initial (competitive) market to" purchase in the foremarket. *Newcal, 513 F.3d at 1050*.

As to Plaintiffs' attempt to allege a single-brand market, Plaintiffs provide no response to Apple's argument that they fail to allege facts going to the four factors as required by *Newcal* to survive a motion to dismiss to justify their proposed *single brand aftermarkets*. *513 F.3d at 1049-50*. Plaintiffs *cannot* satisfy *Newcal* based on the facts they have alleged. Plaintiffs suggest that the four *single-brand* downstream markets (or aftermarkets) flow from the ***single-brand foremarket*** of iOS smartphones. *See* FAC ¶¶ 125 ("the iOS Institutional **[*29]** App marketplace is downstream. . . from the single-product iOS device market."), 135 ("The citizens of our country have invested around a trillion dollars in the iOS network effect. . . the market for iOS app notarization stamps is a relevant antitrust market"), 136 ("Like the iOS app notarization stamp, the iOS app onboarding software is a critical component to access the critical infrastructure that is the national iOS network effect."); MTS ¶ 12 ("Four downstream markets are alleged, which by definition, Apple has 100% control over."). Yet, Plaintiffs do not cite a single antitrust case that has *ever* recognized a ***single-brand foremarket***, and their attempt to define a single-brand foremarket market around "iOS smartphones" without any explanation for why that market should be so limited and without any reference to competitor products or substitutes runs afoul of the principle that "[a] single brand is *never* a relevant market when the underlying product is fungible." *Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *87*.

Moreover, Plaintiffs do not attempt to plead facts to satisfy *Newcal's* four factors to justify their proposed single brand aftermarkets. *Newcal* requires Plaintiffs to show (1) the aftermarket is wholly derivative from the **[*30]** primary market, (2) the illegal restraints of trade relate only to the aftermarket, (3) the defendant did not achieve market power in the aftermarket through contractual provisions that it obtains in the initial market, and (4) competition in the initial market does not suffice to discipline anticompetitive practices in the aftermarket. *513 F.3d at 1048-50*. Importantly, the *Newcal* factors require Plaintiffs to articulate the relationship between a *non-brand limited foremarket* and *the single-brand aftermarkets*. But, here, Plaintiffs do not plead any facts demonstrating the relationship between the non-brand limited foremarket of US Smartphones and the four single-brand aftermarkets. Thus, Plaintiffs fail to allege facts as required by *Newcal* to sustain their single-brand markets.

On a broader level, Plaintiffs fail to plead facts sufficient to justify any of the six alleged relevant markets under the standard rules for *any* market, let alone do they plead the specific facts required to justify its *five* single-brand markets as required by *Newcal* at the motion to dismiss stage. *See* *Buccaneer Energy, 846 F.3d at 1313* (A plaintiff cannot ignore economic reality and "arbitrarily choose the product market relevant to its claims;" rather, the plaintiff must "justify **[*31]** any proposed market by defining it with reference to the rule of reasonable interchangeability and cross-elasticity of demand."). The asserted markets are not secondary markets derived from consumers who are unknowingly captured and held prisoner through a primary market. Instead, according to Plaintiffs' theory, the asserted markets appear to stand on their own, and, for the reasons stated above, lack plausibility.

Plaintiffs do not dispute Apple's arguments about lack of interchangeability analysis. They argue that their failure to provide analysis of cross-elasticity of demand in the FAC "is not fatal to Plaintiffs' claims" because each of the submarkets alleged are well-defined in themselves, and their boundaries can be refined through discovery. Opp. at 7-8 (citing *Brown Shoe Co. v. U.S., 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*). This is incorrect. "Authorities far too numerous to cite or discuss in detail have established" that "[t]he principle most fundamental to product market definition is 'cross-elasticity of demand.'" *Kaplan v. Burroughs Corp., 611 F.2d 286, 291 (9th Cir. 1979)*. "[W]here the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand," therefore, "the relevant market is legally insufficient." **[*32]** *City of N.Y. v. Grp. Health Inc., 649 F.3d 151, 155 (2d Cir. 2011)*.

But even if Plaintiffs' alleged Foremarket 1 of "US Smartphones" could be sustained, none of Plaintiffs' antitrust claims about Apple's actions are shown to impact that market. Plaintiffs must define "the relevant market, which refers to 'the area of effective competition.'" *Qualcomm., 969 F.3d at 992*. Plaintiffs fail to define that area of effective competition in which they compete. They are not smartphone manufacturers. Nor do they provide any other basis for the Court to find that the market of US Smartphones is the "area of effective competition" for Plaintiffs' claims. *See e.g., Pistacchio v. Apple Inc., No. 4:20-CV-07034-YGR, 2021 U.S. Dist. LEXIS 47071, 2021 WL 949422, at *2 (N.D. Cal. Mar. 11, 2021)* ("[T]he relevant market definition contains sparse supporting allegations. First, as noted, Pistacchio is required, and has not included appropriate allegations demonstrating that there are *not* appropriate economic substitutes for Apple Arcade on the iOS platform. . . . The complaint offers no specific allegations supporting the sole focus of the market definition on cloud gaming alternatives as opposed to the broader video game market generally, including those individually sold both in the Apple App Store or by competitors on computer or console platforms, nor does the complaint contain allegations supporting the narrowing **[*33]** of a market to consideration of a subscription based payment model.").

Second, the four downstream single-brand markets on which Plaintiffs' antitrust claims rely run afoul of a fundamental principle for antitrust market definition: they are not markets for products or services. *See e.g., Newcal, 513 F.3d at 1045* ("First and foremost, the relevant market must be a *product* market. The consumers do not define the boundaries of the market; the products or producers do.") (Emphasis in original); *Kaplan, 611 F.2d at 292* ("In arriving at an adequate market definition, price differential between competing products and services is a relevant factor to consider[.]"). For example, Plaintiffs alleged iOS Institutional App Market is defined as a market in which Apple "buy[s]" apps from developers by approving or rejecting them for distribution on the App Store. But Plaintiffs themselves admit this "market" is "largely theoretical," "hypothetical," and untethered to the licensing arrangement on which the App Store is actually predicated. *Id.* ¶¶ 18, 19, 121. Plaintiffs acknowledge that Apple's app review process is not one in which Apple buys the apps of developers, but, rather the "DPLA and App Store employ language that a free app is 'For Sale' **[*34]** or 'Available' through the App Store after gaining 'approval' by Apple for 'adherence to iOS standards.'" *Id.* ¶ 19. The DPLA confirms this arrangement, explaining that "Applications that meet Apple's Documentation and Program Requirements may be submitted for consideration by Apple for distribution via the App Store" and if "selected by Apple, Your Applications will be digitally signed by Apple and distributed[.]" DPLA § Purpose. The DPLA does not include any provisions indicating that Apple pays developers or "buys" apps through the app review process. Rather than buying apps, as discussed in greater detail below, Apple enables the distribution of apps to end users through the app review process.

Similarly, there is no basis supporting Plaintiffs' notion that the proposed downstream markets of "iOS notary stamps," "iOS application loaders," and "iOS userbase" are markets for *products*. Rather, as Plaintiffs acknowledge, each of these three markets refer to component parts a developer may access and use when a developer's app is approved for distribution on the App Store. *See* FAC ¶¶ 135-40. These three markets are neither *markets* nor do they describe *products* but integrated features **[*35]** of Apple's app approval process. Plaintiffs' articulation of these markets is contrived and does not reflect the reality of an actually-existing product market. Indeed, the Court in *Epic* rejected the alleged "foremarket for Apple's own operating system" on Apple mobile devices as "'artificial,'" "entirely litigation driven, misconceived, and bear[ing] little relationship to the reality of the marketplace" because the Court determined that the operating system was an integrated feature of the mobile devices, and that it was "illogical to argue that there is a market for something that is not licensed or sold to anyone." *Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *29*. The *Epic* Court summarized that there were "fundamental factual flaws with Epic Games' market structure" because "[w]ithout a product, there is no market for the non-product, and the requisite analysis cannot occur." *2021 U.S. Dist. LEXIS 172303, [WL] at *86*; *see also id.* ("Thus, where there is no product or market for smartphone operating systems, there are no derivative markets."). The *Epic* Court also rejected the proposed "payment solutions aftermarket" for "the independent reason that [the "In App Purchases" feature set out in Apple's DPLA] is not a product for which there is a market." *Id.* The same analysis applies **[*36]** here: in the absence of information demonstrating that Plaintiffs' downstream markets describe *actually existing products* that are sold or licensed, Plaintiffs' aftermarkets are "without a product, there is no market for the non-product, and the requisite analysis cannot occur." *Id.*

Third, the markets Plaintiffs allege fail to grapple with their own admission and economic reality that the "iOS App market is two-sided." FAC ¶ 12; *accord id.* ¶¶ 11, 17, 18, 123, 125. The Court in *Epic* addressed the nature of the Apple's iOS App marketplace, and Plaintiffs do not dispute its analysis or conclusion that as a two-sided market the iOS App marketplace is a market not for products but for *transactions*:

> As a threshold issue, the Court considers whether the App Store provides two-sided transaction services or as Epic Games argues "distribution services." The Supreme Court has seemingly resolved the question: two-sided transaction platforms sell transactions. In two-sided markets, a seller "offers different products or services to two different groups who both depend on the platform to intermediate between them." *Amex, 138 S. Ct. at 2280*. Here, try as it might, Epic Games cannot avoid the obvious. Plaintiff only sells to iOS **[*37]** users through the App Store on Apple's platform. No other channel exists for the transaction to characterize the market as one involving "distribution services." . . .Accordingly, the Court finds that the relevant App Store product is transactions[.]

*Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *83*. As such, Apple's iOS App two-sided app market is "best understood as supplying only one product—transactions—which is jointly consumed" by developers and consumers on opposing sides of the platform. *Amex, 138 S. Ct. at 2286 n.8*. Therefore, the relevant market must be some category of "transactions" between developers and consumers. *Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *83-86*; *accord* *Amex, 138 S. Ct. at 2287* ("[W]e will analyze the two-sided market for credit-card transactions as a whole to determine whether the plaintiffs have shown that Amex's antisteering provisions have anticompetitive effects."). As the court in *US Airways v. Sabre Holdings Corp., 938 F.3d 43, 57 (2d Cir. 2019)*, explained, "A transaction platform is a two-sided platform where the business "cannot make a sale to one side of the platform without simultaneously making a sale to the other. . . As a result, "[e]valuating both sides of a two-sided transaction platform is . . . necessary to accurately assess competition."

Despite conceding the fact that the iOS App market is a two-sided market of transactions, Plaintiffs four proposed **[*38]** downstream single-brand markets each cut up the app marketplace into admittedly "hypothetical" and "theoretical," FAC ¶¶ 18-19, one-sided markets, with no reference to the *transaction between* developers and consumers that is the actual product on the platform. Instead, it posits Apple as the monopsony buyer of the apps. *See* FAC ¶ 121 ("The other side of this market is the national institutional app market . . Apple is a monopsony buyer of developers' apps, in the institutional app market, because they are sole distributor on the retail side."). Specifically, Plaintiffs advance a *theory* that Apple is an "institutional buyer" of apps and that it "sells" notary stamps, onboarding software and userbase access to developers. But this theoretical framework does not align with the economic reality that Plaintiffs concede: that the iOS App market is a two-sided market of transactions between developers and consumers. Developers are engaged in a *transaction* with consumers, not selling to Apple.

As the court in *Epic* explained, although Apple may be involved in facilitating an exchange through its operation of the App Store platform, ultimately "users and developers consume App Store transactions." **[*39]** *2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *83*. Plaintiffs' failure to allege relevant markets that encompass or even address the two-sided nature of the iOS App market renders their market definitions insufficient as a matter of law. *Amex, 138 S. Ct. at 2287* ("[C]ompetition cannot be accurately assessed by looking at only one side of the platform in isolation."); *Sabre Holdings Corp., 938 F.3d at 57* ("In other words: In cases involving two-sided transaction platforms, the relevant market must, as a matter of law, include both sides of the platform."); *Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *86* ("Epic Games' aftermarket approach to market definition is inconsistent with its recognition that the App Store constitutes a two-sided transaction platform which it fails to properly analyze."). Plaintiffs offer no argument on this point.

In summary, missing from Plaintiffs' market definitions is the identification of *any* well-pleaded allegations that support the boundaries they seek to defined. Plaintiffs fail to plead facts sufficient to adequately define any of their markets (making any kind of analysis on interchangeability and cross-elasticity of demand impossible), fail to rationalize and defend the five single-brand markets; do not define markets for actual products; and ignore the two-sided nature of the iOS app market. "A threshold **[*40]** step in any antitrust case is to accurately define the relevant market." *Qualcomm Inc., 969 F.3d at 992*. Because Plaintiffs have failed to "rigorously address[]" market definition, their complaint warrants dismissal. *City of Oakland v. Oakland Raiders, 445 F. Supp. 3d 587, 600 (N.D. Cal. 2020)*.

2. Antitrust Injury

Apple also argues that Plaintiffs fail to plead antitrust injury.

To plausibly state antitrust claims in this market for transactions of apps (which cannot plausibly be limited to iOS apps based on the allegations in the FAC, as discussed above), Plaintiffs must allege injury to "competition in the market as a whole"—such as marketwide reduction in output or increase in prices—"not merely injury to itself as a competitor" in the market. *Gorlick Distrib. Ctrs., LLC v. Car Sound Exhaust Sys., Inc., 723 F.3d 1019, 1024-25 (9th Cir. 2013)*. This alleged harm also must be "'attributable to an anticompetitive aspect of the practice under scrutiny'"; "harm that could have occurred under the normal circumstances of free competition" does not suffice. *In re NFL's Sunday Ticket Antitrust Litig., 933 F.3d 1136, 1150 (9th Cir. 2019)* (quoting *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*).

Apple argues that Plaintiffs' theory of injury is that *their* apps were rejected from the App Store or subjected to alleged ranking suppression. Motion to Dismiss at 6; FAC ¶¶ 28-30, 53, 87. Yet, Apple contends, Plaintiffs make no allegation that Apple's conduct excluded Apple competitors, suppressed output of the market, increased **[*41]** app prices, or otherwise harmed competition *in the market* beyond Plaintiffs' conclusory allegations of "damage to an entire market," FAC ¶ 81, or unadorned references to "restricted output, quality, and innovation." *Id.* ¶¶ 115, 191. "[A] formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555*.

Additionally, Apple argues that Plaintiffs ignore the nature of the App Store platform such that for every app that is allegedly "suppressed" in search rankings, another app's visibility is lifted. Motion to Dismiss at 6. The effect of "suppression" in search rankings affects the relative positions among products in the market; but there is no showing of harm to competition across the market. Effects on *Plaintiffs'* apps alone, which may raise equitable issues as *between* app developers, do not establish *antitrust* injury. As the Court noted in *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*, "[t]he antitrust laws . . . were enacted for the protection of competition not competitors." (Quotation marks omitted).

Finally, Apple argues that Plaintiffs cannot merely declare that every app rejection injures competition by decreasing output and constricting consumer choice, because "if that were the rule, the *Sherman Act* would inhibit competition **[*42]** by requiring all platforms to increase the number of available apps—no matter if they contained malware, were offensive, sought to scam users, or were inferior copycats that could confuse consumers." Docket No. 64 ("Reply") at 8. Relying on the *Epic*'s analysis, Apple contends that consumers instead "should be able to choose between the type of ecosystems and ***antitrust law*** should not artificially eliminate them." *Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *29*. The App Store's curation—which differentiates it from other platforms—helps "maintain[] a healthy ecosystem that ultimately benefits" users and developers. *2021 U.S. Dist. LEXIS 172303, [WL] at *75*. Thus, Apple concludes, Plaintiffs offer no plausible theory that Apple's policies reduce the net quality of transactions in a relevant market, their allegations amount only to individual harm. *See Gorlick, 723 F.3d at 1025*.

Plaintiffs respond by arguing that they plead "harm to competitors" or "harm to the market" throughout the FAC, and that it is enough that Plaintiffs plead the harm generally at the motion to dismiss stage. Opp. at 11-12 (citing FAC ¶¶ 53, 81, 173, 174, 179, 200). Additionally, Plaintiffs point to a Congressional Subcommittee report which they contend provides the requisite detail to sustain their allegations of marketwide harm. **[*43]** Opp. at 12.

The Court disagrees. The allegations of injury contained in the FAC are either confined to specific harms experienced by Plaintiffs or a small group of competitors, rather than harm to the market. None of the allegations in the FAC allege harm generally to the market of transactions for apps across a relevant market.

Plaintiffs' allege various types of antitrust injury, all of which are insufficient:

- "Apple's refusal to sell notarization stamps or onboarding software . . . is intended to harm competition app developers, like Plaintiffs and Class Members." FAC ¶ 173.
- "The artificial monopoly created by notarization stamps and software onboarding results in damages to nearly twenty million proposed class members of approximately one thousand dollars each. . . When the stamps aren't issued, further damages accrue from lost app revenues. . . In China, 'open' app stores are ten times the size of Apple's App Store in China." FAC ¶ 174.

- "Much damage is done to the overall competition within the institutional app markets, as a result of Apple's anticompetitive practices in userbase access, notarization and onboarding. But the damages extend beyond those markets, into the overall **[*44]** US economy, and even public health response, in the case of Coronavirus Reporter." FAC ¶ 179
- "Apple's conduct and unlawful contractual restrains harm a market that forms a substantial part of the domestic economy, the smartphone enhanced internet device app market." FAC ¶ 200.

The assertions at FAC ¶¶ 173, 179 and 200 amount to conclusory and "threadbare recitals" of the elements of antitrust injury that are insufficient to state a claim. *Iqbal, 556 U.S. at 663*; *see also, e.g., NorthBay Healthcare Grp., Inc. v. Kaiser Found. Health Plan, Inc., 305 F. Supp. 3d 1065, 1074 (N.D. Cal. 2018)* (dismissing antitrust claims because "there are no non-conclusory allegations that [Defendant's] actions restrained trade in the relevant market or injured overall competition" and the allegations "lack factual enhancement and are conclusory."); *Eastman v. Quest Diagnostics Inc., 108 F. Supp. 3d 827, 835 (N.D. Cal. 2015)* (same); *Feitelson v. Google Inc., 80 F. Supp. 3d 1019, 1029 (N.D. Cal. 2015)* (same). Additionally, as discussed above, these allegations relate to harms in hypothetical, non-existent single-brand markets - not in a relevant, actually-existing, two-sided, brand-differentiated market for app transactions.

Although the allegation at FAC ¶ 174 provides some factual basis for Plaintiffs' theory of injury—asserting that Apple's App Review process necessarily injures competition by excluding a number of developers from launching apps on Apple's App Store—this allegation **[*45]** on its own is not sufficient to plead to antitrust injury for two reasons. First, Plaintiffs ignore the App Store serves a two-sided transaction market. As *Epic* held, in a two-sided transaction market, there must be consideration of the "effects on both sides of the market." *2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *102*. Plaintiffs' theory of antitrust injury alleges injury on only one side of the transaction - developers - but fails to grapple with the second side of the transaction market, consumers. Indeed, that apps which comply with Apple's generally applicable "Guidelines" regarding security, functionality and reliability are approved over those that do not is consistent with "normal circumstances of free competition" and may well serve the best interests of consumers. *In re NFL's Sunday Ticket Antitrust Litig., 933 F.3d at 1150*. It is not enough that conduct "has the effect of reducing consumers' choices or increasing prices to consumers." *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1202 (9th Cir. 2012)*). That is because these effects may arise for procompetitive reasons, such as increased interbrand competition. *See Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 891-93, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*. As the court held in *Epic*, Apple's "centralized app distribution and the 'walled garden' approach differentiates Apple from Google." *2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *102*. "That distinction ultimately increases consumer choice by allowing users who value open distribution **[*46]** to purchase Android devices, while those who value security and the protection of a 'walled garden' to purchase iOS devices." Although the conclusion in *Epic* is not necessarily controlling here, Plaintiffs alleged theory of antitrust injury fails to give *any* consideration of the consumer-side of the two-sided transaction market. Failure to allege injury that harmed overall competition in the relevant market—here, a two-sided market of transactions—undermines Plaintiffs' theory of antitrust injury. *See NorthBay Healthcare, 305 F. Supp. 3d at 1074*.

Second, even if it is assumed that Apple exercised monopsonist market power in the apps transaction market, its decisions as to which apps are allowed to sell through the App Store is not an act that in itself causes harm the antitrust laws were designed to protect. Plaintiffs failed to make any allegation the Apple benefits from its rejection of apps or from suppression of apps in the search function. There is no showing that Apple is reaping the fruits of anti-competitive conduct. The deficiency of Plaintiffs' claim in asserting an antitrust injury is demonstrated by the following analogy. Query: if the only newspaper in town decides which advertisements may properly be posted or which **[*47]** advertisements to accept, does a rejected advertiser suffer an anti-trust injury? No. That is not the kind of injury antitrust laws are intended to protect. As noted above, ***antitrust law*** protections competition, not competitors. In contrast, if the newspaper attempted to squelch competition by telling advertisers if they dare advertise in an up-and-coming competing newspaper or radio station, they will be barred from its newspaper, that could suffice to show antitrust injury. *See e.g., Lorain J. Co. v. United States, 342 U.S. 143, 150-51, 152, 72 S. Ct. 181, 96 L. Ed. 162 (1951)* ("The publisher's attempt to regain its monopoly of interstate commerce by forcing advertisers to boycott a competing radio station violated *§ 2" of the Sherman Act*). Plaintiffs do not allege facts any such antitrust injury in the FAC.

To be sure, Plaintiffs allege that:

> "Apple rejected Coronavirus Reporter on March 6, 2020, knowing apps from large institutions and strategic partners were in the pipeline but not yet ready. Apple specifically strategized to prevent the Coronavirus Reporter app, and *all* COVID startup firms, from setting a precedent or amassing a user base, which could jeopardize its own pipeline and/or the first-mover advantage of desirable institutional partners of a monopolistic trust." FAC ¶ 53.

If **[*48]** Apple were to reject or suppress Plaintiffs' apps to diminish competition for Apple's own apps or apps of other developers with whom Apple is conspiring, that might be deemed to inflict antitrust injury. But the FAC and ¶ 53 fail to plausibly allege such conduct with any specificity.

Finally, Plaintiffs' argument that by incorporating by reference a "House Subcommittee report" regarding Apple's business practices into the FAC they have sufficiently plead antitrust injury is unavailing. Opp. at 12. Although the FAC makes reference to the report and states that the report is incorporated by reference, FAC ¶¶ 37-45, Plaintiffs do not connect the findings in the report to their theory and allegations of antitrust injury to the entire market in this case. At most, Plaintiffs allege that aspects of Apple's business practices described in the report "directly harmed Plaintiffs and class members," FAC ¶¶ 40-41, but go no further in elaborating how the practices alleged in this case inflicted antitrust injury in the two-sided market relevant here.

Thus, in addition to Plaintiffs failing to define a relevant market for their antitrust claims, Plaintiffs fail to sufficiently plead antitrust injury **[*49]** in the FAC even if the Court were to assume a relevant market had been defined. This failure provides a second and independent basis for the Court to dismiss Plaintiffs' antitrust claims (Claims 1-7). Because Plaintiffs have failed to make the threshold showings of a plausible a relevant market and alleging antitrust injury, the Court need not analyze whether they have alleged facts sufficient to satisfy the substantive elements of Plaintiffs' particular antitrust claims. *See e.g., Amex, 138 S. Ct. at 2285* (Market definition is an essential predicate to the entire case, for "[w]ithout a definition of [the] market there is no way to measure [the defendant's] ability to lessen or destroy competition.'").

B. Contract Claims (Claims 8 and 9)

Plaintiffs bring two breach of contract claims: (1) breach of contract for Apple's pretextual refusal to approve the Coronavirus Reporter app for distribution on the App Store in violation of the DPLA and Developer Agreement, FAC ¶¶ 244-260 (Claim 8), and (2) breach of the covenant of good faith and fair dealing for Apple's refusal to approve the Coronavirus Reporter app, *id.* ¶¶ 261-66 (Claim 9). Plaintiffs fail to state claims for breach of contract and, accordingly, these **[*50]** claims are dismissed.

To state a breach of contract claim under California law, DPLA § 14.10, a plaintiff must plead: (1) a contract; (2) plaintiff's performance or excuse for nonperformance; (3) breach; and (4) damages. *Hamilton v. Greenwich Invs. XXVI, LLC, 195 Cal. App. 4th 1602, 126 Cal. Rptr. 3d 174, 183 (Cal. Ct. App. 2011)*. Plaintiffs fail to "identify the specific provision of the contract" at issue, much less allege facts establishing breach. *Donohue v. Apple, Inc., 871 F. Supp. 2d 913, 930 (N.D. Cal. 2012)*.

Plaintiffs allege that Apple breached the 'promise[]" in its "Developer Agreement as amended in March 2020 . . . that entities with 'deeply rooted medical credentials' were permitted to publish COVID apps on the App Store." FAC

¶¶ 245, 254. But nothing in the Developer Agreement (or any other contract) contained such a promise, much less *obligated* Apple to distribute any particular app through the App Store, even those submitted by institutions. *See* Donohue, 871 F. Supp. 2d at 931 (rejecting argument that a user guide contained contractual promises because it "includes no 'promises' which plaintiff could have 'accepted'"). Plaintiffs do not identify any contractual provision that they allege was breached.

Instead, Apple points out that the contract governing app distribution is the DPLA. The DPLA expressly states that approval decisions are in Apple's "sole discretion." DPLA § 3.2(g) ("Applications **[*51]** for iOS Products. . . **may be distributed only if selected by Apple (in its sole discretion)** for distribution via the App Store. . . as contemplated in this Agreement.") (Emphasis added). Plaintiffs agreed to this arrangement in exchange for use to Apple's propriety software, tools, and services. *See* DPLA § 1.1 (developers must "accept and agree to the terms" of the DPLA to "use the Apple Software or Services"). Thus, Plaintiffs fail to state a claim for breach of contract (Claim 8) because they fail to allege a breach.

Similarly, Plaintiffs' claim for breach of the covenant of good faith and fair dealing (Claim 9) fails because it re-hashes Plaintiffs' breach allegations (*compare* FAC ¶¶ 254, 260, *with id.* ¶¶ 263, 26). Plaintiffs do not allege that Apple frustrated any specific contractual term. *See* Soundgarden, 2020 U.S. Dist. LEXIS 64545, 2020 WL 1815855, at *17. Thus, it is dismissed for the same reasons. *See* Soundgarden v. UMG Recordings, Inc., 2020 U.S. Dist. LEXIS 64545, 2020 WL 1815855, at *17 (C.D. Cal. Apr. 6, 2020) ("no additional claim is actually stated" where allegations "do not go beyond the statement of a mere contract breach and, relying on the same alleged acts, simply seek the same damages or other relief"). Moreover, the "implied covenant is limited to assuring compliance with the express terms of the contract, and cannot be extended to create **[*52]** obligations not contemplated by the contract." Donohue, 871 F. Supp. 2d at 932 (quotation marks omitted). The express conferral of "sole discretion" upon Apple under the DPLA cannot be contradicted by the implied covenant. *See* Rockridge Tr. v. Wells Fargo, N.A., 985 F. Supp. 2d 1110, 1156 (N.D. Cal. 2013) ("An implied covenant of good faith and fair dealing cannot contradict the express terms of a contract.").

C. RICO and Fraud Claims (Claims 10 and 11)

To plead a civil RICO claim under § 1962(c), Plaintiffs must allege "(1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity (known as 'predicate acts') (5) causing injury to plaintiff's business or property." Living Designs, Inc. v. E.I. Dupont de Nemours & Co., 431 F.3d 353, 361 (9th Cir. 2005) (quotation marks omitted).

Plaintiffs allege that Apple, unnamed "individuals within Apple," "Apple's App Review team," "PR firms, law firms, and rival developer cronies," FAC ¶¶ 269, 270, 273, formed a RICO enterprise and "engaged in a distinct pattern of predicate acts over a multi-year timespan," *id.* ¶ 274, including "wire fraud and mail fraud by assigning junior App Review members to issue false, pretextual reasons for rejection to small developers," *id.* ¶ 275, and "lifting and appropriating their ideas into their own competing apps, and suppressing the original creators' work by blocking app store distribution," **[*53]** *id.* ¶ 269.

Plaintiffs' RICO claim sounds in fraud and must be pled with particularity under Rule 9(b). Odom v. Microsoft Corp., 486 F.3d 541, 553 (9th Cir. 2007) (en banc). The FAC therefore "must identify the who, what, when, where, and how of the misconduct charged, as well as what is false or misleading about the purportedly fraudulent statement, and why it is false." Depot, Inc. v. Caring for Montanans, Inc., 915 F.3d 643, 668 (9th Cir. 2019) (quotation marks omitted). Plaintiffs' allegations do not meet Rule 9(b)'s standard.

Plaintiffs rely on vague, conclusory allusions to Apple's alleged practice of "assigning junior App Review members to issue false, pretextual reasons for rejection to small developers." FAC ¶ 275; *see also, e.g., id.* ¶¶ 42, 87, 104, 257. These general allegations do not identify the specific who, what, when, where, and how. Plaintiffs' attempts to describe discrete instances of fraud are no more detailed. For example, Plaintiffs point to a communication from Apple stating that Coronavirus Reporter was rejected because it contained "data that has not been vetted for accuracy by a reputable source" and was not associated with a "recognized institution." *Id.* ¶ 278. There is no plausible allegation that this was false, *id.* ¶ 277, only, at most, that Apple's requirements were poorly considered, *id.* ¶¶ 277-78. The **[*54]** decision was consistent with Apple's Guidelines. *See* Guidelines § 5.1.1(ix). Similarly, Plaintiffs suggest that Apple rejected Bitcoin Lottery because its "primary purpose" was to "encourage users to watch ads or perform marketing-oriented tasks," which was "not appropriate for the App Store." *Id.* ¶ 280. But here too, Plaintiffs do not dispute that the rejection was made pursuant to Apple's Guidelines. *See* Guidelines § 3.2.2(vi) ("Apps should allow a user to get what they've paid for without performing additional tasks. . . Apps should not require users to rate the app, review the app, watch videos, download other apps. . . or take other similar actions in order to access functionality, content, use the app, or receive monetary or other compensation, including but not limited to gift cards and codes."). Thus, Plaintiffs' RICO claim fails to sufficiently allege fraudulent behavior with particularity as required under *Rule 9(b)* and should be dismissed. *Rule 9(b)* also applies to Plaintiffs' derivative fraud claim (Count 11), and thus that claim fails for the same reason.

Additionally, Plaintiffs' RICO claim fails for another reason. Plaintiffs must allege an enterprise that is *separate* from the "person **[*55]** employed by or associated with" that enterprise who engaged in the unlawful RICO conduct. *18 U.S.C. § 1962(c)*; *see also Schreiber Distrib. Co. v. Serv-Well Furniture Co., 806 F.2d 1393, 1396 (9th Cir. 1986)*. In other words, "[i]f [a corporation] is the enterprise, it cannot also be the RICO defendant." *Rae v. Union Bank, 725 F.2d 478, 481 (9th Cir. 1984)*. Plaintiffs' allegations make clear that the alleged enterprise *is* Apple itself. According to the FAC, it consists of "Apple," *id.* ¶ 269, "Apple's App Review team," and "senior Apple management," *id.* ¶ 270. Where, as here, the "enterprise consist[s] only of [the corporation] and its employees, the pleading . . . fail[s] for lack of distinctiveness." *Living Designs, Inc., 431 F.3d at 361*.

Finally, Plaintiffs' assertions that the alleged enterprise consisted of Apple's "crony app developers," "law firms," and "PR firms" who allegedly "divert profits," "spread Apple's gospel," or obfuscate "Apple's anticompetitive agenda," FAC ¶¶ 271-72, fails because none of these groups are alleged to have participated in an alleged enterprise involving the predicate acts of wire and mail fraud. The allegations are also conclusory.

Thus, the Court dismisses Plaintiffs' RICO and fraud claims (Claims 10 and 11).

D. Leave to Amend

Based on the foregoing analysis, the Court dismisses all eleven of Plaintiffs' claims against Apple in the FAC. Accordingly, **[*56]** because all of the claims against Apple are dismissed, so too are Plaintiffs' class allegations stemming from those claims.

The Court addresses whether Plaintiffs should be given leave to amend any or all of their claims. While *Fed. R. Civ. P. 15(a)* states that leave to amend "shall be freely given when justice so requires," nonetheless "[a] district court acts within its discretion to deny leave to amend when amendment would be futile[.]" *Chappel v. Lab'y Corp. of Am., 232 F.3d 719, 725-26 (9th Cir. 2000)*.

Although Plaintiffs are correct to note that this will be the first ruling under *rule 12(b)(6)* concerning Plaintiffs' complaint, Apple is also correct in observing that between the various iterations of this case being filed across jurisdictions and by different configurations of Plaintiffs - all challenging the same conduct by Apple and all by the same counsel - this is Plaintiff's *seventh* amended complaint on these claims. *See supra* Procedural Background. Plaintiffs have had the benefit of responding to Apple's fully briefed motions to dismiss in this case and previous cases, and, yet, in this seventh complaint they still fail to state any claims. Accordingly, the Court finds that it would be futile to grant leave to Plaintiffs to bring an *eighth* amended complaint, and thus dismisses **[*57]** the claims with prejudice.

E. Other Issues

1. Plaintiffs' Motions for Preliminary Injunction and to Strike

Because the Plaintiffs' claims against Apple are dismissed with prejudice, Plaintiffs pending motions for preliminary injunction are denied as moot. Docket Nos. 20, 52.

The Court denies Plaintiffs' motion to strike Apple's motion to dismiss, Docket No. 51. There is no basis for a party to strike a motion. *See* 5C Wright & Miller, Fed. Prac. & Proc. Civ. § 1380 (3d ed.) ("*Rule 12(f)* motions [to strike] only may be directed towards pleadings as defined by *Rule 7(a)*; thus motions, affidavits, briefs, and other documents outside of the pleadings are not subject to *Rule 12(f)*.").

2. Plaintiffs' Motion to Append Claim

Plaintiffs' second motion for preliminary injunction additionally asserts that Plaintiffs are authorized to append an "addendum [] two-pages in length that succinctly raises" a new claim (Claim 12) under California' Unfair Competition Law, and proceeds to assume that "the operative complaint" is now "the FAC + UCL Addendum." Docket No. 51 at 3. The Court need not consider Plaintiffs' procedurally improper attempt to amend their complaint. This addendum is a nullity because Plaintiffs did not notice a motion **[*58]** for such relief, much less complied with the Court's procedures for doing so. *See Hocking v. City of Roseville, 2007 U.S. Dist. LEXIS 81540, 2007 WL 3240300, at *5 (E.D. Cal. Nov. 2, 2007)* ("Because this request was not submitted by properly noticed motion, it is not presently before the court and the court therefore declines to address it at this time."); *see also N.D. Cal. L.R. 7-1* & *10* (explaining the rules for moving for leave to amend a complaint). The Court denies the request to append a claim to the FAC on this procedural grounds.

Even if the Court were to consider Plaintiffs' request on the merits, it would deny the motion. Plaintiffs' proposed UCL claim draws from an article published in Politico describing Apple's lobbying efforts in state legislature, which Plaintiff's characterize as allegedly "expos[ing] a quid pro quo to rescind Apple's $25 million donation to an historically black college (HBCU) in Georgia, alleged to be the most disgraceful scandal in Apple's forty-year history." Docket No. 53 ("UCL Claim") ¶ 3. Plaintiffs claim that this allegation presents additional predicate acts for their RICO claim (Count 10), that the RICO enterprise should be amended to include the lobbyists and law firms mentioned in the article, and that they bring a UCL claim under the "unfair" prong derived from **[*59]** the RICO claim. *Id.* ¶ 5. Notably, the Politico article they reference was published on August 20, 2021, which was 17 days *before* Plaintiffs filed their FAC. There was no superseding development warranting the amendment. Moreover, this conduct has nothing to do with Plaintiffs. Plaintiffs do not include allegations about how they were injured by the actions described in the article, and, thus, it is not apparent that the Plaintiffs have standing to pursue this claim. *Lujan v. Defs. of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)* ("[T]he irreducible constitutional minimum of standing contains three elements. First, the plaintiff must have suffered an 'injury in fact'").

Furthermore, the attempted amendment is problematic because Apple's *First Amendment*-protected lobbying activity cannot form the basis for antitrust liability, RICO and UCL liability under the *Noerr-Pennington* doctrine. *See Kottle v. Nw. Kidney Centers, 146 F.3d 1056, 1059 (9th Cir. 1998)* ("This circuit has clarified that the *Noerr-Pennington* doctrine is not merely a narrow interpretation of the *Sherman Act* in order to avoid a statutory clash with *First Amendment* values . . . rather, the doctrine is a direct application of the *Petition Clause*, and we have used it to set aside antitrust actions premised on state law, as well as those based on federal law."); *Sosa v. DIRECTV, Inc., 437 F.3d 923, 929 (9th Cir. 2006)* (extending *Noerr-Pennington* to RICO); *Multimedia Patent Tr. v. LG Elecs., Inc., 2013 U.S. Dist. LEXIS 156686, 2013 WL 12073800, at *3 (S.D. Cal. Aug. 1, 2013)* (same **[*60]** for UCL). Plaintiffs' asserted allegations appear meritless and it would likely be futile for them to attempt to cure this deficiency.

Thus, on procedural grounds and on the merits, the Court denies Plaintiffs' attempt to add another claim to their complaint under the UCL. Docket No. 52.

3. Plaintiffs' Notices for Discovery and Apple's Motion to Quash

On October 25, 2021, Plaintiffs filed a notice informing the Court of recently submitted petitions for cert. requesting that the U.S. Supreme Court "invoke original jurisdiction and assign a special master to ensure" that proceedings involving antitrust claims against Apple, including this case, "are not contaminated by Gibson Dunn's [counsel for Apple] political retaliation against Dr. Isaacs," a party to this case. Docket No. 65. The information Plaintiffs bring to the Court's attention in the notice is not relevant this case and the Court takes no action on the notice.

Plaintiffs appear to refer to a case in which Isaacs alleged a RICO claim against Gibson, Dunn & Crutcher LLP but not any individual lawyers. Plaintiffs do not allege that any attorneys are Apple's attorneys of record in this case. That case was dismissed—with fees awarded **[*61]** to the defendants—and all appeals are exhausted. *See Isaacs* *v. USC Keck Sch. of Med., 853 F. App'x 114, 117-18 (9th Cir. 2021)*; *Isaacs v. USC Keck Sch. of Med.*, No. 19-8000 DSF, Dkt. 112 (C.D. Cal. May 15, 2020).

Apple's counsel filed a declaration stating, "We are aware of no reasonable basis for Plaintiffs' assertion that counsel for Apple in this case (or, for that matter, any attorney of Gibson, Dunn & Crutcher LLP) would be a witness in this litigation. To the extent that Plaintiffs have asserted that Gibson, Dunn & Crutcher LLP as an entity may be a witness, we are aware of no reasonable basis for that statement either. Nor are we aware of any reasonable basis for Plaintiffs' assertion that counsel for Apple have a conflict of interest or are subject to disqualification for any reason. Gibson Dunn has been retained by Apple to represent the company in this litigation, and we will continue to do so." Docket No. 63 ¶¶ 2-3.

Plaintiffs also filed notices pursuant to *California Code of Civil Procedure § 1987* purporting to require Apple executives and Lina Khan, Chair of the Federal Trade Commission, to appear for live examination at the hearing on November 4, 2021. Docket Nos. 66-68. Those state civil procedure notices have no effect in federal court and were improper. *See* *Castillo-Antonio v. Hernandez, 2019 U.S. Dist. LEXIS 108962, 2019 WL 2716289, at *3 (N.D. Cal. June 28, 2019)*. Plaintiffs did not seek nor obtain leave to present live testimony at the upcoming November 4 motions **[*62]** hearing, and in any event, no live testimony is needed. *See* *N.D. Cal. L.R. 7-6* ("No oral testimony will be received in connection with any motion, unless otherwise ordered by the assigned Judge."). Furthermore, the hearing has passed - any issues that were raised by the notices are now moot.

Finally, Apple moved to quash Plaintiffs' subpoena requests. Docket No. 74. However, now that the Court has dismissed all of Plaintiffs' claims against Apple with prejudice, there is no basis for Plaintiffs' subpoena requests. Thus, Apple's motion to quash is also denied as moot.

V. CONCLUSION

For the foregoing reasons, the Court **GRANTS** Apple's motion to dismiss all of Plaintiffs' claims against Apple. Docket No. 45. The Court **DENIES AS MOOT** Plaintiffs' pending motions for preliminary injunction, to strike and to append claim, as well as Apple's motion to quash. Docket Nos. 20, 51, 52, 74.

This order disposes of Docket Nos. 20, 45, 51, 52, and 74. The Clerk is instructed to enter Judgment and close the case.

IT IS SO ORDERED.

EDWARD M. CHEN

United States District Judge

JUDGMENT

On November 30, 2021, the Court issued its Order Granting Defendant's Motion to Dismiss, and Denying Plaintiffs' **[*63]** Motions for Preliminary Injunction, to Strike, and to Append Claim. Pursuant to *Federal Rule of Civil Procedure 58*, the Court hereby **ENTERS** judgment in favor of Defendant. The Clerk of Court shall close the file in this matter.

IT IS SO ORDERED.

Judges: Honorable Thomas M. Durkin, United States District Judge.

Opinion by: Thomas M. Durkin

Opinion

MEMORANDUM OPINION AND ORDER

In this lawsuit alleging a price-fixing conspiracy in the chicken industry against more than 20 defendants, **[*44]** the Court appointed interim counsel to represent a putative class of direct-purchaser plaintiffs (the "DPPs" and their "Appointed Counsel"). *See* R. 144.[1] The Court approved settlements Appointed Counsel negotiated with six defendant corporate families, totaling $170,261,600.00, while the case continues to proceed against the remaining defendants.[2] Appointed Counsel have now moved for: an interim fee award; reimbursement of litigation expenses;

---

[1] The Court appointed Lockridge Grindal Nauen P.L.L.P. and Pearson, Simon & Warshaw, LLP as Interim Co-Lead Counsel, and Hart, McLaughlin & Eldridge, LLC as Interim Liaison Counsel.

and incentive awards to the five named class representatives. R. 4550. That motion is granted in accordance with this order.

Background

Without the benefit of a prior government investigation to guide them, Appointed Counsel filed the first complaint in this case in September 2016. Since then, the Court has appointed counsel for two additional classes and more than 100 entities have opted out of the classes to file their own direct actions. The more than 20 defendants are represented by some of the most prominent law firms in the country.

Appointed Counsel successfully defended the case against a significant motion to dismiss. They have shepherded the case through extensive discovery, as is recounted in the declaration supporting their motion, *see* ***[*45]*** R. 4552, and is reflected in the more than 5,000 docket entries that make up the case, including 16 scheduling orders. Appointed Counsel have briefed numerous motions, including a motion for class certification that is currently pending.

Appointed Counsel have been assisted by 20 other firms. Appointed Counsel and the assisting firms have submitted their hours for the Court's review on a quarterly basis. Their collective lodestar is 100,608.25 hours representing $50,928.159.75 in fees. *See* R. 4552 ¶ 24.

Appointed Counsel seek a fee award of one-third of the settlement total of $170,261,600.00, or $56,753,866.00. They also seek payment of $4.5 million of the $5,104,566.48 in litigation expenses they have incurred. And they seek a $25,000 incentive award for each of the five named plaintiffs.[3]

Analysis

It is customary for class counsel in large and complex cases to seek an interim fee award. *See*, *e.g.*, *Kleen Prod. LLC v. Int'l Paper Co., 2017 U.S. Dist. LEXIS 183015, 2017 WL 5247928, at *4 (N.D. Ill. Oct. 17, 2017)*; *see also* *In re Endotronics, Inc., 1989 U.S. Dist. LEXIS 1141, 1989 WL 6746, at *1 (D. Minn. Jan. 30, 1989)* ("Untoward delay could discourage [class counsel] from engaging in matters such as these. The Court, therefore, must have discretion to award interim fees and costs."). The "starting point" for determining such an award is the "market rate" for such services. *In re Synthroid Mktg. Litig., 264 F.3d 712, 719 (7th Cir. 2001)*; *see also* *Silverman v. Motorola Sols., Inc., 739 F.3d 956, 957 (7th Cir. 2013)* ("[A]ttorneys' **[*46]** fees in class actions should approximate the market rate that prevails between willing buyers and willing sellers of legal services."); *Williams v. Rohm & Haas Pension Plan, 658 F.3d 629, 635 (7th Cir. 2011)* ("[T]he district court must try to assign fees that mimic a hypothetical *ex ante* bargain between the class and its attorneys."). Estimation of the market rate "is inherently conjectural," *In re Trans Union Corp. Priv. Litig., 629 F.3d 741, 744 (7th Cir. 2011)*, because "there is no market in class cases." Brian T. Fitzpatrick, *A Fiduciary Judge's Guide to Awarding Fees in Class Actions*, *89 Fordham L. Rev. 1151, 1155 (2021)*. But the Seventh Circuit has explained that the goal of approximating the market rate can be "informed by a number of factors, including: (1) the actual agreements between the parties as well as fee agreements reached by sophisticated entities in the market for legal services; (2) the risk of non-payment at the outset of the case; (3) the caliber of Class Counsel's performance; and [4] information from other cases, including fees awarded in comparable cases." *Hale v. State Farm Mut. Auto. Ins. Co., 2018 U.S. Dist. LEXIS 210368, 2018 WL 6606079, at *8 (S.D. Ill. Dec. 16, 2018)* (citing *Synthroid, 264 F.3d at 719*)).

---

[2] This Court granted final approval to settlements with: Fieldale Farms Corporation on November 16, 2018, R. 1414; Amick Farms LLC on October 26, 2020, R. 3934; George's Inc., George's Farms, Inc. and Peco Foods, Inc. on October 27, 2020, R. 3944; and Pilgrim's Pride Corp., Tyson Foods, Inc., Tyson Chicken, Inc., Tyson Breeders, Inc., and Tyson Poultry, Inc. on June 29, 2021, R. 4789.

[3] The named plaintiffs are: Maplevale Farms, Inc.; John Gross and Company, Inc.; Ferraro Foods, Inc. and Ferraro Foods of North Carolina, LLC; Joe Christiana Food Distributors, Inc.; and Cedar Farms Co., Inc. *See* R. 4552 ¶ 36.

A. Actual Agreements

Appointed Counsel in this case do not have a fee agreement with the named plaintiffs other than that they would take a percentage of any award. *See* R. 5048-1 ¶ 11, Fitzpatrick Decl. ("According to [Appointed Counsel], the representative class members **[*47]** signed retainer agreements that did not specify a fee percentage; they specified only that any fees would be awarded by the Court.").[4] However, 2,808 claims have been filed by potential class member entities in the class, the majority of whom are sophisticated business entities. *See id.*, Fitzpatrick Decl. ("In light of the sophistication of the class members, all of whom are businesses and some of whom are quite large, the conclusion that can be drawn from their decision not to object is that they favor the flat fee proposed by DPPs—not a sliding-scale fee."). None of them have objected to the fee award request. Courts have found that the lack of opposition by sophisticated business entities is evidence that the award is reasonable. *See* Silverman, 739 F.3d at 959 (holding that for large, sophisticated investors, it would be "worth a complaint to the district judge if the lawyers' cut seems too high. Yet none of the institutional investors has protested."); *In re Dairy Farmers of Am., Inc., 80 F. Supp. 3d 838, 847 (N.D. Ill. 2015)* (observing, in finding that the requested one-third fee award was reasonable, that "the plaintiffs here are sizable, sophisticated entities capable of reviewing (and objecting to) the proposed fee arrangement"),

No other actual agreements have been presented **[*48]** to the Court. There is, however, case law describing court-ordered auctions in which potential class counsel bid for appointment. *See* *In re Cap. One Tel. Consumer Prot. Act Litig., 80 F. Supp. 3d 781, 800 (N.D. Ill. 2015)* (collecting cases, including *In re Amino Acid Lysine Antitrust Litig., 918 F. Supp. 1190 (N.D. Ill. 1996)*). The courts in *In re Amino Acid* and the other cases collected by *In re Capital One* sought fee award structure bids from attorneys hoping to represent the classes in those cases. The courts in those cases chose counsel who submitted declining fee scale award structures. (In other words, counsel proposed that their fee percentage decrease as the settlement amount increased.) These cases are relatively outdated, none being less than 20 years old. *See* R. 5048-1 ¶ 8, Fitzpatrick Decl. (court "experimentation with auctions has all but ceased"). But the Court is also aware that counsel for the End-User Plaintiff Class in this case bid a declining fee scale in other cases within the last ten years. *See* R. 5182 (citing *In re Lithium Ion Batteries Antitrust Litig.*, Case No. 13-MD-2420-YGR (N.D. Cal), Dkt. 2630-2; *In re Optical Disk Drive Prods. Antitrust Litig.*, Case No. 10-MD-2134-VRW (N.D. Cal) Dkt. 2900, reported in *In re Optical Disk Drive Antitrust Litig., 959 F.3d 922, 934 (9th Cir. 2020)*).

The Court does not put much stock in these examples. First, no other attorneys bid to be appointed counsel for **[*49]** the DPPs in this case. Without competition, a bid auction was not feasible. And without competition, no attorney would offer to take a case under a declining fee scale award structure.

Furthermore, the Seventh Circuit has explained that declining fee scale award structures do not reflect market realities and impose a perverse incentive "ensuring that at some point attorneys' opportunity cost will exceed the benefits of pushing for a larger recovery, even though extra work could benefit the client." Synthroid, 264 F.3d at 721; *see also* Silverman, 739 F.3d at 957 ("[S]olvent litigants do not select their own lawyers by holding auctions, because auctions do not work well unless a standard unit of quality can be defined and its delivery verified. There is no 'standard quantity' of legal services, and verification is difficult if not impossible."). "Subsequent cases within the Seventh Circuit have similarly recognized that the auction concept is flawed[.]" R. 5050-1 at 17 n.15, Klonoff Decl. Of course, when confronted with a court ordered competitive auction that permits declining scale bids, some attorneys will likely make such a bid in order to win the auction. But for the reasons expressed by the Seventh

[4] Appointed Counsel submitted a declaration from Brian Fitzpatrick, who is a professor at Vanderbilt University Law School and has studied and written about class action litigation. *See* R. 5048-1. In addition to requesting further briefing from Appointed Counsel, the Court invited briefs from counsel for the other two putative classes in the case. The Commercial and Institutional Indirect Purchaser Class submitted a declaration by Robert Klonoff, who is a professor at Lewis & Clark Law School, and who has also studied and written about class action litigation. *See* R. 5050-1. The Court found both declarations very helpful and has relied on them in preparing this opinion and order.

Circuit, the Court questions whether **[*50]** it is appropriate to permit declining scale bids in an auction. Thus, cases with auctions that permitted such bids carry little weight in the Court's consideration here.

B. Risk of Non-Payment & Caliber of Class Counsel's Performance

A declining scale fee award structure might be appropriate in cases in which settlement is a more likely outcome and in which the "marginal costs" of increasing the settlement recovery amount are low. *See* Silverman, 739 F.3d at 959. As Professor Fitzpatrick surmised, this "may explain the use of [declining scale fee award structures] in the two [Telephone Consumer Protection Act] cases" the Court asked the parties to address. *See* R. 5048-1 at 17 n.6, Fitzpatrick Decl.

The Court ordered the parties to address the use of declining sliding scale fee award structures in Gehrich v. Chase Bank USA, N.A., 316 F.R.D. 215, 236 (N.D. Ill. 2016), and In re Cap. One Tel. Consumer Prot. Act Litig., 80 F. Supp. 3d 781, 805 (N.D. Ill. 2015). *See* R. 4915. Unlike those cases in which "settlement was likely," Gehrich, 316 F.R.D. at 230, settlement in a complex antitrust case like this is far from a foregone conclusion. *See* R. 505-1 ¶ 37, Klonoff Decl. ("In terms of risk and complexity, TCPA cases are the polar opposite of the present case, a complicated multi-party antitrust conspiracy case.").[5] Appointed Counsel invested massive resources of time and money when no other counsel expressed interest, with little **[*51]** assurance of success. *See* Silverman, 739 F.3d at 958 ("When this suit got under way, no other law firm was willing to serve as lead counsel. Lack of competition not only implies a higher fee but also suggests that most members of the securities bar saw this litigation as too risky for their practices."). As noted, no government investigation preceded the complaint in this case for Appointed Counsel to piggy-back. And Plaintiffs have been opposed by many defendants, including a number of very large and well-funded corporations, which have retained some of the most prominent and sophisticated law firms in the United States. The Court's 92-page decision denying the motions to dismiss was a relatively close call. Discovery proceeded while the motions to dismiss were briefed and decided, so Appointed Counsel was immediately incurring costs of time and money without any assurance of an award. Furthermore, issues raised in the motions to dismiss show that success on class certification and summary judgment, let alone trial, is no guarantee.

Appointed Counsel have devoted thousands of hours to this case. Their performance to date has been exemplary. The road to some of the settlements was eventually smoothed by later **[*52]** criminal indictments. But Appointed Counsel's work appears to have prompted the government investigations that led to those indictments, rather than the reverse. A substantial award is warranted here as a proper incentive for high quality counsel to take on complex cases, requiring a massive investment of time and money, with such a high risk of non-payment.

C. Fee Awards in Comparable Cases

The Seventh Circuit has recognized that academic studies of attorney fees awards in common fund class settlement cases reveal a declining percentage with the size of the settlement. *See* Silverman, 739 F.3d at 959. But as Professor Fitzpatrick noted, "these findings are based on fee awards from other Circuits . . . that are not even trying to capture how clients pay lawyers in the market like the Seventh Circuit does." R. 5048-1 at 20 n.7, Fitzpatrick Decl. These decisions are infected by default rules recommending smaller attorney fee award percentages for "megafunds." *See*, *e.g.*, Wal-Mart Stores, Inc. v. Visa U.S.A., Inc., 396 F.3d 96, 123 (2d Cir. 2005) (affirming a 6.5 percent fee award from a common fund over $3 billion, reasoning that "the sheer size of the instant fund makes a smaller percentage appropriate"); Dial Corp. v. News Corp., 317 F.R.D. 426 (S.D.N.Y. 2016) ("[I]n class actions where the recovered settlement fund runs into the multi-millions, **[*53]** courts typically decrease the percentage of the fees amount as the size of the fund increases."). The Seventh Circuit has expressly rejected a megafund rule because it is a perverse incentive. *See* Synthroid, 264 F.3d at 718 (reversing district court's fee

---

[5] Moreover, research by both Professors Fitzpatrick and Klonoff shows that the use of declining sliding scale fee awards in the Seventh Circuit is rare. *See* R. 5048-1 at 13 n.5, Fitzpatrick Decl.; R. 5050-1 at 26-31, Klonoff Decl.

award in part because it imposed a lower fee percentage because the settlement fund was more than $100 million, holding that "[m]arkets would not tolerate that effect"). Clients generally want to incentivize their counsel to pursue every last settlement dollar, and a declining percentage award operates to the contrary. Thus, to the extent that courts in other circuits have awarded percentages smaller than what Appointed Counsel seek here, the Court finds those awards relatively unpersuasive.

Most persuasive are the large number of antitrust cases in this circuit that have awarded one-third of the common fund as attorney's fees. *See* R. 5050-1 at 45-46 (table citing cases), Klonoff Decl. The fact that fee awards in antitrust cases in this circuit are almost always one-third is a strong indication that this should be considered the "market rate." *See* R. 5048-1 ¶ 14, Fitzpatrick Decl. (in "a series of antitrust class actions . . . . recover[ing] more than $2 billion **[*54]** . . . . *not a single class member ever objected* to the fee request in any of these cases" showing that "sophisticated corporations are happy to play flat fees of 33.33% and they are happy to do so even in the largest cases."). There is simply little to no precedent recommending anything other than an award of 33 percent. With the only real evidence of the "market rate" being one-third, that is what the Court will award.

D. Expenses

Appointed Counsel seek $4.5 million out of $5,104,566.48 in expenses. Appointed Counsel "informed the class" that they would not seek to recover the full amount of their expenses at this time. *See* R. 4551 at 2 n.7. The request for $4.5 million in expenses is granted.

Expenses, however, should be deducted from the common fund before the fee award percentage is applied. The "ratio that is relevant to assessing the reasonableness of the attorneys' fee that the parties agreed to is the ratio of (1) the fee to (2) the fee plus what the class members received." *Redman v. RadioShack, 768 F.3d 622, 630 (7th Cir. 2014)*. Out-of-pocket costs, although paid through the settlement fund, are not benefits to the class and thus not part of "what the class members received." *Id.*; *see also* *In re Wells Fargo Sec. Litig., 157 F.R.D. 467, 471 (N.D. Cal. 1994)* ("If an attorney risks losing some portion **[*55]** of his fee award for each additional dollar in expenses he incurs, the attorney is sure to minimize expenses."). Therefore, Appointed Counsel will be paid fees of one-third of the settlement fund minus $4.5 million in expenses.

E. Named Plaintiff Incentive Awards

"Because a named plaintiff is an essential ingredient of any class action, an incentive award is appropriate if it is necessary to induce an individual to participate in the suit." *Cook v. Niedert, 142 F.3d 1004, 1016 (7th Cir. 1998)*. "To determine if an incentive award is warranted, a district court evaluates the actions the plaintiff has taken to protect the interests of the class, the degree to which the class has benefitted from those actions, and the amount of time and effort the plaintiff expended in pursuing the litigation." *Camp Drug Store, Inc. v. Cochran Wholesale Pharm., Inc., 897 F.3d 825, 834 (7th Cir. 2018)* (citing *Cook, 142 F.3d at 1016*). Incentive awards based on a percentage of the settlement fund "are disfavored, if not altogether forbidden." *See* William B. Rubenstein, 5 Newberg on Class Actions § 17:16 (5th ed. 2018); *see also* *In Re EpiPen Mktg., Sales Pracs. & Antitrust Litig., 2018 U.S. Dist. LEXIS 195455, 2021 WL 5369798, at *7 (D. Kan. Nov. 17, 2021)*.

The declarations submitted in support of incentive awards give no indication of the number of hours the named plaintiffs have spent on the case. Appointed Counsel relies on *Cook v. Niedert* in which the Seventh Circuit affirmed an incentive award of $25,000 per **[*56]** named plaintiff. *See* R. 4551 at 21 (citing *142 F.3d at 1016*). But in *Cook* the named plaintiff was an individual who "reasonably feared workplace retaliation" by "filing the suit." *Id. at 1016*. No such risk is present here, and the named plaintiffs are business entities, not individual people. Presumably, businesses serving as named plaintiffs for the DPP class believe that the chance of collecting from this lawsuit was worth the cost of participating in it. Litigation is convenient for no one. But business entities are in a much better position to devote time to a lawsuit and delegate the burdens among their officers and employees than a person who must bear the entire burden individually.

"Empirical evidence shows that incentive awards are now paid in most class suits and average between $10-$15,000 per class representative." *See* William B. Rubenstein, 5 Newberg on Class Actions § 17:1 (5th ed. 2018). Appointed Counsel cite one antitrust case from this district which awarded $15,000 to named plaintiffs from a $90 million settlement. *See In re Potash Antitrust Litig.*, No. 1:08-cv-06910 (ECF No. 589) (N.D. Ill. June 12, 2013). Without specific hour totals indicating a higher award is appropriate, and without evidence **[*57]** that the role of class representative imposed anything other than a professional (as opposed to a personal) burden, the Court will not ignore what appears to be a customary maximum of a $15,000 incentive award.

Conclusion

Therefore, Appointed Counsel's motion [4550] is granted as follows: (1) expenses are awarded in the amount of $4.5 million; (2) incentive awards in the amount of $15,000 are awarded to each of the five class representatives; and (3) fees are awarded in the amount of $55,228,866.70, which is one third of the settlement fund after deducting the expenses and incentive awards.

OPINION AND ORDER GRANTING ADIENT AND LEAR'S MOTION TO DISMISS (ECF NO. 21) AND GRANTING VOLKSWAGEN AND BRANDSTÄTTER'S MOTION TO DISMISS (ECF NO. 35)

I. Introduction

Plaintiff Prevent DEV **[*2]** GmbH ("Prevent") filed this antitrust action against Defendants Adient PLC ("Adient"); Lear Corporation ("Lear"); Volkswagen, AG ("Volkswagen"); and Ralf Brandstätter ("Brandstätter") for an alleged boycott. ECF No. 1. Specifically, Prevent alleges Defendants have unlawfully conspired to exclude it from the automotive seat cover market in violation of the Sherman Act and the Michigan Antitrust Reform Act. *Id.* Plaintiff also brings claims for tortious interference and civil conspiracy. *Id.* Prevent thus seeks damages and injunctive relief under *Sections 15* and *16 of the Clayton Act*, *15 U.S.C. §§ 15*, *26*.

Presently before the Court are Adient and Lear's Motion to Dismiss, filed on January 25, 2021, and Volkswagen and Brandstätter's Motion to Dismiss, filed on March 10, 2021. ECF Nos. 21, 35. The matters are fully briefed, and a hearing was held on September 21, 2021. On November 9, 2021, Volkswagen and Brandstätter filed a notice informing the court of a decision by the United States Court of Appeals for the Sixth Circuit Court in a related case, *Prevent USA Corp. v. Volkswagen AG, No. 21-1379, 17 F.4th 653, 2021 U.S. App. LEXIS 33234, 2021 WL 5176952 (6th Cir. Nov. 8, 2021)*, and Prevent filed a response the next day. ECF Nos. 48, 49. For the following reasons, the Court **GRANTS** Adient and Lear's Motion to Dismiss [#21] and **GRANTS** Volkswagen and Brandstätter's **[*3]** Motion to Dismiss [#35].

II. Background

A. Factual Background

The automotive seating market consists of a three-tiered supply chain. ECF No. 1, PageID.17. Specifically, it consists of Tier 3 suppliers, which sell raw or nearly raw materials like metal, plastic, textiles, and leather; Tier 2 suppliers, which make component parts; and Tier 1 suppliers, which incorporate the Tier 2 components into complete seats that they then sell to large carmakers, or Original Equipment Manufacturers ("OEMs"). *Id.* at PageID.16-19.

Prevent "is a corporation organized and existing under the laws of Germany with its principal place of business in Wolfsburg, Germany." *Id.* at PageID.13. "Plaintiff's business includes operating as a 'Tier 2' supplier of seat covers, typically supplying seat covers to the Tier 1 suppliers." *Id.* at PageID.4.

Defendant Adient "is a corporation organized and existing under the laws of Ireland, with its principal place of business in Plymouth, Michigan," while Defendant Lear "is a corporation organized and existing under the laws of Delaware with its principal place of business in Southfield, Michigan." *Id.* at PageID.13-14. Defendants Adient and Lear are "Tier 1" suppliers, which **[*4]** "supply full automotive seats directly to carmakers like Volkswagen, General Motors, and Daimler." *Id.* Adient and Lear also operate as Tier 2 suppliers, *id.* at PageID.25-26, and thus compete against Prevent in the automotive seat covers market.

Defendant Volkswagen is "a corporation organized and existing under the laws of Germany with its principal place of business in Wolfsburg, Germany." *Id.* at PageID.15. Volkswagen is an OEM and "the largest manufacturer of passenger vehicles in the world by sales volume." *Id.* Defendant Brandstätter is domiciled in or near Wolfsburg, Germany. *Id.* He has been the Chief Executive Officer of Volkswagen since June 2020 and was the Chief Operating Officer from August 2018 until then. *Id.*

Plaintiff alleges that, in 2016, Prevent Group, with which Plaintiff is associated, became embroiled in a global dispute with Defendant Volkswagen over a supply stoppage. *Id.* at PageID.29. "In response, Volkswagen launched 'Project 1,' a highly organized campaign to 'demolish' Plaintiff and the Prevent Group and to exclude them systematically from the market." *Id.* at PageID.4. Allegedly, led by Brandstätter, *id.* at PageID.30-31, Volkswagen approached all four major Tier **[*5]** 1 automotive seat suppliers with an agreement to boycott Prevent from their business across all OEMs in exchange for guaranteed future contracts with Volkswagen, *id.* at PageID.34-35. Only

Adient and Lear, which allegedly controlled 56% and 22% of the global automotive seat market in 2017 respectively, *id.* at PageID.24-25, agreed to engage in the scheme.[1] *Id.* at 35.

Plaintiff contends Volkswagen proposed this agreement despite it being "against Volkswagen's rational economic interest" since Prevent "was the cheapest, most efficient competitor." *Id.* at PageID.34. And, in 2018, Adient and Lear "abruptly" cut ties with Prevent and stopped sending Requests for Quotes ("RFQ") for potential new business. *Id.* at PageID.37.

Prevent alleges it learned about the boycott because in 2017, it "received an anonymous letter and internal Volkswagen documents[] . . . from a person claiming to have first-hand information about Volkswagen's Project 1 strategy to destroy Plaintiff and the Prevent Group." *Id.* at PageID.6. Representatives of the Prevent Group subsequently notified German authorities and the Volkswagen Board. *Id.* at PageID.6-7.

Additionally, a member of the Project 1 team provided *Business Insider* ***[*6]*** information and over fifty hours of audio recordings of more than thirty Project 1 meetings from 2017 to 2018. *Id.* at PageID.6. *Business Insider* began reporting on Project 1 in July 2020, including "the Project 1 group discussing how to redirect Plaintiff's business to Adient." *Id.* at PageID.7. After an internal investigation, Volkswagen identified the source as a manager named Christian Minkley. *Id.* He has since died in "unusual" circumstances, but he left notes indicating his manager directed him to record the Project 1 meetings. *Id.* at PageID.7-8.

Plaintiff also claims its allegations are based on "information from other suppliers[] and other sources with direct evidence of these facts." *Id.* at PageID.8.

B. Procedural Background

Since 2016, the Prevent Group, Volkswagen, and their affiliates have been engaged in extensive litigation related to Project 1 in German courts. ECF No. 21-3, PageID.779. These disputes are ongoing, ECF No. 21, PadeID.147, and discussed in further detail *infra* at III.A.4. Then, in November 2019, two Prevent Group affiliates brought the Project 1 dispute to this district. *See Prevent USA Corp. et al. v. Volkswagen AG*, 19-cv-13400-BAF-EAS. This case was ultimately **[*7]** dismissed on *forum non conveniens* grounds, *Prevent USA Corp. v. Volkswagen AG, No. 19-CV-13400, 2021 U.S. Dist. LEXIS 53216, 2021 WL 1087661, at *17 (E.D. Mich. Mar. 22, 2021)*, which the United States Court of Appeals for the Sixth Circuit affirmed, *Prevent USA, 2021 U.S. App. LEXIS 33234, 2021 WL 5176952, at *7*. As with the litigation in Germany, this lawsuit is discussed in greater detail at III.A.4 *infra*.

Prevent filed the instant action on November 30, 2020. Prevent is suing all four Defendants for an unlawful agreement in restraint of trade in violation of the *Sherman Act § 1* (Claim 1) and Michigan ***Antitrust Law***, *M.C.L. § 445.772* (Claim 4), as well as for civil conspiracy (Claim 8). Additionally, Prevent is bringing claims against Adient and Lear for monopsonization or attempted monopsonization in violation of the *Sherman Act § 2* (Claims 2 and 3) and Michigan ***Antitrust Law***, *M.C.L. § 445.773* (Claims 5 and 6). Finally, Prevent is bringing a tortious interference claim against Volkswagen and Brandstätter (Claim 7).

Adient and Lear filed a joint Motion to Dismiss on January 25, 2021. ECF No. 21. They aver (1) Prevent's claims under the *Sherman Act* are barred by the *Foreign Trade Antitrust Improvements Act of 1992 ("FTAIA")*, (2) the case is not properly in this district under the doctrine of *forum non conveniens*, (3) Prevent fails to state a *Sherman Act § 1* claim, (4) Prevent fails to state a *Sherman Act § 2* claim, (5) Prevent does not establish antitrust injury, and (6) the **[*8]** derivative state law claims should also be dismissed. Prevent filed a response on March 1, 2021, ECF No. 24, and Adient and Lear timely replied, ECF No. 37.

---

[1] The Court acknowledges Defendants Adient and Lear dispute the characterizations of their market share in 2017. Nevertheless, the Court declines to resolve this dispute because the market share did not ultimately play a role in the Court's analysis.

On March 10, 2021, Volkswagen and Brandstätter also filed a joint Motion to Dismiss. In it, they argue (1) the case is not properly in this district under the doctrine of *forum non conveniens*, (2) Prevent fails to plead personal jurisdiction as to either Defendant, (3) Prevent fails to state a *Sherman Act § 1* claim, and (4) the derivative state law claims should also be dismissed. Prevent filed its response on March 31, 2021, ECF No. 40, and Volkswagen and Brandstätter timely replied, ECF No. 41.

III. LAW & ANALYSIS

A. The Court Will Dismiss Prevent's Claims on the Basis of *Forum Non Conveniens*

As stated above, the defendants move for dismissal on several grounds; however, Defendants' *forum non conveniens* arguments are persuasive and dispositive as to all Defendants. For the following reasons, the Court concludes the case should be handled in Germany.

Under the doctrine of *forum non conveniens*, "a district court may decline to exercise its jurisdiction" if it would be more convenient to resolve the claims in another forum. *Hefferan v. Ethicon Endo-Surgery, Inc., 828 F.3d 488, 492 (6th Cir. 2016)*.

> When courts apply *forum* ***[*9]*** *non conveniens*, there are three considerations: (1) whether an adequate alternative forum is available; (2) whether a balance of private and public interests suggests that trial in the chosen forum would be unnecessarily burdensome for the defendant or the court; and (3) the amount of deference to give the plaintiff's choice of forum.

Jones v. IPX Int'l Equatorial Guinea, S.A., 920 F.3d 1085, 1090 (6th Cir. 2019). *Forum non conveniens* analysis is fact dependent. *Williams v. Green Bay & W.R. Co., 326 U.S. 549, 557, 66 S. Ct. 284, 90 L. Ed. 311 (1946)*. Moreover, it "does not turn on any one factor." *Wong v. PartyGaming Ltd., 589 F.3d 821, 831 (6th Cir. 2009)* (citing *Piper Aircraft Co. v. Reyno, 454 U.S. 235, 250, 102 S. Ct. 252, 70 L. Ed. 2d 419 (1981)*). "There is no requirement in *Piper* that the burden be 'oppressive,' though an oppressive burden would be sufficient." *Gering v. Fraunhofer-Gesellschaft e.V., No. 05-73458, 2009 U.S. Dist. LEXIS 81812, 2009 WL 2922847, at *3 (E.D. Mich. Sept. 9, 2009)* (quoting *Stewart v. Dow Chemical, 865 F.2d 103, 106 (6th Cir.1989)*).

1. The Doctrine of *Forum Non Conveniens* is applicable to Antitrust Cases

As a threshold matter, the Court briefly addresses Plaintiff's contention "that cases under the U.S. antitrust laws can *never* be dismissed in favor of a foreign court on grounds of *forum non conveniens*." ECF No. 24, PageID.707 (citing *Indus. Inv. Dev. Corp. v. Mitsui & Co., 671 F.2d 876, 890 (5th Cir. 1982)*, *vacated on other grounds*, *460 U.S. 1007, 103 S. Ct. 1244, 75 L. Ed. 2d 475 (1983)*; *Laker Airways Ltd. v. Pan Am. World Airways, 568 F. Supp. 811, 818 (D.D.C. 1983)*).

When the instant motion was briefed and argued, the United States Court of Appeals for the Sixth Circuit had not yet addressed this issue. However, since then—while deciding the related case *Prevent USA*—the Sixth Circuit rejected Plaintiff's position and held "nothing in [the special venue provision **[*10]** of the *Clayton Act*] indicates that the district court may not dismiss a case for refiling in a foreign country." *2021 U.S. App. LEXIS 33234, 2021 WL 5176952, at *6*. The Sixth Circuit thus upheld the district court's dismissal of the plaintiff's *Sherman Act* and state law claims on *forum non conveniens* grounds. *2021 U.S. App. LEXIS 33234, [WL] at *7*. Accordingly, the Court will proceed with the *forum non conveniens* analysis.

2. Germany is an Adequate Alternative Forum

There exists an adequate alternative forum when "the defendant is 'amenable to process' in the foreign jurisdiction." *Wong, 589 F.3d at 830* (quoting *Piper Aircraft Co., 454 U.S. at 255 n. 22*). The "alternative forum is inadequate if 'the remedy provided by [it] is so clearly inadequate or unsatisfactory that it is no remedy at all." *Id. at 831* (quoting *Piper Aircraft Co., 454 U.S. at 254*). There is no remedy at all when, "for example, the jurisdiction 'does not permit litigation of the subject matter of the dispute.'" *Hefferan, 828 F.3d at 494-95* (quoting *Piper Aircraft Co., 454 U.S. at 255 n. 22*). The remedy in the alternative forum does not need to be the same as would be provided by an American court. *Id. at 495* ("Law that is simply less favorable to the plaintiff in the alternative forum is not so extraordinary as to render that forum inadequate."). In particular, a forum is not "inadequate simply because of the likelihood of lesser damages." *Id.*; *see also* *Prevent USA, 2021 U.S. App. LEXIS 33234, 2021 WL 5176952, at *3* ("But the reality that the foreign venue makes it more **[*11]** difficult to establish the claim or that the foreign law is less generous to prevailing plaintiffs does not establish unavailability.").

Germany is an adequate alternative forum in which to litigate this dispute. First, Germany is available as an alternative forum. Defendant Volkswagen is a German corporation, and Defendant Brandstätter is a German resident, so both are amenable to process in that jurisdiction. Moreover, Defendants "Adient and Lear both have substantial operations in Germany and are willing to accept service there." ECF No. 21, PageID.157 (citing ECF Nos. 21-3, 21-4).

Prevent has expressed concerns that "consent to service does not mean that a German court will accept jurisdiction or otherwise agree to adjudicate the case." ECF No. 24, PageID.708. Prevent does not indicate why a German court would not accept jurisdiction over the case—especially given the ongoing litigation in Germany between the Prevent Group and Volkswagen over Project 1. Instead, Prevent relies on *Associação Brasileira de Medicina de Grupo v. Stryker Corp., 891 F.3d 615 (6th Cir. 2018)* to say that a defendant's willingness to accept service is irrelevant. ECF No. 24, PageID.708 (citing *Stryker, 891 F.3d at 621*). Prevent overstates the *Stryker* holding. In that record, there was no evidence the defendant had any connection **[*12]** to Brazil or that Brazilian courts permitted litigation over the subject matter at issue. *Stryker, 891 F.3d at 622*. Thus, the Sixth Circuit held the defendant's single statement in a brief that it consented to jurisdiction in Brazil was insufficient to show Brazil was an available and adequate forum.

That is the opposite of the situation in the present case. Prevent itself alleged that Adient and Lear have close and "significant" business relationships with Volkswagen, a German company, ECF No. 1, PageID.26-27, and that they engaged in this boycott to deepen those relationships. Given, Adient and Lear's regular contact with German commerce, there is evidence before the Court that Adient and Lear have connections with Germany sufficient to form the basis of jurisdiction.

Additionally, there is sufficient evidence that Germany permits litigation over the subject matter at issue. The Prevent Group has already brought claims in German courts based on Project 1, generally, and the termination of agreements to supply seat backrests, in particular. ECF No. 21, PageID.157 (citing ECF Nos. 21-3, 21-3-15). Moreover, a plaintiff asserting claims assigned to it by Prevent (and six other members of the Prevent Group) recently **[*13]** brought a case in Germany alleging antitrust claims against Volkswagen that include the abrupt termination of Prevent's seat cover contracts in March 2018. ECF No. 35-11, PageID.1609, PageID.1632-35, PageID.1669.

> [T]he fact that Prevent Group companies have filed several lawsuits against VWAG and its subsidiaries in German courts for unfair competition and antitrust violations arising from their alleged execution of Project 1 is powerful evidence that plaintiffs themselves recognize Germany as an available and adequate forum for the litigation of such disputes.

*Prevent USA, 2021 U.S. Dist. LEXIS 53216, 2021 WL 1087661, at *9* (citing *Faber-Plast GmbH v. Kleinert, 997 F. Supp. 846, 847 (E.D. Mich. 1998)*). To quell any lingering concerns, the Court will condition the *forum non* *conveniens* dismissal on Adient and Lear's consent to suit and acceptance of process in Germany. *See Stryker, 891 F.3d at 621* (citing *Dowling v. Richardson-Merrell, Inc., 727 F.2d 608, 611, 616 (6th Cir. 1984)*.[2]

Second, German courts would be able to provide an adequate remedy. Plaintiff's claims can be brought in Germany. Germany has antitrust laws which cover the exercise of monopoly/monopsony power and boycott. ECF No. 21, PageID.157 (citing ECF No. 21-5); *see also* ECF No. 35-11 (translation of antitrust lawsuit based on Project 1 filed by assignee of Plaintiff and six other Prevent Group companies against Volkswagen and other defendants). **[*14]**

Prevent contends that Germany is inadequate because "German ***antitrust law*** would apply 'only with respect to the effects of the Defendants' conduct on the German market, but not with respect to the effects of that conduct on the U.S. and other markets.'" ECF No. 24, PageID.709 (quoting ECF No. 25). However, in *Prevent USA*, the Sixth Circuit concluded a German-based antitrust lawsuit would likely reach more conduct and injuries than an American-based one. *Prevent USA, 2021 U.S. App. LEXIS 33234, 2021 WL 5176952, at *3*. In Germany, Prevent may also bring antitrust claims under European law and could thus include in its cause of action anticompetitive effects across the European Union. *Id.* In contrast, a *Sherman Act* claim cannot reach foreign conduct that produces only anticompetitive harm abroad. *Id.*

Indeed, the Court notes it is not at all clear Prevent has alleged domestic harm sufficient to bring a *Sherman Act* claim. The Complaint does not allege Volkswagen, Adient, or Lear ever bought, or refused to buy, seat covers from Prevent for import into the United States. Instead, Plaintiff alleges that from 2015 to 2017, Prevent sold seat covers to Adient for the Volkswagen Passat. ECF No. 1, PageID.28. Plaintiff also alleges Volkswagen assembles the Passat in Tennessee. *Id.* Notably, **[*15]** Plaintiff does not allege Adient exclusively used its seat covers in manufacturing seats for the Passat, Volkswagen exclusively used Adient's seats in assembling the Passat, or the Passat is exclusively manufactured in Tennessee. The Court is thus left to make these assumptions and infer that, at least between 2015 and 2017, Prevent's seat covers entered the United States. Prevent asks too much—especially because Adient and Lear raised this point in their Motion to Dismiss, *see* ECF No. 21, PageID.152, and Prevent did not address it. This cause of action consists of a German company initiating the boycott of another German company and goods that are not alleged to have been imported into the United States, a German court should have jurisdiction over the conduct at issue.

Equally unavailing is Prevent's argument that Germany is inadequate because "its courts are not empowered to award treble damages, compel meaningful party discovery, or compel any third-party discovery at all." ECF No. 24, PageID.709. Again, a forum is not "inadequate simply because of the likelihood of lesser damages." *Hefferan, 828 F.3d at 495*. As to the procedural differences between Germany's legal system and the American one, various courts, **[*16]** including the Sixth Circuit, have found that the German legal system is adequate. *See, e.g., id.* ("The differences in Germany's legal system do not reveal an alternative forum that provides a remedy 'so clearly inadequate or unsatisfactory' that it is 'no remedy at all.'") (quoting *Piper Aircraft, 454 U.S. at 254*); *Prevent USA, 2021 U.S. App. LEXIS 33234, 2021 WL 5176952, at *3* (holing Germany was an adequate forum to hear Prevent Group plaintiffs' antitrust case). Moreover, Plaintiff's assignee and other Prevent Group affiliates have already availed themselves of the German courts based on the same underlying conduct. *See Faber-Plast, 997 F. Supp. at 847* (finding Germany to be an adequate alternative forum in part because "the parties have engaged, and indeed continue to engage, in litigation in Germany, and a substantial part of the events giving rise to the instant suit occurred in Germany").

Accordingly, for the foregoing reasons, the Court concludes the Germany is an adequate alternative forum this lawsuit.

---

[2] *See also Solari v. Goodyear Tire & Rubber Co., 654 F. App'x 763, 766 (6th Cir. 2016)* ("Goodyear U.S. has repeatedly agreed to submit to French jurisdiction for the claims asserted in Plaintiffs' amended complaint. So unless Plaintiffs can show that France would decline jurisdiction or otherwise provides a "clearly unsatisfactory" remedy, Goodyear U.S. has shown an adequate alternative forum.")

3. The Balance of Public and Private Interests Favor Transfer

"If an adequate alternative forum is available, then courts examine whether the plaintiff's choice of forum is unnecessarily burdensome. *Zions First Nat. Bank v. Moto Diesel Mexicana, S.A. de C.V., 629 F.3d 520, 523 (6th Cir. 2010)*. To guide that analysis, courts look to the private and public interests that the Supreme Court listed **[*17]** in *Gulf Oil Corp. v. Gilbert, 330 U.S. 501, 67 S.Ct. 839, 91 L.Ed. 1055 (1947)*." *Jones, 920 F.3d at 1092*.

i. Private Interests

> In *Gulf Oil*, the Supreme Court announced a non-exhaustive list of private interests to consider, including, "the relative ease of access to sources of proof; availability of compulsory process for attendance of unwilling, and the cost of obtaining attendance of willing, witnesses; possibility of view of premises, if view would be appropriate to the action; and all other practical problems that make trial of a case easy, expeditious and inexpensive."

Jones, 920 F.3d at 1092 (quoting *Gulf Oil Corp., 330 U.S. at 508*). The Sixth Circuit has also considered whether "documents and witnesses will likely require translation to English." *Solari, 654 F. App'x at 768*; *see also* *Prevent USA, 2021 U.S. App. LEXIS 33234, 2021 WL 5176952, at *4*.

Here, the private interests strongly favor litigation in Germany. Prevent alleges Defendant Volkswagen, a German company, developed the idea for Project 1 and approached Defendants Adient and Lear with the boycott scheme to "demolish[] [Prevent] as a supplier of seat covers." ECF No. 1, PageID.5. It further alleges Defendant Brandstätter, a German resident, oversaw the planning and execution of Project 1 and gave detailed updates to Volkswagen's Board, including Chairman Herbert Diess, whom the Complaint specifically names. *Id.* at PageID.30. Diess and the other Board members will **[*18]** be key witnesses in the litigation. Despite their importance to the case, they would be outside of this Court's subpoena power.[3] *See* *Gering, 2009 U.S. Dist. LEXIS 81812, 2009 WL 2922847, at *4* (finding private interests favored dismissing the case to Germany because "[t]his Court does not have the authority to compel foreign witnesses to appear and testify in the Eastern District of Michigan, and the overwhelming majority (if not all) of the potential witnesses in this case are foreign witnesses").

Additionally, many of the exhibits submitted by all parties have been translated from German into English. *See, e.g.*, ECF No. 1-3. And most of the factual allegations in the Complaint are based on internal Project 1 documents that were originally written in German. *Id.* at PageID.30 n. 5 ("Quotes of written Volkswagen materials throughout the Complaint are unofficial translations from German."). It stands to reason that much of the evidence in this case will continue to be in German, which supports dismissing the case for litigation in Germany. *See* *Gering, 2009 U.S. Dist. LEXIS 81812, 2009 WL 2922847, at *4* ("The fact that a jury in the Eastern District of Michigan will be comprised of English-speaking persons (presumably similarly lacking knowledge of the German language) likewise strongly **[*19]** disfavors trying this case in the Eastern District of Michigan.").

---

[3] Prevent argues that Adient and Lear, as domestic defendants, "bear the burden of identifying specific witnesses who would be unwilling to testify in this forum and establishing their relevance to the case." ECF No. 24, PageID.710-11 (citing *Hefferan, 828 F.3d at 498-99*). Prevent is correct that the *Hefferan* court held that the availability of compulsory process "receives less weight when it has not been alleged or shown that any witness would be unwilling to testify." *Id. at 499* (internal quotation marks omitted). Nevertheless, despite this lack of specificity, the Sixth Circuit affirmed the district court's dismissal of the Hefferans' case because "[r]elative ease of access to sources of proof and the availability of compulsory process for proceedings abroad support dismissal." Similarly, Adient and Lear's failure to specifically allege that certain foreign witnesses will not testify in the United States is not fatal to their *forum non conveniens* argument.

Prevent alleges "[e]mployees of Adient and Lear regularly met with C-suite level executives from Volkswagen in Michigan and discussed Project 1 initiatives and measures. ECF No. 1, PageID.35. Then, at the hearing, Prevent named specific employees it averred would be key witnesses and are domiciled in Michigan. Similarly, in its response to Volkswagen and Brandstätter's notice regarding *Prevent USA*, Prevent again argued the evidence of, and key witnesses to, the alleged conspiracy between Volkswagen and Adient and Lear is in Michigan. ECF No. 49, PageID.2878-79.

While some Adient and Lear employees may be key witnesses and may be based in Michigan, the Court concludes access to sources of proof would still be relatively easier in Germany. Adient and Lear have consented to litigating this matter in Germany and have agreed to make available in Germany any documents or personnel under their control in Michigan. ECF No. 21, PageID.159 n. 13 (citing ECF Nos. 21-4, 21-5). Furthermore, Brandstätter, who allegedly oversaw Project 1, participated in calls with Adient and Lear from Germany, so even those meetings have a German nexus. Additionally, **[*20]** the Volkswagen executives who met with Adient and Lear employees in Michigan are already available in Germany. While some of the evidence in this case may be in Michigan, "the bulk of the documents and records constituting necessary proof in the litigation are located in" Germany, *Barak v. Zeff, 289 F. App'x 907, 912 (6th Cir. 2008)*, and that which is not can be brought there. Accordingly, the Court finds the private interests favor litigating this case in Germany.

ii. Public Interests

> Looking again to *Gulf Oil*, the public interests we consider include the administrative difficulties of litigation in congested centers instead of the suit's place of origin, the burden of jury duty on citizens of communities with no relation to the case, the importance of trying the case in view and reach of others that may be affected, the local interest in having localized controversies decided at home, and the appropriateness of having trial at home with the law that governs the case.

Jones, 920 F.3d at 1093 (citing *Gulf Oil Corp., 330 U.S. at 508-09*). "To evaluate [the public interest] factors, the court must consider the locus of the alleged culpable conduct, often a disputed issue, and the connection of that conduct to the plaintiff's chosen forum." *Van Cauwenberghe v. Biard, 486 U.S. 517, 528, 108 S. Ct. 1945, 100 L. Ed. 2d 517 (1988)*.

Here, the public interest factors also favor litigation in Germany. **[*21]** The suit's place of origin is Germany. Plaintiff alleges Project 1 was developed in Germany. ECF No. 1, PageID.5. Plaintiff further alleges that as part of Project 1, Volkswagen "hatched" a conspiracy for a group boycott, in which it convinced Adient and Lear to participate. *Id.*; *see also id.* at PageID.32-33 (describing internal Volkswagen documents that allegedly detail the boycott plan). Yet, Prevent now asserts this is a Michigan-based conspiracy because the Complaint alleges Adient and Lear employees met with Volkswagen employees in Michigan. ECF No. 49, PageID.2878-79. However, that some of the actions related to the alleged conspiracy occurred in Michigan does not change the fact that the "locus of the alleged culpable conduct," *Biard, 486 U.S. at 528*, is Germany, where Project 1 and this boycott were formulated and managed.

That the cause of action is German in nature is evidenced by the fact that Plaintiff's assignee is currently litigating the termination of these contracts in Germany. *See* ECF No. 35-11. Additionally, as discussed *infra* at III.A.4, there are already several related cases in Germany between Prevent Group affiliates and Volkswagen arising from the 2016 supply stoppage and Project **[*22]** 1 schemes. "The importance of trying the case in view and reach of others that may be affected, [and] the local interest in having localized controversies decided at home" weigh in favor of litigating this dispute in Germany among its brethren. Judicial economy favors removing the case to Germany as well.[4]

Furthermore, it appears the presence of foreign defendants in this case has already caused some administrative difficulties: Volkswagen and Brandstätter were not served with the Summons and Complaint until late February 2021, almost three months after the complaint was filed. *See* ECF Nos. 39, 43. And, as discussed *supra* at III.A.3.i, it appears much of the evidence is in German and/or Germany.

Prevent asserts "Germany has an interest only in its own market, not the worldwide market alleged in the Complaint. By contrast, a 'defendant's home forum always has a strong interest in providing a forum for redress of injuries.'" ECF No. 24, PageID.710 (quoting *Shi v. New Mighty U.S. Tr., 918 F.3d 944, 952, 440 U.S. App. D.C. 105 (D.C. Cir. 2019)*) (internal citations omitted). While the Court generally agrees with this principle, it is ultimately unhelpful in this case as Germany is the home forum for half the Defendants. Moreover, as discussed *supra* at III.A.2., a German **[*23]** court's interest would extend to anticompetitive conduct throughout the European Union. *Prevent USA, 2021 U.S. App. LEXIS 33234, 2021 WL 5176952, at *3*. In contrast, a Sherman Act claim brought in the United States can only address domestic effects. *Id.*

The Court acknowledges citizens of Michigan have some relation to this case to the extent meetings regarding the alleged boycott occurred in Michigan. Nevertheless, the boycott itself was an agreement initiated by a German company (Volkswagen) to boycott another German company (Prevent), and that the goods subject to the boycott (seat covers) are not alleged to have ever been imported into the United States. A handful of meetings in Michigan is not a sufficient connection to outweigh the foreign nature of the suit. Accordingly, the public interests also favor litigating this case in Germany.

4. Deference to Plaintiff's Choice

Generally, courts "apply a strong presumption in favor of a plaintiff's selected forum." *Zions First, 629 F.3d at 523-24*. It is also usually "reasonable for [a] district court to assume that the choice [of a defendant's home forum] was convenient. *District Boling v. Prospect Funding Holdings, LLC, 771 F. App'x 562, 571 (6th Cir. 2019)*. However, a "foreign plaintiff's forum choice is usually accorded less deference" than an American plaintiff's because it is "much less reasonable" to assume the forum is **[*24]** convenient. *Hefferan, 828 F.3d at 493* (quoting *Piper Aircraft Co., 454 U.S. at 256*). This is especially true "as evidence of forum shopping mounts." *Stryker, 891 F.3d at 619*. Courts consider whether a foreign plaintiff's "decision to file suit in the United States was motived by a legitimate reason such as convenience or the ability to obtain jurisdiction over the defendants rather than tactical advantage." *Id. at 494*.

Here, the Court finds Prevent's choice of forum is entitled to little deference. Prevent is a foreign plaintiff and therefore entitled to less deference. *Hefferan, 828 F.3d at 493*. Prevent counters that Adient and Lear are headquartered in this District and cannot seriously claim inconvenience. *See, e.g.*, ECF No. 49, PageID.2877. However, courts have dismissed on *forum non conveniens* grounds when cases involved both domestic and foreign defendants. *See, e.g., Ranza v. Nike, Inc., 793 F.3d 1059 (9th Cir. 2015)* (affirming dismissal of workplace discrimination claims brought by American plaintiff living abroad against foreign corporation and its domestic parent company); *Kryvicky v. Scandinavian Airlines Sys., 807 F.2d 514 (6th Cir. 1986)* (affirming dismissal of wrongful death claims brought by American plaintiff against foreign airline and domestic airline manufacturer).

[4] The Court acknowledges Prevent's assertion that Adient and Lear are not named in any of the German lawsuits and thus the actions cannot be called "parallel." ECF No. 40, PageID.2399. Nevertheless, Prevent assigned claims arising from the March 2018 termination of its seat cover supply agreements to an entity established to bring such claims on behalf of the Prevent Group. *See* ECF No. 35-11, PageID.1669. While Adient and Lear are not named in that litigation, the complaint refers to the third parties that replaced them as Volkswagen's suppliers. *Id.* at PageID.1609. It is clear these lawsuits are related, if not "parallel."

Despite Adient and Lear's connection to Michigan, the Court concludes the Prevent Group's litigation history evidences foreign shopping. **[*25]** As discussed *supra* at III.A.3.ii n.4, the Court acknowledges Prevent, Adient, and Lear, have not been named parties in the any of the prior lawsuits in Germany. However, Prevent is wrong in arguing "[c]ourts will only infer forum shopping when the *same* plaintiff has brought parallel claims in a foreign court and is seeking to re-litigate an unfavorable result in the foreign court." ECF No. 24, PageID.705 (emphasis in original). For example, in *Prevent USA, 2021 U.S. Dist. LEXIS 53216, 2021 WL 1087661*, the district court (Friedman, J.) dismissed on *forum non conveniens* grounds despite neither of the two plaintiffs, one of which was an American company, being named in the earlier foreign litigation.

Moreover, Prevent is so closely affiliated with the other Prevent Group companies that it is disingenuous for Plaintiff to try to separate the instant action from its predecessors. In fact, the Complaint is rife with references to the broader Prevent Group and its dispute with Volkswagen. A few examples are below.

> In 2016, a global dispute arose between Volkswagen and companies affiliated with Plaintiff known as the "Prevent Group." . . . In response, Volkswagen launched "Project 1," a highly organized campaign to "demolish" Plaintiff and the Prevent **[*26]** Group and to exclude them systematically from the market.

ECF No. 1, PageID.4.

> Project 1 had several dimensions, including interfering with acquisitions by Prevent Group companies that might threaten Volkswagen's market power, hiring private investigators to spy on Prevent Group executives to gain insight into the Prevent Group's acquisition strategy and business, and manufacturing negative press about the Prevent Group. These aspects of Project 1 are the subject of separate proceedings both in this District and in certain European courts.

Id. at PageID.5.

> At one point, Adient was the single largest customer of both Plaintiff and across the entire automotive business of the wider Prevent Group. At the same time, Prevent Group companies would purchase some components from Adient in markets in which Adient was acting as a Tier 3 supplier, including certain fabrics. In addition, the Prevent Group also provided major product development and pre-serial production services to several of Adient's operations. The relationship between Plaintiff and Adient was highly successful.

Id. at PageID.27

> As Plaintiff grew, it achieved more bargaining power to insist upon competitive prices and terms, directly **[*27]** threatening Volkswagen's strategy of keeping its suppliers small and weak and thereby allowing Volkswagen to force anticompetitive prices and terms on those suppliers. Entities within the Prevent Group began acquiring smaller, weak suppliers. This posed a direct threat to Volkswagen's market power strategy.

Id. at PageID.29.

> Volkswagen estimated that the replacement of Prevent Group companies, including Plaintiff, would cost it roughly 200 million euros. . . . The replacement of all Prevent Group companies, including Plaintiff, as suppliers to Volkswagen was approved at the highest levels of the company.

Id. at PageID.32-33.

> By foreclosing Plaintiff from capturing these returns, Defendants caused loss to Plaintiff's industry goodwill and market reputation, and substantially decreased the overall market valuation of the Prevent Group.

Id. at PageID.41

The instant lawsuit is the latest iteration in a long series of lawsuits in which Prevent Group companies have alleged, both in this District and German courts, that Volkswagen and its subsidiaries are trying to drive them out of business. Judge Friedman extensively detailed this litigation history in *Prevent USA, 2021 U.S. Dist. LEXIS 53216, 2021 WL 1087661*. Because Defendants submitted **[*28]** the same declaration in support of their motions to dismiss, the Court includes Judge Friedman's summary below.

This litigation history is explained in the declaration of Dr. Detlef Hass, ECF 33, submitted in support of defendants' motion. Dr. Hass catalogues the lawsuits that have been litigated in German courts between Prevent Group companies and Volkswagen since 2016. The first two were brought by VWAG and some of its subsidiaries against the Prevent Group companies Car Trim GmbH ("Car Trim") and ES Automobilguss GmbH ("Automobilguss") in August 2016 when these suppliers froze all deliveries to Volkswagen. In each case, the Braunschweig Regional Court found the suppliers' delivery freezes to be unjustified, granted Volkswagen's motions for preliminary injunctions, and ordered the suppliers to resume delivery of parts for specified periods of time. *See* Hass Decl. ¶¶ 3, 4; Hass Decl. Exs. 1, 2.

A third lawsuit arose in 2018. In March of that year, Volkswagen informed Automobilguss that it was terminating its supplier contract with that company. Automobilguss then sued VWAG in the Regional Court of Leipzig and sought an injunction requiring Volkswagen to continue purchasing gear components. **[*29]** *See* Hass Decl. ¶ 6; Hass Decl. Ex. 3. The court granted partial relief, but the appellate court, the Higher Regional Court of Dresden, reversed. Hass Decl. ¶¶ 7-9; Hass Decl. Ex. 4[.] The appellate court concluded that Volkswagen had good cause to terminate its relationship with [Automobliguss] "in reaction to the illegal threat of the [latter]" to stop supplying gear components. PageID.1022. The court also rejected plaintiff's antitrust argument that VWAG had abused its market power, finding that "[t]he Plaintiff did not demonstrate by *prima facie* evidence that the Defendant is a market-dominating company." PageID.1017.

Prevent Group's legal action against Volkswagen continued in another German court in 2018 when Prevent TWB GmbH & Co KG ("TWB") sued VWAG and two other VW subsidiaries in an effort to require them to continue purchasing its car seat components. *See* Hass Decl. ¶ 10; Hass Decl. Ex. 5. Defendants had given notice in March 2018 that they were cancelling their supply agreements with TWB effective March 2019. The Regional Court of Dortmund noted plaintiff's belief that "the cancellation is simply retribution for the dispute that has been publicized in the media between [VWAG] **[*30]** and two affiliated companies of Plaintiff's parent company, CarTrim GmbH and ES Automobilguss GmbH, dating from 2016." Hass Decl. Ex. 5 (PageID.1073). The court denied the injunction. PageID.1069. In affirming, the Duesseldorf Higher Regional Court found plaintiff's request for an injunction to be "unfounded" because, among other reasons, plaintiff conceded that it had already found more than ten new customers." Hass Decl. Ex. 6 (PageID.1136, 1141).

The dispute over VWAG's cancellation of Prevent Group's parts contracts continued in another German court, the Regional Court of Hanover, where TWB sued Skoda Auto a.s., a VWAG subsidiary, in 2018. Hass Decl. ¶ 12. That court, like the Regional Court of Dortmund (and for essentially the same reasons), denied plaintiff's request for an injunction to compel defendant to continue buying car seat components after defendant canceled its contract in early 2018. Hass Decl. Ex. 7. Plaintiff appealed this decision to the First Antitrust Division of the Celle Higher Regional Court[] but withdrew the appeal after that court indicated that it intended to dismiss the appeal because it "clearly has no chance of succeeding." Hass Decl. ¶ 13, Hass Decl. **[*31]** Ex. 8 (PageID.1247).

Another in this continuing series of disputes between VWAG and Prevent Group is a lawsuit brought by VWAG against Neue Halberg-Guss GmbH ("NHG"), a supplier of engine blocks and other components, in the Regional Court of Braunschweig in 2018. Hass Decl. ¶ 19, 20; Hass Decl. Exs. 12, 13. In that case, VWAG obtained an order permitting it to attach NHG's assets in the amount of 42 million Euros. The basis for the claim was that NHG, upon being acquired by the Prevent Group, massively increased the prices it demanded VWAG pay as a condition of continued delivery. Hass Decl. Exs. 13 (PageID.1633-35). VWAG paid the demanded prices, which the court characterized as "usurious," in order to avoid production shutdowns at its engine plant. PageID.1650, 1654. In affirming, the appellate court agreed that NHG's significant price increases were usurious and that NHG's threatened "delivery stop caused an economic predicament for [VWAG], which at the time was dependent on deliveries from [NHG] because alternatives were—undisputedly—not available in a timely manner." Hass Decl. Ex. 14 (PageID.1735).

The most recent [German] battle between VWAG and Prevent Group took shape in December **[*32]** 2019, when a company named Andromeda Dispute & Litigation GmbH ("Andromeda") sued VWAG, Audi AG, Porsche AG, Skoda Auto a.s., SEAT S.A., SITECH Sitztechnik GmbH, Volkswagen Automatic Transmission

Co. Ltd. No. 125, and Volkswagen R GmbH in the Regional Court of Frankfurt. Hass Decl. ¶ 22, Hass Decl. Ex. 15. Plaintiff indicated that it was suing by assignment on behalf of several Prevent Group companies whose contracts with the VW companies had been terminated in March 2018. Hass Decl. Ex. 15 (PageID.1788). In this lawsuit, plaintiff asserts claims "on the basis of contractual and criminal law, and in particular ***antitrust law***" for these unlawful terminations. *Id.* VWAG, plaintiff alleges, "had strategically prepared for this separation for years." PageID.1789. Plaintiff points to a Project 1 presentation in April 2017 for VWAG's board where the company's "separation costs" were tallied. *Id.* VWAG allegedly intended that "[a]ll suppliers should see what happens when they do not strictly follow the unwritten laws of [VWAG]; for, in 2016, individual companies of the 'Prevent Group' had dared to suspend delivery." *Id.* VWAG allegedly intended "to 'eliminate' all of the companies of the 'Prevent **[*33]** Group.'" PageID.1790. According to the complaint, VWAG believed that "the strategy of the 'Prevent Group' that had been pursued for years - the acquisition and recovery of small and mid-sized automotive supply companies - had to be halted." *Id.* VWAG allegedly

> created a "List of problematic suppliers," which recorded, among other things, financial assessments for each supplier, the dependence of the supplier on [VWAG] in percentage of revenue, a "depth evaluation" for each supplier, the plans of Volkswagen for handling the supplier, and, in the column "Status," all information regarding a change of control. On the other hand, a concept was needed for the replacement of the companies that supplied [VWAG] and its corporation [sic].
>
> . . .
>
> Now, with great urgency, replacement suppliers needed to be found for all parts delivered by companies of the "Prevent Group" and - this was planned for "February 2018" - in one fell swoop, all contracts of all companies of the corporation of Defendant No. 1) with companies of the "Prevent Group" were annulled, terminated properly or without notice, and this action was accompanied by a great media presence in order to demonstrate to all suppliers the consequences **[*34]** of "insubordinate behavior."

PageID.1790, 1792. As evidence, plaintiff references a Project 1 presentation in April 2017 to VWAG's board. PageID.1792.

The complaint goes on to allege:

> The conduct of the Defendants was and is illegal in many respects. In March 2018, there were as few "grounds for termination" for a termination or ending of the contracts without notice or even with notice before the expiry of the fixed term as there were in June 2016.
>
> . . .
>
> The concerted action of March 20, 2018, was not only the contractually based but also antitrust-based and moreover illegal infringement of an established and practiced commercial business as well as a malicious, immoral injury to seven Cedents, because, as they have declared, Defendant No. 1) and the remaining affiliates did not pursue any justified economic goals but rather the targeted public injury of the "Prevent Group." Defendant No. 1) lied to the Cedents - as well as to the courts - regarding its actual plans; it was only gradually - some of it very recently - that the duplicitous double-dealing was uncovered.

PageID.1792-93. Further,

> [i]n order to conceal the negative influences on the assets, the stock market price and the share **[*35]** value of Volkswagen AG, the responsible persons involved temporarily named their project "Project-1," more precisely, in the years 2016 and 2017. It is not known what further or other code names the destruction campaign had. In any case, a presentation for the board meeting of the VW Group dated April 25, 2017 (Annex K1) contained a recommendation for action, calling for a complete "modulation" of the "companies of the Prevent Group" (including ES Guss and Car Trim) and for all objectives to be fully implemented by February 2018....Furthermore, the presentation refers to the Group's board meetings dated August 16, 2016 and August 23, 2016, at which the Board of Management of the Group had already decided on the "modulation" - the destruction of all suppliers of the "Prevent Group" and the structure of alternative suppliers.

PageID.1814-15. The complaint also alleges the specific goals of Project 1:

> In any case, on August 16, 2016, the Board of Management of the [Volkswagen] Group decided to "modulate", i.e. boycott the supplier companies of the Hastor family of entrepreneurs, which were no longer wanted for further business. The Board of Management of the Group determined that

> (1) a fully **[*36]** secured 2-supplier strategy was to be set up to ensure that all VW plants would be supplied with automotive parts without using the companies of the Hastor/Prevent Group;
> (2) any participation by the Hastor family of entrepreneurs in a supply company in the past, present and future should be examined and prevented;
> (3) the legal department should be closely involved in all activities relating to the companies of this family of entrepreneurs;
> (4) close internal monitoring of developments is necessary and that the Board of Management of the Group should report on developments at least weekly (i.e. again on August 23, 2016).
>
> In view of these determinations, it was clear that the Board of Management of the Group did not think of admitting their own mistakes or even of responding to justified demands from VW Group suppliers. It was also clear that the VW Group would use all means made available by the Board of Management to "clean up" all supply chains and supply companies of Hastor managers or Hastor holdings as soon as this appeared necessary for any reason or was deemed necessary as a preventive measure.

PageID.1815.

The complaint further alleges that Project 1, which the complaint also referred **[*37]** to as "the destruction campaign," included an effort by the VW Group

> to use its organizational and structural possibilities in the value-added pyramid for the approximately 11 million vehicles it produces annually to *deny the assignors access to new supply contracts for the brands of the VW Group*. In addition, the Hastor family and their companies willing to invest were *denied access to the supplier market in all markets in which the VW Group was able to exert influence on the award of supplier contracts*, namely in South America, *North America*, Europe[,] and Asia. This included blocking the acquisition of shareholdings in other companies, although the VW group could not have any equity interest of its own in investing Group funds for this purpose.

PageID.1818 (original emphasis omitted; emphasis added). Project 1 also allegedly sought to block Prevent Group companies from acquiring other suppliers:

> [T]he VW Group has also made every possible effort to exploit its organizational and structuring possibilities in the value-added pyramid for the supply chain controlled by its worldwide in order to prevent companies in which the Hastor family could have had a direct or indirect holding from **[*38]** being taken over.
>
> . . .
>
> VW AG, as a listed company, has at no time publicly reported to the capital market that it has been engaged in a campaign of destruction against the companies of the Hastor family of entrepreneurs since at least 2015 and is planning for this dispute both the loss of all deliveries to these companies (and consequently also possible disruptions to assembly at their plants) and costs and claims for damages in the hundreds of millions.

PageID.1844-45.

The complaint asserts antitrust claims, arguing at length that plaintiff had stated a claim under both German and European ***antitrust law***. PageID.1848 et seq. Plaintiff alleges that VWAG and the named subsidiaries have monopsony power due to their "dominant position with regard to the vendor parts manufactured by the Prevent companies." PageID.1850. Plaintiff asserts that defendant could be held liable under German ***antitrust law*** for "any market conduct which has objectively disadvantageous effects on competition for the party concerned." *Id.* Within its discussion of defendants' antitrust violations, plaintiff alleges:

> In this context, reference should also be made once again to the strategy of the defendant's group management **[*39]** board to try by all means to prevent the takeover of suppliers by companies of the Prevent Group. All this must be taken into account in the necessary balancing of the interests of the companies concerned. The interest of the defendant is clearly directed towards permanently excluding all companies of the Prevent Group as suppliers for all defendants, because it fears that these companies will build up countervailing power and that it will no longer be able to unilaterally enforce its interests in the

> drafting of contracts, in particular its general terms and conditions of purchase, and in the execution of contracts, as it has done in the past.

PageID.1854. Plaintiff further alleges:

> In the present case, as has been explained, it must be assumed that the defendant has a monopoly-like position in the demand for subcontracted parts, which is manifested in the specific form of the supply contracts. Ultimately, the first objective of the defendant regarding 1. [sic] was not only to consolidate its position of power as a buyer of motor vehicle parts, but to expand it and to make it clear to all other suppliers what consequences they would have to expect if they did not comply with the defendant's **[*40]** requirements.

PageID.1857. The complaint asserts a slew of claims under German law, including antitrust, fraud, unjust enrichment, and interference with an "established ... business operation." PageID.1870. Plaintiff expands on the latter point, citing authority for the proposition that such interference includes "[t]he prevention of planned commercial activities of an already active company ..., such as its extension or expansion, if the 'internal connection' to an existing company is present." PageID.1871.

*2021 U.S. Dist. LEXIS 53216, [WL] at *12-16*.

After this extensive litigation history, in November 2019, two plaintiffs affiliated with the Prevent Group sued Volkswagen and Volkswagen Group of America, Inc. in this District for actions related to Project 1. *See Prevent USA Corp. et al. v. Volkswagen AG*, 19-cv-13400-BAF-EAS. Specifically, the plaintiffs argued that the defendants conspired to block Prevent Group affiliates from acquiring other automobile parts suppliers "with the purpose and effect of suppressing competition, maintaining Volkswagen's market power over suppliers, and in the process causing massive losses to [the Prevent Group]." *Prevent USA, 2021 U.S. Dist. LEXIS 53216, 2021 WL 1087661, at *2*.

One of the plaintiffs in that case, Prevent USA, is a subsidiary of **[*41]** the Prevent Group, organized and existing under the laws of Pennsylvania, and registered to do business in Michigan. The other, Eastern Horizon, is a Dutch company with its principal place of business in the Netherlands. One of the defendants in that case, Volkswagen Group of America, is a New Jersey corporation whose principal place of business is in Virginia. The other is the same Volkswagen entity named in the instant case. Volkswagen and Volkswagen Group of America successfully moved to dismiss the lawsuit based on *forum non conveniens*.

The court (Friedman, J.) found Germany was an adequate forum for the litigation because both defendants were amenable to process there, Germany's legal system was competent to handle a broad array of disputes, and Prevent Group companies were already litigating several unfair competition and antitrust lawsuits against Volkswagen and its subsidiaries based on the Project 1 conduct. *2021 U.S. App. LEXIS 33234, [WL] at *8-9*. The court found the balance of interests favored litigation in Germany because the case had little connection to Michigan, Project 1 was devised and administered in Germany, and the majority of the evidence was in Germany. *2021 U.S. App. LEXIS 33234, [WL] at *9-11*. Finally, the court gave the plaintiffs' choice **[*42]** of forum little deference because they had little connection to the United States and "Prevent Group companies have brought a number of lawsuits against Volkswagen in Germany, the obviously more convenient and appropriate forum for resolution of their disputes against this German car maker." *2021 U.S. App. LEXIS 33234, [WL] at *11*; *see also* *2021 U.S. App. LEXIS 33234, [WL] at *12-16* (describing Prevent Group's litigation history against Volkswagen in Germany). The United States Court of Appeals for the Sixth Circuit affirmed. *Prevent USA, 2021 U.S. App. LEXIS 33234, 2021 WL 5176952*, at *.; *see also* *2021 U.S. App. LEXIS 33234, [WL] at *5* ("The convenience of handling this lawsuit in Michigan is not obvious, even from Prevent USA's perspective. Keep in mind that the Prevent Group brought five different actions in Germany before bringing this American lawsuit.").

The parties dispute whether the Prevent Group is "winning" the litigation in Germany, but the Court need not decide a plaintiff's potential motive for forum shopping—be it to relitigate issues or the opportunity for higher damages. Given that the bulk of the evidence in this case will be in German or Germany, it is "much less reasonable" to assume Prevent chose this forum for convenience rather than tactical advantage.

For the foregoing reasons, the Court will dismiss the cause of action as to all defendants **[*43]** on *forum non conveniens* grounds.

B. Prevent's Antitrust Claims are Barred by the FTAIA

Additionally, the Court finds that Prevent's antitrust claims are barred by the FTAIA. All Defendants argue that Prevent's antitrust claims are barred by the FTAIA. ECF No. 21, PageID.152-155; ECF No. 35, PageID.1015. The Court also finds these arguments persuasive.

"The FTAIA seeks to make clear to American exporters . . . that the *Sherman Act* does not prevent them from entering into businesses arrangements ... however anticompetitive, as long as those arrangements adversely affect only foreign markets." *F. Hoffmann-La Roche Ltd. v. Empagran S.A., 542 U.S. 155, 161, 124 S. Ct. 2359, 159 L. Ed. 2d 226 (2004)*. To determine whether anticompetitive conduct is subject to *Sherman Act* liability, a court must first determine whether "that conduct falls within the FTAIA's general rule excluding the *Sherman Act*'s application," *i.e.*, does the "conduct involv[e] trade or commerce . . . with foreign nations. *Id. at 158*. Then, a court must determine

> whether the conduct nonetheless falls within a domestic-injury exception to the general rule, an exception that applies (and makes the *Sherman Act* nonetheless applicable) where the conduct (1) has a "direct, substantial, and reasonably foreseeable effect" on domestic commerce, and (2) "such effect gives rise to a [*Sherman Act*] claim." **[*44]**

Id. at 159 (quoting *15 U.S.C. §§ 6a(1)(A)*, *(2)*).

As a threshold matter, Prevent avers the FTAIA only applies when the Complaint alleges wholly foreign transactions, and it thus cannot apply here where the unlawful agreement was reached in Michigan with companies headquartered in Michigan. ECF No. 24, PageID.702-03. In support of its position, Plaintiff contends Defendants' FTAIA arguments disregard *Empagran*'s holding that "the FTAIA's general rule applies where the anticompetitive conduct at issue is foreign." *542 U.S. at 163*.

However, Prevent misconstrues that particular holding in *Empagran*. The Supreme Court was determining whether the FTAIA only applies to export commerce or whether it reaches other types of conduct. *See* *542 U.S. at 163*. After analyzing the legislative history, the *Empagran* Court found "that wholly foreign transactions as well as export transactions are covered by the amendment, but that import transactions are not." *Id.* The Supreme Court went on to hold that when anticompetitive conduct had independent adverse domestic and foreign effects, a domestic purchaser could bring a *Sherman Act* claim for the domestic injury, but foreign purchaser could not bring a claim based on the foreign harm. *Id. at 159*. *Empagran* is thus inapposite and Prevent has not advanced any authority for this **[*45]** argument.

The other cases Prevent cites are similarly unhelpful to Prevent's argument and instead demonstrate the contrapositive. *TI Inv. Servs., LLC v. Microsoft Corp.* holds the FTAIA does not apply to a United States defendant selling services to United States consumers within the United States but would apply to that same defendant selling services to Indian customers. *23 F. Supp. 3d 451, 468 (D.N.J. 2014)*. Similarly, *Lotes Co. v. Hon Hai Precision Indus. Co.* holds "[u]nlike claims involving purely domestic conduct, the FTAIA bars claims based on foreign conduct from proceeding unless the foreign conduct has a cognizable effect on the United States." *753 F.3d 395, 406 (2d Cir. 2014)*. The purpose of the FTAIA is not to exclude wholly foreign conduct as Prevent argued, it is to exclude "conduct that causes only foreign injury." *Empagran, 542 U.S. at 158*.

Prevent's reliance on *In re Auto. Parts Antitrust Litig. (Bearings), No. 12-MD-02311, 2014 U.S. Dist. LEXIS 119372, 2014 WL 4209588, at *6 (E.D. Mich. Aug. 26, 2014)* is similarly misplaced. *See* ECF No. 24, PageID.703 ("[W]here at least some conduct is alleged to have occurred in the United States, the FTAIA thus does not apply."). As the next sentence in that opinion makes clear, the *Bearings* court held that the FTAIA arguments only applied to the foreign parent company because the domestic subsidiary was "specifically alleged to manufacture and sell bearings within the United **[*46]** States." *Bearings, 2014 U.S. Dist. LEXIS 119372, 2014 WL 4209588, at *6*. As discussed *supra* at III.A.2, Prevent did not make any similar allegations in its own Complaint—it does not allege that its seat covers were ever imported into the United States.

Here, the alleged boycott agreement was between two companies headquartered in Michigan and a company headquartered in Germany and concerned another company headquartered in Germany, so it necessarily "involves trade or commerce with foreign nations" and falls within the FTAIA's general rule. Thus, the Court must determine whether the alleged boycott falls into the FTAIA exception.

Non-import foreign commerce is subject to *Sherman Act* liability "where the conduct (1) has a 'direct, substantial, and reasonably foreseeable effect' on domestic commerce, and (2) 'such effect gives rise to a [*Sherman Act*] claim.'" *Empagran, 542 U.S. at 159* (quoting *15 U.S.C. §§ 6a(1)(A)*, *(2)*). The Court of Appeals for the Sixth Circuit has not yet analyzed the FTAIA exception, and there is a circuit split as to how "direct" the effect on United States commerce must be. *Compare* *United States v. LSL Biotechnologies, 379 F.3d 672, 680 (9th Cir. 2004)* (defining "direct" as "an immediate consequence of the defendant's activity"), *with* *Minn-Chem, Inc. v. Agrium, Inc., 683 F.3d 845, 857 (7th Cir. 2012)* (en banc) (defining "direct" as "a reasonably proximate causal nexus"). To be "substantial" the conduct must have more than a "spillover **[*47]** effect on the domestic commerce." *Eurim-Pharm GmbH v. Pfizer Inc., 593 F. Supp. 1102, 1106-07 (S.D.N.Y. 1984)*. The second prong of the FTAIA exception requires "that the domestic effect must proximately cause the plaintiff's injury." *Lotes Co., 753 F.3d at 414* (collecting cases).

In *Lotes*, the plaintiff argued the defendants had attempted to gain monopoly power over the entire USB connector industry by refusing to offer licenses to adopters of their technology. *Id. at 401*. It further alleged this exclusionary conduct increased prices for devices using USB connectors in the United States. *Id. at 402*. The defendants contended the plaintiff's *Sherman Act* claims were barred by the FTAIA. The United States Court of Appeals for the Second Circuit held it did not need to determine "whether the defendants' foreign anticompetitive conduct has a 'direct, substantial, and reasonably foreseeable effect' on U.S. domestic or import commerce" because "even assuming that Lotes has plausibly alleged a domestic effect, that effect did not 'give [ ] rise to' Lotes's claims." *Id. at 413* (alteration in original). Specifically, the court found

> those higher prices did not cause Lotes's injury of being excluded from the market for USB 3.0 connectors—that injury flowed directly from the defendant's exclusionary foreign conduct. Lotes's complaint thus **[*48]** seeks redress for precisely the type of "independently caused foreign injury" that *Empagran* held falls outside of Congress's intent. *Empagran, 542 U.S. at 173, 124 S.Ct. 2359*.
>
> Indeed, to the extent there is any causal connection between Lotes's injury and an effect on U.S. commerce, the direction of causation runs the wrong way. Lotes alleges that the defendants' patent hold-up has excluded Lotes from the market, which reduces competition and raises prices, which are then passed on to U.S. consumers. Lotes's injury thus *precedes* any domestic effect in the causal chain. And "[a]n effect never precedes its cause." *Am. Home Prods. Corp. v. Liberty Mut. Ins. Co., 748 F.2d 760, 765 (2d Cir.1984)*.

Id. at 414.

Here, Prevent suffers from the same problem. It alleges Defendants collaborated to exclude it from the global automotive seat cover market and that this exclusion "raised the price and reduced the output of seat covers" which "affected vehicles sold in the United States." ECF No. 1 at PageID.39. But this causal chain goes the wrong way: Prevent's injury precedes any domestic effect Defendants' actions may have had on United States markets. "Accordingly, even assuming that the defendants' anticompetitive conduct caused a 'direct, substantial, and reasonably foreseeable effect' in the United States, any such effect did not **[*49]** 'give[ ] rise to'" Prevent's claim. *Id. at 415* (alteration in original). Because Prevent has not satisfied both prongs of the FTAIA exception, the Court concludes the *Sherman Act* claims (Claims 1-3) are barred. This would also serve to bar Prevent's state law antitrust claims (Claims 4-6). *In re Auto. Parts Antitrust Litig., 2017 U.S. Dist. LEXIS 221151, 2017 WL 7689654, at *7 (E.D. Mich. May 5, 2017)*.

IV. CONCLUSION

For the foregoing reasons, the Court concludes this matter will be dismissed on *forum non conveniens* grounds. The Court further concludes Prevent's Sherman Act and attendant state law claims are barred by the FTAIA.

Accordingly,

IT IS ORDERED Defendants Adient and Lear's Motion to Dismiss [#21] is **GRANTED**. This dismissal is conditioned on the following:

1. Adient and Lear's consent to suit and acceptance of process in Germany in a civil action arising out of the alleged boycott;
2. Adient and Lear's agreement to make available any documents or witnesses within its control that are necessary for fair adjudication of said action in Germany; and
3. Adient and Lear's consent to pay any judgment rendered against it in Germany in the aforementioned action.

IT IS FURTHER ORDERED Defendants Volkswagen and Brandstätter's Motion to Dismiss [#35] is **GRANTED**.

IT IS SO ORDERED.

Judges: Ivan L.R. Lemelle, SENIOR UNITED STATES DISTRICT JUDGE.

Opinion by: Ivan L.R. Lemelle

Opinion

ORDER AND REASONS

Before the Court is defendants' motion to dismiss pursuant to *Rule 12(b)(1) of the Federal Rules of Civil Procedure* (Rec. Docs. 247), plaintiffs' response in opposition (Rec. Doc. 250), and defendants' reply in further support of motion **[*4]** to dismiss (Rec. Doc. 253).

For the reasons discussed below,

IT IS ORDERED that defendants' motion to dismiss (Rec. Doc. 247) is **DENIED**.

I. FACTS AND PROCEDURAL HISTORY

On February 25, 2019, this Court consolidated plaintiff Esquire Deposition Solutions, LLC ("Esquire") and plaintiff Veritext Corp.'s actions against defendants John J. Lee, Jr.,[1] Vincent P. Borrello, Jr., Milton Donegan, Jr., Suzette Magee, Kimya M. Holmes, John H. Anderssen, May F. Dunn, Elizabeth C. Methvin, and Laura Putnam. *See* Rec. Doc. 91. Veritext and Esquire are both Delaware corporations providing court-reporting services to clients across the United States, including in Louisiana. Rec. Docs. 1 at 5, 117 at 5. Both companies also consume court reporting services in Louisiana. *Id.* Plaintiffs provide negotiated rates and discounts for court reporting services to frequent customers who agree to utilize plaintiffs' services for all or some of their court reporting needs. Rec. Doc. 117 at 8.

Defendants are current and former members of the Louisiana Board of Examiners of Certified Shorthand Reporters ("Board"), which is a regulatory body created "for the purpose of encouraging proficiency in the practice of shorthand **[*5]** reporting as a profession, promoting efficiency in court and general reporting, and . . . establishing a standard of competency for those persons engaged in it." *LA. STAT. ANN. § 37:2551(A)* (2021). The Board is authorized to enforce *Louisiana Code of Civil Procedure Article 1434*, the provision under scrutiny in this matter, which prohibits

> a person who has a contractual relationship with a party litigant to provide shorthand reporting or other court reporting services . . . [or] a person employed part or full time under contract or otherwise by a person who has a contractual relationship with a party litigant to provide shorthand reporting or other court reporting services.

---

[1] On January 11, 2019, the Court granted plaintiffs' motion to substitute John J. Lee, Jr., in his official capacity as a member of the Louisiana Board of Examiners of Certified Shorthand Reporters, for Paul A. Bonin. Rec. Doc. 89.

La. Code Civ. Proc. Ann. art. 1434(A)(2) (2021); *see also* Rec. Doc. 117 at 6, 17.

In 2012, the Board began enforcing *Article 1434* against all court reporters who entered into volume-based discount contracts with party litigants. *Id.* at 13. Plaintiffs consequently brought Constitutional claims under the dormant *Commerce Clause* and the *Fourteenth Amendment*, as well as a claim under *Section 1 of the Sherman Act, 15 U.S.C. § 1*. Rec. Docs. 1, 4. The Court dismissed plaintiffs' constitutional challenges, and subsequently dismissed the *Sherman Act* claim on reconsideration. *Veritext Corp. v. Bonin, 259 F. Supp. 3d 484 (E.D. La. 2017)*, *on reconsideration*, *2017 U.S. Dist. LEXIS 121488, 2017 WL 3279464 (E.D. La. Aug. 2, 2017)*. On appeal, the Fifth Circuit confirmed the dismissal of Veritext's Constitutional claims but reversed the dismissal of its *Sherman Act* claim **[*6]** because it found that "Veritext pled facts sufficient to support a finding that the Board's conduct does indeed restrain trade." *Veritext Corp. v. Bonin, 901 F.3d 287, 292 (5th Cir. 2018)*. Additionally, the Court held that the Board members were not entitled to *Parker* immunity because the active supervision requirement of that doctrine was "not met." *Id.; see also Parker v. Brown, 317 U.S. 341, 351, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*.

Plaintiffs then filed a motion for partial summary judgment on the affirmative defenses of unclean hands, *in pari delicto*, indemnification, contribution, and allocation of fault. Rec. Docs. 229, 231, 234. The Court granted summary judgment for the affirmative defenses of unclean hands and allocation of fault and dismissed as moot the affirmative defenses of *in pari delicto*, indemnification, and contribution. Rec. Docs. 237, 238. Defendants next filed a motion for reconsideration of plaintiffs' motion for summary judgment.[2] Rec. Docs. 240, 242, 246. Shortly after their motion for reconsideration, defendants filed this instant motion to dismiss for lack of subject matter jurisdiction. Rec. Docs. 247, 250, 253.

II. LAW AND ANALYSIS

A. Motion to Dismiss Standard

Rule 12(b)(1) of the Federal Rules of Civil Procedure allows a party to move for dismissal of a complaint for lack of subject matter jurisdiction. *Fed. R. Civ. P. 12(b)(1)*. The court's "subject matter jurisdiction" **[*7]** defines its power to hear cases under statutory or constitutional authority. *See Steel Co. v. Citizens for Better Env't, 523 U.S. 83, 89, 118 S. Ct. 1003, 140 L. Ed. 2d 210 (1998)*. "Sovereign immunity implicates subject matter jurisdiction." *Chapa v. U.S. Dep't of Just., 339 F.3d 388, 389 (5th Cir. 2003)*. "Because sovereign immunity deprives the court of jurisdiction, the claims barred by sovereign immunity can be dismissed only under *Rule 12(b)(1)* and not with prejudice." *Warnock v. Pecos Cty., Tex., 88 F.3d 341, 343 (5th Cir. 1996)*.

A party may raise an objection that the federal court lacks subject matter jurisdiction at any stage of litigation. *Arbaugh v. Y&H Corp., 546 U.S. 500, 506, 126 S. Ct. 1235, 163 L. Ed. 2d 1097 (2006)*. But even without a challenge from any party, courts have an independent obligation to determine whether subject matter jurisdiction exists. *Ruhrgas AG v. Marathon Oil Co., 526 U.S. 574, 583, 119 S. Ct. 1563, 143 L. Ed. 2d 760 (1999)*. When the court lacks subject matter jurisdiction, the court does not have the authority to hear and determine a particular matter and must dismiss the case. *See Kontrick v. Ryan, 540 U.S. 443, 455, 124 S. Ct. 906, 157 L. Ed. 2d 867 (2004)* (quoting *Fed. R. Civ. P. 12(h)(3)*).

B. *Eleventh Amendment* Immunity Differs from State Action Immunity[3]

---

[2] This Court denied defendants' motion for reconsideration on October 22, 2021. Rec. Doc. 262.

[3] State action immunity is also known as *Parker* immunity. *See Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*.

The *Eleventh Amendment* bars a private citizen from suing a state in federal court, unless the state consents to suit, Congress has abrogated the state's sovereign immunity, or the *Ex parte Young* exception applies. *209 U.S. 123, 28 S. Ct. 441, 52 L. Ed. 714 (1908)*; *Freedom from Religion Found. v. Abbott, 955 F.3d 417, 424 (5th Cir. 2020)*. This protection from suit "extends to any state agency or entity deemed an alter ego or arm of the state." *Perez v. Region 20 Educ. Serv. Ctr., 307 F.3d 318, 326 (5th Cir. 2002)*. A court considers many factors in determining whether a state agency is an "arm of the state," including: **[*8]**

> (1) whether the state, through statutes or case law, views the entity as an arm of the state; (2) the source of the entity's funding; (3) whether the entity is concerned with local or statewide problems; (4) the entity's degree of authority independent from the state; (5) whether the entity can sue and be sued in its own name; and (6) whether the entity has the right to hold and use property.

Earles v. State Bd. of Certified Pub. Accts. of La., 139 F.3d 1033, 1037 (5th Cir. 1998).

In contrast, state action immunity derives from "statutory construction, legislative intent, and judicial deference to federalism," not the *Eleventh Amendment*. *Rodgers v. La. Bd. of Nursing, 665 F. App'x 326, 329 (5th Cir. 2016)* (citing *Cmty. Commmc'ns Co. v. City of Boulder, Colo., 455 U.S. 40, 53, 102 S. Ct. 835, 70 L. Ed. 2d 810 (1982)*). It was first recognized in *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. *See* *id. at 1040*. There, the court held that both state agencies and private individuals are exempt from activities that might otherwise violate federal ***antitrust law***. *Id.* But the state cannot automatically invoke this immunity. *Id. at 1040-41*. Generally, two criteria must be satisfied: (1) "the challenged restraint must be one clearly articulated and affirmatively expressed as state policy to displace competition with state regulation" and (2) "the anticompetitive conduct must be actively supervised by the state itself." *La. Real Est. Appraisers Bd. v. U.S. Fed. Trade Comm'n, 976 F.3d 597, 603 (5th Cir. 2020)*.

Accordingly, *Eleventh Amendment* immunity and state action immunity are two distinct protections that defendants may raise when sued. *See* ***[*9]*** *Earles, 139 F.3d at 1036-44* (distinguishing between *Eleventh Amendment* Immunity and state action immunity when ruling). In the instant motion, defendants assert they are entitled to *Eleventh Amendment* immunity. Rec. Doc. 247-1 at 2. But plaintiffs contend that the Fifth Circuit already ruled defendants are not immune from plaintiffs' claims. Rec. Doc. 250 at 2. Plaintiffs misunderstand that the Fifth Circuit only ruled on defendants' pursuit of state action immunity, not *Eleventh Amendment* immunity. *See* *Veritext Corp. v. Bonin, et al., 901 F.3d 287, 292 (5th Cir. 2018)*. In this prior proceeding, the Court ruled that plaintiffs were not entitled to *Parker* immunity because the active supervision requirement, prong two of the aforementioned test, was not met. *Id. at 292*. Because the Fifth Circuit only ruled on whether defendants were entitled to state action immunity, and this doctrine is distinct from *Eleventh Amendment* immunity, defendants are not barred from moving to dismiss on these new grounds.

C. *Ex parte Young* Exception

Although the prior Fifth Circuit decision does not bar defendants from moving to dismiss based on *Eleventh Amendment* immunity, defendants are not necessarily entitled to that protection. The aforementioned exceptions to *Eleventh Amendment* immunity must be inapplicable. Defendants posit that none are relevant, and emphasize in particular that plaintiffs' injunctive relief claims **[*10]** do not fall within the *Ex parte Young* exception. Rec. Doc. 247-1 at 14. Under *Ex parte Young*, "a litigant may sue a state official in his official capacity if the suit seeks prospective relief to redress an ongoing violation of federal law." *Williams on behalf of J.E. v. Reeves, 954 F.3d 729, 736 (5th Cir. 2020)*. For this exception to apply, "three criteria must be satisfied: (1) A plaintiff must name individual state officials as defendants in their official capacities; (2) the plaintiff must allege an ongoing violation of federal law; and (3) the relief sought must be properly characterized as prospective." *Green Valley Special Util. Dist. v. City of Schertz, Tex., 969 F.3d 460, 471 (5th Cir. 2020)* (citing *Verizon Md., Inc. v. Pub. Serv. Comm'n of Md., 535 U.S. 635, 645, 122 S. Ct. 1753, 152 L. Ed. 2d 871 (2002)*) (other citations omitted).

Here, plaintiffs satisfy each criterion of the *Ex Parte Young* exception. First, plaintiffs name defendants in their official capacity. *See* Rec. Doc. 247-1 at 1. Second, plaintiffs claim an ongoing violation of federal law. They assert that the Board members' enforcement of *Louisiana Code of Civil Procedure Article 1434* violates the *Sherman Act*, *15 U.S.C. § 1*. *See* Rec. Doc. 117 at 21-22. The Fifth Circuit even affirmed that "Veritext has alleged facts sufficient to make out a prima facie *Sherman Act* claim." *Veritext Corp., 901 F.3d at 292*.

Defendants emphasize that the *Ex parte Young* exception cannot apply because the Fifth Circuit deemed *Article 1434* constitutional. *See* Rec. Doc. 247-1 at 14-16. They maintain that the *Ex parte Young* ***[*11]*** exception only bars suit "when the plaintiff seeks to restrain enforcement" of an "unconstitutional" state law. Rec. Doc. 247-1 at 14. But the exception is not limited to when a state law may violate the Federal Constitution. If a plaintiff alleges a state law violates a federal statute, then the *Ex parte Young* exception still applies. *See* *Pennhurst State Sch. & Hosp. v. Halderman, 465 U.S. 89, 102, 104 S. Ct. 900, 79 L. Ed. 2d 67 (1984)* ("[T]he rule permitting suits alleging conduct contrary to the supreme authority of the United States has survived.") (internal quotation marks omitted); *see also* *Air Evac EMS, Inc. v. Tex. Dep't Ins., Div. of Workers Comp., 851 F.3d 507, 520 (5th Cir. 2017)* (applying the *Ex parte Young* exception when the plaintiff alleged a violation of the *Americans with Disabilities Act (ADA)*). Thus, even though the Fifth Circuit determined plaintiffs' constitutional claims lacked merit, its affirmation of plaintiffs' *Sherman Act* claim confirms plaintiffs right to seek relief for an ongoing violation of that Act.[4]

Lastly, plaintiffs seek injunctive relief, and thus, satisfy the third criterion of the *Ex parte Young* exception. *See* Rec. Doc. 117 at 21-22; *see also* *Verizon, 535 U.S. at 645* (including injunctive relief as a form of prospective relief under the *Ex parte Young* exception). Defendants claim plaintiffs' requested relief "would be impossible to enforce." Rec. Doc. 247-1 at 22. A court, nevertheless, only **[*12]** conducts a "straightforward inquiry" in determining whether *Eleventh Amendment* immunity applies. *Verizon, 535 U.S. at 645*. After determining the requested relief is prospective, the Court need not consider "the scope of any eventual relief." *Air Evac EMS, 851 F.3d at 520*.

Upon satisfying the criteria for the *Ex parte Young* exception, plaintiffs may sue defendants in their official capacity for prospective relief and defendants are not entitled to *Eleventh Amendment* immunity.

New Orleans, Louisiana this 30th day of November, 2021

/s/ Ivan L.R. Lemelle

SENIOR UNITED STATES DISTRICT JUDGE

End of Document

[4] Defendants rely on *Idaho v. Coeur d'Alene Tribe of Idaho, 521 U.S. 261, 117 S. Ct. 2028, 138 L. Ed. 2d 438 (1997)*, to argue that plaintiffs' claims against state officials are the functional equivalent of a claim against the state, and thus, not privy to the *Ex parte Young* exception. Rec. Doc. 247-1 at 18-20. But the Fifth Circuit has "never before applied the holding of *Coeur d'Alene* in a context outside of the unique land rights challenge in that case." *Williams, 954 F.3d at 739*.

Judges: Thomas M. Durkin, United States District Judge.

Opinion by: Thomas M. Durkin

Opinion

MEMORANDUM OPINION AND ORDER[1]

In this lawsuit alleging a price-fixing conspiracy in the chicken industry against more than 20 defendants, the Court appointed interim counsel to represent a putative class of direct-purchaser plaintiffs (the "DPPs" and their "Appointed Counsel"). *See* R. 144.[2] The Court approved settlements Appointed Counsel negotiated with six defendant corporate families, totaling $169,601,600.00, while the case continues to proceed against the remaining defendants.[3] Appointed Counsel have now moved for: an interim fee award; reimbursement of litigation expenses; and incentive awards to the five named class representatives. R. 4550. That motion is granted in accordance with this order.

Background

[1] This opinion and order, originally entered on November 30, 2021, has been amended to correct typographical errors in the total settlement fund amount and the attorney fee award amount. This amendment is entered nunc pro tunc to November 30, 2021.

[2] The Court appointed Lockridge Grindal Nauen P.L.L.P. and Pearson, Simon & Warshaw, LLP as Interim Co-Lead Counsel, and Hart, McLaughlin & Eldridge, LLC as Interim Liaison Counsel.

[3] This Court granted final approval to settlements with: Fieldale Farms Corporation on November 16, 2018, R. 1414; Amick Farms LLC on October 26, 2020, R. 3934; George's Inc., George's Farms, Inc. and Peco Foods, Inc. on October 27, 2020, R. 3944; and Pilgrim's Pride Corp., Tyson Foods, Inc., Tyson Chicken, Inc., Tyson Breeders, Inc., and Tyson Poultry, Inc. on June 29, 2021, R. 4789.

Without the benefit of a prior government investigation to guide them, Appointed Counsel filed the first complaint in this case in September 2016. Since then, the Court has appointed counsel for two additional classes and more than 100 entities have opted out of the classes to file their own direct actions. The more than 20 defendants are represented by some **[*35]** of the most prominent law firms in the country.

Appointed Counsel successfully defended the case against a significant motion to dismiss. They have shepherded the case through extensive discovery, as is recounted in the declaration supporting their motion, *see* R. 4552, and is reflected in the more than 5,000 docket entries that make up the case, including 16 scheduling orders. Appointed Counsel have briefed numerous motions, including a motion for class certification that is currently pending.

Appointed Counsel have been assisted by 20 other firms. Appointed Counsel and the assisting firms have submitted their hours for the Court's review on a quarterly basis. Their collective lodestar is 100,608.25 hours representing $50,928.159.75 in fees. *See* R. 4552 ¶ 24.

Appointed Counsel seek a fee award of one-third of the settlement total of $169,601,600.00, or $56,533,866.70. They also seek payment of $4.5 million of the $5,104,566.48 in litigation expenses they have incurred. And they seek a $25,000 incentive award for each of the five named plaintiffs.[4]

Analysis

It is customary for class counsel in large and complex cases to seek an interim fee award. *See, e.g., Kleen Prod. LLC v. Int'l Paper Co., 2017 U.S. Dist. LEXIS 183015, 2017 WL 5247928, at *4 (N.D. Ill. Oct. 17, 2017)*; *see also In re Endotronics, Inc., 1989 U.S. Dist. LEXIS 1141, 1989 WL 6746, at *1 (D. Minn. Jan. 30, 1989)* ("Untoward delay **[*36]** could discourage [class counsel] from engaging in matters such as these. The Court, therefore, must have discretion to award interim fees and costs."). The "starting point" for determining such an award is the "market rate" for such services. *In re Synthroid Mktg. Litig., 264 F.3d 712, 719 (7th Cir. 2001)*; *see also Silverman v. Motorola Sols., Inc., 739 F.3d 956, 957 (7th Cir. 2013)* ("[A]ttorneys' fees in class actions should approximate the market rate that prevails between willing buyers and willing sellers of legal services."); *Williams v. Rohm & Haas Pension Plan, 658 F.3d 629, 635 (7th Cir. 2011)* ("[T]he district court must try to assign fees that mimic a hypothetical *ex ante* bargain between the class and its attorneys."). Estimation of the market rate "is inherently conjectural," *In re Trans Union Corp. Priv. Litig., 629 F.3d 741, 744 (7th Cir. 2011)*, because "there is no market in class cases." Brian T. Fitzpatrick, *A Fiduciary Judge's Guide to Awarding Fees in Class Actions*, *89 Fordham L. Rev. 1151, 1155 (2021)*. But the Seventh Circuit has explained that the goal of approximating the market rate can be "informed by a number of factors, including: (1) the actual agreements between the parties as well as fee agreements reached by sophisticated entities in the market for legal services; (2) the risk of non-payment at the outset of the case; (3) the caliber of Class Counsel's performance; and [4] information from other cases, including fees awarded in comparable cases." *Hale v. State Farm Mut. Auto. Ins. Co., 2018 U.S. Dist. LEXIS 210368, 2018 WL 6606079, at *8 (S.D. Ill. Dec. 13, 2018)* (citing *Synthroid, 264 F.3d at 719* **[*37]**)).

A. Actual Agreements

Appointed Counsel in this case do not have a fee agreement with the named plaintiffs other than that they would take a percentage of any award. *See* R. 5048-1 ¶ 11, Fitzpatrick Decl. ("According to [Appointed Counsel], the representative class members signed retainer agreements that did not specify a fee percentage; they specified only that any fees would be awarded by the Court.").[5] However, 2,808 claims have been filed by potential class member

[4] The named plaintiffs are: Maplevale Farms, Inc.; John Gross and Company, Inc.; Ferraro Foods, Inc. and Ferraro Foods of North Carolina, LLC; Joe Christiana Food Distributors, Inc.; and Cedar Farms Co., Inc. *See* R. 4552 ¶ 36.

[5] Appointed Counsel submitted a declaration from Brian Fitzpatrick, who is a professor at Vanderbilt University Law School and has studied and written about class action litigation. *See* R. 5048-1. In addition to requesting further briefing from Appointed

entities in the class, the majority of whom are sophisticated business entities. *See id.*, Fitzpatrick Decl. ("In light of the sophistication of the class members, all of whom are businesses and some of whom are quite large, the conclusion that can be drawn from their decision not to object is that they favor the flat fee proposed by DPPs—not a sliding-scale fee."). None of them have objected to the fee award request. Courts have found that the lack of opposition by sophisticated business entities is evidence that the award is reasonable. *See* *Silverman, 739 F.3d at 959* (holding that for large, sophisticated investors, it would be "worth a complaint to the district judge if the lawyers' cut seems too high. Yet none of the institutional investors has **[*38]** protested."); *In re Dairy Farmers of Am., Inc., 80 F. Supp. 3d 838, 847 (N.D. Ill. 2015)* (observing, in finding that the requested one-third fee award was reasonable, that "the plaintiffs here are sizable, sophisticated entities capable of reviewing (and objecting to) the proposed fee arrangement"),

No other actual agreements have been presented to the Court. There is, however, case law describing court-ordered auctions in which potential class counsel bid for appointment. *See* *In re Cap. One Tel. Consumer Prot. Act Litig., 80 F. Supp. 3d 781, 800 (N.D. Ill. 2015)* (collecting cases, including *In re Amino Acid Lysine Antitrust Litig., 918 F. Supp. 1190 (N.D. Ill. 1996)*). The courts in *In re Amino Acid* and the other cases collected by *In re Capital One* sought fee award structure bids from attorneys hoping to represent the classes in those cases. The courts in those cases chose counsel who submitted declining fee scale award structures. (In other words, counsel proposed that their fee percentage decrease as the settlement amount increased.) These cases are relatively outdated, none being less than 20 years old. *See* R. 5048-1 ¶ 8, Fitzpatrick Decl. (court "experimentation with auctions has all but ceased"). But the Court is also aware that counsel for the End-User Plaintiff Class in this case bid a declining fee scale in other cases within the last ten years. *See* R. 5182 (citing *In re Lithium Ion Batteries Antitrust* ***[*39]*** *Litig.*, Case No. 13-MD-2420-YGR (N.D. Cal), Dkt. 2630-2; *In re Optical Disk Drive Prods. Antitrust Litig.*, Case No. 10-MD-2134-VRW (N.D. Cal) Dkt. 2900, reported in *In re Optical Disk Drive Antitrust Litig., 959 F.3d 922, 934 (9th Cir. 2020)*).

The Court does not put much stock in these examples. First, no other attorneys bid to be appointed counsel for the DPPs in this case. Without competition, a bid auction was not feasible. And without competition, no attorney would offer to take a case under a declining fee scale award structure.

Furthermore, the Seventh Circuit has explained that declining fee scale award structures do not reflect market realities and impose a perverse incentive "ensuring that at some point attorneys' opportunity cost will exceed the benefits of pushing for a larger recovery, even though extra work could benefit the client." *Synthroid, 264 F.3d at 721*; *see also* *Silverman, 739 F.3d at 957* ("[S]olvent litigants do not select their own lawyers by holding auctions, because auctions do not work well unless a standard unit of quality can be defined and its delivery verified. There is no 'standard quantity' of legal services, and verification is difficult if not impossible."). "Subsequent cases within the Seventh Circuit have similarly recognized that the auction concept is flawed[.]" R. 5050-1 **[*40]** at 17 n.15, Klonoff Decl. Of course, when confronted with a court ordered competitive auction that permits declining scale bids, some attorneys will likely make such a bid in order to win the auction. But for the reasons expressed by the Seventh Circuit, the Court questions whether it is appropriate to permit declining scale bids in an auction. Thus, cases with auctions that permitted such bids carry little weight in the Court's consideration here.

B. Risk of Non-Payment & Caliber of Class Counsel's Performance

A declining scale fee award structure might be appropriate in cases in which settlement is a more likely outcome and in which the "marginal costs" of increasing the settlement recovery amount are low. *See* *Silverman, 739 F.3d at 959*. As Professor Fitzpatrick surmised, this "may explain the use of [declining scale fee award structures] in the two [*Telephone Consumer Protection Act*] cases" the Court asked the parties to address. *See* R. 5048-1 at 17 n.6, Fitzpatrick Decl.

Counsel, the Court invited briefs from counsel for the other two putative classes in the case. The Commercial and Institutional Indirect Purchaser Class submitted a declaration by Robert Klonoff, who is a professor at Lewis & Clark Law School, and who has also studied and written about class action litigation. *See* R. 5050-1. The Court found both declarations very helpful and has relied on them in preparing this opinion and order.

The Court ordered the parties to address the use of declining sliding scale fee award structures in *Gehrich v. Chase Bank USA, N.A., 316 F.R.D. 215, 236 (N.D. Ill. 2016)*, and *In re Cap. One Tel. Consumer Prot. Act Litig., 80 F. Supp. 3d 781, 805 (N.D. Ill. 2015)*. *See* R. 4915. Unlike those cases in which "settlement was likely," *Gehrich, 316 F.R.D. at 230*, settlement in a complex antitrust case like this is far from a foregone conclusion. *See* R. 505-1 **[*41]** ¶ 37, Klonoff Decl. ("In terms of risk and complexity, TCPA cases are the polar opposite of the present case, a complicated multi-party antitrust conspiracy case.").[6] Appointed Counsel invested massive resources of time and money when no other counsel expressed interest, with little assurance of success. *See* *Silverman, 739 F.3d at 958* ("When this suit got under way, no other law firm was willing to serve as lead counsel. Lack of competition not only implies a higher fee but also suggests that most members of the securities bar saw this litigation as too risky for their practices."). As noted, no government investigation preceded the complaint in this case for Appointed Counsel to piggy-back. And Plaintiffs have been opposed by many defendants, including a number of very large and well-funded corporations, which have retained some of the most prominent and sophisticated law firms in the United States. The Court's 92-page decision denying the motions to dismiss was a relatively close call. Discovery proceeded while the motions to dismiss were briefed and decided, so Appointed Counsel was immediately incurring costs of time and money without any assurance of an award. Furthermore, issues raised in the motions to **[*42]** dismiss show that success on class certification and summary judgment, let alone trial, is no guarantee.

Appointed Counsel have devoted thousands of hours to this case. Their performance to date has been exemplary. The road to some of the settlements was eventually smoothed by later criminal indictments. But Appointed Counsel's work appears to have prompted the government investigations that led to those indictments, rather than the reverse. A substantial award is warranted here as a proper incentive for high quality counsel to take on complex cases, requiring a massive investment of time and money, with such a high risk of non-payment.

C. Fee Awards in Comparable Cases

The Seventh Circuit has recognized that academic studies of attorney fees awards in common fund class settlement cases reveal a declining percentage with the size of the settlement. *See* *Silverman, 739 F.3d at 959*. But as Professor Fitzpatrick noted, "these findings are based on fee awards from other Circuits . . . that are not even trying to capture how clients pay lawyers in the market like the Seventh Circuit does." R. 5048-1 at 20 n.7, Fitzpatrick Decl. These decisions are infected by default rules recommending smaller attorney fee award **[*43]** percentages for "megafunds." *See, e.g.,* *Wal-Mart Stores, Inc. v. Visa U.S.A., Inc., 396 F.3d 96, 123 (2d Cir. 2005)* (affirming a 6.5 percent fee award from a common fund over $3 billion, reasoning that "the sheer size of the instant fund makes a smaller percentage appropriate"); *Dial Corp. v. News Corp., 317 F.R.D. 426 (S.D.N.Y. 2016)* ("[I]n class actions where the recovered settlement fund runs into the multi-millions, courts typically decrease the percentage of the fees amount as the size of the fund increases."). The Seventh Circuit has expressly rejected a megafund rule because it is a perverse incentive. *See* *Synthroid, 264 F.3d at 718* (reversing district court's fee award in part because it imposed a lower fee percentage because the settlement fund was more than $100 million, holding that "[m]arkets would not tolerate that effect"). Clients generally want to incentivize their counsel to pursue every last settlement dollar, and a declining percentage award operates to the contrary. Thus, to the extent that courts in other circuits have awarded percentages smaller than what Appointed Counsel seek here, the Court finds those awards relatively unpersuasive.

Most persuasive are the large number of antitrust cases in this circuit that have awarded one-third of the common fund as attorney's fees. *See* R. 5050-1 at 45-46 (table citing cases), **[*44]** Klonoff Decl. The fact that fee awards in antitrust cases in this circuit are almost always one-third is a strong indication that this should be considered the "market rate." *See* R. 5048-1 ¶ 14, Fitzpatrick Decl. (in "a series of antitrust class actions . . . . recover[ing] more than $2 billion . . . . *not a single class member ever objected* to the fee request in any of these cases" showing that "sophisticated corporations are happy to play flat fees of 33.33% and they are happy to do so even in the largest

[6] Moreover, research by both Professors Fitzpatrick and Klonoff shows that the use of declining sliding scale fee awards in the Seventh Circuit is rare. *See* R. 5048-1 at 13 n.5, Fitzpatrick Decl.; R. 5050-1 at 26-31, Klonoff Decl.

cases."). There is simply little to no precedent recommending anything other than an award of 33 percent. With the only real evidence of the "market rate" being one-third, that is what the Court will award.

D. Expenses

Appointed Counsel seek $4.5 million out of $5,104,566.48 in expenses. Appointed Counsel "informed the class" that they would not seek to recover the full amount of their expenses at this time. *See* R. 4551 at 2 n.7. The request for $4.5 million in expenses is granted.

Expenses, however, should be deducted from the common fund before the fee award percentage is applied. The "ratio that is relevant to assessing the reasonableness of the attorneys' fee that the parties agreed **[*45]** to is the ratio of (1) the fee to (2) the fee plus what the class members received." *Redman v. RadioShack, 768 F.3d 622, 630 (7th Cir. 2014)*. Out-of-pocket costs, although paid through the settlement fund, are not benefits to the class and thus not part of "what the class members received." *Id.; see also In re Wells Fargo Sec. Litig., 157 F.R.D. 467, 471 (N.D. Cal. 1994)* ("If an attorney risks losing some portion of his fee award for each additional dollar in expenses he incurs, the attorney is sure to minimize expenses."). Therefore, Appointed Counsel will be paid fees of one-third of the settlement fund minus $4.5 million in expenses.

E. Named Plaintiff Incentive Awards

"Because a named plaintiff is an essential ingredient of any class action, an incentive award is appropriate if it is necessary to induce an individual to participate in the suit." *Cook v. Niedert, 142 F.3d 1004, 1016 (7th Cir. 1998)*. "To determine if an incentive award is warranted, a district court evaluates the actions the plaintiff has taken to protect the interests of the class, the degree to which the class has benefitted from those actions, and the amount of time and effort the plaintiff expended in pursuing the litigation." *Camp Drug Store, Inc. v. Cochran Wholesale Pharm., Inc., 897 F.3d 825, 834 (7th Cir. 2018)* (citing *Cook, 142 F.3d at 1016*). Incentive awards based on a percentage of the settlement fund "are disfavored, if not altogether forbidden." *See* William B. Rubenstein, 5 Newberg **[*46]** on Class Actions § 17:16 (5th ed. 2018); *see also In Re EpiPen Mktg., Sales Pracs. & Antitrust Litig., 2021 U.S. Dist. LEXIS 224272, 2021 WL 5369798, at *7 (D. Kan. Nov. 17, 2021)*.

The declarations submitted in support of incentive awards give no indication of the number of hours the named plaintiffs have spent on the case. Appointed Counsel relies on *Cook v. Niedert* in which the Seventh Circuit affirmed an incentive award of $25,000 per named plaintiff. *See* R. 4551 at 21 (citing *142 F.3d at 1016*). But in *Cook* the named plaintiff was an individual who "reasonably feared workplace retaliation" by "filing the suit." *Id. at 1016*. No such risk is present here, and the named plaintiffs are business entities, not individual people. Presumably, businesses serving as named plaintiffs for the DPP class believe that the chance of collecting from this lawsuit was worth the cost of participating in it. Litigation is convenient for no one. But business entities are in a much better position to devote time to a lawsuit and delegate the burdens among their officers and employees than a person who must bear the entire burden individually.

"Empirical evidence shows that incentive awards are now paid in most class suits and average between $10-$15,000 per class representative." *See* William B. Rubenstein, 5 Newberg on Class Actions § 17:1 (5th ed. 2018). Appointed Counsel cite **[*47]** one antitrust case from this district which awarded $15,000 to named plaintiffs from a $90 million settlement. *See In re Potash Antitrust Litig.*, No. 1:08-cv-06910 (ECF No. 589) (N.D. Ill. June 12, 2013). Without specific hour totals indicating a higher award is appropriate, and without evidence that the role of class representative imposed anything other than a professional (as opposed to a personal) burden, the Court will not ignore what appears to be a customary maximum of a $15,000 incentive award.

Conclusion

Therefore, Appointed Counsel's motion [4550] is granted as follows: (1) expenses are awarded in the amount of $4.5 million; (2) incentive awards in the amount of $15,000 are awarded to each of the five class representatives; and (3) fees are awarded in the amount of $55,008,866.67, which is one third of the settlement fund after deducting the expenses and incentive awards.

LexisNexis® Headnotes

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Boycotts

HN1[] **Horizontal Refusals to Deal, Boycotts**

A group boycott occurs when multiple producers refuse to sell goods or services to a particular consumer.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN2[] **Remedies, Damages**

To plead a Sherman Act claim, a private plaintiff must show that it is a proper party to pursue the claim—a requirement known as antitrust standing. Although buyers who pay collusive overcharges (direct purchasers) ordinarily have antitrust standing to challenge a horizontal price-fixing scheme, buyers who are priced out the market—and hence do not purchase the product or pay the overcharge—ordinarily do not. A nonpurchaser's injury is less direct than the injuries of actual purchasers and highly speculative.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN3[] **Standards of Review, De Novo Review**

Dismissal for failure to state a claim is reviewed de novo. To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Antitrust standing is a question of law reviewed de novo.

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN4[] **Standing, Injury in Fact**

To establish constitutional standing, a plaintiff must show (i) that he suffered an injury in fact that is concrete, particularized, and actual or imminent; (ii) that the injury was likely caused by the defendant; and (iii) that the injury would likely be redressed by judicial relief.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN5[] **Clayton Act, Claims**

Section 1 of the Sherman Act prohibits unreasonable restraints of trade. Actions for damages, like this one, are authorized by § 4 of the Clayton Act. Despite the apparent breadth of the phrase any person, the U.S. Supreme Court has held that Congress did not intend to afford a remedy to everyone injured by an antitrust violation simply on a showing of causation. Instead, the plaintiff must have antitrust standing.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN6[] **Standing, Requirements**

Courts have identified certain factors for determining whether a plaintiff who has borne an injury has antitrust standing: (1) the nature of the plaintiff's alleged injury; that is, whether it was the type the antitrust laws were intended to forestall; (2) the directness of the injury; (3) the speculative measure of the harm; (4) the risk of duplicative recovery; and (5) the complexity in apportioning damages. These five factors are illustrative rather than exhaustive.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN7[] **Standing, Requirements**

To conclude that there is antitrust standing, a court need not find in favor of the plaintiff on each factor. Instead, we balance the factors,, recognizing that antitrust standing involves a case-by-case analysis. Most cases will find some factors tending in favor of standing (to a greater or lesser degree), and some against (also in varying degrees), and a court may find standing if the balance of factors so instructs. Nevertheless, the first factor—antitrust injury—is mandatory.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN8[] **Standing, Requirements**

Courts have identified four requirements for antitrust injury: (1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Evidence > Burdens of Proof > Allocation

HN9[] **Standing, Requirements**

The antitrust injury requirement is satisfied where the plaintiff shows that it stands to suffer, not gain, from the defendant's unlawful conduct.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN10[] **Standing, Requirements**

Under the third requirement for antitrust injury, it is not enough that the plaintiff's claimed injury flows from the unlawful conduct. An antitrust injury must flow from that which makes defendants' acts unlawful.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN11[] **Anticompetitive & Predatory Practices, Predatory Pricing**

The plaintiff's injury must be of the type the antitrust laws were intended to prevent. The U.S. Supreme Court has made clear that injuries which result from increased competition or lower (but non-predatory) prices are not encompassed by the antitrust laws. Thus, if the injury flows from aspects of a defendant's conduct that are beneficial or neutral to competition, there is no antitrust injury, even if the defendant's conduct is illegal.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN12[] **Per Se Rule & Rule of Reason, Sherman Act**

The goal of the Sherman Act is to distinguish between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN13[] **Standing, Requirements**

The second factor in the antitrust standing inquiry looks to whether the plaintiff's alleged injury was the direct result of the defendant's allegedly anticompetitive conduct. This factor focuses on the chain of causation between the plaintiff's injury and the alleged restraint of trade. The harm may not be derivative and indirect or secondary, consequential, or remote.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN14[] **Standing, Requirements**

Nonpurchasers who are priced out of the market, however, present a special problem, due to the speculative nature of the harm. Courts require a reasonable level of certainty before they will confer antitrust standing on such consumers.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN15[] Standing, Requirements

Under Montreal Trading a regular course of dealing exception makes sense only if that course of dealing occurred in a competitive market.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN16[] Remedies, Damages

The speculative measure of harm factor in the antitrust standing inquiry considers whether the plaintiff's damages are only speculative.

Summary:

SUMMARY[**]

Antitrust

The panel affirmed the district court's dismissal, for failure to state a claim, of an antitrust action brought by the City of Oakland against the National Football League and its member teams.

The City alleged that defendants created artificial scarcity in their product of NFL teams, and then used that scarcity to demand supra-competitive prices from host cities. The City alleged that when it could not pay those prices, defendants punished it by allowing the Raiders to move to Las Vegas.

The panel held that the City had Article III standing because it plausibly alleged that, but for defendants' conduct, it would have retained the Raiders, and thus made the required showing that its injury was likely caused by defendants.

Affirming the district court's dismissal, the panel held that defendants' conduct did not amount to an unreasonable restraint of trade in violation of § 1 of the Sherman Act. The panel held that the City failed sufficiently to allege a group boycott, which occurs when multiple producers refuse to sell goods or services to **[**2]** a particular customer. Here, the City alleged only that a single producer, the Raiders, refused to deal with it. The panel held that the City also failed sufficiently to allege statutory standing on a theory that defendants' conduct constituted an unlawful horizontal price-fixing scheme. The panel held that a finding of antitrust standing requires a balancing of the nature of the plaintiff's alleged injury, the directness of the injury, the speculative measure of the harm, the risk of duplicative recovery, and the complexity in apportioning damages. The panel reasoned that here, the City was priced out of the market and therefore was a nonpurchaser. In addition, the City's damages were highly speculative and would be exceedingly difficult to calculate.

[**] This summary constitutes no part of the opinion of the court. It has been prepared by court staff for the convenience of the reader.

Concurring, Judge Bumatay wrote that he would hold that the price-fixing claim was too speculative to satisfy the threshold of constitutional standing. He wrote that the City did not show that its injury was fairly traceable to defendants' challenged conduct, but rather relied on speculation upon speculation to connect its injury of the Raiders leaving for Las Vegas to the NFL's entry rule. Judge Bumatay thus concurred in the court's **[**3]** judgment and joined Parts I, II, and III.B of the majority opinion.

Opinion by: A. Wallace Tashima

Opinion

[*447] TASHIMA, Circuit Judge:

[*448] Plaintiff City of Oakland (the "City") alleges that the National Football League ("NFL") and its thirty-two member teams (collectively, "Defendants") have "created artificial scarcity in their product (NFL teams), and then used that scarcity . . . to demand supra-competitive prices from host cities." First Am. Compl. ("FAC" or "complaint") FAC ¶ 1.[1] It further alleges that, "[w]hen Oakland could not pay those prices, Defendants punished the city: they voted to allow the Raiders to move to Las Vegas, which left Oakland without an NFL team and caused significant losses to Oakland." FAC ¶ 2. The City contends that Defendants' conduct amounts to an unreasonable restraint of trade in violation of *§ 1 of the Sherman Act, 15 U.S.C. § 1*, on two independent bases: First, because it constitutes an unlawful group boycott, and second, because it constitutes an unlawful horizontal price-fixing scheme. The district court dismissed the City's Sherman Act claim for failure to state a claim upon which relief **[**5]** may be granted. *See* *City of Oakland v. Oakland Raiders, 445 F. Supp. 3d 587, 606 (N.D. Cal. 2020)*; *Fed. R. Civ. P. 12(b)(6)*. We affirm.

We agree with the district court that the City has failed to allege a group boycott. ***HN1***[] A group boycott occurs when *multiple* producers refuse to sell goods or services to a particular consumer. Although the City alleges

---

[*] The Honorable Douglas L. Rayes, United States District Judge for the District of Arizona, sitting by designation.

[1] The NFL is "an association of 'separately owned professional football teams.'" *In re Nat'l Football League's Sunday Ticket Antitrust Litig., 933 F.3d 1136, 1144 (9th Cir. 2019)* (quoting *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 187, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)*).

collective action (*i.e.*, that the other NFL teams supported the Raiders' boycott), it has not alleged a *group* boycott. The City has alleged only that a single producer—the Raiders—refused to deal with the City.

The City's horizontal price fixing theory fails as well. ***HN2***[] To plead a *Sherman Act* claim, a private plaintiff must show that it is a proper party to pursue the claim—a requirement known as antitrust standing. Although buyers who pay collusive overcharges (direct purchasers) ordinarily have antitrust standing to challenge a horizontal price-fixing scheme, buyers, like the City, who are priced out the market—and hence do **[*449]** not purchase the product or pay the overcharge—ordinarily do not. A nonpurchaser's injury is less direct than the injuries of actual purchasers and highly speculative: we cannot know whether, in the absence of Defendants' restrictions on output, the nonpurchaser would have made a purchase and, if so, under what terms. In addition, **[**6]** the City's damages are highly speculative and would be exceedingly difficult to calculate. We therefore agree with the district court that the City has failed to allege antitrust standing on its horizontal price fixing theory of liability.

I.[2]

In 1995, the Oakland Raiders professional football team signed an agreement to play in the Oakland-Alameda County Coliseum ("Coliseum"). FAC ¶ 102. Under the terms of the agreement, the Raiders leased the Coliseum for a period of sixteen years, with an annual rent of $50,000; the City offered the Raiders a $31.9 million relocation and operating loan; the City committed up to $10 million toward the construction of a new training facility; the City offered up to $85 million toward stadium modernization efforts; and the Raiders agreed to a $1 surcharge on ticket sales, with the proceeds to benefit Oakland public schools and other public services. FAC ¶ 102. The Raiders extended the lease in 2009 and again in 2014. FAC ¶¶ 107, 112.

In the years that followed, the City negotiated with the Raiders in an unsuccessful attempt to keep the team in Oakland. In 2014, the City proposed donating land to the Raiders for a new stadium. FAC ¶ 113. **[**7]** In 2015, the City proposed a $500 million renovation of the Coliseum, to which the City would have contributed significantly. FAC ¶ 113. In 2016, the City supported a proposal to build a new $1.3 billion stadium in Oakland, financed by $350 million in public funds, $400 million from an investment group led by former NFL players Ronnie Lott and Rodney Peete, and $500 million from the Raiders. FAC ¶ 121. The City alleges that the Raiders and the NFL engaged in these negotiations in bad faith. According to the complaint, "[t]he Raiders, the NFL, and ultimately, the vast majority of NFL Clubs, were just stringing Oakland along as part of their collusive scheme to relocate the Raiders." FAC ¶ 23.

In 2017, the Raiders filed an application with the NFL to relocate the team to Las Vegas. FAC ¶ 124. The NFL teams voted thirty-one to one to approve the relocation. FAC ¶ 132. The complaint alleges that the move benefitted the Raiders and the other NFL teams alike. The Raiders moved to a new, $1.9 billion stadium in Las Vegas, financed by $750 million in public funds, FAC ¶¶ 5, 149, and the team's enterprise value more than doubled to $3 billion, FAC ¶¶ 5, 63. The other teams, meanwhile, divided **[**8]** a $378 million relocation fee paid by the Raiders, FAC ¶ 66, and, due to revenue sharing among NFL teams, stand to share in "new television rights in a new geographic territory, new merchandising, new intellectual property and game receipts from an ultra-luxury $1.9 billion stadium," FAC ¶¶ 4, 66.

In 2018, the City commenced this action against the NFL, the Raiders, and the other thirty-one NFL teams, alleging an antitrust violation under *§ 1 of the Sherman Act, 15 U.S.C. § 1*, as well as breach **[*450]** of contract and unjust enrichment claims under California law. FAC ¶¶ 218-42. The complaint seeks declaratory and monetary relief, including treble damages under *§ 4 of the Clayton Act, 15 U.S.C. § 15(a)*.

[2] Because the district court dismissed the City's Sherman Act claim under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*, we recite the facts as they appear in the City's complaint. *See* *Padilla v. Yoo, 678 F.3d 748, 751 n.1 (9th Cir. 2012)* ("We emphasize that this factual background is based only on the *allegations* of the plaintiffs' complaint. Whether the plaintiffs' allegations are in fact true has not been decided in this litigation, and nothing we say in this opinion should be understood otherwise.").

With respect to the *Sherman Act* claim, which is the focus of this appeal, the complaint alleges that

> [t]he relevant market in this action is the market for hosting NFL teams. The consumers in this market are all Host Cities offering, and all cities and communities that are willing to offer (*i.e.*, potential Host Cities), home stadia and other support to major league professional football teams in the geographic United States. The product in this market is the NFL team, as a hosted entity.

FAC ¶ 189. The City alleges that this market is anticompetitive because the **[**9]** NFL limits both the number of teams and the freedom of teams to relocate: NFL rules permit neither league expansion nor team relocation without the approval of three-fourths of the NFL's teams. FAC ¶ 66. The complaint further alleges that these policies and practices artificially restrict the number of teams, driving up the prices demanded of and paid by host cities. As incumbent and aspiring host cities compete with one another, they are forced to pay supracompetitive prices to retain or acquire teams, usually in the form of publicly financed stadia. The complaint alleges that in a competitive market—with more teams and fewer restrictions on relocation—teams would instead compete for host cities, driving down prices: "Because all viable locations would have a team, team owners would not be able to make threats about leaving their current Host Cities. In fact, the tables would take a dramatic turn: teams actually would compete for financially viable locations." FAC ¶ 47 (quoting R. Fort, *Market Power in Pro Sports: Problems and Solutions*, 13-14, *in The Economics of Sports* (W. Kern ed., 2000)). The complaint maintains that, "[i]n a competitive market, demanding a new stadium would be **[**10]** a risky move for any team owner: the Host City could reject the demand and seek out a new team willing to play in the existing stadium." FAC ¶ 145.

The City's contention that, in a competitive market, the Raiders would have stayed in Oakland rests on three premises. First, the City alleges that there would be more NFL teams in a competitive market. According to the complaint, Defendants "artificially restrict the supply of its product (NFL teams) even though consumer demand in the market could support greater output (more teams)." FAC ¶ 9. "[F]ocusing on factors of wealth and population," the City contends that "the current NFL could support as many as 42 teams in the United States." FAC ¶ 43. Second, the City asserts that Oakland is a highly attractive market:

> A recent economic analysis conducted by Dr. Daniel Rascher, Professor and Director of Academic Programs for the Sport Management Program at the University of San Francisco, commissioned by Oakland focused on which U.S. cities, currently without an NFL team, best reflect the demographic and financial conditions of existing Host Cities and are the best prospects for new NFL franchises. The winner? ***Oakland***. Focusing on total population, **[**11]** real income, percentage of NFL "super fans," and existing stadia support, Oakland was the highest rated city for NFL expansion.

FAC ¶ 138. Third, the City alleges that "without the NFL's cartel structure and rigid control over output (league expansion), the Raiders would have had virtually no relocation 'extortion' threat to exercise." FAC ¶ 92.

[*451] The City contends that Defendants' conduct violates the *Sherman Act* on horizontal price-fixing and group boycott theories. First, the City contends that Defendants have engaged in a group boycott, also known in ***antitrust law*** as a concerted refusal to deal. The complaint alleges that "[t]he decision to remove a team from a Host City, combined with the decision to deny that same City a new expansion franchise, constitutes a collective refusal to deal with, or a group boycott of, the City." FAC ¶ 140. Second, the City contends that Defendants, as a cartel, have engaged in a classic horizontal price-fixing scheme. FAC ¶ 146. By "constrain[ing] the supply of NFL teams," the NFL "is driving up the price of hosting an NFL team far beyond the marginal costs of operating an NFL team and far beyond the price that would be found in a competitive marketplace." FAC **[**12]** ¶¶ 145-46.

The complaint asserts that the City lost the Raiders for two reasons. First, the City alleges that it was priced out of the market: "Because it could not pay Defendants' supra-competitive prices, Oakland lost the Raiders and any chance to host an NFL team." FAC ¶ 51. Second, because Defendants believed moving the Raiders to Las Vegas was in their economic interest, they refused to negotiate with the City in good faith.

The complaint alleges that Defendants' conduct—and the loss of the Raiders—has injured the City in several ways: lost investment value arising from the tens of millions of dollars the City borrowed to improve the Coliseum and build a training facility, FAC ¶¶ 201-03; lost income, including the $1 ticket surcharge dedicated to public education and the rental monies the Raiders paid for use of the Coliseum, FAC ¶¶ 204-05; lost tax revenues from ticket sales, concessions, stadium parking, player compensation, and merchandising associated with Raiders games, FAC ¶¶ 206-10; and devaluation of the Coliseum property, which the City and Alameda County jointly own, FAC ¶¶ 211-17.

The district court dismissed the City's Sherman Act claim with prejudice under *Rule 12(b)(6)* and declined **[**13]** to exercise supplemental jurisdiction over the state-law claims. The court concluded that the City's alleged injuries were too speculative to confer antitrust standing because the City "had not plausibly alleged that, but for the limited number of teams, Oakland would still have an NFL team." *City of Oakland, 445 F. Supp. 3d at 601*. The court also rejected the City's group boycott theory on the ground that the City had "not alleged that any NFL team besides the Raiders has refused to deal with Oakland, or that the NFL has prohibited any team from dealing with Oakland." *Id. at 605-06*. Following the entry of judgment, the City timely appealed.

HN3[] "Dismissal for failure to state a claim is reviewed *de novo*." *Barrett v. Belleque, 544 F.3d 1060, 1061 (9th Cir. 2008)* (per curiam). "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* "Antitrust standing is a question of law reviewed de novo." *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1054 (9th Cir. 1999)*.

[*452] III.

A. Article III Standing

We begin by addressing Defendants' argument that the City lacks Article **[**14]** III standing.[3] ***HN4***[] To establish constitutional standing, "a plaintiff must show (i) that he suffered an injury in fact that is concrete, particularized, and actual or imminent; (ii) that the injury was likely caused by the defendant; and (iii) that the injury would likely be redressed by judicial relief." *TransUnion LLC v. Ramirez, 141 S. Ct. 2190, 2203, 210 L. Ed. 2d 568 (2021)* (citing *Lujan v. Defs. of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*).

Defendants focus on the second requirement, contending that the City's "purported injury cannot 'fairly . . . be traced' to the NFL's rules requiring existing teams to approve league expansion," because the City relies on "a long and speculative chain of causation." Specifically, Defendants emphasize that the City does not "allege that any team sought to play in the NFL and was denied admission," "that if there were an additional team, it would have played in Las Vegas thereby foreclosing the Raiders' move there," "that if there were additional teams and one of them might have played in Las Vegas, the Raiders would have stayed in Oakland rather than move to another city with a more attractive stadium or better economics," or "that it made any effort to attract an existing franchise or new expansion team to replace the Raiders in Oakland since learning in 2016 of the Raiders' **[**15]** plans to leave."

We agree with Defendants that the City relies on a somewhat speculative chain of causation. As we explain in Part III.C, *infra*, this fact plays a significant role in our analysis of the City's *statutory* standing. To establish constitutional standing, however, the City need not establish to a certainty that, but for Defendants' challenged conduct, it would have retained the Raiders or acquired another team. It need only plausibly allege that, but for that conduct, there is

[3] Although Defendants did not challenge the City's constitutional standing in the district court, the issue "may be raised at any time, even for the first time on appeal." *DBSI/TRI IV Ltd. P'ship v. United States, 465 F.3d 1031, 1038 (9th Cir. 2006)*.

a "substantial probability" that it would have done so. *See Warth v. Seldin, 422 U.S. 490, 504, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)*; *Nat'l Fam. Farm Coal. v. U.S. Env't Prot. Agency, 966 F.3d 893, 908 (9th Cir. 2020)*; *Legal Aid Soc'y of Alameda Cnty. v. Brennan, 608 F.2d 1319, 1334-35 (9th Cir. 1979)*. That standard is satisfied here. The City credibly alleges that Oakland is a prime location for an NFL team, that there would be more NFL teams in a market driven by consumer demand, and that—in a competitive market—teams like the Raiders would not be able to use a threat of relocation to demand supracompetitive concessions from host cities. Specifically, Oakland is an incumbent host city. FAC ¶ 1. The City further alleges that in the absence of Defendants' challenged actions (*i.e.*, in a competitive market), there would be more teams in the NFL FAC ¶¶ 1, 9, 39, 43-44, 67, 69, 197, 199; that in the absence of Defendants' challenged actions, **[**16]** Defendants would not be able to threaten relocation, FAC ¶¶ 16, 145, or demand supracompetitive prices from host cities, FAC ¶¶ 5, 10, 14, 47, 49, 57, 149, 198; that Oakland was willing and able to pay competitive prices to retain the Raiders, FAC ¶¶ 4, 65, 121-22, 128-31; that Oakland is a highly desirable host city for an NFL team, FAC ¶¶ 5, 26. 127,138; that NFL relocation policies favor a team's home territory over relocation, FAC ¶¶ 21, 89-90, 167; that the Raiders were financially successful in Oakland, received significant **[*453]** financial support from the City, and had one of the most loyal fan bases in the NFL, FAC ¶ 22; that Oakland lost the Raiders solely because it was unable to pay supracompetitive prices, FAC ¶¶ 51, 133, 150-51; and that, in a competitive market, the Raiders would have stayed in Oakland or Oakland would have landed another team, FAC ¶¶ 16, 92.

These allegations are sufficiently plausible to allege that there is a "substantial probability" that the Raiders would have stayed in Oakland if not for Defendants' challenged conduct. This is not a case in which the plaintiff's theory of standing is either "counterintuitive" or premised on "a 'highly attenuated chain **[**17]** of possibilities.'" *California v. Texas, 141 S. Ct. 2104, 2119, 210 L. Ed. 2d 230 (2021)* (quoting *Clapper v. Amnesty Int'l USA, 568 U.S. 398, 410, 133 S. Ct. 1138, 185 L. Ed. 2d 264 (2013)*).[4]

B. Group Boycott[5]

As stated above, the complaint alleges a violation of the *Sherman Act* on two alternative theories—horizontal price fixing and group boycott. The district court rejected the group boycott theory on the ground that the City "has not alleged that any NFL team besides the Raiders has refused to deal with Oakland, or that the NFL has prohibited any team from dealing with Oakland or set any 'agreed terms' that Oakland must meet to attract a new or different team." *City of Oakland, 445 F. Supp. 3d at 605-06*. The City contends that the complaint adequately states a claim on a group boycott theory because it alleges that "it is the NFL owners *acting collectively* (not individual teams) who

---

[4] Defendants' reliance on *City of Rohnert Park v. Harris, 601 F.2d 1040 (9th Cir. 1979)*, is misplaced. There, the city's assertion that a regional shopping center would have been developed in the city absent the defendants' challenged conduct was "entirely speculative." *Id. at 1045*. That is not the case here.

[5] "The classic 'group boycott' is a concerted attempt by a group of competitors at one level to protect themselves from competition from non-group members who seek to compete at that level"—something that is not alleged here. *Phil Tolkan Datsun, Inc. v. Greater Milwaukee Datsun Dealers' Advert. Ass'n, 672 F.2d 1280, 1284 (7th Cir. 1982)* (quoting *Smith v. Pro Football, Inc., 593 F.2d 1173, 1178, 193 U.S. App. D.C. 19 (D.C. Cir. 1978)*); *see also* Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶¶ 2003i, 2200a (4th and 5th eds. 2013-2020) ("Areeda & Hovenkamp"). "The term group boycott," however, "is in reality a very broad label for divergent types of concerted activity," *Phil Tolkan Datsun, 672 F.2d at 1285* (quoting *Mackey v. Nat'l Football League, 543 F.2d 606, 619 (8th Cir. 1976)*, *overruled on other grounds as stated in Eller v. Nat'l Football League Players Ass'n, 731 F.3d 752, 755 (8th Cir. 2013)*), and the Supreme Court has recognized group boycotts aimed directly at consumers, *e.g., St. Paul Fire & Marine Ins. Co. v. Barry, 438 U.S. 531, 544, 98 S. Ct. 2923, 57 L. Ed. 2d 932* ("[T]he *Sherman Act* makes it an offense for [businessmen] to agree among themselves to stop selling to particular customers." (alteration in original) (quoting *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, 340 U.S. 211, 214, 71 S. Ct. 259, 95 L. Ed. 219 (1951)*, *overruled on other grounds by Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*)). For purposes of our analysis, therefore, we assume that a concerted refusal to deal with a consumer or consumers states a cognizable "group boycott" claim under *§ 1 of the Sherman Act*.

decide whether and where a particular team may relocate and . . . Defendants made a '*collective* decision to move the Raiders to Las Vegas.'" We disagree.

Collective action in support of an individual boycott is not the same as a group boycott. The City's allegations, taken as true, show only that *the Raiders* boycotted the City and that the other Defendants supported **[**18]** the Raiders' boycott. **[*454]** The other teams did not "boycott" the City. The FAC does not allege that they, or any of them, refused to "sell" to the City.

The group boycott cases upon which the City relies involve circumstances in which *multiple* producers refused to sell their goods or services to consumers. In *FTC v. Superior Court Trial Lawyers Ass'n., 493 U.S. 411, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)*, the Supreme Court recognized a viable group boycott claim where "*a group of lawyers* agreed not to represent indigent criminal defendants in the District of Columbia Superior Court until the District of Columbia government increased the lawyers' compensation." *Id. at 422-23* (emphasis added). The Supreme Court explained that these lawyers, as a group, had engaged in "a concerted refusal to serve an important customer in the market for legal services." *Id. at 423*. And in *St. Paul Fire & Marine Insurance Co., 438 U.S. at 543-45*, the Court recognized a group boycott claim where *three medical malpractice insurers* refused to offer coverage to the policyholders of a fourth insurer in order to force the policyholders into agreeing to coverage by the fourth insurer on the fourth insurer's terms. As these cases reflect, a group boycott occurs when "*two or more competitors* . . . refuse to do business with one firm." *Group boycott*, Black's Law Dictionary (11th ed. 2019) **[**19]** (emphasis added); *see* *Seagood Trading Corp. v. Jerrico, Inc., 924 F.2d 1555, 1568 (11th Cir. 1991)* ("[T]he distinguishing feature of such cases is a plurality of refusals to deal by different parties."); *Constr. Aggregate Transp., Inc. v. Fla. Rock Indus., Inc., 710 F.2d 752, 773 (11th Cir. 1983)* ("[I]t is important to remember that a concerted refusal to deal essentially is an agreement among two or more parties that each will engage in an individual refusal to deal with a particular customer or customers. In the case before us, however, we have only one business entity refusing to deal with the plaintiff . . . . That [a second business entity] may have instigated [the first entity's] refusal to deal does not create the plurality of 'refusals' necessary for the arrangement to be called a group boycott."). Here, the other NFL teams simply supported the Raiders' refusal to deal with the City, but did not themselves refuse to do business with the City. The City, therefore, although it has alleged an individual boycott, has not alleged a group boycott.[6]

The City alternatively contends that it has alleged a group boycott because the other teams supported the Raiders' relocation threat by agreeing among themselves that they would neither relocate to Oakland nor allow an expansion team to locate there if the City refused to accede to the Raiders' demands **[**20]** for a new stadium. FAC ¶ 140. A law review article upon which the City relies describes this group boycott theory as follows:

> [G]iven the artificial scarcity of teams and the difficulty of new entry, threats to relocate are more than the action of an individual economic entity; rather, every threat to relocate is also an implicit threat of a concerted boycott. A group boycott exists when individual economic actors agree to refrain from dealing with another entity in order to gain some competitive advantage, in this case the advantage of favorable subsidies to build or renovate new stadiums. . . . Translation: If Houston does not pay the price demanded by the Oilers, no other NFL team will deal with the city.

[*455] David Haddock, Tonga Jacobi & Matthew Sag, *League Structure & Stadium Rent-Seeking—the Role of Antitrust Revisited*, *65 Fla. L. Rev. 1, 50-51 (2013)*. This may be a viable theory of group boycott (a question we need not reach), but it fails here because the City has not proffered any specific allegations to suggest that such an agreement in fact existed in this case. As the district court explained, "[c]ertain commentators' view that 'a threat by an individual team to relocate *may* comprise an *implicit* threat of **[**21]** concerted boycott' does not, without more, show that such a boycott in fact occurred." *City of Oakland, 445 F. Supp. 3d at 606*. The City's allegation is therefore too speculative to cross the plausibility threshold.

---

[6] We do not decide whether the collective action of which the City complains could be actionable under *§ 1 of the Sherman Act* on any other theory. We hold only that the conduct of which the City complains does not allege a group boycott.

C. Horizontal Price Fixing: Antitrust Standing

Because the City's group boycott theory fails to state a claim, the viability of the City's Sherman Act claim turns on its horizontal price-fixing theory. As set forth below, we hold that the City's price-fixing theory fails as well, for lack of antitrust standing.[7]

HN5[] *Section 1 of the Sherman Act* prohibits unreasonable restraints of trade. *In re NFL's Sunday Ticket Antitrust Litig., 933 F.3d at 1149*.[8] Actions for damages, like this one, are authorized by *§ 4 of the Clayton Act*.[9] "Despite the apparent breadth of the phrase 'any person,' the Supreme Court has held that Congress did not intend to afford a remedy to everyone injured by an antitrust violation simply on a showing of causation." *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 987 (9th Cir. 2000)*. Instead, the plaintiff must have "antitrust standing." *Id.*

HN6[] We have "identified certain factors for determining whether a plaintiff **[**22]** who has borne an injury has antitrust standing":

> (1) the nature of the plaintiff's alleged injury; that is, whether it was the type the antitrust laws were intended to forestall;
> (2) the directness of the injury;
> (3) the speculative measure of the harm;
>
> (4) the risk of duplicative recovery; and
>
> (5) the complexity in apportioning damages.

Am. Ad Mgmt., 190 F.3d at 1054.[10]

---

[7] Because we affirm the dismissal of the City's group boycott theory on other grounds, we need not address whether our analysis of antitrust standing with respect to the City's price-fixing theory applies as well to the City's group boycott theory.

[8] The City does not contend that the challenged practices are per se unlawful.

[9] *Section 4(a)* provides:

> [A]ny person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor . . . and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

15 U.S.C. § 15(a).

[10] These five factors are illustrative rather than exhaustive. In *R.C. Dick Geothermal Corp. v. Thermogenics, Inc., 890 F.2d 139, 146 (9th Cir. 1989)* (en banc), for example, we articulated five different factors that, although largely overlapping with those identified in *American Ad Management*, included two factors that we did not specifically mention in *American Ad Management*: "[t]he specific intent of the alleged conspirators" and "[t]he existence of other, more appropriate plaintiffs." We nevertheless rely on the *American Ad Management* factors to frame our analysis. Among other virtues, they adhere closely to the factors identified by Areeda and Hovenkamp in their influential treatise on ***antitrust law***:

> Unlike the United States government, which is authorized to sue anyone who violates the antitrust laws, a private antitrust plaintiff must show "standing" to sue. In addition to proving everything that would entitle the government to relief, the private plaintiff must also show (1) that the acts violating the antitrust laws caused—or, in an equity case, threatened to cause—it injury-in-fact to its "business or property;" (2) that this injury is not too remote or duplicative of the recovery of a more directly injured person; (3) that such injury is "antitrust injury," which is defined as the kind of injury that the antitrust laws were intended to prevent and "flows from that which makes defendants' acts unlawful"; and, in a damage case, (4) that the damages claimed or awarded measure such **[**23]** injury in a reasonably quantifiable way.

Areeda & Hovenkamp ¶ 335 (footnotes omitted). Although *American Ad Management* did not mention the requirement that a plaintiff show injury to its "business or property," that is indisputably an additional requirement for antitrust standing under *§ 4 of*

HN7[] "To conclude that there is antitrust standing, a court need not find in **[*456]** favor of the plaintiff on each factor." Id. at 1055. "Instead, we balance the factors," *id.*, recognizing that "[a]ntitrust standing involves a case-by-case analysis," Amarel v. Connell, 102 F.3d 1494, 1507 (9th Cir. 1996) (as amended). "Most cases will find some factors tending in favor of standing (to a greater or lesser degree), and some against (also in varying degrees), and a court may find standing if the balance of factors so instructs." L.A. Mem'l Coliseum Comm'n v. Nat'l Football League, 791 F.2d 1356, 1363 (9th Cir. 1986). Nevertheless, the first factor—antitrust injury—is mandatory. *See* Am. Ad Mgmt., 190 F.3d at 1055 ("[T]he Supreme Court has noted that '[a] showing of antitrust injury is necessary, but not always sufficient, to establish standing under § 4.'" (second alteration in original) (quoting Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 110 n.5, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986))); *see also* Big Bear Lodging Ass'n v. Snow Summit, Inc., 182 F.3d 1096, 1102 (9th Cir. 1999) ("To have standing to bring an antitrust case, a plaintiff must demonstrate that the harm the plaintiff has suffered or might suffer from the practice is an 'antitrust injury,' that is, an 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" (quoting Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990))). Applying these principles here, we conclude that, although the City has alleged antitrust **[**24]** injury, it has not alleged antitrust standing generally.

1. Antitrust Injury

HN8[] We have identified "four requirements for antitrust injury: (1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent." Am. Ad Mgmt., 190 F.3d at 1055.

The City has adequately alleged the first requirement—unlawful conduct. The City alleges that Defendants, operating as a cartel, have restricted the number of NFL teams and demanded supracompetitive prices from host cities. These allegations are sufficient. *See, e.g.,* NCAA v. Bd. of Regents of Univ. of Okla., 468 U.S. 85, 107-08, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984) ("Restrictions on price and output are the paradigmatic examples of restraints of trade that the Sherman Act was intended to prohibit."); Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1434 (9th Cir. 1995) ("If the plaintiff puts forth evidence of restricted output and supracompetitive prices, that is direct proof of . . . injury to competition . . . .").

The City has adequately alleged the second requirement—injury—as well. HN9[] This requirement is satisfied where the **[*457]** plaintiff shows that it "stands to suffer, not gain," from the defendant's unlawful conduct. Am. Ad Mgmt., 190 F.3d at 1056. That is the case here. The City plausibly alleges that, but for Defendants restrictions on output, the Raiders would **[**25]** have stayed in Oakland, or another NFL team would have located there. The City alleges, moreover, that the loss of the Raiders has caused the City economic loss, including reduced tax revenues.

HN10[] Under the third requirement, "[i]t is not enough that the plaintiff's claimed injury flows from the unlawful conduct. An antitrust injury must 'flow[ ] from that which makes defendants' acts unlawful.'" *Id.* (second alteration in original). The complaint again satisfies this requirement here. The City's alleged injuries stem from the loss of the Raiders, and the City plausibly alleges that the Raiders left Oakland because of Defendants' allegedly unlawful restriction on output. The City also credibly asserts that, in a world with more teams, there might have already been a team in Las Vegas, blocking the Raiders' move there, and that, in a competitive market with more teams, the Raiders would not have had the leverage to demand supracompetitive concessions from the City. The City's alleged injuries, therefore, flow from that which allegedly makes Defendants' conduct unlawful: limiting output below levels dictated by consumer demand.

HN11[] "Finally, the plaintiff's injury must be 'of the type the antitrust **[**26]** laws were intended to prevent.'" Id. at 1057. "The Supreme Court has made clear that injuries which result from *increased* competition or lower (but non-predatory) prices are not encompassed by the antitrust laws." *Id.* Thus, "[i]f the injury flows from aspects of a defendant's conduct that are beneficial or neutral to competition, there is no antitrust injury, even if the defendant's

the Clayton Act. *See* 15 U.S.C. § 15(a); Hawaii v. Standard Oil Co. of Cal., 405 U.S. 251, 260-61, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972).

conduct is illegal." *Theme Promotions, Inc. v. News Am. Mktg. FSI, 546 F.3d 991, 1003 (9th Cir. 2008)*. Here, Defendants argue that the complaint fails this test because the City lost the Raiders "through the process of competition . . . . Loss of the Raiders to a city that made a better offer is not injury arising from a *reduction* in competition."

Defendants' argument stands ***antitrust law*** on its head. "[T]he principal objective of antitrust policy is to maximize *consumer* welfare by encouraging *firms* to behave competitively," Areeda & Hovenkamp ¶ 100, not, as Defendants suggest, to maximize producers' welfare by increasing competition among consumers. ***HN12***[] As the Supreme Court recently reminded us, "[t]he goal [of the *Sherman Act*] is to distinguish between restraints with anticompetitive effect that are harmful *to the consumer* and restraints stimulating competition that are in *the consumer's* best interest." *NCAA v. Alston, 141 S. Ct. at 2151* (first **[**27]** alteration in original) (emphasis added) (quoting *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018)*). Thus, the fact that the City lost the Raiders as a result of enhanced competition among *consumers* does not negate the City's antitrust injury.

On the contrary, the proper focus is on whether the City's injuries flow from a decrease in competition among *producers*. They do. The City alleges that it was injured because Defendants reduced output and increased prices. These are precisely the kinds of harms to competition that the antitrust laws were intended to prevent. *See Pool Water Prods. v. Olin Corp., 258 F.3d 1024, 1034 (9th Cir. 2001)* ("Antitrust injury 'means injury from higher prices or lower output, the principal vices proscribed by the antitrust laws.'" **[*458]** (quoting *Nelson v. Monroe Reg'l Med. Ctr., 925 F.2d 1555, 1564 (7th Cir. 1991)*)). Thus, the City has alleged antitrust injury.

2. The Directness of the Injury

HN13[] The second factor in the antitrust standing inquiry "looks to whether [the plaintiff's] alleged injury was the direct result of [the defendant's] allegedly anticompetitive conduct." *Am. Ad Mgmt., 190 F.3d at 1058*. This factor focuses on "the chain of causation between [the plaintiff's] injury and the alleged restraint" of trade. *Id.* "The harm may not be 'derivative and indirect' or 'secondary, consequential, or remote.'" *Theme Promotions, 546 F.3d at 1004* (first quoting *Amarel, 102 F.3d at 1511*, and then quoting *Kolling v. Dow Jones & Co., 137 Cal. App. 3d 709, 187 Cal. Rptr. 797, 808 (Ct. App. 1982)*).

This factor cuts against the **[**28]** City's antitrust standing. In a horizontal price-fixing scheme like the one the City alleges here, members of a cartel "collude on price and output in an effort to maximize their profits." Areeda & Hovenkamp ¶ 391b1. Producers restrict output and raise prices, and consumers—direct purchasers from the cartel—pay an overcharge (a supracompetitive price) to purchase the producers' goods or services. These direct purchasers plainly have "standing to recover any collusive overcharges." *Id.* Their injuries are direct and certain. The same cannot be said, however, of consumers, like the City, that "were priced out of the market." *Id.* As Areeda & Hovenkamp explain:

> The difficulty lies in identifying those who are injured by the deadweight welfare loss. Anyone could claim that he or she would have purchased at the competitive price but was priced out of the market as a result of the anticompetitive pricing. Thus, courts are likely to find that the claims of those who refused to purchase at the cartel price are *speculative*.

Id.

The Tenth Circuit confronted this situation in *Montreal Trading Ltd. v. Amax Inc., 661 F.2d 864 (10th Cir. 1981)*. There, the plaintiff alleged that the defendants unlawfully limited potash production to drive up prices. *Id. at 865*. The plaintiff **[**29]** brought an antitrust action against the producers, arguing that as a result of the defendants' actions it was unable to buy potash that it could have resold at a profit. *Id. at 867*. The Tenth Circuit held that the plaintiff lacked antitrust standing. *Id. at 868*. First, the court noted that "[a] price fixing conspiracy is certainly 'aimed' at those who purchase the product at the inflated price; their injury is more direct and more proximately caused than those who are unable to purchase due to product scarcity." *Id.* Second, the plaintiff's injury was too speculative:

> [W]hen, as here, the nonpurchaser has no prior course of dealing with any defendant, we will remain unsure about many things, including: whether the purchase would have been made from one of the conspirators or from one of their competitors; what quantity would have been purchased; what price would have been paid; and at what price resale would have occurred. In the instant case we would also be uncertain whether the potash producers would have inquired about the identity of [the plaintiff's] customers before making the sale; whether, if asked, [the plaintiff] could have truthfully replied that part of the purchase was allocated to customers **[**30]** outside North Korea; whether [the plaintiff] would have had the funds needed to make the purchase; and whether an alleged shortage of railroad cars would have aborted the transaction.

[*459] *Id. at 868*.[11]

The same concerns exist here too. First, the City's injuries are less direct than those of actual purchasers, such as the cities of Las Vegas and Los Angeles, each of which recently acquired NFL teams, presumably by agreeing to supracompetitive prices. Indeed, the existence of these more direct victims is an additional factor counseling against the City's standing. *See* *Ass'n of Wash. Pub. Hosp. Dists. v. Philip Morris Inc., 241 F.3d 696, 701 (9th Cir. 2001)*; *R.C. Dick Geothermal Corp., 890 F.2d at 146*; *Montreal Trading, 661 F.2d at 868*.[12]

Second, the City's contention that, in the absence of Defendants' challenged practices, it would have retained the Raiders (or acquired another team) is too speculative to establish antitrust standing. As the district court explained:

> The Court . . . previously held that Oakland had not plausibly alleged that, but for the limited number of teams, Oakland would still have an NFL team. The Court identified the following "incomplete list of issues that might be relevant" but were not addressed in Oakland's original complaint:
>
> > (1) whether there are additional potential owners willing to establish new teams if the NFL allowed them to **[**31]** do so; (2) whether such potential owners would have based a team in Las Vegas before the Raiders decided to relocate there; (3) whether the Raiders would still have left Oakland for another city if the NFL allowed additional teams; (4) if the Raiders might still have left, whether an additional team would have been established in Oakland to replace the Raiders; or (5) whether Oakland has made any effort to attract an existing team other than the Raiders or to establish a new expansion team to replace the Raiders.
>
> Oakland's first amended complaint alleges none of those things. Instead, it repeats an allegation from the original complaint that entrepreneur and basketball-team-owner Mark Cuban believes Oakland is a better site for the Raiders than Las Vegas, and adds an allegation that an economic analysis commissioned by Oakland determined that, of U.S. cities without NFL teams, Oakland "best reflect[s] the demographic and financial conditions of existing Host Cities" and has "the best prospects for new NFL franchises." But Oakland still has not plausibly alleged what the playing field would look like if the NFL allowed more than thirty-two teams. In that hypothetical world, what would **[**32]** prevent Las Vegas from offering a more attractive deal, as in fact occurred? Would another team have already existed in Las Vegas? Would the Raiders have gone elsewhere if Las Vegas already had a team? If the Raiders left, would a different team play in Oakland? The first amended complaint answers none of those questions.

City of Oakland, 445 F. Supp. 3d at 601 (second alteration in original) (citations omitted).

We agree. The City has not alleged—and there is no way of knowing—what would have occurred in a more competitive marketplace. Would new teams have joined the NFL? Would they have found Oakland attractive? Would the Raiders have left Oakland in any event? Would the **[*460]** Raiders have stayed in the Bay Area, but not in Oakland? What price would the City have paid to retain the Raiders or acquire another team? Would the City

---

[11] The Tenth Circuit did not adopt a bright-line rule precluding nonpurchasers who have been priced out of a market from establishing antitrust standing. *See* *Montreal Trading, 661 F.2d at 868*. We agree.

[12] The City's injuries would also be less direct than those of NFL expansion teams denied entry into the league.

have been willing and able to pay a competitive price? There are too many speculative links in the chain of causation between Defendants' alleged restrictions on output and the City's alleged injuries. *Cf.* Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 540, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983) ("In this case, the chain of causation between the Union's injury and the alleged restraint in the market for construction subcontracts contains several somewhat vaguely defined links.").

The City complains **[**33]** that it should not be required "to reconstruct the hypothetical marketplace absent a defendant's anticompetitive conduct." (Quoting United States v. Microsoft Corp., 253 F.3d 34, 79, 346 U.S. App. D.C. 330 (D.C. Cir. 2001).)[13] Nonpurchasers who are priced out of the market, however, present a special problem, due to the speculative nature of the harm. ***HN14***[] We require a reasonable level of certainty before we will confer antitrust standing on such consumers. *See* Montreal Trading, 661 F.2d at 868; Areeda & Hovenkamp ¶ 391b1.

The City alternatively contends that it has standing under *Montreal Trading* because it can show "a regular course of dealing with the conspirators." *661 F.2d at 868*. The City's past dealings with the Raiders, however, do not establish a *regular* course of dealing. ***HN15***[] And, under *Montreal Trading*, a "regular course of dealing" exception makes sense only if that course of dealing occurred in a competitive market. But that is not what the FAC alleges. The City alleges that its course of dealing with the Raiders occurred in an anticompetitive market, which does not resolve the many uncertain links in the chain of causation. Thus, even assuming that *Montreal Trading* is the law of the Circuit, an issue we need not decide, the City would still lack standing.

In sum, this factor—the directness of the injury—supports the conclusion that the City has not alleged antitrust **[**34]** standing.

3. The Speculative Measure of Harm

HN16[] So too does the third factor, which considers whether the City's "damages are only speculative." *Am. Ad Mgmt., 190 F.3d at 1059*. For the reasons just discussed, we do not know whether the City would have retained an NFL team, whether that team would have been the Raiders or another team, where that team would have played, or what price the City would have paid for the privilege of having an NFL team. Because we do not know whether the City would have retained the Raiders, we cannot know whether it would have avoided the harm it alleges.

Furthermore, even if the City could demonstrate that it would have retained the Raiders (or acquired another team), its damages—"lost investment value," "tax revenues associated with Raiders games," and "devaluation of the Coliseum property"—would be exceedingly difficult to calculate. *Cf.* *id. at 1060* ("[W]e do not find the calculation of damages in this case to be exceedingly complicated."); Areeda & **[*461]** Hovenkamp ¶ 335c5 ("Once it becomes clear—especially early in the litigation—that damage measurements will be unduly speculative, the courts generally dismiss the damage suit."). In this respect too, this case is far afield from the conventional horizontal **[**35]** price-fixing case in which an actual purchaser seeks to recover collusive overcharges.

In sum, like the second factor, the third factor supports that the City has not adequately alleged antitrust standing.

4. Remaining Factors

The remaining factors do not undermine the City's claim of antitrust standing. This case does not appear to present a risk of duplicative recoveries. Nor does it appear that this case would require an apportionment of damages. Nevertheless, in light of the indirectness of the City's injuries, the existence of more direct victims, the speculative

---

[13] In *Microsoft, 253 F.3d 34*, the plaintiffs were required to prove that Microsoft's anticompetitive practices (*i.e.*, foreclosing Netscape's and Java's distribution channels) caused Microsoft to maintain its monopoly power in the operating system market. In that context, and relying on Areeda & Hovenkamp, the D.C. Circuit reasoned that courts could infer causation from the fact that a defendant has engaged in anticompetitive conduct that reasonably appears capable of making a significant contribution to maintaining monopoly power. *Id. at 79*. The court did not address the question presented here.

measure of harm, and the difficulty in calculating damages, we are persuaded that the City lacks antitrust standing to pursue its horizontal price-fixing theory. As the district court observed, the circumstances presented here "render[] this case particularly unsuitable as a novel expansion of antitrust liability to non-purchaser plaintiffs." *City of Oakland, 445 F. Supp. 3d at 603*.

IV.

We hold that the district court properly dismissed the City's Sherman Act claim for failure to state a claim upon which relief may be granted. The City's group boycott theory fails to state a claim because the City has not alleged that more than one team refused to deal with the **[**36]** City. The City's horizontal price-fixing theory fails because the City has not adequately alleged antitrust standing. Although the City has alleged antitrust injury, it has not alleged with sufficient certainty that it would have purchased the product (*i.e.*, that the Raiders would have stayed in Oakland), and under what terms, in a hypothetical competitive market.

The judgment of the district court, therefore, is **AFFIRMED**.

Concur by: BUMATAY

Concur

BUMATAY, Circuit Judge, concurring:

The City of Oakland brings two theories of antitrust liability against the NFL, the Raiders, and the NFL's other 31 teams. We've called one theory the "group boycott" claim and the other a "price-fixing" claim. As the majority correctly holds, both theories come up short. In their view, Oakland gets to suit up and take the field of Article III standing but can't run the claims into the endzone of antitrust liability. Upon further review, however, I think, the majority fumbles the standing analysis on the price-fixing claim. I would hold that this claim is too speculative to satisfy the threshold of constitutional standing and so must be benched even before kickoff. On the group boycott claim, I fully agree with the majority **[**37]** that Oakland stays on the field but ultimately fails to score on the merits. In short, we should have dismissed Oakland's price-fixing claim on Article III standing grounds and denied the group boycott claim on legal sufficiency grounds. I thus concur in the court's judgment and join Parts I, II and III.B of the majority opinion.

I.

Rigorous enforcement of the Article III standing requirements ensures that federal courts stay in their lanes. *See Spokeo, Inc. v. Robins*, 578 U.S. 330, 338, 136 S. Ct. 1540, 194 L. Ed. 2d 635 (2016). By disclaiming jurisdiction to resolve certain disputes, we confine ourselves to "a proper[] judicial role." *Id.* (simplified). To meet **[*462]** Article III standing, a party must establish (1) an injury in fact; (2) traceability; and (3) redressability. *Id.* And meeting standing on one claim doesn't mean standing on other claims. *See DaimlerChrysler Corp. v. Cuno, 547 U.S. 332, 352-53, 126 S. Ct. 1854, 164 L. Ed. 2d 589 (2006)*. Thus, courts must look to see if a party has standing for each claim brought—regardless of standing on another claim. *Id.* The party seeking access to federal court bears the burden of showing standing. *Spokeo*, 578 U.S. at 338.

Here, Oakland asserts two independent theories of antitrust liability under *§ 1 of the Sherman Act, 15 U.S.C. § 1*.

First, the "price-fixing" claim. Oakland alleges that the NFL has created a horizontal price-fixing scheme with its entry requirements for new teams. An NFL **[**38]** rule dictates that 3/4 of NFL owners must vote to approve a new football team's entry into the league. Such a rule, says Oakland, inflates the price of hosting teams for cities by artificially restricting the supply of teams.

Second, we have the "group boycott" claim. Oakland contends that the NFL and its teams have started an anticompetitive boycott against the City by collectively refusing to deal with it. In the City's view, the NFL's franchises are punishing Oakland for declining to pay the high costs and benefits to keep the Raiders in the Bay Area.

Oakland fails to meet its burden of establishing Article III standing for the price-fixing claim, while the group boycott claim fails on the merits.

A.

Oakland's price-fixing claim drops the ball on the second element—traceability. A party satisfies this element by showing that its injury "is fairly traceable to the challenged conduct of the defendant." *Spokeo*, 578 U.S. at 338. Traceability requires "a causal connection between the injury and the conduct complained of." *Lujan v. Defs. of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. So with traceability, we ask: "Is the line of causation between the illegal conduct and injury too attenuated?" *Allen v. Wright, 468 U.S. 737, 752, 104 S. Ct. 3315, 82 L. Ed. 2d 556 (1984)*.

Our court has held that "a causal chain does not fail simply because it has several links, **[**39]** provided those links are not hypothetical or tenuous." *Nw. Requirements Utils. v. FERC, 798 F.3d 796, 806 (9th Cir. 2015)* (simplified). Traceability then can't "rely on conjecture about the behavior of other parties." *Ecological Rts. Found. v. Pac. Lumber Co., 230 F.3d 1141, 1152 (9th Cir. 2000)*. And when a standing theory "rests on a highly attenuated chain of possibilities," "far stronger evidence" is required to establish traceability. *California v. Texas, 141 S. Ct. 2104, 2119, 210 L. Ed. 2d 230 (2021)* (simplified).

Oakland's price-fixing claim relies on speculation upon speculation to connect its injury to the NFL's entry rule. Basically, Oakland tries to connect its injury—the Raiders leaving for Las Vegas—to the NFL's 3/4 approval rule for new franchises. Specifically, Oakland argues that the entry rule allows NFL teams to demand excessive payments from host cities, causing the Raiders to move to Las Vegas and costing Oakland an NFL home team. As a result, Oakland argues it would not have been injured under more lenient rules for entry into the NFL. Essentially, Oakland's causal chain looks like this:

[*463]

But Oakland relies on speculation every step of the way. Start with Step One. Under Oakland's theory, in a pro-competitive hypothetical world, the NFL would replace its current 3/4 approval rule with a more competitive approach, which would allow for easier admission. We aren't told what **[**40]** this new rule might be or how it might meet the threshold of improved competition. Instead, we must imagine a hypothetical rule that would somehow accomplish what Oakland seeks.

Step Two—engage in more speculation about hypothetical teams. To get to the next step in the chain of traceability, we need to speculate that this new rule would entice new football franchises to apply to the NFL. Here, it's unclear how potential football franchises would react to this hypothetical new rule. Oakland assumes that more franchises would apply, given a more lenient admission rule. But there is no evidence that these imaginary franchises would have a significant incentive to apply under, say, a 1/2 owner approval rule rather than the existing 3/4 rule. As the NFL accurately notes, Oakland cannot point to a single instance of a team being denied entry into the NFL under the existing rule. And under either regime, a potential franchise would have to convince a significant portion of NFL owners that its admission would not hurt the sport or the quality of competition. In fact, the only evidence Oakland can muster on this point is a 2004 estimate that the NFL could support up to 42 teams in the United **[**41]** States. But such evidence comes well short **[*464]** of showing that more franchises would be likely to apply simply because the NFL could hypothetically support more of them. Article III requires "far stronger evidence" here. *California v. Texas, 141 S. Ct. at 2119*.

Step Three—consider a hypothetical world where the NFL admits new teams from the crop of applicants. The problem at this step is that the composition of sports leagues is inherently difficult to predict. Sports leagues can't have an infinite number of teams. For example, a sports league has to weigh increasing the number of teams in its roster against other factors such as scheduling constraints, the quality of competition, and existing contracts and commitments with players. *See* Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application*, ¶ 2214(b) (5th ed. 2021) ("Areeda & Hovenkamp") ("[A] sports league requires limits on the number of teams in order that scheduling and ranking can be coordinated."). Oakland would have us overlook these realities and speculate that the NFL would admit more teams if it had a more permissive entry rule and received more applications.

Step Four—calculate the probabilities that a new imaginary NFL **[**42]** team would play in Las Vegas. Only if another NFL team played at Allegiant Stadium would the Raiders be blocked from leaving Oakland—the precise injury alleged here. But as Oakland acknowledges, it can't provide any evidence that Las Vegas would have hosted an NFL team prior to the Raiders under supposedly pro-competitive rules. As a result, Oakland again asks this court to make another speculative leap—this time that a hypothetical franchise admitted under hypothetical rules would have chosen Las Vegas as its home. But we generally do not "endorse standing theories that rest on speculation about the decisions of independent actors." *Clapper v. Amnesty Int'l, USA, 568 U.S. 398, 414, 133 S. Ct. 1138, 185 L. Ed. 2d 264 (2013)*; *see also* *Ecological Rts. Found., 230 F.3d at 1152* ("The issue in the causation inquiry is whether the alleged injury can be traced to the defendant's challenged conduct, rather than to that of some other actor not before the court.").

Finally, Step Five—assume there would be enough new franchises admitted by the NFL to prevent other host cities from attracting the Raiders away from Oakland. At this final step, we must speculate whether another city would have still attracted the Raiders with a more appealing stadium or better economics. Oakland does put forward evidence from an economic expert **[**43]** stating that Oakland is an attractive location for an NFL franchise. But ultimately, Oakland asks us to conjecture about how hypothetical franchises would have weighed hypothetical proposals from hypothetical host cities. So Oakland's expert can't save the speculative house of cards from tumbling down.

In sum, Oakland's price-fixing theory requires us to make layers of speculative judgments to connect the allegedly unlawful conduct (the NFL's entry rule) to the alleged injury (the Raiders' decision to leave Oakland). But Article III standing requires more than an elaborate string of speculations. It requires the alleged injury to be fairly traceable to the unlawful conduct. *Spokeo*, 578 U.S. at 338. Oakland's loss of the Raiders is too remote and too conjectural to be traceable to the NFL's entry process. I would hold that Oakland failed to establish Article III standing on its price-fixing claim.

The majority looks past these speculations by determining that Oakland has shown a "substantial probability" of standing. Maj. Op. 16. The majority argues **[*465]** that, despite a "somewhat speculative chain of causation," there is a substantial probability that the Raiders would have stayed in Oakland but for the NFL's entry rule. Maj. Op. 15. **[**44]** But our court has made clear that causation cannot "be too speculative, or rely on conjecture about the behavior of other parties." *Ecological Rts. Found., 230 F.3d at 1152*. That is precisely what Oakland's price-fixing claim does. It speculates about events at every step of the causal chain—relying on inferences about what unknown, independent parties would do under hypothetical circumstances. As a result, I would dismiss Oakland's price-fixing claim for failure to establish Article III standing.[1]

B.

Oakland, however, does establish Article III standing for its group boycott claim. Oakland satisfies the standing requirements for the group boycott claim because it directly connects the unlawful conduct to the alleged injury.

---

[1] In reaching the merits of the price-fixing claim, the majority imports a Tenth Circuit case into our court—*Montreal Trading Ltd. v. Amax Inc., 661 F.2d 864 (10th Cir. 1981)*. In *Montreal Trading*, the Tenth Circuit denied antitrust standing to non-purchasers on the theory that their injuries were too uncertain. *Id. at 868*. I question, however, whether *Montreal Trading* is relevant here. *Montreal Trading* explained that nonpurchasers should be denied standing to sue "when they lack a past course of dealing with the conspirators." *Id.* But Oakland, the Raiders, and the NFL have a long course of dealing, making the applicability of the *Montreal Trading* rule suspect. Moreover, the majority applies *Montreal Trading* without claiming to adopt it as a "bright-line rule" for our circuit. Maj. Op. 29 n.11. But doing so just further complicates an already complicated area of law. The majority should have punted on this issue.

Unlike the price-fixing claim, the premise of the group boycott claim is that the NFL franchises themselves colluded to keep Oakland from hosting an NFL team. The football teams sought to punish Oakland, the theory goes, after the City refused to make new payments or improvements to its stadium to keep the Raiders. Thus, the injury of a lack of an NFL franchise is closely tied to the alleged unlawful conduct of group boycotting. In other words, there is a direct handoff from the anticompetitive action to the alleged injury. **[**45]** As a result, Oakland establishes Article III standing on its group boycott claim.

Looking at the merits, I agree with the majority that Oakland fails to demonstrate an antitrust violation on this claim. In short, Oakland can only show that the Raiders refused to deal with the City—not that the other franchises joined the Oakland boycott. Moreover, since Oakland failed to plead a *Sherman Act* violation, I do not reach whether Oakland has sufficiently shown antitrust standing. Antitrust standing is distinct from Article III standing. *See* *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 535 n.31, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. Unlike Article III standing, courts have discretion to skip antitrust standing and go right to the merits. *See* Areeda & Hovenkamp, ¶ 335f ("When a court concludes that no violation has occurred, it has no occasion to consider [antitrust] standing."). So there's no need to address Oakland's antitrust standing on this claim, but that doesn't mean the City has it. *See* Maj. Op. 21 n.7.

II.

So, after further review, we must affirm the district court's dismissal of Oakland's suit. While Oakland doesn't need to provide indisputable evidence of traceability to win access to federal courts, the City can't rely on a Hail Mary of speculation to satisfy standing. In my view, we should **[*466]** have blown the whistle on jurisdiction rather than **[**46]** letting that claim play out on the merits.

Opinion

[*784] ORDER

HAYES, Judge:

The matter before the Court is the Motion to Dismiss Plaintiffs' Class Action Complaint filed by Defendant General Motors LLC. (ECF No. 12).

I. PROCEDURAL BACKGROUND

On May 17, 2021, Plaintiffs Robert Romoff and Joe Siciliano filed a Class Action Complaint against Defendant General Motors LLC ("GM"). (ECF No. 1). The Complaint alleges that GM violated California and New Jersey law by including a "Destination Charge" in the listed sticker price of its vehicles that did not reflect the actual cost to GM of delivering the vehicles to dealerships and by failing to disclose that the charge included profit. (*See id.*).

[*785] On August 2, 2021, GM filed a Motion to Dismiss Plaintiffs' Class Action Complaint **[**2]** for failure to state a claim under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. (ECF No. 12). On August 24, 2021, Plaintiffs filed an Opposition to the Motion to Dismiss. (ECF No. 13). On August 31, 2021, Defendant filed a Reply. (ECF No. 14).

II. ALLEGATIONS IN THE COMPLAINT

Defendant GM "designs, engineers, manufactures and sells vehicles." (ECF No. 1 ¶ 24). The "Monroney" price stickers on vehicles sold by GM "break out [a] Destination Charge separate and apart from the base MSRP and include it as an add-on." (*Id.* ¶ 27). This disclosure is mandated by the Federal Automobile Information Disclosure Act, which requires manufacturers to list "the amount charged to the dealer for the transportation of the car to the place of delivery." (*Id.* ¶ 32). "A vehicle's destination fee is generally understood in the automotive industry to reflect the manufacturer's average cost of delivering one of its vehicles to a dealership." (*Id.* ¶ 2). "Line items are intended to inform consumers of the reason they are being charged" and "[c]onsumers do not generally expect line-item costs to include hidden profit." (*Id.* ¶ 32).

"Despite its name, the 'Destination Charge' has little to do with getting the vehicle to its intended destination" and instead **[**3]** is used as a "vessel for profit." (*Id.* ¶¶ 27-28). "[T]he increase in GM's Destination Charge over the past decade has not and is not correlated with the actual increase in costs of shipping." (*Id.* ¶ 30). "[O]ther automakers['] 'destination fees' have not increased at the same pace during this ten-year period." (*Id.* ¶ 30). "[O]ther major industry participants routinely disclose that their 'destination fees' are largely comprised of profit." (*Id.* ¶ 32). GM "never discloses that the Destination Charge far exceeds the actual costs it pays to transport its vehicles to dealers." (*Id.* ¶ 35). By labelling the charge a "Destination Charge," GM "misleads reasonable consumers into believing its 'Destination Charge' reflects the actual cost of shipping its vehicles to their 'destination,' not the cost of shipping its vehicles *plus* profit." (*Id.* ¶ 26).

Plaintiffs Robert Romoff and Joe Siciliano are citizens of California and New Jersey, respectively, who purchased new GM vehicles. Prior to purchasing the vehicles, Plaintiffs viewed the vehicles' price stickers. Romoff's vehicle included a Destination Charge of $1,195 and Siciliano's vehicle included a Destination Charge of $995. Plaintiffs "reasonably **[**4]** believed that the . . . Destination Charge represented GM's cost to deliver" the vehicles "and further understood that the Destination Charge was a pass-through cost that [they were] required to pay and unable to negotiate." (*Id.* ¶¶ 14, 20). GM "failed to disclose that it had included profit in the Destination Charge." (*Id.* ¶¶ 15, 21). Plaintiffs were damaged by GM's "material misrepresentations and omissions" because they "overpaid" for their vehicles by paying the full Destination Charge. (*Id.* ¶¶ 17, 23). Had they known the truth, Plaintiffs "would not have purchased or leased the [ ] [v]ehicles, or would have paid significantly less for them." (*Id.* ¶¶ 61, 77).

Plaintiffs seek to represent the following classes:

> All consumers who, during the applicable statute of limitations, purchased or leased a Class Vehicle in the state of California and paid a Destination Charge (the "California Class"). All consumers who, during the applicable statute of limitations, purchased or leased a Class Vehicle in the state of New Jersey **[*786]** and paid a Destination Charge (the "New Jersey Class").

(*Id.* ¶ 44).

Plaintiffs brings the following individual and class claims against GM: (1) violation of California's **[**5]** Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code §§ 17200, et seq.*; (2) violation of *California's Consumer Legal Remedies Act ("CLRA"), Cal. Civ. Code §§ 1750, et seq.*; (3) violation of the New Jersey Consumer Fraud Act ("NJCFA"), *N.J. Stat. Ann. § 56:8-1*; and (4) unjust enrichment (on behalf of both classes). Plaintiffs seeks declaratory and injunctive relief, restitution, disgorgement, damages, pre-judgment interest, and attorneys' fees and costs.

III. CONTENTIONS

GM contends that its conduct was not deceptive because the amount and existence of the Destination Charge and total vehicle price was fully disclosed prior to purchase. GM contends that Plaintiffs' statutory claims should be dismissed because: (1) GM had no duty to disclose any additional information about the charge; (2) whether profit is included in a charge is not a material fact to a reasonable or average consumer; and (3) Plaintiffs have not satisfied the CLRA, UCL, and NJCFA's standing requirements. GM contends that the UCL claim should be dismissed due to the lack of predicate unlawful acts. GM contends that Plaintiffs' equitable claims should be dismissed because Plaintiffs have an adequate remedy at law.

Plaintiffs contend that a disclosed fee can be deceptive to a reasonable or average consumer when it is misrepresented as a pass-through cost. Plaintiffs **[**6]** contend that whether a reasonable consumer would be deceived is a question that is not appropriate for resolution at this stage of the litigation. Plaintiffs contend that GM's alleged violation of the CLRA is an adequate basis for their UCL claim. Plaintiffs contend that GM has a duty to disclose the existence of profit in the Destination Charge. Plaintiffs contend that GM's misrepresentations and omissions are material. Plaintiffs contend that the Complaint adequately alleges reliance, causation, and economic injury. Plaintiffs contend that the Complaint alleges fact sufficient to support their claims for equitable relief and that they can plead in the alternative at this stage in the litigation.

IV. LEGAL STANDARD

Rule 12(b)(6) of the Federal Rules of Civil Procedure permits dismissal for "failure to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. In order to state a claim for relief, a pleading "must contain . . . a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. Dismissal under *Rule 12(b)(6)* "is proper only where there is no cognizable legal theory or an absence of sufficient facts alleged to support a cognizable legal theory." *Shroyer v. New Cingular Wireless Servs., Inc., 622 F.3d 1035, 1041 (9th Cir. 2010)* (quoting *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*).

"To survive a motion to dismiss, a complaint must contain sufficient **[**7]** factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* "[A] plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation **[*787]** of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555* (second alteration in original) (quoting *Fed. R. Civ. P. 8(a)*).

Additionally, claims sounding in fraud must comply with the heightened pleading requirements of *Federal Rule of Civil Procedure 9(b)*, which requires that "[i]n alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake." *Fed. R. Civ. P. 9(b)*. "To comply with *Rule 9(b)*, allegations of fraud must be specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong." *Bly—Magee v. California, 236 F.3d 1014, 1019 (9th Cir. 2001)*. *Rule 9(b)* "requires more specificity including an account of the time, place, and specific content of the false representations as well as the identities **[**8]** of the parties to the misrepresentations." *Swartz v. KPMG LLP, 476 F.3d 756, 764 (9th Cir. 2007)*.

V. DISCUSSION

California's Consumers Legal Remedies Act prohibits "unfair methods of competition and unfair or deceptive acts or practices." *Cal. Civ. Code § 1770*. Among the twenty-four activities deemed unlawful by the CLRA, two are alleged in this case: "[r]epresenting that goods or services have . . . characteristics . . . that they do not have" and "[a]dvertising goods or services with intent not to sell them as advertised." *Id. § 1770(a)(5)*, *(9)*.

California's Unfair Competition Law prohibits "any unlawful, unfair or fraudulent business act or practice." Cal. Bus. & Prof. Code § 17200. "Because Business & Professions Code § 17200 is written in the disjunctive, it establishes three varieties of unfair competition—acts or practices which are unlawful, or unfair, or fraudulent." Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999). A practice is "unlawful" if it violates other laws, including the CLRA. Kasky v. Nike, Inc., 27 Cal. 4th 939, 949, 119 Cal. Rptr. 2d 296, 45 P.3d 243 (2002). A practice is "fraudulent" if "members of the public are likely to be deceived." Davis v. HSBC Bank Nev., N.A., 691 F.3d 1152, 1169 (9th Cir. 2012). The "unfair" prong of the UCL prohibits "practice[s] [that] may be deemed unfair even if not specifically proscribed by some other law." Cel-Tech Commc'ns, 20 Cal. 4th at 180.

New Jersey's Consumer Fraud Act prohibits:

> [t]he act, use or employment by any person of any unconscionable commercial practice, deception, fraud, false pretense, false promise, **[**9]** misrepresentation, or the knowing concealment, suppression, or omission of any material fact with the intent that others rely upon such concealment, suppression or omission, in connection with the sale or advertisement of any merchandise . . ., or with the subsequent performance of such person as aforesaid, whether or not any person has in fact been misled, deceived or damaged thereby.

N.J. Stat. Ann. § 56:8-2. The NJCFA thus sets forth three general categories of unlawful acts: "(1) affirmative acts; (2) knowing omissions; and (3) regulatory violations." Thiedemann v. Mercedes-Benz USA, LLC, 183 N.J. 234, 245, 872 A.2d 783 (2005).

Plaintiffs allege that by calling the charge a "Destination Charge," GM affirmatively "misleads reasonable consumers into believing its 'Destination Charge' reflects the actual cost of shipping its vehicles to their 'destination,' not the cost of shipping its vehicles *plus* profit." **[*788]** (ECF No. 1 ¶ 26). The CLRA and the fraudulent prong of the UCL proscribe conduct that is "likely to deceive" a "reasonable consumer." *Williams v. Gerber Prods. Co., 552 F.3d 934, 938 (9th Cir. 2008)*. "[T]he reasonable consumer standard requires a probability 'that a significant portion of the general consuming public or of targeted consumers, acting reasonably in the circumstances, could be misled.'" *Ebner v. Fresh, Inc., 838 F.3d 958, 965 (9th Cir. 2016)*. The NJCFA imposes a similar "average **[**10]** consumer" standard in determining whether conduct is unlawful. *See* Cox v. Sears Roebuck & Co., 138 N.J. 2, 17, 647 A.2d 454 (1994) ("The capacity to mislead is the prime ingredient of all types of consumer fraud."); Smajlaj v. Campbell Soup Co., 782 F. Supp. 2d 84, 98 (D.N.J. 2011) ("To constitute consumer fraud the business practice in question must be misleading and stand outside the norm of reasonable business practice in that it will victimize the average consumer."). "'[W]hether a practice is deceptive will usually be a question of fact not appropriate for decision on demurrer' or motions to dismiss." Moore v. Mars Petcare US, Inc., 966 F.3d 1007, 1017 (9th Cir. 2020). However, "if common sense would not lead anyone to be misled, then the claim may be disposed of at a motion to dismiss stage." Id. at 1018; *see also* Hassler v. Sovereign Bank, 644 F. Supp. 2d 509, 516 (D.N.J. 2009) ("[C]ourts have dismissed [NJCFA] complaints for failure to state a claim where plaintiffs have failed to allege that the defendant engaged in conduct that could be considered misleading within the meaning of the Act.").

The Complaint alleges that the price stickers on vehicles sold by GM "break out [a] Destination Charge separate and apart from the base MSRP and include it as an add-on." (ECF No. 1 ¶ 27). The Complaint alleges that this disclosure is mandated by the Federal Automobile Information Disclosure Act ("AIDA"), which requires manufacturers to list "the amount **[**11]** charged to the dealer for the transportation of the car to the place of delivery." (*Id.* ¶ 32). The Complaint alleges that "[a] vehicle's destination fee is generally understood in the automotive industry to reflect the manufacturer's average cost of delivering one of its vehicles to a dealership." (*Id.* ¶ 2). The Complaint alleges that "[l]ine items are intended to inform consumers of the reason they are being charged" and "[c]onsumers do not generally expect line-item costs to include hidden profit." (*Id.* ¶ 32). The Complaint alleges that GM's "'Destination Charge' has little to do with getting the vehicle to its intended destination" and instead is used as a "vessel for profit." (*Id.* ¶¶ 27-28). The Complaint alleges that by labelling the charge a

"Destination Charge," GM "misleads reasonable consumers into believing its 'Destination Charge' reflects the actual cost of shipping its vehicles to their 'destination,' not the cost of shipping its vehicles *plus* profit." (*Id.* ¶ 26).

The word "charge"—as used in the Complaint—is defined as "the price demanded for something." Charge, Merriam Webster, https://www.merriam-webster.com/dictionary/charge (last accessed Nov. 17, 2021); *see also* *Moore, 966 F.3d at 1018* **[**12]** (discussing the dictionary definition of a term in analyzing whether a label was misleading to a reasonable consumer under California statutes); *Hassler, 644 F. Supp. 2d at 516* (discussing dictionary definition in analysis of NJCFA claim). Reasonable or average consumers would not be surprised to learn that the price of goods often includes profit for the seller. The term "Destination Charge" does not reasonably imply an absence of profit. *See* *Becerra v. Dr Pepper/Seven Up, Inc., 945 F.3d 1225, 1230 (9th Cir. 2019)* (rejecting an argument that a term in a label was misleading "[j]ust because some consumers **[*789]** may unreasonably interpret the term differently").

As alleged in the Complaint, the amount and existence of the Destination Charge and the total listed sticker price of GM's vehicles were fully disclosed. Plaintiffs received the vehicles they were promised at the prices they agreed upon. GM's alleged disclosure of the Destination Charge complied with the AIDA requirement that manufacturers divulge "the amount charged, if any, to such dealer for the transportation of such automobile to the location at which it is delivered to such dealer." *15 U.S.C. § 1232(f)(3)*. The statutory language contained in the AIDA—requiring disclosure of "the amount charged" to the dealer—no more suggests the absence of profit than the term "Destination Charge" itself. In summary, the allegations concerning the context of the vehicles' sales do not alter the common-sense understanding that a charge can include profit. *See Ebner, 838 F.3d at 966* (affirming dismissal of UCL and CLRA claims because "[a]part from the **[**13]** accurate [ ] label, there are no other words, pictures, or diagrams adorning the packaging . . . from which *any* inference could be drawn or on which *any* reasonable belief could be based"). The Court concludes that the Complaint fails to allege facts to support an inference that Defendant made any affirmative misrepresentation.

In addition to alleging that the term "Destination Charge" is an affirmative misrepresentation, Plaintiffs also plead an omission theory of liability—that GM had a duty to disclose the existence of profit in the Destination Charge and failed to do so. To be actionable under the CLRA, UCL, or NJCFA, the omitted fact must be material. *See* *Hodsdon v. Mars, Inc., 891 F.3d 857, 863 (9th Cir. 2018)* (requiring the plaintiff to allege that an omission is material to plead a claim under California consumer protection laws); *N.J. Stat. Ann. § 56:8-2* (prohibiting the "act, use or employment by any person of any . . . knowing concealment, suppression, or omission of any *material* fact . . . ." (emphasis added)). A fact is material if a reasonable person would attach importance to its existence in determining his or her course of action. *See* *Friedman v. AARP, Inc., 855 F.3d 1047, 1055 (9th Cir. 2017)*; *Peters v. U.S. Dep't of Housing & Urban Dev., No. Civ. 04:06057-RBK, 2006 U.S. Dist. LEXIS 4727, 2006 WL 278916, at *5 (D.N.J. Feb. 1, 2006)*.

The Court has concluded that a reasonable or average consumer would not expect the Destination Charge to exclude **[**14]** profit. As a result, additional disclosure of the fact that the charge includes profit would not affect a reasonable or average consumer's understanding of the composition of the Destination Charge. GM's omission of additional information regarding the Destination Charge is not material.

The unlawful prong of the UCL "borrows violations of other laws and treats them as unlawful practices that the [UCL] makes independently actionable." *Alvarez v. Chevron Corp., 656 F.3d 925, 933 n.8 (9th Cir. 2011)*. The Complaint alleges that GM's conduct was unlawful under the UCL because GM's conduct violated the CLRA and California's False Advertising Law, *Cal. Bus. & Prof. Code § 17500, et seq.* The reasonable consumer standard applies to both of these borrowed statutes. *See Williams, 552 F.3d at 938*. Plaintiffs' unlawful-prong UCL claim fails because the Complaint does not adequately plead a violation of any predicate law.

The "unfair" prong of the UCL prohibits "practice[s] [that] may be deemed unfair even if not specifically proscribed by some other law." *Cel-Tech Commc'ns, 20 Cal. 4th at 180*.

> Under the UCL's unfairness prong, courts consider either: (1) whether the **[*790]** challenged conduct is tethered to any underlying constitutional, statutory or regulatory provision, or that it threatens an incipient

> violation of an ***antitrust law***, or violates the policy or spirit **[**15]** of an ***antitrust law***; (2) whether the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers; or (3) whether the practice's impact on the victim outweighs the reasons, justifications and motives of the alleged wrongdoer.

Doe v. CVS Pharm, Inc., 982 F.3d 1204, 1214-15 (9th Cir. 2020). The factual basis for Plaintiffs' unfair-prong UCL claim is the same as for Plaintiffs' other claims. Because the Complaint fails to allege facts to support an inference that GM's conduct is deceptive or violates any statutory provision, this Court joins numerous other district courts in holding that the unfair-prong claim must also be rejected. *See* *Sue Shin v. Campbell Soup Co., No. CV 17-1082-DMG (JCx), 2017 U.S. Dist. LEXIS 136121, 2017 WL 3534991, at *8 (C.D. Cal. Aug. 9, 2017)* ("Here, Shin's UCL unfair prong claim overlaps entirely with her claim under the fraudulent prong. Accordingly, for the same reasons the Court granted Campbell's motion to dismiss as to the FAL, CLRA, and UCL fraudulent-prong claims, the Court [grants] Campbell's motion to dismiss Shin's unfair-prong UCL claim."); *Hadley v. Kellogg Sales Co. 243 F. Supp. 3d 1074, 1105 (N.D. Cal. 2017)* (collecting cases). The Court concludes that the Motion to Dismiss is granted as to Plaintiff's CLRA, UCL, and NJCFA claims.

In California, "[w]hen a plaintiff alleges unjust enrichment, a court may construe the cause of action as a quasi-contract claim seeking restitution. **[**16]** *Astiana v. Hain Celestial Grp., Inc., 783 F.3d 753, 762 (9th Cir. 2015)* (internal citations and quotations omitted). "To allege unjust enrichment as an independent cause of action, a plaintiff must show that the defendant received and unjustly retained a benefit at the plaintiff's expense." *ESG Capital Partners, LP v. Stratos, 828 F.3d 1023, 1038 (9th Cir. 2016)*. The test is the same under New Jersey law—"a plaintiff must show both that [the] defendant received a benefit and that retention of that benefit without payment would be unjust." *VRG Corp. v. GKN Realty Corp., 135 N.J. 539, 554, 641 A.2d 519 (1994)*.

GM's conduct cannot be considered "unjust" because the Complaint fails to adequately allege facts to support an inference that GM's conduct is deceptive. *See Ebner, 838 F.3d at 968* ("Because we have concluded that the FAC fails to state a claim under any of these [California] statutes, the unjust enrichment cause of action has been mooted."); *Maniscalco v. Brother Intern. Corp. (USA), 627 F. Supp. 2d 494, 505 (D.N.J. 2009)* ("Plaintiffs' unjust enrichment claims . . . are identical to their claims under the CFA . . . . Therefore, BIC's argument based solely on Plaintiffs' purportedly failed CFA allegations, has no merit."). The Court concludes that the Motion to Dismiss is granted as to Plaintiffs' unjust enrichment claims.

VI. CONCLUSION

IT IS HEREBY ORDERED that the Motion to Dismiss Plaintiffs' Class Action Complaint filed by Defendant (ECF No. 12) is granted. The Class Action Complaint **[**17]** (ECF No. 1) is dismissed without prejudice. No later than thirty (30) days from the date of this Order, Plaintiffs Robert Romoff and Joe Siciliano may file any motion for leave to amend pursuant to *Civil Local Rules 7.1* and *15.1(c)*. If no motion is filed, the case will be closed.

LexisNexis® Headnotes

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

HN1[] **Standards of Review, Abuse of Discretion**

Appellate courts review evidentiary rulings for abuse of discretion and will reverse only if incorrect evidentiary rulings were prejudicial.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

Civil Procedure > ... > Standards of Review > Substantial Evidence > Sufficiency of Evidence

HN2[] **Standards of Review, De Novo Review**

A jury verdict will be upheld if supported by substantial evidence. Appellate courts may not weigh the evidence but simply ask whether the plaintiff has presented sufficient evidence to support the jury's conclusion. Any underlying legal analysis or statutory interpretation is reviewed de novo. But findings of fact will be reversed only when the evidence permits only one reasonable conclusion, and that conclusion is contrary to the jury's verdict.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Remedies > Injunctions > Permanent Injunctions

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Judgments > Relief From Judgments > Altering & Amending Judgments

Civil Procedure > Trials > Judgment as Matter of Law > Postverdict Judgment

HN3[] **Standards of Review, Abuse of Discretion**

Appellate courts review de novo a district court's denial of a renewed motion for judgment as a matter of law. Appellate courts review for abuse of discretion a district court's rulings on motions to alter or amend a judgment, motions for a permanent injunction, and motions for a new trial.

Civil Procedure > ... > Discovery > Methods of Discovery > Expert Witness Discovery

Evidence > ... > Testimony > Examination > Direct Examinations

HN4[] **Methods of Discovery, Expert Witness Discovery**

Although the advisory notes to Fed. R. Civ. P. 26(a)(2)(B) permit counsel to assist experts in preparing reports, an expert report, which is intended to set forth the substance of the direct examination, should be written in a manner that reflects the testimony to be given by the witness and it must be signed by the witness.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Evidence > Inferences & Presumptions > Inferences

HN5[] **Standards of Review, Abuse of Discretion**

A district court abuses its discretion if it misapplies the law or makes a finding that is illogical, implausible, or without support in inferences which can be drawn from the record.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > Trials > Jury Trials > Jury Instructions

HN6[] Judges, Discretionary Powers

A district court has substantial latitude in formulating jury instructions.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN7[] Conspiracy to Monopolize, Elements

By its terms, Section 1 of the Sherman Act bans every contract, combination, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations. 15 U.S.C.S. § 1. The elements of a Section 1 claim are: (1) a contract, combination, or conspiracy; (2) that unreasonably restrained trade under either a per se rule of illegality or a rule of reason analysis; and (3) that the restraint affected interstate commerce. To establish a conspiracy, the available evidence must tend to exclude the possibility that the alleged conspirators acted independently. Horizontal price fixing and market allocation are per se Section 1 violations.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN8[] Actual Monopolization, Claims

Section 2 of the Sherman Act makes it illegal to monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce. 15 U.S.C.S. § 2. While section 1 of the Sherman Act targets concerted anticompetitive conduct, section 2 of the Sherman Act targets independent anticompetitive conduct. Monopoly power itself is not unlawful—instead, it must be accompanied by an element of anticompetitive conduct to trigger section 2 of the Sherman Act liability.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN9[] Sherman Act, Claims

Attempted monopolization under section 2 of the Sherman Act, 15 U.S.C.S. § 2, requires: (1) specific intent to monopolize a relevant market; (2) predatory or anticompetitive conduct; and (3) a dangerous probability of success. Conspiracy to monopolize requires: (1) an agreement or understanding between alleged conspirators; (2) a specific intent to monopolize; and (3) overt acts in furtherance of the alleged conspiracy.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN10[] Sherman Act, Claims

To define a market under section 2 of the Sherman Act, 15 U.S.C.S. § 2, the district court must determine: (1) the field in which the plaintiff was engaged in geographic and distributional terms, and (2) the product, or product line, that competes in that field. The relevant market is defined as the commodities reasonably interchangeable by consumers for the same purpose. Appellate courts review relevant market definitions as fact findings reversible only if the evidence compels a conclusion contrary to the jury's verdict.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN11[] Sherman Act, Claims

Courts use the specific intent element to limit the reach of an attempt claim to conduct threatening monopolization under section 2 of the Sherman Act, 15 U.S.C.S. § 2. A plaintiff may establish specific intent to monopolize through either direct evidence of unlawful design or circumstantial evidence principally of illegal conduct. This inference may be drawn from conduct with an unreasonable restraint of trade in violation of section 1 of the Sherman Act, 15 U.S.C.S. § 1.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN12[] Actual Monopolization, Claims

Monopoly power is the ability to control prices or exclude competition in the relevant market. It can be proven by direct or circumstantial evidence. The latter approach requires plaintiffs to (1) define the relevant market, (2) show that the defendant owns a dominant share of that market, and (3) show that there are significant barriers to entry and show that existing competitors lack the capacity to increase their output in the short run. A market share of 65% or more usually establishes a prima facie case of monopoly power in Section 2 of the Sherman Act, 15 U.S.C.S. § 2, contexts. But the minimum showing of market share required in an attempt case is a lower quantum than the minimum showing required in an actual monopolization case. A market share as low as 44% is sufficient to support a finding that a party was dangerously close to monopoly power where barriers to entry were high and competitors could not expand their short-run output.

Antitrust & Trade Law > Clayton Act > Claims

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

Antitrust & Trade Law > Clayton Act > Scope

HN13[] **Clayton Act, Claims**

Section 7 of the Clayton Act prohibits mergers that tend substantially to lessen competition or create a monopoly. 15 U.S.C.S. § 18. To establish a prima facie section 7 case, a plaintiff must (1) propose the proper relevant market and (2) show that the effect of the merger in that market is likely to be anticompetitive. A new trial may be granted where there is no evidence on the amount of damages attributable only to the antitrust violation. But a district court's denial of a motion for a new trial is reversible only if the record contains no evidence in support of the verdict. Once a plaintiff establishes the fact of antitrust injury, appellate courts must uphold the jury's finding as to the amount of damages unless that finding is grossly excessive or monstrous, clearly not supported by the evidence, or only based on speculative guesswork.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Remedies > Injunctions > Permanent Injunctions

HN14[] **Standards of Review, Abuse of Discretion**

Appellate courts review for abuse of discretion a grant of a permanent injunction and any decision underlying the imposition of the injunction is reviewed by the standard that is appropriate to that determination.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN15[] **Clayton Act, Claims**

Section 16 of the Clayton Act authorizes injunctive relief against any threatened loss or damage by a violation of the antitrust laws. 15 U.S.C.S. § 26. Such relief must be based on a clear indication of a significant causal connection between the conduct enjoined or mandated and the violation found directed toward the remedial goal intended. But a district court may order an injunction beyond a simple proscription against the precise conduct previously pursued. The reviewing court only asks if the relief is a reasonable method of eliminating the consequences of the illegal conduct. If the jury finds that monopolization or attempted monopolization has occurred, the available injunctive relief is broad, including to terminate the illegal monopoly, deny to the defendant the fruits of its statutory violation, and ensure that there remain no practices likely to result in monopolization in the future.

Antitrust & Trade Law > Sherman Act > Remedies > Injunctions

HN16[] **Remedies, Injunctions**

A district court can order conduct to avoid a recurrence of the antitrust violation and to eliminate its consequences.

Antitrust & Trade Law > Sherman Act > Remedies > Injunctions

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

HN17[] **Remedies, Injunctions**

In antitrust cases involving injunctive relief, district courts have broad discretion to fit the decree to the special needs of the individual case.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN18[] **Remedies, Damages**

A plaintiff need not prove that the antitrust violation was the only cause of its injury in order to recover damages; proof that the violation was a material cause is sufficient.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN19[] **Remedies, Damages**

Where an antitrust plaintiff suffers continuing antitrust injuries from anticompetitive changes to market structure that arose from a proven antitrust violation, the violation may be a material cause of that injury, and so recovery of damages is permitted, even after the last proven date of the violative conduct. If a defendant has conspired to violate the antitrust laws and thereby harmed a market's competitive structure, it remains liable for the continuing injuries suffered by plaintiffs from the structural harm to competition that its unlawful scheme brought about. It is no defense to argue that the conspiracy has ended, where the conspiracy achieved its anticompetitive objective.

Civil Procedure > ... > Discovery > Methods of Discovery > Expert Witness Discovery

Civil Procedure > Pretrial Matters > Conferences > Scheduling Conferences

Civil Procedure > Discovery & Disclosure > Disclosure > Mandatory Disclosures

Civil Procedure > Pretrial Matters > Conferences > Pretrial Orders

HN20[] **Methods of Discovery, Expert Witness Discovery**

Fed. R. Civ. P. 26 states that a party must disclose to the other parties the identity of any expert witness it may use at trial. Fed. R. Civ. P. 26(a)(2)(A). If a scheduling order is issued, experts must be disclosed at the times and in the sequence that the court orders. Fed. R. Civ. P. 26(a)(2)(D).

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN21[] **Standing, Requirements**

A party must have antitrust standing, consisting of the (1) injury of the type the antitrust laws were intended to prevent that also (2) flows from that which makes defendants' acts unlawful. And monetary recovery will not be permitted for injuries independently caused by something other than the antitrust violation.

Summary:

SUMMARY[**]

Antitrust

The panel affirmed in part and vacated in part the district court's judgment, after a jury trial, in favor of Optronic Technologies, Inc., also known as Orion Telescopes & Binoculars, in Orion's lawsuit alleging that Ningbo Sunny Electronic Co. Ltd. and Sunny Optics, Inc., violated federal ***antitrust law*** and California laws.

Orion alleged that Sunny conspired with Suzhou Synta Optical Technology Co. Ltd. and other "Synta Entities" to fix prices and allocate the telescope market.

The panel held that the district court properly admitted the expert report and testimony of Drs. Jose Sasian and J. Douglas Zona, Orion's telescope manufacturing expert and damages expert, and properly excluded the testimony of Jeffrey Redman, a rebuttal expert for Sunny.

The panel held that the district court did not abuse **[**2]** its discretion by giving the jury a mid-trial curative instruction limiting the scope of the testimony of Dr. Celeste Saravia, a rebuttal expert on damages.

The panel held that Orion presented sufficient evidence to support the jury's verdict in Orion's favor on its Sherman Act § 1 claims. First, sufficient evidence supported the jury's verdict that Sunny conspired with horizontal competitor Synta to ensure that Sunny acquired Meade Instruments Corp., another telescope manufacturer, to protect their market share and guarantee that competitor Jinghua Optics & Electronics would not buy Meade. Second, sufficient evidence supported the jury's alternative findings that Sunny conspired with a competitor to fix prices or credit terms

[**] This summary constitutes no part of the opinion of the court. It has been prepared by court staff for the convenience of the reader.

in violation of § 1. Third, sufficient evidence supported the jury's verdict that Sunny agreed with Synta, a horizontal competitor, either not to compete with one another in the market, or to divide customers or potential customers between them.

The panel held that the evidence supported the jury's verdict for Orion on its Sherman Act § 2 claims of attempted monopolization and conspiracy to monopolize the global telescope manufacturing market. The panel concluded that the jury's verdict imposing **[**3]** § 2 liability did not depend on an improper joint monopoly theory. The panel held that Orion sufficiently defined the relevant market through expert testimony by Dr. Zona. In addition, sufficient evidence supported the jury's findings that Sunny expressed a specific intent to gain monopoly power and was dangerously close to attaining monopoly power.

The panel affirmed the jury's verdict for Orion on its Clayton Act § 7 claim, based on the jury's finding of a reasonable likelihood that Sunny's acquisition of Meade would substantially reduce competition in the telescope manufacturing market or create a monopoly. The panel held that Sunny was not entitled to a new trial on the issue of § 7 liability because Orion presented evidence of antitrust injury, and the jury's finding as to damages was neither grossly excessive unsupported, nor the result of guesswork.

The panel held that the district court did not abuse its discretion in imposing injunctive relief against Sunny under Clayton Act § 16.

The panel held that Orion offered substantial evidence in support of the district court's finding that the conspiracy between Sunny and Synta continued post 2016, and Sunny was not entitled to judgment as a matter of law on the issue **[**4]** of whether Orion was entitled to post-September 2016 damages.

Vacating in part, the panel held that the district court abused its discretion by excluding under Fed. R. Civ. P. 26 and 37 the declaration that Dr. Saravia gave in support of Sunny's motion to alter or amend the judgment with regard to the valuation of a settlement set-off. The panel remanded for further proceedings.

On Orion's cross-appeal, the panel affirmed the district court's grant of summary judgment for Sunny on the issue of whether Sunny caused Orion's failure to acquire Meade.

Opinion by: Ronald M. Gould

Opinion

[*473] GOULD, Circuit Judge:

Optronic Technologies, Inc., also known as Orion Telescopes & Binoculars ("Orion"), filed a lawsuit alleging that Ningbo Sunny Electronic Co., Ltd. and Sunny Optics, Inc., collectively "Sunny," violated federal **[**5]** ***antitrust law*** and California laws. The case went to trial and the jury gave its verdict for Orion, awarding it $16.8 million in damages. Sunny appealed this verdict and several district court rulings. We have jurisdiction under 28 U.S.C. §

* The Honorable Jed S. Rakoff, United States District Judge for the Southern District of New York, sitting by designation.

1291, and we affirm the jury's verdict. In so holding, we comment on the legal analysis a district court may use to resolve pre-and-post-trial motions in similar cases, and the evidence necessary to support a jury verdict in antitrust cases.

I. FACTUAL AND PROCEDURAL BACKGROUND

A. The Parties

Orion is an American telescope company that designs and markets telescopes but does not make them. Sunny is a Chinese telescope manufacturer owned by Peter Ni, and James Chiu controls Sunny's manufacturing activities. Orion alleged that Sunny violated federal ***antitrust law*** and related California laws by unlawfully conspiring with Suzhou Synta Optical Technology Co. Ltd. ("Suzhou Synta"), Synta Technology Corp. ("Synta Tech"), and Celestron Acquisition LLC ("Celestron"), collectively **[*474]** the "Synta Entities." Sunny and Suzhou Synta are two of the biggest manufacturers of telescopes sold in the United States. The relationship between Suzhou Synta and Synta Tech is disputed, but David **[**6]** Shen is the principal of both companies, collectively "Synta." Celestron is a Suzhou Synta subsidiary and the largest telescope distributor in the United States. Celestron made its own telescopes but stopped after being acquired by Synta. Joe Lupica was Celestron's CEO and CFO but resigned to work on Sunny's 2013 acquisition of Meade Instruments Corp. ("Meade"), another telescope manufacturer. Sunny hired Lupica as Meade's CEO.

B. The Telescope Manufacturing Market

During the relevant time period, the key telescope distributors were Celestron, Meade, and Orion, whereas the main telescope manufacturers were Sunny, Synta, and Meade. Because most telescope manufacturers are private, market share data is not readily available. But public customs data show that, since 2012, Sunny and Synta have together accounted for up to 80 percent of telescopes imported into the United States. In 1991, the Federal Trade Commission ("FTC") blocked a proposed joint venture between Celestron and Meade. The FTC decided that this joint venture would "be a virtual monopolist in the manufacture and sale of [certain telescopes]." Meade had tried to acquire Celestron's assets in 2002, but the FTC prevented this **[**7]** deal "to maintain competition." In 2005, Synta bought all of Celestron's assets, including its intellectual property, and moved Celestron's telescope manufacturing to Synta's factory in China.

C. The Meade Deal

Meade made itself available for purchase in early 2013. Orion offered $4.5 million, but Meade chose to proceed with a different $4.5 million offer from Jinghua Optics & Electronics ("JOC") and announced the proposed merger in May 2013. Sunny intervened by submitting an unsolicited $5.87 million bid for Meade. Meade terminated the JOC merger and accepted Sunny's offer. Sunny created a holding company called Sunny Optics, to facilitate its acquisition of Meade. Orion claims Celestron and Synta colluded with Sunny to help it acquire Meade. The parties agree that a company called Sky Rainbow—which Orion insists is jointly owned by Peter Ni, the principal of Sunny, and David Shen, the principal of Synta—financed Sunny's acquisition of Meade. Sunny also admits it reached out to Celestron—now owned by Synta—to request that Celestron pay for already-purchased telescopes faster than it was obliged to do.

D. The Hayneedle Deal

In 2014, Hayneedle, an e-commerce company, decided to sell certain **[**8]** website addresses—including telescopes.com, on which Celestron relied heavily—known as the "Haystack Assets." Orion submitted the highest bid and signed a letter of intent with Hayneedle in May 2014. The Synta Entities sent an email advising Orion that the Synta Entities were cutting off Orion's line of credit. This email stated that "if Orion really buys Hayneedle, this will be the beginning of hazard [sic], we could not trust Orion's credit any more." The Synta Entities forwarded this email to Sunny and asked Sunny to also withdraw Orion's line of credit. Sunny sent Orion an almost identical email. Not surprisingly, Orion's deal with Hayneedle fell through. Orion claims it was unable to acquire the Hayneedle Assets after Synta and Sunny cut off its lines of credit.

E. Procedural History

In September 2016, Orion entered into Settlement and Supply Agreements with **[*475]** the Synta Entities to resolve antitrust claims related to Sunny's acquisition of Meade. Orion then sent a demand letter to Sunny, after which Sunny stopped selling telescopes to Orion. Orion filed this lawsuit on November 1, 2016. The operative complaint set out four claims against Sunny and two of its subsidiaries: (1) price-fixing **[**9]** and collusion by competitors in violation of *Sherman Act § 1*; (2) attempted monopolization and conspiracy to monopolize in violation of *Sherman Act § 2* and *Clayton Act § 7*; (3) violation of the California Unfair Competition Law ("UCL"); and (4) collusion to restrain trade in violation of California's Cartwright Act. Orion also sought compensatory and punitive damages, disgorgement, divesture, injunctive relief, and restitution from Sunny.

Both parties moved for summary judgment. The district court denied Orion's motion for summary judgment, but granted in part and denied in part Sunny's motion for summary judgment. Orion's summary judgment motion alleged that Sunny had violated *Sherman Act § 1* by conspiring with the Synta Entities to acquire Meade. Sunny argued that Orion lacked standing on this claim because Orion would not have acquired Meade regardless of misconduct by Sunny or its subsidiaries. The district court granted Sunny partial summary judgment on the issue of standing, holding "that Orion would not have acquired Meade in the absence of [Sunny's] alleged misconduct; JOC would have." But the district court found that Orion may still have been harmed by Sunny's acquisition of Meade because it concentrated the telescope market "more **[**10]** than five times the amount presumed to enhance market power." The district court found a genuine issue of material fact as to whether Sunny and Synta had entered into an agreement that harmed competition. Sunny also obtained summary judgment on Orion's below-cost pricing and refusal to deal claims.

Before trial, Orion timely designated two expert witnesses, Jose Sasian, PhD., and J. Douglas Zona, PhD. Sunny did not timely disclose any expert witnesses, but later disclosed fraud examiner Jeffrey Redman and economist Celeste Saravia, Ph.D. as rebuttal experts. The parties cross-filed motions to exclude the other's experts. The district court denied Sunny's motion but granted Orion's motion to exclude Mr. Redman's testimony. It partially granted Orion's motion to exclude Dr. Saravia.

A six-week jury trial was held. Dr. Saravia testified at trial, and Orion objected that she was impermissibly offering affirmative damages testimony. The district court sustained this objection and instructed the jury that it was "not to consider [Dr. Saravia's] testimony as to any amount of damages nor her opinion as to damages." After Orion rested, Sunny moved for judgment as a matter of law pursuant to *Federal Rule of Civil Procedure 50(a)* **[**11]** . The district court denied this motion.

The jury reached a verdict on November 26, 2019. It found Sunny liable on all claims tried before it and awarded a total of $16.8 million in damages. Sunny and Meade filed for bankruptcy on December 4, 2019, and litigation was stayed as to them. The district court entered a partial judgment for Orion and against Sunny on December 5, 2019. This partial judgment encompassed the *Sherman Act §§ 1* and *2*, *Clayton Act § 7*, *California UCL*, and *California Cartwright Act* claims, collectively the "Damages Claims." The district court then trebled the damages that were listed in the jury's verdict, under the *Clayton Act § 4*, *15 U.S.C. § 15*, and awarded Orion $50.4 million on the Damages Claims.

Sunny renewed its motion for judgment as a matter of law under **[*476]** *Federal Rule of Civil Procedure 50(b)* and moved for a new trial under *Federal Rule of Civil Procedure 59(a)*. The district court denied these motions. Sunny also moved to alter or amend the judgment under *Federal Rule of Civil Procedure 59(e)* to offset the value of the Settlement and Supply Agreements. The district court deducted $3.1 million from Orion's award, but did not offset any profits Orion derived from the Supply Agreement. In its view, Sunny had the burden of proof on this issue and the evidence that it offered to this end—a declaration by Dr. Saravia—was inadmissible as untimely **[**12]** under *Federal Rules of Civil Procedure 26* and *37*.

Orion moved for equitable relief and judgment on its UCL claim. The district court granted this motion, but reduced the scope of Orion's proposed injunction by ordering Sunny to: (1) supply Meade and Orion at non-discriminatory terms for five years; and (2) not communicate with Synta to the extent that such communication violated federal ***antitrust law***.

On April 10, 2020, the United States Bankruptcy Court for the Central District of California permitted the district court to enter a final judgment against Defendants Sunny Optics and Meade, which the district court did five days later. Sunny timely appealed.

II. STANDARDS OF REVIEW

HN1[] We review evidentiary rulings for abuse of discretion and will reverse only if incorrect evidentiary rulings were prejudicial. *Velazquez v. City of Long Beach, 793 F.3d 1010, 1017 (9th Cir. 2015)*.

HN2[] A jury verdict will be upheld if supported by substantial evidence. *Castro v. County of Los Angeles, 833 F.3d 1060, 1066 (9th Cir. 2016)*. "[W]e may not weigh the evidence but simply ask whether the plaintiff has presented sufficient evidence to support the jury's conclusion." *Id.* Any underlying legal analysis or statutory interpretation is reviewed *de novo*. *Mattel, Inc. v. Walking Mountain Prods., 353 F.3d 792, 814 (9th Cir. 2003)*. But findings of fact will be reversed only when the evidence "permits only one reasonable conclusion, and that conclusion is contrary **[**13]** to the jury's verdict." *Castro, 833 F.3d at 1066*.

HN3[] We review *de novo* a district court's denial of a renewed motion for judgment as a matter of law. *Id.* We review for abuse of discretion a district court's rulings on motions to alter or amend a judgment, *Idaho Potato Comm'n v. G & T Terminal Packaging, Inc., 425 F.3d 708, 718 (9th Cir. 2005)*, motions for a permanent injunction, *Bank of Am. v. City & County of San Francisco, 309 F.3d 551, 557 (9th Cir. 2002)*, and motions for a new trial, *City Sols., Inc. v. Clear Channel Commc'ns, 365 F.3d 835, 843 (9th Cir. 2004)*.

III. SUNNY'S APPEAL

A.

Sunny seeks reversal on the basis that the district court made three erroneous evidentiary rulings as to experts. We disagree.

Sunny first challenges the district court's admission of the testimony of Dr. Sasian, Orion's telescope manufacturing expert. Dr. Sasian's testimony that Sunny and Synta could make the same telescopes supports an inference that Sunny and Synta are horizontal competitors. This inference is relevant because Orion alleged that Sunny and Synta conspired to fix prices and allocate the telescope market, which are *per se* antitrust violations when engaged in by horizontal competitors. *See* *Palmer v. BRG of Ga., Inc., 498 U.S. 46, 49, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)*; **[*477]** *Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 986 (9th Cir. 2000)*.

Sunny argues that Dr. Sasian's testimony was "junk-science untethered to the facts of the case" because he only visited Celestron's factory for two hours roughly thirty-six years ago and relied on publicly available data from Orion's website. But Dr. Sasian's report **[**14]** and testimony explained how he used the product specifications of telescopes made by Sunny and Synta to determine that they could make each other's products. That these data were publicly available on Orion's website does not make Dr. Sasian's report untethered to the facts of this case.

Sunny also contends that Dr. Sasian's admission that 60% of his report was written by counsel gives grounds for reversal. ***HN4***[] Although the advisory notes to *Federal Rule of Civil Procedure 26(a)(2)(B)* permit counsel to assist experts in preparing reports, "the report, which is intended to set forth the substance of the direct examination, should be written in a manner that reflects the testimony to be given by the witness and it must be signed by the witness." The district court properly admitted Dr. Sasian's report because the parts written by counsel consisted of background information qualified by statements such as "I am informed that . . . ." Dr. Sasian also testified that he signed his report after reviewing and editing it and determining that it accurately reflected his analysis and opinion with regard to the case.

Sunny further contends that Dr. Sasian was not qualified as an expert because he has made only "a couple of hobby telescopes." **[**15]** But the district court reasonably found that Dr. Sasian is qualified to testify as to whether it is technically feasible for Sunny and Synta to manufacture certain telescopes made by the other company. Dr. Sasian holds a Ph.D. in optical sciences, serves as an astronomy and optical sciences professor, has published research regarding the design, fabrication, and testing of various optical devices including telescopes, and previously worked at AT&T Bell Laboratories, where he personally oversaw the design and fabrication of lens systems.

We conclude that the district court properly admitted Dr. Sasian's expert report and testimony. *See United States v. Hinkson, 585 F.3d 1247, 1263 (9th Cir. 2009)* (*en banc*) (holding that***HN5***[] a district court abuses its discretion if it misapplies the law or makes a finding that is illogical, implausible, or without support in inferences which can be drawn from the record).

Sunny also disputes the district court's admission of the testimony of Dr. Zona, Orion's damages expert. Sunny maintains that Dr. Zona's testimony was insufficiently tied to the facts of the case because he relied on theoretical economic models instead of "actual data" and did not calculate the actual overcharges Sunny inflicted on Orion.

Dr. Zona **[**16]** used two methods—direct and structural—to calculate damages. For the direct method, Dr. Zona's elasticity, margin, and pass-through calculations were based on data from the telescope manufacturing market, but he explained that the overcharges inflicted on Orion are not directly observable. Dr. Zona estimated these overcharges by looking to the number of alleged co-conspirators and considering the market shares of manufacturers in the relevant market. One method measured cartel overcharges from other conspiracies with similar market compositions, though Dr. Zona noted that his estimates could be conservative because the telescope market had so few buyers, which would likely magnify the overcharges. Dr. Zona separately looked to the structural theory of Cournot Equilibrium, an economic **[*478]** model where competitors simultaneously choose levels of output to maximize their profits. He adjusted this analysis to reflect the relevant market structure, of which two colluders—Sunny and Synta—controlled more than 70% of the market, based on data taken directly from this case. This Cournot Equilibrium model corroborated the results that Dr. Zona derived from his analysis of cartels operating in markets **[**17]** with compositions similar to the telescope market. Dr. Zona separately calculated damages through the structural method to check his direct method calculations. Dr. Zona's expert report and testimony were sufficiently tied to the facts of this case such that the district court properly admitted this evidence. *See Velazquez, 793 F.3d at 1017*; *Hinkson, 585 F.3d at 1263*.

The final pretrial evidentiary ruling that Sunny contests is the district court's exclusion of the testimony of Mr. Redman, one of Sunny's rebuttal experts. On appeal, Sunny argues that, although Mr. Redman is not an accountant or economist, he is qualified in these areas based on experience alone, and he should have been admitted because courts "routinely allow non-economists" to rebut expert economists such as Dr. Zona.

Sunny's arguments are unavailing. Mr. Redman admitted that he did not grasp the meaning of the term "pass through" as used by Dr. Zona. He also conceded that he was unfamiliar with the private cartel data that Dr. Zona used to estimate Orion's overcharges. In addition, Mr. Redman had no experience with antitrust damages and had never calculated elasticity or overcharges in antitrust contexts. Mr. Redman stated that the structural model used by Dr. Zona **[**18]** is "out of [his] area of expertise," and his arguments for how to calculate an overcharge violated antitrust economic principles. As the district court found, "Mr. Redman does not appear to understand the methods and models that Dr. Zona used." We hold that the district court properly excluded testimony of Mr. Redman as to Dr. Zona. *See* *Hinkson, 585 F.3d at 1263*. There was no abuse of discretion in this ruling.

B.

Sunny challenges the district court's mid-trial curative instruction limiting the scope of Dr. Saravia's expert witness testimony, contending that this ruling was an abuse of discretion.

At trial, Dr. Saravia, who was only a rebuttal expert, testified regarding her sensitivity analysis of Dr. Zona's damages calculations, in which she adjusted the parameters—*i.e.*, inputs—he used in his damages model by replacing them with alternative inputs that she deemed "more consistent with facts in the case." Dr. Saravia testified that, after her adjustments, Dr. Zona's "estimate of damages . . . goes way down," as shown by a slide titled "Making Reasonable Adjustments Dramatically Lowers Dr. Zona's Damages." Orion objected that Dr. Saravia had exceeded the bounds of rebuttal testimony by giving affirmative damages **[**19]** testimony.

The parties agreed that the district court had properly prohibited Dr. Saravia from presenting alternative damages estimates or models as part of her rebuttal testimony. The district court gave a curative instruction, in which it advised the jury that it was striking Dr. Saravia's testimony to the extent that she had presented a lower measure of damages than the one calculated by Dr. Zona. In issuing this curative instruction, the district court further explained to the jury that Dr. Saravia's criticisms of the methods used by Dr. Zona, as shown by her sensitivity analysis, were properly before the jury and **[*479]** could be considered, but that she was not permitted to provide an alternative estimate of her own. The district court did not, as Sunny claims, tell the jury to ignore Dr. Saravia's testimony altogether. Indeed, Sunny's counsel continued his direct examination of Dr. Saravia after the district court's curative instruction and clarified that she was only testifying as to her sensitivity analysis and not to an alternative measure of damages. We therefore conclude that the district court did not abuse its discretion in giving its curative instruction on Dr. Saravia's damages **[**20]** testimony. *See United States v. Rodriguez, 971 F.3d 1005, 1016 (9th Cir. 2020)* (stating that ***HN6***[] "[t]he district court has substantial latitude in formulating jury instructions" (cleaned up)).

C.

Sunny seeks reversal on the basis that Orion presented insufficient evidence to support three parts of the jury's verdict in Orion's favor on its *Sherman Act § 1* ("*Section 1*") claims. We reject these contentions.

HN7[] By its terms, *Section 1* bans every "contract, combination . . . , or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 1*. The elements of a *Section 1* claim are: (1) a contract, combination, or conspiracy; (2) "that unreasonably restrained trade under either a *per se* rule of illegality or a rule of reason analysis; and (3) that the restraint affected interstate commerce." *Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1062 (9th Cir. 2001)*. To establish a conspiracy, the available evidence must tend "'to exclude the possibility' that the alleged conspirators acted independently." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. Horizontal price fixing and market allocation are *per se* *Section 1* violations. *See* *Palmer, 498 U.S. at 49*; *Knevelbaard Dairies, 232 F.3d at 986*.

Sunny first contends that substantial evidence does not support the jury's verdict that Sunny conspired with horizontal competitor Synta to ensure that Sunny acquired Meade to protect their market share and guarantee that competitor JOC would not buy Meade. **[**21]** If proven, that would be a *per se* *Section 1* violation. *See* *Helix Milling Co. v. Terminal Flour Mills Co., 523 F.2d 1317, 1322 (9th Cir. 1975)*.

At trial Orion offered evidence from which the jury could conclude that Peter Ni, David Shen, and other Synta executives discussed, before Sunny submitted its bid for Meade, arranging a transaction in which Sunny would acquire Meade. An email between Ni, Shen, and other Synta executives states that Sunny bought Meade "to prevent JOC to buy Meade," and Synta executives agreed that Celestron—which was owned by Synta—and Synta would "provide[] the financial support to Sunny" for its purchase of Meade. Orion also presented evidence that

Synta did in fact provide such financial support. Specifically, Celestron made $7.2 million in "prepayments" to Sunny for unshipped telescopes, and gave Sunny $10 million in interest-free loans to fund Meade's operations, Indeed, Orion offered evidence that Sunny's purchase of Meade was financed by funds provided by Sky Rainbow, an entity jointly owned by Ni and Shen. Orion further pointed out that Celestron and Synta received interests in Meade equivalent to the funds they provided for Sunny's acquisition of Meade, which signaled that Sunny rewarded Celestron and Synta for this financial support. The jury **[**22]** also viewed evidence that Celestron executives ran Sunny's acquisition of Meade. In 2013, Celestron's CEO resigned to consult Sunny on the Meade deal then became the CEO of **[*480]** Meade. Sunny also instructed the lawyers who represented it in the Meade deal to take advice from Shen.

Orion also offered evidence from which the jury could infer that Sunny's acquisition of Meade was part of a larger scheme in which Sunny and Synta aimed to jointly control the telescope market notwithstanding that federal regulators had already prohibited such a combination. After former Celestron CEO Joe Lupica became the CEO of Meade, he sent an email indicating that the owners of Sunny and Synta—Peter Ni and David Shen—had a "vision of how the four companies are to cooperate for the benefit of the entire group of companies." Lupica later sent another email stating that "[i]f we take advantage of the strong relationships among Sunny, Synta, Celestron and Meade (under Peter's ownership), we can quickly turn the company around and the four companies can dominate the telescope industry." To this end, Lupica insisted that "we need to have one senior management team managing Meade and Celestron." And the evidence **[**23]** was such that the jury could infer that Lupica was aware that the FTC had blocked two prior attempts to merge Celestron and Meade because the combined entity would be "a virtual monopolist in the manufacture and sale of [certain telescopes]."

We thus hold that substantial evidence supports the jury's verdict that Sunny and Synta conspired to acquire Meade to protect their market share and stop a competitor from buying Meade. *See* *Castro, 833 F.3d at 1066*.

Sunny also challenges the jury's alternative findings that Sunny conspired with a competitor to fix prices or credit terms in violation of *Section 1*. But the jury could infer from the evidence that Synta controls an entity called Good Advance, and that Sunny and Synta conspired to fix the prices that they charged Orion and Synta's subsidiary Celestron using Good Advance. Orion offered evidence that Good Advance uses the name "Taiwan Synta," and Sunny admits that Joyce Huang, Good Advance's only employee, works for Synta Tech. Also, the evidence showed that Huang worked for Synta owner David Shen, who gave direction to Good Advance, and Good Advance has the same business address as Synta and Sky Rainbow, the entity that transferred the funds that Sunny used to purchase **[**24]** Meade.

Orion also offered specific price-fixing evidence at trial. Synta asked Sunny: "Is Sunny's AZ GOTO mount the same as that Suzhou used? If so, please re-check your price. Suzhou's 2013 list price of AZ GOTO mount [and] steel tripod was US $140." Sunny sent an email to Huang stating that it was "considering . . . adopting different product prices to protect Celestron." Huang, who worked for Synta's David Shen, told Sunny to raise the prices it charged Orion to match the prices that Synta was charging Orion. Sunny agreed. Price lists showed that Sunny charged Orion fifty percent more than it charged Synta subsidiary, Celestron, for identical items. Substantial evidence therefore supports the jury's verdict that Sunny and Synta committed a *per se* *Section 1* violation by conspiring to fix the prices that they charged Synta's subsidiary Celestron and Orion. *See* *Castro, 833 F.3d at 1066*; *Knevelbaard Dairies, 232 F.3d at 986*.

With regard to fixing credit terms, which is a form of price fixing and a *per se* *Section 1* violation, *Catalano, Inc. v. Target Sales, Inc., 446 U.S. 643, 648, 100 S. Ct. 1925, 64 L. Ed. 2d 580 (1980)*, the jury could infer from the evidence adduced at trial that Sunny and Synta engaged in such behavior in retaliation for Orion's Hayneedle deal. Orion offered the highest bid to Hayneedle for the Haystack Assets, **[*481]** including the telescopes.com **[**25]** website address on which Synta's subsidiary Celestron relied, and Orion then signed a letter of intent with Hayneedle. The Synta Entities then sent an email terminating Orion's line of credit. The Synta Entities forwarded this email to Sunny and asked Sunny to withdraw Orion's line of credit. Sunny sent Orion a credit termination email nearly identical to the one sent by the Synta Entities. These emails both stated that Sunny and Synta were revoking Orion's credit because Orion was buying the Haystack Assets. These emails also stated that Sunny and Synta would no longer allow Orion to receive telescope shipments in advance of payment. Because substantial evidence supports the jury's verdict that Sunny and Synta fixed credit terms in violation of Section 1, we affirm this finding. *See* Castro, 833 F.3d at 1066; Catalano, 446 U.S. at 648.

Sunny argues that there was not substantial evidence to support the jury's verdict that Sunny agreed with Synta, a horizontal competitor, either not to compete with one another in the market, or to divide customers or potential customers between them. Such conduct constitutes illegal market allocation, which is a *per se* Section 1 violation. *See* Palmer, 498 U.S. at 49. We disagree.

The documentary evidence and expert testimony that Orion presented **[**26]** during trial—particularly Dr. Sasian's testimony regarding overlapping production capabilities—showed that Sunny had the technical capability to manufacture the same telescopes as Synta, but chose not to. Two internal emails mentioned "consider[ing] how to avoid conflict with Celestron's products," and "divid[ing] the products and sell[ing] them to different markets to reduce conflicts." Other emails between Sunny and Synta indicate that they had agreed to divide customers. For instance, in a December 2013 email, Synta's Shen told Sunny that:

> Bidding with Costco between May and June (compete with Celestron for the price). This is a very important issue. This need Director Ni to communicate face-to-face with DAVE when he goes to the United States. Don't bid. If you let the thing go by doing this, how would you deal with everything in the future? All products are produced by Sunny. Following a conflict, Celestron would not trust Sunny any longer.

This is quintessential evidence of a market allocation conspiracy. We accordingly conclude that substantial evidence supports the jury's verdict that Sunny engaged in *per se* illegal market allocation with Synta. *See* Castro, 833 F.3d at 1066; Palmer, 498 U.S. at 49.

D.

Sunny also seeks reversal **[**27]** on the basis that the evidence does not support the jury's verdict for Orion on its Sherman Act § 2 ("Section 2") claims. We disagree. ***HN8***[] Section 2 makes it illegal to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce . . . ." 15 U.S.C. § 2. While Section 1 "targets concerted anticompetitive conduct, [Section 2] targets independent anticompetitive conduct." Fed. Trade Comm'n v. Qualcomm Inc., 969 F.3d 974, 989-90 (9th Cir. 2020). Monopoly power itself is not unlawful—instead, it must be "accompanied by an element of anticompetitive conduct" to trigger Section 2 liability. Id. at 990.

The jury found Sunny liable for attempted monopolization and conspiracy to monopolize under Section 2. ***HN9***[] Attempted monopolization requires: "(1) specific intent to monopolize a relevant market; (2) predatory or anticompetitive **[*482]** conduct; and (3) a dangerous probability of success." Catlin v. Wash. Energy Co., 791 F.2d 1343, 1348 (9th Cir. 1986). Conspiracy to monopolize requires: "(1) an agreement or understanding between [alleged conspirators]; (2) a specific intent to monopolize; and (3) overt acts in furtherance of the alleged conspiracy." Howard Hess Dental Lab'ys Inc. v. Dentsply Int'l, Inc., 516 F. Supp. 2d 324, 341 (D. Del. 2007), *aff'd*, 602 F.3d 237 (3d Cir. 2010).

We first reject Sunny's argument that Orion improperly pursued a "joint monopoly theory" at trial. The district court's jury instruction on conspiracy to monopolize required Orion to show that **[**28]** "[Sunny or its subsidiaries] specifically intended that *one of the parties* to the agreement would obtain or maintain monopoly power in the telescope and accessory manufacturing market." It is true that this jury instruction does not specify which entity—Sunny or Synta—the parties to the agreement intended would achieve or maintain monopoly power, but Sunny agreed to the jury instructions in advance and did not object to this lack of clarity. Moreover, there is substantial evidence that Sunny was dangerously close to acquiring monopoly power, and the jury could have found that the parties intended for Sunny to have a monopoly over the telescope manufacturing market. We therefore conclude that the jury's verdict imposing Section 2 liability does not depend on a joint monopoly theory.

Sunny's contentions that Orion could not prevail under *Section 2* for failure to define the relevant market are similarly unavailing. ***HN10***[] To define a market, the district court must determine: (1) "the field in which the plaintiff was engaged . . . in geographic and distributional terms," and (2) "the product (or product line) that competes in that field." *JBL Enters., Inc. v. Jhirmack Enters., Inc., 698 F.2d 1011, 1016 (9th Cir. 1983)*. The relevant market is defined as the "commodities reasonably interchangeable **[**29]** by consumers for the same purpose." *Id.* We review relevant market definitions as fact findings reversible only if the evidence compels a conclusion contrary to the jury's verdict. *Id.*

Orion established the relevant market through expert testimony by Dr. Zona. Sunny claims this was insufficient because Dr. Zona did not analyze the cross-elasticity of demand between the product and substitutes, conduct a SSNIP [1] analysis, independently analyze whether manufacturers can produce both high-and-low-end telescopes, explain why the market included accessories, or evaluate substitutes to the telescope manufacturing market.

These contentions are without merit. Sunny acknowledges that there is no requirement to use any specific methodology in defining the relevant market. Dr. Zona testified that there was no need to perform a SSNIP analysis because the global telescope and telescope accessory manufacturing **[*483]** market is so broad—geographically unbounded and encompassing all products potentially substituted for or sold with telescopes—that the key question is whether a new manufacturer, such as an automaker, could enter the telescope market quickly enough to offset a SSNIP imposed by a hypothetical **[**30]** monopolist. As such, Dr. Zona determined reasonably that he could forgo a SSNIP analysis in favor of his barriers to entry analysis. Dr. Sasian testified that Sunny and Synta had the technical capacity to make high-and-low-end telescopes, so Dr. Zona did not need to independently determine that as part of his antitrust economic analysis. Dr. Zona further testified that his market definition included telescope accessories because buyers purchase them with telescopes and they are often shipped together to save money. *See JBL Enters., 698 F.2d at 1016* (explaining that the relevant product may also include "a 'cluster' or 'product line' of one manufacturer [if it] is reasonably interchangeable for that of another by the [distributor] that is making the purchase"). Dr. Zona finally testified that there is no real substitute for telescope manufacturing. No basis for reversal on market definition therefore exists here. *See United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*.

Regarding the sufficiency of the evidence, Sunny takes the position that "no evidence" supports the jury's finding that Sunny expressed a specific intent to gain monopoly power. We disagree.

HN11[] Courts use the specific intent element to limit "the reach of an attempt claim to conduct threatening monopolization." **[**31]** *William Inglis & Sons Baking Co. v. ITT Cont'l Baking Co., 668 F.2d 1014, 1027 (9th Cir. 1981)*. A plaintiff may establish specific intent to monopolize through either direct evidence of "unlawful design" or circumstantial evidence "principally of illegal conduct." *Id.* This "inference may be drawn from conduct . . . with an unreasonable restraint of trade in violation of *section 1 of the Sherman Act*." *Id. at 1028*.

As explained above, substantial direct evidence of unlawful design supports the jury's *Section 1* finding that Sunny had a specific intent to seize control of the telescope and accessory manufacturing market by acquiring Meade. The email in which Sunny stated that it purchased Meade "to prevent JOC to buy Meade," for instance, establishes that Sunny's specific intent was to prevent JOC, the third-largest competitor in the telescope and accessory manufacturing market, from becoming a stronger competitor. In addition, and as explained above, the evidence supports the jury's conclusion that Sunny unlawfully conspired with Synta to prevent JOC, a new, smaller

[1] SSNIP is a common methodology for defining a relevant antitrust market. To perform a SSNIP analysis, an economist proposes a narrow geographic and product market definition and then iteratively expands that definition until a hypothetical monopolist in the proposed market would be able to profitably make a small but significant non-transitory increase in price ("SSNIP"). At each step, if consumers would respond to a SSNIP by making purchases outside the proposed market definition, thereby rendering the SSNIP unprofitable, then the proposed market definition is too narrow. At the next step, the economist expands the proposed geographic or product market definition to include the substituted products or area. This process is repeated until a SSNIP in the proposed market is predicted to be profitable for the hypothetical monopolist. *See St. Alphonsus Med. Ctr. - Nampa Inc. v. St. Luke's Health Sys., Ltd., 778 F.3d 775, 784 (9th Cir. 2015)*.

competitor, from buying Meade. Orion also presented evidence that Sunny told the FTC Shen was not involved in its Meade acquisition, when, at the very least, Sky Rainbow, which Shen partially owned, funded Sunny's acquisition of Meade. This *Section 1* violation also **[**32]** supports a finding of specific intent to monopolize. *See William Inglis & Sons Baking Co., 668 F.2d at 1028*.

Sunny attempts to pre-empt this analysis by suggesting that Synta would have no motive to help Sunny acquire monopoly power because that would give Sunny the power to dictate prices and market economies over Synta. We are not persuaded. Because Synta is a horizontal competitor of Sunny, Synta would benefit from Sunny's ability to raise prices because Synta could raise its own prices in turn. *See Matsushita Elec. Indus. Co., 475 U.S. at 583* ("[C]ompetitors . . . stand to gain from any conspiracy to raise the market price."). And the jury could have inferred that Synta agreed to help **[*484]** Sunny acquire Meade because it expected to receive favorable wholesale pricing for Celestron-branded products and to engage in the market allocation scheme addressed in Orion's *Section 1* claims. Orion also offered evidence that Celestron was aware that its conduct was, or could be perceived as anticompetitive. Celestron provided $7.2 million in "prepayments" to Sunny for unshipped telescopes to support Sunny's acquisition of Meade, and Celestron admitted that it would need to revert to its usual course of dealing with Sunny to avoid unwanted suspicion. We therefore hold that substantial evidence supports **[**33]** the jury's verdict that Sunny demonstrated the specific intent to monopolize necessary for *Section 2* liability. *See id.*; *Castro, 833 F.3d at 1066*; *William Inglis, 668 F.2d at 1027*.

Sunny finally suggests that the evidence Orion offered at trial did not establish that Sunny was dangerously close to attaining monopoly power. This contention is unavailing and does not warrant reversal.

HN12[] Monopoly power is the ability to "control prices" or "exclude competition" in the relevant market. *Image Tech. Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1202, 1206 (9th Cir. 1997)*. It can be proven by direct or circumstantial evidence. *Id. at 1202*. The latter approach requires plaintiffs to "(1) define the relevant market, (2) show that the defendant owns a dominant share of that market, and (3) show that there are significant barriers to entry and show that existing competitors lack the capacity to increase their output in the short run." *Id.* A market share of sixty-five percent or more usually establishes a prima facie case of monopoly power in *Section 2* contexts. *Id. at 1206* (citation omitted). But "the minimum showing of market share required in an attempt case is a lower quantum than the minimum showing required in an actual monopolization case." *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1438 (9th Cir. 1995)*. We have held that a market share as low as forty-four percent is sufficient to support a finding that a party was dangerously **[**34]** close to monopoly power where barriers to entry were high and competitors could not expand their short-run output. *Id.*

The evidence Orion presented at trial, including Dr. Zona's expert testimony, established that Sunny's market share was around fifty percent and reached its peak of sixty-three percent in 2013. Sunny's citations to its 2017 market share of about thirty-three-and-a-half percent, are inapposite because, by 2018, Sunny's market share was just over forty-nine percent, above the forty-four percent mark that we have recognized to be sufficient to establish a dangerous proximity to market power. *See id.* Dr. Zona testified that there are high barriers to entry in the telescope manufacturing market, and that this market is highly concentrated. Orion also presented evidence that there had been no new entrants into the telescope manufacturing market for ten years, corroborating Dr. Zona's conclusion that there are high barriers to entry in the telescope manufacturing market. After Sunny bought Meade, Sunny became the largest telescope manufacturer in the world. Sunny's forty-nine percent market share could have risen more if it had gotten Meade's telescope manufacturing plant **[**35]** up to speed. Substantial evidence therefore supports the jury's finding that Sunny was dangerously close to monopoly power such that it could be held liable under *Section 2*. *See Castro, 833 F.3d at 1066*; *Rebel Oil, 51 F.3d at 1438*.

None of Sunny's attacks successfully undermines the jury's verdict finding that Sunny unlawfully conspired to monopolize the global telescope manufacturing market in violation of *Section 2 of the Sherman Act*. **[*485]** Accordingly, the *Section 2* verdict stands.

E.

Orion prevailed on its *Clayton Act § 7* ("*Section 7*") claim because the jury found a reasonable likelihood that Sunny's acquisition of Meade would substantially reduce competition in the telescope manufacturing market or create a monopoly. Sunny seeks a new trial on the basis that Orion did not prove damages from this violation of *Section 7*. Once more, we disagree.

HN13[] *Section 7* prohibits mergers that tend "substantially to lessen competition" or "create a monopoly." *15 U.S.C. § 18*. "To establish a prima facie [*Section 7*] case, [a plaintiff] must (1) propose the proper relevant market and (2) show that the effect of the merger in that market is likely to be anticompetitive." *Fed. Trade Comm'n v. Penn State Hershey Med. Ctr., 838 F.3d 327, 337-38 (3d Cir. 2016)*. A new trial may be granted where there is "no evidence on the amount of damages attributable only to the antitrust violation." *Farley Transp. Co. v. Santa Fe Trail Transp. Co., 786 F.2d 1342, 1351 (9th Cir. 1985)*. But "[t]he district court's denial of the motion for a new trial **[**36]** is reversible only if the record contains no evidence in support of the verdict." *Id. at 1347*. Once a plaintiff establishes "the fact of antitrust injury," we must uphold the jury's finding as to the amount of damages unless that finding is "'grossly excessive or monstrous,' clearly not supported by the evidence, or 'only based on speculative guesswork.'" *Handgards, Inc. v. Ethicon, Inc., 743 F.2d 1282, 1287 (9th Cir. 1984)* (citation omitted).

Orion presented evidence of antitrust injury on its *Section 7* claim during trial. The theory that Orion set out to the jury was that Sunny's acquisition of Meade reduced the number of major telescope manufacturers from three to two. This manufacturer consolidation further concentrated the already highly concentrated telescope manufacturing market by causing its Herfindahl-Hirschman Index ("HHI")—a widely accepted measure of market concentration—to increase by over 1,000 points, or five times the amount that is presumptively anticompetitive. *See St. Alphonsus Med. Ctr., 778 F.3d at 788*. By acquiring Meade, Sunny gained increased control over telescope manufacturing, which enabled Sunny and its competitors to charge supracompetitive prices for telescopes. This was a major factor in the overcharges that Orion experienced in its business dealings with Sunny, Synta, and Meade. **[**37]** Sunny tries to counter this analysis by arguing that Orion's expert Dr. Zona testified that the overcharges Orion had to pay did not result from Sunny's acquisition of Meade. But this mischaracterizes Dr. Zona's testimony. Dr. Zona only confirmed that his damages calculation excluded damages Orion sustained from its failure to acquire Meade. He did not state that Orion was undamaged by supracompetitive prices arising from the merger. Because Orion presented evidence of antitrust injury, and because the jury's finding as to damages was neither grossly excessive, unsupported, nor the result of guesswork, Sunny is not entitled to a new trial on the issue of *Section 7* liability. *See Handgards, 743 F.2d at 1287*.

F.

The district court entered injunctive relief against Sunny under *Clayton Act § 16 ("Section 16")*, *15 U.S.C. § 26*, and the UCL. Sunny claims this injunction is overbroad. ***HN14***[] We review for abuse of discretion a grant of a permanent injunction and any decision "underlying the imposition of the injunction is reviewed by the standard **[*486]** that is appropriate to that determination." *Bank of Am., 309 F.3d at 557*.

Sunny suggests the district court's injunction does not flow from conduct that violated the antitrust laws, implying that whether the banned conduct violates ***antitrust law*** is a legal issue **[**38]** underlying the grant of injunctive relief and subject to *de novo* review. That suggestion is incorrect.

HN15[] *Section 16* authorizes injunctive relief against any "threatened loss or damage by a violation of the antitrust laws." *15 U.S.C. § 26*. Such relief must be based on a "clear indication of a significant causal connection between the conduct enjoined or mandated and the violation found directed toward the remedial goal intended." *United States v. Microsoft Corp., 253 F.3d 34, 105, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (quotation marks omitted). But a district court may order an injunction "beyond a simple proscription against the precise conduct previously pursued." *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 698, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. The reviewing court only asks if "the relief [is] a reasonable method of eliminating the consequences of the illegal conduct." *Id.* If the jury finds that monopolization or attempted monopolization has occurred, the available injunctive relief is broad, including to "terminate the illegal monopoly, deny to the defendant the fruits of its statutory violation, and ensure that there remain no practices likely to result in monopolization in the future." Microsoft, 253 F.3d at 103; *accord* Ford Motor Co. v. United States, 405 U.S. 562, 573, 92 S. Ct. 1142, 31 L. Ed. 2d 492 (1972) (holding that antitrust relief must restore competition).

There was no error. Sunny's decision to forgo profits by refusing to supply Meade was proof of its intent to restrain competition. **[**39]** And the telescope manufacturing market would become overconcentrated if Sunny eliminated Meade as a competitor. The district court validly ordered Sunny to supply Meade on non-discriminatory terms. This injunction will help ensure that Sunny does not engage in practices "likely to result in monopolization in the future." Microsoft, 253 F.3d at 103.

Sunny similarly claims that the district court improperly granted relief on Orion's refusal-to-deal claim, which was dismissed on summary judgment, when it ordered Sunny to supply Orion on non-discriminatory terms. **HN16**[] But the district court can order conduct to "avoid a recurrence of the [antitrust] violation and to eliminate its consequences. Prof'l Eng'rs, 435 U.S. at 698. As explained above, the jury properly found that Orion had been forced to pay inflated prices as a result of the market power exerted by Sunny and Synta following the unlawful Meade acquisition. The district court thus properly fashioned a "reasonable method of remedying the harm to [Orion] caused by [Sunny's] attempted monopolization and ensuring that [Sunny's] violations of ***antitrust law*** do not recur" with regard to Orion by ordering Sunny to supply Orion on non-discriminatory terms.

Sunny, citing *Kodak*, argues that the district **[**40]** court's order to supply Orion and Meade on non-discriminatory terms is inappropriate because it will result in a windfall for Orion and so may create an oligopoly. *See* 125 F.3d at 1224-26. But in *Kodak*, the defendant challenged various requirements of an injunction insofar as they required nondiscriminatory sales of parts to non-party competitors, and we affirmed that "[i]njunctive relief covering nonpart[ies] . . . is proper" to prevent future Sherman Act violations. Id. at 1226. Sunny is now making the opposite argument: that injunctive relief requiring an antitrust defendant to deal on a nondiscriminatory basis is only appropriate if it applies to the defendant's interactions with **[*487]** all market participants. Kodak imposes no such requirement. The district court acted within its discretion in finding that, under the facts of this case, extending injunctive relief only to Orion and Meade would enhance, not stifle, competition. *See* Ford, 405 U.S. at 573 (explaining that, **HN17**[] in antitrust cases involving injunctive relief, district courts have broad discretion to "fit the decree to the special needs of the individual case" (quotation marks omitted)). We decline to conclude that the district court abused its discretion in fashioning injunctive relief **[**41]** it deemed appropriate to prevent a recurrence of the antitrust violations, or to remand this case based on the scope of the injunction. *See* Prof'l Eng'rs, 435 U.S. at 698; Ford, 405 U.S. at 573; Microsoft, 253 F.3d at 103.

G.

In connection with the antitrust claims at issue here, Orion and Synta entered into the Settlement and Supply Agreements in 2016, and Synta also agreed to supply Orion on most favored customer terms. Sunny also stopped supplying Orion in 2016. Sunny challenges the district court's finding that its conspiracy with Synta could have continued past 2016 and seeks judgment as a matter of law on the issue of whether Orion is entitled to post-September 2016 damages.

The parties disagree on who bore the burden of proof on this issue. Regardless, Orion offered substantial evidence that the conspiracy between Sunny and Synta continued past 2016 because Synta kept overcharging Orion instead of giving Orion the most favored customer rate, leading Orion to pay more for telescopes than it had before its agreements with Synta. This evidence also showed that Sunny stopped supplying Orion. These acts to raise Orion's costs are suggestive of a continued conspiracy.

But even if the conspiracy between Sunny and Synta to eliminate Meade as an independent competitor **[**42]** ended in 2016, when Orion and Synta signed the Settlement and Supply Agreements, Orion could still recover post-2016 damages because it continued to suffer economic harm from the harm to competition caused by the illegal concerted activity. See L.A. Mem'l Coliseum Comm'n v. Nat'l Football League, 791 F.2d 1356, 1366 (9th Cir. 1986) (**HN18**[] "[A] plaintiff need not prove that the antitrust violation was the only cause of its injury in order to recover damages[;] proof that the violation was a material cause is sufficient."). The purpose of Sunny and Synta's conspiracy was to prevent JOC from acquiring Meade and to eliminate Meade as an independent competitor in the market for telescope and telescope accessories manufacturing. This conspiracy achieved its objective: a highly concentrated market with fewer competitors and higher costs for telescope brands not yet controlled by the co-conspirators. Orion's antitrust post-2016 injuries arose directly from the change in market structure that resulted from the conspiracy's successful elimination of Meade as an independent competitor. When Sunny decided to stop supplying Orion, Synta exploited its market power to charge Orion higher prices. Orion nonetheless continued buying approximately seventy-five percent of its telescopes from Synta **[**43]** because it lacked viable alternate suppliers in the highly concentrated market. This is consistent with Dr. Zona's testimony; he explained that structural changes to the telescope manufacturing market brought about by the conspiracy continued to impose costs on Orion after 2016, and he was able to estimate those costs.

[*488] ***HN19***[] Therefore, where an antitrust plaintiff suffers continuing antitrust injuries from anticompetitive changes to market structure that arose from a proven antitrust violation, we hold that the violation may be a material cause of that injury, and so recovery of damages is permitted, even after the last proven date of the violative conduct. This rule accords with the common-sense principle that "if you break it, you buy it." If a defendant has conspired to violate the antitrust laws and thereby harmed a market's competitive structure, it remains liable for the continuing injuries suffered by plaintiffs from the structural harm to competition that its unlawful scheme brought about. It is no defense to argue that the conspiracy has ended, where the conspiracy achieved its anticompetitive objective. As a result, Orion could prevail by showing that an overt pre-2016 conspiracy **[**44]** had residual market effects that resulted in post-2016 damages.

The district court properly found that Sunny was not entitled to judgment as a matter of law on post-2016 damages. The jury could have found that Sunny and Synta continued conspiring after 2016 or that Orion's post-2016 damages were a residual effect of a pre-2016 conspiracy between Sunny and Synta. *See* *Castro, 833 F.3d at 1066*. Either would suffice to affirm.

H.

Sunny contends the district court improperly excluded a declaration by Dr. Saravia in ruling on its post-trial motion to alter or amend the judgment. In the district court's view, this declaration fell within the scope of *Federal Rule of Evidence 702*, and was inadmissible as untimely under *Federal Rules of Civil Procedure 26* and *37*.

HN20[] But *Rule 26* states that "a party must disclose to the other parties the identity of any [expert] witness it may use at trial . . . ." *FED. R. CIV. P. 26(a)(2)(A)*. If a scheduling order is issued, experts must be disclosed "at the times and in the sequence that the court orders." *FED. R. CIV. P. 26(a)(2)(D)*. Here, the district court entered a pre-trial scheduling order that set a May 31, 2019 deadline for disclosure of rebuttal experts. Sunny timely disclosed Mr. Redman and Dr. Saravia as rebuttal experts. And there is no evidence that Sunny did not attach written reports to these disclosures. **[**45]** *FED. R. CIV. P. 26(a)(2)(B)*. Indeed, Orion's motion to exclude Dr. Saravia's testimony takes issue with her written report. As such, the district court could not apply the rule that "[i]f a party fails to provide information or identify a witness as required by *Rule 26(a)*[,] the party is not allowed to use that information or witness to supply evidence on a motion" with regard to Dr. Saravia. *FED. R. CIV. P. 37(c)(1)*.

We hold that the district court abused its discretion by excluding under *Federal Rules of Civil Procedure 26* and *37* the declaration that Dr. Saravia gave in support of Sunny's motion to alter or amend the judgment. *See Yokoyama v. Midland Nat'l. Life Ins. Co., 594 F.3d 1087, 1091 (9th Cir. 2010)*. We express no opinion on whether Dr. Saravia's declaration is admissible under *Federal Rule of Evidence 702* because the district court should address that issue in the first instance. *See* *Singleton v. Wulff, 428 U.S. 106, 120-21, 96 S. Ct. 2868, 49 L. Ed. 2d 826 (1976)*. We remand for further proceedings consistent with this opinion.

IV. ORION'S CROSS-APPEAL

Orion cross-appeals the district court's entry of summary judgment for Sunny on the issue of whether Sunny caused Orion's failure to acquire Meade. ***HN21***[] But Orion must have antitrust standing, consisting of the "(1) injury of the type the **[*489]** antitrust laws were intended to prevent that also (2) flows from that which makes defendants' acts unlawful." *In re Online DVD-Rental Antitrust Litig., 779 F.3d 914, 922 (9th Cir. 2015)* (cleaned up). And monetary recovery "will not be permitted for **[**46]** injuries . . . independently caused by something other than the antitrust violation." *Nat'l Football League, 791 F.2d at 1366*.

The relevant facts are that, in February 2013, Orion offered $4.5 million to acquire Meade. Meade chose a different higher offer from JOC. In April 2013, JOC reduced its offer from $5 million to $4.5 million, so Meade re-opened the bidding process. In May 2013, Meade reached out to Orion and stated that it no longer had an exclusive merger agreement with JOC. But Orion declined to submit another offer to buy Meade at that time. JOC later offered $4.5 million to purchase Meade, and Meade accepted. The merger between JOC and Meade was announced on May 17, 2013. Sunny later made an unsolicited $5.87 million bid to acquire Meade, so Meade abandoned its second deal with JOC to accept Sunny's offer.

Orion claims that a reasonable jury could have found in its favor because: (1) JOC's second bid for $4.5 million was the same amount as Orion's bid; (2) JOC had backed out of buying Meade once; and (3) Orion had more to gain from purchasing Meade than JOC did and so it might have increased its bid to ensure that it acquired Meade. These arguments are unavailing because they do not properly account for the timing **[**47]** of bids. Most importantly, when Orion was informed that Meade's deal with its prior high bidder was off, Orion declined to even submit a bid to buy Meade. Orion's decision not to submit a new offer to Meade creates a strong presumption that Orion would not have acquired Meade even if Sunny had not outbid JOC for Meade. Orion offered no evidence Meade would have accepted a higher bid from Orion after announcing its $4.5 million deal with JOC, or that Meade would have terminated this deal for reasons other than Sunny's bid. There was no genuine dispute of material fact on whether Sunny prevented Orion from buying Meade. *See Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 252, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*.

VACATED in part only with regard to the valuation of the settlement set-off, which is REMANDED for further proceedings consistent with this opinion. AFFIRMED with regard to all other issues. We AWARD costs on appeal to Orion.

Ass'n for Accessible Meds. v. Bonta

United States District Court for the Eastern District of California

December 8, 2021, Decided; December 9, 2021, Filed

Opinion

[*977] ORDER

This matter is before the Court on Plaintiff Association for Accessible Medicine's ("Plaintiff") Motion for Preliminary Injunction ("PI") requesting the Court enjoin the enforcement of Assembly Bill 824 ("AB 824"). (ECF No. 15.) Defendant Rob Bonta, in his official capacity as Attorney General of the State **[**2]** of California ("Defendant" or the

"State"), has filed an opposition.[1] (ECF No. 20.) Plaintiff has filed a reply. (ECF No. 26.) For the reasons set forth below, Plaintiff's motion is GRANTED.

I. Factual and Procedural Background [2]

AB 824, signed into law by California Governor Gavin Newsom on October 7, **[*978]** 2019, creates a presumption that "reverse payment" settlement agreements regarding patent infringement claims between brand-name and generic pharmaceutical companies are anti-competitive and unlawful.

Reverse payment settlement agreements arise primarily — if not exclusively — in the context of pharmaceutical drug regulations and suits brought under the statutory provisions of the Drug Price Competition and Patent Term Restoration Act of 1984, commonly referred to as the *Hatch-Waxman Act*. Under the *Hatch-Waxman Act*, once a brand-name company has submitted a new prescription drug to the U.S. Food and Drug Administration ("FDA") and gained approval to market it, a manufacturer of a generic drug with the same active ingredients that is biologically equivalent to the approved brand-name drug can gain approval to market the generic through an abbreviated FDA process. The New Drug Application ("NDA") process is long, comprehensive, and expensive, whereas the Abbreviated New Drug Application **[**3]** ("ANDA") process to which generic drugs are subject is substantially less expensive and requires far less testing.

In order to gain approval through the FDA, the generic company must file an ANDA. As part of this application, the generic company must assure the FDA that its drug will not infringe on any patents owned by the brand-name company. One way to do so is for the generic company to certify that any listed, relevant patent is invalid or will not be infringed by the manufacture, use, or sale of the generic drug. This is called Paragraph IV certification. Because filing under Paragraph IV indicates there are current patents the generic company asserts are invalid or uninfringed by its product, the Paragraph IV certification is *per se* a patent infringement and thus the brand-name company can and often does bring suit against the generic drug manufacturer.

Settlements of the resulting lawsuits sometimes include reverse payments in which the plaintiff, the brand-name company, pays the defendant, the infringing generic company, a sum of money for the promise that the generic company will keep its drug off the market for an agreed-upon length of time.

AB 824 targets these types of settlements. **[**4]** According to the State, AB 824 closes this loophole in the *Hatch-Waxman Act* and ensures a brand-name company cannot continue to enforce an otherwise weak patent against generic companies through these reverse payment settlement agreements. AB 824 imposes a presumption that a settlement agreement involving a brand-name company compensating the generic company for keeping its drug off the market is anticompetitive under California ***antitrust law***. It also levies a civil penalty against any individual who assists in the violation of the section of three times the value received by the individual due to the violation or $20 million, whichever is greater.

Plaintiff, a nonprofit, voluntary association comprised of the leading manufacturers and distributors of generic and biosimilar medicines, manufacturers and distributors of bulk active pharmaceutical ingredients, and suppliers of other goods and services to the generic and biosimilar pharmaceutical industry, previously filed suit in an attempt to invalidate AB 824. (ECF No. 1, No. 2:19-cv-02281-TLN-DB.) In the related case, Plaintiff also filed a motion for preliminary injunction (ECF No. 10, No. 2:19-cv-02281-TLN-DB), which the Court denied (ECF No. 29, **[**5]** No. 2:19-cv-02281-TLN-DB). The Court found, primarily due to the nature of Plaintiff's pre-enforcement attack on AB

---

[1] Pursuant to *Federal Rule of Civil Procedure ("Rule") 25(d)*, "[t]he officer's successor is automatically substituted as a party" when a public officer "ceases to hold office while the action is pending." *Fed. R. Civ. P. 25(d)*. Accordingly, Rob Bonta is automatically substituted as a party for Xavier Becerra, the former Attorney General of the State of California. The Clerk of the Court is directed to update the docket as necessary.

[2] The following factual background is taken mostly verbatim from the Court's December 31, 2019 Order denying Plaintiff's motion for preliminary injunction in the related case. (*See* ECF No. 29, No. 2:19-cv-02281-TLN-DB.)

824, Plaintiff failed to establish a likelihood **[*979]** of success on the merits or raise serious questions going to the merits. (*Id.*) The Court concluded that absent a constitutional violation, Plaintiff failed to establish an irreparable harm that was both likely and imminent. (*Id.*) Plaintiff subsequently filed an interlocutory appeal of the Court's decision to the Ninth Circuit. (ECF No. 31, No. 2:19-cv-02281-TLN-DB.) The Ninth Circuit heard oral arguments on the matter and ultimately vacated this Court's order and remanded with instructions to dismiss without prejudice, finding Plaintiff failed to demonstrate its members had an Article III injury in fact and concluding Plaintiff lacked associational standing to bring claims on its members' behalf. (*See* ECF Nos. 46-47, No. 2:19-cv-02281-TLN-DB.) The Court subsequently dismissed the suit without prejudice pursuant to the Ninth Circuit's memorandum and mandate. (ECF Nos. 48-49, No. 2:19-cv-02281-TLN-DB.)

On August 25, 2020, Plaintiff filed the instant Complaint alleging near-identical causes of action to its prior suit, once again in an **[**6]** attempt to invalidate AB 824: (1) Declaratory/Injunctive Relief — *Commerce Clause* — Extraterritoriality; (2) Declaratory/Injunctive Relief — Preemption; (3) Declaratory/Injunctive Relief — *Excessive Fines Clause*; and (4) Declaratory/Injunctive Relief — Due Process — Burden-Shifting. (ECF No. 1 at 21-33.) On September 14, 2020, Plaintiff filed the instant motion for preliminary injunction. (ECF No. 15.) On October 15, 2020, the State filed an opposition (ECF No. 20), and on October 22, 2020, Plaintiff filed a reply (ECF No. 26).

II. Standard of Law

Injunctive relief is "an extraordinary remedy that may only be awarded upon a clear showing that the plaintiff is entitled to such relief." *Winter v. NRDC, Inc., 555 U.S. 7, 22, 129 S. Ct. 365, 172 L. Ed. 2d 249 (2008)* (citing *Mazurek v. Armstrong, 520 U.S. 968, 972, 117 S. Ct. 1865, 138 L. Ed. 2d 162 (1997)* (per curiam)). "The purpose of a preliminary injunction is merely to preserve the relative positions of the parties until a trial on the merits can be held." *Univ. of Tex. v. Camenisch, 451 U.S. 390, 395, 101 S. Ct. 1830, 68 L. Ed. 2d 175 (1981)*; *see also* *Costa Mesa City Emps. Ass'n v. City of Costa Mesa, 209 Cal. App. 4th 298, 305, 146 Cal. Rptr. 3d 677 (2012)* ("The purpose of such an order is to preserve the status quo until a final determination following a trial."); *GoTo.com, Inc. v. Walt Disney, Co., 202 F.3d 1199, 1210 (9th Cir. 2000)* ("The status quo ante litem refers not simply to any situation before the filing of a lawsuit, but instead to the last uncontested status which preceded the pending controversy.").

"A plaintiff seeking a preliminary injunction must establish [1] that he **[**7]** is likely to succeed on the merits, [2] that he is likely to suffer irreparable harm in the absence of preliminary relief, [3] that the balance of equities tips in his favor, and [4] that an injunction is in the public interest." *Winter, 555 U.S. at 20*. A plaintiff must "make a showing on all four prongs" of the *Winter* test to obtain a preliminary injunction. *Alliance for the Wild Rockies v. Cottrell, 632 F.3d 1127, 1135 (9th Cir. 2011)*. In evaluating a plaintiff's motion for preliminary injunction, a district court may weigh the plaintiff's showings on the *Winter* elements using a sliding-scale approach. *Id.* A stronger showing on the balance of the hardships may support issuing a preliminary injunction even where the plaintiff shows that there are "serious questions on the merits . . . so long as the plaintiff also shows that there is a likelihood of irreparable injury and that the injunction is in the public interest." *Id.* Simply put, plaintiffs must **[*980]** demonstrate, "that [if] serious questions going to the merits were raised [then] the balance of hardships [must] tip[ ] sharply" in [p]laintiffs' favor in order to succeed in a request for preliminary injunction. *Id. at 1134-35*.

III. Analysis [3]

---

[3] The State requests the Court take judicial notice of Exhibits A through E, Assembly Committee on Health AB 824 Bill Analysis (March 26, 2019), Assembly Floor Analysis of AB 824 (September 4, 2019), Letters of Support for AB 824, Table 8: Total All Payers State Estimates by State of Residence (1991-2004) — Drugs and Other Non-durable Products (Millions of Dollars), Health expenditures by state of residence: Summary tables, and *Pay-for-Delay: How Drug Company Pay-Offs Cost Consumers Billions*, FTC Staff Study (Jan. 2010), respectively. (ECF No. 20-1.) Plaintiff has not filed an opposition to this request. The Court

Plaintiff argues in the instant motion for preliminary **[**8]** injunction that it is likely to succeed on the merits of its claims, its members will suffer irreparable harm absent an injunction, the balance of equities and the public interest weigh in favor of an injunction, and it is likely to succeed on the merits. (*See* ECF No. 15-1.) The Court will first address the State's evidentiary objections, then the jurisdictional prerequisite of standing, and finally evaluate each of Plaintiff's arguments, starting with the dormant *Commerce Clause* claim.

A. The State's Objections to Plaintiff's Evidence

The State filed objections to Plaintiff's declarations submitted with the instant motion. (ECF No. 24-1.) With respect to Exhibit E, the State contends the following portion of paragraph four is inadmissible on the grounds of lack of personal knowledge, in violation of *Federal Rule of Evidence 602*: "[B]ecause of [the company's] concern about the enforcement of AB 824 as it would apply to such a settlement in light of AB 824's provision deeming exclusive licenses to be things of value, [the company] decided to pull out of the settlement negotiation and instead continue litigating the case." (*Id.* at 3-4, 6.) The Court finds that Exhibit E contains the sworn statements of the company's general counsel, **[**9]** who states that he is "knowledgeable about [the company's] recent and pending patent-infringement litigation." (ECF No. 17-3 at 1-2.) Exhibit E also contains information about the company filing suit against a generic drug company after it filed an ANDA with a Paragraph IV certification challenging one of the company's patents. (*Id.*) The Court sees no reason — and the State has not provided an adequate reason — not to take declarant's statement as truth. The language of the declaration does not indicate "speculation without foundation in personal knowledge," a basis upon which courts have stricken declarations. *See* *Green v. City & County of San Francisco, No. 17-cv-00607-TSH, 2021 U.S. Dist. LEXIS 161990, 2021 WL 3810243 (N.D. Cal. Aug. 21, 2021)*. Further, the declaration states facts that would be admissible evidence. Accordingly, the State's objection with respect to Exhibit E is overruled.

The Court need not address objections to evidence upon which it did not rely in the instant motion and therefore declines to consider the State's remaining objections.

B. Standing

As previously noted, the Ninth Circuit held that Plaintiff lacked associational **[*981]** standing to bring claims on its members' behalf and remanded to this Court to dismiss without prejudice. (*See* ECF Nos. 46-47, **[**10]** No. 2:19-cv-02281-TLN-DB.) Specifically, the Ninth Circuit found none of the declarations submitted from Plaintiff's members alleged an intention to engage in a "pay for delay" settlement agreement "of the sort prohibited by AB 824" and therefore Plaintiff did not establish standing "based on a threat of imminent or certainly impending prosecution." (ECF No. 47 at 5; No. 2:19-cv-02281-TLN-DB (internal quotation marks and citation omitted).) The Ninth Circuit also found Plaintiff's members "have not established that they have incurred economic injury due to complying with AB 824, i.e., by foregoing pay for delay settlement agreements or litigating patent-infringement suits to judgment." (*Id.*) As the previously-referenced declarations stated the members would only be *likely* to litigate every pending lawsuit to judgment or *likely* to keep their products off-market until the relevant patents expire, the court found Plaintiff alleged "only possible future injury and d[id] not establish a substantial risk of harm." (*Id.* at 6 (internal quotation marks and citation omitted).)

Plaintiff argues in the instant motion that "[a]ny questions of standing or ripeness are now answered" because declarations **[**11]** filed with its motion state that a number of its members have suffered "concrete economic harm." (ECF No. 15-1 at 8.) In opposition, the State contends Plaintiff has not met its burden to demonstrate Article III standing because it does not demonstrate injury-in-fact and traceability. (ECF No. 20 at 12.)

To establish Article III standing, a plaintiff must have "(1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision." *Spokeo,*

---

previously took judicial notice of these exact documents in the prior suit (ECF No. 29 at 5-6, No. 2:19-cv-02281-TLN-DB) and for the same reasons now GRANTS the State's request for judicial notice.

The Court has also reviewed and considered the amici curiae brief submitted by the American Antitrust Institute, Consumer Reports, Inc., and Public Citizen, Inc. in support of AB 824's implementation and enforcement. (*See* ECF Nos. 19-2, 22.)

Inc. v. Robins, 578 U.S. 330, 338, 136 S. Ct. 1540, 194 L. Ed. 2d 635 (2016). "[A]n association has standing to bring suit on behalf of its members when: (a) its members would otherwise have standing to sue in their own right; (b) the interests it seeks to protect are germane to the organization's purpose; and (c) neither the claim asserted nor the relief requested requires the participation of individual members in the lawsuit." Hunt v. Wash. State Apple Advert. Comm'n, 432 U.S. 333, 343, 97 S. Ct. 2434, 53 L. Ed. 2d 383 (1977).

With respect to injury-in-fact, the State argues "it is not clear whether the potential settlements that [Plaintiff] describes in its declarations even come within the ambit of AB 824" as "one declaration makes no mention of an agreement to forego anything . . . such as sales or research," "other declarations use generic **[**12]** descriptors such as '[Most Favored Nations]' and 'industry-standard accelerator provision' to describe key settlement provisions," and some of the terms in the declarations "may be subject to exceptions to AB 824." (*Id.* at 12-13.) Additionally, the State asserts Plaintiff cannot establish standing based on "fears of hypothetical future harm," such as an altered course of patent settlement negotiations or how the State will enforce AB 824. (*Id.* at 13-14.) However, Plaintiff specifies that Exhibit E, the declaration of one of its members, avers that "the member recently decided, in light of AB 824's provision deeming exclusive licenses to be things of value (and at considerable cost in terms of legal fees), to pull out of a tentative settlement agreement under which the defendant would have received consideration and would have been allowed to bring its generic product onto the market prior to the expiration of the patent, but not immediately." (ECF No. 26 at 5 (internal quotation marks omitted) (citing ECF No. 15-6 **[*982]** ¶¶ 4-5).) The declaration further states that "because of [the company's] concern about the enforcement of AB 824 as it would apply to such a settlement in light of AB 824's **[**13]** provision deeming exclusive licenses to be things of value, [the company] decided to pull out of the settlement negotiation and instead continue litigating the case." (ECF No. 17-3 at 3.) The declaration also notes the company "has thus chosen to continue litigating a patent-infringement lawsuit at considerable cost in terms of legal fees that it would not be incurring had the settlement proposal . . . been finalized." (*Id.*) This declaration avers that the company "intend[ed] to enter into a settlement agreement of the sort prohibited by AB 824" and establishes economic injury in the form of "foregoing pay for delay settlements" — the previous deficiencies identified by the Ninth Circuit. It is therefore sufficient to prove injury-in-fact.

With respect to traceability, the Court finds that the injury-in-fact complained of in Exhibit E is directly traceable to AB 824 taking effect at the start of 2020. With respect to redressability, Plaintiff seeks an injunction to stop enforcement of AB 824. (*See* ECF Nos. 1, 15-1.) Accordingly, the Court finds Plaintiff has sufficiently alleged the elements of associational standing to bring the instant motion for preliminary injunction.

C. Likelihood **[**14]** of Success on the Merits

Plaintiff argues AB 824: violates the dormant Commerce Clause by directly regulating out-of-state-conduct; is preempted by federal patent law, the delicate balance between the competing interests of patent protections and ***antitrust law*** struck by the Supreme Court in FTC v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013), and the Biologics Price Competition and Innovation Act ("BPCIA"); violates the constitutional prohibition on excessive fines under the Eighth Amendment; and violates due process in that it creates a burden-shift with no meaningful opportunity to rebut the presumption applied. (*See* ECF No. 15-1.) Because the Court finds that Plaintiff is likely to succeed on the merits of its dormant Commerce Clause claim, it will address that claim only and decline to consider the rest of Plaintiff's arguments challenging the legality of AB 824. Plaintiff argues its dormant Commerce Clause claim is ripe and likely to succeed on the merits. (ECF No. 15-1 at 13-16.) The Court will consider each of Plaintiff's arguments in turn.

i. Ripeness

Plaintiff contends the issue is ripe for adjudication because (1) the State admitted in oral argument before the Ninth Circuit that it intends to enforce the statute with respect to agreements made out-of-state and (2) Plaintiff's members **[**15]** have suffered economic injury in the form of declining or losing favorable settlement offers and spending huge sums litigating cases they otherwise would have settled. (ECF No. 15-1 at 13-14.) With respect to prudential ripeness, Plaintiff asserts its claim is now ripe because its members have already suffered economic injury. (*Id.* at 14.)

In opposition, the State contends the claim is constitutionally unripe because: Plaintiff has not shown any of its members has a plan to violate the law or has executed the type of agreement prohibited by AB 824 as its declarations fail to "indicate whether California sales would be included in the alleged potential settlements"; statements made by the State during oral argument before the Ninth Circuit do not constitute a threat of prosecution; and Plaintiff does not show past prosecution or enforcement of the law. (ECF No. 20 at 16.) The State characterizes the claim as a pre-enforcement, as-applied claim that is prudentially unripe because it is not yet **[*983]** factually developed and requires the Court to speculate about hypothetical cases as to how AB 824 may be enforced. (*Id.* at 16-17.)

The constitutional test for ripeness consists of three parts: (1) **[**16]** a concrete plan to violate the law; (2) a communicated threat of prosecution; and (3) a history of past prosecution or enforcement of the challenged law. *See, e.g.*, *Clark v. City of Seattle, 899 F.3d 802 (9th Cir. 2018)*. However, Plaintiff is correct that the Court need not rely on this test when "tangible economic injury is alleged," as "the gravamen of the suit is economic injury rather than threatened prosecution." *See* *Nat'l Audubon Society, Inc. v. Davis, 307 F.3d 835, 855 (9th Cir. 2002)*. Courts then apply the test for Article III standing, *id. at 855-56*, as articulated above. As previously noted, the Court finds Plaintiff adequately establishes constitutional standing.

Prudential ripeness is a doctrine that encompasses three principles: "the general prohibition on a litigant's raising another person's legal right[;] the rule barring adjudication of generalized grievances more appropriately addressed in the representative branches[;] and the requirement that a plaintiff's complaint fall within the zone of interests protected by the law invoked." *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 127, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)* (internal quotation marks and citation omitted). The Ninth Circuit has articulated that prudential ripeness involves evaluation of "the fitness of the issues for judicial decision and the hardship to the parties of withholding court consideration." *Thomas v. Anchorage Equal Rights Comm'n, 220 F.3d 1134, 1141 (9th Cir. 2000)* (internal quotation marks and citation **[**17]** omitted) (finding plaintiffs' claims "unfit for judicial resolution" because they were "devoid of any specific factual context" and the record was "remarkably thin and sketchy, consisting only of a few conclusory affidavits"). Here, as previously noted, Exhibit E avers that one of Plaintiff's member companies decided to pull out of a settlement negotiation for a pay-for-delay settlement agreement and chose instead to continue litigating a patent-infringement lawsuit at significant cost due to concerns about enforcement of AB 824. (ECF No. 17-3 at 3.) Accordingly, the Court finds the claim is prudentially ripe, as there is a sufficient factual development for judicial resolution.

ii. Likelihood of Success

Plaintiff argues AB 824 — because it is not limited to settlement agreements entered into in California or between California entities — directly regulates out-of-state commerce and is therefore a per se violation of the dormant *Commerce Clause*. (ECF No. 15-1 at 14-16 (citing *Baldwin v. G. A. F. Seelig, Inc., 294 U.S. 511, 55 S. Ct. 497, 79 L. Ed. 1032 (1935)*; *Sam Francis Found. v. Christies, Inc. (Sam Francis), 784 F.3d 1320 (9th Cir. 2015)*).) In opposition, the State contends Plaintiff's dormant *Commerce Clause* claim rests solely on an extraterritoriality theory and "the Supreme Court has rarely held that statutes violate the extraterritoriality doctrine."[4] (ECF No. 20 at 17 **[**18]** (quoting **[*984]** *Rocky Mt. Farmers Union v. Corey, 730 F.3d 1070, 1101 (9th Cir. 2013)*). The State

[4] The Court agrees with the State that Plaintiff alleges that AB 824 unlawfully regulates extraterritorial activity — especially in light of the fact that the Ninth Circuit has identified the case law Plaintiff cites as pertaining to extraterritoriality arguments and that Plaintiff does not argue any other theory in its briefing. (ECF No. 15-1 at 14-16 (citing *Healy v. Beer Inst., 491 U.S. 324, 332, 109 S. Ct. 2491, 105 L. Ed. 2d 275 (1989)*; *Brown-Forman Distillers Corp. v. N.Y. State Liquor Auth. (Brown-Forman), 476 U.S. 573, 579, 106 S. Ct. 2080, 90 L. Ed. 2d 552 (1986)*); *see also* ECF Nos. 15-1, 26); *Rocky Mt. Farmers Union, 730 F.3d at 1101* (citing *Healy, 491 U.S. at 336*; *Brown-Forman, 476 U.S. at 579*). Accordingly, this Court will only address the argument regarding extraterritoriality.

maintains AB 824 does not regulate conduct occurring wholly outside California, as an agreement "to engage in unlawful sales in California [that] may be made outside the state does not put those decisions out of the state's reach." (*Id.* at 18-19.)

The *Commerce Clause* provides that "Congress shall have power . . . [t]o regulate Commerce . . . among the several States." *U.S. Const., art. I, § 8, cl. 3*. "This affirmative grant of power does not explicitly control the several states, but it 'has long been understood to have a 'negative' aspect that denies the States the power unjustifiably to discriminate against or burden the interstate flow of articles of commerce.'" *Rocky Mt. Farmers Union, 730 F.3d at 1087* (quoting *Oregon Waste Sys. v. Department of Envtl. Quality, 511 U.S. 93, 98, 114 S. Ct. 1345, 128 L. Ed. 2d 13 (1994)*; *Wyoming v. Oklahoma, 502 U.S. 437, 454, 112 S. Ct. 789, 117 L. Ed. 2d 1 (1992)*). The "negative" or "dormant" *Commerce Clause* "prohibits discrimination against interstate commerce and bars state regulations that unduly burden interstate commerce." *Id.; Sam Francis, 784 F.3d at 1323* (internal citation omitted). The Supreme Court has articulated a two-tiered approach to evaluate state economic regulation under the *Commerce Clause*: "[1] When a state statute directly regulates or discriminates against interstate commerce, or when its effect is to favor in-state economic interests over out-of-state interests, [the Court has] generally struck down the statute without **[**19]** further inquiry. [2] When, however, a statute only has indirect effects on interstate commerce and regulates evenhandedly, [the Court has] examined whether the [s]tate's interest is legitimate and whether the burden on interstate commerce clearly exceeds the local benefits." *Ass'n des Eleveurs de Canards et d'Oies du Quebec v. Harris, 729 F.3d 937, 948 (9th Cir. 2013)* (quoting *Brown-Forman Distillers Corp. v. N.Y. State Liquor Auth., 476 U.S. 573, 578-79, 106 S. Ct. 2080, 90 L. Ed. 2d 552 (1986)*).

With respect to direct regulation of interstate commerce occurring wholly outside of a state's borders, also known the extraterritoriality doctrine, the dormant *Commerce Clause* provides that "any 'statute that directly controls commerce occurring wholly outside the boundaries of a State exceeds the inherent limits of the enacting State's authority.'" *Rocky Mt. Farmers Union, 730 F.3d at 1101* (quoting *Healy v. Beer Inst., 491 U.S. 324, 336, 109 S. Ct. 2491, 105 L. Ed. 2d 275 (1989)*). The critical inquiry "is whether the practical effect of the regulation is to control conduct beyond the boundary of the state." *Id.* (quoting *Healy, 491 U.S. at 336*; *Brown-Forman, 476 U.S. at 579*). To determine practical effect, the Ninth Circuit considers the direct consequences of the statute as well as "how the challenged statute may interact with the legitimate regulatory regimes of other States and what effect would arise if not one, but many or every, State adopted similar legislation." *Id.* (quoting *Healy, 491 U.S. at 336*). "[T]he Supreme Court has rarely held that statutes violate the extraterritoriality doctrine." *Id.*

[20]** Nevertheless, the Ninth Circuit in *Sam Francis* recently found California's Resale Royalty Act's clause regulating sales outside the state of California facially violative of the dormant *Commerce Clause*. *784 F.3d at 1322*. The language of the clause at issue required the payment of royalties to the artist after a sale of fine art whenever the seller resided in California or the sale took place in California. *Id.* The court noted the statute violates the dormant *Commerce Clause* **[*985]** because it "facially regulates a commercial transaction that 'takes place wholly outside of the State's borders.'" *Id. at 1323-24* (citing *Healy, 491 U.S. at 336*; *Valley Bank of Nev. v. Plus Sys., Inc., 914 F.2d 1186, 1189-90 (9th Cir. 1990)* ("Direct regulation occurs when a state law directly affects transactions that take place . . . entirely outside of the state's borders. Such a statute is invalid per se . . . .")). The court provided the following example: "if a California resident has a part-time apartment in New York, buys a sculpture in New York from a North Dakota artist to furnish her apartment, and later sells the sculpture to a friend in New York, the Act requires the payment of a royalty to the North Dakota artist — even if the sculpture, the artist, and the buyer never traveled to, or had any connection with, California." *Id.*

Conversely, in *Rocky Mountain*, the Ninth Circuit held California's Low Carbon Fuel Standard ("Fuel Standard"), *Cal. Code Regs., tit. 17, §§ 95480-90* (2011), did not violate the dormant *Commerce Clause*'s prohibition on extraterritorial regulation. *730 F.3d at 1078*. The California Air Resources Board ("CARB") implemented the Fuel Standard to lower greenhouse gas ("GHG") emissions in transportation fuel *consumed in California* by reducing the quantity of GHGs emitted in the production of fuel. *Id. at 1079-80* (emphasis added). To comply with the Fuel Standard, "a fuel blender must keep the average carbon intensity of its total volume of fuel below the Fuel Standard's annual limit" and "fuels generate credits or deficits, depending on whether their carbon intensity is higher or lower than the annual cap." *Id. at 1080*. The Fuel Standard uses a "lifecycle analysis" to account for emissions associated with all aspects of the fuel production process and CARB assigns a cumulative carbon intensity value to an individual fuel lifecycle, known as a "pathway." *Id. at 1080-81*.

The Ninth Circuit concluded the Fuel Standard regulates only the California market, as it stated:

> [The Fuel Standard] says nothing at all about ethanol produced, sold, and used outside California, it does **[**21]** not require other jurisdictions to adopt reciprocal standards before their ethanol can be sold in California, it makes no effort to ensure the price of ethanol is lower in California than in other states, and *it imposes no civil or criminal penalties on non-compliant transactions completed wholly out of state*.

Id. at 1101-03 (emphasis added). The court noted California does not control the transportation, farming practices, and land use factors that could encourage producers to adopt less carbon-intensive policies "simply because it factors them into the lifecycle analysis." *Id. at 1103*. The court also highlighted that the "credits and caps [in the Fuel Standard] apply only to the portfolios of fuel blenders in California and the producers who contract with them." *Id.* The court concluded that "California properly based its regulation on the harmful properties of fuel" and "[i]t does not control the production or sale of ethanol wholly outside of California." *Id. at 1104*.

Here, with respect to settlement agreements, the language of AB 824 provides that:

> [A]n agreement resolving or settling, on a final or interim basis, a patent infringement claim, in connection with the sale of a pharmaceutical product, shall be presumed **[**22]** to have anticompetitive effects and shall be a violation of this section if both of the following apply: (A) A nonreference drug filer[5] receives anything **[*986]** of value from another company asserting patent infringement, including, but not limited to, an exclusive license or a promise that the brand company will not launch an authorized generic version of its brand drug. (B) The nonreference drug filer agrees to limit or forego research, development, manufacturing, marketing, or sales of the nonreference drug filer's product for any period of time.

Cal. Health & Safety Code § 134002(a)(1). With respect to rebutting this presumption, the law provides that:

> Parties to an agreement are not in violation of paragraph (1) if they can demonstrate by a preponderance of the evidence that either of the following are met: (A) The value received by the nonreference drug filer . . . is a fair and reasonable compensation solely for other goods or services that the nonreference drug filer has promised to provide. (B) The agreement has directly generated procompetitive benefits and the procompetitive benefits of the agreement outweigh the anticompetitive effects of the agreement.

Id. § 134002(a)(3). The law also contains a civil penalties provision, as follows:

> Each person **[**23]** that violates or assists in the violation of this section shall forfeit and pay to the State of California a civil penalty sufficient to deter violations of this section, as follows: (i) If the person who violated this section received any value due to that violation, an amount up to three times the value received by the party that is reasonably attributable to the violation of this section, or twenty million dollars ($20,000,000), whichever is greater. (ii) If the violator has not received anything of value as described in clause (i), an amount up to three times the value given to other parties to the agreement reasonably attributable to the violation of this section, or twenty million dollars ($20,000,000), whichever is greater. (iii) For the purposes of this subdivision, "reasonably attributable to this violation" shall be determined by California's share of the market for the brand drug at issue in the agreement.

Id. § 134002(e)(1)(A).

The State contends that "AB 824 seeks to prevent or reduce anticompetitive pharmaceutical sales in California, and, thus, applies to agreements to engage in that conduct," not "conduct occurring wholly outside California." (ECF

---

[5] The statute defines a "nonreference drug filer" as "[a]n ANDA filer" or "[a] biosimilar biological product application filer." *Cal. Health & Safety Code § 134000(g)*.

No. 20 at 18-19.) The State asserts "if **[**24]** manufacturers want to avoid application of AB 824 to agreements they enter into, they can do so simply by omitting California sales from those covered by the agreement." (*Id.* at 19.) However, a review of the relevant sections of the statute reveals no such limitation to only California sales, unlike the Fuel Standard's express limitation to fuels consumed in California in *Rocky Mountain*. *730 F.3d at 1079-80*. The Court therefore finds persuasive Plaintiff's hypothetical: "If two parties settle a patent suit in Delaware on terms that AB 824 deems unlawful, the settling parties (and every person who merely assists) would be liable for severe penalties under California law."[6] **[*987]** (ECF No. 15-1 at 16 (citing *Cal. Health & Safety Code §§ 134002(a)*, *(e)*).) The Court finds this hypothetical similar to the hypothetical articulated by the Ninth Circuit in *Sam Francis*. *784 F.3d at 1323-24*. As it is written, AB 824 may reach the kind of settlement agreements proposed by Plaintiff — an agreement in which none of the parties, the agreement, or the pharmaceutical sales have any connection with California.

The Court further finds issues with AB 824's civil penalties provision. One of the factors that weighed against the Ninth Circuit finding an unconstitutional, extraterritorial regulation of **[**25]** commerce in *Rocky Mountain* was that the Fuel Standard did not impose civil or criminal penalties on non-compliant transactions completed wholly out of state. *730 F.3d at 1101-03*. That is not the case here. The State characterizes the civil penalties provision in AB 824, which could conceivably impose a $20 million fine (or more) on a person who received any value for a violation of this section, as "simply alter[ing] the . . . penalties to conduct that was already illegal under California law." (ECF No. 20 at 18.) The Court finds this argument disingenuous, as AB 824 could be used to levy substantially significant civil penalties on parties that do not have any connection with California. As it is written, the civil penalties provision could hypothetically reach a corporate officer of a Delaware company entering into a settlement agreement with another Delaware company regarding pharmaceutical sales in only Delaware. In light of this provision, the Court cannot reasonably find that AB 824 regulates only the California market.

Based on the foregoing, the Court finds Plaintiff is likely to succeed in showing that AB 824 violates the dormant *Commerce Clause*. As such, the Court need not and does not address Plaintiff's alternative claims **[**26]** challenging the legality of AB 824.

D. Immediate and Irreparable Injury

Plaintiff argues "[o]nly an injunction barring enforcement of the statute can prevent its members from suffering further irreparable harm, as "AB 824 has already caused multiple . . . members to lose favorable settlement offers and the value associated with them, and has thus caused these members to spend huge sums of money litigating patent cases they otherwise would have settled." (ECF No. 15-1 at 24.) Plaintiff asserts this economic injury constitutes irreparable injury due to the State's *Eleventh Amendment* immunity. (*Id.*) Plaintiff also maintains its members suffer irreparable injury by subjecting them to a law that violates their constitutional rights. (*Id.*)

In opposition, the State argues that since AB 824 went into effect, Plaintiff's members have settled more than 40 patent infringement cases and "there has not been a statistically significant decrease in the number of ANDAs submitted in 2020." (ECF No. 20 at 27.) The State also notes Plaintiff's argument of irreparable injury due to subjecting its members to an unconstitutional law is meritless because Plaintiff has not demonstrated a likelihood of success on the merits. (**[**27]** *Id.*)

---

[6] The State contends that "if manufacturers want to avoid application of AB 824 to agreements they enter into, they can do so simply by omitting California sales from those covered by the agreement," impliedly arguing that the provisions of AB 824 will not be enforced against parties entering into settlement agreements covering pharmaceutical sales outside of California. (ECF No. 20 at 19.) The State continually emphasizes in its opposition that AB 824 "does not regulate conduct occurring wholly outside California," "sets the terms of doing business in California," and "governs the prices for which goods are sold in California." (*Id.* at 18-19.) The Court ultimately does not find this argument persuasive as AB 824 on its face does not include such a limitation to California sales. 2019 Cal. Legis. Serv. 531; *see also* ***Smallwood v. Allied Van Lines, Inc., 660 F.3d 1115, 1121 (9th Cir. 2011)*** (For purposes of statutory interpretation, "[u]nder the 'plain meaning' rule, '[w]here the language [of a statute] is plain and admits of no more than one meaning[,] the duty of interpretation does not arise, and the rules which are to aid doubtful meanings need no discussion." (citing *Carson Harbor Vill., Ltd. v. Unocal Corp., 270 F.3d 863, 878 (9th Cir. 2001)* (en banc)). The Court therefore cannot read "California sales" into the statute where it was not written by the State Legislature.

The Court agrees with Plaintiff. The Ninth Circuit has concluded that although monetary harm does not constitute irreparable harm, monetary injury can be **[*988]** irreparable when *Eleventh Amendment* sovereign immunity prevents a plaintiff from recovering damages in federal court. *Cal. Pharmacists Ass'n v. Maxwell-Jolly, 563 F.3d 847, 852 (9th Cir. 2009)*, *vacated on other grounds by* *Douglas v. Indep. Living Ctr. of S. Cal., Inc., 565 U.S. 606, 132 S. Ct. 1204, 182 L. Ed. 2d 101 (2012)*. The monetary injury stems from Plaintiff's members foregoing cost-saving settlement agreements likely deemed unlawful by AB 824 and instead litigating these cases to judgment. Accordingly, the Court is persuaded that Plaintiff's members will be unable to recover monetary damages against the State even if Plaintiff is successful on the merits of its case.

Further, "[I]f the arguments and evidence show that a statutory provision is unconstitutional on its face, an injunction prohibiting its enforcement is 'proper.'" *Whole Woman's Health v. Hellerstedt, 579 U.S. 582, 136 S. Ct. 2292, 2307, 195 L. Ed. 2d 665 (2016)* (citing *Citizens United v. FEC, 558 U.S. 310, 333, 130 S. Ct. 876, 175 L. Ed. 2d 753 (2010)*); *see also* *Puente Arizona v. Arpaio, 76 F. Supp. 3d 833, 860 (D. Ariz. 2015)*, *vacated in part on other grounds by* *Puente Arizona v. Arpaio, 821 F.3d 1098 (9th Cir. 2016)*. As noted previously, Plaintiff has established a likelihood of success on the merits of its dormant *Commerce Clause* claim.

Based on the foregoing, the Court finds that Plaintiff has sufficiently shown a likelihood of irreparable harm in the absence of a preliminary injunction.

E. Balance of Equities and Public Interest

Having found a likelihood of **[**28]** success as to Plaintiff's dormant *Commerce Clause* claim and a likelihood of irreparable harm absent an injunction, Plaintiff must demonstrate the balance of equities tip in its favor. *See* *Alliance, 632 F.3d at 1134-35*. A court balancing the equities will look to possible harm that could befall either party. *See CytoSport, Inc. v. Vital Pharms., Inc., 617 F. Supp. 2d 1051, 1081 (E.D. Cal. 2009)*, *aff'd*, *348 F. App'x 288 (9th Cir. 2009)*. Additionally, "[t]he public interest analysis for the issuance of a preliminary injunction requires [the Court] to consider whether there exists [s]ome critical public interest that would be injured by the grant of preliminary relief." *Credit Bureau Connection, Inc. v. Pardini, 726 F. Supp. 2d 1107, 1123 (E.D. Cal. Jul. 12, 2010)* (citing *Indep. Living Ctr. of S. Cal., Inc. v. Maxwell-Jolly, 572 F.3d 644, 659 (9th Cir. 2009)*).

As noted previously, Plaintiff argues that absent an injunction, its members will suffer economic injury and continue to be subjected to an unconstitutional law. (ECF No. 15-1 at 24.) Plaintiff also asserts that for every day that AB 824 is in effect, the flow of generic and biosimilar medicines into the market slows, resulting in lost savings from such medicines. (*Id.*) Plaintiff maintains AB 824 "has already led to delays in the availability of generic medicines, and it has already driven generic manufacturers to withdraw Paragraph IV ANDAs." (*Id.*)

In opposition, the State asserts that "any time a State is enjoined by a court from effectuating statutes enacted by representatives **[**29]** of its people, it suffers a form of irreparable injury." (ECF No. 20 at 28 (citing *Maryland v. King, 567 U.S. 1301, 133 S. Ct. 1, 183 L. Ed. 2d 667 (2012)*).) The State contends that if AB 824 is enjoined, "California will have one less tool at its disposal to combat collusive agreements, and consequently, Californians will be denied affordable drugs and experience increasing insurance premiums." (*Id.*) The State also asserts that it has an interest in ensuring pharmaceuticals are affordable, and AB 824 "is designed to curb the high costs of prescription drugs that affect not **[*989]** only healthcare patients, but also payors such as employers and the Medicare and Medicaid programs." (*Id.*)

In light of the irreparable harm to Plaintiff articulated above, the Court finds Plaintiff's arguments with respect to the balance of equities and the public interest persuasive as well. Relative to Plaintiff's injury, the Court agrees with Plaintiff's contention that the harm to the State is relatively *de minimis*, as the State "will still be able to bring enforcement actions under federal ***antitrust law***." (ECF No. 15-1 at 25.) The Court also notes that the State can amend AB 824 to ensure that it is compliant with the U.S. Constitution. Finally, the public interest favors a permanent **[**30]** injunction because Plaintiff has established a likelihood of success on its dormant *Commerce Clause* claim. *See* *Puente Arizona, 76 F. Supp. 3d at 861*.

Based on the foregoing, the Court finds the balance of equities and the public interest element tips sharply in Plaintiff's favor such that an injunction would be proper even if there were only serious questions going to the merits.

IV. CONCLUSION

For the foregoing reasons, the Court GRANTS Plaintiff's Motion for Preliminary Injunction to enjoin enforcement of AB 824. (ECF No. 15.)

IT IS SO ORDERED.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(b)(6) allows a defendant to move to dismiss a cause of action which fails to state a claim upon which relief can be granted. To survive a *Rule 12(b)(6)* motion, a complaint must plead enough facts to state a claim to relief that is plausible on its face. A claim is plausible when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. When evaluating a *Rule 12(b)(6)* motion, the court must presume all factual allegations of the complaint to be true and draw all reasonable inferences in favor of the nonmoving party. But conclusory allegations amounting only to formulaic recitation of the elements are not entitled to an assumption of truth. Courts must consider the complaint in its entirety, as well as other sources courts ordinarily examine when ruling on *Rule 12(b)(6)* motions to dismiss, in particular, documents incorporated into the complaint by reference, and matters of which a court may take judicial notice.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Mistake

HN2[] **Heightened Pleading Requirements, Fraud Claims**

A party alleging fraud must state with particularity the circumstances constituting fraud. *Fed. R. Civ. P. 9(b)*. Particularity requires the who, what, when, where, and how of the misconduct charged, including what is false or misleading about a statement, and why it is false. Allegations must be specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong.

HN3[] **Discretionary Jurisdiction, Factors**

Courts may adjudicate only actual cases or controversies. *U.S. Const. art. III, § 2, cl. 1*. When presented with a claim for a declaratory judgment, therefore, federal courts must take care to ensure the presence of an actual case or controversy. Absent a true case or controversy, a complaint solely for declaratory relief under *28 U.S.C.S. § 2201* will fail for lack of jurisdiction under *Fed. R. Civ. P. 12(b)(1)*. To satisfy the actual controversy requirement in a trademark case, the plaintiff must show real and reasonable apprehension that it would be liable for infringement if it continued marketing its product.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN4[] **Amendment of Pleadings, Leave of Court**

When dismissal is appropriate, courts shall freely give leave to amend the complaint when justice so requires. *Fed. R. Civ. P. 15(a)(2)*. In the Ninth Circuit, district courts may deny leave to amend due to undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, and futility of amendment.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Defenses

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN5[] **Tying Arrangements, Defenses**

To pass a motion to dismiss, a plaintiff must allege an actual adverse effect on competition caused by the tying arrangement.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN6[] Attempts to Monopolize, Elements

The mere fact of having monopoly power is not unlawful unless it is accompanied by an element of anticompetitive conduct.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN7[] State Regulation, Claims

The Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200*, broadly prohibits unfair competition, defined as any unlawful, unfair or fraudulent business act or practice. The unlawful prong requires an underlying violation of law.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN8[] State Regulation, Claims

To plead a claim under the Unfair Competition Law (UCL), *Cal. Bus. & Prof. Code § 17200*, fraudulent prong, a plaintiff must show that members of the public are likely to be deceived by the challenged practice. Likelihood of deception is assessed under a reasonable consumer standard. A plaintiff must also demonstrate actual reliance, which may be inferred from the misrepresentation of a material fact.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN9[] Heightened Pleading Requirements, Fraud Claims

Particularity under *Fed. R. Civ. P. 9(b)* requires the who, what, when, where, and how of the misconduct charged, including what is false or misleading about a statement, and why it is false.

Civil Procedure > ... > Declaratory Judgments > State Declaratory Judgments > Grounds for Relief

Governments > Legislation > Statutory Remedies & Rights

Torts > Products Liability > Theories of Liability > Breach of Warranty

Civil Procedure > ... > Declaratory Judgments > State Declaratory Judgments > Scope of Declaratory Judgments

HN10[] State Declaratory Judgments, Grounds for Relief

N.Y. General Business Law § 369-b does not provide a private right of action. A party cannot bring a declaratory judgment claim based on a statute for which there is no private right of action.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Standing

Trademark Law > ... > Particular Subject Matter > Geographic Terms > Terms Ineligible for Protection

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

HN11[] False Advertising, Lanham Act

Section 43(a) of the Lanham Act, 15 U.S.C.S. § 1125(a)(1)(B), forbids the use of false or misleading descriptions in commercial advertising. Although the Ninth Circuit has not yet decided the issue, the better reasoned district court authority is that, where a Lanham Act claim is predicated on the theory that the defendant engaged in a knowing and intentional misrepresentation, then Fed. R. Civ. P. 9(b) is applicable.

Torts > ... > Contracts > Intentional Interference > Elements

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Intentional Torts > Defamation > Libel

HN12[] Intentional Interference, Elements

Intentional interference with contractual relations requires pleading the existence of a valid then-existing contract between plaintiff and a third party. Intentional interference with prospective economic advantage requires pleading an existing economic relationship with a probability of future economic benefit and that the defendant's interference was wrongful by some legal measure other than the fact of interference itself. Similarly, trade libel requires a plaintiff to identify the particular purchasers who have refrained from dealing with him, and specify the transactions of which he claims to have been deprived.

Opinion

ORDER GRANTING MOTION TO DISMISS COUNTERCLAIMS

Plaintiffs Cisco Systems, Inc. and Cisco Technology, Inc. (collectively "Cisco") sued Defendant Dexon Computer, Inc. ("Dexon") for trademark infringement, trademark counterfeiting, false designation of origin, unfair business practices under California law, and unjust enrichment. In its amended answer, Dexon filed eleven counterclaims against Cisco: antitrust violations of the Sherman Act and the California Cartwright Act; violations of the California Unfair Competition Law and the Lanham Act; declaratory judgments as to the parties' rights; and tortious interference with business and trade libel. Cisco moves to dismiss all counterclaims. The Court GRANTS the motion with leave to amend.

I. BACKGROUND

A. Facts Alleged

Cisco Systems, Inc. is a Delaware corporation with its principal place of business in San Jose, California. Am. Answer & Countercl. (dkt. 50) ¶ 11. Cisco **[*5]** Technology, Inc. is a California corporation with its principal place of business in San Jose, California. Id. ¶ 12. Cisco manufactures and sells products and services in "routing and switching" as well as "home networking, IP telephony, optical networking, security, storage area networking, and wireless technology." Id. ¶ 14.

Dexon is a Minnesota corporation with its principal place of business in Bloomington, Minnesota. See id. ¶ 10. Dexon sells "affordable network equipment" to hospitals, emergency service providers, public service organizations, and other small to medium-sized businesses. Id. ¶ 6. Dexon is a "value added reseller" ("VAR") or "independent secondary-market reseller": it purchases and resells new or refurbished equipment by such companies as Cisco, Hewlett Packard, Dell, and Juniper Networks. Id. ¶¶ 52, 95.

1. Alleged Monopoly in Three Markets

Dexon alleges that Cisco has a monopoly in three putative markets: the market for Ethernet switches; the market for routers (collectively, "equipment markets"); and the market for maintenance of its own equipment.

First, Dexon alleges that Cisco has more than a 60% market share of the U.S. and global markets for Ethernet switches. **[*6]** Id. ¶ 26. Ethernet switches are "devices that control data flow within a network to enable network components to communicate efficiently." Id. ¶ 22.

Second, Dexon alleges that Cisco has more than a 60% market share in the U.S. and global markets for routers. Id. ¶ 30. Routers "allow for communication between networks." Id. ¶ 27. Although some Ethernet switches incorporate routing technologies, customers do not substitute Ethernet switches for routers. Id. ¶¶ 27, 28.

In the equipment markets, some of Cisco's competitors are "Hewlett Packard, Dell, and Juniper Networks." Id. ¶ 95. A new firm may struggle to enter these markets because of the high cost of developing the software and hardware and building a sales network. Id. ¶ 31. Also, customers have "long purchase cycles" before they replace or upgrade their network components. Id. ¶ 32.

Third, Cisco has a 90% share of the U.S. and global "After-Market for Maintenance Services" on its own equipment. Id. ¶ 20. Cisco sells the SmartNet package, a maintenance service that may be purchased in one to five year periods. Id. ¶¶ 2, 3. SmartNet provides "onsite visits from certified engineers, software updates, technical assistance center [ ] access, **[*7]** online resources, and hardware replacement services." Id. ¶ 16. Although third parties provide some of these maintenance services for Cisco equipment, only SmartNet provides "important software bug fixes, patches, and updates." Id. ¶¶ 18, 17, 20.

Cisco does not require any purchasers of its equipment to purchase SmartNet. Id. And "customers can and do purchase Cisco networking equipment without maintenance services." Id. ¶ 21. Further, those who choose to purchase SmartNet need not do so at the same time they purchase Cisco equipment, or from the same seller. See id. ¶¶ 36, 38. Nonetheless, Dexon alleges that customers who have purchased Cisco products are "effectively compelled" to purchase SmartNet. Id. ¶ 18.

2. Cisco's Conduct Toward Consumers

Cisco has an "Authorized Channel Network" under which it sells equipment to entities that are "Authorized Resellers." Id. ¶ 97. Cisco exerts strict control over how, and at what prices, its "Authorized" partners buy and sell Cisco equipment. Id. Dexon, however, is a vendor in the secondary market and often has cheaper prices. Id. ¶ 95. Dexon alleges that Cisco's margins are "far higher" for sales made through channels with higher resale prices." **[*8]** Id. ¶ 45. Dexon alleges that the cheaper prices on the secondary market "run counter to Cisco's profit motives," so Cisco takes steps to suppress it. Id. ¶ 59.

Cisco informs purchasers of secondary-market equipment that the software embedded in the equipment is "not transferable," so their equipment will require a new software license. Id. ¶ 103. After informing these purchasers that their software licenses are invalid, Cisco "extort[s]" license fees from them. Id. ¶ 106. Cisco also informs them that their equipment is "used," "stolen," or "counterfeit." Id. ¶ 110. Cisco defines "used" to mean "previously owned equipment that is now owned by a party other than the original customer," including both "opened and unopened equipment." Id. ¶ 111 (emphasis added). Cisco knows that this definition is misleading and contrary to customers' understanding of the term. Id. ¶¶ 112-13. Finally, Cisco refuses to warranty equipment sold on the secondary market on the stated basis that it cannot determine whether the products are genuine or counterfeit. Id. ¶ 114.

Cisco also allegedly coerces secondary-market equipment purchasers who have purchased SmartNet packages into purchasing more equipment. Id. **[*9]** ¶ 44. Dexon alleges that Cisco "has suddenly claimed at some point after customers purchased a SmartNet service package that the SmartNet service packages were no longer valid in the absence of a new purchase of a [Cisco router and/or Ethernet switch]." Id. ¶ 40. Cisco has sometimes "force[d]" a customer to pay a "re-certification fee" to reinstate a SmartNet package "associated with previously purchased networking products." Id. Customers have "little choice" but to give in because they have already purchased equipment and SmartNet. Id.

Dexon provides two examples of Cisco's conduct toward secondary-market equipment purchasers. First, an unidentified hospital that had long purchased Cisco products from Dexon was contemplating another order from Dexon. Id. ¶ 42. Cisco "threatened [the hospital] that if it did not cancel the order" from Dexon, Cisco would "not honor the contemplated new SmartNet service package" and "cancel immediately all SmartNet service packages . . . in place for the entire hospital system and clinics." Id. The hospital backed out of the deal with Dexon. Id. Second, in the middle of an unidentified 911-service center's five-year SmartNet package, Cisco told the center **[*10]** that it had to purchase new routers and Ethernet switches "if it wanted to receive the service it was due under its SmartNet service package." Id. ¶ 43. Because the center could not afford it, Dexon, at its own expense, purchased a new SmartNet package for the center's equipment. Id.

Cisco's tactics "force customers to only be able to access both networking equipment and service through the most expensive avenues." Id. ¶ 53. It is "practically difficult" for these customers to defect to a competitor of Cisco's. Id. ¶ 55. Further, "customers are not free to make a product choice on the merits but rather need to account for the likely reaction of Cisco" and "what treatment it will face if it draws Cisco's disapproval." Id. ¶ 57. Cisco's competitors in the equipment markets therefore "have less revenue than they should." Id.

3. Cisco's Conduct Toward Dexon

Cisco "spends substantial money and effort to attack secondary market participants such as Dexon and to chill reseller and end user participation in the secondary market." Id. ¶ 119. It employs a team of "Brand Protection" employees who intervene with resellers and end users to disrupt sales on the secondary market. Id. ¶ 120(b).

Cisco **[*11]** also "tortiously and erroneously insinuat[es] to resellers and end users that secondary market participants in general are engaging in illegal activity." Id. ¶ 120(c).

In 2015, Cisco deactivated Dexon's access to the online service database used to arrange maintenance for Cisco products. Id. ¶¶ 50, 49. Cisco later reinstated Dexon. Id. But in 2018, Cisco deactivated Dexon's access and refused to reinstate it. Id. ¶ 51. As a result, at least two customers purchased equipment from a Cisco competitor. Id. On another occasion, Cisco allegedly threatened a larger VAR not to do business with Dexon, and when the VAR representative refused to comply, "he was assigned to a different region and account." Id. ¶ 52. Dexon believes that other VARs were "successfully coerced . . . to limit or withdraw their business from Dexon." Id. Cisco has "falsely advis[ed] Dexon's actual and prospective customers" that "Dexon does not sell genuine Cisco product; Dexon does not sell new Cisco product; Dexon 'repackages' used Cisco product as 'new'; Dexon opens new Cisco product and substitutes parts or software" and made other similar statements. Id. ¶ 121.

Dexon has lost customers "due to [Cisco's] anticompetitive **[*12]** and coercive tactics." Id. ¶ 58. And it suffered "losses that directly stem from Cisco's anticompetitive conduct" when it was "forced to provide new equipment under duress from Cisco." Id. Dexon has also sustained "losses to its goodwill and reputation in the marketplace." Id. ¶ 60. Because of its market position, Cisco is "immune" to "customer dissatisfaction" and instead actively "portray[s] Dexon as an unworthy sales partner [that] is the cause of the customers' problems." Id.[1]

B. Procedural History

On July 22, 2020, Cisco sued Dexon for trademark infringement, trademark counterfeiting, false designation of origin, unfair business practices under California law, and unjust enrichment. See Am. Compl. (dkt. 32). The Court denied Dexon's motion to dismiss Cisco's amended complaint for lack of personal jurisdiction. See Amended Order (dkt. 40). After Dexon filed an amended answer and eleven counterclaims, Cisco moved to dismiss them. See Mot. to Dismiss (dkt. 72).

II. LEGAL STANDARD

HN1[] *Rule 12(b)(6) of the Federal Rules of Civil Procedure* allows a defendant to move to dismiss a cause of action which fails to state a claim upon which relief can be granted. To survive a *Rule 12(b)(6)* motion, a complaint must plead "enough facts to state a claim to **[*13]** relief that is plausible on its face." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim is plausible "when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. When evaluating a *Rule 12(b)(6)* motion, the court "must presume all factual allegations of the complaint to be true and draw all reasonable inferences in favor of the nonmoving party." *Usher v. City of Los Angeles, 828 F.2d 556, 561 (9th Cir. 1987)*. But conclusory allegations amounting only to "formulaic recitation of the elements" are not entitled to an assumption of truth. See *Iqbal, 556 U.S. at 681* (quoting *Twombly, 550 U.S. at 555*). "[C]ourts must consider the complaint in its entirety, as well as other sources courts ordinarily examine when ruling on *Rule 12(b)(6)* motions to dismiss, in particular, documents incorporated into the complaint by reference, and matters of which a court may take judicial notice." *Tellabs, Inc. v. Makor Issues & Rts., Ltd., 551 U.S. 308, 322, 127 S. Ct. 2499, 168 L. Ed. 2d 179 (2007)*.

HN2[] A party alleging fraud "must state with particularity the circumstances constituting fraud." *Fed. R. Civ. P. 9(b)*. Particularity requires "the who, what, when, where, and how of the misconduct charged, including what is false or misleading about a statement, and why it is false." *Benavidez v. Cty. of San Diego, 993 F.3d 1134, 1145 (9th Cir. 2021)* (quoting United States v. United Healthcare Ins. Co., *848 F.3d 1161, 1180 (9th Cir. 2016)*). Allegations must be "specific enough to give defendants notice of the particular misconduct which is alleged to constitute **[*14]** the

---

[1] Dexon includes more factual allegations in its opposition brief, but these are not properly before the court on this motion. See, e.g., MTD Opp. (dkt. 81) at 26-27, 30.

fraud charged so that they can defend against the charge and not just deny that they have done anything wrong." United Healthcare, 848 F.3d at 1180 (citation and quotation omitted).

HN3[] Courts may adjudicate only actual cases or controversies. U.S. Const. art. III, § 2, cl. 1. "When presented with a claim for a declaratory judgment, therefore, federal courts must take care to ensure the presence of an actual case or controversy." Rhoades v. Avon Prods., Inc., 504 F.3d 1151, 1157 (9th Cir. 2007) (citing Pub. Serv. Comm'n v. Wycoff, Co., 344 U.S. 237, 244, 73 S. Ct. 236, 97 L. Ed. 291 (1952)). "Absent a true case or controversy, a complaint solely for declaratory relief under 28 U.S.C. § 2201 will fail for lack of jurisdiction under Rule 12(b)(1)." Id. (citation omitted). To satisfy the actual controversy requirement in a trademark case, the plaintiff must show "real and reasonable apprehension" that it would be liable for infringement if it continued marketing its product. Monster Cable Prods., Inc. v. Euroflex S.R.L., 642 F. Supp. 2d 1001, 1010 (N.D. Cal. 2009) (quoting Chesebrough-Pond's, Inc. v. Faberge, Inc., 666 F.2d 393, 396 (9th Cir. 1982)).

HN4[] When dismissal is appropriate, courts "shall freely" give leave to amend the complaint "when justice so requires." Fed. R. Civ. P. 15(a)(2). In the Ninth Circuit, district courts may deny leave to amend due to "undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, and futility of amendment." Leadsinger, Inc. v. BMG Music Pub., 512 F.3d 522, 532 (9th Cir. 2008) (quoting Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)).

III. [*15] DISCUSSION

The Court dismisses all of Dexon's counterclaims for failure to state a claim.

A. Antitrust Claims

1. Tying Claims (Counterclaims 1 and 4)

Dexon alleges that Cisco violated Section 1 of the Sherman Act and the California Cartwright Act because competition was harmed when customers who purchased SmartNet (maintenance service) were forced to purchase a "tied" product (equipment). See Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 462, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992). HN5[] To pass a motion to dismiss, a plaintiff "must allege an actual adverse effect on competition caused by the tying arrangement." Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1200 (9th Cir. 2012) (quotation and citation omitted).

These counterclaims fail because Dexon does not allege that the supposed tie had any adverse effect on competition. Dexon alleges that Cisco's competitors are impacted because "customers are not free to make a product choice on the merits but rather need to account for the likely reaction of Cisco." Countercl. ¶ 57; see id. ¶ 65 ("A substantial amount of commerce has been affected in the [equipment] Markets."); id. ¶ 67 (same). But the alleged facts do not support these conclusory assertions. The hospital that cancelled its order from Dexon simply bought Cisco products elsewhere, leaving competitors such as Hewlett Packard, Dell, and Juniper Networks **[*16]** unaffected. See id. ¶ 42. Dexon nowhere alleges that these competitors lost a sale when Cisco asked the 911 service center to purchase more Cisco equipment. And no lost sale is plausible because, at that time, the 911 center was not interested in "mak[ing] a product choice on the merits." It wanted no further equipment from any manufacturer. See id. ¶ 43.

More broadly, the supposed tie makes no logical sense. SmartNet exists to maintain Cisco products. The maintenance service (the supposed tying product) is only desirable to consumers as an add-on to the underlying equipment (the supposed tied product). Because a consumer buys SmartNet for equipment she already has, Cisco cannot exploit control over the SmartNet market to force people to buy the underlying equipment. It's true that, if

Cisco improperly withheld SmartNet service from its customers, Cisco may have breached its contract. But that is not an antitrust violation, nor would the claim be Dexon's.[2]

Because Dexon fails to plead a tying claim under the *Sherman Act*, its *Cartwright Act* claim fails. See *Cnty. Of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)* (noting that the "analysis under California's ***antitrust law*** mirrors the analysis under federal law").

2. Monopolization Claims (Counterclaims [*17] 2 and 3)

The Court also dismisses Dexon's counterclaims that Cisco unlawfully monopolized the equipment markets in violation of *Section 2 of the Sherman Act* (or that it attempted to do so). ***HN6***[] The mere fact of having monopoly power is not unlawful "unless it is accompanied by an element of anticompetitive conduct." See *Verizon Commc'ns Inc. v. L. Offs. of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. Dexon alleges that Cisco engaged in the following exclusionary conduct to maintain its monopoly power: coercing purchases in the equipment markets; bullying its customers to purchase through more expensive channels; pressuring a VAR not to deal with Dexon; hurting Dexon by discontinuing its access to Cisco's service database; reversing a prior course of conduct toward Dexon; and engaging in similar tactics. Countercl. ¶ 71(a)-(f).

Dexon fails to plead that any of this alleged conduct, either singly or in the aggregate, was anticompetitive. As explained above, Dexon fails to allege that Cisco's coercion or "bullying" of its consumers harmed Cisco's competitors in the equipment markets. Nor does Dexon allege that competition was harmed when Cisco pressured another VAR not to deal with Dexon, discontinued Dexon's access to Cisco's database, or reversed its prior course of conduct toward Dexon. Cisco's conduct apparently led **[*18]** some customers to purchase Cisco equipment from suppliers other than Dexon. Countercl. ¶ 42. But this had no effect on Cisco's competitors. In at least one case, Cisco's conduct apparently helped its competitors: shutting off Dexon's access to the service database led frustrated consumers to purchase products made by other manufacturers. See id. ¶ 51. Dexon does not allege that Cisco's conduct made it more difficult for Dexon (or any other distributor) to distribute the products made by Cisco's competitors. And such an allegation would be a difficult one to make. Cf. *Omega Env't, Inc. v. Gilbarco, Inc., 127 F.3d 1157, 1163 (9th Cir. 1997)* (restrictions on distribution channels rarely pose an antitrust problem because they rarely foreclose competitors' access to consumers).

Further, Dexon's theory for why Cisco took action against Dexon makes little economic sense. See *Adaptive Power Sols., LLC v. Hughes Missile Sys. Co., 141 F.3d 947, 952 (9th Cir. 1998)* ("Antitrust claims must make economic sense." (citing *Eastman Kodak, 504 U.S. at 468*)). A firm is unlikely to prefer distribution channels with higher resale prices. Dexon alleges that Cisco gets a higher margin out of more expensive distributors, but it pleads no specific facts in support of this assertion. Id. ¶¶ 45, 59. Without more, it is implausible.

Because Dexon has not pleaded that Cisco's alleged conduct harmed **[*19]** competition, its claims under *Section 2 of the Sherman Act* fail.

3. Antitrust Injury

The antitrust claims also fail because Dexon has not pleaded antitrust injury. Although Dexon alleges that it was harmed by Cisco's conduct, it has not pleaded this harm was caused by anticompetitive conduct. Thus, while the conduct may have violated consumers' contracts with Cisco, or it may have been unwarranted or arbitrary, any injury to Dexon was not "of the type the antitrust laws were intended to prevent and that flows from that which

[2] It is at least theoretically possible for a firm to harm competitors by locking customers into a costly long-term service plan and then requiring purchases in a tied equipment market that customers en masse (for some set of reasons) cannot refuse. But no court that has yet found such an arrangement, and the conditions necessary are far away from the facts alleged here.

makes defendants' acts unlawful." *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*.

For the above reasons, counterclaims 1 through 4 are dismissed with leave to amend. See *Leadsinger, 512 F.3d at 532*.

B. Other Claims

1. Unfair Competition Law (Counterclaim 5)

Dexon also alleges a claim under the California Unfair Competition Law ("UCL"), founded on the putative antitrust violations, as well as the following conduct: misrepresentations about the software license that users need to operate the equipment; misleading classification of secondary-market Cisco equipment as "used" or "counterfeit"; wrongful denial of warranties to secondary-market equipment; and tortious efforts to interfere with Dexon's business. Countercl. ¶¶ 92-130. These allegations fail because Dexon **[*20]** fails to allege its own reliance on any purported misrepresentation and/or because they are insufficiently pleaded under *Federal Rule of Civil Procedure 9(b)*.

HN7[] The UCL broadly prohibits "unfair competition," defined as "any unlawful, unfair or fraudulent business act or practice." *Cal. Bus. & Prof. Code § 17200*; *Friedman v. AARP, Inc., 855 F.3d 1047, 1051 (9th Cir. 2017)*. The "unlawful" prong requires an underlying violation of law. See *Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1168 (9th Cir. 2012)*. Dexon has not plausibly alleged a violation of the antitrust laws, so it does not allege a UCL violation on that basis. See *Jones v. Micron Tech. Inc., 400 F. Supp. 3d 897, 923 (N.D. Cal. 2019)*.

Nor has Dexon pleaded a violation of the "unfair" prong. Dexon fails to sufficiently allege that any of Cisco's conduct "threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 544 (Cal. 1999)*; see *Cisco Sys. Inc. v. Link US, LLC, 2019 U.S. Dist. LEXIS 212028, 2019 WL 6682838 (N.D. Cal. Dec. 6, 2019)* (applying this test in the context of a reseller).

HN8[] To plead a claim under the UCL's fraudulent prong, a "plaintiff must show that members of the public are likely to be deceived by the [challenged] practice." *Friedman, 855 F.3d at 1055*. "[L]ikelihood of deception is assessed under a 'reasonable consumer standard.'" Id. A plaintiff must also demonstrate "actual reliance," which may be "inferred from the misrepresentation **[*21]** of a material fact." Id.

a. Reliance by Third Parties

The UCL claim fails because Dexon did not plead its own reliance on the misrepresentation or facts sufficient to infer that reliance.

Courts are split as to whether reliance by third parties is sufficient to plead UCL fraud claims. See *Equinox Hotel Mgmt., Inc. v. Equinox Holdings, Inc., 2018 U.S. Dist. LEXIS 16914, 2018 WL 659105, at *13-14 (N.D. Cal. Feb. 1, 2018)* (discussing the split). But the majority view is that the plaintiff must plead his own reliance. See, e.g., id.; *L.A. Taxi Coop., Inc. v. Uber Techs., Inc., 114 F. Supp. 3d 852, 866 (N.D. Cal. 2015)*. On this view, the UCL does not confer statutory standing on a plaintiff when only third parties (and not the plaintiff itself) relied on the misrepresentation.

The Court is persuaded by the majority approach and concludes that Dexon must allege facts sufficient to infer its own reliance on the misrepresentations. While it is plausible that Dexon is indirectly harmed by its customers' reliance on the misrepresentation, the mere existence of harm does not mean that this harm is cognizable under the UCL. That's especially true given that restitution is the only monetary remedy for UCL claims, which is a poor fit for the thrust of Dexon's counterclaim as alleged. See *Cal. Bus. & Prof. Code § 17203*; *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 131 Cal. Rptr. 2d 29, 63 P.3d 937, 947 (Cal. 2003)* (restitution under the UCL must "restore the status quo by returning to the plaintiff funds in which he or she has an ownership **[*22]** interest"). Dexon has failed to allege facts plausibly suggesting that the harm derived from its own reliance.[3]

b. Other Grounds

The Court notes several additional flaws with Dexon's UCL claim. First, Dexon fails to allege that Cisco made any misrepresentation about the software license that users need to operate the equipment. See *Link US, 2019 U.S. Dist. LEXIS 212028, 2019 WL 6682838, at *7-8* (rejecting this argument). Dexon alleges that Cisco informs customers that "although its hardware can be freely resold, the 'embedded Cisco software that runs on the hardware' is 'not transferable,' and purchasers of secondary market Cisco equipment 'must acquire a new license from Cisco before the software can be used.'" Countercl. ¶ 102. Dexon contends that this statement is false because it violates the first sale doctrine. But that doctrine applies to purchased software, not to purchased software licenses. Dexon alleges no plausible facts suggesting that initial owners of Cisco equipment own (rather than merely license) the embedded software. Cisco makes no misrepresentation when it informs secondary-market equipment purchasers that they need a software license. See *Link US, 2019 U.S. Dist. LEXIS 212028, 2019 WL 6682838, at *7-8* (citing *Vernor v. Autodesk, Inc., 621 F.3d 1102, 1107 (9th Cir. 2010)*).

Dexon's claim of wrongful denial of warranties to secondary-market equipment **[*23]** also fails. The Court can discern no misrepresentations here. Countercl. ¶¶ 114-19. Dexon criticizes Cisco's policy of refusing to warranty secondary-market equipment, asserts that Cisco's tools to detect counterfeits are lacking, and alleges that Cisco fails to properly police its manufacturers and process serial numbers. Id. ¶¶ 116-18. Dexon has alleged not fraud, but frustration.

The allegations also fail because Dexon does not "state with particularity the circumstances constituting fraud." *Fed. R. Civ. P. 9(b)*; see *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)* (applying *Rule 9(b)* to UCL fraud claims). ***HN9***[] Particularity requires "the who, what, when, where, and how of the misconduct charged, including what is false or misleading about a statement, and why it is false." *Benavidez, 993 F.3d at 1145* (quotation and citation omitted). Dexon does not state who at Cisco classified genuine products as "used" or "counterfeit," or when, and to whom. See Countercl. ¶ 110. And although it provides at least some further details in its opposition, see Opp. at 25, its pleading does not allege the "who, when, or where" of Cisco's allegedly misleading definition of the word "used." See id. ¶ 111-13. Dexon fails to allege the "who, when, or where" to back up its conclusory claim that Cisco's Technical **[*24]** Assistance Center "intentionally modif[ies] or change[s] product serial numbers" in order to sell SmartNet. Id. ¶ 118. Nor does it allege "who, when, where, or what" as to Cisco's alleged "tortious[] and erroneous[] insinuati[ons] to resellers and end users" that actors such as Dexon are engaging in illegal activity. See id. ¶ 120(d). It also does not allege "when or where" Cisco told Dexon's actual and prospective customers that "Dexon does not sell genuine [or new] product," or who made this claim, or to whom. Id. ¶ 121. Although Dexon alleges that Cisco made this threat to a hospital system, that hospital is unidentified and insufficient specific facts are pleaded. Id. ¶ 42.

For these reasons, Dexon has failed to state a claim under the UCL.

2. Declaratory Judgment (Counterclaims 6 and 7)

---

[3] In *Cisco Sys. Inc. v. Link US, LLC, 2019 U.S. Dist. LEXIS 212028, 2019 WL 6682838 (N.D. Cal. Dec. 6, 2019)*, this Court held that a counterclaim plaintiff stated a UCL fraud claim based on Cisco's misleadingly broad definition of "used" equipment. Cf. id. ¶¶ 111-13 (making a similar allegation). The Court permitted the claim to proceed, explaining that reliance need not be pleaded specifically, and apparently assuming that reliance by third parties could be cognizable. However, the Court did not consider this question. The Court does so today and adopts the majority approach.

Dexon seeks a declaratory judgment that "the sale of genuine Cisco product which Cisco has unilaterally deemed to be 'unauthorized' or 'unapproved' because sold outside of Cisco's authorized channels, sold to a secondary market reseller such as Dexon, or ineligible for warranty services as a result thereof, do not violate the *Lanham Act*." Countercl. ¶ 132.

This sentence is difficult to parse, but Dexon appears **[*25]** to want a declaration that its sale of genuine Cisco products does not violate the *Lanham Act*. But Cisco does not contend that the sale of genuine Cisco products violates the *Lanham Act*. Dexon does not allege that Cisco has sued Dexon or anyone else on this theory. In this suit, Cisco has sued Dexon on the theory that it does not sell genuine products. See Amended Compl. (dkt. 32). The Court lacks subject matter jurisdiction to issue a declaratory judgment as Dexon's proposed contention because Dexon has no "real and reasonable apprehension" of liability under the *Lanham Act* for selling genuine products. See MTD at 22 (citing Monster Cable Prods., Inc. v. Euroflex S.R.L., 642 F. Supp. 2d 1001, 1010 (N.D. Cal. 2009)). The Court dismisses with leave to amend.

The Court also dismisses Dexon's claim for a declaratory judgment that, in limiting its warranty to products sold by Authorized Sellers, Cisco violates *N.Y. General Business Law § 369-b*. ***HN10***[] *Section 369-b* does not provide a private right of action. *Cisco Sys., Inc. v. Beccela's Etc., LLC, 403 F. Supp. 3d 813, 826 (N.D. Cal. 2019)* (citing *Worldhomecenter.com, Inc. v. KWC America, Inc., 2011 U.S. Dist. LEXIS 104496, 2011 WL 4352390, at *8 (S.D.N.Y. Sept. 15, 2011)*). A party cannot bring a declaratory judgment claim based on a statute for which there is no private right of action. *N. Cty. Commc'ns Corp. v. Cal. Catalog & Tech., 594 F.3d 1149, 1162 (9th Cir. 2010)*.

3. ***Lanham Act*** (Counterclaim 8)

Dexon also alleges that Cisco violated the *Lanham Act* because it made "misleading representations of fact regarding the software embedded in Cisco hardware sold on the secondary market" and "misleading representations of fact regarding **[*26]** whether products in the secondary market are 'used.'" Countercl. ¶ 144-45.

HN11[] *Section 43(a)* of the *Lanham Act* forbids the use of false or misleading descriptions in commercial advertising. See *15 U.S.C. § 1125(a)(1)(B)*; see *Southland Sod Farms v. Stover Seed Co., 108 F.3d 1134, 1139 (9th Cir. 1997)* (stating the five required elements). Although the Ninth Circuit has not yet decided the issue, "the better reasoned [district court] authority is that, where a *Lanham Act* claim is predicated on the theory that the defendant engaged in a knowing and intentional misrepresentation, then *Rule 9(b)* is applicable." *Clorox Co. v. Reckitt Benckiser Grp. PLC, 398 F. Supp. 3d 623, 634 (N.D. Cal. 2019)* (quoting *23andMe, Inc. v. Ancestry.com DNA, LLC, 356 F. Supp. 3d 889, 908 (N.D. Cal. 2018)*).

The *Lanham Act* claim fails for two reasons discussed in the previous section. First, Cisco's statement that secondary-market equipment purchasers require a software license is not a misrepresentation. Second, Dexon has not pleaded with particularity the "who, what, or when" regarding Cisco's allegedly misleading definition of "used," who was misled, and how specifically the misrepresentation caused Dexon harm. See *Kearns, 567 F.3d at 1126*.

4. Intentional Interference and Trade Libel (Counterclaims 9, 10, and 11)

Dexon also insufficiently pleads its intentional interference with contractual relations, intentional interference with prospective economic advantage, and trade libel claims, all of which are subject to *Rule 9(b)*. These claims are based on the general **[*27]** allegations that Cisco "made false and misleading statements about Dexon and the products it sells to these customers in order to disrupt the contractual relationship and to cause these customers to purchase product from Cisco authorized resellers." Countercl. ¶ 152; see also id. ¶¶ 159(a)-(c), 165 (similar).

All three claims require specificity not present here. ***HN12***[] Intentional interference with contractual relations requires pleading the existence of a valid then-existing contract between plaintiff and a third party. *Quelimane Co. v. Stewart Title Guar. Co., 19 Cal. 4th 26, 77 Cal. Rptr. 2d 709, 960 P.2d 513, 530 (Cal. 1998)*. Intentional interference with prospective economic advantage requires pleading an existing "economic relationship . . . with a probability of future economic benefit" and that the defendant's interference "was wrongful by some legal measure other than the fact of interference itself." *Della Penna v. Toyota Motor Sales, U.S.A., Inc., 11 Cal. 4th 376, 45 Cal. Rptr. 2d 436, 902 P.2d 740, 748, 751 (Cal. 1995)*. Similarly, trade libel requires a plaintiff to "identify the particular purchasers who have refrained from dealing with him, and specify the transactions of which he claims to have been deprived." *Muddy Waters. LLC v. Superior Ct., 62 Cal. App. 5th 905, 925, 277 Cal. Rptr. 3d 204 (2021)*.

The Court dismisses these three counterclaims with leave to amend. Especially in light of *Rule 9(b)*, Dexon's allegations are far too unspecific. See *AccuImage Diagnostics Corp v. Terarecon, Inc., 260 F. Supp. 2d 941, 956-57 (N.D. Cal. 2003)* (dismissing these clahns where plaintiff pleaded only **[*28]** "conclusory allegations").

IV. CONCLUSION

For the foregoing reasons, the Court dismisses Dexon's eleven counterclaims with leave to amend. Dexon may file an amended answer and counterclaims within 30 days of the date of this order.

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* tests the sufficiency of the claims. When evaluating the sufficiency of a complaint's factual allegations, the court must accept all material facts alleged in the complaint as true and construe them in the light most favorable to the non-moving party. A motion to dismiss under *Rule 12(b)(6)* will be granted if a plaintiff alleges the grounds of his entitlement to relief with nothing more than labels and conclusions, and a formulaic recitation of the elements of a cause of action. Factual allegations must be enough to raise a right to relief above the speculative level on the assumption that all the allegations in the complaint are true, even if doubtful in fact.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Inferences & Presumptions > Inferences

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A plaintiff must plead factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. In other words, a complaint must state a plausible claim for relief and contain well-pleaded facts that permit the court to infer more than the mere possibility of misconduct.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN3[] **Sherman Act, Claims**

Section 1 of the Sherman Act makes unlawful every contract, combination, or conspiracy, in restraint of trade or commerce among the several States. *15 U.S.C.S. § 1*. The Act serves to promote robust competition and suppress business combinations that restrain competition. But the Sherman Act gives no hint that it was intended to restrain state action. States may have an interest in regulating occupations, conferring exclusive rights to dominate a particular market to certain entities, or otherwise limiting competition to achieve public objectives. Thus, a State acting in its sovereign capacity is generally immune from federal antitrust laws. But state-action immunity is the exception rather than the rule. When a State delegates control over a market to a non-state actor, the actor generally cannot assert state-action immunity.

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN4[] **Sherman Act, Defenses**

Courts use three approaches to analyzing state-action immunity from federal antitrust laws. First, true state action, such as that of a state legislature or state supreme court, is ipso facto immune from antitrust liability. Second, municipalities and executive state agencies are entitled to state-action immunity if they act pursuant to a clearly articulated and affirmatively expressed state policy to replace competition. Third, private parties and state agencies that are controlled by participants in the markets they regulate only receive immunity if their anticompetitive acts are (1) taken pursuant to a clearly articulated state policy and (2) supervised by the state.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN5[] **Scope, Exemptions**

State executive branches are entitled to state-action immunity from antitrust suits.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

HN6[] **Sherman Act, Claims**

Non-state actors who engage in anti-competitive conduct pursuant to state authorization do not receive ipso facto immunity from liability under the Sherman Act. Nevertheless, such persons or entities may be immune if they satisfy a two-part test: (1) the anti-competitive conduct was pursuant to a clearly articulated and affirmatively expressed state policy to replace competition with regulation; and (2) the conduct is actively supervised by the State itself. Municipalities acting pursuant to clearly articulated and affirmatively expressed state policies are protected by state-action immunity without needing to show they are actively supervised by the state. State agencies may receive the same immunity as municipalities without active state supervision because, as public bodies, state agencies are unlikely to be involved in private arrangements to limit competition. Once it is clear that state authorization exists, there is no need to require the State to supervise actively the execution of what is a properly delegated function. So long as a state agency meets the requirements set forth in Hess and is acting pursuant to a clearly articulated state policy, it is immune from liability under the Sherman Act.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN7[] **Exemptions & Immunities, Parker State Action Doctrine**

When a state agency is composed of or controlled by actors who participate in the same market they regulate, any anti-competitive agency actions must be actively supervised by the State. But the supervision requirement extends to state agencies controlled by active market participants, who possess singularly strong private interests because they pose the very risk of self-dealing.

Governments > State & Territorial Governments > Employees & Officials

HN8[] **State & Territorial Governments, Employees & Officials**

When the state executive or executive agencies act within their lawful authority, their acts are those of the sovereign.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN9[] **Sherman Act, Claims**

Clear articulation does not require a legislature to expressly state an anticompetitive intent. The clear-articulation test for State immunity from liability under the *Sherman Act, 15 U.S.C.S. § 1*, is met if the anticompetitive effect was the foreseeable result of what the State authorized.

Real Property Law > Brokers > Discipline, Licensing & Regulation

HN10[] **Brokers, Discipline, Licensing & Regulation**

Oregon law specifically prohibits a real estate licensee from providing any part or share of the licensee's compensation to a person who is the buyer or seller of the real property that is the subject of the transaction. *Or. Rev. Stat. § 696.290(1)(a)*.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN11[] **Sherman Act, Claims**

To state a claim for violation of *Section 1* of the Sherman Act, *15 U.S.C.S. § 1*, a plaintiff must plead facts that show (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the person or entities intended to harm or restrain trade or commerce among the several states, or with foreign nations; (3) which actually injures competition. A conspiracy as defined by *Section 1* of the Sherman Act requires an agreement that joins together independent centers of decisionmaking. The agreement need not be between two or more separate legal entities. But the Sherman Act requires an agreement to restrain trade made between separate economic actors pursuing separate economic interests.

Civil Rights Law > ... > Section 1983 Actions > Elements > Protected Rights

HN12[] **Elements, Protected Rights**

To state a claim under *42 U.S.C.S. § 1983*, a plaintiff must both (1) allege the deprivation of a right secured by the federal Constitution or statutory law, and (2) allege that the deprivation was committed by a person acting under color of state law. Legislative acts that do not impinge on fundamental rights or employ suspect classifications are presumed valid, and this presumption is overcome only by a clear showing of arbitrariness and irrationality.

Constitutional Law > Equal Protection > Judicial Review > Standards of Review

HN13[] **Judicial Review, Standards of Review**

Under rational basis review, a law or policy must be upheld if there is any reasonably conceivable state of facts that could provide a rational basis for treating the plaintiff differently. Even if a state statute or policy produces unequal or unfair results, it does not necessarily fail rational basis review. A state law may be constitutional even if it is unwise, improvident, or out of harmony with a particular school of thought, as long as it bears some a relationship to some legitimate end.

Governments > Police Powers

HN14[] **Governments, Police Powers**

Regulation of certain trades or professions is a legitimate objective of state governments. It is properly within the state's police power to regulate and license professions.

Constitutional Law > Equal Protection > Judicial Review > Standards of Review

HN15[] **Judicial Review, Standards of Review**

That a statute may be over-inclusive by its enforcement does not, under rational basis review, render it unconstitutional.

Constitutional Law > State Constitutional Operation

HN16[] **Constitutional Law, State Constitutional Operation**

There is no private right of action for damages under the Oregon Constitution.

Civil Procedure > ... > Federal & State Interrelationships > State Sovereign Immunity > State Immunity

Governments > State & Territorial Governments > Claims By & Against

Torts > Public Entity Liability > Immunities > Sovereign Immunity

Constitutional Law > State Sovereign Immunity > Abrogation of Immunity

HN17[] **State Sovereign Immunity, State Immunity**

Federal courts have long recognized an exception to *Eleventh Amendment* sovereign immunity when state officials are sued in their official capacities for prospective relief on federal law claims. But the exception does not apply when a suit against state officials is brought under state law. Thus, the *Eleventh Amendment* bars plaintiffs from bringing state law claims for both prospective and retrospective relief against state officials in their official capacities.

Constitutional Law > State Sovereign Immunity > Abrogation of Immunity

Governments > State & Territorial Governments > Claims By & Against

HN18[] **State Sovereign Immunity, Abrogation of Immunity**

Pennhurst does not preclude state law claims against sate government officers in their individual capacities.

Opinion

OPINION & ORDER

HERNÁNDEZ, District Judge:

Plaintiff REX — Real Estate Exchange, Inc. ("REX") brings this action for antitrust violation under *Section 1 of the Sherman Act*, violation of the *Fourteenth Amendment* *Equal Protection and Due Process Clauses*, and violation of rights secured by *Article I, section 20 of the Oregon Constitution* against Defendants Kate Brown in her individual and official capacity as Governor of Oregon, Steve Strode in his individual and official capacity as Oregon Real Estate Commissioner, the Oregon Real Estate Agency, the Oregon Real Estate Board ("Board"), and each individual member of the Board in their official capacities. Currently before the Court is Defendants' Motion to Dismiss Plaintiff's Complaint. For reasons stated below, the Court grants Defendants' Motion.

BACKGROUND

Plaintiff REX is a real estate technology company that connects real estate buyers and sellers online. Compl. ¶ 4, ECF **[*2]** 1. Unlike most traditional brick-and-mortar real estate companies, REX offers rebates to customers on commissions it receives. *Id.* at ¶ 5. Under its Buyer Rebate Program, when one of its customers purchases a home, REX refunds half of its buyer's agent commission to the customer at closing. *Id.* at 6. REX contends that its Buyer Rebate Program reduces the price of the average home in Oregon by $5,000 to $10,000 with no impact on the seller's revenue. *Id.*

Defendant Oregon Real Estate Agency ("Agency") is an official agency of the State of Oregon. Compl. ¶ 18. The Agency has the power to "[m]ake and enforce rules as necessary to administer and enforce the provisions of . . . any law with the administration and enforcement of which the agency is charged. Or. Rev. Stat. ("O.R.S") *§ 696.385(3)*. The agency operates under the supervision and control of the Oregon Real Estate Commissioner

("Commissioner"), who is appointed by the Governor subject to confirmation by the Oregon Senate. *O.R.S. 696.375(2)*. By statute, the Commissioner must have been a real estate broker in Oregon "actively engaged in business as such" for five years prior to the date of appointment. *Id.* The Commissioner "holds office at the pleasure of the **[*3]** governor." *Id.*

Defendant Oregon Real Estate Board exists within the Agency and is made of up nine members appointed by the Governor to hold office for four years and serve at the pleasure of the Governor. *O.R.S. 696.405(1)*. Seven members must have held real estate licenses and have been actively engaged in the real estate profession in Oregon for five years prior to their appointments. *Id.* The other two Board members cannot be real estate licensees or have had any prior connection to the Agency. *Id.* The Board is authorized to inquire into the needs of real estate licensees, advise the Governor as to how the Agency may best serve the state and the licensees, and make recommendations and suggestions of policy to the Agency regarding the regulation of licensees and the real estate business in Oregon. *O.R.S. 696.425(1)*.

REX received a real estate brokerage license and began doing business in Oregon in January 2019. In March 2019, the Agency sent an "Education Letter of Advice" ("Letter") notifying REX that its Buyer Rebate Program violates an Oregon state law that prohibits sharing real estate commissions with any person who does not have a real estate license. *Id.* at ¶ 59; *see O.R.S. 696.290* ("[A] real estate licensee may not offer, **[*4]** promise, allow, give, pay or rebate, directly or indirectly, any part or share of the licensee's compensation arising from or accruing from any real estate transaction . . . to any person who is not a real estate licensee[.]"). The Letter informed REX that offering rebates to its customers is grounds for discipline under Oregon law, but that the Agency would not take action against REX's license at that time. Compl. Ex. 1, ECF 1-1. Since receiving the letter, REX has not rebated any portion of its commissions to customers. Compl. ¶ 63. REX contends that it has forgone transactions in Oregon and its revenue growth has been slower compared to other markets because it cannot offer rebates to customers. *Id.*

REX asserts that the Agency's anti-rebate policies bar new entrants to the brokerage market and protect incumbent brokers who benefit from artificially high commissions. *Id.* at 62. REX alleges that the Agency's policies restrict competition and "injure buyers and sellers of property throughout Oregon" by depriving them of price discounts, including cash rebates. *Id.* at 67. According to REX, "Defendants' promulgation, adoption, maintenance, and enforcement of the anti-rebate policies **[*5]** arises from and result in agreements, combinations, and conspiracies that restrain competition . . . in violation *Section 1 of the Sherman Act, 15 U.S.C. § 1*." *Id.* at 72. REX also claims that Oregon's anti-rebate policies violate its and its customers' due process rights and equal protection rights. *Id.* at ¶¶ 82-109. Finally, REX claims that by enforcing the anti-rebate policies, Defendants violate the rights of REX and its customers under the *Privileges and Immunities Clause of the Oregon Constitution Article I, section 20*. *Id.* at ¶¶ 112-124.

Plaintiff seeks damages and an injunction prohibiting Defendants from enforcing Oregon's anti-rebate policies. Defendants move to dismiss all claims.

STANDARDS

II. *Rule 12(b)(6)*

HN1[] A motion to dismiss under *Rule 12(b)(6)* tests the sufficiency of the claims. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. When evaluating the sufficiency of a complaint's factual allegations, the court must accept all material facts alleged in the complaint as true and construe them in the light most favorable to the non-moving party. *Wilson v. Hewlett-Packard Co., 668 F.3d 1136, 1140 (9th Cir. 2012)*. A motion to dismiss under *Rule 12(b)(6)* will be granted if a plaintiff alleges the "grounds" of his "entitlement to relief" with nothing "more than labels and conclusions, and a formulaic recitation of the elements of a cause of action[.]" *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. "Factual allegations must be enough to raise a right to relief above the speculative level **[*6]** on the assumption that all the allegations in the complaint are true (even if doubtful in fact)[.]" *Id.* (citations and footnote omitted).

HN2[] To survive a motion to dismiss, a complaint "must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (internal quotation marks omitted). A plaintiff must "plead[] factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* In other words, a complaint must state a plausible claim for relief and contain "well-pleaded facts" that "permit the court to infer more than the mere possibility of misconduct[.]" *Id. at 679*.

DISCUSSION

I. Claims Under the Sherman Act, *15 U.S.C. § 1*

Plaintiff claims that Oregon's Governor, Real Estate Commissioner, Real Estate Agency, Real Estate Board, and each of the Board's members acted pursuant to a "continuing agreement among Defendants and co-conspirators to require home sellers to pay the buyer broker an inflated amount," and Defendants' established, maintain, and implement Oregon's anti-rebate policies in furtherance of a contract, combination, or conspiracy to unreasonably restrain trade and commerce in violation **[*7]** of *Section 1 of the Sherman Act*. Compl. ¶¶ 74-76. Defendants argue that (1) Plaintiff's Sherman Act claim is barred by state-action immunity; and (2) Plaintiff fails to allege facts that make the Sherman Act claim plausible on its face. The Court addresses Defendants' arguments in turn.

A. State-Action Immunity

HN3[] *Section 1 of the Sherman Act* makes unlawful "every contract, combination . . ., or conspiracy, in restraint of trade or commerce among the several States." *Parker v. Brown, 317 U.S. 341, 350, 63 S. Ct. 307, 87 L. Ed. 315 (1943)* (quoting *15 U.S.C. § 1*). The Act serves to promote robust competition and suppress "business combinations" that restrain competition. *Id. at 351*. But the Sherman Act "gives no hint that it was intended to restrain state action." *Id.* States may have an interest in regulating occupations, conferring exclusive rights to dominate a particular market to certain entities, or otherwise limiting competition to achieve public objectives. *N.C. State Bd. of Dental Exam'rs v. FTC, 574 U.S. 494, 503, 135 S. Ct. 1101, 191 L. Ed. 2d 35 (2015)*. Thus, a State acting in its sovereign capacity is generally immune from federal antitrust laws. *Deak-Perera Haw., Inc. v. Dep't of Transp. 745 F.2d 1281, 1282 (9th Cir. 1984)*; *see* *Dental Exam'rs, 574 U.S. at 503* ("If every duly enacted state law or policy were required to conform to the mandates of the Sherman Act, thus promoting competition at the expense of other values a State may deem fundamental, federal ***antitrust law*** would impose an impermissible burden on the State's power to regulate."). **[*8]**

But "[s]tate-action immunity is the exception rather than the rule." *Chamber of Com. of the U.S.A. v. City of Seattle, 890 F.3d 769, 781 (9th Cir. 2018)*. When a State delegates control over a market to a non-state actor, the actor generally cannot assert state-action immunity. *See id.* ("Closer analysis is required when the activity at issue is not directly that of the State itself, but rather is carried out by other pursuant to state authorization.") (internal quotations and citations omitted).

HN4[] Courts use three approaches to analyzing state-action immunity. First, true state action, such as that of a state legislature or state supreme court, is *ipso facto* immune from antitrust liability. *Hoover v. Ronwin, 466 U.S. 558, 567-68, 104 S. Ct. 1989, 80 L. Ed. 2d 590 (1984)*. Second, municipalities and executive state agencies are entitled to state-action immunity if they act pursuant to a "clearly articulated and affirmatively expressed state policy" to replace competition. *Id. at 568-69*; *see* *Town of Hallie v. City of Eau Claire, 471 U.S. 34, 45, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)*. Third, private parties and state agencies that are controlled by participants in the markets they regulate only receive immunity if their anticompetitive acts are (1) taken pursuant to a clearly articulated state policy and (2) supervised by the state. *Dental Exam'rs, 574 U.S. at 506*.

1. *Oregon Governor*

Defendants assert that Governor Brown is *ipso facto* immune from antitrust liability under *Parker*. Plaintiff, **[*9]** on the other hand, claims that the *ipso facto* immunity afforded to state legislatures and supreme courts does not extend to governors. *See Hoover, 466 U.S. at 568 n.17* ("This case does not present the issue whether the Governor of a State stands in the same position as the state legislature and state supreme court for purposes of the state-action doctrine."). But while the issue was not before the Court in *Hoover*, the Ninth Circuit has held that ***HN5***[] state executive branches are entitled to state-action immunity from antitrust suits. *See Deak-Perera, 745 F.2d at 1283*, *cert. denied*, *470 U.S. 1053, 105 S. Ct. 1756, 84 L. Ed. 2d 820 (1985)* ("We see no reason why a state executive branch, when operating within its constitutional and statutory authority, should be deemed any less sovereign than a state legislature, or less entitled to deference under principles of federalism."). As the head of the executive branch of Oregon, any actions taken by the Governor are acts of the sovereign. Thus, Governor Brown is entitled to state-action immunity.

2. *Oregon Real Estate Agency and Real Estate Commissioner*

HN6[] Non-state actors who engage in anti-competitive conduct pursuant to state authorization do not receive *ipso facto* immunity from liability under the Sherman Act. Nevertheless, such persons or entities may be immune if they satisfy **[*10]** a two-part test: (1) the anti-competitive conduct was pursuant to "a clearly articulated and affirmatively expressed state policy to replace competition with regulation"; and (2) the conduct is "actively supervised by the State itself." *Cal. Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)*; *see Dental Exam'rs, 574 U.S. at 506*.

The supervision requirement ensures that immunity is conferred only to non-state actors who "in the judgment of the State, actually further state regulatory policies." *Patrick v. Burget, 486 U.S. 94, 101, 108 S. Ct. 1658, 100 L. Ed. 2d 83 (1988)*. In *Town of Hallie*, the Supreme Court held that municipalities acting pursuant to clearly articulated and affirmatively expressed state policies are protected by state-action immunity without needing to show they are actively supervised by the state. *471 U.S. at 47*. The Ninth Circuit has since held that state agencies may receive the same immunity as municipalities without active state supervision because, as public bodies, state agencies are unlikely to be involved in private arrangements to limit competition. *Hass v. Oregon State Bar, 883 F.2d 1453, 1460 (9th Cir. 1989)*. "Once it is clear that state authorization exists, there is no need to require the State to supervise actively the . . . execution of what is a properly delegated function." *Hass 883 F.2d at 1460* (citing *Town of Hallie, 471 U.S. at 47*). In *Hass*, the Ninth Circuit determined that the Oregon State Bar was a state agency because the Oregon legislature **[*11]** had "expressly designated the Bar as the instrumentality through which the legislature will implement its policies[.]" *Id. at 1461*. The Court held that the Bar need not satisfy the active supervision requirement to be entitled to state-action immunity*. Id.* So long as a state agency meets the requirements set forth in *Hass* and is acting pursuant to a clearly articulated state policy, it is immune from liability under the Sherman Act.

Plaintiff argues that the Agency and the Commissioner cannot receive state-action immunity without active state supervision because the Agency is "wholly controlled by a market participant." Compl. ¶ 60. ***HN7***[] When a state agency is composed of or controlled by actors who participate in the same market they regulate, any anti-competitive agency actions must be "actively supervised" by the State. *Midcal, 445 U.S. at 105*. The *Midcal* supervision rule stems from the concern that "where a private party is engaging in anticompetitive activity, there is a real danger he is acting to further his own interests, rather than the governmental interests of the State." *Dental Exam'rs, 574 U.S. at 507* (internal quotations and citation omitted). *Midcal* involved private businesses that restrained competition pursuant to state policy. *445 U.S. at 99-101*. But the supervision requirement **[*12]** extends to "[s]tate agencies controlled by active market participants, who possess singularly strong private interests" because they "pose the very risk of self-dealing Midcal's supervision requirement was created to address. *Id. at 114*.

Plaintiff asserts that the Commissioner is an active market participant because he "must hold an active real estate broker license to qualify for the position." Compl. ¶ 60. In its response brief, Plaintiff acknowledges that Commissioner Strode deactivated his license.[1] Pl. Resp. 17, ECF 38. But Plaintiff argues that the Commissioner's "deep ties to the real-estate lobby" give him "the same economic incentives to restrain competition as current active market participants." *Id.* at 17-18. Plaintiff relies on *Dental Exam'rs*, in which a majority of the North Carolina Dental Board's members were engaged in the active practice of dentistry—the profession they regulated. 574 U.S. at 511. In that case, the Supreme Court held that because the board was almost entirely composed of active market participants, it could only be entitled to state-action immunity if it was actively supervised by the State. *Id.*

In contrast, Commissioner Strode does not have an active real estate license and **[*13]** thus cannot engage in an active real estate practice while he is the head of the Agency. Even if the Commissioner has an economic incentive to restrain competition because of a future intent to participate in the market, this case is distinguishable from *Dental Exam'rs*. In *Dental Exam'rs*, the board members were elected by other licensed dentists and were not removable by any public official. *Id. at 499-500*. Here, the Commissioner is appointed by the Governor with Senate confirmation and can be removed by the Governor at will. In that respect, the Agency is more like a prototypical state agency—a fact that is not diminished by the requirement that the Commissioner have formerly been an active market participant. As such, the Agency and the Commissioner need not satisfy the "active supervision" requirement. So long as they acted pursuant to a clearly articulated state policy, they are be entitled to state-action immunity. *See* *Charley's Taxi Radio Dispatch Corp. v. SIDA of Hawaii, Inc., 810 F.2d 869, 876 (9th Cir. 1987)* (**HN8**[] "When the state executive or executive agencies act within their lawful authority, their acts are those of the sovereign.").

Plaintiff also claims that the Agency did not act pursuant to a clearly articulated state policy because *O.R.S. 696.290(1)(a)* does not clearly express a policy banning rebates **[*14]** to its customers. Plaintiff argues that because other states allow rebates in the face of similar statutory language, *O.R.S. 696.290(1)(a)* cannot be a "clearly" articulated ban on rebates. Pl. Resp. 9-15, ECF 38.[2]

HN9[] Clear articulation does not require a legislature to expressly state an anticompetitive intent. *Chamber of Com. of the U.S.A., 890 F.3d at 782* (citing *FTC v. Phoebe Putney Health Sys., Inc., 568 U.S. 216, 226, 133 S. Ct. 1003, 185 L. Ed. 2d 43 (2013)*. "The clear-articulation test is met if the anticompetitive effect was the foreseeable result of what the State authorized." *Id.* (internal quotations and citations omitted); *see* *City of Columbia v. Omni Outdoor Advert., Inc., 499 U.S. 365, 372, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)* ("We have rejected the contention that this requirement can be met only if the delegating statute explicitly permits the displacement of competition.").

Here, the Oregon legislature, in creating the Agency, expressly empowered the Agency to enforce rules and regulations related to the business of real estate sales. The Agency's authority to regulate real estate sales derives from *O.R.S. 696.385(3)*, which states that the "Real Estate Agency shall have the power to . . . [m]ake and enforce rules as necessary to administer and enforce the provisions of . . . any law with the administration or enforcement of which the agency is charged." In enacting an authorizing statute, the Oregon legislature clearly articulated a policy empowering **[*15]** the Agency to suppress competition in Oregon as necessary to enforce Oregon law. *See* *Hass, 883 F.2d at 1458* (holding that statutory scheme that "clearly evinces a legislative policy to supplant free market competition with regulation in the field" satisfies the clear articulation test). Thus, the Agency, and the Commissioner as its head, are authorized to enforce the provisions of *O.R.S. 696.290(1)(a)*, which by its terms,

---

[1] *O.R.S. 696.375(2)* requires the Commissioner to have previously held a real estate license and to have been active in the real estate business prior to appointment. The statute does not require the Commissioner to have an active real estate license while holding office. Plaintiff acknowledges its error after Defendants provided evidence that Commissioner Strode deactivated his real estate license upon being appointed Commissioner.

[2] The Court notes that the majority of state statutes cited by Plaintiff do not explicitly use the word "rebate" as *O.R.S. 696.290(1)(a)* does. Whether, within a particular context, the term "rebate" may be interpreted differently is not before the Court. The Court finds that the Agency's interpretation is consistent with the plain meaning of the statute.

states that a real estate licensee "may not . . . *rebate* . . . any part or share of the licensee's compensation . . . to any person who is not a real estate licensee[.]" (emphasis added).[3] Suppressing activity by real estate licensees that does not comply with the plain language of O.R.S. 696.290(1)(a) is a "foreseeable result" of what the legislature authorized.

The Court finds that in sending the Letter to REX, the Agency acted in a manner that was within its authority as delegated by the Oregon legislature and that was pursuant to a clearly articulated state policy. *See id.* ("Our task, therefore, is to determine whether the restraints in question are a reasonable and foreseeable exercise of delegated powers within the scope of an agency's authority.") (quoting Hybud Equip. Corp. v. City of Akron, 742 F.2d 949, 960 (6th Cir. 1984)). Under *Hallie*, the Commissioner and the Agency are entitled to **[*16]** state-action immunity from antitrust liability.

3. *The Oregon Real Estate Board and Board Members*

Plaintiff argues that because the majority of Board members hold active real estate licenses and are active market participants, they must meet both of Midcal's requirements. Defendants, on the other hand, argue that the Board and its members are immune from suit because they lack any authority to adopt, establish, or enforce state policy. The Board exists within the Agency and serves to "make recommendations and suggestions of policy." O.R.S. 696.425(1). Defendants note that the Board did not sign the Letter to REX or engage in its drafting. Def. Reply 14, ECF 40. Plaintiff alleges that the Board's anti-competitive act was to give "advice, recommendations, and/or assistance to the Agency concerning Oregon's anti-rebate law and . . . on enforcement activities, including the threatening letter sent to REX." Compl. ¶61. Even if Plaintiff can make credible allegations that the Board engaged in contract, combination, or conspiracy to restrain competition, the Board is entitled to state-action immunity under Midcal.

First, like the Agency, any recommendations made by the Board to prohibit rebates to customers were made pursuant **[*17]** to a clearly articulated state policy. The Board's role is to make policy recommendations and suggestions to the Agency. And if the Board recommended that the Agency notify REX that providing rebates to customers violates state law, then the Board engaged in a reasonable interpretation of O.R.S. 696.290(1).

Second, the Board is actively supervised by the Agency as an arm of the State. The Board lacks the authority to take any enforcement action and can only act through suggestions and recommendations to the Agency and the Governor. Indeed, the Board was created as a subsidiary of the Agency itself. *See* O.R.S. 696.405(1) ("The Real Estate Board is established within the Real Estate Agency."). Thus, by definition actions of the Board are supervised by the State. Under Midcal, the Board is entitled to state-action immunity.

In summary, any alleged anti-competitive actions by the Governor, the Commissioner, the Agency, and the Board were taken to enforce an anti-rebate law enacted by the state legislature. All such actions are those of the State itself, and thus fall squarely within the protection from antitrust liability justified by the reasoning in Parker.[4]

B. Plausible Claim under the Sherman Act

---

[3] Under O.R.S. 696.290(1)(a), "any person who is not a real estate licensee" includes individuals exempt from license requirements under O.R.S. § 696.030. Such persons include "[a] nonlicensed individual transferring or acquiring an interest in real estate owned or to be owned by the nonlicensed individual." O.R.S. § 696.030(17). Thus, **HN10**[] Oregon law specifically prohibits a real estate licensee from providing "any part or share of the licensee's compensation" to a person who is the buyer or seller of the real property that is the subject of the transaction. O.R.S. 696.290(1)(a).

[4] The Court declines to opine on the wisdom of Oregon's anti-rebate policy. "The Court did not suggest in Parker, nor has it suggested since, that a state action is exempt from antitrust liability only if the sovereign acted wisely[.] The only requirement is that the action be that of the State acting as a sovereign." Hoover, 466 U.S. at 574 (internal quotations and citation omitted).

Even if Defendants were not entitled to state-action **[*18]** immunity, Plaintiff has failed to allege facts that make its antitrust claim plausible on its face. ***HN11***[] To state a claim for violation of *Section 1 of the Sherman Act*, a plaintiff must plead facts that show "(1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the person or entities intended to harm or restrain trade or commerce among the several states, or with foreign nations; (3) which actually injures competition." *Kendall v. Visa U.S.A., Inc., 518 F.3d 1042, 1047 (9th Cir. 2008)*. A conspiracy as defined by *Section 1 of the Sherman Act* requires "an agreement that joins together independent centers of decisionmaking." *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 196, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* (internal quotations and citation omitted). The agreement need not be between two or more separate legal entities. But the Sherman Act requires an agreement to restrain trade made between "separate economic actors pursuing separate economic interests." *Id. at 195*.

Defendants are all members of the executive branch of the Oregon state government. The Governor appoints and may remove the Commissioner and each of the nine members of the Board. The Commissioner and all of the Board members serve at the pleasure of the Governor. The Board is authorized by state statute to advise both the Agency and the Governor on policy regarding **[*19]** the real estate industry in Oregon. Thus, with respect to the Sherman Act, Defendants are members of the same entity. And with the respect to the alleged anti-competitive action taken, they are not separate decisionmakers. Plaintiff alleges no facts supporting an inference that Governor Brown, the Agency, or the Board function as separate economic actors to restrain competition. As such, even if Defendants were not entitled to state-action immunity, Plaintiff's claim that Defendants engaged in a contract, combination, or conspiracy to restrain competition would fail.

II. Claims under *42 U.S.C. § 1983*

Plaintiff brings three claims against Defendants under *42 U.S.C. § 1983* for violation of constitutional rights. First, Plaintiff claims Defendants violated its due process rights under the *Fourteenth Amendment* because *O.R.S. 696.290*, the law on which Oregon's anti-rebate policies are based, lacks "any rational relationship to a legitimate public purpose." Compl. ¶ 88. Second, Plaintiff claims that Defendants' enforcement of the anti-rebate policies violates the *Fourteenth Amendment Equal Protection Clause* by treating individuals and businesses that offer rebates differently than those that do not. P. Resp. 23. Third, Plaintiff brings an equal protection claim on behalf of its customers who do not have real **[*20]** estate licenses because they are prohibited from receiving rebates, whereas home buyers who happen to possess real estate licenses are not.[5] Compl. ¶ 104.

HN12[] "To state a claim under *§ 1983*, a plaintiff must both (1) allege the deprivation of a right secured by the federal Constitution or statutory law, and (2) allege that the deprivation was committed by a person acting under color of state law." *Anderson v. Warner, 451 F.3d 1063, 1067 (9th Cir. 2006)*. Legislative acts that do not impinge on fundamental rights or employ suspect classifications are presumed valid, and this presumption is overcome only by a "clear showing of arbitrariness and irrationality." *Kawaoka v. City of Arroyo Grande, 17 F.3d 1227 (9th Cir. 1994)*. Because there is no fundamental right to give or receive rebates in real estate transactions, government prohibition of rebates is presumptively valid under the *Due Process Clause* if it is rationally related to a legitimate government interest. And because Plaintiff does not allege discrimination based on a suspect classification, the anti-rebate policy will survive an equal protection challenge "if there is a rational relationship between the disparity of treatment and some legitimate government purpose." *United States v. Ayala-Bello, 995 F.3d 710 (9th Cir. 2021)* (quoting *Heller v. Doe, 509 U.S. 312, 320, 113 S. Ct. 2637, 125 L. Ed. 2d 257 (1993)*). Thus, the fate of all three constitutional claims hinge on whether there is a rational basis **[*21]** for Oregon's anti-rebate policy.

---

[5] Defendants do not challenge whether Plaintiff has third-party standing to assert claims on behalf of its customers. The Court does not address this issue in detail but notes that federal courts commonly recognize an exception to the rule against third-party standing when commercial businesses assert the rights of their customers. *See* *Craig v. Boren, 429 U.S. 190, 97 S. Ct. 451, 50 L. Ed. 2d 397 (1976)* ("[V]endors and those in like positions have been uniformly permitted to resist the efforts at restricting their operations by acting as advocates of the rights of third parties who seek access to their market or function.").

HN13[] Under rational basis review, a law or policy must be upheld if there is "any reasonably conceivable state of facts that could provide a rational basis" for treating the plaintiff differently. *Jones v. Solis, 121 F. App'x 228, 230 (9th Cir. 1995)* (*quoting* *FCC v. Beach Commc'ns, Inc., 508 U.S. 307, 313, 113 S. Ct. 2096, 124 L. Ed. 2d 211 (1993)*). Even if a state statute or policy produces unequal or unfair results, it does not necessarily fail rational basis review. *United States v. Padilla-Diaz, 862 F.3d 856, 862 (9th Cir. 2017)*. A state law may be constitutional even if it is "unwise, improvident, or out of harmony with a particular school of thought," as long as it bears some a relationship to some legitimate end. *Nat'l Ass'n for Advancement of Psychoanalysis v. Cal. Bd. of Psych., 228 F.3d 1043, 1051 (9th Cir. 2000)* (quoting *Williamson v. Lee Optical of Okla., Inc., 348 U.S. 483, 488, 75 S. Ct. 461, 99 L. Ed. 563 (1955)*).

Plaintiff presents many compelling arguments that Oregon's anti-rebate law hurts consumers and artificially increases home prices. But Plaintiff alleges no facts to rebut the presumption that *O.R.S. 696.290* has a rational relationship to a legitimate government purpose. **HN14**[] Regulation of certain trades or professions is a legitimate objective of state governments. *See* *id. at 1054* ("It is properly within the state's police power to regulate and license professions."). Oregon's statutory scheme authorizes Defendants to regulate the business of real estate sales and the professional activity of realtors. Defendants state a legitimate purpose in preventing individuals **[*22]** without real estate licenses from receiving compensation for work that can only be performed by licensed realtors under the state scheme.

Plaintiff makes the conclusory allegation that Oregon's anti-rebate "policies unconstitutionally infringe on the rights of consumers and their brokers to decide how to transact." Compl. ¶ 64. But regulating the interaction between sales professionals and consumers falls squarely within the governing power of the State and provides a rational basis for Defendants' enforcement action here. In addition, Defendants' application of *O.R.S. 696.290* to Plaintiff may be constitutional even if it prohibits more activity than is necessary to achieve its goal. *See* *Mendoza v. Garrett, 358 F. Supp. 3d 1145, 1175 (D. Or. 2018)* (**HN15**[] "[T]hat the statute may be overinclusive by its enforcement . . . does not, under rational basis review, render it unconstitutional."). Because Plaintiff does not allege facts showing that Oregon's statute prohibiting compensation to unlicensed individuals lacks a rational basis, it fails to state a claim for violation of the *Fourteenth Amendment Due Process and Equal Protection Clauses*.

III. Claims under the *Oregon Constitution, Article 1, Section 20*

Plaintiff brings claims under the *Privileges and Immunities Clause of Article 1, section 20 of the Oregon Constitution*.[6] Plaintiff alleges that Oregon's anti-rebate policies "violate Plaintiff's privileges by prohibiting Plaintiff from **[*23]** participating in the real estate market merely because it provides rebates to non-real estate licensees[.]" Compl. ¶ 114. Plaintiff also brings a claim on behalf of its customers, alleging that Oregon's anti-rebate policies "limit the privilege of receiving a rebate to real estate licensees and excludes non-licensees from receiving rebates[.]" Compl. ¶ 120.

As a preliminary matter, the Court notes that **HN16**[] there is no private right of action for damages under the Oregon Constitution. *See* *Hunter v. City of Eugene, 309 Ore. 298, 303, 787 P.2d 881, 883 (1990)* ("Oregon's Bill of Rights provides no textual or historic basis for implying a right to damages for constitutional violations."). Thus, neither of Plaintiff's claims under the Oregon Constitution provide a mechanism to recover damages from Defendants in their individual capacities.

Next, Defendants argue that the *Eleventh Amendment* bars suits brought in federal court under state law against state officials. **HN17**[] Federal courts have long recognized an exception to *Eleventh Amendment* sovereign immunity when state officials are sued in their official capacities for prospective relief on federal law claims. *Ex Parte Young, 209 U.S. 123, 28 S. Ct. 441, 52 L. Ed. 714 (1908)*. But the *Ex Parte Young* exception does not apply

[6] "No law shall be passed granting to any citizen or class of citizens privileges, or immunities, which, upon the same terms, shall not equally belong to all citizens." *OR. CONST., art I, § 20*.

when a suit against state officials is brought under state law. *Pennhurst State Sch. & Hosp. v. Halderman, 465 U.S. 89, 106, 104 S. Ct. 900, 79 L. Ed. 2d 67 (1984)*. Thus, the *Eleventh Amendment* bars plaintiffs from bringing state law claims **[*24]** for both prospective and retrospective relief against state officials in their official capacities. *Pena v. Gardner, 976 F.2d 469, 473 (9th Cir. 1992)* (citing *Pennhurst, 465 U.S. at 106*). Consequently, Plaintiff's claims under the Oregon Constitution against Governor Brown, Commissioner Strode, and members of the Board in their official capacities are barred by the *Eleventh Amendment*.

HN18[] Plaintiff correctly asserts that *Pennhurst* does not preclude it from bringing state law claims against Defendants in their individual capacities. *See* *id. at 472* ("[The *Eleventh Amendment*] will not, however, bar claims against state officials in their *personal* capacities.") (emphasis in original). Though Plaintiff may bring damages claims against individual defendants, Oregon law provides no mechanism to recover damages under the Oregon Constitution. *See* *Hunter, 309 Ore. at 303, 787 P.2d at 883*. Thus, Plaintiff's state constitutional claims must be dismissed.

In its extensive Complaint, Plaintiff makes compelling arguments that excessive fixed broker commissions harm consumers and the housing market itself. Plaintiff notes that the U.S. Department of Justice has begun to take action against the anti-competitive activity of traditional real estate brokers and that many states allow commission rebates to home buyers. Plaintiff points out that Oregon is one of the few remaining **[*25]** states that prohibit such rebates. But neither the merits of traditional real estate brokers' compensation scheme nor the prudence of Oregon's anti-rebate policies are before Court. The Court's role here is to decide whether Plaintiff states a plausible claim that the anti-rebate policies violates *Section 1 of the Sherman Act*, the *Fourteenth Amendment Due Process and Equal Protection Clauses, or the Oregon Constitution*. In that regard, Plaintiff does not meet its burden.

CONCLUSION

Construing all alleged facts in Plaintiff's Complaint as true, the Court finds that Plaintiff fails to adequately state claims on which relief may be granted. The Court grants Defendants' Motion to Dismiss [22].

IT IS SO ORDERED.

DATED: December 9, 2021.

Opinion

[*1077] ORDER ON DEFENDANTS' MOTION TO DISMISS

(Doc. No. 15)

Plaintiff Netafim Irrigation, Inc., alleges that Defendants Jain Irrigation, Inc., Jain Distribution Holdings, Inc., Irrigation Design & Construction, LLC, and Agri-Valley Irrigation, LLC, engaged in anticompetitive market behavior when the Jain entities acquired majority shares of the latter two companies. Netafim also alleges that all four

Defendants are liable for false advertising that caused it damage. Defendants now move to dismiss each of Netafim's claims. For the reasons that follow, the Court will grant that motion in part and deny it in part.

BACKGROUND [2]**

Netafim's case is centered on the micro-irrigation industry in Central California. Doc. No. 1 ("Compl."), ¶ 1.[1] Micro-irrigation is a comparatively cost-effective and sustainable form of irrigation that delivers water and nutrients directly to the root systems of crops. Id., ¶ 15. The micro-irrigation industry consists of three levels: (1) manufacturers that produce equipment for micro-irrigation systems; (2) local design firms that work with growers to customize, install, and maintain micro-irrigation systems; and (3) growers that purchase and use micro-irrigation **[*1078]** systems on their farms. Id., ¶ 16. Manufacturers depend on local design firms to sell products to growers, as the local design firms are able to design micro-irrigation systems that meets the needs of particular growers' fields and then install and maintain those systems. Id., ¶ 17. As part of these relationships, manufacturers invest time and money to ensure the local design firms are knowledgeable about the manufacturers' product lines and prices—this often involves manufacturers' provision to local design firms of non-public pricing and individualized quotes for projects. Id., ¶ 19. These relationships notwithstanding, **[**3]** local design firms have historically worked with multiple manufacturers in order to offer growers the most suitable products at the best prices. Id., ¶ 18. Likewise, local design firms also compete to win growers' business based on the price, quality, and array of equipment they can offer. Id.

Netafim manufactures micro-irrigation equipment and is based in Fresno, California. Id., ¶¶ 1, 3. Jain Irrigation is also based in Fresno and serves as Netafim's largest competitor in micro-irrigation equipment manufacturing. Id., ¶¶ 1, 4. Irrigation Design and Agri-Valley are micro-irrigation design firms based in Patterson, California, and Fresno, respectively. Id., ¶¶ 6-7.

In 2016, Netafim had approximately $65 million in sales in Central California, which included around $9 million in sales through Irrigation Design and Agri-Valley. Id., ¶¶ 20, 23-28. Jain, on the other hand, had approximately $25 million in Central Valley sales in 2016. Id., ¶ 21. Meanwhile, Irrigation Design and Agri-Valley had combined revenues of $113 million in 2016. Id., ¶ 22. At that time, Irrigation Design and Agri-Valley were the two largest micro-irrigation design firms in Central California. Id.

In 2017, Jain **[**4]** Distribution—a Fresno-based sister company of Jain Irrigation—acquired an 80% interest in both Irrigation Design and Agri-Valley. Id., ¶¶ 5-7, 29.[2] After the acquisition, Netafim terminated its relationships with Irrigation Design and Agri-Valley. Id., ¶ 31. Given the control that Irrigation Design and Agri-Valley had over access to growers in local markets in Central California, once these relationships were terminated, Netafim was unable to match its pre-acquisition sales figures by using other design firms. Id., ¶¶ 35-36. In turn, Netafim's equipment sales declined in 2017 and were still depressed through 2020. Id., ¶¶ 36-38.

---

[1] While others will be cited and discussed in greater detail below, the following factual allegations drawn from the complaint provide relevant context for resolving Defendants' motion. The Court construes these factual allegations as true. See *Mollett v. Netflix, Inc., 795 F.3d 1062, 1065 (9th Cir. 2015)*.

[2] While the complaint explains that Jain Distribution is the holding company for Irrigation Design and Agri-Valley—and that both Jain Distribution and Jain Irrigation are wholly owned subsidiaries of Jain Irrigation Limited, "an Indian multi-national conglomerate" that has not itself been sued in this action—Netafim's allegations describing the acquisition singly identify Jain Irrigation as the active Jain participant. Compl., ¶¶ 1, 4-5, 29-38. Nonetheless, the parties' briefing on Defendants' motion does not recognize a distinction between the separate Jain entities. Thus, for purposes of this order, the Court will adopt that practice as well.

Netafim filed its complaint on March 29, 2021.[3] Therein, it alleges that Jain's acquisition of Irrigation Design and Agri-Valley reduced competition in the sale of micro-irrigation **[*1079]** equipment in local markets across Central California. Id., ¶ 1. On this theory, Netafim raises causes of action under the *Sherman Antitrust Act, 15 U.S.C. § 1*, and the Clayton Antitrust Act, *15 U.S.C. § 18*. Compl., ¶¶ 79-85, 86-92. Netafim also brings a cause of action under the *Lanham Act*, *15 U.S.C. § 1125*, which is based on allegations that Defendants engaged in an adverse campaign of false advertisements following the acquisition. Compl., ¶¶ 93-102. Netafim **[**5]** seeks equitable relief and millions of dollars in damages for its claims. Id., ¶ 1, Prayer for Relief.

Defendants now move to dismiss the complaint in full under *Federal Rule of Civil Procedure 12(b)(6)*. Doc. No. 15. Netafim has filed its opposition, to which Defendants have replied. Doc. Nos. 17 & 18.

LEGAL STANDARD

Under *Federal Rule of Civil Procedure 12(b)(6)*, a cause of action may be dismissed where a plaintiff fails "to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. Dismissal under *Rule 12(b)(6)* may be based on the lack of a cognizable legal theory or on the absence of sufficient facts alleged under a cognizable legal theory. *Conservation Force v. Salazar, 646 F.3d 1240, 1242 (9th Cir. 2011)*; Johnson v. Riverside Healthcare Sys., *534 F.3d 1116, 1121-22 (9th Cir. 2008)*. To survive a *Rule 12(b)(6)* motion for failure to allege sufficient facts, a complaint must include a "short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. Compliance with this rule ensures that the defendant has "fair notice of what the . . . claim is and the grounds upon which it rests." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*) (internal marks omitted). Under this standard, a complaint must contain sufficient factual matter to "state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*) (internal marks omitted). A claim has facial plausibility when the plaintiff pleads factual content **[**6]** that allows the court to draw the reasonable inference that the defendant is liable for the alleged misconduct. *Id. at 663*.

In reviewing a complaint under *Rule 12(b)(6)*, all allegations of material fact are taken as true and construed in the light most favorable to the nonmoving party. *Mollett, 795 F.3d at 1065*; Marceau v. Blackfeet Hous. Auth., *540 F.3d 916, 919 (9th Cir. 2008)*. But the court is "not 'required to accept as true allegations that contradict exhibits attached to the Complaint or matters properly subject to judicial notice, or allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences.'" *Seven Arts Filmed Entm't, Ltd. v. Content Media Corp. PLC, 733 F.3d 1251, 1254 (9th Cir. 2013)* (quoted source omitted). Complaints that offer no more than "labels and conclusions" or "a formulaic recitation of the elements of a cause of action will not do." *Iqbal, 556 U.S. at 678*; *Johnson v. Fed. Home Loan Mortg. Corp., 793 F.3d 1005, 1008 (9th Cir. 2015)*. Rather, "for a complaint to survive a motion to dismiss, the non-conclusory 'factual content,' and reasonable inferences from that content, must be plausibly suggestive of a claim entitling the plaintiff to relief." *Moss v. U.S. Secret Serv., 572 F.3d 962, 969 (9th Cir. 2009)* (quoting *Iqbal, 556 U.S. at 678*). If a motion to dismiss is granted, the court "should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be **[*1080]** cured by the allegation of other facts." *Henry A. v Willden, 678 F.3d 991, 1005 (9th Cir. 2012)* (quoted source and internal marks omitted). **[**7]**

DISCUSSION

---

[3] As acknowledged in the complaint and Defendants' unopposed request for judicial notice, the parties here have been involved in other adversarial litigation in federal and state court. Compl., ¶¶ 56-58; Doc. No. 15-2. See *Jain Irrigation, Inc. v. Netafim Irrigation, Inc., 386 F. Supp. 3d 1308 (E.D. Cal. 2019)*; Jain Irrigation, Inc. v. Netafim Irrigation, Inc., No. 37-2019-00035422-CU-AT-CTL (Cal. Super. Ct. filed July 8, 2019). Notwithstanding this notice, the Court's resolution of this motion is not affected by these separate proceedings.

In their motion, Defendants argue that all three of Netafim's claims should be dismissed. The Court will start with Defendants' challenges to the antitrust claims, and then turn to the parties' disputes regarding the false advertising claim.

A. Antitrust claims

Section 1 of the Sherman Antitrust Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1*. *Section 7* of the Clayton Antitrust Act prohibits mergers and acquisitions "in any line of commerce" in which the effect "may be substantially to lessen competition, or to tend to create a monopoly." *15 U.S.C. § 18*.

Mirroring these provisions, Netafim uses its first two claims to allege that Jain's acquisition of Irrigation Design and Agri-Valley was an unreasonable restraint of trade (in violation of the *Sherman Act*) that substantially lessened competition in the markets for micro-irrigation equipment and micro-irrigation design services in local markets throughout Central California (in violation of the *Clayton Act*). Compl., ¶¶ 81, 88. Defendants now challenge both claims, considered together, on four threshold grounds.[4]

Defendants' first two challenges go to Netafim's pleading of an antitrust injury, which is itself a necessary **[**8]** predicate for possessing the unique antitrust standing that is required for claims under the Sherman and Clayton Acts. *Somers v. Apple, Inc., 729 F.3d 953, 963 (9th Cir. 2013)*; *Glen Holly Ent., Inc. v. Tektronix Inc., 352 F.3d 367, 371 (9th Cir. 2003)*. Broadly, antitrust injury is "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Somers, 729 F.3d at 963* (quoted source omitted). With their dismissal motion, Defendants argue that Netafim has not sufficiently pleaded that their conduct caused any injury, much less one that antitrust laws are meant to deter.

Defendants' latter two challenges go to the sufficiency of Netafim's allegations defining a relevant market and Defendants' power within that defined market. Allegations of this kind are also generally required for both Sherman and Clayton Act claims. *Brown Shoe Co. v. United States, 370 U.S. 294, 324, 343, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*; *Newcal Indus., Inc. v. Ikon Office Sol., 513 F.3d 1038, 1044 (9th Cir. 2008)*.

[*1081] The Court will consider the market-related challenges first, as they necessarily color the discussion of the antitrust injury disputes. See *Fed. Trade Comm'n v. Qualcomm Inc., 969 F.3d 974, 992 (9th Cir. 2020)* ("[I]n assessing alleged antitrust injuries, courts must focus on anticompetitive effects 'in the market where competition is [allegedly] being restrained.' 'Parties whose injuries, though flowing from that which makes the defendant's conduct unlawful, are experienced in another market do not suffer antitrust injury.'" **[**9]** (quoted source omitted)).

1. Relevant market

"A threshold step in any antitrust case is to accurately define the relevant market, which refers to 'the area of effective competition.'" *Qualcomm Inc., 969 F.3d at 992* (quoted source omitted); see also *Rebel Oil Co. v. Atl.*

---

[4] Defendants also assert that Netafim's Clayton Act claim against Irrigation Design and Agri-Valley must fail as the language of *Section 7* only applies to acquirers of assets, not sellers. Netafim does not respond to this assertion. Defendants are correct as to the language of the *Clayton Act* provision. *15 U.S.C. § 18* (stating in multiple contexts that "no person shall acquire"). But the Ninth Circuit has also recognized that sellers may be joined in a *Section 7* claim if the court requires jurisdiction over both the selling and acquiring entities to fashion equitable relief. *United States v. Coca-Cola Bottling Co. of L.A., 575 F.2d 222, 230-31 (9th Cir. 1978)* (discussing *Section 15 of the Clayton Act*, which is codified at *15 U.S.C. § 25*). For purposes of its *Section 7* claim, Netafim seeks both equitable relief and damages from all Defendants. Compl., Prayer for Relief. Recognizing the statutory language and the controlling precedent, the Court will dismiss that claim as to Irrigation Design and Agri-Valley with respect to damages. *Gerlinger v. Amazon.Com, Inc., 311 F. Supp. 2d 838, 852 (N.D. Cal. 2004)*; *Fricke-Parks Press, Inc. v. Fang, 149 F. Supp. 2d 1175, 1186 (N.D. Cal. 2001)*.

Richfield Co., 51 F.3d 1421, 1434 (9th Cir. 1995) ("[A] 'market' is the group of sellers or producers who have the 'actual or potential ability to deprive each other of significant levels of business.'" (quoted source omitted)). Setting the relevant market boundaries is a critical first step as it enables the court to assess issues regarding market share, the defendant's ability to lessen or destroy competition, and the alleged antitrust injury. *Qualcomm Inc., 969 F.3d at 992*; *Rebel Oil Co., 51 F.3d at 1434*.

To define a relevant market, the plaintiff must identify both a product market and a geographic market. *Hicks v. PGA Tour, Inc., 897 F.3d 1109, 1120 (9th Cir. 2018)*. The product market "includes the pool of goods or services that enjoy reasonable interchangeability of use and cross-elasticity of demand." *Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1063 (9th Cir. 2001)* (quoted source omitted). In other words, based on the product market, the relevant market will "include 'the group or groups of sellers or producers who have actual or potential ability to deprive each other of significant levels of business.'" *Newcal Indus., Inc., 513 F.3d at 1045* (quoted source omitted). In so far as it is defined geographically, the relevant market **[**10]** is the "area of effective competition . . . where buyers can turn for alternate sources of supply." *Morgan, Strand, Wheeler & Biggs v. Radiology, Ltd., 924 F.2d 1484, 1490 (9th Cir. 1991)* (quoted source and internal marks omitted).

Before turning to Netafim's allegations, the Court notes that relevant market determinations are typically fact-intensive, with actual "inquiry into the 'commercial realities' faced by consumers." *High Tech. Careers v. San Jose Mercury News, 996 F.2d 987, 990 (9th Cir. 1993)* (quoted source omitted). This often enables market-defining allegations to survive scrutiny under *Rule 12(b)(6)*. *Newcal Indus., Inc., 513 F.3d at 1045*. Nonetheless, a relevant market definition still must be plausible and without a fatal legal defect that is apparent from the face of the complaint. Id.

In the complaint, Netafim defines separate product markets for micro-irrigation equipment and micro-irrigation design services, and geographic markets as the local areas where micro-irrigation design services are demanded by growers and provided by design firms. Compl., ¶¶ 59-65.

In their motion, Defendants primarily take issue with how the product markets interact or fail to interact with the geographic markets. First, Defendants argue that Netafim has not actually alleged a geographic market that corresponds to the equipment product market. Second, regarding the design services product market, Defendants **[**11]** assert that Netafim's allegations are conclusory and improperly based on cherrypicked counties and zip codes that show a significant anticompetitive effect.

[*1082] The Court rejects the first argument. As noted above, to properly define a relevant market, a product market must be paired with a geographic market. *Hicks, 897 F.3d at 1120*. Yet, Netafim's broader allegations establish that its geographic markets definition of local areas where micro-irrigation design services are demanded and provided necessarily corresponds to the product markets for both those services and micro-irrigation equipment. Namely, according to the complaint, Jain's acquisition of the design firms disrupted competition in the micro-irrigation industry by reducing other manufacturers' access to growers. This theory of harm is itself predicated on Netafim's description of a three-tier micro-irrigation industry where design firms function as the necessary intermediary between manufacturers of micro-irrigation equipment and growers who purchase that equipment as part of their micro-irrigation systems. Compl., ¶¶ 16-19. In other words, Netafim's allegations explain that producers (manufacturers) and consumers (growers) of micro-irrigation equipment **[**12]** are mutually dependent on the services of micro-irrigation design firms. Through this lens, it is clear that the market for those design services overlap with the market for micro-irrigation equipment, as the latter is being sold through the former. This conclusion aligns with Netafim's product market allegations. Id., ¶¶ 59-60. It also allows for a reasonable inference (if one is even needed) that the relevant geographic markets for selling that equipment are the same geographic markets for selling those design services.

Defendants' second argument is aimed at the sufficiency of the relevant geographic market allegations. In general terms, the relevant geographic market is the "area of effective competition" where buyers could practicably turn for alternative sources of supply if a seller attempted to exercise market power by increasing price or decreasing quality. *Tanaka, 252 F.3d at 1063* (quoted source omitted).[5] A geographic market need not be alleged or proved with "scientific precision," nor must it be defined "by metes and bounds as a surveyor would lay off a plot of ground." *United States v. Conn. Nat'l Bank, 418 U.S. 656, 669, 94 S. Ct. 2788, 41 L. Ed. 2d 1016 (1974)*; *United States v. Pabst Brewing Co., 384 U.S. 546, 549, 86 S. Ct. 1665, 16 L. Ed. 2d 765 (1966)*. Rather, the complaint need only include sufficient information to present a relevant geographic market that is facially sustainable. **[**13]** *Newcal Indus., Inc., 513 F.3d at 1045*; see also *Jacobs v. Tempur-Pedic Int'l, Inc., 626 F.3d 1327, 1336 (11th Cir. 2010)* ("[A]ntitrust plaintiffs still must present enough information in their complaint to plausibly suggest the contours of the relevant geographic and product markets.").

As noted above, Netafim defines the relevant geographic markets as the "local geographic markets where growers demand design services and where design firms provide design services." Compl., ¶ 61. Netafim alleges that these local geographic markets arise from growers' demand for local service. Id., ¶ 62. According to Netafim, "[e]very micro-irrigation system **[*1083]** must be tailored to the needs of a particular grower in a particular location for a particular field and crop," which in turn leads growers to seek design services from design firms with a "local office" and "expertise with local field and crop factors that influence the design of micro-irrigation systems." Id. In response to this demand, Netafim continues, design firms operate "locally" by maintaining "local stores to serve growers in these local markets." Id., ¶ 63. "Each store serves growers located near the store. Design firms have local employees and rely on local labor forces and local equipment to design and install systems in each area." Id. Netafim **[**14]** also explain that Defendants' own operations "illustrate that the relevant geographic markets are local." Id., ¶ 64. Netafim supports this allegation by listing fourteen storefronts that Irrigation Design and Agri-Valley maintain in certain counties and zip codes across Central California. Id., ¶¶ 24-25. Netafim alleges that this quantity of separate physical locations indicates that "design services are provided in local markets." Id., ¶ 64. Netafim adds that Irrigation Design and Agri-Valley's market dominance in those counties and zip codes—as exhibited by Netafim's sales figures through the design firms at these locations and its dramatic drop in sales following the acquisition—also "confirms that the [relevant] markets are local." Id., ¶¶ 64-65.

Much of Defendants' argument focuses on Netafim's enumeration of "cherrypicked" and "gerrymandered" counties and zip codes in the complaint.[6] Netafim responds that its pleading does not define the relevant geographic markets by county lines and zip code borders, and that these geographic markers were added to the complaint only to more clearly illustrate the control that Defendants had over access to growers in those local areas. This reading, **[**15]** however, conflicts with the following allegation: "The local geographic markets where Netafim alleges that [Irrigation Design and Agri-Valley] had a dominant share are listed in Tables 1 and 2, above, and include Merced, Solano, and Stanislaus Counties, and the zip codes of 93292, 93620, 93622, 93624, 93722, 95012, 95206, 95236, 95341, 95360, 95363, and 95620." Compl., ¶ 61. And to the extent Netafim has alleged that the relevant geographic markets are at least in part defined by the boundaries of particular counties and zip codes, it has not plausibly explained in the complaint why these lines are appropriately drawn. Rather, this case aligns with other instances where courts have rejected geographic market definitions based on political and administrative boundaries. Cf. *Concord Assocs., L.P. v. Ent. Props. Tr., 817 F.3d 46, 53-54 (2d Cir. 2016)* (rejecting a gambling-related market based primarily on four New York counties while excluding nearby gambling markets in Connecticut, Pennsylvania, and New Jersey); *Nicolosi Distrib., Inc. v. FinishMaster, Inc., No. 18-cv-03587-BLF, 2019 U.S. Dist. LEXIS 62079, 2019 WL 1560460, at *5 (N.D. Cal. Apr. 10, 2019)* (rejecting a geographic market based on county

---

[5] This describes a monopoly market situation, where the seller holds market power. If market power is instead possessed by a buyer or group of buyers, the market situation is alternatively described as a monopsony. *United States v. Syufy Enters., 903 F.2d 659, 663 & n.4 (9th Cir. 1990)*. These similar yet unique forms of market power are generally treated as equivalent for purposes of ***antitrust law***. *Weyerhaeuser Co. v. Ross-Simmons Hardwood Lumber Co., 549 U.S. 312, 321-22, 127 S. Ct. 1069, 166 L. Ed. 2d 911 (2007)*. In the context of a monopsony, however, the relevant geographic market definition captures the area in which sellers are able to turn to other buyers as reasonably good substitutes. *Todd v. Exxon Corp., 275 F.3d 191, 201-02 (2d Cir. 2001)* (explaining generally how market definitions are affected by different market situations).

[6] Defendants ask the Court to take judicial notice of a map of Central California that identifies the twelve zip codes that are referenced in Netafim's allegations. Doc. No. 15-2. Although maps are frequently a subject of judicial notice, the Court resolves this portion of Defendants' motion without need for notice of this particular map.

lines where no plausible explanation for excluding other neighboring counties). Thus, in so far as Netafim has defined the relevant geographic markets based on certain counties and zip codes, its current **[**16]** allegations cannot stand.

Yet, the Court also recognizes that much of Netafim's geographic market pleading is based on something other than the enumerated counties and zip codes. This is the tack Netafim takes in opposition to Defendants' **[*1084]** motion when it urges the Court to instead focus on its allegations explaining that "the relevant geographic markets are the local areas around [the design firms'] retail stores." While this contention aligns with other allegations in the complaint, neither those allegations nor Netafim's opposition explain how to implement this separate definition without running into obvious problems. For instance, consider a hypothetical where two design firm storefronts are located within a mile of each other, one maintained by Irrigation Design and the other maintained by a non-defendant design firm. Under Netafim's proposal, each storefront gives rise to a unique geographic market consisting of the surrounding local area. Yet, nothing in the complaint (nor Netafim's argument here) suggests that growers in this area could not alternate between the two stores if one of the design firms increased its prices. Defendants present a similar hypothetical in their motion, **[**17]** with argument that design firms located a block apart would exist in different markets simply because they fell within different zip codes. Netafim responded with explanation that "two stores a block away from each other presumably would be in the same local market." This may have defeated Defendants' zip code theory, but with no other limiting principles in play, it also conflicts with Netafim's suggestion that each storefront gives rise to a geographic market.

At bottom, the Court can reasonably infer from the complaint that the defined "local geographic markets" are circumscribed areas in Central California that surround physical storefronts maintained by micro-irrigation design firms. This, according to Netafim's pleading, is where design services are sought and provided, and growers would not leave these areas for those design services (and ultimately micro-irrigation equipment) if subjected to a small price increase. Without reasonably concrete geographic terms, however, the complaint otherwise presents an open-ended approach to decipher the amorphous phrase "local geographic markets." To that end, the Court finds as telling how the allegations here stand in contrast to other **[**18]** cases that have involved properly alleged "local" geographic markets. For instance, in *Sentry Data Systems, Inc. v. CVS Health, 379 F. Supp. 3d 1320, 1329 (S.D. Fla. 2019)*, the plaintiff alleged local geographic markets based on twenty-two core-based statistical areas in which the defendant had a 30% or greater share of contract pharmacy locations. Similarly, *Sidibe v. Sutter Health, 667 F. App'x 641, 642-43 (9th Cir. 2016)*, involved allegations of local geographic markets for the sale of inpatient hospital services based on hospital service areas as defined in a publication produced by healthcare researchers. Likewise, in *Universal Hospital Services, Inc. v. Hill-Rom Holdings, Inc., No. SA-15-CA-32-FB, 2015 U.S. Dist. LEXIS 154154, 2015 WL 6994438, at *2 (W.D. Tex. Oct. 15, 2015)*, the plaintiff defined regional geographic sub-markets for time-sensitive medical equipment rentals as a circle with a ninety-mile radius centered on regional distribution centers owned and operated by the parties. And in *It's My Party, Inc. v. Live Nation, Inc., 811 F.3d 676, 681-82 (4th Cir. 2016)*, the court determined that the instant concert promotion dispute involved the local market of the Washington-Baltimore area. The market definition in each of these cases came with limiting principles of a kind that are not present here.[7]

[*1085] While the bar at this stage does not demand scientific precision or metes and bounds, some certainty is required to ensure the phrase "local geographic markets" provides enough notice to be able to proceed. See *Orchard Supply Hardware LLC v. Home Depot USA, Inc., 939 F. Supp. 2d 1002, 1010 (N.D. Cal. 2013)* ("Plaintiff's **[**19]** definition of the relevant geographic market—'various regional markets in California and Oregon where Orchard and other retail sellers of power tools compete against one another'—is vague and conclusory."). Because the complaint fails in this regard, the Court will dismiss the claims on this basis and provide Netafim with an opportunity to amend its pleading.

---

[7] The same is true regarding Netafim's own case law authority. See *Saint Alphonsus Med. Ctr.-Nampa Inc. v. St. Luke's Health Sys., Ltd., 778 F.3d 775, 783-85 (9th Cir. 2015)* (relevant geographic market of the city of Nampa); *Movie 1 & 2 v. United Artists Commc'ns, Inc., 909 F.2d 1245, 1248 (9th Cir. 1990)* (relevant geographic market of the greater Santa Cruz area); United States v. Trib. Publ'g Co., No. CV 16-01822-AB (PJWx), 2016 WL 2989488, at *3-4 (C.D. Cal. Mar. 18, 2016) (relevant geographic market of Orange County and Riverside County).

2. Market power

Along with a relevant market definition, a plaintiff must plead that the defendant has power within that market. Newcal Indus., Inc., 513 F.3d at 1052; Rick-Mik Enters., Inc. v. Equilon Enters. LLC, 532 F.3d 963, 972 (9th Cir. 2008). Market power is the ability of a seller "to raise price and restrict output." Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 464, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992) (quoted sources and internal marks omitted); Rebel Oil Co., 51 F.3d at 1434; see also Campfield v. State Farm Mut. Auto. Ins. Co., 532 F.3d 1111, 1118 (10th Cir. 2008) ("In a monopsony, the buyers have market power to decrease market demand for a product and thereby lower prices."). Practically, "[m]arket power . . . is simply a way to assess whether the defendant's conduct has anticompetitive effects." Staley v. Gilead Scis., Inc., 446 F. Supp. 3d 578, 616 (N.D. Cal. 2020). Similar to the relevant market definition, ascertaining market power is fact-intensive and case-specific; thus, market power allegations often survive scrutiny under Rule 12(b)(6). Eastman Kodak Co., 504 U.S. at 466-67; Newcal Indus., Inc., 513 F.3d at 1052.

As to the nuts and bolts, market power can be proved through direct or circumstantial evidence, and market power allegations should generally track at least one **[**20]** of these routes. Rebel Oil Co., 51 F.3d at 1434. The first route requires direct proof of an injury to competition that a competitor with market power could inflict, such as evidence showing restricted output and supra-competitive prices. Id. In contrast, plaintiffs more commonly present a circumstantial case, which demands a relevant market definition and evidence showing that (1) the defendant owns a dominant share of that market and (2) there are significant barriers to entry and existing competitors lack the capacity to increase their output in the short run. Id.

A threshold problem emerges quickly. Namely, before even considering Netafim's market power allegations, the Court recognizes its inability to fully assess them in light of the insufficient allegations regarding the relevant geographic market. Id. ("Without a definition of the relevant market, it is impossible to determine market share."). Even so, there still exists value in sizing up the market power allegations at this stage so as to offer guidance moving forward.[8]

In the complaint, Netafim first describes the micro-irrigation equipment market in Central California as being worth approximately $225 million at the time of the acquisition. Compl., ¶ **[**21]** 66. Of this pie, Netafim estimates its own share to have been 37% and Jain's to have been 11%, with the **[*1086]** remainder left for small manufacturers who were also harmed by the acquisition. Id. Netafim acknowledges its inability to further pinpoint specific market shares within the "local geographic markets," but alleges that a similar breakdown is likely to apply at a local level. Id. Netafim then describes Irrigation Design and Agri-Valley as the two largest design firms in Central California. Id., ¶ 67. While noting the design firms' specific market shares vary across local markets depending on their physical locations and grower relationships, Netafim alleges that the pair "provide nearly all micro-irrigation design services in the regions surrounding their locations." Id. Netafim again points to the previously discussed enumeration of Irrigation Design and Agri-Valley storefronts, which include the percentages of Netafim's sales through the design firms at those locations in 2016 and 2017. Id., ¶¶ 24-25, 67.

Through these allegations, Netafim does not exactly confirm whether it intends to prove market power through direct or circumstantial evidence. Although its opposition brief focuses **[**22]** on the circumstantial angle, at this stage, Netafim might in fact still intend to try to do both. And some groundwork has been laid for each kind of effort. As for direct evidence, Netafim does not directly allege that the acquisition choked output, but it repeatedly references how the acquisition disrupted the channels for communication between manufacturers and growers. Id., ¶¶ 74-75. And while supra-competitive prices are not identified, the complaint expressly states (albeit in conclusory fashion) that the acquisition led to increased prices for micro-irrigation equipment and design services. Id., ¶¶ 77, 84, 91.

[8] To that end, if it chooses to amend its relevant market allegations, Netafim may also amend its market power allegations as it deems necessary.

As for circumstantial evidence, the Court first notes that some parts of the equation, such as barriers to entry, are missing from or only weakly implied in the general market power allegations. In contrast, Netafim's allegations regarding its sales through specific storefronts that were maintained by Irrigation Design and Agri-Valley lend some credence to the idea that the design firms owned strong market shares in certain locations. Id., ¶¶ 24-25, 67. On the other hand, the Court places some stock in Defendants' point that, based on figures in the complaint, Irrigation **[**23]** Design and Agri-Valley only accounted for about 14% of Netafim's overall sales in Central California in 2016, which raises some doubt regarding the design firms' market share. Id., ¶¶ 20, 27-28. The fact that Netafim has not alleged its own market share (or Jain's, for that matter) in the same local areas where the design firms maintained the aforementioned storefronts also adds uncertainty on this front.[9] Also noteworthy is Netafim's allegation of Jain's 11% market share in Central California. Id., ¶ 66. What makes a given market share dominant necessarily varies from case to case, but some figures will be too low regardless of the particular circumstances presented. Eleven precent almost assuredly fails to meet the bar. *Rebel Oil Co., 51 F.3d at 1438*. And yet, as Netafim emphasizes in its opposition, there remain reasonable counterarguments to Defendants' highlighting of these seemingly too-low figures. For one, these numbers relate to Defendants' pre-acquisition position, and Netafim's entire case is based on the changes in the parties' positions following the acquisition. Moreover, as to the 11% figure, Netafim's case does not appear to be premised on an isolated allegation of **[*1087]** Jain's share in the market for **[**24]** micro-irrigation equipment. Rather, Netafim seems to be alleging that Jain's position in that market *plus* its acquisition of Irrigation Design and Agri-Valley and their respective shares in the market for micro-irrigation design services constitutes sufficient power in an interconnected market based on the sale of micro-irrigation equipment to growers through micro-irrigation design firms. This matches the discussion above regarding the unified theory of harm on which Netafim rests its antitrust claims. Finally, in so far as Defendants contend Netafim's pleading is insufficient because it lacks precise market share figures, some caution is in order. See *ThermoLife Int'l LLC v. NeoGenis Labs Inc., No. CV-18-02980-PHX-DWL, 2021 U.S. Dist. LEXIS 72375, 2021 WL 1400818, at *9 (D. Ariz. Apr. 14, 2021)* (explaining that exact, percentage-based market share figures are not necessarily needed to pass muster under *Rule 12(b)(6)*); *Top Rank, Inc. v. Haymon, No. CV 15-4961-JFW (MRWx), 2015 U.S. Dist. LEXIS 164676, 2015 WL 9948936, at *8 (C.D. Cal. Oct. 16, 2015)* (same). To provide pinpoint accuracy, Netafim would essentially need access to financial information of Defendants that it cannot be expected to possess at this stage.

With this collective information now at the fore for the parties' consideration moving forward, the Court finds a comfortable stopping point and defers further judgment on the sufficiency of these allegations given that full resolution cannot be had with the **[**25]** insufficient relevant market definition.

3. Antitrust Injury

Next up are Defendants' antitrust injury challenges. An antitrust injury consists of (1) unlawful conduct, (2) causing an injury to the plaintiff, (3) that flows from that which makes the conduct unlawful, and (4) that is of the type the antitrust laws were intended to prevent. *Somers, 729 F.3d at 963*. The Ninth Circuit has also imposed a fifth requirement that "the 'injured party be a participant in the same market as the alleged malefactors.'" *Glen Holly Ent., Inc., 352 F.3d at 371* (quoted source omitted). "In other words, the party alleging the injury must be either a consumer of the alleged violator's goods or services or a competitor of the alleged violator in the restrained market." Id. (quoted source omitted).

Broadly, Netafim alleges that Jain's acquisition of Irrigation Design and Agri-Valley was both an illegal vertical merger and an illegal horizontal merger, each of which produced increased prices and reduced quality across the micro-irrigation equipment and design services markets that has caused harm to Netafim, other manufacturers, and growers. Defendants argue that Netafim's injury allegations regarding increased prices or reduced quality are

---

[9] For instance, if the design firms accounted for 100% of Netafim's sales in a specific area, but Netafim's sales only accounted for a small fraction of the total sales in that area, the design firms would not possess dominant market shares based on their business with Netafim alone.

insufficient. They also contend **[**26]** that, even if an injury has been sufficiently alleged, Netafim has failed to plausibly allege that that injury was caused by their conduct. The Court takes these arguments in reverse order.

a. Causation

To plead an antitrust claim, the plaintiff must "allege some credible injury caused by [the defendant's] unlawful conduct." *Am. Ad Mgmt., Inc., 190 F.3d at 1056*. For their first challenge, Defendants hone in on Netafim's allegation that, "[f]ollowing the announcement of the acquisition, Netafim could no longer work with [Irrigation Design and Agri-Valley] and terminated its relationships with them." Compl., ¶ 31. With this allegation, Defendants assert that Netafim conceded that the cause of its purported injuries, if any, was its own voluntary decision to refuse to do business with the design firms after their acquisition by Jain.

[*1088] The Court rejects this argument, at this stage, as it relies solely on isolating a particular allegation from its greater context within the complaint. Namely, in addition to the allegation above, Netafim explains that it ended the design firm relationships, in part, because Jain would make the design firms favor its own products over those manufactured by competitors including Netafim. Id., ¶ **[**27]** 32. Netafim supports this allegation by quoting from Jain's public announcement of the acquisition as being a "[m]ajor push to deploy [Jain's] leading Agriculture Technology portfolio" and means by which Jain would be able to "build direct relationships with growers" through the design firms. Id. Netafim also supports this allegation by explaining that the design firms did in fact favor Jain's products after the acquisition. Id., ¶ 33. As one example, Netafim describes being informed by a large cantaloupe grower that Irrigation Design had "flipped" the grower from Netafim to Jain. Id. It adds that other growers informed that Irrigation Design pressured them to switch their business to Jain too. Id. The other reason for ending the relationships, according to Netafim, was its inability to bid on projects through the design firms without providing Jain with access to its competitively sensitive pricing and product information. Id., ¶ 34. In theme, Netafim alleges elsewhere in the complaint that manufacturers' close working relationships with design firms includes provision of "non-public pricing and individualized quotes for projects." Id., ¶ 19.

When read together and in a light most **[**28]** favorable to Netafim, the Court does not find a fatal pleading deficiency. Although Defendants describe Netafim's additional reasoning as pretext for its decision to boycott the design firms, the Court cannot draw the same conclusion without betraying the legal standard for considering a *Rule 12(b)(6)* motion. The same can be said for Defendants' assertion that, since the acquisition, the design firms have repeatedly sought Netafim's business to no avail. Defendants' best authority for an analogous pleading failure featured allegations indicating that the plaintiff had "voluntarily withdrew from competition" in the relevant market by executing a contract with the defendant to sell virtually all the assets of its relevant division. *Chrysler Corp. v. Fedders Corp., 643 F.2d 1229, 1235 (6th Cir. 1981)*. This may have constituted a failure to plead causation, but Netafim has made no comparable claim that it sought to entirely remove itself from the market for micro-irrigation equipment manufacturing. Finally, Defendants' citation to case law at the summary judgment stage is inapt here. See *United Indus., Inc. v. Eimco Process Equip. Co., 61 F.3d 445, 448-49 (5th Cir. 1995)*; *Argus Inc. v. Eastman Kodak Co., 801 F.2d 38, 43-45 (2d Cir. 1986)*. While a dispute on this issue may play out differently as this litigation progresses, the allegations at hand allow for a reasonable inference that Netafim's own action did not **[**29]** break the causal chain.

b. Injury

For their other argument, Defendants contend that Netafim has not pleaded a plausible antitrust injury. "A plaintiff may only pursue an antitrust action if it can show *antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Am. Ad Mgmt., Inc., 190 F.3d at 1055* (quoted source and internal marks omitted); see also *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* ("Every merger of two existing entities into one, whether lawful or unlawful, has the potential for producing economic readjustments that adversely affect some persons. But Congress has not condemned mergers on that account; it has condemned them **[*1089]** only when they may produce anticompetitive effects."). "It is well established that the antitrust laws are only intended to preserve competition for the benefit of consumers." Id. "Consumer welfare is maximized when economic resources are allocated to their best use . . ., and when consumers are assured competitive price and quality." *Rebel Oil Co., 51 F.3d at 1433*. Thus, "the antitrust laws are only concerned with acts that harm 'allocative efficiency *and* raise[ ] the price of goods above their competitive level or diminish[ ] their quality.'" *Pool Water Prods. v. Olin Corp., 258 F.3d 1024, 1034 (9th Cir. 2001)* (quoting *Rebel Oil Co., 51 F.3d at 1433*).

Turning **[**30]** to the complaint, for both antitrust claims, Netafim alleges that "the acquisition increased prices and reduced quality in the relevant markets for micro-irrigation equipment and design services in Central California." Compl., ¶¶ 84, 91. Netafim explains that these effects are the result of Defendants' merger of a large equipment manufacturer and the area's two largest design firms. Id., ¶¶ 82-83, 89-90. Big picture, Defendants contend that Netafim's injury allegations are nothing more than conclusory, boilerplate assertions. The Court agrees with Defendants.

While Netafim does well to sketch outlines of a horizontal merger between the design firms and a vertical merger between those design firms and Jain, its allegations do not sufficiently describe how those mergers translated to harm. For one, other than the conclusory reference to increased prices and reduced quality, Netafim has not offered any factual allegations suggesting that consumers (i.e., growers) have actually suffered from these or any other harms as a result of the mergers. Or as Defendants correctly point out in their reply brief, "Netafim fails to allege a single instance in which, as a result of the merger, a single **[**31]** grower was prevented from purchasing a single piece of micro-irrigation equipment." In fact, the only substantive allegation involving a post-acquisition consumer describes a cantaloupe grower switching from Netafim to Jain, which if anything implies enhanced consumer welfare. Compl., ¶ 33. Netafim's references to reduced competition for the sale of micro-irrigation equipment and between design firms provide no help on this front, as reduced competition only triggers antitrust liability when consumers are harmed. *Rebel Oil Co., 51 F.3d at 1433*. Nor is harm to consumers demonstrated by Netafim's allegation that non-Jain manufacturers have had to invest significant resources to compete following the acquisition. Compl., ¶ 74. Not only does this allegation contradict a theory of reduced competition, it also describes an activity—jostling for market share—that is not proscribed by antitrust laws. *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 115-16, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*; see also *Pool Water Prods., 258 F.3d at 1036* ("Increased concentration may make anticompetitive activity more likely, but in and of itself it does not amount to antitrust injury."). To that end, Netafim also never explains how competing manufacturers, including itself, were injured by a harm that antitrust laws were intended to prevent. *Reveal Chat Holdco, LLC v. Facebook, Inc., 471 F. Supp. 3d 981, 997-98 (N.D. Cal. 2020)* (explaining that **[**32]** plaintiffs must sufficiently allege that they themselves have suffered antitrust injuries); see also *Big Bear Lodging Ass'n v. Snow Summit, Inc., 182 F.3d 1096, 1102 (9th Cir. 1999)* (explaining that the plaintiffs stood to benefit from increased prices because they competed with, rather than consumed, the defendants' products).

In sum, Netafim's allegations identify harms that antitrust laws are intended to prevent, but do so in a manner that fails to connect these conclusory references to specific factual circumstances of this case. **[*1090]** Thus, the Court will grant Defendants' motion to dismiss on this ground as well.

B. False advertising claim

Defendants also seek dismissal of Netafim's claim for false advertising in violation of *§ 43(a)(1)(B) of the Lanham Act*. *15 U.S.C. § 1125(a)(1)(B)*. Under this statute, a plaintiff may bring an action "against persons who make false and deceptive statements in a commercial advertisement [or promotion] about their own or the plaintiff's product." *Jarrow Formulas, Inc. v. Nutrition Now, Inc., 304 F.3d 829, 835 (9th Cir. 2002)*. For claims of this kind, the plaintiff must plead (and ultimately prove) six elements: (1) the defendant made a false or misleading statement either about the plaintiff's or its own product; (2) the statement was made in a commercial advertisement or promotion; (3) the statement actually deceived or has the tendency to deceive a substantial **[**33]** segment of its audience; (4) the deception is material, in that it is likely to influence the purchasing decision; (5) the defendant caused its statement to enter interstate commerce; and (6) the plaintiff has been or is likely to be injured as a result of the statement, either by direct diversion of sales from itself to the defendant, or by a lessening of goodwill associated with the plaintiff's product. *§ 1125(a)(1)(B)*; *Jarrow Formulas, Inc., 304 F.3d at 835 n.4*.

For its *Lanham Act* claim, Netafim alleges that, following the acquisition, Defendants made numerous false or misleading statements about (1) the usefulness and safety of micro-irrigation equipment manufactured with additives, foaming agents, or recycled materials, and (2) Netafim's ability and willingness to fulfill warranty obligations. Id., ¶¶ 95-96. It further describes the statements—which are unpacked in greater detail below—as at least misleading, if not literally false, and asserts that they were made with intent to mislead potential customers as to the usefulness, reliability, and safety of Netafim's products. Id., ¶¶ 98, 100. As to their dissemination, Netafim alleges that the statements entered interstate commerce because they were posted online or spread to Netafim's customers **[**34]** by way of Defendants' salesforces. Id., ¶¶ 96, 101. And as to their effect, Netafim alleges that Defendants' statements both tended to deceive customers and actually influenced customers' purchasing decisions. Id., ¶¶ 99-100.

In the same fashion as Netafim's pleading, the Court will differentiate and separately consider the allegations regarding micro-irrigation equipment statements from those related to its warranty obligations.

a. Micro-irrigation equipment

Netafim identifies three distinct ways in which Defendants made false or misleading statements about micro-irrigation equipment.

Netafim first describes a report from an Agri-Valley salesperson that, soon after the acquisition, Jain trained Irrigation Design and Agri-Valley salespeople how to pitch against Netafim equipment and did so with a sales handbook that included magnified photos purporting to be damaged Netafim equipment. Compl., ¶ 40. Netafim alleges that it heard from this salesperson that Defendants "used these images to falsely represent to customers that Netafim's equipment is of inferior quality because it contains recycled materials." Id.

Netafim next alleges that, in June 2017, it learned from a San Joaquin Valley grower **[**35]** that Defendants' salespeople told him the following false statements: (1) "Netafim is primarily owned by venture capitalists and the investors have been concerned with their returns"; (2) "[o]ther than changing the names of some products, there have not been recent new product advancements, or improvements in efficiency **[*1091]** made by Netafim to stay competitive"; and (3) "[a]s a result, Netafim have been utilizing foam fillers and recycled materials to manufacture its new drip tape and hose in order to reduce its resin cost and maintain margins." Id., ¶ 41.

Finally, Netafim describes numerous false or misleading statements that appeared in two blog posts that were published in June 2017 and August 2020. Id., ¶¶ 43-46. As to the June 2017 post, which was published by Jain on its commercial website and then re-published by Agri-Valley on its own website, Netafim alleges that the following false assertions were made:

- "To save money some manufacturers are adding foams, fillers and other additives to resin used to make irrigation tubing."
- "Unfortunately consumers pay for these cost cutting measures without any explanation about the compromise in material."
- "Many [competing manufacturers] no **[**36]** longer follow engineering standards developed to help growers ensure they have reliably performing products for years to come."
- "You can see the material voids (holes), resulting in a product that weighs less, and most likely will not have the same performance, and may be more susceptible to environmental stress cracking when used in combination with other fillers or recycled materials."
- "From research, recycled plastics will not have the same performance and long-term life as virgin resin systems designed for irrigation tubing. For further reference and study please visit this Dow webinar or read this article about down-cycling."

• "ASABE 435 Standards . . . . Compromises such as wall thickness, recycled resins, and the addition of fillers, foams, or other additives, make tubing that cannot meet the standards for performance set out by the 435 standards."
• "There simply is not enough of a safety factor in operating pressure and long term operating and burst pressure performance as with tubing meeting the standard."

Id., ¶ 45.

In addition to the statements above, Netafim also alleges that the following false assertions were made in a video embedded in the June 2017 post:

• "100% virgin **[**37]** plastic, Jain tubing comes with a 10-year warranty and conforms to ASABE standards."
• "While some manufacturers add foam, fillers, and additives to reduce their material usage, Jain manufactures tubing with a thicker wall that meets 435 advanced weather-performance standards."

Id., ¶¶ 46-47. Specific to these assertions, Netafim alleges that "[i]t is false that Jain's micro-irrigation tubes are made of '100% virgin plastic,'" as "Jain's products include other materials," and "Jain admits as much in other postings on its own website." Id., ¶ 50. Netafim points to other statements made in Jain's blog posts that it contends contradict the 100% virgin plastic assertion. Id.

As to the August 2020 blog post, which Jain published on its website, Netafim alleges that Jain asserted the following:

"One of the major differences in the tubing is the quality of resin a manufacturer uses to make the tubing and emitter line . . . . A couple of questions to ask of your local distributor selling you the cheapest tubing possible: Were recycled resins used to make the tubing? Were foaming agents or fillers used to make this tubing?"

[*1092] Id., ¶ 43. This, Netafim alleges, falsely suggests that micro-irrigation **[**38]** tubing and emitter lines made with recycled resins, foaming agents, or other additives are low quality. Id., ¶ 44.

Regarding all of the above assertions, Netafim alleges that the following suggestions are false: (1) the purpose of additives is to increase profits or cut costs at the expense of quality, and (2) micro-irrigation tubing that uses recycled materials or additives does not meet ASABE 435 standards. Id., ¶¶ 48-49.

Against these allegations, Defendants raise a litany of arguments that particular statements or sets of statements fail to satisfy certain elements of a *Lanham Act* claim. As an initial matter, the Court finds little favor in this tactic in so far as it flattens the breadth of the pleaded claim by isolating individual statements. For instance, the Court agrees with Defendants' assertion that Netafim's allegations regarding the San Joaquin Valley grower conversation describe only statements made by a single salesperson to a single grower during a single sales conversation. And the Court agrees that, taken alone, these allegations do not sufficiently allege a *Lanham Act* claim. That is, in isolation, these allegations identify false or misleading statements, but not ones that were made in **[**39]** a commercial advertisement or promotion, entered interstate commerce, and deceived or influenced the broader purchasing public. But the Court also recognizes that Netafim has not pleaded these allegations for purposes of setting forth a distinct *Lanham Act* claim. Rather, it has done so to support its overarching claim that Defendants engaged in a "misinformation campaign" regarding Netafim's products and the usefulness and safety of micro-irrigation equipment manufactured with additives, foaming agents, or recycled materials. Compl., ¶¶ 2, 39. This in turn requires the Court to read Netafim's allegations supporting that overarching claim in their entirety to determine if a sufficient claim has been pleaded. *L.A. Taxi Coop., Inc. v. Uber Techs., Inc., 114 F. Supp. 3d 852, 862 & n.2 (N.D. Cal. 2015)*. And reading the allegations in that fashion, and in the light most favorable to Netafim, the Court finds the pleading to be sufficient.

As catalogued above, Netafim has identified specific false or misleading statements that Defendants made regarding their own micro-irrigation equipment and that of competing manufacturers. Although some of these statements did not refer directly to Netafim or include a side-by-side comparison between Defendants and their competitors, some direct comparisons **[**40]** were made and the collection as a whole reasonably indicates that such associations were implied when not expressed. See Southland Sod Farms v. Stover Seed Co., 108 F.3d 1134, 1139, 1145 (9th Cir. 1997) (explaining that a statement may be actionable under the Lanham Act even without a direct comparison to a competitor, and that falsity may be shown through necessary implication). With its description of the alleged statements, Netafim also depicts statements made in the context of commercial advertising or promotions, given their dissemination to the relevant purchasing public through direct interactions or targeted blog posts. Newcal Indus., Inc., 513 F.3d at 1054. Likewise, Netafim connects those statements to customer deception by asserting that Defendants trained sales personnel to pitch against its equipment by making false representations as to its quality. While generic, this point is adequately bolstered by Netafim's description of the conversation with the San Joaquin Valley grower that involved the same kind of statements, as well as its allegation that growers informed of being pressured with similar sales pitches after the acquisition. See Lona's Lil Eats, LLC v. DoorDash, Inc., No. 20-CV-06703-TSH, 2021 U.S. Dist. LEXIS 8930, **[*1093]** 2021 WL 151978, at *8 (N.D. Cal. Jan. 18, 2021). This combination of allegations also provides substance for Netafim's otherwise-bald claim that it heard from customers that Defendants' statements tended to **[**41]** deceive and influence purchasing decisions. In a similar fashion, Netafim's conclusory interstate commerce allegation suffices when combined with its allegations describing blog posts. TrafficSchool.com, Inc. v. Edriver Inc., 653 F.3d 820, 829 n.3 (9th Cir. 2011). Moreover, Netafim generally alleges that the industry for micro-irrigation products involves interstate shipments (Compl., ¶ 12), and its other allegations regarding the size and scope of that industry enable the Court to infer that the statements at least substantially affected interstate commerce. Thompson Tank & Mfg. Co. v. Thompson, 693 F.2d 991, 993 (9th Cir. 1982). Finally, even though Netafim's injury allegation is conclusory (Compl., ¶ 102), commercial injury is generally presumed when the plaintiff competes directly with the defendant and the defendant's statement has a tendency to mislead consumers. ThermoLife Int'l, LLC v. Gaspari Nutrition Inc., 648 F. App'x 609, 615-16 (9th Cir. 2016); TrafficSchool.com, Inc., 653 F.3d at 826-27, 829. The misleading factor is discussed above, and Netafim alleges throughout the complaint that it directly competes with Defendants to sell micro-irrigation equipment to growers. Compl., ¶¶ 1, 21.

In sum, the Court finds these allegations, when read in their entirety, present a sufficient claim. Although Defendants' motion promotes additional inquiry as to whether particular, isolated statements satisfy the elements of a Lanham Act claim, the Court declines to wade further **[**42]** into these disputes at this stage. For one, some turn on fact-intensive questions that are inapt for full resolution here. And, as explained above, Netafim's individual allegations can be actionable in support of a broader claim, even if they are not themselves actionable on their own. While Netafim's reliance on nonactionable statements may hamper its ability to survive future challenges in this case, resolution at those stages is distinct from the Court's task at hand.

b. Warranty obligations

Netafim's allegations regarding Defendants' false statement about its warranty obligations are briefer than its allegations regarding the micro-irrigation equipment statements. Namely, Netafim highlights another statement in the June 2017 blog post that, Netafim alleges, was made in reference to a then-pending change in its ownership and aimed at its ability and willingness to fulfill warranty obligations to clients. Compl., ¶¶ 51-52. According to the complaint, the statement in question reads as follows: "I would recommend asking, who is warrantying the product? Will this company be in its current form and have the ability and willingness to honor the warranty or will you be dealing with a new **[**43]** owner in a business that has significantly changed." Id., ¶ 52. Netafim alleges that this statement "falsely insinuated Netafim would not honor its warranties" when in fact "Netafim's ability and willingness to honor its product warranties was not then and is not now dependent on its ownership." Id., ¶¶ 52-53.

Defendants challenge these allegations on grounds that the statement constitutes puffery (as opposed to actionable false statements) and does not involve a direct comparison to Netafim. Defendants also point out that Netafim has not alleged that this particular statement deceived customers or harmed Netafim in any way. In opposition, Netafim does not particularize its defense of this statement, and instead seems to lump its defense of these allegations with all of those discussed above regarding micro-irrigation equipment.

[*1094] The Court declines to dismiss Netafim's claim on account of the lack of a direct comparison in this statement. Southland Sod Farms, 108 F.3d at 1145. Likewise, at this stage, the Court declines to conclusively determine that this statement is "extremely unlikely to induce consumer reliance," and thus nonactionable puffery. *Newcal Indus., Inc., 513 F.3d at 1053*. Otherwise, however, the Court finds Netafim's opposition to be unpersuasive. **[**44]** While Netafim provides factual allegations that illustrate how Defendants' false statements regarding micro-irrigation equipment tended to deceive customers as to that equipment, it has not included similar details regarding the warranty statement. Instead, for purposes of this statement, Netafim must rely solely on its boilerplate allegation that all of statements set forth in the complaint tended to deceive customers. Compl., ¶ 99. The Court cannot infer from this allegation alone that Defendants' allegedly false statement—which, at most, impliedly references Netafim's ability and willingness to fulfill warranty obligations—actually deceived or tended to deceive a substantial segment of the relevant purchasing public. The Court also finds the same defect with Netafim's pleading of the materiality or influence of any deception, as Netafim's allegations on that element make no mention of the Netafim's warranty obligations. Id., ¶ 100. And that lack of sufficiently alleged deception leaves Netafim unable to avail itself of a presumption of injury here. Without this, Netafim's generic allegation that all of Defendants' statements caused Netafim to be injured is not enough. Id., ¶ 102. **[**45]** For all of these insufficiencies, the Court will dismiss this portion of Netafim's Lanham Act claim and grant Netafim leave to amend.

ORDER

Accordingly, IT IS HEREBY ORDERED that:

1. Defendants' motion to dismiss (Doc. No. 15) is GRANTED in part and DENIED in part;

    a. The first cause of action for violation of the *Sherman Act* is DISMISSED without prejudice;

    b. The second cause of action for violation of the *Clayton Act* is DISMISSED with prejudice to the extent it seeks damages against Defendants Irrigation Design and Agri-Valley;

    c. The second cause of action for violation of the *Clayton Act* is otherwise DISMISSED without prejudice;

    d. The third cause of action for violation of the *Lanham Act* is DISMISSED, without prejudice, to the extent the claim is based on the warranty statement; and

2. Netafim is GRANTED leave to file an amended complaint. If Netafim elects to file a first-amended complaint, it must do so within thirty days of service of this order.

IT IS SO ORDERED.

Dated: December 14, 2021

Judges: Daniel D. Crabtree, United States District Judge.

Opinion by: Daniel D. Crabtree

Opinion

MEMORANDUM AND ORDER

In February 2020, the court certified a *Rule 23(b)(3)* class action brought by consumer and third-party payors of the EpiPen—an epinephrine auto-injector ("EAI") used to treat anaphylaxis—who allege state antitrust violations premised on a generic delay theory. Doc. 2018-1 at 126-28; *see also* Doc. 2169 at 42 (Pretrial Order ¶ 4.a.). Generally, the class plaintiffs allege that the Mylan Defendants[1]—who marketed and sold the EpiPen—violated certain state antitrust laws by entering an unlawful reverse payment settlement that delayed generic entry of a competing generic EAI and stifled competition in the EAI market. *See* Doc. 2169 at 15-17, 42, 44-45 (Pretrial Order ¶¶ 3.a.1.b., 4.a., 4.d.).

The Mylan Defendants now ask the court to decertify the state law antitrust class. *See* Doc. 2389 (Mylan Defendants' Motion to Decertify the State Antitrust Class With Respect to Plaintiffs' Generic **[*64]** Delay Claim). They argue that a recent Supreme Court decision requires the court to decertify the state antirust class because "[e]very class member must have Article III standing in order to recover individual damages." *TransUnion LLC v. Ramirez, 141 S. Ct. 2190, 2208, 210 L. Ed. 2d 568 (2021)*. Here, the Mylan Defendants argue, some class members are brand loyalists—meaning they would have purchased EpiPen even if a generic was available on the EAI market. So, according to the Mylan Defendants, the brand loyalist class members have sustained no injuries from any generic delay (even if it occurred). As a consequence, the Mylan Defendants argue the court should decertify the state law antitrust class action because the class includes uninjured class members who lack standing.

The class plaintiffs filed an Opposition to the Motion to Decertify (Doc. 2404). The Mylan Defendants filed a Reply (Doc. 2424; *see also* Doc. 2423-1 (sealed version)). Then, the class plaintiffs filed a Motion for Leave to File a Surreply (Doc. 2437). And, the Mylan Defendants filed a Response, opposing the class plaintiffs' Motion for Leave to File a Surreply (Doc. 2447). The matter thus is fully briefed, and the court now is prepared to rule.[2]

For reasons explained below, the court grants **[*65]** in part the Mylan Defendants' Motion to Decertify the State Antitrust Class (Doc. 2389) and denies the motion in part. The court grants the motion in just two respects: (1) The court grants Mylan's motion to decertify the portion of the state law antitrust class action asserting claims under the laws of Nevada and North Carolina because no named plaintiff purchased an EpiPen in those two states after the alleged but-for generic entry date, and thus, no named plaintiff sustained injury under the antitrust laws of either

---

[1] The Mylan Defendants include Mylan N.V., Mylan Specialty L.P., Mylan Pharmaceuticals Inc., and Heather Bresch. Doc. 2169 at 1. This Order refers to these four defendants collectively as "the Mylan Defendants" or "Mylan."

[2] The Mylan Defendants' motion asks the court to set the matter for oral argument "if the Court believes that would be helpful." Doc. 2389 at 2. Our local rule, *D. Kan. Rule 7.2*, gives the court discretion to "set any motion for oral argument or hearing at the request of a party or on its own initiative." The court finds here that the parties' extensive papers adequately argue the issues raised by the Mylan Defendants' Motion to Decertify. Oral argument isn't necessary or consistent with *Fed. R. Civ. P. 1*. So, the court declines to set oral argument on this motion.

state based on any generic delay; and (2) the court grants Mylan's unopposed request to dismiss plaintiff Anastasia Johnston's claims because she sustained no financial injury. The court denies Mylan's motion in all other respects.

Also, the court grants the class plaintiffs' Motion for Leave to File a Surreply (Doc. 2437). The court begins with the Surreply issue.

I. Class Plaintiffs' Motion for Leave to File a Surreply

The class plaintiffs ask the court for leave to file a Surreply. They assert that Mylan's Reply "raise[s] *four* new, unfounded issues that warrant a short response." Doc. 2437 at 2. Mylan opposes the request for leave to file a Surreply, arguing that (1) **[*66]** plaintiffs could have raised the Surreply's arguments earlier in the briefing, and (2) Mylan's Reply didn't raise new arguments improperly but, instead, simply responded to arguments presented by plaintiffs' Opposition to the Motion to Decertify.

Our court's local rules limit briefing on motions to the motion (with memorandum in support), a response, and a reply. *D. Kan. Rule 7.1(a)* & *(c)*. Surreplies typically are not allowed. *Taylor v. Sebelius, 350 F. Supp. 2d 888, 900 (D. Kan. 2004)*, *aff'd on other grounds*, *189 F. App'x 752 (10th Cir. 2006)*. Instead, surreplies are permitted only with leave of court and under "rare circumstances." *Humphries v. Williams Nat. Gas Co., No. 96-4196-SAC, 1998 U.S. Dist. LEXIS 21196, 1998 WL 982903, at *1 (D. Kan. Sept. 23, 1998)* (citations omitted). As an example, when a moving party raises new material for the first time in a reply, the court should give the nonmoving party an opportunity to respond to that new material (which includes both new evidence and new legal arguments) in a surreply. *Green v. New Mexico, 420 F.3d 1189, 1196 (10th Cir. 2005)*; *Doebele v. Sprint/United Mgmt. Co., 342 F.3d 1117, 1139 n.13 (10th Cir. 2003)*. The rules governing filing of surreplies "are not only fair and reasonable, but they assist the court in defining when briefed matters are finally submitted and in minimizing the battles over which side should have the last word." *Humphries, 1998 U.S. Dist. LEXIS 21196, 1998 WL 982903, at *1* (citation omitted).

Here, the court disagrees with plaintiffs that the Reply asserts four new arguments. Each argument responds directly to something that class plaintiffs **[*67]** assert in their Opposition. So, the arguments aren't necessarily "new." Yet, the court recognizes, the specific arguments don't surface in the briefing until Mylan's Reply. And, Mylan has submitted new factual material to support the arguments. *See* Doc. 2423-1 at 14, 21 (citing Ex. 2); *see also id.* at 30 (citing Exs. 3 & 4). On these facts, the court finds, this case presents the "rare circumstances" where a surreply is permitted. *Humphries, 1998 U.S. Dist. LEXIS 21196, 1998 WL 982903, at *1* (citation omitted). The questions raised by the pending motion confront difficult issues about a certified class scheduled to try its state law antitrust claims to a jury less than two months from now. The class plaintiffs' proposed Surreply helps the court to consider the important questions presented by Mylan's Motion to Decertify. So, exercising its discretion, the court grants plaintiffs' request for leave to file a Surreply (Doc. 2437). Also, the court grants Mylan's request to file a Response to plaintiffs' Surreply. Doc. 2447 at 2. As explained in this Order's last section (Part III), the court directs the parties to file both sealed and unsealed versions of class plaintiffs' proposed Surreply (Doc. 2438-1) and Mylan's proposed Response to the Surreply **[*68]** (Doc. 2446-1) as separate docket entries.

II. The Mylan Defendants' Motion to Decertify the State Antitrust Class

Next, the court addresses the merits of the Mylan Defendants' Motion to Decertify. The court begins with the legal standard governing decertification of a class action.

A. Legal Standard

Federal Rule of Civil Procedure 23(c)(1)(C) provides that an "order that grants or denies class certification may be altered or amended before final judgment." *Fed. R. Civ. P. 23(c)(1)(C)*; *see also* *DG ex rel. Stricklin v. Devaughn, 594 F.3d 1188, 1201 (10th Cir. 2010)* (explaining that district court "possesses the discretion under *Rule 23(c)(1)(C)* to amend its certification order to reflect its findings or decertify the class altogether prior to final judgment"). Citing this Rule, the Supreme Court has explained that a certification order "is inherently tentative" because even "after a certification order is entered, the judge remains free to modify it in the light of subsequent developments in the litigation." *Gen. Tel. Co. of Sw. v. Falcon, 457 U.S. 147, 160, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982)* (citing *Fed. R. Civ. P. 23(c)(1)*).

When moving to decertify a class, "'defendant must logically provide some reason for the court to change its conclusion.'" *Blair v. TransAm Trucking, Inc., 309 F. Supp. 3d 977, 1014 (D. Kan. 2018)* (quoting *Schell v. OXY USA Inc., No. 07-1258-JTM, 2013 U.S. Dist. LEXIS 129569, 2013 WL 4857686, at *3 (D. Kan. Sept. 11, 2013)*). "'Yet, it remains the plaintiff's burden to prove that the requirements of *Rule 23* are met.'" *Id.* (quoting *Arkalon Grazing Ass'n v. Chesapeake Operating, Inc., No. 09-1394-CM, 2014 U.S. Dist. LEXIS 91589, 2014 WL 3089556, at *1 (D. Kan. July 7, 2014)*); *see also* *Sibley v. Sprint Nextel Corp., 315 F.R.D. 642, 651 (D. Kan. 2016)* ("When faced with a motion to decertify—that is, even after the Court has granted **[*69]** a motion for class certification—the party seeking certification continues to bear the burden of meeting the requirements of *Rule 23*." (citation omitted)). *Cf.* *Day v. Celadon Trucking Servs., Inc., 827 F.3d 817, 832 (8th Cir. 2016)* (requiring defendant to "provide good reason before the district court revisits the [class certification] issue").

The decision whether to certify a class action "belongs within the discretion of the trial court." *Tabor v. Hilti, Inc., 703 F.3d 1206, 1227 (10th Cir. 2013)* (citation and internal quotation marks omitted). But when exercising this discretion, district courts must conduct a "rigorous analysis" and decide whether the putative class satisfies all the requirements of *Federal Rule of Civil Procedure 23*. *Comcast Corp. v. Behrend, 569 U.S. 27, 33, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* (citation and internal quotation marks omitted); *see also* *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350-51, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*.

To certify a class action, *Rule 23(a)* requires (1) numerosity, (2) commonality, (3) typicality, and (4) adequate representation, plus one of the requirements established by *Rule 23(b)(1)*, *(b)(2)*, or *(b)(3)*. *Fed. R. Civ. P. 23(a)—(b)*. Here, the court certified the state law antitrust class action under *Rule 23(b)(3)*. Doc. 2018-1 at 126. *Rule 23(b)(3)* requires that "questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. The court applies this governing standard **[*70]** to Mylan's Motion to Decertify, below.

B. Analysis

As already recited, the Mylan Defendants move to decertify the state law antitrust class action. They argue that the Supreme Court's recent *TransUnion* decision requires that "[e]very class member must have Article III standing in order to recover individual damages[,]" *TransUnion, 141 S. Ct. at 2208*, but some class members in this antitrust class action are uninjured, and thus, lack standing to sue. In the alternative, Mylan argues that the court should decertify the state law antitrust generic delay claims for certain states that no longer have an adequate or typical class representative. The court addresses both arguments, in turn, below.

1. Motion to Decertify State Antitrust Class Action

Mylan's motion asserts that *TransUnion* requires the court to decertify the class because the certified state law antitrust class contains uninjured class members. Plaintiffs respond, arguing that the court's prior class certification Order doesn't conflict with the Supreme Court's *TransUnion* decision. Also, plaintiffs argue that the evidentiary record shows that Mylan is wrong that the class contains uninjured members. The court addresses these arguments about the facts and the law in the following subsections, **[*71]** a. and b. It starts with the governing law.

a. *TransUnion*'s Effect on the Class Certification Order

In February 2020, the court certified an antitrust class action consisting of "[a]ll persons and entities in the Antitrust States[3] who paid or provided reimbursement for some or all of the purchase price of Branded EpiPens at any time" in the class period "for the purpose of consumption, and not resale, by themselves, their family member(s), insureds, plan participants, employees, or beneficiaries." Doc. 2018-1 at 126. In its class certification Order, the court rejected Mylan's argument that plaintiffs had failed to satisfy *Rule 23(b)(3)*'s predominance requirement because—according to Mylan's argument—plaintiffs cannot prove that all class members sustained injury. *See id.* at 58-79. Instead, the court applied "the standard artic[ulated] by the Seventh Circuit" and approved by our court in two of Judge Lungstrum's opinions. *Id.* at 67; *see also id.* at 62-67 (discussing *Messner v. Northshore Univ. HealthSystem, 669 F.3d 802, 825 (7th Cir. 2012)*, *In re Urethane Antitrust Litig., No. 04-1616-JWL, 2013 U.S. Dist. LEXIS 69784, 2013 WL 2097346, at *2 (D. Kan. May 15, 2013)*, and *In re Syngenta AG MIR 162 Corn Litig., No. 14-md-2591-JWL, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *4 (D. Kan. Sept. 26, 2016)*). This standard precludes class certification when the putative class "'contains a great many persons who have suffered no injury at the hands of the defendant.'" *Messner, 669 F.3d at 825*.

Based on the evidence presented at class certification—including expert opinion from plaintiffs' **[*72]** expert, Professor Meredith Rosenthal—the court concluded "plaintiffs have shown, at least at the class certification stage, that the percentages of uninjured class members are small enough that they don't preclude class certification." *Id.* at 75. Also, it concluded that "any questions about the absence of injury for some class members don't overwhelm the common issues and defeat predominance on class certification." *Id.* at 76. But, the court recognized that "'depending on the ultimate size of the class at issue here,' the factual record eventually may develop more fully and show that the number of uninjured class members is 'more significant' than it now appears." *Id.* at 75 (quoting *Messner, 669 F.3d at 826*). The court noted that it "'is free to revisit this issue' if that, in fact, occurs." *Id.* (quoting *Messner, 669 F.3d at 826*); *see also Fed. R. Civ. P. 23(c)(1)(C)* ("An order that grants or denies class certification may be altered or amended before final judgment."). So, at class certification, the court concluded that "the current record doesn't defeat the predominance requirement simply because the putative class definitions contain a percentage of uninjured class members." *Id.*

Also, the court declined to deny certification based on Mylan's argument that certifying a class with **[*73]** uninjured class members violates Article III's standing requirements. *Id.* at 76-77. Relying on existing Tenth Circuit precedent, the court found that "the Article III standing requirement does not demand that plaintiffs establish each putative class member has sustained injury." *Id.* at 77 (citing *Colo. Cross Disability Coal. v. Abercrombie & Fitch Co., 765 F.3d 1205, 1214 (10th Cir. 2014)*). Instead, the court concluded under existing Circuit precedent, plaintiff had satisfied the Article III standing requirement "by showing that each named plaintiff has sustained injury sufficient to confer standing." *Id.*

More than a year after the court issued its certification Order, the Supreme Court issued its opinion in *TransUnion LLC v. Ramirez, 141 S. Ct. 2190, 210 L. Ed. 2d 568 (2021)*. *TransUnion* addressed the question whether every class member in that case's class action had satisfied the requirement of demonstrating "Article III standing in order to *recover individual damages*" in the class action. *Id. at 2208* (emphasis added). *TransUnion* involved a class of 8,185 individuals asserting *Fair Credit Reporting Act* claims against a credit reporting agency because the class members' internal TransUnion credit reports contained misleading information. *Id. at 2200*. But, for only "1,853 of the class members, TransUnion provided misleading credit reports to third-party businesses." *Id.* And, for "the other 6,332 class members[,]" their credit reports "were *not* provided to third-party **[*74]** businesses during the relevant time period." *Id.* The Supreme Court thus held that "the 6,332 class members whose internal TransUnion credit files were not disseminated to third-party businesses did not suffer a concrete harm." *Id. at 2212*. As a consequence, those 6,332 class members lacked standing to assert *Fair Credit Reporting Act* claims against TransUnion. *Id. at 2214*.

---

[3] At class certification, the Antitrust States included: Alabama, California, Florida, Hawaii, Illinois, Kansas, Maine, Michigan, Minnesota, Mississippi, Nebraska, Nevada, New Hampshire, New York, North Carolina, Tennessee, and Utah. Doc. 2018-1 at 126 n.72. On summary judgment, however, the court dismissed the Tennessee antitrust claims without prejudice because no properly-named plaintiff resides in that state. Doc. 2381 at 163, 182. So, 16 Antitrust States currently remain part of the certified class action.

Mylan asserts that *TransUnion*'s holding requires the court to decertify the state antitrust class action. Mylan argues that the certified class contains brand loyalists—*i.e.*, consumers who loyally purchased branded EAIs and who wouldn't have switched to purchasing a generic EAI when one became available. Mylan argues that these class members thus sustained no injury—no concrete harm—from any generic delay. As a consequence, Mylan asserts, the brand loyalists who are class members lack standing to assert state antitrust claims against Mylan. Also, Mylan contends, it's impossible to identify these uninjured class members without conducting individualized inquiries of each class member to determine who was and was not a brand loyalist. This individual inquiry, Mylan argues, will "overwhelm questions common to the class." *Comcast Corp. v. Behrend, 569 U.S. 27, 34, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*. And, says Mylan, that individual inquiry defeats *Rule 23(b)(3)* **[*75]** 's predominance requirement, thus requiring the court to decertify the state antitrust class.

Mylan recognizes that *TransUnion* never discussed Article III standing in the context of certifying a class action. Indeed, Mylan concedes that "the Supreme Court passed on the issue of 'whether every class member must demonstrate standing *before* a court certifies a class.'" Doc. 2390 at 17 n.10 (quoting *TransUnion, 141 S. Ct. at 2208 n.4*). But, Mylan argues, *TransUnion* explicitly recites that plaintiffs "must maintain their personal interest in the dispute *at all stages of litigation*." *TransUnion, 141 S. Ct. at 2208* (emphasis added). And, it also recognizes that a "plaintiff must demonstrate standing 'with the manner and degree of evidence required at the successive stages of the litigation.'" *Id.* (quoting *Lujan v. Defs. of Wildlife, 504 U.S. 555, 561, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*). Mylan argues that plaintiffs can't shoulder that burden here—where class certification already has occurred, and the court already has decided summary judgment. Mylan asserts that a trial won't change the fact that plaintiffs can't demonstrate that all class members have sustained damages. Thus, Mylan argues, not every class member in this case has "Article III standing[,]" and, under *TransUnion*, these class members can't "recover individual damages." *Id.* As a consequence, Mylan asserts, the **[*76]** court must decertify the class because there is no way to identify and remove from the class uninjured brand loyalists—which, according to Mylan, plaintiffs have conceded exist in the class—without conducting millions of individual inquiries.

Plaintiffs respond that they always have argued—and the data always has shown—that a low probability exists that the class includes brand loyalists who remained brand loyal throughout the entire class period. Also, plaintiffs provide updated opinions from Prof. Rosenthal based on her analysis of updated pharmacy records. According to plaintiffs, Prof. Rosenthal's updated analysis shows "that the probability that brand loyalists are in the Class is, at best, *de minimis*." Doc. 2404 at 18. But, plaintiffs argue, even if the class includes some brand loyalists, Prof. Rosenthal's updated analysis also shows that any purported brand loyalist nonetheless sustained injury in the form of paying overcharges for the EpiPen. Using updated data, Prof. Rosenthal finds that the EpiPen price fell in the real world after a generic EAI entered the market. She opines that this same EpiPen price decline would have occurred in the but-for world where a generic would **[*77]** have entered the market sooner. As a consequence, Prof. Rosenthal asserts, even brand loyalists have sustained damages from generic delay in the form of paying higher prices for EpiPens. Thus, plaintiffs argue, even if certain class members never would have purchased a generic EAI over a branded EpiPen, all class members—including any purported brand loyalists—sustained injury because they paid overcharges on their EpiPen purchases.

Based on this data, plaintiffs argue that *TransUnion* differs from this case.[4] *See* Doc. 2404 at 20 (asserting that "each and every member of this Class was injured through paying higher prices for brand and generic EpiPens"); *see also id.* at 21 (arguing that "Mylan speculates that so-called 'brand loyalists' exist and have not suffered an injury," but plaintiffs have shown "all class members were impacted as a result of the delayed entry of an independent generic alternative for EpiPen" (citation and internal quotations omitted)). Thus, plaintiffs assert, Mylan's reliance on *TransUnion* is misplaced because plaintiffs are capable of proving that all class members—

---

[4] Plaintiffs assert four arguments why *TransUnion* doesn't require the court to decertify the class. Doc. 2404 at 20-22. Also, plaintiffs argue that accepting Mylan's argument that the court must decertify the state antitrust class because it contains some number of uninjured class members "would be a potential death knell to generic delay claims—and many other types of class actions." *Id.* at 22-23. Because the court finds that plaintiffs have shown they are capable of presenting classwide evidence of generic delay damages sustained by every class member, thus satisfying Article III standing, the court need not address plaintiffs' other arguments.

even brand loyalists, if they exist—sustained damage from paying overcharges for EpiPen that Mylan's generic delay **[*78]** caused.

Mylan argues that the court can't consider Prof. Rosenthal's updated damages theory, and, even if it considers it, Mylan asserts that it doesn't support class certification. The court addresses those arguments in subsection b. And, as explained below, the court finds that plaintiffs have come forward with a method—in the form of Prof. Rosenthal's expert opinion—of proving classwide injury with evidence that is common to the class.[5] Thus, plaintiffs have provided a way—at this stage of the litigation, anyway—to show that each member sustained concrete harm from Mylan's alleged conduct, thereby establishing that all class members have Article III standing. So, the court declines to decertify the class based on the Supreme Court's *TransUnion* decision.

But—at the same time—the court recognizes the effect that *TransUnion*'s standing requirement has on this case where—Mylan argues—some class members sustained no injury. Although plaintiffs have come forward with a method for proving classwide injury for all EpiPen purchasers—brand loyal or not—a factfinder may not agree that the evidence shows what plaintiffs argue it does. A jury may accept Prof. Rosenthal's opinions about classwide injury. But, a jury **[*79]** also might reject those opinions. And, if a jury concludes that plaintiffs haven't shown classwide injury, then *TransUnion* holds that those class members who haven't sustained injury lack standing to recover damages. To address this problem, the court predicts that it will require a specific jury finding addressing the brand loyalist argument. The parties must confer and propose appropriate jury instructions and verdict form addressing whether each class member has sustained damage from the generic delay. This approach would enable the factfinder to decide whether each class member has sustained injury, and thus has or doesn't have standing to recover antitrust damages.

a. Plaintiffs Have Shown a Method of Proving That All Class Members—Even Brand Loyalists—Sustained Damages.

As already discussed, even if some small number of brand loyalists exist in the class, plaintiffs assert that updated data shows these class members still sustained injury from generic delay in the form of overcharges paid for branded EpiPens. According to plaintiffs' expert, Prof. Meredith Rosenthal, she has received "updated IQVIA Xponent data" extending "through October 2020[,]" and her analysis of that updated data shows **[*80]** EpiPen prescriptions "fell precipitously with the entry of the Mylan authorized generic and Teva's generic." Doc. 2412-2 at 4 (Rosenthal Decl. ¶ 6). Prof. Rosenthal explains that this updated data allows one to "see the effect of actual competitive generic entry on EpiPen's price," and based on that data, she opines "with a high degree of certainty that the brand EpiPen price would have decreased after competitive generic entry had it occurred" in a but-for world with no without generic delay. *Id.* at 9-10 (Rosenthal Decl. ¶ 13 & Fig. 3); *see also id.* ("[W]ith the longer span of data from the period after independent generic competition for EpiPen (*i.e.*, the Teva launch), it is now possible to infer with a high degree of certainty that brand EpiPen prices would also have declined but-for the alleged generic delay."). This analysis, in turn, "supports" Prof. Rosenthal's "conclusion that there is a very low probability that any given Class member did not suffer a quantifiable overcharge in this matter" in the form of higher prices for branded EpiPens. *Id.* Mylan asserts five arguments why plaintiffs' updated data nonetheless fails to permit class certification to continue.

First, Mylan **[*81]** argues that the court can't even consider the theory of injury to brand loyalists in the form of EpiPen overcharges because it's untimely. Mylan asserts that the parties have litigated this case for four years and Mylan has argued since at least March 2019 that the class contains uninjured class members. But, Mylan argues, plaintiffs never asserted their argument that brand loyalists have sustained injury in the form of paying EpiPen

---

[5] As plaintiffs note, the court already concluded, when deciding defendants' Motion to Dismiss the Consolidated Class Action Complaint, that plaintiffs had "alleged economic loss sufficient to discharge the standing requirement" by alleging that "Mylan's conduct caused them to pay inflated prices for the EpiPen, and—but for Mylan's unlawful conduct—they would have purchased other versions of the EpiPen (both branded and generic) at lower cost." Doc. 896 at 102-03 (citations omitted). But, the court also recognizes, this ruling addressed plaintiffs' state consumer protection act claims, not the antitrust claims. *See id.* at 99-104.

overcharges until they filed their Opposition to the Motion to Decertify in August 2021. Mylan argues that plaintiffs can't use untimely expert testimony to inject this new theory in the case at this late stage when they never included their overcharge damages theory in the Pretrial Order. Also, Mylan contends, allowing plaintiffs to proceed with this new damages theory will prejudice Mylan because it has had no opportunity to conduct discovery on this topic, depose witnesses or experts about the overcharge damages, assert *Daubert* challenges to Prof. Rosenthal's opinions on this theory, or brief the issue on the merits to the court. The court disagrees with Mylan's arguments.

Although plaintiffs didn't assert the overcharge damages theory until their Opposition **[*82]** to the Motion to Decertify, they have explained adequately why they couldn't have asserted it earlier—that is, they didn't have the data to support the theory until June 2021. Prof. Rosenthal explains that the data available to her "at the time of [her] merits report were retail sales (IQVIA) data through June 2018, and Mylan's EpiPen rebate data through November 2018." Doc. 2438-2 at 4 (Rosenthal Sur-Reply Decl. ¶ 3). She explains that this data showed "a decreasing EpiPen price trend[,]" but "it was not yet clear if this was a trend that would continue after an independent generic manufacturer entered the market[.]" *Id.* Because Prof. Rosenthal only had data that "ended prior to Teva's actual launch[,]" she asserts "it was not possible . . . to reach a conclusion about the impact of Teva's launch on EpiPen prices and quantities[,]" and thus, she "was unable at the time to calculate overcharges for brand loyal purchases." *Id.* But, when Mylan produced additional rebate data on June 9, 2021, *see* Doc. 2437-3 at 2, Prof. Rosenthal found this new data made it "possible to conclude that the retail price of brand EpiPen, both gross and net of rebates, decreased after independent generic entry **[*83]** in the actual world." Doc. 2438-2 at 4 (Rosenthal Sur-Reply Decl. ¶ 3). Thus, she explains, she is "able to demonstrate that Class members paid a higher price for brand EpiPen than they would have in the but-for scenario and calculate the associated damages for purchases of the brand using data subsequent to Teva's launch to compute an appropriate brand price yardstick." *Id.*

Mylan contends that Prof. Rosenthal could have performed this analysis earlier had plaintiffs asserted their overcharge damages theory earlier and requested the data sooner. But Mylan's argument doesn't challenge the fact that plaintiffs didn't receive Mylan's updated rebate data until June 2021. And, Mylan never explains why the court should fault plaintiffs for failing to assert a damages theory that Mylan hasn't produced data to support.[6]

Also, plaintiffs argue that Prof. Rosenthal's updated damages opinion is timely because the parties agreed that her updated damages opinion was due on October 1, 2021—a deadline that still was in the future when Mylan filed the Motion to Decertify and the parties briefed its issues. *See* Doc. 2415 at 2 (Scheduling Order No. 15 (Amended Trial Order)). Mylan responds that Prof. Rosenthal's **[*84]** updated damages opinion was intended merely to provide an updated damages number using pre-existing damages theories that plaintiffs already had disclosed. In contrast, Mylan argues, plaintiffs have asserted a new damages theory which, Mylan contends, is waived because plaintiffs never asserted it in the Pretrial Order. *See* *Wilson v. Muckala, 303 F.3d 1207, 1215 (10th Cir. 2002)* ("[T]he pretrial order is the controlling document for trial[,]" and any "claims, issues, defenses, or theories of damages not included in the pretrial order are waived[.]" (citation and internal quotation marks omitted)). But, our Circuit explicitly has recognized that "'while the pretrial order defines a lawsuit's boundaries in the trial court and on appeal, total inflexibility is undesirable.'" *103 Invs. I, L.P. v. Square D Co., 372 F.3d 1213, 1217 (10th Cir. 2004)* (quoting *Summers v. Mo. Pac. R.R. Sys., 132 F.3d 599, 604 (10th Cir. 1997)*); *see also id.* (holding that the trial court abused its discretion by refusing to consider an expert rebuttal report as untimely).

Here, plaintiffs adequately have justified the reason they couldn't assert their overcharge damages theory earlier: because plaintiffs' expert didn't yet have the data to support the theory. Under these facts, precluding plaintiffs from asserting their damages theory would amount to "total inflexibility" and that approach is "undesirable" **[*85]** here. *103 Invs., 372 F.3d at 1217* (citation and internal quotation marks omitted). Also, the court disagrees with Mylan's argument that permitting plaintiffs to proceed with the overcharge damages theory will prejudice Mylan. As plaintiffs highlight, Mylan has responded to Prof. Rosenthal's updated damages opinion by submitting a 16-page Declaration

---

[6] Mylan also contends that its updated rebate data is only relevant to Prof. Rosenthal's opinions about net prices, not gross prices. But, as Prof. Rosenthal explains, she used two sets of data—the IQVIA Xponent data and the Mylan rebate data—to conduct the updated pricing analysis. Doc. 2438-2 at 4-5 & n.5 (Rosenthal Sur-Reply Decl. ¶¶ 3, 5 & Fig. 3).

from Mylan's own expert, John H. Johnson. Doc. 2423-2 (Johnson Decl.). Dr. Johnson uses the same two sets of data—the IQVIA Xponent data and the Mylan rebate data—and opines that the data refutes Prof. Rosenthal's opinion that brand loyalists have sustained injury in the form of paying overcharges for EpiPen. *Id.* at 3-4, 9-10 (Johnson Decl. ¶¶ 3-4, 10 & Fig. 2). Also, Mylan's Reply and its Response to the Sur-Reply devote more than 20 pages challenging the merits of Prof. Rosenthal's updated damages opinion.[7] *See* Doc. 2423-1 at 6-7, 14-15, 19-29; *see also* Doc. 2446-1 at 3-11. In this context, it is evident. Mylan has had ample opportunity to review Prof. Rosenthal's opinions since their disclosure, and it still has the capacity to challenge her opinions. Thus, the court finds Mylan isn't prejudiced here.

In sum, the court declines Mylan's invitation to exclude Prof. **[*86]** Rosenthal's updated damages opinions as untimely.

Second, Mylan argues that plaintiffs' updated damages opinion doesn't support class certification because plaintiffs never have identified any redressable injury for brand loyalists. *See* *California v. Texas, 141 S. Ct. 2104, 2115-16, 210 L. Ed. 2d 230 (2021)* (explaining that the redressability requirement "to satisfy Article III standing" requires that plaintiffs seek a judicial "remedy that will redress the individual plaintiffs' injuries"). Here, Mylan argues, Prof. Rosenthal previously testified that brand loyalists' damages are zero. *See* Doc. 1636-6 at 18 (Rosenthal Dep. 172:9-18). But, plaintiffs explain, Prof. Rosenthal gave this deposition testimony in February 2019—more than two years before she received Mylan's updated damages data supporting her overcharge damages opinion. For the same reasons already outlined, the court concludes that plaintiffs' failure to assert a redressable injury for brand loyalists before Mylan produced the updated damages data supporting Prof. Rosenthal's analysis shouldn't preclude them from asserting their overcharge damages theory based on newly provided data. With the updated damages data, plaintiffs have identified a redressable injury in the form of alleged EpiPen overcharges. **[*87]**

Also, the court concludes, *TransUnion* doesn't require decertification. Mylan argues that *TransUnion* requires a plaintiff have standing "at all stages of litigation" and to "demonstrate standing with the manner and degree of evidence required at the successive stages of the litigation." *TransUnion, 141 S. Ct. at 2208* (citations and internal quotation marks omitted). At this stage of the case, plaintiff's updated damages theory based on EpiPen overcharges satisfies this standing requirement.

TransUnion addressed the question whether every class member in that class action had satisfied the requirement of to demonstrate "Article III standing in order to *recover individual damages*" in the class action. *Id. at 2208* (emphasis added). *TransUnion* held that "the 6,332 class members whose internal TransUnion credit files" contained misleading information "did not suffer a concrete harm" because their credit files "were not disseminated to third-party businesses." *Id. at 2212*. As a consequence, those 6,332 class members lacked standing to assert *Fair Credit Reporting Act* claims against TransUnion. *Id. at 2214*. Thus, *TransUnion* deals with the standing requirement in the context of a class member's ability to recover damages. *TransUnion* never holds or even implies that class certification requires every class member to demonstrate standing. To the contrary, **[*88]** the Supreme Court said explicitly that it wasn't addressing that question. *See* *id. at 2208 n.4* ("We do not here address the distinct question whether every class member must demonstrate standing *before* a court certifies a class."). In short, *TransUnion* provides no reason to disturb the court's class certification Order.

Third, Mylan contends that Prof. Rosenthal's analysis extends only to third party payors ("TPPs")—not individual consumers. *See* Doc. 2412-2 at 9-10 (Rosenthal Decl. ¶ 13 & Fig. 3) (analyzing "the TPP EpiPen price per prescription, both gross and net of rebates" and concluding that it "decreased after the Mylan AG entry and, more importantly, continued to do so after the Teva generic's entry"). Thus, Mylan argues, Prof. Rosenthal's overcharge damages theory can't support class certification for an entire class that includes TPPs as well as consumers. Prof. Rosenthal disagrees with Mylan's argument, explaining that her analysis shows the same results—*i.e.*, decreasing EpiPen prices after generic entry—for both cash payors and insured consumers as it shows for TPPs. Doc. 2438-2 at 4-8 (Rosenthal Sur-Reply Decl. ¶¶ 5-8 & Figs. 3-5). As plaintiffs argue, Prof. Rosenthal's opinion means that all

---

[7] Mylan never applied to the court for permission to take Prof. Rosenthal's deposition about the opinions she's formed based on the updated data. When it comes to litigating aggressively, no one can accuse either side of the caption of shyness.

consumers **[*89]** sustained injuries in the real world where Mylan allegedly delayed generic entry. Based on Prof. Rosenthal's explanation, the court concludes that plaintiffs have come forward with opinion evidence capable of supporting a finding of classwide harm based on generic delay damages. Whether the finder of fact accredits that testimony is a separate question, but it's not one the court can decide on a pretrial motion.

But, Mylan also argues, Prof. Rosenthal's overcharge damages opinion isn't even plausible for insured consumers who paid a fixed co-pay. Mylan asserts that these class members are uninjured because they paid the same out-of-pocket co-pay regardless of the EpiPen's price. And so, Mylan argues, individualized inquiries are required to identify and exclude these uninjured insured consumers from the class. Plaintiffs respond, arguing that insured consumers still sustained an injury because the collateral source rule bars evidence of insurance payments since those insurance payments are independent of Mylan's conduct. According to plaintiffs, the collateral source doctrine permits insured consumers to assert their antitrust claims because they sustained injury even when the injury **[*90]** was reimbursed by insurance. *See, e.g., Goda v. Abbott Labs., No. 01445-96, 1997 D.C. Super. LEXIS 69, 1997 WL 156541, at *9 (D.C. Super. Ct. Feb. 3, 1997)* (applying the collateral source rule to a consumer class alleging antitrust injuries from paying overcharges for branded prescription drugs, even though consumers' insurance companies paid the overcharges, and finding "no reason why a wrongdoer should gain because his target has paid for coverage either through his dollars or through his [health care coverage]").

At class certification, the court addressed the parties' arguments about the collateral source doctrine. It concluded "that it need not decide—as a matter of law—whether the collateral source rule applies to plaintiffs' claims" on the certification motion because "the question whether the collateral source doctrine applies to plaintiffs who used insurance to pay for their EpiPen purchases is a legal issue that presents a common question that applies classwide." Doc. 2018-1 at 56. Also, the court noted, plaintiffs "expressly" had excluded from the class definitions: "'Single flat co-pay' consumers who purchased EpiPens or generic EpiPens only via a fixed dollar co-payment that is the same for all covered devices, whether branded or generic (*e.g.*, $20 for all branded and generic devices)." **[*91]** *Id.* at 55; *see also id.* at 127 (excluding from the class definition "'Single flat co-pay' consumers"). None of the parties raise this point in the briefing on the current motion. But, from the court's perspective, the certified class already excludes this group of consumers—*i.e.*, the single, flat co-pay consumers—who Mylan claims are uninjured, and thus lack standing. Based on this exclusion, the court can't find that Mylan's argument about insured consumers who paid flat co-pays provides a reason for the court to decertify the class.

Fourth, Mylan argues that Prof. Rosenthal's updated data fails to show injury to all TPPs. Specifically, Mylan argues that brand-loyal TPPs didn't sustain injury from the alleged generic delay because the Wholesale Acquisition Cost (WAC) never changed after Teva launched its generic EAI. Invoking opinions rendered by Mylan's own expert, Dr. Johnson, *see* Doc. 2423-2 at 13 & n.28 (Johnson Decl. ¶ 15), Mylan attacks Prof. Rosenthal's opinion that the branded EpiPen's price would have decreased in the but-for world for all TPPs because, Mylan argues, she bases that opinion on data showing the average third-party price *per prescription*. But, Mylan argues, any **[*92]** number of factors may affect a TPP's price per prescription. Those factors may include coverage changes, pharmacy discounts, or PBM policies—and not necessarily the entry of a generic competitor. Mylan's arguments go to the weight of Prof. Rosenthal's opinions. Plaintiffs have shown that her opinions are capable of proving injury to all TPPs based on her analysis of the decreasing price for branded EpiPen prescriptions. Mylan can attack Prof. Rosenthal's opinions through vigorous cross-examination or with contrary evidence—just as Mylan has done by offering Dr. Johnson's competing expert opinions supporting this Motion to Decertify. *See Daubert v. Merrell Dow Pharms., Inc., 509 U.S. 579, 596, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)* ("Vigorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence."); *see also In re Syngenta AG MIR 162 Corn Litig., No. 14-md-2591-JWL, 2016 U.S. Dist. LEXIS 132549, 2016 WL 5371856, at *10 (D. Kan. Sept. 26, 2016)* (concluding that defendants' criticisms of plaintiffs' experts' methodologies failed to show that they "are so unreliable as to preclude certification" but instead, "[m]ore importantly for purposes of certification, these criticisms present common questions that do not undermine a finding of predominance"); *In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. 14-md-02503, 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *10 (D. Mass. Oct. 16, 2017)* (concluding, at class certification **[*93]** stage, "any disagreement [about expert's method of calculating damages] does not overcome the Plaintiffs' showing that damages will be substantially shown by common proof"). But, the conflicting expert opinions don't provide a reason for the court to decertify the state antitrust class. Instead, the conflicting opinions present a jury question whether all TPPs sustained injury from the alleged generic delay. And, this issue is one common to the class. Thus, Mylan's arguments on this fourth point don't require the court to decertify the class.

Fifth, Mylan argues that the updated data doesn't solve the problem of having uninjured class members in the certified class because the updated data reveals two additional categories of class members who are not injured. According to Mylan, the two additional categories consist of: (1) consumers who would have switched to the Auvi-Q or the Adrenaclick authorized generic; and (2) TPPs who paid more for the Teva generic than the branded EpiPen device.

For the first group—consumers who would have switched to the Auvi-Q or the Adrenaclick authorized generic—Mylan argues that these consumers (and their TPPs who reimbursed their purchases) weren't injured **[*94]** by the alleged delay of the Teva generic (the only claim remaining in the case) because they didn't switch to the Teva generic when it became available but, instead, switched to Auvi-Q or Adrenaclick's authorized generic. But as plaintiffs explain, neither of Mylan's arguments establish that the class necessarily includes uninjured class members. First, for consumers who purchased an EpiPen during the relevant class period, plaintiffs have adduced evidence capable of supporting a finding that they sustained injury because they paid an inflated price caused by generic delay. This outcome—if accredited by the factfinder—establishes an injury even if these consumers later switched to Auvi-Q or Adrenaclick's EAI.[8] Second, Mylan's argument assumes that these consumers—who switched from EpiPen to Auvi-Q or Adrenaclick in the actual world—never would have purchased a generic EAI in a but-for world where the generic EAI would have been available to purchase years earlier than in the real world. In sum, plaintiffs have demonstrated that they can prove injuries common to class members consisting of consumers (and their TPPs who reimbursed their purchases) who switched from purchasing the EpiPen **[*95]** to purchasing the Auvi-Q or the Adrenaclick authorized generic.

For the second group—TPPs who paid more for Teva's generic than the branded EpiPen device—Mylan argues that these class members are uninjured because these TPPs actually paid less for EpiPens before a generic entered the EAI market. Mylan asserts that Prof. Rosenthal's new data shows EpiPen prices paid by TPPs as well as the rebates Mylan paid to those TPPs. But her data doesn't include any information about rebates Teva paid to TPPs—if it paid any at all. Mylan's expert, Dr. Johnson, has analyzed Prof. Rosenthal's data, and he opines that it shows prices were "higher for TPPs whose members switched to the 'independent' Teva generic product than if they had stayed with the branded product." Doc. 2423-2 at 9-10 (Johnson Decl. ¶ 10 & Fig. 2). Mylan argues that the only way to determine whether TPPs paid more for EpiPen or the Teva generic is to conduct an individualized inquiry of each TPP's rebate arrangements with Mylan and Teva. And, Mylan contends, these individual issues preclude *Rule 23(b)(3)*'s requirement that "questions of law or fact common to class members predominate over any questions affecting only individual members[.]" **[*96]** *Fed. R. Civ. P. 23(b)(3)*; *see also CGC Holding Co. v. Broad & Cassel, 773 F.3d 1076, 1087 (10th Cir. 2014)* (explaining that plaintiffs bear the burden under *Rule 23(b)(3)* to "show that common questions subject to generalized, classwide proof *predominate* over individual questions").

Plaintiffs respond, arguing that Dr. Johnson's comparison of actual-world, net EpiPen prices to actual-world, gross Teva generic prices is not the appropriate measurement to determine whether TPPs sustained injury. Instead, plaintiffs explain through Prof. Rosenthal's opinions that the correct comparison compares the net price paid by TPPs for EpiPen in the real world with the price TPPs would have paid for Teva's generic in the but-for world. Doc. 2438-2 at 9 (Rosenthal Sur-Reply Decl. ¶ 11). Prof. Rosenthal calculates Teva's generic price on a per prescription basis, in the but-for world, at $163 per prescription. Doc. 2132-7 at 97 (Rosenthal Merits Expert Report Attach. C.6.a). And, she explains that the Teva generic's price in the but-for world is well below the prices Dr. Johnson provides in his analysis. Doc. 2438-2 at 9-12 (Rosenthal Sur-Reply Decl. ¶¶ 10-14 & Figs. 6, 7, 8).

---

[8] The class only consists of consumers or TPPs who purchased EpiPens during the relevant class period. Plaintiffs aren't asserting claims based on Auvi-Q or Adrenaclick purchases.

Mylan criticizes Prof. Rosenthal for relying on real-world data, in some instances, to show declining EpiPen prices after generic entry **[*97]** while also asserting that the but-for world generic price is the correct comparison to show that TPPs sustained injury from alleged generic delay. Prof. Rosenthal's approach, Mylan contends, is inconsistent. But, Prof. Rosenthal provides an adequate explanation why she makes the actual and but-for world comparisons and why her expert opinion shows that TPPs sustained injury from the alleged generic delay in the form of paying more for EpiPen than the Teva generic. *See* Doc. 2438-2 at 9-13 (Rosenthal Sur-Reply Decl. ¶¶ 10-17 & Figs. 6, 7, 8). Prof. Rosenthal's opinions provide plaintiffs a method for proving classwide injury through common evidence. Thus, the court declines to decertify the class on this basis.[9]

2. Motion to Decertify Portions of the Class for States That Allegedly Have No Adequate or Typical Class Representative

As an alternative to decertifying the entire state law antitrust class, Mylan asks the court to decertify certain portions of the class. Mylan contends there are portions of the class that lack an adequate and typical class representative who properly can assert state antitrust generic delay claims on behalf of the class.

Two of *Rule 23(a)*'s class certification requirements **[*98]** are that the representative class members (1) must assert claims or defenses that "are typical of the claims or defenses of the class" and (2) that they "will fairly and adequately protect the interest of the class." *Fed. R. Civ. P. 23(a)(3)—(4)*. Mylan asserts that two groups of named plaintiffs no longer satisfy *Rule 23(a)*'s typicality and adequacy requirements, and thus they can't serve as class representatives in this certified class action. *First*, Mylan argues that Local 282 isn't an adequate or typical class representative to represent third-party payors ("TPPs") in 14 of the 16 Antitrust States because it never reimbursed the purchase of an EpiPen in those states. *Second*, Mylan contends that the court should decertify the antitrust class in at least seven of the Antitrust States because those states lack an adequate or typical class representative to represent individual end-payor consumers. The court addresses the two arguments, separately, below. It begins with the argument about Local 282.

a. Local 282

Mylan argues that Local 282 is no longer a typical or adequate class representative to represent TPPs because it never reimbursed the purchase of an EpiPen device in 14 of the 16 Antitrust States during the class **[*99]** period. Mylan asserts, correctly, that Local 282 is the only named plaintiff who is a TPP. And, Mylan argues, because Local 282 never reimbursed EpiPen purchases in 14 of the Antitrust States, it has no antitrust claim under these 14 states' laws. As a consequence, Mylan argues, Local 282 can serve as the class representative only for claims relying on New York and Florida law—the two states where it reimbursed EpiPen purchases during the class period. And, Mylan asks the court to decertify the TPP antitrust claims in the other 14 states where Local 282 made no EpiPen reimbursements during the class period.

Plaintiffs respond, arguing that Mylan bases its argument on the flawed premise that the court certified two separate antitrust classes—one for TPPs and one for individual consumers. As plaintiffs correctly explain, the court did no such thing. The TPPs are not a separate class. Instead, the court's class certification Order certified a state antitrust class action consisting of "[a]ll persons and entities in the Antitrust States who paid or provided reimbursement for

---

[9] Plaintiffs' Opposition to the Motion to Decertify also argues that consumers sustained injury caused by the alleged generic delay through a "loss of choice" to purchase a generic EAI. Doc. 2404 at 12. As Mylan correctly argues, the court's summary judgment Order recognized that "those class members who chose to purchase branded EpiPen products over a generic sustained no loss of choice." Doc. 2381 at 179. Also, plaintiffs conceded at summary judgment that "Prof. Rosenthal's 'loss of choice' opinion is not a measure of damages." *Id.* (citing Doc. 2183-1 at 20). So, Mylan argues, plaintiffs' loss of choice argument isn't evidence of classwide injury sufficient to support class certification of the state antitrust class. Because the court already has determined that plaintiffs have come forward with evidence of classwide injury consisting of Prof. Rosenthal's overcharge theory of damages, the court need not further address plaintiffs' "loss of choice" argument.

some or all of the purchase price of Branded EpiPens at any time" in the class period "for the purpose of consumption, **[*100]** and not resale, by themselves, their family member(s), insureds, plan participants, employees, or beneficiaries." Doc. 2018-1 at 126 (footnote omitted). Under this definition, the certified class includes both TPPs and individual consumers—as long as they made qualifying EpiPen purchases during the class period. And, because Local 282 is an "entity" who reimbursed EpiPen purchases in two of the 16 Antitrust States during the class period, it is an adequate and typical class representative to represent the interests of the class. *See In re Warfarin Sodium Antitrust Litig., 391 F.3d 516, 531 (3d Cir. 2004)* (finding that trial court didn't err by including TPPs in the certified class because "TPPs, like individual consumers, suffered direct economic harm when, as a result of [defendant's] alleged misrepresentations, they paid supracompetitive prices for [a prescription drug] instead of purchasing lower-priced generic warfarin sodium").

For the other 14 states "where Local 282 does not have beneficiaries," plaintiffs argue that "the individual consumer Class representatives can serve as the class representative" for those states. Doc. 2404 at 27. The court generally agrees with plaintiffs' argument, but there's a problem with their argument for two states: **[*101]** Nevada and North Carolina. Local 282 is the only named plaintiff for Nevada[10] and North Carolina.[11] But, Local 282 reimbursed no EpiPen purchases after March 14, 2014 (the alleged but-for generic entry date) in these two states. Thus, Mylan argues, Local 282 did not sustain any injury in Nevada or North Carolina produced by Mylan's alleged generic delay. And, as a consequence, Local 282 doesn't have standing to assert antitrust claims under the laws of Nevada and North Carolina.

Plaintiffs don't respond directly to Mylan's argument that Local 282's failure to reimburse EpiPen purchases after the but-for generic entry date in these two states makes it an inadequate and atypical class representative. Based on plaintiffs' failure to respond and because the Pretrial Order doesn't include any other properly-named plaintiff who can serve as an adequate representative for claims under Nevada or North Carolina law, the court agrees with Mylan's argument. Lacking an adequate representative to make these claims on the class's behalf, the court must decertify the portion of the state antitrust class action asserting claims under the antitrust laws of Nevada and North Carolina. So, for this reason, **[*102]** the court grants Mylan's request to decertify the state antitrust classes for Nevada and North Carolina.

Also, Mylan's Reply raises two new arguments about TPPs in response to plaintiffs' proffer of Prof. Rosenthal's updated analysis. *First*, Mylan argues that the court must exclude TPPs from the class because of a class conflict. For support, Mylan again cites its own expert's opinion. They rely on Dr. Johnson's analysis of Prof. Rosenthal's data which—he opines—shows that TPPs paid more for the Teva generic in the real world than they paid for the branded EpiPen device. Thus, Mylan argues, TPPs have a conflict with individual consumers who—plaintiffs allege—would have paid less for a Teva generic than a branded EpiPen. Prof. Rosenthal disagrees with Dr. Johnson's opinions. She has come forward and explained adequately why she compared actual and but-for prices. Prof. Rosenthal also explains how her comparison concluded that TPPs would have paid less for the Teva generic in the but-for world. Thus, Prof. Rosenthal opines, TPPs sustained injuries from the alleged generic delay. If the trier of fact accepts Prof. Rosenthal's explanation, no class conflict exists between TPPs and individual **[*103]** consumers because, according to Prof. Rosenthal, both of these groups sustained injury from Mylan's alleged generic delay. Thus, based on the current record, the court declines to exclude TPPs from the class.

Second, Mylan argues that a conflict exists between TPPs and consumers because they each paid a portion of the EpiPen's price, and should plaintiffs prevail on their generic delay claims, each is entitled to recover a portion of the

---

[10] Originally, the Consolidated Class Action Complaint named two plaintiffs who purchased EpiPens in Nevada: Local 282 and Miriam Clarke. Doc. 60 at 11, 19 (Compl. ¶¶ 10, 41). Ms. Clarke voluntarily dismissed her claims against Mylan on February 7, 2018. Doc. 139 at 1. Thus, Local 282 is the only remaining named plaintiff and class representative for Nevada EpiPen purchasers.

[11] Likewise, the Consolidated Class Action Complaint named two plaintiffs who purchased EpiPens in North Carolina: Local 282 and Cassandra Cobb. Doc. 60 at 11, 20 (Compl. ¶¶ 10, 47). Ms. Cobb voluntarily dismissed her claims against Mylan on February 7, 2018. Doc. 139 at 1. Thus, Local 282 is the only remaining named plaintiff and class representative for North Carolina EpiPen purchasers.

alleged overcharges. Mylan contends that this scenario pits TPPs and consumers against each other because each group will argue that they paid a higher portion of the alleged overcharge, and thus are entitled to a bigger share of the recovery. Mylan concedes that it already raised this argument at the class certification stage, and the court previously rejected it. *See* Doc. 2018-1 at 41-44; *see also id.* at 43 (explaining that "defendants don't persuade the court that the alleged conflict between consumers and third-party payors precludes class certification" because "the current record shows that consumers and third-party payors share" the same interest in that "they both seek to prove that defendants' illegal conduct caused them to sustain injuries **[*104]** in the form of overpaying for the EpiPen"). But, Mylan contends that the court should revisit this issue because—Mylan argues—there is no named plaintiff TPP for 14 of the 16 states. Thus, Mylan contends, no plaintiff exists who can represent TPPs' interests adequately in 14 of the 16 Antitrust States.

The court isn't persuaded by Mylan's argument. As it found at the class certification stage, the court concludes that Mylan's argument is "merely speculative" and it "has not shown that the composition of any class will create internal competition for damages shares." *Id. at 41-42*. So, the court again denies Mylan's request to exclude TPPs from the class based on this speculative conflict argument.

b. Consumer Named Plaintiffs

Next, Mylan argues that no named plaintiff in at least seven of the Antitrust States (Alabama, Florida, Hawaii, Maine, Minnesota, Nebraska, and New York) sustained damages from any alleged generic delay because either: (a) the class representatives for those states testified that they were EpiPen brand loyalists; or (b) the purchasing records show that they only purchased branded devices. Thus, Mylan argues, the class representatives for these seven states are uninjured, and **[*105]** so they can't serve as adequate or typical class representatives for the class members.

With this argument, Mylan asks to relitigate issues its already litigated and lost. Mylan asserted this argument at class certification. Doc. 2018-1 at 37-40. Mylan's argument didn't persuade the court then, *id.* at 39-40, and it still doesn't convince the court now. As plaintiffs explained on class certification, Prof. Rosenthal opines that the named plaintiffs' purchasing history isn't indicative of brand loyalty because the alleged generic delay affected consumer switching patterns. *Id.* at 37. Prof. Rosenthal opines that consumers would have switched to a generic earlier in the but-for world where a generic would have become available to purchase sooner than it was in the real world because of the alleged generic delay. *Id.* at 38. Prof. Rosenthal's opinion is capable of showing that named plaintiffs who purchased branded EAIs still sustained injury because they would have switched to a generic earlier in that but-for world. Also, her updated opinion shows that these named plaintiffs—even if brand loyalists—sustained injury in the form of paying overcharges for EpiPen. Thus, plaintiffs have demonstrated **[*106]** sufficiently that the named representative plaintiffs sustained an injury from Mylan's alleged anticompetitive conduct, thus making them typical and adequate class representatives to represent the interests of class members.

Also, Mylan argues that testimony by named class representatives establishes that they are brand loyalists who weren't injured by any generic delay. Plaintiffs respond, arguing that Mylan misrepresents their testimony. The court agrees that these seven class representatives' deposition testimony doesn't establish that they are uninjured brand loyalists who are atypical and inadequate class representatives. Instead, the deposition testimony shows that these plaintiffs didn't know generic alternatives were available and, in fact, many of them testified that they likely would have purchased a generic had they known one was available or if it was cheaper than buying a branded EpiPen. And, importantly, all seven of these plaintiffs were deposed before November 2018, when the Teva generic launched. So, no AB-rated generic was available for purchase when these plaintiffs gave their deposition testimony.

For the Alabama claim, named representative plaintiff Kenneth James **[*107]** Evans's testimony shows that he didn't know a generic was available, and had he known about a generic, he testified he probably would have purchased one. Doc. 2404-13 at 4 (Evans Dep. 106:8-15). Thus, Mr. Evans's testimony shows that he was willing to purchase a generic, and thus wasn't brand loyal.

For Florida, named representative plaintiff Lee Seltzer testified that he didn't know a generic EAI was available. Doc. 2404-15 at 7 (Seltzer Dep. 157:16-22). Also, he testified that he purchased an Auvi-Q EAI—which is another branded product. *Id.* at 4 (Seltzer Dep. 76:4-24). But, it's not an EpiPen so his testimony shows he was not brand loyal to EpiPen. None of Mr. Seltzer's testimony establishes that he was brand loyal and never would have purchased a generic. To the contrary, his testimony shows that he was willing to buy devices other than EpiPen and that he didn't know a generic was available to purchase.

For Hawaii, named representative plaintiff Linda Wagner testified that she preferred the branded EpiPen because her doctor prescribed it for her, but she also testified that she would prefer a generic EAI if it was cheaper and her doctor prescribed it for her. Doc. 2404-7 at 4 (Wagner **[*108]** Dep. 116:13-24). Thus, Ms. Wagner's testimony fails to show that she was brand loyal and never would have purchased a generic. To the contrary, Ms. Wagner testified that she was amenable to buying a generic.

For Maine, named representative plaintiff Lorraine Wight testified that she purchased generic EpiPens. Doc. 2404-8 (Wight Dep. 150:13-20). But, Mylan argues, Ms. Wight only made these generic purchases because there was a shortage of branded EpiPens in her area, and according to Mylan, Ms. Wight testified that EpiPen was the "only acceptable option." Doc. 2390-4 at 6 (Wight Dep. 26:9-13). But, in context, Ms. Wight testified that *her doctor* had told her that the EpiPen was her "only acceptable option" because other EAI devices weren't available on the market. *Id.* at 5-6 (Wight Dep. 25:16-26:8). And, Ms. Wight specifically testified that she was "asking about other alternatives" to EpiPen, thus showing that she wasn't brand loyal. *Id.* at 5 (Wight Dep. 25:23).

For Minnesota, named representative plaintiff Heather Marie DeStefano testified that she didn't know other EAI devices were available because all she'd ever heard about was EpiPen. Doc. 2404-12 at 3-4 (DeStefano Dep. 127:17-128:6). **[*109]** And for Nebraska, named representative plaintiff Mark Kovarik testified that he was unaware that a generic EpiPen was available. Doc. 2404-14 at 4-5 (Kovarik Dep. 79:24-80:1). So, neither Ms. DeStefano nor Mr. Kovarik testified that they are brand loyalists. Instead, they testified that they didn't know other options were available to purchase. This testimony doesn't show that either Ms. DeStefano or Mr. Kovarik lacks standing to assert generic delay claims.

Finally, for New York, named representative plaintiff Donna Wemple testified that she "would be more likely to purchase the generic" because it's priced lower. Doc. 2404-11 at 3-4 (Wemple Dep. 257:25-258:17). Thus, Ms. Wemple's testimony contradicts Mylan's argument that she's brand loyal. Instead, as Ms. Wemple testified, she says she's more likely to buy a generic.[12]

None of this testimony shows that these seven plaintiffs were brand loyal. To the contrary, it shows that these plaintiffs either were unaware of other buying options or that they likely would purchase a generic EAI if it was made available to them. Thus, plaintiffs have shown that these seven named plaintiffs have sustained injury from the alleged generic delay. **[*110]** And, the seven named plaintiffs thus are typical and adequate class representatives to represent the class members. The court refuses to decertify the state ***antitrust law*** claims for these seven Antitrust States based on Mylan's argument that they lack an injured named plaintiff to represent the class.

Last, Mylan argues that the court should dismiss plaintiff Anastasia Johnston's claims because her EpiPen purchase records show that she paid $0 for her EpiPen purchases. Doc. 2390-3 at 2 (citing Doc. 1636-2 at 192). Mylan argues that Ms. Johnston sustained no injuries and lacks standing to assert her antitrust generic delay claims under Michigan law. *See* Doc. 60 at 17 (Compl. ¶ 35) (alleging that Ms. Johnston is a resident and citizen of Michigan). Plaintiffs concede that Ms. Johnston doesn't satisfy the class definition and thus is not a proper class representative. Doc. 2404 at 26. And, they concede that her claims are subject to dismissal. *Id.* But, as plaintiffs

---

[12] Mylan makes similar arguments about named plaintiffs Teia Amell (Maryland) and Meredith Krimmel (Texas)—*i.e.*, that their deposition testimony establishes they are brand loyalists who sustained no injury. *See* Doc. 2423-1 at 32 n.20. But, these named plaintiffs aren't part of the state antitrust class action because Maryland and Texas aren't included in the 16 Antitrust States. In any event, the court agrees with plaintiffs. These two named plaintiffs' deposition testimony doesn't establish definitively that they are EpiPen brand loyalists.

correctly assert, Ms. Johnston's dismissal doesn't require the court to decertify the Michigan state law antitrust class action because another named plaintiff—Annette Sutorik—purchased EpiPens in Michigan, and thus, she is **[*111]** a properly-named plaintiff who brings antitrust claims under Michigan law. *See* Doc. 60 at 18 (Compl. ¶ 36).

III. Motions for Leave to File Under Seal

Both sides of the caption have moved to file under seal certain portions of their briefs and some exhibits supporting or opposing the Mylan Defendants' Motion to Decertify. *See* Docs. 2423, 2438, 2439, 2446, 2460, 2461. The court rules those motions in the following fashion, after reciting the governing legal standard.

The Supreme Court recognizes a "general right to inspect and copy public records and documents, including judicial records and documents." *Nixon v. Warner Commc'ns, Inc., 435 U.S 589, 597, 98 S. Ct. 1306, 55 L. Ed. 2d 570 (1978)* (citations omitted). Nevertheless, a party may rebut the presumption of access to judicial records by demonstrating that "countervailing interests heavily outweigh the public interests in access." *Mann v. Boatright, 477 F.3d 1140, 1149 (10th Cir. 2007)* (citation and internal quotation marks omitted). The party seeking to deny access must shoulder the burden to establish a sufficiently significant interest outweighing the presumption of access. *Id.* (citation and internal quotation marks omitted); *see also United States v. Bacon, 950 F.3d 1286, 1293 (10th Cir. 2020)* ("[T]he party seeking to keep records sealed bears the burden of justifying that secrecy," and it must "articulate a sufficiently significant **[*112]** interest that will justify continuing to override the presumption of public access[.]" (citation and internal quotation marks omitted)). The decision whether a judicial record qualifies for sealing under this governing standard "is a matter left to the sound discretion of the district court." *Mann, 477 F.3d at 1149* (citing *Nixon, 435 U.S. at 599*).

The parties' sealing requests fall into three categories.

First, Mylan moves for leave to file under seal preliminarily its Reply in Support of the Motion to Decertify. Doc. 2423. The motion seeks leave to file under seal Mylan's Reply and Exhibit 2 to the Reply which is the Declaration of Dr. John H. Johnson, IV. *Id.* at 2. Later, Mylan filed a renewed motion for leave to file under seal after conferring with plaintiffs and relevant third parties about the information they believe qualifies for sealing in these documents. Mylan's renewed motion seeks leave to file under seal certain portions of its Reply and certain portions of Exhibit 2 that Mylan, plaintiffs, or third party CVS asserts qualifies for sealing. Doc. 2439.

The court denies as moot the preliminary motion seeking leave to file under seal (Doc. 2423). And, the court grants the renewed motion seeking leave to file under seal **[*113]** (Doc. 2439). Mylan asks to redact limited portions of the Reply and Exhibit 2 to the Reply that contain commercially sensitive data including pricing and market share information. Mylan asserts that, if disclosed, this information could harm Mylan or third party CVS. Also, some of the proposed redactions contain IQVIA data that was produced to the parties under an agreement containing a confidentiality clause. Given these interests, the court finds that Mylan has shouldered its burden. It has established that the need to preserve the confidentiality of the specific and limited redactions they seek outweighs the public's right to access the material. The court thus grants its request for leave to file under seal certain portions of the Reply and Exhibit 2 to the Reply. The court directs Mylan to do two things: (1) file under seal the Reply and Exhibit 2, and (2) file publicly the Reply and Exhibit 2, redacting the limited information that Mylan has shown qualifies for sealing.

Second, plaintiffs filed an Unopposed Motion for Leave to Provisionally File Under Seal Their Sur-reply to Mylan's Motion to Decertify the State Antitrust Class. Doc. 2438. The motion seeks leave to file under **[*114]** seal plaintiffs' Surreply and Exhibit O to the Surreply which is Prof. Rosenthal's Surreply Declaration. After the parties conferred about the information that may qualify for sealing in these documents, Mylan filed a Renewed Motion for Leave to File Under Seal Plaintiffs' Sur-reply to Motion to Decertify. Doc. 2460. It seeks the court's leave permitting plaintiffs to file under seal just certain portions of the Surreply and Exhibit O because they contain sensitive commercial information.

The court denies as moot plaintiffs' preliminary motion (Doc. 2438). And, the court grants Mylan's renewed motion seeking leave for plaintiffs to file their Surreply and Exhibit O under seal (Doc. 2460). As Mylan sufficiently explains, these narrow portions of the Surreply and Exhibit O that it seeks leave for plaintiffs to file under seal "reference conclusions drawn from IQVIA and rebate data regarding the pricing of EpiPen devices and competitor EAI devices." Doc. 2460-1 at 2. As already discussed, this data is commercially sensitive information that could harm Mylan if disclosed. Also, the IQVIA data is highly confidential and was produced under an agreement with a confidentiality clause. Applying **[*115]** the governing legal standard, the court finds that Mylan has established that the need to preserve the confidentiality of the specific and limited redactions they seek outweighs the public's right to access the material. So, the court directs plaintiffs to file: (1) their Surreply and Exhibit O under seal, and (2) their Surreply and Exhibit O publicly with the limited redactions Mylan has shown qualify for sealing.

Third, Mylan has filed a Motion for Leave to Preliminarily File Under Seal Its Response to Plaintiffs' Sur-reply to Motion to Decertify. Doc. 2446. It seeks leave to file under seal Mylan's Response to plaintiffs' Surreply because, Mylan asserts, it contains confidential information. After conferring with plaintiffs about its sealing requests, Mylan filed a Renewed Motion for Leave to File Under Seal Its Proposed Response to Plaintiffs' Sur-reply to Motion to Decertify. Doc. 2461.

The court denies as moot Mylan's preliminary motion seeking leave to file under seal (Doc. 2446). And, the court grants Mylan's renewed motion for leave to file under seal (Doc. 2461). Like the motions already discussed, Mylan seeks leave to file under seal portions of its Response to plaintiffs' **[*116]** Surreply that discuss IQVIA and rebate data. For the same reasons already discussed, the court finds these limited portions qualify for sealing because the need to preserve the confidentiality of this information outweighs the public's right to access the material. So, the court directs Mylan to: (1) file under seal its Response to plaintiffs' Surreply, and (2) file publicly its Response to plaintiffs' Surreply with the limited redactions they have shown qualify for sealing.

IV. Conclusion

For reasons explained in this Order, the court grants the Mylan Defendants' Motion to Decertify the State Antitrust Class (Doc. 2389) in part and denies it in part. Also, the court grants the class plaintiffs' Motion for Leave to File a Surreply (Doc. 2437). And, the court rules the parties' Motions for Leave to File Under Seal (Docs. 2423, 2438, 2439, 2446, 2460 & 2461) consistent with the conclusions reached in this Order's Part III.

Also, as discussed above on page 12, the court directs the parties to confer and propose appropriate jury instructions and verdict form addressing whether each class member has sustained damage from the generic delay. The parties should include these proposed instructions **[*117]** and verdict form with their submission of joint jury instructions, as the Amended Trial Order directs. *See* Doc. 2415 at 3.

IT IS THEREFORE ORDERED BY THE COURT THAT the Mylan Defendants' Motion to Decertify the State Antitrust Class (Doc. 2389) is granted in part and denied in part. The court grants Mylan's motion to decertify the Nevada and North Carolina state law antitrust claims' class actions because no named plaintiff purchased an EpiPen in those two states after the alleged but-for generic entry date, and thus, no named plaintiff sustained injury under the antitrust laws of Nevada or North Carolina based on any generic delay. Also, the court grants Mylan's request to dismiss plaintiff Anastasia Johnston's claims because she sustained no financial injury. But, the court denies the motion in all other respects.

IT IS FURTHER ORDERED THAT the class plaintiffs' Motion for Leave to File a Surreply (Doc. 2437) is granted.

IT IS FURTHER ORDERED THAT Mylan's Motion for Leave to Preliminarily File Under Seal Its Reply in Support of the Motion to Decertify (Doc. 2423) is denied as moot.

IT IS FURTHER ORDERED THAT Mylan's Renewed Motion for Leave to File Under Seal its Reply in Support of **[*118]** the Motion to Decertify (Doc. 2439) is granted.

IT IS FURTHER ORDERED THAT Class Plaintiffs' Unopposed Motion for Leave to Provisionally File Under Seal Their Sur-reply to Mylan's Motion to Decertify the State Antitrust Class (Doc. 2438) is denied as moot.

IT IS FURTHER ORDERED THAT Mylan's Renewed Motion for Leave to File Under Seal Plaintiffs' Sur-reply to Motion to Decertify (Doc. 2460) is granted.

IT IS FURTHER ORDERED THAT Mylan's Motion for Leave to Preliminarily File Under Seal Its Response to Plaintiffs' Sur-reply to Motion to Decertify (Doc. 2446) is denied as moot.

IT IS FURTHER ORDERED THAT Mylan's Renewed Motion for Leave to File Under Seal Its Proposed Response to Plaintiffs' Sur-reply to Motion to Decertify (Doc. 2461) is granted.

IT IS SO ORDERED.

Dated this 15th day of December, 2021, at Kansas City, Kansas.

Opinion

ORDER

Before us are two motions to compel. One was filed in Case No. 19 C 8318 by Defendants Agri Stats, Inc., Butterball LLC, Cargill Meat Solutions Corporation, Cargill, Inc., Cooper Farms, Inc., Farbest Foods, Inc., Foster Farms, LLC, Foster Poultry Farms, Hormel Foods Corporation, Hormel Foods, **[*6]** LLC, House of Raeford Farms, Inc., Perdue Farms, Inc., Perdue Foods LLC, The Hillshire Brands Company, Tyson Foods, Inc., Tyson Fresh Meats, Inc., Tyson Prepared Foods, Inc. ("Defendants")[1] against Plaintiffs Olean Wholesale Grocery Cooperative, et al., also known for purposes of this motion as the "Direct Purchaser Plaintiffs" ("DPPs") (D.E. 242: Mot. to Compel DPPs). The second motion addressed by this Order was filed in Case No. 20 C 2295[2] by Defendants against Plaintiffs Sandee's Bakery, et al., also known as the "Indirect Purchaser Plaintiffs" ("IPPs") (D.E. 163, 20 C 2295: Mot. to Compel IPPs). Although Defendants' initial brief was identical in both cases, each set of Plaintiffs filed its own - different - response (D.E. 249: DPPs' Resp. to Mot.; D.E. 172 (No. 20 C 2295): IPPs' Resp. to Mot.), to which Defendants filed identical replies (D.E. 252: Reply to DPPs; D.E. 176 (No. 20 C 2295): Reply to IPPs).

I. BACKGROUND

All Defendants except Agri Stats are breeders, processors, and sellers of turkeys and turkey products who are accused by Plaintiffs of artificially inflating turkey prices through the exchange of information in reports created by Defendant Agri Stats. The DPPs buy turkey **[*7]** and turkey products directly from Defendants. The IPPs purchase turkey and turkey products either from a DPP or another IPP. Both the DPPs and the IPPs contend that Defendants' alleged anticompetitive behavior caused them to be overcharged for turkey they purchased - the DPPs when they bought turkey from one or more Defendants and the IPPs when they bought turkey that "passed on," to them, the artificially inflated price. At issue in the motions to compel is Defendants' request for certain so-called "downstream discovery," related to the sale and pricing of turkey as it was sold and resold by the DPPs and IPPs to other buyers.[3]

II. MOTIONS TO COMPEL

---

[1] After the filing of the instant motions, Defendants Tyson Foods, Inc., Tyson Fresh Meats, Inc., Tyson Prepared Foods, Inc. are in the process of settling the class claims against them in this matter. (D.E. 265.)

[2] On May 26, 2020, the district court consolidated Case No. 19 C 8318 with Case No. 20 C 2295 (D.E. 139.) Except where noted, citations to docket entries in this order are to the docket in No. 19 C 8318. This matter is before the magistrate judge on a referral for discovery supervision. (D.E. 267, 268.)

[3] "Downstream discovery" refers to "documents and data reflecting a purchaser's use or sale of a product after the purchase." ***In re Plasma-Derivative Protein Therapies Antitrust Litig., 09 C 7666, 2012 U.S. Dist. LEXIS 61114, 2012 WL 1533221, *1 (N.D. Ill. April 27, 2012)***. Specifically, Defendants seek the following information from both the DPPs and the IPPs: (1) documents sufficient to show how prices for turkey are set (RFP 22); (2) sales data for turkey (RFP 26); (3) documents sufficient to show orders and backlog of turkey sold by Plaintiffs (RFP 27); (4) documents sufficient to show the geographic markets for which Plaintiffs sell turkey (RFP 29); (5) documents sent to, or received from others regarding actual or potential sales or purchases of turkey (RFP 32); and (6) documents sent to, or received from others regarding the processing of turkey (RFP 33). (Def. Mots. to Compel. at 4). All parties appear to accept that all of these requests concern "downstream data," discussed below in Part III.

District courts - including magistrate judges - have broad authority to manage their dockets, including determining the scope of allowable discovery. *Jones v. City of Elkhart, 737 F.3d 1107, 1115 (7th Cir. 2013)*. In making our decision on this motion to compel, we are guided as always by *Fed. R. Civ. P. 26(b)(1)*, which provides that parties may obtain discovery regarding any non-privileged matter that is relevant to the claim or defense of any party's claim or defense and proportional to the needs of the case, considering the importance of the issues at stake in the action, the amount in controversy, the parties' relative **[*8]** access to relevant information, the parties' resources, the importance of the discovery in resolving the issues, and whether the burden or expense of the proposed discovery outweighs its likely benefit. *In re Broiler Chicken Antitrust Litig., No. 16 C 8637, 2018 U.S. Dist. LEXIS 116658, 2018 WL 3398141, at *1 (N.D. Ill. July 12, 2018)* ("*Broiler I*"). At the discovery stage, "relevant" evidence under *Rule 26(b)(1)* is broader than it would be at trial; evidence does not need to be admissible to be discoverable. *Coleman v. Illinois, No. 19 C 3789, 2020 U.S. Dist. LEXIS 177020, 2020 WL 5752149, at *3 (N.D. Ill. Sept. 25, 2020)*.

III. DOWNSTREAM DISCOVERY

This discovery dispute turns on the question of whether "downstream discovery" is relevant to these consolidated-for-discovery antitrust cases, one brought by direct purchasers and one brought by indirect purchasers.[4] There is no absolute bar to downstream discovery in private antitrust cases, but it is usually not relevant in federal antitrust cases brought *solely* by direct purchaser plaintiffs, because federal ***antitrust law*** does not recognize a cause of action for indirect purchasers to claim they were overcharged amounts that were "passed on" from direct purchasers (who were first allegedly overcharged by defendants/sellers). Therefore, when only direct purchasers bring suit, defendants are barred from arguing as a defense that the allegedly overcharged amounts were "passed on" by the direct purchasers **[*9]** to indirect purchasers downstream. *Broiler I, 2018 U.S. Dist. LEXIS 116658, 2018 WL 3398141, at *1*, citing *In re Plasma-Derivative Protein Therapies Antitrust Litig., No. 09 C 7666, 2012 U.S. Dist. LEXIS 61114, 2012 WL 1533221, at *2 (N.D. Ill. Apr. 27, 2012)* (citing a "plethora of case law").

Defendants argue that downstream discovery is within the scope of *Rule 26(b)(1)* in the DPP and IPP cases here. The IPP case is clearly a different posture, in that the IPPs sue for damages from being overcharged in the purchases they made indirectly (i.e., through others) from Defendants, and those claims exist in the IPP case under various state laws, including "repealer" (of the federal law prohibition on indirect purchaser antitrust claims) laws or unjust enrichment statutes.[5] As were the direct purchaser plaintiffs in *Broiler I*, the DPPs are third parties in the IPP matter, and downstream discovery from direct purchasers sometimes has been held to be relevant in indirect purchaser antitrust lawsuits because the information about direct purchaser pricing practices can be relevant to the relevant overcharge the indirect purchasers claim they paid. *See Broiler I, 2018 U.S. Dist. LEXIS 116658, 2018 WL 3398141, at *2*; *In re Broiler Chicken Antitrust Litig., No. 16 C 8637, 2019 U.S. Dist. LEXIS 114664, 2019 WL 2764260, at *2 (N.D. Ill. May 6, 2019)* (*Broiler II*"); *In re Cathode Ray Tube (CRT) Antitrust Litig., 301 F.R.D. 449, 453-54 (N.D. Cal. 2014)*. But "the mere possibility that [downstream discovery] may be relevant to the defendant's ability to defend against a pass-through claim or to oppose class certification by indirect purchasers" does not automatically entitle the antitrust defendant to downstream discovery. **[*10]** *Broiler I, 2018 U.S. Dist. LEXIS 116658, 2018 WL 3398141, at *2*, citing *In re Vitamins Antitrust Litig., 198 F.R.D. 296, 299 (D.D.C. 2000)* ("[I]n order to determine whether the individualized downstream data is discoverable, the Court must first determine whether this data is relevant to the subject matter at issue and then if it is deemed relevant, the Court must weigh

[4] There are three other related cases that have been consolidated with the two cases here - 21 C 3763, 21 C 4131, and 21 C 3551 - that are not at issue in this motion.

[5] The Supreme Court held in *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 (1968)*, and *Illinois Brick Co. v. Illinois, 431 U.S. 720, 735, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, that only direct purchasers had standing to bring suit under the federal antitrust laws. A number of states subsequently passed "Illinois Brick repealer statutes" which allow indirect purchasers to sue for "passed-on" damages under the particular state's ***antitrust law***. *In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d 772, 815 (N.D. Ill. 2017)*. A pass-through (or pass-on) defense says that in such state cases, a defendant is liable only for damages for alleged overcharges that were not "passed on" by the direct purchaser to successive buyers.

the benefits of this information to the defendants against the burden or expense that discovery of this information would impose on the plaintiffs.") The foregoing approach to evaluating requests for downstream discovery in federal antitrust cases thus mirrors *Rule 26(b)(1)* as amended in 2015: The Court examines these requests, in the DPP and IPP cases here, for their relevance and proportionality.

A. Downstream Discovery from Direct Purchaser Plaintiffs

Defendants argue that downstream discovery from the DPPs is relevant both to the issues of pass-through[6] and also for non-pass-through reasons such as class certification, market definition, and competitive effects.

In seeking downstream discovery from the DPPs (John Gross Company and Maplevale) Defendants argue that the information is relevant because of its direct linkage to the overcharge the IPPs say they paid for turkey (in their purchases from DPPs or other IPPs), so that the IPPs will need the information **[*11]** to make their damage claims, and the DPPs will need the information to defend against the IPP claims that they were overcharged.[7] (Def. Reply in Support of Mot. to Compel at 2.) Accordingly, Defendants say, the downstream discovery sought here is directly relevant.

The DPPs respond that in this case, their downstream pricing practices are not relevant because they are only two smaller entities, so that the amounts they charged the IPPs does not fix the amount of the IPPs' claimed overcharge. The DPPs suggest that Defendants should instead seek discovery from the large direct purchasers/resellers that control or controlled a significant portion of the indirect purchaser market. (DPP Response at 8.) Notably, in Defendants' reply, they acknowledge that proving the IPPs' initial overcharge will in fact require discovery from large direct purchasers, or from many small ones, to generate an adequate data set. Defendants' contention that downstream discovery from only the two DPPs here is relevant to help *defend* against claims of common overcharge by pointing out lack of uniformity among direct purchasers, or by establishing the failure of the IPPs' statistical models to describe all class **[*12]** members, (Def. Reply at 17), was not persuasive. The argument relies heavily on Defendants' supposition about the breadth of discovery the IPPs may need to establish their claims or to put defenses to those claims in sharper focus.

Notably, in *Broiler I*, the court's refusal to compel downstream discovery from the direct purchasers in that case rested in large part on the court's concerns that Defendants could only speculate, in the absence of additional discovery, about what the indirect purchaser plaintiffs' pass-through arguments or expert analysis would be. *2018 WL 3398141, at *2-3*. The Court takes a similar view of the posture of the instant case in denying the Defendants' motion to compel DPP downstream discovery at this time.

The two cases Defendants cite in support of downstream discovery from the DPPs are of little aid. In *Broiler II*, the Court allowed indirect purchaser plaintiffs to obtain downstream discovery from an entity that was a single, large, third-party direct purchaser (named "Porky Products"), based on the relevance of the information to claims made by end-user plaintiffs and commercial and institutional indirect purchaser plaintiffs, and to defenses to such claims. *2019 U.S. Dist. LEXIS 114664, 2019 WL 2764260, at *1-2*. The *Broiler II* court even distinguished the discovery **[*13]** allowed from Porky Products from other downstream discovery the same court had denied when it

---

[6] Although it appears that this issue was debated at the parties' meet-and-confer sessions, Plaintiffs' briefs do not dispute the existence of state antitrust laws or that at least some of them allow for a pass-through defense in certain situations, including some of the statutes under which the IPPs have sued Defendants. Plaintiffs argue that none of the situations that allow pass-through exist in this case for any of the various state antitrust statutes. However, as we explain below, our decision on this motion is not the proper vehicle for detailed statutory construction of a dozen or more state antitrust statutes. We are comfortable that there is a better-than-likely chance that pass-through will be an issue under one or more statutes and therefore for the purposes of this decision we accept that such defense is available to Defendants to some extent, although we give no opinion about the exact scope of any individual statute or the evidence needed to prove the defense.

[7] The third named direct purchaser plaintiff, Olean Wholesale Grocery Cooperative, was voluntarily dismissed from the case with prejudice on October 11, 2021. (D.E. 309.)

was sought from direct purchasers that were "relatively smaller players in the distribution chain," explaining that sufficient information might be better learned from other sources. *Id.*, quoting *In re Broiler Chickens Antitrust Litig., No. 16 C 8637, 2018 U.S. Dist. LEXIS 27155, 2018 WL 999899, at *4 (N.D. Ill. Feb. 21, 2018)*. Similarly, in *Cathode Ray Tube*, the direct purchaser from which the court ordered downstream discovery was a large company - Best Buy - whose purchases and resales of the product at issue were highly relevant to the issue of pass-through damages, and the opinion did not suggest that any real question existed as to the relevance, to the indirect purchaser overcharge issues, of downstream discovery or "competitive intelligence" information in the possession of this large direct purchaser. *301 F.R.D. at 453-54*.[8]

Nor is the Court persuaded by defendants' argument that downstream discovery is sufficiently relevant to class-certification, anti-competitive effects, and market definition for the Court to compel this discovery now. The Court sees Defendants' two leading cases, *Valley Drug Co. v. Geneva Pharm., Inc., 350 F.3d 1181 (11th Cir. 2003)* and *In re Urethane Antitrust Litig., 237 F.R.D. 454 (D. Kan. 2006)*, as not analogous. The discovery requests in *In re Urethane* had been specifically tailored solely to address issues of class certification among all Plaintiffs, **[*14]** and the requests encompassed more than downstream discovery information. *237 F.R.D. at 459*. In *Valley Drug*, the Eleventh Circuit reversed a grant of class certification because the district court had not properly addressed whether there was a conflict between certain wholesalers and the rest of the class, allowing some downstream discovery into this specific issue, and noting that "the district court retains discretion in determining how much discovery is enough" [to address the issue]. *350 F.3d at 1195*. Notably, *Valley Drug* did not concern the fairness of prices paid for products sold to direct and indirect purchasers. *See also* *Broiler II, 2019 U.S. Dist. LEXIS 114664, 2019 WL 2764260, at *1* ("DPPs are relatively smaller players in the distribution chain, and Defendants may be able to obtain sufficient discovery to address the commonality and predominance issues in the IPP case from other sources.").

We deny Defendants' motion to compel the DPPs, but the denial is without prejudice to the issue being raised later in the case when relevance and proportionality of this discovery is established more clearly.

B. Discovery from Indirect Purchaser Plaintiffs

Defendants' argument for the relevance of downstream discovery from the IPPs is simple. They say that the IPPs' case depends on not only proving that **[*15]** they were overcharged by the DPPs, but also that the IPPs did not pass on that overcharge to their own customers downstream. Therefore, Defendants contend that discovery concerning what the IPPs did with the turkey they purchased from the DPPs is highly relevant to the claims and defenses in this case. Generally speaking, the IPPs see the discovery as irrelevant under a theory that pass-through defenses are limited under the *Illinois Brick* repealer statutes giving rise to their causes of action to those situations where an indirect purchaser even further down the line brings suit. They contend that the named IPPs "occupy a unique space in antitrust price-fixing litigation" because they use the turkey products they purchase as a component in the production of meals sold to their customers, and that other components include labor, other ingredients, and the fixed costs of running a business. (IPPs' Response to Mot. to Compel at 1.) Therefore, the IPPs say they should be treated as end users, taking the turkey products to make finished meals, and that downstream discovery is not relevant because "no one is suing for overcharges on restaurant meals." (*Id.* at 3.) To put it another way, the IPPs say that **[*16]** absent a risk of duplicative damages (that is, Defendants being found

---

[8] Some of the DPPs' cases are of little help either. *In re Plasma-Derivative Protein Therapies Antitrust Litig. Nos. 09-cv-7666, 11-cv-1468, 2012 U.S. Dist. LEXIS 61114, 2012 WL 153321, at *3 (N.D. Ill. April 27, 2012)*, disallowed downstream discovery, but the matter before the court in that case was a direct purchaser action only. *In re Vitamins Antitrust Litigation, 198 F.R.D. at 299*, involved both direct and indirect purchaser plaintiff cases, but the disallowed downstream discovery was not relevant because defendants did not seek it to assert a pass-through defense but instead to assert consumer demand, and Plaintiffs' expert had used publicly available information to make his determinations, rendering additional discovery unnecessary.

liable for the same overcharge paid by two different purchasers) there can be no pass-through defense, and absent a pass-through defense, downstream discovery is not relevant.[9]

In their Reply, Defendants reiterate their argument that downstream discovery is relevant because the IPPs are entitled to recover only the net overcharges they absorbed, and therefore, Defendants are entitled to seek information concerning how much of those overcharges the IPPs passed on to other purchasers. They dispute the IPPs' attempt to create a new "conflicting claimant rule" that no state antitrust statute would permit a pass-through defense unless an end-user has already filed suit and there is a risk of duplicative damages. Moreover, Defendants ask the Court to reject the IPPs' assertion that there could never be a conflicting claimant because the IPPs should be treated as end-users. (Def. Reply in Support of Mot. to Compel at 4.)

As an initial matter, we decline to engage in individual statutory construction for all 23-some state antitrust statutes at issue in this case, not to mention the common law of unjust enrichment for 25-some **[*17]** states under which the IPPs have also brought suit. As Defendants point out in their Reply, in addition to the question of duplicative damages, some of the state statutes at issue limit plaintiffs to "actual damages," which suggests the need to determine how much overcharge any particular purchaser absorbed in order to prevent it from receiving a windfall if no other downstream purchasers file suit themselves. (*Id.* at 7, *citing* *Vitamins, 259 F. Supp. 2d at 3-5, 7-9*.) Moreover, the Court is not ready to declare that claims of unjust enrichment are never subject to a pass-through defense. *See* *Kickham Hanley PLLC v. George W. Kuhn Drainage Dist., No. 351317, 2021 Mich. App. LEXIS 234, 2021 WL 137773, at *6-7 (Mich. Ct. App. January 14, 2021)* (distinguishing between federal ***antitrust law*** for which there is no pass-through and state claims of unjust enrichment and finding that Plaintiffs did not suffer damages because the overcharge at issue was passed on to customers.) We respectfully decline to indulge the IPPs in their suggestion that every state antitrust statute and state common law is so well-settled as to denying pass-through so that downstream discovery is irrelevant to every claim and defense in the IPP case. We also decline to find that the IPPs should be considered "end-users" as a matter of law. Although the IPPs contend that their transformation of the turkey **[*18]** they purchase into meals and other such products means that there are no other indirect purchasers down the line to file suit, we do not have enough evidence before us to make that sort of fact-intensive determination, which is a matter for discovery. Moreover, Defendants point out that even individual IPPs treat turkey in different ways, transforming some into sandwiches to be sold to customers as well as reselling whole turkeys and turkey breasts. (Def. Reply at 13.) We are satisfied that at this time and on these facts, downstream discovery from the IPPs is relevant.

The IPPs offer little argument that producing downstream discovery will be burdensome. Instead, they offer a compromise to Defendants that they will not withhold any downstream documents on the basis of their objections to downstream discovery to the extent that those documents are also being produced as response to non-downstream discovery requests. (IPPs' Resp. to Mot. to Compel at 13.) But offering not to withhold documents that it has already agreed to produce for other reasons does not fulfill the IPPs' obligation to also produce any additional downstream discovery Defendants request and that this Court finds relevant **[*19]** and proportional. The motion to compel the IPPs to produce of downstream discovery is granted.

CONCLUSION

For the reasons stated above, Defendants' Motion to Compel Direct Purchaser Plaintiffs (D.E. 242) is denied without prejudice and Defendants' Motion to Compel Indirect Purchaser Plaintiffs (D.E. 163) is granted.

---

[9] For example, IPPs site *Clayforth v. Pfizer, Inc., 233 P.3d 1066, 1070 (Cal. 2010)*, which discussed California's Cartwright Act. (IPP's Response to Mot. to Compel at 5). In *Clayforth*, the court explained that where multiple levels of purchasers have sued or there remains a risk they may sue, and damages are to be allocated among "various levels of injured purchasers," defendants assert a pass-through defense to avoid duplicative damages. The IPPs suggest in their response that the Cartwright Act is "like New York's Donnelly Act, under which Defendants seek downstream discovery from CIIPP Sandee's." (IPPs' Resp. to Mot. to Compel at 5.)

Judges: HON. BRIAN R. MARTINOTTI, UNITED STATES DISTRICT JUDGE.

Opinion by: BRIAN R. MARTINOTTI

Opinion

MARTINOTTI, DISTRICT JUDGE

Before the Court is Defendants Novo Nordisk, Inc. ("Novo Nordisk"), Sanofi-Aventis U.S. LCC ("Sanofi"), and Eli Lilly and Company's ("Eli Lilly") (collectively, "Defendants") Partial Motion to Dismiss the putative Plaintiffs' ("Plaintiffs") Third Amended Class Action Complaint ("Third Amended Complaint") pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. (ECF No. 422.) Plaintiffs oppose the motion (ECF No. 455), and Defendants filed a reply (ECF No. 468). Having reviewed the parties' submissions filed in connection with the Motion and having declined to hold oral argument pursuant to *Federal Rule of Civil Procedure 78(b)*, for the reasons set forth below and for good cause having been shown, Defendants' Partial Motion to Dismiss is **GRANTED IN PART** and **DENIED IN PART**.

I. BACKGROUND[1]

For the purpose of this motion to dismiss, the Court accepts the factual allegations in the Third Amended Complaint as true and draws all **[*12]** inferences in the light most favorable to Plaintiffs. *See* *Phillips v. Cty. of Allegheny, 515 F.3d 224, 228 (3d Cir. 2008)*. The Court also considers any "document integral to or explicitly relied upon in the complaint." *In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410, 1426 (3d Cir. 1997)* (quoting *Shaw v. Digit. Equip. Corp., 82 F.3d 1194, 1220 (1st Cir. 1996)*).

---

[1] The factual and procedural backgrounds of this matter are well-known to the parties and were previously recounted by the Court in its Opinion granting in part and denying in part Defendants' Motion to Dismiss the First Amended Complaint (ECF No. 252), as well as the Court's Opinion granting in part and denying in part Defendants' Motion to Dismiss the Second Amended Complaint (ECF No. 304). Therefore, the Court includes only the facts and procedural background relevant to this Motion.

Plaintiffs are 80 individuals who filed the Third Amended Complaint on behalf of themselves and a proposed nationwide class of analog insulin consumers. (ECF No. 411 ¶¶ 25-185.) Plaintiffs bring this action on behalf of themselves and all others similarly situated under *Federal Rule of Civil Procedure 23(a)* and *23(b)(3)*. (*Id.* ¶ 322.) Plaintiffs define their class as:

> All individual persons in the United States and its territories who paid any portion of the purchase price for a prescription of Apidra, Basaglar, Fiasp, Humalog, Lantus, Levemir, Novolog, Tresiba, and/or Toujeo at a price calculated by reference to a list price, AWP (Average Wholesale Price)[2], or WAC (Wholesale Acquisition Price) for purposes other than resale.

(*Id.*) Specifically, the class includes uninsured consumers, consumers in high-deductible health plans, consumers who reach the Medicare Part D donut hole, and consumers with high coinsurance rates. (*Id.* ¶ 325.) Defendants are pharmaceutical companies headquartered in the United States. (*Id.* ¶¶ 186-88.) Defendants research, develop, and manufacture **[*13]** prescription medications. (*Id.*) Defendant Eli Lilly manufactures Humalog and Basaglar; Defendant Novo Nordisk manufactures Fiasp, Novolog, Levemir, and Tresiba; and Defendant Sanofi-Aventis manufactures Apidra, Lantus, and Toujeo. (*Id.*)

On March 29, 2018, Plaintiffs filed the First Amended Class Action Complaint against Defendants (ECF No. 131), and on May 14, 2018, Defendants moved to dismiss (ECF No. 158). In the First Amended Complaint, Plaintiffs brought claims under the federal *Racketeer Influenced and Corrupt Organization Act* ("RICO") pursuant to *18 U.S.C. §§ 1961, et seq.* (ECF No. 131.) The Court held oral argument on January 22, 2019. (ECF No. 247.) On February 15, 2019, the Court issued an Opinion and Order (the "February 2019 Order") granting in part and denying in part Defendants' Motion to Dismiss the First Amended Class Action Complaint. (ECF Nos. 252-53.) In the February 2019 Order, the Court dismissed Plaintiffs' federal RICO claims, finding "[a]lthough Plaintiffs have adequately pled the various elements of a RICO claim," they were indirect purchasers and, therefore, they "lack[ed] standing to maintain [the] action." (ECF No. 252 at 25.)

On March 18, 2019, Plaintiffs filed the Second **[*14]** Amended Class Action Complaint ("Second Amended Complaint") alleging forty-nine counts against Defendants. (ECF No. 255.) In the Second Amended Complaint, Plaintiffs sought an injunction "to prevent [Defendants] from reporting benchmark prices that do not approximate their true net prices." (*Id.* at 142.) Plaintiffs also included claims relating to additional insulin products not alleged in the First Amended Complaint. (*Compare* ECF No. 131 *with* ECF No. 255.) Further, Plaintiffs included several state consumer protection law claims under the state laws of Arizona, California, Colorado, Georgia, Louisiana, Minnesota, Mississippi, Utah, Washington, and West Virginia. (ECF No. 225.) On May 17, 2019, Defendants filed a Partial Motion to Dismiss the Second Amended Complaint. (ECF No. 263.) Plaintiffs opposed the motion (ECF No. 269), and Defendants replied (ECF No. 273).

On February 20, 2020, the Court issued an Opinion and Order (the "February 2020 Order") granting in part and denying in part Defendants' Motion to Dismiss the Second Amended Complaint. (ECF Nos. 304-05.) In the February 2020 Order, the Court held that a private party may not seek equitable relief under RICO and dismissed Plaintiffs' **[*15]** request for injunctive relief under RICO. (ECF No. 304 at 7.) The Court also denied Defendants' Partial Motion to Dismiss the claims related to the new insulin products, finding the Second Amended Complaint adequately alleged a detailed depiction of a fraudulent scheme as it related to the added insulin products. (*Id.* at 8.) The Court granted Defendants' Partial Motion to Dismiss with respect to state consumer protection law causes of action under the state laws of Arizona, Georgia, Mississippi, Washington, and West Virginia, but the Court denied Defendants' Partial Motion to Dismiss with respect to state consumer protection law causes of action under the state laws of Colorado and Utah. (ECF No. 305 at 1.) The Court further granted Defendants' Partial Motion to Dismiss to the extent that: (1) Plaintiffs sought disgorgement and restitution under California law; (2) Plaintiffs sought injunctive relief under Louisiana law; and (3) Plaintiff's sought an award of monetary damages under Minnesota law. (*Id.* at 1-2.)

---

[2] The Plaintiffs frequently use the terms "benchmark price" and "sticker price" to refer to the AWP. (*See, e.g.*, ECF No. 411 ¶¶ 2, 3, 202, 343.)

On April 20, 2021, Plaintiffs filed the Third Amended Complaint, now alleging the following: violation of *Arizona's Civil Racketeering Statute, Ariz. Rev. Stat. §§ 13-2314.04, et seq.*, (Count Three); violation of **[*16]** *Colorado's Organized Crime Act, Colo. Rev. Stat. §§ 18-17-101, et seq.*, (Count Four); violation of *Florida's Civil Remedies for Criminal Practices Act, Fla. Stat. Ann. §§ 772.101, et seq.*, (Count Five); violation of *Georgia's Racketeer Influenced and Corrupt Organizations Act, Ga. Stat. Ann. §§ 16-14-1, et seq.*, (Count Six); violation of *North Carolina's Racketeer Influenced and Corrupt Organization Act, N.C. Gen. Stat. §§ 75D-1, et seq.*, (Count Seven); violation of *Utah's Pattern of Unlawful Activity Act, Utah Code Ann. §§ 76-10-1601, et seq.*, (Count Eight); violation of *Wisconsin's Organized Crime Control Act, Wis. Stat. §§ 946.80, et seq.*, (Count Nine); and civil conspiracy under the common law of thirty-six different states (Count Ten).[3] (ECF No. 411.) On June 11, 2021, Defendants filed a Partial Motion to Dismiss the Third Amended Complaint. (ECF No. 422.) On July 30, 2021, Plaintiffs opposed (ECF No. 455), and on September 13, 2021, Defendants replied (ECF No. 468).

II. Legal Standards

A. *Rule 12(b)(6)*

In deciding a motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, a district court is "required to accept as true all factual allegations in the complaint and draw all inferences from the facts alleged in the light most favorable to [the non-moving party]." *Phillips, 515 F.3d at 228*. "[A] complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (citations omitted). However, "a plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of a cause of action's elements will not do." *Id. at 548* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*). A court is "not bound to accept as true a legal conclusion couched as a factual allegation." *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)*. Instead, **[*17]** assuming the factual allegations in the complaint are true, those "[f]actual allegations must be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555*.

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim for relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 570*). "A claim has facial plausibility when the pleaded factual content allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id. at 663* (citing *Twombly, 550 U.S. at 556*). This "plausibility standard" requires the complaint allege "more than a sheer possibility that a defendant has acted unlawfully," but it "is not akin to a 'probability requirement.'" *Id. at 678* (citing *Twombly, 550 U.S. at 556*). "Detailed factual allegations" are not required, but "more than an unadorned, the-defendant-unlawfully-harmed-me accusation" must be pled; it must include "factual enhancements" and not just conclusory statements or a recitation of the elements of a cause of action. *Id.* (citations omitted).

"Determining whether a complaint states a plausible claim for relief [is] . . . a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." **[*18]** *Id. at 679*. "[W]here the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct, the complaint has alleged—but it has not 'show[n]'—'that the pleader is entitled to relief.'" *Id.* (quoting *Fed. R. Civ. P. 8(a)(2)*). Indeed, after *Iqbal*, it is clear that conclusory or "bare-bones" allegations will no longer survive a motion to dismiss: "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Id. at 678*. To prevent

[3] Under Count Ten of the Third Amended Complaint, Plaintiffs assert "[t]his claim is brought by all plaintiffs against Defendants Novo Nordisk, Sanofi, and Eli Lilly, and alleges violations of the civil conspiracy laws of the following states: Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Nevada, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Utah, Virginia, and Wisconsin." (ECF No. 411 ¶ 525.)

dismissal, all civil complaints must now set out "sufficient factual matter" to show that the claim is facially plausible. This "allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* The Supreme Court's ruling in *Iqbal* emphasizes that a plaintiff must show that the allegations of his or her complaints are plausible. *See id. at 670*.

While, as a general rule, the court may not consider anything beyond the four corners of the complaint on a motion to dismiss pursuant to *Rule 12(b)(6)*, the Third Circuit has held that "a court may consider certain narrowly defined types of material without converting the motion to dismiss [to one for summary judgment pursuant to *Rule 56*]." *In re Rockefeller Ctr. Props. Sec. Litig., 184 F.3d 280, 287 (3d Cir. 1999)*. Specifically, courts may consider **[*19]** any "document *integral to or explicitly relied upon* in the complaint." *In re Burlington Coat Factory, 114 F.3d at 1426* (emphasis added) (quoting *Shaw, 82 F.3d at 1220*).

III. Decision

Defendants' Partial Motion to Dismiss seeks to dismiss Counts Three, Four, Six, Eight and Nine (the "State RICO Claims")[4] and Count Ten (the "State Civil Conspiracy Claims") of the Third Amended Complaint (ECF No. 422 at 6-17.) Defendants also seek to dismiss state-law claims against certain Defendants where no Plaintiff from a given state purchased a product of that Defendant. (*Id.* at 17-21.) The Court addresses each in turn.

A. The State RICO Claims

Defendants assert Plaintiffs lack standing to pursue the State RICO Claims. (ECF No. 422 at 6.) Specifically, Defendants argue because the indirect purchaser rule bars Plaintiffs from pursuing their federal RICO claims, and because the state racketeering statutes Plaintiffs invoke are modeled after the federal RICO statute, the State RICO Claims should be dismissed for the same reasons the federal RICO claims were dismissed.[5] (*Id.* at 6-8.) Plaintiffs assert the State RICO Claims are not subject to the indirect purchaser rule. (ECF No. 455 at 4.) Specifically, Plaintiffs argue the "indirect purchaser rule—as interpreted by the Third **[*20]** Circuit in federal RICO actions—does not bar racketeering claims under state statutes that have no such rule." (*Id.* at 6.)

The Supreme Court developed the indirect purchaser rule in the antitrust context when it held that *Clayton Act* plaintiffs may not demonstrate injury by providing evidence only of indirect purchases. *Illinois Brick Co. v. Illinois, 431 U.S. 720, 737, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. The Supreme Court warned allowing indirect purchasers to recover under such a theory would "transform treble-damages actions into massive multiparty litigations involving many levels of distribution and including large classes of ultimate consumers remote from the defendant." *Id. at 740*. The Court further explained the indirect purchaser rule is intended to prevent defendants from exposure to "multiple liability" should both indirect and direct purchasers in a distribution chain be permitted to assert claims arising out of a single overcharge. *Id. at 730*; *see McCarthy v. Recordex Serv., Inc., 80 F.3d 842, 851 (3d Cir. 1996)*. Because *18 U.S.C. § 1964(c)*, RICO's private cause of action, was modeled on the *Clayton Act*, "antitrust standing principles apply equally to allegations of RICO violations." *McCarthy, 80 F.3d at 855*; *see also Holmes v. Sec. Inv'r Prot. Corp., 503 U.S. 258, 270-74, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)*.

In *Holmes*, the Supreme Court held federal jurisprudence interpreting antitrust principles govern RICO claims because Congress modeled RICO's civil action provision on a substantially similar **[*21]** provision in the *Clayton Act*, explaining:

---

[4] Defendants sought to dismiss Counts Five (Florida) and Seven (North Carolina), but Plaintiffs have voluntarily withdrawn both Counts. (ECF No. 455 at 6.) Accordingly, the Court need not address them.

[5] With exception to the voluntarily withdrawn Counts, Defendants do not object to the adequacy of pleadings of the State RICO Claims. Rather, Defendants contend Plaintiffs cannot "sidestep the indirect purchaser rule's bar on federal RICO claims simply by asserting claims under state analogues of RICO." (ECF No. 422 at 8.) Therefore, the Court addresses only the applicability of the indirect purchaser rule to the State RICO Claims.

> The key to better interpretation lies in some statutory history. We have repeatedly observed, see *Agency Holding Corp. v. Malley-Duff & Assocs., Inc., 483 U.S. 143, 150-51, 107 S. Ct. 2759, 97 L. Ed. 2d 121 (1987)* . . . that Congress modeled *§ 1964(c)* . . . [of RICO after] the federal antitrust laws, *§ 4* of the *Clayton Act* . . .
>
> In *Associated General Contractors [v. Carpenters, 459 U.S. 519, 529, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)]* . . . we discussed how Congress enacted *§ 4* in 1914 with language borrowed from *§ 7* of the *Sherman Act*, passed 24 years earlier. Before 1914, lower federal courts had read *§ 7* to incorporate common-law principles of proximate causation . . . and as we reasoned, as many lower federal courts had done before us . . . that congressional use of the *§ 7* language in *§ 4* presumably carried the intention to adopt 'the judicial gloss that avoided a simple literal interpretation.' . . . Thus, we held that a plaintiff's right to sue under *§ 4* required a showing that the defendant's violation not only was a 'but for' cause of his injury, but was the proximate cause as well.
>
> The reasoning applies just as readily to *§ 1964(c)* [of RICO]. We may fairly credit the 91st Congress, which enacted RICO, with knowing the interpretation federal courts had given the words earlier Congresses had used first in *§ 7* of the *Sherman Act*, and later in the *Clayton Act*'s *§ 4*. . . . It used the same words, and we can only assume it intended them to have the same **[*22]** meaning that courts had already given them.

503 U.S. at 267-68.

However, the Supreme Court did not foreclose States from permitting indirect purchaser actions under their own state antitrust laws. *See* *California v. ARC Am. Corp., 490 U.S. 93, 103, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)* ("[N]othing in *Illinois Brick* suggests that it would be contrary to congressional purposes for States to allow indirect purchasers to recover under their own antitrust laws."); *Supreme Auto Transp., LLC v. Arcelor Mittal USA, Inc., 902 F.3d 735, 743 (7th Cir. 2018)* ("While most states model their antitrust statutes and jurisprudence on federal law, they are under no obligation to do so."); *GEICO Corp. v. Autoliv, Inc., 345 F. Supp. 3d 799, 823 (E.D. Mich. 2018)* (finding several states implemented "*Illinois Brick* repealer statutes" that "allow recovery by indirect purchasers under state law"); *In re EpiPen Mktg., Sales Pracs. & Antitrust Litig., 336 F. Supp. 3d 1256, 1311 (D. Kan. 2018)* (explaining in *Illinois Brick, "*the Supreme Court held that only direct purchasers may bring claims for damages under the federal antitrust laws"); *Bunker's Glass Co. v. Pilkington, PLC, 206 Ariz. 9, 75 P.3d 99, 102 (Ariz. 2003)* (finding both direct and indirect purchasers may sue under Arizona's antitrust statute); *In re Auto. Parts Antitrust Litig., Civ. A. No. 12-2311, 2015 U.S. Dist. LEXIS 189606, at *686 (E.D. Mich. May 1, 2015)* (stating "the Supreme Court held that federal law does not preempt state indirect purchaser statutes").

The role of district courts is to "apply the law of the appropriate jurisdiction." *Panico v. Portfolio Recovery Assocs. LLC, 879 F.3d 56, 58 (3d Cir. 2018)* (citing *City of Philadelphia v. Lead Indus. Ass'n, 994 F.2d 112, 123 (3d Cir. 1993)*. "When interpreting a statute, 'the literal meaning of the statute is the most important, and [courts] are always to read the statute in its ordinary and natural sense.'" **[*23]** *In re Harvard Indus., Inc., 568 F.3d 444, 451 (3d Cir. 2009)* (quoting *Galloway v. United States, 492 F.3d 219, 223 (3d Cir. 2007)*). As a basic premise, "federal courts sitting in diversity apply state substantive law and federal procedural law." *Gasperini v. Ctr. for Humanities, 518 U.S. 415, 427, 116 S. Ct. 2211, 135 L. Ed. 2d 659 (1996)*. "When the state's highest court has not addressed the precise question presented, a federal court must predict how the state's highest court would resolve the issue[.]" *City of Phila., 994 F.2d at 122-23* (citing *Borman v. Raymark Indus., Inc., 960 F.2d 327, 331 (3d Cir. 1992)*). "There are many rules of decision commonly accepted and acted upon by the bar and inferior courts which are nevertheless laws of the state although the highest court of the state has never passed upon them." *West v. AT&T Co., 311 U.S. 223, 236, 61 S. Ct. 179, 85 L. Ed. 139 (1940)*. "In those circumstances a federal court is not free to reject the state rule merely because it has not received the sanction of the highest state court." *Id.* "State law is to be applied in the federal as well as the state courts and it is the duty of the former in every case to ascertain from all the available data what the state law is and apply it[.]" *Id. at 237*.

"In predicting how a matter would be decided under state law," a federal court should examine: "(1) what the [state's] Supreme Court has said in related areas; (2) the decisional law of the [state's] intermediate courts; (3) federal appeals and district court cases interpreting state law; and (4) decisions from other jurisdictions **[*24]** that have discussed the issues we face here." *Hughes v. Long, 242 F.3d 121, 128 (3d Cir. 2001)* (citing *Boyanowski v. Cap. Area Intermediate Unit, 215 F.3d 396, 406 (3d Cir. 2000)*). "[W]here 'two competing yet sensible interpretations' of state law exist," a federal court "should opt for the interpretation that restricts liability, rather than expands it, until the Supreme Court of [the State] decides differently." *Travelers Indem. Co. v. Dammann & Co., 594 F.3d 238, 253 (3d Cir. 2010)* (citing *Werwinski v. Ford Motor Co., 286 F.3d 661, 680 (3d Cir. 2010)*).

Therefore, even if a state's highest court has not decided whether the indirect purchaser rule applies to the State RICO Claims, the Court will predict what the state's highest court may decide by looking into other relevant legal authorities. The five state racketeering statutes at issue are *Arizona's Civil Racketeering Statute, Ariz. Rev. Stat. §§ 13-2314.04, et seq.*, *Colorado's Organized Crime Act, Colo. Rev. Stat. §§ 18-17-101, et seq.*, *Georgia's Racketeer Influenced and Corrupt Organizations Act, Ga. Stat. Ann. §§ 16-14-1, et seq.*, *Utah's Pattern of Unlawful Activity Act, Utah Code Ann. §§ 76-10-1601, et seq.*, and *Wisconsin's Organized Crime Control Act, Wis. Stat. §§ 946.80, et seq.*

1. State Racketeering Statutes

Defendants argue Plaintiffs, as indirect purchasers, lack standing to pursue the state racketeering claims. (ECF No. 422 at 6.) Defendants contend because the state racketeering statutes Plaintiffs invoke are modeled after the federal RICO statute, the indirect purchaser rule barring Plaintiffs' federal RICO claims also bars the state racketeering claims. (*Id.*) Plaintiffs argue the indirect purchaser rule is a judicially-created federal rule that applies to federal RICO claims but not **[*25]** the state racketeering claims. (ECF No. 455 at 7.) Plaintiffs assert Defendants incorrectly "assume that the Third Circuit's interpretation of the indirect purchaser rule to federal RICO claims should apply to these *state* racketeering claims." (*Id.* at 6.) Plaintiffs contend the Court "must interpret state law according to each state's authority or otherwise predict how that state's courts would interpret" the statute. (*Id.* at 6-7.)

As an initial matter, the Court is not aware of, nor have the parties identified, federal or state authority opining on the applicability of the indirect purchaser rule to the state racketeering statutes at issue. The Court begins with examining the relevant statutory language. *In re Harvard Indus., Inc., 568 F.3d at 451*. RICO's civil action provision provides:

> Any person injured in his business or property by reason of a violation of *section 1962* of this chapter [*18 U.S.C. § 1962*] may sue therefor in any appropriate United States district court and shall recover threefold the damages he sustains and the cost of the suit, including a reasonable attorney's fee . . . .

18 U.S.C. § 1964. The civil action provision under Colorado's racketeering statute provides:

> Any person injured by reason of any violation of the provisions of *section 18-17-104* shall have a cause **[*26]** of action for threefold the actual damages sustained. Such person shall also recover attorney fees in the trial and appellate courts and costs of investigation and litigation reasonably incurred . . . .

Colo. Rev. Stat. § 18-17-106. The civil action provision under Georgia's racketeering statute provides:

> Any person who is injured by reason of any violation of Code Section 16-14-4 shall have a cause of action for three times the actual damages sustained and, where appropriate, punitive damages. Such person shall also recover attorney's fees in the trial and appellate courts and costs of investigation and litigation reasonably incurred. . . .

Ga. Code Ann. § 16-14-6. The civil action provision under Utah's racketeering statute provides:

> A person injured in his person, business, or property by a person engaged in conduct forbidden by any provision of *Section 76-10-1603* may sue in an appropriate district court and recover twice the damages he sustains . . . .

Utah Code Ann. § 76-10-1605. The civil action provision under Wisconsin's racketeering statute provides:

> Any person who is injured by reason of any violation of s. 946.83 or 946.85 has a cause of action for 2 times the actual damages sustained and, when appropriate, punitive damages. The person shall also recover attorney fees and costs of the investigation and litigation **[*27]** reasonably incurred. . . .

Wis. Stat. Ann. § 946.87.

The language in the civil action provisions of these state racketeering statutes is substantially similar to the language in the civil action provision of the federal RICO statute. Indeed, it is well-established the state racketeering statutes of Colorado, Georgia, Utah, and Wisconsin are modeled after the federal RICO statute. *See* Floyd v. Coors Brewing Co., 952 P.2d 797, 803 (Colo. App. 1997) (finding Colorado's Organized Crime Control Act "is patterned after the federal [RICO] Act"), *rev'd on other grounds*, 978 P.2d 663 (Colo. 1999); Gianzero v. Wal-Mart Stores Inc., Civ. A. No. 09-656, 2010 U.S. Dist. LEXIS 38370, at *9 (D. Colo. Mar. 29, 2010) ("The Colorado Organized Crime Control Act (COCCA) is modeled after RICO."); Morast v. Lance, 807 F.2d 926, 933 (11th Cir. 1987) ("Georgia's RICO statutes are essentially identical to the federal RICO statutes."); Williams Gen. Corp. v. Stone, 279 Ga. 428, 614 S.E.2d 758, 760 (Ga. 2005) (finding federal RICO is "a statute which mirrors the Georgia civil RICO statute in both purpose and language"); State v. Squires, 2019 UT App 113, 446 P.3d 581, 593 (Utah Ct. App. 2019) (finding the Utah Pattern of Unlawful Activity Act (UPUAA) "is modeled after the federal [RICO] Act"); State v. Evers, 163 Wis. 2d 725, 472 N.W.2d 828, 831 (Wis. Ct. App. 1991) (finding the Wisconsin Organized Crime Control Act "was patterned after RICO").

Because the state racketeering statutes of Colorado, Georgia, Utah, and Wisconsin are modeled after federal RICO, courts have looked to federal case law construing federal RICO for guidance in interpreting these state racketeering statutes. *See* People v. Pollard, 3 P.3d 473, 476 (Colo. App. 2000) ("Because COCCA is patterned after [RICO], federal decisions **[*28]** construing RICO may be instructive upon similar issues arising under the state statute.") (internal citations omitted); People v. Hoover, 165 P.3d 784, 798 (Colo. App. 2006) (finding the Colorado RICO statute was modeled after the federal RICO statute and is generally interpreted according to the same principles); Albright v. Att'ys Title Ins. Fund, 504 F. Supp. 2d 1187, 1203 n.15 (D. Utah 2007) ("Because provisions of the Utah [Pattern of Unlawful Activity Act (UPUAA)] are nearly identical to those in the federal [RICO statute], federal district courts look to . . . federal case law for guidance."); Zibalstar, L.C. v. Conte, Civ. A. No. 17-563, 2019 U.S. Dist. LEXIS 10943, at *8 (D. Utah Jan. 22, 2019) ("Utah courts applying the UPUAA rely heavily on federal RICO decisional law."); Williams Gen. Corp., 614 S.E.2d at 760 ("Because the Georgia RICO Act was modeled after the federal statute, this Court has found federal authority persuasive in interpreting the Georgia RICO statute."); State v. Judd, 147 Wis. 2d 398, 433 N.W.2d 260, 262 (Wis. Ct. App. 1988) (finding federal case law interpreting RICO is persuasive authority in interpreting the Wisconsin RICO statute). Therefore, the Court looks to federal decisions construing federal RICO's civil action provision for guidance in interpreting the civil action provisions of the state racketeering statutes at issue.

While the federal RICO statute does not explicitly state indirect purchasers lack standing, federal courts have construed the language of RICO's civil action provision **[*29]** to bar indirect purchaser actions. McCarthy, 80 F.3d at 855. Because the language in the civil action provisions of the state racketeering statutes is substantially identical to the language in federal RICO's civil action provision, federal jurisprudence construing federal RICO's civil action provision apply to the civil action provisions of the state racketeering statutes. *See* Holmes, 503 U.S. at 268 (holding antitrust principles apply to RICO claims because when Congress "used the same words, and we can only assume it intended them to have the same meaning that courts had already given them"); Brickyard Homeowners' Ass'n Mgmt. Comm. v. Gibbons Realty Co., 668 P.2d 535, 540 (Utah 1983) ("Identity in language presumes identity of construction, so that we look to federal . . . law for guidance."). A majority of courts have repeatedly construed this civil action provision language to bar indirect purchaser actions. *See* In re Zantac (Ranitidine) Prods. Liab. Litig., Civ. A. No. 20-2924, 546 F. Supp. 3d 1216, 2021 U.S. Dist. LEXIS 122580, at *32 (S.D. Fla. June 30, 2021) (observing "the majority of federal courts to address the issue have applied the [indirect purchaser] rule to RICO claims"); *see also* McCarthy, 80 F.3d at 855; Trollinger v. Tyson Foods, Inc., 370 F.3d 602, 616 (6th Cir. 2004) ("[I]ndirect purchasers lack standing under RICO and the antitrust laws to sue for overcharges passed on to them by middlemen."); *Carter v. Berger, 777 F.2d 1173, 1177 (7th Cir. 1985)*; *Harris Cty., Tex. v. Eli Lilly & Co., Civ. A. No. 19-4994, 2020 U.S. Dist. LEXIS 179199, at *12 (S.D. Tex. Sept. 29, 2020)* (declining "to follow the minority rule" and holding "that indirect purchasers lack standing under RICO"). Absent guidance from a state's **[*30]** highest court, this Court finds no reason to interpret this substantially similar language any differently from how courts have already construed such language.

Further, to the extent Plaintiffs argue that precedent from Tenth Circuit—which rejected the indirect purchaser rule in the federal RICO context—should govern their Colorado and Utah state racketeering claims because Colorado and Utah are in the Tenth Circuit, Plaintiffs misconstrue the guiding principles instructing the Court's analysis.[6] In predicting how a state's highest court would rule on an undecided matter of state law, the Court may look at "decisions from other jurisdictions that have discussed the issues[.]" *Hughes, 242 F.3d at 128*. While the Tenth Circuit declined to apply the indirect purchaser rule, other circuits, including the Third Circuit, have elected to apply it. *In re Zantac (Ranitidine) Prods. Liab. Litig., 546 F. Supp. 3d 1216, 2021 U.S. Dist. LEXIS 122580, at *36* ("Because the Supreme Court's message in *Holmes* was clear, the Court is persuaded to join the prevailing view that the indirect purchaser rule applies to RICO claims."); *McCarthy, 80 F.3d at 855*; *Trollinger; 370 F.3d at 616*; *Carter, 777 F.2d at 1177*. Because the Court utilizes federal RICO case law to guide its interpretation of state racketeering statutes, the Third Circuit's binding and Tenth Circuit's non-binding application of the indirect purchaser **[*31]** rule in the federal RICO context is persuasive for determining the application of the indirect purchaser rule in the state RICO context. "[W]here 'two competing yet sensible interpretations' of state law exist," a federal court "should opt for the interpretation that restricts liability, rather than expands it, until the Supreme Court of [the State] decides differently." *Travelers Indem. Co., 594 F.3d at 253* (citing *Werwinski, 286 F.3d at 680*); *see also* *Pearson v. John Hancock Mut. Life Ins. Co., 979 F.2d 254, 259 (1st Cir. 1992)* (noting a plaintiff "cannot justifiably complain if [a] federal court manifests great caution in blazing new state-law trails") (citations omitted). As discussed in Section III.A., the intent of the indirect purchaser rule was to limit the exposure to "multiple liability." *McCarthy, 80 F.3d at 851* (quoting *Illinois Brick, 431 U.S. at 730*). Therefore, following the guiding principles set forth above, the Court is led to predict the highest courts for the states of Colorado and Utah would hold the indirect purchaser rule applies to their respective state racketeering statutes.

Accordingly, Plaintiffs as indirect purchasers lack standing to bring state racketeering claims under the state racketeering statutes of Colorado, Georgia, Utah, and Wisconsin.[7]

2. Arizona's Civil Racketeering Statute

---

[6] To the extent Defendants contend this Court is bound by the Third Circuit's ruling in *McCarthy*, the holding was limited to federal RICO claims. *Day & Zimmermann, Inc. v. Challoner, 423 U.S. 3, 4, 96 S. Ct. 167, 46 L. Ed. 2d 3 (1975)* ("A federal court in a diversity case is not free to engraft onto those state rules exceptions or modifications which may commend themselves to the federal court, but which have not commended themselves to the State in which the federal court sits."). Notwithstanding, because the Court utilizes federal RICO case law to guide its interpretation of state RICO statutes, the Third Circuit's reasoning is persuasive for adjudicating the state racketeering claims.

[7] Plaintiffs contend "Georgia courts have not required that plaintiffs be direct purchasers; instead, courts have engaged in a proximate causation analysis." (ECF No. 455 at 12.) However, Plaintiffs are conflating the indirect purchaser rule with the proximate cause requirement, which, "while related, are 'two analytically distinct aspects' of standing." *In re Zantac (Ranitidine) Prods. Liab. Litig., 546 F. Supp. 3d 1216, 2021 U.S. Dist. LEXIS 122580, at *36* (quoting *McCarthy, 80 F.3d at 851*). Indeed, Plaintiffs have not identified any Georgia case law addressing the applicability of the indirect purchaser rule, and the cases they rely on do not involve indirect purchaser standing. *See e.g.* *Quasebarth v. Green Tree Servicing, LLC, 90 F. Supp. 3d 1373, 1382-83 (M.D. Ga. 2015)* (considering standing for mortgagee plaintiffs who directly contacted the mortgage loan servicer defendant); *Wylie v. Denton, 323 Ga. App. 161, 746 S.E.2d 689, 694-95 (Ga. Ct. App. 2013)* (holding a former bank employee lacked standing against former employer because the loss of employment was only indirectly caused by the bank's alleged wrongdoing); *InterAgency, Inc. v. Danco Fin. Corp., 203 Ga. App. 418, 417 S.E.2d 46 (Ga. Ct. App. 1992)* (holding the corporation stated a cause of action under RICO against brokers—without any discussion of standing—where the corporation cancelled its letter of intent to purchase a travel agency from the brokers and the brokers retained the funds).

Plaintiffs contend because the Arizona Supreme Court rejected **[*32]** applying the indirect purchaser rule to its state antitrust statute, the indirect purchaser rule should not apply to Arizona's racketeering statute. (ECF No. 455 at 8.) Defendants argue the Arizona Supreme Court's "decision to repeal the indirect purchaser rule as to its *antitrust* statute has no bearing on whether the rule still applies to the state's *RICO* statute." (ECF No. 468 at 3.) The Court is not aware, nor have the parties identified, any federal or state authority addressing the applicability of the indirect purchaser rule to Arizona's racketeering statute.

The civil action provision under Arizona's civil racketeering statute provides:

> A person who sustains reasonably foreseeable injury to his person, business or property by a pattern of racketeering activity, or by a violation of *section 13-2312* involving a pattern of racketeering activity, may file an action in superior court for the recovery of up to treble damages and the costs of the suit, including reasonable attorney fees for trial and appellate representation.

Ariz. Rev. Stat. § 13-2314.04. "Arizona's racketeering statute was adapted from the [RICO], *18 U.S.C. §§ 1961-1968*, and Arizona courts 'look to federal decisional law for guidance in construing and applying the Arizona statute.'" **[*33]** *Lara-Chacon v. Ashcroft, 345 F.3d 1148, 1156 (9th Cir. 2003)* (citing *Baines v. Superior Court, 142 Ariz. 145, 688 P.2d 1037, 1040 (Ariz. Ct. App. 1984)*); *Rosier v. First Fin. Capital Corp., 181 Ariz. 218, 889 P.2d 11, 13-14 (Ariz. Ct. App. 1994)* ("Arizona's RICO act is patterned after the federal RICO act."); *Hannosh v. Segal, 235 Ariz. 108, 328 P.3d 1049, 1053 (Ariz. Ct. App. 2014)* ("We look to federal interpretation for guidance where the federal and state RICO statutes contain similar provisions.").

In *Bunker's Glass Co. v. Pilkington PLC*, the Arizona Supreme Court explicitly declined to follow *Illinois Brick*'s guidance and held indirect purchasers have standing to sue under Arizona's state antitrust statute. *206 Ariz. 9, 75 P.3d 99, 108 (Ariz. 2003)*. In *Bunker's Glass*, the Arizona Supreme Court reasoned:

> This case turns upon the interpretation of a provision of the Arizona Antitrust Act that permits a "person" to sue to redress an antitrust injury. *A.R.S. § 44-1408(B)*. Generally, the best indicator of the meaning of a statute is its plain language. *Powers v. Carpenter, 203 Ariz. 116, 51 P.3d 338, 340 (Ariz. 2002)*. The [Arizona Antitrust] Act defines "person" as including "an individual, corporation, . . . or any other legal entity." *A.R.S. § 44-1401*. Nothing in this language restricts the right of action to direct purchasers injured by violations of the Arizona Antitrust Act or precludes indirect purchasers from suing. Indeed . . . by defining the term "person" to include an "individual," the legislature signaled its intent to allow indirect purchasers to sue, because individuals are rarely direct purchasers. . . .

Id. at 102. The Arizona Supreme Court continued **[*34]** by addressing the role of federal guidance for interpreting its state antitrust statute, explaining:

> In the absence of the federal guidance clause, Arizona's statutory language would plainly include indirect purchasers. . . . By refusing to construe the federal guidance clause as requiring that Arizona courts follow *Illinois Brick*'s limitation on the scope of the right of action granted by the legislature, the court is simply choosing to follow the expressed legislative intent that persons injured in their business or property by anti-competitive activity have a right of action. The court defers to the legislature, not the federal courts, to create exceptions to the rule.

Id. at 107.

Here, the Court finds the Arizona Supreme Court's rejection of the indirect purchaser rule and its rationale for declining to follow federal guidance when interpreting its state antitrust statute to be instructive for predicting how Arizona's highest court would decide the applicability of the indirect purchaser rule to its state racketeering statute. While true that the court's repeal of the indirect purchaser rule in *Bunker's Glass* was limited to the state antitrust context, Defendants' argument *Bunker's Glass* has no bearing on whether the indirect **[*35]** purchaser rule applies in the state racketeering context strains credulity. Afterall, the indirect purchaser rule was derived from the antitrust context before it was extended to apply to RICO claims. *McCarthy, 80 F.3d at 855* (finding because RICO's civil action provision was modeled on the *Clayton Act*, "antitrust standing principles apply equally to allegations of RICO violations").

The indirect purchaser rule was derived from *§ 4* of the *Clayton Act*, a provision of the federal antitrust statute.[8] The civil action provision in Arizona's antitrust statute was modeled on *§ 4* of the *Clayton Act*.[9] *Bunker's Glass Co., 75 P.3d at 102* (finding *§ 4* of the *Clayton Act* "is phrased almost identically" to the civil action provision in Arizona's antitrust statute). The federal RICO civil action provision was also modeled on *§ 4* of the *Clayton Act*; and Arizona's state RICO civil action provision was modeled on the federal RICO civil action provision. In other words, the federal and state counterparts of the antitrust and RICO statutes are all modeled on the same civil action provision. Arizona's Supreme Court has already construed its state counterpart of this provision to permit indirect purchaser actions. Therefore, the logical extension would be for Arizona's Supreme Court to extrapolate its interpretation of its state **[*36]** antitrust statute, which is modeled on *§ 4* of the *Clayton Act*, to its state RICO statute, which, through the federal RICO statute, is also modeled after *§ 4* of the *Clayton Act*. Accordingly, the Court is led to predict the highest court in the state of Arizona would permit indirect purchaser actions to proceed under Arizona's Civil Racketeering Statute.

3. *Illinois Brick* Repealer Statutes

Plaintiffs **[*37]** argue the indirect purchaser rule should not apply to the Utah and Wisconsin racketeering claims because the Utah and Wisconsin state legislatures enacted laws to reverse the holding of *Illinois Brick* in their state antitrust statutes. (ECF No. 455 at 9.) Specifically, Plaintiffs contend "[t]here's no better evidence that a state would not apply *Illinois Brick* to racketeering claims than that state's refusal to apply *Illinois Brick* to antitrust claims." (*Id.*) Defendants counter "a state's decision to repeal the indirect purchaser rule as to its *antitrust* statute has no bearing on whether the rule still applies to the state's *RICO* statute." (ECF No. 468 at 3.) Defendants argue "the plain language of the repealer statutes make clear that they only apply to the states' *antitrust* statutes." (*Id.*)

"In the absence of any clear precedent of the state's highest court, we must predict how that court would resolve the issue." *Yurecka v. Zappala, 472 F.3d 59, 62 (3d Cir. 2006)* (citing *Polselli v. Nationwide Mut. Fire Ins. Co., 126 F.3d 524, 528 n.3 (3d Cir. 1997)*); *see also* *Hunt v. United States Tobacco Co., 538 F.3d 217, 220 (3d Cir. 2008)*. "In making such a prediction, we should consider 'relevant state precedents, analogous decisions, considered dicta, scholarly works, and any other reliable data tending convincingly to show how the highest court in the state would resolve the issue at hand.'" *Id.* (quoting *Nationwide Mut. Ins. Co. v. Buffetta, 230 F.3d 634, 637 (3d Cir. 2000)* (quoting *McKenna v. Ortho Pharm. Corp., 622 F.2d 657, 663 (3d Cir. 1980)*)). "[A]n **[*38]** intermediate appellate state court is a datum for ascertaining state law which is not to be disregarded by a federal court unless it is convinced by other persuasive data that the highest court of the state would decide otherwise." *Edwards v. HOVENSA, LLC, 497 F.3d 355, 361, 49 V.I. 1133 (3d Cir. 2007)* (quotation marks and ellipsis omitted) (quoting *West., 311 U.S. at 237*); *see also* *Travelers Indem. Co., 594 F.3d at 244*.

---

[8] *Section 4* of the *Clayton Act*, *15 U.S.C. § 15(a)*, provides:

> any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

[9] The civil action provision in Arizona antitrust statute provides:

> A person threatened with injury or injured in his business or property by a violation of this article may bring an action for appropriate injunctive or other equitable relief, damages sustained and, as determined by the court, taxable costs and reasonable attorney's fees. If the trier of fact finds that the violation is flagrant, it shall increase recovery to an amount not in excess of three times the damages sustained.

Ariz. Rev. Stat. § 44-1408(B).

Several states have enacted "*Illinois Brick* repealer statutes," which are state laws overriding the Supreme Court's holding in *Illinois Brick* to permit indirect purchasers to pursue antitrust claims under their state's antitrust statute. *GEICO Corp., 345 F. Supp. 3d at 842* (observing a number of states have enacted so-called "*Illinois Brick* repealer statutes"); *In re Auto. Parts Antitrust Litig., 2015 U.S. Dist. LEXIS 189606, at *686* ("In response to the Supreme Court's prohibition against antitrust actions by indirect purchasers articulated in [*Illinois Brick*], many states enacted repealer provisions, allowing state actions for indirect purchasers."); *In re EpiPen (Epinephrine Injection, USP) Mktg., Sales Practices & Antitrust Litig., 336 F. Supp. 3d at 1311* ("To avoid the *Illinois Brick* rule, some states have passed 'repealer' statutes allowing indirect purchasers to recover under state antitrust laws.") (citing *In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d 772, 818 (N.D. Ill. 2017)*).

Here, Utah and Wisconsin enacted legislation allowing indirect purchasers to pursue antitrust claims by repealing *Illinois Brick*'s holding from applying to their state antitrust statutes.[10] *See In re Aggrenox Antitrust Litig., 94 F. Supp. 3d 224, 251-52 (D. Conn. 2015)* ("Utah has passed an *Illinois Brick* repealer [statute], and its antitrust statute therefore does grant **[*39]** indirect purchasers the right to bring antitrust damages claims."); *Meyers v. Bayer AG, 2007 WI 99, 303 Wis. 2d 295, 735 N.W.2d 448, 462 (Wis. 2007)* ("[W]e noted that the 1980 revision of [the antitrust statute] provided a remedy under the statute to indirect purchasers in response to *Illinois Brick*, . . . which foreclosed recovery to indirect purchasers under the federal statute."). However, Utah and Wisconsin have not enacted legislation allowing indirect purchasers to pursue racketeering claims under their respective state racketeering statutes. As the Supreme Court explained, states can decide to permit indirect purchaser actions even though federal law does not. *ARC Am. Corp., 490 U.S. at 103*. While Utah and Wisconsin enacted legislation that permits such actions to proceed under the antitrust context, they have not done the same to permit such actions to proceed under their state racketeering statutes.[11] It is not the task of this Court to predict what legislation States will pass; rather, the Court is tasked with predicting how the state's highest court would resolve the matter. *See Travelers Indem. Co., 594 F.3d at 244*.

---

[10] The Wisconsin *Illinois Brick* repealer provision provides:

> Except as provided under par. (b), any person injured, directly or indirectly, by reason of anything prohibited by this chapter may sue therefor and shall recover threefold the damages sustained by the person and the cost **[*40]** of the suit, including reasonable attorney fees.

Wis. Stat. Ann. § 133.18 (1)(a). The Utah *Illinois Brick* repealer statute provision provides:

> A person who is a citizen of this state or a resident of this state and who is injured or is threatened with injury in his business or property by a violation of the Utah Antitrust Act may bring an action for injunctive relief and damages, regardless of whether the person dealt directly or indirectly with the defendant.

Utah Code Ann. § 76-10-3109(1)(a).

[11] By way of comparison, the Court has identified states that have enacted *Illinois Brick* repealer statutes to their state RICO statutes. Under Ohio's racketeering statute, its civil action provision provides:

> In a civil proceeding under division (A) of this section, ***any person directly or indirectly injured*** by conduct in violation of *section 2923.32 of the Revised Code* or a conspiracy to violate that section, other than a violator of that section or a conspirator to violate that section, in addition to relief under division (B) of this section, shall have a cause of action for triple the actual damages the person sustained.

Ohio Rev. Code Ann. § 2923.34 (emphasis added); *see also Lowe v. Ransier (In re Nicole Gas Prod.), 581 B.R. 843, 849 (B.A.P. 6th Cir. 2018)* ("[T]he Ohio Legislature intended the OCPA to offer standing to a broader class of plaintiffs than federal RICO statutes."); *CSAHA/UHHS-Canton, Inc. v. Aultman Health Found., 2012-Ohio-897, ¶ 74 (Ohio Ct. App. 5th Dist. 2012)* ("[U]nlike RICO, the Ohio [racketeering statute] specifically permits recovery for all damages directly or indirectly caused by [the defendant]."); *Iron Workers Local Union No. 17 Ins. Fund v. Philip Morris, Inc., 23 F. Supp. 2d 771, 787 (N.D. Ohio 1998)*.

In predicting how the highest courts in the states of Utah and Wisconsin would interpret their state racketeering statutes, the guidance instructing this Court is to consider federal case law construing the federal RICO statute. *See* Roberts v. C.R. England, Inc., 318 F.R.D. 457, 525 (D. Utah 2017) ("While state courts are not required to adopt identical interpretations of UPUAA and RICO, the Utah Supreme Court often considers federal case law on RICO claims when analyzing comparable UPUAA provisions."); **[*41]** Hill v. Estate of Allred, 2009 UT 28, 216 P.3d 929, 938-39 (Utah 2009); State v. Bradshaw, 2004 UT App 298, 99 P.3d 359, 367 (Utah Ct. App. 2004), *rev'd on other grounds*, 2006 UT 87, 152 P.3d 288 (Utah 2006); Bradford v. Moench, 670 F. Supp. 920, 928 (D. Utah 1987); Squires, 446 P.3d at 593; Albright, 504 F. Supp. 2d at 1203 n.15; Zibalstar, 2019 U.S. Dist. LEXIS 10943, at *8; Heritage Christian Schs., Inc. v. ING N. Am. Ins. Corp., 851 F. Supp. 2d 1154, 1157 (E.D. Wis. 2012) ("Because WOCCA was patterned after RICO, Wisconsin courts consider cases interpreting RICO to be persuasive authority as to the interpretation of WOCCA."); State v. Mueller, 201 Wis. 2d 121, 549 N.W.2d 455 (Wis. Ct. App. 1996); Judd, 433 N.W.2d at 262; Evers, 472 N.W.2d at 831; Rinaldi v. Wisconsin, Civ. A. No. 19-3, 2019 U.S. Dist. LEXIS 137372, at *10 (W.D. Wis. Aug. 13, 2019). Therefore, the Court follows the analysis it set forth above, Section III.A.1.

To clarify, there is a distinction between why the Arizona Supreme Court's holding repealing Illinois Brick can be extrapolated to apply to Arizona's racketeering statute and why the Utah and Wisconsin Illinois Brick repealer statutes cannot be extrapolated to apply to the Utah and Wisconsin racketeering statutes. It is not the job of courts to predict what state legislatures will do. Courts are tasked with predicting how the state's highest court would resolve an undecided issue. *See* City of Phila., 994 F.2d at 122-23. As discussed in Section III.A.2., the Arizona Supreme Court in Bunker's Glass was instructive in explaining how it resolved the applicability of the indirect purchaser rule when its state counterpart was modeled after the federal statute. Using this guidance, the Court can predict how the Arizona Supreme Court would resolve the issue of indirect purchaser actions in the state RICO context. There is no such guidance in Utah and Wisconsin. To the extent there is such **[*42]** guidance, courts are instructed to look to interpretations of the federal RICO statute in construing the Utah and Wisconsin racketeering statutes.

By way of example, in May 2006, Utah amended its state antitrust statute to incorporate and enact an Illinois Brick repealer provision to its state statute. GEICO Corp., 345 F. Supp. 3d at 842 (citing Utah Code Ann. 76-10-3109(1)(a)). Prior to the 2006 amendment, courts construing Utah's state ***antitrust law*** applied Illinois Brick's holding barring indirect purchaser actions. In re Auto. Parts Antitrust Litig., Civ. A. No. 12-02311, 2013 U.S. Dist. LEXIS 80338, at *73-74 (E.D. Mich. June 6, 2013) (finding in Utah, "Illinois Brick was applied prior to the 2006 amendment") (citing Boisjoly v. Morton Thiokol, Inc., 706 F. Supp. 795, 805 (D. Utah 1988)); *see also* GEICO Corp., 345 F. Supp. 3d at 855 (dismissing antitrust claims by indirect purchasers under the laws of Utah "arising from conduct that predated the states' enactment of Illinois Brick repealer provisions"); In re Static Random Access Memory Antitrust Litig., Civ. A. No. 07-01819, 2010 U.S. Dist. LEXIS 131002, at *43-44 (N.D. Cal. Dec. 8, 2010) (same). Indeed, before the Illinois Brick repealer statute was enacted, courts applied and interpreted the Utah state antitrust statute to be consistent with its federal counterpart. *See* Boisjoly, 706 F. Supp. at 805 (finding the Utah antitrust statute, "which is modeled after and closely resembles the federal antitrust statute, expressly provides that it is to be applied and interpreted consistently with its federal counterpart"). It was not until after the Illinois Brick repealer statute was enacted that courts applying Utah's ***antitrust law*** began permitting indirect purchaser **[*43]** actions. California v. Infineon Techs. AG, Civ. A. No. 06-4333, 2008 U.S. Dist. LEXIS 120058, at *25 (N.D. Cal. Apr. 15, 2018) (stating in Utah "the 2006 amendment affirmatively altered the legal landscape with respect to indirect purchaser standing").

Therefore, absent legislative intervention, the Court is led to predict the state's highest court would continue to interpret its respective state racketeering statute consistent with its federal counterpart. Accordingly, Defendants' Partial Motion to Dismiss is **GRANTED** as to the State RICO Claims under the laws of Colorado, Georgia, Utah, and Wisconsin (Counts Four, Six, Eight, and Nine), and **DENIED** as to the State RICO Claim under the laws of Arizona (Count Three).

B. The State Civil Conspiracy Claims

Plaintiffs assert civil conspiracy claims under the laws of thirty-six states.[12] (ECF No. 411 ¶¶ 524-38.) Defendants argue the state-law civil conspiracy claims should be dismissed: (1) where the federal and state racketeering claims fail as viable underlying claims; and (2) where any surviving underlying claim renders the civil conspiracy claim duplicative. (ECF No. 422 at 10.) Defendants also assert the civil conspiracy claims brought under Georgia, Arizona, and Pennsylvania law fail for state-specific reasons. (*Id.* at 10.) The Court addresses each in **[*44]** turn.

1. State Civil Conspiracy Claims Based on Racketeering Violations

Defendants assert the state-law civil conspiracy claims fail without a viable underlying claim as a predicate for liability. (ECF No. 422 at 10.) Specifically, Defendants argue the state-law civil conspiracy claims fail to the extent they are based on violations of federal or state racketeering laws that have already been dismissed. (*Id* at 10-13.) Plaintiffs argue any surviving state racketeering or state consumer fraud claim can serve as viable underlying claim for their state-law civil conspiracy claims. (ECF No. 455 at 15.) Plaintiffs also contend they are not required to plead an underlying claim as a separate cause of action for it to serve as a predicate to the state-law civil conspiracy claims. (*Id.* at 16.)

"The established rule is that a cause of action for civil conspiracy requires a separate underlying tort as a predicate for liability." *In re Orthopedic Bone Screw Prods. Liab. Litig., 193 F.3d 781, 789 (3d Cir. 1999)*; *Boyanowski, 215 F.3d at 405-06* ("The rule that civil conspiracy may not exist without an underlying tort is a common one."); *Curbison v. New Jersey, 242 F. App'x 806, 810 (3d Cir. 2007)* ("A civil conspiracy claim requires a separate underlying tort as a prerequisite for liability."); *Hamborsky v. O'Barto, 613 F. App'x 178, 182 (3d Cir. 2015)*. In surveying the civil conspiracy laws of several different states, the **[*45]** Third Circuit found "the law uniformly requires that conspiracy claims be predicated upon an underlying tort that would be independently actionable against a single defendant." *Id.* (collecting cases). The Third Circuit added "we are unaware of any jurisdiction that recognizes civil conspiracy as a cause of action requiring no separate tortious conduct." *Id.* "Thus, one cannot sue a group of defendants for conspiring to engage in conduct that would not be actionable against an individual defendant." *Pardue v. Gray, 136 F. App'x 529, 533 (3d Cir. 2005)* (quoting *Orthopedic Bone Screw, 193 F.3d at 789*).

Here, Plaintiffs allege "[a]mong the unlawful and tortious acts committed pursuant to and in furtherance of the conspiracy were (i) violations of the state and federal racketeering laws, including the predicate acts of mail and wire fraud; and (ii) violations of the various state law consumer fraud statutes." (ECF No. 411 ¶ 537.) Plaintiffs cannot base their state-law civil conspiracy claims on underlying claims that "would not be actionable against an individual defendant." *Pardue, 136 F. App'x at 533* (quoting *Orthopedic Bone Screw, 193 F.3d at 789*). Because the federal racketeering claims were dismissed, the state-law civil conspiracy claims fail to the extent they are based on violations of federal racketeering law. Similarly, because the **[*46]** state racketeering claims were dismissed, Plaintiffs' state-law civil conspiracy claims fail to the extent they are based on violations of state racketeering laws, with the exception of Plaintiffs' civil conspiracy claim under Arizona law.[13] Notwithstanding, because several of Plaintiffs' consumer fraud claims still survive, Plaintiffs have viable underlying claims to maintain their civil conspiracy causes of action. Accordingly, Defendants' Partial Motion to Dismiss Plaintiffs' state-law civil conspiracy claims is **GRANTED IN PART** and **DENIED IN PART**.

2. State Civil Conspiracy Claims Based on Surviving Claims

---

[12] Under Count Ten of the Third Amended Complaint, Plaintiffs assert "[t]his claim is brought by all plaintiffs against Defendants Novo Nordisk, Sanofi, and Eli Lilly, and alleges violations of the civil conspiracy laws of the following states: Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Nevada, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Utah, Virginia, and Wisconsin." (ECF No. 411 ¶ 525.)

[13] The Court determined Plaintiffs' state racketeering claim under Arizona law survives, and therefore, violations of the Arizona racketeering statute can serve as a predicate for liability to assert a state-law civil conspiracy claim under Arizona law.

Defendants assert the state-law civil conspiracy claims "should be dismissed as duplicative to the extent they are based on a state-law claim that survived [D]efendants' motions to dismiss." (ECF No. 422 at 13.) Defendants also contend the civil conspiracy claims should be dismissed as duplicative "because [P]laintiffs have made no effort to differentiate their civil conspiracy claims from their underlying claims." (ECF No. 468 at 8.) Plaintiffs argue the civil conspiracy claims are not duplicative because Plaintiffs may plead claims in the alternative or allege parallel theories of **[*47]** recovery. (ECF No. 455 at 18.)

Under *Federal Rule of Civil Procedure 8(a)(2)*, a civil plaintiff is required to set forth "a short and plain statement of [his or her] claim showing that [he or she] is entitled to relief." "Factual allegations must be enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555*. While *Rule 8* does not require a plaintiff to provide detailed factual allegations, a plaintiff must provide more than "an unadorned, the-defendant-unlawfully-harmed-me accusation." *Iqbal, 556 U.S. at 678*. Compliance with *Rule 8* requires a plaintiff to "give the defendants fair notice of what the claim is and the grounds upon which it rests." *Twombly, 550 U.S. at 545* (internal citation omitted); *Kanter v. Barella, 489 F.3d 170, 177 (3d Cir. 2007)* (noting the complaint must "provide the opponent with fair notice of a claim and the grounds on which that claim is based").

Here, Defendants' contention that the civil conspiracy claims should be dismissed because they are duplicative to the underlying claims is unconvincing. Defendants are essentially arguing a civil conspiracy claim cannot exist alongside its underlying claim; even though an underlying claim is required for maintaining a civil conspiracy claim. In any event, district courts in this circuit have recognized civil conspiracy claims predicated on underlying consumer **[*48]** fraud claims. *See, e.g.* *Unimed Int'l, Inc. v. Fox News Network, LLC, Civ. A. No. 20-17335, 2021 U.S. Dist. LEXIS 66470, at *12 (D.N.J. Apr. 6, 2021)* (holding because the consumer fraud claim, among others, stated a claim for relief, "[p]laintiff's conspiracy claim also survives dismissal"); *Doherty v. Hertz Corp., Civ. A. No. 10-00359, 2010 U.S. Dist. LEXIS 124714, at *25 (D.N.J. Nov. 24, 2010)* (holding the plaintiff "established a *prima facie* case of civil conspiracy" after successfully pleading her consumer fraud claim); *Aqua Pharms., LLC v. Park Irmat Drug Corp, Civ. A. No. 17-2273, 2018 U.S. Dist. LEXIS 83652, at *13 n.7 (E.D. Pa. May 17, 2018)* (finding "[b]ecause the fraud claim survives, the civil conspiracy claim need not be dismissed"); *Vibra-Tech Eng'rs, Inc. v. Kavalek, 849 F. Supp. 2d 462, 494 (D.N.J. 2012)* (finding a civil conspiracy was adequately pleaded with consumer fraud as one of the underlying claims); *Gray v. CIT Bank, N.A., Civ. A. No. 18-1520, 2018 U.S. Dist. LEXIS 216638, at *22 (D.N.J. Dec. 27, 2018)* (holding because the plaintiff stated a claim for consumer fraud, the "[m]otion to [d]ismiss the conspiracy claim will be denied") *Szelc v. Stanger, Civ. A. No. 08-4782, 2011 U.S. Dist. LEXIS 41827, at *32 (D.N.J. Apr. 15, 2011)* (finding the civil conspiracy claim survived where the alleged state racketeering claim survived to serve as the underlying claim).

Defendants point to no relevant authority in this circuit finding otherwise. To the extent Defendants rely on *Impala Platinum Holdings Ltd. v. A1 Specialized Services & Supplies, Inc.*, the civil conspiracy claims were not dismissed as duplicative, as Defendants contend. *Civ. A. No. 16-1343, 2016 U.S. Dist. LEXIS 127055 (E.D. Pa. Sep. 16, 2016)*. Rather, the court dismissed the plaintiff's civil conspiracy claim for failing to adequately allege malice, an essential element of civil conspiracy under Pennsylvania **[*49]** law. *Id.* at *68-69. Accordingly, Defendants' motion to dismiss Plaintiffs' state-law civil conspiracy claims based on any surviving claims is **DENIED**.[14]

---

[14] Defendants assert the state-law civil conspiracy claims should be dismissed as improper "shotgun pleading" because Plaintiffs "cram three dozen claims, each brough under the law of a different state, into a single count." (ECF No. 422 at 9.) Plaintiffs argue their civil conspiracy claims satisfy the notice pleading requirements without needing to separate each state-law civil conspiracy claim into different counts. (ECF No. 455 at 12.) *Federal Rule of Civil Procedure 8(a)(2)* requires pleadings to contain "a short and plain statement of the claim showing that the pleader is entitled to relief." A plaintiff is required to plead "factual content that allows the court to draw the reasonable inference that the defendant is liable of the misconduct alleged." *Disc Disease Sols. Inc. v. VGH Sols., Inc., 888 F.3d 1256, 1260 (Fed. Cir. 2018)* (quoting *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 556*)). "Specific facts are not necessary; the statement need only give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Erickson v. Pardus, 551 U.S. 89, 93, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)* (citations omitted). Plaintiffs' Third Amended Complaint recounts in nearly 300 pages Defendants' alleged scheme to defraud and conspiracy to inflate prices. The Court finds Defendants have fair notice of the claims asserted against them and the grounds upon which those claims rest.

3. Georgia and Arizona Civil Conspiracy Claims

Defendants argue the Georgia and Arizona civil conspiracy claims fail to the extent they rely on the Georgia and Arizona consumer fraud claims that were dismissed. (ECF No. 422 at 15.) Plaintiffs argue the Arizona and Georgia civil conspiracy claims remain supported by their respective state racketeering allegations. (ECF No. 455 at 16.) Because Plaintiffs' state racketeering claim under Arizona law survives, Plaintiffs' civil conspiracy claim under Arizona law also survives. However, because both the Georgia state racketeering and consumer fraud claims fail, Plaintiffs' civil conspiracy claim under Georgia law also fails. Accordingly, Defendants' motion to dismiss is **GRANTED** as to Plaintiffs' civil conspiracy claim under Georgia law and **DENIED** as to Plaintiffs' civil conspiracy claim under Arizona law.

4. Pennsylvania Civil Conspiracy Claims

Defendants argue the Pennsylvania civil conspiracy claim fails because Plaintiffs have failed to allege malice, which is an essential element for civil **[*50]** conspiracy under Pennsylvania law. (ECF No. 422 at 16.) Plaintiffs argue they alleged "[D]efendants acted intentionally and with intent to mislead, defraud, and deceive," which is sufficient to satisfy the malice requirement under Pennsylvania law to maintain their civil conspiracy claim. (ECF No. 455 at 20.)

Under Pennsylvania law,

> to state a cause of action for civil conspiracy, the following elements are required: (1) a combination of two or more persons acting with a common purpose to do an unlawful act or to do a lawful act by unlawful means or for an unlawful purpose; (2) an overt act done in pursuance of the common purpose; and (3) actual legal damage.

Gen. Refractories Co. v. Fireman's Fund Ins. Co., 337 F.3d 297, 313 (3d Cir. 2003) (citing *Strickland v. Univ. of Scranton, 700 A.2d 979, 987-88 (Pa. Super. Ct. 1997)* (citation and internal quotations marks omitted)). "Proof of malice is an essential part of a cause of action for conspiracy, and malice requires that the conspirators act with the sole purpose of injuring the plaintiff." *Sarpolis v. Tereshko, 625 F. App'x 594, 601 (3d Cir. 2016)* (citations and quotation marks omitted); *see also* *Conquest v. WMC Mortg. Corp., 247 F. Supp. 3d 618, 637 (E.D. Pa. 2017)* (dismissing a civil conspiracy claim where the plaintiff "fail[ed] to allege any facts that suggest[ed] the [defendants] acted contrary to their own legitimate business interests or with the sole intent to harm him"). "Importantly, to state a claim for **[*51]** conspiracy under Pennsylvania law, 'it must be alleged that the sole purpose of the conspiracy was to injure the Plaintiffs.'" *Zafarana v. Pfizer Inc., 724 F. Supp. 2d 545, 559 (E.D. Pa. 2010)* (quoting *Morilus v. Countrywide Home Loans, Inc., 651 F. Supp. 2d 292, 313 (E.D. Pa. 2008)*). Therefore, "where the facts show that a person acted to advance his own business interests, and not solely to injure the party injured, those facts negate any alleged intent to injure." *Becker v. Chi. Title Ins. Co., Civ. A. No. 03-2292, 2004 U.S. Dist. LEXIS 1988, at *13 (E.D. Pa. Feb. 4, 2004)* (citing *Thompson Coal Co. v. Pike Coal Co., 488 Pa. 198, 412 A.2d 466, 472 (Pa. 1979)*).

Here, Plaintiffs allege:

> 526. As detailed above, each of the defendant drug manufacturers separately agreed with the PBMs to commit unlawful and tortious actions in fraudulently pricing the insulin products to consumers and the public. Each defendant drug manufacturer separately shared with the PBMs the common purposes of selling, purchasing, and administering the analog insulins to individual plaintiffs and class members and deriving secret profits from thee above-alleged spread scheme. These profits are greater than either the defendant drug manufacturers or the PBMs could obtain absent their fraudulent concealment of the substantial rebates from defendant drug manufacturers to PBMs.
>
> 527. To effectuate this common purpose, the defendant drug manufacturers periodically and systematically inflated the list prices of the analog insulins. They did so willfully, **[*52]** and with knowledge that class members make payments directly based on the manufacturers' list price. They then represented—either affirmatively or through half-truths and omissions—to the general public and consumers, including plaintiffs and the class, that the analog insulin list prices are a reasonable approximation of the actual cost of these medicines and a proper

> basis for consumer payments. The defendant drug manufacturers and PBMs then concealed from the general public and consumers, like the plaintiffs and class members, the reality that the net prices offered to PBMs in exchange for preferred formulary positions are exponentially lower.
>
> . . . .
>
> 532. In order to garner all of these fees from the defendant drug manufacturers, each PBM and each defendant drug manufacturer meet on a regular basis to discuss analog insulin prices, rebates, spreads, marketing opportunities, and coordination of all of the above.
>
> 533. There is a common communication network between each PBM and each manufacturer for the purpose of implementing the rebate scheme and for the exchange of financial rewards for the PBM activities that benefit the defendant drug manufacturers.
>
> 534. At all relevant times, each one **[*53]** of the PBMs was aware of the defendant drug manufacturers' spread scheme, was a knowing and willing participant in that scheme, and reaped profits from that scheme.

(ECF No. 411 ¶¶ 526-27; 532-34.) Plaintiffs' allegations do not sufficiently allege Defendants acted with the sole purpose of injuring Plaintiffs. *Ruta Kretulskie v. Madison Nat'l Life Ins. Co., Civ. A. No. 18-1357, 2019 U.S. Dist. LEXIS 176356, at *16 (M.D. Pa. Oct. 9, 2019)* (dismissing the civil conspiracy claim under Pennsylvania law where the plaintiff "does not fully satisfy the requisites of state law by adequately pleading that the defendants acted with the sole purpose of injuring the plaintiff"). Accordingly, Defendants' Partial Motion to Dismiss Plaintiffs' civil conspiracy claim under Pennsylvania law is **GRANTED**.

C. Standing

Defendants argue Plaintiffs lack standing to pursue certain claims against certain Defendants because no named Plaintiff "suffered an alleged injury from that defendant's product in a given state." (ECF No. 422 at 17.) Plaintiffs do not substantively dispute this issue. Plaintiffs acknowledge the Court's prior ruling regarding the standing of plaintiffs to bring "claims concerning products that [they] neither purchased nor used." (*Id.* at 4 n.17 (citing the February 2019 Order).) Plaintiffs contend, however, "that for **[*54]** each claim, there is at least one plaintiff who has alleged to have purchased one of the insulins at issue, so dismissal of these claims in their entirety would be inappropriate." (ECF No. 455 at 4 n.17.)

The parties' positions are reconcilable. In the February 2019 Order, the Court held: "As Plaintiffs have asserted multiple claims absent allegations of such products being purchased or used in such jurisdictions, such claims cannot withstand this Motion to Dismiss." (ECF No. 252 at 35.) For each state where no named Plaintiff claims to have purchased a certain Defendant's insulin product, such plaintiff's claim under that state's law against said certain defendant is dismissed. Because there is at least one plaintiff who has alleged to have purchased one of the insulins at issue, no individual plaintiff's claim should be dismissed in its entirety. Accordingly, the parties are directed to provide a joint submission with an agreed upon list as to which claims fail as to certain Defendants where no Plaintiff from a given state purchased that Defendant's products.

IV. Conclusion

For the reasons set forth above, Defendants' Partial Motion to Dismiss is **GRANTED IN PART** and **DENIED IN PART**. **[*55]** Defendants' Partial Motion to Dismiss the state racketeering claims is **GRANTED** with respect to Colorado (Count Four), Georgia (Count Six), Utah (Count Eight), and Wisconsin (Count Nine) and **DENIED** with respect to Arizona (Count Three). Plaintiffs voluntarily withdrew their state racketeering claims with respect to Florida (Count Five) and North Carolina (Count Seven). Defendants' Partial Motion to Dismiss the state-law civil conspiracy claims is **GRANTED** to the extent Plaintiffs base their claims on violations of the federal racketeering law and the state racketeering laws of Colorado, Georgia, Utah, and Wisconsin and **DENIED** to the extent Plaintiffs base their civil conspiracy claim under Arizona law on violations of Arizona's state racketeering law. Defendants' Partial Motion to Dismiss the civil conspiracy claims under Georgia and Pennsylvania law are **GRANTED**. Defendants' Partial Motion to Dismiss the civil conspiracy claims under Arizona law is **DENIED**. Additionally, the

Parties are directed to provide a joint submission with an agreed upon list as to which claims fail as to certain Defendants where no Plaintiff from the respective state purchased that Defendant's products. An accompanying **[*56]** order will follow.

UNITED STATES DISTRICT JUDGE

Dated: December 17, 2021

ORDER

THIS MATTER is before the Court on Defendants Novo Nordisk, Inc. ("Novo Nordisk"), Sanofi-Aventis U.S. LCC ("Sanofi"), and Eli Lilly and Company's ("Eli Lilly") (collectively, "Defendants") Partial Motion to Dismiss the putative Plaintiffs' ("Plaintiffs") Third Amended Class Action Complaint ("Third Amended Complaint") pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. (ECF No. 422.) Plaintiffs oppose the motion (ECF No. 455), and Defendants filed a reply. (ECF No. 468). Having reviewed the parties' submissions filed in connection with the Motion and having declined to hold oral argument pursuant to *Federal Rule of Civil Procedure 78(b)*, for the reasons set forth in the accompanying Opinion and for good cause having been shown,

IT IS on this 17th day of December 2021,

ORDERED that Defendants' Partial Motion to Dismiss (ECF No. 422) the state racketeering claims is **GRANTED** as to Count Four, Count Six, Count Eight, and Count Nine; and it is further

ORDERED that Defendants' Partial Motion to Dismiss (ECF No. 422) the state racketeering claims is **DENIED** as to Count Three; and it is further

ORDERED that Defendants' Partial Motion to Dismiss (ECF **[*57]** No. 422) the state-law civil conspiracy claims is **GRANTED** to the extent Plaintiffs base their claims on violations of the federal racketeering law; and it is further

ORDERED that Defendants' Partial Motion to Dismiss (ECF No. 422) the state-law civil conspiracy claims is **GRANTED** to the extent Plaintiffs base their claims on violations of the state racketeering laws of Colorado, Georgia, Utah, and Wisconsin; and it is further

ORDERED that Defendants' Partial Motion to Dismiss the civil conspiracy claims under Arizona law is **DENIED** to the extent Plaintiffs base their claims on violations of the state racketeering laws of Arizona; and it is further

ORDERED that Defendants' Partial Motion to Dismiss the civil conspiracy claims under Georgia and Pennsylvania law are **GRANTED**; and it is further

ORDERED that Defendants' Partial Motion to Dismiss the civil conspiracy claims under Arizona law is **DENIED**; and it is further

ORDERED that the Parties are to provide a joint submission with an agreed upon list as to which claims fail as to certain Defendants where no Plaintiff from the respective state purchased that Defendant's products.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN1[] **Sherman Act, Claims**

15 U.S.C.S. § 1 of the Sherman Act prohibits entering into agreements that unreasonably restrain trade. An unreasonable restraint is one that inhibits competition in the relevant market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Sherman Act > Claims

HN2[] Actual Monopolization, Claims

15 U.S.C.S. § 2 of the Sherman Act prohibits the unlawful monopolization of trade. To establish a claim under § 2, a plaintiff must prove that the defendant possesses monopoly power in the relevant market and that the defendant willfully acquired or maintained that power through exclusionary conduct.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN3[] Sherman Act, Claims

In the Third Circuit, a private plaintiff seeking to establish a claim for damages under either 15 U.S.C.S. §§ 1 or 2 of the Sherman Act must first establish that it has antitrust standing. Antitrust standing requires that the plaintiff prove that an antitrust injury was suffered by the plaintiff and that the plaintiff is an appropriate plaintiff to bring the antitrust case.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN4[] Remedies, Damages

In determining antitrust standing, the Third Circuit incorporated several factors set forth in judicial precedent. Those factors were organized into the following multifactor balancing test: (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause that harm; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to prevent; (3) the directness of the injury; (4) the existence of more direct victims; and (5) the potential for duplicative recovery or complex apportionment of damages. Therefore, antitrust standing involves a two-part inquiry: (1) whether the plaintiff experienced an antitrust injury; and (2) whether the plaintiff is the proper plaintiff to bring the suit. In an antitrust case where the plaintiff is seeking damages, an antitrust injury is a necessary element of an antitrust claim.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN5[] Standing, Requirements

Antitrust injury must be caused by the antitrust violation, not a mere causal link, but a direct effect.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN6[] Sherman Act, Claims

An antitrust plaintiff cannot be injured in fact by private conduct excluding him from the market when a statute prevents him from entering that market in any event.

Civil Procedure > Appeals > Reviewability of Lower Court Decisions > Preservation for Review

HN7[] Reviewability of Lower Court Decisions, Preservation for Review

When a party asserts a claim in pleadings but at trial does not press the claim in any way or present evidence to support it, the party abandons that claim.

Antitrust & Trade Law > ... > Racketeer Influenced & Corrupt Organizations > Claims > Fraud

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN8[] Claims, Fraud

To establish liability under the Racketeer Influenced & Corrupt Organizations Act (RICO), the plaintiff must show (1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity, plus (5) an injury to business or property. RICO defines racketeering activity as any one of an enumerated lists of different state and federal offenses, also known as predicates. These predicates include any act indictable under specified federal statutes, 18 U.S.C.S. §§ 1961(1)(B)-(C), (E)-(G), as well certain crimes chargeable under state law, 18 U.S.C.S. § 1961(1)(A), and any offense involving bankruptcy or securities fraud or drug-related activity that is punishable under federal law, 18 U.S.C.S. § 1961(1)(D). The plaintiff must show that the defendant committed a RICO predicate act, otherwise the plaintiff's RICO claim fails.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN9[] Private Actions, Racketeer Influenced & Corrupt Organizations

18 U.S.C.S. § 1964(c) provides a private right of action for any person injured in his business or property by reason of a predicate offense. The plaintiff must state an injury to business or property and that a RICO predicate offense not only was a but for cause of injury but was the proximate cause as well. Proximate cause requires some direct relation between the injury asserted and the injurious conduct alleged.

Public Health & Welfare Law > ... > Providers > Payments & Reimbursements > Abuse & Fraud

HN10[] Payments & Reimbursements, Abuse & Fraud

To violate the Anti-Kickback Statute a person or entity must knowingly and willfully offer or pay any remuneration to any person to induce such person to refer an individual to a person for the furnishing of any item or service for which payment may be made in whole or in part under a Federal health care program. 42 U.S.C.S. § 1320a-7b(b)(2)(A).

Governments > Federal Government > Claims By & Against

Public Health & Welfare Law > ... > Providers > Payments & Reimbursements > Abuse & Fraud

HN11[] Federal Government, Claims By & Against

To find an Anti-Kickback Statute violation, a person or entity must knowingly and willfully offer or pay any remuneration to any person to induce such person to refer an individual to a person for the furnishing of any item or service for which payment may be made in whole or in part under a Federal health care program. 42 U.S.C.S. § 1320a-7b(b)(2)(A). The False Claims Act imposes liability on any person who (A) knowingly presents, or causes to be presented, a false or fraudulent claim for payment or approval; or (B) knowingly makes, uses, or causes to be made or used, a false record or statement material to a false or fraudulent claim. In addition, the Travel Act prohibits using interstate travel, mail, or facilities with intent to carry out any unlawful activity, 18 U.S.C.S. § 1952(a)(3), or with intent to distribute the proceeds of any unlawful activity. 18 U.S.C.S. § 1952(a)(1).

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

Evidence > Burdens of Proof > Allocation

HN12[] Private Actions, Racketeer Influenced & Corrupt Organizations

Notably, mere correlation does not demonstrate causation under RICO.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Scope

HN13[] Private Actions, Racketeer Influenced & Corrupt Organizations

When a court evaluates a RICO claim for proximate causation, the central question it must ask is whether the alleged violation led directly to the plaintiff's injuries.

Judges: JOHN T. DORSEY, UNITED STATES BANKRUPTCY JUDGE.

Opinion by: JOHN T. DORSEY

Opinion

[*61] OPINION[1] **AND FINAL ORDER**

The price of prescription drugs in the United States has generated a great deal of attention from government officials, the media and parties who must pay what they consider to be unreasonably high prices for medications. At times these high prices lead to litigation against drug manufacturers. Debtors, who produce one of the most expensive drugs in the U.S., are one of those manufacturers.

Prior to filing for bankruptcy protection, Debtors had been sued by numerous parties over the price of their drug, HP Acthar Gel ("**Acthar**"). Acthar was first approved for use in the United States nearly 60 years ago. Until 2003, Acthar sold for less than $1000 per vial. **[**4]** By 2019, it was selling for nearly $40,000 per vial. Certain third-party payors, who are referred to in this proceeding as the Acthar Insurance Claimants ("**AICs**"), sued Debtors prepetition, and filed proofs of claims for prepetition purchases of Acthar, as well as proofs of claims for administrative expenses based upon post-petition purchases, along with a motion for an order allowing the administrative expense claims.[2] Debtors objected to the Administrative Expense Claims.[3] Following denial of Debtors' Motion for Summary Judgment,[4] I conducted a two-week bench trial to determine the validity of the AICs' Administrative Claims.

Charging a high price for a prescription drug is not, in and of itself, illegal. The United States provides limited controls over the pricing of drugs and, generally speaking, a manufacturer is free to charge whatever price it thinks the market will bear. To prevail on their claims, therefore, the AICs needed to prove that Debtors' **[*62]** ability to

---

[1] This opinion shall constitute the Court's findings of fact and conclusions of law as required by *Federal Rule of Civil Procedure 52* as made applicable by *Federal Rule of Bankruptcy Procedure 7052*.

[2] D.I. 2159, Motion for Entry of an Order Allowing and Compelling Payment of Administrative Claims Pursuant to 503(b) of the Bankruptcy Code (the "**Motion**").

[3] D.I. 3529, Debtors' Objection to Certain Acthar-Related Administrative Claims (the "**Objection**").

[4] D.I. 4792.

charge a supracompetitive price resulted from some other illegal activity. The AICs, therefore, claim that the price of Acthar was unreasonably high because of Debtors' anti-competitive conduct in violation of **[**5]** the *Sherman Act*, and their illegal payments to certain charities and doctors in violation of the *RICO Act* (among other laws) in order to boost sales of Acthar. Having reviewed the extensive evidence submitted at trial, I conclude that the AICs have failed to meet their burden of proof on either of these allegations. Therefore, for the reasons I will explain, the AICs' Motion is denied and the Debtors' Objection to the Administrative Claims is sustained.

FACTS

I. The History of Acthar and Synacthen

The antitrust claims here revolve around two drugs: Acthar and Synacthen Depot ("**Synacthen**"). The first, Acthar, is a drug manufactured and sold by the Debtors. Acthar is a naturally derived, long-acting complex mix of peptides that includes the full natural human ACTH 1-39 amino acid chain along with additional peptides.[5] It was approved for sale in the United States by the FDA in 1952 and is currently approved to treat 19 conditions or "indications."[6] For one of these conditions, infantile spasms ("**IS**") Acthar is a first line treatment, meaning it is typically the first drug prescribed to treat the condition. For all other indications, it is a second-line or later treatment, meaning it is not the first **[**6]** drug prescribed to treat a condition and is prescribed only after other treatments have failed.[7] Acthar is not covered by a patent, but its manufacturing process is a trade secret.[8]

There is no generic or non-brand name version of Acthar, but there are synthetic ACTH products. Synthetic ACTH products contain 24 of the 39 amino acids found in naturally occurring ACTH. Some of the synthetic ACTH products are short-acting, not long-acting like Acthar, and are approved only for diagnostic use, not therapeutic use, meaning they are approved for use in diagnosing a condition, but not treating it. Cortrosyn is an example of a short-acting synthetic ACTH that is on the market for diagnostic purposes.[9]

While several long-acting synthetic ACTH products have been developed, none have been approved for use in the U.S.[10] One such product, the other drug at the center of this case, is Synacthen. The active ingredient in Synacthen and other long-acting synthetic ACTH products is simply synthetic ACTH 1-24, also known as cosyntropin or tetracosactide.[11] Synacthen is approved for sale in over 40 countries to treat several conditions (many of the same ones for which Acthar is used) but is not approved in the **[**7]** U.S. Synacthen has no patent or trade secret protection.[12]

II. Mallinckrodt's Acquisition of Acthar and the U.S. Rights to Synacthen

Acthar was owned by Sanofi (now Aventis) until it was purchased by Questcor **[*63]** Pharmaceuticals, Inc. in 2001.[13] Questcor was struggling to make a profit from its sales of Acthar. Then, in 2003 Acthar received orphan drug designation for IS, though it was not yet approved for that condition. With that designation, and following a change in leadership, Questcor implemented a new aggressive pricing strategy for Acthar and the price jumped from $902 per vial in 2003 to over $23,000 in 2007.[14] In October of 2010, Acthar was approved to treat IS and obtained orphan drug exclusivity for that condition until 2017.[15] Questcor continued to increase the price of Acthar until 2012, when the price reached $28,686.[16]

In the years leading up to 2013, Questcor had been monitoring Synacthen, which was then held by Novartis, as a potential competitor to Acthar.[17] Novartis held global development rights for Synacthen, but never developed it for sale in the U.S., determining that it would be too time-consuming and costly to do so. It decided to auction off the U.S. rights to Synacthen instead. **[**8]** [18]

When Questcor learned that Novartis was shopping the U.S. rights to Synacthen, it acted quickly to bid on those rights. Questcor outbid the competing bidders, Retrophin and Marathon, and secured the license for $135 million ($300 million with the annual milestone payments included).[19] The license provided Questcor with the Synacthen formulation, trademark, post-marketing safety data, manufacturing know-how, and toxicology studies.[20]

Although Questcor's agreement with Novartis included "mechanisms to ensure that Questcor pursue[d] FDA approval and commercialize[d] Synacthen upon approval,"[21] the acquisition -- being one by a competitor of a potentially competing product -- drew the attention of the Federal Trade Commission (the "**FTC**"). Only a month after the Synacthen acquisition, the FTC opened an investigation "to determine whether the acquisition may substantially lessen competition and thereby violate federal antitrust laws."[22] The FTC action was resolved a few years later, as discussed below.

Around the same time that Questcor acquired the Synacthen license, the Debtors had also begun to conduct diligence regarding the potential acquisition of Questcor. In November of 2013, Mallinckrodt's **[**9]** investment banker, Barclay's, delivered its preliminary assessment of Questcor to Mallinckrodt's management.[23] The Barclay's Report highlighted Acthar as Questcor's "Key Product" and noted that upon acquiring Acthar, Questor had increased its manufacturing capacity and increased the price from $1650 per vial to $28,686 per vial. It also noted that "Acthar is not protected by any patents . . . but multiple barriers to entry related to formulation, manufacturing and regulatory make generic synthetics competition less likely."[24]

[24] *Id.*

[*64] The Barclay's presentation also discussed Questcor's recent acquisition of Synacthen, noting there were "immaterial U.S. sales and long projected timeline to U.S. launch."[25] It went on to list the Synacthen acquisition as one of the barriers to entry for Acthar competition, describing Synacthen as "Questcor's main source of potential competition."[26] The Barclay's presentation listed the Synacthen acquisition as one of two defensive moves recently made by Questcor, along with Questcor's acquisition of BioVectra, Questcor's manufacturing partner for the active ingredient in Acthar. As Barclay's explained, the BioVectra acquisition "secured key manufacturing process trade **[**10]** secrets relating to Acthar."[27] The presentation went on to describe the Synacthen acquisition as "a defensive move to acquire a potential future competitor" and noted that it "removes the overhang of potential franchise erosion due to future competition...."[28]

The Debtors' internal due diligence came to similar conclusions about Questcor, describing Acthar as a "protected franchise" due to the complicated formulation, manufacturing, and regulatory requirements and suggesting that Questcor had "walled off possible weaknesses by acquiring ... Synacthen."[29] Mallinckrodt's internal diligence presentations also state that the Synacthen acquisition could "control introduction [of Synacthen] into the U.S. market" and assume that Acthar would "face no competitive threat in the future from synthetic ACTH" under any forecast scenario.[30]

Mallinckrodt's diligence into Questcor also highlighted legal actions and governmental investigations against Questcor, which included the FTC probe, and investigations by the US Attorney's Offices for Pennsylvania and New York, as well as the SEC regarding Questcor's promotional practices related to Acthar with potential fines in the range of $200-400 million. **[**11]** Mallinckrodt's Audit Committee characterized the FTC probe as "a medium risk to achievement of deal value."[31]

With these risks in mind, the Debtors' board voted to proceed with the acquisition and the transaction closed in August of 2014, in a deal worth approximately $5.8 billion.[32]

III. Development of Synacthen and other Synthetic ACTH Products

Thus, by the end of 2014, Mallinckrodt owned both Acthar and the U.S. rights to Synacthen. Since Questcor's agreement with Novartis required it to try to use commercially reasonable efforts to develop and commercialize Synacthen and included milestone deadlines for doing so, it had begun working on developing Synacthen promptly after the acquisition. Questcor quickly discovered that it got less than it had bargained for from Novartis.[33]

Among other things, Questcor learned that there were problems with both Synacthen's drug substance (the drug's active pharmaceutical ingredient or "**API**") and manufacturing that would need to be resolved before any effort to obtain FDA approval could begin. Within a few months **[*65]** of the acquisition of Questcor, Debtors found themselves in the position of having to find a new manufacturer for Synacthen, a process which was **[**12]** delayed

by the then current manufacturer's slow release of the necessary records. While they were able to secure a new manufacturer by June of 2014, it was not until October of 2015 that that manufacturer was able to produce an "initial engineering batch" and not until February 2016 that it was able to produce batches for use in clinical trials.[34]

In the meantime, the Debtors needed to determine which indications or medical conditions they would pursue for Synacthen. With the knowledge that Synacthen's approval for any indication for which Acthar was already approved would significantly affect Acthar's sales, the Debtors considered multiple options, all of which would "extend Acthar's lifecycle."[35] In several internal emails, the Debtors' employees expressed concern about bringing Synacthen to the market for any indication. In February of 2016, Josh Schafer, the Debtors' Chief Strategy Officer, prepared a report entitled "Synacthen Scenarios & Assumptions" in which "it is assumed that Synacthen would gain greater than 50% of IS patient share."[36] The report further calculated the cash impact of a Synacthen launch, concluding that a difference of just two years would result in a benefit to **[**13]** Mallinckrodt of potentially hundreds of millions of dollars.[37]

The Debtors ultimately decided to pursue approval for a disease called Duchenne's muscular dystrophy ("**DMD**"), a decision that Mallinckrodt's Chief Scientific Officer, Dr. Steven Romano testified was driven by several factors. Clinically, the Debtors decided on DMD because it was a disease affecting adolescent boys for which there were currently few treatment options and because the data regarding the ways in which Syncathen works in the body suggested that Synacthen might be particularly effective.[38] But the Debtors also chose DMD because they believed they could get orphan drug status for Synacthen if it were approved for this indication, which would give the Debtors exclusivity for several years and enable them to price Synacthen at a higher level than it was priced outside of the U.S. -- roughly $300,000 per year.[39] Debtors knew that obtaining approval of Synacthen for DMD had a low probability of success (about 15%), but as Dr. Romano and others testified, the probability of the FDA approving any drug is relatively low.[40]

While working to get Synacthen approved to treat DMD, the Debtors were also conducting clinical research **[**14]** and market studies to understand the differences between Acthar and Synacthen with the goal of helping both physicians and their own commercial team understand the distinctions between the products.[41] Some of the market research the Debtors had conducted showed that physicians believed Synacthen and Acthar to be clinically similar and therefore if the Debtors failed to differentiate the two products, Acthar sales might quickly decline in favor of Synacthen sales.[42] Accordingly, the Debtors undertook **[*66]** a "full scrub of data to remove any use of Synacthen data in reference to Acthar."[43]

During the same time that the Debtors were working on getting Synacthen approved for treatment of DMD, the losing bidders for the Novartis license — Retrophin and Marathon — also began to work on getting a synthetic ACTH product to market. The Debtors' possession of the rights to Synacthen did not prevent others from

developing a competing long-acting synthetic ACTH formulation. There was no IP protection on Synacthen, and its active ingredient was relatively easy to reproduce.[44]

Retrophin launched its development efforts immediately after losing its bid for Synacthen. On June 13, 2013, following its failed auction **[**15]** bid, Retrophin's CEO observed that losing the auction was a blessing in disguise, stating "Synacthen was off-patent. The API [active pharmaceutical ingredient] is readily available. We can secure API, formulate the product, file for orphan status, run the trial we intended to run, all without Novartis.... [W]e might even save time given Novartis is still upgrading their CMC and their fill-finish plan is not FDA approved."[45]

By December 2014, Retrophin was able to formulate its own synthetic ACTH product and manufacture "proof of concept" batches.[46] Retrophin sought FDA approval of its product for use in treating infantile spasms and nephrotic syndrome.[47] However, it abandoned the project at the clinical trial stage.[48]

Marathon likewise began working on a synthetic ACTH shortly after it lost the Novartis bid, a project that was later sold to West Therapeutics, Inc.[49] West was also seeking approval of its product for treatment of infantile spasms.[50]

These last few events — the development and manufacturing efforts of the Debtors, Retrophin, and Marathon/West all took place in the three plus years after Questcor acquired the Synacthen license in 2013. As previously noted, shortly after that transaction **[**16]** closed, the FTC launched an investigation into whether the acquisition of the Synacthen license violated antitrust laws. As all the events from 2013 through 2016 unfolded, the FTC continued its investigation and in 2017, the parties reached a settlement. In addition to a $100 million fine, the settlement required the Debtors to (1) sublicense certain of the rights to Synacthen to a third party, royalty free and with an indefinite term, to develop Synacthen and seek approval for use in treating infantile spasms and nephrotic syndrome; (2) provide the sublicensee with all rights and information it had received under the license with Novartis, as well as the Debtors' improvements upon those assets, (3) fulfill contractual obligations to pay Novartis; and (4) file annual reports with the FTC.[51] The FTC approved Marathon (later West) as the sublicensee.

So, although Marathon/West had already begun working on a synthetic ACTH, by 2017 it had received all the **[*67]** Synacthen assets that the Debtors had received from Novartis. West ultimately sought FDA approval for its synthetic ACTH product, Cosyntropin, for a diagnostic indication using what is commonly referred to as a "505(b)(2) application."[52]

[17]** West, using both its own data and the data it received from the Debtors, tried to get approval for Cosyntropin, but following feedback from the FDA regarding the difficulty it would likely encounter in establishing the necessary bridge, West ultimately decided to abandon its attempts to bring a synthetic ACTH product to market.[53]

The Debtors, however, were continuing their efforts to get Synacthen approved, working through the various stages of clinical trials. It was then that they began to encounter more difficulties. First, the FDA approved a new drug for DMD, which was priced significantly lower than Synacthen's anticipated price. This drastically changed the economics of the Synacthen project for the Debtors and they decided to write off the value of Synacthen entirely.[54] Debtors continued to work on getting Synacthen approved for DMD for another year, since they had committed to the DMD patients and medical community to use best efforts to complete the studies, but they encountered what they viewed to be insurmountable problems in enrolling patients for the necessary clinical trials.[55] Accordingly, in December of 2019, Debtors abandoned the project.

As Dr. Romano testified, there were **[**18]** multiple considerations, including commercial, regulatory, legal, and practical ones that informed the Debtors' decision not to do anything further with Synacthen at that point in time.[56] There were also financial concerns. Management was informed by Hillary Muldoon, Debtors' head of competitive intelligence, that "a potential launch of [Synacthen] in any therapeutic indication will have a negative impact on the Acthar business."[57] Following their decision to cease development of Synacthen, on July 14, 2020, the Debtors notified Novartis that they were unilaterally and permanently suspending all remaining rights to develop Synacthen.

At this point in time, no one is pursuing the development or marketing of Synacthen or any synthetic ACTH. However, there is one company, ANI Pharmaceuticals, Inc., that was working on reviving a previously approved, but lapsed, non-synthetic natural ACTH product. On November 1, 2021, ANI obtained FDA approval for its product, Purified Cortrophin Gel, for the treatment of acute exacerbations of MS, rheumatoid arthritis, and nephrotic syndrome.[58] ANI's product is expected to hit the market in 2022 and will compete with Acthar.[59]

[*68] IV. <u>Acthar Pricing</u>

Over the years, **[**19]** the Debtors have considered making changes to Acthar's pricing structure multiple times. By early 2020, following the entry of a $650 million judgment against the Debtors by a D.C. Court on claims made by the Centers for Medicare and Medicaid Services ("**CMS**") regarding rebates owed to the federal government due to increases in Acthar's price[60] and the continued negative publicity surrounding Acthar, Debtors again revisited the idea of changing Acthar's pricing structure. On April 30, 2020, Hugh O'Neill sent an email attaching a presentation called "Acthar Gel Pricing Options" in which the Debtors weighed "the financial realities of the company" against "the ability to shed the negative impact" that the pricing of Acthar has had on their corporate reputation.[61] The presentation concludes that "there is no scenario where a [price] reset results in a better financial outcome for the brand. The tradeoff will come down to a choice between reduction of future risk and optimizing short term financial results."[62]

As Mr. Schafer, the Debtors' Chief Strategy Officer explained in May of 2020, "Acthar appears more 'Cash Cow' than 'Star'... we need to evaluate whether to divest or manage for cash. **[**20]** . . .Divesting Acthar could be beneficial because of its impact on capital and negative growth profile, and remove perceptual overhang. However,

our ability to transact at a reasonable value is dependent on cleansing Acthar of its liabilities."[63] Ultimately, the Debtors decided not to change the price of Acthar.

V. Acthar Co-Pay Subsidies

As the price of Acthar steadily increased, Questcor developed relationships with certain non-profit organizations that provide co-pay assistance to patients who cannot afford their copays. As Kathleen Breton, the Debtors' Senior Director of Patient Services and Reimbursement testified, "most Medicare patients' Acthar copays are in the thousands of dollars" and "most Medicare patients end up requiring some form of financial assistance to pay for Acthar."[64]

In 2013, Questcor had been working with an entity called the Chronic Disease Fund ("**CDF**"), a non-profit organization that provides copay assistance for patients who cannot afford the full copay their insurer requires for a particular drug. In December 2013, in response to negative media attention regarding CDF's relationship with Questcor, CDF's president resigned, and the entire board was replaced. CDF **[**21]** subsequently closed the funds that covered Acthar as noncompliant with its new policies.[65]

When CDF closed its funds, Questcor moved its donations to two other foundations, the Caring Voice Coalition ("**CVC**") and The Assistance Fund ("**TAF**"). But by the end of 2015, CVC also terminated its relationship with Questcor, also because of negative media attention.[66]

Questcor, by now Mallinckrodt, continued its relationship with TAF, with whom it worked from 2014 until December **[*69]** 2020.[67] Debtors' donations were allocated across funds for multiple diseases. Before the Debtors started donating to TAF, TAF did not cover copays for Acthar.[68]

Internal emails at Mallinckrodt show that the company was aware that its donations to TAF increased Acthar sales. In an August 2015 email from the Debtors, an employee acknowledged that Mallinckrodt's relationship with TAF, or more specifically its donations to TAF, "significantly increase[d] sales of Acthar..."[69] From 2014 through 2017, the general manager of the Acthar business determined how much to donate to TAF.[70]

However, in 2017, following an industry-wide investigation into 501(c)(3) foundations that provide copay support, and the service of a civil investigative demand **[**22]** upon Debtors by the U.S. Attorney's Office for the District of Massachusetts, Debtors began to implement new policies and procedures regarding their relationships with copay assistance funds. They first transferred responsibility for relationships with these funds from their commercial department to their government affairs department.[71] In 2018, the Government Affairs department implemented a detailed standard operating procedure ("**SOP**") that considered the guidelines issued by the U.S. Department of Health and Human Services' Office of Inspector General (the "**OIG**") regarding how manufacturers can make donations to funds without violating the Anti-Kickback statute.[72] The Debtors' U.S. General Counsel, Mark Tyndall,

testified that Debtors' agreement with TAF expressly incorporated the Debtors' SOP and included firewalls to ensure that the commercial business had no contact with anyone at TAF. Donation requests from TAF to the Debtors were unsolicited and due diligence was conducted to ensure that funds at TAF to which the Debtors' donations were allocated were "defined by reference to widely recognized clinical standards," "without limitation to symptoms, severity of symptoms, or disease **[**23]** stages," and "in a manner that are open to a broad range of products" as the OIG guidance required.[73] Debtors directed TAF to limit the amount of information and data provided to the Debtors to ensure that they could not correlate their contributions to the amount of co-pay assistance provided to Acthar patients.[74]

While Debtors established a Patient Foundation Charitable Contributions Committee to oversee and approve TAF donations, it does not appear that the committee operated in any formal capacity. As Mr. Tyndall testified, the committee did not hold formal meetings, keep minutes, or have bylaws, and they communicated largely by email.[75]

Between 2014 and 2020, the Debtors donated over $120 million to TAF. Over the years, the Debtors had discussed ceasing donations to TAF, but observed that doing so "would have a negative impact of tens of millions of dollars per year on Acthar's net sales."[76] Ultimately, the Debtors decided to stop donations beginning in **[*70]** 2021 because of "concerns about potential legal exposure of continuing to make those donations."[77] When the Debtors did cease donations, they saw "an uptick in the number of patients that [they] sent to [their] free goods programs ... because **[**24]** the funding wasn't available at The Assistance Fund anymore."[78]

VI. <u>Physician Speaker Program</u>

During this time, the Debtors also worked to increase their efforts to market Acthar by hosting speaker programs to educate healthcare professionals about Acthar. The goal of these programs was to increase sales of Acthar.[79] Like with copay fund contributions, the Debtors also have policies in place regarding their speaker programs to prevent abuse.[80] These policies require, among other things, that speakers have a contract in place and are paid fair market value for their services, that speaking training meetings and programs be held in education-appropriate venues, that all meals provided in conjunction with such programs are modest and for a legitimate purpose, and that Debtors publish information about the payments they have made to physicians annually.[81]

Debtors use a third-party speaker program management firm called Veeva to manage logistics and provide Debtors with reports regarding compliance with their policies. Where non-compliance is alleged, it is investigated, and corrective action is taken where necessary.[82]

During the relevant time for this case, which is the post-petition period, the Debtors **[**25]** paid approximately $1.75 million to physicians for at least 443 speaker events and there are ongoing investigations into the Debtors' payments to healthcare providers in at least two states.

ANALYSIS

I. Federal Antitrust Claims

The AICs assert administrative expense claims based on alleged antitrust violations by the Debtors under *Section 1* and *Section 2 of the Sherman Act* during the post-petition period. In connection with Debtors' Motion for Summary Judgment, I concluded that there were material issues of fact regarding whether Debtors' conduct, either pre-petition or post-petition, constituted illegal conduct under the *Sherman Act* that allowed the Debtors to maintain a monopoly giving Debtors the ability to charge supracompetitive prices post-petition.[83]

HN1[] *Section 1 of the Sherman Act* prohibits entering into agreements that unreasonably restrain trade. *LifeWatch Servs. v. Highmark Inc., 902 F.3d 323, 335 (3d Cir. 2018)*. "An 'unreasonable' restraint is one that inhibits competition in the relevant market." *Id.*

HN2[] *Section 2 of the Sherman Act* prohibits the unlawful monopolization of trade. To establish a claim under *Section 2*, a plaintiff must prove that the defendant possesses monopoly power in the relevant market and that the defendant willfully acquired or maintained that power through exclusionary conduct. *Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 307-08 (3d Cir. 2007)*.

[*71] ***HN3***[] In the Third Circuit, a private plaintiff **[**26]** seeking to establish a claim for damages under either *Section 1* or *Section 2 of the Sherman Act* must first establish that it has antitrust standing. *City of Pittsburgh v. W. Penn Power Co., 147 F.3d 256, 264 (3d Cir. 1998)* ("The question of standing is a threshold inquiry in all actions."); see also *In re Wellbutrin XL Antitrust Litig., 868 F.3d 132 (3d Cir. 2017)* (same). Antitrust standing requires that the plaintiff prove that an antitrust injury was suffered by the plaintiff and that the plaintiff is an appropriate plaintiff to bring the antitrust case. *Associated General Contractors of California, Inc. v. California State council of Carpenters, 459 U.S. 519, n.31, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. Thus, the Debtors argue, the AICs had to prove that but for Questcor's acquisition of the Synacthen license, the FDA would have approved Synacthen for sale in the U.S., which would have created competition for Acthar in the market.

The AICs argue that the Debtors apply the wrong standard for establishing antitrust standing, or what they refer to as causation. They assert that I should apply the standard outlined in *Novell, Inc. v. Microsoft Corp. (In re Microsoft Corp. Antitrust Litig.), 699 F. Supp. 2d 730, 748. (D. Md. 2010)*, *rev'd in part on other grounds by* *Novell, Inc. v. Microsoft Corp., 429 Fed. Appx. 254 (4th Cir. 2011)*, that to satisfy the causation requirement a plaintiff need only show that the conduct at issue "contributed significantly to a defendant's continued monopoly power." Thus, the AICs argue, they only needed to present evidence that it was probable that a competitor armed with the Synacthen license would have obtained FDA approval absent Debtors' **[**27]** conduct. The AICs reliance on *Novell* is misplaced. As the *Novell* Court recognized, the "contributed significantly" standard is derived from the Federal Circuit's decision in *United States v. Microsoft, 253 F.3d 34, 80, 346 U.S. App. D.C. 330 (Fed. Cir. 2001)*. The Federal Circuit specifically stated in its ruling that the "contributed significantly" standard applied in "equitable enforcement actions as opposed to actions for money damages." Therefore, I will apply the standard articulated by the Third Circuit in *City of Pittsburgh* and *Wellbutrin*.

HN4[] In determining antitrust standing, the Third Circuit incorporated several factors set forth by the Supreme Court in *Associated General Contractors of California, Inc. v. California State Council of Carpenters. 459 U.S. 519, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. Those factors were organized into the following multifactor balancing test

[83] D.I. 4792.

by the court in *In re Lower Lake Erie Iron Ore Antirust Litig. 998 F.2d 1144, 1165-66 (3d Cir. 1993)*: (1) the causal connection between the antitrust violation and the harm to the plaintiff and the intent by the defendant to cause that harm; (2) whether the plaintiff's alleged injury is of the type for which the antitrust laws were intended to prevent; (3) the directness of the injury; (4) the existence of more direct victims; and (5) the potential for duplicative recovery or complex apportionment of damages. Therefore, antitrust standing involves a two-part inquiry: (1) whether the plaintiff experienced an antitrust injury; and (2) whether the plaintiff is **[**28]** the proper plaintiff to bring the suit. In an antitrust case where the plaintiff is seeking damages, an antitrust injury is a necessary element of an antitrust claim. *See* *In re Wellbutrin XL Antitrust Litig., 868 F.3d 132 (3d Cir. 2017)* ("antitrust standing is more properly viewed as an element of an antitrust claim..."). Because I find that the AICs failed to carry their burden of proving a but for connection between the Debtors' conduct and their alleged injury, I do not need to address the remaining standing issues. *See* *City of Pittsburgh v. W. Penn Power Co., **[*72]** 147 F.3d 256, 265 (3d Cir. 1998)* ("If antitrust injury is not found, further inquiry is unnecessary.")

Debtors rely on *City of Pittsburgh* to argue that antitrust standing does not exist when a plaintiff's grievance is caused by a regulatory scheme and not the defendant's actions. *147 F.3d 256, 266*. In *City of Pittsburgh*, the City alleged an antitrust injury based on two power companies entering into a pre-merger agreement whereby one power company pulled its application to expand its services to additional zones in Pittsburgh. The City argued that the agreement lessened competition and raised prices. The court reasoned that the antitrust injury was too speculative as the lack of competition was due to a regulatory scheme and the City was merely "foist[ing] [its] version of what might have been on the court under **[**29]** the rubric of antitrust injury." *Id. at 267*. The court also concluded that there was a lack of facts regarding the likelihood that the regulatory authority would have granted the withdrawing power company the approval it had requested.

Debtors contend that *City of Pittsburgh* is dispositive because the court rejected antitrust claims for lack of antitrust injury where "[t]he presence of the regulatory scheme and need for approval" serves to cut "the causal chain and converts what might have been deemed antitrust injury in a free market into only a speculative exercise." *147 F.3d at 267-68*. If no antitrust injury exists where it is unknown whether the regulatory authority would have granted a competitor approval because it never applied, then surely there can be no injury in a case where a competitor sought approval and was denied.

The AICs argue that *City of Pittsburgh* is inapposite because the court made clear that the ruling was specific to the era of regulated electric utility monopolies. At least one decision from the District of Delaware concluded that *City of Pittsburgh* did not apply in the context of a case involving the intersection of the Sherman Act and the *Hatch Waxman Act*. *In re Metoprolol Succinate Direct Purchaser Antitrust Litigation, 2010 U.S. Dist. LEXIS 36303, at *21 (D. Del. Apr. 13, 2010)*. However, that decision was prior to the Third Circuit's decision in *Wellbutrin* where the **[**30]** Court recognized that "[i]n *City of Pittsburgh* we said that no antitrust standing exists when a plaintiff's grievance is caused by a regulatory scheme rather than by the defendant's actions." *868 F.3d at 166*. I conclude that the *Wellbutrin* Court recognized the continuing validity of *City of Pittsburgh* and at least one court has recognized that the *Metoprolol* decision was superseded by *Wellbutrin. See* *United Food & Commer. Workers Local 1776 v. Teikoku Pharma USA, 296 F. Supp. 3d 1142, 1197 (N.D. Cal. 2017)* (noting that *Metoprolol*'s rejection of the concept that certain regulatory requirements could be the cause of the antitrust injury instead of the defendant's conduct was superseded by the *Wellbutrin* and *Nexium* decisions).

In *Wellbutrin*, the appellants claimed that absent certain reverse settlement agreements, Anchen Pharmaceuticals would have launched a generic drug to compete with the defendant's drug. *868 F.3d at 165*. The Court stated that the appellants had to show that the harm - increased drug prices for Wellbutrin XL -was caused by the settlement. *Id. at 164-165*. The court ultimately rejected appellants' argument because it did not account for a regulatory or legislative bar, holding that appellants' antitrust claims fail because the defendant's actions were not the actual cause of the appellants' alleged injury. *Id. at 165-166*. Moreover, the Court concluded that the appellants must produce evidence that it is more likely **[**31]** than **[*73]** not that Anchen Pharmaceuticals, would have obtained a license. *Id. at 167*. Evidence showing that another manufacturer may have obtained a license fails to meet this burden. *Id.*

In *Meijer, Inc. v. Biovail, 533 F.3d 857, 382 U.S. App. D.C. 385 (D.C. Cir. 2008)*, the Court recognized the need for an antitrust plaintiff to prove that the defendant's conduct caused the alleged antitrust injury in the context of a regulatory scheme. The Court concluded: "a would-be purchaser suing an incumbent monopolist for excluding a potential competitor from which it might have bought a product at a lower price must prove the excluded firm was willing and able to supply it but for the incumbent firm's exclusionary conduct." *Id. at 862*. The AICs assert that they have met that burden of proof. I disagree.

Debtors presented evidence at trial, through the expert testimony of Dr. Williams and Dr. Trish as well as the testimony of Mallinckrodt executives, that FDA regulatory requirements created significant barriers to the entry of Synacthen, or any other long-acting synthetic ACTH drug, into the market.[84] The documents submitted into evidence corroborate this testimony. For example, the documents show that before Questcor even acquired the Synacthen license, the previous owner, Novartis, concluded that **[**32]** obtaining FDA approval for Synacthen in the U.S. was likely to be so fraught with challenges that it was not worth the effort.[85] Upon acquiring the Synacthen assets from Novartis, Questcor too began to see that what they had purchased was likely not going to be helpful in overcoming the anticipated FDA hurdles.[86] Even after they resolved the biggest unforeseen problem with the Synacthen assets — the fact that the existing Synacthen manufacturer was not FDA approvable—and were able to get a new manufacturer up and running, Questcor (later Mallinckrodt) encountered additional problems at the clinical trial stage that prevented it from satisfying the FDA's stringent requirements.[87]

Further, the problems that the Debtors encountered with the FDA approval process **[*74]** are not ones that are unique to them or ones that could be explained away by reference to their decisions along the way. The evidence at trial suggested that getting beyond the clinical trial stage of the FDA approval process is so difficult that the other manufacturers who sought approval of a synthetic ACTH product either also tried and failed at this stage or only sought approval in a manner that would avoid it entirely.[88] Even the AICs' **[**33]** own expert, Dr. Rheinstein? who also described the rigorous FDA approval process? concluded that he could only opine that Synacthen could have been approved for diagnostic use and not that it would have been approved because there are always other considerations, including whether the development of synthetic ACTH would make business sense.[89] I find this to be persuasive.

[85] DX 162 (discussing possibility of pursuing FDA approval of Synacthen for MS indication and stating that "the team felt there were significant challenges to developing Synacthen as a commercially successful product in this modern era of FDA review and scrutiny compared with the 1952 approval of Acthar Gel in MS.").

[86] DX 231 (discussing change in FDA requirements that lowered the allowed limit of impurifications contained in peptides, stating "up until 2007, both FDA and EMA were allowing peptides to have [ ] limits of 0.2%, 0.5% and 1.0%. It is still allowed at those limits in the EU . . . However, in 2008, FDA started to push peptides to comply with the ICH limits for small molecules (unless justified), so it is now 0.05% report, 0.1% ID, and 0.15% qualified for API. . . Basically, that means that we will need to qualify (with existing tox data hopefully), the two new impurities at the very least."); DX 230 (discussing shortcomings in existing toxicology data); DX 235 (discussing problems Questcor uncovered with Synacthen's existing manufacturer, Takeda, stating "Takeda claims that they are not FDA approved (no problem) but more importantly are not suitable for an FDA inspection (big problem). They also claimed that their Synacthen production processes are complex and not a simple fill/finish operation (bigger problem). Moreover, they claim the production processes need to be developed further to be considered US commercial-ready. It looks as if we have uncovered yet another can of worms with regards to Synacthen CMC.")

[87] 11-10-21 Transcript at 80-82 (Debtors' Chief Scientific Officer discussing inability to satisfy FDA's clinical trial requirements because of difficulties finding patients willing to enroll in studies).

[88] 11-17-21 Transcript at 34 (noting Retrophin abandoned its attempts at FDA approval for its synthetic ACTH at the clinical trial stage); Burke Transcript (West's representative discussing risk associated with clinical trials and their use of a 505(b)(2) application to avoid the need for clinical trials); 11-10-21 Transcript at 77 (likelihood of any drug getting approval from the FDA is less than 10%).

[89] 11-12-21 Transcript at 126.

In addition to the persuasive evidence that the FDA regulatory process was the cause of the inability of either the Debtors or a potential competitor developing Synacthen or another long-acting synthetic ACTH product, the Debtors also presented evidence to refute the AICs' allegations that it was the Debtors' possession of the Synacthen rights that prevented or delayed the entry of a synthetic ACTH product to the market. Several witnesses testified that there was no IP protection for Synacthen, and it was relatively easy to reproduce.[90] Indeed, at least two other companies were able to do so without the Synacthen assets.[91] Further, even after the Debtors turned over the Synacthen assets to Marathon /West after the 2017 settlement with the FTC, West was still unable to obtain FDA approval for its synthetic ACTH product.[92]

All the evidence presented establishes that the FDA's drug approval requirements served as a barrier to the entry of a new synthetic ACTH drug to the market. ***HN5***[] As the *City of Pittsburgh* Court explained:

> [A]ntitrust injury must be caused by the antitrust violation-- not a mere causal link, but a direct effect. Here, the interposition of the regulatory scheme and actions of the parties -- both defendants and plaintiff -- interferes with the chain of causation. The statutory scheme precluded competition without the requisite regulatory permission. ***HN6***[] As Professors Areeda & Hovenkamp describe, "a plaintiff cannot be injured in fact by private conduct excluding him from the market when a statute prevents him from entering that market in any event." Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** P 363(b), at 222 (1995) (citing *Axis S.p.A. v. Micafil, Inc., 870 F.2d 1105 (6th Cir. 1989)*).

City of Pittsburgh v. W. Penn Power Co., 147 F.3d 256, 268 (3d Cir. 1998) quoting **[*75]** *429 U.S. at 489*. Just as the regulatory scheme present in *City of* Pittsburgh precluded competition in the utility market without the permission of the Public Utility Commission, here, the FDA precluded competition in the pharmaceutical market without its permission. This regulatory barrier broke the chain of causation and, accordingly, the AICs were unable to prove that the harm they experienced **[**35]** was connected to and in fact caused by the Debtors' alleged anticompetitive conduct. *147 F.3d at 267-68* ("The presence of the regulatory scheme and need for approval . . . cuts the causal chain and converts what might have been deemed antitrust injury in a free market into only a speculative exercise."). For that reason, the AICs claims must fail.

Accordingly, I find that the AICs have failed to present sufficient evidence to support a conclusion that but for Debtors' acquisition of the Synacthen Assets a competitor would have developed either Synacthen or another long-acting synthetic ACTH product that could compete against Acthar. Having failed to prove a causal connection between Debtors' alleged illegal conduct and their damages, the AICs have failed to establish requisite standing to maintain a claim under the *Sherman Act* and, accordingly, an administrative claim under the Bankruptcy Code. Because the AICs lack standing, it is not necessary to address other antitrust elements, including damages.

II. State Law Antitrust Claims

In their administrative claim, the AICs alleged that the Debtors' conduct also violated numerous state laws. The AICs, however, failed to connect any evidence admitted at trial to the alleged **[**36]** state causes of action. Therefore, I conclude that the AICs have abandoned those claims *West v. Gregoire, 184 Wn. App. 164, 336 P.3d 110, 113 (Washington Court of Appeals, 2014)* (***HN7***[] "When a party asserts a claim in pleadings but at trial does not 'press' the claim in any way or present evidence to support it, the party abandons that claim."); *Harbison v.*

[92] Burke Deposition at 40 (testimony that none of the information West received was "adequately supportive to be meaningfully additive.").

Little, 723 F. Supp. 2d 1032, 1038 (M.D. Tenn. 2010) ("If a plaintiff fails to include arguments regarding a claim in a post-trial brief, the court is justified in finding that the plaintiff has abandoned that claim.").

III. RICO Claims

In their pre-trial brief, the Claimants argued that the Debtors violated the RICO Act through the Anti-Kickback Statute, False Claims Act, mail fraud, wire fraud, and the Travel Act. The AICs contend that the Debtors violated these federal statutes in two ways. First, the Debtors provided unlawful co-pay subsidies through donations to charitable foundations that provide co-pay assistance to eligible patients. Second, the AICs allege that the Debtors paid healthcare professionals, through speaker fees and other methods to persuade them to prescribe more Acthar. I will address each theory in turn.

A. RICO Standard of Review

HN8[] To establish liability under the Racketeer Influenced & Corrupt Organizations Act ("**RICO**"), the plaintiff must show "(1) conduct (2) of an enterprise (3) through a pattern (4) of racketeering activity, plus **[**37]** [(5)] an injury to business or property." Reyes v. Netdeposit, LLC, 802 F.3d 469, 483 (3d Cir. 2015) (internal quotation marks and citations omitted). RICO defines "racketeering activity" as any one of an enumerated lists of different state and federal offenses, also known as predicates. RJR Nabisco, Inc. v. Eur. Cmty., 579 U.S. 325, 329-30, 136 S. Ct. 2090, 195 L. Ed. 2d 476 (2016). "These predicates include "any act 'indictable' under specified **[*76]** federal statutes, §§ 1961(1)(B)-(C), (E)-(G), as well certain crimes 'chargeable' under state law, § 1961(1)(A), and any offense involving bankruptcy or securities fraud or drug-related activity that is 'punishable' under federal law, § 1961(1)(D)." Id. at 330. The plaintiff must show that the defendant committed a RICO predicate act, otherwise the plaintiff's RICO claim fails. *See* Heinemeyer v. Twp. of Scotch Plains, 198 F. App'x 254, 256 (3d Cir. 2006).

HN9[] Section 1964(c) of Title 18 of the U.S. Code provides a private right of action for "[a]ny person injured in his business or property by reason of [a predicate offense]." Kenney v. Am. Bd. of Internal Med., 847 F. App'x 137, 146 (3d Cir. 2021). The plaintiff must "state an injury to business or property and 'that a RICO predicate offense not only was a but for cause of injury but was the proximate cause as well.'" Kenney, 847 F. App'x at 146 (quoting St. Luke's Health Network, Inc. v. Lancaster Gen. Hosp., 967 F.3d 295, 300 (3d Cir. 2020)). Proximate cause requires "some direct relation between the injury asserted and the injurious conduct alleged." Reyes, 802 F.3d at 483 (quoting Holmes v. Sec. Investor Prot. Corp., 503 U.S. 258, 268, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)).

Therefore, the AICs had to prove that the Debtors committed a predicate act, and one of those predicate acts caused a direct injury to their **[**38]** business dealings. Based on their two theories, the AICs had to prove that either the foundation co-pay subsidy payments or the Debtors' physician payments were not only the but-for cause of their injuries but also the proximate cause of their injuries.

B. Claimants' Co-Pay Subsidy Theory of RICO Liability

Addressing the first argument, the AICs allege that the Debtors' systematic course of conduct in donating millions of dollars to co-pay assistance funds was for the purpose of increasing sales of Acthar. Thus, the Debtors violated the RICO Act when they made these payments post-petition. To prove this claim, the AICs had to demonstrate: (1) Debtors made post-petition contributions that violated the Anti-Kickback Statute; (2) Debtors committed mail or wire fraud by providing false certifications of compliance with specific fraudulent intent; and (3) the purported violation caused injury to AICs' business or property during the post-petition period.

a. Anti-Kickback Statute

HN10[] To violate the Anti-Kickback Statute a person or entity must "'knowingly and willfully' offer[] or pay[] 'any remuneration ... to any person to induce such person ... to refer an individual to a person for the furnishing **[**39]** ... of any item or service for which payment may be made in whole or in part under a Federal health care program.'"

United States ex. Rel. Greenfield v. Medco Health Sols., Inc., 880 F.3d 89, 94-95 (3d Cir. 2018) (quoting 42 U.S.C. § 1320a-7b(b)(2)(A)). In their co-pay subsidy theory, the AICs allege that the Debtors violated the Anti-Kickback Statute because their intent in making the charitable donations was to induce more Acthar prescriptions for Medicare beneficiaries.[93] The AICs state that the Debtors only stopped donating millions of dollars to TAF at the end of 2020 because of "concerns of potential legal exposure of continuing to make those donations."[94]

Regarding the Anti-Kickback Statute, I find the AICs did not meet their **[*77]** burden. First, the AICs presented no evidence at trial of any post-petition contributions by the Debtors that were unlawful. The evidence shows that the Debtors' contributions were allocated to TAF disease funds that were independent, bona fide charitable assistance programs.[95] While the AICs state that the Debtors' compliance programs were "window dressing" to add a hint of legitimacy, there was no evidence establishing that the Debtors failed to follow their policies or the law during the post-petition period. In fact, the evidence at trial demonstrated the opposite. In one example, **[**40]** the AICs asserted in their pre-trial brief that the Debtors' Government Affairs department did not conduct any diligence on the TAF relationship at the time of the transition from commercial. Instead, the evidence showed that the team conducted diligence over the ten months after the initial transition and before making its first recommendation to donate to TAF.[96]

Just because the Debtors' money flowed to TAF and was distributed to Acthar-related disease state funds in the post-petition period, does not mean the Debtors' contributions were illegal. Pharmaceutical companies, under OIG guidance, are allowed to make contributions to 501(c)(3) charitable foundations.[97] The AICs had to demonstrate that the Debtors' contributions were in some way unlawful.[98] From 2018 to 2020, Mallinckrodt donated $56.9 million to TAF.[99] The total amount of assistance TAF provided to Acthar patients was--$39.7 million.[100] TAF allocated the Debtors' contributions to various other disease funds including a juvenile arthritis fund that provided no assistance to Acthar patients and a fund for multiple sclerosis that used only 1.3% of total donations for Acthar.[101] Looking at all the funds in TAF that allocated Debtors' donations, **[**41]** Acthar was the subject of only 3.8% of claims for assistance and only 16.7% of the assistance provided.[102] Providing no evidence to contradict this, the AICs failed to prove the Debtors' contribution were unlawful.

Second, to prevail on their co-pay subsidy theory, the AICs needed to prove the Debtors committed mail or wire fraud by providing false certifications of compliance with specific fraudulent intent. *See* United States v. Hedaithy, 392 F.3d 580, 590 (3d Cir. 2004). However, the AICs provided no evidence and did not even attempt to show that Debtors provided false certifications of compliance and acted with the requisite specific intent to defraud them into covering excess Acthar prescriptions.

Finally, the AICs failed to establish that the alleged RICO predicate acts were the but-for cause of the alleged injury, as required in the Third Circuit. *See* Anderson v. Ayling, 396 F.3d 265, 269 (3d Cir. 2005). To establish the but-for cause, the AICs had to identify specific prescriptions that they would not have reimbursed but for the alleged

fraudulent scheme. Instead, the AICs' expert did not even try to specify which prescriptions were aligned with Mallinckrodt's donations to TAF and failed to specify which prescriptions were associated with any illegal contributions. The AICs failed **[**42]** to provide evidence that even **[*78]** one prescription was the result of Mallinckrodt's TAF donations. The AICs have not met their burden of establishing that the Debtors violated the federal RICO statute through their donations to charitable foundations.

C. Debtors' Interactions with Physicians

Addressing their second argument, the AICs also alleged that the Debtors violated the RICO Act by paying physicians through speaker programs. They assert that the Debtors paid remunerations to prescribing physicians to induce them to prescribe Acthar and encourage other physicians to do the same. Thereby, the Claimants contend the Debtors violated the Anti-Kickback Statute, the False Claims Act, the federal *Travel Act*, as well as state bribery laws through these payments.

HN11[] As previously stated, for me to find an Anti-Kickback Statute violation, a person or entity must "'knowingly and willfully' offer[] or pay[] 'any remuneration ... to any person to induce such person ... to refer an individual to a person for the furnishing ... of any item or service for which payment may be made in whole or in part under a Federal health care program.'" *U.S. ex. Rel. Greenfield, 880 F.3d at 94-95* (quoting *42 U.S.C. § 1320a-7b(b)(2)(A)*). The *False Claims Act* imposes "liability on any person who '(A) knowingly presents, **[**43]** or causes to be presented, a false or fraudulent claim for payment or approval; [or] (B) knowingly makes, uses, or causes to be made or used, a false record or statement material to a false or fraudulent claim.'" *U.S. ex rel. Greenfield, 880 F.3d at 94*. In addition, "[t]he *Travel Act* prohibits using interstate travel, mail, or facilities with intent to carry out 'any unlawful activity,' *18 U.S.C. § 1952(a)(3)*, or with intent to 'distribute the proceeds of any unlawful activity.'" *United States v. Ferriero, 866 F.3d 107, 113 (3d Cir. 2017)* (quoting *18 U.S.C. § 1952(a)(1)*). The AICs accuse the Debtors of violating a multitude of state bribery laws. Without specifying which states, they claim that the "kickback" scheme to the doctors along with charitable foundation payments constituted bribes.

The AICs had to offer evidence that showed the Debtors' speaker programs specifically departed from the "common practice" and (1) violated federal and state law, in other words, committed a predicate act; (2) that the Debtors had the necessary scienter; and (3) the Debtors' speakers' programs were the but-for and proximate cause of their alleged injuries. I will address each requirement in turn.

a. *Explaining the Predicate Acts*

During the post-petition period, the Debtors paid over $1.7 million to physicians for at least 443 speaker events as part **[**44]** of their speakers' bureau program.[103] Like many other specialty pharmaceutical companies in the field, the Debtors host these speaker programs to educate healthcare professionals about specific drugs, in this case Acthar.[104]

Despite over 440 programs, the AICs could not point to a single example of a post-petition physician payment that qualified as a remuneration in exchange for prescribing a drug for which reimbursement under a federal healthcare program is available in violation of *42 United States Code § 1320a-7b(b)(2)*. In their pre-trial brief, the AICs pointed to documents describing a particular physician, "Pulmonologist A" and his prescribing behavior,[105] but they did not question any witnesses at **[*79]** the trial about this physician or the documents.

The AICs also pointed to ongoing investigations into the Debtors' payments to healthcare providers by the U.S. Attorney's Offices for the Middle District of Florida and Eastern District of Pennsylvania, and the fact that the Debtors have not changed their policies in response to those investigations.[106] They also made vague references

to "issues" with the Debtors' speaker programs and certain things that were flagged as violative of Debtors' policies but did not explain how such incidents **[**45]** would support a finding that the Debtors' violated the law. If anything, they support the conclusion that the Debtors' policies were effective by ensuring the incidents were brought to the attention of and resolved by the Debtors' compliance department.

Here, I conclude the AICs again did not meet their burden. The Debtors chose speakers who are experts in the relevant therapeutic areas or have sufficient experience prescribing Acthar to speak about the drug, and they paid fair market value to the speakers and prohibited conducting any type of "return on investment" analysis about the prescribing habits of physicians engaged as speakers.[107] In addition, they monitored their speaker programs closely to prevent abuse, and the compliance team used a third party to manage logistics, including planning events consistent with Debtors' policies; ensuring that speaker compensation is at fair market value; enforcing dozens of other rules related to the programs; and providing detailed real-time, quarterly, and yearly compliance reports.[108] Those reports indicated that the Debtors fully complied with their policies and did not knowingly and willfully induce physicians to write more Acthar prescriptions. **[**46]** [109] The AICs failed to show any violation of federal or state law and therefore have not met the predicate act requirement under the RICO Act.

b. *Lacking the Specific Intent*

The AICs also had to prove the Debtors acted with specific intent that their speaker programs would induce their *speakers* to prescribe more Acthar.[110] Yet, they failed to offer any evidence that would support this conclusion. Throughout the post-petition period, the Debtors had a compliance program, and they consistently reevaluated its policies to update them regarding interactions with physicians to fit within the latest legal and regulatory guidance. There is simply nothing in the evidence that would support the conclusion that the Debtors "knowingly and willfully" tried to induce their speakers to prescribe more Acthar in violation of the law.

c. *The But-for and Proximate Cause of the Speaker Programs*

Finally, under the physician speaker programs theory, the AICs had to **[*80]** show that the speaker programs were the but-for and proximate cause of their alleged injuries. ***HN12***[] Notably, "mere correlation does not demonstrate causation" under RICO. *Sergeants Benevolent Ass'n Health & Welfare Fund v. Sanofi-Aventis U.S. LLP, 806 F.3d 71, 92 (2d Cir. 2015)*. The AICs attempt to establish the required but for causation by showing that **[**47]** after the speaker program began, there was an increase in demand for Acthar.[111] This is insufficient.

To explain the correlation between the increased prescriptions and the ramp up of the speaker program, the Debtors' expert, Dr. Jena, testified that physicians who prescribe Acthar more frequently tend to be more familiar with it and the relevant therapeutic areas; therefore, they are more qualified to speak about it.[112] Despite that fact, 94% of physicians who wrote prescriptions for Acthar post-petition were not speakers during that period.[113]

[109] See DX 073, Post-Petition Period Speaker Bureau Metrics; 11-17-21 Transcript at 136-39, 142.

[110] This is not to be confused with an intention on the part of the Debtors that the speaker programs would result in more Acthar prescriptions generally. It is not unlawful for a company to pay a single physician to educate a group of physicians about a drug with the intention that *all* physicians might then increase the number of prescriptions they write for the drug. It is, however, unlawful for a company to pay a single physician to act as a "speaker" at an educational program with the intention that the payment made to that physician will then induce *that* physician to write more prescriptions for the drug.

[113] DX 607, Jena Rep., ex. 5.

Going further, Dr. Jena, based on his physician-level analysis, determined that there was no empirical evidence that Mallinckrodt's speaker payments caused more doctors or speakers to increase prescribing Acthar in the post-petition period or before.[114] In fact, physicians tended to prescribe slightly fewer vials of Acthar per month after receiving their first speaker payment.[115] Even one of the AICs' witnesses, Christopher Ragan, acknowledge that Humana could not establish "an inappropriate relationship" between Debtors and a physician through information on speaker fees and prescribing rates alone.[116] The AICs failed to address this correlation in their argument **[**48]** and could not provide any evidence showing how the Debtors' speaker programs were the but-for cause of their alleged injuries.

In addition to the but-for cause, the AICs had to show the Debtors' speaker programs were the proximate cause of their alleged injuries. ***HN13***[] "When a court evaluates a RICO claim for proximate causation, the central question it must ask is whether the alleged violation led directly to the plaintiff's injuries." *Anza v. Ideal Steel Supply Corp., 547 U.S. 451, 461, 126 S. Ct. 1991, 164 L. Ed. 2d 720 (2006)*. Therefore, even if the Debtors' speaker programs sought to illegally induce additional prescriptions, the AICs had to show that those RICO violations directly led to more physicians prescribing Acthar to the detriment of the AICs, and that the doctors did not act independently.

In this case, the AICs, again, failed to offer any evidence that any physicians prescribed Acthar against their better judgment. Dr. Jena credibly testified that all the AICs have strict prior authorization requirements for Acthar.[117] The AICs' witness, Mr. Ragan, also admitted he had no knowledge of "any instances of misconduct related to prescriber kickbacks from Acthar in the [post-petition] window."[118] Mr. Ragan further testified that the Humana **[*81]** never took any measure to stop covering **[**49]** Acthar prescriptions made by paid speakers despite having the information of which physicians participated in the Debtors' speaker programs and acknowledging the audit capabilities to address any concerns.[119] The AICs had the ability and leverage to prevent their own alleged injuries by stopping to cover Acthar prescriptions they believed to be fraudulently induced. They had opportunities to audit any provider they had concerns about. The AICs never utilized these abilities despite the power to do so. Therefore, I find the AICs' alleged injury was not caused by the Debtors' conduct. The AICs' physician payments theory of RICO violations must also fail.

IV. Additional State Law Claims

Like the antitrust claims based on state law, because the AICs did not present any evidence at trial regarding their additional state law claims, or brief them in their post-trial briefing, I find they have also been abandoned.

CONCLUSION

In conclusion, I find that the AICs have not met their burden with respect to any of their claims. For that reason, their Motion for an order allowing an administrative expense claim is DENIED and the Debtors' Objection to the AICs' administrative claims is SUSTAINED.

Opinion

MEMORANDUM OPINION

This matter is before the Court on the Motion to Dismiss Plaintiff's Complaint filed by Defendant, National Basketball Association (Docket #14) and the Motion to Compel Arbitration and Dismiss filed by Defendant, National Basketball Players Association (Docket #15).

I. Factual and Procedural Background.

On May 27, 2021, Plaintiff, Rosel C. Hurley III ("Mr. Hurley"), filed his Complaint in this case, *pro se*,[1] alleging Defendants violated the *Sherman Act*, *15 U.S.C. §§ 1*, *2* ("*Sherman Act*"), and the *Federal Arbitration Act*, *9 U.S.C. Chapter 1* ("FAA").[2]

This case stems from the National Basketball Players Association's ("NBPA") denial of Mr. Hurley's Application to become a certified Player Agent with the NBPA. The NBPA, a labor organization within **[*2]** the meaning of *§ 2* of the *National Labor Relations Act ("NLRA")*, *29 U.S.C. § 152*, is recognized by the National Basketball Association ("NBA") as "the exclusive bargaining representative for all professional basketball players employed by each of the NBA member teams." *Collins v. Nat'l Basketball Players Ass'n 850 F. Supp. 1468,1471 (D. Colo. 1991)*, aff'd, *No 92-1022, 1992 U.S. App. LEXIS 24069 (10th Cir. Colo. 1992)*. The NBPA has delegated portions of its exclusive bargaining authority to certified "Player Agents" for purposes of negotiating individual contracts. *Id. at 1475*. The NBPA "is legally entitled to forbid *any* other person or organization from negotiating for its members" and has the "sole[]" discretion to determine "whether, to what extent and to whom to delegate [its exclusive] authority." *Id. at 1475* (emphasis in original).

The NBPA has established "Regulations Governing Player Agents" ("Regulations"), as referenced in Mr. Hurley's Complaint, and one of the primary objectives of said Regulations is to "afford each Player the opportunity to select a certified Player Agent who, in turn, has agreed to comply with these Regulations, to represent or advise Players as a fiduciary with honesty, competency and loyalty, and act consistent with the Player's membership in a collective bargaining unit." (Docket #15-1, Exhibit B, Section A.) The Regulations govern all aspects of the relationship **[*3]** between the NBPA and its Player Agents, including certification, conduct, discipline, and dispute resolution.

In order to apply for certification as a Player Agent, a candidate must complete an Application for Certification as a Player Agent ("Application"). As set forth in § 2A of the Regulations, Applicants agree to comply with the Regulations upon signing and filing an Application:

> The signing and filing of an Application constitutes the applicant's agreement to comply with and to be bound by these Regulations, including the exclusive arbitration remedy set forth in Section 5, and that the failure to comply in any material respect with any provision of these Regulations shall constitute grounds for denial, revocation, or suspension of his certification or other disciplinary action.

(Regulations at § 2A.) Once an Application is filed, the NBPA reviews the Application and performs a background investigation; may request additional materials and information; and, requires each applicant to pass a written examination administered by the NBPA. (Id.)

Section 5 of the Regulations provides as follows with regard to disputes that may arise relative to the certification process, or from the "interpretation, **[*4]** application and enforcement" of the Regulations:

> In establishing this new system for regulating Player Agents it is the intention of the NBPA that the arbitration process shall be the exclusive method for resolving any and all disputes that may arise from denying certification to an applicant or from the interpretation, application or enforcement of these Regulations and the resulting SPACs between Player Agents and individual Players. This will ensure that those disputes - which involve essentially internal matters concerning the relationship between individual Players, the NBPA and its capacity as their exclusive bargaining representative, and Player Agents performing certain delegated

---

[1] Although Mr. Hurley is proceeding *pro se*, he is, in fact an attorney practicing in the State of Ohio. His pleadings, therefore, are not entitled to the liberal construction afforded to *pro se* litigants who are not trained in the law. *Ponte v. Chase Bank USA, N.A., 2013 U.S. Dist. LEXIS 155044 (E.D. Mich October 8, 2013* (citing *Sabeti v. Maron, No. 12-2392, 2012 U.S. Dist. LEXIS 78082, *4 (E.D.N.Y. June 4, 2012)* (practicing attorney's complaint not entitled to liberal pro se construction); *Foulke v. Va. State Police, No. 12-00006,2012 U.S. Dist. LEXIS 33816, *1 n.1 (W.D. Va. March 13, 2012)* (active member of Virginia bar's complaint not entitled to extra measure of liberal construction); *Zanke-Jodway v. Capital Consultants, Inc., No. 08-930, 2010 U.S. Dist. LEXIS 19137, *4, *23 (W.D. Mich. March 3, 2010)* (attorney proceeding *pro se* is presumed to be aware of the rules of federal procedure)).

[2] The Complaint filed with the Court as Docket #1 is missing a page, omitting Paragraph 11 and the beginning of Paragraph 12, parts of which were referenced by Mr. Hurley in briefing. The NBPA attaches a complete copy of the Complaint to its Motion at Exhibit 15-6.

> representative functions relating particularly to individual Player compensation negotiations - will be handled and resolved expeditiously by the decision-maker established herein, without need to resort to costly and time-consuming formal adjudication.
>
> The provisions of this Section shall apply with respect to three types of disputes that may arise under these Regulations:
>
> 1. The NBPA denies an Application and the applicant wishes to appeal from that action;
>
> 2. A dispute arises with respect to the meaning, **[*5]** interpretation or enforcement of a SPAC (described in Section 4) entered into between a Player and the Player Agent; and
>
> 3. A dispute arises between two or more Player Agents with respect to their individual entitlement to fees owed, whether paid or unpaid, by a Player who was jointly represented by such Player Agents. In such cases, at the Player's option, any fees paid or payable by the Player after the dispute arises shall be placed in escrow pending final resolution of such dispute, and paid out of escrow in accordance with the Arbitrator's decision.
>
> > With respect to any dispute that may arise pursuant to paragraph (1) above, the procedure for filing an appeal and invoking arbitration is set forth in these Regulations in Section 2.D. Once arbitration has been invoked, the procedure set forth in subparagraphs D through F, below, shall apply. With respect to any dispute that may rise [sic] pursuant to paragraph (2-3) above, the following procedures shall apply ...

(Regulations at § 5.)

On August 19, 2020, Mr. Hurley applied to take the online examination required to become a certified Player Agent. (Complaint at Paragraph 6.) In his Application, Mr. Hurley, an attorney, disclosed the fact that his law **[*6]** license was under suspension.[3] (Complaint at Paragraph 6.) On August 26, 2020, NBPA Director of Security, Eric Rhodes, forwarded Mr. Hurley a Background Questionnaire, which he completed and returned the same day. (Complaint at Paragraph 7.) On September 4, 2020, Mr. Rhodes requested a detailed explanation regarding a bankruptcy discovered during the NBPA's background investigation of Mr. Hurley, and Mr. Hurley provided an explanation the same day. (Complaint at Paragraph 8.)

Mr. Hurley alleges that on December 2, 2020, he was informed by NBPA Legal Operations Manager Meagan Macchirole that "he was approved to take the on-line exam," but that later, on February 10, 2021, he "was called by NBPA Personnel" and told that he would not be permitted to take the February 12, 2021 due to the "law licensing issue" that he had originally disclosed in his Application. (Complaint at Paragraphs 9 and 10.)[4]

---

[3] Mr. Hurley notes that a law license is not required to become a certified Player Agent.

[4] The NBPA states that while Mr. Hurley disclosed his law license had been suspended, he did not reveal the circumstances of his suspension in his Application. In its Motion to Dismiss, the NBPA includes information obtained from public records regarding the circumstances precipitating the suspension of Mr. Hurley's law license, along with information regarding additional felony convictions and additional law license suspensions. (Docket #22.) Mr. Hurley responded in briefing that he disclosed his felony conviction and "other issues" at the beginning of the application process but that because his Application was completed and submitted online, he does not have his completed Application for reference. (Docket #22 at p. 3.)

The NBPA explains, "A check of public records shows the suspension was based on a finding that Plaintiff "misrepresented his status as an Ohio lawyer in an attempt to mislead and intimidate small businesses into paying him money" - all while earlier suspensions remained in effect." (Docket #15-1 a p. 3, citing Exhibit A, *152 Ohio St. 3d at 537*.) Further, the NBPA states, "In his application, Plaintiff additionally failed to disclose - as required - that he had pled guilty to "aggravated menacing and telephone harassment," for threatening his ex-wife and ordered to pay a $5,000 fine. (Docket #15-1 at p. 4, citing Ex. D., *Cleveland Metro Bar Ass'n v. Hurley, 143 Ohio St. 3d 69, 2015- Ohio 1568, 34 N.E.3d 116 (Ohio 2015)*. In footnotes, the NBPA provides additional detail as follows:

> FN2 The Cleveland Metro. Bar Ass'n opinion states that Plaintiff also received an interim suspension in March 2013 after he was "convicted of multiple felonies for improperly using the Ohio Law Enforcement Gateway while employed by the Cuyahoga County prosecutor's office." Ex. A, *152 Ohio St. 3d at 537*. Moreover, public records **[*7]** reveal that Plaintiff was additionally suspended in November 2013 based on a finding that Plaintiff fail[ed] to register as an attorney for the 2013-2015 biennium." Exhibit C, *In re Admin. Actions, 136 Ohio St. 3d 1544, 1545, 2013- Ohio 4827, 996 N.E.2d 973*

A. The Complaint.

Mr. Hurley filed his Complaint in this case on May 27, 2021, challenging the denial of his Application and claiming he was wrongfully "denied access to the market of representing prospective and current NBA Basketball players" in violation of the *Sherman Act*. (Docket #23 at p. 3.) Mr. Hurley argues that the actions of the NBA and the NBPA "would cause a reasonable person to believe that the Defendants were acting in concert with and at the behest of a non-labor member or group [the NBA], in order to ensure the Plaintiff's exclusion from the marketplace the Defendants completely control" (Complaint at Paragraph 14), and states as follows:

> The defendants action show they did not want the Plaintiff under any circumstances to take the NBA Agents Exam considering the high possibility he would pass the exam since he has done so in the past. As such, this conduct constitutes a per se violation of *Section 1* and *2* of the *Sherman Act*, *15 U.S.C. §§ 1*,*2* without necessity of further proof, or alternately, under Rule of Reason analysis, conduct subject **[*8]** to treble damages. (Ohio 2013). Plaintiff's law license was also suspended in April 2015 for "conduct underlying his felony convictions and two unrelated misdemeanor convictions." Ex. A., *152 Ohio St. 3d at 537*.
>
> FN3 Plaintiff's application also omitted a misdemeanor conviction for a hit and run where he fled the scene of the accident and was ordered to pay a $500 fine, probation and complete 50 hours of community service. See Henry J. Gomez, Cleveland police officer gets probation, fine, community service for hit-and-run, Cleveland.com, Feb. 15, 2020. (Citation omitted.)

(Complaint at Paragraph 17.) Mr. Hurley references the Collective Bargaining Agreement entered into between the NBPA and the NBA, alleging its provisions regarding Player Agents demonstrate that the NBA benefitted from Defendants' "control [of] the market to represent prospective and current NBA professional basketball players."

Further, Mr. Hurley argues that pursuant to Sections 2D, 6E & F of the Regulations, and the protections set forth in the *Federal Arbitration Act, 9 U.S.C. § 2* ("FAA"), he was entitled to arbitrate his dispute with the NBPA regarding its denial of his Application to sit for the certification exam.

B. The NBA's Motion to Dismiss.

On September 10, 2021, the NBA filed its Motion **[*9]** to Dismiss Plaintiff's Complaint (Docket #14), arguing that the Complaint fails to allege the basic elements of an antitrust claim under *Sections 1* and *2* of the *Sherman Act*, setting forth only conclusory allegations that fail to plead that the NBA took any illegal action, or was involved in any way in the events giving rise to this lawsuit. Further, the NBA argues that because Mr. Hurley's antitrust claims against the NBA rely on the NBA's Collective Bargaining Agreement with the National Basketball NBPA, his claims are barred under the nonstatutory labor exemption to antitrust laws. Finally, the NBA argues that Mr. Hurley has completely failed to allege a violation of the FAA, as there is no allegation that the NBA ever agreed to arbitrate claims with Mr. Hurley, "who is a complete stranger to the organization."

Mr. Hurley filed his Memorandum in Opposition to Dismiss on October 18, 2021. (Docket #23.) Mr. Hurley argues that the allegations set forth in the Complaint are sufficient to withstand dismissal at this stage of proceedings. Mr. Hurley argues that an agency relationship exists between the NBA and the NBPA relative to the certification of Player Agents and, therefore, that the NBA is liable for **[*10]** the actions of the NBPA, including violations of antitrust laws. Mr. Hurley also argues that the NBA is vicariously or secondarily liable for the actions of the NBPA because of their relationship with one another. Finally, Mr. Hurley argues that the NBPA's Player Agent Regulations regarding certification restrict minority access to the certification process.

On November 1, 2021, the NBA filed its Reply Memorandum of Law. (Docket #25.) The NBA reiterates the arguments set forth in its Motion to Dismiss, noting that Mr. Hurley failed to comprehensively address the arguments raised by the NBA in its Motion to Dismiss, and argues that the various principles of agency and tort law discussed by Mr. Hurley have no application to the facts and circumstances in this case. The NBA argues that Mr. Hurley has not pled facts sufficient to state any claims against it whatsoever.

C. NBPA's Motion to Compel Arbitration and Dismiss.

The NBPA filed its Motion to Dismiss on September 10, 2021. (Docket #15.) The NBPA argues that because Mr. Hurley concedes that he agreed to be bound by the NBPA Regulations and applicable law, his challenge to the NBPA's rejection of his Application must be arbitrated. The **[*11]** Arbitration Agreement in this case reads "any prospective agent whose application for certification is denied may appeal that denial by filing a timely demand for arbitration." NBPA Regulations, Section 2C. The NBPA argues that Mr. Hurley's Sherman Act claim falls within the scope of the Arbitration Agreement and, that despite Mr. Hurley's failure to provide notice in accordance with the notice provisions of Section 2C, the NBPA has formally offered, and continues to offer, to extend the 30-day filing deadline and allow Mr. Hurley to proceed with his appeal before an independent arbitrator, but he refuses.

The NBPA argues that even if Mr. Hurley is not required to arbitrate his claims, the Court should dismiss his Complaint for failure to plead any cognizable claim for relief. Citing *Collins*, the NBPA argues that denial of certification as a Player Agent does not constitute an unreasonable restraint on trade under the *Sherman Act*, as labor unions acting in their self-interest and not in combination with nonlabor groups are statutorily exempt from *Sherman Act* liability. *Collins, 1992 U.S. App. LEXIS 24069, at *6* (citing *States v. Hutcheson, 312 U.S. 219, 232, 61 S. Ct. 463, 85 L. Ed. 788 (1941)*). Further, the NBPA argues that Mr. Hurley failed to plead the essential elements of a *Sherman Act* claim - including the failure to allege an antitrust **[*12]** injury, a threshold to requirement to his claim. The NBPA references Paragraph 19 of Mr. Hurley's Complaint, in which he states that "[his] business has been injured by Defendants' anticompetitive actions in violation of *Section 1* and *2*," which the NBPA argues is inadequate to state an antitrust claim. Finally, the NBPA argues that the FAA does not create a private right of action or a substantive claim for relief and serves only to ensure private agreements to arbitrate are enforced according to their terms and, therefore, that Mr. Hurley's FAA claim fails to state a claim upon which relief can be granted.

On October 12, 2021, Mr. Hurley filed his Memorandum in Opposition to Compel Arbitration and Dismiss. (Docket #22.) Mr. Hurley states he "has no opposition to resolving the denial of [his] application for certification by arbitration" and "has always wanted to arbitrate the issue of denial of certification." (Id. at p. 2.) However, Mr. Hurley argues that the "limited Arbitration Agreement" listed in *Section 5 of the NBPA* Regulations does not encompass his *Sherman Act* claim and, therefore, that his *Sherman Act* claim should not be dismissed. (Id. at p. 4.) Mr. Hurley argues that NBPA is not statutorily exempt from antitrust laws and **[*13]** that "only through discovery can it be determined if there is a direct connection between the antitrust violation and the alleged injury." Mr. Hurley argues that the actions of the NBPA were taken "at the behest of a non-union member [the NBA] and had an unreasonable effect on trade," thus constituting a *per se* violation of the *Sherman Act*.

On October 25, 2021, the NBPA filed a Reply Brief, in large part reiterating the arguments in favor of dismissal raised in its initial Motion.

During a telephone status conference, the Parties were given additional time to brief the impact, if any, the recent Sixth Circuit opinion in *Boykin v. Family Dollar Stores of Mich, LLC, 3 F.4th 832 (6th Cir. Mich. 2021)*, may have on the resolution of the NBPA's Motion to the extent the NBPA seeks to compel arbtiration. Briefs were filed on December 3, 2021.

II. Standard of Review.

A motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)* allows a defendant to test the legal sufficiency of a complaint without being subject to discovery. *See* *Yuhasz v. Brush Wellman, Inc., 341 F.3d 559, 566 (6th Cir. 2003)*. In evaluating a motion to dismiss, the court must construe the complaint in the light most favorable to the plaintiff, accept its factual allegations as true, and draw reasonable inferences in favorable of the plaintiff. *See* *Directv, Inc. v. Treesh, 487 F.3d 471, 476 (6th Cir. 2007)*. The court will not, however, accept conclusions of law or unwarranted **[*14]** inferences cast in the form of factual allegations. *See* *Gregory v. Shelby County, 220 F.3d 433, 446 (6th Cir. 2000)*.

In order to survive a motion to dismiss, a complaint must provide the grounds of the entitlement to relief, which requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action. *See* *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 1964-65, 167 L. Ed. 2d 929 (2007)*. That is, "[f]actual allegations must be enough to raise a right to relief above the speculative level, on the assumption that all the allegations in the complaint are true (even if doubtful in fact)." *Id.* (internal citation omitted). Accordingly, the claims set forth in a complaint must be plausible, rather than conceivable. *See* *Twombly, 127 S. Ct. at 1974*.

On a motion brought under *Rule 12(b)(6)*, the court's inquiry is limited to the content of the complaint, although matters of public record, orders, items appearing in the record of the case, and exhibits attached to the complaint may also be taken into account. *See* *Amini v. Oberlin College, 259 F.3d 493, 502 (6th Cir. 2001)*. It is with this standard in mind that the instant Motion must be decided.

III. Discussion.

A. The *Sherman Act*.

Section 1 of the *Sherman Act* regulates concerted activity between two or more entities, outlawing "every contract, combination ... or conspiracy, in restraint of trade or commerce among the several States" and is limited to "unreasonable" restraints of **[*15]** trade. *15 U.S.C. § 1*. To prevail on a claim under *§ 1*, a plaintiff must prove: (1) a contract, combination, or conspiracy; (2) producing adverse, anticompetitive effects in the relevant product and geographic markets; (3) that the object of the scheme and the conduct resulting from it was illegal; and, (3) that the scheme was the proximate cause of the alleged antitrust injury. *See* *Expert Masonry, Inc. v. Boone Cty., Ky, 440 F.3d 336, 342 (6th Cir. Ky. 2006)*. *Section 2* of the *Sherman Act* makes it unlawful to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States." *15 U.S.C. § 2*. To bring a claim under *§ 2*, a claimant must show "'(1) possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen or historic accident.'" *Tarrant Serv. Agency, Inc. v. Am. Standard, Inc., 12 F.3d 609, 613 (6th Cir. Ky. 1993)* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778*, cert. denied, *512 U.S. 1221, 114 S. Ct. 2709, 129 L. Ed. 2d 836(1994)*).

"Antitrust laws were enacted to prevent restraints to free competition in business and commercial transactions that tend to restrict production, control prices or otherwise control the market to the detriment of consumers." *In re Detroit Auto Dealers Ass'n, 955 F.2d 457 (6th Cir. Mich. 1992)* (citing *Apex Hosiery Co. v. Leader, 310 U.S. 469, 60 S. Ct. 982, 84 L.Ed. 1311 (1940)*). "Congress provided a statutory labor exemption from the antitrust laws ... **[*16]** demonstrat[ing] a congressional purpose to restrict the application of the antitrust laws when they unduly interfere with the goals of federal labor law." *Id.* (citing *15 U.S.C. §§ 17* and *26*, *29 U.S.C. §§ 52*, *104*, *105* and *113*; *Connell Construction Co., Inc. v. Plumbers & Steamfitters Local Unition No. 100, 421 U.S. 616, 621, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)*). "In resolving conflicts in areas where federal antitrust and labor policies seemingly overlap, the Supreme Court has recognized a nonstatutory labor exemption." *Id.*

As thoroughly analyzed by the Court in *Collins v. Nat'l Basketball Players Ass'n, 850 F. Supp. 1468*:

> The NBPA Regulations and Article XXXI of the NBPA-NBA Agreement are exempt from ***antitrust law***. Collins claims that the limitation of the market for the representation of basketball players is an antitrust violation. Although the Regulations do limit agents' representational ability, the identified "market" for the representation of NBA basketball players in salary negotiations is explicitly precluded by the federal labor laws. Were that market not exempt from the *Sherman Act*, then all collective bargaining by labor unions would be a violation of

> the antitrust laws, because in all collective bargaining other potential bargaining agents are entirely excluded from the relevant market. As the exclusive representative for all of the NBA players, the NBPA is legally entitled to forbid any other person or organization **[*17]** from negotiating for its members. Its right to exclude all others is central to the federal labor policy embodied in the NLRA.

(*Collins, 850 F. Supp. 1468, 1475* (citing *NLRB v. Allis-Chalmers Mfg. Co., 388 U.S. 175,180, 87 S. Ct. 2001, 18 L. Ed. 2d 1123 (1967)*). As succinctly stated by the Tenth Circuit Court of Appeals affirming the District Court's decision in *Collins*, "[t]he statutory labor exemption from the *Sherman Act* permits the NBPA to establish a certification procedure for player agents." *Collins, 1992 U.S. App. LEXIS 24069, at *5-6*. Further, "The nonstatutory exemption immunizes labor arrangements that are the ordinary implication of activities contemplated by the federal labor laws. *Collins, 850 F. Supp. 1468, at *33* (citing 2 ***Antitrust Law*** P 229a, at 192)(nonstatutory exemption applies to preclude a claim that the collective bargaining agreement then in effect between the NBA and the NBPA violated antitrust laws in forbidding teams from negotiating with non-NBPA certified agents.)

Pursuant to the statutory and nonstatutory labor exemptions to antitrust laws, Mr. Hurley fails to state a claim under the *Sherman Act* against either the NBPA or the NBA.

2. Failure to Plead the Elements of a Sherman Act Claim.

In addition to the foregoing, Mr. Hurley has failed to plead the essential elements of a *Sherman Act* claim, including the threshold requirement of an antitrust injury. In order to prove an antitrust injury, "the **[*18]** key inquiry is whether competition - not necessarily a competitor - suffered as a result of the challenged business practice." *CBC Cos. v Equifax, Inc., 561 F.3d 569, 571-72 (6th Cir. Ohio 2009)*. A plaintiff must allege "anti-competitive effects resulting from [the defendant's] actions; absent injury to competition, injury to a plaintiff as a competitor will not satisfy this pleading requirement." *Mizlou Television Network, Inc. v. Nat'l Broad. Co., 603 F. Supp. 677, 683 (D.D. C. 1984)* (emphasis in original). "[A] plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior." *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. Speculative injury and conclusory allegations regarding harm to the competition are insufficient. *CBC Cos., 561 F.3d 569, 572*. District courts are required to dismiss claims under *Rule 12(b)(6)* when a plaintiff fails to satisfy antitrust standing. *NicSand, Inc. v. 3M NicSand, Inc., 507 F.3d 442, 450 (6th Cir. Ohio 2007)*.

In his Complaint, Mr. Hurley alleges that the NBPA, "acting in concert with and at the behest of the NBA, wrongfully denied Mr. Hurley's Application to become a certified Player Agent, injuring his business. (Complaint at Paragraph 14.) Mr. Hurley states, "Plaintiff's business has been injured by Defendants' anticompetitive actions in violation of *Section 1* and *2* of the *Sherman Act*." (Complaint at Paragraph 19.) In briefing, Mr. Hurley asserts that as a result of the denial of his Application, he was "denied the possibility **[*19]** to represent" a particular player during contract negotiations. (Docket #22 at p. 15.) Mr. Hurley does not allege injury to competition, but rather individualized injury. This is insufficient to establish antitrust standing.

Furthermore, Mr. Hurley has not pled a contract, combination, or conspiracy; producing adverse, anticompetitive effects in the relevant market; resulting in an antitrust injury - nor has he pled possession of monopoly power in the relevant market and the willful acquisition or maintenance of that power. There are no allegations whatsoever that anyone at the NBA did anything at all, let alone anything that could be construed as a *Sherman Act* violation, relative to any of the allegations set forth in the Complaint. Mr. Hurley states in a conclusory manner that the NBA and the NBPA were acting in concert to ensure Mr. Hurley's exclusion from the marketplace, and in briefing includes discussion regarding principal-agent relationships; joint and several liability; vicarious and secondary liabilty; and, respondeat superior, none of which serve to bolster his *Sherman Act* claims. Mr. Hurley argues that "[o]nly through discovery can it be determined if there consisted of a conspiracy with a non-labor **[*20]** member to deny Plaintiff's approved application and access to the NBPA Agent Certification Exam knowing there was a good chance the Plaintiff would pass the exam since he passed it before, thus showing conduct arising to a per se violation of the Sherman ***Antitrust law***." (Docket #22 at p. 10.) Again, this relates to the NBPA's decision to deny Mr. Hurley's application to become a Player Agent, individualized harm, and whether the denial was justified.

Finally, Mr. Hurley has pled no facts in support of his conclusory statement set forth in briefing that the NBPA's Player Agent Regulations restrict minority access to the certification process.

Accordingly, even if not otherwise barred by the statutory labor exemption, Defendants are entitled to dismissal of Mr. Hurley's Sherman Act claims as he has failed to allege a *Sherman Act* violation.

B. *Federal Arbitration Act*.

As set forth above, Mr. Hurley's Complaint fails to state a claim against Defendants under the *Sherman Act*. Thus, the question of whether Mr. Hurley's Sherman Act claim falls within the agreement to arbitrate set forth in the NBPA Regulations is moot. To the extent that Mr. Hurley challenges the propriety of the NBPA's denial of his Application to become a certified Player **[*21]** Agent, the NBPA and Mr. Hurley agree that the arbitration requirements set forth in the NBPA Regulations apply and, despite the fact that Mr. Hurley failed to comply with the procedures for invoking arbitration set forth in the Regulations, both appear willing to proceed to arbitration on that issue. Accordingly, Defendants' Motions to Dismiss are granted with regard to Mr. Hurley's claim under the *Federal Arbitration Act*.

IV. Conclusion.

For the foregoing reasons, the Motion to Dismiss Plaintiff's Complaint filed by the National Basketball Association (Docket #14) is hereby GRANTED.

The Motion to Compel Arbitration and Dismiss filed by the National Basketball Players Association (Docket #15) is hereby DENIED IN PART AND GRANTED IN PART.

Mr. Hurley's Sherman Act and Federal Arbitration Act claims against both the NBA and NBPA are hereby DISMISSED WITH PREJUDICE.

The NBPA's Motion to Compel Arbitration is hereby DENIED AS MOOT.

IT IS SO ORDERED.

/s/ Donald C. Nugent

DONALD C. NUGENT

Senior United States District Judge

DATED: December 22, 2021

JUDGMENT

For the reasons stated in the Memorandum Opinion filed contemporaneously herewith, the Motion to Dismiss Plaintiff's Complaint filed by the National Basketball Association **[*22]** (Docket #14) is hereby GRANTED.

The Motion to Compel Arbitration and Dismiss filed by the National Basketball Players Association (Docket #15) is hereby DENIED IN PART AND GRANTED IN PART.

Mr. Hurley's Sherman Act and Federal Arbitration Act claims against both the NBA and NBPA are hereby DISMISSED WITH PREJUDICE.

The NBPA's Motion to Compel Arbitration is hereby DENIED AS MOOT.

IT IS SO ORDERED.

In re Oncology & Hematology Specialists, P.A.

Superior Court of New Jersey, Appellate Division

October 20, 2021, Argued; December 22, 2021, Decided

DOCKET NO. A-2080-19

Reporter
2021 N.J. Super. Unpub. LEXIS 3144 *; 2021 WL 6057217

IN THE MATTER OF THE APPLICATION OF ONCOLOGY AND HEMATOLOGY SPECIALISTS, P.A., d/b/a OHS PHARMACY TO OPERATE A PHARMACY IN THE STATE OF NEW JERSEY.

Notice: NOT FOR PUBLICATION WITHOUT THE APPROVAL OF THE APPELLATE DIVISION.

PLEASE CONSULT NEW JERSEY *RULE 1:36-3* FOR CITATION OF UNPUBLISHED OPINIONS.

Prior History: **[*1]** On appeal from the New Jersey Board of Pharmacy, Division of Community Affairs, Department of Law and Public Safety.

Core Terms

pharmacy, patients, medical treatment, Codey Law, pharmacists, practitioner, medical practice, tests, drugs, equitable estoppel, pharmaceutical, collaborative, anti-competitive, healthcare services, drug therapy, prescriptions, regulations, dispensing, licensed, ordering, argues, disease, beneficial interest, supervision, laboratory, includes, physician-owned, monitoring, modifying, clinical

Counsel: Richard B. Robins argued the cause for appellant Oncology and Hematology Specialists, P.A. (Mandelbaum Salsburg, PC, attorneys; Richard B. Robins, of counsel and on the briefs; Mohamed H. Nabulsi, on the briefs).

Jodi C. Krugman, Deputy Attorney General, argued the cause for respondent New Jersey Board of Pharmacy (Andrew J. Bruck, Acting Attorney General, attorney; Sookie Bae-Park, Assistant Attorney General, of counsel; Jodi C. Krugman, on the brief).

Judges: Before Judges Hoffman, Geiger, and Susswein.

Opinion

PER CURIAM

Petitioner Oncology and Hematology Specialists, P.A. appeals from the final agency decision of the New Jersey State Board of Pharmacy (the Board), entered on December 11, 2019, denying petitioner's application to register, open, and operate a pharmacy within its medical practice.

Petitioner, a medical practice wholly owned by four medical doctors, sought to open a "closed door clinic pharmacy" within its practice location, exclusively for the patients of its physicians. The Board denied petitioner's pharmacy application, concluding that such a pharmacy would violate the **[*2]** Codey Law, *N.J.S.A. 45:9-22.5(a)*, which prohibits physicians from referring patients to health care services owned by them. The Board further concluded the proposed pharmacy did not fit within an exception to the Codey Law that states : "The restrictions on referral of patients . . . shall not apply to . . . medica l treatment or a procedure that is provided at the practitioner's medical office[,]" *N.J.S.A. 45:9-22.5(b)*, because pharmacies do not provide medical treatment.

On appeal, petitioner argues the Board erred by failing to recognize that pharmacies provide medical treatment and by acting beyond the scope of its authority in considering the Codey Law, which falls under the authority of the Board of Medical Examiners. Petitioner further contends the Board's denial of the application amounted to impermissible anti-competitive conduct, and the doctrine of equitable estoppel required the Board to approve petitioner's application. We reject these arguments and affirm.

I.

In May 2018, petitioner, an oncology and hematology medical practice in Mountain Lakes wholly owned by four physicians, submitted a pharmacy permit application to the Board, seeking to open a new "closed door clinic pharmacy" that would only be accessed by **[*3]** — and fill prescriptions for — petitioner's patients. The proposed pharmacy would be located at petitioner's practice in Mountain Lakes. An affidavit attached to its application specified that the pharmacy would be operated "in compliance with the 'Same Practice' Exception to New Jersey Codey Law . . . ." Thereafter, petitioner's counsel submitted a letter and certification, dated February 11, 2019, setting forth legal arguments and attaching documents in support of the subject application.

On April 24, 2019, the Board considered petitioner's application and voted to deny the application, concluding "the practice structure would create a violation of the Codey Law." On December 11, 2019, the Board issued an order memorializing the denial of petitioner's application, which included a seven - page written explanation of its decision.

The Board explained the Codey Law bars medical practitioners from referring patients to health care services where the practitioners hold "a significant beneficial interest." *N.J.S.A. 45:9-22.5(a)*. Because "[t]he definition of '[h]ealth care service' set forth in *N.J.S.A. 45:9-22.4* expressly includes a pharmacy," the Board stated, "any referral by a physician to a pharmacy, in which the physician **[*4]** has a beneficial interest, would violate the Codey Law, unless an exception to the law applies." *Ibid.* (second alteration in original). Such an unlawful arrangement would exist if the Board approved petitioner's application because petitioner's physicians would have a beneficial interest in the pharmacy, which would only fill prescriptions for patients referred exclusively by the petitioner's physicians.

Moreover, the Board determined the "so-called 'in-office' exception" did not apply because "the proposed pharmacy would have to provide a 'medical treatment or a procedure'" in petitioner's office, but "a pharmacy provides neither 'medical treatments' nor 'medical procedures' to patients." The Board also noted that its decision was consistent with the several advisory opinions rendered by the Board of Medical Examiners, providing "that although physicians may own pharmacies, the Codey Law would prohibit a physician from referring the physician's own patients to the pharmacy in which he or she held an ownership interest."

Before the Board issued its order and accompanying explanation, the Deputy Director of Consumer Affairs, assisted by the Supervising Management Improvement Specialist **[*5]** and the Executive Officer and Chief Investigator of the Legalized Games of Chance Commission, reviewed the Board's then-proposed order and the relevant documentation "to determine whether the denial of a pharmacy permit to a physician-owned medical practice constitutes anti-competitive conduct by the Board . . . ." In a memorandum dated December 10, 2019, the Deputy Director stated, "[w]e unanimously determined the Board's proposed action would not displace competition" because the denial

> in no way suggests that licensed physicians cannot become owners of a pharmacy. The Board's action does not limit ownership of a pharmacy to only licensed pharmacists. Non-licensees, including physicians, may own a pharmacy. The Board's determination to deny the application for a permit was based on the fact that the proposed pharmacy would only have filled prescriptions written by the same physicians who were owners of the pharmacy.

Petitioner now appeals from the December 11, 2019 order that denied its application to register, open, and operate a pharmacy within its medical practice. Petitioner presents the following points of argument:

POINT I

THE BOARD ERRONEOUSLY ACTED BEYOND ITS LAWFUL SCOPE OF **[*6]** AUTHORITY BY SEEKING TO INTERPRET AND APPLY THE CODEY LAW, WHICH DOES NOT GOVERN PHARMACIES, AND WHICH THE BOARD LACKS POWER TO ENFORCE.

POINT II

THE BOARD ERRONEOUSLY FOUND THAT THE IN-OFFICE EXCEPTION TO THE CODEY LAW IS INAPPLICABLE TO THE PRACTICE OF PHARMACY.

POINT III

THE BOARD'S DENIAL OF APPELLANT'S PERMIT APPLICATION WAS PRECLUDED BASED ON THE DOCTRINE OF EQUITABLE ESTOPPEL AND OTHER EQUITABLE GROUNDS.

POINT IV

THE BOARD ERRED BY ENGAGING IN ANTI-COMPETITIVE CONDUCT.

II.

Appellate review of a final agency decision is limited, *Russo v. Bd. of Trs., 206 N.J. 14, 27 (2011)*, in recognition "that agencies have 'expertise and superior knowledge . . . in their specialized fields.'" *Hemsey v. Bd. of Trs., 198 N.J. 215, 223 (2009)* (alteration in original) (quoting *In re License Issued to Zahl, 186 N.J. 341, 353, 895 A.2d 437 (2006)*). Thus, an agency's decision should be upheld "unless there is a clear showing that it is arbitrary, capricious, or unreasonable, or that it lacks fair support in the record." *Russo, 206 N.J. at 27* (quoting *In re Herrmann, 192 N.J. 19, 27-28, 926 A.2d 350 (2007)*).

Likewise, on appeal, appellate courts accord deference to the "agency's interpretation of a statute" it is charged with enforcing. *Thompson v. Bd. of Trs., 449 N.J. Super. 478, 483, 158 A.3d 1195 (App. Div. 2017)* (quoting *Richardson v. Bd. of Trs., 192 N.J. 189, 196, 927 A.2d 543 (2007)*). "Deference to agency interpretation of a statute is appropriate as long as that interpretation is reasonable, and does not conflict with the express or implied intent of the legislature . . . **[*7]** ." *Gilliland v. Bd. of Rev., 298 N.J. Super. 349, 354, 689 A.2d 781 (App. Div. 1997)* (citations omitted). However, an agency's "interpretation of the law outside of its charge is entitled to 'no special deference.'" *Comm. Workers of Am., Local 1034 v. N.J. State Policemen's Benevolent Ass'n, Local 203, 413 N.J. Super. 286, 291 (App. Div. 2010)* (quoting *In re Camden Cnty. Prosecutor, 394 N.J. Super. 15, 23, 925 A.2d 63 (App. Div. 2007)*). *See also* *Teeters v. Div. of Youth and Fam. Servs., 387 N.J. Super. 423, 428, 904 A.2d 747 (App. Div. 2006)* (citations omitted) ("Although we are enjoined to accord respect to an agency's interpretation of the statute it is assigned to administer, we are not bound by an agency's interpretation of law, any more than we are bound by the legal rulings of lower courts").

Under this limited standard of review, "[a] reviewing court 'may not substitute its own judgment for the agency's, even though the court may have reached a different result.'" *In re Stallworth, 208 N.J. 182, 192, 26 A.3d 1059 (2011)* (quoting *In re Carter, 191 N.J. 474, 483, 924 A.2d 525 (2007)*). Rather, an appellate court focuses on three major inquiries: (l) whether the agency's decision conforms with relevant law; (2) whether the decision is supported by substantial credible evidence in the record; and (3) whether, in applying the law to the facts, the administrative agency clearly erred in reaching its conclusion. *Id. at 192*.

Petitioner's principal claim of agency error asserts that the Board erroneously interpreted the Codey Law. We disagree. The Codey Law provides, "[a] practitioner shall not refer a patient or direct an employee of the practitioner to refer a patient to a health care **[*8]** service in which the practitioner, or the practitioner's immediate family, or the practitioner in combination with the practitioner's immediate family has a significant beneficial interest . . . ." *N.J.S.A. 45:9-22.5(a)*. "'Practitioner' means a physician, chiropractor or podiatrist licensed pursuant to Title 45 of the Revised Statutes. " *N.J.S.A. 45:9-22.4*; *see also* *N.J.S.A. 45:9-18*.

> "Health care service" means a business entity which provides on an inpatient or outpatient basis: testing for or diagnosis or treatment of human disease or dysfunction; or dispensing of drugs or medical devices for the treatment of human disease or dysfunction. Health care service includes, but is not limited to, a bioanalytical laboratory, *pharmacy*, home health care agency, rehabilitation facility, nursing home, hospital, or a facility

which provides radiological or other diagnostic imagery services, physical therapy, ambulatory surgery, or ophthalmic services.

. . . .

"Significant beneficial interest" means any financial interest; but does not include ownership of a building wherein the space is leased to a person at the prevailing rate under a straight lease agreement, payments made by a hospital to a physician pursuant to a hospital and physician incentive **[*9]** plan, or any interest held in publicly traded securities.

[*N.J.S.A. 45:9-22.4* (emphasis added).]

The Codey Law includes the following relevant exception to the above rule:

"The restrictions on referral of patients established in this section shall not apply to . . . medical treatment or a procedure that is provided at the practitioner's medical office and for which a bill is issued directly in the name of the practitioner or the practitioner's medical office . . . ." *N.J.S.A. 45:9-22.5(c)*. Neither the statutes governing physicians, nor the Board of Medical Examiners' regulations, define "medical treatment" or "medical procedure."

Petitioner argues the Board's determination that "the 'practice of pharmacy' does not involve 'medical treatment or procedure' . . . was totally erroneous." Petitioner contends a pharmacy's activities fit within "the generally accepted meaning of the language 'medical treatment or procedure, "' which, citing medical and legal dictionaries, OSHA regulations, and New Jersey case law, petitioner asserts "is defined as 'a *broad term covering all the steps taken* to effect a cure of an injury or disease; including examination and diagnosis as well as application of remedies[.]'" Petitioner argues a pharmacy's **[*10]** activities of

dispensing medication, . . . "interpreting and evaluating prescriptions"; "administering and distributing drugs"; "advising and consulting on the therapeutic values, contents, hazards and uses of drugs"; "collecting, analyzing and monitoring patient data"; "providing pharmaceutical care and education"; "collaborative drug therapy management including modifying, continuing or discontinuing drug or device therapy"; "ordering or performing of laboratory tests under collaborative drug therapy management"; and "ordering clinical tests"

[*N.J.S.A. 45:14-41*.]

constitute medical treatment as steps taken to combat illness and the application of remedies. Petitioner also emphasizes the significant training and qualifications of pharmacists to show they administer medical treatment.

The Board's interpretation that pharmacies do not provide medical treatment is also supported by the professional and statutory distinction between medical doctors and pharmacists. Physicians and pharmacists undergo different education and training, and pharmacists are not medical doctors. Moreover, the statutes governing medical practice and those governing pharmaceutical practice occupy two different chapters of New Jersey's **[*11]** Revised Statutes — Chapter 9 governs medical practice, and Chapter 14 governs pharmacy practice.

Physicians are persons "licensed or permitted to practice medicine or surgery in this State[,]" *N.J.S.A. 45:9-27.5(a)*, whereas pharmacists are persons "licensed by this State to engage in the practice of pharmacy[,]" *N.J.S.A. 45:14-41*. These distinctions suggest that only physicians (or those under their supervision) provide medical care while pharmacists provide pharmaceutical care.

Whereas Chapter 9 states that, "'the practice of medicine or surgery' . . . include[s] the practice of any branch of medicine and/or surgery, and any method of treatment of human ailment, disease, pain, injury, deformity, mental or physical condition," *N.J.S.A. 45:9-5.1*, Chapter 14 describes the "practice of pharmacy" in terms of the provision of services, not treatment.

"Practice of pharmacy" means a health care service by a pharmacist that includes: compounding, dispensing and labeling of drugs, biologicals, radio pharmaceuticals or devices; overseeing automated medication systems; interpreting and evaluating prescriptions; administering and distributing drugs, biologicals and devices; maintaining prescription drug records; advising and consulting on the therapeutic **[*12]** values,

> content, hazards and uses of drugs, biologicals and devices; managing and monitoring drug therapy; collecting, analyzing and monitoring patient data; performing drug utilization reviews; storing prescription drugs and devices; supervising technicians, interns and externs; and such other acts, services, operations or transactions necessary, or incidental to, providing pharmaceutical care and education. In accordance with written guidelines or protocols established with a licensed physician, the "practice of pharmacy" also includes collaborative drug therapy management including modifying, continuing or discontinuing drug or device therapy; ordering or performing of laboratory tests under collaborative drug therapy management; and ordering clinical tests, excluding laboratory tests, unless those tests are part of collaborative drug therapy management.
>
> [*N.J.S.A. 45:14-41*.]

Chapter 14 further provides:

> "Pharmaceutical care" means the provision by a pharmacist of drug therapy review and other related patient care services intended to achieve positive outcomes *related to* the treatment, cure or prevention of a disease; control, elimination or reduction of a patient's symptoms; or arresting or slowing **[*13]** of a disease process as defined by the rules and regulations of the board.
>
> [*N.J.S.A. 45:14-41* (emphasis added).]

Notably, under Chapter 9, the practice of medicine involves "any method of treatment of human ailment[,]" *N.J.S.A. 45:9-5.1*, whereas under Chapter 14, pharmaceutical care involves "patient care services intended to achieve positive outcomes *related to* the treatment[,]" *N.J.S.A. 45:14-41* (emphasis added). Pharmaceutical care being related to treatment, but not treatment itself, reflects that pharmacists and pharmacies do not render medical treatment to patients; rather, they are the means by which patients receive access to their treatment needs.

Even where the practice of pharmacy involves working "in conjunction with . . . physicians" to provide "collaborative drug therapy management[,]" *N.J.A.C. 13:39-13.2(a)*, a pharmacist may perform "[o]nly those activities that have been approved by the collaborating physician," *N.J.A.C. 13:39-13.1*, which

> shall only include the collecting, analyzing and monitoring of patient data; ordering or performing of laboratory tests based on the standing orders of a physician as set forth in the written protocol; ordering of clinical tests based on the standing orders of a physician as set forth in the written protocol, . . . modifying, **[*14]** continuing or discontinuing drug or device therapy; and therapeutic drug monitoring with appropriate modification to dose, dosage regimen, dosage forms or route of administration.
>
> [*N.J.S.A. 45:14-41*.]

These activities do not obviously constitute medical treatment and are akin to the others "related to" treatment. Furthermore, to engage in collaborative practice with a physician, a pharmacist must "be pre-approved by the Board." *N.J.A.C. 13:39-13.3*. Petitioner does not indicate that it planned to engage in collaborative practice or would seek permission from the Board to do so.

We acknowledge that in *Kemp*, our Supreme Court interpreted the word "treatment"[1] and held, "[t]he plain meaning of "treatment" encompasses the administration of a vaccine." *147 N.J. at 300-01* (citing various legal and medical dictionaries for the proposition that "treatment" encompasses prevention of diseases). Later in its opinion, the Court explicitly stated, "[t]he introduction of the vaccine into [one]'s body, . . . to cause the body to react in a certain way,

---

[1] *Kemp* involved the issue of whether a State entity enjoyed immunity from liability under the Tort Claims Act, *N.J.S.A. 59:6-4*. *147 N.J. at 297, 299*. The statute provided public entities with "absolute immunity for the failure to perform an adequate examination 'for the purpose of determining whether [a] person has a disease or physical or mental condition that would constitute a hazard to the health or safety of himself or others'" unless "the examination is 'for the purpose of treatment.'" *Id. at 300*.

falls within the definition of *medical* treatment." *Id. at 303-04* (emphasis added). Chapter 14 provides, the "[p]ractice of pharmacy . . . includes . . . administering a distributing drugs . . . ." *N.J.S.A. 45:14-41*. It further provides: **[*15]**

> "Administer" means the direct application of a drug to the body of a patient or research subject by subcutaneous, intramuscular or intradermal injection, inhalation or ingestion by a pharmacist engaged in collaborative practice or in accordance with regulations jointly promulgated by the board and the State Board of Medical Examiners.
>
> [*Ibid.*]

While pharmacists provide medical treatment when they administer vaccines, most referrals from physicians to a pharmacy are not for vaccination, but rather for the dispensing of drugs and the other services encompassing the "practice of pharmacy" under *N.J.S.A. 45:14-41*, which do not constitute medical treatment or procedures. Petitioner does not claim its pharmacy would only be administering vaccines. Since the primary functions of a pharmacy do not include medical treatment, the Board did not err by finding the "in-office" exception to the Codey Law inapplicable.

Petitioner also highlights the Board of Medical Examiners' regulations that "permit[] physicians to refer their own patients for bioanalytical tests to laboratories in which the physicians have a financial interest, and which are located at the physicians' offices" and "permit[] physicians to dispense **[*16]** prescription drugs to their own patients in their offices." *N.J.A.C. 13:35-6.16(i)(1)*; *N.J.A.C. 13:35-7.5(a)*. Petitioner argues that if physicians are allowed to provide these services without violating the Codey Law, then they also can lawfully operate a pharmacy within their practice. We disagree.

First, bioanalytical testing may constitute medical treatment and fit within the above-discussed exception to the Codey Law. More importantly, *N.J.S.A. 45:14-41* provides: "'Pharmacy practice site' means any place in this State where drugs are dispensed or pharmaceutical care is provided by a licensed p harmacist, *but shall not include a medical office under the control of a licensed physician*." *N.J.S.A. 45:14-41* (emphasis added). Accordingly, when physicians dispense medication directly to patients per *N.J.A.C. 13:35-7.5*, they do not act as pharmacists or a separate pharmaceutical entity. There is thus no "refer[ral]" . . . to a health care service" that would violate the Codey Law; instead, the dispensing falls within the scope of the doctor's medical practice.

Petitioner maintains the Board exceeded the scope of its authority by interpreting, applying, and enforcing the Codey Law. Petitioner also contends the *Pharmacy Practice Act (PPA), N.J.S.A. 45:14-40 to -82*, only empowers the Board to regulate the practice of pharmacy, and thus the **[*17]** Board was not authorized to enforce the Codey Law, which regulates the profession of physicians; instead, the New Jersey State Board of Medical Examiners has sole and exclusive authority to regulate the conduct of physicians in New Jersey. Citing *Newcomb Sales v. Bd. of Pharmacy, 218 N.J. Super. 69, 71, 526 A.2d 1122 (App. Div. 1987)*, petitioner further argues the Board deviated from the PPA's directives, which "mandates issuance of a pharmacy permit," upon an applicant's satisfaction of the applicable statutory requirements to receive a permit, none of which prohibit physician ownership of pharmacies. Petitioner contends that "the Board may deny an application only for one or more of the eleven grounds specifically enumerated in the PPA." Thus, because it "satisfied each of the enumerated statutory and regulatory permit requirements," petitioner asserts "the Board lacked lawful power to deny the permit application based on a reason that was not enumerated in the controlling statute." We disagree.

N.J.S.A. 45:14-42 provides:

> The [B]oard shall enforce the provisions of this act. The [B]oard shall have all of the duties, powers and authority specifically granted by or necessary for the enforcement of this act, as well as such other duties, powers and authority as it may be granted from time **[*18]** to time by applicable law.

The statute delineating the Board's responsibilities and powers authorizes the Board to "deny . . . the permit of any pharmacy practice site" if the Board finds "that any conduct of the . . . applicant is violative of *any* federal, State or local laws or regulations relating to the practice of pharmacy . . . ." *N.J.S.A. 45:14-75(b)(1)* (emphasis added). The

Codey Law reasonably relates to the practice of pharmacy, as it explicitly defines pharmacies as a health care service, N.J.S.A. 45:9-22.4, to which physicians are barred from referring their patients if they hold a beneficial interest in said pharmacy, N.J.S.A. 45:9-22.5(a). Thus, we conclude the Board acted within the scope of its authority under N.J.S.A. 45:14-75(b) in denying petitioner's application because petitioner, a group of physicians, would violate a state law relating to the practice of pharmacy if permitted to operate the pharmacy.

Petitioner next argues "the doctrine of equitable estoppel precludes the Board from lawfully denying [petitioner]'s application" because petitioner relied on the Board's previous grant and multiple renewals of a pharmacy permit to a similarly-structured in-house physician-owned pharmacy. The Board granted this application to Regional Cancer Care **[*19]** Associates LLC (RCCA) in 2014 and renewed it as recently as May 2019. Petitioner argues it "reasonably expected" its pharmacy permit would be granted, relying on the Board allowin g RCCA to operate a physician-owned pharmacy. Based on this assumption, petitioner asserts it has incurred costs in excess of $512,000 relating to its pharmacy application.

Equitable estoppel "is designed to prevent injustice by not permitting a party to repudiate a course of action on which another party has relied to his detriment." *Knorr v. Smeal, 178 N.J. 169, 178, 836 A.2d 794 (2003)*. This equitable doctrine is "founded in the fundamental duty of fair dealing imposed by law" and "is invoked in 'the interests of justice, morality and common fairness.'" *Ibid.* (first quoting *Casamasino v. City of Jersey City, 158 N.J. 333, 354, 730 A.2d 287 (1999)*; and then quoting *Palatine I v. Plan. Bd., 133 N.J. 546, 560, 628 A.2d 321 (1993)*). "[T]o establish equitable estoppel, plaintiffs must show that defendant engaged in conduct, either intentionally or under circumstances that induced reliance, and that plaintiffs acted or changed their position to their detriment." *Ibid.* (citing *Miller v. Miller, 97 N.J. 154, 163, 478 A.2d 351 (1984)*). However, "[s]ubstantial detrimental reliance is not enough, 'only justified and reasonable reliance warrant the application of equitable estoppel[.]'" *Gen. Accident Ins. Co. v. N.Y. Marine and Gen. Ins. Co., 320 N.J. Super. 546, 557, 727 A.2d 1050 (App. Div. 1999)* (quoting *Palatine I v. Plan. Bd., 133 N.J. 546, 563, 628 A.2d 321 (1993)*).

"Equitable estoppel is rarely invoked against a governmental **[*20]** entity. However, equitable estoppel will be applied in the appropriate circumstances unless the application would prejudice essential governmental functions." *Middletown Twp. Policemen's Benevolent Ass'n Local No. 124 v. Twp. of Middletown, 162 N.J. 361, 367, 744 A.2d 649 (2000)* (internal citations and quotation marks omitted) (quoting *Wood v. Borough of Wildwood Crest, 319 N.J. Super. 650, 656, 726 A.2d 310 (App. Div. 1999)*). We recently stated that "equitable considerations are relevant to assessing governmental conduct, and may be invoked to prevent manifest injustice." *Tasa v. Bd. of Trs., 458 N.J. Super. 47, 60, 202 A.3d 663 (App. Div. 2019)* (quoting *In re Johnson, 215 N.J. 366, 378-79, 73 A.3d 440 (2013)*).

We reject petitioner's equitable estoppel argument. The Board has conceded that it made a mistake when it granted the permit to RCCA and has filed an action for the rescission of RCCA's permit. We agree with the Board that "if approval of RCCA's application was in error, it was not required to repeat that error as to [petitioner]."

Additionally, within four months of submitting its application to the Board, petitioner received notice the Board would likely reject its pharmacy application to avoid violating the Codey Law. In May 2018, petitioner submitted the application under review, and in September 2018, the Board denied the application for a physician-owned-pharmacy permit submitted by Summit Medical Group (SMG).[2]

Finally, petitioner has not shown the Board reversing its position on physician-owned pharmacies **[*21]** to be unjust. *See* *Johnson, 215 N.J. at 379-80* ("Equitable estoppel is designed to prevent disavowal of prior conduct if a change of course would be unjust."). "[A]dministrative agencies generally have the inherent power to reopen or to modify and rehear prior decisions [,]" including "decision[s] involving the same parties and the identical subject matter . . . ." *In re Trantino, 89 N.J. 347, 364, 446 A.2d 104 (1982)*.

---

[2] The Board voted to deny SMG's application for a specialty pharmacy license at the conclusion of its September 27, 2018 meeting and explained the denial in an October 24, 2018 order and decision.

Additionally, an agency may revise its interpretation of a statute after testing the "wisdom of its policy" and to meet "the demands of changed circumstances . . . ." *Glukowsky v. Equity One, Inc., 180 N.J. 49, 65-66, 848 A.2d 747 (2004)* (citations omitted). Thus, the Board changing course to accord its policy with the Codey Law and the Board of Medical Examiners' position on physician - owned pharmacies did not amount to a "manifest injustice."

We further agree with the Board arguments regarding petitioner's desire to open a pharmacy rather operate a dispensary:

> Most telling, however, is [petitioner's] admission that there is a direct financial incentive for its desire to open a pharmacy rather operate a dispensary. [Petitioner] admits that operating a dispensary "would present a serious payment issue" because pharmacy benefit managers "deter payment by seeking to restrict patient access to physician dispensaries." [Petitioner] **[*22]** thus admits to a direct financial incentive for [its] physicians to prescribe medications to be filled at the proposed pharmacy, where they will obtain additional profit from owning that pharmacy. Nothing would prevent an [petitioner's] physician[s] from choosing to prescribe a drug that will provide a higher profit margin for the pharmacy than a lower cost drug, assuming both would provide a similar benefit for patient treatment, or worse, choosing to prescribe a drug that would be less efficacious but produce a higher profit for the pharmacy and its physician-owners. This potential financial gain should not[,] either actually or potentially[,] influence a treatment decision. This concern is the precise ill the Codey Law was intended to prevent.

Lastly, petitioner argues the Board engaged in anti-competitive conduct by changing its position on physician owned pharmacies and denying petitioner's pharmacy application. Petitioner claims the Board, which is "controlled by active market participants, i.e., practicing pharmacists[,]" denied petitioner (and SMG's) application "to protect its members' financial interests[] by prohibiting non-pharmacists from competing against them in the free **[*23]** market."

Petitioner relies on *N.C. State Bd. of Dental Exam'rs v. Fed. Trade Comm'n, 574 U.S. 494, 135 S. Ct. 1101, 191 L. Ed. 2d 35 (2015)*. In that case, the United States Supreme Court allowed the Federal Trade Commission (FTC) to bring a complaint against a dentist-run state dentistry board which, "after dentists complained to the Board that non-dentists were charging lower prices for certain services than dentists, "issued cease-and-desist letters to non-dentist teeth whitening service providers and product manufacturers, often warning that the unlicensed practice of dentistry is a crime." *Id. at 494*.

The Court considered whether the Board could claim state-action immunity, not the merits of the FTC's claims alleging "anticompetitive and unfair method of competition." *Id. at 501*. Ultimately, the Court held that "a state board on which a controlling number of decisionmakers are active market participants in the occupation the board regulates" cannot "invoke state-action antitrust immunity" unless the state actively supervises the board for anti-competitive conduct. *Id. at 511-12*. Because the State did not exercise active supervision over the dentistry board, the Court found the board was not immune from suit and affirmed the decision disciplining the board for violating ***antitrust law***. *See* *Id. at 515*.

Petitioner's reliance on this **[*24]** case is unpersuasive. Petitioner did not assert an anti-trust claim against the Board. Moreover, petitioner presents no evidence the Board acted improperly, but instead asks this court to "infer" the Board acted with an anti-competitive motive based on the Board's change-of-position on physician owned pharmacies after a large medical practice, SMG, applied to open a pharmacy.

Furthermore, the State proactively screened the Board's denial of petitioner's pharmacy application for anti-competitive conduct and concluded the denial did not displace competition. Nothing suggests the State's review of the Board's decision was deficient. *See* *N.C. State Bd. of Dental Exam'rs, 574 U.S. at 515* (discussing state supervision over regulatory boards, which requires the supervisor review "the substance of the anticompetitive decision, not merely the procedures followed to produce it"; "the supervisor must have the power to veto or modify particular decisions to ensure they accord with state policy"; and "the state supervisor may not itself be an active market participant ").

In sum, petitioner fails to convincingly show the Board acted with an improper motive or arbitrarily, capriciously, or unreasonably.

Affirmed.

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Legal Entitlement

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN1[] **Entitlement as Matter of Law, Appropriateness**

A court shall grant summary judgment if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*. When considering a motion for summary judgment, the court must view the evidence in the light most favorable to the nonmoving party, but the determination of whether a given factual dispute requires submission to a jury must be guided by the substantive evidentiary standards that apply to the case.

Civil Procedure > Judgments > Summary Judgment > Burdens of Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Scintilla Rule

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN2[] **Summary Judgment, Burdens of Proof**

A summary judgment movant has the initial burden to demonstrate the absence of a genuine dispute as to any material fact. The burden can be met by either negating an essential element of the nonmoving party's case or showing that there is no evidence to prove a fact necessary to the nonmoving party's case. If the movant meets its burden, the nonmoving party must point to specific evidence showing a genuine issue for trial. The nonmoving party must do more than simply show that there is some metaphysical doubt as to the material facts. A mere scintilla of evidence in support of the nonmoving party will not suffice to overcome a motion for summary judgment, and unsupported speculation is not enough to create a genuine issue of material fact.

Civil Procedure > Judgments > Summary Judgment > Burdens of Proof

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN3[] **Summary Judgment, Burdens of Proof**

Speculation does not create a genuine issue of fact; instead, it creates a false issue, the demolition of which is a primary goal of summary judgment.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN4[] **Sherman Act, Claims**

Section 1 of the Sherman Act makes illegal every contract, combination, or conspiracy, in restraint of trade. *15 U.S.C.S. § 1*. The provision is interpreted to prohibit only unreasonable restraints on trade, so the elements of a *§ 1* claim are: 1) a conspiracy that 2) unreasonably 3) restrains trade.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN5[] **Sherman Act, Claims**

An agreement to restrain trade is a threshold requirement of every antitrust conspiracy claim. That is so because, as a general matter, the Sherman Act does not restrict the long recognized right of a private enterprise freely to exercise its own independent discretion as to parties with whom it will deal.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Evidence > Types of Evidence > Circumstantial Evidence

Evidence > Inferences & Presumptions > Inferences

HN6[] **Per Se Rule & Rule of Reason, Sherman Act**

To prove the existence of an agreement to restrain trade, a plaintiff must establish a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement. The existence of an agreement can be proven by direct evidence of the agreement or inferred from circumstantial evidence tending to establish an agreement. Direct evidence is evidence that is based on personal knowledge or observation and that, if true, proves a fact without inference or presumption. The evidence must show an explicit understanding to collude. Ambiguous statements are not direct evidence of collusion.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Evidence > Types of Evidence > Circumstantial Evidence

Evidence > Inferences & Presumptions > Inferences

HN7[] **Per Se Rule & Rule of Reason, Sherman Act**

It is only in rare cases that a plaintiff can establish the existence of a conspiracy by showing an explicit agreement. Indeed, most conspiracies are inferred from the behavior of the alleged conspirators, and from other circumstantial evidence, such as barriers to entry and other market conditions.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Inferences & Presumptions > Inferences

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN8[] **Conspiracy to Monopolize, Elements**

Although the existence of a conspiracy can be inferred from circumstantial evidence, ***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *15 U.S.C.S. § 1* case. Conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. Thus, a plaintiff must present evidence that tends to exclude the possibility that the alleged conspirators acted independently. Although the plaintiff's evidence need not be such that only an inference of conspiracy may be derived from it, the evidence must at least go beyond equivocal complaints and tend to exclude the inference of independent action. The court must consider the evidence as a whole, rather than compartmentalizing the separate factual components.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Types of Evidence > Circumstantial Evidence

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN9[] **Conspiracy to Monopolize, Elements**

A showing of parallel business behavior can be circumstantial evidence of the existence of a conspiracy, but without more, conscious parallelism is not enough to establish a conspiracy. The plaintiff must also show that each defendant engaging in the parallel action acted contrary to its economic self-interest, or show other plus factors tending to establish that the defendants were in a collusive agreement to fix prices or otherwise restrain trade. The existence of the plus factors removes a plaintiff's evidence from the realm of equipoise and renders that evidence more probative of conspiracy than of conscious parallelism. There is no finite list of plus factors; any showing that tends to exclude the possibility of independent action may qualify.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Evidence > Inferences & Presumptions > Inferences

HN10[] **Per Se Rule & Rule of Reason, Sherman Act**

To establish that defendants engaged in parallel conduct, a plaintiff must show that they took similar actions to achieve the same end. The defendants' actions need not be simultaneous or identical, but substantial variances in the actions may undercut the inference of a conspiracy.

Civil Procedure > Judgments > Summary Judgment > Burdens of Proof

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN11[] **Summary Judgment, Burdens of Proof**

A plaintiff cannot defeat a summary judgment motion by merely asserting that the jury might, and legally could, disbelieve the defendant's denial of a conspiracy.

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > ... > Contracts > Intentional Interference > Elements

HN12[] **Intentional Interference, Elements**

Four elements are required to establish tortious interference with a contractual or business relationship: (1) the existence of a business relationship or contract; (2) knowledge of the business relationship or contract on the part of the defendant; (3) an intentional and unjustified interference with the business relationship or procurement of the contract's breach; and (4) damage to the plaintiff as a result of the interference.

Opinion

ORDER GRANTING SUMMARY JUDGMENT

This case is before the Court based on Defendants' motions for summary judgment (Docs. 358, 359, 361). Plaintiff filed a combined response in opposition (Doc. 375) to which Defendants **[*2]** filed replies (Docs. 381, 382, 383). No hearing is necessary to rule on the motions, and for the reasons that follow, the Court finds that the motions are due to be granted.

Overview

This case is a spin-off from a still-pending suit filed by Plaintiff in federal court in Delaware nearly 7 years ago.[1] The case has a long and tortured procedural history, but it boils down to a fairly simple question: Did Defendants conspire to keep Plaintiff out of the heavy construction equipment sales market in North America by threatening to withhold their used equipment from the online auction site that Plaintiff had contracted with to sell its new equipment?

Defendants argue in their motions for summary judgment that the answer to this question is "no" because there is simply no record evidence from which a jury could find that they individually did what Plaintiff claims, much less that they conspired with each other (or anyone else) to do so. Having carefully reviewed the evidence and legal memoranda submitted by the parties,[2] the Court agrees.

---

[1] *Int'l Constr. Prods., LLC v. Caterpillar, Inc., et al.*, D. De. Case No. 1:15cv108-RGA-SRF (filed Jan. 29, 2015).

[2] Collectively, the parties filed nearly 200 exhibits containing over 3,700 pages (including dozens of condensed four-page-to-one-page deposition transcripts), *see* Attach. to Docs. 355, 356, 357, 376, and more than 200 pages of legal memoranda in support of and in opposition to the motions for summary judgment.

Background

Plaintiff was a distributor of new Chinese-manufactured Lonking heavy construction equipment, **[*3]** and it was also "an authorized reseller" of other Chinese-manufactured heavy construction equipment. Plaintiff's business model was to sell the equipment directly to consumers over the Internet rather than through a dealer network, which was the typical business model in the North American heavy construction equipment market.

Defendants are independently owned and operated heavy construction equipment dealers who sell new and used equipment manufactured by Caterpillar, Inc. in exclusive regional territories around the United States. Defendants sometimes use online auction sites, such as IronPlanet, and auction companies, such as Cat Auction Services (CAS) and Ritchie Bros. Auctioneers, to sell their used equipment.

There was considerable interrelationship between the auction services and the heavy construction equipment manufacturers and dealers. For example, Defendant Ring Power Corporation was a minority shareholder of IronPlanet and Defendant Ziegler, Inc. was a shareholder of CAS. Additionally, Ziegler's president and CEO, Bill Hoeft, was a founding member of CAS and chairman of its board of directors.

In January 2014, after several months of informal discussions, IronPlanet and CAS **[*4]** began formal merger negotiations.[3] The merger was consummated the following year, and in 2016, the combined entity merged with Ritchie Bros.

In March 2014, while the merger discussions were ongoing between CAS and IronPlanet, Plaintiff entered into an agreement with IronPlanet to sell certain new Chinese-manufactured heavy construction equipment on IronPlanet's website.[4] The agreement was announced at a large industry trade show, and as Plaintiff hoped, the announcement generated significant press coverage and "ma[d]e a splash" in the industry.

IronPlanet terminated the agreement the following month, and Plaintiff subsequently went out of business. The circumstances giving rise to the termination of the agreement form the basis of Plaintiff's claims.

There is evidence that IronPlanet terminated the agreement because it did not want to continue devoting substantial resources to a venture that generated only one sale and it wanted to devote its resources to the potentially more lucrative CAS merger. However, there is also evidence that (in the light most favorable to Plaintiff) shows that IronPlanet's decision to terminate the agreement was based, at least in part, on "pressure" exerted on **[*5]** it by industry stakeholders that were not happy with its decision to sell new Chinese-manufactured heavy construction equipment on its website.

The dispositive issue in this case is whether the pressure was the result of concerted action involving Defendants. The facts and evidence pertinent to the resolution of this issue are interspersed in the analysis section below.

Procedural History

In January 2015, Plaintiff filed suit against Caterpillar, CAS, and several other heavy construction equipment manufacturers in federal court in Delaware, alleging antitrust violations and other claims. Over the course of that litigation, the claims against CAS and manufacturers other than Caterpillar and Komatsu America Corporation were dismissed.

---

[3] Although Plaintiff devotes substantial discussion in its response to events related to the merger between CAS and IronPlanet to support its conspiracy claim, the Delaware court unequivocally ruled in October 2019 that "because ... the merger agreement between IronPlanet and [CAS] did not restrain trade, [Plaintiff] cannot rely on the merger agreement to establish concerted action." Doc. 238, at 9.

[4] The "representative brands" indentified in the agreement were Lonking, Shantui, Sunward, Zoomlion, XCMG, and Mahindra.

In September 2018, Plaintiff was granted leave to file a second amended complaint to add three Caterpillar dealers (Ring Power, Ziegler, and Thompson Tractor Company, Inc.) as defendants. Nearly two year later, in August 2020, after initially dismissing the claims against these "dealer defendants" for lack of personal jurisdiction, the Delaware court reconsidered the dismissal and transferred the claims against the dealer defendants to this Court. *See* Docs. **[*6]** 294, 295. The Delaware court did not transfer the claims against Caterpillar and Komatsu, and those claims remain pending in the Delaware court.

Three months after the case was transferred to this Court, Plaintiff was granted leave to file an amended complaint that focused solely on the claims against the three named dealer defendants. *See* Doc. 324 (denying Defendants' motion to dismiss and granting Plaintiff's motion to amend). The amended complaint (Doc. 322) asserts four counts against Defendants: two under *Section 1* of the *Sherman Act*, *15 U.S.C. § 1* (Counts 1 and 2) and two tortious interference claims under state law (Counts 3 and 4). Defendants answered the complaints, denying the claims asserted against them and asserting various affirmative defenses. *See* Docs. 325, 326, 327.

Two months later, in January 2021, a scheduling order was entered establishing a phased discovery schedule. *See* Doc. 338, at ¶4.a. Phase 1 was limited to "fact discovery on the issue of the existence of a conspiracy in relation to the alleged agreement to boycott IronPlanet," and Phase 2 was to focus on "expert discovery and the issues of market definition, antitrust injury, and damages." *Id.* Phase 2 was not to proceed until the Court resolved **[*7]** any summary judgment motions concerning the existence of the alleged conspiracy. *Id.* at ¶4.c.; *see also* Doc. 386 (denying Plaintiff's motion to defer consideration of the summary judgment motions to allow it to conduct certain expert discovery).

Phase 1 discovery was completed in July 2021, as scheduled. Defendants thereafter filed motions for summary judgment on all the claims asserted by Plaintiff in the amended complaint.

Briefing on the motions was completed in October 2021. Plaintiff requested oral argument on the motions, but the Court sees no need for it. Thus, the motions are ripe for rulings.

Analysis

HN1[] "The court shall grant summary judgment if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. When considering a motion for summary judgment, the court must view the evidence in the light most favorable to the nonmoving party, but "the determination of whether a given factual dispute requires submission to a jury must be guided by the substantive evidentiary standards that apply to the case." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*.

HN2[] The movant has the initial burden to demonstrate the absence of a genuine dispute as to any material fact. **[*8]** *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. This burden can be met by "either negating an essential element of the nonmoving party's case or showing that there is no evidence to prove a fact necessary to the nonmoving party's case." *McGee v. Sentinel Offender Servs., LLC, 719 F.3d 1236, 1242 (11th Cir. 2013)*.

If the movant meets its burden, the nonmoving party must point to specific evidence showing a genuine issue for trial. *See* *Celotex, 477 U.S. at 324*. The nonmoving party "must do more than simply show that there is some metaphysical doubt as to the material facts." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. "A mere scintilla of evidence in support of the nonmoving party will not suffice to overcome a motion for summary judgment, and unsupported speculation is not enough to create a genuine issue of material fact." *Franklin v. Tatum, 627 F. App'x 761, 764 n.6 (11th Cir. 2015)* (internal citations and quotations omitted); *see also* *Cordoba v. Dillard's, Inc., 419 F.3d 1169, 1181 (11th Cir. 2005)* ("[U]nsupported speculation ... does not meet a party's burden of producing some defense to a summary judgment motion. ***HN3***[] Speculation does not create a *genuine* issue of fact; instead, it creates a false issue, the demolition of which is a primary goal of summary judgment." (quoting *Hedberg v. Ind. Bell Tel. Co., 47 F.3d 928, 931-32 (7th Cir.1995)*) (emphasis in original)); *Rollins v. TechSouth, Inc., 833 F.2d 1525, 1529 (11th Cir. 1987)* ("[U]nsubstantiated assertions alone are not enough to withstand a motion for summary judgment.").

Sherman Act Claims (Counts 1 and 2)

Defendants argue that the summary judgment evidence fails to establish **[*9]** the existence of a conspiracy and, as a result, they are entitled to judgment as a matter of law on the antitrust claims asserted in the amended complaint. Plaintiff responds that the summary judgment evidence establishes (directly or circumstantially) the existence of a conspiracy between Defendants and others, or that it at least shows that there are genuine factual disputes on the issue. The Court agrees with Defendants, as explained below.

HN4[] *Section 1* of the *Sherman Act* makes illegal "[e]very contract, combination ..., or conspiracy, in restraint of trade." *15 U.S.C. § 1*. This provision has been interpreted to prohibit only "unreasonable" restraints on trade, so the elements of a *§ 1* claim are [1] a conspiracy, that [2] unreasonably [3] restrains trade. *Quality Auto Painting Ctr. of Roselle, Inc. v. State Farm Indem. Co., 917 F.3d 1249, 1260 (11th Cir. 2019)*. Here, only the first element is currently at issue.

HN5[] An agreement to restrain trade is a "threshold requirement of every antitrust conspiracy claim." *City of Tuscaloosa v. Harcros Chems., Inc., 158 F.3d 548, 569 (11th Cir. 1998)*. This is so because, "as a general matter, the *Sherman Act* 'does not restrict the long recognized right of [a private enterprise] freely to exercise [its] own independent discretion as to parties with whom [it] will deal." *Verizon Commc'ns. Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (quoting *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)*).

HN6[] To prove the existence of an agreement to restrain trade, the plaintiff must establish "a unity **[*10]** of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement." *Harcros, 158 F.3d at 569* (quoting *Seagood Trading Corp. v. Jerrico, Inc., 924 F.2d 1555, 1573 (11th Cir. 1991)*). The existence of an agreement can be proven by direct evidence of the agreement or inferred from circumstantial evidence tending to establish an agreement. *Id.*

"Direct evidence" is evidence that "is based on personal knowledge or observation and that, if true, proves a fact without inference or presumption." Black's Law Dictionary 699 (11th ed. 2019); *see also* *United Am. Corp. v. Bitmain, Inc., 530 F. Supp. 3d 1258 (S.D. Fla. 2021)* ("Direct evidence is explicit and does not require courts to make inferences to find an agreement."). The evidence must show "an explicit understanding ... to collude." *Golden Bridge Tech., Inc. v. Motorola, Inc., 547 F.3d 266, 272 (5th Cir. 2008)*. Ambiguous statements are not direct evidence of collusion. *See* *Hyland v. HomeServices of Am., Inc., 771 F.3d 310, 318 (6th Cir. 2014)*; *InterVest, Inc. v. Bloomberg, L.P., 340 F.3d 144, 149 (3d Cir. 2003)*.

Here, the summary judgment evidence does not contain any direct evidence of an explicit agreement between Defendants to pressure IronPlanet into terminating its relationship with Plaintiff. Defendants' employees and officials unequivocally denied the existence of such an agreement, and Plaintiff did not point to any direct evidence explicitly showing the existence of an agreement.[5] All of the purported direct evidence cited by Plaintiff in its response would require one or more inferences **[*11]** to find that the Defendants agreed to collude against Plaintiff.

---

[5] The Court did not overlook the Eleventh Circuit statement in *De-Long Equip. Co. v. Wash. Mills Abrasive Co., 887 F.2d 1499, 1515 (11th Cir. 1989)*, that the court "must look beyond the defendants' bald denial of concerted action and analyze the substance of [plaintiff's] evidence in order to determine if summary judgment was appropriate," but the Supreme Court has made clear that when faced with sworn testimony denying involvement in the alleged conspiracy, a plaintiff must come forward with something more than an assertion that the denials are not credible to withstand summary judgment, *see* *Anderson, 477 U.S. at 256* (rejecting argument that a plaintiff can defeat a summary judgment motion "by merely asserting that the jury might, and legally could, disbelieve the defendant's denial of a conspiracy").

For example, the telephone conversation in which IronPlanet's president, Jeff Jeter, allegedly told Plaintiff's chairman, Tim Frank, that "Cat[erpillar] and at least one other manufacturer" were "putting pressure" on IronPlanet to terminate its relationship with Plaintiff or "they" (understood by Mr. Frank to be the manufacturers and dealers) would no longer consign equipment to IronPlanet does not directly establish the existence of an agreement rather than parallel independent action, nor does it unambiguously tie the dealer defendants in this case to the agreement.[6] The Court did not overlook Mr. Jeter's contemporaneous notes of this conversation, which stated that Mr. Frank "understands pressure and said he suspects it would be hard to brush off if they [the manufacturers and dealers] are serious." Although this is evidence from which a jury could find that IronPlanet received "pressure" to terminate its agreement with Plaintiff, it is not direct evidence of a conspiracy because the factfinder would be required to infer that the pressure was being exerted through a collective agreement rather than parallel independent **[*12]** action. Additionally, Mr. Jeter's notes and his deposition testimony about the notes do not tie any particular dealer (much less the defendants named in this case) to the pressure being asserted because, although Mr. Jeter confirmed in his deposition that "they" referred to manufacturers and dealers generally, he could not recall the "specificity and granularity" of which manufacturers or dealers were exerting pressure or what pressure they were asserting.

The fact that the summary judgment evidence does not contain direct evidence of a conspiracy is not dispositive (or surprising) because ***HN7***[] "it is only in rare cases that a plaintiff can establish the existence of a conspiracy by showing an explicit agreement." *Harcros, 158 F.3d at 569* (quoting *Seagood Trading Corp., 924 F.2d at 1573*). Indeed, "most conspiracies are inferred from the behavior of the alleged conspirators, and from other circumstantial evidence (economic and otherwise), such as barriers to entry and other market conditions." *Id.*

HN8[] Although the existence of a conspiracy can be inferred from circumstantial evidence, "***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *§ 1* case." *Matsushita Elec., 475 U.S. at 588*. "[C]onduct as consistent with permissible competition as with illegal conspiracy **[*13]** does not, standing alone, support an inference of antitrust conspiracy." *Id.* Thus, the plaintiff must present evidence that "tends to exclude the possibility that the alleged conspirators acted independently." *Id.* (internal quotation omitted); *see also Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 554, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* ("[P]roof of a *§ 1* conspiracy must include evidence tending to exclude the possibility of independent action .... [C]onspiracy evidence must tend to rule out the possibility that the defendants were acting independently.").

Although the plaintiff's evidence "need not be such that *only* an inference of conspiracy may be derived from it," the evidence must at least "go beyond equivocal complaints and *tend* to exclude the inference of independent action." *Am. Contractors Supply, LLC v. HD Supply Constr. Supply, Ltd., 989 F.3d 1224, 1234 (11th Cir. 2021)* (quoting *De-Long Equip., 887 F.2d at 1509*) (emphasis in original). The Court must consider the evidence as a whole, rather than compartmentalizing the separate factual components. *See Cont'l Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*.

---

[6] Additionally, the statements attributable to Mr. Jeter are hearsay insofar as they are being offered to prove the truth of the matter asserted—that IronPlanet terminated its agreement with Plaintiff due to "pressure" from Caterpillar and others. The statements are not excluded from the definition of hearsay under *Fed. R. Evid. 801(d)(2)(E)* because IronPlanet is not alleged to be a "coconspirator" with Defendants. The statements are not admissible under *Fed. R. Evid. 804(b)(3)(A)* because Mr. Jeter testified in his deposition that he did not recall the substance of his conversion with Mr. Frank, not that he did not recall having a conversation at all. *See Lamonica v. Safe Hurricane Shutters, Inc., 711 F.3d 1299, 1317 (11th Cir. 2013)* ("*Rule 804(a)(3)* applies only if the declarant is unable to remember the 'subject matter,' i.e., if 'he has no memory of the events to which his hearsay statements relate.' The fact that the witness does not remember making the statements themselves is irrelevant." (quoting *N. Miss. Commc'ns v. Jones, 792 F.2d 1330, 1336 (5th Cir. 1986)*)).

HN9[] A showing of "parallel business behavior" can be circumstantial evidence of the existence of a conspiracy, but without more, "conscious parallelism"[7] is not enough to establish a conspiracy. *See* *Twombly, 550 U.S. at 561 n.7*. The plaintiff must also show that "each defendant engaging in the parallel action acted contrary to its economic self-interest, or [show] other 'plus **[*14]** factors' tending to establish that the defendants were ... in a collusive agreement to fix prices or otherwise restrain trade." *Harcros, 158 F.3d at 570-71*. The existence of the plus factors "remove[s] [a plaintiff's] evidence from the realm of equipoise and render[s] that evidence more probative of conspiracy than of conscious parallelism." *Williamson Oil Co. v. Philip Morris USA, 346 F.3d 1287, 1301 (11th Cir. 2003)*. There is no finite list of plus factors; any showing that "tends to exclude the possibility of independent action" may qualify. *Id. at 1303*.

Here, Plaintiff argues that a conspiracy can be inferred from the fact that each Defendant threatened not to use (i.e., boycott) IronPlanet to sell its used equipment if IronPlanet did not terminate its relationship with Plaintiff. Defendants respond that the summary judgment evidence does not show that they threatened to boycott IronPlanet and even if they had, the evidence fails to show any "plus factors" that would tend to rule out the possibility that they were acting independently. Each point—the existence (or not) of parallel conduct and the existence (or not) of any plus factors—will be discussed in turn.

HN10[] To establish that the defendants engaged in "parallel conduct," the plaintiff must show that they took similar actions to achieve the **[*15]** same end. *See* *SD3, LLC v. Black & Decker (U.S.) Inc., 801 F.3d 412, 427 (4th Cir. 2015)*; *see also* *In re Musical Instruments & Equip. Antitrust Lit., 798 F.3d 1186, 1193 (9th Cir. 2015)* (noting that an example of parallel conduct is when "competitors adopt[] similar policies around the same time in response to similar market conditions"). The defendants' actions need not be simultaneous or identical, but substantial variances in the actions may undercut the inference of a conspiracy. *See* *Anderson News, LLC v. Am. Media, Inc., 899 F.3d 87, 105 (2d Cir. 2018)*.

Here, Plaintiff points to the following communications as evidence that Defendants engaged in parallel conduct by threatening to boycott IronPlanet if it did not terminate its relationship with Plaintiff:

• On March 18, 2014, Ziegler's president and CEO, Bill Hoeft, emailed IronPlanet's CEO, Greg Owens, confirming receipt of IronPlanet's latest merger proposal. The email also included a "side note," stating: "We[8] would like to better understand the relationship [between IronPlanet and Plaintiff], as we are concerned that Caterpillar and the CAT dealers would have significant concerns about any arrangement where IronPlanet is providing auction services for new equipment for a Caterpillar competitor." There is no evidence of any other communications between Mr. Hoeft (or anyone else at Ziegler) and anyone at IronPlanet relating to Plaintiff.

• On April 2 and **[*16]** 3, 2014, Ring Power employee Frank Fowler had several phone calls with Mr. Owens. Neither of them recalled the exact substance of the calls, but contemporaneous notes show that Mr. Fowler was calling Mr. Owens merely "to verify [the rumors] and find out what is going on" with IronPlanet and Plaintiff.

• On April 4, 2014, at the request of a supervisor, Thompson employee Richard Lindley asked IronPlanet employee Bob Winnette "[w]hat does this [the agreement between IronPlanet and Plaintiff] mean?" This communication occurred while Mr. Lindley was negotiating with Mr. Winnette over the consignment of six pieces of heavy equipment to IronPlanent. Mr. Winnette responded by forwarding an email stating that IronPlanet's agreement with Plaintiff had been "suspended." Mr. Lindley requested a more formal statement on

[7] Conscious parallelism is "a common reaction of 'firms in a concentrated market that recognize their shared economic interests and their interdependence with respect to price and output decisions.'" *Quality Auto, 917 F.3d at 1261* (quoting *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*).

[8] Plaintiff argues that "we" refers to Ziegler because the signature block on the email identified Mr. Hoeft as the president and CEO of Ziegler. However, even when viewed in the light most favorable to Plaintiff, the summary judgment evidence establishes that the "we" refers to CAS (not Ziegler) because the email was sent in the context of the ongoing merger negotiations between CAS and IronPlanet in which Mr. Hoeft was involved in his capacity as a member of CAS's board of director; the substance of the "side note" closely tracked language proposed by a consultant working for CAS on the merger; and Mr. Hoeft (and Ziegler) had no business relationship with IronPlanet other than Mr. Hoeft's involvement in the merger negotiations.

> IronPlanet letterhead, which Mr. Winnette provided several days later in a letter stating that "IronPlanet has terminated its relationship with [Plaintiff]" and that Plaintiff's equipment had been removed from IronPlanet's website.

These communications do not contain any express or implied threats and, even in the light most favorable to Plaintiff, amount to nothing more than mere **[*17]** inquiries and expressions of concern about the impact of IronPlanet's deal with Plaintiff on the heavy construction equipment industry. This concern is not unreasonable or contrary to Defendants' economic interests considering that the sale of Plaintiff's new equipment on IronPlanet's website could have reduced the price for which Defendants could sell their used equipment on the website. Additionally, the communications were not unusual because Ring Power and Thompson had existing business relationships with IronPlanet and one of them (Ring Power) had an ownership interest in IronPlanet.

There is no evidence that the communications were perceived as boycott threats by Mr. Owens or any other IronPlanet employee. Indeed, IronPlanet's president, Mr. Jeter, unequivocally testified that he did not receive—and that he was unaware of—any threats from Defendants.

Plaintiff did not point to any conflicting evidence regarding the substance or nature of the communications between Defendants and IronPlanet. Plaintiff's speculation and unsupported claims of a group boycott are simply not enough to establish a genuine issue for trial on this record. *See* *Cordoba, 419 F.3d at 1181* ("Speculation does not create a *genuine* issue **[*18]** of fact; instead, it creates a false issue, the demolition of which is a primary goal of summary judgment." (quoting *Hedberg v. Ind. Bell Tel. Co., 47 F.3d 928, 931-32 (7th Cir. 1995)*) (emphasis in original)); *Kemp Pontiac-Cadillac, Inc. v. Hartford Auto Dealers' Ass'n, Inc., 380 F. Supp. 1382, 1389 (D. Conn. 1974)* ("[G]lib and conclusory allegations ... are insufficient to raise genuine issues for trial in the face of the specific denials in sworn depositions and affidavits by and in behalf of the several defendants that they never engaged in any such conduct.").

The Court did not overlook Plaintiff's argument that a jury could reasonably find that Thompson and Ziegler's communications to IronPlanet amount to veiled threats because they implicitly conditioned the outcome of ongoing negotiations on IronPlanet's termination of its relationship with Plaintiff. There are (at least) four problems with this argument.

First, with respect to Ziegler, the summary judgment evidence establishes that Mr. Hoeft's email was sent on behalf of CAS, not Ziegler. Thus, any alleged threat in that email cannot be attributable to Ziegler.

Second, no one at IronPlanet viewed these communications as threats (veiled or otherwise), and based on the substance and context of the communications, it would require a stacking of inferences and/or pure speculation to find them to be **[*19]** boycott threats.

Third, there is no evidence that there was an agreement between Thompson and Ziegler to threaten not to deal with IronPlanet, and it is well established that an independent decision not to do business with someone is not an antitrust violation.

Fourth, it is undisputed that before the events giving rise to this case, Ziegler did not consign equipment to IronPlanet, so a threat from Ziegler to withhold consignments in the future would not have changed the existing status quo or been a real threat.

In sum, on this record, no reasonable jury could find that Defendants individually threatened to boycott IronPlanet if it did not terminate its relationship with Plaintiff. Accordingly, there is no parallel conduct from which the jury could possibly infer the existence of a conspiracy.

Without parallel conduct, the Court need not consider whether the "plus factors" identified by Plaintiff tend to show that Defendants' conduct is more probative of a conspiracy than conscious parallelism. However, for sake of completeness, the Court will address the plus factors below.

Plaintiff identifies six "plus factors" to show that the boycott threats that Defendants allegedly made to IronPlanet **[*20]** are more indicative of a conspiracy than individual action or conscious parallelism: (1) context, (2) uniformity of conduct, (3) common motive to conspire, (4) actions against self-interest, (5) evidence implying a traditional conspiracy, and (6) compliance transparency. Each will be discussed in turn.

First, Plaintiff alleges that the context in which the communications were made is a plus factor. However, the considerations cited by Plaintiff in support of this contention are unconvincing.

The timing of the communications amongst Defendants after they became aware of the IronPlanet deal does not tend to show a conspiracy and exclude independent action because it would be natural for industry players who communicate regularly (both professionally and socially) to discuss new developments in the industry at the time those developments transpire. Moreover, the fact that high-level executives were aware of and may have discussed IronPlanet is unsurprising (and not indicative of a conspiracy) because the relationship between IronPlanet and Plaintiff injected an entirely new business model into the industry.

Likewise, the speed at which IronPlanet switched from devoting resources to build **[*21]** up a website for Plaintiff's sales to taking the website down does not tend to show the existence of a conspiracy rather than independent parallel action. Those actions were taken by IronPlanet, not any of the alleged conspirators, and there is simply no evidence from which it could be inferred that the reason IronPlanet took these actions as quickly as it did is because of a conspiracy rather than independent parallel action. Additionally, it is noteworthy that IronPlanet's actions were not inconsistent with its post hoc explanation that (1) continued devotion of substantial time and resources to a website for Plaintiff was not a fruitful endeavor because the website only generated one sale in the month that it was operational; (2) IronPlanet wanted to expeditiously stop its inefficient use of limited resources and devote more time and money to other initiatives, such as the potentially more lucrative CAS merger; and (3) the juxtaposition of new and used equipment on its website was confusing buyers.

Finally, the threat posed by Plaintiff to the alleged conspirators is speculative at best, given the low volume of sales that actually resulted while the its partnership with IronPlanet **[*22]** was in existence and the novelty and lack of proven success of Plaintiff's proposed business model.

Thus, the context in which the communications and related actions occurred do not tend to make the alleged (but unproven) parallel action more likely to indicate conspiracy than lawful conscious parallelism.

Second, Plaintiff identifies "uniformity of conduct" as a plus factor. However, it seems that the similarity of Defendants' conduct is effectively subsumed within the parallel conduct element of the alleged antitrust violation, because the conduct would have to be sufficiently uniform to qualify as parallel. Although the record shows uniform conduct at a high level of generality, Defendants' conduct was not *so* similar as to portend collusion rather than independent action. For example, Ring Power's alleged boycott threat was not made in the context of ongoing negotiations, as was the case with the threats allegedly made by Thompson and Ziegler; and, Ziegler's alleged threat was in the context of negotiations on the CAS merger, not the sale of equipment as was the case with Thompson's alleged threat. Moreover, the fact that Defendants reacted similarly (by seeking additional information **[*23]** about an understandable concern created by a potential "sea change" in the industry) is at least equally consistent with parallel independent action as it is to the existence of a conspiracy. *See* *Quality Auto, 917 F.3d at 1267* (uniformity of conduct suggestive of agreement only if it "would not plausibly arise from 'independent responses to common stimuli'" (quoting *Twombly, 550 U.S. at 556 n.4*)).

Third, Plaintiff asserts that Defendants were motivated by a desire to eliminate a competitor to maintain their own profits. However, under the circumstances, the particular communications at issue are at least as indicative of a good business practice (curiosity and concern about changes in their industry) than of a group boycott conspiracy designed to eliminate a competitor. *See* *Anderson News, 899 F.3d at 112*. Moreover, because the motive behind most (if not all) anticompetitive agreements is ultimately to protect profits, labelling that common motive a "plus factor" is not particularly helpful to the analysis. *See* *Parker Auto Body Inc. v. State Farm Mut. Auto. Ins. Co., 171 F. Supp. 3d 1274, 1283 (M.D. Fla. 2016)*; *see also* *Quality Auto, 917 F.3d at 1263 n.14* ("This plus factor is more properly invoked in contexts where the motive is unique and specific to the alleged conspirators.").

Fourth, Plaintiff identifies "actions against self-interest" as a plus factor, asserting that Defendants stood to lose money **[*24]** by withholding consignments from IronPlanet. Putting aside that this factor would not squarely apply to Ziegler because the summary judgment evidence shows that it had never listed equipment on IronPlanet prior to the events giving rise to this case, the evidence establishes that IronPlanet was not the only viable auction service that could be used to sell heavy construction equipment. Moreover, because common sense dictates that the price Defendants would have been able to get for their *used* equipment may have decreased if cheaper *new* equipment was being sold on the same website, it would not necessarily have been against their self-interest not to consign their used equipment to IronPlanet if it was also selling the new Chinese-manufactured equipment distributed by Plaintiff. Thus, even when viewing the evidence in the light most favorable to Plaintiff, any conclusion as to whether boycotting IronPlanet would have been against Defendants' individual economic interests would be purely speculative.

Fifth, Plaintiff points out the volume of frequent communications between Defendants and IronPlanet and argues that the timing and circumstances surrounding their communications is a plus **[*25]** factor because it is indicative of a traditional conspiracy. However, considering that the case appears to turn on only a mere handful of calls and emails over the course of several days, the volume and frequency of these communications seems unremarkable, particularly given that the parties communicated fairly regularly anyway. And regardless, this factor cannot overcome the lack of any evidence that those communications contained or constituted parallel threats. Stated another way, in the face of evidence indicating that the communications to IronPlanet were not threatening in nature, it would be implausible and unreasonable to infer that the timing or frequency of the communications amongst Defendants somehow renders them unlawful.

The issue is not whether Defendants communicated with each other. Rather, the issue is whether any of the communications show that Defendants agreed to threaten IronPlanet with a boycott if it did not terminate its relationship with Plaintiff.

The summary judgment evidence establishes that at least Ring Power and Thompson had communications with each other during the pertinent timeframe of March and April 2014. However, the evidence also shows that it was **[*26]** not uncommon for Defendants to communicate with each other regarding the sale of used equipment or other legitimate business matters. Moreover, even if Plaintiff is correct that the communications were more frequent than normal during the pertinent timeframe, that would not be enough to show collusion without evidence of the substance of the communications. *See* *In re Fla. Cement & Concrete Antitrust Lit., 746 F. Supp. 2d 1291, 1316 (S.D. Fla. 2010)* (close relationships and telephonic communications among defendants were merely an opportunity to conspire, and were not enough to show conspiracy); *Nichols Motorcycle Supply Inc. v. Dunlop Tire Corp., 913 F. Supp 1088, 1117-18 (N.D. Ill. 1995)* ("The telephone calls, although significant with respect to the time period in which they were made and the context in which they occurred, do not provide any evidence of a horizontal conspiracy because there is no testimony indicating who called whom or what was said during those conversations."); *see also* *Williamson Oil, 346 F.3d at 1319* ("'[T]he mere opportunity to conspire among antitrust defendants does not, standing alone, permit the inference of conspiracy.' ... [T]he opportunity to fix prices without any showing that [the defendants] actually conspired does not tend to exclude the possibility that they did not avail themselves of such opportunity ...." (quoting *Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1456 (11th Cir. 1991)*)).

Here, there is simply no evidence from **[*27]** which a reasonable jury could find that the substance of the communications amongst Defendants involved Plaintiff or an agreement to threaten IronPlanet with a boycott. Although those involved in the communications amongst Defendants did not recall the precise substance of most of the communications (other than that some of the communications between Ring Power and Thompson employees involved the potential sale of particular piece of equipment), they all consistently testified that the communications did not involve a plan to threaten IronPlanet with a boycott over its relationship with Plaintiff. The record contains no evidence to the contrary, and it is well established that ***HN11***[] a plaintiff cannot defeat a summary judgment motion "by merely asserting that the jury might, and legally could, disbelieve the defendant's denial of a conspiracy." *See* *Anderson, 477 U.S. at 256*.

In sum, although evidence of the communications amongst Defendants (and the other alleged conspirators) shows that Defendants had opportunity to formulate an agreement to threaten IronPlanet with a boycott, it does not support an inference that they did so because the summary judgment evidence also shows that Defendants communicated regularly **[*28]** (and did so here) for legitimate purposes, such as negotiating deals for used equipment. *See* *Seagood Trading Corp., 924 F.2d at 1574* ("[W]hen the defendant puts forth a plausible, procompetitive explanation for his actions, [the Court] will not be quick to infer, from circumstantial evidence, that a violation of the antitrust laws has occurred.").

Sixth, Plaintiff lists "compliance transparency," or the ability to monitor or enforce a conspiracy, as a plus factor. *See* *In re Urethane Antitrust Lit., 768 F.3d 1245, 1265 (10th Cir. 2014)* (finding evidence of collusion in the price-fixing context when "defendant companies monitored one another to prevent cheating and to discipline any supplier that was found cheating"). In support, Plaintiff points to evidence that Defendants and other alleged conspirators individually monitored the IronPlanet website, and particularly Plaintiff's section of the website. This is unremarkable, considering that at least Ring Power and Thompson listed their equipment on IronPlanet, and that they and the other alleged conspirators were also likely to keep track of available inventory in order to strategize internally and set their own prices. Moreover, the entire public had the ability to view the website during the pertinent time period, and the fact that Defendants **[*29]** may have done so as well does not show that they were monitoring each other in order to discipline any alleged conspirator who did not conform to the alleged boycott threat. Thus, the fact that Defendants each monitored IronPlanet's website regularly does not tend to show that they acted collusively rather than independently.

In sum, even if there was sufficient evidence of parallel conduct to require consideration of whether any there were any "plus factors" that would tend to show that the parallel conduct was the result of a conspiracy rather than independent action or conscious parallelism, Defendants would still be entitled to summary judgment based on the discussion above.[9] At the very least, based on the summary judgment evidence, Plaintiff has not "remove[d] [its] evidence from the realm of equipoise" such that it is "more probative of conspiracy than of conscious parallelism." *Williamson Oil, 346 F.3d at 1301*. Stated another way, the summary judgment evidence does not tend to exclude the possibility that Defendants acted independently and is "as consistent with permissible competition as with illegal conspiracy." *Matsushita Elec., 475 U.S. at 588*.

Accordingly, because there is no direct or circumstantial evidence that Defendants engaged in **[*30]** a conspiracy to exclude Plaintiff from the heavy construction equipment sales market by threatening to boycott IronPlanet if it did not terminate its relationship with Plaintiff, Defendants are entitled to judgment as a matter of law on the *Sherman Act* claims in Counts 1 and 2 of the amended complaint.

Tortious Interference (Counts 3 and 4)

The tortious interference claims are based on the same general premise as the antitrust claims—i.e., Defendants' threats to boycott IronPlanet if it continued its relationship with Plaintiff caused IronPlanet to terminate the relationship. The parties disagree as to what law governs these claims (North Carolina, Illinois, or Florida), but the Court need not resolve that dispute because the parties agree that there are no material differences in the applicable laws of those states. The Court will cite to Florida law because that is what it is more familiar with.

---

[9] Even if the Court considered Plaintiff's untimely and unauthorized expert declaration (Doc. 376-107), the outcome would be the same. The "plus factors" discussed in the declaration are (1) motive to conspire, (2) actions against independent self-interest, (3) evidence of a traditional conspiracy, and (4) compliance transparency. The discussion of the first factor is unhelpful because, like an opportunity to conspire, the fact that defendants have a motive to conspire does not tend to show that they did so. The discussion of the second factor is irrelevant because it focuses on actions by IronPlanet that were against its self-interest, not actions of the alleged conspirators (i.e., Defendants) that were against their self-interests. The discussion of the third and fourth factors is effectively legal argument masquerading as an expert opinion that was fully considered (and rejected) in the Court's consideration of the "plus factors" identified by Plaintiff in its response in opposition.

HN12[] "Four elements are required to establish tortious interference with a contractual or business relationship: (1) the existence of a business relationship or contract; (2) knowledge of the business relationship or contract on the part of the defendant; (3) an intentional and unjustified interference with **[*31]** the business relationship or procurement of the contract's breach; and (4) damage to the plaintiff as a result of the interference." *Howard v. Murray, 184 So. 3d 1155, 1166 (Fla. 1st DCA 2015)* (citing *Tamiami Trail Tours, Inc. v. Cotton, 463 So. 2d 1126, 1127 (Fla. 1985)*). Defendants do not contest the first or fourth elements,[10] but they argue that there is no evidence from which a reasonable jury could find in Plaintiff's favor on the second or third elements. The Court agrees in part.

With respect to the second element, it is undisputed that Ring Power and Thompson had knowledge of the agreement between IronPlanet and Plaintiff because they specifically asked IronPlanet about it. However, Ziegler argues that the summary judgment evidence fails to establish that it was aware that Plaintiff had a contract with Plaintiff. This argument is unpersuasive because it is undisputed that Ziegler (through its president and CEO, Mr. Hoeft) at least knew that IronPlanet and Plaintiff had some sort of "business relationship," which is all that is necessary to prove the second element. *See* *Howard, 184 So.3d at 1166*; *Restatement (Second) of Torts § 766 cmt. i*.

With respect to the third element, Defendants argue that there is no evidence from which a jury could find that they intentionally and unjustifiably interfered with the business relationship between IronPlanet and Plaintiff or induced **[*32]** IronPlanet to breach its agreement with Plaintiff. The Court agrees.

Specifically, as to Ring Power, there is no evidence from which a reasonable jury could find that it intentionally interfered with the agreement between IronPlanet and Plaintiff because, as discussed above in connection with the antitrust claims, the summary judgment evidence fails to show that Ring Power threatened to boycott IronPlanet as Plaintiff claims. Rather, all of the nonspeculative evidence of record shows that the communications Ring Power had with IronPlanet concerning Plaintiff were nothing more than inquires to "find out what is going on" that did not contain or imply (and were not received as) a boycott threat. Thus, Ring Power is entitled to summary judgment on the tortious interference claims against it.[11]

Likewise, as to Thompson, the summary judgment evidence fails to establish that it threatened to boycott IronPlanet if it did not terminate its agreement with Plaintiff. However, even if the communications between Messrs. Lindley and Winnette could be construed as a veiled threat that Thompson would not consign the equipment that was under negotiation to IronPlanet without confirmation from IronPlanet **[*33]** that its deal with Plaintiff had been "suspended," that threat would not be actionable because Thompson was justified in not dealing (or threatening not to deal) with IronPlanet under the circumstances. *See* *Restatement (Second) Torts § 766 cmt. l* ("A's aversion to C is as legitimate a reason for his refusal to deal with B as his aversion to B. If he is merely exercising that freedom, he is not liable to C for the harm caused by B's choice not to lose A's business for the sake of getting C's."); *see also* *Genet Co. v. Annheuser-Busch, Inc., 498 So.2d 683, 684 (Fla. 3d DCA 1986)* ("[T]here can be no claim [for tortious interference] where the action complained of is undertaken to safeguard or promote one's financial or economic interest."). Furthermore, the undisputed evidence establishes that Thompson's concern about the status of the relationship between IronPlanet and Plaintiff was motivated by its legitimate business interests (a concern that its used equipment would sell for less if IronPlanet's website also listed Plaintiff's new equipment), rather than malice. *See* *Menendez v. Beech Acceptance Corp., 521 So.2d 178, 180 (Fla. 3d DCA 1988)* ("[C]onduct engaged in [to protect a competing financial interest], even if tinged with animosity and malice, does not give rise to a cause

---

[10] It is undisputed that Plaintiff and IronPlanet had a business relationship (first element), and the issue of damages (fourth element) was deferred until Phase 2 of the case.

[11] Based on this disposition, the Court need not consider Ring Power's alternative argument that any alleged interference would have been "privileged" because it was a minority owner of IronPlanet. *See* *Bridge Fin., Inc. v. J. Fischer & Assocs., Inc., 310 So. 3d 45, 50 (Fla. 4th DCA 2020)* (holding that "because [the defendant] was a partial [5%] owner in [the plaintiff], he was not a stranger to a business relationship, and thus cannot be held liable for tortious interference"). Likewise, the Court need not consider Plaintiff's argument that Ring Power should not be allowed to assert this privilege defense now because it did not raise it in its answer.

of action for interference with a contractual relationship."); *McCurdy v. Collis, 508 So.2d 380, 383 (Fla. 1st DCA 1987)* (noting that the privilege **[*34]** to interfere is only negated "when malice is the sole basis for interference" (emphasis added)). Thus, Thompson is entitled to summary judgment on the tortious interference claims against it.

Finally, as to Ziegler, the summary judgment evidence establishes that Mr. Hoeft's email asking to "better understand th[e] relationship" between IronPlanet and Plaintiff was sent on behalf of CAS, not Ziegler. But, even if the email could be construed to have been sent on behalf of Ziegler, it did not contain or imply (and was not received as) a boycott threat. Additionally, even if that communication was somehow construed as a threat by Ziegler not to use IronPlanet to sell equipment in the future because of IronPlanet's dealings with Plaintiff, that would not be actionable because Ziegler, like Thompson, was free to independently decide who to deal with based on its own business interests. Thus, Ziegler is entitled to summary judgment on the tortious interference claims against it.

Accordingly, because the summary judgment evidence establishes that Defendants did not intentionally or unjustifiably interfere with Plaintiff's business relationship with IronPlanet, Defendants are entitled to judgment **[*35]** as a matter of law on the tortious interference claims in Counts 3 and 4 of the amended complaint.

Conclusion

In sum, although a reasonable jury could find that IronPlanet was "pressured" into terminating its relationship with Plaintiff, there is simply no evidence (direct or circumstantial) from which a jury could find that the dealer defendants named in this case were responsible for exerting that pressure, much less that they unlawfully entered into an agreement to do so. Accordingly, it is

ORDERED that Defendants' motions for summary judgment (Docs. 358, 359, 361) are **GRANTED**. The Clerk shall enter judgment in favor of Defendants and close the case file.

DONE and ORDERED this 23rd day of December, 2021.

LexisNexis® Headnotes

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Balance of Hardships

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Likelihood of Success

HN1[] **Grounds for Injunctions, Balance of Hardships**

Preliminary injunctions are an extraordinary remedy never awarded as of right. A plaintiff seeking a preliminary injunction must establish that he or she is likely to succeed on the merits, that he or she is likely to suffer irreparable harm in the absence of preliminary relief, that the balance of equities tips in his or her favor, and that an injunction is in the public interest. In the Ninth circuit, a plaintiff may also obtain a preliminary injunction under a sliding scale approach by raising serious questions' going to the merits of plaintiff's claims and showing that the balance of hardships tips sharply in his or her favor. In all cases, at an irreducible minimum, the party seeking an injunction must demonstrate a fair chance of success on the merits, or questions serious enough to require litigation. Because of this importance, when a plaintiff has failed to show the likelihood of success on the merits, we need not consider the remaining three elements.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Constitutional Law > ... > Case or Controversy > Standing > Elements

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN2[] **Standing, Burdens of Proof**

Regarding standing under U.S. Const. art. III, federal courts have the power to decide legal questions only in the presence of an actual Case or Controversy. If a plaintiff invokes federal jurisdiction, they bear the burden of showing that they have suffered an injury in fact that is fairly traceable to the conduct being challenged and which will likely be redressed by a favorable decision. Standing to sue under U.S. Const. art. III must be supported in the same way as any other matter on which the plaintiff bears the burden of proof, i.e., with the manner and degree of evidence required at the successive stages of the litigation.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN3[] **Standing, Burdens of Proof**

Regarding standing at the preliminary injunction stage, plaintiffs must make a clear showing of each element of standing. When there are multiple plaintiffs, the presence of one plaintiff with standing assures that the controversy before the Court is justiciable.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN4[] **Injunctions, Preliminary & Temporary Injunctions**

A trial court may give even inadmissible evidence some weight in a preliminary injunction analysis.

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN5[] **Standing, Elements**

Regarding standing under U.S. Const. art. III, to be sure, standing is an ongoing inquiry and the need to satisfy the requirements of U.S. Const. art. III persists throughout the life of the lawsuit, with the later stages of the case requiring more of plaintiffs than is required at earlier stages.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN6[] **Injunctions, Preliminary & Temporary Injunctions**

The threshold inquiry in a preliminary injunction analysis is the plaintiff's likelihood of success.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN7[] **Cartels & Horizontal Restraints, Price Fixing**

In regard to proving a likelihood of success on a price fixing claim, it is certainly true that any combination which tampers with price structures is engaged in an unlawful activity.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN8[] **Sherman Act, Claims**

Regarding a claim of price fixing, when two partners set the price of their goods or services they are literally price fixing, but they are not per se in violation of the Sherman Act.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN9[] **Grounds for Injunctions, Irreparable Harm**

Regarding the irreparable harm inquiry in a preliminary injunction analysis, it is well established that a monetary injury is not normally considered irreparable.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

HN10[] **Injunctions, Preliminary & Temporary Injunctions**

Regarding the public interest factor in a preliminary injunction analysis, this factor looks at an injunction's impact on non-parties rather than parties.

Opinion

ORDER RE INJUNCTION

Re: Dkt. Nos. 19, 259

In this consumer antitrust action, Lisa McCarthy and twenty-six other plaintiffs allege that a number of banks and financial institutions have engaged in a conspiracy to fix the intra-bank interest rate known as the USD LIBOR. Dkt. No. 1. The gravamen **[*8]** of the complaint is that the LIBOR formula and procedures themselves, which have been publicly known since the 1980s, are inherently anticompetitive, and that defendants' participation in determining LIBOR is itself a conspiracy. In this respect, this case is entirely different from long-running litigation in other courts which alleged that banks and other financial institutions manipulated the submissions used to determine the LIBOR. *See Gelboim v. Bank of America Corp., 823 F.3d 759, 764 (2d Cir. 2016)* ("[i]t is alleged that the Banks colluded to depress LIBOR by violating the rate-setting rules" so that "the payout associated with the various financial instruments was thus below what it would have been" absent the manipulation). Plaintiffs are consumers of loans and credit cards with variable interest rates, and say they paid artificially inflated interest rates as a result of defendants' conduct.

Plaintiffs have filed a motion for preliminary and permanent injunction under *Federal Rule of Civil Procedure 65*, which asks that defendants be prohibited from, among other things, "continuing to engage in their price-fixing scheme" and "enforcing any financial instrument that relies in whole or in part on USD LIBOR." Dkt. No. 19 at iii. Plaintiffs also seek an order "voiding variable **[*9]** interest rate contracts for consumer loans which include LIBOR as a component of the variable interest rate." *Id.*

In a subsequent "application for an order to show cause why an injunction should not issue," Dkt. No. 259, plaintiffs again sought what is effectively the same relief. They asked the Court to issue "an order to show cause why defendants should not be enjoined and prohibited from continuing to engage in their LIBOR price-fixing scheme" and prohibited "from enforcing the LIBOR part of any financial instrument, including mortgages, student loans, credit cards, auto loans and lines of credit, that rely in whole or in part on USD LIBOR." *Id.* at 8. The OSC application also asks the Court to "declare void any agreement or contract for a variable interest rate consumer loan that includes USD LIBOR as a component of its variable interest rate," as well as "require that defendants post a bond to secure the return of their retail customers' price-fixed overpayments and a bond to cover the difference between the federal treasury rate and the LIBOR price-fixed rate." *Id.*

Because the injunction and OSC requests are virtually identical, the Court will resolve both in the *Rule 65* context. The requests **[*10]** are denied.

LEGAL STANDARDS

HN1[] "Preliminary injunctions are 'an extraordinary remedy never awarded as of right.'" *Michigan v. DeVos, 481 F. Supp. 3d 984, 990 (N.D. Cal. 2020)* (quoting *Winter v. NRDC, Inc., 555 U.S. 7, 24, 129 S. Ct. 365, 172 L. Ed. 2d 249 (2008)*). "'A plaintiff seeking a preliminary injunction must establish that he [or she] is likely to succeed on the merits, that he [or she] is likely to suffer irreparable harm in the absence of preliminary relief, that the balance of equities tips in his [or her] favor, and that an injunction is in the public interest.'" *Id. at 990-91* (quoting *Winter, 555 U.S. at 20*); *see also Garcia v. Google, Inc., 786 F.3d 733, 740 (9th Cir. 2015)* (same). "In our circuit, a plaintiff may also obtain a preliminary injunction under a 'sliding scale' approach by raising 'serious questions' going to the merits of plaintiff's claims and showing that the balance of hardships tips 'sharply' in his or her favor." *Michigan, 481 F. Supp. 3d at 991* (quoting *A Woman's Friend Pregnancy Res. Clinic v. Becerra, 901 F.3d 1166, 1167 (9th Cir. 2018)* and *Vanguard Outdoor, LLC v. City of Los Angeles, 648 F.3d 737, 740 (9th Cir. 2011)*).

"In all cases, at an 'irreducible minimum,' the party seeking an injunction 'must demonstrate a fair chance of success on the merits, or questions serious enough to require litigation.'" *Maffick LLC v. Facebook, Inc., No. 20-cv-05222-JD, 2020 U.S. Dist. LEXIS 162517, 2020 WL 5257853, at *1 (N.D. Cal. Sept. 3, 2020)* (quoting *Pimentel v. Dreyfus, 670 F.3d 1096, 1105-06 (9th Cir. 2012)* (cleaned up)); *see also Garcia, 786 F.3d at 740* ("The first factor under *Winter* is the most important -- likely success on the merits."). Because of this importance, when "a plaintiff has failed to show the likelihood of success on the merits, we need not consider the remaining three [*Winter* elements]." **[*11]** *Garcia, 786 F.3d at 740* (internal quotations and citations omitted).

DISCUSSION

I. ARTICLE III STANDING

Defendants say that plaintiffs lack Article III standing to sue. Dkt. No. 133 at 5-6. Consequently, the Court starts, as it must, with the justiciability of this controversy.

HN2[] Under Article III of the Constitution, federal courts have "the power to decide legal questions only in the presence of an actual 'Cas[e]' or 'Controvers[y].'" *Wittman v. Personhuballah, 578 U.S. 539, 543, 136 S. Ct. 1732, 195 L. Ed. 2d 37 (2016)*. Plaintiffs have invoked federal jurisdiction, and so they bear the burden of showing that they have "suffered an 'injury in fact'" that is "'fairly traceable' to the conduct being challenged" and which "will likely be 'redressed' by a favorable decision." *Id.* (quoting *Lujan v. Defenders of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*).

Standing to sue under Article III "must be supported in the same way as any other matter on which the plaintiff bears the burden of proof, *i.e.*, with the manner and degree of evidence required at the successive stages of the litigation." *Lujan, 504 U.S. at 561*. In this "very preliminary stage of the litigation," the Court will take into account the "allegations in [plaintiffs'] complaint and whatever other evidence they submitted in support of" their preliminary injunction motion. *Washington v. Trump, 847 F.3d 1151, 1159 (9th Cir. 2017)*.

HN3[] "At the preliminary injunction stage, plaintiffs must make a clear showing of each element of standing." **[*12]** *Townley v. Miller, 722 F.3d 1128, 1133 (9th Cir. 2013)* (citations omitted). When there are multiple plaintiffs, as is the case here, the presence of one plaintiff with standing "assures that [the] controversy before [the] Court is justiciable." *DOC v. United States House of Representatives, 525 U.S. 316, 330, 119 S. Ct. 765, 142 L. Ed. 2d 797 (1999)* (citing *Director, Office of Workers' Compensation Programs v. Perini North River Assocs., 459 U.S. 297, 303-05, 103 S. Ct. 634, 74 L. Ed. 2d 465 (1983)*).

Defendants' Article III objection is not well taken. The complaint alleges that plaintiffs are "consumers of variable interest rate loans"; "USD LIBOR is an unlawful rate regularly utilized as a component of the pricing in variable interest rate consumer loans by the defendants and their co-conspirators"; and plaintiffs "have been damaged and are threatened with damage in that they have paid and will pay anticompetitive rates in the future for variable interest rate loans." Dkt. No. 1 ¶ 4. On that score, plaintiff McCarthy filed a declaration attesting that she is "a consumer of variable interest rate loans, including a Capital One credit card with a variable interest rate tied to USD LIBOR." Dkt. No. 212-1 ¶ 2. The complaint also alleges that defendants conspired to fix the USD LIBOR rate with an agreed-upon formula that excluded the lowest submitted rates, and that a "reasonable estimate of the competitive price" is "the lowest rate submitted by the contributor banks, which is excluded **[*13]** by virtue of defendants' unlawful combination or conspiracy." Dkt. No. 1 ¶¶ 43, 45. Plaintiffs provided a declaration by Patricia Plonsker, a "financial analyst and management consultant specializing in interest rate risk for financial institutions," who states that "the impact of the US LIBOR price-fixing formula on US consumers is enormous" and has resulted in "excess overcharge interest accrued on outstanding loans." Dkt. No. 19-2 at 3 & ¶ 28.[1]

These factors amply establish plaintiffs' standing to sue under Article III. *HN5*[] To be sure, "[s]tanding is an ongoing inquiry" and the need to satisfy the requirements of Article III "persists throughout the life of the lawsuit," with the later stages of the case requiring more of plaintiffs than is required at this early stage. *Heeger v. Facebook, Inc., 509 F. Supp. 3d 1182, 1188 (N.D. Cal. 2020)* (citation omitted). But at this stage, plaintiffs are positioned to sue.

---

[1] nn1 Defendants' requests to strike Plonsker's declarations under *Federal Rule of Evidence 702*, Dkt. Nos. 135, 266, are denied without prejudice to possible consideration down the road. *HN4*[] A "trial court may give even inadmissible evidence some weight" in a preliminary injunction analysis. *Flynt Distributing Co., Inc. v. Harvey, 734 F.2d 1389, 1394 (9th Cir. 1984)*; *see also* *Johnson v. Couturier, 572 F.3d 1067, 1083 (9th Cir. 2009)*. The Court considered the Plonsker declaration at Dkt. No. 19-2 for the specific question of standing, but did not rely on any of Plonsker's declarations for the analysis of the preliminary injunction factors.

II. LIKELIHOOD OF SUCCESS

HN6[] The threshold inquiry under *Winter* is plaintiffs' likelihood of success. Plaintiffs state in the complaint two antitrust violations by defendants: (1) price fixing in violation of *Section 1 of the Sherman Act, 15 U.S.C. § 1*; and (2) a conspiracy to monopolize in violation of *Section 2 of the Sherman Act, 15 U.S.C. § 2*. Dkt. No. 1 ¶¶ 68-85. The injunction requests are based on the *Section 1* claim only, *see* Dkt. No. **[*14]** 19 at 1 & Dkt. No. 259 at 1, and so the merits inquiry focuses on that claim only. The question is whether plaintiffs have demonstrated a likelihood of success, or at the very least a serious question, on their *Section 1* claim that warrants the extraordinary remedy of a preliminary injunction.

They have not. The salient facts for this conclusion are largely undisputed. The parties agree that, since the mid-1980s, a group of banks have worked together to set a daily LIBOR rate. Dkt. No. 1 ¶¶ 32-33. To set the rate, each panel bank provided an answer to the question, "At what rate could you borrow funds, were you to do so by asking for and then accepting inter-bank offers in a reasonable market size just prior to 11 a.m.?" *Id.* ¶ 33. Since management of the LIBOR was handed over from the British Bankers' Association (BBA) to defendant Intercontinental Exchange Benchmark Administration Limited (IBA) in 2014, IBA has continued to solicit this input data from panel banks. *Id.* ¶¶ 36-38. IBA then calculates LIBOR "using a trimmed arithmetic mean" in which "the highest and lowest quartiles of submissions are excluded" and "[a] mean is calculated from the remaining middle quartiles, rounded to five decimal **[*15]** places." *Id.* ¶ 43.

The setting of the daily LIBOR is subject to regulatory oversight. The Financial Conduct Authority (FCA), a creature of U.K. law, is charged with "regulat[ing] LIBOR and supervis[ing] both LIBOR submitters and its administrator." Dkt. No. 133 at 8. The parties agree that the FCA is in the process of phasing LIBOR out. *See* Dkt. No. 212 (plaintiffs' reply brief) at 8 ("Defendants have pledged to sunset the LIBOR formula by the end of 2023"); Dkt. No. 133 (defendants' opposition brief) at 1 ("The global financial community has been carefully planning for the eventual transition from LIBOR to alternative benchmarks through a phase-out process supervised by financial regulators and central banks.").

The parties do not dispute the nearly universal use of the LIBOR rate in the banking world. The complaint alleges that the rate is "used by an estimated US $350 trillion . . . of outstanding contracts in maturities ranging from overnight to more than 30 years." Dkt. No. 1 at 3. Defendants make the same point to the effect that an injunction against "continuing to set or observe LIBOR" would "massively disrupt global financial markets, causing grave uncertainty regarding rights **[*16]** and obligations under contracts that reference LIBOR." Dkt. No. 133 at 12.

Plaintiffs say they have demonstrated a likelihood of success on the merits by virtue of a single United States Supreme Court decision of an older vintage: *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*. That is in effect the entirety of plaintiffs' legal argument. *See* Dkt. No. 19 at 2 ("Plaintiffs' success on the merits is manifest" under *Socony*); *see also id.* at 9-10 (same). Much of plaintiffs' argument simply hurls block quotes from *Socony* like projectiles from a catapult, because plaintiffs "believe that the simple statements by the Supreme Court, which are clear, concise and cogent, are more persuasive than any arguments that anyone else could make." Dkt. No. 288 at 2-4.

This almost exclusive reliance on *Socony* is misplaced. ***HN7***[] It is certainly true that "[a]ny combination which tampers with price structures is engaged in an unlawful activity." *Socony, 310 U.S. at 221*. But plaintiffs' insistence that the merits analysis should stop with a highly general and undisputed proposition of ***antitrust law*** plucked from *Socony* is not correct. To start, plaintiffs overlook the distinguishing fact that *Socony* was a criminal case where the defendants were convicted at trial of a conspiracy that was "not to be found in any **[*17]** formal contract or agreement." *Id. at 177*. In addition, legal developments in the 81 years since *Socony* was published cast considerable doubt on plaintiffs' rather mechanical analysis. In *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 9, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*, the Supreme Court expressly stated that the question was not "simply [one] of determining whether two or more potential competitors have literally 'fixed' a 'price.'" The Court cautioned that "[l]iteralness is overly simplistic and often overbroad. ***HN8***[] When two partners set the price of their goods or services they are literally 'price fixing,' but they are not *per se* in violation of the Sherman Act." Broadcast Music, 441 U.S. at 9. In Texaco Inc. v. Dagher, 547 U.S. 1, 6, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006), the Court again underscored that the defendants' "pricing policy may be price fixing in a literal sense," but "it is not price fixing in the antitrust sense."

Plaintiffs did not engage with these developments, and simply pound Socony to say that price fixing is illegal. *See, e.g.*, Dkt. No. 288 at 1. This will not do for present purposes. To be sure, the Court embraces the proposition that horizontal price fixing is a *per se* violation of the Sherman Act Section 1. *See* United States v. Florida, No. 4:14-cr-00582-JD, 2017 U.S. Dist. LEXIS 58426, 2017 WL 1374599, at *2 (N.D. Cal. Apr. 17, 2017). But that does not mean that simply adding the LIBOR formula to this legal principle amounts to proof that plaintiffs are entitled to immediately **[*18]** void $350 trillion dollars' worth of contracts on a preliminary basis, especially when the Supreme Court has repeatedly cautioned since Socony that the antitrust laws should not be applied in such a rote manner.

Overall, plaintiffs have not carried their burden of establishing a likelihood of success sufficient to warrant the extraordinary relief of a preliminary injunction. Even if plaintiffs were said to have raised a serious question about the Section 1 claim, an injunction would still be unwarranted because they have failed to satisfy the other Winter factors.[2]

III. IRREPARABLE HARM, BALANCE OF THE EQUITIES, AND THE PUBLIC INTEREST

Plaintiffs have not established an imminent threat of irreparable harm. ***HN9***[] The injury plaintiffs claim is that they paid too much in interest rates, but "[i]t is well established . . . that such monetary injury is not normally considered irreparable." Maffick, 2020 U.S. Dist. LEXIS 162517, 2020 WL 5257853, at *3 (quoting Los Angeles Memorial Coliseum Comm'n v. Nat'l Football League, 634 F.2d 1197, 1202 (9th Cir. 1980)). Plaintiffs also acknowledge that the LIBOR formula and procedures they attack have been publicly known and in continuous use since the 1980s. Dkt. No. 19 at 4. Why these well-known, decades-old practices are suddenly ripe for emergency relief in 2021 is not explained. This delay further undermines a claim of irreparable **[*19]** harm. *See* Cal. Physicians Serv., Inc. v. Healthplan Servs., Inc., No. 3:18-cv-03730-JD, 2021 U.S. Dist. LEXIS 44170, 2021 WL 879797, at *7 (N.D. Cal. Mar. 9, 2021).

The "balance of equities" does not tip in plaintiffs' favor. *See* Winter, 555 U.S. at 24-31. Other than plaintiff McCarthy, none of the plaintiffs have demonstrated that they are paying a variable interest rate that is tied to LIBOR. Dkt. No. 212-2 - 212-8. Consequently, the hardship to plaintiffs is, on the whole, minor and purely monetary. In contrast, defendants have established that if the Court were to enjoin LIBOR across the board, as plaintiffs propose, substantial and possibly catastrophic consequences would ensue in the global financial market. *See* Dkt. No. 133 at 14-15; Dkt. No. 136. Plaintiffs did not contest this showing.

For the same reason, the public interest factor weighs heavily against plaintiffs. ***HN10***[] This factor looks at an injunction's "impact on non-parties rather than parties." Bernhardt v. L.A. Cnty., 339 F.3d 920, 931 (9th Cir. 2003) (citation omitted). An amicus brief filed by the Chamber of Commerce of the United States of America and others demonstrates that the injunction plaintiffs request would "inject great uncertainty into financial transactions, pose systemic risks to the financial system, and leave parties to millions of contracts without a mechanism to calculate their payment obligations." Dkt. No. 214-1 at 1. Another amicus **[*20]** brief filed by the Federal Reserve Bank of New York and the Board of Governors of the Federal Reserve System also establishes that an "abrupt end to LIBOR without an orderly transition would be detrimental to the public interest with consequences that could include . . . upending consumer contracts, including mortgages and student loans." Dkt. No. 282-1 at 1. Plaintiffs rather glibly dismiss these serious concerns by saying that "[f]inancial disasters are irrelevant in price fixing cases." Dkt.

[2] nn2 Because plaintiffs' merits showing is lacking, the Court need not resolve defendants' other "likelihood of success" arguments, such as antitrust standing or personal jurisdiction. Dkt. No. 133 at 6-7, 9-10. Those issues will be addressed as warranted at a later stage of the case.

No. 318 at 1. Not so under *Winter*. The public interest factor is a critical component of a preliminary injunction analysis, and plaintiffs have failed to show that the public interest supports the injunction they have asked for.[3]

CONCLUSION

The motion for injunction and application for an order to show cause are both denied, Dkt. Nos. 19, 259, as are defendants' requests to strike and their evidentiary objection. Dkt. Nos. 135, 266, 292. The Financial Conduct Authority's motion for leave to file an amicus brief, Dkt. No. 349, is terminated as moot in light of this order. The motions to dismiss that were taken under submission, Dkt. No. 342, will be resolved in a separate order.

IT IS SO ORDERED.

Dated: **[*21]** December 23, 2021

/s/ James Donato

JAMES DONATO

United States District Judge

End of Document

[3] nn3 Defendants' objection to new reply evidence, Dkt. No. 292, is terminated as moot. The evidence objected to played no role in this order.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

To survive a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)*, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A court must accept as true the factual allegations contained in a complaint and draw all inferences in favor of a plaintiff. A complaint may be dismissed pursuant to *Rule 12(b)(6)* only where it appears that there are not enough facts to state a claim to relief that is plausible on its face. Plausibility requires enough facts to raise a reasonable expectation that discovery will reveal evidence of the alleged misconduct. The plausibility standard asks for more than a sheer possibility that a defendant has acted unlawfully. The pleading standard *Fed. R. Civ. P. 8* announces does not require detailed factual allegations, but it demands more than an unadorned, the-defendant-unlawfully-harmed-me accusation. Where a court is unable to infer more than the mere possibility of the alleged misconduct based on the pleaded facts, the pleader has not demonstrated that she is entitled to relief and the action is subject to dismissal.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN2[] Standing, Clayton Act

It is a well-established principle that, while the United States is authorized to sue anyone violating the federal antitrust laws, a private plaintiff must demonstrate standing. Antitrust standing is a threshold, pleading-stage inquiry and when a complaint, by its terms, fails to establish the requirement, a court must dismiss it as a matter of law. Plaintiffs must demonstrate antitrust standing whether they seek monetary or injunctive relief.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN3[] Standing, Requirements

A private plaintiff must show two elements to demonstrate antitrust standing: (1) it suffered a special kind of antitrust injury and that (2) it is a suitable plaintiff to pursue the alleged antitrust violations and thus is an efficient enforcer of the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN4[] Standing, Requirements

Generally, only those that are participants in the defendants' market can be said to have suffered antitrust injury. However, if a plaintiff is a market participant or satisfies the inextricably intertwined exception recognized by the U.S. Court of Appeals for the Second Circuit, then the court must employ the Second Circuit's three-part test for determining whether a plaintiff has alleged an antitrust injury: first, the party asserting that it has been injured by an illegal anticompetitive practice must identify the practice complained of and the reasons such a practice is or might be anticompetitive. Next, the court identifies the actual injury the plaintiff alleges, which requires it to look to the ways in which the plaintiff claims it is in a worse position as a consequence of the defendant's conduct. Finally, the court compares the anticompetitive effect of the specific practice at issue to the actual injury the plaintiff alleges. It is not enough for the actual injury to be causally linked to the asserted violation. Rather, in order to establish antitrust injury, the plaintiff must demonstrate that its injury is of the type the antitrust laws were intended to prevent and that flows from that which makes or might make defendants' acts unlawful.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN5[] Standing, Requirements

If a plaintiff clears the antitrust-injury hurdle, a court employs a four-factor test to determine whether the plaintiff is an efficient enforcer. The factors include: (1) the directness or indirectness of the asserted injury, (2) the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement, (3) the speculativeness of the alleged injury, and (4) the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries. The four factors need not be given equal weight: the relative significance of each factor will depend on the circumstances of the particular case.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN6[] **Per Se Rule & Rule of Reason, Sherman Act**

Section 1 of the Sherman Act makes it illegal to enter into a contract, combination, or conspiracy to restrain trade or commerce. 15 U.S.C.S. § 1. To establish a § 1 violation, a plaintiff must produce evidence sufficient to show: (1) a combination or some form of concerted action between at least two legally distinct economic entities; and (2) such combination or conduct constituted an unreasonable restraint of trade either per se or under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Sherman Act

HN7[] **Per Se Rule & Rule of Reason, Sherman Act**

In evaluating potential Sherman Act violations, courts employ two complementary categories of antitrust analysis. The first category includes agreements that are "illegal per se" because their nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality. The second category includes agreements whose competitive effect can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed. For that second category of analysis, courts apply the rule of reason. Per se violations include horizontal and vertical price-fixing; division of a market into territories; certain tying arrangements; and some group boycotts involving concerted refusals to deal with a competitor. A "group boycott" and a "refusal to deal" are analytically identical.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN8[] **Horizontal Refusals to Deal, Boycotts**

Precedent limits the per se rule in the boycott context to cases involving horizontal agreements among direct competitors. In other words, if there is no horizontal agreement among direct competitors, then there can be no group boycott and the per se rule is inapplicable.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN9[] Motions to Dismiss, Failure to State Claim

In considering a motion to dismiss for failure to state a claim pursuant to *Fed. R. Civ. P. 12(b)(6)*, a court may consider the following matters outside the four corners of the complaint: (1) documents attached as an exhibit to the complaint or answer, (2) documents incorporated by reference in the complaint, (3) documents that, although not incorporated by reference, are integral to the complaint, or (4) any matter of which the court can take judicial notice for the factual background of the case.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN10[] Standing, Requirements

To suffer antitrust injury, the putative plaintiff must be a participant in the very market that is directly restrained. Usually, that market is the one in which the defendant operates, such as when the plaintiff is a competitor or consumer of the defendant, but sometimes the defendant will corrupt a separate market in order to achieve its illegal ends, in which case the injury suffered can be said to be inextricably intertwined with the injury of the ultimate target. Regardless, antitrust injury is suffered by participants in the restrained market.

Antitrust & Trade Law > Sherman Act > Claims

HN11[] Sherman Act, Claims

At the first step of the Gatt analysis, plaintiffs need allege only that the defendants have engaged in unlawful anticompetitive conduct. The bar for such a showing is a low one. The second step requires the court to isolate and identify the plaintiffs' actual injury or the ways in which the plaintiff claims it is in a worse position as a consequence of the defendant's conduct.

Antitrust & Trade Law > Sherman Act > Claims

HN12[] Sherman Act, Claims

Gatt Step 2 is construed as having two requirements: (1) plaintiffs must plausibly allege violations of market-wide harm, or in other words, an injury to competition; and (2) plaintiffs must plausibly allege that they are worse off than it would be if the market were free of anticompetitive forces.

Antitrust & Trade Law > Sherman Act > Claims

HN13[] Sherman Act, Claims

At the third step of the Gatt analysis, plaintiffs must demonstrate that the defendants' anticompetitive behavior caused actual injury. In other words, the nature of the plaintiffs' injury must be caused by the defendants' anticompetitive actions and not by something else.

Antitrust & Trade Law > Sherman Act > Claims

HN14[] Sherman Act, Claims

Directness in the antitrust context means close in the chain of causation. That factor turns on principles of proximate causation.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN15[] **Standing, Requirements**

The second factor to determine whether an antitrust plaintiff is an efficient enforcer simply looks for a class of persons naturally motivated to enforce the antitrust laws. Inferiority to other potential plaintiffs can be relevant, but it is not dispositive.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN16[] **Remedies, Damages**

Under the third factor to determine whether an antitrust plaintiff is an efficient enforcer, a court asks whether there would be a high degree of speculation in a damages calculation. The fourth factor traditionally concerns the prospect of different groups of plaintiffs attempting to recover for the same exact injury. However, the potential difficulty in ascertaining and apportioning damages is not an independent basis for denying standing where it is adequately alleged that a defendant's conduct has proximately injured an interest of the plaintiff's that the statute protects. Moreover, at the motion to dismiss stage, any holding that the damages would be speculative is premature.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN17[] **Relevant Market, Geographic Market Definition**

Regardless of what standard applies, antitrust plaintiffs must articulate a relevant market. The relevant market is broadly defined as the area of effective competition, which is typically the arena within which significant substitution in consumption or production occurs. Market definition is ordinarily a deeply fact-intensive inquiry. Accordingly, courts often hesitate to grant motions to dismiss for failure to plead a relevant market. Still, where a plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products, the relevant market is legally insufficient and a motion to dismiss may be granted. Merely asserting that a commodity is in some way unique is insufficient to plead a relevant market.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Same Case & Controversy

HN18[] **Supplemental Jurisdiction, Pendent Claims**

28 U.S.C.S. § 1367(c) provides that district courts may decline to exercise supplemental jurisdiction over a state law claim if the district court has dismissed all claims over which it has original jurisdiction Where any federal claims have been dismissed at a relatively early stage of litigation, courts often decline to exercise subject matter jurisdiction.

Counsel: **[*1]** For Kapildeo Singh, Plaintiff: Andrew J. Mollica, LEAD ATTORNEY, Office of Andrew J. Mollica, Garden City, NY; Alan Pincus, Sr., Allan Pincus, Holland, PA.

Opinion

MEMORANDUM-DECISION AND ORDER

I. INTRODUCTION

Plaintiffs Kapildeo **[*2]** Singh, Lawrence Dumain, Ira Wallach, Brian Wallach, Yves Sarrazin, Erlin Hill, Bruce Soulsby, and Alan Weisenberg bring this civil action against Defendants American Racing-Tioga Downs Inc. d/b/a as Tioga Downs Casino and Raceway ("Tioga"); American Racing-Vernon Downs Inc. d/b/a Vernon Downs Racetrack ("Vernon"); American Racing and Entertainment, LLC ("American Racing"); New Meadowlands Racetrack LLC d/b/a The Meadowlands Racetrack ("the Meadowlands") ("Tioga," "Vernon," and "the Meadowlands" collectively referred to as the "racetracks"), and Jeffrey R. Gural ("Gural"). See Dkt. No. 1 ("Complaint"). Presently before the Court is Defendants' motion to dismiss pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. See Dkt. Nos. 10 ("Motion to Dismiss"), 10-1 ("Defendants' Memorandum of Law"), 16 ("Opposition"), 17 ("Reply"), 19 ("Plaintiffs' Sur-Reply"), 20 ("Defendants' Sur-Reply"). For the reasons that follow, the Court grants the Motion to Dismiss.

II. BACKGROUND

A. Factual History

The following factual allegations contained in the Complaint are assumed to be true. See *Vega v. Hempstead Union Free Sch. Dist., 801 F.3d 72, 76 (2d Cir. 2015)*.

1. The Parties

Plaintiffs are/were owners of racing horses, including horses that they raced or intended to race at the racetracks. Compl. ¶ 19. Plaintiffs **[*3]** had ownership interests in horses they intended to race during the 2021 racing season at the racetracks. Id. ¶¶ 20, 23-24, 26-29, 31-32, 34, 36-37, 39-40. Additionally, Plaintiffs had business relationships with trainers to train their respective horses. Id. ¶¶ 22, 25, 30, 33, 35, 38, 41. Plaintiffs are licensed and in good standing in New York and New Jersey with the New York Gaming Board and the New Jersey Racing Commission. Id. ¶ 42. These licenses give Plaintiffs the ability to compete at the racetracks. Id. To participate in the harness racing industry, Plaintiffs need to have the ability to stable and train their horses, qualify their horses in sanctioned qualifying races, and have the ability to enter into races throughout the New York and New Jersey region. Id. ¶ 43. Furthermore, in order to race in the lucrative stakes program at the Meadowlands, Plaintiffs must make continuing payments to keep their horses eligible, and Plaintiffs made these payments in February 2021. Id. ¶¶ 44-45.

The racetrack defendants directly solicit horse owners and trainers from across the United States and internationally to compete in their stake's races. Id. ¶ 46. These racetracks allegedly comprise **[*4]** a significant share of the harness racing market in the Northeastern United States. Id. ¶ 47. Tioga, Vernon, and the Meadowlands are direct competitors of each other and are separate entities even though they have some common ownership. Id. ¶¶ 49, 51-53.

Defendant Gural is the CEO of American Racing and President of Meadowlands. Id. ¶¶ 14-15. Gural possesses an ownership interest in the racetracks and American Racing, and also owns interests in a number of horses that he races at the above race tracks. Id. ¶¶ 28, 54.

2. Allard Situation and Boycott

Rene Allard is a horse trainer who is currently under investigation and indictment, and as a result of this indictment, Allard does not train horses for racing at any race track. Id. ¶ 57. Pursuant to an agreement with the U.S. Department of Justice, Allard was permitted to work with horses at a stable in Florida provided that the horses are not intended to participate in races. Id. ¶ 58. Plaintiffs allege that Gural used this information as a pretext to reduce his competition by excluding Plaintiffs and others from competing in races at the race tracks. Id. ¶ 59. On March 6, 2021, Gural issued a statement on behalf of Tioga, Vernon, and the **[*5]** Meadowlands:

> The Meadowlands, Tioga & Vernon Downs will exclude any horse being trained or that has been trained in [Rene Allard's Florida] stable in any stake and is actively investigating who owns the horses that are or have been in his stable this winter.
>
> Those owners who currently have or have had horses in Allard's stable this winter are advised that all horses owned wholly or in part by them will be excluded from participation in all Meadowlands, Tioga & Vernon Downs races and that all of horses owned wholly or in part by them will be deemed ineligible to for any/all Meadowlands, Tioga & Vernon Downs administered stakes races for a minimum of three years.
>
> If owners affected by the above are a minority partner on horses with owners that are not affected by the above and are being trained by accepted trainers, they must legitimately divest their interest in those horses, which will be required to be done and demonstrated to the satisfaction of The Meadowlands before the March 15 stakes payments will be accepted on those horses.

Id. ¶ 60; Compl. Ex. A ("March 6th Statement").

Plaintiffs allege that they and other owners were subject to the terms of the March 6th Statement because some **[*6]** horses they had interests in were stabled by Allard. Compl. ¶ 62. This was the case even if Plaintiffs had no intention of racing the horses stabled by Allard. Id. ¶ 63. Plaintiffs further contend that the March 6th Statement's ban was not equally enforced. Id. ¶¶ 66-67. No further stakes payments were accepted for Plaintiffs' horses and the payments they had already made were forfeited. Id. ¶ 68. Plaintiffs had to quickly sell their interests in their horses below market value, and Plaintiffs continue to not be allowed to compete at the tracks for the next three years. Id. ¶¶ 69-70.

Plaintiffs allege the following: (1) group boycott in violation of *15 U.S.C. § 1*; (2) group boycott in violation of *New York General Business Law § 340*; and (3) various tortuous interference with a contractual relationship claims. Id. ¶¶ 72-204.

B. Procedural History

On August 23, 2021, Plaintiffs filed their Complaint against Defendants. See Compl. On October 27, 2021, Defendants filed their Motion to Dismiss. See Mot. to Dismiss. On November 24, 2021, after the parties submitted their initial briefing, the Court requested that the parties submit additional briefing on whether Plaintiffs have antitrust standing. See Dkt. No. 18. The parties promptly filed **[*7]** their sur-replies. Pls.' Sur-Reply; Defs.' Sur-Reply.

III. LEGAL STANDARD

A. *Rule 12(b)(6)* Motion to Dismiss

HN1[] To survive a motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, a "complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 663, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*); see also *Fed. R. Civ. P. 12(b)(6)*. A court must accept as true the factual allegations contained in a complaint and draw all inferences in favor of a plaintiff. See *Allaire Corp. v. Okumus, 433 F.3d 248, 249-50 (2d Cir. 2006)*. A complaint may be dismissed pursuant to *Rule 12(b)(6)* only where it appears that there are not "enough facts to state a claim to relief that is plausible on its face." *Twombly, 550 U.S. at 570*. Plausibility requires "enough fact[s] to raise a reasonable expectation that discovery will reveal evidence of [the alleged misconduct]." *Id. at 556*. The plausibility standard "asks for more than a sheer possibility that a defendant has acted unlawfully." *Iqbal, 556 U.S. at 678* (citing *Twombly, 550 U.S. at 556*). "[T]he pleading standard *Rule 8* announces does not require 'detailed factual allegations,' but it demands more than an unadorned, the-defendant-unlawfully-harmed-me accusation." Id. (citing *Twombly, 550 U.S. at 555*). Where a court is unable to infer more than the mere possibility of the alleged misconduct based on the pleaded facts, the pleader has not demonstrated that she is entitled **[*8]** to relief and the action is subject to dismissal. See *id. at 678-79*.

B. Antitrust Standing

HN2[] "It is a well-established principle that, while the United States is authorized to sue anyone violating the federal antitrust laws, a private plaintiff must demonstrate 'standing.'" *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 436 (2d Cir. 2005)*. In a recent opinion, the Second Circuit reiterated that "[a]ntitrust standing is a threshold, pleading-stage inquiry" and "when a complaint by its terms fails to establish this requirement we must dismiss it as a matter of law." *In re Am. Express Anti-Steering Rules Antitrust Litig., No. 20-1766, 19 F.4th 127, 2021 U.S. App. LEXIS 34626, 2021 WL 5441263, at *4 (2d Cir. Nov. 22, 2021)* (quoting *Gatt Commc'ns, Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 75 (2d Cir. 2013)*). Plaintiffs must demonstrate antitrust standing whether they seek monetary or injunctive relief. *Paycom Billing Servs., Inc. v. Mastercard Int'l, Inc., 467 F.3d 283, 290 (2d Cir. 2006)*.

HN3[] A private plaintiff must show two elements to demonstrate antitrust standing: (1) "it suffered a special kind of antitrust injury" and that (2) "it is a suitable plaintiff to pursue the alleged antitrust violations and thus is an efficient enforcer of the antitrust laws." *In re Am. Express Anti-Steering Rules Antitrust Litig., 2021 U.S. App. LEXIS 34626, 2021 WL 5441263, at *4* (quoting *Gatt Commc'ns, Inc., 711 F.3d at 76*) (internal quotation marks omitted)).

HN4[] "Generally, only those that are participants in the defendants' market can be said to have suffered antitrust injury." In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 158 (2d Cir. 2016). The Second Circuit has also recognized an "inextricably intertwined" exception. See id. at 158-63. If a plaintiff is a market participant or satisfies the "inextricably intertwined" **[*9]** exception, then the Court must employ the Second Circuit's three-part test for determining whether a plaintiff has alleged an antitrust injury:

> First, the party asserting that it has been injured by an illegal anticompetitive practice must identify the practice complained of and the reasons such a practice is or might be anticompetitive. Next, we identify the actual injury the plaintiff alleges . . . [which] requires us to look to the ways in which the plaintiff claims it is in a worse position as a consequence of the defendant's conduct. Finally, we compare the anticompetitive effect of the specific practice at issue to the actual injury the plaintiff alleges. It is not enough for the actual injury to be causally linked to the asserted violation. Rather, in order to establish antitrust injury, the plaintiff must demonstrate that its injury is of the type the antitrust laws were intended to prevent and that flows from that which makes or might make defendants' acts unlawful.

Gatt Commc'ns, Inc., 711 F.3d at 76 (alterations, citations, and internal quotation marks omitted).

HN5[] If a plaintiff clears the antitrust-injury hurdle, the Second Circuit employs a four-factor test to determine whether a plaintiff is an "efficient enforcer." **[*10]** The factors include: (1) "the directness or indirectness of the asserted injury," (2) "the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement," (3) "the speculativeness of the alleged injury," and (4) "the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries." IQ Dental Supply, Inc. v. Henry Schein, Inc., 924 F.3d 57, 65 (2d Cir. 2019). "These four factors need not be given equal weight: the relative significance of each factor will depend on the circumstances of the particular case." Id.

C. Section 1 of the Sherman Act[1]

HN6[] Section 1 of the Sherman Act makes it illegal to enter into a "contract, combination . . . or conspiracy" to restrain trade or commerce. 15 U.S.C. § 1. "To establish a [Section] 1 violation, a plaintiff must produce evidence sufficient to show: (1) a combination or some form of concerted action between at least two legally distinct economic entities; and (2) such combination or conduct constituted an unreasonable restraint of trade either per se or under the rule of reason." Tops Markets, Inc. v. Quality Markets, Inc., 142 F.3d 90, 95-96 (2d Cir. 1998).

A district court within the Second Circuit recently explained the difference between the per se and rule of reason approaches:

> HN7[] In evaluating **[*11]** potential Sherman Act violations, courts employ "two complementary categories of antitrust analysis." Nat'l Soc. of Prof'l Engineers v. United States, 435 U.S. 679, 692, 98 S.Ct. 1355, 55 L.Ed.2d 637 (1978). The first category includes agreements that are "illegal per se" because their "nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality." Id. The second category includes "agreements whose competitive effect can only be evaluated by analyzing the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed." Id. For this second category of analysis, courts apply the rule of reason. Bogan v. Hodgkins, 166 F.3d 509, 514 (2d Cir. 1999).

---

[1] Plaintiffs do not allege that Defendants violated Section 2 of the Sherman Act. The elements of a claim under Section 2 of the Sherman Act are: "(1) proof of a concerted action deliberately entered into with the specific intent to achieve an unlawful monopoly, and (2) the commission of an overt act in furtherance of the conspiracy." Int'l Distrib. Ctrs., Inc. v. Walsh Trucking Co., 812 F.2d 786, 795 (2d Cir. 1987) (internal quotation marks omitted). "A Section 1 violation is legally distinct from that under [Section] 2." Sitts v. Dairy Farmers of Am., Inc., 417 F. Supp. 3d 433, 464 (D. Vt. 2019) (quoting United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 224 n.59, 60 S. Ct. 811, 84 L. Ed. 1129) (internal quotation marks omitted).

PharmacyChecker.com, LLC v. Nat'l Ass'n of Boards of Pharmacy, 530 F. Supp. 3d 301, 343 (S.D.N.Y. 2021). "Per se violations include, for example, horizontal and vertical price-fixing; division of a market into territories; certain tying arrangements; and some group boycotts involving concerted refusals to deal with a competitor." Cap. Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 542-43 (2d Cir. 1993) (internal citations omitted). Plaintiffs allege that Defendants' actions amount to a group boycott and/or a refusal to deal. Compl. ¶ 73. However, a "group boycott" and a "refusal to deal" are "analytically identical." Concord Assocs., L.P. v. Ent. Properties Tr., No. 12-CV-1667, 2013 U.S. Dist. LEXIS 186964, 2014 WL 1396524, at *11 (S.D.N.Y. Apr. 9, 2014) (citing Intellective, Inc. v. Massachusetts Mut. Life Ins. Co., 190 F. Supp. 2d 600, 616 (S.D.N.Y. 2002)), aff'd, 817 F.3d 46 (2d Cir. 2016).

Moreover, the Supreme Court has said that **HN8**[] "precedent limits the per se rule in the boycott context to cases involving horizontal agreements **[*12]** [2] among direct competitors." NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 135, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998). The Second Circuit also clarified that "NYNEX . . . squarely held that a horizontal agreement is a prerequisite in a group boycott case." PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101, 110 (2d Cir. 2002). In other words, if there is no horizontal agreement among direct competitors, then there can be no group boycott and the per se rule is inapplicable. See Concord Assocs., L.P., 2013 U.S. Dist. LEXIS 186964, 2014 WL 1396524, at *11 (first citing Solent Freight Servs., Ltd. Inc. v. Alberty, 914 F. Supp. 2d 312, 320 (E.D.N.Y. 2012); and then citing Team Obsolete Ltd. v. A.H.R.M.A. Ltd., 216 F.R.D. 29, 38 (E.D.N.Y. 2003)).

IV. DISCUSSION

A. Matters Outside the Pleadings

As an initial matter, Plaintiffs ask the Court "to strike all factual averments [relied upon by Defendants] not contained in Plaintiffs' Complaint and additionally ask this Court not to consider any such facts." Opp'n at 3-4. In their Reply, Defendants argue that the public records from Allard's criminal prosecution may be considered because they are integral to Plaintiff's claims and because they are not used to assess the truth of the matters stated. Reply at 1-2.

HN9[] "In considering a motion to dismiss for failure to state a claim pursuant to Rule 12(b)(6), a court may consider the following matters outside the four corners of the complaint: (1) documents attached as an exhibit to the complaint or answer, (2) documents incorporated by reference in the complaint (and provided by the parties), (3) documents **[*13]** that, although not incorporated by reference, are 'integral' to the complaint, or (4) any matter of which the court can take judicial notice for the factual background of the case." Lane v. Tilbe, No. 18-CV-0438, 2018 U.S. Dist. LEXIS 203904, 2018 WL 6289668, at *2 (N.D.N.Y. Dec. 3, 2018) (internal citations omitted) (Kahn, J.). Here, Plaintiffs attached the March 6th Statement to their Complaint. See March 6th Statement. The Exhibit made references to Allard, various indictments, and performance enhancing drugs. See id. At this time, although skeptical of Plaintiffs' argument, the Court does not need to consider the contested factual averments in ruling on the Motion to Dismiss.

B. Antitrust Standing

Plaintiffs argue that they suffered an antitrust injury and are efficient enforcers, Pls.' Sur-Reply at 4-7, while Defendants argue that Plaintiffs lack antitrust standing because they suffered no antitrust injury and are not efficient enforcers, Defs.' Sur-Reply at 3-8. The Court agrees that Plaintiffs have established antitrust standing.[3]

---

[2] "Restraints imposed by agreement between competitors have traditionally been denominated as horizontal restraints, and those imposed by agreement between firms at different levels of distribution as vertical restraints." Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 730, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988).

1. Gatt Antitrust Injury Analysis

Before turning to the *Gatt* three-part test for determining whether a plaintiff has alleged an antitrust injury, the Court must determine whether Plaintiffs are market participants or satisfy the "inextricably intertwined" exception. **[*14]**

The Second Circuit has explained that:

> The upshot is that ***HN10***[] to suffer antitrust injury, the putative plaintiff must be a participant in the very market that is directly restrained. Usually, that market is the one in which the defendant operates, such as when the plaintiff is a competitor or consumer of the defendant, but sometimes the defendant will corrupt a separate market in order to achieve its illegal ends, in which case the injury suffered can be said to be "inextricably intertwined" with the injury of the ultimate target. Regardless, antitrust injury is suffered by participants in the restrained market (or markets).

In re Aluminum Warehousing Antitrust Litig., 833 F.3d at 161.

The Court finds that Plaintiffs plausibly allege that they participated in "any of the markets in which the defendants operate." Id. The racetracks directly solicit horse owners (like Plaintiffs) to compete in their stake's races. Compl. ¶ 46. Although the racetracks do not directly compete with Plaintiffs,[4] the racetracks are more akin to consumers of Plaintiffs' labor. The racetracks "compete [against each other] to attract horse owners to race horses on their tracks." Id. ¶ 53. For their part, Plaintiffs compete for, among other things, purse monies. Id. ¶ 85. There **[*15]** is no question that the March 6th Statement's ban took place in the harness racing market, "and that is where the direct, immediate impact [was] felt [by Plaintiffs]." *In re Aluminum Warehousing Antitrust Litig., 833 F.3d at 162*. Plaintiffs were now precluded "from racing for purse monies, stabling at the tracks, accessing the grounds of the tracks for training and qualifying purposes, [and] participating in sanctioned qualifying races. . . ." Compl. ¶ 85.

a. Step 1

HN11[] "At the first step of the *Gatt* analysis, [Plaintiffs] need allege only that the Defendants have engaged in unlawful anticompetitive conduct." *IQ Dental Supply, Inc., 924 F.3d at 63*. "The bar for such a showing is a low one." Id. Thus, the Court finds that Plaintiffs have satisfied this requirement by plausibly alleging that Defendants' March 6th Statement's ban served as a boycott of Plaintiffs. See *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 212, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)* ("Group boycotts . . . have long been held to be in the forbidden category [under the antitrust laws].").

b. Step 2

"The second *Gatt* step requires [the Court] to isolate and identify [Plaintiffs'] 'actual injury' or the 'ways in which the plaintiff claims it is in a "worse position" as a consequence of the defendant's conduct.'" *IQ Dental Supply, Inc., 924 F.3d at 63* (quoting *Gatt Commc'ns Inc., 711 F.3d at 76*).

Plaintiffs claim that they are in a worse position than they were before the boycott because **[*16]** "they are prohibited from participating in the harness racing market; they have lost their property; they have been deprived of valuable business relationships; and they have lost foreseeable income/profits." Pls.' Sur-Reply at 5. Defendants'

---

[3] To the extent Plaintiffs argue that they sufficiently pleaded an antitrust injury by relying on the "essential facilities" doctrine, Opp'n at 6, the Court does not need to consider this argument.

[4] Defendant Gural, on the other hand, is a direct competitor. Compl. ¶ 83. As for American Racing, it is unclear from the Complaint what role American Racing plays in the harness racing market, but the Court will assume for now that it too is a market participant.

supplemental briefing is silent on whether Plaintiffs are in a worse position; instead they argue that Plaintiffs failed to plausibly allege that Defendants' conduct caused any competitive harm. Defs.' Sur-Reply at 3.[5]

The Second Circuit in *IQ Dental* explained that for *Gatt* Step 2:

> ***Antitrust law*** is concerned with market conditions. Assuming that IQ is operating in a market affected by anticompetitive conduct, the question of actual injury becomes whether IQ is worse off than it would be if the market were free of anticompetitive forces. IQ has alleged that the Defendants' anticompetitive conduct affected the market, and that, after it entered the market, its sales through SourceOne suffered as a result.

IQ Dental Supply, Inc., 924 F.3d at 64 (internal citation omitted and emphasis added).

HN12[] The Court construes *Gatt* Step 2 as having two requirements: (1) plaintiffs must plausibly allege violations of market-wide harm, or in other words, an injury to competition;[6] and (2) plaintiffs must **[*17]** plausibly allege that they are "worse off than it would be if the market were free of anticompetitive forces."

As to the first requirement, Plaintiffs' Complaint adequately alleges an injury to competition. The Complaint includes allegations that the March 6th Statement's ban "reduce[s] competition within the harness racing market." Compl. ¶ 73. The reasoning is that "[a]s a general rule, the race tracks compete for more owners to enter their horses into races in order to increase competition and consumption by the public" and "Defendants' actions decrease the number of competitors in their races and therefore reduces competition at Tioga, Vernon, American Racing, and The Meadowlands." Id. ¶ 82.

Here, for purposes of the motion, Plaintiffs' Complaint plausibly alleges a sufficient injury for the antitrust standing analysis when it alleges Defendant Gural conspired with the other defendants to exclude Plaintiffs (and other horse owners who were impacted by the ban) from competing on the racetracks and within the harness racing market. Id. ¶¶ 55, 74. Other courts have agreed that the prevention of marketwide competition is an "injury **[*18]** of the type the antitrust laws were designed to prevent." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; see, e.g., *Intellective, 190 F. Supp. 2d at 613* ("Intellective adequately states an antitrust injury in this regard [because] Intellective alleges that it, and all others, are prevented from competing in

---

[5] In a footnote, Defendants argue that Plaintiffs have alleged a two-sided market (horse owners and racing fans), and that Plaintiffs cannot establish antitrust injury because they "have only alleged harm to themselves and have not considered net harms to the two-sided market considered as a whole." Defs.' Sur-Reply at 4 n.3. The Court disagrees for several reasons. First, the argument was made in a footnote and was not properly placed before the Court. See *Young America's Foundation v. Stenger, No. 20-CV-0822, 2021 U.S. Dist. LEXIS 159439, 2021 WL 3738005, at *15 (N.D.N.Y. Aug. 24, 2021)* (Kahn, J.). Second, the Court is not convinced that Plaintiffs have alleged a two-sided market. Although the racetracks connect the market of horse fans to the market of horse owners, the network effects based on the Complaint's allegations run mainly in one direction: "the more owners who race their horses at these racetracks, the more competitive the races are and the more attractive the races are to the public." Compl. ¶ 53. The Complaint provides no allegations regarding why the horse owners would care how many racing fans there are. Third, Defendants rely upon *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2280, 201 L. Ed. 2d 678 (2018)* for their two-sided market standing argument, but as the Second Circuit recently held: "Importantly, American Express did not directly address antitrust standing at all." *Salveson v. JPMorgan Chase & Co., 860 F. App'x 207, 209 (2d Cir. 2021)*.

[6] The Court notes that district courts within the Second Circuit have not been consistent with regard to the step of the *Gatt* analysis in which a court should consider whether a plaintiff plausibly plead an injury to competition. See, e.g., *Sell It Soc., LLC v. Acumen Brands, Inc., No. 14-CV-3491, 2015 U.S. Dist. LEXIS 35404, 2015 WL 1345927, at *4 (S.D.N.Y. Mar. 20, 2015)* (considering it mainly at Step 1), *Arcesium, LLC v. Advent Software, Inc., No. 20-CV-4389, 2021 U.S. Dist. LEXIS 62957, 2021 WL 1225446, at *7 (S.D.N.Y. Mar. 31, 2021)* (considering it at Step 2). In some cases, courts still consider whether a plaintiff plausibly alleges an antitrust injury even if they do not explicitly follow the *Gatt* three-step process. See, e.g., *Bhanusali v. Orange Reg'l Med. Ctr., No. 10-CV-6694 CS, 2013 U.S. Dist. LEXIS 113974, 2013 WL 4828657, at *9 (S.D.N.Y. Aug. 12, 2013)*, aff'd in part, vacated in part, *572 F. App'x 62 (2d Cir. 2014)*, *Ramnarine v. Nationstar Mortg., LLC, No. 19-CV-5544, 2019 U.S. Dist. LEXIS 219328, 2019 WL 7038430, at *3 (E.D.N.Y. Dec. 20, 2019)*.

the relevant market by the Working Group's control of the data necessary to perform a competing study."), *Clarett v. Nat'l Football League, 306 F. Supp. 2d 379, 403 (S.D.N.Y. 2004)*, rev'd on other grounds, *369 F.3d 124 (2d Cir. 2004)* ("Clarett has a demonstrable antitrust injury for precisely the same reason [as *Intellective*]: he alleges that the Rule prevents him, and all others similarly situated, from competing in the relevant market."); *HM Compounding Servs., Inc. v. Express Scripts, Inc., No. 14-CV-1858, 2015 U.S. Dist. LEXIS 89062, 2015 WL 4162762, at *10 (E.D. Mo. July 9, 2015)* ("[F]or purposes of a motion to dismiss, [the plaintiff] has sufficiently pled an antitrust injury by asserting that [the defendant] excluded it as a competitor from the marketplace.").

As to the second requirement, which Defendants do not contest, the Court agrees that Plaintiffs have sufficiently alleged they are worse off than they would be if the market were free of anticompetitive forces (*i.e.* no March 6th Statement ban). See Pls.' Sur-Reply at 5.

c. Step 3

HN13[] Finally, at the last step, Plaintiffs "must demonstrate that the Defendants' anticompetitive behavior caused its actual injury." *IQ Dental Supply, Inc., 924 F.3d at 64-65* (citing *Gatt Commc'ns Inc., 711 F.3d at 76*). "In other words, the nature of Plaintiff's **[*19]** injury (or the market-wide harm they allege) must be caused by Defendants' anticompetitive actions and not by something else." *Arcesium, 2021 U.S. Dist. LEXIS 62957, 2021 WL 1225446, at *8*. Plaintiffs easily allege the necessary causal relationship because Plaintiffs' own injuries—their inability to compete in the market—stem from the March 6th Statement's ban.

2. Efficient Enforcer Analysis

Plaintiffs argue that they are efficient enforcers of the antitrust laws because they satisfy all four factors, Pls.' Sur-Reply at 7, while Defendants assert that Plaintiffs are not efficient enforcers because the injuries are "speculative and are unconnected with the antitrust violation they allege," Defs.' Sur-Reply at 7-8. The Court finds that Plaintiffs plausibly allege that they are efficient enforcers of the antitrust laws.

HN14[] "Directness in the antitrust context means close in the chain of causation." *Gatt Commc'ns, Inc., 711 F.3d at 78*. This factor turns on "familiar principles of proximate causation." *Lotes Co. v. Hon Hai Precision Indus. Co., 753 F.3d 395, 412 (2d Cir. 2014)*. Regarding the first factor, Plaintiffs' injuries are relatively clear and direct: horse owners like Plaintiffs who were subject to the ban in the March 6th Statement were directly impacted by it. The first factor weighs in favor of Plaintiffs.

HN15[] "The second factor simply looks for a class **[*20]** of persons naturally motivated to enforce the antitrust laws." *In re DDAVP Direct Purchaser Antitrust Litig., 585 F.3d 677, 689 (2d Cir. 2009)*. "Inferiority to other potential plaintiffs can be relevant, but it is not dispositive." Id. (internal quotation marks omitted). Here, it is not apparent whether there are more direct victims of the alleged conspiracy than Plaintiffs. Rather, Plaintiffs are "the most-motivated plaintiff with respect to the Defendants' alleged direct boycott" because Plaintiffs are the immediate victims of the March 6th Statement. *IQ Dental Supply, Inc., 924 F.3d at 68*. The second factor also weighs in favor of Plaintiffs.

HN16[] Under the third factor, the Court asks whether there would be "a high degree of speculation in a damages calculation." *Id. at 66-67*. Additionally, the fourth factor "traditionally concerns the prospect of different groups of plaintiffs attempting to recover for the same exact injury." *Fund Liquidation Holdings LLC v. UBS AG, No. 15-CV-5844, 2021 U.S. Dist. LEXIS 189499, 2021 WL 4482826, at *7 (S.D.N.Y. Sept. 30, 2021)*. However, the Supreme Court has noted that the "potential difficulty in ascertaining and apportioning damages is not . . . an independent basis for denying standing where it is adequately alleged that a defendant's conduct has proximately injured an interest of the plaintiff's that the statute protects." *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 135, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)*. Moreover, "[a]t the motion to dismiss stage, any holding that these damages would **[*21]** be speculative is premature." *In re Foreign Exch. Benchmark Rates Antitrust Litig., No. 13-CV-7789, 2016 U.S. Dist. LEXIS 128237, 2016 WL 5108131, at *11 (S.D.N.Y. Sept. 20, 2016)*. There may be considerable challenges in the calculation of damages, but at this time, the Court finds that this factor is neutral. As for the fourth factor, there is no indication that Defendants' conduct was subject to government and regulatory investigations, meaning that "[t]here is nothing before this Court demonstrating that any of the Plaintiffs have received payments as a result of those proceedings. . . ." *Fund Liquidation Holdings LLC, 2021 U.S. Dist. LEXIS 189499, 2021 WL 4482826, at *7*. Plus, "there are various ways to protect against duplicate recoveries or apportionment issues in this action." Id. As a result, the fourth factor weighs in favor of Plaintiffs.

On balance, at the pleading stage, Plaintiffs plausibly allege that they are efficient enforcers of the antitrust laws.

C. *Section 1 of the Sherman Act*

Having established that Plaintiffs can demonstrate antitrust standing, the Court will turn to the merits of the parties' arguments. Defendants argue that (1) Plaintiffs failed to plead concerted action; (2) Plaintiffs' claims are not entitled to per se treatment; and (3) Plaintiffs' claims fail under a rule of reason analysis. Defs.' Mem. of Law at 10-13, 15-18. The Court finds that because Plaintiffs did not adequately allege the **[*22]** relevant market, the antitrust claim must fail and the Court does not need to resolve whether Plaintiffs failed to plead concerted action, whether the claims are subject to the per se rule[7] and whether the claims fail under a per se or rule of reason analysis.

1. Relevant Market

HN17[] Regardless of what standard applies (per se or rule of reason), Plaintiffs "must articulate a relevant market." See *Downtown Music Publishing LLC v. Peloton Interactive, Inc., 436 F. Supp. 3d 754, 765 & n.5 (S.D.N.Y. 2020)*. "The relevant market is broadly defined as 'the area of effective competition,' which is typically 'the arena within which significant substitution in consumption or production occurs.'" *US Airways, Inc. v. Sabre Holdings Corp., 938 F.3d 43, 55 (2d Cir. 2019)* (quoting *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2285, 201 L. Ed. 2d 678 (2018)*). "Market definition is ordinarily a deeply fact-intensive inquiry." *Id. at 55* (quoting *Todd v. Exxon Corp., 275 F.3d 191, 199 (2d Cir. 2001)*). Accordingly, courts often "hesitate to grant motions to dismiss for failure to plead a relevant . . . market." *Todd, 275 F.3d at 199-200*. Still, the Second Circuit has explained that "[w]here the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products," "the relevant market is legally insufficient and a motion to dismiss may be granted." *Sabre, 938 F.3d at 64* (quoting **[*23]** *Chapman v. New York State Div. for Youth, 546 F.3d 230, 238 (2d Cir. 2008)*).[8]

---

[7] "[C]ourts have long recognized the existence of 'hub-and-spoke' conspiracies in which an entity at one level of the market structure, the 'hub,' coordinates an agreement among competitors at a different level, the 'spokes.'" ***United States v. Apple, Inc., 791 F.3d 290, 314 (2d Cir. 2015)*** (quoting *Howard Hess Dental Labs. Inc. v. Dentsply Int'l, Inc., 602 F.3d 237, 255 (3d Cir. 2010)*). "Existing case law makes clear that a hub-and-spoke theory is cognizable under *Section 1* only if there are both vertical agreements between the hub and each spoke, and also a horizontal agreement among the various spokes with each other." *In re Zinc Antitrust Litig., 155 F. Supp. 3d 337, 376 (S.D.N.Y. 2016)* (citing ***Apple, 791 F.3d at 314***). The per se rule can apply to "hub-and-spoke" conspiracies. See *Preston Hollow Cap. LLC v. Nuveen LLC, No. 20-CV-5597, 2021 U.S. Dist. LEXIS 150031, 2021 WL 3542255, at *14 (S.D.N.Y. Aug. 10, 2021)*. Although Plaintiffs do not explicitly refer to a "hub-and-spoke" conspiracy in the Complaint, the Court may determine at a later time that Gural acted as a "hub" and racetrack defendants as "spokes."

[8] Although *Chapman* dealt with *Section 2 of the Sherman Act*, other courts in this Circuit have applied *Chapman*'s rationale to *Section 1* claims. See, e.g., *Madison 92nd St. Assocs., LLC v. Courtyard Mgmt. Corp., No. 13-CV-0029, 2014 U.S. Dist. LEXIS 104541, 2014 WL 3728591, at *9 (S.D.N.Y. July 28, 2014)*, aff'd, *624 F. App'x 23 (2d Cir. 2015)*, *Planetarium Travel, Inc. v. Altour Int'l, Inc., 97 F. Supp. 3d 424, 428 (S.D.N.Y.)*, aff'd, *622 F. App'x 40 (2d Cir. 2015)*, *Peloton Interactive., 436 F. Supp. 3d at 765*.

Here, Plaintiffs purport to define the relevant market as the harness racing market in the Northeastern United States. Compl. ¶ 47. However, after carefully reviewing the Complaint, the Court finds that Plaintiffs made no effort to explain the alleged market with reference "to the rule of reasonable interchangeability and cross-elasticity of demand," and the Court must grant the motion to dismiss. See *Global Discount Travel Servs. v. Trans World Airlines, 960 F. Supp. 701, 705 (S.D.N.Y. 1997)* ("plaintiff's failure to define its market by reference to the rule of reasonable interchangeability is, standing alone, valid grounds for dismissal."); *Full Circle United, LLC v. Skee-Ball, Inc., No. 11-CV-5476, 2014 U.S. Dist. LEXIS 202841, 2014 WL 12829195, at *10 (E.D.N.Y. May 13, 2014)* ("Regardless, since FC fails to 'define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand,' the pleading is 'legally insufficient and a motion to dismiss may be granted.'") (quoting *Chapman, 546 F.3d at 238*); *In re AMR Corp., 527 B.R. 874, 884 (Bankr. S.D.N.Y. 2015)* ("Failure to define the market by reference to the rule of interchangeability is, standing alone, valid grounds for dismissal."). Instead, Plaintiffs refer to the Meadowlands as "the premiere track in all of harness racing and no other venue offers an equivalent stakes program" and that it "holds a dominant position in harness racing with no other track having **[*24]** the quality of racing comparable to it." Compl. ¶¶ 48, 78. Still, the Second Circuit has noted that "[m]erely asserting that a commodity is in some way unique is insufficient to plead a relevant market." *Concord Assocs., L.P., 817 F.3d at 54* (quoting *B.V. Optische Industrie De Oude Delft v. Hologic, Inc., 909 F. Supp. 162, 171 (S.D.N.Y. 1995)*). The alleged uniqueness of the Meadowlands does not relieve Plaintiffs of their requirement to refer to the rule of interchangeability in the Complaint when "[t]here is no discussion of other products in the market that potentially compete with the [Meadowlands or the other racetracks], of arguably competing products that should not be included the market, or of the factors that make the [Meadowlands or the other racetracks] a unique market." *Mathias v. Daily News, L.P., 152 F. Supp. 2d 465, 481-82 (S.D.N.Y. 2001)*.

D. Remaining State Law Claims

Because Plaintiffs have not alleged diversity jurisdiction, Compl. ¶ 16, this Court would only have subject matter jurisdiction to consider Plaintiffs' state law claims to the extent that supplemental jurisdiction is provided for under *28 U.S.C. § 1367*. ***HN18***[↑] *Subsection (c)* of that section provides that "district courts may decline to exercise supplemental jurisdiction over a [state law] claim . . . [if] the district court has dismissed all claims over which it has original jurisdiction" *28 U.S.C. § 1367(c)*. Where, as here, any federal claims have been dismissed **[*25]** at a relatively early stage of litigation, courts often decline to exercise subject matter jurisdiction. See *Valencia ex rel. Franco v. Lee, 316 F.3d 299, 306 (2d Cir. 2003)*; *Tops Markets, Inc., 142 F.3d at 103* ("[W]hen all federal claims are eliminated in the early stages of litigation, the balance of factors generally favors declining to exercise pendent jurisdiction over remaining state law claims and dismissing them without prejudice.") (citing *Carnegie-Mellon Univ. v. Cohill, 484 U.S. 343, 350, 108 S. Ct. 614, 98 L. Ed. 2d 720 (1988)*). The Court elects to do so here. The Court dismisses the state law claims without prejudice for lack of subject matter jurisdiction.

V. CONCLUSION

Accordingly, it is hereby:

ORDERED, that Defendants' Motion to Dismiss (Dkt. No. 10) is **GRANTED**; and it is further

ORDERED, that Plaintiffs' Complaint (Dkt. No. 1) is **DISMISSED WITHOUT PREJUDICE**; and it is further

ORDERED, that the Clerk of the Court is directed to close this action; and it is further

ORDERED, that the Clerk serve a copy of this Memorandum-Decision and Order on all parties in accordance with the Local Rules.

IT IS SO ORDERED.

Judges: MARK A. KEARNEY, JUDGE.

Opinion by: MARK A. KEARNEY

Opinion

MEMORANDUM

KEARNEY, J.

A pharmacy purchaser of pharmaceutical drugs alleges a drug manufacturer with a patented brand name drug conspired to restrict output of a three of its competitors' generic product by agreeing to settle three patent infringement lawsuits it brought against three of the generic drug manufacturers. The pharmacy alleged the brand name manufacturer gave three of its alleged infringing generic competitors with exclusive periods to sell an approved generic of its brand name drug before its patent expired. The pharmacy claims the three settlement agreements are actual evidence of one overarching joint venture conspiracy created by the brand name manufacturer designed to restrict the output of the drug and maintain higher prices and greater profits. The competing generic companies and the brand name company move to dismiss arguing the pharmacy pleads no direct or circumstantial evidence of a single agreement to conspire, no antitrust injury, and we lack personal jurisdiction over an Israeli company acquiring some of the assets and liabilities of one of the generic companies. The pharmacy responds by partially shifting to an unplead **[*4]** theory after reviewing the three settlement agreements but stands on the same plead facts. The pharmacy insists the three settlement agreements are still direct evidence of a single horizontal conspiracy among four competitors in a market with six or seven other admitted non-party competitors.

But the settlement agreements themselves do not demonstrate a single conspiracy among the brand and generics to provide exclusive distribution rights. They do exactly the opposite. The pharmacy argues it plead circumstantial evidence of a conspiracy from the close timing and similarity of the three settlement agreements even though the agreements depend on none of the other six or seven non-conspiring generic manufacturers seeking to sell this drug through a court order allowing their sale or otherwise. The pharmacy swears the competitors admitted adding more manufacturers will lead to a price collapse and lost profits. We also reject the pharmacy's initial thoughts concerning exercising personal jurisdiction over the Israeli purchaser based on the allegations and record adduced to date but grant its request for limited discovery.

We grant the brand name manufacturer's and three generic manufacturers' **[*5]** motions to dismiss for failure to plead an antitrust conspiracy but grant the pharmacy's request for leave to amend. We further grant the pharmacy's request for limited expedited discovery into our specific personal jurisdiction over the Israeli purchaser should it not amend the complaint and instead wish to continue suing only the Israeli purchaser. We decline a request to sanction the pharmacy for not amending its complaint after reviewing the three settlement agreements.

I. Alleged facts

Medical professionals prescribe the pharmaceutical drug Colcrys to treat gout and familial Mediterranean fever. It contains the active ingredient colchicine, which "had been used in the United States for decades before the [Food and Drug Administration]" approved Colcrys.[1] But in 2006, the Food and Drug Administration "encouraged the pharmaceutical industry to submit New Drug Applications ('NDAs') for previously unapproved drugs to facilitate the FDA evaluation of older drug products by contemporary standards."[2]

Takeda Pharmaceuticals U.S.A., Inc.'s predecessor applied for three New Drug Approvals for colchicine's treatment of familial Mediterranean fever and the treatment and prevention **[*6]** of gout in 2008.[3] The Food and Drug Administration approved Colcrys as "the first pharmaceutical product contain[ing] colchicine as the sole active ingredient" on July 29, 2009.[4] It "granted Takeda's colchicine product a three-year exclusivity for the treatment of gout and seven-year exclusivity for the treatment of familial Mediterranean fever."[5] Takeda's exclusivity period ended on July 29, 2016.[6]

---

[1] ECF Doc. No. 1 ¶ 28. Colchicine is "a very old drug" which doctors used to treat gout "for a very long time." *Id.* ¶ 30. The ancient Greeks used colchicine to treat gout more than two thousand years ago. *Id.* Dr. Stephen Goldfinger "reported successful use of colchicine" to treat familial Mediterranean fever in 1972. *Id.* Gout is "a type of severe arthritis often characterized by painful 'flares' (severe and sudden attacks of pain, redness, inflammation, and tenderness in joints) resulting from the build-up of uric acid)." *Id.*

[2] *Id.* ¶ 28.

[3] *Id.* ¶ 32.

[4] *Id.* ¶¶ 29, 32.

[5] *Id.* ¶ 32.

Par, Watson, and Amneal file Abbreviated New Drug Applications certifying their generic versions of Colcrys do not infringe on Takeda's patents or Takeda's patents are invalid.

Once a name brand drug comes to market, generic drug companies attempt to bring an AB-rated[7] generic form of the drug to market by filing an Abbreviated New Drug Application with the Food and Drug Administration, which significantly lowers the price of the brand drug once there are "many generic competitors" on the market.[8] "[B]arriers to entry by a generic drug manufacturer are high"; they must "first formulate a generic version of the brand-name drug; conduct bioequivalence and other studies needed to support an Abbreviated New Drug Application to [the Food and Drug Administration]; file the [Abbreviated New **[*7]** Drug Application] and work with [the Food and Drug Administration] on any issues that arise regarding approval; and invest in manufacturing facilities for the commercialization of the product."[9] To incentivize generic drug companies "to seek approval of generic alternatives to branded drugs, the first generic manufacturer to file an [Abbreviated New Drug Application] containing a certification that the generic version does not infringe on any valid patent listed in the [Food and Drug Administration's] 'Orange Book' against the reference-listed brand drug . . . gets 180 days of protection from competition from other generic versions of the drug."[10] If a generic drug manufacturer files the Abbreviated New Drug Application certifying its drug does not infringe on the brand name drug's patents, the brand name manufacturer can sue the generic manufacturer for patent infringement, which delays final Food and Drug Administration approval of the Abbreviated New Drug Application for up to thirty months.[11]

Par Pharmaceuticals, Inc. filed an Abbreviated New Drug Application with the Food and Drug Administration in December 2011 seeking approval for its generic version of Colcrys.[12] **[*8]** Par certified "all pertinent patents that Takeda listed in the [Food and Drug Administration's] Orange Book under the Colcrys [New Drug Application] were either invalid or not infringed."[13] This certification entitled Par "to a 180-day period of regulatory exclusivity during which the Food and Drug Administration would not approve other generic manufacturers to sell a generic version of Colcrys."[14] Amneal Pharmaceuticals, LLC and Watson Laboratories, Inc., along with six other generic drug companies, also filed Abbreviated New Drug Applications "seeking approval to sell generic versions of Colcrys and made similar . . . certifications that any listed patents were invalid or not infringed."[15]

[14] *Id.* ¶ 42.

[15] *Id.* ¶ 43. Value Drug conceded this allegation is not accurate during oral argument because all eight generic filers did not file at the same time; eight generic manufacturers filed over the course of the allegations in the complaint, presumably from 2011 to 2019. ECF Doc. No. 148, Tr. 23:17-24:2.

Takeda sues the generic drug companies including Par, Watson, and Amneal; launches its own Authorized Generic; and settles the litigation with Par, Watson, and Amneal.

Takeda responded by suing all the generic drug company filers for patent infringement.[16] Takeda sued Par first in August 2013, then sued the other generic drug companies at an unplead time.[17] But Takeda's Colcrys patents are allegedly "fatally weak" and "had already been found to have not been infringed . . . in litigation regarding another product called Mitigare."[18]

While proceeding with its patent infringement litigations, Takeda agreed non-party Prasco could distribute its authorized generic of Colcrys "to try to lock up generic sales for Takeda" and keep the profits "otherwise lost to generic competitors."[19] Prasco distributed the generic Colcrys "at a price just slightly lower than branded Colcrys" and "collected and remitted back to Takeda virtually all of the revenues" from generic Colcrys sales.[20]

Par **[*9]** obtained tentative Food and Drug Administration approval for its Abbreviated New Drug Application in February 2015.[21] Watson also obtained tentative approval in October 2015.[22] But Par and Watson still needed final approval to market their generic drug.

Value Drug Company, a pharmacy chain purchaser of pharmaceutical drugs, sees these developments as incentivizing Takeda and the generics to conspire to limit output and keep prices higher: Takeda faced devastation in profits if more generics than only its authorized generic came to market; Par faced an "unpleasant prospect of entering" the market with its generic because Prasco already had a generic in the market, forcing Par "to offer very low prices to dislodge and gain market share, depriving Par of the benefits of its 180-day exclusivity as the first [Abbreviated New Drug Application] filer"; and Watson and Amneal faced "the unattractive prospect of entering a market where Prasco and Par had already been fighting for market share for 180 days" thereby making both offer "rock-bottom prices to gain sales and share."[23]

So on the eve of trial in Takeda's patent infringement suit against Par, "Takeda, Par, Watson, and Amneal agreed **[*10]** to a scheme to restrain price competition to Colcrys by concertedly reducing generic Colcrys output, and agreed to share in the monopoly profits maintained thereby until January of 2024."[24] These four competitors (with six or seven others on the sidelines) entered into a single horizontal conspiracy effected through Takeda settling its patent infringement suits against Par, Watson, and Amneal under agreements presumably providing benefits to all litigants. Par and Takeda settled in November 2015, Watson and Takeda settled in January 2016, and Amneal and Takeda settled in March 2016—all with separate, written settlement agreements.[25] As for Amneal,

[24] *Id.* ¶ 54.

although the parties did not execute the formal settlement agreement until March 2016, Takeda and Amneal signed a term sheet with essential terms of the settlement on December 10, 2015—shortly after Takeda and Par settled.[26]

Par and Takeda entered a distribution agreement where Par would refrain from launching its generic version of Colcrys "despite having tentative [Food and Drug Administration] approval" and "[two-and-a-half] years following entry of the agreement (*i.e.* in July of 2018) . . . Par would . **[*11]** . . replace Prasco as the distributor of Takeda's authorized generic Colcrys and remit back to Takeda virtually all of the revenues from sales of authorized generic Colcrys, keeping some of the revenues for itself."[27] Takeda entered into settlement agreements with Watson and Amneal whereby each would get "a defined time, believed to be between [six] and [eighteen] months in duration, to sell generic Colcrys free from competition from all other generic Colcrys sellers" in exchange for "Watson and Amneal stay[ing] off the market for several years until their defined period of marketing commenced."[28]

Takeda and Par's settlement agreement.

Takeda and Par settled Takeda's claim for patent infringement against Par on November 24, 2015.[29] Takeda granted Par a non-exclusive license through a license agreement "to distribute, have distributed, market, sell, or offer for sale a generically-labeled .6 mg colchicine oral tablet product manufactured by Takeda" beginning July 1, 2018.[30] Takeda also granted Par "a fully paid-up, royalty-free, irrevocable, non-exclusive license" to sell its generic of Colcrys.[31] Par and Takeda agreed Par could begin selling its generic of Colcrys beginning on the earlier of **[*12]** January 1, 2024; the date a court finds the patents covering Colcrys invalid or not infringed based on a drug "substantively identical" to Par's generic of Colcrys; the date a "Third Party" begins selling its generic of Colcrys with

Party means "[e]ach Plaintiff and Defendant" collectively "Parties" - here, Takeda Pharmaceuticals USA, Inc. and Amneal Pharmaceuticals LLC. ECF Doc. No. 123-2 at 17. We note third party is not used as the defined term "Third Party" in Amneal's settlement agreement. Value Drug nonetheless concedes if Watson enters the market, so does Amneal. *See* ECF Doc. No. 124 at 9 n.7, 10 n.9 (Value Drug admitting Par and Amneal came in when Watson came in).

[39] ECF Doc. No. 1 ¶ 48.

***The alleged conspiracy comes to an unexpected end*.**

Takeda and the three generics negotiated an "escape clause" in each settlement agreement allowing the three generics to sell their generic Colcrys if another non-party company entered the market.[40]

The escape clause triggered a few months later.[41] Non-party generic Mylan filed and notified Takeda in September 2016 of its Abbreviated New Drug Application with a certification Takeda's patents are either invalid or not infringed.[42] Takeda sued Mylan for patent infringement in October 2016, and Takeda and Mylan settled the litigation in November 2017.[43] The settlement purportedly "permitted Mylan to launch upon a court decision invalidating the patents covering Colcrys."[44] Our Delaware colleague Judge Richard G. Andrews "issued **[*15]** an opinion granting a motion by [non-party] Hikma for summary judgment in patent litigation concerning another product subject to the same patents as Colcrys, which Takeda failed to appeal."[45] Mylan launched its generic of Colcrys in November 2019.[46] Mylan's entry into the market "thereby trigger[ed] the 'escape clause' in Par, Watson, and Amneal's agreements" with Takeda.[47]

***Value Drug sues Takeda, Par, Amneal, Watson, Teva Ltd., and Teva USA for violations of Section I and II of the Sherman Act*.**

Value Drug - a purchaser of brand Colcrys from Takeda and generic Colcrys from Prasco and Par - sued Takeda, Par, Amneal, Watson, Teva Ltd., and Teva USA for violations of *Section I* and *II of the Sherman Act* on August 5, 2021.[48] Value Drug alleges Takeda entered a single conspiracy with Par, Watson, and Amneal "to restrict output and restrain competition" by preventing AB-rated generics of Colcrys from coming to market.[49] The alleged conspiracy depended on all defendants' participation, and Value Drug alleges the co-conspirators enjoyed "supracompetitive Colcrys profits" by virtue of this conspiracy to restrict competition.[50]

---

[40] *Id.* ¶ 57 ("Par, Watson, and Amneal would refrain from launching their own generic versions of Colcrys for so long as *non-conspirators* did so. That is, the co-conspirators agreed that if *a non-conspiring seller* of generic Colcrys entered the market, Par, Watson, and Amneal could do so." (emphasis added)).

[42] *Id.* ¶ 63.

[43] *Id.*

[44] *Id.* ¶ 64.

[45] *Id.* ¶ 65.

[46] *Id.* ¶ 66.

[47] *Id.* ¶¶ 62, 65-66.

[48] *Id.* ¶ 7. Value Drug alleges Teva Pharmaceutical Industries Ltd. and Teva Pharmaceuticals USA, Inc. purchased Watson and expressly assumed its liabilities in July 2015 and/or ratified Watson's conduct. *Id.* ¶¶ 12-13. At oral argument, Value Drug conceded Teva Ltd. signed the purchase agreement in July 2015, but the sale did not close until August 2016. The date of the closing is not plead. These facts comprise the extent of Value Drug's allegations involving Teva Ltd. and Teva USA. *See generally* ECF Doc. No. 1.

[49] ECF Doc. No. 1 ¶¶ 1, 7-8, 10-14, 27. Value Drug also sued Endo Pharmaceuticals Inc. We dismissed Endo Pharmaceuticals from the litigation upon the parties' agreement. ECF Doc. No. 125.

[50] ECF Doc. No. 1 ¶¶ 3, 60.

The basic features of the conspiracy derived from Takeda, **[*16]** Par, Watson, and Amneal agreeing: Par would not bring its own generic to market and would rather agree to market Takeda's "authorized generic" previously distributed by Prasco, but Par would not do so until two-and-a-half years after the agreement to lengthen the time Takeda enjoyed the Colcrys market competition-free; Par would pay Takeda a "large royalty"; Watson and Amneal would restrict selling their generics for several years in exchange for a defined period of time to sell their respective generic Colcrys products free from all other generic competition; and Takeda would enter license agreements with other non-conspiring generic companies to delay their entry beyond Watson and Amneal's agreed periods of competition-free sales "thereby giving the co-conspirators long periods of supracompetitive Colcrys profits."[51]

II. Analysis

Value Drug's presently plead claims hinge on Takeda's settlement agreements with Par, Watson, and Amneal. Par, Watson, and Amneal argue the settlement agreements directly contradict Value Drug's plead theory, Value Drug reviewed the settlement agreements but chose not to amend, and we must dismiss the Complaint because the conspiracy is implausible.

Takeda **[*17]** argues the principal points adopted by all competitors: (1) the conspiracy as plead is implausible on its face and directly contradicted by the settlement agreements; (2) Value Drug fails to plead sufficient facts supporting a single, horizontal conspiracy even if it plead a plausible conspiracy; and (3) Value Drug's claims are barred because the settlement agreements forming the basis of the alleged antitrust violations are merely a legitimate exercise of Takeda's patent rights under the *Patent Act*.[52] Amneal and Watson move to dismiss on similar grounds arguing the settlement agreements Value Drug attempts to rely upon as evidence of the conspiracy directly contradict its theory and make the conspiracy implausible, particularly with respect to Watson and Amneal because they did not stand to receive the benefit Value Drug alleges since neither received a defined period of serial exclusivity.[53] Value Drug responds to Takeda, Watson, and Amneal's motions together, arguing: (1) it adequately pleads direct evidence of the conspiracy; (2) alternatively, it adequately pleads circumstantial evidence of the conspiracy; (3) it has adequately plead a single conspiracy; and (4) the *Patent Act* does not immunize Takeda's **[*18]** conduct in settling the patent litigation.[54]

Par moves to dismiss because Value Drug fails to plead an antitrust injury.[55] Par argues it had two independent regulatory bars to launch its generic: (1) lack of final FDA approval; and (2) Takeda's patents, which break the chain of causation.[56] Value Drug counters antitrust injury is not typically decided on a motion to dismiss, it adequately plead Par would have received earlier FDA approval to launch but for the conspiracy, Par's argument regarding Takeda's patents providing an independent barrier to launching is flawed, and even if it is not, Value Drug adequately pleads Takeda's patents are invalid or not infringed by the generic defendants.[57]

Israeli purchaser Teva Ltd. moves to dismiss for lack of personal jurisdiction.[58] Teva Ltd. argues Value Drug fails to adequately plead our personal jurisdiction and exercising personal jurisdiction over it is unconstitutional.[59] Teva

USA moves to dismiss for failure to plead Teva Ltd. and Teva USA's involvement in the conspiracy or any facts regarding their liability as Watson's successor-in-interest or on a ratification theory.[60]

Because we find Value Drug's plead conspiracy is implausible on its face, **[*19]** we need not reach the substance of Par's and Teva USA's motions to dismiss which joined in the other defendants' arguments. We grant Takeda's, and Watson and Amneal's motions to dismiss because Value Drug fails to plead a plausible conspiracy.[61] We defer Teva Ltd.'s motion to dismiss for lack of personal jurisdiction subject to further review following expedited jurisdictional discovery if Value Drug chooses not to amend its Complaint and intends to proceed against Teva Ltd. alone.

A. Value Drug does not plead a plausible single horizontal conspiracy.

Value Drug brings two claims against Takeda and the three generics—conspiracy to restrain trade in violation of *15 U.S.C. § 1* and conspiracy to monopolize in violation of *15 U.S.C. § 2*—and one claim for monopolization against Takeda only in violation of *15 U.S.C. § 2*.

Section 1 of the Sherman Act provides "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal."[62] *Section 1* antitrust plaintiffs must establish three things: (1) "a contract, combination . . . or conspiracy"; (2) an unreasonable restraint on trade; and (3) antitrust injury.[63] "[T]he existence of an **[*20]** agreement is the

[61] *Federal Rule of Civil Procedure 12(b)(6)* requires the plaintiff state a claim upon which relief can be granted. The purpose of the Rule is to test the sufficiency of the fact allegations. *Sanders v. United States, 790 F. App'x 424, 426 (3d Cir. 2019)*. If a plaintiff is unable to plead "enough facts to state a claim to relief that is plausible on its face," the court should dismiss the complaint. *Id.* (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*); *see also Kajla v. U.S. Bank Nat'l Ass'n as Tr. for Credit Suisse First Boston MBS ARMT 2005-8, 806 F. App'x 101, 104 n.5 (3d Cir. 2020)* (quoting *Warren Gen. Hosp. v. Amgen Inc., 643 F.3d 77, 84 (3d Cir. 2011)*). "A claim has facial plausibility when the plaintiff pleads factual content ... allow[ing] the court to draw the reasonable inference ... the defendant is liable for the misconduct alleged." *Robert W. Mauthe M.D., P.C. v. Spreemo, Inc., 806 F. App'x 151, 152 (3d Cir. 2020)* (quoting *Zuber v. Boscov's, 871 F.3d 255, 258 (3d Cir. 2017)*). While "[t]he plausibility standard is not akin to a 'probability requirement,'" it does require the pleading show "more than a sheer possibility ... a defendant has acted unlawfully." *Riboldi v. Warren Cnty. Dep't of Human Servs. Div. of Temp. Assistance & Soc. Servs., 781 F. App'x 44, 46 (3d Cir. 2019)* (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*). "A pleading that merely 'tenders naked assertion[s] devoid of further factual enhancement' is insufficient." *Id.* (quoting *Iqbal, 556 U.S. at 668*). In determining whether to grant a *12(b)(6)* motion, "we accept all well-pleaded allegations as true and draw all reasonable inferences in favor of the plaintiff" but "disregard threadbare recitals of the elements of a cause of action, legal conclusions, and conclusory statements." *Robert W. Mauthe, M.D., P.C., 806 F. App'x at 152* (quoting *City of Cambridge Ret. Sys. v. Altisource Asset Mgmt. Corp., 908 F.3d 872, 878-79, 69 V.I. 1034 (3d Cir. 2018)*). Our Court of Appeals requires us to apply a three-step analysis to a 12(b)(6) motion: (1) we "'tak[e] note of the elements a plaintiff must plead to state a claim'"; (2) we "identify allegations that ... 'are not entitled to the assumption of truth' because those allegations 'are no more than conclusion[s]'"; and, (3) "'[w]hen there are well-pleaded factual allegations,' we 'assume their veracity' ... in addition to assuming the veracity of 'all reasonable inferences that can be drawn from' those allegations ... and, construing the allegations and reasonable inferences 'in the light most favorable to the [plaintiff]'..., we determine whether they 'plausibly give rise to an entitlement to relief.'" *Oakwood Lab'ys LLC v. Thanoo, 999 F.3d 892, 904 (3d Cir. 2021)* (internal citations omitted); *Connelly v. Lane Constr. Corp., 809 F.3d 780, 787 (3d Cir. 2016)*.

[62] *15 U.S.C. § 1*.

[63] *In re Insur. Brokerage Antitrust Litig., 618 F.3d 300, 314-15, 315 n.9 (3d Cir. 2010)*; *see also Howard Hess Dental Lab'ys Inc. v. Dentsply Int'l, Inc., 602 F.3d 237, 253 (3d Cir. 2010)* ("A plaintiff asserting a *Section 1* claim also must allege four elements: '(1) concerted action by the defendants; that produced anti-competitive effects within the relevant product and geographic

hallmark of a *Section 1* claim."[64] "Instead of assigning [contract, combination . . . or conspiracy] a distinct meaning, courts have interpreted them collectively to require 'some form of concerted action' . . . in other words, a 'unity of purpose or a common design and understanding or a meeting or minds' or 'a conscious commitment to a common scheme.'"[65]

Section 2, conversely, has "sweeping language" making it unlawful to "monopolize, attempt to monopolize, or conspire to monopolize, interstate or international commerce."[66] "A *Section 2* conspiracy claim has four elements: (1) an agreement to monopolize; (2) an overt act in furtherance of the conspiracy; (3) a specific intent to monopolize; and (4) a causal connection between the conspiracy and the injury alleged."[67] But a litigant may bring a *Section 2* claim for monopolization as well, requiring "'(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.'"[68] The second element of a monopolization claim requires "the willful acquisition or maintenance of monopoly power." **[*21]** [69] "As this element makes clear, the acquisition or possession of monopoly power must be accompanied by some anticompetitive conduct on the part of the possessor."[70]

While Value Drug's claim for monopolization does not require the existence of a conspiracy on its face, it requires "some anticompetitive conduct" on Takeda's part to acquire or maintain the monopoly power.[71] Value Drug only alleges Takeda's "conduct" is its participation in the conspiracy with Par, Watson, and Amneal. Because we find Value Drug has not plausibly alleged a conspiracy, we also find Value Drug fails to plead a monopolization claim.[72]

In pleading a conspiracy, a plaintiff must plead "enough factual matter (taken as true) to suggest that an agreement was made."[73] A plaintiff may rely on direct or circumstantial evidence or some combination of both to plead an

We apply the same pleading standards to a *Section 1* and *Section 2* conspiracy claim. *See* *W. Penn Allegheny Health Sys., Inc. v. UPMC, 627 F.3d 85, 99-100 (3d Cir. 2010)*.

agreement.[74] If relying exclusively on direct evidence of conspiracy, "the complaint must plead 'enough fact to raise a reasonable expectation that discovery will reveal' this direct evidence" of illegality.[75] "And if the plaintiff alternatively expects to rest on the circumstantial evidence of parallel behavior, the complaint's statement of facts must place the **[*22]** alleged behavior in 'a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action.'"[76] "[R]egardless of whether the plaintiff expects to prove the existence of a conspiracy directly or circumstantially, it must plead 'enough fact[s] to raise a reasonable expectation that discovery will reveal evidence of illegal agreement.'"[77] We look at the conspiracy as a whole when assessing each defendants' involvement, and "[i]n short, the issue is whether the pleading delineates to some sufficiently specific degree that a defendant purposefully joined and participated in the conspiracy."[78]

1. Value Drug's single horizontal conspiracy as plead.

Value Drug alleges Takeda, Par, Watson, and Amneal conspired to restrain trade and monopolize the market on the eve of Par's trial with Takeda in November 2015.[79] They allegedly agreed: Par would refrain from launching its generic of Colcrys and instead distribute Takeda's authorized generic two-and-a-half years after reaching its settlement agreement with Takeda and remit substantial royalty payments back to Takeda; "Watson and Amneal would restrict **[*23]** their output generic of Colcrys for several years, and then would each enjoy a defined period of time to sell their respective generic Colcrys products free from competition from all other would-be generic Colcrys makers;" and Takeda "would enter licenses with [the] other [non-conspiring] generic companies that would delay their entry beyond Watson and Amneal's agreed periods of competition-free sales, thereby giving the co-conspirators long periods of supracompetitive Colcrys profits."[80]

Value Drug swears the conspiracy has "two basic features."[81] First, Takeda and Par settled their patent litigation and "entered into a sham joint venture . . . that concealed the first part of their output restriction conspiracy."[82] Par and Takeda agreed Par would not launch its generic of Colcrys, and in July 2018—two-and-a-half years after they executed the settlement agreement—Par would become the distributor of Takeda's authorized generic of Colcrys.[83] Under this arrangement, Par would "remit back to Takeda virtually all of the revenues from sales of authorized generic Colcrys, keeping some of the revenues for itself."[84] The second feature involved Watson and Amneal.[85]

[82] *Id.* ¶ 55.

[83] *Id.*

[84] *Id.*

They too settled their respective **[*24]** litigation with Takeda and entered into separate settlement agreements.[86] Takeda "struck agreements with Watson and Amneal, respectively, offering each a defined time, believed to be between [six] and [eighteen] months in duration, to sell generic Colcrys free from competition from all other generic Colcrys sellers, if Watson and Amneal would stay off the market for several years until their defined periods of marketing commenced."[87] The conspiracy, though, had an escape clause.[88] Under Value Drug's theory, "Par, Watson, and Amneal would refrain from launching their own generic versions of Colcrys only for so long as non-conspirators did so. That is, the co-conspirators agreed that if a non-conspiring seller of generic Colcrys entered the market, Par, Watson, and Amneal could do so . . . Par's selling Takeda's authorized generic Colcrys avoided this escape clause."[89] Value Drug continues: "This escape clause, and its necessary implication that the co-conspirators were willing to restrict their own output only so long as non-conspirators were doing so, too, illustrates the interdependence of the promises of the co-conspirators, the existence of the conspiracy, the fact that the output restriction **[*25]** was against the unilateral economic interests of the conspirators and was only in their joint conspiratorial interests, and demonstrates the singular nature of the conspiracy."[90]

Value Drug alleges this arrangement benefitted all the co-conspirators.[91] According to Par "[t]he distribution agreement between Takeda and Par . . . provides powerful incentives to ensure that the parties preserve the two-entrant market."[92] And Par itself purportedly explained the logic behind the conspiracy: "[A market with] a single branded drug (Takeda's Colcrys) and a single generic version (Par's authorized generic) only functions if the market for Colcrys-equivalent colchicine is limited to those two products. [] Although a drug market can maintain price stability with a single generic version of a drug on the market, multiple entrants often product a market-wide price collapse with mass renegotiation and cancellation of supply agreements. [] The distribution agreement between Takeda and Par recognizes this dynamic and provides powerful incentives to ensure that the parties preserve the two-entrant market."[93] Par also "asserted that even the entry of a single additional competitor **[*26]** would cause its distribution joint venture with Takeda 'to lose approximately 97 million in annual revenue;'" and "with 'two or three other generic ANDA filers enter[ing] the market,' the joint venture would lose even more, because '[a]s additional generic versions of Colcrys enter the market, Par would be forced to swiftly reduce prices to maintain even a portion of its market share.'"[94] Value Drug pleads each defendant had no unilateral interest in this arrangement, and "[t]he conduct among [Takeda, Par, Amneal, and Watson] only makes economic sense if there was an agreement among the four of them to restrain their respective generic and authorized-generic output and prevent the price collapse that Par so vividly described."[95] In other words, under Value Drug's theory, the conspirators agreed Par, Watson,

[92] *Id.* (ellipses in original).

[93] *Id.* (alterations in original).

[94] *Id.* ¶ 59.

[95] *Id.* ¶¶ 58-60. Value Drug posits Takeda had no unilateral interest to stop selling its generic drug through Prasco, Par had no unilateral interest to restrict its output of generic Colcrys for several years and agree to defined period of sales free from other generic competition, and Watson and Amneal had no unilateral economic interests to agree to restrict their output for several years after Par's 180-day exclusivity elapsed. *Id.*

and Amneal would stay off the market to each enjoy defined periods of competition-free sales to avoid "the price collapse" Par so vividly described when more than a brand drug and one generic drug is on the market.[96]

Value Drug alleges this conspiracy "restricted output of generic Colcrys, kept Colcrys prices at supracompetitive levels, and delayed their fall to competitive **[*27]** levels."[97] Value Drug alleges the conspiracy "was very profitable to both Takeda and Par" even though "Watson and Amneal did not get to enjoy the fruits of the conspiracy."[98] Value Drug alleges Takeda "earned approximately $1 billion more than it would have had it faced generic competition," "Par expected to earn approximately $50-80 million more than it would absent the conspiracy," and "Watson and Amneal each could have expected to earn approximately $12-36 million more during their respective periods as the only generic seller on the market than they would have earned absent the conspiracy."[99]

2. Value Drug pleads no direct evidence of the conspiracy.

"Allegations of direct evidence of an agreement, if sufficiently detailed, are independently adequate" to plead a conspiracy.[100] Direct evidence is "evidence that is explicit and requires no inferences to establish the proposition or conclusion being arrested" such as "a document or conversation explicitly manifesting the existence of the agreement in question."[101] Value Drug argues it offers two forms of direct evidence—the settlement agreements themselves and defendants' judicial admissions in a different litigation.[102]

Value Drug **[*28]** cites a string of cases purportedly supporting its argument the individual, bilateral settlement agreements are direct evidence of the single, horizontal conspiracy among Takeda, Par, Watson, and Amneal.[103] Value Drug fails to appreciate why these cases are distinguishable from what it pleads here. For example, Value Drug cites to one of Judge Goldberg's opinions in the *King Drug Co. of Florence v. Cephalon, Inc.* litigation.[104] Judge Goldberg considered motions for summary judgment on whether individual settlement agreements between the brand and generic defendants *themselves* violated antitrust principles because they *individually* contained large and unjustified reverse settlements following our Supreme Court's holding in *Actavis*.[105] Value Drug seizes on

June 23, 2014)* (deciding a motion for summary judgment and finding "[w]hether this evidence is properly considered 'direct' depends on whether the fact-finder would have to take an additional logical step in order to conclude that a conspiracy occurred. In other words, an additional step is indicative of circumstantial evidence. Direct evidence requires no extrapolation, as with 'a document or conversation explicitly manifesting the existence of the agreement in question.") (citing *In re Insur., 618 F.3d at 324 n.23*)).

[102] ECF Doc. No. 124 at 11-14. Value Drug argues we can take judicial admission of unplead statements made in a different litigation in front of Judge Andrews. We need not decide whether we can consider these statements to defeat the motion to dismiss because the statements are in support of Value Drug's unplead "Second Wave" theory. We further detail Value Drug's argued "Second Wave" theory in the circumstantial evidence section.

[103] ECF Doc. No. 124 at 11-12.

[104] *88 F. Supp. 3d 402 (E.D. Pa. 2015)*.

Judge Goldberg's footnote "[p]laintiffs have presented direct evidence of concerted action through the settlement agreements between Cephalon and each of the Generic Defendants, and Defendants have not challenged Plaintiffs' ability to meet the concerted action requirement on these claims."[106] But Value Drug fails to acknowledge the concerted action Judge Goldberg is discussing is *not* concerted action among the brand and *all* of the generics, it is concerted action between the brand and **[*29]** *each* of the generics with respect to the individual settlement agreements raising antitrust concerns. Judge Goldberg addressed several agreements; Value Drug alleges one.

Judge Thrash in *In re Androgel Antitrust Litigation (No. II)* considered whether individual settlement agreements between the brand and each generic raised antitrust concerns as a reverse payment settlement on a motion for summary judgment.[107] One of the generics moved for summary judgment arguing the plaintiffs failed to demonstrate a conspiracy to restrain trade in violation of *Sections 1* and *2 of the Sherman Act*.[108] Judge Thrash observed both claims "require the same threshold showing—the existence of an agreement to restrain trade" and "[a] written contract satisfies this requirement 'only if it embodies an agreement to unlawfully restrain trade.'"[109] Judge Thrash concluded the settlement agreements constituted direct evidence of a conspiracy because "the settlement agreements specifically address the conduct the Plaintiffs argue is unlawful."[110] Judge Thrash reasoned: "The parties negotiated and agreed that in exchange for dropping the patent litigation, providing some services, and delaying generic introduction until 2015, the Generics **[*30]** would receive compensation. Whether that common objective—dropping the patent litigation in exchange for compensation—was an illegal restraint of trade is a separate question. But if it was, then the settlements are clear, direct evidence of an agreement to unlawfully restrain trade."[111] In *In re Androgel*, the very conduct purportedly constituting the antitrust violation—"dropping the patent litigation in exchange for compensation" in the form of a reverse payment—appeared in the terms of each individual written settlement agreement between the brand and the generic manufacturer. Thus, as Judge Thrash aptly reasoned, if a jury found this conduct to be in violation of the *Sherman Act*, the settlement agreements

---

[105] *F.T.C. v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*; *see also* *King Drug Co. of Florence, 88 F. Supp. 3d at 407-410* (detailing the terms of each settlement agreement between the brand and individual generic manufacturers), 422 (denying defendants' motions for summary judgment).

[106] *King Drug Co. of Florence, 88 F. Supp. 3d at 410 n.9*. In this footnote, Judge Goldberg rejected defendants' argument "there exists a 'special,' heightened standard of review for motions for summary judgment in the antitrust context," distinguishing the cases the defendants relied on because the cases addressed "the limited inferences that may be drawn from ambiguous, circumstantial evidence in establishing concerted action . . . ." *Id.* Judge Goldberg found the plaintiffs presented direct evidence of concerted action in the form of the written settlement agreements.

[107] *No. 09-2084, 2018 U.S. Dist. LEXIS 99716, 2018 WL 2984873, at *1-4 (N.D. Ga. June 14, 2018)*. Solvay—the brand drug—sued two generic manufacturers for patent infringement after they made Paragraph IV certifications when filing their Abbreviated New Drug Applications. *2018 U.S. Dist. LEXIS 99716, [WL] at *2-3*. The separate litigations ran on parallel schedules, and on the same day, Solvay settled the individual cases with the generics. *2018 U.S. Dist. LEXIS 99716, [WL] at *3*. Each settlement agreement also contained "business promotion agreements" wherein the brand drug and generic agreed to share profits of the brand drug and the generic agreed to do something—here either promote the brand drug to physicians or serve as a backup supplier of the brand drug. *2018 U.S. Dist. LEXIS 99716, [WL] at *4*. Judge Thrash found "[t]ogether, these types of settlements are called 'reverse payment' settlements, and they have recently become popular in pharmaceutical litigation." *2018 U.S. Dist. LEXIS 99716, [WL] at *4*. The plaintiffs alleged the defendants violated federal ***antitrust law*** by entering into reverse settlement agreements. *2018 U.S. Dist. LEXIS 99716, [WL] at *5*. This contrasts with our case, where the alleged antitrust violation is a single, horizontal conspiracy among all defendants to restrict the output of Colcrys.

[108] *2018 U.S. Dist. LEXIS 99716, [WL] at *7*.

[109] *Id.* (further citations omitted).

[110] *2018 U.S. Dist. LEXIS 99716, [WL] at *8*.

[111] *Id.* We note Value Drug selectively and misleadingly quotes Judge Thrash's reasoning to support its position here.

constituted *direct evidence* of the conspiracy between the brand and each individual generic as they memorialized the very agreement which violated the *Sherman Act*.

This is not what we have here. Value Drug is not challenging the separate bilateral settlement agreements as individually violative of the *Sherman Act*.[112] Value Drug pleads a single, horizontal antitrust conspiracy among Takeda, Par, Watson, and Amneal. The bilateral settlement agreements are not direct evidence of this alleged conspiracy. We are persuaded **[*31]** by another Judge Goldberg opinion in the *King Drug Co. of Florence, Inc. v. Cephalon, Inc* litigation.[113] Judge Goldberg separately considered whether four individual, bilateral reverse payment settlement agreements executed between the brand drug Cephalon and the generic defendants "were the product of an overall antitrust conspiracy between all of the Defendants" on a motion for summary judgment.[114] As we have here, Judge Goldberg observed "[t]he motions at issue do not concern the legality of the individual, bilateral settlement agreements between Cephalon and each Generic Defendant. What is at issue is Plaintiffs' claim that the separate settlement agreements were in fact the manifestation of a horizonal conspiracy between all Defendants—with Cephalon at the center—to restrain trade in the modafinil market."[115] Judge Goldberg found the individual, bilateral settlement agreements are not direct evidence of an overall antitrust conspiracy.[116] There, the plaintiffs argued the settlement agreements themselves, which contained substantially similar language and structure, constituted direct evidence.[117] Judge Goldberg rejected this argument, reasoning, "[t]he settlement agreements themselves are individual agreements, not global agreements amongst **[*32]** all Defendants. Plaintiffs are unable to point to any direct evidence that the Generics agreed amongst themselves, let alone that such overall agreement also included Cephalon. Indeed, each agreement runs only between Cephalon and a single Generic.

---

[112] Value Drug also misplaces reliance on *In re Wellbutrin XL Antitrust Litig., 133 F. Supp. 3d 734 (E.D. Pa. 2015)* and *United Food & Com. Workers Loc. 1776 & Participating Emps. Health & Welfare Fund v. Teikoku Pharma USA, 296 F. Supp. 3d 1142 (N.D. Cal. 2017)*. In *In re Wellbutrin*, the "Wellbutrin Settlement was executed on February 9, 2007" resolving various pending lawsuits between the brand drug and various generic manufacturers and "was comprised of multiple agreements." *In re Wellbutrin XL, 133 F. Supp. 3d at 745*. Not only did the parties sign one settlement agreement (made up of various agreements, including "the Omnibus Agreement"), one generic took the lead initially in negotiating on behalf of *all* generic manufacturers. *Id.* This is not what Value Drug alleges today. Value Drug alleges *separate* settlement agreements between Takeda and Par, Takeda and Watson, and Takeda and Amneal. Value Drug does not allege together these constituted a global settlement agreement, like in *In re Wellbutrin*, nor does it allege either Par, Watson, or Amneal negotiated on behalf of all of them collectively. Similarly, in *United Food & Com. Workers Loc. 1776*, the plaintiffs argued "the Settlement Agreement, **signed by all three defendants**, satisfies the 'contract, combination, or conspiracy' elements" of their antitrust claims. *296 F. Supp. 3d at 1165* (emphasis added). Judge Orrick observed "Defendants **do not dispute this**, although they do dispute the significance, lawfulness, and effect of the various provisions in that Agreement" and therefore granted judgment in favor of plaintiff on the conspiracy element of its claims. *Id.* (emphasis added). We do not have all defendants signing one settlement agreement here. We have individual settlement agreements between Takeda and each generic manufacturer. Nor do the defendants here concede the settlement agreements satisfy the conspiracy claim. Neither of these cases provides teeth to Value Drug's misplaced argument.

[113] *King Drug Co. of Florence, Inc., 2014 U.S. Dist . LEXIS 84818, 2014 WL 2813312, at *6*. We recognize this case involves a motion for summary judgment and thus a different standard than the one we apply to the motion to dismiss before us. Judge Goldberg's reasoning as to why the bilateral settlement agreements are not direct evidence of a single horizontal conspiracy is nonetheless persuasive.

[114] *2014 U.S. Dist. LEXIS 84818, [WL] at *1*.

[115] *2014 U.S. Dist. LEXIS 84818, [WL] at *6*.

[116] *2014 U.S. Dist. LEXIS 84818, [WL] at *1, 6-7*.

[117] *2014 U.S. Dist. LEXIS 84818, [WL] at *6*.

While Plaintiffs are correct that the settlements contain similar terms, and it could be argued that this similarity is evidence of an overall conspiracy, that is classic circumstantial, not direct evidence."[118]

Value Drug pleads the generics individually settled their patent infringement litigations with Takeda around the same time and with bilateral settlement agreements containing similar structure and terms, purportedly manifesting an overarching single, horizontal conspiracy among Takeda, Par, Watson, and Amneal.[119] Value Drug conceded at oral argument there is no provision in the settlement agreements—beside in Watson's agreement which references Par and Amneal's generic Colcrys product—providing *direct* evidence of an agreement among Takeda, Par, Watson, and Amneal to restrict generic Colcrys output.[120] Value Drug further conceded "conspirators **[*33]** normally don't lay out and specifically say, hey, this is what I'm doing."[121] But this is exactly the type of "smoking gun" evidence Value Drug needs if it intends to rely on the settlement agreements as *direct evidence* of a conspiracy.[122] There is simply no direct evidence of an antitrust conspiracy in the individual settlement agreements themselves. The mere fact Watson's agreement mentions two other products may give rise to an *inference* Watson, Par, and Amneal knew of each other's agreements' terms and somehow fell into an overarching output restriction conspiracy. But this is a conclusion requiring us to *infer* something and thus is *not* direct evidence; it is "classic circumstantial" evidence just like Judge Goldberg reviewed on a summary judgment record.

Value Drug also argues it provides direct evidence of the overarching conspiracy in the form of judicial admissions by Par in front of Judge Andrews.[123] This too fails to carry the day for Value Drug. The statements by Par only address Par and Takeda's distribution agreement and the benefits provided to Par and Takeda by maintaining a two-drug market.[124] The statements do not address Watson and Amneal or their agreement and involvement **[*34]** in this alleged overarching conspiracy among Takeda, Par, Watson, and Amneal. Value Drug's reliance on the statements would require us to draw inferences Takeda, Par, Watson, and Amneal entered an overarching conspiracy among each other from Par's statements about its agreement with Takeda and the benefits it draws from it. This reach is classic circumstantial evidence, not direct.

Value Drug pleads no direct evidence of a conspiracy because neither the settlement agreements nor Par's statements are direct evidence of the single, horizontal conspiracy among Takeda, Par, Watson, and Amneal.

3. Value Drug pleads no circumstantial evidence of the conspiracy.

Plaintiffs may plead an anti-competitive conspiracy violating federal law through circumstantial evidence.[125] But mere allegations of parallel conduct are not enough, nor are allegations of "conscious parallelism."[126] "In order 'to

[121] *Id.*, Tr. 27:10-12.

[122] *Cephalon, 2014 U.S. Dist. LEXIS 84818, 2014 WL 2813312, at *5* (discussing proof of conspiracy by direct evidence and stating "[b]ecause direct evidence of an unlawful conspiracy—a 'smoking gun'—is often unavailable, proof by inferences drawn from circumstantial evidence is the norm.") (citing *InterVest, Inc. v. Bloomberg, L.P., 340 F.3d 144, 159 (3d Cir. 2003)*) (further citation omitted).

[123] ECF Doc. No. 1 ¶¶ 58-59; *see also* ECF Doc. No. 124 at 13 (characterizing its pleading as judicial admissions to Judge Andrews which "conceded the purpose and effect of the conspiracy and the 'joint venture.'").

[124] ECF Doc. No. 1 ¶¶ 58-59.

[125] *See, e.g. In re Ins., 618 F.3d at 321*.

avoid deterring innocent conduct that reflects enhanced, rather than restrained, competition,' . . . and in order to enforce the *Sherman Act*'s requirement of an agreement, the Supreme Court has required that 'a *§ 1* plaintiff's offer of conspiracy evidence must tend to rule out the possibility that the defendants were **[*35]** acting independently."[127] "Some courts have denominated these facts, the presence of which may indicate the existence of an actionable agreement, as 'plus factors'" and although not exhaustive, our Court of Appeals recognizes three such plus factors: (1) motive to enter the conspiracy; (2) evidence defendants acted contrary to their interests; and (3) evidence implying a traditional conspiracy.[128] "[P]lus factors are simply circumstances in which the inference of independent action is less likely than that of concerted action."[129]

Value Drug argues it adequately pleads circumstantial evidence of a conspiracy because it pleads conscious parallel conduct, motive to agree, and the conspiring defendants acted contrary to their economic interests.[130] Takeda, Watson, Amneal, and Par counter the conspiracy is implausible, and Value Drug fails to adequately plead circumstantial evidence of a conspiracy nonetheless. We need not decide whether Value Drug plausibly pleads consciously parallel conduct because its conspiracy *as plead* is admittedly implausible belying any inference of concerted action. But we grant Value Drug leave to amend should it be able to plead its later-argued theory **[*36]** consistent with *Rule 11*.

We again start with Value Drug's plead conspiracy. Value Drug's plead purpose of the conspiracy is for "the four [conspirators] to restrain their respective generic and authorized-generic output **and prevent the price collapse that Par so vividly described**"—*i.e.*, the price collapse which occurs when there are more than two entrants (one brand and one generic of a drug) in the market—in order to enjoy and maintain supracompetitive profits.[131] To achieve this purpose, Takeda, Par, Watson, and Amneal agreed to consistently maintain a two-entrant system until January 2024, with Par first enjoying exclusivity well past its 180-day exclusivity provided as the first Abbreviated New Drug Application filer, and then Watson and Amneal each enjoying successive periods of exclusivity—something neither would otherwise enjoy since neither filed their Application first.[132] Understanding other non-conspirator generics could also come to market, the four competitors purportedly agreed Takeda would provide them licenses to enter the market after Watson and Amneal had their exclusivity period.[133] The competitors also purportedly agreed, though, if a non-conspiring generic came to market, all of **[*37]** them could enter too; in other words, they would only restrict their output if the non-conspirator generics did so too.[134] In so doing, they restricted competition and stood to gain supracompetitive profits.[135]

---

[126] *Id.* ("Parallel conduct is, of course, consistent with the existence of an agreement; in many cases where an agreement exists, parallel conduct—such as setting prices at the same level—is precisely the concerted action that is the conspiracy's object. But as the Supreme Court has long recognized, parallel conduct is 'just as much in line with a wide swath of rational and competitive business strategy unilaterally prompted by common perceptions of the market.'" (quoting *Twombly, 550 U.S. at 554*)).

[127] *Id.* (further citations omitted).

[128] *Id.* (quoting *Flat Glass, 385 F.3d at 360*). Evidence implying a traditional conspiracy "consists of 'non-economic evidence that there was an actual manifest agreement not to compete,' which may include 'proof that the defendants got together and exchanged assurances of common action or otherwise adopted a common plan even though no meetings, conversations, or exchanged documents are shown.'" *Id.* (quoting *Flat Glass, 385 F.3d at 361*) (further citation omitted).

[129] *In re Generic Pharm., 338 F. Supp. 3d at 448* (further citation omitted) (alteration in original).

[130] Value Drug does not argue it pleads evidence implying a traditional conspiracy.

[131] ECF Doc. No. 1 ¶¶ 58-60.

[132] *Id.* ¶¶ 3(a)-(e), 54-57.

[133] *Id.* ¶ 3(e).

[134] *Id.* ¶ 57.

But what Value Drug pleads is belied by the settlement agreements Value Drug attempts to rely on as circumstantial evidence of the conspiracy. It is not disputed Watson and Amneal did not have a defined period of exclusive sales. The purported conspiracy (as best we can tell based on the allegations with all inferences in Value Drug's favor) really worked this way:

• Par agreed to be Takeda's distributor of its authorized generic from July 1, 2018 through the earlier of June 30, 2022 (or the date Par launches its own generic of Colcrys or any other single-ingredient oral colchicine product other than Takeda's or its generic of Colcrys);[136]

• Par also agreed with Takeda it could launch its own generic of Colcrys on the earlier of January 1, 2024; the date a court finds the patents covering Colcrys invalid or not infringed based on a drug "substantively identical" to Par's generic of Colcrys; the date a "Third Party" begins selling its generic of Colcrys with Takeda's permission; **[*38]** or a date following another generic drug manufacturer launching "at risk" without permission from Takeda.[137] Third Party *does not* except Watson and Amneal; rather, it means "any person other than a Party or an Affiliate to a Party."[138]

• Watson agreed with Takeda it could launch its own generic of Colcrys on the earlier of: October 15, 2020; 135 days before another generic (besides Par or Amneal) begins selling its generic of Colcrys with Takeda's permission; the date Par or Amneal begins selling their generics of Colcrys with Takeda's permission; the date a court finds the patents covering Colcrys invalid or not infringed based on a drug "substantively identical" to Watson's generic of Colcrys; the date another generic starts selling after a Court determines the Colcrys patents are invalid or not infringed based on a drug "*not* substantively identical" to Watson's generic of Colcrys; or a date following another generic drug manufacturer launching "at risk" without permission from Takeda.[139]

• And Amneal agreed with Takeda it could launch its own generic of Colcrys on the earlier of: October 15, 2020; the date a court finds the patents covering Colcrys invalid or not infringed based on a drug **[*39]** "substantively identical" to Amneal's generic of Colcrys; the date a third party begins selling its generic of Colcrys with Takeda's permission; or a date following another generic drug manufacturer launching "at risk" without permission from Takeda.[140]

Thus, drawing all inferences in favor of Value Drug but reviewing the agreements Value Drug itself relies on to state its claim, we know:

• Par and Takeda would be the only two sellers on the market, with Takeda distributing its branded Colcrys and Par distributing Takeda's authorized generic, from July 1, 2018 to October 15, 2020 when Watson and Amneal entered the market with their generic products; upon their joint entry, Watson and Amneal would cause the "price collapse" with four market entrants—which, according to Value Drug's own pleading, would cause the generics to "swiftly reduce prices to maintain even a portion" of the market share.

• If Watson's entry date of 135 days before another generic (besides Par or Amneal) got triggered, Watson still would not have a period of exclusivity. Rather, both Par and Amneal could come in with their generics.[141]

---

[135] *Id.* ¶ 54.

[136] ECF Doc No. 123, Ex. 1, at 16 § 1.1.

[137] ECF Doc No. 123, Ex. 1, at 17 § 1.3.

[138] ECF Doc. No. 123, Ex. 1, at 29, Ex. A to License Agreement (Definitions).

[139] ECF Doc. No. 123-1, Ex. 2, at 16-17 § 1.2.

[140] ECF Doc. No. 123-2, Ex. 3, at 18-19 §§ 1.2.

[141] ECF Doc No. 123, Ex. 1, at 17 § 1.3(c); ECF Doc. No. 123-1, Ex. 2, at 16-17 § 1.2(b); ECF Doc. No. 123-2, Ex. 3, at 18-19 § 1.2(c); *see also* ECF Doc. No. 124 at 9 n.7, 10 n.9 (Value Drug admitting Par and Amneal came in when Watson came in).

Thus, the market would have: Takeda's brand Colcrys; Takeda's authorized generic of Colcrys; **[*40]** Par's generic Colcrys; Watson's generic Colcrys; and Amneal's generic Colcrys.[142]

• And, as Value Drug pleads, if a non-conspirator came into the market, Par, Watson, and Amneal could also come in then.[143]

We next turn to the purported "Second Wave" theory of conspiracy Value Drug did not plead but raised at oral argument and in its briefing. Value Drug argues the actual unplead purpose of the conspiracy is to "order their market entry" to compete against three generics rather than the potential nine, and thus avoid "the looming Second Wave" of generics which would cause an even larger price collapse than what occurs when there are three generics in the market.[144] In other words, Takeda, Par, Watson, and Amneal did not conspire to totally restrict their output in exchange for defined periods of exclusivity in a two-entrant market and supracompetitive profits to be shared among themselves (as plead); they instead conspired to restrict their output to compete only against *each other* for defined periods of time, rather than all nine generics which could have been on the market. But Value Drug fails to plead facts supporting this theory and effectively concedes its as-plead theory **[*41]** is implausible by not defending it.[145]

Value Drug's conspiracy *as plead* is implausible because in any of these scenarios, the admitted price collapse occurs. Value Drug concedes this result.[146] Rather than doubling down on its theory the four competitors agreed to this scheme to prevent the inevitable price collapse which occurs when "even . . . a single additional" generic enters the market and disrupts the high prices commanded in a two-entrant market, Value Drug argues the purpose of the conspiracy is actually to prevent the *further* price collapse which would occur from the "looming Second Wave" of generic manufacturers also trying to take their generic of Colcrys to market.[147] But Value Drug cannot plead one implausible conspiracy—a conspiracy in which each conspirator joined in order to enjoy defined, competition-free periods of sales in a two-entrant market[148]—and argue because another unplead conspiracy is plausible we should not dismiss its plead implausible allegations.[149]

---

[142] We note under Par's license with Takeda, if Par launched its own generic, Par could no longer be the distributor of Takeda's authorized generic. ECF Doc No. 123, Ex. 1, at 16 § 1.1. Even assuming in favor of Value Drug Par decided not to launch and rather continued being Takeda's distributor, Watson still has no exclusivity because the market has branded Colcrys, Takeda's authorized generic, Watson's generic, and Amneal's generic. Conversely, assuming Par did launch *and* Takeda chose to stop distributing its authorized generic, the market is still similarly saturated with the brand drug and three generics. Regardless of whether Par chose to launch its own generic or not, Watson never obtained an exclusive period of time or a scenario where the price collapse Value Drug pleads does not occur. Amneal similarly had no exclusivity in either scenario.

[143] ECF Doc No. 123, Ex. 1, at 17 § 1.3(c); ECF Doc. No. 123-1, Ex. 2, at 16-17 § 1.2(b); ECF Doc. No. 123-2, Ex. 3, at 18-19 § 1.2(c); *see also* ECF Doc. No. 1 ¶ 57.

[144] *See, e.g.*, ECF Doc. No. 124.

[145] Value Drug's allegations in paragraph 57 may be subject to different interpretations. But Value Drug drafted the pleading. And in its briefing, Value Drug swears the "escape clause" it references in paragraph 57 is the escape clauses in each individual settlement agreement. *See, e.g.* ECF Doc. No. 124 at 7 n.1 (discussing entry dates in context of "escape clauses" in settlement agreements); 9 n.7 (same); 10 n.9; 13 n.13 (conceding Par, Watson, and Amneal would all enter at once causing competition from three generics (instead of nine in accordance with Value Drug's new "second wave" theory); 19 n.21 (describing clauses providing entry dates in settlement agreements as "escape clauses"). While we should plausibly infer facts based on the plead facts, we cannot simply create new theories of liability based on arguments attempting to reconstruct sworn allegations. Value Drug's conclusions do not suffice. Its belated arguments attempting to stretch those conclusions into facts also do not suffice.

[146] *See, e.g.*, ECF Doc. No. 124 at 17 (arguing the purpose of the conspiracy is to avoid "the looming Second Wave" of generics).

[147] *Id.* ("By conspiring to order their market entry, Takeda avoided competing against Par, Watson, and Amneal for a period of time, then competed against just the three co-conspirators and avoided a price collapse from the looming Second Wave.").

[148] ECF Doc. No. 1 ¶¶ 3(a)-(e), 4, 56-60, 71.

Value Drug pleads itself out of court by focusing the plead motives of the four competitors to reduce generic output "to prevent the price collapse that Par so vividly described"—*i.e.*, the price **[*42]** collapse which occurs when even one other generic enters the two-entrant market.[150] The settlement agreements themselves preclude Watson and Amneal from selling their generics in a two-entrant market and rather demonstrate the price collapse Par described *will* happen when one of the four competitors brings its generic to market because all three generics, and possibly Takeda's authorized generic, can be sold at once. As plead, we discern no motive for the competitors to enter a *single, horizontal* conspiracy among all of them to cause the very price collapse they allegedly conspired to avoid.[151] This theory makes no economic sense and forecloses an inference of concerted action among the four competitors.[152]

We dismiss Value Drug's plead claims against Takeda, Par, Watson, Amneal, and Teva USA with leave to amend.

B. We defer ruling on Teva Ltd.'s motion to dismiss for lack of personal jurisdiction and allow limited expedited jurisdictional discovery.

Teva Ltd. moves to dismiss Value Drug's complaint arguing we do not enjoy personal jurisdiction over it as an Israeli company with its principal place of business in Israel.[153] Value Drug responds we **[*43]** enjoy personal jurisdiction over Teva Ltd. under Pennsylvania's long arm statute, the *Clayton Act (15 U.S.C. § 22)*, and *Federal Rule of Civil Procedure 4(k)(2)*.[154] Value Drug also argues exercising jurisdiction—either general or specific—is constitutional.[155] In the alternative, Value Drug asks for jurisdictional discovery. We disagree with Value Drug it has adequately plead or proffered adequate evidence our exercise of jurisdiction over Teva Ltd. is constitutional. But we grant Value Drug limited jurisdictional discovery on one plead theory of personal jurisdiction.

1. Value Drug's pleading of personal jurisdiction over Teva Ltd.

Value Drug knowingly sued a foreign company with a foreign principal place of business and yet failed to plead barely a fact regarding our personal jurisdiction over it.[156]

Value Drug bases our personal jurisdiction over Teva Ltd. on four sparse allegations: (1) "Teva Ltd. is successor-in-interest to Watson"; (2) "On July 26, 2015 Teva Ltd. purchased Watson and, as part of that purchase, assumed all

---

[149] We do not take a position on whether the "Second Wave" conspiracy is plausible. We simply note Value Drug argues against Takeda, Watson, and Amneal's motions to dismiss arguments by setting forth its unplead second wave theory, not its plead theory of preserving a two-entrant market for as long as possible.

[150] ECF Doc. No. 1 ¶¶ 58-60.

[151] *See, e.g., Petruzzi's IGA Supermarkets, Inc. v. Darling-Delaware Co., 998 F.2d 1224, 1243 (3d Cir. 1993)* (finding defendants need not share the same motive in entering a conspiracy, "[r]ather, all that is required is that *they each have* a motive to conspire." (emphasis added)).

[152] *See, e.g., Brunson Commc'ns, Inc. v. Arbitron, Inc., 239 F. Supp. 2d 550, 563-64 (E.D. Pa. 2002)* (applying reasoning in *Matsushita* to motion to dismiss and quoting "if the defendants 'had no rational economic motive to conspire, and if their conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy.") Because we find it makes no economic sense to conspire to cause a price collapse upon entry to the market, we cannot find the defendants' conduct is not equally consistent with other plausible explanations—*i.e.*, each generic defendant unilaterally settled its patent litigation with Takeda for reasons other than to restrict generic output.

[153] ECF Doc. No. 106; ECF Doc. No. 1 ¶ 12 (pleading Teva Ltd.'s incorporation and principal place of business in Israel).

[154] ECF Doc. No. 117.

[155] *Id.*

[156] ECF Doc. No. 1 ¶ 12.

of Watson's liabilities"; and (3) "Moreover, Teva Ltd. ratified Watson's conduct challenged herein"; (4) "Each defendant has transacted business, maintained substantial contacts, and/or committed overt acts in furtherance of the illegal **[*44]** scheme and conspiracy throughout the United States, including in this district. The scheme and conspiracy have been directed at, and have had the intended effect of, causing injury to persons residing in, located in, or doing business throughout the United States, including in this district."[157]

2. Value Drug fails to plead or proffer adequate evidence to establish we enjoy personal jurisdiction over Teva Ltd. but we allow it limited jurisdictional discovery should it decline to timely amend its complaint.

"'[T]he burden of demonstrating the facts that establish personal jurisdiction,' falls on the plaintiff . . . and 'once a defendant has raised a jurisdictional defense,' the plaintiff must 'prov[e] by affidavits or other competent evidence that jurisdiction is proper.'"[158] When, as here, no party requests an evidentiary hearing "'the plaintiff[s] need only establish a prima facie case of personal jurisdiction.'"[159] We are required to "'accept the plaintiff's allegations as true, and . . . to construe disputed facts in favor of the plaintiff.'"[160] "Of course, by accepting a plaintiff's facts as true when a motion to dismiss is originally made, a court is not precluded from revisiting the issue **[*45]** if it appears that the facts alleged to support jurisdiction are in dispute."[161]

"Pennsylvania's long-arm statute gives its courts jurisdiction over out-of-state defendants to the maximum extent allowed by the U.S. Constitution."[162] *Federal Rule of Civil Procedure 4(k)(2)* provides "[f]or a claim that arises under federal law, serving a summons or filing a waiver of service establishes personal jurisdiction over a defendant if: (A) the defendant is not subject to jurisdiction in any state's courts of general jurisdiction; and (B) exercising jurisdiction is consisted with the United States Constitution and laws."[163] The *Clayton Act*, which allows nationwide service of process, permits us to consider whether we have personal jurisdiction over Teva Ltd. "on the basis of [its] aggregate contacts with the United States as a whole" under the *Fifth Amendment's Due Process clause*.[164]

[163] *Fed. R. Civ. P. 4(k)(2)*.

Regardless of which statute or rule we operate under, exercising personal jurisdiction over Teva Ltd. must still be constitutional. The parties dispute whether exercising jurisdiction is constitutional and what standard to apply. We apply the same analysis applied to a personal jurisdiction analysis under the *Fourteenth Amendment*.[165]

a. We do not enjoy general personal jurisdiction over Teva Ltd.

Value Drug first argues we enjoy general jurisdiction over Teva Ltd. based on Teva Ltd.'s "continuous and systematic contacts" with the United States or alternatively as Teva USA's alter ego. At the outset, we reject Teva Ltd.'s argument and evidence proffered purportedly supporting its argument we may exercise jurisdiction over Teva Ltd. under an alter ego theory.[166] Value Drug does not plead we have personal jurisdiction over Teva Ltd. under an alter ego theory. It cannot now attempt to rely on an unplead theory through briefing.[167]

Oct. 17, 2017)* (same); *see also Livnat v. Palestinian Auth., 851 F.3d 45, 54, 428 U.S. App. D.C. 140 (D.C. Cir. 2017)* ("To be sure, neither the Supreme Court nor this court has expressly analyzed whether the *Fifth* and *Fourteenth Amendment* standards differ. But the Second, Sixth, Seventh, Eleventh, and Federal Circuits have, and all agree that there is no meaningful difference in the level of contacts required for personal jurisdiction. The only difference in the personal-jurisdiction analysis under the two Amendments is the *scope* of relevant contacts: Under the *Fourteenth Amendment*, which defines the reach of state courts, the relevant contacts are state-specific. Under the *Fifth Amendment*, which defines the reach of federal courts, contacts with the United States as a whole are relevant. That difference is not at play in this case." (citations omitted)).

[166] ECF Doc. No. 117 at 20, 23-24.

[167] Value Drug argues we "should not [] ignore[]" its evidence regarding alter ego jurisdiction. ECF Doc. No. 151 at 9 n.5. While Value Drug is correct our inquiry on a *12(b)(2)* motion is not limited to pleadings—in fact a Plaintiff may not rest on its pleading when jurisdiction is challenged—Value Drug is incorrect it can rest on an unplead theory for personal jurisdiction merely by providing evidence of its unplead theory once jurisdiction is challenged. The very case Value Drug relies on for its argument illustrates this principle. *See In re Chocolate Confectionary Antitrust Litig., 641 F. Supp. 2d 367, 381 (M.D. Pa. 2009)* ("Although plaintiffs bear the ultimate burden of proving personal jurisdiction by a preponderance of the evidence, such a showing is unnecessary at the preliminary stages of litigation . . . **Rather, plaintiffs must merely allege sufficient facts to establish a prima facie case of jurisdiction over the person. Once these allegations are contradicted by an opposing affidavit, however, plaintiffs must present similar evidence in support of personal jurisdiction** . . . '[A]t no point may a plaintiff rely

We consider whether we otherwise have general jurisdiction over Teva Ltd. Our inquiry is whether the "corporation's 'affiliations with the State are so 'continuous and systematic' as to render [it] essentially at home in the forum State."[168] The Supreme **[*47]** Court recently reiterated the standard for general jurisdiction:

> A state court may exercise general jurisdiction only when a defendant is "essentially at home" in the State. General jurisdiction, as its name implies, extends to "any and all claims" brought against a defendant. Those claims need not relate to the forum State or the defendant's activity there; they may concern events and conduct anywhere in the world. But that breadth imposes a correlative limit: Only a select "set of affiliations with a forum" will expose a defendant to such sweeping jurisdiction. In what we have called the "paradigm" case, an individual is subject to general jurisdiction in her place of domicile. And the "equivalent" forums for a corporation are its place of incorporation and principal place of business.[169]

Value Drug concedes Teva Ltd.'s state of incorporation and principal place of business is Israel.[170] Value Drug's argument apparently seizes on our Supreme Court's language in *Daimler* leaving open the possibility of exercising general jurisdiction over a defendant "in an exceptional case . . . [when] a corporation's operations in a forum other than its formal place of incorporation or principal place of business **[*48]** may be so substantial and of such a nature as to render the corporation at home in that State."[171] But "it is incredibly difficult to establish general jurisdiction [over a corporation] in a forum *other* than the place of incorporation or principal place of business."[172] Value Drug argues we have general jurisdiction due to Teva Ltd.'s extensive contacts with the United States.[173] We are unpersuaded by Value Drug's citations to pre-*Daimler* cases and see no "exceptional reason" to exercise general personal jurisdiction over Teva Ltd.

b. We defer ruling on whether we enjoy specific personal jurisdiction over Teva Ltd. following limited jurisdictional discovery.

Value Drug alternatively argues we may exercise specific jurisdiction over Teva Ltd. Specific jurisdiction requires: (1) minimum contacts—"some act by which [the defendant] purposefully avails itself of the privilege of conducting activities within the forum state"; (2) "[t]he plaintiff's claims . . . 'must arise out of or relate to the defendant's contacts' with the forum'"; and (3) exercising jurisdiction does not offend "traditional notions of fair play and substantial justice.'"[174] Value Drug relies on three theories: (1) Teva Ltd.'s contacts with **[*49]** the United States are

---

on the bare pleadings alone in order to withstand a defendant's *Rule 12(b)(2)* motion to dismiss for lack of in personam jurisdiction . . . Once the motion is made, plaintiff must respond with actual proofs, not mere allegations.' When the plaintiff responds with affidavits or other evidence in support of its position, the court is bound to accept these representations and defer final determination as to the merits of the allegations until a pretrial hearing or the time of trial." (internal citations omitted) (emphasis added)).

[171] *Daimler, 571 U.S. at 139 n.19*.

[172] *Chavez v. Dole Food Co., Inc., 836 F.3d 205, 223 (3d Cir. 2016)* (alteration and emphasis in original) (quoting *Monkton Ins. Servs., Ltd. v. Ritter, 768 F.3d 429, 432 (5th Cir. 2014)*).

[173] ECF Doc. No. 117 at 19 ("Teva Ltd. cannot continuously and systematically avail itself of the privileges of U.S. capital investment, U.S. intellectual property protections, U.S. federal courts, and U.S. consumer market access as if at home in the U.S., as it has at all relevant times, without also having to answer for its U.S. wrongdoings.").

[174] *Ford Motor Co., 141 S. Ct. at 1024-25* (further citations omitted).

sufficient to exercise specific jurisdiction; (2) we can impute Watson's contacts to Teva Ltd. because Teva Ltd. is Watson's successor-in-interest; and (3) we can impute Watson's contacts to Teva Ltd. because Teva Ltd. ratified its conduct.[175]

We grant limited jurisdictional discovery on Value Drug's first theory.[176] Value Drug pleads "[e]ach defendant has transacted business, maintained substantial contacts, and/or committed overt acts in furtherance of the illegal scheme and conspiracy throughout the United States."[177] Our Court of Appeals has held this bare conclusory pleading is "clearly frivolous" and not warranting of jurisdictional discovery.[178] But in response to Teva Ltd.'s motion to dismiss, Value Drug proffered evidence of Teva Ltd.'s contacts with the United States.[179] What Value Drugs did not do is provide evidence or argument the claims before us now arise from or relate to Teva Ltd.'s contacts with the United States.[180] We are satisfied based on the record before us, including Value Drug's Complaint and proffer of evidence in response to Teva Ltd.'s motion to dismiss, Value Drug's jurisdictional discovery will not be a fishing expedition but rather a targeted inquiry **[*50]** into whether the claims here arise from or relate to Teva Ltd.'s contacts with the United States.[181]

We reject Value Drug's theory of personal jurisdiction under the successor-in-interest and ratification theories.[182] Value Drug does not plead or proffer facts supporting its legal conclusion "Teva Ltd. ratified Watson's conduct challenged herein."[183] We have no basis to provide discovery when we have no facts supporting this theory.

We similarly reject Value Drug's successor liability theory of personal jurisdiction as plead. "[U]nder Pennsylvania law, the acts of a predecessor corporation may be attributed to its successor for purposes of determining whether jurisdiction over the successor is proper."[184] "Accordingly, jurisdiction is established if the successor corporation

---

[175] ECF Doc. No. 117.

[176] *See, e.g.*, *Toys "R" Us, Inc., 318 F.3d at 456* ("Although the plaintiff bears the burden of demonstrating facts that support personal jurisdiction . . . courts are to assist the plaintiff by allowing jurisdictional discovery unless the plaintiff's claim is 'clearly frivolous.' If a plaintiff presents factual allegations that suggest 'with reasonable particularity' the possible existence of the requisite 'contacts between [the party] and the forum state, the plaintiff's right to conduct jurisdictional discovery should be sustained.") (internal citations omitted). Our Court of Appeals found "the record before the District Court contained sufficient non-frivolous allegations (and admissions) to support the request for jurisdictional discovery." *Id.*

[177] ECF Doc. No. 1 ¶ 17.

[178] *Massachusetts Sch. of L. at Andover, Inc. v. Am. Bar Ass'n, 107 F.3d 1026, 1042 (3d Cir. 1997)* ("The district court found (at least by implication), and we agree, that [plaintiff's] jurisdictional claims were clearly frivolous. Our result is in accord with other cases which hold that a mere unsupported allegation that the defendant 'transacts business' in an area is 'clearly frivolous.'"); *see also* *Falcone v. WiredLogic, Inc., No. 06-800, 2006 U.S. Dist. LEXIS 113496, 2006 WL 8459813, at *6 (E.D. Pa. Oct. 26, 2006)* ("[M]ere unsupported allegations that a defendant 'transacts business,' has 'contacts,' or 'expressly targeted Pennsylvania residents' are clearly frivolous and discovery will be denied.").

[179] *See, e.g.*, ECF Doc. No. 117.

[180] *See, e.g., id.*

[181] We again note Value Drug does not plead an alter ego or agency theory. Thus, Value Drug's inquiry must not undertake to establish jurisdiction through Teva Ltd.'s subsidiaries' contacts with the United States and involvement with Colcrys.

[182] Because we apply Pennsylvania law to determine personal jurisdiction over Teva Ltd., and because the parties dispute which law may apply *substantively* to Value Drug's theory of successor liability, our finding as to personal jurisdiction has no bearing on whether Teva Ltd. may be liable as a successor under a potentially applicable law besides Pennsylvania.

[183] ECF Doc. No. 1 ¶ 12 (merely pleading a legal conclusion and no further facts in the Complaint about ratification); ECF Doc. No. 117 at 8, 26 (citing to no evidence in the record supporting its ratification theory).

[184] *Falcone, 2006 U.S. Dist. LEXIS 113496, 2006 WL 8459813, at *9* (quoting *Huth v. Hillsboro Ins. Mgmt., 72 F. Supp. 2d 506, 510 (E.D. Pa. 1990)* (citing *Simmers v. Am. Cyanamid Corp., 394 Pa. Super. 464, 576 A.2d 376, 381 (Pa. Super. 1990)*).

may be held liable under Pennsylvania's law of successor liability."[185] Value Drug relies on the "express assumption of liability" exception to Pennsylvania's general rule of no successor liability.[186] The parties dispute whether Value Drug pleading Watson continues to exist precludes a finding of successor liability under Pennsylvania law.[187] In *In re Suboxone Antitrust Litigation* ***[*51]*** , Judge Goldberg considered whether a defendant could be liable as a successor-in-interest under Pennsylvania law when the plaintiff argued the defendant expressly assumed liabilities.[188] Judge Goldberg found it could not for three reasons: (1) the agreement did not expressly transfer liabilities to a successor corporation; (2) "the continued existence of original entity precludes successor liability;" and (3) the plaintiffs failed to allege the original entity had any liability, regardless.[189] Judge Goldberg found: "[i]t is well established that '[i]f the original entity still exists . . . there is no successor, and therefore no successor liability.'"[190] He continued: "[a]t least one district court has concluded that, under Pennsylvania law, the 'cessation of ordinary business operations' factor may be satisfied when the predecessor does not dissolve or completely cease to exist, but rather is reduced to an assetless shell."[191] "Where, however, the original entity is not an assetless shell and does not completely cease ordinary operations, successor liability is precluded."[192]

The plaintiffs in *In re Suboxone* argued it did not matter the predecessor entity still existed, **[*52]** relying on a Massachusetts case applying Massachusetts law.[193] Judge Goldberg found he need not consider the plaintiffs' argument because the Massachusetts case decided under Massachusetts law which Plaintiffs relied on "is inapposite given [his] finding that there was no assumption of liability."[194] Value Drug attempts to distinguish the

Litig., No. 03-17000, 2010 U.S. Dist. LEXIS 57859, 2010 WL 2403355, at *7 (N.D. Ohio June 11, 2010)* ("Of course, if the original entity still exists, there is no successor—and no successor liability."))

[191] *In re Suboxone, 2017 U.S. Dist. LEXIS 176555, 2017 WL 4810801, at *6* (citing *Lehman Bros. Holdings v. Gateway Funding Diversified Mtg. Servs., L.P., 989 F. Supp. 2d 411, 436 (E.D. Pa. 2013)*).

[192] *Id.* (citing *Norfolk, 153 F. Supp. 3d at 808*).

[193] Interestingly, Value Drug also cites the case the plaintiffs in *In re Suboxone* relied on—*Town of Lexington v. Pharmacia Corp., No. 12-11645, 2015 U.S. Dist. LEXIS 36815, 2015 WL 1321457 (D. Mass. Mar. 24, 2015)*—in its sur-reply. ECF Doc. No. 136 at 11. Value Drug cites it for the proposition it is "the general rule . . . that 'a successor who assumes liabilities of its predecessor may not escape liability simply because the predecessor lives on.'" *Id.*

case on this basis arguing Judge Goldberg did not decide whether the predecessor entity must cease to exist when there is an express assumption of liability.

But we are not persuaded. Judge Goldberg found three independent reasons to deny successor liability—one of which included the predecessor entity still existed. We are persuaded by the analysis presented by Judge Goldberg and other judges to have considered this issue.[195] Value Drug pleads Watson still exists, precluding a finding of successor liability under Pennsylvania law, and thus precluding us from imputing Watson's contacts for purposes of jurisdiction as plead.[196]

We reject Value Drug's argument we enjoy general jurisdiction over Teva Ltd. or we can impute Watson's contacts to Teva Ltd. under **[*53]** a successor-in-interest or ratification theory as plead. But we grant limited jurisdictional discovery on whether Value Drug's claims arise from or relate to Teva Ltd.'s contacts with the United States. Understanding Value Drug may amend its Complaint and plead other theories of our personal jurisdiction for Teva Ltd. to the extent possible under *Rule 11*, we defer jurisdictional discovery until after Value Drug can amend.

3. We deny Watson and Amneal's request for sanctions.

Watson and Amneal move for sanctions against Value Drug in the form of their fees in prosecuting their motion to dismiss under *28 U.S.C. § 1927* if we dismiss Value Drug's complaint with leave to amend.[197] We decline to

---

[194] *In re Suboxone, 2017 U.S. Dist. LEXIS 176555, 2017 WL 4810801, at *8 n.10*.

[195] *See, e.g., 2017 U.S. Dist. LEXIS 176555, [WL] at *7-8*; *Fend v. Allen-Bradley Co., No. 17-01701, 2019 U.S. Dist. LEXIS 205730, 2019 WL 6242119, at *1 (E.D. Pa. Nov. 20, 2019)* (rejecting successor theory because predecessor entity still existed); *Norfolk S. Ry. Co. v. Pittsburgh & W. Virginia R.R., 153 F. Supp. 3d 778, 807 (W.D. Pa. 2015)*, *aff'd*, *870 F.3d 244 (3d Cir. 2017)* (post-trial memorandum addressing successor liability under Pennsylvania law and finding "[i]f the original entity still exists, however, there is no successor, and therefore, no successor liability"); *Norfolk S. Ry. Co. v. Pittsburgh & W. Virginia R.R. & Power Reit, No. 11-1588, 2014 U.S. Dist. LEXIS 83209, 2014 WL 2808907, at *16 (W.D. Pa. June 19, 2014)* (denying summary judgment on successor theory when plaintiffs argued under the fraudulent purpose and de facto merger/mere continuation exceptions to general rule (later addressing the same in *Norfolk S. Ry. Co., 153 F. Supp. 3d at 807*) and noting it did not find any binding precedent on this issue but "[s]everal outside jurisdictions have recognized that the continued existence of a predecessor forecloses the availability of successor liability"); *Hyjurick v. Commonwealth Land Title Ins. Co., No. 11-1282, 2012 U.S. Dist. LEXIS 59087, 2012 WL 1463633, at *4 (M.D. Pa. Apr. 27, 2012)* ("The facts alleged in the complaint, however, do not implicate successor liability. Commonwealth is alleged to be a separate corporate entity. Fidelity cannot be Commonwealth's successor if Commonwealth exists as a separate corporation, albeit one that is a wholly owned subsidiary."); *see also Phila. Elec. Co. v. Hercules, Inc., 762 F.2d 303, 307, 309 (3d Cir. 1985)* (finding successor liability under Pennsylvania law when an express assumption occurred but the predecessor entity had been dissolved).

[196] Value Drug relies on *Eagle Nat'l Bank v. ISCP Funding, LLC*, to argue Pennsylvania law does not require the predecessor entity to cease existence when there is an express assumption of liabilities. *No. 00685, 2011 Phila. Ct. Com. Pl. LEXIS 107, 2011 WL 10525397, at *2-3 (Pa. Com. Pl. May 3, 2011)*. The case is inapposite. It does not address successor liability, nor does it involve a claim from a plaintiff trying to establish liability over a defendant under a successor theory. Rather, the case involved the sellers of a company suing the purchaser seeking a preliminary injunction to enjoin the purchaser from using certain disputed funds transferred during the sale. *2011 Phila. Ct. Com. Pl. LEXIS 107, [WL] at *1-2*. In *Eagle National Bank*, the sellers transferred their assets to the purchaser, "including reserve deposits held for the benefit of the branch offices." *2011 Phila. Ct. Com. Pl. LEXIS 107, [WL] at *2*. Certain branches disclaimed affiliation with the purchaser and requested the sellers release any funds in the reserve deposits. *Id.* The sellers forwarded the request to release the funds to the purchaser—who then owned the reserve deposits. *Id.* The purchaser disclaimed it had to pay the branches the deposits. *Id.* The sellers sought a preliminary injunction to stop the purchaser from using the money in dispute, which the sellers transferred to the purchaser during the sale and the sellers argued the purchaser agreed to pay in the purchase agreement when it assumed certain liabilities. *Id.* Judge Bernstein issued the preliminary injunction finding the elements satisfied. *2011 Phila. Ct. Com. Pl. LEXIS 107, [WL] at *5*. The case thus did not involve the issue we have before us nor did it address successor liability.

[197] ECF Doc. No. 131 at 13-14.

sanction Value Drug at this stage. Its pleading is inaccurate and possibly inartful; it is not frivolous and there is no basis to find bad faith or intentional misconduct.

Congress in *section 1927* provides "[a]ny attorney or other person admitted to conduct cases in any court of the United States or any Territory thereof who so multiplies the proceedings in any case unreasonably and vexatiously may be required by the court to satisfy personally the excess costs, expenses, and attorneys' fees reasonably incurred because of such conduct." **[*54]** [198] Watson and Amneal argue they are entitled to their fees for moving to dismiss a complaint which Value Drug knew contained false allegations after receiving the settlement agreements and then consciously choose not to amend. We disagree.

Our Court of Appeals instructs sanctions under *28 U.S.C. § 1927* are limited to when an attorney has "(1) multiplied proceedings; (2) unreasonably and vexatiously; (3) thereby increasing the cost of the proceedings; (4) with bad faith or with intentional misconduct."[199] The sanctions are "intended to deter an attorney from *intentionally* and unnecessarily delaying judicial proceedings, and they are limited to the costs that result from such delay," but our Court of Appeals cautions "courts should exercise [this sanctioning power] only in instances of a serious and studied disregard for the orderly process of justice."[200] Congress's allowance of fees in *section 1927* is to be construed narrowly "and with great caution so as not to stifle the enthusiasm or chill the creativity that is the very lifeblood of the law."[201] "Consequently, sanctions may not be imposed under *§ 1927* absent a finding that counsel's conduct resulted from bad faith, rather than misunderstanding, bad judgment, or well-intentioned **[*55]** zeal."[202]

Value Drug's choice to stand on its Complaint and defend against the motions to dismiss is not so clearly frivolous, unreasonable, or vexatious to rise to the level of bad faith warranting sanctions. We decline to sanction Value Drug.

III. Conclusion

Pharmacy chain Value Drug alleges Takeda Pharmaceuticals, manufacturer of a brand name Colcrys—a drug approved by the Food and Drug Administration for the treatment and prevention of gout and familial Mediterranean fever—entered a single conspiracy with generic drug manufacturers Par, Watson, and Amneal to restrict generic Colcrys output in exchange for defined periods of exclusive sales and thus extended periods of supracompetitive profits. But Value Drug fails to plead a plausible single horizontal conspiracy among the four competitors based on settlement agreements. The settlement agreements are to the contrary on their face. We must dismiss its Complaint based on this theory with leave to amend if Value Drug can plead an alternative theory. Value Drug similarly fails to plead multiple theories of personal jurisdiction over an Israeli purchaser of some of Watson's assets but skates by with a bare pleading and a proffer of **[*56]** evidence of one theory entitling it to limited specific jurisdictional discovery before dismissal. We need not reach the substance of Par and Teva USA's alternative arguments for dismissal with an understanding Value Drug is now fully apprised of both entity's arguments should it amend consistent with our Order.

ORDER

AND NOW, this 28th day of December 2021, upon considering Defendant Takeda's Motion to dismiss (ECF Doc. No. 103), Plaintiff's Response (ECF Doc. No. 124), Defendant's Reply (ECF Doc. No. 135), Defendant Par Pharmaceutical's Motion to dismiss (ECF Doc. No. 104), Plaintiff's Response (ECF Doc. No. 120), Defendant's Reply (ECF Doc. No. 134), Defendants Teva Pharmaceutical Industries, LTD.'s and Teva Pharmaceuticals USA, Inc's Motion to dismiss (ECF Doc. No. 106), Plaintiff's Response (ECF Doc. No. 117), Defendants' Reply (ECF Doc. No. 130), Plaintiff's Surreply (ECF Doc. No. 136), Defendants' Response to Plaintiff's Surreply (ECF Doc. No. 140), Defendant Teva Ltd.'s letter brief regarding jurisdiction (ECF Doc. No. 146), and Plaintiff's Response (ECF Doc. No. 151), Defendants Amneal's and Watson's Motion to dismiss (ECF Doc. No. 107), Plaintiff's Response (ECF Doc. No. 124), **[*57]** Defendants' Reply (ECF Doc. No. 131), following extensive oral argument, and for reasons in the accompanying Memorandum, it is **ORDERED**:

1. Defendant Takeda's Motion (ECF Doc. No. 103) is **GRANTED** without prejudice;

2. Defendant Par's Motion (ECF Doc. No. 104) is **GRANTED** without prejudice allowing Par to join the co-defendants' arguments and is dismissed without prejudice;

3. Defendants Amneal Pharmaceuticals, LLC's and Watson Laboratories, Inc's Motion (ECF Doc. No. 107) is **GRANTED** in part without prejudice but **DENIED** in part as to its request for sanctions;

4. Defendants Teva Pharmaceuticals USA, Inc's and Teva Pharmaceutical Industries, Ltd.'s Motion (ECF Doc. No. 106) is **GRANTED in part** and **DEFERRED in part** as to personal jurisdiction over Teva Ltd.:

a. Teva USA may join the co-defendants' arguments and is dismissed without prejudice;

b. Teva Ltd. remains the only defendant subject to an amended complaint and review of our personal jurisdiction over it following expedited limited discovery;

5. We grant Value Drug's request:

a. To file an amended Complaint to address the pleading deficiencies and conform the pleadings to the later arguments compliant with *Rule 11* no later than **January 18, 2022**;

[*58] b. If it elects to not amend the Complaint under the leave granted under this Order, to begin limited expedited discovery into our ability to exercise specific personal jurisdiction over remaining defendant Teva Ltd. through: the issuance of no more than five interrogatories and five document requests to Teva Ltd. and subpoena records from Teva USA issued no earlier than **January 21, 2022** to be responded no later than **January 31, 2022**; and to take no more than three depositions over a virtual sharing platform not exceeding three hours limited to our exercise of specific personal jurisdiction to be completed no later than **February 8, 2022**; and to then supplement its arguments allowing us to exercise personal jurisdiction over Teva Ltd. not exceeding fifteen pages filed no later than **February 15, 2022** with a response from Teva Ltd. due **February 25, 2022**.

Opinion by: KEARNEY

Opinion

AMENDED MEMORANDUM[1]

KEARNEY, J.

A pharmacy purchaser alleges a manufacturer of a patented brand name drug conspired to restrict output of its patented drug by agreeing to settle three patent infringement lawsuits it filed against three generic drug manufacturers then actively seeking to sell generic versions of its product. The pharmacy alleged the brand name manufacturer gave these three alleged infringing generic competitors exclusive periods to sell an approved generic of its brand name drug before its patent expired. The pharmacy claims the three settlement agreements are actual evidence of one overarching joint venture conspiracy created by the brand name manufacturer designed to restrict the output of its drug and maintain higher prices and greater profits. The competing generic companies and the brand name company move to dismiss arguing the pharmacy pleads no direct or circumstantial evidence of a single agreement to conspire, no antitrust injury, and we lack personal jurisdiction over an Israeli company acquiring some of the assets and liabilities of one of the generic companies. The pharmacy responds by partially shifting to an unplead theory after reviewing **[*4]** the three settlement agreements but stands on the same plead facts. The pharmacy insists the three settlement agreements are still direct evidence of a single horizontal conspiracy among four competitors in a market with six or seven other admitted non-party competitors.

But the settlement agreements themselves do not demonstrate a single conspiracy among the brand and generics to provide exclusive distribution rights. They do exactly the opposite. The pharmacy argues it plead circumstantial evidence of a conspiracy from the close timing and similarity of the three settlement agreements even though the agreements depend on none of the other six or seven non-conspiring generic manufacturers seeking to sell this drug through a court order allowing their sale or otherwise. The pharmacy swears the competitors admitted adding more manufacturers will lead to a price collapse and lost profits. We also reject the pharmacy's initial thoughts concerning exercising personal jurisdiction over the Israeli purchaser based on the allegations and record adduced to date but grant its request for limited discovery.

We grant the brand name manufacturer's and three generic manufacturers' motions to dismiss **[*5]** for failure to plead an antitrust conspiracy but grant the pharmacy's request for leave to amend. We further grant the pharmacy's request for limited expedited discovery into our specific personal jurisdiction over the Israeli purchaser should it not amend the complaint and instead wish to continue suing only the Israeli purchaser. We decline a request to sanction the pharmacy for not amending its complaint after reviewing the three settlement agreements.

I. Alleged facts

---

[1] We amend our December 28, 2021 Memorandum (ECF Doc. No. 153) only to clarify unwieldly language in our introduction sentence without affecting our legal analysis or import of our December 28, 2021 Order (ECF Doc. No. 154). Our apologies for inartful language.

Medical professionals prescribe the pharmaceutical drug Colcrys to treat gout and familial Mediterranean fever. It contains the active ingredient colchicine, which "had been used in the United States for decades before the [Food and Drug Administration]" approved Colcrys.[2] But in 2006, the Food and Drug Administration "encouraged the pharmaceutical industry to submit New Drug Applications ('NDAs') for previously unapproved drugs to facilitate the FDA evaluation of older drug products by contemporary standards."[3]

Takeda Pharmaceuticals U.S.A., Inc.'s predecessor applied for three New Drug Approvals for colchicine's treatment of familial Mediterranean fever and the treatment and prevention of gout in 2008. **[*6]** [4] The Food and Drug Administration approved Colcrys as "the first pharmaceutical product contain[ing] colchicine as the sole active ingredient" on July 29, 2009.[5] It "granted Takeda's colchicine product a three-year exclusivity for the treatment of gout and seven-year exclusivity for the treatment of familial Mediterranean fever."[6] Takeda's exclusivity period ended on July 29, 2016.[7]

Par, Watson, and Amneal file Abbreviated New Drug Applications certifying their generic versions of Colcrys do not infringe on Takeda's patents or Takeda's patents are invalid.

Once a name brand drug comes to market, generic drug companies attempt to bring an AB-rated[8] generic form of the drug to market by filing an Abbreviated New Drug Application with the Food and Drug Administration, which significantly lowers the price of the brand drug once there are "many generic competitors" on the market.[9] "[B]arriers to entry by a generic drug manufacturer are high"; they must "first formulate a generic version of the brand-name drug; conduct bioequivalence and other studies needed to support an Abbreviated New Drug Application to [the Food and Drug Administration]; file the [Abbreviated New Drug Application] **[*7]** and work with [the Food and Drug Administration] on any issues that arise regarding approval; and invest in manufacturing facilities for the commercialization of the product."[10] To incentivize generic drug companies "to seek approval of generic alternatives to branded drugs, the first generic manufacturer to file an [Abbreviated New Drug Application] containing a certification that the generic version does not infringe on any valid patent listed in the [Food and Drug Administration's] 'Orange Book' against the reference-listed brand drug . . . gets 180 days of protection from competition from other generic versions of the drug."[11] If a generic drug manufacturer files the Abbreviated New

[10] *Id.* ¶ 39.

Drug Application certifying its drug does not infringe on the brand name drug's patents, the brand name manufacturer can sue the generic manufacturer for patent infringement, which delays final Food and Drug Administration approval of the Abbreviated New Drug Application for up to thirty months.[12]

Par Pharmaceuticals, Inc. filed an Abbreviated New Drug Application with the Food and Drug Administration in December 2011 seeking approval for its generic version of Colcrys.[13] Par certified "all **[*8]** pertinent patents that Takeda listed in the [Food and Drug Administration's] Orange Book under the Colcrys [New Drug Application] were either invalid or not infringed."[14] This certification entitled Par "to a 180-day period of regulatory exclusivity during which the Food and Drug Administration would not approve other generic manufacturers to sell a generic version of Colcrys."[15] Amneal Pharmaceuticals, LLC and Watson Laboratories, Inc., along with six other generic drug companies, also filed Abbreviated New Drug Applications "seeking approval to sell generic versions of Colcrys and made similar . . . certifications that any listed patents were invalid or not infringed."[16]

***Takeda sues the generic drug companies including Par, Watson, and Amneal; launches its own Authorized Generic; and settles the litigation with Par, Watson, and Amneal*.**

Takeda responded by suing all the generic drug company filers for patent infringement.[17] Takeda sued Par first in August 2013, then sued the other generic drug companies at an unplead time.[18] But Takeda's Colcrys patents are allegedly "fatally weak" and "had already been found to have not been infringed . . . in litigation regarding another product **[*9]** called Mitigare."[19]

While proceeding with its patent infringement litigations, Takeda agreed non-party Prasco could distribute its authorized generic of Colcrys "to try to lock up generic sales for Takeda" and keep the profits "otherwise lost to generic competitors."[20] Prasco distributed the generic Colcrys "at a price just slightly lower than branded Colcrys" and "collected and remitted back to Takeda virtually all of the revenues" from generic Colcrys sales.[21]

[15] *Id.* ¶ 42.

[16] *Id.* ¶ 43. Value Drug conceded this allegation is not accurate during oral argument because all eight generic filers did not file at the same time; eight generic manufacturers filed over the course of the allegations in the complaint, presumably from 2011 to 2019. ECF Doc. No. 148, Tr. 23:17-24:2.

[17] ECF Doc. No. 1 ¶ 44.

[18] *Id.*

[19] *Id.* ¶ 45. While Value Drug places this allegation right after its allegation "Takeda sued Par first, in August 2013," thereby suggesting this ruling came out *before* Takeda sued Par and the other generics, Value Drug conceded at oral argument this ruling did not come out before Takeda filed the lawsuits for patent infringement against the generics. It rather came out in May 2015. ECF Doc. No. 148, Tr. 56:17-57:14.

[20] ECF Doc. No. 1 ¶ 49.

[21] *Id.* ¶¶ 50-51.

Par obtained tentative Food and Drug Administration approval for its Abbreviated New Drug Application in February 2015.[22] Watson also obtained tentative approval in October 2015.[23] But Par and Watson still needed final approval to market their generic drug.

Value Drug Company, a pharmacy chain purchaser of pharmaceutical drugs, sees these developments as incentivizing Takeda and the generics to conspire to limit output and keep prices higher: Takeda faced devastation in profits if more generics than only its authorized generic came to market; Par faced an "unpleasant prospect of entering" the market with its generic because Prasco already had a generic in the market, forcing Par "to offer very low prices to dislodge **[*10]** and gain market share, depriving Par of the benefits of its 180-day exclusivity as the first [Abbreviated New Drug Application] filer"; and Watson and Amneal faced "the unattractive prospect of entering a market where Prasco and Par had already been fighting for market share for 180 days" thereby making both offer "rock-bottom prices to gain sales and share."[24]

So on the eve of trial in Takeda's patent infringement suit against Par, "Takeda, Par, Watson, and Amneal agreed to a scheme to restrain price competition to Colcrys by concertedly reducing generic Colcrys output, and agreed to share in the monopoly profits maintained thereby until January of 2024."[25] These four competitors (with six or seven others on the sidelines) entered into a single horizontal conspiracy effected through Takeda settling its patent infringement suits against Par, Watson, and Amneal under agreements presumably providing benefits to all litigants. Par and Takeda settled in November 2015, Watson and Takeda settled in January 2016, and Amneal and Takeda settled in March 2016—all with separate, written settlement agreements.[26] As for Amneal, although the parties did not execute the formal settlement agreement until **[*11]** March 2016, Takeda and Amneal signed a term sheet with essential terms of the settlement on December 10, 2015—shortly after Takeda and Par settled.[27]

Par and Takeda entered a distribution agreement where Par would refrain from launching its generic version of Colcrys "despite having tentative [Food and Drug Administration] approval" and "[two-and-a-half] years following entry of the agreement (*i.e.* in July of 2018) . . . Par would . . . replace Prasco as the distributor of Takeda's authorized generic Colcrys and remit back to Takeda virtually all of the revenues from sales of authorized generic Colcrys, keeping some of the revenues for itself."[28] Takeda entered into settlement agreements with Watson and Amneal whereby each would get "a defined time, believed to be between [six] and [eighteen] months in duration, to sell generic Colcrys free from competition from all other generic Colcrys sellers" in exchange for "Watson and Amneal stay[ing] off the market for several years until their defined period of marketing commenced."[29]

[29] *Id.* ¶ 56.

***Takeda and Par's settlement agreement*.**

Takeda and Par settled Takeda's claim for patent infringement against Par on November **[*12]** 24, 2015.[30] Takeda granted Par a non-exclusive license through a license agreement "to distribute, have distributed, market, sell, or offer for sale a generically-labeled .6 mg colchicine oral tablet product manufactured by Takeda" beginning July 1, 2018.[31] Takeda also granted Par "a fully paid-up, royalty-free, irrevocable, non-exclusive license" to sell its generic of Colcrys.[32] Par and Takeda agreed Par could begin selling its generic of Colcrys beginning on the earlier of January 1, 2024; the date a court finds the patents covering Colcrys invalid or not infringed based on a drug "substantively identical" to Par's generic of Colcrys; the date a "Third Party" begins selling its generic of Colcrys with Takeda's permission; or a date following another generic drug manufacturer launching "at risk" without permission from Takeda.[33]

***Takeda and Watson's settlement agreement*.**

Takeda and Watson settled Takeda's claim for patent infringement against Watson on January 7, 2016—two months after Takeda settled with Par.[34] Takeda and Watson contemporaneously entered into a license agreement which is part of the settlement **[*13]** agreement granting Watson "a fully paid-up, royalty-free, irrevocable, non-exclusive license" to sell its generic Colcrys.[35] Watson's license is subject to additional terms, including when the

controlled by [Takeda] and its respective Affiliates as of the Effective Date or at any time in the future, which Licensed Patents and intellectual property rights are necessary to (1) manufacture, have manufacture, use, import, distribute, offer to sell, have sold and sell in the Territory the Watson ANDA Product and any and all components thereof as necessary to make, have made, manufacture, or have manufactured the Watson Anda Product as described in the Watson ANDA, and (ii) to make and have made the Watson ANDA Product outside the Territory only for use, sale and importation in or for the Territory (the "***License***")." *Id.* at 16 § 1.1(a).

[36] *Id.* at 16-17 §§ 1.2(a)-(e), (g) ("Subject to the terms of the License in Paragraph 1.1 above, Watson shall be entitled to make, use, import, market, offer for sale, sell, and distribute [Watson's generic of Colcrys] during the period beginning on the first to occur of the following (each, a '***Generic Entry Date***') and continuing until the expiration of the last to expire of the Licensed Patents: (a) October 15, 2020; (b) [t]he date that is one hundred thirty-five days (135) days prior to the date on which a first commercial sale of a Generic Equivalent by a Third Party (other than the Par ANDA Product or the Amneal ANDA Product) is permitted or authorized pursuant to a license or other authorization by Takeda; (c) [t]he date that, pursuant to a license or other authorization by Takeda, Par is permitted to launch the Par ANDA Product or Amneal is permitted to launch the Amneal ANDA Product; (d) [t]he date of a Final Court Decision . . . holding that all unexpired claims of the Licensed Patents that were asserted and adjudicated against a Third Party are invalid, canceled, or unenforceable or not infringed, where the judgment of a non-infringement is based on a label that is substantively identical to the Watson label that received tentative approval from the FDA on October 6, 2015; (e) the date of a first commercial sale of a Third Party Generic Equivalent following a Final Court decision of non-infringement by that Third Party based on a label *not* substantively identical to the Watson label that received tentative approval from FDA on October 6, 2015 . . . (g) Subject to Watson's payment of the Profit Share as applicable, the date that is the earlier of (i) ten (10) business days after the date of a first commercial sale in the Territory by any Third Party without license or authorization from Takeda of a Generic Equivalent."). They further agreed: "For the avoidance of doubt, all the Generic Entry Dates in this Paragraph 1.2 are subject to any regulatory exclusivity to which the First Filer is entitled." *Id.* at 18. "Third Party" means "a Person other than a Party or an Affiliate of a Party." *Id.* at 33, Ex. A to License (Definitions). "'Affiliate' means any Person that directly or indirectly controls, is controlled by, or is under common control with any one of the Parties." *Id.* "Party" means "[e]ach Plaintiff and Defendant" collectively "Parties" - here, Takeda Pharmaceuticals USA, Inc. and Watson Laboratories, Inc. *Id.* at 15.

[37] ECF Doc. No. 123-2, Ex. 3, at 2.

[38] *Id.* at 2, 18. "Subject to the terms of this License Agreement, including without limitation Paragraph 1.2 below, Takeda hereby grants Amneal and its respective Affiliates (and to the extent necessary, its suppliers, distributors, and customers, as the case may be): a fully paid-up, royalty-free, irrevocable, non-exclusive license under the Licensed Patents and any other intellectual property rights owned or controlled by Plaintiff and its respective Affiliates as of the Effective Date or at any time in the future, which Licensed Patents and intellectual property rights are necessary to manufacture, have manufactured, use, import, distribute, offer to sell, have sold and sell in or for the Territory the Amneal ANDA Product and any and all components thereof as necessary to make, have made, manufacture, or have manufactured the Amneal ANDA Product as described in the Amneal ANDA (the 'License')." *Id.* at 18 § 1.1.

covering Colcrys invalid or not infringed based on a drug "substantively identical" to Amneal's generic of Colcrys; or the date a third party begins selling its generic of Colcrys with Takeda's permission; a date following another generic drug manufacturer launching "at risk" without permission from Takeda.[39]

Amneal received final approval for its generic of Colcrys approximately six months later in September 2016.[40]

***The alleged conspiracy comes to an unexpected end*.**

Takeda and the three generics negotiated an "escape clause" in each settlement agreement allowing the three generics to sell their generic Colcrys if another non-party company entered the market.[41]

The escape clause triggered a few months later.[42] Non-party generic **[*15]** Mylan filed and notified Takeda in September 2016 of its Abbreviated New Drug Application with a certification Takeda's patents are either invalid or not infringed.[43] Takeda sued Mylan for patent infringement in October 2016, and Takeda and Mylan settled the litigation in November 2017.[44] The settlement purportedly "permitted Mylan to launch upon a court decision invalidating the patents covering Colcrys."[45] Our Delaware colleague Judge Richard G. Andrews "issued an opinion granting a motion by [non-party] Hikma for summary judgment in patent litigation concerning another product subject to the same patents as Colcrys, which Takeda failed to appeal."[46] Mylan launched its generic of Colcrys in

---

[39] "Pursuant to the License, Amneal shall be entitled to sell and distribute, without any limitation or restriction, [Amneal's generic of Colcrys] during the period beginning on the first to occur of the following (each, a 'Generic Entry Date') and continuing until the expiration of the last to expire of the Licensed Patents: (a) October 15, 2020; (b) [t]he date of a Final Court Decision . . . holding that all Asserted Claims of the Licensed Patents are invalid, canceled, or unenforceable or not infringed, where the judgment of a non-infringement is based on a label that is substantively identical to the Amneal label pending before the FDA as of the Effective Date of this Agreement; (c) [t]he date of a first commercial sale of a Generic Equivalent in the Territory by any third party permitted or authorized pursuant to a license or other written authorization granted to such third party by Takeda . . . (e) Subject to Amneal's payment of the Profit Share as applicable, the date that is the earlier of (i) ten (10) business days after the date of a first commercial sale in the Territory by any Third Party without license or authorization from Takeda of a Generic Equivalent." *Id.* at 18-19 §§ 1.2(a)-(c), (e). They further agreed: "For the avoidance of doubt, all the Generic Entry Dates in this Paragraph 1.2 are subject to any regulatory exclusivity to which the First Filer is entitled." *Id.* at 19. "Third Party" means "a Person other than a Party or an Affiliate of a Party." *Id.* at 32, Ex. A to License (Definitions). "'Affiliate' means any Person that directly or indirectly controls, is controlled by, or is under common control with any one of the Parties . . . ." *Id.* at 30. Party means "[e]ach Plaintiff and Defendant" collectively "Parties" - here, Takeda Pharmaceuticals USA, Inc. and Amneal Pharmaceuticals LLC. ECF Doc. No. 123-2 at 17. We note third party is not used as the defined term "Third Party" in Amneal's settlement agreement. Value Drug nonetheless concedes if Watson enters the market, so does Amneal. *See* ECF Doc. No. 124 at 9 n.7, 10 n.9 (Value Drug admitting Par and Amneal came in when Watson came in).

[40] ECF Doc. No. 1 ¶ 48.

November 2019.[47] Mylan's entry into the market "thereby trigger[ed] the 'escape clause' in Par, Watson, and Amneal's agreements" with Takeda.[48]

***Value Drug sues Takeda, Par, Amneal, Watson, Teva Ltd., and Teva USA for violations of Section I and II of the Sherman Act*.**

Value Drug — a purchaser of brand Colcrys from Takeda and generic Colcrys from Prasco and Par — sued Takeda, Par, Amneal, Watson, Teva Ltd., and Teva USA for violations of *Section I* and *II of the Sherman Act* on August 5, 2021.[49] Value Drug alleges **[*16]** Takeda entered a single conspiracy with Par, Watson, and Amneal "to restrict output and restrain competition" by preventing AB-rated generics of Colcrys from coming to market.[50] The alleged conspiracy depended on all defendants' participation, and Value Drug alleges the co-conspirators enjoyed "supracompetitive Colcrys profits" by virtue of this conspiracy to restrict competition.[51]

The basic features of the conspiracy derived from Takeda, Par, Watson, and Amneal agreeing: Par would not bring its own generic to market and would rather agree to market Takeda's "authorized generic" previously distributed by Prasco, but Par would not do so until two-and-a-half years after the agreement to lengthen the time Takeda enjoyed the Colcrys market competition-free; Par would pay Takeda a "large royalty"; Watson and Amneal would restrict selling their generics for several years in exchange for a defined period of time to sell their respective generic Colcrys products free from all other generic competition; and Takeda would enter license agreements with other non-conspiring generic companies to delay their entry beyond Watson and Amneal's agreed periods of competition-free sales **[*17]** "thereby giving the co-conspirators long periods of supracompetitive Colcrys profits."[52]

II. Analysis

Value Drug's presently plead claims hinge on Takeda's settlement agreements with Par, Watson, and Amneal. Par, Watson, and Amneal argue the settlement agreements directly contradict Value Drug's plead theory, Value Drug reviewed the settlement agreements but chose not to amend, and we must dismiss the Complaint because the conspiracy is implausible.

Takeda argues the principal points adopted by all competitors: (1) the conspiracy as plead is implausible on its face and directly contradicted by the settlement agreements; (2) Value Drug fails to plead sufficient facts supporting a single, horizontal conspiracy even if it plead a plausible conspiracy; and (3) Value Drug's claims are barred because the settlement agreements forming the basis of the alleged antitrust violations are merely a legitimate exercise of Takeda's patent rights under the *Patent Act*.[53] Amneal and Watson move to dismiss on similar grounds arguing the

[49] *Id.* ¶ 7. Value Drug alleges Teva Pharmaceutical Industries Ltd. and Teva Pharmaceuticals USA, Inc. purchased Watson and expressly assumed its liabilities in July 2015 and/or ratified Watson's conduct. *Id.* ¶¶ 12-13. At oral argument, Value Drug conceded Teva Ltd. signed the purchase agreement in July 2015, but the sale did not close until August 2016. The date of the closing is not plead. These facts comprise the extent of Value Drug's allegations involving Teva Ltd. and Teva USA. *See generally* ECF Doc. No. 1.

[50] ECF Doc. No. 1 ¶¶ 1, 7-8, 10-14, 27. Value Drug also sued Endo Pharmaceuticals Inc. We dismissed Endo Pharmaceuticals from the litigation upon the parties' agreement. ECF Doc. No. 125.

[51] ECF Doc. No. 1 ¶¶ 3, 60.

[52] *Id.* ¶¶ 3(a)-(e).

[53] ECF Doc. No. 103.

settlement agreements Value Drug attempts to rely upon as evidence of the conspiracy directly contradict its theory and make the conspiracy implausible, particularly with respect to **[*18]** Watson and Amneal because they did not stand to receive the benefit Value Drug alleges since neither received a defined period of serial exclusivity.[54] Value Drug responds to Takeda, Watson, and Amneal's motions together, arguing: (1) it adequately pleads direct evidence of the conspiracy; (2) alternatively, it adequately pleads circumstantial evidence of the conspiracy; (3) it has adequately plead a single conspiracy; and (4) the *Patent Act* does not immunize Takeda's conduct in settling the patent litigation.[55]

Par moves to dismiss because Value Drug fails to plead an antitrust injury.[56] Par argues it had two independent regulatory bars to launch its generic: (1) lack of final FDA approval; and (2) Takeda's patents, which break the chain of causation.[57] Value Drug counters antitrust injury is not typically decided on a motion to dismiss, it adequately plead Par would have received earlier FDA approval to launch but for the conspiracy, Par's argument regarding Takeda's patents providing an independent barrier to launching is flawed, and even if it is not, Value Drug adequately pleads Takeda's patents are invalid or not infringed by the generic defendants.[58]

Israeli purchaser Teva Ltd. moves to dismiss **[*19]** for lack of personal jurisdiction.[59] Teva Ltd. argues Value Drug fails to adequately plead our personal jurisdiction and exercising personal jurisdiction over it is unconstitutional.[60] Teva USA moves to dismiss for failure to plead Teva Ltd. and Teva USA's involvement in the conspiracy or any facts regarding their liability as Watson's successor-in-interest or on a ratification theory.[61]

Because we find Value Drug's plead conspiracy is implausible on its face, we need not reach the substance of Par's and Teva USA's motions to dismiss which joined in the other defendants' arguments. We grant Takeda's, and Watson and Amneal's motions to dismiss because Value Drug fails to plead a plausible conspiracy.[62] We defer

In determining whether to grant a 12(b)(6) motion, "we accept all well-pleaded allegations as true and draw all reasonable inferences in favor of the plaintiff" but "disregard threadbare recitals of the elements of a cause of action, legal conclusions, and conclusory statements." *Robert W. Mauthe, M.D., P.C., 806 F. App'x at 152* (quoting *City of Cambridge Ret. Sys. v. Altisource*

Teva Ltd.'s motion to dismiss for lack of personal jurisdiction subject to further review following expedited jurisdictional discovery if Value Drug chooses not to amend its Complaint and intends to proceed against Teva Ltd. alone.

A. Value Drug does not plead a plausible single horizontal conspiracy.

Value Drug brings two claims against Takeda and the three generics—conspiracy to restrain trade in violation of *15 U.S.C. § 1* and conspiracy to monopolize in violation of *15 U.S.C. § 2*—and one **[*20]** claim for monopolization against Takeda only in violation of *15 U.S.C. § 2*.

Section 1 of the Sherman Act provides "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal."[63] *Section 1* antitrust plaintiffs must establish three things: (1) "a contract, combination . . . or conspiracy"; (2) an unreasonable restraint on trade; and (3) antitrust injury.[64] "[T]he existence of an agreement is the hallmark of a *Section 1* claim."[65] "Instead of assigning [contract, combination . . . or conspiracy] a distinct meaning, courts have interpreted them collectively to require 'some form of concerted action' . . . in other words, a 'unity of purpose or a common design and understanding or a meeting or minds' or 'a conscious commitment to a common scheme.'"[66]

Section 2, conversely, has "sweeping language" making it unlawful to "monopolize, attempt to monopolize, or conspire to monopolize, interstate or international commerce."[67] "A *Section 2* conspiracy claim has four elements: (1) an agreement to monopolize; (2) an overt act in furtherance of the conspiracy; (3) a specific intent to monopolize; and (4) a causal connection between the **[*21]** conspiracy and the injury alleged."[68] But a litigant may bring a *Section 2* claim for monopolization as well, requiring "'(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.'"[69] The second element of a

[68] *Howard Hess Dental Lab'ys Inc., 602 F.3d at 253*.

monopolization claim requires "the willful acquisition or maintenance of monopoly power."[70] "As this element makes clear, the acquisition or possession of monopoly power must be accompanied by some anticompetitive conduct on the part of the possessor."[71]

While Value Drug's claim for monopolization does not require the existence of a conspiracy on its face, it requires "some anticompetitive conduct" on Takeda's part to acquire or maintain the monopoly power.[72] Value Drug only alleges Takeda's "conduct" is its participation in the conspiracy with Par, Watson, and Amneal. Because we find Value Drug has not plausibly alleged a conspiracy, we also find Value Drug fails to plead a monopolization claim.[73]

In pleading a conspiracy, a plaintiff must plead "enough factual matter (taken as true) to suggest that an agreement **[*22]** was made."[74] A plaintiff may rely on direct or circumstantial evidence or some combination of both to plead an agreement.[75] If relying exclusively on direct evidence of conspiracy, "the complaint must plead 'enough fact to raise a reasonable expectation that discovery will reveal' this direct evidence" of illegality.[76] "And if the plaintiff alternatively expects to rest on the circumstantial evidence of parallel behavior, the complaint's statement of facts must place the alleged behavior in 'a context that raises a suggestion of a preceding agreement, not merely parallel conduct that could just as well be independent action.'"[77] "[R]egardless of whether the plaintiff expects to prove the existence of a conspiracy directly or circumstantially, it must plead 'enough fact[s] to raise a reasonable expectation that discovery will reveal evidence of illegal agreement.'"[78] We look at the conspiracy as a whole when assessing each defendants' involvement, and "[i]n short, the issue is whether the pleading delineates to some sufficiently specific degree that a defendant purposefully joined and participated in the conspiracy."[79]

1. Value Drug's single horizontal [*23] conspiracy as plead.

Value Drug alleges Takeda, Par, Watson, and Amneal conspired to restrain trade and monopolize the market on the eve of Par's trial with Takeda in November 2015.[80] They allegedly agreed: Par would refrain from launching its generic of Colcrys and instead distribute Takeda's authorized generic two-and-a-half years after reaching its settlement agreement with Takeda and remit substantial royalty payments back to Takeda; "Watson and Amneal would restrict their output generic of Colcrys for several years, and then would each enjoy a defined period of time to sell their respective generic Colcrys products free from competition from all other would-be generic Colcrys makers;" and Takeda "would enter licenses with [the] other [non-conspiring] generic companies that would delay their entry beyond Watson and Amneal's agreed periods of competition-free sales, thereby giving the co-conspirators long periods of supracompetitive Colcrys profits."[81]

Value Drug swears the conspiracy has "two basic features."[82] First, Takeda and Par settled their patent litigation and "entered into a sham joint venture . . . that concealed the first part of their output restriction conspiracy."[83] Par **[*24]** and Takeda agreed Par would not launch its generic of Colcrys, and in July 2018—two-and-a-half years after they executed the settlement agreement—Par would become the distributor of Takeda's authorized generic of Colcrys.[84] Under this arrangement, Par would "remit back to Takeda virtually all of the revenues from sales of authorized generic Colcrys, keeping some of the revenues for itself."[85] The second feature involved Watson and Amneal.[86] They too settled their respective litigation with Takeda and entered into separate settlement agreements.[87] Takeda "struck agreements with Watson and Amneal, respectively, offering each a defined time, believed to be between [six] and [eighteen] months in duration, to sell generic Colcrys free from competition from all other generic Colcrys sellers, if Watson and Amneal would stay off the market for several years until their defined periods of marketing commenced."[88] The conspiracy, though, had an escape clause.[89] Under Value Drug's theory, "Par, Watson, and Amneal would refrain from launching their own generic versions of Colcrys only for so long as non-conspirators did so. That is, the co-conspirators agreed that if a non-conspiring seller of generic Colcrys **[*25]** entered the market, Par, Watson, and Amneal could do so . . . Par's selling Takeda's authorized generic Colcrys avoided this escape clause."[90] Value Drug continues: "This escape clause, and its necessary implication that the co-conspirators were willing to restrict their own output only so long as non-conspirators were doing so, too, illustrates the interdependence of the promises of the co-conspirators, the existence of the conspiracy, the fact that

[90] *Id.*

the output restriction was against the unilateral economic interests of the conspirators and was only in their joint conspiratorial interests, and demonstrates the singular nature of the conspiracy."[91]

Value Drug alleges this arrangement benefitted all the co-conspirators.[92] According to Par "[t]he distribution agreement between Takeda and Par . . . provides powerful incentives to ensure that the parties preserve the two-entrant market."[93] And Par itself purportedly explained the logic behind the conspiracy: "[A market with] a single branded drug (Takeda's Colcrys) and a single generic version (Par's authorized generic) only functions if the market for Colcrys-equivalent colchicine is limited to those two products. **[*26]** [] Although a drug market can maintain price stability with a single generic version of a drug on the market, multiple entrants often product a market-wide price collapse with mass renegotiation and cancellation of supply agreements. [] The distribution agreement between Takeda and Par recognizes this dynamic and provides powerful incentives to ensure that the parties preserve the two-entrant market."[94] Par also "asserted that even the entry of a single additional competitor would cause its distribution joint venture with Takeda 'to lose approximately 97 million in annual revenue;'" and "with 'two or three other generic ANDA filers enter[ing] the market,' the joint venture would lose even more, because '[a]s additional generic versions of Colcrys enter the market, Par would be forced to swiftly reduce prices to maintain even a portion of its market share.'"[95] Value Drug pleads each defendant had no unilateral interest in this arrangement, and "[t]he conduct among [Takeda, Par, Amneal, and Watson] only makes economic sense if there was an agreement among the four of them to restrain their respective generic and authorized-generic output and prevent the price collapse that Par so vividly **[*27]** described."[96] In other words, under Value Drug's theory, the conspirators agreed Par, Watson, and Amneal would stay off the market to each enjoy defined periods of competition-free sales to avoid "the price collapse" Par so vividly described when more than a brand drug and one generic drug is on the market.[97]

Value Drug alleges this conspiracy "restricted output of generic Colcrys, kept Colcrys prices at supracompetitive levels, and delayed their fall to competitive levels."[98] Value Drug alleges the conspiracy "was very profitable to both Takeda and Par" even though "Watson and Amneal did not get to enjoy the fruits of the conspiracy."[99] Value Drug alleges Takeda "earned approximately $1 billion more than it would have had it faced generic competition," "Par expected to earn approximately $50-80 million more than it would absent the conspiracy," and "Watson and Amneal each could have expected to earn approximately $12-36 million more during their respective periods as the only generic seller on the market than they would have earned absent the conspiracy."[100]

2. Value Drug pleads no direct evidence of the conspiracy.

---

Value Drug posits Takeda had no unilateral interest to stop selling its generic drug through Prasco, Par had no unilateral interest to restrict its output of generic Colcrys for several years and agree to defined period of sales free from other generic competition, and Watson and Amneal had no unilateral economic interests to agree to restrict their output for several years after Par's 180-day exclusivity elapsed. *Id.*

[97] *Id.*

[98] *Id.* ¶ 67.

[99] *Id.* ¶ 68.

[100] *Id.* ¶¶ 69-71.

"Allegations of direct evidence of an agreement, **[*28]** if sufficiently detailed, are independently adequate" to plead a conspiracy.[101] Direct evidence is "evidence that is explicit and requires no inferences to establish the proposition or conclusion being arrested" such as "a document or conversation explicitly manifesting the existence of the agreement in question."[102] Value Drug argues it offers two forms of direct evidence—the settlement agreements themselves and defendants' judicial admissions in a different litigation.[103]

Value Drug cites a string of cases purportedly supporting its argument the individual, bilateral settlement agreements are direct evidence of the single, horizontal conspiracy among Takeda, Par, Watson, and Amneal.[104] Value Drug fails to appreciate why these cases are distinguishable from what it pleads here. For example, Value Drug cites to one of Judge Goldberg's opinions in the *King Drug Co. of Florence v. Cephalon, Inc.* litigation.[105] Judge Goldberg considered motions for summary judgment on whether individual settlement agreements between the brand and generic defendants *themselves* violated antitrust principles because they *individually* contained large and unjustified reverse settlements following our Supreme Court's holding in *Actavis*.[106] Value Drug seizes on **[*29]** Judge Goldberg's footnote "[p]laintiffs have presented direct evidence of concerted action through the settlement agreements between Cephalon and each of the Generic Defendants, and Defendants have not challenged Plaintiffs' ability to meet the concerted action requirement on these claims."[107] But Value Drug fails to acknowledge the concerted action Judge Goldberg is discussing is *not* concerted action among the brand and *all* of the generics, it is concerted action between the brand and *each* of the generics with respect to the individual settlement agreements raising antitrust concerns. Judge Goldberg addressed several agreements; Value Drug alleges one.

Judge Thrash in *In re Androgel Antitrust Litigation (No. II)* considered whether individual settlement agreements between the brand and each generic raised antitrust concerns as a reverse payment settlement on a motion for summary judgment.[108] One of the generics moved for summary judgment arguing the plaintiffs failed to

[102] *Id. at 323-24 n.23*; *see also* *King Drug Co. of Florence, Inc. v. Cephalon, Inc., Nos. 06-1797, 06-1833, 06-2768, 2014 U.S. Dist. LEXIS 84818, 2014 WL 2813312, at *6 (E.D. Pa. June 23, 2014)* (deciding a motion for summary judgment and finding "[w]hether this evidence is properly considered 'direct' depends on whether the fact-finder would have to take an additional logical step in order to conclude that a conspiracy occurred. In other words, an additional step is indicative of circumstantial evidence. Direct evidence requires no extrapolation, as with 'a document or conversation explicitly manifesting the existence of the agreement in question.") (citing *In re Insur., 618 F.3d at 324 n.23*)).

[103] ECF Doc. No. 124 at 11-14. Value Drug argues we can take judicial admission of unplead statements made in a different litigation in front of Judge Andrews. We need not decide whether we can consider these statements to defeat the motion to dismiss because the statements are in support of Value Drug's unplead "Second Wave" theory. We further detail Value Drug's argued "Second Wave" theory in the circumstantial evidence section.

[104] ECF Doc. No. 124 at 11-12.

[105] *88 F. Supp. 3d 402 (E.D. Pa. 2015)*.

[106] *F.T.C. v. Actavis, Inc., 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*; *see also* *King Drug Co. of Florence, 88 F. Supp. 3d at 407-410* (detailing the terms of each settlement agreement between the brand and individual generic manufacturers), 422 (denying defendants' motions for summary judgment).

[107] *King Drug Co. of Florence, 88 F. Supp. 3d at 410 n.9*. In this footnote, Judge Goldberg rejected defendants' argument "there exists a 'special,' heightened standard of review for motions for summary judgment in the antitrust context," distinguishing the cases the defendants relied on because the cases addressed "the limited inferences that may be drawn from ambiguous, circumstantial evidence in establishing concerted action . . . ." *Id.* Judge Goldberg found the plaintiffs presented direct evidence of concerted action in the form of the written settlement agreements.

[108] *No. 09-2084, 2018 U.S. Dist. LEXIS 99716, 2018 WL 2984873, at *1-4 (N.D. Ga. June 14, 2018)*. Solvay—the brand drug—sued two generic manufacturers for patent infringement after they made Paragraph IV certifications when filing their Abbreviated

demonstrate a conspiracy to restrain trade in violation of Sections 1 and 2 of the Sherman Act.[109] Judge Thrash observed both claims "require the same threshold showing—the existence of an agreement to restrain trade" and "[a] written **[*30]** contract satisfies this requirement 'only if it embodies an agreement to unlawfully restrain trade.'"[110] Judge Thrash concluded the settlement agreements constituted direct evidence of a conspiracy because "the settlement agreements specifically address the conduct the Plaintiffs argue is unlawful."[111] Judge Thrash reasoned: "The parties negotiated and agreed that in exchange for dropping the patent litigation, providing some services, and delaying generic introduction until 2015, the Generics would receive compensation. Whether that common objective—dropping the patent litigation in exchange for compensation—was an illegal restraint of trade is a separate question. But if it was, then the settlements are clear, direct evidence of an agreement to unlawfully restrain trade."[112] In *In re Androgel*, the very conduct purportedly constituting the antitrust violation—"dropping the patent litigation in exchange for compensation" in the form of a reverse payment—appeared in the terms of each individual written settlement agreement between the brand and the generic manufacturer. Thus, as Judge Thrash aptly reasoned, if a jury found this conduct to be in violation of the Sherman Act, the settlement agreements constituted **[*31]** *direct evidence* of the conspiracy between the brand and each individual generic as they memorialized the very agreement which violated the Sherman Act.

This is not what we have here. Value Drug is not challenging the separate bilateral settlement agreements as individually violative of the Sherman Act.[113] Value Drug pleads a single, horizontal antitrust conspiracy among Takeda, Par, Watson, and Amneal. The bilateral settlement agreements are not direct evidence of this alleged conspiracy. We are persuaded by another Judge Goldberg opinion in the King Drug Co. of Florence, Inc. v.

New Drug Applications. 2018 U.S. Dist. LEXIS 99716, [WL] at *2-3. The separate litigations ran on parallel schedules, and on the same day, Solvay settled the individual cases with the generics. 2018 U.S. Dist. LEXIS 99716, [WL] at *3. Each settlement agreement also contained "business promotion agreements" wherein the brand drug and generic agreed to share profits of the brand drug and the generic agreed to do something—here either promote the brand drug to physicians or serve as a backup supplier of the brand drug. 2018 U.S. Dist. LEXIS 99716, [WL] at *4. Judge Thrash found "[t]ogether, these types of settlements are called 'reverse payment' settlements, and they have recently become popular in pharmaceutical litigation." 2018 U.S. Dist. LEXIS 99716, [WL] at *4. The plaintiffs alleged the defendants violated federal ***antitrust law*** by entering into reverse settlement agreements. 2018 U.S. Dist. LEXIS 99716, [WL] at *5. This contrasts with our case, where the alleged antitrust violation is a single, horizontal conspiracy among all defendants to restrict the output of Colcrys.

[109] 2018 U.S. Dist. LEXIS 99716, [WL] at *7.

[110] *Id.* (further citations omitted).

[111] 2018 U.S. Dist. LEXIS 99716, [WL] at *8.

[112] *Id.* We note Value Drug selectively and misleadingly quotes Judge Thrash's reasoning to support its position here.

[113] Value Drug also misplaces reliance on In re Wellbutrin XL Antitrust Litig., 133 F. Supp. 3d 734 (E.D. Pa. 2015) and United Food & Com. Workers Loc. 1776 & Participating Emps. Health & Welfare Fund v. Teikoku Pharma USA, 296 F. Supp. 3d 1142 (N.D. Cal. 2017). In *In re Wellbutrin*, the "Wellbutrin Settlement was executed on February 9, 2007" resolving various pending lawsuits between the brand drug and various generic manufacturers and "was comprised of multiple agreements." In re Wellbutrin XL, 133 F. Supp. 3d at 745. Not only did the parties sign one settlement agreement (made up of various agreements, including "the Omnibus Agreement"), one generic took the lead initially in negotiating on behalf of *all* generic manufacturers. *Id.* This is not what Value Drug alleges today. Value Drug alleges *separate* settlement agreements between Takeda and Par, Takeda and Watson, and Takeda and Amneal. Value Drug does not allege together these constituted a global settlement agreement, like in *In re Wellbutrin*, nor does it allege either Par, Watson, or Amneal negotiated on behalf of all of them collectively. Similarly, in United Food & Com. Workers Loc. 1776, the plaintiffs argued "the Settlement Agreement, **signed by all three defendants**, satisfies the 'contract, combination, or conspiracy' elements" of their antitrust claims. 296 F. Supp. 3d at 1165 (emphasis added). Judge Orrick observed "Defendants **do not dispute this**, although they do dispute the significance, lawfulness, and effect of the various provisions in that Agreement" and therefore granted judgment in favor of plaintiff on the conspiracy element of its claims. *Id.* (emphasis added). We do not have all defendants signing one settlement agreement here. We have individual settlement agreements between Takeda and each generic manufacturer. Nor do the defendants here concede the settlement agreements satisfy the conspiracy claim. Neither of these cases provides teeth to Value Drug's misplaced argument.

Cephalon, Inc litigation.[114] Judge Goldberg separately considered whether four individual, bilateral reverse payment settlement agreements executed between the brand drug Cephalon and the generic defendants "were the product of an overall antitrust conspiracy between all of the Defendants" on a motion for summary judgment.[115] As we have here, Judge Goldberg observed "[t]he motions at issue do not concern the legality of the individual, bilateral settlement agreements between Cephalon and each Generic Defendant. What is at issue is Plaintiffs' claim that the separate settlement agreements were in fact the manifestation of a horizonal conspiracy between all Defendants—with Cephalon **[*32]** at the center—to restrain trade in the modafinil market."[116] Judge Goldberg found the individual, bilateral settlement agreements are not direct evidence of an overall antitrust conspiracy.[117] There, the plaintiffs argued the settlement agreements themselves, which contained substantially similar language and structure, constituted direct evidence.[118] Judge Goldberg rejected this argument, reasoning, "[t]he settlement agreements themselves are individual agreements, not global agreements amongst all Defendants. Plaintiffs are unable to point to any direct evidence that the Generics agreed amongst themselves, let alone that such overall agreement also included Cephalon. Indeed, each agreement runs only between Cephalon and a single Generic. While Plaintiffs are correct that the settlements contain similar terms, and it could be argued that this similarity is evidence of an overall conspiracy, that is classic circumstantial, not direct evidence."[119]

Value Drug pleads the generics individually settled their patent infringement litigations with Takeda around the same time and with bilateral settlement **[*33]** agreements containing similar structure and terms, purportedly manifesting an overarching single, horizontal conspiracy among Takeda, Par, Watson, and Amneal.[120] Value Drug conceded at oral argument there is no provision in the settlement agreements—beside in Watson's agreement which references Par and Amneal's generic Colcrys product—providing *direct* evidence of an agreement among Takeda, Par, Watson, and Amneal to restrict generic Colcrys output.[121] Value Drug further conceded "conspirators normally don't lay out and specifically say, hey, this is what I'm doing."[122] But this is exactly the type of "smoking gun" evidence Value Drug needs if it intends to rely on the settlement agreements as *direct evidence* of a conspiracy.[123] There is simply no direct evidence of an antitrust conspiracy in the individual settlement agreements themselves. The mere fact Watson's agreement mentions two other products may give rise to an *inference* Watson, Par, and Amneal knew of each other's agreements' terms and somehow fell into an overarching output restriction

---

[114] *King Drug Co. of Florence, Inc., 2014 U.S. Dist. LEXIS 84818, 2014 WL 2813312, at *6*. We recognize this case involves a motion for summary judgment and thus a different standard than the one we apply to the motion to dismiss before us. Judge Goldberg's reasoning as to why the bilateral settlement agreements are not direct evidence of a single horizontal conspiracy is nonetheless persuasive.

[115] *2014 U.S. Dist. LEXIS 84818, [WL at *1*.

[116] *2014 U.S. Dist. LEXIS 84818, [WL] at *6*.

[117] *2014 U.S. Dist. LEXIS 84818, [WL] at *1, 6-7*.

[118] *2014 U.S. Dist. LEXIS 84818, [WL] at *6*.

[119] *2014 U.S. Dist. LEXIS 84818, [WL] at *7*.

[120] *See, e.g.*, ECF Doc. No. 1 ¶¶ 53-57.

[121] ECF Doc. No. 148, Tr. 26:12-27:15.

[122] *Id.*, Tr. 27:10-12.

[123] *Cephalon, 2014 U.S. Dist. LEXIS 84818, 2014 WL 2813312, at *5* (discussing proof of conspiracy by direct evidence and stating "[b]ecause direct evidence of an unlawful conspiracy—a 'smoking gun'—is often unavailable, proof by inferences drawn from circumstantial evidence is the norm.") (citing *InterVest, Inc. v. Bloomberg, L.P., 340 F.3d 144, 159 (3d Cir. 2003)*) (further citation omitted).

conspiracy. But this is a conclusion requiring us to *infer* something and thus is *not* direct evidence; it is "classic circumstantial" evidence just like **[*34]** Judge Goldberg reviewed on a summary judgment record.

Value Drug also argues it provides direct evidence of the overarching conspiracy in the form of judicial admissions by Par in front of Judge Andrews.[124] This too fails to carry the day for Value Drug. The statements by Par only address Par and Takeda's distribution agreement and the benefits provided to Par and Takeda by maintaining a two-drug market.[125] The statements do not address Watson and Amneal or their agreement and involvement in this alleged overarching conspiracy among Takeda, Par, Watson, and Amneal. Value Drug's reliance on the statements would require us to draw inferences Takeda, Par, Watson, and Amneal entered an overarching conspiracy among each other from Par's statements about its agreement with Takeda and the benefits it draws from it. This reach is classic circumstantial evidence, not direct.

Value Drug pleads no direct evidence of a conspiracy because neither the settlement agreements nor Par's statements are direct evidence of the single, horizontal conspiracy among Takeda, Par, Watson, and Amneal.

3. Value Drug pleads no circumstantial evidence of the conspiracy.

Plaintiffs may plead an anti-competitive **[*35]** conspiracy violating federal law through circumstantial evidence.[126] But mere allegations of parallel conduct are not enough, nor are allegations of "conscious parallelism."[127] "In order 'to avoid deterring innocent conduct that reflects enhanced, rather than restrained, competition,' . . . and in order to enforce the *Sherman Act*'s requirement of an agreement, the Supreme Court has required that 'a *§ 1* plaintiff's offer of conspiracy evidence must tend to rule out the possibility that the defendants were acting independently."[128] "Some courts have denominated these facts, the presence of which may indicate the existence of an actionable agreement, as 'plus factors'" and although not exhaustive, our Court of Appeals recognizes three such plus factors: (1) motive to enter the conspiracy; (2) evidence defendants acted contrary to their interests; and (3) evidence implying a traditional conspiracy.[129] "[P]lus factors are simply circumstances in which the inference of independent action is less likely than that of concerted action."[130]

Value Drug argues it adequately pleads circumstantial evidence of a conspiracy because it pleads conscious parallel conduct, motive to agree, and the conspiring **[*36]** defendants acted contrary to their economic interests.[131] Takeda, Watson, Amneal, and Par counter the conspiracy is implausible, and Value Drug fails to

---

[124] ECF Doc. No. 1 ¶¶ 58-59; *see also* ECF Doc. No. 124 at 13 (characterizing its pleading as judicial admissions to Judge Andrews which "conceded the purpose and effect of the conspiracy and the 'joint venture.'").

[125] ECF Doc. No. 1 ¶¶ 58-59.

[126] *See, e.g. In re Ins., 618 F.3d at 321*.

[127] *Id.* ("Parallel conduct is, of course, consistent with the existence of an agreement; in many cases where an agreement exists, parallel conduct—such as setting prices at the same level—is precisely the concerted action that is the conspiracy's object. But as the Supreme Court has long recognized, parallel conduct is 'just as much in line with a wide swath of rational and competitive business strategy unilaterally prompted by common perceptions of the market.'" (quoting *Twombly, 550 U.S. at 554*)).

[128] *Id.* (further citations omitted).

[129] *Id.* (quoting *Flat Glass, 385 F.3d at 360*). Evidence implying a traditional conspiracy "consists of 'non-economic evidence that there was an actual manifest agreement not to compete,' which may include 'proof that the defendants got together and exchanged assurances of common action or otherwise adopted a common plan even though no meetings, conversations, or exchanged documents are shown.'" *Id.* (quoting *Flat Glass, 385 F.3d at 361*) (further citation omitted).

[130] *In re Generic Pharms., 338 F. Supp. 3d at 448* (further citation omitted) (alteration in original).

[131] Value Drug does not argue it pleads evidence implying a traditional conspiracy.

adequately plead circumstantial evidence of a conspiracy nonetheless. We need not decide whether Value Drug plausibly pleads consciously parallel conduct because its conspiracy *as plead* is admittedly implausible belying any inference of concerted action. But we grant Value Drug leave to amend should it be able to plead its later-argued theory consistent with *Rule 11*.

We again start with Value Drug's plead conspiracy. Value Drug's plead purpose of the conspiracy is for "the four [conspirators] to restrain their respective generic and authorized-generic output **and prevent the price collapse that Par so vividly described**"—*i.e.*, the price collapse which occurs when there are more than two entrants (one brand and one generic of a drug) in the market—in order to enjoy and maintain supracompetitive profits.[132] To achieve this purpose, Takeda, Par, Watson, and Amneal agreed to consistently maintain a two-entrant system until January 2024, with Par first enjoying exclusivity well past its 180-day exclusivity provided as the first Abbreviated New Drug Application **[*37]** filer, and then Watson and Amneal each enjoying successive periods of exclusivity—something neither would otherwise enjoy since neither filed their Application first.[133] Understanding other non-conspirator generics could also come to market, the four competitors purportedly agreed Takeda would provide them licenses to enter the market after Watson and Amneal had their exclusivity period.[134] The competitors also purportedly agreed, though, if a non-conspiring generic came to market, all of them could enter too; in other words, they would only restrict their output if the non-conspirator generics did so too.[135] In so doing, they restricted competition and stood to gain supracompetitive profits.[136]

But what Value Drug pleads is belied by the settlement agreements Value Drug attempts to rely on as circumstantial evidence of the conspiracy. It is not disputed Watson and Amneal did not have a defined period of exclusive sales. The purported conspiracy (as best we can tell based on the allegations with all inferences in Value Drug's favor) really worked this way:

• Par agreed to be Takeda's distributor of its authorized generic from July 1, 2018 through the earlier of June 30, 2022 (or the **[*38]** date Par launches its own generic of Colcrys or any other single-ingredient oral colchicine product other than Takeda's or its generic of Colcrys);[137]

• Par also agreed with Takeda it could launch its own generic of Colcrys on the earlier of January 1, 2024; the date a court finds the patents covering Colcrys invalid or not infringed based on a drug "substantively identical" to Par's generic of Colcrys; the date a "Third Party" begins selling its generic of Colcrys with Takeda's permission; or a date following another generic drug manufacturer launching "at risk" without permission from Takeda.[138] Third Party *does not* except Watson and Amneal; rather, it means "any person other than a Party or an Affiliate to a Party."[139]

• Watson agreed with Takeda it could launch its own generic of Colcrys on the earlier of: October 15, 2020; 135 days before another generic (besides Par or Amneal) begins selling its generic of Colcrys with Takeda's permission; the date Par or Amneal begins selling their generics of Colcrys with Takeda's permission; the date a court finds the patents covering Colcrys invalid or not infringed based on a drug "substantively identical" to Watson's generic of Colcrys; the date another **[*39]** generic starts selling after a Court determines the Colcrys

---

[132] ECF Doc. No. 1 ¶¶ 58-60.

[133] *Id.* ¶¶ 3(a)-(e), 54-57.

[134] *Id.* ¶ 3(e).

[135] *Id.* ¶ 57.

[136] *Id.* ¶ 54.

[137] ECF Doc No. 123, Ex. 1, at 16 § 1.1.

[138] ECF Doc No. 123, Ex. 1, at 17 § 1.3.

[139] ECF Doc. No. 123, Ex. 1, at 29, Ex. A to License Agreement (Definitions).

patents are invalid or not infringed based on a drug "*not* substantively identical" to Watson's generic of Colcrys; or a date following another generic drug manufacturer launching "at risk" without permission from Takeda.[140]

- And Amneal agreed with Takeda it could launch its own generic of Colcrys on the earlier of: October 15, 2020; the date a court finds the patents covering Colcrys invalid or not infringed based on a drug "substantively identical" to Amneal's generic of Colcrys; the date a third party begins selling its generic of Colcrys with Takeda's permission; or a date following another generic drug manufacturer launching "at risk" without permission from Takeda.[141]

Thus, drawing all inferences in favor of Value Drug but reviewing the agreements Value Drug itself relies on to state its claim, we know:

- Par and Takeda would be the only two sellers on the market, with Takeda distributing its branded Colcrys and Par distributing Takeda's authorized generic, from July 1, 2018 to October 15, 2020 when Watson and Amneal entered the market with their generic products; upon their joint entry, Watson and Amneal would cause the "price **[*40]** collapse" with four market entrants—which, according to Value Drug's own pleading, would cause the generics to "swiftly reduce prices to maintain even a portion" of the market share.
- If Watson's entry date of 135 days before another generic (besides Par or Amneal) got triggered, Watson still would not have a period of exclusivity. Rather, both Par and Amneal could come in with their generics.[142] Thus, the market would have: Takeda's brand Colcrys; Takeda's authorized generic of Colcrys; Par's generic Colcrys; Watson's generic Colcrys; and Amneal's generic Colcrys.[143]
- And, as Value Drug pleads, if a non-conspirator came into the market, Par, Watson, and Amneal could also come in then.[144]

We next turn to the purported "Second Wave" theory of conspiracy Value Drug did not plead but raised at oral argument and in its briefing. Value Drug argues the actual unplead purpose of the conspiracy is to "order their market entry" to compete against three generics rather than the potential nine, and thus avoid "the looming Second Wave" of generics which would cause an even larger price collapse than what occurs when there are three generics in the market.[145] In other words, Takeda, Par, **[*41]** Watson, and Amneal did not conspire to totally restrict their output in exchange for defined periods of exclusivity in a two-entrant market and supracompetitive profits to be shared among themselves (as plead); they instead conspired to restrict their output to compete only against *each other* for defined periods of time, rather than all nine generics which could have been on the market.

---

[140] ECF Doc. No. 123-1, Ex. 2, at 16-17 § 1.2.

[141] ECF Doc. No. 123-2, Ex. 3, at 18-19 §§ 1.2.

[142] ECF Doc No. 123, Ex. 1, at 17 § 1.3(c); ECF Doc. No. 123-1, Ex. 2, at 16-17 § 1.2(b); ECF Doc. No. 123-2, Ex. 3, at 18-19 § 1.2(c); *see also* ECF Doc. No. 124 at 9 n.7, 10 n.9 (Value Drug admitting Par and Amneal came in when Watson came in).

[143] We note under Par's license with Takeda, if Par launched its own generic, Par could no longer be the distributor of Takeda's authorized generic. ECF Doc No. 123, Ex. 1, at 16 § 1.1. Even assuming in favor of Value Drug Par decided not to launch and rather continued being Takeda's distributor, Watson still has no exclusivity because the market has branded Colcrys, Takeda's authorized generic, Watson's generic, and Amneal's generic. Conversely, assuming Par did launch *and* Takeda chose to stop distributing its authorized generic, the market is still similarly saturated with the brand drug and three generics. Regardless of whether Par chose to launch its own generic or not, Watson never obtained an exclusive period of time or a scenario where the price collapse Value Drug pleads does not occur. Amneal similarly had no exclusivity in either scenario.

[144] ECF Doc No. 123, Ex. 1, at 17 § 1.3(c); ECF Doc. No. 123-1, Ex. 2, at 16-17 § 1.2(b); ECF Doc. No. 123-2, Ex. 3, at 18-19 § 1.2(c); *see also* ECF Doc. No. 1 ¶ 57.

[145] *See, e.g.*, ECF Doc. No. 124.

But Value Drug fails to plead facts supporting this theory and effectively concedes its as-plead theory is implausible by not defending it.[146]

Value Drug's conspiracy *as plead* is implausible because in any of these scenarios, the admitted price collapse occurs. Value Drug concedes this result.[147] Rather than doubling down on its theory the four competitors agreed to this scheme to prevent the inevitable price collapse which occurs when "even . . . a single additional" generic enters the market and disrupts the high prices commanded in a two-entrant market, Value Drug argues the purpose of the conspiracy is actually to prevent the *further* price collapse which would occur from the "looming Second Wave" of generic manufacturers also trying to take their generic of Colcrys to market.[148] But Value **[*42]** Drug cannot plead one implausible conspiracy—a conspiracy in which each conspirator joined in order to enjoy defined, competition-free periods of sales in a two-entrant market[149]—and argue because another unplead conspiracy is plausible we should not dismiss its plead implausible allegations.[150]

Value Drug pleads itself out of court by focusing the plead motives of the four competitors to reduce generic output "to prevent the price collapse that Par so vividly described"—*i.e.*, the price collapse which occurs when even one other generic enters the two-entrant market.[151] The settlement agreements themselves preclude Watson and Amneal from selling their generics in a two-entrant market and rather demonstrate the price collapse Par described *will* happen when one of the four competitors brings its generic to market because all three generics, and possibly Takeda's authorized generic, can be sold at once. As plead, we discern no motive for the competitors to enter a *single, horizontal* conspiracy among all of them to cause the very price collapse they allegedly conspired to avoid.[152] This theory makes no economic sense and forecloses an inference of concerted action among the four competitors. **[*43]** [153]

---

[146] Value Drug's allegations in paragraph 57 may be subject to different interpretations. But Value Drug drafted the pleading. And in its briefing, Value Drug swears the "escape clause" it references in paragraph 57 is the escape clauses in each individual settlement agreement. *See, e.g.* ECF Doc. No. 124 at 7 n.1 (discussing entry dates in context of "escape clauses" in settlement agreements); 9 n.7 (same); 10 n.9; 13 n.13 (conceding Par, Watson, and Amneal would all enter at once causing competition from three generics (instead of nine in accordance with Value Drug's new "second wave" theory); 19 n.21 (describing clauses providing entry dates in settlement agreements as "escape clauses"). While we should plausibly infer facts based on the plead facts, we cannot simply create new theories of liability based on arguments attempting to reconstruct sworn allegations. Value Drug's conclusions do not suffice. Its belated arguments attempting to stretch those conclusions into facts also do not suffice.

[147] *See, e.g.*, ECF Doc. No. 124 at 17 (arguing the purpose of the conspiracy is to avoid "the looming Second Wave" of generics).

[148] *Id.* ("By conspiring to order their market entry, Takeda avoided competing against Par, Watson, and Amneal for a period of time, then competed against just the three co-conspirators and avoided a price collapse from the looming Second Wave.").

[149] ECF Doc. No. 1 ¶¶ 3(a)-(e), 4, 56-60, 71.

[150] We do not take a position on whether the "Second Wave" conspiracy is plausible. We simply note Value Drug argues against Takeda, Watson, and Amneal's motions to dismiss arguments by setting forth its unplead second wave theory, not its plead theory of preserving a two-entrant market for as long as possible.

[151] ECF Doc. No. 1 ¶¶ 58-60.

[152] *See, e.g., Petruzzi's IGA Supermarkets, Inc. v. Darling-Delaware Co., 998 F.2d 1224, 1243 (3d Cir. 1993)* (finding defendants need not share the same motive in entering a conspiracy, "[r]ather, all that is required is that *they each have* a motive to conspire." (emphasis added)).

[153] *See, e.g., Brunson Commc'ns, Inc. v. Arbitron, Inc., 239 F. Supp. 2d 550, 563-64 (E.D. Pa. 2002)* (applying reasoning in *Matsushita* to motion to dismiss and quoting "if the defendants 'had no rational economic motive to conspire, and if their conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy.") Because we find it makes no economic sense to conspire to cause a price collapse upon entry to the market, we cannot find the defendants' conduct is not equally consistent with other plausible explanations— *i.e.*, each generic defendant unilaterally settled its patent litigation with Takeda for reasons other than to restrict generic output.

We dismiss Value Drug's plead claims against Takeda, Par, Watson, Amneal, and Teva USA with leave to amend.

B. We defer ruling on Teva Ltd.'s motion to dismiss for lack of personal jurisdiction and allow limited expedited jurisdictional discovery.

Teva Ltd. moves to dismiss Value Drug's complaint arguing we do not enjoy personal jurisdiction over it as an Israeli company with its principal place of business in Israel.[154] Value Drug responds we enjoy personal jurisdiction over Teva Ltd. under Pennsylvania's long arm statute, the *Clayton Act (15 U.S.C. § 22)*, and *Federal Rule of Civil Procedure 4(k)(2)*.[155] Value Drug also argues exercising jurisdiction—either general or specific—is constitutional.[156] In the alternative, Value Drug asks for jurisdictional discovery. We disagree with Value Drug it has adequately plead or proffered adequate evidence our exercise of jurisdiction over Teva Ltd. is constitutional. But we grant Value Drug limited jurisdictional discovery on one plead theory of personal jurisdiction.

1. Value Drug's pleading of personal jurisdiction over Teva Ltd.

Value Drug knowingly sued a foreign company with a foreign principal place of business and yet failed to plead barely a fact regarding our personal **[*44]** jurisdiction over it.[157]

Value Drug bases our personal jurisdiction over Teva Ltd. on four sparce allegations: (1) "Teva Ltd. is successor-in-interest to Watson"; (2) "On July 26, 2015 Teva Ltd. purchased Watson and, as part of that purchase, assumed all of Watson's liabilities"; and (3) "Moreover, Teva Ltd. ratified Watson's conduct challenged herein"; (4) "Each defendant has transacted business, maintained substantial contacts, and/or committed overt acts in furtherance of the illegal scheme and conspiracy throughout the United States, including in this district. The scheme and conspiracy have been directed at, and have had the intended effect of, causing injury to persons residing in, located in, or doing business throughout the United States, including in this district."[158]

2. Value Drug fails to plead or proffer adequate evidence to establish we enjoy personal jurisdiction over Teva Ltd. but we allow it limited jurisdictional discovery should it decline to timely amend its complaint.

"'[T]he burden of demonstrating the facts that establish personal jurisdiction,' falls on the plaintiff . . . and 'once a defendant has raised a jurisdictional defense,' the plaintiff must 'prov[e] by affidavits **[*45]** or other competent evidence that jurisdiction is proper.'"[159] When, as here, no party requests an evidentiary hearing "'the plaintiff[s]

a. We do not enjoy general personal jurisdiction over Teva Ltd.

Value Drug first argues we enjoy general jurisdiction over Teva Ltd. based on Teva Ltd.'s "continuous and systematic contacts" with the United States or alternatively as Teva USA's alter ego. At the outset, we reject Teva Ltd.'s argument and evidence proffered purportedly supporting its argument we may exercise jurisdiction over Teva Ltd. under an alter ego theory.[167] Value Drug does not plead we have personal jurisdiction over Teva Ltd. under an alter ego theory. It cannot now attempt to rely on an unplead theory through briefing.[168]

We consider whether we otherwise have general jurisdiction over Teva Ltd. Our inquiry is whether the "corporation's 'affiliations with the State are so 'continuous and systematic' as to render [it] essentially at home in the forum State."[169] The Supreme Court recently reiterated the standard for general jurisdiction:

> A state court may exercise general jurisdiction only when a defendant is "essentially at home" in the State. General jurisdiction, as its name implies, extends to "any and all claims" brought against a defendant. Those claims need not relate to the forum State or the defendant's activity there; they may concern events and conduct anywhere in the world. But that breadth imposes a correlative limit: Only a select "set of affiliations with a forum" will expose a defendant to such sweeping jurisdiction. In what we have called the "paradigm" case, an individual is subject to general jurisdiction in her place of domicile. And the "equivalent" forums **[*48]** for a corporation are its place of incorporation and principal place of business.[170]

---

contacts); *In re Chocolate Confectionary Antitrust Litig., 602 F. Supp. 2d 538, 558 (M.D. Pa. 2009)* (same); *In re Suboxone (Buprenorphine Hydrochloride & Naloxone) Antitrust Litig., No. 13-2445, 2017 U.S. Dist. LEXIS 171322, 2017 WL 4642285, at *3 (E.D. Pa. Oct. 17, 2017)* (same); *see also* *Livnat v. Palestinian Auth., 851 F.3d 45, 54, 428 U.S. App. D.C. 140 (D.C. Cir. 2017)* ("To be sure, neither the Supreme Court nor this court has expressly analyzed whether the *Fifth* and *Fourteenth Amendment* standards differ. But the Second, Sixth, Seventh, Eleventh, and Federal Circuits have, and all agree that there is no meaningful difference in the level of contacts required for personal jurisdiction. The only difference in the personal-jurisdiction analysis under the two Amendments is the *scope* of relevant contacts: Under the *Fourteenth Amendment*, which defines the reach of state courts, the relevant contacts are state-specific. Under the *Fifth Amendment*, which defines the reach of federal courts, contacts with the United States as a whole are relevant. That difference is not at play in this case." (citations omitted)).

[167] ECF Doc. No. 117 at 20, 23-24.

[168] Value Drug argues we "should not [] ignore[]" its evidence regarding alter ego jurisdiction. ECF Doc. No. 151 at 9 n.5. While Value Drug is correct our inquiry on a *12(b)(2)* motion is not limited to pleadings—in fact a Plaintiff may not rest on its pleading when jurisdiction is challenged—Value Drug is incorrect it can rest on an unplead theory for personal jurisdiction merely by providing evidence of its unplead theory once jurisdiction is challenged. The very case Value Drug relies on for its argument illustrates this principle. *See* *In re Chocolate Confectionary Antitrust Litig., 641 F. Supp. 2d 367, 381 (M.D. Pa. 2009)* ("Although plaintiffs bear the ultimate burden of proving personal jurisdiction by a preponderance of the evidence, such a showing is unnecessary at the preliminary stages of litigation . . . **Rather, plaintiffs must merely allege [*47] sufficient facts to establish a prima facie case of jurisdiction over the person. Once these allegations are contradicted by an opposing affidavit, however, plaintiffs must present similar evidence in support of personal jurisdiction** . . . '[A]t no point may a plaintiff rely on the bare pleadings alone in order to withstand a defendant's *Rule 12(b)(2)* motion to dismiss for lack of in personam jurisdiction . . . Once the motion is made, plaintiff must respond with actual proofs, not mere allegations.' When the plaintiff responds with affidavits or other evidence in support of its position, the court is bound to accept these representations and defer final determination as to the merits of the allegations until a pretrial hearing or the time of trial." (internal citations omitted) (emphasis added)).

[169] *Daimler AG v. Bauman, 571 U.S. 117, 139, 134 S. Ct. 746, 187 L. Ed. 2d 624 (2014)* (quoting *Goodyear Dunlop Tires Operations, S. A. v. Brown, 564 U.S. 915, 919, 131 S. Ct. 2846, 180 L. Ed. 2d 796 (2011)*) (alteration in original).

[170] *Ford Motor Co. v. Montana Eighth Jud. Dist. Ct., 141 S. Ct. 1017, 1024, 209 L. Ed. 2d 225 (2021)* (internal citations omitted) (citing *Goodyear, 564 U.S. at 919* and *Daimler, 571 U.S. at 137*).

Value Drug concedes Teva Ltd.'s state of incorporation and principal place of business is Israel.[171] Value Drug's argument apparently seizes on our Supreme Court's language in *Daimler* leaving open the possibility of exercising general jurisdiction over a defendant "in an exceptional case . . . [when] a corporation's operations in a forum other than its formal place of incorporation or principal place of business may be so substantial and of such a nature as to render the corporation at home in that State."[172] But "it is incredibly difficult to establish general jurisdiction [over a corporation] in a forum *other* than the place of incorporation or principal place of business."[173] Value Drug argues we have general jurisdiction due to Teva Ltd.'s extensive contacts with the United States.[174] We are unpersuaded by Value Drug's citations to pre-*Daimler* cases and see no "exceptional reason" to exercise general personal jurisdiction over Teva Ltd.

b. We defer ruling on whether we enjoy specific personal jurisdiction over Teva Ltd. following limited jurisdictional discovery.

Value Drug alternatively argues we may exercise specific jurisdiction **[*49]** over Teva Ltd. Specific jurisdiction requires: (1) minimum contacts—"some act by which [the defendant] purposefully avails itself of the privilege of conducting activities within the forum state"; (2) "[t]he plaintiff's claims . . . 'must arise out of or relate to the defendant's contacts' with the forum'"; and (3) exercising jurisdiction does not offend "traditional notions of fair play and substantial justice.'"[175] Value Drug relies on three theories: (1) Teva Ltd.'s contacts with the United States are sufficient to exercise specific jurisdiction; (2) we can impute Watson's contacts to Teva Ltd. because Teva Ltd. is Watson's successor-in-interest; and (3) we can impute Watson's contacts to Teva Ltd. because Teva Ltd. ratified its conduct.[176]

We grant limited jurisdictional discovery on Value Drug's first theory.[177] Value Drug pleads "[e]ach defendant has transacted business, maintained substantial contacts, and/or committed overt acts in furtherance of the illegal scheme and conspiracy throughout the United States."[178] Our Court of Appeals has held this bare conclusory pleading is "clearly frivolous" and not warranting of jurisdictional discovery.[179] But in response to Teva Ltd.'s motion

Bar Ass'n, 107 F.3d 1026, 1042 (3d Cir. 1997)* ("The district court found (at least by implication), and we agree, that [plaintiff's] jurisdictional claims were clearly frivolous. Our result is in accord with other cases which hold that a mere unsupported allegation that the defendant 'transacts business' in an area is 'clearly frivolous.'"); *see also Falcone v. WiredLogic, Inc., No. 06-800, 2006 U.S. Dist. LEXIS 113496, 2006 WL 8459813, at *6 (E.D. Pa. Oct. 26,*

to dismiss, **[*50]** Value Drug proffered evidence of Teva Ltd.'s contacts with the United States.[180] What Value Drugs did not do is provide evidence or argument the claims before us now arise from or relate to Teva Ltd.'s contacts with the United States.[181] We are satisfied based on the record before us, including Value Drug's Complaint and proffer of evidence in response to Teva Ltd.'s motion to dismiss, Value Drug's jurisdictional discovery will not be a fishing expedition but rather a targeted inquiry into whether the claims here arise from or relate to Teva Ltd.'s contacts with the United States.[182]

We reject Value Drug's theory of personal jurisdiction under the successor-in-interest and ratification theories.[183] Value Drug does not plead or proffer facts supporting its legal conclusion "Teva Ltd. ratified Watson's conduct challenged herein."[184] We have no basis to provide discovery when we have no facts supporting this theory.

We similarly reject Value Drug's successor liability theory of personal jurisdiction as plead. "[U]nder Pennsylvania law, the acts of a predecessor corporation may be attributed to its successor for purposes of determining whether **[*51]** jurisdiction over the successor is proper."[185] "Accordingly, jurisdiction is established if the successor corporation may be held liable under Pennsylvania's law of successor liability."[186] Value Drug relies on the "express assumption of liability" exception to Pennsylvania's general rule of no successor liability.[187] The parties dispute whether Value Drug pleading Watson continues to exist precludes a finding of successor liability under Pennsylvania law.[188] In *In re Suboxone Antitrust Litigation*, Judge Goldberg considered whether a defendant could be liable as a successor-in-interest under Pennsylvania law when the plaintiff argued the defendant expressly assumed liabilities.[189] Judge Goldberg found it could not for three reasons: (1) the agreement did not expressly

---

2006) ("[M]ere unsupported allegations that a defendant 'transacts business,' has 'contacts,' or 'expressly targeted Pennsylvania residents' are clearly frivolous and discovery will be denied.").

180 *See, e.g.*, ECF Doc. No. 117.

181 *See, e.g., id.*

182 We again note Value Drug does not plead an alter ego or agency theory. Thus, Value Drug's inquiry must not undertake to establish jurisdiction through Teva Ltd.'s subsidiaries' contacts with the United States and involvement with Colcrys.

183 Because we apply Pennsylvania law to determine personal jurisdiction over Teva Ltd., and because the parties dispute which law may apply *substantively* to Value Drug's theory of successor liability, our finding as to personal jurisdiction has no bearing on whether Teva Ltd. may be liable as a successor under a potentially applicable law besides Pennsylvania.

184 ECF Doc. No. 1 ¶ 12 (merely pleading a legal conclusion and no further facts in the Complaint about ratification); ECF Doc. No. 117 at 8, 26 (citing to no evidence in the record supporting its ratification theory).

186 *Id.* (citing *Umac, Inc. v. Aqua-Gas AVK Ltd., No. 04-4022, 2005 U.S. Dist. LEXIS 6124, 2005 WL 742497, at *3 (E.D. Pa. Mar. 30, 2005)*).

187 ECF Doc. No. 1 ¶ 12; *see also* *Falcone, 2006 U.S. Dist. LEXIS 113496, 2006 WL 8459813, at *9* ("Under Pennsylvania law, 'when one company sells or transfers all of its assets to another company, the purchasing or receiving company is not responsible for the debts and liabilities of the selling company simply because it acquired the seller's property.' However, this general rule of non-liability can be overcome if the plaintiff demonstrates that '(1) the purchaser expressly or implicitly agreed to assume liability, (2) the transaction amounted to a consolidation or merger, (3) the purchasing corporation was merely a continuation of the selling corporation, (4) the transaction was fraudulently entered into to escape liability, or (5) the transfer was without adequate consideration and no provisions were made for creditors of the selling corporation.'" (internal citations omitted)).

188 ECF Doc. No. 1 ¶ 11 ("Defendant Watson Laboratories, Inc. ***is*** a Nevada Corporation having places of business at 311 Bonnie Circle, Corona, CA 92878 and Morris Corporate Center III, 400 Interpace Parkway, Parsippany, NJ 07054." (emphasis added)).

transfer liabilities to a successor corporation; (2) "the continued existence of original entity precludes successor liability;" and (3) the plaintiffs failed to allege the original entity had any liability, regardless.[190] Judge Goldberg found: "[i]t is well established that '[i]f the original entity still exists . . . there is no successor, and therefore no successor liability.'"[191] He continued: "[a]t least one district court has concluded **[*52]** that, under Pennsylvania law, the 'cessation of ordinary business operations' factor may be satisfied when the predecessor does not dissolve or completely cease to exist, but rather is reduced to an assetless shell."[192] "Where, however, the original entity is not an assetless shell and does not completely cease ordinary operations, successor liability is precluded."[193]

The plaintiffs in *In re Suboxone* argued it did not matter the predecessor entity still existed, relying on a Massachusetts case applying Massachusetts law.[194] Judge Goldberg found he need not consider the plaintiffs' argument because the Massachusetts case decided under Massachusetts law which Plaintiffs relied on "is inapposite given [his] finding that there was no assumption of liability."[195] Value Drug attempts to distinguish the case on this basis arguing Judge Goldberg did not decide whether the predecessor entity must cease to exist when there is an express assumption of liability.

But we are not persuaded. Judge Goldberg found three independent reasons to deny successor liability—one of which included the predecessor entity still existed. We are persuaded by the analysis presented **[*53]** by Judge Goldberg and other judges to have considered this issue.[196] Value Drug pleads Watson still exists, precluding a

finding of successor liability under Pennsylvania law, and thus precluding us from imputing Watson's contacts for purposes of jurisdiction as plead.[197]

We reject Value Drug's argument we enjoy general jurisdiction over Teva Ltd. or we can impute Watson's contacts to Teva Ltd. under a successor-in-interest or ratification theory as plead. But we grant limited jurisdictional discovery on whether Value Drug's claims arise from or relate to Teva Ltd.'s contacts with the United States. Understanding Value Drug may amend its Complaint and plead other theories of our personal jurisdiction for Teva Ltd. to the extent possible under *Rule 11*, we defer jurisdictional discovery until after Value Drug can amend.

3. We deny Watson and Amneal's request for sanctions.

Watson and Amneal move for sanctions against Value Drug in the form of their fees in prosecuting their motion to dismiss under *28 U.S.C. § 1927* if we dismiss Value Drug's complaint with leave to amend.[198] We decline to sanction Value Drug at this stage. Its **[*54]** pleading is inaccurate and possibly inartful; it is not frivolous and there is no basis to find bad faith or intentional misconduct.

Congress in *section 1927* provides "[a]ny attorney or other person admitted to conduct cases in any court of the United States or any Territory thereof who so multiplies the proceedings in any case unreasonably and vexatiously may be required by the court to satisfy personally the excess costs, expenses, and attorneys' fees reasonably incurred because of such conduct."[199] Watson and Amneal argue they are entitled to their fees for moving to dismiss a complaint which Value Drug knew contained false allegations after receiving the settlement agreements and then consciously choose not to amend. We disagree.

Our Court of Appeals instructs sanctions under *28 U.S.C. § 1927* are limited to when an attorney has "(1) multiplied proceedings; (2) unreasonably and vexatiously; (3) thereby increasing the cost of the proceedings; (4) with bad faith or with intentional misconduct."[200] The sanctions are "intended to deter an attorney from *intentionally* and unnecessarily delaying judicial proceedings, and they are limited to the costs that result from such delay," but our Court of Appeals cautions "courts **[*55]** should exercise [this sanctioning power] only in instances of a serious and studied disregard for the orderly process of justice."[201] Congress's allowance of fees in *section 1927* is to be

---

Elec. Co. v. Hercules, Inc., 762 F.2d 303, 307, 309 (3d Cir. 1985) (finding successor liability under Pennsylvania law when an express assumption occurred but the predecessor entity had been dissolved).

[197] Value Drug relies on *Eagle Nat'l Bank v. ISCP Funding, LLC*, to argue Pennsylvania law does not require the predecessor entity to cease existence when there is an express assumption of liabilities. *No. 00685, 2011 Phila. Ct. Com. Pl. LEXIS 107, 2011 WL 10525397, at *2-3 (Pa. Com. Pl. May 3, 2011)*. The case is inapposite. It does not address successor liability, nor does it involve a claim from a plaintiff trying to establish liability over a defendant under a successor theory. Rather, the case involved the sellers of a company suing the purchaser seeking a preliminary injunction to enjoin the purchaser from using certain disputed funds transferred during the sale. *2011 Phila. Ct. Com. Pl. LEXIS 107, [WL] at *1-2*. In *Eagle National Bank*, the sellers transferred their assets to the purchaser, "including reserve deposits held for the benefit of the branch offices." *2011 Phila. Ct. Com. Pl. LEXIS 107, [WL] at *2*. Certain branches disclaimed affiliation with the purchaser and requested the sellers release any funds in the reserve deposits. *Id.* The sellers forwarded the request to release the funds to the purchaser—who then owned the reserve deposits. *Id.* The purchaser disclaimed it had to pay the branches the deposits. *Id.* The sellers sought a preliminary injunction to stop the purchaser from using the money in dispute, which the sellers transferred to the purchaser during the sale and the sellers argued the purchaser agreed to pay in the purchase agreement when it assumed certain liabilities. *Id.* Judge Bernstein issued the preliminary injunction finding the elements satisfied. *2011 Phila. Ct. Com. Pl. LEXIS 107, [WL] at *5*. The case thus did not involve the issue we have before us nor did it address successor liability.

[198] ECF Doc. No. 131 at 13-14.

[199] *28 U.S.C. § 1927*.

[200] *LaSalle Nat. Bank v. First Connecticut Holding Grp., LLC, 287 F.3d 279, 288 (3d Cir. 2002)* (further citations omitted).

construed narrowly "and with great caution so as not to stifle the enthusiasm or chill the creativity that is the very lifeblood of the law."[202] "Consequently, sanctions may not be imposed under *§ 1927* absent a finding that counsel's conduct resulted from bad faith, rather than misunderstanding, bad judgment, or well-intentioned zeal."[203]

Value Drug's choice to stand on its Complaint and defend against the motions to dismiss is not so clearly frivolous, unreasonable, or vexatious to rise to the level of bad faith warranting sanctions. We decline to sanction Value Drug.

III. Conclusion

Pharmacy chain Value Drug alleges Takeda Pharmaceuticals, manufacturer of a brand name Colcrys—a drug approved by the Food and Drug Administration for the treatment and prevention of gout and familial Mediterranean fever—entered a single conspiracy with generic drug manufacturers Par, Watson, and Amneal to restrict generic Colcrys output in exchange for defined periods of exclusive sales and thus extended periods of supracompetitive profits. **[*56]** But Value Drug fails to plead a plausible single horizontal conspiracy among the four competitors based on settlement agreements. The settlement agreements are to the contrary on their face. We must dismiss its Complaint based on this theory with leave to amend if Value Drug can plead an alternative theory. Value Drug similarly fails to plead multiple theories of personal jurisdiction over an Israeli purchaser of some of Watson's assets but skates by with a bare pleading and a proffer of evidence of one theory entitling it to limited specific jurisdictional discovery before dismissal. We need not reach the substance of Par and Teva USA's alternative arguments for dismissal with an understanding Value Drug is now fully apprised of both entity's arguments should it amend consistent with our Order.

Subsequent History: US Supreme Court certiorari denied by *Lloyds Banking Grp. PLC v. Schwab Short-Term Bond Mkt. Fund, 2022 U.S. LEXIS 3018 (U.S., June 21, 2022)*

Prior History: **[**1]** Appeal from the United States District Court for the Southern District of New York. No. 11-md-2262, Naomi Reice Buchwald, Judge.

This appeal arises from a multidistrict litigation alleging that Defendants-Appellees, some of the world's largest banks and affiliated entities, conspired to suppress the London Interbank Offered Rate ("LIBOR"), a benchmark rate used in countless financial instruments around the globe. On appeal are several orders from the United States District Court for the Southern District of New York (Buchwald, J.), granting Defendants-Appellees' motions to dismiss antitrust claims in twenty-three cases based on Plaintiffs-Appellants' lack of antitrust standing and/or the court's lack of personal jurisdiction over Defendants-Appellees.

We agree with the district court that Plaintiffs-Appellants who purchased LIBOR-indexed bonds from third parties lack antitrust standing. To have antitrust standing, a plaintiff must be an "efficient enforcer" of the antitrust laws whose alleged injury was proximately caused by a defendant. Here, the third parties' independent decisions to reference that benchmark severed the causal chain linking Plaintiffs-Appellants' injuries to Defendants-Appellees' **[**2]** misconduct, thereby rendering Plaintiffs-Appellants unsuitable as efficient enforcers. But we disagree with the district court's personal jurisdiction analysis, and hold instead that jurisdiction is appropriate under the conspiracy-based theory first articulated by this Court in *Charles Schwab Corp. v. Bank of Am. Corp., 883 F.3d 68 (2d Cir. 2018)*, which post-dated the district court's ruling. According to that precedent, a defendant purposefully avails itself of the laws of a forum when that defendant or its co-conspirator undertakes an overt act in furtherance of the conspiracy in the forum. Here, the facts alleged by Plaintiffs-Appellants — specifically, that executives and managers for several banks were directing the suppression of LIBOR from within the United States — were sufficient to establish personal jurisdiction over the banks under a conspiracy-based theory of jurisdiction. We thus AFFIRM in part, REVERSE in part, and REMAND to the district court for proceedings consistent with this opinion.

---

[*] The Clerk of Court is respectfully directed to amend the caption as set forth above.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN1[] **Clayton Act, Claims**

Section 4 of the Clayton Act provides for a private right of action and treble damages to any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws. 15 U.S.C.S. § 15(a). But the Supreme Court has recognized that Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation. Accordingly, the private right to seek treble damages for federal antitrust violations has developed limiting contours, which are embodied in the concept of "antitrust standing." To establish antitrust standing, a plaintiff must show (1) antitrust injury, which is injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful, and (2) that he is a proper plaintiff in light of four efficient enforcer factors.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN2[] **Standing, Requirements**

Even where a plaintiff has cleared the antitrust-injury hurdle for "antitrust standing," the plaintiff must further show that it is an efficient enforcer of the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN3[] **Standing, Requirements**

An antitrust plaintiff must show both constitutional standing and antitrust standing.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN4[] **Standing, Requirements**

At its core, the efficient enforcer analysis for antitrust standing requires a court to decide if the plaintiff is a proper party to perform the office of a private attorney general and thereby vindicate the public interest in antitrust enforcement. In Associated General Contractors of California, Inc. v. California State Council of Carpenters the Supreme Court has outlined four factors to guide this analysis: (1) the directness or indirectness of the asserted injury; (2) the existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement; (3) the speculativeness of the alleged injury; and (4) the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN5[] **Standing, Clayton Act**

For the purposes of antitrust standing, proximate cause is determined according to the so-called "first-step rule." Under that rule, injuries that happen at the first step following the harmful behavior are considered proximately caused by that behavior. Rather, the general tendency of § 4 of the Clayton Act is not to go beyond the first step.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN6[] **Remedies, Damages**

In the context of antitrust standing, highly speculative damages is a sign that a given plaintiff is an inefficient engine of enforcement.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN7[] **Remedies, Damages**

The U.S. Supreme Court has warned that antitrust standing should not provide a "get-out-of-court-free card" to be played any time that a damages calculation might be complicated.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN8[] **Standing, Requirements**

In the context of antitrust standing, the fourth Associated General Contractors of California, Inc. v. California State Council of Carpenters factor-the importance of avoiding either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other-reflects a strong interest in keeping the scope of complex antitrust trials within judicially manageable limits.

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Erie Doctrine

HN9[] **Federal & State Interrelationships, Erie Doctrine**

In deciding matters of state law, the United States Court of Appeals for the Second Circuit seeks to predict how the state's highest court would resolve the issues that we have identified. Naturally, that means that the Court gives the fullest weight to pronouncements of the state's highest court,-but it also means that the Court looks to the rulings of the state's lower courts as providing important data points for understanding state law.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > In Personam Actions

Evidence > Burdens of Proof > Allocation

HN10[] **In Rem & Personal Jurisdiction, In Personam Actions**

To survive a motion to dismiss, a plaintiff must make a prima facie showing that personal jurisdiction exists. While the United States Court of Appeals for the Second Circuit reads the pleadings and any supporting materials in the light most favorable to the plaintiffs, it also requires that plaintiffs make legally sufficient allegations of jurisdiction, including an averment of facts that, if credited, would suffice to establish jurisdiction over the defendant.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

HN11[] **In Personam Actions, Due Process**

Before a court may exercise personal jurisdiction over a defendant, three requirements must be met: (1) the plaintiff's service of process upon the defendant must have been procedurally proper; (2) there must be a statutory basis for personal jurisdiction that renders such service of process effective; and (3) the exercise of personal jurisdiction must comport with constitutional due process principles.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Due Process

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN12[] **In Personam Actions, Due Process**

As the U.S. Supreme Court has long held, due process demands that each defendant over whom a court exercises jurisdiction have some minimum contacts with the forum such that the maintenance of the suit does not offend traditional notions of fair play and substantial justice.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Foreseeability

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN13[] **In Personam Actions, Foreseeability**

When the claims arise out of, or relate to, a defendant's contacts with the forum — i.e., specific jurisdiction is asserted — minimum contacts necessary to support such jurisdiction exist where the defendant purposefully availed itself of the privilege of doing business in the forum and could foresee being haled into court there. The contacts must be created by the defendant itself, rather than from the unilateral activity of another party or a third person. That said, a defendant can purposefully avail itself of a forum through the action of a third party by directing its agents or distributors to take action there. The United States Court of Appeals for the Second Circuit has held that a defendant can similarly avail itself of a forum through certain actions taken by a co-conspirator in the forum. Much like an agent who operates on behalf of, and for the benefit of, its principal, a co-conspirator who undertakes action in furtherance of the conspiracy essentially operates on behalf of, and for the benefit of, each member of the conspiracy.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Torts > Procedural Matters > Commencement & Prosecution > In Personam Jurisdiction

HN14[] **In Personam Actions, Minimum Contacts**

To assert a conspiracy theory of personal jurisdiction, a plaintiff must plausibly allege that (1) a conspiracy existed; (2) the defendant participated in the conspiracy; and (3) a co-conspirator's overt acts in furtherance of the conspiracy had sufficient contacts with a forum to subject that co-conspirator to jurisdiction in that forum.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Foreseeability

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN15[] **In Personam Actions, Foreseeability**

The conspiracy theory of personal jurisdiction could not get off the ground if a defendant were altogether blindsided by its co-conspirator's contacts with the forum; the conspiratorial contacts must be of the sort that a defendant should reasonably anticipate being haled into court in the forum as a result of them.

Opinion by: RICHARD J. SULLIVAN

Opinion

[*109] RICHARD J. SULLIVAN, *Circuit Judge*:

Plaintiffs-Appellants in this multidistrict litigation allege an international conspiracy to manipulate the London Interbank Offered Rate ("LIBOR"), a benchmark interest rate for lending money among global financial institutions. Defendants-Appellees are the sixteen panel banks involved in setting LIBOR, about two dozen affiliated banking institutions (together with the panel banks, "Banks"), and the British Bankers' Association ("BBA"), as well as affiliated organizations working with the BBA to set LIBOR (collectively, "Defendants"). On appeal are several orders from the United States District Court for the Southern District of New York (Buchwald, *J.*), granting Defendants' motions to dismiss claims in twenty-three cases for lack of antitrust standing or lack of personal jurisdiction over **[**4]** Defendants.

We agree with the district court that third parties who independently chose to reference LIBOR in their bonds before selling those bonds to Plaintiffs broke the causal chain linking Plaintiffs' harm to Defendants' misconduct. Under well-established antitrust standing principles, this means that those Plaintiffs who purchased such bonds are not the proper parties to enforce the federal antitrust laws against Defendants and thus lack statutory standing. And like the district court, we are persuaded that this statutory standing analysis applies to the antitrust claims brought under California law.

But we disagree with the district court's personal jurisdiction analysis. In our view, jurisdiction is appropriate under a conspiracy-based theory, in which a defendant **[*110]** purposefully avails itself of the laws of a forum when it or its co-conspirator undertakes an overt act in furtherance of the conspiracy in the forum. Here, that requirement — first articulated by this Court in an opinion that postdated the district court's ruling — is satisfied in light of allegations that executives and managers from several Banks were directing the suppression of LIBOR from the United States. We **[**5]** thus **AFFIRM** in part, **REVERSE** in part, and **REMAND** to the district court for proceedings consistent with this opinion.

I. BACKGROUND

A. Factual Allegations

This marks the fourth time in eight years that this case has come before us. *See Charles Schwab Corp. v. Bank of Am. Corp., 883 F.3d 68 (2d Cir. 2018)* ("*Schwab")*; *Gelboim v. Bank of Am. Corp., 823 F.3d 759 (2d Cir. 2016)*; *In re LIBOR-Based Fin. Instruments Antitrust Litig., No. 13-3565-L, 2013 U.S. App. LEXIS 26157, 2013 WL 9557843 (2d Cir. Oct. 30, 2013)*. Consequently, we have had ample occasion to discuss Plaintiffs' factual allegations, which "[d]espite the legal complexity of this case, . . . are rather straightforward." *Gelboim, 823 F.3d at 765* (quoting *In re LIBOR-Based Fin. Instruments Antitrust Litig., 935 F. Supp. 2d 666, 677 (S.D.N.Y. 2013)* ("*LIBOR I*")).

LIBOR is a widely used benchmark that approximates the average rate at which a group of designated banks can borrow money. It serves as an index for a variety of financial instruments, including bonds, interest rate swaps, commercial paper, and exchange-traded derivatives. LIBOR is also used indirectly in calculating rates for short-term, fixed-rate bonds, which do not reference LIBOR but are nevertheless assessed in terms of their spread relative to it. LIBOR has also been licensed to third parties, including the Chicago Mercantile Exchange, which directly incorporate LIBOR as a price component for financial products traded in the United States.

The Banks belonged to the British Bankers' Association ("BBA"), a trade organization for the banking and financial-services **[**6]** sector in the United Kingdom that sets the daily LIBOR rate for various currencies. With respect to the daily LIBOR rate for U.S. dollars,[1] the Banks that comprised the LIBOR panel were asked to disclose the rate at which they could borrow dollars on the inter-bank market. Under LIBOR-setting rules, (1) each Bank was to independently exercise good faith judgment in submitting its estimated interest rates for borrowing funds at different maturity rates, which were to be based on the Bank's knowledge of market conditions; (2) the daily submissions were to remain confidential until after LIBOR was computed and published; and (3) Thomson Reuters, on behalf of the BBA, would then calculate LIBOR based on the average of the middle eight submissions, and publish the final rate, as well as all sixteen individual submissions.

The panel Banks involved in setting LIBOR also bought and sold — in the United States — billions of dollars' worth of financial instruments tied to that benchmark. Even small increases in LIBOR would have allegedly cost the Banks hundreds of millions of dollars. *Gelboim, 823 F.3d at 766*. For instance, JPMorgan Chase stated that it would lose $500 million if LIBOR increased by one percentage point. **[**7]** But if rates instantaneously *decreased* by one percentage point, Citibank, for example, would make $1.935 billion.

During the 2008 financial crisis, several news articles and scholarly pieces reported **[*111]** that LIBOR was suspiciously low as compared to other lending benchmarks. *See* *LIBOR I", 935 F. Supp. 2d at 680*. These comments were promptly refuted by the Banks and the BBA, who provided alternative explanations for LIBOR's failure to track similar benchmarks. *Id.* In early 2011, however, one of the Banks released a report explaining that the United States Department of Justice, along with several other United States and foreign agencies, had subpoenaed information designed to determine whether the panel Banks had manipulated LIBOR during the 2008 financial crisis. *Id.*

B. Procedure

In light of mounting evidence that LIBOR had been artificially suppressed, litigants began flooding courts throughout the country with federal and state antitrust claims and various other claims based on the alleged manipulation. To manage these cases, the Judicial Panel on Multidistrict Litigation ("JPML") established an MDL in the Southern District of New York. *See* *In re: Libor-Based Fin. Instruments Antitrust Litig., 802 F. Supp. 2d 1380 (J.P.M.L. 2011)*. The JPML explained that the cases shared the same allegations that the panel **[**8]** Banks "manipulated L[IBOR] by deliberately and intentionally understating their respective borrowing costs to the BBA, and that, by doing so, they paid lower interest rates to customers who bought [the Banks'] products with rates of return tied to L[IBOR.]" *Id. at 1381*. The MDL has expanded to include dozens of class and individual actions.

As relevant here, four groups of Plaintiffs brought complaints related to the alleged conspiracy:

(1) The Over-the-Counter (or "OTC") Plaintiffs filed a putative class action representing those who directly purchased LIBOR-based interest rate swaps directly from the Banks.

(2) The Bondholder Plaintiffs filed a putative class action on behalf of those who held LIBOR-based bonds issued by third parties.

(3) The Exchange-Based Plaintiffs filed a putative class action for purchasers of LIBOR-based futures on the Chicago Mercantile Exchange.

(4) The remaining Plaintiffs comprise a group filing individual (non-class) actions based on their purchases of various financial instruments from the Banks. Among this group are The Charles Schwab Corporation and related entities (collectively, "Schwab"), which filed three complaints alleging harm from purchases of various LIBOR-indexed **[**9]** financial instruments from the Banks, as well as from LIBOR-based bonds and fixed-rate bonds sold by third parties.

Taken together, Plaintiffs' complaints named about forty Defendants allegedly responsible for the LIBOR suppression. They include the panel Banks involved in setting LIBOR: Bank of America Corporation and Bank of America, N.A. (together, "Bank of America"); Bank of Tokyo-Mitsubishi UFJ Ltd. ("BTMU"); Barclays Bank plc

[1] For the sake of simplicity, this Opinion refers to the U.S.-Dollar LIBOR as "LIBOR."

("Barclays"); Citigroup, Inc. and Citibank, N.A. (together, "Citibank"); Coöperatieve Centrale Raiffeisen-Boerenleenbank B.A. ("Rabobank"); Credit Suisse Group AG ("Credit Suisse"); Deutsche Bank AG ("Deutsche Bank"); HSBC Holdings plc and HSBC Bank plc (together, "HSBC"); JPMorgan Chase & Co. and JPMorgan Chase Bank, N.A. (together, "JPMorgan Chase"); Lloyds Banking Group plc ("Lloyds"); HBOS plc ("HBOS"); Société Générale S.A. ("SocGen"); The Norinchukin Bank ("Norinchukin"); Portigon AG and Westdeutsche ImmobilienBank AG **[*112]** (together, "WestLB"); Royal Bank of Canada ("RBC"); Royal Bank of Scotland Group plc ("RBS"); and UBS AG ("UBS"). Three of these Banks — Bank of America, Citibank, and JPMorgan Chase — are incorporated and headquartered in the United States, **[**10]** while the remainder are foreign Banks. In addition to naming these Defendants, the complaints (taken together) name about two dozen affiliated banking institutions, most of which are incorporated and/or headquartered in the United States.[2] They also name the BBA, BBA Enterprises, Ltd., and BBA LIBOR, Ltd., each of which participates in setting LIBOR.

The district court initially dismissed the federal antitrust claims in their entirety on the ground that Plaintiffs failed to plead antitrust injury, reasoning that the LIBOR-setting process was collaborative rather than competitive and that Plaintiffs therefore suffered no anticompetitive harm. *See* *LIBOR I, 935 F. Supp. 2d at 686-95*. At the same time, however, the district court denied motions to dismiss certain other contract-based claims that were not linked to the antitrust claims. *Id. at 738*. Several Plaintiffs appealed, and we dismissed the appeal for lack of subject matter jurisdiction for the simple reason that the district court had not yet issued a final order disposing of the entire MDL. *In re LIBOR-Based Fin. Instruments Antitrust Litig.*, 2013 U.S. App. LEXIS 26157, 2013 WL 9557843, at *1. The Supreme Court granted certiorari and reversed, holding that Plaintiffs did not have to wait until the completion of all MDL proceedings to appeal and observing that the parties could **[**11]** take advantage of *Federal Rule of Civil Procedure 54(b)* to obtain partial judgment on subsets of claims. *Gelboim v. Bank of Am. Corp., 574 U.S. 405, 415-16, 135 S. Ct. 897, 190 L. Ed. 2d 789 (2015)*.

With the case once again before our Court, we reversed the district court on the merits. Specifically, we held that Plaintiffs had plausibly alleged a per se antitrust violation involving horizontal price-fixing and had plausibly alleged an inter-bank conspiracy to suppress LIBOR based on parallel conduct, internal communications, and "a common motive" of "increased profits and the projection of financial soundness." *Gelboim, 823 F.3d at 781-82*. We further considered Plaintiffs' statutory "antitrust standing," which turns on whether Plaintiffs "suffered antitrust injury" and whether they are the proper parties to challenge the antitrust violations (so-called "efficient enforcers"). *Id. at 772*. While we determined that Plaintiffs had sufficiently alleged that they suffered an antitrust injury, we concluded that we were "not in a position to resolve" the efficient-enforcer prong, which would "entail further inquiry" best left to the district court in the first instance. *Id. at 778*.

[*113] Back in the district court, Defendants moved to dismiss several antitrust claims, including the federal antitrust claims filed by Schwab and the Bondholder Plaintiffs, on efficient enforcer **[**12]** grounds. The Defendants also moved to dismiss various state-law antitrust claims, such as those filed by Schwab pursuant to California's Cartwright Act, arguing that state law imposed analogous efficient enforcer requirements that certain Plaintiffs could not overcome. Separately, citing a lack of personal jurisdiction, Defendants moved to dismiss all or part of each complaint filed by Schwab and the OTC and Exchange-Based Plaintiffs, as well as the remaining eighteen complaints filed by non-class Plaintiffs.

---

[2] Those entities are Citigroup Financial Products, Inc.; Citi Swapco Inc.; Citigroup Global Markets, Inc.; Citigroup Funding Inc.; Credit Suisse Securities (USA) LLC; Credit Suisse (USA) Inc.; Deutsche Bank Securities, Inc.; HSBC Bank USA, N.A.; HSBC Finance Corporation; HSBC Securities (USA) Inc.; HSBC USA Inc.; Chase Bank, USA, N.A.; J.P. Morgan Securities LLC; Merrill Lynch, Pierce, Fenner & Smith Inc. (f/k/a Banc of America Securities LLC); Merrill Lynch Capital Services, Inc.; RBC Capital Markets LLC; RBS Securities Inc. (f/k/a Greenwich Capital Markets, Inc.); UBS Securities LLC; Barclays Capital Inc.; Credit Suisse International; The Hongkong and Shanghai Banking Corporation Ltd.; J.P. Morgan Dublin plc; Merrill Lynch International Bank. Although our case caption lists Credit Suisse Group International, the district court dismissed that party since the complaint referenced it only in the case caption, and the entity otherwise appears to be non-existent. *In re LIBOR-Based Fin. Instruments Antitrust Litig. ("LIBOR IV"), No. 11-mdl-2262 (NRB), 2015 U.S. Dist. LEXIS 147561, 2015 WL 6243526, at *158 (S.D.N.Y. Oct. 20, 2015)*. The caption also lists Rabobank International, but that is merely a tradename for Rabobank.

On December 20, 2016, the district court largely granted the motions to dismiss. On the issue of antitrust standing, the district court concluded that the Bondholder Plaintiffs were not efficient enforcers since they purchased their bonds from third parties who independently chose to reference LIBOR. *In re LIBOR-Based Fin. Instruments Antitrust Litig. ("LIBOR VI"), No. 11-mdl-2262 (NRB), 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *16 (S.D.N.Y. Dec. 20, 2016)*. Such independent action, the court explained, "breaks the chain of causation between [D]efendants' actions and a [P]laintiff's injury." *Id.* The court further held that the efficient enforcer considerations underlying its analysis of the federal antitrust claims applied with equal force to the antitrust claims brought under *California's Cartwright Act*. *2016 U.S. Dist. LEXIS 175929, [WL] at 24*.

But the district court **[**13]** did not address whether Schwab, whose claims depended in part on purchasing LIBOR-related bonds sold by third parties, was an efficient enforcer. Instead, the district court dismissed Schwab's three complaints (and the claims of several other Plaintiffs) on personal jurisdiction grounds. The district court first defined the scope of the conspiracy, which the court deemed to be limited to the Banks' "projection of financial soundness." *2016 U.S. Dist. LEXIS 175929, [WL] at 7*. With this narrow scope in mind, the court rejected the notion that Plaintiffs could "rely on the sales of LIBOR-based financial products in the United States" because "the goal of the conspiracy would have succeeded regardless of whether any defendants based their products on LIBOR and regardless of whether any [D]efendant [B]ank increased or decreased the margin on their LIBOR-based products." *2016 U.S. Dist. LEXIS 175929, [WL] at 8*. Although the court noted several allegations that Bank executives and managers in the United States had directed the suppression of LIBOR from within the United States, the court nevertheless found that the allegations could be "easily discounted, especially in light of the moving [D]efendants' declarations" denying those allegations. *2016 U.S. Dist. LEXIS 175929, [WL] at 11*. **[**14]** After discounting those allegations, and without holding an evidentiary hearing or permitting jurisdictional discovery, the district court concluded that Plaintiffs had failed to plausibly allege any facts supporting a conspiracy-based theory of jurisdiction. *See* *2016 U.S. Dist. LEXIS 175929, [WL] at 8, 14*.

Plaintiffs timely appealed. We received briefing on the antitrust standing issues, separate briefing on the personal jurisdiction issues, and supplemental briefing in light of our decision in *Schwab*. Following oral argument, we granted requests from a number of parties to sever, stay, and remand their appeals to the district court for purposes of concluding settlement negotiations. The district court ultimately approved those settlements on December 16, 2020, prompting us to dismiss those appeals on January 27, 2021.[3] This appeal is now ready for resolution.

[*114] II. DISCUSSION

In broad strokes, Plaintiffs raise two challenges to the district court's opinion. First, Schwab and the Bondholder Plaintiffs challenge the district court's conclusion that those who purchased LIBOR-related bonds from third parties lack antitrust standing under federal law, and (with respect to Schwab only) that California law applies the **[**15]** same statutory standing analysis. Second, each Plaintiff contends that the district court in fact had personal jurisdiction over every Defendant based on multiple theories, including a conspiracy-based theory of jurisdiction. We take each issue in turn.

---

[3] Specifically, we dismissed the appeals of the following parties pursuant to ***Federal Rule of Appellate Procedure 42(b)***: (1) Plaintiffs Ellen Gelboim and Linda Zacher's appeal with respect to Citibank, NA and Citigroup, Inc. (Doc. No. 821); (2) Gelboim and Zacher's appeal with respect to J.P. Morgan Chase & Co., J. P. Morgan Chase Bank, N.A., Bank of America Corporation, and Bank of America N.A. (Doc. Nos. 817, 815); (3) Gelboim and Zacher's appeal with respect to Royal Bank of Scotland (Doc. Nos. 819), and (4) the Exchange-Based Plaintiffs Metzler Asset Management GmbH (f/k/a Metzler Investment GMBH), FTC Futures Fund SICAV, FTC Futures Fund PCC Ltd., Atlantic Trading USA, LLC, 303030 Trading LLC, Gary Francis, and Nathaniel Haynes's appeal with respect to Société Générale S.A. (Doc. Nos. 784). We later dismissed HSBC Holdings plc and HSBC Bank plc from one of the Schwab cases. (Doc. No. 838) Most recently, Gelboim and Zacher moved to sever and stay their appeal as to Credit Suisse, The Bank of Tokyo-Mitsubishi UFJ, Ltd. (now known as MUFG Bank, Ltd.), and Norinchukin Bank, which we granted on October 19, 2021; accordingly, this opinion does not resolve any legal issues between those parties.

A. Antitrust Standing

The Bondholder Plaintiffs argue that the district court improperly dismissed their complaint after concluding that they lacked antitrust standing to bring a federal antitrust claim. Schwab purports to join the Bondholder Plaintiffs' appeal on this issue to the extent that its antitrust claims overlap with the Bondholder Plaintiffs', and Schwab further challenges the district court's determination that California's state ***antitrust law*** mirrors its federal analog.

On the issue of federal antitrust standing, we agree with the district court's conclusion that those Plaintiffs who purchased LIBOR-based bonds from third parties did not suffer an antitrust injury *that was proximately caused* by Defendants' alleged conspiracy. Like the district court, we therefore hold that the Bondholder Plaintiffs are not the proper parties to sue under federal ***antitrust law*** because — in the parlance of our antitrust doctrine — the Bondholder **[**16]** Plaintiffs are not "efficient enforcers" of the federal law. The same conclusion necessarily covers Schwab's federal antitrust claims, to the extent that they are based on Schwab's purchase of LIBOR-related bonds from third parties, and Schwab's California antitrust claims, since we are persuaded that California's antitrust standing analysis tracks its federal analog.[4]

1. Antitrust Standing for Federal Antitrust Claims

HN1[] *Section 4 of the Clayton Act* provides for a private right of action and treble damages to "[a]ny person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws." *15 U.S.C. § 15(a)*. But the Supreme Court **[*115]** has recognized that "Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." *Associated General Contractors of California, Inc. v. California State Council of Carpenters ("AGC"), 459 U.S. 519, 534, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* (internal quotation marks omitted). Accordingly, the private right to seek treble damages for federal antitrust violations has "developed limiting contours," which are "embodied in the concept of 'antitrust standing.'" *Gatt Commc'ns, Inc. v. PMC Assocs., L.L.C., 711 F.3d 68, 75 (2d Cir. 2013)*.

To establish antitrust standing, "a plaintiff must show (1) antitrust injury, which is 'injury of the type the antitrust laws were intended to prevent and that flows from **[**17]** that which makes defendants' acts unlawful,' and (2) that he is a proper plaintiff in light of four 'efficient enforcer' factors[.]" *In re DDAVP Direct Purchaser Antitrust Litig., 585 F.3d 677, 688 (2d Cir. 2009)* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*).[5] There can be no doubt after our decision in *Gelboim* that all Plaintiffs here, including Schwab and the Bondholder Plaintiffs, have "plausibly alleged antitrust injury" flowing from the Banks' horizontal price-fixing conspiracy. *823 F.3d at 775*. ***HN2***[] But even where a plaintiff "has cleared the antitrust-injury hurdle," the plaintiff must further "show that it is an 'efficient enforcer' of the antitrust laws." *IQ Dental Supply, Inc. v. Henry Schein, Inc., 924 F.3d 57, 65 (2d Cir. 2019)*. Though *Gelboim* did not resolve this efficient-enforcer prong of the antitrust-standing analysis, the district court considered the issue on remand and found that the Bondholder Plaintiffs failed to plausibly allege facts establishing that they were efficient enforcers.

HN4[] At its core, the efficient enforcer analysis requires a court to decide if the "plaintiff is a proper party to perform the office of a private attorney general and thereby vindicate the public interest in antitrust enforcement."

---

[4] Even though the district court dismissed Schwab's claims for lack of personal jurisdiction and did not reach Defendants' motion to dismiss Schwab's claims for lack of antitrust standing, we are free to consider that issue on appeal as an alternate basis to affirm the dismissal of Schwab's claims. *See* *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 421 (2d Cir. 2005)*.

[5] ***HN3***[] Of course, an antitrust plaintiff must show both constitutional standing and antitrust standing. *See* *AGC, 459 U.S. at 535 n.31*; *Port Dock & Stone Corp. v. Oldcastle Ne., Inc., 507 F.3d 117, 121 (2d Cir. 2007)*. But we have already held that constitutional standing is "easily satisfied by [A]ppellants' pleading that they were harmed by receiving lower returns on LIBOR-denominated instruments as a result of [D]efendants' manipulation of LIBOR." *Gelboim, 823 F.3d at 770*.

Gelboim, 823 F.3d at 780 (internal quotation marks omitted). In AGC, the Supreme Court outlined four factors to guide this analysis:

(1) "'the directness or indirectness of the asserted injury'";

(2) "'the **[**18]** existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement'";

(3) "the speculativeness of the alleged injury"; and

(4) "the difficulty of identifying damages and apportioning them among direct and indirect victims so as to avoid duplicative recoveries."

Volvo N. Am. Corp. v. Men's Int'l Prof'l Tennis Council, 857 F.2d 55, 66 (2d Cir. 1988) (quoting *AGC, 459 U.S. at 540-45*). We now consider whether the district court properly applied these factors on remand.

a. Directness of the Injury

In our view, the district court correctly "dr[e]w a line between [P]laintiffs who transacted directly with [D]efendants and those who did not," finding that **[*116]** only those who transacted with the Banks suffered a direct antitrust injury. *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *16*. ***HN5***[] For the purposes of antitrust standing, proximate cause is determined according to the so-called "first-step rule." "Under th[at] rule, injuries that happen at the first step following the harmful behavior are considered proximately caused by that behavior." *In re Am. Express Anti-Steering Rules Antitrust Litig., No. 20-1766, 19 F.4th 127, 2021 U.S. App. LEXIS 34626, at *15 (2d Cir. Nov. 22, 2021)*; *see also* Gatt, 711 F.3d at 78 ("Directness . . . means close in the chain of causation.") (internal quotation marks omitted). It is thus not enough that a plaintiff "suffered a loss in some manner that might conceivably be traced to the conduct of the defendants." **[**19]** *In re Aluminum Warehousing Antitrust Litig., 833 F.3d 151, 157 (2d Cir. 2016)* (internal quotation marks omitted). Rather, "'the general tendency of [§ 4 of the Clayton Act] is not to go beyond the first step.'" *Verizon Commc'ns Inc. v. Law Offs. of Curtis V. Trinko, LLP, 540 U.S. 398, 417, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)* (Stevens, J., concurring in the judgment) (internal quotation marks omitted); *see also* *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 126, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)* (citing *AGC, 459 U.S. at 532-33*) (holding that the Clayton Act covers only plaintiffs "whose injuries were proximately caused by a defendant's antitrust violations.")

The first-step rule and traditional proximate cause considerations require drawing a line between those whose injuries resulted from their direct transactions with the Banks and those whose injuries stemmed from their deals with third parties. *See* *In re Am. Express, No. 20-1766, 2021 U.S. App. LEXIS 34626, at *17* (holding that "if there are 'direct victims,' those victims are the merchants to which Amex's Anti-Steering Rules applied," not the appellants who "were allegedly injured when Amex's competitors, . . . raised their own prices"); 2A Phillip Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 335c(3) (2014) ("Beyond the actual customers, most other plaintiffs would be classified as 'remote' and denied standing even though they have suffered injury-in-fact."). This is because the decision of a third party to incorporate LIBOR as a term in a financial instrument could be made without any connection to the actions of **[**20]** the Banks. Such independent decisions snap the chain of causation linking Plaintiffs' injury to the Banks' misconduct.

The disconnect between Plaintiffs' injury and the Banks' alleged benefit further demonstrates the attenuated nature of the causal chain. Schwab and the Bondholder Plaintiffs were allegedly harmed because they received lower-interest payments due to the conspirators' suppression of LIBOR, which resulted in Plaintiffs' counterparties receiving a corresponding benefit of lower-interest payments. But the reduced-interest payment in no way enriched the Banks, who had no financial stake in the transactions whatsoever. Rather, for every Plaintiff who was harmed by a reduced-interest payment, there was a third party who benefited from being the counterparty to the transaction. None of that benefit, however, flowed to the Banks. And while Plaintiffs insist that the Banks derived a reputational benefit from falsely touting their ability to get lower rates on borrowing than was actually the case, that benefit too is wholly unrelated to the purported harm. Though the Banks may have increased their profits by selling LIBOR-indexed instruments, those who purchased from third parties **[**21]** were "not the target" of such harm; they were "simply collateral damage." *IQ Dental Supply, 924 F.3d at 65-66*.

To be sure, some courts have occasionally looked past intervening decisions by **[*117]** third parties to find "umbrella standing," which allows a consumer who dealt with a non-cartel member to pursue antitrust claims against cartel members who rigged the market as a whole. *See* *Gelboim, 823 F.3d at 778* (collecting cases and noting a circuit split). We have never adopted this theory of antitrust standing, and the unique nature of the LIBOR conspiracy makes umbrella standing particularly inappropriate here. *See, e.g.*, *In re Am. Express, No. 20-1766, 2021 U.S. App. LEXIS 34626, at *23* ("[I]t is not the appellants' status of umbrella plaintiffs or otherwise that resolves the antitrust standing question but 'the relationship between the defendant's alleged unlawful conduct and the resulting harm to the plaintiff.'" (quoting *Am. Ad Mgmt., Inc. v. Gen. Tel. Co. of Cal., 190 F.3d 1051, 1058 (9th Cir. 1999)*). Unlike the archetypal price-fixing conspiracy, which involves a cartel that controls a market for a good and sells that good at an inflated price, *see, e.g.*, *In re Beef Indus. Antitrust Litig., 600 F.2d 1148, 1166 n.24 (5th Cir. 1979)*, the LIBOR conspiracy entailed the fixing of a number that was available for unlimited third parties to reference and incorporate into their own products and transactions without any input from, or involvement by, the Banks. There is **[**22]** no allegation that the Banks controlled the market for LIBOR-referencing products, nor any claim that the Banks pressured third parties to adhere to a LIBOR-based index. Instead, third parties independently decided to peg their bonds' terms to LIBOR.

Simply put, umbrella standing of the sort urged by the Bondholder and Schwab Plaintiffs would yield liability that is far too sweeping and would, therefore, "raise the very concern of damages disproportionate to wrongdoing" emphasized in cases that reject umbrella standing. *Gelboim, 823 F.3d at 779*. Because the harm that befell Schwab and the Bondholder Plaintiffs is far removed from Defendants' conduct, it cannot be said that Defendants proximately caused the alleged antitrust injury.

The Supreme Court's decision in *Blue Shield of Virginia v. McCready, 457 U.S. 465, 102 S. Ct. 2540, 73 L. Ed. 2d 149 (1982)*, is not to the contrary. There, the plaintiff argued that an insurance provider for her employer-purchased group health plan had conspired with psychiatrists to box out psychologists from the psychotherapy market, and as a result of the conspiracy, had refused to reimburse her for treatment provided by a psychologist. *See* *id. at 469-70*. The Supreme Court determined that the plaintiff had successfully pleaded antitrust injury because, even though she did not directly **[**23]** transact with the conspiring defendants, her injury was "inextricably intertwined" with their scheme. *Id. at 484*. In so holding, the Supreme Court merely carved out an exception to the market participant requirement in cases where a plaintiff was "manipulated or utilized by [a defendant] as a fulcrum, conduit or market force to injure competitors or participants in the relevant product and geographical markets." *Aluminum Warehousing, 833 F.3d at 161* (internal quotation marks omitted). *McCready* involved a direct relationship between the pocket-book harm to the plaintiff and the market advantage gained by the defendants, which was the very goal of the conspiracy.

Not so here. As noted above, Defendants derived no benefit from Plaintiffs' transactions with third parties. Those transactions, while arguably foreseeable to the Banks, were entirely separate from the purpose of the alleged conspiracy and took place merely because of LIBOR's unlimited public availability as a reference point for innumerable transactions. This case thus has little in common with *McCready*.

[*118] Likewise, the Seventh Circuit cases on which Plaintiffs rely, *Sanner v. Board of Trade of Chicago, 62 F.3d 918 (7th Cir. 1995)*, and *Loeb Industries, Inc. v. Sumitomo Corp., 306 F.3d 469 (7th Cir. 2002)*, do not support a finding of proximate cause here. In both cases, the Seventh Circuit found antitrust standing for the **[**24]** plaintiffs who bought or sold various physical commodities in the cash market, and who alleged injuries caused by the defendants' manipulation of the futures market for the same commodity. *Sanner, 62 F.3d at 930*; *Loeb Indus., 306 F.3d at 489*. But while these cases accepted a somewhat attenuated chain of causation, they nonetheless emphasized the "lockstep" link between prices in the two markets and the uniquely interrelated nature of a *cash* market for a specific commodity and the *futures* market for that same commodity. In fact, *Sanner* deemed the markets to be "so closely related that the distinction between them is of no consequence to antitrust standing analysis." *62 F.3d at 929* (internal quotation marks omitted). *Sanner* further emphasized that the defendant "intended to impact both the cash and futures markets to bring down prices in both markets" in order to benefit its clients. Id. at 929-30. The same cannot be said here, where the Banks gained no financial benefit from the use of LIBOR as an index number for *third-party* transactions.

We thus reject the attempts of Schwab and the Bondholder Plaintiffs "to impose liability for transactions [that] [D]efendants did not control and of which they were likely not even aware." Sonterra Cap. Master Fund Ltd. v. Credit Suisse Grp. AG, 277 F. Supp. 3d 521, 560 (S.D.N.Y. 2017); *see also* In re Am. Express, No. 20-1766, 2021 U.S. App. LEXIS 34626, at *17; Sullivan v. Barclays PLC, No. 13-cv-2811 (PKC), 2017 U.S. Dist. LEXIS 25756, 2017 WL 685570, at *17-18; In re Platinum & Palladium Antitrust Litig., No. 14-cv-9391 (GHW), 2017 U.S. Dist. LEXIS 46624, 2017 WL 1169626, at *22 (S.D.N.Y. Mar. 28, 2017). As aptly summarized by the district **[**25]** court, the Bondholder Plaintiffs "did not purchase directly from [D]efendants," and "made their own decisions to incorporate LIBOR into their transactions, over which [D]efendants had no control, in which [D]efendants had no input, and from which [D]efendants did not profit." LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *16. The same is true of Schwab insofar as it purchased LIBOR-related bonds from third parties.[6] Accordingly, since Defendants did not proximately cause the injury flowing from the purchases of these LIBOR-related bonds, neither set of Plaintiffs has statutory standing to raise a federal antitrust claim related to those purchases. *See* Lexmark, 572 U.S. at 126.

b. Other *AGC* Factors

While the first factor alone furnishes ample justification for affirming the district court, the other AGC factors, on the whole, likewise cut against a finding of antitrust standing. The second factor - "the existence of more direct victims of the alleged conspiracy," AGC, 459 U.S. at 545 - clearly weighs against antitrust standing since there is no shortage of other parties in this very case who purchased LIBOR-indexed financial instruments directly from the Banks. Those victims' injuries are directly linked to the Banks' profit from the conspiracy, thus underscoring the attenuated nature **[**26]** of the **[*119]** harms allegedly flowing from third-party bond sales. *See id.*

The third factor, which focuses on whether the alleged damages are "highly speculative," id. at 542, also favors Defendants. ***HN6***[] As we previously stated, "highly speculative damages is a sign that a given plaintiff is an inefficient engine of enforcement." Gelboim, 823 F.3d at 779. Schwab and the Bondholder Plaintiffs contend that their "damage theory is simple," and only requires the district court to compare the "difference between the fixed price and the price that would have obtained in a competitive market but for the price fixing." Appellant's Antitrust Br. at 37-38.

Though simple to articulate, Plaintiffs' damages theory would be difficult to apply because, at least for those who purchased their bonds during the suppression period, Plaintiffs' theory would require the court to speculate about how the third-party sellers would have factored a non-suppressed LIBOR into the transaction. For example, a bondholder may have received lowered coupon payments from a suppressed rate, but the price of the bond itself may have been correspondingly lowered to account for a suppressed LIBOR. The spread relative to LIBOR could have also been adjusted in light of **[**27]** the lower rate. To answer these and other conjectural hypotheticals, Schwab and the Bondholder Plaintiffs "would have to model far more than basic lost sales and lost profits"; they would essentially have to "creat[e] . . . an alternative universe" based on "multiple layers of speculation." IQ Dental Supply, 924 F.3d at 67 (internal quotation marks omitted). Such "highly speculative" damages claims are disfavored in selecting efficient antitrust enforcers. *See* AGC, 459 U.S. at 542-43.

That said, two considerations persuade us to give this damages-calculation factor only limited weight. First, many of the Bondholder Plaintiffs purchased their bonds prior to the period in which LIBOR was allegedly suppressed. For

[6] Indeed, Schwab's argument is even more tenuous in some respects, since Schwab bases its federal antitrust claim not only on LIBOR-indexed bonds purchased from third parties, but also on fixed-rate bonds that do not reference LIBOR at all. Schwab's theory is that LIBOR exerted a kind of gravitational force, influencing fixed-rate bonds. But that is clearly insufficient to establish antitrust standing.

claims based on these purchases, calculating damages would be more straightforward since it would not turn on how third parties accounted for the suppressed rate when incorporating LIBOR as part of the price term. ***HN7***[] Second, the Supreme Court has warned that antitrust standing should not provide a "get-out-of-court-free card" to be played "any time that a damages calculation might be complicated." *Apple Inc. v. Pepper, 139 S. Ct. 1514, 1524, 203 L. Ed. 2d 802 (2019)*. Though of diminished weight, this factor nevertheless tips the scale slightly in favor of Defendants.

HN8[] Finally, the fourth *AGC* factor - "the **[**28]** importance of avoiding either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other" - reflects a "strong interest . . . in keeping the scope of complex antitrust trials within judicially manageable limits." *AGC, 459 U.S. at 543-44*. This case does not present the problem of upstream and downstream purchasers that is the usual focus of this factor. *See id.* After all, the third parties who sold the bonds — and *benefited* from the suppressed rate — would clearly not be in a position to enforce the antitrust laws. Although the ongoing government enforcement actions might pose some minimal risk of duplicative recoveries, *see* *Gelboim, 823 F.3d at 780*, we nevertheless view this fourth factor as favoring Schwab and the Bondholder Plaintiffs.

But, on the whole, the last three *AGC* factors ultimately bolster the finding that Schwab and the Bondholder Plaintiffs have **[*120]** failed to establish antitrust standing.[7]

2. Antitrust Standing for California Antitrust Claims

Schwab next challenges the district court's decision to apply the *AGC* antitrust standing factors to antitrust claims brought pursuant to California's Cartwright Act. Though state-law authority is sparse and federal cases interpreting the **[**29]** state's requirements are divided, *compare, e.g.*, *In re Am. Express Anti-Steering Rules Antitrust Litig., 433 F. Supp. 3d 395, 413-14 (E.D.N.Y. 2020)* (siding with courts applying the *AGC* factors to California's Cartwright Act), *with, e.g.*, *In re Keurig Green Mountain Single-Serve Coffee Antitrust Litig., 383 F. Supp. 3d 187, 258 (S.D.N.Y. 2019)* ("I cannot conclude . . . that the Supreme Court of California would apply the *AGC* factors in accordance with federal precedents. . . ."), we ultimately agree with the court below that California law substantially incorporates the *AGC* factors.

HN9[] In deciding matters of state law, we seek to "predict how the state's highest court would resolve the [issues] that we have identified." *Travelers Ins. Co. v. Carpenter, 411 F.3d 323, 329 (2d Cir. 2005)* (internal quotation marks omitted). Naturally, that means that we "give the fullest weight to pronouncements of the state's highest court," *id.* - but it also means that we look to the rulings of the state's lower courts as providing important data points for understanding state law, *see* *New York v. Nat'l Serv. Indus., Inc., 460 F.3d 201, 210 (2d Cir. 2006)*.

To date, the California Supreme Court has not addressed the question before us; instead, the best data point for assessing California's antitrust standing analysis is a decision from a California intermediate appellate court, *Vinci v. Waste Mgmt., Inc., 36 Cal. App. 4th 1811, 43 Cal. Rptr. 2d 337, 338-39 (Cal. Ct. App. 1995)*, which expressly described the antitrust standing required under state law in terms of the *AGC* factors. *See also* *Wholesale Elec. Antitrust Cases I & II, 147 Cal. App. 4th 1293, 55 Cal. Rptr. 3d 253, 265 (Cal. Ct. App. 2007)* (quoting federal antitrust standing elements as deciding antitrust **[**30]** standing under California's Cartwright Act). The *Vinci* court looked to federal antitrust elements both because the Cartwright Act contains "similar language" to the federal antitrust statute interpreted in *AGC* and "[b]ecause the Cartwright Act has objectives identical to the federal antitrust acts." *Vinci, 43 Cal. Rptr. 2d at 338 & n.1*.

Schwab nonetheless contends that the California Supreme Court's more recent decision in *Aryeh v. Canon Business Solutions, Inc., 55 Cal. 4th 1185, 151 Cal. Rptr. 3d 827, 292 P.3d 871, 877 (Cal. 2013)*, casts doubt on *Vinci*. While it is true that *Aryeh* stated in dicta that "[i]nterpretations of federal ***antitrust law*** are at most instructive,

[7] Having resolved the antitrust-standing issue in favor of Defendants, we do not reach their alternative argument that Schwab and the Bondholder Plaintiffs have not pleaded an antitrust injury related to bonds purchased before the suppression period.

not conclusive, when construing the Cartwright Act," 292 P.3d at 877, Aryeh does not compel us to conclude that interpretations of federal and state antitrust standing law always diverge. Indeed, we recently held — on the strength of Aryeh's instructions alone — that "the California legislature, like Congress, was 'familiar with the common-law rule' of proximate cause" and did not intend "to displace it *sub silentio*" when it enacted the Cartwright Act. In re Am. Express, No. 20-1766, 2021 U.S. App. LEXIS 34626, at *24 (quoting Lexmark, 572 U.S. at 132). This conclusion is strengthened by Vinci, **[*121]** which remains the California case most directly on point. We therefore hold that Schwab also lacks antitrust standing to bring its state-law claims based on its purchasing of bonds from third parties.

B. Personal [31] Jurisdiction**

We next consider the district court's personal jurisdiction analysis. As noted above, the district court dismissed the federal and state antitrust claims filed by the Exchange-Based, OTC, and non-class Plaintiffs (including Schwab), after concluding that these Plaintiffs failed to sufficiently allege minimum contacts with the United States. Reviewing the district court's dismissal de novo, Chloe v. Queen Bee of Beverly Hills, LLC, 616 F.3d 158, 163 (2d Cir. 2010), we conclude that the district court had specific personal jurisdiction under the conspiracy theory adopted in *Schwab*.

HN10[] To survive a motion to dismiss, "a plaintiff must make a prima facie showing that [personal] jurisdiction exists." Licci ex rel. Licci v. Lebanese Canadian Bank, SAL, 732 F.3d 161, 167 (2d Cir. 2013) (internal quotation marks omitted). While we read "the pleadings and any supporting materials in the light most favorable to the plaintiffs," *id.*, we also require that the plaintiffs make "legally sufficient allegations of jurisdiction, including an averment of facts that, if credited[,] would suffice to establish jurisdiction over the defendant," Penguin Grp. (USA) Inc. v. Am. Buddha, 609 F.3d 30, 35 (2d Cir. 2010) (alteration in original) (internal quotation marks omitted).

HN11[] Before a court may exercise personal jurisdiction over a defendant, three requirements must be met: (1) "the plaintiff's service of process upon the **[**32]** defendant must have been procedurally proper"; (2) "there must be a statutory basis for personal jurisdiction that renders such service of process effective"; and (3) "the exercise of personal jurisdiction must comport with constitutional due process principles." Waldman v. Palestine Liberation Org., 835 F.3d 317, 327-28 (2d Cir. 2016) (quoting Licci ex rel. Licci, 673 F.3d at 59-60).

Only the third requirement — compliance with due process — is contested here. ***HN12***[] As the Supreme Court has long held, due process demands that each defendant over whom a court exercises jurisdiction have some "minimum contacts with [the forum] such that the maintenance of the suit does not offend traditional notions of fair play and substantial justice." Int'l Shoe Co. v. Wahsington, 326 U.S. 310, 316, 66 S. Ct. 154, 90 L. Ed. 95 (1945) (internal quotation marks omitted); *see also* Waldman, 835 F.3d at 330-31 (applying analysis to Fifth Amendment). Our inquiry narrows further, however, since the district court did not address traditional notions of fair play and substantial justice, and Defendants do not rely on that prong as an alternative basis for affirmance. We thus likewise limit our analysis to the assessment of Defendants' minimum contacts. *See* Schwab, 883 F.3d at 82.

The district court determined that the "relevant forum for the assessment of minimum contacts is the United States as a whole." LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *8. In reaching this conclusion, the district court cited its analysis **[**33]** in an earlier opinion, *id.*, in which the court had observed that some of Plaintiffs' claims "arise under federal statutes containing provisions authorizing nationwide service of process," LIBOR IV, 2015 U.S. Dist. LEXIS 147561, 2015 WL 6243526, at *23; *see* 15 U.S.C. § 22. There, the district court grounded its nation-based approach on the theory that "[w]hen the national sovereign is applying national law, the relevant contacts **[*122]** are the contacts between the defendant and the sovereign[] nation." LIBOR IV, 2015 U.S. Dist. LEXIS 147561, 2015 WL 6243526, at *23 (quoting In re Oil Spill by Amoco Cadiz, 954 F.2d 1279, 1294 (7th Cir. 1992)); *see also* Chew v. Dietrich, 143 F.3d 24, 28 n.4 (2d Cir. 1998). No party challenges the district court's conclusion that a nation-wide contacts analysis is appropriate here, and neither do we. *See* In re Magnetic Audiotape Antitrust Litig., 334 F.3d 204, 207 (2d Cir. 2003) (assuming that district court correctly decided that the "minimum contacts analysis looks to a corporation's contacts with the United States as a whole," "given that the parties do not question it on appeal").

HN13[] When the claims "arise[] out of, or relate[] to, [a] defendant's contacts with the forum — i.e., specific jurisdiction is asserted — minimum contacts necessary to support such jurisdiction exist where the defendant purposefully availed itself of the privilege of doing business in the forum and could foresee being haled into court there." *Licci, 732 F.3d at 170* (internal quotation marks omitted and alterations adopted); *see also* ***[**34]*** *Bristol-Myers Squibb Co. v. Superior Ct. of California, 137 S. Ct. 1773, 1780, 198 L. Ed. 2d 395 (2017)*. The contacts must be created by the "defendant *[it]self*," *Walden v. Fiore, 571 U.S. 277, 284, 134 S. Ct. 1115, 188 L. Ed. 2d 12 (2014)* (internal quotation marks omitted), rather than from the "unilateral activity of another party or a third person," *Helicopteros Nacionales de Colombia, S.A. v. Hall, 466 U.S. 408, 417, 104 S. Ct. 1868, 80 L. Ed. 2d 404 (1984)*. That said, "a defendant can 'purposefully avail itself of a forum'" through the action of a third party by "directing its agents or distributors to take action there." *Schwab, 883 F.3d at 84* (quoting *Daimler AG v. Bauman, 571 U.S. 117, 135 n.13, 134 S. Ct. 746, 187 L. Ed. 2d 624 (2014)*); *see also* *Walden, 571 U.S. at 286* ("[A] defendant's contacts with the forum State may be intertwined with his transactions or interactions with the plaintiff or other parties.").

In *Schwab*, we held that a defendant can similarly avail itself of a forum through certain actions taken by a co-conspirator in the forum. *See* *Schwab, 883 F.3d at 86-87*. Much like an agent who operates on behalf of, and for the benefit of, its principal, a co-conspirator who undertakes action in furtherance of the conspiracy essentially operates on behalf of, and for the benefit of, each member of the conspiracy. *See* *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 769, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* ("In any conspiracy, two or more entities that previously pursued their own interests separately are combining to act as one for their common benefit.").

HN14[] To assert a conspiracy theory of personal jurisdiction, a plaintiff must plausibly allege that "(1) a conspiracy existed; (2) the defendant **[**35]** participated in the conspiracy; and (3) a co-conspirator's overt acts in furtherance of the conspiracy had sufficient contacts with a [forum] to subject that co-conspirator to jurisdiction in that [forum]." *Schwab, 883 F.3d at 87*. Defendants argue that Plaintiffs cannot meet *Schwab's* third prong, and that, in addition to *Schwab's* test, conspiracy-based jurisdiction "requires a relationship of direction, control, and supervision before a co-conspirator's forum contacts may be imputed to absent defendants for jurisdictional purposes." Appellees' Jurisdiction Sur-reply at 5. We reject both arguments.

1. The Plaintiffs plausibly alleged overt conspiratorial acts in the forum.

Only *Schwab*'s third prong is at **[*123]** issue here.[8] When viewed in favor of the non-moving party, the pleadings and record evidence establish several overt, conspiratorial acts that are sufficient to subject each co-conspirator to personal jurisdiction in the United States. *See* *Licci, 732 F.3d at 167*; *Dorchester Fin. Sec., Inc. v. Banco BRJ, S.A., 722 F.3d 81, 85 (2d Cir. 2013)*.

Plaintiffs allege that Bank executives and managers in the United States mandated that their subordinates manipulate LIBOR. For starters, they allege that a "senior UBS manager in Stamford, Connecticut issued [a] standing directive **[**36]** to 'submit low LIBOR contributions' for USD LIBOR, and to keep submissions in the 'middle of the pack of other banks' expected LIBOR submissions.'" Confidential App'x at 3-4 (quoting UBS's admissions to the Department of Justice). Similarly, Plaintiffs rely on emails between a senior JPMorgan Chase executive in New York and the Banks' LIBOR submitter discussing the importance of staying in "the pack" and

---

[8] Although Defendants state for the first time in their sur-reply that Plaintiffs failed to satisfy the first two *Schwab* factors, we consider this delayed argument to be forfeited. *See* *McBride v. BIC Consumer Prods. Mfg. Co., 583 F.3d 92, 96 (2d Cir. 2009)* ("[W]e ordinarily will not consider issues raised for the first time in a reply brief."); 16AA Charles A. Wright & Arthur R. Miller, *Federal Practice & Procedure* § 3974.2 (5th ed.) ("An appellee who fails to include and properly argue a contention in the appellee's brief takes the risk that the court will view the contention as forfeited."). Indeed, even after Plaintiffs' opening brief articulated essentially the same conspiracy-based jurisdictional test later adopted in *Schwab* and relied on *Gelboim* as "confirm[ing] that the first and second elements are met," Appellants' Jurisdiction Br. at 59, Defendants' 73-page response brief on personal jurisdiction did not hint at any disagreement on that score. Under these circumstances, no "manifest injustice" would result from following our ordinary course and declining to consider Defendants' belated argument. *JP Morgan Chase Bank v. Altos Hornos de Mexico, S.A. de C.V., 412 F.3d 418, 428 (2d Cir. 2005)*.

asking the submitter to "err on the low side" when setting LIBOR. *Id.* at 3, 30, 139. They also quote an email in which a U.S.-based employee of Citibank urged the Bank's LIBOR submitter that "we should take a leadership [role] in bringing these LIBORS back to more sensible levels," "[e]xactly as we did 3-4 months back"; the Bank's LIBOR submissions then decreased. *Id.* at 34-35. Finally, Plaintiffs assert that a Barclays' executive "who was based in New York . . . has admitted that he instructed subordinates to submit artificially low USD LIBOR rates." *Id.* at 343.

If true, these communications would establish overt acts taken by co-conspirator Banks in the United States in furtherance of the suppression conspiracy, vesting the district court with personal jurisdiction over each Defendant. **[**37]** *See Schwab, 883 F.3d at 87*; *cf. United States v. Kirk Tang Yuk, 885 F.3d 57, 74 (2d Cir. 2018)* (holding that a phone call to advance a conspiracy made venue proper in the district where the call originated); *Textor v. Bd. of Regents of N. Illinois Univ., 711 F.2d 1387, 1393 (7th Cir. 1983)* (finding conspiracy-based personal jurisdiction where a party allegedly discriminated in the forum "[i]n furtherance of, and in accordance with, th[e] conspiracy").[9]

The district court, however, was not convinced because it found each allegation to be "easily discounted, especially in light of **[*124]** the moving [D]efendants' declarations stating that they did not determine or transmit their LIBOR submissions from the United States." *LIBOR VI, 2016 U.S. Dist. LEXIS 175929, 2016 WL 7378980, at *11*. But this is not the stage in the litigation to decide competing factual assertions; "in the absence of an evidentiary hearing, it was error for the district court to resolve that factual dispute in [Defendants'] favor." *Dorchester, 722 F.3d at 86*.

Defendants nonetheless argue that Plaintiffs' allegations cannot survive scrutiny. Attacking the allegations concerning the UBS-related LIBOR bids, they contend that the document on which Plaintiffs rely (a non-prosecution agreement with the Department of Justice) actually "contradicts" Plaintiffs' assertion that the UBS manager in Stamford, Connecticut directed subordinates to manipulate the inter-bank rate. Appellee's **[**38]** Jurisdiction Br. at 43. To be sure, the non-prosecution agreement mentions suppression-related emails from a UBS manager "in Zurich," but the agreement further states that the Zurich manager "in turn indicated that the direction came from the Stamford-based Group Treasury senior manager." App'x at 3399, 3408. And while Defendants would discount these statements as "apparently not based on . . . personal knowledge," Appellee's Jurisdiction Br. at 43, we are not at liberty to draw that inference against Plaintiffs at this stage of the litigation. *See Dorchester, 722 F.3d at 85-86*.

Defendants similarly challenge the characterizations of other alleged conspiratorial acts. For instance, Defendants would disregard allegations of the U.S.-based requests from upper management at JPMorgan Chase, dismissing those communications as "executives" merely "express[ing] opinions about [LIBOR] submissions." Appellee's Jurisdiction Br. at 44. Once again, this strained reading is clearly incompatible with our obligation to interpret the record in the light most favorable to Plaintiffs. *See Dorchester, 722 F.3d at 85-86*. In the end, Plaintiffs have alleged overt acts taken in the United States to advance the suppression conspiracy; at this stage of the litigation, **[**39]** that is enough to establish personal jurisdiction. *See Schwab, 883 F.3d at 87*.

2. Conspiracy jurisdiction does not require allegations of control.

Defendants next argue that in addition to meeting *Schwab*'s three elements, Plaintiffs must also demonstrate that Defendants directed, controlled, and/or supervised the co-conspirator who carried out the overt acts in the forum. Although Defendants base their argument on our decision in *Leasco Data Processing Equip. Corp. v. Maxwell, 468 F.2d 1326 (2d Cir. 1972)*, *abrogated on other grounds by Morrison v. Nat'l Australia Bank Ltd., 561 U.S. 247, 130 S. Ct. 2869, 177 L. Ed. 2d 535 (2010)*, neither that case nor due process principles require more than that a defendant purposefully availed itself of the forum through the overt acts of its co-conspirator.

---

[9] In light of this conclusion, we do not address whether other alleged acts, including that the BBA sent a representative to the United States to assure investors that LIBOR was sound and that LIBOR submissions were transmitted to Thomson Reuters in New York, also amount to overt conspiratorial acts in the forum.

In adopting "the appropriate test for alleging a conspiracy theory of jurisdiction," *Schwab* noticeably did not endorse Defendant's argument, even though Defendants advanced the same point there. *Compare* Schwab, 883 F.3d at 86-87, *with* Brief for Defendants-Appellees, Schwab, 883 F.3d 68, 2017 WL 395989, at *30-35. Our silence was not due to oversight — indeed, elsewhere in *Schwab* we discussed the very portions of Leasco on which Defendants now rely. *See* Schwab, 883 F.3d at 85. Leasco, however, did not demand a relationship of control before one defendant's minimum contacts are imputed to its co-conspirator. It held instead that "the mere presence of one conspirator" would **[*125]** not be enough to "confer personal jurisdiction **[**40]** over another alleged conspirator," and that actions taken by a lawyer in the forum could not be attributed to a partner at the law firm merely on the basis of the partnership. Leasco, 468 F.2d at 1343. True, we went on to state in dicta that the "matter could be viewed differently" if the partner had delegated the in-forum tasks, meaning that delegation and control can be important indicia of purposeful availment through a third party. *Id.* But that observation in no way amounts to a holding that a defendant *must* control a co-conspirator before its purposeful availment is imputed to the defendant; rather, *Schwab* provides "the appropriate test for alleging a conspiracy theory of jurisdiction." 883 F.3d at 87.

Moreover, although we conclude that our caselaw does not require a relationship of control, direction, or supervision, we should also underscore that *Schwab*'s three-prong test *serves* the purposeful availment requirement, rather than supplants it. *See id.* (fashioning the test to avoid "inconsisten[cies] with the 'purposeful availment' requirement"). ***HN15***[] To that end, the conspiracy theory could not get off the ground if a defendant were altogether blindsided by its co-conspirator's contacts with the forum; the conspiratorial **[**41]** contacts must be of the sort that a defendant "should reasonably anticipate being haled into court" in the forum as a result of them. *World-Wide Volkswagen Corp. v. Woodson, 444 U.S. 286, 297, 100 S. Ct. 559, 62 L. Ed. 2d 490 (1980)*; *see also* Schwab, 883 F.3d at 82 ("[The] minimum contacts necessary to support such jurisdiction exist where the defendant purposefully availed itself of the privilege of doing business in the forum and could foresee being haled into court there.").

Defendants, of course, do not dispute that the overt acts were foreseeable to them. The alleged conspiracy involved the manipulation of U.S.-Dollar LIBOR with co-conspirators who were based in the United States. With this backdrop, the alleged overt acts taken by co-conspirators in the United States to advance the conspiracy should certainly have been anticipated by Defendants, and that is enough to make out a prima facie case that each Defendant has the requisite minimum contacts with the nation.[10] *See* Schwab, 883 F.3d at 87.

III. Conclusion

For the foregoing reasons, we **AFFIRM** the judgment of the district court dismissing the Bondholder Plaintiffs' complaint, as well as dismissing Schwab's federal and state antitrust claims to the extent that they depend on its purchases of LIBOR-related bonds from third parties. But since we hold that Defendants **[**42]** had the relevant minimum contacts with the United States to satisfy due process, we **REVERSE** the judgment in part, and **REMAND** for further proceedings.

APPENDIX A

Additional Counsel for Plaintiffs-Appellants on the Brief

Josephs v. Marzan

United States District Court for the District of Minnesota

January 5, 2022, Decided; January 5, 2022, Filed

Civil No. 21-0749 (JRT/DTS)

Reporter
2022 U.S. Dist. LEXIS 2035 *; 2022 WL 45041

MICHALEEN JOSEPHS, Plaintiff, v. ALBERTO JOSE MARZAN and PRESS MEDIA GROUP, INC. d/b/a VumaTV, Defendants.

Core Terms

equitable relief, damages, entity, costs, enterprise, expenses, private plaintiff, restraining order, attorney's fees, alleges, monetary damages, treble damages, legislative history, courts, uncontested, equitable remedy, documentation, violations, cases, wire, abuse of process, promissory note, investors, remedies, Default, redress, motion for default, default judgment, interim relief, gap

Counsel: **[*1]** Caitlinrose H. Fisher and Matthew D. Forsgren, FORSGREN FISHER MCCALMONT DEMAREA TYSVER LLP, Minneapolis, MN, for plaintiff.

Alberto Jose Marzan, defendant, Pro se.

Press Media Group, Inc., defendant, Pro se.

Judges: JOHN R. TUNHEIM, Chief United States District Judge.

Opinion by: JOHN R. TUNHEIM

Opinion

MEMORANDUM OPINION AND ORDER GRANTING DEFAULT JUDGMENT

Plaintiff Michaleen Josephs brought this action against Defendants Alberto Jose Marzan and Press Media Group, Inc. ("PMG") in connection with a series of investment loans Josephs made to the Defendants and other payments Josephs made for Defendants' benefit. Josephs filed a Motion for Default Judgment against both defendants requesting monetary damages and equitable relief. The Court will grant the Motion for Default Judgment and will award damages and equitable relief.

BACKGROUND

On March 22, 2021, Josephs filed a Complaint against both Defendants. (Compl., Mar. 22, 2021, Docket No. 1.) The Complaint alleges that Marzan induced Josephs to loan money to and invest in PMG and pay other expenses for Marzan and PMG conditioned on a series of promises that she would be paid back. (*Id.* ¶¶ 45-58, 60-93, 101-19.) Josephs and PMG entered into two written promissory notes **[*2]** guaranteeing repayment of $150,000 that Josephs wired PMG as a loan and of $47,000 in expenses Josephs had paid for PMG's benefit. (*Id.* ¶¶ 88-91;

Compl., Exs. A—B.) Marzan also personally guaranteed these notes in a written contract that also allowed Josephs to recover attorney fees and costs associated with enforcing payment. (Compl. ¶¶ 92-93; Compl., Ex. C.) Josephs also allowed Defendants to use her credit cards, wired money to them, and paid other expenses for their benefit. (Compl. ¶¶ 72-76, 80-83, 106, 108.)

The Complaint alleges that instead of a legitimate investment Marzan and PMG defrauded Josephs. (*See, e.g., id.* ¶¶ 3-8, 44-57, 68-71, 146-157.) For example, Josephs wired PMG a $150,000 loan—later secured by a promissory note—after Marzan represented to her that PMG had secured $2.5 million in funding from other investors and had never taken on debt. (*Id.* ¶¶ 48-49, 51, 56-58.) These representations were false. (*Id.* ¶¶ 50, 52-54.) In furtherance of this fraud, Marzan caused the use of both interstate wires and mail. (*E.g.*, *id.* ¶¶ 147-48.)

The Complaint further alleges that Marzan has a history of engaging in various fraudulent schemes beginning at least by 2013. (*Id.* ¶¶ 31-37.) **[*3]** This includes insurance fraud, another investment-related fraud, and defrauding Josephs and other victims in connection with the scheme alleged in this case. (*Id.* ¶¶ 7, 32, 36, 71, 146.)

In addition to the debts owed to Josephs, the Complaint alleges that Marzan and PMG have a series of unpaid debts, default judgments, and court-ordered restitution awards. (*Id.* ¶¶ 41, 121-23.) According to the Complaint, Marzan has avoided criminal penalties on two occasions on the condition of repaying victims but has failed to fully do so in one case and only repaid another defrauded investor when criminal prosecution resumed after Marzan failed his payment obligations. (*Id.* ¶¶ 32-41.) Outside the Complaint, Josephs documented 8 default judgments from 2014 to 2020 against Marzan, PMG, and another company associated with Marzan. (Decl. of Matthew Forsgren ("1st Forsgren Decl."), Exs. C—J, Aug. 19, 2021, Docket No. 13.)[1]

Marzan has created a new company: Jupiter Rising Film. (Compl. ¶ 137.) The Complaint alleges that Marzan and Jupiter Rising Film seek funding without disclosing Marzan's history of fraud. (*Id.* ¶¶ 139-40.)

Josephs alleges that Marzan sought and received a temporary harassment restraining **[*4]** order against Josephs to prevent her from seeking repayment of the money Josephs was owed. (*Id.* ¶¶ 134-35.) Josephs moved to quash the restraining order and the parties engaged in two discovery conferences and an evidentiary hearing with witnesses that resulted in the Minnesota state district court vacating the restraining order. (1st Forsgren Decl. ¶ 23, Ex. O.) Until the restraining order was lifted, Josephs was unable to seek recovery of the various debts she was owed. (Compl. ¶¶ 6, 134.)

The damages alleged in the Complaint as demonstrated by supporting documentation Josephs filed with the Court show that Josephs loaned PMG or paid for expenses on behalf of PMG totaling $266,233.36 from the written and oral contracts Josephs made with the Defendants over the course of the scheme. Josephs provided a $150,000 loan and paid $47,000 in expenses that were later guaranteed by two promissory notes entered into on January 16, 2020 at 8% interest, compounded annually with a December 13, 2020 maturity date. (*Id.* ¶¶ 87-90; Compl., Exs. A—B, Mar. 22, 2021, Docket No. 1-1.) She made wire transfers and Western Union transfers totaling $20,600. (Compl. ¶ 129; Decl. of Michaleen Josephs ("Josephs **[*5]** Decl.") ¶¶ 9-13, Ex. C at 2-10, Nov. 1, 2021, Docket No. 20; *see also* Josephs Decl., Ex. B at 2, Exs. D—E.) PMG and Marzan used her credit cards to charge a total of $46,097.02 in expenses. (2nd Mem. Supp. Mot. Default J. at 14-15, Nov. 1, 2021, Docket No. 18; Josephs Decl. ¶¶ 15-18, Ex. B at 2-3, Ex. F.)[2] Josephs also incurred $2,536.34 in miscellaneous expenses for PMG and Marzan. (Josephs Decl. ¶¶ 19-25, Ex. B at 3, Exs. G—H.) Josephs has not been repaid any of these loans or expenses. (Compl. ¶¶ 129-31.)

---

[1] The Court may take judicial notice of these public judicial opinions and records. *Fed. R. Evid. 201*; *Stutzka v. McCarville, 420 F.3d 757, 760 n.2 (8th Cir. 2005)*.

[2] Paragraph 17 of the affidavit Josephs filed in support of her damages indicates that the Defendants are liable for $5,128.43 in 2019 credit card expenses not reflected in the $47,000 promissory note. (Josephs Decl. ¶ 17.) As Exhibit B shows $5,128.45 and all calculations based on these expenses in Josephs's filings arrive at a sum using $5,128.45, the Court will use $5,128.45 for these expenses.

In addition to these loans and expenses PMG and Marzan induced Josephs to pay as investment and business expenses, the Complaint alleges that Marzan sought her help securing, paying for, and furnishing an apartment for his personal use conditioned on an agreement that he would pay Josephs back. (Compl. ¶¶ 61, 109-10, 119.) Marzan never paid for the apartment and took the furniture without paying Josephs for it. (*Id.* ¶¶ 109, 119, 127-28.) Supporting documentation shows that Josephs paid $25,155.00 in rent, a $3,000 security deposit which she did not recover, and $17,937.19 furnishing the apartment for a total of $46,092.19. (Josephs Decl. ¶¶ 27-28, Exs. B, I—J, M.)

Finally, Josephs **[*6]** has also incurred significant attorney fees and costs seeking to recover in this case as well as opposing the harassment restraining order. (Mem. Supp. Mot. Default J. at 41, Aug. 19, 2021, Docket No. 12; 2nd. Decl. of Matthew Forsgren ("2nd Forsgren Decl.") ¶¶ 8-13, Nov. 1, 2021, Docket No. 19.) Josephs incurred $125,442.60 in attorney fees and costs opposing the restraining order and $58,284.50 through October 2021 in attorney fees and costs in this lawsuit.[3] (2nd Forsgren Decl. ¶¶ 10, 13, Exs. 1-3.)

Both Defendants were served on April 15, 2021. (Summons, May 19, 2021, Docket No. 4.) Neither Defendant made an appearance, answered, or filed any motion in the case. The clerk entered default against both Defendants on May 27, 2021. (Entry of Default, May 27, 2021, Docket No. 8.); *see also* *Fed. R. Civ. P. 55(a)*. On August 19, 2021, Josephs filed a Motion for Default Judgment against both Defendants. (Mot. Default J., Aug. 19, 2021, Docket No. 10.). At the Motion Hearing on October 14, 2021, the Court ordered additional documentation of the requested monetary damages and briefing on the requested equitable relief. (Min. Entry, Oct. 14, 2021, Docket No. 17.) Josephs submitted this documentation and briefing **[*7]** on November 1, 2021. (2nd Mem. Supp. Mot. Default J.; 2nd Forsgren Decl.; Josephs Decl.)

DISCUSSION

I. CAUSES OF ACTION

"Upon default, the factual allegations of a complaint (except those relating to the amount of damages) are taken as true, but it remains for the court to consider whether the unchallenged facts constitute a legitimate cause of action, since a party in default does not admit mere conclusions of law." *Murray v. Lene, 595 F.3d 868, 871 (8th Cir. 2010)* (quotation omitted). The Court concludes that the Complaint has properly alleged facts sufficient to support a viable cause of action on each claim.

Count I asserts a Racketeering Influenced and Corrupt Organizations ("RICO") Act claim against Marzan under *18 U.S.C. §§ 1962(c)*, *1964*. A RICO claim must have four elements: (1) an enterprise (2) engaged in racketeering activity (3) forming a pattern of such activity and (4) conduct of the defendant in support of the enterprise. *Crest Const. II, Inc. v. Doe, 660 F.3d 346, 353 (8th Cir. 2011)*.

"Three elements must be proven to show that a RICO enterprise existed: (1) a common purpose that animates the individuals associated with it; (2) an ongoing organization with members who function as a continuing unit; and (3) an ascertainable structure distinct from the conduct of a pattern of racketeering." *United States v. Lee, 374 F.3d 637, 647 (8th Cir. 2004)*. The facts in **[*8]** the Complaint demonstrate a common purpose among Marzan and various entities including PMG of enriching Marzan and paying his personal expenses rather creating actual investment opportunities and legitimate businesses. The undisputed facts also demonstrate there is an ongoing

---

[3] In her supplemental brief and in the supporting affidavit from Matthew Forsgren, Josephs asserts that she has incurred $58,584.50 in fees and costs prosecuting this case through October 31, 2021. (2nd Mem. Supp. Mot. Default J at 15; 2nd Forsgren Decl. ¶ 13.) The sum of the fees and expenses documented in Exhibit 3 of the Forsgren affidavit is $51,975.50. (2nd Forsgren Decl. Ex. 3.) When added to the $6,309 in fees and expenses incurred in October 2021 (*Id.* ¶ 12), the documentation shows that Josephs has incurred $58,284.50 in fees and expenses. Therefore, the Court will use the $58,284.50 amount substantiated in the record.

organization with Marzan and various corporate entities functioning for this common purpose. Finally, they show that the structure is sufficiently distinct from the conduct and from Marzan. The entities are distinct from the conduct because they would still exist as businesses even if "the slate were wiped clean of the underlying racketeering activity." *See* Handeen v. Lemaire, 112 F.3d 1339, 1352 (8th Cir. 1997). And the enterprise is sufficiently distinct from Marzan because he is distinct from PMG, a corporate entity with its own legal status and rights. *See* Cedric Kushner Promotions, Ltd. v. King, 533 U.S. 158, 163-65, 121 S. Ct. 2087, 150 L. Ed. 2d 198 (2001). Therefore, Josephs adequately establishes the existence of a RICO enterprise to satisfy this element.

Racketeering activity is defined to include a long list of federal and state offenses including mail and wire fraud. 18 U.S.C. § 1961(1); United States v. Haynie, 8 F.4th 801, 804 (8th Cir. 2021). The Complaint alleges that Marzan's RICO enterprise knowingly intended to defraud Josephs and others to obtain money and property for Marzan's enrichment using mail and wire communications **[*9]** in interstate commerce in violation of 18 U.S.C. § 1341 (mail fraud) and 18 U.S.C. § 1343 (wire fraud). The Complaint sufficiently establishes the enterprise has engaged in racketeering activity.

The RICO pattern element requires "two or more related acts of racketeering activity that amount to or pose a threat of continued criminal activity. To satisfy [this] element, therefore, a plaintiff must provide evidence of multiple predicate acts occurring over a substantial period of time." Crest Const. II, 660 F.3d at 356 (quotations omitted). The Complaint alleges a pattern of fraud including at least (1) insurance fraud in 2013; (2) a similar investment-related fraud targeting another individual in 2014; and (3) multiple acts of fraud targeting Josephs beginning in July 2019. The Complaint, therefore, alleges the pattern of racketeering activity RICO element.

Finally, the conduct element refers to an individual's conduct within the RICO enterprise. Handeen, 112 F.3d at 1347. Hence, the conduct element "authorize[s] recovery only against individuals who participate in the operation or management of the enterprise itself." *Id.* (quotation omitted). The Complaint alleges that Marzan was involved in operating the various entities including PMG set up for the enterprise to defraud **[*10]** people including Josephs. Therefore, the Complaint meets this element. With all four RICO elements met, the Court concludes that the uncontested facts of the Complaint adequately establish a viable RICO Act claim against Marzan.

Count II asserts a fraudulent representation claim against both Defendants. Under Minnesota law, the elements of this claim are (1) a false representation of a past or existing material fact; (2) made with knowledge of its falsity or without knowledge of whether it was true or false; (3) with the intent to induce reliance; (4) actual reliance; and (5) damages as a result of the reliance. Hoyt Props., Inc. v. Prod. Res. Grp., LLC, 736 N.W.2d 313, 318 (Minn. 2007). The Complaint alleges (1) Marzan, on behalf of himself and on behalf of PMG while acting within the scope of his authority, made several false representations (2) Marzan and PMG knew to be false (3) with the intent to induce Josephs to loan PMG money and pay expenses for the Defendants in reliance on those false representations and that (4) Josephs actually relied on those representations and wired money to and paid expenses for the Defendants (5) that she has not been repaid as promised—damages as a result of her reliance. Therefore, the Court concludes that that the uncontested **[*11]** facts of the Complaint adequately establish a viable fraudulent misrepresentation claim against both Defendants.

Count III asserts a breach of contract claim against both Defendants. Under Minnesota law, the elements of this claim are (1) formation of a contract; (2) performance by the plaintiff of any condition precedent to the defendant's performance; and (3) breach of the contract by the defendant. Lyon Fin. Servs., Inc. v. Ill. Paper & Copier Co., 848 N.W.2d 539, 543 (Minn. 2014). The Complaint alleges that Josephs entered into multiple written and oral contracts with the Defendants. Josephs provided the Court with the signed, written contracts for two promissory notes with PMG and Marzan's signed personal guaranty of those contracts. She also provided the Court a detailed accounting of the loans and payments she made based on these contracts. Neither Defendant has paid Josephs any amount despite their contractual obligations. Therefore, the Court concludes that that the uncontested facts of the Complaint adequately establish a viable breach of contract claim.[4]

---

[4] The Complaint also alleges a promissory estoppel claim (Count IV) in the alternative to the breach of contract claim. Because the Court concludes that the Complaint satisfies the requirements for breach of contract and the damages Josephs suffered

Count V asserts an abuse of process claim against Marzan. Under Minnesota law, the elements of this claim are "the existence of an ulterior purpose and the act of using the process to accomplish a result **[*12]** not within the scope of the proceedings in which it was issued, whether such result might otherwise be lawfully obtained or not." *Kellar v. VonHoltum, 568 N.W.2d 186, 192 (Minn. Ct. App. 1997)* (citing *Hoppe v. Klapperich, 224 Minn. 224, 28 N.W.2d 780, 786 (Minn. 1947)*); *accord* *Strei v. Blaine, 996 F. Supp. 2d 763, 793 (D. Minn. 2014)*. The ulterior purpose must be something other than "the very purpose for which [the process] is intended." *Strei, 996 F. Supp. 2d at 794*. The plaintiff must also suffer an injury to the plaintiff's person or property that is more than an indirect injury to the plaintiff's business or "good name." *Hoppe, 28 N.W.2d at 787*. The Complaint alleges that Marzan sought a harassment restraining order for the purpose of and then used it to prevent Josephs from recovering money she was lawfully entitled to—something that is outside the purpose and scope of a Minnesota harassment restraining order. *See* *Minn. Stat. § 609.748*; *Welsh v. Johnson, 508 N.W.2d 212, 214 (Minn. Ct. App. 1993)*. As a result, she was unable to seek recovery of debts owed and had to incur significant costs vacating the restraining order so that she could continue seeking repayment, a direct injury to her property. *See* *Hoppe, 28 N.W.2d at 787*. Therefore, the Court concludes that that the uncontested facts of the Complaint adequately establish a viable abuse of process claim.

II. MONETARY DAMAGES

Once the Court determines that it is appropriate to grant default judgment, the Court must still determine the proper relief to grant. Even **[*13]** if the defendant's liability is established through a default judgment, the plaintiff must prove actual damages to "a reasonable degree of certainty." *Everyday Learning Corp. v. Larson, 242 F.3d 815, 819 (8th Cir. 2001)*; *see also* *Murray, 595 F.3d at 871*. The Court need not hold an evidentiary hearing on damages if the damages are "readily discernable on the basis of undisputed evidence in the record." *Cutcliff v. Reuter, 791 F.3d 875, 883 (8th Cir. 2015)*.

Because the uncontested Complaint has established viable claims, the Court must decide the proper relief to grant. Josephs requests (1) monetary damages against both Defendants for her actual losses, (2) treble damages against Marzan for any damages tied to the RICO claim, and (3) equitable relief against Marzan under the RICO Act. Because the record now substantiates these damages, the Court will award Josephs monetary damages against both PMG and Marzan.

The Court will not conduct an evidentiary hearing on the damages because they are readily discernable from the affidavits and documentary evidence now on the record. *See* *Cutcliff, 791 F.3d at 883*; *see also* *Quality Carriers, Inc. v. Randolph, No. 06-1170, 2007 U.S. Dist. LEXIS 49479, 2007 WL 2027281, at *1 (N.D.N.Y. July 9, 2007)* ("[T]he court may rely on detailed affidavits and documentary evidence to fix damages after a default judgment has been entered.")

A. Business Loan Related Damages

With the additional documentation, Josephs has adequately substantiated the requested **[*14]** monetary damages related to her investment in PMG, including RICO treble damages against Marzan. The record shows that PMG entered into two promissory notes—one for $150,000 and one for $47,000—with Josephs on January 16, 2020 with a maturity date of December 13, 2020. Interest accrues on these promissory notes at a rate of 8% per annum, compounded annually. Marzan also personally guaranteed these notes. Josephs has also substantiated the other business-related damages. The record shows that she transferred a total of $20,600 through wire transfers and Western Union transfers. It also substantiates that Josephs incurred $46,097.02 in credit card expenses and $2,536.34 in miscellaneous expenses on behalf of Defendants. The uncontested facts in the Complaint establish that neither Defendant has repaid any amount. Therefore, the Court will award Josephs $266,233.36 in damages,

---

under the promissory estoppel claim are identical to those as the breach of contract claim, the promissory estoppel claim is moot as an alternative theory of recovery.

plus interest on the promissory notes, for Counts II and III from PMG and Marzan, jointly and severally. Because these damages are included in the RICO claim, Josephs is also entitled to treble damages from Marzan on these damages for Count I. *See* *18 U.S.C. § 1964(c)*. The Court will award Josephs $532,466.72, plus treble damages interest **[*15]** on the promissory notes, against Marzan alone.

B. Apartment Related Damages and Attorney Fees and Costs

In addition to the business-related damages for which both Defendants are liable, Marzan alone is individually liable for certain damages.

The uncontested facts in the Complaint demonstrate that Josephs rented and furnished an apartment for Marzan's personal use conditioned on an agreement to repay Josephs. Because nothing indicates—and Josephs does not allege—that PMG is responsible for these costs, Marzan is solely liable for these expenses and these expenses are not related to the RICO enterprise therefore treble damages are not available. The record shows that Josephs incurred apartment and furniture-related expenses in the amount of $46.092.19. The uncontested facts in the Complaint establish that Marzan has not repaid any amount related to these expenses. Therefore, the Court will award Josephs an additional $46,092.19 for Counts II and III against Marzan alone.

C. Attorney Fees and Costs

Josephs also seeks recovery from Marzan alone of the attorney fees and costs she has incurred both in prosecuting this action and in responding to the restraining order. Because Josephs has demonstrated **[*16]** that she is legally entitled to the fees and costs and the expenses are reasonable, the Court will also award these damages against Marzan.[5]

Josephs may recover the costs of this case under two theories. First, RICO includes a fee shifting provision allowing private plaintiffs that successfully bring a civil RICO case to recover "the cost of the suit, including a reasonable attorney's fee" from the defendant. *18 U.S.C. § 1964(c)*. Because the Complaint sufficiently establishes a civil RICO claim against Marzan, Josephs is entitled to the cost of her suit. Second, under Minnesota law, attorney fees are recoverable in a civil action if permitted by a specific contract. *Roach v. Cnty. of Becker, 962 N.W.2d 313, 322-23 (Minn. 2021)*. The guaranty Marzan signed securing the two promissory notes also permitted Josephs to recover her costs and expenses including attorney fees as permitted under Minnesota law in an action to enforce the guaranty. Therefore, the Court will award Josephs her costs including reasonable attorney fees in prosecuting this case.

Josephs may also recover her costs responding to the harassment restraining order under the abuse of process claim. The Minnesota Supreme Court has directed courts to look at a variety of sources to determine the damages **[*17]** available to plaintiffs in abuse of process cases. *Hoppe, 28 N.W.2d at 787 n.2*. Under these sources, plaintiffs may recover their "pecuniary loss" caused by the abuse of process. Restatement (First) of Torts § 682. Here, Josephs's pecuniary loss was the costs she incurred vacating the restraining order so that she could continue seeking repayment of the debts she was owed. Minnesota courts have found awarding attorney fees and costs to plaintiffs appropriate in abuse of process cases. *See, e.g.,* *Winnick v. Chisago Cnty. Bd. of Comm'rs, 389 N.W.2d 546, 549 (Minn. Ct. App. 1986)*; *Dollar Travel Agency, Inc. v. Nw. Airlines, Inc., 354 N.W.2d 880, 883 (Minn. Ct. App. 1984)*. Therefore, the Court will award Josephs her costs including reasonable attorney fees in responding to the restraining order.

[5] Josephs does not seek to recover costs and attorneys from PMG because PMG is not included in the RICO or abuse of process claims and, unlike Marzan's personal guaranty, the promissory notes did not include a provision allowing Josephs to recover expenses incurred enforcing the notes. Therefore, these damages are not awarded against PMG.

Josephs has provided an affidavit and documentation demonstrating the costs and fees she has incurred both in connection with this case and responding to the restraining order for the abuse of process claim. (Forsgren Decl. ¶¶ 3-12, Exs. 1-3.) This filing includes names, credentials, hours spent, descriptions of the activities, and a breakdown of the costs incurred. (*Id.*) This documentation is sufficient to support the reasonableness of the costs and fees. *See* *United HealthCare Corp. v. Am. Trade Ins. Co., 88 F.3d 563, 575 (8th Cir. 1996)*; *FMC Corp. v. Varonos, 892 F.2d 1308, 1317 (7th Cir. 1990)*. The hourly rates are consistent with common rates in the relevant market and the hours expended are reasonable to the issues raised, types of claims involved, and **[*18]** successful results both in this case and in responding to the restraining order. RICO claims are complex and difficult cases that require expertise and specificity that can increase costs. Considering these circumstances and the documentation provided, the $58,284.50 Josephs has incurred in this case is reasonable. While expending $125,442.60 responding to a restraining order may seem unreasonable at first glance, lifting the order entailed an evidentiary hearing involving multiple witnesses and discovery disputes including two discovery conferences. Under these circumstances and as documented, these costs appear to be reasonable. Therefore, the Court will award Josephs $58,284.50 for Counts I and III and $125,442.60 for Count V in reasonable attorney fees and costs against Marzan alone.

III. EQUITABLE RELIEF

In addition to monetary damages, Josephs seeks prospective equitable relief pursuant to *18 U.S.C. § 1964(a)*. Josephs requests that the Court (1) order Marzan to divest himself of any interest in PMG and Jupiter Rising Film; (2) prohibit Marzan from launching any future start-ups; and (3) require Marzan to disclose his history of criminal fraud, a copy of the Complaint in this case, the Motion for **[*19]** Default Judgment, and this Order to investors, potential business partners, and potential employees or contractors of any entity or business in which Marzan is involved. (Compl. at 23; Mem. Supp. Mot. Default J. at 29.) Because RICO allows private plaintiffs to obtain equitable relief, Josephs has standing to receive the relief she seeks, and granting equitable relief here will serve the purposes of RICO's equitable relief and private plaintiff provisions, the Court will grant equitable relief and impose various restrictions on Marzan to dismantle the RICO enterprise.

A. Availability of Equitable Relief to Private Plaintiffs

The Court must first determine whether equitable relief is available to private RICO plaintiffs like Josephs as a court cannot award relief it lacks the power to award to a particular plaintiff. The circuit courts who have addressed whether equitable relief is available to private plaintiffs are split. *Compare* *Chevron Corp. v. Donziger, 833 F.3d 74, 137 (2d Cir. 2016)* (holding that equitable relief is available to private plaintiffs); *Nat'l Org. For Women, Inc. v. Scheidler, 267 F.3d 687, 695 (7th Cir. 2001)*, *rev'd on other grounds*, *537 U.S. 393, 123 S. Ct. 1057, 154 L. Ed. 2d 991 (2003)* (same), *with* *Hengle v. Treppa, 19 F.4th 324, 356, 2021 U.S. App. LEXIS 33964 (4th Cir. 2021)* (holding that equitable relief is not available to private plaintiffs); *Religious Tech. Ctr. v. Wollersheim, 796 F.2d 1076, 1088 (9th Cir. 1986)* (same).[6] The Supreme Court has not answered this question. *RJR Nabisco, Inc. v. Eur. Cmty., 579 U.S. 325, 354 n.13, 136 S. Ct. 2090, 195 L. Ed. 2d 476 (2016)* ("This Court has **[*20]** never decided whether equitable relief is available to private RICO plaintiffs . . . and we express no opinion on the issue today."). The

---

[6] Other circuits have addressed but left unresolved whether equitable relief is available to private plaintiffs again. The First and Third Circuits have noted the split but expressed no opinion on the issue. See *Lincoln House, Inc. v. Dupre, 903 F.2d 845, 848 (1st Cir. 1990)*; *Northeast Women's Ctr., Inc. v. McMonagle, 868 F.2d 1342, 1355 (3d Cir. 1989)*. The Fourth and Fifth Circuits have expressed doubt that equitable relief is available to private plaintiffs. *See* *Johnson v. Collins Ent. Co., 199 F.3d 710, 726 (4th Cir. 1999)*; *In re Fredeman Litig., 843 F.2d 821, 829-30 (5th Cir. 1988)*

Eighth Circuit has also not answered this question. *Bennett v. Berg, 685 F.2d 1053, 1064 (8th Cir. 1982)* (declining to decide whether equitable remedies are available to private RICO plaintiffs).[7]

A civil cause of action for RICO violations is created in *18 U.S.C. § 1964* which also describes the civil remedies available. "[A]s with any question of statutory interpretation, the court begins its analysis with the plain language of the statute." *Owner-Operator Indep. Drivers Ass'n, Inc. v. Supervalu, Inc., 651 F.3d 857, 862 (8th Cir. 2011)*

The relevant part of RICO's civil remedies section provides:

> (a) **The district courts of the United States shall have jurisdiction to prevent and restrain violations of *section 1962*** of this chapter **by issuing appropriate orders**, including, but not limited to: **ordering any person to divest himself of any interest**, direct or indirect, in any enterprise; **imposing reasonable restrictions on the future activities** or investments of any person, including, but not limited to, prohibiting any person from engaging in the same type of endeavor as the enterprise engaged in, the activities of which affect interstate or foreign commerce; or **ordering dissolution or reorganization of any enterprise**, making **[*21]** due provision for the rights of innocent persons.
>
> (b) **The Attorney General may institute proceedings under this section. Pending final determination thereof, the court may at any time enter such restraining orders or prohibitions**, or take such other actions . . . as it shall deem proper.
>
> (c) **Any person injured in his business or property by reason of a violation of *section 1962* of this chapter may sue therefor in any appropriate United States district court and shall recover threefold the damages he sustains and the cost of the suit, including a reasonable attorney's fee** . . . .

18 U.S.C. § 1964 (emphasis added)

Subsection (a) gives district courts the power to issue injunctive relief to prevent and restrain activities that are unlawful under *18 U.S.C. § 1962* in civil RICO cases. Crucially, it does not limit who may obtain such relief or in whose favor courts may exercise this grant of power. Therefore, absent language elsewhere in the statute limiting who may obtain this relief, the most natural reading of *subsection (a)* is that the injunctive relief the subsection authorizes is available to all civil RICO plaintiffs.

Subsections (b) and *(c)* specifically authorize two types of civil RICO plaintiffs: the United States and "any person injured in his business or property by" a **[*22]** RICO violation.

Subsections (b) and *(c)* also authorize additional types of relief and place limits on who is authorized to obtain these additional types of relief. After authorizing the United States to file a civil RICO claim, *subsection (b)* provides that "[p]ending final determination" of the suit, "the court may . . . enter such restraining orders or prohibitions . . . as it shall deem proper." In other words, the United States is able seek interim equitable relief.

This sentence granting the United States the ability to seek interim relief also has the effect of limiting the availability of this relief to the United States. This is so because otherwise this sentence in *subsection (b)* would be superfluous. "A preliminary injunction is always appropriate to grant intermediate relief of the same character as that which may be granted finally." *De Beers Consol. Mines v. United States, 325 U.S. 212, 220, 65 S. Ct. 1130, 89 L. Ed. 1566 (1945)*; *see also* *Grupo Mexicano de Desarrollo S.A. v. All. Bond Fund, Inc., 527 U.S. 308, 326, 119 S. Ct. 1961, 144 L. Ed. 2d 319 (1999)* (analyzing and applying *De Beers*). Therefore, if *subsection (a)* remedies are available to the United States—something no court has rejected—and *subsection (a)*'s equitable remedies are available only to the United States, the second sentence of *subsection (b)* would be superfluous because the United

---

[7] On rehearing en banc of *Bennett*, one member of the en banc court would have found that equitable relief is available to private plaintiffs. *Bennett v. Berg, 710 F.2d 1361, 1365 (8th Cir. 1983)* (en banc) (McMillan, J. concurring in part and dissenting in part). The rest of the en banc court did not address the issue.

States would already be able to seek interim equitable relief if it sought equitable relief as a final remedy. The only interpretation **[*23]** of *§ 1964* that gives meaning to all of *§ 1964*'s text including the second sentence of *subsection (b)* then is that *subsection (a)*'s permanent equitable remedies are available to all plaintiffs including private plaintiffs, but interim relief is only available to the United States. "[T]he canon against surplusage is strongest when an interpretation would render superfluous another part of the same statutory scheme." *Marx v. Gen. Revenue Corp., 568 U.S. 371, 386, 133 S. Ct. 1166, 185 L. Ed. 2d 242 (2013)*. Because any other interpretation would render part of *§ 1964* superfluous, the most natural reading of the text allows private plaintiffs to seek equitable remedies.

The conclusion that permanent equitable relief but not interim relief is available to private plaintiffs is further supported by comparing the structures of *subsections (b)* and *(c)*. Both subsections begin by granting the ability to file civil RICO cases to certain parties and then provide specific remedies only available to each type of plaintiff. *Subsection (b)* gives the United States the ability to seek interim equitable relief whereas *subsection (c)* gives private plaintiffs the ability to seek treble damages and attorney fees. To date, no court has found that the United States can seek treble damages and attorney fees suggesting that this should be seen as a grant to private plaintiffs and a limitation **[*24]** on the United States. *See, e.g.*, *Donziger, 833 F.3d at 138*.

Thus, three reasons demonstrate that that the most natural reading of *§ 1964*'s unambiguous text allows private plaintiffs to seek permanent *§ 1964(a)*'s equitable remedies. First, *subsection (a)* itself places no limitation on which plaintiffs can seek the equitable relief provided there, instead expansively giving courts the power to grant such relief. Second, reading the second sentence of *subsection (b)* as a limitation on who can seek just interim equitable remedies while allowing private plaintiffs to seek final equitable remedies eliminates surplusage from *§ 1964*. Third, this reading also allows *subsections (b)* and *(c)* to have a consistent structure. In sum, *§ 1964* begins with a broad grant of power without limitation and nothing else in the statute limits who may obtain final equitable relief in contrast to the limits the statute places on interim equitable relief, treble damages, and attorney fees.

Allowing private plaintiffs to seek the equitable remedies in *subsection (a)* is also in keeping Congress's express intent that the "provisions of [the RICO Act] shall be liberally construed to effectuate its remedial purposes." *Pub. L. 91-452, § 904(a), 84 Stat. 947 (1970)*. Congress's purpose in passing RICO was to eradicate organized crime "by providing enhanced sanctions and new **[*25]** remedies to deal with the unlawful activities of those engaged in organized crime." *Pub. L. 91-452, Statement of Findings and Purpose, 84 Stat. 923 (1970)*. With RICO, Congress intended to "encourag[e] civil litigation not merely to compensate victims but also to turn them into private attorneys general, supplementing Government efforts by undertaking litigation in the public good." *Rotella v. Wood, 528 U.S. 549, 550, 120 S. Ct. 1075, 145 L. Ed. 2d 1047 (2000)*. "Indeed, if Congress' liberal-construction mandate is to be applied anywhere, it is in *§ 1964*, where RICO's remedial purposes are most evident." *Sedima, S.P.R.L. v. Imrex Co., 473 U.S. 479, 491 n.10, 105 S. Ct. 3275, 87 L. Ed. 2d 346 (1985)*. Allowing a private plaintiff to obtain equitable relief that dismantles a RICO enterprise and imposes restrictions on a person's future activities will enable victims to best undertake litigation in the public good. The availability of treble damages provides a strong deterrent effect and encourages injured parties to bring civil RICO cases to redress past harms; wider availability of permanent injunctions increases the likelihood of preventing future violations of *§ 1962*—the main purpose of RICO.

The courts that have held that equitable relief is not available to private plaintiffs rely primarily on three arguments: (1) a text-based argument that *§ 1964(b)*'s mention of interim equitable relief allows the United States alone to obtain *§ 1964(a)*'s permanent **[*26]** equitable because *§ 1964(c)* lacks a similar mention; (2) the pre-and post-legislative history of RICO's enactment; and (3) a comparison to the *Clayton Act*. *See, e.g.*, *Hengle, 19 F.4th at 353-56* (applying (1) and (3)); *Wollersheim, 796 F.2d at 1084-87* (applying all three).

The Court finds the first argument unpersuasive. As discussed above, it would render the interim relief provision of *§ 1964(b)* superfluous as even without this clause, the United States could seek interim relief under *§ 1964(a)*. The United States gets its ability to seek permanent equitable remedies from *§ 1964(a)*, not *§ 1964(b)* which only references interim relief. This argument would also render the interim relief clause a mere clarification, but if the clause did not exist, the Court would still find that the United States could seek interim relief based on *§ 1964(a)* and there would be no need for this clarification. *Cf.* *Young v. United Parcel Serv., Inc., 575 U.S. 206, 135 S. Ct.*

1338, 1352-53, 191 L. Ed. 2d 279 (2015) (refusing to adopt an interpretation of a statute that would render part of the text an unnecessary clarification). It also does not fit with the overall structure of *§ 1964* which begins with a broad grant of power that does not limit who may seek equitable relief before defining two types of plaintiffs and specifies additional remedies available to each type of plaintiff in *subsections (b)* and *(c)*.

The Court also finds the second argument **[*27]** relying on legislative history unpersuasive. While legislative history can be a useful tool of statutory interpretation in many cases, its application here is not particularly useful. First, courts typically look to legislative history and other sources if the statutory language is ambiguous. *See, e.g., United States v. Smith, 171 F.3d 617, 620 (8th Cir. 1999)*. Because the Court finds that the plain meaning of the statute is not ambiguous, the legislative history is of much less value especially because there is no "'clearly expressed intent to the contrary' that would warrant a different construction" in the legislative history. *Nat'l Org. for Women, Inc. v. Scheidler, 510 U.S. 249, 261, 114 S. Ct. 798, 127 L. Ed. 2d 99 (1994)* (quoting *Reves v. Ernst & Young, 507 U.S. 170, 177, 113 S. Ct. 1163, 122 L. Ed. 2d 525 (1993)*). Second, the legislative history itself is ambiguous. *See Scheidler, 267 F.3d at 699* (discussing RICO's conflicting legislative history on equitable relief); *Wollersheim, 796 F.2d at 1084-86* (recognizing RICO's conflicting legislative history while still concluding that legislative history supported limiting the availability of equitable relief). Moreover, a part of the history this argument relies on is Congress's failure to expressly expand RICO's civil remedies **after** enacting RICO. *See Wollersheim, 796 F.2d at 1086* (discussing Congressional inaction after RICO's enactment). Post-enactment legislative history and rejected legislative action is rarely a reliable basis for statutory interpretation. **[*28]** *Bruesewitz v. Wyeth LLC, 562 U.S. 223, 242, 131 S. Ct. 1068, 179 L. Ed. 2d 1 (2011)*; *see also Cent. Bank of Denver, N.A. v. First Interstate Bank of Denver, N.A., 511 U.S. 164, 187, 114 S. Ct. 1439, 128 L. Ed. 2d 119 (1994)* (noting that inaction may indicate "that the existing legislation already incorporated the offered change"). The legislative history here cannot overcome the unambiguous meaning of the statute.

The third common argument comparing RICO to the Clayton Act is also unpersuasive because it too points in different directions. Congress modeled RICO's civil enforcement mechanisms contained in *§ 1964* after the Clayton Antitrust Act civil enforcement mechanisms. *See Holmes v. Sec. Inv. Prot. Corp., 503 U.S. 258, 267, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)*. Unlike RICO, the Clayton Act's civil enforcement mechanism is spread out over three code sections: *15 U.S.C. §§ 4*, *15*, *26*. *Section 4* authorizes the United States to file antitrust cases that seek equitable relief. *Section 15* authorizes private parties to file cases and allows for treble damages and recovery of attorney fees. *Section 26* specifically authorizes injunctive relief for private parties. *Section 26* was included in the *Clayton Act* that passed in 1914 to fill a gap in the previously enacted *Sherman Antitrust Act* that only authorized the United States to seek equitable relief. *California v. Am. Stores Co., 495 U.S. 271, 285-87, 110 S. Ct. 1853, 109 L. Ed. 2d 240 (1990)*. There are thus two reasonable but conflicting ways to interpret this history as applied to RICO. On the one hand, the fact that, unlike the *Clayton Act* which specifically authorizes private parties to seek equitable relief in *15 U.S.C. § 26* and meant to **[*29]** fill a gap, RICO does not have explicit language authorizing it and filling the gap could mean that the gap is unfilled. *See Hengle, 19 F.4th at 356* (embracing the unfilled gap approach). On the other hand, because the Supreme Court regularly treats the remedial provisions of RICO and the Clayton Act identically and the Supreme Court has already determined that private parties can obtain injunctive relief under the *Clayton Act*, the same interpretation could apply to RICO even though RICO consolidates its civil remedial provisions into one section while the *Clayton Act* spread them out. *Scheidler, 267 F.3d at 700* (embracing the same interpretation approach). There is an additional inference supporting the same interpretation approach. The *Clayton Act* specifically added equitable relief as an option for private litigants to existing ***antitrust law*** whereas RICO created civil remedies for both the United States and private parties at the same time for an entirely new type of law. So, RICO could be interpreted as consolidating the remedies into one section without needing a separate gap filling section because it never had the gap to begin with. Much like the specific legislative history of RICO, a comparison to the *Clayton Act* at a minimum does not overcome and may support the Court's **[*30]** interpretation of the statute's plain language.

The plain language of *18 U.S.C. § 1964* combined with RICO's express purpose to dismantle criminal enterprises demonstrates that private RICO plaintiffs are authorized to seek prospective injunctive relief. The Court must now decide whether to grant it here.

B. Standing to Receive Equitable Relief

Next the Court must determine whether Josephs has standing to request the equitable relief she seeks. Courts have an obligation to ensure litigants have standing even if the parties themselves do not raise the issue. *Frank v. Gaos, 139 S. Ct. 1041, 1046, 203 L. Ed. 2d 404 (2019)*; *Warth v. Seldin, 422 U.S. 490, 499, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)* (noting that standing "is the threshold question in every federal case").

Article III of the Constitution limits the jurisdiction of federal courts to deciding cases and controversies. *Lujan v. Defs. of Wildlife, 504 U.S. 555, 559, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992)*. Standing is essential to the case-or-controversy requirement. *Id. at 560*. "[S]tanding is not dispensed in gross." *Lewis v. Casey, 518 U.S. 343, 385 n.6, 116 S. Ct. 2174, 135 L. Ed. 2d 606 (1996)*. Instead, "a plaintiff must demonstrate standing separately for each form of relief sought." *Friends of the Earth, Inc. v. Laidlaw Env't Servs. (TOC), Inc., 528 U.S. 167, 185, 120 S. Ct. 693, 145 L. Ed. 2d 610 (2000)*; *Digital Recognition Network, Inc. v. Hutchinson, 803 F.3d 952, 956 (8th Cir. 2015)*. Even if a plaintiff has standing for a damages claim, the plaintiff may not be able to pursue injunctive relief. *City of Los Angeles v. Lyons, 461 U.S. 95, 109, 103 S. Ct. 1660, 75 L. Ed. 2d 675 (1983)*. To establish standing, a plaintiff must show (1) that it suffered a concrete and particularized injury in fact that is actual or imminent; (2) a causal connection between the injury **[*31]** and the defendant's conduct; and (3) that it is likely the plaintiff's injury will be redressed by the remedy. *Lujan, 504 U.S. at 560-61*.

Josephs easily meets the first two standing requirements. The uncontested facts establish that Josephs has suffered a concrete and particularized injury caused by Marzan's conduct: his uncontested actions defrauded Josephs and breached their contracts causing her to lose a substantial amount of money. Josephs also easily meets the redressability requirement for the monetary damages—including RICO treble damages—she seeks. It is, however, a closer question whether Josephs meets the redressability requirement for the equitable relief.

In *Lyons*, the Supreme Court held that although a plaintiff had standing to seek monetary damages after being placed in a chokehold under an allegedly impermissible Los Angeles Police Department chokehold policy, the plaintiff lacked standing to seek an injunction against future enforcement of the chokehold because he did not credibly allege that he faced a realistic probability that he would be choked as a result of the policy in the future. *Lyons, 461 U.S. at 106, 106 n.7*. An award of damages would redress the previous chokehold, but the Court found that it was no more than speculation **[*32]** that the injunction would prevent a future injury to the plaintiff even if it was certain that someone else might be the victim of an unconstitutional chokehold. *Id. at 108*. Instead, a plaintiff must show that the plaintiff "personally would benefit in a tangible way from the court's intervention." *Warth, 422 U.S. at 508*.

Josephs argues that equitable relief would redress her injury by making it much more likely that she recovers the money she is owed by both PMG and Marzan. It will increase the likelihood that PMG will pay her, she asserts, because PMG is a potentially viable for-profit company that has partnerships with large, legitimate entities and removing Marzan from his role in PMG increases the likelihood it will develop into a successful entity capable of paying the debts it owes including to Josephs. As for Marzan, Josephs argues that the equitable relief will make it more likely that she can recover from Marzan by making it more difficult for him to hide his assets and income.

Josephs has standing to seek equitable relief. As Josephs admits, it is highly unlikely that she will loan money to or invest in Marzan or PMG again, indeed probably less likely than the risk that the plaintiff in *Lyons* would be placed **[*33]** in a police chokehold again and if she were to that would be entirely her own decision. *Lyons* is still inapposite here. An injunction against the city of Los Angeles would not have increased the likelihood of the plaintiff recovering monetary damages from the city. Cities have routine practices for paying judgments against them and have income streams and fixed assets that a judgment holder can seek recovery against. And even if Los Angeles did not have these things, blocking a chokehold policy would still not have increased the ability of the plaintiff to recover. Here, Josephs sufficiently alleges that equitable relief both increases the likelihood that PMG is financially successful and decreases the likelihood that Marzan is able to hide his assets and income in the future—substantially increasing the likelihood that Josephs recovers at least some of her damages. This case is thus more akin to *Friends of the Earth*, where the Supreme Court held that a private plaintiff had standing to seek civil penalties even though that money would go to the government because the civil penalties "made it likely, as opposed to merely speculative, that the penalties would redress [plaintiff's] injuries." *528 U.S. at 187*. So too here. **[*34]** Even though the direct benefit of the equitable relief will go to others, equitable relief here makes it more likely the monetary damages will redress Josephs's injuries. Just like in *Friends of the Earth*, the actual imposition of statutorily available remedies rather than just their availability is likely to deter future RICO violations. *See id. at 186*.

This conclusion is bolstered by the core concerns that standing doctrine is meant to address. Josephs does not ask for an advisory opinion here as the uncontested facts demonstrate that she has been concretely harmed and is seeking to address that harm. *Hawse v. Page, 7 F.4th 685, 694 (8th Cir. 2021)* ("The doctrine[] of standing . . . , properly applied, ensure[s] that federal courts will decide only concrete disputes and will refrain from publishing advisory opinions or judicial essays on issues of the day.") She has also demonstrated that she is adverse to PMG and Marzan with a sufficient personal stake to illuminate all issues before the Court. *See Flast v. Cohen, 392 U.S. 83, 99, 88 S. Ct. 1942, 20 L. Ed. 2d 947 (1968)* ("The 'gist of the question of standing' is whether the party seeking relief has 'alleged such a personal stake in the outcome of the controversy as to assure that concrete adverseness which sharpens the presentation of issues upon which the court so largely depends **[*35]** for illumination of difficult constitutional questions.'" (quoting *Baker v. Carr, 369 U.S. 186, 204, 82 S. Ct. 691, 7 L. Ed. 2d 663 (1962)*)).

Although it is not certain that even with the statutorily authorized equitable relief Josephs will recover all the damages awarded, it is far more likely that such relief will allow Josephs to redress her injuries at least in part. Thus, Josephs has standing to seek equitable relief as she will personally benefit in a tangible way from the Court's intervention. *See Warth, 422 U.S. at 508*.

C. Structuring Equitable Relief

Because the Court finds that RICO's civil equitable relief is available to private plaintiffs and Josephs has standing to seek it, the Court must now decide whether to grant it and if so, how to structure the relief.

The Court will grant equitable relief. Congress explicitly intended to provide new remedies to deal with unlawful activities in order to eradicate them. *18 U.S.C. § 1964(a)* itself is meant to "prevent and restrain violations" of *18 U.S.C. § 1962*. The undisputed facts establish that Marzan has developed a pattern of violating *18 U.S.C. § 1962* over several years and may continue doing so through PMG and Jupiter Rising Film. Implementing the relief requested here would fill the prosecutorial gaps and help eliminate illegal activity as Congress intended. *See Sedima, 473 U.S. at 493*; *Rotella, 828 U.S. at 557*.

[*36] The Court's decision to grant equitable relief here should not be seen as permitting equitable relief in any case where a plaintiff who is requesting monetary damages can prove that the defendant may be unlikely to pay without equitable relief through the Court's traditional equitable powers. *See Califano v. Yamasaki, 442 U.S. 682, 705, 99 S. Ct. 2545, 61 L. Ed. 2d 176 (1979)* ("[F]ederal courts retain their equitable power to issue injunctions in suits over which they have jurisdiction."). Three conditions make this the rare case where it is appropriate to do so. First, the plaintiff is seeking relief under a statute that explicitly empowers this type of relief with the specific purpose of addressing the types of activity the defendant is engaged in. Second, the plaintiff has demonstrated that the defendant has organized his life to avoid his court-ordered obligations. It appears that Marzan has created an enterprise designed to skirt damages awards and is using the enterprise to intentionally evade recovery by the same people and entities harmed by the enterprise. By using corporate entities and investors to pay for his lifestyle, judgment holders are unable to recover court-ordered damages because they cannot attach judgments to any assets or income in his name. Marzan has thumbed his nose at the judicial system by leaving a string of default judgments and unpaid damages awards in his wake even when courts grant him leniency in hopes that such leniency will allow him to pay his victims. Instead, the undisputed facts show that he takes advantage of this leniency to find a new victim. Equitable relief is appropriate when defendants take advantage of the law to shield themselves from accountability at law. *See Gingras v. Think Fin., Inc., 922 F.3d 112, 128 (2d Cir. 2019)*, *cert.*

denied sub nom. Sequoia Cap. Operations, LLC v. Gingras, 140 S. Ct. 856, 205 L. Ed. 2d 458 (2020). Third, the plaintiff has credibly shown that the relief will increase the chances that multiple defendants including a defendant not subject to the equitable relief will pay the monetary damages awarded.

When structuring equitable relief here, the Court is mindful of the conditions leading to this rare circumstance, RICO's purpose, and Joseph's standing to seek this relief and will structure the relief to best conform with these issues. The Court will order the following equitable relief pursuant to *§ 1964(a)*:

- Marzan must immediately divest himself of any interest, direct or indirect, in PMG and Jupiter Rising Film;
- Marzan must immediately cease all management, control, employment, and involvement with PMG and Jupiter Rising Film except to the extent necessary to provide remaining owners, managers, and employees with information and property necessary to continue the operation **[*37]** of the entities which Marzan must handover within 7 days of receiving this Order;
- Upon issuance of this Order, Marzan must not remove any assets from PMG and Jupiter Rising Film including but not limited to intellectual property, proprietary information, physical property, or financial assets including those Marzan believes to be his personal property. To the extent that that Marzan asserts something in the control of PMG or Jupiter Rising Film is his personal property, Marzan may provide evidence of his ownership to the Court which will then adjudicate the proper titleholder of the property;[8]
- Marzan must—without being asked—disclose his 2014 guilty plea to insurance fraud in the State of Minnesota[9] and provide (1) a copy of the Complaint in this case, (2) Josephs' Motion for Default Judgment and the initial accompanying memorandum, declaration, and exhibits filed in support of the motion,[10] and (3) this Order to:
    1. Any potential or actual investor in any entity in which Marzan is involved in the entity's finances, operation, management, and/or control;
    2. Any potential or actual business in any entity in which Marzan is involved in the entity's finances, operation, management, and/or **[*38]** control; and
    3. Any potential or actual employees or contractors of any entity in which Marzan is involved in the entity's finances, operation, management, and/or control;
- Marzan may not form any entity including but not limited to a corporation, limited liability company, or partnership without first obtaining permission from the Court;
- Josephs must provide notice to the Court within 28 days of satisfaction of her judgment against PMG; and
- Josephs must provide notice to the Court within 28 days of satisfaction of her judgment against Marzan.

This relief will prevent and restrain future violations by Marzan's RICO enterprise while protecting innocent investors, owners, managers, and employees of PMG and Jupiter Rising. It will also prevent and restrain future violations by protecting innocent investors, employees, and contractors who would otherwise be unaware of the existence of the RICO enterprise. By preventing and restraining future violations, this relief is the type of conduct RICO's *§ 1964(a)* equitable remedies are directed toward eradicating. It also increases the likelihood that Josephs will be able to recover her damages from PMG and Marzan. **[*39]** By requiring Josephs to report the future satisfaction of her judgments to the Court, the Court will be able to relieve Marzan of the equitable relief if the Court determines Josephs no longer has standing for the equitable relief granted.

---

[8] This provision protects the rights of innocent persons and entities involved with PMG and Jupiter Rising Film under *18 U.S.C. § 1964(a)*.

[9] The Court will not require Marzan to directly disclose his charge of Theft By Swindle in Minnesota State Court Case Number 82-CR-14-2262 as it was continued for dismissal. *See* Sentencing Order, *State of Minnesota v. Alberto Jose Marzan*, Case No. 82-CR-14-2262 (Minn. Dist. Ct. Aug. 20, 2018). The facts of the case will still be available to those receiving disclosures because the Complaint in this case must be provided.

[10] Marzan need not disclose the supplemental briefing and documentation Josephs provided at the Court's request. To be clear, in addition to the Complaint and this Order, Marzan must disclose Docket Numbers 10, 12, and 13 including all exhibits attached to Docket Number 13.

To be clear, this Order will not require Marzan to make the disclosures to any entity, owner, or investor of any company in which he is an employee without any management or control over the company and is without any role in the company's finances or operations. Marzan is encouraged to seek clarification from the Court if he is uncertain of these requirements now or if at any time in the future when he is considering his role in a company. Marzan may also request the Court terminate the equitable relief or grant an alteration to or an exception from this Order but must do so before taking any action that would violate the terms of this Order.

CONCLUSION

The undisputed facts adequately establish that Marzan and PMG are jointly and severally liable to Josephs for fraudulent representation and breach of contract and that Marzan alone is liable to Josephs for violation the RICO Act and abuse of process. Therefore, the Court will grant Josephs's Motion **[*40]** for Default Judgment. The Court will award Josephs monetary damages against PMG and Marzan associated with the losses she has demonstrated on the record including interest on the promissory notes against both Defendants and including treble damages and attorney fees against Marzan as authorized by RICO. The Court will also grant Josephs equitable relief against Marzan to prevent and restrain future RICO Act violations because such relief is available to private plaintiffs and Josephs has standing to request it.

ORDER

Based on the foregoing, and all the files, records, and proceedings herein, **IT IS HEREBY ORDERED** that Plaintiff's Motion for Default Judgment [Docket No. 10] is **GRANTED IN PART and DENIED IN PART** as follows:

1. Alberto Jose Marzan is liable to Michaleen Josephs for violation of the Racketeer Influenced and Corrupt Organizations Act (Count I), fraudulent misrepresentation (Count II), breach of contract (Count III), and abuse of process (Count V).

2. Press Media Group, Inc. is liable to Michaleen Josephs for fraudulent misrepresentation (Count II) and breach of contract (Count III).

3. The motion for default judgment against Alberto Jose Marzan and Press Media Group, Inc. for **[*41]** promissory estoppel (Count IV) is **DENIED** as moot.

4. Michaleen Josephs is awarded $266,233.36, plus accrued interest on the promissory notes of not less than $31,521.73 as of December 20, 2021, with interest continuing to accrue at a rate of $46.63 per day until the date of judgment, against Alberto Jose Marzan and Press Media Group, Inc., jointly and severally.

5. Michaleen Josephs is awarded treble damages for Count I under *18 U.S.C. § 1964(c)* in the amount of $532,466.72, plus not less than $63,043.45 representing treble damages on accrued interest as of December 20, 2021, with damages continuing to accrue at a rate of $93.26 per day until the date of judgment, against Alberto Jose Marzan.

6. Michaleen Josephs is awarded $58,284.50 in additional damages against Alberto Jose Marzan, representing reasonable attorney fees and costs as authorized by *18 U.S.C. § 1964(c)* against Alberto Jose Marzan, arising from Count I and as authorized by the personal guaranty contract, arising from Count III.

7. Michaleen Josephs is awarded $46,092.19 in additional damages against Alberto Jose Marzan, arising from Counts II and III.

8. Michaleen Josephs is awarded $125,442.60 in additional damages against Alberto Jose Marzan, arising from Count **[*42]** V.

9. Pursuant to *18 U.S.C. § 1964(a)*, arising from Count I, until further order of this Court:

    a. Alberto Jose Marzan must immediately divest himself of any interest, direct or indirect, in Defendant Press Media Group, Inc. d/b/a VumaTV and in Jupiter Rising Film;

b. Alberto Jose Marzan must immediately cease all management, control, employment, and involvement with Press Media Group, Inc. d/b/a VumaTV and Jupiter Rising Film except to the extent necessary to provide remaining owners, managers, and employees of these entities with information and property necessary to continue the operation of the entities;

c. Alberto Jose Marzan must handover all information and property relevant to the above section within seven (7) days of receiving this Order;

d. As of the date of this Order, Alberto Jose Marzan must not remove any assets from Press Media Group, Inc. d/b/a VumaTV and Jupiter Rising Film including but not limited to intellectual property, proprietary information, physical property, or financial assets including those Alberto Jose Marzan believes to be his personal property;

e. Alberto Jose Marzan may provide the Court with evidence of his personal ownership of any assets in the control of Press Media Group, **[*43]** Inc. or Jupiter Rising Film who will award title to the proper owner;

f. Albert Jose Marzan must promptly and without request disclose his 2014 guilty plea to insurance fraud in *State of Minnesota v. Alberto Jose Marzan*, Minnesota Case No. 82-CR-13-4853 and provide (1) a copy of the Complaint in this case [Docket No. 1], (2) Michaleen Josephs's Motion for Default Judgment [Docket No. 10.] and initial accompanying memorandum [Docket No. 12], declaration [Docket No. 13], and exhibits [attachments to Docket No. 13] filed in support of the Motion in this case, and (3) this Order to:

i. Any potential or investor in any entity in which Marzan is involved in the entity's finances, operation, management, and/or control;

ii. Any potential or actual business in any entity in which Marzan is involved in the entity's finances, operation, management, and/or control; and

iii. Any potential or actual employees or contractors of any entity in which Marzan is involved in the entity's finances, operation, management, and/or control;

g. Alberto Jose Marzan is enjoined from forming any entity including but not limited to a corporation, limited liability company, or partnership without explicit permission from **[*44]** the Court;

h. Michaleen Josephs must provide notice to the Court within twenty-eight (28) days of satisfaction of the damages awarded in her favor against Press Media Group, Inc.; and

i. Michaleen Josephs must provide notice to the Court within twenty-eight (28) days of satisfaction of the damages awarded in her favor against Alberto Jose Marzan.

LET JUDGMENT BE ENTERED ACCORDINGLY.

DATED: January 5, 2022

at Minneapolis, Minnesota.

Opinion

ORDER

Nazir Khan, a surgeon formerly employed by Presence Chicago Hospitals Network, appeals the dismissal of his complaint for failure to state a claim. He alleged that the hospital administrators violated state and federal law by terminating his admitting privileges for not cooperating with an employee review. Because these allegations do not state a federal claim, we affirm.

HN1[] We treat all factual allegations in Khan's operative complaint (his first amended complaint) as true, while taking all reasonable inferences in his favor. *Calderone v. City of Chi., 979 F.3d 1156, 1161 (7th Cir. 2020)*. Khan worked as a cardiothoracic **[*2]** surgeon for nearly twenty years for St. Elizabeth's Hospital (which merged with another hospital and became Presence Chicago Hospitals Network) before the hospital terminated his privileges. He alleges that the hospital administrators removed him from the staff so that other employees could perform his procedures.

In 2017, the hospital's CEO and Chief Medical Officer asked Khan to resign. They referred to an unspecified "pattern" involving his cases. Khan then signed a leave-of-absence agreement, allegedly under duress. A review committee identified four of Khan's cases involving high infection rates and issues with call responsiveness and asked Khan to undergo a physical and psychological examination to address these concerns. Khan refused and asked that a log of his cases be sent to an outside reviewer. The hospital ignored Khan's request and in mid-2018 terminated his admitting privileges.

Two years after his discharge, Khan filed this suit. He amended his complaint several times, primarily alleging claims under federal ***antitrust law***, *Title VII of the Civil Rights Act of 1964*, the *Health Care Quality Improvement Act*, *42 U.S.C. §§ 11101*, *11137*, and various state-law claims.

The court granted the defendants' motion to dismiss. The court dismissed **[*3]** Khan's antitrust claims because Khan did not allege a cognizable antitrust injury; he did not plead sufficient facts of any relevant market or the hospital's control of any market. The court also dismissed Khan's claim under the Health Care Quality Improvement Act because the Act does not provide a private right of action. As for his Title VII discrimination claim, the court found that Khan had not obtained a right-to-sue letter from the Equal Employment Opportunity Commission showing that he had exhausted his administrative remedies. If he could show that he exhausted those administrative remedies, the court added, he then could refile that claim. The court then declined to exercise supplemental jurisdiction over the remaining state-law claims.

Khan amended his complaint again, attaching an EEOC right-to-sue letter indicating that he had exhausted his administrative remedies under Title VII. (He also repleaded a host of other claims that the court properly dismissed because he had not sought leave to bring them, and we do not discuss them further.) The EEOC letter confirmed that the charge Khan filed with the agency was untimely, and so the court dismissed Khan's remaining claims with **[*4]** prejudice.

On appeal, Khan generally challenges the court's dismissal of each of his claims. Regarding his discrimination claim, Khan argues the district court erred in directing him to allege that he filed a charge with the EEOC, only to reverse course after he refiled his claim and dismiss it as time-barred. But the court correctly determined that Khan filed his charge with the EEOC more than two years after the termination of his admitting privileges, well outside Title VII's 300-day window. *42 U.S.C. § 2000e-5(e)(1)*. As the court explained, ***HN2***[] dismissal is appropriate when, as here, a plaintiff's complaint sets out all the elements of an affirmative defense. *NewSpin Sports, LLC v. Arrow Elecs., Inc., 910 F.3d 293, 299-300 (7th Cir. 2018)*.

Khan now argues for the first time that the district court should have tolled the statute-of-limitations period because he did not learn of this requirement until the court dismissed his operative complaint. Waiver aside, *see Markel Ins.*

Co. v. Rau, 954 F.3d 1012, 1018 (7th Cir. 2020), Khan has not alleged anything to suggest that tolling here would serve the filing requirement's purpose of giving prompt notice to the employer. *See* *Nat'l R.R. Passenger Corp. v. Morgan, 536 U.S. 101, 113-121, 122 S. Ct. 2061, 153 L. Ed. 2d 106 (2002)*.

Regarding his antitrust claim, Khan argues that the court wrongly required him to allege that the hospital had established market control. ***HN3***[] But to state a claim under the *Sherman Act*, Khan had **[*5]** to allege not only an injury to himself, but also "an injury to the market." *Agnew v. Nat'l Collegiate Athletic Ass'n, 683 F.3d 328, 335 (7th Cir. 2012)*. Moreover, staffing decisions at one hospital do not violate federal ***antitrust law***. *Kochert v. Greater Lafayette Health Servs., 463 F.3d 710, 717 (7th Cir. 2006)*.

As for his claim under the Health Care Quality Improvement Act, Khan maintains that the review committee relied on false statements and denied him appropriate notice and a hearing. But the district court correctly explained that ***HN4***[] this statute does not provide a private right of action, *see, e.g.,* *Patel v. Hamilton Medical Center, Inc., 967 F.3d 1190, 1194 (11th Cir. 2020)*, and indeed, it immunizes those engaged in good-faith peer review. *Austin v. Am. Ass'n of Neurological Surgs., 253 F.3d 967, 974 (7th Cir. 2001)*.

Finally, Khan continues to press his various state-law claims. But because his federal claims were all properly dismissed, the district court was well within its discretion to decline to exercise supplemental jurisdiction over his state-law claims. *28 U.S.C. § 1367(c)(3)*.

We have considered Khan's other arguments and motions; none has merit.

AFFIRMED

Opinion

[*1103] ORDER GRANTING DEFENDANT'S MOTION TO DISMISS

Docket No. 24

I. INTRODUCTION

Plaintiff Thomas M. Reilly, the developer of an app called Konverti which facilitates peer-to-peer, in-person currency exchanges, alleges antitrust violations and unfair and anticompetitive conduct by Apple, Inc. ("Apple") through its monopolist operation of its App Store. Docket No. 1 ("Compl."). Plaintiff's app was allegedly approved and then abruptly removed by Apple from the App Store in 2017. *Id.* ¶ 7. In this action, Plaintiff seeks damages and injunctive relief to restore the Konverti app to the App Store and to alter Apple's operation of the App Store.

Now pending is Apple's motion to dismiss Plaintiff's complaint. Docket No. 24. For the reasons explained below, the Court **GRANTS** Apple's motion to dismiss.

II. BACKGROUND

A. Summary of Allegations

1. Apple's **[**2]** App Approval Process

According to the Complaint, "Apple designs, markets and sells smartphones, personal computers, tablets, wearables and accessories, and sells a variety of related services." Compl. ¶ 2. Apple has created an ecosystem for its iOS devices, such as the iPhone and iPad. *See id.* ¶¶ 18, 20, 52. Apple also operates the App Store, a platform through which iOS users and developers can transact. *Id.* ¶ 2. While Apple develops and distributes its own apps to users, *id.* ¶ 27, most native apps offered for download on the App Store are developed by third-party developers, *id.* ¶ 23. Apps for iOS devices can only be purchased through the App Store. *Id.* ¶¶ 22, 24.

To license Apple's proprietary software and distribute apps through its ecosystem, developers agree to abide by a Developer Program License Agreement ("DPLA"). Compl. ¶¶ 12, 66. This alleged "contract of adhesion" is standardized and imposes the same terms on all developers. *Id.* ¶ 38; *see also id.* ¶ 41. Pursuant to the DPLA, developers agree to abide by Apple's App Review Guidelines. While these Guidelines guide Apple's app review team, Apple retains "sole discretion" to reject any app that a developer seeks for distribution **[**3]** through Apple's App Store. Docket No. 25, Exh. 1 (DPLA) § 6.9(b); *see also id.*, Exh. 2 ("Guidelines") at 1[1] ("We do this by offering a highly curated App Store where every app is reviewed by experts. . . For everything else there is always the open Internet. If the App Store model and guidelines are not best for your app or business idea that's okay, we provide Safari for a great web experience too.").

2. Plaintiff's App and Removal from the App Store

Plaintiff Thomas Reilly alleges that he is the developer of Konverti, which he describes as "a Peer to Peer Currency Exchange." **[*1104]** Compl. ¶ 5. Konverti allegedly "facilitates person to person exchanges of small amounts of currency." *Id.* Aside from alleging that each user's "identification is vetted through Apple's identity management system," *id.* ¶ 6, the Complaint does not otherwise describe Konverti's function or operation. Plaintiff alleges that Konverti was approved by the Google Play Store and is currently available through Google Play for Android system users. *Id.* ¶ 6.

Konverti was allegedly "approved and placed" in Apple's App Store in June 2017 before it was "abruptly removed weeks later without clear cause." Compl. ¶¶ 7, 15, 26. Apple **[**4]** allegedly provided two reasons for Konverti's removal. First, Apple determined that the app was not safe. *Id.* ¶ 15. Second, Apple determined Konverti violated Guideline 5.0. *Id.* This Guideline provides:

> Apps must comply with all legal requirements in any location where you make them available (if you're not sure, check with a lawyer). We know this stuff is complicated, but it is your responsibility to understand and make sure your app conforms with all local laws, not just the guidelines below. And of course, apps that solicit, promote, or encourage criminal or clearly reckless behavior will be rejected. In extreme cases, such as apps that are found to facilitate human trafficking and/or the exploitation of children, appropriate authorities will be notified.

Exh. 2 § 5.0. Plaintiff alleges that Apple explained that it "continue[d] to find [Plaintiff's] app still facilitates individuals meeting in person for currency exchange, which is not an appropriate concept for the App Store" and that Plaintiff should "review [his] app concept and remove all content and features that are illegal in the locations where your app is available." Compl. ¶ 15 (quotation marks omitted). Plaintiff alleges **[**5]** that he unsuccessfully appealed Konverti's removal "multiple times" between June 2017 and 2020. *Id.* Plaintiff alleges that he is aware of no "security, legal or reporting requirements" triggered by Konverti. *Id.* ¶ 6. Plaintiff alleges that because Konverti was initially "approved and placed" on the App Store, Plaintiff was induced "to pay [Apple] monies and spend over

---

[1] The agreements and Guidelines are "central" to Plaintiff's claims, and are incorporated by reference in the FAC. *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)*.

$150k developing and marketing Konverti for over two years." *Id.* ¶ 17. Plaintiff alleges he "has been damaged in that Apple's conduct and delays in providing access [to] the [App] Store have caused significant loss of opportunity and impacted the market for Konverti." *Id.*

3. Plaintiff's Antitrust Claim Theory

Plaintiff brings suit under federal and state ***antitrust law***. He explains that "mobile device suppliers, commonly known in the industry as original equipment manufacturers ("OEMs"), will select and install an OS [operating system] prior to shipping their respective devices for sale." *Id.* ¶ 19. He alleges that the "overwhelming majority of mobile devices sold by these OEMs use the Android OS, which is licensed by Google," but, in contrast, "Apple uses a proprietary operating system called iOS, which it installs on the **[**6]** iPhone" and iPad. *Id.* ¶ 20. The "only channel for distributing iOS apps" (apps that are functional on Apple devices that use iOS) is through Apple's App Store. *Id.* ¶ 22.

Plaintiff alleges that Apple monopolizes the "iOS App Distribution Market" through "technical" and "contractual" restrictions. Compl. ¶¶ 18-42. He claims that:

- Apple "unlawfully maintains its monopoly power in the iOS App Distribution Market" in violation of *Section 2 of the Sherman Act* by "prevent[ing] the distribution of iOS apps through means other than the Apple Store and prevent[ing] developers from distributing competing **[*1105]** app stores to iOS users," Compl. ¶ 55 (Count 1);

- Apple violates *Section 2* by denying Konverti access to a purported essential facility, "iOS," *id.* ¶¶ 58-61 (Count 2); and

- The "Developer Agreement and the terms of the Apple Store Review Guidelines unreasonably restrain competition" in violation of *Section 1*, *id.* ¶ 67 (Count 3).

Plaintiff contends that the same conduct violates *California's Cartwright Act* (Count 4) and Unfair Competition Law (Count 5). *Id.* ¶¶ 71-88.

Plaintiff defines the relevant market for his antitrust claims as the "market for distribution of apps compatible with iOS to users of iOS devices" which is comprised of **[**7]** "all of the channels through which apps may be distributed to iOS devices," which, in turn, is limited to Apple's App Store because it is the "only channel for distributing apps" to iOS devices. *Id.* ¶ 28. Plaintiff alleges that the "geographic scope of the iOS App Distribution Market is worldwide, as consumers and developers can access iOS worldwide." *Id.* ¶ 29.

B. Procedural Background

In December 2018, Mill Lane Productions, LLC, purporting to be the developer of the Konverti app and which was represented by the same counsel as Plaintiff, sued Apple in the Superior Court of California, County of Santa Clara alleging negligent misrepresentation and violation of California's unfair competition law for Apple's removal of Konverti from the App Store. Docket No. 25, Exh. 3 ("State Court Compl."). After twice amending its complaint in response to Apple's demurrers, *id.*, Exh. 4, Mill Lane voluntarily dismissed its case without prejudice on February 5, 2020, *id.*, Exh. 5.

Plaintiff Reilly filed this case in June 2021, alleging that he is the developer of Konverti. Compl. ¶ 5. Mill Lane is not mentioned in this action; Plaintiff has not filed a disclosure of non-party interested entities pursuant **[**8]** to *Local Rule 3-15*.

Now pending is Apple's motion to dismiss the complaint for failure to state a claim. Docket No. 24 ("Motion").

III. LEGAL STANDARD

A. Failure to State a Claim (*Rule 12(b)(6)*)

Federal Rule of Civil Procedure 8(a)(2) requires a complaint to include "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. A complaint that fails to meet this standard may be dismissed pursuant to *Rule 12(b)(6)*. *See* *Fed. R. Civ. P. 12(b)(6)*. To overcome a *Rule 12(b)(6)* motion to dismiss after the Supreme Court's decisions in *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* and *Bell Atlantic Corporation v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, a plaintiff's "factual allegations [in the complaint] 'must . . . suggest that the claim has at least a plausible chance of success.'" *Levitt v. Yelp! Inc., 765 F.3d 1123, 1135 (9th Cir. 2014)*. The court "accept[s] factual allegations in the complaint as true and construe[s] the pleadings in the light most favorable to the nonmoving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. But "allegations in a complaint . . . may not simply recite the elements of a cause of action [and] must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively." *Levitt, 765 F.3d at 1135* (quoting *Eclectic Props. E., LLC v. Marcus & Millichap Co., 751 F.3d 990, 996 (9th Cir. 2014)*). "A claim has facial plausibility when the Plaintiff pleads factual content that allows the court to draw the reasonable inference that the Defendant is **[*1106]** liable for the misconduct alleged." *Iqbal, 556 U.S. at 678*. "The plausibility standard **[**9]** is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (quoting *Twombly, 550 U.S. at 556*).

IV. ANALYSIS

A. Antitrust Claims (Counts 1-4)

Apple seeks to dismiss Plaintiff's antitrust claims because Plaintiffs fail to allege facts sufficient to meet two threshold conditions to proceed on any antitrust theory: (1) a plausible relevant market for their claims, and (2) antitrust injury. For the reasons stated below, the Court dismisses all of the antitrust claims for Plaintiff's failure to satisfy these threshold conditions.

1. Relevant Market for Antitrust Claims

"A threshold step in any antitrust case is to accurately define the relevant market, which refers to 'the area of effective competition.'" *Fed. Trade Comm'n v. Qualcomm Inc., 969 F.3d 974, 992 (9th Cir. 2020)* (citation omitted); *see also* *Image Tech. Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1202 (9th Cir. 1997)* ("The relevant market is the field in which meaningful competition is said to exist." (citing *United States v. Continental Can Co., 378 U.S. 441, 449, 84 S. Ct. 1738, 12 L. Ed. 2d 953 (1964)*)). Market definition is an essential predicate to the entire case, for "[w]ithout a definition of [the] market there is no way to measure [the defendant's] ability to lessen or destroy competition.'" *Ohio v. American Express Co., 138 S. Ct. 2274, 2285, 201 L. Ed. 2d 678 (2018)*; *Flagship Theatres of Palm Desert, LLC v. Century Theatres, Inc., 55 Cal. App. 5th 381, 413, 269 Cal. Rptr. 3d 446 (Cal. Ct. App. 2020)* (noting the same under California's Cartwright Act). Accordingly, an antitrust plaintiff must plead a plausible relevant **[**10]** market—including "both a geographic market and a product market"—to state a claim. *Hicks v. PGA Tour, Inc., 897 F.3d 1109, 1120 (9th Cir. 2018)*; *see also* *hiQ Labs, Inc. v. LinkedIn Corp., 485 F. Supp. 3d 1137, 1148 (N.D. Cal. 2020)* ("[T]he relevant market must still be plausibly alleged to make it past a 12(b)(6) challenge.").

a. Plaintiff Fails to Allege a Plausible Relevant Product Market

Where a complaint fails to adequately allege a relevant market underlying its antitrust claims, those claims must be dismissed. *Pistacchio v. Apple Inc., 2021 U.S. Dist. LEXIS 47071. 2021 WL 949422, at *2 (N.D. Cal. Mar. 11, 2021)*; *Coronavirus Reporter v. Apple, Inc., No. 21-CV-05567-EMC, 2021 WL 5936910, at *7 (N.D. Cal. Nov. 30, 2021)*. A relevant product market "must encompass the product at issue as well as all economic substitutes for the product." *Newcal Indus., Inc. v. Ikon Office Sol., 513 F.3d 1038, 1045 (9th Cir. 2008)*. "The principle most fundamental to product market definition is 'cross-elasticity of demand' for certain products or services," a measure of interchangeability or substitutability of related products. *Kaplan v. Burroughs Corp., 611 F.2d 286, 291-92 (9th Cir. 1979)*. "Commodities which are 'reasonably interchangeable' for the same or similar uses normally should be included in the same product market for antitrust purposes." *Id.* "This interchangeability is largely gauged by the purchase of competing products for similar uses considering the price, characteristics and adaptability of the competing commodities." *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 380-81, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. "In defining the relevant market, the court must look beyond the particular commodity produced by an alleged monopolist because the relevant **[**11]** product market for determining monopoly power, or the **[*1107]** threat of monopoly control, depends upon the availability of alternative commodities for buyers." *Kaplan, 611 F.3d at 292* (citing *Fount-Wip, Inc. v. Reddi-Wip, Inc., 568 F.2d 1296, 1301 (9th Cir. 1978)*). "Illegal monopoly does not exist merely because the production of a particular product is 'monopolized'" without regard to alternative substitutes. *Id.* A plaintiff cannot ignore economic reality and "arbitrarily choose the product market relevant to its claims"; rather, the plaintiff must "justify any proposed market by defining it with reference to the rule of reasonable interchangeability and cross-elasticity of demand." *Buccaneer Energy (USA) v. Gunnison Energy Corp., 846 F.3d 1297, 1313 (10th Cir. 2017)* (internal quotation marks and citation omitted).

Here, Plaintiff alleges a single relevant product market for his antitrust claims: the iOS App Distribution Market he asserts consists entirely and exclusively of Apple's App Store. Compl. ¶¶ 28, 29. Plaintiff's proposed market fails for several reasons.

First, Plaintiff essentially asserts a *single-brand* market *defined* as Apple's App Store. "Single-brand markets are, at a minimum, extremely rare" and courts have rejected such market definitions "[e]ven where brand loyalty is intense." *Apple, Inc. v. Psystar Corp., 586 F. Supp. 2d 1190, 1198 (N.D. Cal. 2008)* (internal quotation marks and citation omitted). On the other hand, as **[**12]** the court in *Epic v. Apple* recently reiterated, "[a] single brand is never a relevant market when the underlying product is fungible." *Epic Games, Inc. v. Apple Inc., No. 4:20-CV05640-YGR, 559 F. Supp. 3d 898, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925, at *87 (N.D. Cal. Sept. 10, 2021)* (citation omitted, emphasis in the original). "It is an understatement to say that single-brand markets are disfavored. From nearly the inception of modern ***antitrust law***, the Supreme Court has expressed skepticism of single-brand markets[.]" *In re Am. Express Anti-Steering Rules Antitrust Litig., 361 F. Supp. 3d 324, 343 (E.D.N.Y. 2019)*; Herbert J. Hovenkamp, Markets in IP & Antitrust, *100 Geo. L.J. 2133, 2137 (2012)* ("[A]ntitrust law has found that a single firm's brand constitutes a relevant market in only a few situations."). To be sure, "[a]ntitrust markets consisting of just a single brand, however, are not per se prohibited. . .. In theory, it may be possible that, in rare and unforeseen circumstances, a relevant market may consist of only one brand of a product." *Psystar Corp. at 1198*.

The Supreme Court and Ninth Circuit have only found single-brand markets plausible in the context of *aftermarkets* which are "wholly derivative from and dependent on the primary market." *Newcal Indus., 513 F.3d at 1049*; *see also* *Streamcast Networks, Inc. v. Skype Techs., S.A., 547 F. Supp. 2d 1086, 1094 (C.D. Cal. 2007)* ("[T]he few cases in which courts have acknowledged the possibility of limiting the relevant market to a single brand have involved markets for replacement parts for specific brands of durable goods where consumers are 'locked-in' **[**13]** to maintaining them.").

Yet Plaintiff does not allege that the "iOS App Distribution Market" is an aftermarket.[2] Despite alleging that the *primary* **[*1108]** market in this case should be a single-brand market, Plaintiff does not cite a single antitrust case that has *ever* recognized a *single-brand primary market. Cf.* Docket No. 31 ("Opp.") at 4-5.

---

[2] Plaintiff's opposition brief does not dispute Apple's argument that Plaintiff failed to allege the relevant market as an aftermarket. Indeed, the word "aftermarket" does not appear in Plaintiff's complaint nor in its opposition brief. Nonetheless, setting aside Plaintiff's failure to clearly articulate its intention to propose a single-brand aftermarket, the allegations in the complaint do not suffice to plausibly allege a single-brand aftermarket under Ninth Circuit precedent. Under *Newcal*, to plausibly assert a single-brand aftermarket at the pleading stage, a Plaintiff is required to adequately allege that (1) the aftermarket is wholly derivative from the primary market, (2) the illegal restraints of trade relate only to the aftermarket, (3) the defendant did not achieve market power in the aftermarket through contractual provisions that it obtains in the initial market, and (4) competition in the initial market does not suffice to discipline anticompetitive practices in the aftermarket. *513 F.3d at 1048-50*. At most, Plaintiff's complaint gestures at fourth factor. *See* Compl. ¶¶ 32-34. But even these statements amount to conclusory assertions and formulaic recitations of the element, devoid of specific factual allegations to satisfy *Rule 12(b)(6)*. *Levitt, 765 F.3d at 1135*.

Moreover, the complaint provides no explanation for limiting the relevant market to a *single-brand market* defined around *Apple's distribution of iOS apps* when the complaint concedes that "the overwhelming majority of mobile devices sold by [original equipment manufacturers] *use the Android OS, which is licensed by Google*," and that Plaintiff's app is available through Google Play for Android system users. Compl. ¶¶ 6, 20. Consumers who want Konverti can obtain it through Google Play Store on devices with Android OS. And as Plaintiff conceded at the oral argument, Konverti can be configured as an app available on the Internet, as a web-based app, and then accessed through a web browser on an iOS device. Plaintiff provides no basis for limiting the market definition to the App Store and excluding other platforms that provide access to apps, such as web-based **[**14]** apps that can be accessed from any web browser, including from iOS devices, or the Google Play Store where Plaintiff acknowledges the Konverti app is currently available. Thus, because "[d]istribution can occur through web apps, by web access, and through other [app] stores," *Epic, 2021 U.S. Dist. LEXIS 172303, 2021 WL 4128925 at *113*, Plaintiff's failure to address or analyze these plausible alternatives is fatal to his proposed market definition, *Pistacchio, 2021 U.S. Dist. LEXIS 47071, 2021 WL 949422 at *2*; *see also* *Hicks, 897 F.3d at 1122-23* (affirming dismissal because alleged market was implausible without explanation of why potential substitutes were not interchangeable); *Streamcast Networks, Inc. v. Skype Techs., S.A., 547 F. Supp. 2d 1086, 1095 (C.D. Cal. 2007)* (rejecting the plaintiff's narrow market definition where alternatives "permit[ted] users to accomplish the same basic task"); *Federal Trade Commission v. Lab. Corp. of Am., No. SACV 10-1873 AG (MLGx), 2011 U.S. Dist. LEXIS 20354, 2011 WL 3100372, at *18 (C.D. Cal. Feb. 22, 2011)* (stating courts "routinely recognize that otherwise identical products are not in separate markets simply because consumers pay for those products in different ways"); *hiQ Labs, Inc. v. LinkedIn Corp., 485 F. Supp. 3d 1137, 2020 WL 5408210, at *7 (N.D. Cal. 2020)* (holding that plaintiff had "not yet shown that it is *plausible* that the relevant market should be defined as that which uses only [defendant's] data" where alternative public channels exist to obtain similar data (emphasis in original)). This Court similarly rejected proposed single-brand antitrust market of "iOS Institutional App Market")in *Coronavirus Reporter, 2021 WL 5936910, at *9-11*.

Although the "principle **[**15]** most fundamental to product market definition is 'cross-elasticity of demand' for certain products or services," *Kaplan, 611 F.2d at 291-92* the complaint lacks any discussion of cross-elasticity of demand for certain products or services. Plaintiff concedes that complaint fails to engage such an analysis or to define "'the area of effective competition.'" *Fed. Trade Comm'n v. Qualcomm Inc., 969 F.3d 974, 992 (9th Cir. 2020)*; Opp. at 4-5. Instead, Plaintiff **[*1109]** argues his failure to provide analysis of cross-elasticity of demand in the complaint "is not fatal to Plaintiff's claims" because each of the submarkets alleged are well-defined in themselves, and their boundaries can be refined through discovery. Opp. at 4-5 (citing *Brown Shoe Co. v. U.S., 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*). This is incorrect. "Authorities far too numerous to cite or discuss in detail have established" that "[t]he principle most fundamental to product market definition is 'cross-elasticity of demand.'" *Kaplan v. Burroughs Corp., 611 F.2d 286, 291 (9th Cir. 1979)*. "[W]here the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand," therefore, "the relevant market is legally insufficient." *City of N.Y. v. Grp. Health Inc., 649 F.3d 151, 155 (2d Cir. 2011)*.

In short, a plausible market requires alleged facts explaining why the products *included* in the market *are substitutes* for one another as well **[**16]** as alleged facts explaining why seemingly similar products *excluded* from the market *are not substitutes* for those in the market. Plaintiffs "iOS distribution services market" asserted here lacks justification on both bases.

b. Plaintiff Fails to Allege a Plausible Relevant Geographic Market

Plaintiff has also failed to allege facts indicating that the "area of effective competition where buyers can turn for alternate sources of supply" is worldwide. *Morgan, Strand, Wheeler & Biggs v. Radiology, Ltd., 924 F.2d 1484, 1490 (9th Cir. 1991)* (quotation marks and ellipsis omitted). Taking Plaintiff's proposed market definition of *all* app transactions on the App Store *worldwide*, the relevant inquiry is whether *all* consumers and *all* developers of *all* iOS apps across the world operate in one "area of effective competition." *Moore v. James H. Matthews & Co., 550 F.2d 1207, 1218 (9th Cir. 1977)* (quotation marks omitted). There is no allegation that, *e.g.*, users in every country access the same App Store storefront; that users in different countries can download the same array of apps; or that the commercial realities for developing, marketing, distributing, and supporting apps are the same in every country. Thus, the Complaint does not contain allegations sufficient to support the global geographic scope that Plaintiff's proposes.

c. Conclusion Regarding **[**17]** Relevant Market

In sum, Plaintiff's complaint fails to allege plausible product or geographic markets, which are threshold showings for Plaintiff's antitrust claims. Thus, the Court grants Apple's motion to dismiss as to all of Plaintiff's antitrust claims (Counts 1-4). *See* *Qualcomm, 969 F.3d at 992* (courts cannot "assess[] alleged antitrust injuries . . . in the market where competition is [allegedly] being restrained" without "an accurate definition of the relevant market," which is indispensable to "measur[ing] [the defendant's] ability to lessen or destroy competition").

2. Antitrust Injury

a. Failure to Allege Injury to Competition

Apple's second threshold argument for dismissal of Plaintiff's antitrust claims is that Plaintiff fail to plead antitrust injury. *Somers v. Apple, Inc., 729 F.3d 953, 964 n.5 (9th Cir. 2013)*; *see also* *In re WellPoint, Inc. Out-of-Network "UCR" Rates Litig., No. MDL092074PSGFFMX, 2013 WL 12130034, at *11 (C.D. Cal. July 19, 2013)* (explaining that antitrust injury under the Cartwright Act is analyzed under the same general framework as federal law). To allege antitrust injury, a plaintiff must allege injury to "competition in the market as a **[*1110]** whole"—such as marketwide reduction in output or increase in prices—"not merely injury to itself as a competitor." *Gorlick Distrib. Ctrs., LLC v. Car Sound Exhaust Sys., Inc., 723 F.3d 1019, 1024-25 (9th Cir. 2013)*. Thus, a plaintiff may not merely allege that the defendant is engaged in some anticompetitive conduct and that **[**18]** "some injury is occurring." *Town Sound & Custom Tops, Inc. v. Chrysler Motors Corp., 959 F.2d 468, 486-87 (3d Cir. 1992)* (en banc). To state a claim, a "plaintiff must *link* the two showings with a theory of causation that is both plausible and cognizable by the antitrust laws." *Id.* (emphasis added). The alleged harm also must be "'attributable to an anticompetitive aspect of the practice under scrutiny[;]'" "harm that could have occurred under the normal circumstances of free competition" does not suffice. *In re NFL's Sunday Ticket Antitrust Litig., 933 F.3d 1136, 1150 (9th Cir. 2019)* (quoting *Atl. Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 334, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*).

Plaintiff's theory of harm is that *his* app was rejected from the App Store notwithstanding *his* investment in Konverti. Compl. ¶ 17. This theory fails to connect his supposed injury to injury to competition generally. *See* *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)* ("The antitrust laws . . . were enacted for the protection of competition not competitors.") (quotation marks omitted). There is no allegation, for example, that the imposition of the guideline under which Konverti was rejected or that the App Review process stifles marketwide output or increases prices. *See* Compl. ¶¶ 40-41. Nor does Plaintiff contend that Apple's removal of apps erroneously approved for distribution on the App Store—the alleged cause of his lost investment, *id.* ¶ 17—has any deleterious impact on competition. *See* *Pool Water Prods. v. Olin Corp., 258 F.3d 1024, 1036 (9th Cir. 2001)* ("The critical **[**19]** question for determining whether there is antitrust injury is whether the harm is of the kind the antitrust laws were meant to protect against"). As this Court ruled in *Coronavirus Reporter, 2021 WL 5936910, at *14*, "The allegations of injury contained in the FAC are either confined to specific harms experienced by Plaintiffs or a small group of competitors, rather than harm to the market. None of the allegations in the FAC allege harm generally to the market of transactions for apps across a relevant market."

Plaintiff cannot demonstrate antitrust injury sufficient to sustain his claims through references to alleged anticompetitive acts that have no relation to Plaintiff or the harm that he experienced. For example, Plaintiff repeatedly notes that Apple does not allow competing app stores on iOS. *See* Compl. ¶¶ 30, 47, 55. But Plaintiff does not allege that he sought to create such a competing store. Similarly, Plaintiff suggests Apple's pre-installation of certain apps, including the App Store, is anticompetitive without an allegation that this affected him or his app, Konverti, in any way. *See id.* ¶¶ 27, 37.

Plaintiff's allegation that "Apple's conduct has substantial anti-competitive effects, including increased prices and costs, **[**20]** reduced innovation and quality of service, and lowered output," Opp. 5-6 (quoting Compl. ¶ 56) is wholly conclusory and simply constitutes "threadbare recitals" of the elements of antitrust injury insufficient to state a claim. Iqbal, 556 U.S. at 663. To plead antitrust injury, one cannot "merely recite the bare legal conclusion that competition has been restrained unreasonably" but must "at a minimum, sketch the outline of [the injury to competition] with allegations of supporting factual detail." Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1198 (9th Cir. **[*1111]** 2012) (quotation marks omitted; alteration in original); *see also* Reveal Chat Holdco, LLC v. Facebook, Inc., 471 F. Supp. 3d 981, 998 (N.D. Cal. 2020) (rejecting as "nothing more than conclusory" allegations that plaintiffs "'had their business and assets destroyed by Facebook's anticompetitive scheme,' and are prevented from entry or reentry into the relevant markets because of Facebook's exclusionary conduct"); NorthBay Healthcare Grp., Inc. v. Kaiser Found. Health Plan, Inc., 305 F. Supp. 3d 1065, 1074 (N.D. Cal. 2018) (dismissing antitrust claims because "there are no non-conclusory allegations that [Defendant's] actions restrained trade in the relevant market or injured overall competition" and the allegations "lack factual enhancement and are conclusory.").[3]

b. Conclusion

Thus, Plaintiff fails to adequately plead antitrust injury. This failure provides a second and independent basis for the **[**21]** Court to dismiss Plaintiff's antitrust claims (Counts 1-4). Because Plaintiff has failed to make the threshold showings of a plausible a relevant market and alleging antitrust injury, the Court need not analyze whether he has alleged facts sufficient to satisfy the substantive elements of Plaintiff's particular antitrust claims. See *e.g.,* Amex, 138 S. Ct. at 2285 (Market definition is an essential predicate to the entire case, for "[w]ithout a definition of [the] market there is no way to measure [the defendant's] ability to lessen or destroy competition.'").

B. Unfair Competition Claim (Count 5)

Plaintiff's fifth cause of action under California's Unfair Competition Law, Cal. Bus. & Prof. Code § 17200, is premised on the following allegation:

> Apple's conduct alleged herein constitutes unlawful, unfair and fraudulent conduct under Cal. Bus. And Prof. Code, §17200 ET. Seq. Apple has deceptively and unfairly: failed to implement policies and procedures that would prevent deceptive and unfair conduct; induced Plaintiff to develop an application by making false representations and then arbitrarily removing it from the Apple Store based on information that was available to Apple since the beginning of the relationship but does not qualify reasons for removal.

Compl. ¶ 81. To **[**22]** the extent the claim is derivative of Plaintiff's allegations of antitrust violations, the UCL claim falls with those claims. City of San Jose v. Off. of the Comm'r of Baseball, 776 F.3d 686, 691-92 (9th Cir. 2015) ("An independent claim under California's UCL is therefore barred so long as [the defendant's] activities are lawful under the antitrust laws."); *see also* Aleksick v. 7—Eleven, Inc., 205 Cal. App. 4th 1176, 1185, 140 Cal. Rptr. 3d 796 (Cal. Ct. App. 2012) ("When a statutory claim fails, a derivative UCL claim also fails.").

Plaintiff contends that the UCL claim encompasses an additional claim "on top of the alleged antitrust violations." Opp. at 10. Plaintiff argues Count 5 includes an independent claim under the UCL that "Defendant has deceptively" failed to "implement policies and procedures that **[*1112]** would prevent deceptive practices and induced Plaintiff to develop an application by making false representations and then arbitrarily removing it from the App Store based on information that was available to Defendant since the beginning of their 2-year relationship." *Id.*

Plaintiff's additional UCL claim then sounds in fraud, which requires him to plead it with particularity under Fed. R. Civ. P. 9(b)'s heightened standard. *See* Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009). The complaint, however, falls short of alleging the "who, what, when, where, and how" required by Rule 9. Id. at 1124 (quotation marks omitted).

---

[3] Plaintiff's relevant market definition and theory of antitrust injury also fail to apprehend or analyze the two-sided nature of the marketplace of transactions for apps where Apple's App Store functions as an intermediary between the respective sides — app developers and end users. *See* Coronavirus Reporter, 2021 WL 5936910, at *12-15. Although Apple does not advance this argument in the pending motion, should Plaintiff seek to amend his complaint to plausibly state a claim, Plaintiff must allege a relevant market and theory of antitrust injury that addresses the two-sided nature of the relevant market. *See id.*

The complaint only describes **[**23]** specific communications in which Apple explained *its rejection* of his app. *See* Compl. ¶¶ 7, 15. The complaint does not elaborate on any instances in which Apple told him his app would be distributed through the App Store—the supposedly "fraudulent conduct" on which he relied. Opp. 10. The complaint includes vague allegations that someone at Apple represented to Plaintiff at an unidentified time, in an unidentified manner, that Konverti "compli[ed] with all App Store policies." Compl. ¶ 17. This ambiguous, nonspecific and general allegation does not satisfy *Rule 9(b)*. *See* *Kearns, 567 F.3d at 1127* (rejecting "claims of nondisclosure . . . couched in general pleadings alleging Ford's intent to conceal from customers that CPO vehicles were essentially the same as ordinary used vehicles" because "[s]uch general pleadings do not satisfy the heightened pleading requirements of *Rule 9(b)*").

Similarly, Plaintiff fails to plead facts to support "the elements of fraud" as required to state a claim grounded in fraud under the UCL. *Kearns, 567 F.3d at 1126* ("The elements of a cause of action for fraud in California are: "(a) misrepresentation (false representation, concealment, or nondisclosure); (b) knowledge of falsity (or 'scienter'); (c) intent to defraud, **[**24]** i.e., to induce reliance; (d) justifiable reliance; and (e) resulting damage.") (citation omitted). Notably, complaint lacks any allegation of scienter or an intent to defraud associated with the alleged statement that Plaintiff's app complied with Apple's policies. *See id.* Nor are there any allegations that, if true, would show Plaintiff justifiably relied on Apple's alleged statement. *See id.* This is particularly relevant given the complaint's concession that Apple's written Guidelines put the onus Plaintiff to ensure his app was safe and legal. Compl. ¶ 16.

Thus, the Court dismisses Plaintiff's UCL claim (Count 5) for failure to state a claim.

C. Adequate Remedies at Law (Counts 1-5)

Plaintiff's Prayer for Relief seeks exclusively equitable remedies: injunctive relief, a declaration and restitution. Compl. at 26-27. One of the "basic requisites [for] the issuance of equitable relief" from a federal court is "the inadequacy of remedies at law." *O'Shea v. Littleton, 414 U.S. 488, 502, 94 S. Ct. 669, 38 L. Ed. 2d 674 (1974)*; *see also Sonner v. Premier Nutrition Corp., 971 F.3d 834, 844 (9th Cir. 2020)* (a plaintiff "must establish that she lacks an adequate remedy at law before securing equitable restitution for past harm"); *Mort v. United States, 86 F.3d 890, 892 (9th Cir. 1996)* ("It is a basic doctrine of equity jurisprudence that courts of equity should not act ... when the moving **[**25]** party has an adequate remedy at law.").

Plaintiff, however, merely asserts that he lacks adequate remedies at law, Compl. ¶ 83, but fails to allege facts or reasons why that is the case. Indeed, the complaint seeks redress for Plaintiff's lost investment — allegedly $150,000 that he spent developing the Konverti app — and **[*1113]** lost profits — from Apple's alleged wrongdoing by removing Konverti from the App Store. Plaintiff offers the conclusory assertion that "the only way to protect its property and protect its rights is to obtain an injunction," Opp. at 10; Compl. ¶¶ 85-87, but provides no explanation and alleges no facts as to why a legal remedy is inadequate to remedy his alleged harm. In *Sonner*, like here, the plaintiff declined to request damages and then urged that she had no adequate remedy at law and was entitled to equitable restitution. *971 F.3d at 844-45*. The Ninth Circuit rejected that argument as the plaintiff had not "explain[ed] how the same amount of money for the exact same harm is inadequate or incomplete." *Id. at 844*. Likewise, Plaintiff here could have sought to recoup his lost investment through damages. *Id.*; *see also* *Guzman v. Polaris Indus. Inc., No. 8:19-cv-1543, 2021 U.S. Dist. LEXIS 98389, 2021 WL 2021454, at *11 (C.D. Cal. May 12, 2021)* ("The relevant question, however, is not whether [plaintiff] has *pleaded* legal remedies, **[**26]** but whether he could have *sought* an adequate legal remedy.").

Thus, because Plaintiff fails to adequately allege that he lacks remedies at law, Plaintiff's claims for equitable relief (Counts 1-5) are dismissed. *See* *Anderson v. Apple Inc., 500 F. Supp. 3d 993, 1009 (N.D. Cal. 2020)* (dismissing claims because "[u]nder *Sonner*, the plaintiffs are required, at a minimum, to plead that they lack an adequate remedy at law, which they have not done").

D. Leave to Amend

The Court dismisses all of Plaintiff's claims for the reasons discussed above, but grants Plaintiff leave to amend his claims. Pursuant to *Fed. R. Civ. P. 15(a)*, leave to amend "shall be freely given when justice so requires." This complaint is Plaintiff's first. While it appears doubtful that Plaintiff will be able to cure the fundamental flaws in his complaint, in light of the liberal policy in favor of granting leave to amend, the Court grants leave to Plaintiff to amend his claims. *See* *Pistacchio, 2021 U.S. Dist. LEXIS 47071, 2021 WL 949422, at *3*; *hiQ Labs, 485 F. Supp. 3d 1137, 2020 WL 5408210, at *7* (providing leave to amend to address deficiencies in the allegations underlying the market definition). Plaintiff is cautioned, however, that in amending the complaint, he must comply with *Rule of Civil Procedure 11*.

V. CONCLUSION

The Court **GRANTS** Apple's motion to dismiss the complaint. Docket No. 24. The Court grants Plaintiff leave to amend his complaint. **[**27]** Plaintiff amended complaint must be filed within thirty (30) days from the date of this order.

This order disposes of Docket No. 24.

IT IS SO ORDERED.

Dated: January 7, 2022

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

In evaluating a motion to dismiss under Fed. R. Civ. P. 12(b)(6), courts must treat the complaint's factual allegations as true and must grant plaintiff the benefit of all inferences that can be derived from the facts alleged. Although detailed factual allegations are not necessary to withstand a Rule 12(b)(6) motion, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face, — that is, the facts alleged in the complaint must be enough to raise a right to relief above the speculative level. The court need not accept as true, then, a legal conclusion couched as a factual allegation, nor inferences unsupported by the facts set out in the complaint. And it may consider not only the facts alleged in the complaint, but also any documents either attached to or incorporated in the complaint, and matters of which courts may take judicial notice.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN2[] Actual Monopolization, Claims

The offense of monopoly maintenance under § 2 of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Evidence > Types of Evidence > Circumstantial Evidence

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Evidence > Inferences & Presumptions > Inferences

HN3[] Attempts to Monopolize, Elements

The U.S. Supreme Court defines monopoly power as the power to control prices or exclude competition. In other words, a firm is a monopolist if it can profitably raise prices substantially above the competitive level. If a plaintiff can supply direct proof that a firm has in fact profitably done so, the existence of monopoly power is clear. Because such direct proof is rarely available, however, plaintiffs and courts more typically examine market structure in search of circumstantial evidence of monopoly power. In such a case, courts may infer monopoly power from a firm's possession of a dominant share of a relevant market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN4[] Actual Monopolization, Monopoly Power

Because market power is meaningful only if it is durable, a plaintiff proceeding by the indirect method must also show that the firm's dominant share of the relevant market is protected by barriers to entry into the market. Entry barriers' are factors that prevent new rivals from timely responding to an increase in price above the competitive level.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN5[] Attempts to Monopolize, Elements

The indirect framework first requires the plaintiff to establish the relevant market in which the defendant firm allegedly has monopoly power. If the plaintiff succeeds at that stage, it must then adequately allege that the defendant has a dominant share of that market, and that its dominance is protected by barriers to entry.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN6[] **Relevant Market, Geographic Market Definition**

Even though the definition of a relevant antitrust market is typically a factual rather than a legal inquiry, certain legal principles nevertheless govern. It is well established, for instance, that an antitrust market includes two components: the product market and the geographic market. A relevant product market is a term of art in antitrust analysis, and the Circuit has defined it as including all products reasonably interchangeable by consumers for the same purposes. Because the ability of consumers to turn to other suppliers restrains a firm from raising prices above the competitive level, the analysis of market power uses as its denominator all products roughly equivalent to another for the use to which they are put. In other words, courts look at whether two products can be used for the same purpose, and, if so, whether and to what extent purchasers are willing to substitute one for the other.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN7[] **Relevant Market, Product Market Definition**

The question of appropriate substitutes looks to both whether two products can be used for the same purpose, and, if so, whether and to what extent purchasers are willing to substitute one for the other.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN8[] **Actual Monopolization, Monopoly Power**

Courts generally require a 65% market share to establish a prima facie case of market power.

Mergers & Acquisitions Law > Antitrust > Market Definition

HN9[] **Antitrust, Market Definition**

Plaintiffs need not present market shares estimates with the precision of a NASA scientist. The closest available approximation often will do. A reliable, reasonable, close approximation of relevant market share data is sufficient.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN10[] **Actual Monopolization, Monopoly Power**

A plaintiff proceeding under the indirect method of proof who has alleged a dominant market share must also allege that the defendant's possession of a dominant share of a relevant market is protected by entry barriers. Because market share is just a way of estimating market power, which is the ultimate consideration, easy entry and the absence of barriers matter even though the defendant has a large market share. For antitrust purposes, a barrier to entry is best defined as any factor that permits firms already in the market to earn returns above the competitive level while deterring outsiders from entering.

Antitrust & Trade Law > Regulated Industries > Communications > Telecommunications Act

HN11[] Communications, Telecommunications Act

For purposes of analyzing barriers to entry, a network effect is a feature that makes a network more valuable as the number of users increases.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Federal Trade Commission Act > Scope

HN12[] Actual Monopolization, Claims

Possessing monopoly power in the relevant market is not enough, however. the second element of a § 2 of the Sherman Act claim: has the Federal Trade Commission sufficiently alleged the willful maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Sherman Act > Claims

HN13[] Actual Monopolization, Claims

Having a monopoly does not by itself violate § 2 of the Sherman Act. The U.S. Supreme Court has explained that the mere possession of monopoly power, and the concomitant charging of monopoly prices, is not only not unlawful; it is an important element of the free-market system. To safeguard the incentive to innovate, the possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive conduct. Whether any particular act of a monopolist is exclusionary, rather than merely a form of vigorous competition, however, can be difficult to discern: the means of illicit exclusion, like the means of legitimate competition, are myriad. The challenge for an antitrust court, therefore, lies in stating a general rule for distinguishing between exclusionary acts, which reduce social welfare, and competitive acts, which increase it.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN14[] **Actual Monopolization, Claims**

The D.C. Circuit has articulated several principles that emerge from a century of case law on monopolization under § 2 of the Sherman Act. First, to be condemned as exclusionary, a monopolist's act must have an anticompetitive effect. That is, it must harm the competitive process and thereby harm consumers. Second, the plaintiff, on whom the burden of proof of course rests, must demonstrate that the monopolist's conduct indeed has the requisite anticompetitive effect. Third, if a plaintiff successfully establishes a prima facie case under § 2 by demonstrating anticompetitive effect, then the monopolist may proffer a procompetitive justification for its conduct. Fourth, if the monopolist's procompetitive justification stands unrebutted, then the plaintiff must demonstrate that the anticompetitive harm of the conduct outweighs the procompetitive benefit. Finally, in considering whether the monopolist's conduct on balance harms competition and is therefore condemned as exclusionary for purposes of § 2, a court's focus is upon the effect of that conduct, not upon the intent behind it. Evidence of the intent behind the conduct of a monopolist is relevant only to the extent it helps us understand the likely effect of the monopolist's conduct.

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

HN15[] **Antitrust, Horizontal Mergers**

It is well established that mergers may constitute one such means' that tend to destroy competition itself via means other than competition on the merits.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN16[] **Attempts to Monopolize, Elements**

A monopolist's acquisition of an actual or likely potential competitor is properly classified as anticompetitive, for it tends to augment or reinforce the monopoly by means other than competition on the merits.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN17[] **Deceptive & Unfair Trade Practices, State Regulation**

The agency must allege harm to competition and consumers; harm to one or more competitors will not suffice.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Mergers & Acquisitions Law > Antitrust > Premerger Notifications

Antitrust & Trade Law > Federal Trade Commission Act > US Federal Trade Commission

Antitrust & Trade Law > Federal Trade Commission Act > Scope

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > Federal Trade Commission Act

HN18[] Deceptive & Unfair Trade Practices, Federal Trade Commission Act

The Hart-Scott-Rodino Act does not require the Federal Trade Commission (FTC) to reach a formal determination as to whether the acquisition under review violates the antitrust laws. On the contrary, it merely obliges the parties to the merger to report certain information to the agency and to wait to consummate the deal until the expiration of the statutory waiting period, which the FTC may extend while it gathers additional information. 15 U.S.C.S. § 18a(a), (b), (e).

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > Injunctions

Antitrust & Trade Law > Federal Trade Commission Act > US Federal Trade Commission

Antitrust & Trade Law > Consumer Protection > False Advertising > US Federal Trade Commission

Antitrust & Trade Law > Federal Trade Commission Act > Scope

HN19[] Deceptive & Unfair Trade Practices, Federal Trade Commission Act

Section 13(b) of the Federal Trade Commission (FTC) Act therefore contemplates only relief that is prospective, not retrospective. It does not permit the FTC to bring a claim based on long-past conduct without some evidence that the defendant is' committing or is about to commit another violation.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN20[] Motions to Dismiss, Failure to State Claim

Although the D.C. Circuit does not appear to have weighed in on the issue, a chorus of other courts has held that a motion to dismiss under Fed. R. Civ. P. 12(b)(6) doesn't permit piecemeal dismissals of parts of claims. Rather, the question at this stage is simply whether the complaint includes factual allegations that state a plausible claim for relief. That conclusion flows from the plain language of Rule 12(b)(6), which permits a party to seek dismissal for failure to state a claim upon which relief can be granted.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN21[] Complaints, Requirements for Complaint

In sum, at the motion-to-dismiss stage, once a court determines that a claim states a viable basis for relief, it cannot further parse out whether other portions of the claim would suffice on their own.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

HN22[] **Judges, Discretionary Powers**

A trial court enjoys considerable discretion over discovery matters.

Governments > Courts > Court Personnel

HN23[] **Courts, Court Personnel**

Adjudication has its own unique ethical requirements; as a result, the D.C. Circuit has held that the standard is not applicable to non-adjudicatory proceedings, and that courts must not impose judicial roles upon administrators when they perform functions very different from those of judges.

Antitrust & Trade Law > Federal Trade Commission Act > Scope

Antitrust & Trade Law > Federal Trade Commission Act > US Federal Trade Commission

Antitrust & Trade Law > Consumer Protection > False Advertising > US Federal Trade Commission

HN24[] **Antitrust & Trade Law, Federal Trade Commission Act**

Even when not acting as an adjudicator, a Federal Trade Commission Commissioner is not absolved of all ethical constraints. For instance, when a Commissioner is engaged in the rulemaking process, she should be disqualified when there has been a clear and convincing showing that the agency member has an unalterably closed mind on matters critical to the disposition of the proceeding. When considering potential prejudgment in the context of a rulemaking, however, courts have not generally objected to statements made prior to the initiation of agency action and have recognized that administrators, and even judges, may hold policy views on questions of law prior to participating in a proceeding.

Legal Ethics > Prosecutorial Conduct

HN25[] **Legal Ethics, Prosecutorial Conduct**

The standards of neutrality for prosecutors are not necessarily as stringent as those applicable to judicial or quasi-judicial officers, and they may require a stronger showing for a prosecutor than a judge in order to conclude that a conflict of interest exists. In particular, given prosecutors' duties, they are necessarily permitted to be zealous in their enforcement of the law. Of course, this does not waive prosecutors' ethical obligations, as they too must serve the public interest, and their behavior is not immunized from judicial scrutiny in cases in which the enforcement decisions of an administrator were motivated by improper factors or were otherwise contrary to law.

Legal Ethics > Prosecutorial Conduct

HN26[] Legal Ethics, Prosecutorial Conduct

True disinterest on the issue of such a defendant's guilt is the domain of the judge and the jury — not the prosecutor.

Opinion by: JAMES E. BOASBERG

Opinion

[*40] MEMORANDUM OPINION

Second time lucky? The Federal Trade Commission's first antitrust suit against Facebook, Inc. stumbled out of the starting blocks, as this Court dismissed the Complaint last June. In doing so, the Court concluded that the Commission had failed to plausibly allege "that Facebook has monopoly power in the market for Personal Social Networking (PSN) services." *FTC v. Facebook, Inc., 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *1-2 (D.D.C. June 28, 2021)*. Because that "defect **[**2]** could conceivably be overcome by re-pleading," however, the Court left the door ajar for the agency to amend the Complaint and reinstate its suit. *560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, [WL] at *1*.

Eagerly accepting such invitation, the FTC has filed an Amended Complaint containing significant additions and revisions aimed at addressing the shortcomings identified in the Court's prior Opinion. The core theory of the lawsuit remains essentially unchanged. The Commission continues to allege that Facebook has long had a monopoly in the market for PSN services and that it has unlawfully maintained that monopoly via two types of actions: first, by acquiring competitors and potential competitors — most notably, Instagram and WhatsApp — that it believed were well situated to eat into its monopoly; and second, by implementing and enforcing policies that prevented interoperability between Facebook and other apps that it viewed as nascent threats. The facts alleged this time around to fortify those theories, however, are far more robust and detailed than before, particularly in regard to the contours of Defendant's alleged monopoly.

Facebook nonetheless moves to dismiss once again, contending that the FTC's latest effort is akin to rearranging **[**3]** the deck chairs on the Titanic. Although the agency may well face a tall task down the road in proving its allegations, the Court believes that it has now cleared the pleading bar and may proceed to discovery. That holding flows from several conclusions. First, the FTC has now alleged enough facts to plausibly establish that Facebook exercises monopoly power in the market for PSN services. Second, it has adequately alleged that the company's dominant market share is protected by barriers to entry into that market. Third, the agency has also explained that Facebook not only possesses monopoly power, but that it has willfully maintained that power through anticompetitive conduct — specifically, the acquisitions of Instagram and WhatsApp. The Court will not, however, allow the allegations surrounding Facebook's interoperability policies (also known as the Platform policies) to move forward; they founder for the same fundamental reasons as explained before: Facebook abandoned the policies in 2018, and its last alleged enforcement was even further in the past.

Last, the company lets fly a new arrow this time around, urging dismissal on the independent basis that the FTC's vote authorizing **[**4]** the Amended Complaint was invalid because Chair Lina Khan's alleged prejudgment of Facebook's antitrust liability required her recusal. The Court believes that such contention misses its target, as Khan was acting in a prosecutorial capacity, as opposed to in a judicial role, in connection with the vote.

Ultimately, whether the FTC will be able to prove its case and prevail at summary judgment and trial is anyone's guess. The Court declines to engage in such speculation and simply concludes that at this motion-to-dismiss stage, where the FTC's allegations are treated as true, the agency **[*41]** has stated a plausible claim for relief under *Section 2* of the Sherman Act. The Court, consequently, will deny Facebook's Motion.

Table of Contents

I. Background

In its prior Opinions in this case and in a parallel antitrust suit filed by a number of States, the Court described in detail the background of social networking, **[**5]** Facebook Blue — *i.e.*, the product that "its millions of users think of when they think of 'Facebook,'" — the company's acquisitions of Instagram and WhatsApp, and the history of Facebook Platform and the company's interoperability policies. See *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *2-6*; *New York v. Facebook, Inc. (New York), No. 20-3589, 549 F. Supp. 3d 6, 2021 WL 2643724, at *2-6 (D.D.C. June 28, 2021)*. The Court will spare the reader another factual recitation here and will instead confine this brief background section to the case's procedural history. As the critical question in this Motion is whether the FTC's new allegations have filled the holes in its previous Complaint, that will be the focus of the Court's analysis below.

The FTC filed this action on December 9, 2020, asserting one count of monopoly maintenance under *Section 2 of the Sherman Act*. See ECF No. 3 (Redacted Complaint), ¶¶ 169-74. The suit was filed after three of the FTC's five Commissioners voted to authorize it. See FTC, FTC Sues Facebook for Illegal Monopolization (Dec. 9, 2020), https://bit.ly/30Q3I8Y. Chair Khan was not yet a Commissioner at the time. Id. As noted in the Court's previous Opinions, although this FTC suit was initially assigned to Judge Christopher R. Cooper of this district, he reassigned it to this Court, which was handling the earlier-filed and related State case. See *Facebook, 560 F. Supp. 3d 1, 2021*

U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *7; **[**6]** see also No. 20-3590, Minute Order of Jan. 12, 2021. Facebook subsequently moved to dismiss both cases. While the Court granted the dismissal of the States' entire case, New York, 549 F. Supp. 3d 6, 2021 WL 2643724, at *29, here it dismissed only the Complaint, "leaving the agency the chance to replead if it believes it can successfully remedy the infirmities described" in the Court's Opinion. Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *7.

Despite a change in leadership since the lawsuit was initially filed, the FTC took the Court up on its offer, filing an Amended Complaint in August 2021. See ECF No. 76 (Amended Complaint filed under seal); ECF No. 82 (Redacted Am. Compl.). (In this Opinion, the Court cites a copy of the Amended Complaint that has minor redactions to protect confidential business information.) As with the initial Complaint, three of the five Commissioners voted to authorize the updated filing. See FTC, **[*42]** FTC Alleges Facebook Resorted to Illegal Buy-or-Bury Scheme to Crush Competition After String of Failed Attempts to Innovate (Aug. 19, 2021), https://bit.ly/3q8Ku76. This time around, however, Chair Khan — who was appointed earlier in 2021 — was one of those three. Id.; see also ECF No. 83-1 (Motion to Dismiss) at 5.

The Amended Complaint again alleges unlawful monopoly **[**7]** maintenance under Section 2 of the Sherman Act, although it now lists two counts. See Redacted Am. Compl., ¶¶ 230-42. The allegations in the second count incorporate those in the first, while also alleging additional conduct. Specifically, Count I alleges that "Facebook has willfully maintained its monopoly power through its course of anticompetitive conduct consisting of its anticompetitive acquisitions." Id., ¶ 232. Count II, meanwhile, alleges that "Facebook has willfully maintained its monopoly power through its course of conduct that includes both anticompetitive acquisitions and . . . maintaining and enforcing anticompetitive agreements relating to Facebook Platform to deter competitive threats to its personal social networking monopoly." Id., ¶ 238 (emphasis added). Plaintiff again invokes Section 13(b) of the FTC Act, id., ¶ 243, which authorizes the agency to seek an injunction against an entity that "is violating" or "is about to violate" the antitrust laws. See 15 U.S.C. § 53(b). The Government hopes to procure an injunction aimed at preventing the allegedly unlawful conduct in the future, as well as an order mandating "divestiture of assets, divestiture or reconstruction of businesses (including, but not limited to, Instagram and/or **[**8]** WhatsApp), and such other relief sufficient to restore the competition that would exist absent the conduct alleged in the Complaint." Redacted Am. Compl. at 79.

Believing the FTC's recent effort as flawed as its predecessor, Facebook has now moved to dismiss the Amended Complaint.

II. Legal Standard

Facebook relies on Federal Rule of Civil Procedure 12(b)(6), which permits dismissal of a complaint where it fails to state a claim upon which relief can be granted. See MTD at 6. ***HN1***[] In evaluating such a motion to dismiss, courts must "treat the complaint's factual allegations as true . . . and must grant plaintiff 'the benefit of all inferences that can be derived from the facts alleged.'" Sparrow v. United Air Lines, Inc., 216 F.3d 1111, 1113, 342 U.S. App. D.C. 268 (D.C. Cir. 2000) (quoting Schuler v. United States, 617 F.2d 605, 608, 199 U.S. App. D.C. 23 (D.C. Cir. 1979)). Although "detailed factual allegations" are not necessary to withstand a Rule 12(b)(6) motion, Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007), "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face,'" Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (quoting Twombly, 550 U.S. at 570) — that is, the facts alleged in the complaint "must be enough to raise a right to relief above the speculative level." Twombly, 550 U.S. at 555. The court need not accept as true, then, "a legal conclusion couched as a factual allegation," Trudeau v. FTC, 456 F.3d 178, 193, 372 U.S. App. D.C. 335 (D.C. Cir. 2006) (quoting Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)), nor "inferences . . . unsupported by the facts set out in the complaint." Id. (quoting **[**9]** Kowal v. MCI Commc'ns Corp., 16 F.3d 1271, 1276 (D.C. Cir. 1994)). And it may consider not only "the facts alleged in the complaint," but also "any documents either attached to or incorporated in the complaint[,] and matters of which [courts] may **[*43]** take judicial notice." Equal Emp't Opportunity Comm'n v. St. Francis Xavier Parochial Sch., 117 F.3d 621, 624, 326 U.S. App. D.C. 67 (D.C. Cir. 1997).

III. Analysis

HN2[] As set forth in the Court's prior Opinion, the offense of monopoly maintenance under *Section 2* of the Sherman Act "has two elements: '(1) the possession of monopoly power in the relevant market and (2) the willful . . . maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.'" *United States v. Microsoft Corp., 253 F.3d 34, 50, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (*en banc*) (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*); see *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *7*. Facebook seeks dismissal on the ground that the FTC has not adequately pleaded either of those prerequisites. Specifically, Defendant contends that, as before, the Commission has not alleged facts plausibly establishing monopoly power, see MTD at 6-20, and that the agency has also not adequately alleged legally cognizable exclusionary conduct. Id. at 20-38. Separately, Facebook also urges the Court to conclude that the FTC's vote purporting to authorize the Amended Complaint was invalid because of Chair Khan's biased participation. Id. at 38-45. The Court examines each of those arguments in turn. **[**10]**

A. Monopoly Power

Consider first the threshold inquiry of a monopoly-maintenance claim: has the FTC plausibly alleged that Facebook has monopoly power in a relevant market? ***HN3***[] "The Supreme Court defines monopoly power as 'the power to control prices or exclude competition.'" *Microsoft, 253 F.3d at 51* (quoting *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*). In other words, "a firm is a monopolist if it can profitably raise prices substantially above the competitive level." Id. (citations omitted). If a plaintiff can supply direct proof that a "firm has in fact profitably done so, the existence of monopoly power is clear." Id. (citations omitted). Because such "direct proof" is "rarely available," however, plaintiffs and courts "more typically examine market structure in search of circumstantial evidence of monopoly power." Id. In such a case, courts may infer monopoly power from "a firm's possession of a dominant share of a relevant market." Id.; see *Toys "R" Us, Inc. v. FTC, 221 F.3d 928, 937 (7th Cir. 2000)* (market power can be proven "through direct evidence of anticompetitive effects" or, "more conventional[ly]," "by proving relevant product and geographic markets and by showing that the defendant's share exceeds [some] threshold"); *S. Pac. Commc'ns Co. v. Am. Tel. & Tel. Co., 740 F.2d 980, 1000 (D.C. Cir. 1984)* ("[C]ourts frequently approach the problem of measuring market power by defining **[**11]** the relevant product and geographic market and computing the defendant's market share. Monopoly power is then ordinarily inferred from a predominant share of the market.").

HN4[] Because "[m]arket power is meaningful only if it is durable," a plaintiff proceeding by the indirect method must also show that the firm's dominant share of the relevant market is protected by "barriers to entry" into the market. See *Lenox MacLaren Surgical Corp. v. Medtronic, Inc., 762 F.3d 1114, 1123-25 (10th Cir. 2014)*; *Microsoft, 253 F.3d at 51*. "'Entry barriers' are factors . . . that prevent new rivals from timely responding to an increase in price above the competitive **[*44]** level." *Microsoft, 253 F.3d at 51*; see *S. Pac. Commc'ns Co., 740 F.2d at 1001-02*.

In its Opposition, the FTC contends that it has alleged both indirect and direct evidence of Facebook's monopoly power, although it devotes far more attention to the indirect-proof argument. See ECF No. 85 (Redacted FTC Opposition) at 4-15. Because the Court concludes that the FTC has adequately alleged indirect evidence of such monopoly power, it need not separately address whether this is the rare case in which the agency has also pleaded direct evidence. ***HN5***[] The indirect framework first requires the plaintiff to "establish[] the relevant market" in which the defendant firm allegedly has monopoly power. See *Sky Angel U.S., LLC v. Nat'l Cable Satellite Corp., 947 F. Supp. 2d 88, 102 (D.D.C. 2013)* (quoting *Neumann v. Reinforced Earth Co., 786 F.2d 424, 429, 252 U.S. App. D.C. 11 (D.C. Cir. 1986)*). If the plaintiff succeeds **[**12]** at that stage, it must then adequately allege that the defendant has a dominant share of that market, and that its dominance is protected by barriers to entry. Id; see, e.g., *FTC v. AbbVie Inc., 976 F.3d 327, 373-74 (3d Cir. 2020)* (above 60% market share sufficient); *Image Tech. Servs. v. Eastman Kodak Co., 125 F.3d 1195, 1206 (9th Cir. 1997)* ("Courts generally require a 65% market share to establish a prima facie case of market power.").

1. *Market Definition*

HN6[] As the Court explained in its previous Opinion, even though the definition of a relevant antitrust market is typically a "factual" rather than a "legal" inquiry, certain "legal principles" nevertheless govern. *Newcal Indus., Inc. v. Ikon Off. Sol., 513 F.3d 1038, 1045 (9th Cir. 2008)*; see *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *9*. It is well established, for instance, that an antitrust market includes "two components: the product market and the geographic market." *Sky Angel, 947 F. Supp. 2d at 102*. "A 'relevant product market' is a term of art in antitrust analysis," *United States v. H & R Block, Inc., 833 F. Supp. 2d 36, 50 (D.D.C. 2011)*, and the Circuit has defined it as including "all products reasonably interchangeable by consumers for the same purposes." *Microsoft, 253 F.3d at 52* (internal quotation marks and citation omitted). "Because the ability of consumers to turn to other suppliers restrains a firm from raising prices above the competitive level," *id at 51* (internal citation omitted), the analysis of market power uses as its denominator all products "roughly equivalent to another for the use to **[**13]** which [they are] put." *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 437 (3d Cir. 1997)* (citation omitted). "In other words, courts look at whether two products can be used for the same purpose, and, if so, whether and to what extent purchasers are willing to substitute one for the other." *H & R Block, 833 F. Supp. 2d at 51* (internal quotation marks and citation omitted).

The Court found in its prior Opinion that the FTC had plausibly established a relevant antitrust market. *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *9-11*. The FTC alleges the same market in its Amended Complaint, and Defendant does not object to that market definition here. See Redacted Am. Compl., ¶¶ 165-80; Redacted FTC Opp. at 3 ("The Court has already determined, correctly, that the FTC has adequately pleaded a relevant antitrust market for PSN services in the United States."); MTD at 6-13 (noting Court's prior market definition without objection, while arguing that FTC still has not alleged dominant share of that market). The Court will briefly recount the relevant findings of its previous Opinion on market definition, as that **[*45]** will help frame the question of whether the FTC has sufficiently alleged that Facebook has a dominant share of such market.

Unlike a relatively obvious market for, say, tires or doughnuts, the relevant market here is considerably more **[**14]** nuanced. The Court previously endorsed the agency's definition of the market for PSN services in the United States as consisting of "online services that enable and are used by people to maintain personal relationships and share experiences with friends, family, and other personal connections in a shared social space." *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *10* (quoting Redacted Compl., ¶ 52). Such PSN services are "defined, and distinguished from other services, by their having '[t]hree key elements.'" Id. (quoting Redacted Compl., ¶ 52). "First, [they] are built on a social graph that maps the connections between users and their friends, family, and other personal connections." Redacted Compl., ¶ 53. "Second, [they] include features that many users regularly employ to interact with personal connections and share their personal experiences in a shared [virtual] social space, including in a one-to-many 'broadcast' format." Id., ¶ 54. And "'[t]hird, [they] include features that allow users to find and connect with other users, to make it easier for each user to build and expand their set of personal connections. The social graph also supports this feature by informing [the user] which [new] connections' might be available based **[**15]** on her existing network." *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *10* (quoting Redacted Compl., ¶ 55). Here, the Amended Complaint provides an essentially identical definition of PSN services. See Redacted Am. Compl., ¶¶ 166-69.

Having approved the FTC's definition of PSN services, the Court's previous Opinion then turned to the agency's allegation that certain other well-known "types of internet services" are not "adequate substitutes." *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *10* (quoting Redacted Compl., ¶ 57). The Commission put forth a number of reasons why other technology services — such as LinkedIn, YouTube, Spotify, and Netflix — do not qualify. For instance, it alleged that "'specialized social networking services' that 'focus on professional . . . connections' (*e.g.*, LinkedIn) are not substitutes because they are designed for and used primarily by professionals for sharing professional content," as opposed to PSN's design and primary use of "maintain[ing] personal relationships and shar[ing] experiences with friends, family, and other personal connections." Id. (quoting Redacted Compl., ¶¶ 52, 58). The Amended Complaint provides substantially similar allegations here, while acknowledging other players in the PSN market, "including Snapchat, Google+, Myspace, **[**16]** Path, MeWe, Orkut, and Friendster." Redacted Am. Compl., ¶¶ 171-77, 200.

In its first Opinion, the Court concluded that "[w]hile there are certainly bones that one could pick with the FTC's market-definition allegations, the Court does not find them fatally devoid of meat." *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *10*. It rejected, for example, Facebook's contentions that the market definition "contains an internal contradiction," and that the FTC "neglected to allege any facts regarding the cross-elasticity of demand between [PSN services] and [potential] substitutes for it." *560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, [WL] at *10-11* (internal quotation marks and citations omitted). Notably, the Court parried Defendant's argument "that the Complaint impermissibly distinguishes PSN services from other possible substitutes based on their primar[y] uses." *560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, [WL] at *11* (internal quotation marks and citations omitted). ***HN7***[] As the Court explained, the question **[*46]** of appropriate substitutes "looks to both 'whether two products can be used for the same purpose, and, if so, whether and to what extent purchasers are willing to substitute one for the other.'" Id (quoting *H & R Block, 833 F. Supp. 2d at 51*) (emphasis added); see also *United States v. Aetna Inc., 240 F. Supp. 3d 1, 19 (D.D.C. 2017)*. In sum, although "the agency certainly could have provided more on that front, the fact that other services are **[**17]** not primarily used for the sort of personal sharing that is the hallmark of a PSN service seems a plausible reason why little switching would occur." Id.

Given that the Amended Complaint provides an essentially identical definition of the relevant market, see Redacted Am. Compl., ¶¶ 166-69, and that Facebook lodges no objection to the Court's prior finding, the Court sees no reason to revisit its earlier analysis and conclusion. See MTD at 6-13; Redacted FTC Opp. at 3. The Amended Complaint's allegations thus do enough to make out a plausible market for PSN services. See Redacted Am. Compl., ¶¶ 165-80.

2. *Market Share*

With the market defined, the Court now addresses what has thus far been the FTC's Achilles' heel: sufficiently alleging Facebook's market dominance. In the last go-round, the Commission alleged "only that Facebook has 'maintained a dominant share of the U.S. personal social networking market (in excess of 60%)' since 2011, and that 'no other social network of comparable scale exists in the United States.'" *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *12* (quoting Redacted Compl., ¶¶ 3, 64). The Court concluded that such bare allegations — "which do not even provide an estimated actual figure or range for Facebook's market **[**18]** share at any point over the past ten years — ultimately fall short of plausibly establishing that Facebook holds market power." Id. Because it was conceivable "that the agency may be able to 'cure [these] deficiencies' by repleading," however, the Court dismissed the Complaint without prejudice, leaving Plaintiff "free to amend [its] pleading and continue the litigation." *560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, [WL] at *14* (quoting *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*; *Ciralsky v. CIA, 355 F.3d 661, 666, 359 U.S. App. D.C. 366 (D.C. Cir. 2004)*).

The FTC has now done precisely that, adding substantial new allegations about the contours of Facebook's market share. Most notably, the Amended Complaint alleges far more detailed facts to support its claim that "Facebook has today, and has maintained since 2011, a dominant share of the relevant market for U.S. personal social networking services." Redacted Am. Compl., ¶ 190. Specifically, the Amended Complaint includes allegations regarding Facebook's market share of daily average users (DAUs) and monthly average users (MAUs) of PSN services in the United States, as well as its share of users' average time spent on PSN services. Id. For instance, the FTC alleges that, "[b]ased on an analysis of data maintained by Comscore, a commercially-available data source," "Facebook's share of DAUs of apps providing **[**19]** personal social networking services in the United States has exceeded 70% since 2016 and was at least as high in 2011." Redacted Am. Compl., ¶¶ 182, 200. Indeed, the Amended Complaint alleges that, from "September 2016 through December 2020, Facebook's share of DAUs among apps providing personal social networking services in the United States averaged 80% per month for smartphones, 86% per month in tablets, and 98% per month for desktop computers, and that Facebook's share of DAUs has not dropped below 70% in any month on any device-type." Id., ¶ 200(a). "The combined **[*47]** shares of other [PSN] providers," meanwhile — which the FTC identifies as "including Snapchat, Google+, Myspace, Path, MeWe, Orkut, and Friendster" — "did not exceed 30% on any device type during any month in this period." Id.

The agency's allegations concerning MAUs tell the same story. Again relying on Comscore data, the FTC alleges that "Facebook's share of MAUs of apps providing personal social networking services in the United States has exceeded 65% since 2012 and was at least as high in 2011." Id., ¶ 201. Similarly, the "combined shares of other providers . . . did not exceed 32% on either device type, mobile or **[**20]** desktop, in any month during" the period of September 2012 to December 2020. Id., ¶ 201(a). Plaintiff's allegations concerning "Facebook's share of the time spent by users of apps providing personal social networking services in the United States" are also in accord with the DAU and MAU data. In fact, the FTC alleges that Facebook's share of users' time spent on such services "has exceeded 80% since 2012 and was at least as high in 2011." Id., ¶ 199.

The Amended Complaint also adequately alleges that the three metrics offered to measure market share — DAUs, MAUs, and time spent — are appropriate indicators. The FTC explains, consistent with common sense, that "a personal social networking service's attractiveness to users, and therefore its competitive significance, is related to its number of users and to how intensively its users engage with the service." Id., ¶ 192. Significantly, the Amended Complaint alleges that Facebook itself uses these metrics to assess its performance, as well as that of rival PSN services. Indeed, "in the ordinary course of business, Facebook's executives and investors, rival personal social networking providers, and industry observers have assessed the performance **[**21]** of Facebook Blue, Instagram, and other personal social networking providers using measures of active user base and how much people use the services—with DAUs, MAUs, and the amount time spent by users on the service being common units of measure." Id., ¶ 193. For instance, "Facebook's internal presentations assessing the performance of Facebook Blue and Instagram focus on time spent per month, MAUs, and DAUs," and the company "relies on these same metrics to assess its rivals' competitive significance." Id., ¶ 194.

The FTC similarly alleges that other firms offering PSN services cite these metrics. Snapchat, for example, regularly compares its performance with that of "Instagram by observing the firms' MAUs, DAUs, and time spent" metrics. Id., ¶ 195. Relatedly, the FTC also alleges that "[c]ommercial data sources track the usage of online services within the United States" using metrics such as "MAUs, DAUs, and time spent." Id., ¶ 196.

Considering these new allegations and granting Plaintiff "the benefit of all inferences that can be derived from the facts alleged," *Sparrow, 216 F.3d at 1113* (internal citation omitted), means that the Amended Complaint "contain[s] sufficient factual matter, accepted as true, **[**22]** to 'state a claim to relief that is plausible on its face.'" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 570*). In stark contrast with its predecessor, this Complaint provides reinforcing, specific allegations that all point toward the same conclusion: Facebook has maintained a dominant market share during the relevant time period. Accepting the market definition (which Defendant does) and the truth of Plaintiff's market-share allegations (which the Court must at this stage), Facebook's market share comfortably exceeds the levels that courts ordinarily find sufficient to establish monopoly **[*48]** power. See, e.g., *AbbVie Inc., 976 F.3d at 373* (above 60% market share sufficient); *Eastman Kodak Co., 125 F.3d at 1206* ("***HN8***[] Courts generally require a 65% market share to establish a prima facie case of market power."); *2301 M Cinema LLC v. Silver Cinemas Acquisition Co., 342 F. Supp. 3d 126, 140 (D.D.C. 2018)*.

Not prepared to throw in the towel, Defendant offers several rejoinders, none of which is persuasive at this stage. First, it contends that the Comscore data on which the FTC relies "itself warns against reliance on this data, disclaiming responsibility for its 'accuracy or completeness.'" MTD at 7-8 (quoting Redacted Am. Compl., ¶ 182 n.1). Such an attack on the reliability of the underlying data, however, is inapposite at the motion-to-dismiss stage. Facebook will be given ample **[**23]** opportunity to advance such arguments down the line, perhaps in a potential "battle of the experts." At this juncture, however, the Court "must treat the complaint's factual allegations as true." *Sparrow, 216 F.3d at 1113* (internal quotation marks and citation omitted). It thus has no basis now to scrutinize the reliability of the data relied on by the FTC.

Second, Defendant also assails the significance of data concerning time spent on PSN services. Specifically, it contends that such data "does not track PSNS usage; it instead tracks users of online services and total time spent on those services (PSNS and non-PSNS alike)." MTD at 7. Here, Facebook gains more traction, though its argument does not ultimately carry the day. It is correct, as the Court previously acknowledged, that data measuring the amount of time users spend on Facebook (and on other PSN service providers) likely captures time not spent engaging with a PSN service — *e.g.*, watching a movie trailer embedded on the official page of the movie — given how the FTC defined the market. *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627,* at *13 ("[A]t least some of the features offered by a Facebook or Instagram or Path are not, seemingly, part of those firms' PSN-services offerings as defined by the FTC; **[**24]** time spent on those apps or websites, accordingly, is not necessarily time spent on a PSN service."). But that does not mean that the metric tells the Court nothing about Facebook's market share, as the company suggests. See MTD at 7-10. The Amended Complaint alleges, for instance, that Facebook Blue and Instagram "are predominantly used as personal social networking services." Redacted Am. Compl., ¶ 202. Indeed, the FTC states that Facebook itself recognizes that Facebook Blue provides "personal social networking services, and that personal social networking services are the predominant value and use of Facebook Blue to users." Id., ¶ 178 (emphasis added). Numerous statements from Facebook CEO Mark Zuckerberg fortify the premise that the company understands Facebook Blue and Instagram to be focused on delivering PSN services. See, e.g., id., ¶¶ 177-79, 202.

While Defendant is correct that data capturing time spent on platforms providing PSN services includes more than time spent just using such services, that imperfection is not fatal at this stage. ***HN9***[] As courts in this district have recognized, "[P]laintiffs 'need not present market shares . . . estimates with the precision of a NASA **[**25]** scientist. The closest available approximation often will do.'" *United States v. Anthem, Inc., 236 F. Supp. 3d 171, 207 (D.D.C. 2017)* (quoting *FTC v. Sysco Corp., 113 F. Supp. 3d 1, 54 (D.D.C. 2015)*) (internal quotation marks and citation omitted); see *H & R Block, Inc., 833 F. Supp. 2d at 72* (citation omitted) ("A reliable, reasonable, close approximation of relevant market share data is sufficient."). Here, moreover, Plaintiff is not relying solely on the time-spent data — which **[*49]** indicates a market share well over the necessary threshold — but instead supports that allegation with MAU and DAU metrics that reinforce the same conclusion. See *Twombly, 550 U.S. at 563* ("[O]nce a claim has been stated adequately, it may be supported by showing any set of facts consistent with the allegations in the complaint."). In light of those allegations, it would be improper to dismiss the FTC's Amended Complaint just because it does not have perfect data (which may not exist) about precisely what percentage of users' time spent on Facebook Blue and Instagram includes interacting with friends, family, and other personal contacts, as opposed to engaging in activity — such as passively viewing a music video — that falls outside of the market definition. See, e.g., *United States v. Bazaarvoice, Inc., No. 13-133, 2014 U.S. Dist. LEXIS 3284, 2014 WL 203966, at *32 (N.D. Cal. Jan. 8, 2014)* ("The data that exist regarding this market are imperfect, in part because the market is relatively new. But that does not **[**26]** mean that one should ignore the existing data or the market realities. For example, there is no real dispute that the overwhelming majority of [Defendant's] business came from [Ratings and Reviews platforms (R & R)], so to complain that [the Government's expert] did not distinguish between revenue from R & R and other [of] the parties' other offerings that complement R & R is unconvincing.").

Facebook's third central counterargument focuses on the FTC's use of MAU and DAU figures. See MTD at 12. Defendant posits that those metrics "cannot plausibly be used to calculate relative market share, both because the same individuals may (and often do) use more than one service and, more fundamentally, because the mere fact that an individual uses a service says nothing about how much time (if any) that person spends consuming PSNS on that service." Id. Not so. With regard to the first point, the FTC indicates that a single user's consumption of services from multiple providers is reflected in the MAU and DAU metrics. See Redacted FTC Opp. at 8. In other words, if one person used both Instagram and Snapchat on the same day, both uses would be included in the denominator to determine the total **[**27]** shares in the market for PSN services. Id. As for Facebook's contention that MAU and DAU figures do not account for intensity of use of PSN services, that argument merely underscores the utility of looking to time-spent data as well and considering the three metrics holistically. Indeed, while each metric captures consumption of PSN services on somewhat different terms, that reality may in fact strengthen the FTC's case because each measurement paints the same picture: Facebook has maintained a dominant market share during the relevant time period. In any event, to the extent that DAUs and MAUs do not fully capture consumers' intensity of use, the Amended Complaint alleges that Facebook's share of the relevant market actually increases when one looks to time-spent data, which accounts for intensity of use within a day or month. See Redacted Am. Compl., ¶¶ 199-201.

In short, the FTC has done its homework this time around and has put forth detailed factual allegations that "raise a right to relief above the speculative level, on the assumption that all the allegations in the complaint are true." *Twombly, 550 U.S. at 555* (citations omitted). To allege market dominance, the agency used multiple metrics designed **[**28]** to capture output or consumption — "the usual measure of a market and of the shares within it."

Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***, vol. IIB, ¶ 535, at 308 (5th ed. 2021). Each of those metrics buttresses one another and demonstrates a market share that courts **[*50]** typically find significant enough to infer monopoly power. And the Amended Complaint extensively alleges that the metrics are regularly used by Facebook, its competitors, and relevant data collectors to assess market power. While Defendant may ultimately be able to disprove these allegations as litigation continues, that issue is not before the Court today. Rather, it suffices to conclude that the FTC has plausibly alleged that Facebook maintained a dominant share of the U.S. personal-social-networking market since 2011.

3. *Barriers to Entry*

As the prior Opinion in this case concluded that the Commission had fallen short on its market-share allegations, the Court did not "address the issue of whether the FTC has sufficiently alleged entry barriers." *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *12*. Because the agency has now plausibly alleged such a market share, the Court must take on the issue.

HN10[] As explained above, a plaintiff proceeding under the indirect **[**29]** method of proof who has alleged a dominant market share must also allege that the defendant's "possession of a dominant share of a relevant market [] is protected by entry barriers." *Microsoft, 253 F.3d at 51*. "Because market share is just a way of estimating market power, which is the ultimate consideration, easy entry and the absence of barriers matter even though the defendant has a large market share." Areeda & Hovenkamp, ¶ 420, at 78 (internal quotation marks and citations omitted). "For antitrust purposes, a barrier to entry is best defined as any factor that permits firms already in the market to earn returns above the competitive level while deterring outsiders from entering." Id., ¶ 420, at 77; see *Microsoft, 253 F.3d at 51* ("'Entry barriers' are factors . . . that prevent new rivals from timely responding to an increase in price above the competitive level.").

The FTC alleges that "Facebook's dominant position in the U.S. personal social networking market is durable due to significant entry barriers, including direct network effects and high switching costs." Redacted Am. Compl., ¶ 212. The Court concludes that such allegations, set forth in more detail below, are sufficient at this stage.

Start with network effects. A leading antitrust treatise explains, ***HN11***[] "For purposes of **[**30]** analyzing barriers to entry, a network effect is a feature that makes a network more valuable as the number of users increases." Areeda & Hovenkamp, ¶ 421h, at 95. A telephone system, for example, is traditionally "more valuable as it has more subscribers, thus enabling more people to communicate with one another." Id. Here, the FTC advances a modern variation on that well-established barrier to entry. It alleges that "because a core purpose of personal social networking is to connect and engage with personal connections, it is very difficult for a new entrant to displace an established personal social network in which users' friends and family already participate." Redacted Am. Compl., ¶ 212. In other words, why would new users go to a social space that does not include their important contacts?

The Amended Complaint also alleges that "[i]n addition to facing these network effects, a potential entrant in personal social networking services would also have to overcome the high switching costs faced by users." Id., ¶ 213. It explains: "Over time, users of Facebook's and other personal social networks build more connections and develop a history of posts and shared experiences, which they cannot easily transfer to another **[**31]** personal social networking provider." Id. Indeed, these "switching costs can increase over time" as **[*51]** a "user's collection of content and connections, and investment of effort in building each, continually builds with use of the service." Id.

It is at least plausible that these twin doctrines pose barriers to entry in the market for PSN services. Off the bat, there can be little doubt that network effects and switching costs are commonly recognized types of barriers to entry — a proposition that Facebook does not meaningfully contest. See ECF No. 87 (Reply) at 9-12; see also, e.g., *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 476-77, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (discussing switching costs); *Microsoft, 253 F.3d at 55-56* (discussing network effects); Areeda & Hovenkamp, ¶ 421h. Against that backdrop, the FTC has supported its claims with ample allegations in the Amended Complaint. For example, that Defendant itself "recognized the significant advantage Facebook enjoyed due to these structural barriers." Redacted Am. Compl., ¶ 212. Indeed, a Facebook executive expressed the sentiment as follows: "Why are we hard to compete with[?] Your friends are here. You have made a big investment in your Facebook network and identity." Id. Zuckerberg, furthermore, stated about the company's network effects, "Perhaps the most valuable **[**32]** thing about Facebook is that it is by far the world's most comprehensive directory of people and their connections[, which is] a huge structural advantage." Id.

The Amended Complaint also alleges the same with regard to switching costs. It states that Facebook executives recognized that "one of the most important ways we can make switching costs very high for users - if we are where all users' photos reside[, it] will be very tough for a user to switch if they can't take those photos and associated data/comments with them." Id., ¶ 216. The FTC also notes that "these switching costs can increase over time — a 'ratchet effect' — as each user's collection of content and connections, and investment of effort in building each, continually builds with use of the service." Id., ¶ 213. Finally, it alleges that Facebook was also well aware of this dynamic, with "a Facebook ordinary course document not[ing] that there are 'many lines of evidence for a substantial ratchet effect' and that ratchet effects 'can confer [a] permanent advantage.'" Id.

Taken together, those allegations are sufficient at this early stage in the ligation. While this case involves a novel market, it is at least plausible **[**33]** that Facebook's network effects and the high cost of switching away prevent new rivals from entering that market. In short, the Amended Complaint's allegations concerning barriers to entry are "enough to raise a right to relief above the speculative level." *Twombly, 550 U.S. at 555*.

Facebook resists this conclusion, insisting that the FTC has "pleaded itself out of court" by alleging that "other service providers with substantial networks could add PSNS offerings along with other services." MTD at 13. In other words, Defendant contends that there cannot be significant entry barriers because a "non-PSNS can add PSNS features after establishing a network outside the PSNS market." Reply at 10. But the FTC's allegation about the growth of non-PSN services does not necessarily contradict the existence of entry barriers into the market for PSN services. Indeed, the Amended Complaint describes how "well-known, sophisticated, and well-financed firms" such as Google "also tried but failed to successfully enter the U.S. personal social networking market" and how Facebook's market power has nonetheless endured for years. See Redacted Am. Compl., ¶ 187. The Amended Complaint further alleges that Zuckerberg **[*52]** himself recognized, **[**34]** "[T]here are network effects around social products and a finite number of different social mechanics to invent." Redacted Am. Compl., ¶ 66. In addition, while Defendant's prediction about non-PSN services' ability to grow before eventually adding PSN services may ultimately be vindicated, at this stage the Court is required to "grant [P]laintiff 'the benefit of all inferences that can be derived from the facts alleged.'" *Sparrow, 216 F.3d at 1113* (quoting *Schuler, 617 F.2d at 608*). To accept Facebook's theory about barriers to entry would require the Court to do the inverse and all but ignore the FTC's well-pleaded allegations about network effects and switching costs. The Court declines Defendant's invitation, while noting that Facebook is of course free to pursue the theory as the litigation progresses.

B. Anticompetitive Conduct

HN12[] Possessing monopoly power in the relevant market is not enough, however. The Court now turns to the second element of a *Section 2* claim: has the FTC sufficiently alleged the "willful . . . maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident"? *Microsoft, 253 F.3d at 50* (quoting *Grinnell, 384 U.S. at 570-71*). Count I alleges that Facebook engaged in anticompetitive conduct **[**35]** by acquiring firms such as Instagram and WhatsApp. Count II, meanwhile, alleges that those acquisitions, together with Defendant's agreements and practices related to Facebook Platform — *i.e.*, the company's "set of tools that allowed software developers to create interoperability between their products and Facebook Blue," *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *5* — constitute a course of anticompetitive conduct. The Court thus considers whether the FTC has satisfied the second element of its monopoly-maintenance claim with respect to each of the two counts.

1. *Count I*

a. Legal Framework

HN13[] "[H]aving a monopoly does not by itself violate *§ 2*." *Microsoft 253 F.3d at 58*. The Supreme Court has explained that the "mere possession of monopoly power, and the concomitant charging of monopoly prices, is not only not unlawful; it is an important element of the free-market system . . . . To safeguard the incentive to innovate, the possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive conduct." *Verizon Commc'ns Inc. v. L. Offs. of Curtis V. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. "Whether any particular act of a monopolist is exclusionary, rather than merely a form of vigorous competition," however, "can be difficult to discern: the means of illicit exclusion, like the means of legitimate competition, **[**36]** are myriad." *Microsoft 253 F.3d at 58*. "The challenge for an antitrust court," therefore, "lies in stating a general rule for distinguishing between exclusionary acts, which reduce social welfare, and competitive acts, which increase it." Id.

Addressing that challenge, the D.C. Circuit has articulated several principles that "emerge" from "a century of case law on monopolization under *§ 2*." Id. ***HN14***[] "First, to be condemned as exclusionary, a monopolist's act must have an 'anticompetitive effect.' That is, it must harm the competitive process and thereby harm consumers." Id. "Second, the plaintiff, on whom the burden of proof of course rests, must demonstrate that the monopolist's conduct indeed has the requisite anticompetitive effect." *Id. at 58-59* (internal citations omitted). "Third, if a plaintiff successfully **[*53]** establishes *a prima facie* case under *§ 2* by demonstrating anticompetitive effect, then the monopolist may proffer a 'procompetitive justification' for its conduct." *Id. at 59*. "Fourth, if the monopolist's procompetitive justification stands unrebutted, then the plaintiff must demonstrate that the anticompetitive harm of the conduct outweighs the procompetitive benefit." Id. Finally, "in considering whether the monopolist's conduct **[**37]** on balance harms competition and is therefore condemned as exclusionary for purposes of *§ 2*, [a court's] focus is upon the effect of that conduct, not upon the intent behind it. Evidence of the intent behind the conduct of a monopolist is relevant only to the extent it helps us understand the likely effect of the monopolist's conduct." Id.

b. Application

With those principles in mind, the Court examines whether Count I in the Amended Complaint — which focuses on Facebook's acquisitions of Instagram and WhatsApp — plausibly alleges legally cognizable anticompetitive conduct.

HN15[] As its last Opinion recognized, "It is well established that mergers may constitute one such 'means'" that tend to "'destroy competition itself' via 'means other than competition on the merits.'" *Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *22* (quoting *Microsoft, 253 F.3d at 58, 62*). Indeed, there is no shortage of authorities observing that "[h]istorically and today, merging viable competitors to create a monopoly is a clear *§ 2* offense." Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***, vol. III, ¶ 701a, at 200 (4th ed. 2015). ***HN16***[] Further, a monopolist's acquisition of "an actual or likely potential competitor is properly classified as anticompetitive, for it tends to augment or reinforce the **[**38]** monopoly by means other than competition on the merits." Id.; see also, e.g., *Grinnell, 384 U.S. at 576* (finding *Section 2* violation based in part on acquisitions of competitors); *BRFHH Shreveport, LLC v. Willis Knighton Med. Ctr., 176 F. Supp. 3d 606, 622 (W.D. La. 2016)* ("[A]cquisitions of viable competitors alone may establish the anticompetitive conduct element of a *section 2* claim."); *Behrend v. Comcast Corp., No. 03-6604, 2012 U.S. Dist. LEXIS 51889, 2012 WL 1231794, at *20 (E.D. Pa. Apr. 12, 2012)* (same).

Against that backdrop, the key question is whether the FTC has plausibly alleged that Facebook engaged in such anticompetitive conduct by acquiring actual or potential competitors, harming the competitive process, and thereby harming consumers. Before delving into that question, it is worth noting preliminarily that while the Amended Complaint references Facebook's acquisitions of companies other than Instagram and WhatsApp, the agency concedes that it does not allege that those acquisitions "each standing alone[] violated the antitrust laws. Instead, the allegations provide factual context for Facebook's anticompetitive course of conduct." Redacted FTC Opp. at 21 (emphasis omitted). The Court therefore focuses on the allegations with regard to the acquisitions of Instagram and WhatsApp.

Start with Instagram. The FTC alleges that it was long "a serious threat to Facebook's dominance," which led Defendant to "initially tr[y] **[**39]** to compete on the merits with mobile photo-sharing capabilities." Redacted Am. Compl., ¶¶ 80, 83. "As Instagram soared," however, "Facebook's leaders began to focus on the prospect of acquiring Instagram rather than competing with it." Id., ¶ 87. Indeed, Zuckerberg internally "repeatedly explained the case for acquisition in terms of Instagram's threat as a personal social networking competitor." Id., ¶ 89; see id., ¶¶ 87-92. According to the Amended Complaint, that **[*54]** sentiment was consistent with the "deeply rooted view within Facebook that, as Mr. Zuckerberg put it in a June 2008 internal email, 'it is better to buy than compete.'" Id., ¶ 64. Eventually in April 2012, Facebook announced that it had reached an agreement to acquire Instagram for $ 1 billion, the company's most expensive acquisition to date. Id., ¶ 95. The Amended Complaint also alleges that both internally and externally, commentators viewed the purchase as designed to neutralize a competitor. See, e.g., id., ¶¶ 95-104. "Less than two weeks after the acquisition was announced," moreover, "Zuckerberg suggested canceling or scaling back investment in Facebook's own mobile photo app as a direct result of the Instagram deal," **[**40]** which Facebook went on to do in the ensuing years. Id., ¶ 98.

The story is much the same with regard to WhatsApp. The Amended Complaint alleges that "[a]fter neutralizing the threat from Instagram, Facebook turned to what it considered 'the next biggest consumer risk' for Facebook Blue": WhatsApp, "the popular and widely used mobile message app." Id., ¶ 107. Although WhatsApp was not yet active in the personal-social-networking market, Facebook feared that once the app reached sufficient scale, it "could, by adding additional features and functionalities, enter the personal social networking market at competitive scale and undermine or displace Facebook Blue's personal social networking monopoly." Id., ¶ 108. In other words, Facebook viewed WhatsApp as a likely potential competitor. Id., ¶ 118 ("Facebook executives and employees repeatedly identified WhatsApp internally as a unique threat to Facebook Blue."). Once again, Facebook briefly attempted to compete with WhatsApp before "decid[ing] to acquire WhatsApp rather than compete with it, in an effort to neutralize a significant competitive threat to its personal social networking monopoly." Id., ¶ 120. Indeed, Zuckerberg wrote in 2012, **[**41]** "[I]'m the most worried about messaging. WhatsApp is already ahead of us in messaging in the same way Instagram was 'ahead' of us in photos . . . . I'd pay $ 1b for them if we could get them." Id. Ultimately, in February 2014, Facebook announced an agreement to buy WhatsApp for $ 19 billion. Id., ¶ 121.

Those facts sufficiently allege that Facebook acquired Instagram and WhatsApp in order to neutralize actual and likely future competitors. Although Defendant briefly contends that the FTC has not alleged the "objective likelihood that WhatsApp would be a significant PSNS rival" and that there may in fact have been "little actual overlap" between Instagram and Facebook Blue, see MTD at 24, the question at this stage is merely whether the agency has plausibly alleged that Instagram and WhatsApp were actual or potential competitors. See Areeda & Hovenkamp, ¶ 701a, at 200 (4th ed. 2015). The Amended Complaint has plainly done so, as evidenced by the above allegations, as well as by numerous others put forth by the FTC and not expressly recited above. See Redacted Am. Compl., ¶¶ 80-129. In fact, Facebook drops this argument in its Reply, see Reply at 14-19, implying a lack of faith. See, **[**42]** e.g., *Wal-Mart Stores, Inc. v Sec'y of Labor, 406 F.3d 731, 736 n.*, 365 U.S. App. D.C. 395 (D.C. Cir. 2005)* (construing moving party's "silence in reply" brief as indication that party had "abandoned [its initial] argument"); *Hunter v. D.C. Child & Family Servs. Agency, 710 F. Supp. 2d 152, 157 (D.D.C. 2010)*.

Defendant finds slightly surer footing, however, in its contention that the FTC must allege some anticompetitive effect — that is, that the acquisitions "harm the competitive process and thereby harm consumers." *Microsoft, 253 F.3d at 58*. ***HN17***[] Facebook **[*55]** is correct inasmuch as the agency must allege harm to competition and consumers; "harm to one or more competitors will not suffice." Id. It is right, moreover, that the FTC has not, and could not, allege harm in the archetypal form of increased consumer prices, given that Facebook Blue, Instagram, and WhatsApp are all provided free of charge. See Reply at 17; see also *Microsoft, 253 F.3d at 51* ("[A] firm is a monopolist if it can profitably raise prices substantially above the competitive level."). Notwithstanding that unusual aspect of this antitrust suit, the FTC contends — and the Court ultimately agrees — that the Amended Complaint sufficiently alleges "harm to the competitive process and thereby harm [to] consumers." *Microsoft, 253 F.3d at 58*.

Setting aside price increases, the FTC does identify a host of other harms to the competitive process and to consumers of PSN services from the **[**43]** acquisitions. Namely, Plaintiff alleges a decrease in service quality, lack of innovation, decreased privacy and data protection, excessive advertisements and decreased choice and control with regard to ads, and a general lack of consumer choice in the market for such services. See Redacted Am. Compl., ¶¶ 218-24. Indeed, the FTC specifically alleges that the lack of "meaningful competition" has allowed Facebook to "provide lower levels of service quality on privacy and data protection than it would have to provide in a competitive market." Id., ¶ 222. Elsewhere the Amended Complaint alleges that, after acquiring Instagram and

WhatsApp, Facebook halted development of its own competing services and slowed innovation and promotion of the newly acquired products. Id., ¶¶ 98-105; 126-27. And the agency further contends that, in a competitive market, "[c]ompeting social networks may also have explored and developed alternative advertising models that consumers . . . could have preferred." Id., ¶ 226. In short, the FTC alleges that even though Facebook's acquisitions of Instagram and WhatsApp did not lead to higher prices, they did lead to poorer services and less choice for consumers.

c. **[**44]** Facebook's Counterarguments

Defendant resists the above conclusion, maintaining that the FTC is merely speculating about the harm to competition and consumers. At this stage, however, the Court inquires merely into whether Plaintiff's allegations, taken as true, state a plausible claim for relief. Here, they do, as the FTC has alleged that consumers had access to inferior products and less choice in the market for PSN services than they would have had in the absence of Facebook's acquisitions.

The Amended Complaint alleges, for example, that while WhatsApp "embraced privacy-focused offerings and design" before its acquisition, Facebook has provided lesser privacy and data protections since, which it could not have done in a competitive market. Id., ¶¶ 127, 221. It is certainly plausible, moreover, as the Amended Complaint alleges, that consumers would prefer services that offered fewer ads or different ad frameworks. Indeed, the advent of federal legislation addressing various privacy and advertising concerns related to consumer technology is consistent with the intuitive notion that consumers care about these issues and may prefer stronger protections in their PSN services. See, e.g. **[**45]** , *15 U.S.C. § 6101 et seq.* (Telemarketing and Consumer Fraud and Abuse Prevention Act); *15 U.S.C. § 7701 et seq.* (Controlling the Assault of Non-Solicited Pornography and Marketing Act); *47 U.S.C. § 227* (Telephone Consumer Protection Act). As for harm to consumer choice, Plaintiff's allegations that Facebook scaled down and eventually shuttered its own mobile-sharing app after acquiring Instagram is consistent **[*56]** with the assertion that consumers would have a better and broader market of services to choose from had the acquisition never occurred. See Redacted Am. Compl., ¶¶ 98, 102-04.

While the FTC has not yet proven the requisite anticompetitive effect, it is not required to do so at this stage. The Commission has alleged that the acquisitions at issue harmed competition and that "[w]ithout meaningful competition, Facebook has been able to provide lower levels of service quality . . . than it would have to provide in a competitive market." Redacted Am. Compl., ¶ 222. The agency will need to substantiate these allegations at later stages in the litigation — likely with expert testimony or statistical analysis — but lack of proof at this juncture does not equate to impermissible speculation, as Defendant contends. Relatedly, Facebook insists that there is no way to know how the market **[**46]** for PSN services would have developed but for its acquisitions. Yet that is also not a reason to draw the negative inference that Plaintiff's allegations must be false; rather, it reinforces the notion that the FTC down the road will have to prove its allegations about how the acquisitions affected market conditions and competition. Cf. *Microsoft, 253 F.3d at 79* ("[N]either plaintiffs nor the court can confidently reconstruct a product's hypothetical technological development in a world absent the defendant's exclusionary conduct. To some degree, the defendant is made to suffer the uncertain consequences of its own undesirable conduct.") (internal quotation marks and citation omitted).

Facebook's final critique on this issue involves the FTC's review of the acquisitions prior to their closing. As the Court's previous Opinion in this case explained:

> As required by the Hart-Scott-Rodino Act, *15 U.S.C. § 18a*, the FTC reviewed the acquisition [of Instagram] prior to closing to assess whether it posed anticompetitive concerns. Whereas most mergers are cleared quickly, in this instance the review took over four months. During that scrutiny, the agency took the rare step of "requir[ing] the submission [by the parties] of additional **[**47]** information or documentary material relevant to the proposed acquisition." *15 U.S.C. § 18a(e)(1)(A)*. Eventually, however, Facebook and Instagram satisfied the agency's concerns, and in August (over four months after the merger was announced), the Commission voted 5-0 to allow it to proceed without any challenge or conditions. See FTC, FTC Closes its Investigation into Facebook's Proposed Acquisition of Instagram Photo Sharing Program (Aug. 22, 2012), https://bit.ly/3bDa2mp.

Facebook, 560 F. Supp. 3d 1, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *4. Facebook's acquisition of WhatsApp was "also subject to Hart-Scott-Rodino Act pre-merger review, but the FTC, once again, did not block it." Id. (citation omitted). "Although the FTC [again] conveniently omits any mention of this review in its Complaint, the Court may take judicial notice of that public agency action." Id. (citations omitted).

Facebook thus argues that because the FTC "unconditionally cleared both acquisitions under Section 7 of the Clayton Act, which Congress enacted to address incipient threats to competition that Section 2 would not condemn," it is hypocritical for the agency to now claim that the acquisitions run afoul of Section 2. See MTD at 21. The FTC, for its part, counters that "HSR filings do not result in acquisitions being approved or blessed **[**48]** by the FTC or DOJ," that the HSR Act "merely established reporting requirements for acquisitions over a certain size," and that the prior HSR reviews are simply beside the point here. See Redacted FTC Opp. at 21.

[*57] The FTC has the better argument, at least insofar as its HSR reviews at the time of the acquisitions do not bear significantly on the issue now before the Court. ***HN18***[] The HSR Act does not require the FTC to reach a formal determination as to whether the acquisition under review violates the antitrust laws. On the contrary, it merely obliges the parties to the merger to report certain information to the agency and to wait to consummate the deal until the expiration of the statutory waiting period, which the FTC may extend while it gathers additional information. See 15 U.S.C. § 18a(a), (b), (e). Indeed, while the FTC conducted an investigation of the challenged acquisitions here and eventually voted to close the investigation, its closing letter to Facebook expressly stated, "This action is not to be construed as a determination that a violation may not have occurred, just as the pendency of an investigation should not be construed as a determination that a violation has occurred. The Commission reserves **[**49]** the right to take such further action as the public interest may require." FTC, Closing Letter Regarding Proposed Acquisition of Instagram, Inc., by Facebook, Inc. (Aug. 22, 2012), https://bit.ly/3p1UMGF. That letter is in keeping with the Act's explicit language making clear that the FTC can bring post-review challenges, notwithstanding the previous closing of HSR review without an antitrust-violation determination: "Any action taken by the Federal Trade Commission or the Assistant Attorney General or any failure of the Federal Trade Commission or the Assistant Attorney General to take any action under this section shall not bar any proceeding or any action with respect to such acquisition at any time under any other section of this Act or any other provision of law." 15 U.S.C. § 18a(i)(1).
