In reviewing a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)*, a court must accept the factual allegations set forth in a complaint as true, and draw all reasonable inferences in favor of the plaintiff. The plaintiff must satisfy a flexible plausibility standard. Once a claim has been stated adequately, it may be supported by showing any set of facts consistent with the allegations in the complaint. A court does not require heightened fact pleading of specifics, but only enough facts to state a claim to relief that is plausible on its face.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Pleading & Practice > Motion Practice > General Overview

HN2[] **Motions to Dismiss, Failure to State Claim**

In connection with a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a court normally may only consider facts stated in the complaint or documents attached to the complaint as exhibits or incorporated by reference. A court may only consider a document not appended to the complaint if the document is incorporated in the complaint by reference or is a document upon which the complaint solely relies and is integral to the complaint.

Evidence > Judicial Notice > Adjudicative Facts > Judicial Records

HN3[] **Adjudicative Facts, Judicial Records**

Courts routinely take judicial notice of documents filed in other courts not for the truth of the matters asserted in other litigation, but rather to establish the fact of such litigation and related filings.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act makes it unlawful to monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations. *15 U.S.C.S. § 2*.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN5[] **Sherman Act, Claims**

In order to state a claim for monopolization under *§ 2* of the Sherman Act, a plaintiff must establish (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. To state a claim for attempted monopolization, a plaintiff must allege that: (1) the defendants engaged in predatory or anticompetitive conduct; (2) with a specific intent to monopolize; and (3) a dangerous probability of achieving monopoly power. For any antitrust violation, a plaintiff must make some showing of actual injury attributable to something the antitrust laws were designed to prevent. A complaint must allege facts which show injury to competition, as distinct from injury to plaintiff as a competitor. The antitrust laws were enacted for the protection of competition not competitors.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN6[] **Private Actions, Remedies**

To survive a motion to dismiss, a complaint must allege antitrust injury, which is injury of the type the antitrust laws were intended to prevent and that flows from that which makes a defendant's acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. In order to have standing to prosecute private antitrust claims, a plaintiff must show more than that the defendant's conduct caused them an injury. In addition to injury in fact to a plaintiff's business or property caused by the antitrust violation, *15 U.S.C.S. § 15*, antitrust standing for a private plaintiff requires a showing of a special kind of antitrust injury, as well as a showing that the plaintiff is an efficient enforcer to assert a private antitrust claim. It is insufficient that a plaintiff suffers from a defendant's allegedly wrongful behavior; competition itself must be threatened as well. The antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior. Showing such an injury requires identifying the practice complained of and the reasons such a practice is or might be anticompetitive. A plaintiff need not prove that competition has been harmed; it is sufficient to show a likelihood that competition would be diminished.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

***HN7*[]** **Private Actions, Remedies**

The costs of defending against frivolous patent litigations and business disparagement alone do not necessarily rise to the level of an antitrust injury that the antitrust laws were enacted to prevent. However, such allegations can be sufficient where it is alleged that the combined effect of the allegedly sham litigation and the other alleged conduct is such that it threatens to exclude all competitors from a market.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

***HN8*[]** **Private Actions, Standing**

If a court determines that a plaintiff has alleged an antitrust injury, it must then determine whether any of the other factors, largely relating to the directness and identifiability of the plaintiff's injury, prevent the plaintiff from being an efficient enforcer of the antitrust laws.

Antitrust & Trade Law > Sherman Act > Claims

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

***HN9*[]** **Sherman Act, Claims**

The pursuit of litigation may, in some circumstances, constitute a form of anticompetitive activity. Such allegations are limited, however, by a principle known as the Noerr-Pennington doctrine, which was developed to protect *First Amendment* rights to petition government. The doctrine immunizes legislative, executive and judicial activity from antitrust liability even if the activity is designed to eliminate competition. This principle does not apply, however, to "sham" litigation. Immunity may not apply to litigation that is a mere sham to cover an attempt to interfere directly with the business relationships of a competitor. Immunity does not apply to litigation involving unethical conduct in the setting of the adjudicatory process or a pattern of baseless, repetitive claims. Repetitive lawsuits carrying the hallmark of insubstantial claims are unprotected. Repetitive, sham litigation in state courts may constitute an antitrust violation.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN10[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The definition of "sham" litigation for purposes of the Noerr-Pennington doctrine is as follows: First, a lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under this second part of the definition of sham, a court should focus on whether the baseless lawsuit conceals an attempt to interfere directly with the business relationships of a competitor through the use of the governmental process--as opposed to the outcome of that process--as an anticompetitive weapon. This two-tiered process requires a plaintiff to disprove a challenged lawsuit's legal viability before a court will entertain evidence of the suit's economic viability.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Inferences & Presumptions > Presumptions

Antitrust & Trade Law > Consumer Protection > False Advertising > General Overview

Evidence > Inferences & Presumptions > Presumptions > Rebuttal of Presumptions

HN11[] **Sherman Act, Claims**

Although truthful comparisons made in the competition between products do not constitute anticompetitive behavior, courts recognize that false and misleading statements may provide a basis for antitrust claims. Advertising that emphasizes a product's strengths and minimizes its weaknesses does not, at least unless it amounts to deception, constitute anticompetitive conduct violative of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*. A plaintiff asserting a monopolization claim based on misleading advertising must overcome a presumption that the effect on competition of such a practice was de minimis. There are several factors to consider in determining whether a plaintiff has overcome this presumption: whether the representations were (1) clearly false, (2) clearly material, (3) clearly likely to induce reasonable reliance, (4) made to buyers without knowledge of the subject matter, (5) continued for prolonged periods, and (6) not readily susceptible of neutralization or other offset by rivals.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN12[] **Sherman Act, Claims**

Evaluating market power begins with defining the relevant market. To adequately plead a Sherman Act, *15 U.S.C.S. § 1 et seq.*, violation, a plaintiff must identify the relevant market, including the geographic market and a relevant product market, and the alleged product market must bear a rational relation to the methodology courts prescribe to define a market for antitrust purposes--analysis of the interchangeability of use or the cross-elasticity of demand, and it must be plausible.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN13[ ] **Relevant Market, Product Market Definition**

Market analysis is defined as follows: The relevant market is defined as all products reasonably interchangeable by consumers for the same purposes, because the ability of consumers to switch to a substitute restrains a firm's ability to raise prices above the competitive level. Reasonable interchangeability sketches the boundaries of a market, but there may also be cognizable sub-markets which themselves constitute the appropriate market for antitrust analysis. Defining a sub-market requires a fact-intensive inquiry that includes consideration of such practical indicia as industry or public recognition of the sub-market as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. The term sub-market is somewhat of a misnomer, since the sub-market analysis simply clarifies whether two products are in fact reasonable substitutes and are therefore part of the same market. The emphasis always is on the actual dynamics of the market rather than rote application of any formula. Products will be considered to be reasonably interchangeable if consumers treat them as acceptable substitutes.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN14[ ] **Relevant Market, Product Market Definition**

Determining the relevant market requires a fact-intensive inquiry that is best served by allowing the parties discovery.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN15[ ] **Relevant Market, Product Market Definition**

Where a plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in the plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN16[ ] **Relevant Market, Product Market Definition**

A relevant market consists of products reasonably interchangeable for the purposes for which they are produced--price, use and qualities considered. The test of interchangeability is whether users regard the products as the same.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN17[] **Relevant Market, Product Market Definition**

Generally, a single brand does not define a product market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN18[] **Relevant Market, Product Market Definition**

At the motion to dismiss for failure to state a claim stage, it is sufficient that a plaintiff has alleged specific facts that support a narrow product market in a way that is plausible and bears a rational relation to the methodology courts prescribe to define a market for antitrust purposes.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN19[] **Actual Monopolization, Monopoly Power**

Monopoly power may be proven directly by evidence of the control of prices or the exclusion of competition, or it may be inferred from one firm's large percentage share of the relevant market. Market power is defined as the ability to control prices by restricting output. It may be proven directly by evidence of the control of prices or the exclusion of competition, or it may be inferred from one firm's large percentage share of the relevant market.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN20[] **Antitrust & Trade Law, Sherman Act**

The Donnelly Act, *N.Y. Gen. Bus. Law § 340*, is modeled on the Sherman Act, *15 U.S.C.S. § 1 et seq.*, and generally is construed in accordance with federal precedent.

Torts > Business Torts > Trade Libel > Elements

HN21[] **Trade Libel, Elements**

In order to make out a claim for business disparagement, a plaintiff must show that the defendant published an oral, defamatory statement directed at the quality of a business's goods and must prove that the statements caused special damages. Under New York law, product disparagement consists of: (1) a false statement; (2) published by a defendant to a third party; (3) with malice; and (4) with special damages. New York courts define special damages as the loss of something having economic or pecuniary value. In addition, special damages must be fully and accurately stated, with sufficient particularity to identify actual losses. Where loss of customers constitutes the alleged special damages, the individuals who ceased to be customers, or who refused to purchase, must be named and the exact damages itemized.

Torts > Business Torts > Trade Libel > Elements

HN22[] **Trade Libel, Elements**

Where loss of customers constitutes the alleged special damages for a claim for business disparagement, the individuals who ceased to be customers, or who refused to purchase, must be named, and the exact damages itemized.

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN23[] **Concerted Action, Civil Conspiracy**

Civil conspiracy cannot be alleged as a separate claim because New York law does not recognize civil conspiracy as an independent tort. Under New York law, a claim for civil conspiracy may stand only if it is connected to a separate underlying tort.

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN24[] **Concerted Action, Civil Conspiracy**

Allegations of civil conspiracy are permitted only to connect the actions of separate defendants with an otherwise actionable tort. While there is no cognizable action for a civil conspiracy, a plaintiff may plead conspiracy in order to connect the actions of the individual defendants with an actionable underlying tort and establish that those acts flow from a common scheme or plan.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN25[] **Civil Conspiracy, Elements**

To properly plead civil conspiracy, a plaintiff must allege both a primary tort and also show the four elements of a conspiracy, namely: (1) a corrupt agreement between two or more parties; (2) an overt act in furtherance of the agreement; (3) the parties' intentional participation in the furtherance of a plan or purpose; and (4) resulting damage or injury.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN26[] **Intentional Interference, Elements**

Under New York law, the elements of a claim for tortious interference are that (1) the plaintiff had a business relationship with a third party; (2) the defendant knew of that relationship and intentionally interfered with it; (3) the defendant acted solely out of malice, or used dishonest, unfair, or improper means; and (4) the defendant's interference caused injury to the relationship. In addition, under New York law, a plaintiff must allege that but for the defendants' wrongful conduct, the plaintiff would have entered into a prospective contract or an existing contract would not have been breached. Intentional procurement of a breach is an essential element of the tort of interference with contractual relations. A plaintiff must allege that there would not have been a breach but for the activities of defendants. Under New York law, interference with pre-contractual relations is actionable where a contract would have been entered into but for the malicious, fraudulent, or deceitful acts of a third party.

Counsel: **[**1]** For Alternative Electrodes, LLC, Plaintiff: Evan M. Janush, Esq., Lanier Law Firm, New York, New York.

For Empi, Inc. and Encore Medical, L.P., Defendants: Kenneth I. Schacter, Esq. and Theo J. Robins, Esq., Bingham McCutchen LLP, New York, New York.

Opinion by: JOSEPH F. BIANCO

Opinion

[*325] MEMORANDUM AND ORDER

JOSEPH F. BIANCO, District Judge:

Plaintiff Alternative Electrodes, LLC ("plaintiff" or "AEL") brought this action against Empi, Inc. ("Empi") and Encore Medical, L.P. ("Encore") (collectively, "defendants"), alleging violations of the Lanham Act, *15 U.S.C. § 1051, et seq.*, and antitrust violations under the Sherman Act, *15 U.S.C. § 2, et seq.*, as well as averring claims for illegal monopoly, defamation, false advertising, tortious interference with contract, tortious intereference with prospective business relationship, civil conspiracy and breach of contract under New York State law.

Defendants now move for dismissal of all claims in the complaint, except the Lanham Act claim, pursuant to *Fed. R. Civ. P. 12(b)(6)*. For the reasons set forth below, defendants' motion is granted in part and denied in part.

I. BACKGROUND

A. Facts

The following facts are taken from **[**2]** the amended complaint ("Am. Compl.") and are not findings of fact by the Court. The Court assumes these facts to be true for the purpose of deciding this motion and construes them in the light most favorable to plaintiff, the non-moving party.

Defendant Empi is a wholly-owned subsidiary of DJO Inc. Defendant Encore Medical is DJO Inc.'s surgical implant division. (Am. Compl. PP 4-5.) "Defendants market and sell a range of electrical muscle stimulation devices, including the VitalStim device." (*Id*. P 10.) The VitalStim device ("VS") is used to treat a medical condition called dysphagia, or difficulty swallowing, which affects an estimated 15 million Americans. (*Id*. P 11.) The VitalStim requires replacement electrodes throughout the life of the machine.

Defendants allegedly dominate the market for electrodes that can be used with the VitalStim device. (*Id*. P 13.) In fact, plaintiff alleges that "Defendants have an almost 100% market share in this relevant market and enjoy substantial profit margins." (*Id*.) According to the amended **[*326]** complaint, plaintiff "poses a business threat to the Defendants, because Plaintiff distributes far less costly electrodes that can be used with the Defendants' **[**3]** VitalStim device." (*Id*. P 12.) Plaintiff has distributed these electrodes since 2006. (*Id*. P 14.) Prior to that time, "VitalStim customers had no choice but to buy electrodes from Defendants because no other electrodes could connect to a VitalStim device." (*Id*.) Plaintiff alleges that "defendants' electrodes can only be used once and cost approximately $ 18 per four-pack, which upon information and belief, represents a profit margin of $ 15 or 600%." (*Id*. P 17.) "Alternative Electrodes offered electrodes that, unlike those of Defendants, are reusable" and cost $ 8.95 per four-pack. (*Id*. P 18.) Nevertheless, plaintiff has had sales of "far less than 1% of the Defendants' sales in the relevant market." (*Id*.)

According to the amended complaint, "[i]n order to protect its monopoly, Encore and its affiliated entities threatened, and then filed, patent infringement lawsuits against competitors within the electrode market." (*Id*. P 15.) Plaintiff alleges that defendants also issued "repeated false statements about the manufacturers' purported failure to meet Food and Drug Administration ("FDA") regulatory requirements." (*Id*.)

Plaintiff alleges that, less than three weeks after it made its first **[**4]** shipment of sample electrodes to potential customers in October of 2006, "The Chattanooga Group, a division of Encore Medical at the time [and the manufacturer of the VitalStim device], issued a 'Risk Management Alert' nationwide to all VitalStim customers, including an estimated 100 customers in New York, 're: Alternative Electrodes.com: Preventing Possible Adverse Events.'" (*Id*. P 20.) Plaintiff alleges that this advisory contained several false and misleading statements including that Alternative Electrodes: "(1) may compromise patient safety; (2) may reduce efficacy in terms of patient outcomes; (3) have generated performance concerns by VitalStim clinicians in the field; (4) are not cleared to market by the FDA for the treatment of dysphagia; and, (5) carry unsubstantiated manufacturer claims regarding safety, compatibility and clearance for use with the VitalStim system." (*Id*.) The amended complaint further alleges that "Empi and its authorized dealers continue to repeat these statements to this day to Alternative Electrodes' customers and potential customers." (*Id*.) The amended complaint lists many potential customers that have allegedly informed plaintiff that they will not **[**5]** purchase plaintiff's electrodes as a result of statements made to them by defendants. (*Id*. PP 22-23.) The timeframe of these alleged statements are not entirely clear, but appear to range from that initial Risk Management Alert through at least 2008.

Plaintiff also alleges that Encore Medical, VitalStim and ESD LLC filed suit against it on December 20, 2006, alleging patent infringement. This suit was dismissed pursuant to a confidential settlement agreement between the parties entered into on August 23, 2007. (*Id*. P 26, Ex. G.). As part of this agreement, Encore Medical, VitalStim and ESD agreed not to make certain statements about the safety of plaintiff's product. Plaintiff alleges that the recent statements made by defendants about its electrodes violate this agreement. (*Id*. PP 26-27.)

The amended complaint further alleges that Empi threatened another patent litigation as recently as February 2008 against another company which recently began selling electrodes manufactured by plaintiff's manufacturer. (Am. Compl. P 30.) Empi also allegedly sent "mailings **[*327]** with false and misleading statements to current and potential customers of Alternative Electrodes" in February 2008. (Id. P 31, **[**6]** Ex. F.)

B. Procedural History

Plaintiff filed the complaint in this action on March 27, 2008. On July 21, 2008, plaintiff filed an amended complaint. On October 2, 2008, defendants filed a motion for dismissal pursuant to *Fed. R. Civ. P. 12(b)(6)*. Plaintiff submitted its response to the motion on November 3, 2008. On November 24, 2008, defendants submitted their reply. Oral argument was heard on January 23, 2009. All of the submissions have been considered by the Court.

II. STANDARD OF REVIEW

HN1[] In reviewing a motion to dismiss pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, the court must accept the factual allegations set forth in the complaint as true, and draw all reasonable inferences in favor of the plaintiff. *See* *Cleveland v. Caplaw Enters., 448 F.3d 518, 521 (2d Cir. 2006)*; *Nechis v. Oxford Health Plans, Inc., 421 F.3d 96, 100 (2d Cir. 2005)*. The plaintiff must satisfy "a flexible 'plausibility standard.'" *Iqbal v. Hasty, 490 F.3d 143, 157-58 (2d Cir. 2007)*. "[O]nce a claim has been stated adequately, it may be supported by showing any set of facts consistent with the allegations in the complaint." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 1969, 167 L. Ed. 2d 929 (2007)*. The Court, therefore, **[**7]** does not require "heightened fact pleading of specifics, but only enough facts to state a claim to relief that is plausible on its face." *Id. at 1974*.

HN2[] In connection with a motion to dismiss under *Rule 12(b)(6)*, the Court normally may only consider "facts stated in the complaint or documents attached to the complaint as exhibits or incorporated by reference." *Nechis, 421 F.3d at 100*; *accord* *Kramer v. Time Warner Inc., 937 F.2d 767, 773 (2d Cir. 1991)*. The Court may only consider a document not appended to the complaint if the document is "incorporated in [the complaint] by reference" or is a document "upon which [the complaint] *solely* relies and . . . is *integral to the complaint*." *Roth v. Jennings, 489 F.3d 499, 509 (2d Cir. 2007)* (quoting *Cortec Indus., Inc. v. Sum Holding L.P., 949 F.2d 42, 47 (2d Cir. 1991))* (emphases in original). ***HN3***[] Courts also "'routinely take judicial notice of documents filed in other courts . . . not for the truth of the matters asserted in other litigation, but rather to establish the fact of such litigation and related filings.'" *Crews v. County of Nassau, No. 06-CV-2610 (JFB), 2007 U.S. Dist. LEXIS 6572, at *5 n.2 (E.D.N.Y. Jan. 30, 2007)* (quoting *Kramer v. Time Warner Inc., 937 F.2d 767, 774 (2d Cir. 1991))*. **[**8]** Thus, in the instant case, this Court can consider the patent litigation plaintiff references in the amended complaint, because it is integral to plaintiff's claims, and consists of documents filed in another court being considered not for its truth, but for the fact of its filing.

III. DISCUSSION

A. Sherman Act Claims

Plaintiff's amended complaint alleges claims for unlawful monopolization and attempted monopolization in violation of the Sherman Act, *15 U.S.C. § 2*. ***HN4***[] The Sherman Act makes it unlawful to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 2*.

HN5[] "[I]n order to state a claim for monopolization under *Section 2* of the Sherman Act, a plaintiff must establish '(1) the possession of monopoly power in the relevant market and (2) the willful acquisition **[*328]** or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.'" *PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101, 105 (2d Cir. 2002)* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966))*. **[**9]** To state a claim for attempted monopolization, a plaintiff must allege that: (1) the defendants engaged in predatory or anticompetitive conduct; (2) with a specific intent to monopolize; and (3) a dangerous probability of achieving monopoly power. *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*; *Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 99-100 (2d Cir. 1998)*; *see* *Dolan v. Fairbanks Capital Corp., No. 03 Civ. 3285 (DRH), 2005 U.S. Dist. LEXIS 45308, at *20 (E.D.N.Y. Aug. 16, 2005)*. Furthermore, "[f]or any antitrust violation, 'a plaintiff must make some showing of actual injury attributable to something the antitrust laws were designed to prevent.'" *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 562, 101 S. Ct. 1923, 68 L. Ed. 2d 442 (1981)*. That is, the amended complaint must allege facts which show injury to competition, as distinct from injury to plaintiff as a competitor. *See* *Jarmatt Truck Leasing Corp. v. Brooklyn Pie Co., Inc., 525 F. Supp. 749, 750 (E.D.N.Y. 1981)* (citing *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701, (1977)* ("The antitrust laws . . . were enacted for the protection of competition not competitors.") (internal quotation marks and citation omitted)).

Defendants **[**10]** argue that plaintiff's monopolization claims should be dismissed because plaintiff (1) suffered no cognizable injury and, therefore, lacks standing, and (2) has failed to plead the relevant market definition adequately. The Court will address each argument in turn.

1. Standing

HN6[] To survive a motion to dismiss, a complaint must allege "*antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; see also *Balaklaw v. Lovell, 14 F.3d 793, 797 (2d Cir. 1994)* ("It is now well settled that in order to have standing to prosecute private antitrust claims, plaintiffs must show more than that the defendants' conduct caused them an injury."). "In addition to injury in fact to the plaintiff's business or property caused by the antitrust violation, *15 U.S.C. § 15*, antitrust standing for a private plaintiff requires a showing of a special kind of 'antitrust injury,' as well as a showing that the plaintiff **[**11]** is an 'efficient enforcer' to assert a private antitrust claim." *Port Dock & Stone Corp. v. Oldcastle Northeast, Inc., 507 F.3d 117 (2d Cir. 2007)* (citing *Associated Gen. Contractors, Inc. v. California State Council of Carpenters, 459 U.S. 519, 537-45, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983))*. Thus, it is insufficient that plaintiff suffered from defendants' allegedly wrongful behavior; competition itself must be threatened as well. *Paycom Billing Servs. v. MasterCard Int'l, Inc., 467 F.3d 283, 290 (2d Cir. 2006)* ("'[t]he antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior'") (quoting *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884,* *109 L. Ed. 2d 333* ***[*329]*** *(1990)* (emphasis in original)). "Showing such an injury requires identifying the practice complained of and the reasons such a practice is or might be anticompetitive." *Port Dock, 507 F.3d at 122*. Plaintiff need not prove that competition has been harmed; it is sufficient to show a likelihood that competition would be diminished. *Brunswick Corp., 429 U.S. at 489*.

In addition to the harm defendants' anticompetitive behavior allegedly caused plaintiff, plaintiff also **[**12]** alleges that defendants have diminished competition in the VitalStim compatible electrodes market in general through frivolous patent litigations and publishing false statements about its competitors. ***HN7***[] The costs of defending against frivolous patent litigations and business disparagement alone do not necessarily rise to the level of an antitrust injury that the antitrust laws were enacted to prevent. However, such allegations can be sufficient where it is alleged that the combined effect of the allegedly sham litigation and the other alleged conduct is such that it threatens to exclude all competitors from a market. *See, e.g., Xerox Corp. v. Media Sciences Int'l Inc., 511 F. Supp. 2d 372, 381 (S.D.N.Y. 2007)*. This is the precise injury alleged here. Plaintiff alleges that these actions have resulted in the following injuries:

> Defendants' unlawful conduct has stifled competition in the VS Compatible Electrodes market and has had a direct, substantial and adverse effect on competition by monopolizing the VS Compatible Electrodes market, artificially creating barriers to entry in the VS Compatible Electrodes market, and foreclosing competition on the basis of price and quality. Defendants' **[**13]** anticompetitive conduct was instituted so that it could illegally maintain the monopoly profits that it reaped from purchases of VS Compatible Electrodes.
>
> But for Defendants' conduct, all purchasers of VS Compatible Electrodes would have been able to purchase comparable if not superior electrodes for use with the VitalStim device at lower prices. In addition, Defendants' anticompetitive conduct has reduced the output of VS Compatible Electrodes. Entry into the VS Compatible Electrodes market has been effectively foreclosed by Defendants' disparagement campaign and sham litigation scare tactics.
>
> By foreclosing competition through unlawful actions, Defendants prevented VS Compatible Electrodes purchasers from purchasing lower-priced VS Compatible Electrodes and prevented these purchasers from improving patient access and care. Indeed, the harm to patient care has been severe. Due to the unlawful monopoly prices of VS Compatible Electrodes, caregivers, such as speech pathologists, have had to forego providing VitalStim treatment to patients who have potentially fatal swallowing disorders and may be on feeding tubes.

(Am. Compl. at PP 51-54.)

Based on the above, it is clear that plaintiff **[**14]** has alleged the kind of injury to competition that antitrust laws were designed to prevent. Further, plaintiff is an efficient enforcer under the standard laid out by the Second Circuit, and defendants do not argue to the contrary. *Balaklaw v. Lovell, 14 F.3d 793, 798 (2d Cir. 1994)* (***HN8***[] if the Court determines that the plaintiff has alleged an antitrust injury, "they must then determine whether any of the other factors, largely relating to the directness and identifiability of the plaintiff's injury, prevent the plaintiff from being an efficient enforcer of the antitrust laws."). The Court, therefore, need only assess whether **[*330]** the conduct alleged to have caused these injuries -- sham litigation and deceptive business disparagement -- is conduct that antitrust laws appropriately target.

Plaintiff's Sherman Act claims are brought based on two distinct theories -- namely, that defendants have brought sham litigation as a means of limiting plaintiff's ability to compete against them and that defendants have wrongfully disparaged plaintiff's product in order to unlawfully limit competition. Defendants argue that plaintiff's claims based on sham litigation are barred by the *Noerr-Pennington* doctrine **[**15]** and that plaintiff's claims based on business disparagement do not constitute anticompetitive behavior. As set forth below, the Court disagrees.

a. Sham Litigation

Defendants argue that the *Noerr-Pennington* doctrine bars plaintiff's antitrust claims based on defendants' patent litigation. Plaintiff argues that the litigation at issue here constitutes sham litigation and, therefore, is not protected by the *Noerr-Pennington* doctrine.

"There is no question that HN9[] the pursuit of litigation may, in some circumstances, constitute a form of anti-competitive activity." In re Fresh Del Monte Pineapple Antitrust Litigation, 04 MD 1628 (RMB) (MHD), 2007 U.S. Dist. LEXIS 1372, at *52-*53 (S.D.N.Y. Jan. 9, 2007). Such allegations are limited, however, by a principle known as the *Noerr-Pennington* doctrine, which was developed to protect First Amendment rights to petition government. California Motor Transp. Co. v. Trucking Unltd., 404 U.S. 508, 510-11, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972); *see also* United Mine Workers of Am. v. Pennington, 381 U.S. 657, 669-670, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965); Eastern R. Presidents Conf. v. Noerr Motor Freight, Inc., 365 U.S. 127, 134-36, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961). The doctrine "immunizes legislative, executive and judicial activity from antitrust **[**16]** liability even if the activity is designed to eliminate competition." Mover's & Warehousemen's Assoc. of Greater New York, Inc. v. Long Island Moving & Storage Ass'n, Inc., 98 CV 5373 (SJ), 1999 U.S. Dist. LEXIS 20667, *18 (E.D.N.Y. Dec. 16, 1999). This principle does not apply, however, to "sham" litigation. Noerr, 365 U.S. at 144 (immunity may not apply to litigation that is "a mere sham to cover . . . an attempt to interfere directly **[*331]** with the business relationships of a competitor"); California Motor Transport, 404 U.S. at 512-13 (immunity does not apply to litigation involving "unethical conduct in the setting of the adjudicatory process" or "a pattern of baseless, repetitive claims"); *accord* Otter Tail Power Co. v. United States, 410 U.S. 366, 380, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973) ("repetitive lawsuits carrying the hallmark of insubstantial claims" are unprotected); Vendo Co. v. Lektro-Vend Corp., 433 U.S. 623, 635 n.6, 97 S. Ct. 2881, 53 L. Ed. 2d 1009 (1977) ("repetitive, sham litigation in state courts may constitute an antitrust violation") (plurality opinion).

In Professional Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993), the Supreme Court laid out HN10[] the definition of "sham" **[**17]** litigation for these purposes:

> First, the lawsuit must be objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. . . . Only if challenged litigation is objectively meritless may a court examine the litigant's subjective motivation. Under this second part of our definition of sham, the court should focus on whether the baseless lawsuit conceals 'an attempt to interfere *directly* with the business relationships of a competitor' through the 'use [of] the governmental *process* -- as opposed to the *outcome* of that process -- as an anticompetitive weapon.' This two-tiered process requires the plaintiff to disprove the challenged lawsuit's *legal* viability before the court will entertain evidence of the suit's *economic* viability."

Professional Real Estate, 508 U.S. at 60-61 (internal citations omitted). A suit is not objectively baseless if there is probable cause to sue. Professional Real Estate, 508 U.S. at 62.

Plaintiff's amended complaint alleges the following: "It was evident from the beginning of the [patent] litigation that the primary, if not sole purpose, of instigating suit was to advise customers of the pending (but meritless) **[**18]** litigation and attempt to drive Alternative Electrodes from the market. The litigation was objectively unreasonable and was initiated in order to interfere directly with Alternative Electrodes' business relationships and activities." (Am. Compl. P 24.) Plaintiff further alleges that "[t]he sham patent suit strategy failed. Recognizing the frivolity of the claim in light of prior art, these Defendants completely dismissed their suit on October 3, 2007 without any penalty or payment of any kind by Alternative Electrodes." (*Id*. P 25.) The parties entered into a settlement agreement dated August 23, 2007. (*Id*. P 26.) According to the amended complaint, "[a]s recently as February, 2008, Empi, its affiliated entities, and authorized dealers have again threatened patent litigation against another company which recently began selling electrodes manufactured by Plaintiff's manufacturer. Notably, this recent competitor to the VitalStim Electrodes market, Columbia Scientific, was previously VitalStim's largest dealer. Thus, despite having unsuccessfully prosecuted sham patent litigation against Plaintiff, Empi continued to threaten yet another sham patent litigation against a new upstart competitor **[**19]** for the purpose of foreclosing competition and retaining their monopoly profits." (*Id*. P 30.)

Plaintiff alleges that the litigation was both subjectively and objectively baseless and plausibly supports this claim with the assertion that there could be no valid patent claim due to the existence of "prior art." (Plaintiff's Memorandum of Law, at 6.) At this stage of litigation, such allegations are sufficient to withstand a motion to dismiss. Louisiana Wholesale Drug Co., Inc. v. Sanofi-Aventis, No. 07 Civ. 7343(HB), 2008 U.S. Dist. LEXIS 3611, 2008 WL 169362, at *5 (S.D.N.Y. Jan. 18, 2008); ICOS Vision System Corp., N.V. v. Scanner Tech. Corp., 2006 U.S. Dist. LEXIS 13847, 2006 WL 838990 (S.D.N.Y. Mar. 29, 2006) ("If, as alleged, Scanner knew that § 271(g) did not apply and threatened litigation for the sole purpose of harming ICOS, then its threats were neither objectively reasonable nor taken in good faith. This is all that need be alleged at this early stage of the litigation.").

b. Business Disparagement as Antitrust Conduct

Defendants also argue that, "as a matter of law, efforts to disparage a competitor do not harm competition." (Defendants' Memorandum of Law, at 12) (citing Schachar v. Am. Acad. of Ophthalmology, Inc., 870 F.2d 397, 399 (7th Cir. 1989)) **[**20]** ("Warfare among suppliers and their different products is competition. ***Antitrust law*** does not compel your competitor to praise your product or sponsor your work. To require cooperation or friendliness among rivals is to undercut the intellectual foundations of ***antitrust law***.") ***HN11***[] Although defendants are correct that truthful comparisons made in the competition between products do not constitute anticompetitive **[*332]** behavior, courts recognize that false and misleading statements may provide a basis for antitrust claims. *The Nat'l Ass'n of Pharmaceutical Mfrs., Inc. v. Ayerst Labs., 850 F.2d 904, 916 (2d Cir. 1988)* (stating that "'[a]dvertising that emphasizes a product's strengths and minimizes its weaknesses does not, at least unless it amounts to deception, constitute anticompetitive conduct violative of § 2 [of the Sherman Act]'" but holding that a claim based on a letter alleged to be "false and misleading in certain respects . . . should be allowed to go forward with the discovery process to substantiate its claim.") (quoting Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 287-88 (2d Cir. 1979)). "[A] plaintiff asserting a monopolization claim based on misleading advertising must **[**21]** overcome a presumption that the effect on competition of such a practice was *de minimis*.'" Pharm. Mfrs., 850 F.2d at 916 (citation and quotations omitted). The Second Circuit has adopted several factors to consider in determining whether a plaintiff has overcome this presumption: whether the representations "were (1) clearly false, (2) clearly material, (3) clearly likely to induce reasonable reliance, (4) made to buyers without knowledge of the subject matter, (5) continued for prolonged periods, and (6) not readily susceptible of neutralization or other offset by rivals." Pharm. Mfrs., 850 F.2d at 916.

The Second Circuit in *Pharm. Mfrs*. went on to find that, at the motion to dismiss stage, an allegation that the representation was "false and misleading in certain respects" was sufficient "to go forward with the discovery process to substantiate its claim that the [representation] was clearly false, clearly material, and clearly likely to induce reasonable reliance." *Id*. Similarly, here, plaintiff has sufficiently alleged that defendants made statements that were false and misleading to potential clients and, therefore, should be entitled to discovery in order to substantiate its claims. **[**22]** Plaintiff alleges that defendants (including, notably, the manufacturer of VitalStim) repeatedly made representations to potential Alternative Electrodes customers that Alternative Electrodes "(1) may compromise patient safety; (2) may reduce efficacy in terms of patient outcomes; (3) have generated performance concerns by VitalStim clinicians in the field; (4) are not cleared to market by the FDA for the treatment of dysphagia; and, (5) carry unsubstantiated manufacturer claims regarding safety, compatibility and clearance for use with the VitalStim system." (Am. Compl. P 20.) Plaintiff further alleges that these statements are false and misleading and also asserts other allegations which could plausibly support satisfaction of the other above-referenced factors. Defendants argue, among other things, that plaintiff cannot satisfy the requirement for showing that the representations were made to "buyers without knowledge of the subject matter." However, the Court cannot determine, at this early stage of the litigation, as a matter of law, that these factors cannot be satisfied. For example, there is insufficient basis to discern at this juncture whether the statements are unlikely **[**23]** to induce reasonable reliance, whether the buyers are without knowledge of the subject matter, or whether the statements are susceptible to neutralization. [1] Construing **[*333]** the allegations most favorably to plaintiff, including drawing reasonable inferences in its favor, dismissal at this stage is unwarranted. In short, the Court finds "the several

[1] The Court notes that these issues can be particularly complex where the misleading statements are alleged to **[**24]** have been made by, among others, the manufacturer of the principal product, because one may reasonably infer depending on the circumstances that factors such as the ability to neutralize and the willingness of sophisticated buyers to further research such statements can be negatively affected when such statements allegedly come from the manufacturer of the primary product itself, rather than from a mere competitor who does not speak for the primary product.

factors noted above cannot be adequately evaluated until the discovery process has moved forward to a greater extent than it has thus far." *Pharm. Mfrs., 850 F.2d at 916* (finding that, though "pharmacists are likely to have some knowledge of the subject matter discussed in the [representation], and that the representations . . . were made and could only have been made, for [a short period of time]" the claim should proceed to discovery.) If, after discovery, defendants believe that there is insufficient evidence for plaintiff to satisfy these factors, they may move for summary judgment at that time. Accordingly, the motion to dismiss on the ground that plaintiff failed to suffer a cognizable injury and thus lacks standing is denied.

2. Market Definition

HN12[] "Evaluating market power begins with defining the relevant market." *Geneva Pharms. Tech. Corp. v. Barr Labs., Inc., 386 F.3d 485, 496 (2d Cir. 2004)*. To adequately plead a Sherman Act violation, therefore, a plaintiff must identify the relevant market, including the geographic market and a relevant product market, and the "alleged product market must bear a rational relation to the methodology courts prescribe to define a market for antitrust purposes -- analysis of the interchangeability of use or the cross-elasticity of demand, and it must be plausible." *Todd v. Exxon Corp., 275 F.3d 191, 200 (2d Cir. 2001)* (internal quotations marks and citations omitted.). ***HN13***[] The Second Circuit has defined market analysis as **[**25]** follows:

> The relevant market is defined as all products reasonably interchangeable by consumers for the same purposes, because the ability of consumers to switch to a substitute restrains a firm's ability to raise prices above the competitive level. Reasonable interchangeability sketches the boundaries of a market, but there may also be cognizable submarkets which themselves constitute the appropriate market for antitrust analysis. Defining a submarket requires a fact-intensive inquiry that includes consideration of such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. The term submarket is somewhat of a misnomer, since the submarket analysis simply clarifies whether two products are in fact reasonable substitutes and are therefore part of the same market. The emphasis always is on the actual dynamics of the market rather than rote application of any formula.

Geneva Pharms., 386 F.3d at 496 (internal citations and quotation marks omitted). "Products will be considered **[**26]** to be reasonably interchangeable if consumers treat them as acceptable substitutes." *PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101, 105 (2d Cir. 2002)*.

Courts are reluctant to dismiss antitrust claims for failure to plead the relevant product market because ***HN14***[] determining the relevant market requires a fact-intensive inquiry that is best served by allowing the parties discovery. *Todd v. Exxon Corp., 275 F.3d 191, 199-200 (2d Cir. 2001)* (collecting cases and noting that **[*334]** "[b]ecause market definition is a deeply fact-intensive inquiry, courts hesitate to grant motions to dismiss for failure to plead a relevant product market."). However, there is certainly no bar against dismissal in appropriate cases. *Id*.***HN15***[] "'[W]here the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted.'" *Chapman v. New York State Div. for Youth, 546 F.3d 230, 238 (2d Cir. 2008)* **[**27]** (quoting *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3rd Cir. 1997))*.

Plaintiff alleges that the relevant market is "the market for the sale of electrodes compatible for use with VitalStim powered muscle stimulators" in the United States. (Am. Compl. PP 43, 45.) It argues that this is the appropriate market because "[e]lectrodes utilized with electrical stimulation devices are not interchangeable with electrodes for use in VitalStim electrical stimulation devices as such general electrodes do not have mini-snap connectors that allow the electrodes to connect to a VitalStim device. Thus, VitalStim branded electrodes and the VS Compatible Electrodes manufactured by Plaintiff's manufacturer are the only electrodes that are reasonably interchangeable for each other with regard to use for the treatment of dysphagia with VitalStim electrical stimulation devices. From the view of an owner of a VitalStim device, no other electrodes are acceptable substitutes." (Plaintiff's Memorandum of Law, at 13; Am. Compl. P 44.)

Defendants do not dispute that plaintiff has sufficiently pled the geographic market. (Defendants' Memorandum of Law, at 14.) Instead, they claim that plaintiff **[**28]** has failed to plead a plausible relevant product market because its "alleged relevant market is an aftermarket for replacement electrodes compatible with a single branded product manufactured and marketed by DJO, *i.e*., the VitalStim device," and "[s]uch allegations do not plausibly describe a market susceptible of unlawful monopolization because they do not permit 'an inference of monopoly power in the aftermarket that competition in the primary market appears unable to check.'" (Defendants' Memorandum of Law, at 14-15) (citing *SMS Sys. Maint. Servs. v. Digital Equip. Corp., 188 F.3d 11, 17-18 (1st Cir. 1999)*.) In other words, defendants argue that the relevant market cannot plausibly be limited to the market for electrodes for the VitalStim device, but rather should encompass the market for all products aimed at treating dysphagia. They argue that "'[t]he test for a relevant market is not commodities reasonably interchangeable by a particular plaintiff, but 'commodities reasonably interchangeable by consumers for the same purposes.'" (Defendants' Memorandum in Reply, at 5 (quoting *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 438 (3d Cir. 1997)* quoting *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956))*. **[**29]** It is not clear at this stage, however, whether there are adequate substitutes for the VitalStim, especially where it is undisputed, (as confirmed by the parties at oral argument), that the VitalStim device is the only electrical stimulator approved by the FDA for the treatment of dysphagia. ***HN16***[] A relevant market consists of product s reasonably interchangeable "for the purposes for which they are produced -- price, use and qualities considered." *Xerox Corp. v. Media **[*335]** Scis. Int'l, Inc., 511 F. Supp. 2d 372, 383-84 (S.D.N.Y. 2007)*. The test of interchangeability is whether users regard the products as the same. *Xerox, 511 F. Supp. 2d at 384*. In this case, taking into consideration "price, use and qualities," it is unclear, at the motion to dismiss stage, that there are reasonably interchangeable products.

The Court also recognizes that, ***HN17***[] generally, a single brand does not define a product market. *Todd, 275 F.3d at 200* (dismissal is appropriate where a plaintiff "attempts to limit a product market to a single brand, franchise, institution, or comparable entity that competes with potential substitutes") (collecting cases). However, courts have found that there are circumstances under which replacement **[**30]** items for a single brand do define a relevant market. For example, the Supreme Court has held that "[b]ecause service and parts for Kodak equipment are not interchangeable with other manufacturers' service and parts, the relevant market from the Kodak equipment owner's perspective is composed of only those companies that service Kodak machines. . . . The relevant market for antitrust purposes is determined by the choices available to Kodak equipment users." *Eastman Kodak Co. v. Image Tech. Servs., 504 U.S. 451, 481-82, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. Similarly, it has been found that replacement parts for Xerox machines constitute a relevant market. *Xerox, 511 F. Supp. 2d at 385*. Likewise, at this early stage, plaintiff has reasonably alleged that the relevant market here is the replacement parts for the VitalStim powered muscle stimulator. *See Todd, 275 F.3d at 203* (***HN18***[] "At this stage, it is sufficient that plaintiff has alleged specific facts that support a narrow product market in a way that is plausible and bears a rational relation to the methodology courts prescribe to define a market for antitrust purposes."). In short, the Court concludes that plaintiff has adequately pled market definition.

Plaintiff also **[**31]** argues that "as an alternative to relevant market analysis, pursuant to which monopoly power is proven *indirectly*, monopoly power can also be proven through *direct evidence* of the Defendants' ability to control prices and/or exclude competition." (Plaintiff's Memorandum of Law, at 12 (citing *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 460-61, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*; *Geneva Pharms. Tech. Corp. v. Barr Labs., Inc., 386 F.3d 485, 500 (2d Cir. 2004)*; *Tops Mkts., Inc. v. Quality Mkts, Inc., 142 F.3d 90, 97-98 (2d Cir. 1998)* (noting that ***HN19***[] monopoly power "may be proven directly by evidence of the control of prices or the exclusion of competition, or it may be inferred from one firm's large percentage share of the relevant market")).) Defendants argue that plaintiff has not alleged that defendants "control the price of anything other than *its own product*." (Defendants' Reply Memorandum, at 5 (emphasis in original).) This argument is unavailing. By defendants' own admission, until AEL began selling electrodes in October of 2006, "VitalStim device users could only buy replacement electrodes from DJO." (Defendants' Memorandum of Law, at 4.) Plaintiff further alleges that defendants have been able to successfully **[**32]** sell their electrodes, which plaintiff claims are inferior to AEL's, at a 600% profit margin. Such an allegation, along with the other allegations in the amended complaint discussed above, supports a plausible claim that there is monopoly power at work in this market. *See* *Eastman Kodak Co. v. Image Tech. Servs., 504 U.S. 451, 481, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* ("that Kodak controls nearly 100% of the parts market and 80% to 95% of the service market, with no readily available substitutes, **[*336]** is, however, sufficient to survive summary judgment under the more stringent monopoly standard of *§ 2*."). Market power is defined as the ability to control prices by restricting output. *Tops Mkts., 142 F.3d at 98* ("It may be proven directly by evidence of the control of prices or the exclusion of competition, or it may be inferred from one firm's large percentage share of the relevant market."). In the instant case, plaintiff has sufficiently alleged a plausible claim that direct monopoly power is exerted by defendants, and their pleadings are sufficient at this stage of proceedings to survive a motion to dismiss.

B. Donnelly Act Claims

Plaintiff also brings a claim of illegal monopoly under New York's Donnelly Act, *N.Y. Gen. Bus. L. § 340*. **[**33]** ***HN20***[] The Donnelly Act "is modeled on the Sherman Act and generally is construed in accordance with federal precedent." *Menkes v. St. Lawrence Seaway Pilots' Ass'n, 269 Fed. Appx. 54, 2008 U.S. App. LEXIS 5281, at *3 n.3 (2d Cir. Mar. 12, 2008)*. Defendants make the same arguments against the alleged Donnelly claims as they make against the Sherman Act claims. Because the same analysis applies, for the reasons given *supra* regarding the Sherman Act claims, the Court declines to dismiss plaintiff's Donnelly Act claims.

C. Business Disparagement/Injurious Falsehood Claim

With respect to the state law claim for business disparagement and injurious falsehood, plaintiff alleges that defendants have made false and misleading statements about its electrodes from 2006 through present. Plaintiff further alleges that these statements were made to potential customers and, in several instances, have resulted in loss of prospective business. Defendants argue that the only statement plaintiff specifically alleges constituted business disparagement (a Risk Management Alert published in November 2006) is time barred. Defendants argue that plaintiff's assertion "in conclusory terms that unidentified statements similar **[**34]** to those in the Alert were made at unspecified times 'to this day'. . . provides insufficient notice regarding the identity of the speaker, to whom the false statements were made, and when." (Defendants' Memorandum of Law, at 7 (citing Am. Compl. P 20).) Further, defendants argue that none of the statements that are within the statute of limitations period are "alleged to be ***both*** false ***and*** about AEL." (Defendants' Memorandum of Law, at 7) (emphasis in original.) Next, defendants argue that plaintiff has not sufficiently pled special damages as required. Defendants claim that "[u]nable to identify any loss of business attributable to any specific prospective customer, AEL attempts to satisfy its pleading obligations by merely attaching a list of every single one of Defendants' customers (Am. Compl., Ex. K) -- more than 4800 in total -- and asserting that it lost sales to 'many if not all' of them." (Defendants' Memorandum of Law, at 8.) Defendants argue that "[i]dentifying ***every*** customer is no better than identifying ***none***, and certainly does not plead the requisite 'loss of customers.'" (*Id*.) (emphasis in original.)

HN21[] In order to make out a claim for business disparagement, "the plaintiff **[**35]** must show that the defendant published an oral, defamatory statement directed at the quality of a business's goods and must prove that the statements caused special damages." *Fashion Boutique of Short Hills, Inc. v. Fendi USA, Inc., 314 F.3d 48, 59 (2d Cir. 2002)*; *see also* *Chamilia, LLC v. Pandora Jewelry, LLC, No. 04-CV-6017 (KMK), 2007 U.S. Dist. LEXIS 71246, at *58 (S.D.N.Y. Sept. 24, 2007)* ("Under New York law, product disparagement consists **[*337]** of: (1) a false statement; (2) published by Defendant to a third party; (3) with malice; and (4) with special damages."). "The New York courts define special damages as the loss of something having economic or pecuniary value. In addition, special damages must be fully and accurately stated, with sufficient particularity to identify actual losses." *MapInfo Corp. v. Spatial Re-Engineering Consultants, No. 02-CV-1008 (DRH), 2006 U.S. Dist. LEXIS 70408, *41 (N.D.N.Y Sept. 28, 2006)* (internal quotations omitted). "Where loss of customers constitutes the alleged special damages, the individuals who ceased to be customers, or who refused to purchase, must be named and the exact damages itemized." *Fashion Boutique of Short Hills, 314 F.3d 48, at 59*.

The **[**36]** Court finds that plaintiff has met all of these requirements, with the exception of providing itemized special damages. Plaintiff has identified false and misleading statements made by defendants regarding plaintiff. (Am. Compl. P 20.) Plaintiff alleges that these statements have been made repeatedly over the last few years to potential customers and the general public. Specifically, plaintiff alleges that the assertions made in the November 2006 Risk Management Alert have been repeated until very recently. Plaintiff does not provide exact dates for these statements but does allege with specificity other statements that are certainly not time barred. [2] For example, Exhibits D and E to the amended complaint are alleged to be "[t]rue and correct copies of VitalStim Form documents, dated January 25, 2008 and January 16, 2008." (Am. Compl. P 23(e).) These documents include statements that plaintiff alleges are false, including that "alternative electrodes are not cleared by the FDA for use with the VS stimulator." (Am. Compl., Ex. E.) Similar statements were made in an alleged communication by Empi's sales representatives as recently as February 15, 2008. (Am. Compl. P 23(f), Ex. F.) Plaintiff **[**37]** further alleges that defendants acted with malice. (Am. Compl. P 66) ("Defendants acted with malice in making such false statements about Plaintiff's VS Compatible Electrodes, because Defendants made such statements with the intent to interfere with another person's interest, or with a deliberate desire to do Plaintiff harm, or because Defendants made such statements recklessly, without regard to consequences, and under circumstances which Defendants should have anticipated to cause injury.") The amended complaint also lists in detail many potential customers that allegedly did not purchase plaintiff's electrodes as a result of false statements made to them by defendants. (*See* Am. Compl. P 22.)

Plaintiff does not, however, itemize the damages resulting from these losses. Plaintiff argues that special damages are not required because "words which would tend to injure a party's trade, occupation or business are slanderous *per se*." (Plaintiff's Memorandum of Law, at 21 (citing *Angio-Medical Corp. v. Eli Lilly & Co., 720 F. Supp 269 (S.D.N.Y. 1989))*.) Plaintiff relies on *Angio-Medical's* statement that "[l]anguage **[**38]** which merely disparages a product is not actionable unless special damages are pleaded and it appears that such damage is a natural and immediate consequence of the disparaging statements. If, however, the disparaging statements impeach the business methods or integrity of the plaintiff himself, special damages need not be proved as a direct accusation. The action would then qualify as slander per se instead of trade libel." **[*338]** *Angio-Medical, 720 F. Supp. at 269* (citations omitted). As a threshold matter, this language refers to a claim of slander *per se*, not trade libel. The court in *Angio-Medical* went on to hold that special damages must be pled for the plaintiff's trade libel claim. *Id. at 274*. Plaintiff points to no case law that holds otherwise, nor is the Court aware of any such cases. In any event, plaintiff only has alleged disparaging statements about its product, and the amended complaint does not contain allegations regarding business methods or the integrity of the Company itself. Therefore, special damages must be alleged to sufficiently plead a claim for business disparagement.

Finally, to the extent that plaintiff seeks to satisfy its pleading obligations by attaching a **[**39]** list of all of its customers (more than 4,800 in all) and alleging that it lost sales to "many if not all" of them (Am. Compl. P 67; *Id*., Ex. K), such allegations are insufficient to satisfy the "special damages" pleading requirement. *See Fashion Boutique of Short Hills, Inc. v. Fendi USA, Inc., 314 F.3d 48, 59 (2d Cir. 2002)* (***HN22***[] "Where loss of customers constitutes the alleged special damages, the individuals 'who ceased to be customers, or who refused to purchase, must be named,' and the exact damages itemized.") (quoting *Drug Research Corp. v. Curtis Publi'g Co., 7 N.Y.2d 435, 441-42, 166 N.E.2d 319, 199 N.Y.S.2d 33 (1960))*.

In sum, plaintiff has not adequately pled special damages and, therefore, this claim is dismissed without prejudice to replead with itemized damages.

D. Conspiracy Tort Claim

Plaintiff also alleges that "[d]efendants combined and conspired among themselves and with their various third party dealers to interfere with Alternative Electrodes' contracts and prospective business relations and to disparage Alternative Electrodes by engaging in the conduct described above, including, but not limited to, making false statements about Alternative Electrodes' products. Each Defendant agreed and intended to **[**40]** participate in the conspiracy, and engaged in one or more overt acts in the United States or New York, or both, in furtherance of the conspiracy." (Am. Compl. P 78.) Defendants argue that this claim should be dismissed because there is no tort of conspiracy under New York law. Plaintiff argues that, although defendants are correct that no such tort exists, "they

[2] The relevant statute of limitations is one year. *N.Y. C.P.L.R. § 215(3)*.

fail to recognize that New York law does allow plaintiffs to use conspiracy allegations to connect Defendants to the torts alleged in the Complaint." (Plaintiff's Memorandum of Law, at 23.) Plaintiff relies on *Transit Management LLC v. Watson Indus. Inc., 23 A.D.3d 1152, 803 N.Y.S.2d 860, 863 (N.Y. App. Div. 2005)* to support this claim.

As a threshold matter, and as plaintiff's counsel conceded at oral argument, it is axiomatic that ***HN23***[] civil conspiracy cannot be alleged as a separate claim because New York law does not recognize civil conspiracy as an independent tort. *See, e.g., Rivera v. Greenberg, 243 A.D.2d 697, 698, 663 N.Y.S.2d 628 (N.Y App. Div. 1997)* ("[T]he Supreme Court should have dismissed the plaintiff's thirtieth cause of action, which alleges conspiracy to defame, since New York does not recognize civil conspiracy as an independent tort . . . .") **[**41]** (citation omitted); *accord* *Transit Management, 803 N.Y.S.2d at 863* ("it is well established that New York does not recognize civil conspiracy as an independent tort"); *see also* *Treppel v. Biovail Corp., 03 cv 3002 (PKL), 2005 U.S. Dist. LEXIS 18511, at *17 (S.D.N.Y. Aug. 30, 2005)* ("Under New York law, a claim for civil conspiracy may stand only if it is connected to a separate underlying tort."). Therefore, to the extent that plaintiff alleges **[*339]** conspiracy as a separate "fourth cause of action," that separate claim must be dismissed.

However, although it is not permitted as a separate cause of action, allegations of conspiracy may survive in a complaint under certain circumstances. As explained in *Transit Management*, ***HN24***[] "[a]llegations of conspiracy are permitted only to connect the actions of separate defendants with an otherwise actionable tort." (*Transit Management, 803 N.Y.S.2d at 863*) (quoting *Alexander & Alexander of N.Y. v. Fritzen, 68 N.Y.2d 968, 969, 503 N.E.2d 102, 510 N.Y.S.2d 546 (N.Y. 1986))*. Thus, "[w]hile there is no cognizable action for a civil conspiracy, a plaintiff may plead conspiracy in order to connect the actions of the individual defendants with an actionable underlying tort and establish that those **[**42]** acts flow from a common scheme or plan." *American Preferred Prescription, Inc. v. Health Mgmt., Inc., 252 A.D.2d 414, 416, 678 N.Y.S.2d 1 (N.Y. App. Div. 1998)*.

HN25[] To properly plead civil conspiracy for these limited purposes, "a plaintiff must allege both a primary tort and also show the four elements of a conspiracy, namely: (1) a corrupt agreement between two or more parties; (2) an overt act in furtherance of the agreement; (3) the parties' intentional participation in the furtherance of a plan or purpose; and (4) resulting damage or injury." *Fezzani v. Bear, Stearns & Co., 09 cv 0793 (PAC), 592 F. Supp. 2d 410, 2008 U.S. Dist. LEXIS 71943, at *22-*23 (S.D.N.Y. Sept. 22, 2008)*. Plaintiff has satisfied this pleading requirement. (Am. Compl. PP 78-79.) Therefore, although the Court dismisses the conspiracy claim as a separate cause of action, it will permit the conspiracy allegations to remain for the purposes described above.

E. Tortious Interference with Existing and Prospective Economic Advantage

Defendants argue that plaintiff has not sufficiently pled a tortious interference claim because it has not alleged that "but for Defendants' allegedly wrongful behavior plaintiff would have entered a contract with any party." **[**43]** (Defendants' Memorandum of Law, at 23.) Instead, plaintiff alleges that defendants' conduct "was a substantial factor in preventing Plaintiff from entering into such contracts." (Am. Compl. P 72.) Defendants argue that this is insufficient. For the reasons set forth below, the Court agrees.

HN26[] Under New York law, the elements of a claim for tortious interference are that (1) the plaintiff "had a business relationship with a third party; (2) the defendant knew of that relationship and intentionally interfered with it; (3) the defendant acted solely out of malice, or used dishonest, unfair, or improper means; and (4) the defendant's interference caused injury to the relationship." *Carvel Corp. v. Noonan, 350 F.3d 6, 17 (2d Cir. 2003)*. In addition, under New York law, plaintiff must allege that but for defendants' wrongful conduct, plaintiff would have entered into a prospective contract or an existing contract would not have been breached. *Sharma v. Skaarup Ship Management Corp., 916 F.2d 820, 828 (2d Cir. 1990)* ("Intentional procurement of a breach is an essential element of the tort of interference with contractual relations. A plaintiff must allege that there would not have been a breach **[**44]** but for the activities of defendants.") (internal quotations omitted); *Diario El Pais, S.L. v. Nielsen Co., 07 cv 11295 (HB), 2008 U.S. Dist. LEXIS 92987, *22-*23 (S.D.N.Y. Nov. 6, 2008)* ("To render Plaintiffs' tortious interference claim 'plausible,' *[s]ee* *Iqbal, 490 F.3d at 158 (2d Cir. 2007)*, **[*340]** Plaintiffs must provide some factual allegations that but-for Defendant's alleged acts, Plaintiffs would have entered into contracts with specific prospective advertisers or maintained consistent levels of advertising with their existing advertisers.") (citing *School of Visual Arts v. Kuprewicz, 3 Misc. 3d 278, 771 N.Y.S.2d 804, 813 (N.Y. Sup. Ct. 2003)* ("It is well-settled that an essential element of [the intentional interference with prospective economic advantage] tort is that the plaintiff would have consummated a contract with another person but for the interference of the defendant"); *Zhang v. Wang, 05 cv 3888 (FB) (LB), 2006 U.S. Dist. LEXIS 74203, at *5 (E.D.N.Y. Oct. 12, 2006)* ("The plaintiff must also assert the defendant's actions were the 'but for' cause of the alleged breach of contract, that is, that there would not have been a breach but for the activities of the defendant."); *Corporate Training Unlimited v. NBC, 868 F. Supp. 501, 513 (E.D.N.Y. 1994)* **[**45]** ("Under New York law, interference with pre-contractual relations is actionable where a contract would have been entered into but for the malicious, fraudulent, or deceitful acts of a third party."). In arguing that it need only allege that defendants' actions were a substantial factor preventing the completion of a contract, plaintiff relies on *Utility Metal Research, Inc., No. 03 CV 1463 (SLT)(SMG), 2008 U.S. Dist. LEXIS 25095, 2008 WL 850456, at *8 (E.D.N.Y. Mar. 28, 2008)*. *Utility Metal* stated in *dicta* that "[a] plaintiff claiming tortious interference with contract is obligated to establish that intentional acts on the part of a defendant were a substantial factor in the disruption of the contract," citing to a New York state court case from 1972 which explicitly stated that "in order to recover for tortious interference of contract, there had to exist a valid contract between a plaintiff and another, defendant's knowledge of that contract, his intentional interference with or procuring of a breach thereof without justification, and a showing by plaintiff that, *but for his unlawful actions, plaintiff would have received the contract."* *Bryce v. Wilde, 31 N.Y.2d 882, 292 N.E.2d 320, 340 N.Y.S.2d 185 (N.Y. 1972)* (emphasis added). This Court **[**46]** does not find that case to support plaintiff's argument.

In sum, because plaintiff has failed to allege that defendants' alleged tortious interference was a "but for" cause in preventing the contractual relationship with another party, this claim is dismissed. However, the Court will provide plaintiff, if it wishes, an opportunity to re-plead to correct this pleading defect.

F. Breach of Contract

With respect to the breach of contract claim, plaintiff alleges that it entered into a confidential settlement agreement with defendants on August 23, 2007. (Am. Compl. P 105, Ex. G.) According to the amended complaint, defendants agreed to provide plaintiff any "test and/or clinical data showing that [p]laintiff's products are unsafe for use with the VitalStim device; could cause potential legal liability; are unsafe for the treatment of dysphagia using the VitalStim device; or are unsafe for use with the VitalStim device on the anterior portion of the neck." (*Id*. P 106.) Plaintiff alleges that defendants provided no such information, but "[d]espite this lack of data and their binding agreement to refrain from their product disparagement campaign, [d]efendants continue to make false and malicious **[**47]** statements about Alternative Electrodes' products in an attempt to protect their monopoly." (*Id*. P 107; Ex. G. at 4-5.)

Defendants argue that only one of the defendants, Encore Medical -- not Empi, was a party to the August 2007 settlement agreement. Further, the only statements **[*341]** plaintiff alleges violated this agreement were made by Empi, not Encore Medical. (Defendants' Memorandum of Law, at 24.) Plaintiff asserts that "Encore's possession of [the license to sell the VitalStim technology] would likely make Empi Encore's agent so that Encore would be liable for the Empi statements which breached the settlement agreement." (Plaintiff's Memorandum of Law, at 25.) The Court finds the allegations to be sufficient to survive a motion to dismiss.

Further, defendants argue that, even if the statements were made by Encore Medical, nothing in them would violate the settlement agreement. This argument is unavailing. Plaintiff alleges that amended complaint Exhibit E was posted on Empi's website in January 2008. That document states:

> The alternative electrodes are not cleared by the FDA for use with the VS stimulator; they are only cleared for general use. The FDA must clear both stimulator and **[**48]** electrodes for their intended use (treatment of dysphagia) and they have only done so for the VS device and electrodes. This is important because there are no data to support AE's contention that their electrodes are safe to be used with the VS device.
> I know many PT's think that electrodes are just passive devices and have no influence on the safety of treatment, but this is not true. The impedance of the electrodes (much higher for AE) influences how current flows and how the device operates. VitalStim has been proven safe for use on the anterior portion of the neck with the specially designed hardware AND electrodes. The VitalStim electrodes are currently the only

> electrodes that are designed and tested to safely handle the current load and current density of the VitalStim unit without creating hot spots that could potentially injure a patient.

(Am. Compl., Ex. E.) Whether this and/or other statements constitute a breach of the settlement agreement cannot be decided at the motion to dismiss stage of the proceedings in this case. In short, plaintiff has adequately pled a breach of the settlement agreement, and defendants' motion to dismiss this claim is denied.

IV. CONCLUSION

For the **[**49]** reasons stated, defendants' motion to dismiss, pursuant to *Fed. R. Civ. P. 12 (b)(6)*, is granted with respect to plaintiff's state law claims for business disparagement/injurious falsehood, conspiracy (to the extent it is alleged as a separate cause of action), and tortious interference with existing and prospective economic advantage. However, plaintiff may file an amended complaint within 30 days of this Memorandum and Order to address the pleading defects identified by the Court with respect to the business disparagement/injurious falsehood claim and the tortious interference with existing and prospective economic advantage claim. Defendant's motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)* is denied as to all other claims, including the Sherman Act claims.

SO ORDERED.

Opinion

MEMORANDUM OPINION

SIMANDLE, DISTRICT JUDGE:

This matter comes before the Court on Plaintiff Visteon Corporation's ("Plaintiff Visteon" or "Visteon") motion to cure or for reconsideration of the Court's October 7, 2008 Order [Docket Item 136]. THIS COURT FINDS AS FOLLOWS:

1. Plaintiff Visteon seeks to avoid this Court's October 7, 2008 Order, which found that it lacked antitrust standing to bring the claims at issue here. *Emerson Elec. Co. v. Le Carbone Lorraine, S.A., No. 05-6042, 2008 U.S. Dist. LEXIS 80470, 2008 WL 4560716 (D.N.J. Oct. 7, 2008)*. In brief, Plaintiff Visteon, along with the other Plaintiffs in this action, alleges that it purchased electrical carbon products from Defendants at illegally inflated rates as a consequence of Defendants' conspiracy to fix the price of **[*4]** these products. The Court found, over Visteon's protest, that in October, 2005, shortly after commencing the present action, Visteon assigned this antitrust claim to Ford Motor Company ("Ford"). *Emerson Elec., 2008 U.S. Dist. LEXIS 80470, 2008 WL 4560716, at *5*. Plaintiff Visteon now presents an agreement in which Ford has re-conveyed this antitrust claim to Visteon. [1] (Pl. Visteon Ex. A.)

2. The Court will grant Plaintiff Visteon's request for relief from the Court's October 7, 2008 Order and will vacate that Order to the extent it found that Visteon lacks standing to bring this antitrust claim and granted summary judgment against Visteon. In doing so, the Court relies not on *Local Rule 7.1*, but instead on its inherent power to modify or vacate its own interlocutory orders. *Fed. R. Civ. P. 54(b)* ("any order or other decision, however

[1] The Court rejects Defendants' argument that the agreement does not confer standing because it may not have been signed by representatives with authority to transfer the antitrust claim or because the agreement does not specify what consideration Ford received for conveying the claim. The Court agrees with Plaintiff that any lack of authority to bind would make the contract voidable, not void, and Defendants do not have standing to challenge the contract's validity on that ground. *United States v. Baird, 218 F.3d 221, 230 (3d Cir. 2000)*; *Standard Rolling Bearing Co. V. Hess-Bright Mfg. Co., 275 F. 916, 920 (3d Cir. 1921)*; *Residential Reroofers Local 30-B v. A & B Metal & Roofing, Inc., 976 F. Supp. 341, 346 (E.D. Pa. 1997)*. Likewise, the Court will accept as truthful the assertion in the assignment agreement that Ford received **[*5]** "good and valuable consideration" for the exchange and will not require further proof from Plaintiff Visteon on this matter.

designated, that adjudicates fewer than all the claims or the rights and liabilities of fewer than all the parties does not end the action as to any of the claims or parties and may be revised at any time before the entry of a judgment adjudicating all the claims and all of the parties' rights and liabilities"); *John Simmons Co. v. Grier Bros. Co., 258 U.S. 82, 88, 42 S. Ct. 196, 66 L. Ed. 475, 1923 Dec. Comm'r Pat. 669 (1922)* ("the court at any time before final decree may modify or rescind [interlocutory orders]"); *United States v. Jerry, 487 F.2d 600, 605 (3d Cir. 1973)*. "[S]o long as the district court has jurisdiction over the case, it possesses inherent power over **[*6]** interlocutory orders, and can reconsider them when it is consonant with justice to do so." *Jerry, 487 F.2d at 605*.

3. In the present case, the Court finds that the interests of justice, and in particular, the underlying goal of our ***antitrust law*** to deter just the sort of conduct alleged here, call for the reintroduction of Plaintiff Visteon into this litigation. There is no dispute that Visteon purchased the electrical carbon products at issue and, if Plaintiffs' allegations are proven to be true, suffered the injury. Visteon consequently had both constitutional and antitrust standing when this action was brought. See *Gulfstream III Assocs., Inc. v. Gulfstream Aerospace Corp., 995 F.2d 425, 429 (3d Cir. 1993)*. Visteon has consistently maintained that it did not intend to transfer these antitrust claims to Ford, and further, that it did not in fact transfer these claims, and thus did not seek to regain claims it believed were never transferred. Consistent with this Court's October 7, 2008 opinion, however, Visteon has reacquired those claims (still maintaining that they were never transferred) and the Court will permit Visteon to continue in this action now that it has regained antitrust **[*7]** standing. See *Gulfstream, 995 F.2d at 437-40*. An accompanying Order will be entered.

For ECKARD CORPORATION, THE KROGER CO., ALBERTSON'S INC., SAFEWAY, INC., HY-VEE, INC., Consol Plaintiffs: STACEY K. SUTTON, LEAD ATTORNEY, KENNY NACHWALTER, PA, MIAMI, FL.

For NATALIE SUTIN, on behalf of herself and all others similarly situated, Consol Plaintiff: LIONEL Z GLANCY, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, Los Angeles, CA.

For ROSE LIPSCOMB, NEW YORK STATE-WIDE SENIOR ACTION COUNCIL, INC., MASSACHUSETTS SENIOR ACTION COUNCIL, **[*4]** on behalf of themselves and all others similarly situated, Consol Plaintiffs: ALLYN ZISSEL LITE, LEAD ATTORNEY, LITE, DEPALMA, GREENBERG & RIVAS, LLC, NEWARK, NJ.

For GEORGE BURNS, Individually and on behalf of all others similarly situated, Consol Plaintiff: ANDREW ROBERT JACOBS, LEAD ATTORNEY, RAMSEY BERMAN, PC, MORRISTOWN, NJ.

For MILDRED GROSSMAN, on her own behalf and on behalf of all others similarly situated, Consol Plaintiff: C. OLIVER BURT, III, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, BURT & PUCILLO, PC, WEST PALM BEACH, FL.

For LOUISIANA WHOLESALE DRUG CO. INC, on behalf of itself and all others similarly situated, Consol Plaintiff: PETER S. PEARLMAN, LEAD ATTORNEY, COHN, LIFLAND, PEARLMAN, HERRMANN & KNOPF, LLP, SADDLE BROOK, NJ; REBEKAH R. CONROY, WALDER HAYDEN & BROGAN, ROSELAND, NJ.

For UNITED FOOD AND COMMERCIAL WORKERS LOCAL 56 HEALTH & WELFARE DEPARTMENT, on behalf of itself and all others similarly situated, PATRICK J. LYNCH, Consol Plaintiffs: LISA J. RODRIGUEZ, LEAD ATTORNEY, TRUJILLO, RODRIGUEZ & RICHARDS, LLP, HADDONFIELD, NJ; THEODORE M. LIEVERMAN, SPECTOR, ROSEMAN & KODROFF, PC, PHILADELPHIA, PA.

For FRANCES IRENE STEADMAN, Consol Plaintiff: FREDERICK **[*5]** T. KUYKENDALL, III, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, GARDNER, MIDDLEBROOKS, FLEMING, GIBBONS & KITTRELL, PC, BIRMINGHAM, AL; JAMES H MCFERRIN, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, SOUTHEASTERN LEGAL GROUP, BIRMINGHAM, AL; S C MIDDLEBROOKS, III, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, GARDNER, MIDDLEBROOKS, FLEMING & GIBBONS, PC, MOBILE, AL.

For DAWN MAFFEI, Consol Plaintiff: MICHAEL G. NAST, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, RODA & NAST, PC, LANCASTER, PA.

For LEONARD BROWN, Consol Plaintiff: JENNIFER SHARON ABRAMS, JOSEPH J. TABACCO, JR., LEAD ATTORNEYS, COUNSEL NOT ADMITTED TO USDC-NJ BAR, BERMAN, DEVALERIO, PEASE & TABACCO, PC, SAN FRANCISCO, CA.

For ARKANSAS CARPENTERS HEALTH & WELFARE FUND, On its own behalf & on behalf of all others similarly situated, Consol Plaintiff: GREG THOMPSON, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, PROVOST & UMPHREY, BEAUMONT, TX.

For MARY MARGARET PIETSCH individually and on behalf of a class of persons similarly situated, Consol Plaintiff: LYNN L. SARKO, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, KELLER & ROHRBACK, LLP, SEATTLE, WA; RON KILGARD, LEAD ATTORNEY, COUNSEL **[*6]** NOT ADMITTED TO USDC-NJ BAR, DALTON, GOTTO, SAMSON & KILGARD, PLC, PHOENIX, AZ.

For DONALD W. HANNU, on behalf of himself and all others similarly situated, Consol Plaintiff: NEIL A. MCEWEN, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, INVER GROVE HEIGHTS, MN.

For BETTY SAAD, Consol Plaintiff: DIANE A. NYGAARD, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, LEAWOOD, KS.

For EVELYN BARCZAK, ANTHONY DEBELLA, on behalf of himself and others similiarly situated, Consol Plaintiffs: MICHAEL J. FLANNERY, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, CAREY & DANIS, ST. LOUIS, MO.

For AGATHA AGATHA "NIKKI&quo MCCUTCHON, Consol Plaintiff: THOMAS M. SOBOL, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, HAGENS BERMAN SOBOL SHAPIRO LLP, CAMBRIDGE, MA.

For RITE AID CORPORATION, Consol Plaintiff: BARRY L. REFSIN, LEAD ATTORNEY, HANGLEY, ARONCHICK, SEGAL & PUDLIN, PHILADELPHIA, PA; JERRY L. TANENBAUM, LEAD ATTORNEY, SCHNADER HARRISON SEGAL & LEWIS LLP, CHERRY HILL, NJ; STEVE D. SHADOWEN, COUNSEL NOT ADMITTED TO USDC-NJ BAR, HANGLEY ARONCHICK SEGAL & PUDLIN, HARRISBURG, PA.

For COBALT CORP., Consol Plaintiff: CHARLES J. BARNHILL, JR., WILLIAM P. DIXON, LEAD ATTORNEYS, COUNSEL NOT **[*7]** ADMITTED TO USDC-NJ BAR, MINER, BARNHILL & GALLAND, ESQS., MADISON, WI; MARY C. NASH, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, COBALT CORPORATION, MILWAUKEE, WI; RICHARD W. COHEN, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, LOWEY, DANNENBERG, BEMPORAD & SELINGER, ESQS., WHITE PLAINS, NJ.

For CVS MERIDIAN, INC., Consol Plaintiff: BARRY L. REFSIN, LEAD ATTORNEY, HANGLEY, ARONCHICK, SEGAL & PUDLIN, PHILADELPHIA, PA; STEVE D. SHADOWEN, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, HANGLEY ARONCHICK SEGAL & PUDLIN, HARRISBURG, PA.

For ROBERT MITCHELL, Consol Plaintiff: DAVID J. SHEA, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, MANTESE, MILLER & SHEA, PLLC, TROY, MI; KENNETH J. MCINTYRE, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, DICKINSON WRIGHT, ESQS., DETROIT, MI; ROBERT L. MICHELS, LEAD ATTORNEY, COUNSEL NOT ADMITTED TO USDC-NJ BAR, WINSTON & STRAWN LLP, CHICAGO, IL.

Judges: STEPHEN M. ORLOFSKY, SPECIAL MASTER.

Opinion

SPECIAL MASTER'S AMENDED REPORT AND RECOMMENDATION ON DEFENDANTS' MOTIONS FOR SUMMARY JUDGMENT AS TO THE UPSHER AND ESI SETTLEMENTS AND DIRECT PURCHASER

PLAINTIFFS' PARTIAL MOTIONS FOR SUMMARY JUDGMENT AS TO THE APPLICABLE FRAMEWORK FOR [*8] ANALYSIS OF EXCLUSION PAYMENTS AND THE EXCLUSIONARY SCOPE OF THE '743 PATENT

ORLOFSKY, SPECIAL MASTER

I. INTRODUCTION

This consolidated antitrust action has been transferred to the District of New Jersey by the Judicial Panel on Multidistrict Litigation pursuant to *28 U.S.C. § 1407*. Pursuant to *Rule 53 of the Federal Rules of Civil Procedure* [1] and by consent of all parties in the above-captioned action, I have been appointed by order of this Court, dated April 12, 2006, to preside as a Special Master to review and decide all currently pending and future motions directed to Judge Joseph A. Greenaway, Jr. and Magistrate Judge Madeline Cox Arleo including, but not limited to discovery disputes, class certification and summary judgment (the "Appointment Order") (Doc. No. 316). The Appointment Order provides that the decision of the Special Master on any matter before the Special Master will conclusively resolve that matter unless an appropriate objection is filed pursuant to *Fed. R. Civ. P. 53(g)*.

This Report and Recommendation addresses the following Motions: (1) Motion of Defendants Schering-Plough Corporation ("Schering") and Upsher-Smith Laboratories, Inc. ("Upsher) (collectively, "Defendants") for Summary Judgment as to All Claims Brought By Direct Purchaser Plaintiffs ("DP Plaintiffs" or "DPPs") Related to the Upsher Settlement ("Upsher Motion."); [2] (2) Defendants' Motion for Summary Judgment as to All Claims Brought By DPPs Related to the ESI Settlement ("ESI Motion"); [3] (3) DPPs' Motion for Partial Summary Judgment as to the Applicable Framework for Analysis of Exclusion Payments ("Framework Motion"); [4] and (4) DPPs' Motion for Partial Summary Judgment as to the Exclusionary Scope of the '743 Patent ('743 Motion"). [5]

---

[1] **(a) Appointment.**

> **(1)** Unless a statute provides otherwise, a court may appoint a master only to:
>
> > **(A)** perform duties consented to by the parties;
> >
> > * * *
> >
> > **(C)** address pretrial and post-trial matters that **[*9]** cannot be addressed effectively and timely by an available district judge or magistrate judge of the district.

Fed. R. Civ. P. 53(a).

[2] In support of the Upsher Motion, Defendants' submitted an opening Memorandum of Law (accompanied by 125 exhibits attached to the 7/25/08 O'Shaughnessy Decl.) ("Upsher Mem."), a Statement of Undisputed Facts ("Def. Upsher Facts"), a Reply Memorandum of Law in support of the Uphser and ESI Motions (accompanied by 40 exhibits attached **[*10]** to the 10/3/08 O'Shaughnessy Decl.) ("Upsher/ESI Reply"), a Reply to DPPs' Statement of Disputed Facts in Opposition to the Upsher Settlement ("Def. Upsher Reply Facts"), and a 10/21/2008 letter brief regarding a recent Federal Circuit Court of Appeals decision. In response, DPPs submitted a consolidated Memorandum of Law in opposition to the Upsher Motion and the ESI Motion (accompanied by 158 exhibits attached to the 9/5/2008 Refsin Decl.) ("Upsher/ESI Opp."), a Statement of Disputed Facts in Opposition to the Upsher Motion ("DPP Upsher Facts"), and a 10/31/2008 letter brief.

[3] In support of the ESI Motion, Defendants submitted an opening Memorandum of Law (accompanied by 46 exhibits attached to the 7/3/08 O'Shaughnessy Decl.) ("ESI Mem."), a Statement of Undisputed Facts ("Def. ESI Facts"), the Upsher/ESI Reply, a Reply to DPPs' Statement of Disputed Facts in Opposition to the ESI Motion ("Def. ESI Reply Facts") and the above-referenced 10/21/2008 letter brief. In response, DPPs submitted the Upsher/ESI Opp., a Statement of Disputed Facts in Opposition to the ESI Motion ("DPP ESI Facts"), and the above-referenced 10/31/2008 letter brief.

[4] In support of the Framework Motion, DPPs submitted **[*11]** an opening Memorandum of Law (accompanied by four exhibits) ("Framework Mem."), a Statement of Undisputed Facts ("DPP Framework Facts"), and a Reply Brief (accompanied by two appendices with a total of two exhibits) ("Framework Reply"). In response, Defendants submitted a Brief in opposition to the

After consideration of the parties' voluminous submissions in support of and in opposition to the above-referenced Motions, [6] as well as the oral argument of counsel presented on December 10, 2008, I conclude, based on the following analysis, that: (1) Defendants' Motion for Summary Judgment as to All Claims **[*12]** Brought By DP Plaintiffs Related to the Upsher Settlement is granted; (2) Defendants' Motion for Summary Judgment as to All Claims Brought By DP Plaintiffs Related to the ESI Settlement is granted; (3) DP Plaintiffs' Motion for Partial Summary Judgment as to the Applicable Framework for Analysis of Exclusion Payments is denied; and (4) DP Plaintiffs' Motion for Partial Summary Judgment as to the Exclusionary Scope of the '743 Patent is denied.

II. BACKGROUND

This action involves the drug K-Dur 20, a potassium chloride supplement manufactured by Schering. Schering entered into separate agreements with Upsher and ESI Lederle ("ESI") settling patent litigation that Schering had initiated after Upsher and ESI sought approval from the Food and Drug Administration ("FDA") for their generic versions of K-Dur. The gravamen of DP Plaintiffs' Complaint is that Schering's settlements with Upsher and ESI were collusive, anticompetitive agreements that had the effect and purpose of preventing and delaying the entry of generic substitutes for K-Dur and allowing **[*13]** Schering to maintain a monopoly in the extended release potassium chloride supplement market. (DPP Am. Compl., P 1). *See also In re K-Dur Antitrust Litigation, 338 F. Supp. 2d 517, 522, 526 (D.N.J. 2004)*. Plaintiffs allege that but for payments made by Schering to Upsher and ESI under the agreements, Upsher and ESI would have settled on different terms and their generic products would have entered the market earlier than was permitted under the settlements. (DPP Am. Compl. at PP 1, 109). *See also In re K-Dur, 338 F. Supp. 2d at 526*.

As is evident from the discussion to follow, this case involves complex legal and factual issues at the intersection of patent and ***antitrust law***. Accordingly, before analyzing the parties' motions, it is necessary to outline the regulatory, factual and procedural contexts in which the issues presented arise.

A. Statutory and Regulatory Framework

A pharmaceutical company must obtain FDA approval to market a prescription drug. *21 U.S.C. § 355(a)*. In order to obtain approval for a pioneer drug, a company must submit a New Drug Application ("NDA"), which details all safety and efficacy studies, the components in the drug, the methods used in "the manufacture, **[*14]** process and packaging" of the drug, and any patents issued on the composition or methods of using the drug. *Id.* at *§ 355(b)(1)*. The FDA publishes the patent information in the "Approved Drug Products with Therapeutic Equivalence Evaluations," otherwise known as the "Orange Book." *See* FDA Electronic Orange Book, http://www.fda.gov/cder/ob/.

Prior to 1984, a generic drug company also had to undertake its own costly studies regarding the efficacy and safety of a drug, even if the drug was a bioequivalent of a brand name drug already on the market. *See Schering-Plough Corp. v. Fed. Trade Comm'n, 402 F.3d 1056, 1058-59 n.2 (11th Cir. 2005)*, *cert. denied, 548 U.S. 919, 126 S. Ct. 2929, 165 L. Ed. 2d 977 (2006) ("Schering")* (explaining the NDA process and indicating its potential cost). The generic was then required to file its own NDA for its version of the drug. The generic company could not begin testing the drug until after the patent life on the brand-name drug expired, since before that time the pioneer

---

Framework Motion (accompanied by 14 exhibits attached to the 9/5/08 O'Shaughnessy Decl.) ("Framework Opp.") and a Counterstatement of Material Facts ("Def. Framework Facts").

[5] In support of the '743 Motion, DPPs submitted an opening Memorandum of Law (accompanied by 15 exhibits ("'743 Mem."), a Statement of Undisputed Facts ("DPP '743 Facts"), and a Reply Brief (accompanied by two exhibits) ("'743 Reply"). In response, Defendants' submitted a Brief in Opposition to the '743 Motion accompanied by seven exhibits ("'743 Opp."), and a Counterstatement of Material Facts a ("Def. '743 Facts").

[6] The parties' summary judgment submissions include more than 400 pages of briefs and factual statements and a total of more than 400 exhibits.

company could sue the generic for patent infringement. *See* 35 U.S.C. § 271 (2000) (stating that making or using a patented compound is an act of infringement).

In 1984, Congress enacted the Drug Price Competition & Patent **[*15]** Term Restoration Act, commonly known as the Hatch-Waxman Act, Pub. L. No. 98-417, 98 Stat. 1585 (codified at various sections of titles 21 and 35 of the United States Code). Among its key provisions, the Hatch-Waxman Act: (1) created the Abbreviated New Drug Application ("ANDA"), which allows a generic drug applicant to piggyback on safety and efficacy studies conducted for the pioneer drug, *see generally* 21 U.S.C. § 355(j); (2) modified the definition of infringement, so that the conduct of safety and efficacy studies for FDA approval is no longer infringing activity, *see generally* 35 U.S.C. § 271(e); and (3) allowed the extension of patent terms to compensate for the period when a patented drug could not be marketed because it was undergoing the FDA approval process. *See generally* 35 U.S.C. § 156.

Under the The Hatch-Waxman Act, the pioneer drug maker still files a NDA with full-scale safety and efficacy studies and lists the patents that generics might infringe in the future. 21 U.S.C. § 355(b)(1) (enumerating NDA provisions). However, a generic company may file an ANDA, which requires the generic to prove that the new drug is the bioequivalent of a brand-name drug on the market, **[*16]** but does not require the time-consuming studies required for a NDA. *Id.* at § 355(j)(2)(A) (listing the ANDA provisions). *See also* Schering, 402 F.3d at 1058-59 n.2 (generics can use a "truncated" process, "so long as the generic manufacturer proves that its drug is a bio-equivalent to the already-approved brand name/pioneer drug"); Herbert Hovenkamp et al., *Anticompetitive Settlement of Intellectual Property Disputes ("Hovenkamp ")*, 87 Minn. L. Rev. 1719, 1753 (2003) (listing ANDA provisions and noting that generic must be bioequivalent of pioneer drug). Further, the generic may begin testing before the pioneer's patent expires. 35 U.S.C. § 271(e)(1).

Under the Hatch-Waxman Act, an ANDA filer must make one of the following certifications: (1) that the "patent information has not been filed" on the generic's brand-name equivalent (a paragraph I certification); (2) that a "patent [on the branded drug] has expired" (a paragraph II certification); (3) that a brand-name patent exists, "the date on which such patent will expire," with a promise not to market until that date (a paragraph III certification); or (4) "that such patent is invalid or will not be infringed by the manufacture, use, **[*17]** or sale of the new drug for which the application is submitted." (a paragraph IV certification). 21 U.S.C. § 355(j)(2)(A)(vii) (emphasis added).

If the ANDA filer makes a paragraph IV certification, it must consult the Orange Book and provide notification to each NDA or patent owner impacted by the ANDA certification "not later than [twenty] days after the date of the postmark on the notice with which the Secretary informs the applicant that the application has been filed." *Id.* at § 355(j)(2)(B)(ii)(I). The filing of an ANDA with a paragraph IV certification allows the patent holders to sue, as it is considered a technical act of infringement, even though the generic has not yet begun marketing its version of the drug. *See* Stephanie Greene, *A Prescription for Change: How the Medicare Act Revises Hatch-Waxman to Speed Market Entry of Generic Drugs,* 30 J. Corp. L. 309, 317 (2005) (noting that paragraph IV certification is a technical act of infringement because the generic intends to market and infringe the patent). The patent owners then have 45 days to bring an infringement suit against the generic. If the affected patent owners do not file suit, the FDA **[*18]** can approve the ANDA without delay. 21 U.S.C. § 355(j)(5)(B)(iii). However, if an affected patent owner brings an infringement suit, approval of the application is automatically stayed for thirty months, or until a district court issues a final decision concluding that the patent has not been infringed or is otherwise invalid. *Id.*

In order to give generic drug makers an incentive to incur the expense and risk of a potential infringement suit by the patent holder, the ANDA procedures give the first ANDA filer a 180-day exclusivity period. *Id.* at 355(j)(5)(B)(iv). During this exclusivity period, the FDA cannot approve any other generic manufacturer's ANDA until 180 days after the earlier of (1) the date of the first ANDA filer's commercial marketing of its generic drug; or (2) the date of a "court [decision ruling] that the patent is invalid or not infringed." [7] *Id* at 355(j)(5)(B)(iii)(I).

---

[7] Prior to 2000, this was calculated from a "final judgment from which no appeal can be or has been taken." 21 C.F.R. § 314.107(e)(1) (1999). Now, a district court decision is sufficient. Mylan Pharms., Inc. v. Shalala, 81 F. Supp. 2d. 30 (D.D.C. 2000). Also, prior to 1998, FDA regulations had required **[*19]** that ANDA filers would not get the 180-day exclusivity unless they had successfully defended the patent infringement suit. *See* 59 Fed. Reg. 50,338,367 (Oct. 3, 1994). The "successful

B. Factual and Procedural Background [8]

1. The Parties

The DP Plaintiff Class, represented by lead Plaintiff Louisiana Wholesale Drug, is essentially comprised of all persons or entities who purchased K-Dur 20 directly from Schering during the period November 20, 1998, through September 1, 2001. [9] The Class includes wholesalers, hospitals, health maintenance organizations and retail drug store chains.

Schering is a New Jersey corporation engaged in the discovery, development and marketing of, *inter alia,* brand name and generic drugs. Upsher is a Minnesota corporation engaged in the discovery, development and marketing of brand name and generic drugs. Former Defendant Wyeth Laboratories ("Wyeth"), formerly known as American Home Products, Inc. ("AHP"), is a Delaware corporation engaged in the development, manufacturing and marketing of, *inter alia,* brand name and generic drugs. **[*21]** Former Defendant ESI is a business unit of Wyeth that engages in the research, manufacture and sale of generic drugs. [10]

2. K-Dur and the '743 Patent

During the time period relevant to the DP Plaintiffs' claims, Schering marketed a potassium chloride supplement under the brand name K-Dur. (DPP Upsher Facts, P 1). [11] K-Dur is used to treat potassium deficiencies such as those that often arise from the treatment of high blood pressure with diuretic products. (DPP '743 Facts, P 1; Def. '743 Facts, P 1). Although the active ingredient in K-Dur -- potassium chloride -- is not patented, K-Dur is covered by a formulation patent, No. 4,863,743 (the "'743 Patent"), owned by Key Pharmaceuticals, Inc. ("Key"), a division of Schering. (Schering Ans. to DPP Am. Compl., P 23-24). The '743 Patent, which claims a controlled-release

---

defense" requirement was subsequently found to be unreasonable, *Mova Pharm. Corp. v. Shalala, 329 U.S. App. D.C. 341, 140 F.3d 1060, 1069-70 (D.D.C. 1998)*, and the FDA dropped the requirement in 1998. *See* *63 Fed. Reg. 59,710,711 (Nov. 5, 1998)*.

[8] The facts pertinent to the current motions are drawn primarily from the parties' pleadings and their respective statements filed pursuant to *Local Rule 56.1* Unless otherwise indicated, the facts set forth below are not in dispute.

[9] On April 14, 2008, I issued a Report and Recommendation (the "April 14 R&R") recommending that DP Plaintiffs' Motion for Class Certification be granted and the following **[*20]** Class certified:

> All persons or entities who have purchased K-Dur 20 directly from Schering at any time during the period November 20, 1998, through September 1, 2001.
>
> Excluded from the proposed class shall be:
>
> Defendants and their officers, directors, management and employees, subsidiaries and affiliates, as well as federal government entities. Also excluded are persons or entities who have not purchased generic versions of K-Dur 20 after the introduction of generic versions of K-Dur 20.

(April 14 R&R, Doc. No. 636). On December 30, 2008, Judge Greenaway overruled the objections of Defendants and DP Plaintiffs to the April 14 R&R and adopted the R&R as the opinion of the Court. (Dec. 30, 2008 Order, Doc. No. 731).

[10] On January 24, 2005, Judge Greenaway granted final approval of a settlement between DP Plaintiffs and Wyeth. (Jan. 24, 2005 Order, Doc. No. 226). As part of the settlement, DP Plaintiffs agreed to the release and dismissal with prejudice of all claims against Wyeth and its related entities, including ESI. (DPP/Wyeth Settlement Agreement, Doc. 170-3).

[11] In the interest of brevity, the record citations herein regarding the factual background refer to the parties' statements filed pursuant to *Local Rule 56.1* and, unless necessary, do not separately identify each exhibit cited by the parties in their statements of fact. In addition, because the DPP Upsher Facts and the DPP ESI Facts restate each paragraph of Defendants' Upsher Facts and EST Facts, it is not necessary to cite separately to Defendants' Upsher Facts and ESI Facts.

dispersible potassium **[*22]** chloride tablet, was issued on September 5, 1989 and expired on September 5, 2006. (Schering Ans. to DPP Am. Compl. at P 24; DPP Uphser Facts, P 9).

The '743 Patent has 12 claims, all of which depend on or incorporate Claim 1. (DPP Upsher Facts, P 49; DPP '743 Facts, P 12; Def. '743 Facts, P 12). Claim 1 of the '743 Patent states:

> A pharmaceutical dosage unit in tablet form for oral administration of potassium chloride, comprising;
> a plurality of coated potassium chloride crystals, the amount of potassium chloride being in the range of about 64% to about 86.5% by weight based on the total weight of the dosage unit;
>
> a coating material for the individual potassium chloride crystals, the coating material comprising **[*23]** ethylcellulose in the amount in the range of about 9% to about 15% by weight based on the total weight of the coated crystals and at least one member selected from hydroxypropylcellulose and polyethylene glycol in an amount in the range of about 0.5% to about 3% by weight based on the total weight of the coated crystals and said ethylcellulose has a viscosity greater than 40 cp.

('743 Mem., Ex. 1 ('743 Patent) at Col. 8, line 18-Col. 10, line 21). With regard to tablets, the '743 Patent specification states, *inter alia,* "[t]he useful ethylcellulose designations are 7 and higher, corresponding to a viscosity of at least 6 cp, preferably more than 40 cp (designations 45 or higher) for crystals to be compressed into tablets." *(Id.* at Col. 4, lines 63-66).

3. <u>Development and Prosecution of the '743 Patent</u>

The sustained release potassium chloride tablet claimed in the '743 Patent was developed at Key by Charles Hsiao and Chi-Tze Chou using a technique called "microencapsulation." (DPP Upsher Facts, P 4). Microencapsulation is a process in which small particles of a drug are coated to give them sustained release properties. (DPP Upsher Facts, P 5). Tableting exposes the coated microcapsules **[*24]** to compression forces as the individual crystals are compressed into a tablet. *(Id.).* Dr. Hsiao and Ms. Chou used a coating consisting of insoluble ethylcellulose ("EC") with a viscosity of greater than 40 centipoise ("cp") and either hydroxypropylcellulose ("HPC") or polyethylene glycol ("PEG"). (DPP Upsher Facts, P 8). Viscosity is a property of fluid that refers to its resistance to flow. (DPP '743 Facts, P 14; Def. '743 Facts, P 14). The addition of HPC or PEG permits the potassium chloride to leach out through the EC coating. *(Id.).*

The '743 Patent issued from patent application No. 830,981 (the "'981 application"), filed February 19, 1986. (Schering Ans. to DPP Am. Complaint, P 29). The '981 application was a continuation-in-part of application No. 702,714 (the '714 application"), filed February 19, 1985. (DPP '743 Facts, P 19; Def. '743 Facts, P 19). As originally filed, Claim I of the '981 application did not contain any limitation on the viscosity grade of the ethylcellulose used in the coating material. (DPP Upsher Facts, P 50). In addition, as originally filed, Claim I described a "dosage unit" for oral administration of potassium chloride, and was not limited to a tablet **[*25]** dosage form. *(Id.).*

On August 31, 1988, the Patent and Trademark Office ("PTO") rejected the then-pending claims of the '981 application based on Patent No. 4,555,399 (the '399 Patent") and other prior art. (DPP '743 Facts, P 28; Def. '743 Facts, P 28). The '399 Patent had previously been granted to Dr. Hsaio for a controlled release tablet aspirin tablet in which aspirin crystals are coated with EC and HPC and compressed into tablet form. (DPP Upsher Facts, P 51; DPP '743 Facts, P 23; Def. '743 Facts, 23). Example 1 of the '399 Patent describes the use of Ethocel N-10 (Dow), an EC with a viscosity of 9-11 cp. (Upsher/ESI Opp., Ex. 167 ('399 Patent) at Col. 3, line 8; '743 Mem., Ex. 2 (Feb. 27, 1989 Amendment) at 5). However, DP Plaintiffs dispute that the '399 Patent limited the claimed invention in any way to 9-11 cp ethylcellulose. (DPP Upsher Facts, P 51).

After the PTO's August 31, 1988 rejection, Key filed a response that included an amendment to Claim 1 and arguments in support of patentability. (DPP Upsher Facts, P 52). Key amended Claim 1 by specifying that the invention was a "tablet" and by adding the phrase "said ethylcellulose has a viscosity greater than 40 cp" at the end **[*26]** of Claim 1. (DPP Upsher Facts, P 52-53; '743 Mem., Ex. 2 (Feb. 27, 1989 Amendment) at 1-2). In its remarks accompanying the amendment, Key stated, *inter alia,* that "the claims have been amended to more precisely define the claimed invention," and argued that a review of the prior art '399 Patent would not lead one skilled in the art to use EC with a viscosity of greater than 40 cp to make a sustained release potassium chloride tablet as claimed in the '981 application. (DPP Upsher Facts, P 54). Key further stated that the prior art '399 Patent disclosed only EC with a viscosity of 9-11 cp. *(Id.).* On March 31, 1989, the Patent Examiner granted Key the '743 Patent. (DPP Upsher Facts, P 55).

4. The Upsher Patent Litigation

On August 8, 1995, Upsher filed an ANDA with the FDA seeking permission to sell a generic version of K-Dur. (DPP Upsher Facts, P 12). Upsher's generic product, Klor-Con(c) M20, was a microencapsulated, controlled release 20mEq potassium chloride tablet. *(Id.* at 13). Upsher certified to the FDA that its product was bioequivalent to K-Dur and stated that its product was "the same as the reference drug, K-DUR." *(Id.* at 15-16). In its November 3, 1995 paragraph IV Certification **[*27]** Notice to Schering, Upsher claimed that its generic drug would not infringe the '743 Patent. (DPP Upsher Facts, P 17). Specifically, Upsher asserted that its product did not infringe Key's product because: (1) "the viscosity of ethyl cellulose employed in KLOR-CON(c) M is outside the range limited by claim 1 of the '743 patent;" and (2) "[t]he KLOR-CON(c) M product does not contain hydroxypropylcellulose." (Upsher Mem., Ex. 17 (Nov. 13, 1995 Patent Certification Notice) at 8-9). [12] Uphser's product used sorbitan monooleate ("SMO"). (DPP Upsher Facts, P 18). Upsher disputes "any implication that it used SMO in place of HPC or PEG," and disputes that the SMO used in Upsher's product was present in an amount corresponding to the claimed amount of HPC or PEG required by the claims of the '743 Patent. *(Id.).* In its Patent Certification Notice, Upsher also asserted that because, in its amendment of Claim 1, Key inserted a limitation of viscosity for EC of greater than 40 cp, prosecution history estoppel precluded Key from "assert[ing] the doctrine of equivalents in alleging that the KLOR-CON(c) M product infringes its claims." (Upsher Mem., Ex. 17 (Nov. 13, 1995 Patent Certification Notice) at 9-13).

On December 15, 1995, Key filed an action in the United States District Court for the District of New Jersey against Upsher alleging "willful and deliberate" infringement of the '743 Patent. (DPP Upsher Facts, P 19). The case was assigned to Judge Walls. *(Id.* at P 23). Key's action was timely commenced within the 45-day period specified in the Hatch-Waxman Act. *(Id.* at P 19). Upsher answered Key's complaint, denying infringement and alleging declaratory judgment counterclaims for patent invalidity, non-infringement and unenforceability. *(Id.* at P 23).

Discovery in the case included the exchange of tens of thousands of pages of documents and depositions of the inventors and patent attorneys from Key and Schering, as well as of the Upsher technical people and consultants who developed the Upsher formulation. *(Id.* at P 24). Schering retained as an expert, Dr. Gilbert S. Banker, dean of the University of Iowa College of Pharmacy. *(Id.* at P 25). Key retained as its technical expert, Dr. Christopher Rhodes, a co-editor with Dr. Banker of the textbook, **[*29]** *Modern Pharmaceutics. (Id.* at P 27). Drs. Banker and Rhodes each submitted expert reports, and both were deposed for multiple days. *(Id.* at P 28, 30). Dr. Banker opined that the '743 Patent was valid and infringed by Upsher's product; Dr. Rhodes opined that the '743 Patent was invalid and that the Upsher formulation was not equivalent to the claims of the '743 Patent. *(Id.* at 29).

On February 6, 1997, Upsher moved for summary judgment on the issue of non-infringement. *(Id.* at P 31). Upsher argued that Key was barred by prosecution history estoppel from claiming that the Upsher product was equivalent to the '743 Patent, and that no factual equivalency existed between its generic product and the claims of the '743 Patent. *(Id.* at P 31). In opposition to the Motion, Key argued that it was not barred by prosecution history estoppel from asserting equivalency, and that factual disputes existed regarding whether Upsher's formulation was equivalent to the '743 Patent. *(Id.* at P 32). Key separately moved for summary judgment on Upsher's affirmative defenses that the '743 Patent was unenforceable based on inequitable conduct before the PTO. *(Id.* at 34). Upsher opposed Key's motion on the ground **[*30]** that fact disputes concerning the alleged inequitable conduct precluded summary judgment. *(Id.* at P 35).

---

[12] Upsher's **[*28]** Patent Certification Notice also stated that "the KLOR-CON(c) M product does not contain magnesium stearate of polyvinylpyrolidone." *(Id.* at 9).

On June 17, 1997, Judge Walls held a hearing on certain motions, including Upsher's motion for summary judgment. ("743 Mem., Ex. 9). Trial in the **Key v. Upsher** matter was scheduled to being on June 18, 1997.

5. The Upsher Settlement

Upsher initiated contact with Schering to discuss settlement of the patent litigation. (DPP Upsher Facts, P 68). The first settlement meeting took place on May 21, 1997, with subsequent discussions between the parties occurring on May 28, June 3, and June 12, and June 16, 1997. (DPP Upsher Facts, PP 197, 199, 205; Def. Upsher Reply Facts, PP 197, 199, 205). In the early morning hours of June 18, 1997, the parties signed and finalized an agreement, dated June 17, 1997 (the "June 17 Agreement"), "as to the terms under which [Upsher and Schering, on behalf of itself and Key] will settle the *[Key v. Upsher]* action and will enter into a transaction licensing rights to certain Upsher-Smith products to an affiliate of Schering." (DPP Upsher Facts, P 208; Def. Upsher Reply Facts, P 208; Upsher Mem., Ex. 61 (June 17, 1997 letter from Raman Kapur to Ian Troup) at p. 1).

The **[*31]** terms of the June 17 Agreement pertinent to the instant Motions provided that: (1) Upsher would not market its Klor-Con(c) M20 product, or any other sustained release microencapsulated potassium chloride tablet, prior to September 1, 2001; (2) effective September 1, 2001, Schering would grant Upsher a non-royalty bearing non-exclusive license to market its Klor-Con(c) M20 and Klor-Con(c) M10 product in the United States; (3) Upsher would grant Schering licenses to Upsher's Niacor-SR(c) and five other Upsher products; [13] and (4) "[i]n consideration for the licenses, rights and obligations described in paragraphs 1 through 10" of the agreement, Schering would pay to Upsher a total of $ 60 million, comprised of $ 28 million payable upon approval of the agreement by Schering's Board of Directors, $ 20 million on the first anniversary of the approval date, and $ 12 million on the second anniversary of the approval date. [14] (Upsher Mem., Ex. 61 (June 17 Agreement) at PP 3, 7-11).

The parties dispute the facts regarding the *bona fides* of the Niacor-SR(c) license deal and the reasons it was included in the June 17 Agreement. DP Plaintiffs contend that the deal was effectively a sham and that all or part of the $ 60 million paid to Upsher by Schering under the Agreement was really for Upsher's agreement to delay the entry of its generic K-Dur. (Uphser Opp., pp. 37-66; DPP Upsher Facts, PP 72-106, 192-277). Schering contends that the Niacor-SR(c) license was a separately valued deal, that the $ 60 million was a good faith payment for rights Schering believed -- in its business judgment at the time -- were worth $ 60 million, and that the deal was included in the June 17 Agreement only after Schering was satisfied that the deal stood on its own merit. (Upsher Mem., pp. 41-66; Upsher/ESI Reply, pp. 18-27; DPP Upsher Fact, PP 72-106; **[*33]** 192-277).

6. The ESI Patent Litigation and Settlement

On December 29, 1995, ESI sought FDA approval to market a generic version of K-Dur. (DPP ESI Facts, p 3; Schering Ans. to DPP Am. Complaint, P 78). ESI's product was a sustained release tablet for oral administration of potassium chloride. It used the ingredients potassium chloride, EC and HPC in amounts within the ranges specified by Claim 1 of the '743 Patent. (DPP ESI Facts, P 4). ESI submitted a Paragraph IV Certification and notified Schering of its Paragraph IV Certification and ANDA filing. (Schering Ans. to DPP Am. Complaint, P 78).

On February 16, 1996, Schering (through Key) sued ESI in the United States District Court for the Eastern District of Pennsylvania, alleging that ESI's generic product infringed the '743 Patent. (DPP ESI Facts, P 5; Schering Ans.

---

[13] The five other Upsher products were KLOR CON(c) 8, KLOR CON(c) 10, KLOR CON(c) M20, PREVALITE(c), and Pentoxifylline. (Upsher Mem., Ex. 61 (June 17 Agreement) at PP 7-10).

[14] The Agreement also provided for milestone **[*32]** and royalty payments contingent upon Schering's sales of Niacor-SR(c). Subsequent to the June 17 Agreement, Schering decided not to pursue the Niacor-SR(c) opportunity, and Schering never marketed the drug. However, the facts regarding the reasons for Schering's decision are disputed. (DPP Am. Compl., P 74; Schering Ans. to Am. Compl., P 74).

to DPP Am. Compl., P 80). ESI argued that its product did not literally infringe the "743 Patent because ESI's product did not have a "coating material with different ingredients" as required by the '743 Patent. (ESI Opp., Ex. 145 (ESI Reply Mem. in Support of Defendant's Mot. for a Markman Ruling on Patent Claim Construction and/Or for Partial Summary Judgment of No Literal **[*34]** Infringement and Response to Plaintiff's Cross Motion) at p. 2). ESI stated that its "tablets are made by a completely different technology which produces a multi-layered coating with each layer comprised of a separate material having only a single ingredient." *(Id.* at p. 13).

In the Fall of 1996, Schering and ESI agreed to engage in court-supervised mediation. (DPP ESI Facts, P 7). The mediation session was suggested by the presiding District Judge, the Hon. Jan DuBois, to whom the case was assigned. *(Id.).* U.S. Magistrate Judge Thomas Rueter was appointed mediator. *(Id.).* During the mediation sessions, Magistrate Judge Rueter met with the parties both jointly and separately and urged them to settle. *(Id.* at P 8).

In December 1997, Schering obtained information from ESI concerning problems ESI had encountered in demonstrating the bioequivalence of its generic product to K-Dur, as required for approval of ESI's ANDA. (DPP Upsher Facts, P 9; Def. ESI Reply Facts, P 9; ESI Mem., Ex. 13 (Dec. 15, 1997 letter, AHP 05 00175)). The information showed that the FDA had twice rejected ESI's bioequivalence studies and that ESI's most recent effort to conduct a trial showing bioequivalence had **[*35]** begun on December 8, 1997. *(Id.).* Also in mid-December 1997, the parties discussed a proposed settlement whereby Schering would grant ESI a royalty free license to market its generic Micro-K(R) 20 product on December 31, 2003, and ESI would grant Schering licenses for certain ESI products in exchange for a $ 5 million up-front royalty fee plus additional royalty fees based on sales of the products. (DPP ESI Facts, PP 10-11; Def. ESI Reply Facts, PP 10-11).

Judge DuBois held a Markman hearing on January 21 and 22, 1998. (DPP ESI Facts, P 13). At the close of the January 22, 1998 session of the hearing, Judge DuBois told the parties:

> I want you to take this business decision, and it is a business decision and decide it without any more help than you're getting from Judge Rueter. I don't want you to use the adjudicatory powers of the Court.
> We're talking about the conciliatory services that the Court offers, and that's what I want you to use to resolve the case. I don't want to have to adjudicate either this case or the two-week long or longer trial of this case. I want you to try to do it.
>
> I think that's the best way to resolve a dispute of this kind, particularly since I think you can craft **[*36]** a settlement among yourselves.

(ESI Mem., Ex. 17 (Jan. 22, 1998 Tr.) at 139). At the end of the hearing, after summoning the parties to his chambers, Judge DuBois directed the parties to Magistrate Judge Rueter to try to settle the case. (DPP ESI Facts, P 13; ESI Mem., Ex. 18 (Herman 10/30/01 Dep.) at 129-130). [15]

The parties had another mediation session with Magistrate Judge Rueter on Friday, January 23, 1998, which began around 5:30 p.m. and continued until 11:30 p.m. (DPP ESI Facts, P 14). Participating in all or part of the session were three of Schering's counsel and one Schering executive, Martin Driscoll, who participated by phone in parts of the session while attending a New Jersey Nets basketball game with his children. *(Id.).* By the time of the January 23, 1998 mediation session, the parties had agreed to a $ 15 million license from ESI to Schering for ESI's two generic products, and ESI had indicated that it required money to settle the case. (DPP ESI Facts, P 15).

---

[15] In their Statement of Disputed Facts, DP Plaintiffs have asserted that certain of the statements cited in Defendants' Statement of Facts regarding the ESI Settlement are inadmissible hearsay. In this regard, I note that hearsay statements may be considered on summary judgment if the statements are capable of being admissible at trial. *Shelton v. Univ. of Med. & Dentistry, 223 F.3d 220, 223 n.2 (3d Cir. 2000)*. Moreover, to the extent that the statements are offered not to show the truth of the matter asserted, but to demonstrate their effect on the listener, they may be admissible. *See Marks v. Marina, 213 Fed. Appx. 147, 2007 U.S. App. LEXIS 479, at *10-11 (3d Cir. Jan. 10, 2007)* (court properly admitted evidence offered not for its truth, but to show the effect on the listener); *Faulkner v. Super Valu Stores, Inc., 3 F.3d 1419, 1434 (10th Cir. 1993)* ("statements offered for the effect on the listener **[*37]** . . . are generally not hearsay.").

Magistrate Judge Rueter encouraged Schering to pay ESI $ 5 million, which he characterized as "nothing more than legal fees." (DPP ESI Facts, P 16-17). During the January 23, 1998 mediation session, Magistrate Judge Rueter called Mr. Driscoll three times at the basketball game. In those calls, Magistrate Judge Rueter told Mr. Driscoll that he had been instructed by the court to reach a settlement that night and that if the parties did not reach a settlement that night, the judge wanted the parties **[*38]** in court at 8 a.m. the next day. (DPP ESI Fact, P 16-18; ESI Mem., Ex. 12 (FTC Trial Tr.) at 2707-11; ESI Mem., Ex. 19 (Driscoll Dep.) at 295; ESI Mem., Ex. 20 (Driscoll I.H. Tr.) at 105-7). Magistrate Judge Rueter also called John Hoffman, Schering's then in-house antitrust counsel, at home and asked Schering to pay ESI $ 5 million. (DPP ESI Facts, P 17; ESI Mem., Ex. 10 (Hoffman Dep.) at 328, 330; ESI Mem., Ex. 11 (FTC Trial Tr.) at 2618-20). Prior to and during the mediation, ESI requested more than $ 5 million to settle the case. (DPP ESI Facts, P 18).

During the January 23 session, Magistrate Judge Rueter urged Mr. Driscoll to settle and emphasized that he thought the parties could reach a middle ground. (DPP ESI Facts, P 18; ESI Mem., Ex. 12 (FTC Trial Tr.) at 2707-11). Mr. Driscoll expressed his belief that ESI might have difficulty getting its product approved and discussed with Magistrate Judge Rueter a proposal under which Schering would pay ESI a certain amount if ESI's ANDA was approved by a certain date, and a lesser amount if ESI received approval at a later date. (DPP ESI Facts, P 19; ESI Mem., Ex. 19 (Driscoll Dep.) at 295-96; ESI Mem., Ex. 12 (FTC Trial Tr.) at 2711-12). **[*39]** Magistrate Judge Rueter discussed the proposal with Mr. Hoffman, and characterized it as a "bet." (DPP ESI Facts, P 21; ESI Mem., Ex. 11 (FTC Trial Tr.) at 2620). Regarding Schering's doubt that ESI would receive FDA approval, Magistrate Judge Rueter told Mr. Hoffman that he should "put [his] money where [his] mouth is," and stated that if Schering's concern was correct, the proposal wouldn't cost Schering anything. (DPP ESI Facts, P 22; ESI Mem., Ex. 11 (FTC Trial Tr.) at 2621).

The January 23, 1998 mediation session concluded with the parties' agreement that Schering would pay ESI $ 10 million if its ANDA was approved by July 1999, with Schering's payment incrementally decreasing to $ 625,000 if ESI's ANDA was approved in 2002. (ESI Mem., Ex. 16 (C+B-2 002196-97) at P II). The parties further agreed that Key would grant ESI a "royalty free, non-exclusive license under US Patent '743 beginning 1/1/04." *(Id.* at P VI). Once the terms had been agreed to by Schering and ESI, Magistrate Judge Rueter called the participants into chambers and asked them to put the terms in writing and initial or sign them. (DPP ESI Facts, 24; ESI Mem., Ex. II (FTC Trial Tr.) at 2621). Counsel for ESI prepared **[*40]** a handwritten document summarizing the settlement principles. (ESI Mem., Ex. 16 (C+B-2 002196-97); ESI Mem., Ex. 8 (FTC Trial Tr.) at 2488-89; 2537). The document was prepared, and was signed by representatives of Key and ESI, in the presence of Magistrate Judge Rueter. *(Id.).*

Schering and ESI signed a formal settlement agreement in June of 1998. (DPP ESI Facts, P 26). Among its terms, the Agreement provided that: (1) Key would grant to ESI a non-exclusive, royalty-free license, effective January 1, 2004, to market a "Referencing Product" [16] (ESI Mem., Ex. 24 (Settlement Agreement) at P 3.1(a)(i)); (2) except with respect to a Referencing Product for which ESI was permitted to seek FDA approval pursuant to the Agreement, ESI would not, prior to the expiration of the '743 Patent: (i) apply for, sponsor or support an application for AB rating for any potassium chloride product with respect to K-Dur, or (ii) conduct, sponsor, file or support a substitutability or equivalence study of a potassium chloride product with respect to K-Dur *(id.* at P 2.9); and (3) Key would pay to ESI $ 5 million plus an additional sum ranging from $ 10 million, if ESI's ANDA received FDA approval by June 30, **[*41]** 1999, to $ 625,000, if ESI received approval in 2002 *(id.* at P 4.1). In the Agreement, ESI represented that it was not "developing, or currently intends or plans to develop, a potassium chloride product, other than an ESI KCI Product or other potassium chloride products" that it already made. *(Id.* at P 2.8).

ESI received FDA approval for its generic K-Dur product in May 1999, and Schering paid ESI the $ 10 million required under Paragraph 4.1(b) of the Settlement Agreement. (DPP ESI Facts, P 21). In July 2001, ESI announced

[16] The Agreement defined a "Referencing Product" as an ESI KCI Product, a potassium chloride product that is the subject of an ANDA or NDA that references a Key NDA, or a potassium chloride product marketed by ESI as equivalent to, or otherwise substitutable on a generic basis for, K-Dur. (ESI Mem., Ex. 24 (Settlement Agreement) at P 1.2). An ESI KCI Product was defined as the 20 Meq extended release potassium chloride tablet described in Key's ANDA. *(Id.).*

that it was exiting the oral generic business altogether, and in 2002, ESI left the oral generics market. (DPP ESI Facts, P 28).

7. The FTC Action

On March 30, 2001, the Federal Trade Commission ("FTC") filed a complaint **[*42]** against Schering, Upsher and AHP (the "FTC Action"). (DPP ESI Facts, P 29). The complaint alleged, *inter alia,* that Schering's settlements with Upsher and ESI unreasonably restrained commerce and constituted unfair methods of competition in violation of *Section 5 of the Federal Trade Commission Act* (the "FTC Act"). (ESI Mem., Ex. 29 (FTC Complaint) at PP 68-69). The complaint further alleged that Schering monopolized and conspired with Upsher and ESI to monopolize the potassium supplement market. *(Id.* at P 70-71).

Between January and March 2002, the FTC Action was tried before an Administrative Law Judge ("ALJ"). *In re Schering-Plough, 2002 FTC LEXIS 40, *6 (June 27, 2002)* *("Schering-ALJ").* The trial before the ALJ included the testimony of 41 witnesses, thousands of exhibits, and resulted in 8,629 pages of transcript. *Id.* On June 27, 2002, the ALJ issued a lengthy decision -- including 431 findings of fact -- ruling that the Upsher and ESI Agreements were lawful settlements of legitimate patent disputes and dismissing the FTC complaint. *Id. at *8-9*. *See also* *Schering, 402 F.3d at 1061*. The ALJ ruled that the theories advanced by the FTC required a presumption that the '743 Patent was not **[*43]** valid or that Upsher's and ESI's products did not infringe the patent. *Id. at *8-9*. *See also* *Schering, 402 F.3d at 1061*. The ALJ concluded that there was "no basis in law or fact to make that presumption." *Schering-ALJ, 2002 FTC LEXIS 40, at *9*. The ALJ further concluded that a *per se* antitrust analysis of the agreements was not appropriate. *Id. at *219-33*. Rather, applying a rule of reason analysis, the ALJ emphasized the need to consider the exclusionary power of the patent at issue. *Id. at *235-43* ("Application of ***antitrust law*** to markets affected by exclusionary statutes such as the Patent Act cannot ignore the rights of the patent holder.") Considering the exclusionary power of the '743 Patent and the inability to predict the outcome of the patent litigation, the ALJ rejected the FTC's argument that, absent Schering's payments to Upsher and ESI, the generics could have entered the market earlier. *Id. at *242-43*.

The FTC's complaint counsel appealed to the full Commission, which reversed the ALJ. *In re Schering-Plough Corp., 2003 FTC LEXIS 187 (Dec. 8, 2003)* *("Schering-FTC").* Although the Commission refrained from holding that Schering's payments to Upsher and ESI made the settlements **[*44]** *per se* illegal, it also declined to apply the full rule of reason analysis employed by the ALJ. *Id. at *13, 22-27*. Instead, under the analysis adopted by the Commission, once the FTC demonstrates the agreements' anticompetitive effects, the "respondents must demonstrate that the challenged provisions are justified by procompetitive benefits that are both cognizable and plausible." *Id. at *14*. The Commission ruled that the FTC had demonstrated the anticompetitive effect of the agreements, and reasoned that "[a]bsent proof of other offsetting consideration, it is logical to conclude that the *quid pro quo* for the payment was an agreement by the generic to defer entry beyond the date that represents an otherwise reasonable litigation compromise." [17] *Id. at *16, 52*. Although the FTC ostensibly used a truncated rule of reason analysis, it essentially indicated that any settlement involving reverse payments over $ 2 million (an estimated cost of legal fees) would be *quid pro quo* for market delay and, thus, illegal. *Id. at *175-76*. The FTC further rejected the ALJ's conclusion that the licenses granted to Schering under the agreements were adequate consideration for the payments made by Schering, **[*45]** ruling instead that the payments were for delay. *Id. at *15-16*.

The Defendants chose to appeal the FTC's decision to the Eleventh Circuit, which reversed the Commission. *Schering, 402 F.3d at 1068*. The Eleventh Circuit's decision in *Schering,* and its previous decision in *Valley Drug*

---

[17] Although the FTC found both the Upsher and ESI Agreements unlawful, it noted the limited evidence presented regarding the ESI settlement and stated that "[a]s a matter of prosecutorial discretion, we might not have brought a stand-alone case based on such relatively limited evidence." *Schering-FTC, 2003 FTC LEXIS 187, at *166*.

Co. v. Geneva Pharms., 344 F.3d 1294 (11th Cir. 2003), *cert. denied, 543 U.S. 939, 125 S. Ct. 308, 160 L. Ed. 2d 248 (2004)*, are discussed, *infra.*

III. DISCUSSION

A. The Parties' Motions

1. Defendants' Upsher and ESI Motions

In their Motions, Defendants contend that unless DP Plaintiffs can show either: (1) that Schering's underlying patent litigation was "objectively baseless"; (2) that the '743 Patent was procured by fraud; or (3) that terms of the settlements extended the patent's coverage beyond the patent's potential exclusionary scope, the Upsher and ESI Settlements were lawful, even if they did include "reverse **[*46]** payments" to Upsher and ESI Defendants argue that under the foregoing standard, DP Plaintiffs cannot establish that Schering's patent infringement suits were baseless. According to Defendants, the patent litigation with Upsher and ESI involved disputed issues of fact and law such that Schering's claim of infringement could not possibly be deemed objectively baseless. Therefore, Defendants argue, summary judgment must be granted in their favor.

With respect to the Upsher Settlement, Defendants further argue that DP Plaintiffs cannot show that there was a "reverse payment" to Upsher and, thus, their antitrust claim must fail. In short, Defendants contend that because the $ 60 million Schering paid Upsher was fair value for the Niacor license -- and not a net payment for delay of Uphser's generic K-Dur -- there can be no antitrust violation.

In their opposition to Defendants' Upsher and ESI Motions, and in their separate Framework Motion, DP Plaintiffs contend that the legal standard proposed by Defendants is incorrect. DP Plaintiffs argue that the correct framework is either a *per se* analysis, or what they term the "FTC/Hovenkamp approach." Under the framework proposed by DP Plaintiffs, **[*47]** settlement agreements involving reverse payments would be subject to a rebuttable presumption of illegality, which could be overcome by proof of a pro-competitive justification for the payment. With respect to whether the payments to Niacor were, in fact, "reverse payments," DPPs argue that the question of whether Schering paid more than fair value for the Niacor license is a "quintessential factual issue" which cannot properly be decided on summary judgment.

In addition to Defendants' two primary summary judgment arguments summarized above, Defendants contend that DP Plaintiffs have failed to present sufficient evidence of an actual anticompetitive effect on the relevant product market resulting from the settlement. According to Defendants, all generic potassium chloride supplements are interchangeable with K-Dur and, thus, must be included in the relevant market. Defendants argue that because DP Plaintiffs have failed to prove the relevant market, they cannot prove that the Upsher Settlement caused any anticompetitive effects in that market.

In response to Defendants' arguments regarding the relevant market, DP Plaintiffs contend that the anticompetitive effects of delayed generic **[*48]** are indisputable, have been admitted by Schering, and can be proved by direct evidence that eliminates a need for the "relevant market" analysis urged by Defendants. DP Plaintiffs further argue that if a market definition is required, the relevant market cannot simply include all potassium chloride supplements that may be therapeutic substitutes for K-Dur. Rather, they argue, the market consists of K-Dur and its AB-rated equivalents.

Finally, Defendants contend that they are entitled to summary judgment on DP Plaintiffs' damages claims on two grounds. First, Defendants argue that this is not a price-fixing case and DP Plaintiffs cannot claim "overcharge" damages because, as distributors, they were not overcharged for K-Dur but, rather, were allegedly prevented from buying additional products, *i.e.,* generic versions of K-Dur. Defendants argue that the proper measure of damages under these circumstances is lost profits, and that DP Plaintiffs have failed to offer any evidence of such damages.

Second, Defendants contend that DPPs have no claim for damages for K-Dur purchases that were subject to generic bypass.

In response, DP Plaintiffs assert that overcharge damages have long been the **[*49]** standard remedy for direct purchasers suing for antitrust violations. With respect to generic bypass, DPPs contend that Defendants' position is inconsistent with the only published decision on the issue, as well as with the principles underlying the antitrust laws. (Upsher Opp., p. 78 (citing *In re Relafen Antitrust Litig., 346 F. Supp. 2d 349, 368-70 (D. Mass. 2004)*. DP Plaintiffs further argue that even if an adjustment for bypass were required, it would not affect the amount of overcharges suffered by the Plaintiff Class.

2. DPPs' '743 Motion

DP Plaintiffs also seek partial summary judgment as to the exclusionary scope of Schering's '743 patent. This motion has two principal components. First, DPPs argue that under the doctrine of prosecution history estoppel and the "All Elements Rule," the scope of the '743 patent cannot extend to exclude Upsher's generic product. DPP's second contention is that, by its express terms, the Schering/Upsher Settlement Agreement exceeds the exclusionary scope of the '743 patent. Specifically, DPPs contend that the terms of the agreement prevent Upsher not only from selling the allegedly infringing Klor Con M, but also "any other sustained release microencapsulated **[*50]** potassium chloride tablet," irrespective of whether such products infringed Schering's patent.

B. Summary Judgment Standard

Motions for summary judgment are governed by *Federal Rule of Civil Procedure 56*. "Summary judgment is appropriate under *Fed. R. Civ. P. 56(c)* when the moving party demonstrates that there is no genuine issue of material fact and the evidence establishes the moving party's entitlement to judgment as a matter of law." *Med Alert Ambulance, Inc. v. Atlantic Health Sys., Inc., No. 04-1615 (JAG), 2007 U.S. Dist. LEXIS 57083, 2007 WL 2297335, *2 (D.N.J. Aug. 6, 2007)* (citing *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986))*.

Under *Rule 56(c)*, the moving party "always bears the initial responsibility of informing the district court of the basis for its motion, and identifying those portions of 'the pleadings, depositions, answers to interrogatories, and admissions on file, together with affidavits, if any,' which it believes demonstrate the absence of a genuine issue of material fact." *Celotex, 477 U.S. at 323 (1986)* (quoting *Fed. R. Civ. P. 56*). "Once the moving party has satisfied its initial burden, the party opposing the motion must establish that a genuine issue as to a material fact exists." **[*51]** *Med Alert, 2007 U.S. Dist. LEXIS 57083, 2007 WL 2297335 at *3* (citing *Jersey Cent. Power & Light Co. v. Lacey Twp., 772 F.2d 1103, 1109 (3d Cir. 1985))*. The party opposing the motion may not rest upon mere allegations or denials of the pleadings, "but must set forth specific facts showing that there is a genuine issue for trial." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 256, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. *See* also *Ridgewood Bd. of Educ. v. N.E. for M.E., 172 F.3d 238, 252 (3d Cir. 1999)* ("Speculation and conclusory allegations do not satisfy [the nonmoving party's] duty.").

"'A nonmoving party has created a genuine issue of material fact if it has provided sufficient evidence to allow a jury to find in its favor at trial.'" *MedAlert, 2007 U.S. Dist. LEXIS 57083, 2007 WL 2297335 at *3* (quoting *Gleason v. Norwest Mortg., Inc., 243 F.3d 130, 138 (3d Cir. 2001))*. *See also* *Dasrath v. Continental Airlines, Inc., 467 F. Supp. 2d 431, 443 (D.N.J. 2006)* ("A dispute is 'genuine' if 'the evidence is such that a reasonable jury could return a verdict for the non-moving party.'") (quoting *Anderson, 477 U.S. at 248*). In addition, "[a] fact is 'material' only if it might affect the outcome of the suit under the applicable rule of law." *Id.*

C. Traditional Antitrust Analysis

Section 1 of the Sherman Act **[*52]** declares that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is ... illegal." 15 U.S.C. § 1. It is well-settled, however, that this provision outlaws only unreasonable restraints of trade. *See* State Oil v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997). In order to determine whether an "unreasonable restraint" of trade has taken place, courts have traditionally used one of two different analyses: the *per se* rule and the rule of reason. *See* State Oil Co., 522 U.S. at 10.

The *per se* analysis applies only under circumstances where courts have previously considered the type of conduct and found that its expected effects are overwhelmingly anticompetitive and have little prospect of yielding any pro-competitive benefit. *Id.* For a *per se* analysis to apply, the courts must have adequate judicial experience with the type of conduct at issue and must have found that it yields anticompetitive effects in the vast majority of cases (almost one-hundred percent of the time). *See* Herbert Hovenkamp, *Sensible Antitrust Rules for Pharmaceutical Competition,* 39 U.S.F. L. Rev. 11, 19-20. **[*53]** Under the *per se* approach, a court can condemn the action as a *per se* illegal restraint on trade "without elaborate inquiry into the defendant's market power, the actual anticompetitive effects of the restraint in a particular case, or the rationales offered for it." Id. at 20. The *per se* analysis applies to only a few types of conduct, including "naked" exit payments (those payments made solely to keep a competitor out of the market), market-division agreements, and price fixing. Id. at 20-21.

In most cases, where the conduct is not so clearly anticompetitive, courts use the rule of reason analysis. Further, courts have begun to realize that categorization of conduct often is not clear cut, id. at 20-21, and that "[t]here is always something of a sliding scale in appraising reasonableness." Cal. Dental Ass'n v. Fed. Trade Comm'n, 526 U.S. 756, 780, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999). In the rule of reason analysis, "'the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, **[*54]** nature, and effect.'" In re Tamoxifen Citrate Antitrust Litig., 466 F.3d 187, 201 n.13 (2d Cir. 2006), *cert. denied sub. nom.*, *Joblove v. Barr Labs, Inc., 551 U.S. 1144, 127 S.Ct. 3001, 168 L. Ed. 2d 726 (2007) ("Tamoxifen II")* (quoting State Oil Co., 522 U.S. at 10). [18]

Courts have divided the rule of reason analysis into three parts, which involve burden-shifting between the two parties. First, the plaintiff must show that the conduct has produced adverse, anti-competitive effects within the relevant market. U.S. v. Brown Univ., 5 F.3d 658, 668 (3d Cir. 1993). *See also* Tamoxifen II, 466 F.3d at 201 n. 13. If the plaintiff is able to prove this effect, then the burden shifts to the defendant, who must attempt to prove that the conduct "promotes a sufficiently pro-competitive objective." Id. If the defendant meets this standard, the burden then shifts back to the plaintiff to prove that the restraint is not reasonably necessary **[*55]** to achieve the pro-competitive objective. *Id.*

In addition to the *per se* and rule of reason standards, a third type of analysis has evolved: the "quick look" or "truncated rule of reason." *See* Fed. Trade Comm 'n v. Ind. Fed'n of Dentists, 476 U.S. 447, 459, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986). The truncated rule of reason analysis permits the plaintiff to shift the burden to the defendant more quickly, once the plaintiff has shown that the defendant has engaged in conduct similar to those practices falling into the per se category, e.g., restraints on price, output or customers. *Id.* The plaintiff need not establish the relevant market or the defendant's market power, but the defendant has the opportunity to demonstrate pro-competitive justifications and efficiencies. *Id.*

D. Analyses Applied By Other Courts to "Reverse Payment" Settlements

To date, only a few courts have considered the issue of what analytical framework should be applied to antitrust claims involving reverse payment settlements of patent litigation by pioneer and generic drug companies. Although

[18] The opinion in *Tamoxifen II* amended and superseded In re Tamoxifen Citrate Antitrust Litig., 429 F.3d 370 (2d Cir. 2005) *("Tamoxifen I"). Tamoxifen II* predominantly made changes and corrections to the citations in the *Tamoxifen I* opinion, but did not modify the court's analysis or holding.

one Circuit Court has applied a *per se* analysis, the other courts that have considered this issue have adopted approaches that focus on the exclusionary scope **[*56]** of the patent at issue. The reasoning of these cases is summarized below.

1. The Sixth Circuit's *Per Se* Analysis

The Sixth Circuit was the first federal appellate court to consider the legality of a settlement involving a reverse payment. *In re Cardizem CD Antitrust Litig., 332 F.3d 896 (6th Cir. 2003)*, *cert. denied, 543 U.S. 939, 125 S. Ct. 307, 160 L. Ed. 2d 248 (2004)*. In that case, the brand name drug maker, Hochst Marion Roussel ("HMR"), manufactured and sold the drug Cardizem CD. *Id. at 901*. HMR's original patent for the active ingredient of Cardizem CD expired in late 1992. *Id.* In September 1995, a generic manufacturer, Andrx, Inc., filed an ANDA and submitted a Paragraph IV certification, stating that its drug did not infringe the patents covering Cardizem. *Id. at 902*. As the first ANDA filer, Andrx was eligible for the 180-day exclusivity period. *Id.* In November 1995, HMR received a new patent for Cardizem CD's "dissolution profile." *Id.* In January 1996, HMR sued Andrx for patent infringement, thus triggering the 30-month stay of FDA approval of Andrx's ANDA. *Id.* In September 1997, the FDA tentatively approved Andrx's ANDA, indicating that it would be finally approved upon the expiration of the stay or a court **[*57]** ruling of non-infringement. *Id.*

Shortly after the FDA granted tentative approval, HMR and Andrx entered into the agreement that was at issue in the case. *Id.* Among its terms, the agreement provided that Andrx would not market a generic version of Cardizem CD until the earliest of: (1) a final, unappealable determination in favor of Andrx in the infringement case; (2) HMR and Andrx entering into a license agreement; or (3) HMR entering into a license agreement with a third party. *Id.* Andrx further agreed not to "relinquish or otherwise compromise" its right to the 180-day exclusivity period. *Id.* In exchange, HMR agreed to make quarterly payments of $ 10 million to Andrx beginning on the date its ANDA received final FDA approval. *Id.*

On July 9, 1998, the FDA approved Andrx's ANDA, and HMR began making quarterly payments to Andrx. *Id. at 903*. Only in June 1999, after the FDA approved a reformulated generic version submitted by Andrx, did the two companies terminate their agreement and enter into a final settlement of the patent infringement suit. *Id.* At the time of the settlement, HMR made a further payment of $ 50.7 million to Andrx, bringing the total payments to more than $ 89 million. **[*58]** *Id.* On June 23, 1999, Andrx began marketing its generic product, triggering its 180-day exclusivity period. *Id.*

The court found that the parties' agreement was "at its core, a horizontal agreement to eliminate competition" and, thus, "a classic example of a *per se* illegal restraint of trade." *Id. at 908*. In finding the agreement *per se* illegal, the Sixth Circuit appeared particularly troubled by the fact that HMR's agreement with Andrx effectively used the 180-day exclusivity period to delay the entry of other generic competitors. In this regard, the court noted:

> By delaying Andrx's entry into the market, the Agreement also delayed the entry of other generic competitors, who could not enter the market until the expiration of Andrx's 180 period of exclusivity, *which Andrx had agreed not to relinquish or transfer.*

Id. at 907 (emphasis added).

2. The Eleventh Circuit Approach in *Valley Drug* and *Schering v. FTC*

Three months after the *Cardizem* decision, the Eleventh Circuit reached a different result in the case of *Valley Drug Co. v. Geneva Pharms., Inc., 344 F.3d 1294 (11th Cir. 2003)*. *Valley Drug* involved separate settlement agreements between Abbott Laboratories and two generic **[*59]** competitors, Geneva Pharmaceuticals and Zenith Goldine Pharmaceuticals, which had filed ANDAs challenging Abbot's patents relating to Hytrin, a brand name hypertension drug marketed by Abbott since 1987. [19] *Valley Drug, 344 F.3d at 1298*. Abbott filed suit against Geneva alleging infringement of its '207 Patent. *Id. at 1299*. In the suit, Geneva admitted infringement but asserted that Abbott's patent was invalid. *Id.* Zenith filed its own lawsuit against Abbott seeking delisting of the '207 Patent and another Abbott patent (from the Orange Book), and requesting a declaratory judgment that its generic product did not infringe the two patents. *Id.* Abbott asserted counterclaims for infringement against Zenith. *Id.*

Abbott entered into an agreement with Zenith on March 31, 1998 and with Geneva one day later. The Zenith Agreement included the following terms: (1) both parties dropped their lawsuit claims; (2) Zenith acknowledged the validity of Abbott's patents and admitted that any generic **[*60]** terazosin product it might market would infringe those patents; (3) Abbott agreed to make quarterly payments of $ 6 million dollars to Zenith until March 1, 2000 or the termination of the agreement; (4) Zenith agreed not to market any product containing terasozin hydrochloride until Abbott's '207 patent expired on February 17, 2000; and (5) Zenith agreed not to transfer any of its ANDA rights, including the 180-day exclusivity period it earned as the first ANDA filer. *Id. at 1300*.

Similarly, under the terms of the Geneva Agreement: (1) Abbott agreed to pay Geneva $ 4.5 million per month until another manufacturer brought a terazosin product to market, or Abbott won the '207 patent infringement suit; (2) Geneva agreed not to market any terazosin product until a second patent expired in February 2000 or until it obtained a court judgment of non-infringement or invalidity in the '207 patent infringement suit; (3) Geneva agreed not to transfer its rights under the ANDA, including its 180-day exclusivity period; and (4) Geneva agreed to challenge any subsequent ANDA filer's attempt to enforce the "successful defense" requirement. *Id.* On September 1, 1998, the district court hearing Abbott's **[*61]** infringement suit against Geneva declared the '207 Patent invalid. *Id. at 1301* (citing *Abbott Labs. v. Geneva Pharms., Inc., 1998 U.S. Dist. LEXIS 13864, 1998 WL 566884 (N.D. Ill. Sept. 1, 1998))*. That decision was affirmed by the Federal Circuit, and Abbott's petition for certiorari was denied. *Id.* (citing *182 F.3d 1315 (Fed. Cir. 1999)* and *528 U.S. 1078, 120 S. Ct. 796, 145 L. Ed. 2d 671 (2000)*).

In the subsequent private antitrust action, the Eleventh Circuit reversed the district court's decision granting summary judgment against the defendants. [20] *Valley Drug, 344 F.3d at 1295*. The Eleventh Circuit concluded that the district court misapplied the law when it found the agreements to be *per se* antitrust violations. *Id. at 1295*. The court reasoned that the "exclusionary potential of the ['207] patent" shielded the agreements' effects from *per se* antitrust evaluation. *Id. at 1311*. Thus, because the '207 patent would not expire until 2014, the effect of the agreements on competition was "no broader than the potential exclusionary effect of the '207 patent, and was actually narrower to the extent [they] permitted Zenith [and Geneva] to market [their] drug[s] before the '207 patent expired." *Id. at 1305*.

While the court noted that the agreements resembled a horizontal market allocation, it recognized that the patent rights held by Abbott changed the evaluation. *Id. at 1304*. The court emphasized that the patent grant involves the right to exclude, which can lead to lawful agreements allocating the market geographically or by customer type. *Id. at 1304*. The court concluded that the district court erred when it focused on market allocation without considering the lawful exclusionary rights granted to Abbott under the '207 Patent. *Id. at 1305*.

The court further concluded that it was inappropriate **[*63]** to analyze the agreements under a traditional rule of reason framework because "the anticompetitive effects of exclusion cannot be seriously debated." *at 1311*. Rather, the court reasoned, a threshold analysis of the exclusionary scope of the patent must precede any specific antitrust

---

[19] Abbott had multiple patents relating to terazosin hydrochloride, the active ingredient in Hytrin. *Id.* The patents covered various forms of the terazosin hydrochloride compound and methods for using it. *Id.*

[20] On remand, the district court still applied a *per* ***[*62]*** *se* analysis and found the agreements at issue in *Valley Drug* to be *per se* illegal. *See* *In re Terazosin Hydrochloride Antitrust Litig., 352 F. Supp. 2d 1279 (S.D. Fla. 2005)*. However, in its subsequent decision in *Schering,* the Eleventh Circuit found the agreements in *Valley Drug* to be "wholly different" from the Upsher and ESI Agreements. *Schering, 402 F.3d at 1066, n.14*. The court noted that the "critical difference" is that the agreements in *Valley Drug* did not involve final settlements of the patent litigation, and did not permit the generic company to market its product before patent expiration. *Id.*

inquiry. *Id. at 1312*. If the terms of the agreements are found to have effects "beyond the exclusionary effects of Abbott's patent," they "may then be subject to traditional antitrust analysis to assess their probable anticompetitive effects in order to determine whether those provisions violate *§ 1 of the Sherman Act*." *Id.*

The court identified a number of factors influencing its reasoning. First, it emphasized the competing regimes of patent and ***antitrust law***. *Id. at 1305-06*. Second, the fact that the '207 patent subsequently was found to be invalid was not dispositive. *Id. at 1308*. Rather, the court concluded, the "reasonableness of agreements under the antitrust laws are to be judged at the time the agreements are entered into." *Id. at 1306* (citing *Polk Bros. v. Forest City Enters., 776 F.2d 185, 189 (7th Cir. 1985)*; *SCM Corp. v. Xerox Corp., 645 F.2d 1195, 1209 (2d Cir. 1981)*. Third, noting the "important **[*64]** role played by settlement in the enforcement of patent rights," the court rejected the notion that the mere existence or substantial size of a reverse payment was sufficient to trigger *per se* illegality, especially where the lack of any damages reduces the risk for the generic manufacturers in the infringement suit. *Id. at 1309-10* (citing *In re Ciprofloxacin Hydrochloride Antitrust Litig., 261 F. Supp. 2d 188, 251-52 (E.D.N.Y. 2003)* *("Cipro I")* (discussing the asymmetries of litigation risk create by Hatch-Waxman and rejecting argument that payments from the patentee to the infringer are subject to *per se* antitrust analysis)).

(b) **Schering v. FTC**

In Schering's appeal of the *Schering-FTC* decision, the Eleventh Circuit reversed the FTC and reaffirmed the reasoning first set forth in *Valley Drug. Schering, 402 F.3d 1056*. The court restated its view that "neither the rule of reason nor the *per se* analysis is appropriate in this context." *Id. at 1065*. Recognizing the tension between the antitrust and patent laws, the court observed:

> By their nature, patents create an environment of exclusion, and consequently, cripple competition. the anticompetitive effect is already present. "What is required **[*65]** here is an analysis of the extent to which antitrust liability might undermine the encouragement of innovation and disclosure, or the extent to which the patent laws prevent antitrust liability for such exclusionary effects."

Schering, 402 F.3d at 1065-66 (quoting *Valley Drug, 344 F.3d at 1311, n.27*). Clarifying the standard it adopted in *Valley Drug,* the court explained that "the proper analysis of antitrust liability requires an examination of: (1) the scope of the exclusionary potential of the patent; (2) the extent to which the agreements exceed that scope; and (3) the resulting anticompetitive effects." *Id. at 1066*. Applying the foregoing analysis to the Upsher and ESI agreements, the Eleventh Circuit found them well within the scope of the patent and thus legal patent settlements.[21] *Id. at 1076*. In reaching this conclusion, the court emphasized the fact that the agreements permitted Upsher to enter the market more than five years before the '743 Patent expired, and ESI to enter the market more than two years before the expiration of the patent. *Id. at 1067-68*. The court further noted that "there has been no allegation that the '743 patent itself is invalid or that the resulting infringement suits against **[*66]** Upsher and ESI were 'shams.'" *Id. at 1068*. The court rejected the FTC's contention that, absent the payments to Upsher and ESI, the parties could have "simply compromised" on earlier entry dates. Finding no evidence in the record to support this conclusion -- which the court viewed as "somewhat myopic" -- the court reasoned:

> It is uncontested that parties settle cases based on their perceived risk of prevailing in and losing the litigation. Pre-Hatch-Waxman, Upsher and ESI normally would have had to enter the market with their products, incurring the costs of clinical trials, manufacturing and marketing. This market entry would have driven down Schering's profits, as it took sales away. As a result, Schering would have sued ESI and Upsher, seeking damages for lost profits and willful infringement....
>
> By contrast, the Hatch-Waxman Amendments grant generic manufacturers standing to mount a challenge without incurring the cost of entry or risking enormous damages flowing from any possible infringement. *See In re Ciprofloxacin Hydrochloride Antitrust Litig., 261 F. Supp. 2d 188, 251 (E.D.N.Y. 2003)*. Hatch-Waxman

[21] The Eleventh Circuit also rejected the FTC's conclusion that the Niacor license was not worth $ 60 million, but was a payment to keep Upsher off the market, and stated that the FTC's conclusion was "not supported by law or logic." *Id. at 1070*.

> essentially redistributes the relative risk assessments and explains the flow **[*67]** of settlement funds and their magnitude. *Id.* Because of the Hatch-Waxman scheme, ESI and Upsher gained considerable leverage in patent litigation: the exposure to liability amounted to litigation costs, but paled in comparison to the immense volume of generic sales and profits. This statutory scheme could then cost Schering its patent.
>
> By entering into the settlement agreements, Schering realized the full potential of its infringement suit -- a determination that the '743 patent was valid and that ESI and Upsher would not infringe in the future. Furthermore, although ESI and Uphser obtained less than they what they would have received from successfully defending the lawsuits (the ability to immediately market their generics), they gained more than if they had lost. A conceivable compromise, then, directs the consideration from the patent owner to the: challengers. *Id.*

Schering, 402 F.3d at 1074.

Noting the "private and social benefits" of settlements **[*68]** in avoiding the "the inveterate and costly effects of litigation," the court reiterated its view that neither the presence of a reverse payment, nor its size, should "dictate the availability of a settlement remedy." *Id. at 1075* (citing D. Crane, *Exit Payments in Settlement of Patent Infringement Lawsuits; Antitrust Rules and Economic Implications,* 54 Fla. L. Rev. 747, 760 (2002). The court further reasoned that "[a]n exception cannot lie, as the [FTC] might think, when the issue turns on validity *(Valley Drug)* as opposed to infringement (the Schering agreements)." *Id. at 1075-76*.

3. The Second Circuit's *Tamoxifen* Decision

In *Tamoxifen II,* the Second Circuit considered a "reverse payment" settlement between the pioneer drug company, Zenica, [22] and generic manufacturer Barr Laboratories. [23] *Tamoxifen II, 466 F.3d at 190*. Zeneca held the patent rights to and manufactured tamoxifen citrate, a leading breast cancer drug. *Id. at 193*. Barr filed an ANDA for a generic version of tamoxifen, which it amended in 1987 to include a Paragraph IV certification. *Id.* After Zeneca timely sued Barr and Barr's raw material supplier for patent infringement, the district court declared Zeneca's patent invalid **[*69]** based on its conclusion that Zeneca deliberately withheld information from the PTO. *Id.* Zeneca appealed the invalidity decision, and in 1993, while the appeal was pending, the parties entered into a settlement agreement. *Id.*

Under the agreement's principal terms: (1) Barr agreed not to market its generic version of tamoxifen until Zeneca's patent expired in 2002 and thus amended its ANDA to a Paragraph III certification; (2) Barr received a non-exclusive license to sell tamoxifen tablets manufactured by Zeneca under Barr's own label; (3) Zeneca agreed to pay Barr $ 21 million plus an additional $ 45 million over ten years to Barr's raw material supplier; and (4) the parties agreed that if Zeneca's patent were subsequently declared invalid or unenforceable in a final, **[*70]** unappealable judgment, Barr would be allowed to revert to a Paragraph IV certification. *Id. 193-94*. In addition, pursuant to the settlement, the parties jointly moved for *vacatur* of the district court's patent invalidity judgment, which motion was granted by the Federal Circuit. *Id. at 194*.

The validity of Zeneca's patent was subsequently challenged by three other ANDA filers, all of whom were unsuccessful in their attempts to rely on the vacated invalidity judgment. *Id. at 195*. In each case, the court upheld the validity of Barr's patent. *Id.* In the meantime, the "successful defense" rule was invalidated, and Barr became

---

[22] Zeneca refers collectively to Imperial Chemical Industries, PLC ("ICI") and its former subsidiaries, Zeneca, Inc., AstraZeneca Pharmaceuticals LP, and Astra Zeneca PLC, which succeeded to ICI's rights to the patent at issue. *Tamoxifen II, 466 F.3d at 190, 193*.

[23] The case was before the Second Circuit on plaintiffs' appeal of the district court's dismissal of their antitrust claims pursuant to *Fed. R. Civ. P. 12(b)(6)*. *Id.*

eligible for the 180-day exclusivity period, which would only be triggered by Barr marketing its own generic version of tamoxifen. *Id. at 195-96*. In March 1999, the FDA confirmed Barr's entitlement to the exclusivity period. *Id. at 196*.

The private antitrust plaintiffs alleged that the settlement agreement unlawfully: (1) enabled Zeneca and Barr to "resuscitate" a patent that had been held invalid and unenforceable; (2) perpetuated Zeneca's monopolization of the tamoxifen market and allowed Zeneca and Barr to share the monopoly profits; and (3) maintained artificially **[*71]** high prices for tamoxifen and prevented competition from other generic manufacturers. *Id. at 196-97*.

The Second Circuit affirmed the district court's dismissal of the antitrust complaint and upheld the legality of the settlement. *Id. at 197-99*. In reaching its decision, the court noted the tension between the antitrust laws and an innovator's right under patent law to exclude competition. *Id. at 201*. The court further emphasized "our longstanding adherence to the principle that 'courts are bound to encourage' the settlement of litigation." *Id. at 202* (citing *Gambale v. Deutsche Bank AG, 377 F.3d 133, 143 (2d Cir. 2004)*. The court observed:

> It is well settled that '[w]here there are legitimately conflicting [patent] claims ..., a settlement by agreement, rather than litigation, is not precluded by the [Sherman] Act," although such a settlement may ultimately have an adverse effect on competition....
>
> Rules severely restricting patent settlements might also be contrary to the goals of the patent law because the increased number of continuing lawsuits that would result would heighten the uncertainty surrounding patents and might delay innovation.

Id. (quoting *Standard Oil Co. v. United States, 283 U.S. 163, 171, 51 S. Ct. 421, 75 L. Ed. 926 (1931)* **[*72]** (other citations omitted).

The court also declined to find the settlements unlawful based on plaintiffs' contention that the Federal Circuit would have affirmed the invalidity of Zeneca's patent. *Id. at 203-05*. "We cannot judge this post-trial, pre-appeal settlement on the basis of the likelihood *vel non* of Zeneca's success had: it not settled but rather pursued its appeal." *Id. at 203* (citing, *inter alia, Asahi Glass Co. v. Pentech Pharms., Inc., 289 F. Supp. 2d 986, 993 (N.D. Ill. 2003)* (Posner, J., sitting by designation) ("No one can be *certain* that he will prevail in a patent suit."); *In re Ciprofloxacin Hydrochloride Anitirust Litig., 261 F. Supp. 2d 188, 200-01 (E.D.N.Y. 2003)* (noting that courts should not speculate about the outcome of litigation); *Valley Drug, 344 F.3d at 1306* ("[T]he reasonableness of agreements under the antitrust laws are to be judged at the time the agreements are entered into.")).

Citing with approval the reasoning of the courts in *Cipro I, Valley Drug, Schering,* and *Asahi Glass,* the court further held that the mere existence of a reverse payment, especially in the context of the Hatch-Waxman Act, is not enough to trigger *per se* unlawfulness. *Id. at 205-6* **[*73]** (citing *Valley Drug, 344 F.3d at 1309*; *Asahi Glass, 289 F. Supp. 2d at 994*; *Cipro I, 261 F. Supp. 2d at 252*; *Schering, 402 F.3d at 1074*). While the court acknowledged that reverse payments may seem "suspicious," it reasoned that this "suspicion abates upon reflection." *Id. at 208*. Rather, the court held, *"so long as the patent litigation is neither a sham nor otherwise baseless,* the patent holder is seeking to arrive at a settlement in order to protect that to which it presumably entitled: a lawful monopoly." *Id. at 208-09* (emphasis added). In this sense, the settlement did not exceed the scope of the patent. *Id. at 209 n.22*.

The court also noted its general agreement with the Eleventh Circuit regarding the importance of analyzing the scope of the patent, and concluded: "Whatever damage is done to competition by settlement is done pursuant to the monopoly extended to the patent holder by patent law unless the terms of the settlement enlarge the scope of that monopoly." *Id. at 212*. The court agreed that "'[u]nless and until the patent is shown to have been procured by fraud, or a suit for its enforcement shown to be objectively baseless, there is no injury to the market cognizable under **[*74]** existing ***antitrust law***, as long as competition is restrained only within the scope of the patent.'" *Id. at 213* (quoting *In re Ciprofloxacin Hydrochloride Antitrust Litig., 363 F. Supp. 2d 514, 535 (E.D.N.Y. 2005)* *("Cipro II").*

4. *In re Cipro*

On October 15, 2008, the Federal Circuit Court of Appeals affirmed the district court's decision in *Cipro II* granting summary judgment in favor of the defendants. *In re Ciprofloxacin Hydrochloride Antitrust Litig., 544 F.3d 1323 (Fed.*

Cir. 2008) *("Cipro III").* The facts of the *Cipro* case are generally similar to those of the cases discussed above. Bayer held a patent for the active ingredient in the branded drug Cipro, which patent had an expiration date of December 9, 2003. *Id. at 1327-28*. In 1991, Barr Labs, Inc. filed an ANDA with a paragraph IV certification for a generic version of Cipro. *Id. at 1328*. Thereafter, Bayer sued Barr for patent infringement. *Id.*

Shortly before trial, Bayer entered into settlements with Barr and other generic manufacturers. Pursuant to Bayer's settlement with Barr, Barr agreed to convert its paragraph IV ANDA to a paragraph III ANDA, thus certifying that it would not market its generic version of Cipro until after **[*75]** Bayer's patent expired. *Id. at 1328-29*. In exchange, Bayer agreed to make a settlement payment of $ 49.1 million to Barr. *Id. at 1329*. Under a separate "Cipro Supply Agreement," Bayer agreed to either supply Barr with Cipro for resale or make quarterly payments to Barr until December 31, 2003. *Id.* Barr, in turn, agreed not to manufacture, or have manufactured, a generic version of Cipro in the United States. *Id.* Beginning at least six months before the expiration of Bayer's patent, Bayer agreed to allow Barr to sell a competing ciprofloxacin product. *Id.* Bayer and Barr then entered into a consent judgment under which Barr affirmed the validity and enforceability of Bayer's patent and admitted infringement. *Id.*

In the subsequent antitrust action brought by indirect and direct purchasers, the district court granted summary judgment in favor of defendants. *Id. at 1329* (citing *Cipro II, 363 F. Supp. 2d at 548*). Using a rule of reason analysis, the district court first determined that the relevant market was ciprofloxacin and that Bayer had market power within that market. *Id. at 1330*. The court then concluded that "any adverse effects on competition stemming from the Agreements were within **[*76]** the exclusionary zone of [Bayer's patent], and hence could not be redressed by ***antitrust law***." *Id.* Having determined that there was no evidence that the Agreements "created a bottleneck on challenges to [Bayer's patent] or otherwise restrained competition beyond the scope of the patent," the district court concluded that the plaintiffs had failed to show that the Agreements had an anticompetitive effect beyond that authorized by the patent. *Id.*

Affirming the district court, the Federal Circuit distinguished the Sixth Circuit's decision in *Cardizem* and stated:

> We find . . . the district court's analysis to be sound .... [T]he district court applied a rule of reason analysis in assessing the lawfulness of the Agreements. In that analysis, it considered whether there was evidence of sham litigation or fraud before the PTO, and whether any anticompetitive effects of the Agreements were outside the exclusionary zone of the patent. The application of a rule of reason analysis to a settlement agreement involving an exclusion payment in the Hatch-Waxman context has been embraced by the Second Circuit, and advocated by the FTC and the Solicitor General. And, although the Sixth Circuit found **[*77]** a per se violation of the antitrust laws in *In re Cardizem,* the facts of that case are distinguishable from this case and from the other circuit court decisions. In particular, the settlement in that case included, in addition to a reverse payment, an agreement by the generic manufacturer to not relinquish its 180-day exclusivity period, thereby delaying the entry of other generic manufacturers. *In re Cardizem, 332 F.3d at 907*. Furthermore, the agreement provided that the generic manufacturer would not market non-infringing versions of the generic drug. *Id. at 908 n. 13*. Thus, the agreement clearly had anticompetitive effects outside the exclusion zone of the patent. [citation omitted] To the extent that the Sixth Circuit may have found a per se antitrust violation based solely on the reverse payments, we respectfully disagree.

Id. at 1335.

Citing with approval the approaches adopted by the Eleventh and Second Circuits, the Federal Circuit concluded:

> [I]n cases such as this, wherein all anticompetitive effects of the settlement are within the exclusionary power of the patent, the outcome is the same whether the court begins its analysis under ***antitrust law*** by applying a rule of reason **[*78]** approach to evaluate the anti-competitive effects, or under patent law by analyzing the right to exclude afforded by the patent. The essence of the inquiry is whether the agreements restrict competition beyond the exclusionary zone of the patent. This analysis has been adopted by the Second and Eleventh Circuits and by the district court below and we find it to be completely consistent with Supreme Court precedent.

Id. at 1336 (citing Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 175-77, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965) (holding that there may be a violation of the Sherman Act when a patent is procured by fraud, but recognizing that a patent is an exception to the general rule against monopolies). The court further noted its agreement with the Second and Eleventh Circuits that "in the absence of evidence of fraud before the PTO or sham litigation, the court need not consider the validity of the patent in the antitrust analysis of a settlement agreement involving a reverse payment." *Id.*

E. Framework Applicable to the Upsher and ESI Settlements

Having considered the analyses of the cases summarized above, I first conclude that the Upsher and ESI settlements were not *per se* unlawful. DP Plaintiffs' **[*79]** arguments that a *per se* approach is consistent with "traditional antitrust principles" and the legislative purpose of the Hatch-Waxman Act ignore the important purpose underlying the exclusionary rights granted by patent law. *See* Tamoxifen, 429 F.3d at 385; Cipro III, 544 F.3d at 1333. Moreover, with the sole exception of the *Cardizem* case, all of the courts that have considered so-called "reverse payment" settlements, as well as the FTC, have declined to apply a *per se* analysis. *See* Valley Drug, 344 F.3d at 1304; Schering, 402 F.3d at 1065; Tamoxifen II, 466 F.3d at 206; Schering-FTC, 2003 FTC LEXIS 187, at *13, 22-27. *But see* In re Cardizem, 332 F.3d at 908. To the extent that the *Cardizem* court reached a contrary conclusion, the facts of that case are distinguishable.

Unlike the interim settlement in Cardizem, Schering's settlements in this case finally resolved its litigation with Upsher and ESI. Moreover, the settlement agreements in this case permitted the Upsher and ESI generic products to enter the market five years and almost three years, respectively, before the expiration of Schering's '743 Patent. Finally, the agreements in this case did not manipulate the 180-day exclusivity **[*80]** period to create a "bottleneck" precluding the entry of other generic drugs. Upsher's settlement with Schering did not preclude Upsher from transferring or relinquishing the 180-day exclusivity and, because the "successful defense" requirement was in place at the time of the settlement, Upsher arguably was not entitled to the exclusivity period.

I further decline to adopt the "FTC/Hovenkamp" framework proposed by DP Plaintiffs, and note that Plaintiffs have not cited -- nor am I aware of -- any case that has applied this legal framework. The standard articulated by the FTC treats settlements involving reverse payments as presumptively anticompetitive, but purports to allow rebuttal of that presumption with a showing of the pro-competitive effect of the settlement. Schering-FTC, 2003 FTC LEXIS 187, at *57-58. However, the order entered by the FTC prohibited settlements in which the generic company "receives anything of value," with an exception for payments, limited to $ 2 million, linked to litigation costs. Id. at *176. Similarly, the framework suggested by Professor Hovenkamp applies a rebuttable presumption of illegality, which the infringement plaintiff can rebut by showing both "(1) that **[*81]** the *ex ante* likelihood of prevailing in the infringement lawsuit is significant, and (2) that the size of the payment is no more than the expected value of the litigation and collateral costs attending the lawsuit." *See* Herbert Hovenkamp et al., Anticompetitive Settlement of Intellectual Property Disputes, 87 Minn. L. Rev. 1719, 1759 (2003) (emphasis added).

Similar to a *per se* analysis, the FTC/Hovenkamp framework effectively discounts the fact that Schering's '743 Patent gave it the right to exclude infringing competitors. Moreover, it essentially requires a presumption that if the patent holder pays money to the generic company, the patent at issue must be either invalid or not infringed. In my view, the weight of authority counsels against adopting such a presumption. *See, e.g.,* Schering, 402 F.3d at 1066 (noting presumption of patent validity); Tamoxifen, 466 F.3d at 208-09; Cipro II, 363 F. Supp. 2d at 534-35 (declining to infer invalidity based on reverse payment).

I recognize that in this case, the key disputed issues in the patent case involved infringement, rather than validity. In this regard, DP Plaintiffs note that although patents are presumptively valid by statute; *see* **[*82]** 35 U.S.C. § 282, there is no corresponding presumption of infringement. *See* Framework Mem., p. 11. Thus, according the DP Plaintiffs, the probabilistic nature of patents is particularly relevant. *Id.* DP Plaintiffs further contend that Schering's payments to Upsher and ESI are *prima facie* evidence that the parties expected the litigation to result in more competition than was provided for under the settlement agreements. Plaintiffs' arguments are unpersuasive.

Although there is no presumption of infringement, neither is there a statutory presumption that Schering's patent was not infringed. *See* *Schering-FTC, 2003 FTC LEXIS 187, at *61* ("We cannot assume that Schering had a right to exclude Upsher's generic competition for the life of the patent any more than we can assume that Upsher had the right to enter earlier.") (emphasis added).

Accordingly, I decline to discount the exclusionary power of Schering's patent based on the *possibility* that it was not infringed by the Upsher and ESI products. *See* *Cipro II, 363 F. Supp. 2d at 514 and n. 19* (rejecting argument that exclusionary power of the patent should be discounted by the probability of an invalidity finding, and noting the applicability **[*83]** of its analysis to cases in which infringement is the dominant issue); *Tamoxifen, 466 F.3d at 211-12* (citing *Cipro II, supra*); *Asahi Glass, 289 F. Supp. 2d at 992-93* ("It is not 'bad faith' to assert patent rights that one is not certain will be upheld in a suit for infringement pressed to judgment and to settle the suit to avoid risking the loss of the rights. No one can be *certain* that he will prevail in a patent suit."). In addition, I conclude that it is inappropriate to conduct an *ex post* inquiry into infringement issues that were resolved by the parties' settlement. As the *Cipro II* court observed regarding issues of patent validity, "[s]uch an inquiry would undermine any certainty for patent litigants seeking to settle their disputes." *Cipro II, 363 F. Supp. 2d at 530*. *See also* Schering, 402 F.3d at 1072-73 (noting public policy favoring settlement of patent disputes); *Schering-FTC, 2003 FTC LEXIS 187, at *60* (expressing concern that "a mandated inquiry into [the merits of the patent case], as part of an antitrust review, would ultimately have a chilling effect on the efficient settlement of patent litigation").

Finally, I reject DP Plaintiffs' suggestion that Judge Greenaway **[*84]** previously weighed and rejected the analytical framework that has now been adopted by the Second, Eleventh and Federal Circuits. In his Sept. 29, 2004 opinion, Judge Greenaway denied Defendants' 12(b)(6) motion to dismiss, finding, *inter alia,* that Plaintiffs' had adequately *alleged* anti-competitive conduct. As summarized by Judge Greenaway, Defendants had argued that:

> Plaintiffs fail to allege that Defendants engaged in anti-competitive behavior by entering into the settlement agreements. [Defendants] argue that Plaintiffs have not established anti-competitive behavior because the settlement agreements in question do not have an anti-competitive effect. Rather, the settlement agreements are pro- competitive because they allowed Upsher and ESI to enter the market years before Schering's K-Dur patent expired, and such agreements, as a matter of law, are not antitrust violations. By not alleging that the settlements do not reasonably reflect the objective merits of the patent suits, or that Upsher or ESI would have won the patent suit, Plaintiffs have not stated anti-competitive behavior, and thus have no claim.

In re K-Dur, 338 F. Supp. 2d 517, 530-31. Defendants further argued that the **[*85]** settlements (and the payments by Schering allegedly for delay) could not be anti-competitive because Schering had a valid patent and, thus, was entitled to exclude generic competitors until the patent expired. Thus, according to Defendants, absent an allegation of patent invalidity or non-infringement, the entry dates in the agreement are beyond attack. *Id. at 531*.

Contrary to DP Plaintiffs' suggestion, Judge Greenaway did not decide that the framework DP Plaintiffs' now propose (or any other framework) would apply beyond the pleading stage, *i.e.,* at dispositive motions or trial. On the contrary, in denying Defendants' Motion to Dismiss, he stated that "[i]n this Court's view Plaintiffs can sustain a claim of anti-competitive conduct simply by *alleging* facts which show that the outcome of the settlement agreements would have been more pro-competitive absent the cash payments from Schering to Upsher and ESI." [24] *Id. at 532* (emphasis added). Moreover, Judge Greenaway noted the different standards that had been applied by the Sixth Circuit in *Cardizem* (reverse payments *per se* illegal) and the 11th Circuit in *Valley Drug* (rejecting *per se* approach), and expressly stated that he did not **[*86]** need to address whether Defendants' alleged conduct was

---

[24] As Judge Greenaway noted, his opinion addressed a Rule 12(b)(6) motion to dismiss and was decided under the framework of that rule, which treats all of Plaintiffs' allegations as true and draws all inferences in Plaintiffs' favor. *Id. at 527* (noting that Plaintiffs' alleged that but for the reverse payments, Upsher and ESI would have settled on different terms and entered the market sooner); 528 (noting the standard for 12(b)(6) and 12(c) motions); 529 (noting that there is no heightened pleading standard in antitrust cases); 533 (stating that Plaintiffs had sufficiently pled anti-competitive conduct and noting that, at pleading stage, court must consider defendants' pro-competitive justifications as unproven).

per se illegal. *Id. at 533*. Further, although he noted that the FTC had found the Defendants' conduct unlawful and stated that the FTC's findings were "of some interest," he also stated that the FTC's findings were not binding, and he did not adopt the standard used by the FTC in its analysis.

Finally, Judge Greenaway's decision was issued in 2004, before the 11th Circuit's decision in *Schering* and before the decisions **[*87]** of the Second and Federal Circuits following the 11th Circuit approach. Thus, the Circuit Court case law regarding the appropriate analytical framework has developed significantly since Judge Greenaway decided Defendants' motion to dismiss in 2004.

In summary, I will not adopt the FTC/Hovenkamp framework, but, rather, will apply an analysis consistent with the approach that has been adopted by the Second, Eleventh and Federal Circuits. Under that framework, as long as the Upsher and ESI settlements restrained competition only within the scope of Schering's patent, and the underlying patent lawsuits were not objectively baseless, Defendants are entitled to summary judgment on DP Plaintiffs' antitrust claims.

1. The Settlements Do Not Exceed the Exclusionary Scope of the '743 Patent

It is undisputed that the Schering's '743 Patent gave it the right to exclude infringing products until September 5, 2006. It is likewise undisputed that the Upsher Settlement permitted Upsher to market its generic product more than five years before the '743 Patent expired; and the ESI Settlement permitted ESI to market its generic product more than two years before the patent's expiration. Thus, with respect to **[*88]** the entry dates the parties agreed upon, the Upsher and ESI Agreements clearly were well within the exclusionary scope of the '743 Patent.

Having reviewed the Agreements and the record in this case, I further conclude that there is no evidence that any other aspects of the settlement exceeded the exclusionary scope of the '743 Patent. [25] In the Upsher Settlement, Upsher agreed not to market Klor-Con M20(c) or "any other sustained release microencapsulated potassium chloride tablet," prior to Sept. 1, 2001. DP Plaintiffs' contend that by virtue of the above-quoted language, the agreement precluded Upsher from marketing non-infringing products and exceeded the scope of the patent. I disagree. First, there is no evidence in the record that Upsher had developed or planned to develop and market "any other sustained release microencapsulated potassium chloride tablet." Absent evidence that any other such generic product existed or was contemplated by Upsher, there is simply no basis upon which to conclude that the terms of the Upsher Agreement exceeded the scope of the '743 Patent. Moreover, I note that in *Schering,* the Eleventh Circuit determined, on the record before it, [26] that the Upsher, **[*89]** Agreement's restraint covering "sustained release microencapsulated potassium chloride tablet[s]" covered the "identical reach of the '743 patent" and was a lawful ancillary restraint. *Schering, 402 F.3d at 1072* ("Ancillary restraints are generally permitted if they are 'reasonably necessary' toward the contract's objective of utility and efficiency.").

With respect to the ESI Agreement, DP Plaintiffs have not even argued that its terms exceed the exclusionary scope of the patent. Although the terms of the ESI Settlement included ESI's agreement not to conduct, sponsor or support an application for AB rating or equivalence study for a potassium chloride product with respect to K-Dur, ESI also expressly stated in the agreement that neither it nor any of its affiliates were developing, or planned or

[25] Contrary to DP Plaintiffs' argument, Judge Greenaway did not decide that the terms of the Upsher and ESI Settlements exceeded the exclusionary scope of Schering's patent. Rather, he merely concluded that Plaintiffs had *alleged* that the settlement agreements exceeded the scope of the patent. *In re K-Dur, 338 F. Supp. 2d at 532*.

[26] The record in *Schering* included the ALJ's factual finding that the quoted language was included in the settlement so that "Upsher-Smith could continue to market its Klor Con 8 and Klor Con 10 wax matrix tablets without any restrictions," and because "Schering wanted to prevent Uphser-Smith from simply renaming its Klor Con M 20 product to get around the language and intent of the settlement agreement." *Schering-ALJ, 2002 FTC LEXIS 40, at *62-63* (P 158). The ALJ found that "no other restrictions on any of Uphser-Smith's **[*90]** other products were intended by the settlement agreements." *Id.*

intended to develop any such product. Accordingly, as with the Upsher Settlement, there is no evidence that the ESI Agreement excluded any non-infringing products.

Finally, I reject DP Plaintiffs' argument in their '743 Motion that under the doctrine of prosecution history estoppel and the "All Elements Rule," the scope of the '743 patent cannot extend to exclude Upsher's generic product. The DPP's '743 Motion would require me not only to conduct a detailed inquiry into the merits of the patent case, but to decide the infringement issues that were resolved when Schering and Upsher settled. For the reasons discussed above regarding the analytical framework applicable to the Upsher **[*91]** and ESI Settlements, I decline to conduct such an inquiry. *See* *Cipro II, 363 F. Supp. 2d at 524-30* (reviewing refusals of courts and the FTC to undertake an after-the-fact inquiry into the merits of the patent issues in a settled case). To the extent that I consider the infringement issues raised by DP Plaintiffs, I do so only to determine whether Schering's patent lawsuits were objectively baseless.

2. Schering's Patent Infringement Lawsuits Against Upsher and ESI Were Not Objectively Baseless

Because I have concluded that the Upsher and ESI settlements did not exceed the exclusionary scope of the '743 Patent, DP Plaintiffs' antitrust claims fail unless they can show that Schering's patent litigation against Upsher and ESI was objectively baseless. [27] As set forth below, I conclude that DP Plaintiffs cannot satisfy the objectively baseless standard with respect to either of the patent lawsuits. In order to establish that Schering's patent lawsuits were objectively baseless, DP Plaintiffs must show that the lawsuits were "objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits." *Professional Real Estate Investors, Inc. v. Columbia Pictures, Indus., Inc., 508 U.S. 49, 60, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* ***[*92]*** *("PRE").* If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is [not objectively baseless], and an antitrust claim premised on the sham exception must fail." *Id. See also* *Cheminor Drugs, Ltd. v. Ethyl Corp., 993 F. Supp. 271, 281 (D.N.J. 1998)* (Greenaway, J.) (case must be shown to have "absolutely no objective merit"), *aff'd,* *168 F.3d 119 (3d Cir. 1999)*. Where there is no dispute over the "predicate facts" of the underlying lawsuit, the question of whether the suit was objectively baseless is a matter of law. *PRE, 508 U.S. at 63-64*. Predicate facts are the facts and circumstances that were available to the party that brought the underlying lawsuit. *PRE, 508 U.S. at 63* (citing *Nelson v. Miller, 227 Kan. 271, 607 P.2d 438, 444 (Kan. 1980)*. *See also* *In re Relafen Antitrust Litig., 346 F. Supp. 2d 349, 362 n. 7 (D. Mass. 2004)* (recognizing that probable cause is a question of law when the relevant predicate facts involve an unsettled condition of law).

The party seeking to establish that a lawsuit was objectively baseless must do so with clear **[*93]** and convincing evidence. *C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1369 (Fed. Cir. 1998)*; *Handgards, Inc. v. Ethicon, Inc., 601 F.2d 986, 996 (9th Cir. 1979)*. "The U.S. Supreme Court has defined 'clear and convincing evidence' as evidence that places in the Court, as factfinder, an 'abiding conviction that the truth of its factual contentions are highly probable.'" *Bayer Schering Pharma AG v. Barr Laboratories, Inc., No. 05-cv-2308, 2008 U.S. Dist. LEXIS 15917, *50* (quoting *Colorado v. New Mexico, 467 U.S. 310, 316, 104 S. Ct. 2433, 81 L. Ed. 2d 247 (1984)* (internal quotation marks omitted)). *See also A.K. Stamping Co., Inc. v. Instrument Specialties Co., Inc., 106 F. Supp. 2d 627, 639 n. 13 (D.N.J. 2000)* (Greenaway, J.) ("'Clear and convincing' falls between the 'reasonable doubt' standard governing criminal cases and the "preponderance of the evidence" standard typical of civil actions.").

(a) *The Upsher Case*

(i) *Prosecution History Estoppel*

DP Plaintiffs have argued that even if the objectively baseless standard applies, they have developed a record which establishes that it was virtually certain that Upsher would have won the patent case. DP Plaintiffs' principal

---

[27] DP Plaintiffs do not contend that Schering's '743 Patent was procured by fraud on the PTO.

argument is that Schering's primary infringement **[*94]** argument was legally baseless because, during prosecution of the '743 Patent, Schering amended its claims to require EC with a viscosity of "greater than 40 cp." Specifically, DP Plaintiffs note that during prosecution of the '743 patent -- in response to the examiner's rejection of its claims as obvious in light of the prior art -- Schering amended its claims to require an EC with a viscosity of "greater than 40 cp." Upsher's generic product, however, uses Ethocel 20, with a viscosity of 18-22 cp and, thus, did not literally infringe the '743 patent. Therefore, Schering could only claim infringement under the "doctrine of equivalents." According to DP Plaintiffs, however, having surrendered its claim to a product using EC with a viscosity of less than 40 cp, Schering was barred by the doctrine of prosecution estoppel from claiming that Upsher's product using Ethocel 20 was equivalent to Schering's product claimed in the '743 patent.

Defendants dispute DPPs' contention that Schering's reliance on the doctrine of equivalents was objectively baseless. In the patent lawsuit, Key conceded that it was estopped from claiming equivalency as to EC described in the prior art '399 Patent, which **[*95]** had a viscosity of 9-11 cp. Key contended, however, that under the applicable law, it was not estopped from claiming equivalency as to EC with a range between the 11 cp disclosed in the prior art and the 40 cp literally claimed in the '743 Patent. Upsher moved for summary judgment contending that Key's amendment of the patent to recite a viscosity of "greater than 40 cp," estopped Key from claiming equivalence as to any product with a viscosity lower than 40 cp.

Defendants note that at the time Schering filed its lawsuit against Upsher, Federal Circuit law imposed a "flexible bar" under which a claim amendment did not necessarily surrender all range of equivalency regarding the subject matter literally given up by the amendment. *See* *Hughes Aircraft Co. v. United States, 717 F.2d 1351 (Fed. Cir. 1983)*. However, shortly before the settlement, the Supreme Court issued a decision in the case of *Warner Jenkinson Co. v. Hilton Davis Chemical Co., 520 U.S. 17, 117 S. Ct. 1040, 137 L. Ed. 2d 146 (1997)*, which called into question the applicability and scope of the "flexible bar" rule. Thus, by the time of the settlement, the law regarding Schering's ability to rely on the doctrine of equivalents was unsettled. *See* *Festo Corp. v. Shoketsu Kinzoku Kogyo Kabushiki, 234 F.3d 558, 574 (Fed. Cir. 2000)* **[*96]** (noting inconsistency in rules as to the scope' of prosecution history estoppel), *vacated on other grounds,* *535 U.S. 722, 122 S. Ct. 1831, 152 L. Ed. 2d 944 (2002)*. *See also* *In re Wellbutrin SR Antitrust Litig., 2006 U.S. Dist. LEXIS 9687, at *24 (E.D. Pa. Mar. 9, 2006)* (noting that during the 1980s and 1990s, there were two conflicting approaches to prosecution history estoppel, "the more prevalent of which was known as the flexible bar rule, according to which the doctrine of prosecution history estoppel extends only to the subject matter ... relinquished during the prosecution"). In view of the unsettled state of the law regarding prosecution estoppel at the time of the Upsher litigation and settlement, I conclude that Schering's equivalence argument can not be deemed objectively baseless. To be sure, Schering might have lost the argument had the case proceeded to a decision on summary judgment or at trial. In this regard, I note that at the summary judgment argument, Judge Walls expressed doubt about Schering's infringement claim in light of the claim amendment. However, the test is not whether Schering might have lost the patent suit; it is whether the suit was so objectively baseless "that no reasonable litigant **[*97]** could realistically expect success on the merits." *PRE, 508 U.S. at 60*. I conclude as a matter of law that DP Plaintiffs cannot satisfy that test.

(ii) *Other Equivalence and Inequitable Conduct Issues*

Finally, DP Plaintiffs argue that as a factual matter, Schering's argument in the patent case that the SMO in Upsher's product was equivalent to the HPC and PEG required by the '743 patent was objectively baseless. According to DP Plaintiffs, the facts show that: (1) Schering misrepresented the function of HPC and PEG as plasticizers; (2) Schering misrepresented the function of SMO as a plasticizer; and (3) Schering improperly ignored the principal function of HPC and PEG. DP Plaintiffs further argue that summary judgment should be denied so that a jury can consider the invalidity and unenforceability claims that Schering would have had to overcome to prevail on its infringement claim.

DP Plaintiffs' opposition to the Upsher Motion, and the parties' extensive recitations of the conflicting evidence in the patent case regarding these issues, foreclose any finding that Schering's lawsuit was objectively baseless. In particular, the issue of whether SMO was equivalent to HPC was hotly disputed **[*98]** in the patent case, with both sides offering expert opinion in support of their positions. In addition, as Defendants note, Upsher argued in the patent case that multiple fact disputes precluded summary judgment in favor of Key on Upsher's inequitable conduct claim. Because it is clear that there were genuine factual and legal disputes regarding Schering's claims in the patent lawsuit, DP Plaintiffs cannot establish that those claims were objectively baseless.

(b) *The ESI Case*

DP Plaintiffs have not argued, nor identified any evidence, that Schering's patent litigation against ESI was objectively baseless. Moreover, it is undisputed that ESI had problems demonstrating the bioequivalence of its product to K-Dur and that the FDA had twice rejected ESI's bioequivalence studies. Additional undisputed evidence reflects that Schering believed ESI did not have a viable product and that Schering settled under some pressure from the presiding court. *See* *Schering-FTC, 2003 FTC LEXIS 187, at *165* (acknowledging that "Schering was subject to intense, and perhaps unseemly, judicial pressure to settle the patent litigation, and [that] Schering may well have been concerned about its future litigation **[*99]** prospects if it resisted."). In sum, there is no evidence that Schering's lawsuit against ESI was objectively baseless, and, thus, Defendants are entitled to summary judgment on DP Plaintiffs' claims relating to the ESI Settlement.

IV. CONCLUSION

For the reasons set forth above, I conclude that Defendants' Motions for Summary Judgment as to DP Plaintiffs' claims relating to the Uphser and ESI Settlements should be granted. I further conclude that DP Plaintiffs' Motions for Partial Summary Judgment as to the Applicable Framework for Analysis of Exclusion Payments and as to the Exclusionary Scope of the '743 Patent should be denied.

As provided in the Order entered by Magistrate Judge Arleo in this matter, the Special Master's decision on any motion can be appealed to Judge Greenaway in the manner, and subject to the standards of review set forth in *Rule 53 of the Federal Rules of Civil Procedure* and applicable Local Rules.

STEPHEN M. ORLOFSKY

SPECIAL MASTER

ORDER

The Special Master having considered: (1) the Motion of Defendants Schering-Plough Corporation and Upsher-Smith Laboratories, Inc. (collectively, "Defendants") for Summary **[*100]** Judgment as to All Claims Brought By Direct Purchaser Plaintiffs ("DPPs") Related to the Upsher Settlement; (2) Defendants' Motion for Summary Judgment as to All Claims Brought By DPPs Related to the ESI Settlement; (3) DPPs' Motion for Partial Summary Judgment as to the Applicable Framework for Analysis of Exclusion Payments; and (4) DPPs' Motion for Partial Summary Judgment as to the Exclusionary Scope of the '743 Patent, the briefs submitted by all parties in support of and in opposition to the Motions, and the oral argument of counsel, for the reasons set forth in the foregoing Amended Report and Recommendation;

IT IS HEREBY ORDERED, this 6th day of February, 2009, that:

(1) Defendants' Motion for Summary Judgment as to All Claims Brought By DP Plaintiffs Related to the Upsher Settlement is **GRANTED;**

(2) Defendants' Motion for Summary Judgment as to All Claims Brought By DP Plaintiffs Related to the ESI Settlement is **GRANTED;**

(3) DP Plaintiffs' Motion for Partial Summary Judgment as to the Applicable Framework for Analysis of Exclusion Payments is **DENIED;** and

(4) DP Plaintiffs' Motion for Partial Summary Judgment as to the Exclusionary Scope of the '743 Patent is **DENIED.**

Counsel: **[*1]** Sophia Siddiqui, Esquire, of FOX ROTHSCHILD LLP, Attorneys for Plaintiff, Counterclaim-Defendant Lannett Company, Inc.

Frederick L. Cottrell, III, Esquire; Chad M. Shandler, Esquire; and Anne Shea Gaza, Esquire; of RICHARDS LAYTON & FINGER, P.A., Attorneys for Defendants, Counterclaim-Plaintiffs KV Pharmaceutical Company, Ther-RX Corporation and Drugtech Corporation.

Judges: Collins J. Seitz, Jr., Special Master.

Opinion by: Collins J. Seitz, Jr.

Opinion

Collins J. Seitz, Jr., Special Master

The District Court referred to me for decision the following motions:

(1) Defendants/Counterclaim-Plaintiffs KV Pharmaceutical, Ther-RX Corp., and Drugtech Corporation's (collectively "KV") motion to dismiss Plaintiff/Counterclaim Defendant Lannett Company Inc.'s ("Lannett") Amended Complaint (D.I. 59);

(2) Lannett's motion for leave to file a Second Amended Complaint (D.I. 77);

(3) KV's motions for summary judgment with respect to Counts Four through Ten of Lannett's Amended and [Proposed] Second Amended Complaint (D.I. 127, 128, 129, 130);

(4) KV's motion to bifurcate the antitrust, deceptive trade practices and tort claims from the Patent and Lanham Act claims (DI 141); and

(5) Lannett's motion for leave to file a Third Amended Complaint **[*2]** (DI 271).

For the reasons stated herein, I recommend that

(1) KV's motion to dismiss be granted;

(2) Lannett's motion for leave to file a Second Amended Complaint be granted in part and denied in part;

(3) KV's motions for summary judgment on Counts Six Through Ten be denied;

(4) KV's motion to bifurcate the antitrust, deceptive trade practices and tort claims be denied as moot; and

(5) Lannett's motion for leave to file a Third Amended Complaint be denied.

I. BACKGROUND

Lannett has begun selling a multivitamin and mineral product containing omega-3 fatty acids (the "product"). The product is prescribed to women "throughout pregnancy, during the postnatal period for both lactating and non-lactating mothers, and throughout the childbearing years." (DI 4 at ¶ 10). The central issue in this case is whether Lannett's product infringes KV's patents *(Id*. at ¶ 13). Deciding that it would rather play offense than defense in determining that question, Lannett sent a letter to KV demanding that KV refrain from asserting its patents against Lannett's product *(Id*. at ¶ 14).

Assuming that KV would refuse to agree to its request, and within hours of sending the letter, Lannett filed a Complaint (D.I. 1) **[*3]** against KV and two of its subsidiaries. Four days later, on June 10, 2008, Lannett filed an Amended Complaint (D.1. 4). Count One of the Amended Complaint seeks a declaratory judgment of non-infringement directed to United States Patent Nos. 6,258,846 ("the '846 Patent"), 6,576,666 ("the '666 Patent"), 7,112,609 ("the '609 Patent"), 6,197,329 ("the '329 Patent"), and 6,569,857 ("the '857 Patent" collectively, the "KV Patents") and United States Patent Nos. 5,516,925 ("the '925 Patent") and 6,716,814 ("the '814 Patent") (D.I. 4 ¶¶ 5-6, 17-27). Count Two seeks a declaratory judgment of invalidity directed to the KV Patents, and Count Three asserts inequitable conduct directed to the '609 Patent *(id*. at ¶¶ 28-56). Counts Four and Five claim antitrust violations and violations of the Delaware Deceptive Trade Practices Act *(Id*. at ¶¶ 57-72).

As Lannett predicted, KV counter-attacked almost immediately. On June 16, 2008, KV filed an answer and counterclaim (D.I. 5) against Lannett for patent infringement, trademark infringement, false advertising, and unfair competition, and moved for a temporary restraining order ("TRO") and preliminary injunction (D.1. 6). On June 25, 2008, the District Court heard oral argument on the TRO and entered an Order compelling Lannett to take remedial action with respect to product that it provided to distributors (D.1. 57). Since the Court's June 25 Order, discovery ensued and this action has proceeded toward **[*4]** trial, which is now set for March 23, 2009.

II. DISPOSITION OF KV'S MOTION TO DISMISS

In its brief in support of its motion to dismiss, KV argues that (1) Counts One, Two, and Three of the Amended Complaint should be dismissed for lack of subject matter jurisdiction because there was no case or controversy at the time Lannett's initial Complaint was filed; (2) Counts One and Two of the Amended Complaint concerning the '925 and '814 patents, which are owned by non-party Albion International, Inc. ("Albion"), should be dismissed for failure to join an indispensable party;[1] and (3) Counts Four and Five should be dismissed for failure to state a claim upon which relief can be granted (D.I. 60).

---

[1] The parties have stipulated to the dismissal of claims relating to the two patents owned by Albion. (D.I. 69 at 41). Indeed, Lannett struck all references to the '925 and '814 patents in its proposed Second Amended Complaint (D.I. 77, Ex. A ¶¶ 23). Therefore, KV's motion to dismiss claims relating to these patents is moot.

A. Standard of Review

Because the motion to dismiss implicates the Court's subject matter jurisdiction, the Declaratory Judgment Act, and whether the Amended Complaint states a claim upon which relief can be granted, I briefly set forth the various standards of review.

1. Subject Matter Jurisdiction

Rule 12(b)(1) of the Federal Rules of Civil Procedure authorizes dismissal of a complaint for lack of subject matter jurisdiction. "Motions brought under *Rule 12(b)(1)* may present either a facial or factual challenge to the court's subject matter jurisdiction." *Priority Healthcare Corp.* ***[*5]*** *v. Aetna Specialty Pharmacy, LLC, 590 F. Supp. 2d 663, 2008 WL 5273495, at *3 (D. Del. Dec. 18, 2008)*. In reviewing a factual challenge to the court's subject matter jurisdiction, the court is not confined to the allegations of the complaint, and the presumption of truthfulness does not attach to those allegations. *Mortensen v. First Fed. Sav. and Loan Ass'n, 549 F.2d 884, 891 (3d Cir. 1977)*. Instead, the court may consider evidence outside the pleadings, including affidavits, depositions, and testimony, to resolve any factual issues bearing on jurisdiction. *Gotha v. United States, 115 F.3d 176, 179, 36 V.I. 392 (3d Cir. 1997)*. Once the court's subject matter jurisdiction over a complaint is challenged, the plaintiff bears the burden of proving that subject matter jurisdiction exists. *Mortensen, 549 F.2d at 891*.

2. The Declaratory Judgment Act

The Declaratory Judgment Act does not create federal jurisdiction. Rather, jurisdiction must be established in accordance with *Article III, Section 2 of the United States Constitution*, and therefore, jurisdiction under the Declaratory Judgment Act requires a justiciable case or controversy between the parties. *28 U.S.C. § 2201(a)*; *Cat Tech LLC v. TubeMaster, Inc., 528 F.3d 871, 879 (Fed. Cir. 2008)*. For there to be a case or controversy under Article III, "the dispute must be definite and concrete, touching the legal relations of parties having adverse legal interests," "real and substantial," and "admit of specific relief through a decree of conclusive character, as distinguished from an opinion advising **[*6]** what the law would be upon a hypothetical state of facts." *MedImmune, Inc. v. Genentech, Inc., 549 U.S. 118, 127, 127 S. Ct. 764, 166 L. Ed. 2d 604 (2007)* (citation omitted). Because there is no bright-line rule for determining whether an action satisfies the case or controversy requirement, "the analysis must be calibrated to the particular facts of each case," *Cat Tech LLC, 528 F.3d at 879*, with the basic standard being whether "the facts alleged, under all the circumstances, show that *there is a substantial controversy*, between parties having adverse legal interests, *of sufficient immediacy and reality* to warrant the issuance of a declaratory judgment." *MedImmune, 549 U.S. 118 at 127, 127 S. Ct. 764, 166 L. Ed. 2d 604* (emphasis added).

Recent decisions by the Federal Circuit have elaborated on the *MedImmune* standard. In *Prasco, LLC v. Medicis Pharmaceutical Corporation*, the Federal Circuit explained that the "immediacy and reality" requirement can be viewed through the lens of standing. To satisfy standing, the plaintiff must allege "(1) an injury-in-fact, *i.e.* a harm that is concrete and actual or imminent, not conjectural or hypothetical, (2) that is fairly traceable to the defendant's conduct, and (3) redressable by a favorable decision." *Prasco, LLC v. Medicis Pharm. Corp., 537 F.3d 1329, 1338 (Fed. Cir. Aug. 15, 2008)* (quoting *Caraco Pharin. Labs., Ltd. v. Forest Labs., Inc., 527 F.3d 1278, 1291 (Fed. Cir. 2008)* (quotations omitted). An injury-in-fact is crucial because "jurisdiction generally will not arise merely on the basis **[*7]** that a party learns of the existence of a patent owned by another or even perceives such a patent to pose a risk of infringement." *Id. at 1339*. At least "some affirmative act by the patentee" is necessary for an injury-in-fact sufficient to establish an actual controversy. *Id.* (quoting *SanDisk Corp. v. STMicroelectronics, Inc., 480 F.3d 1372, 1380 (Fed. Cir. 2007))*; *see also* *Innovative Therapies, C.A. No. 07-589-SLR-LPS, 2008 U.S. Dist. LEXIS 53290, 2008 WL 2746960, at *8 (D. Del. July 14, 2008)* (finding lack of subject matter jurisdiction over claim for declaratory judgment where plaintiff failed to take "affirmative acts" to enforce patents).

3. *Federal Rule of Civil Procedure 12(b)(6)*

When reviewing a motion to dismiss under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*, "the Court must accept all factual allegations in a complaint as true and take them in the light most favorable to the plaintiff." *Watson v. Hartford Life and Acc. Ins. Co., C.A. No. 08-013-JJF, 589 F. Supp. 2d 452, 2008 WL 5171854, *1 (D. Del. Dec. 9, 2008)* (citing *Erickson v. Pardus, 551 U.S. 89, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007))*. The "[f]actual allegations must be enough to raise a right to relief above the speculative level on the assumption that all of the allegations in the complaint are true (even if doubtful in fact)." *Bell Atl. Corp. v. Twombly, 127 S.Ct. at 1965, 1965 (2007)* (citations omitted). Therefore, "'stating ... a claim requires a complaint with enough factual matter (taken as true) to suggest' the required element." *Phillips v. County of Allegheny, 515 F.3d 224, 234 (3d Cir. 2008)* (quoting *Twombly, 127 S.Ct. at 1965 n. 3*). "This 'does not impose a probability requirement at the pleading stage,' but instead 'simply calls for enough facts **[*8]** to raise a reasonable expectation that discovery will reveal evidence of the necessary element." *Id. at 234*. Blanket and conclusory assertions will not suffice. *Id. at 232*.

B. The Non-Infringement, Invalidity and Inequitable Conduct Claims

KV makes a factual challenge to the Court's subject matter jurisdiction over Lannett's request for declaratory relief on Counts One, Two, and Three of the Amended Complaint (the "non-infringement", "invalidity" and "inequitable conduct" claims, respectively). It argues that there is no case or controversy because KV has never taken any affirmative action regarding the patents-in-suit (D.I. 60 at 7; D.I. 75 at 1-3; D.I. 81) (citing *Prasco, 537 F.3d at 1339*; *San Disk, 480 F.3d at 1380*; and *Innovative Therapies, 2008 U.S. Dist. LEXIS 53290, 2008 WL 2746960, at *8)*. Specifically, KV states that it had never asserted the patents against Lannett, threatened Lannett, or communicated with Lannett concerning its patents. (D.I. 60 at 5, 7). In fact, KV asserts that prior to receiving Lannett's letter demanding that KV agree to refrain from asserting any claim of patent infringement against Lannett's multivitamin and mineral product, it had "no knowledge" that Lannett was planning to launch a generic version of PrimaCare ONE® into the marketplace *(Id.)*. According to KV, this lawsuit came "completely **[*9]** out of the blue." *(Id*. at 4).

Lannett does not dispute that it blindsided KV with its Complaint, which followed immediately on the heels of its letter demand for assurances. Rather, Lannett identifies the following "affirmative acts" by KV that, it contends, create an injury-in-fact sufficient to give the Court subject matter jurisdiction over its request for declaratory relief: (1) KV's failure or refusal to provide assurances that it would not asserts its patents against Lannett and block Lannett's entry into the market (D.I. 69 at 8); (2) KV's pattern of litigious conduct in intellectual property matters *(Id*. at 9); (3) KV's counterclaim for infringement *(Id*. at 8-12); (4) KV's press release that it "intended to defend this and any other challenges to our patents rights vigorously" (DI 82); and (5) KV's statement to customers that it was taking steps to "vigorously enforce" the patents at issue in this suit. *(Id.)* These arguments do not survive scrutiny.

First, KV's refusal to give assurances that it would not enforce its patents, although relevant to a determination of jurisdiction, is not dispositive. *Prasco, 537 F.3d at 1341*. As the Federal Circuit explained in *Prasco*, "the patentee's silence does not alone make an infringement **[*10]** action or other interference with the plaintiff's business imminent." *Id.* "Thus, though a defendant's failure to sign a covenant not to sue is one circumstance to consider in evaluating the totality of the circumstances, it is not sufficient to create an actual controversy — some affirmative actions by the defendant will also generally be necessary." *Id.*

At the time the complaint under consideration was filed — the Amended Complaint[2] — it is undisputed that KV had not accused Lannett of infringement, asserted any rights to Lannett's generic version of PrimaCare ONE®, or

---

[2] I disagree with Lannett's argument that the *Second* Amended Complaint is currently under the Court's consideration, and as a consequence, that there is a live controversy between the parties because KV had asserted counterclaims by the time that it filed the Second Amended Complaint (D.I. 98 at 3-4) (citing *Prasco)*. In *Prasco*, the Federal Circuit explained that the district court *accepted* the declaratory judgment plaintiff's Amended Complaint. *537 F.3d at 1337*. Here, the Court has not accepted the Second Amended Complaint. The Second Amended Complaint is merely an exhibit to a motion for leave to file. Moreover, while

communicated with Lannett about its product. Nor had it taken any actions that restrained Lannett with regard to its product. Indeed, Lannett repeatedly alleges that it "has already manufactured, imported, sold and distributed the product for which it now seeks a declaration of non-infringement or invalidity." (D.1. 69 at 8; *see also id.* at 2, 9). Coupled with its inaction, KV's silence or refusal to provide assurances does not evidence an actual controversy.

Second, Lannett's claim that KV has previously litigated other "intellectual property matters" (D.1. 69 at 10) is only "one circumstance **[*11]** to be considered in assessing whether the totality of circumstances creates an actual controversy." *Prasco, 537 F.3d at 1341*. And that circumstance here is not persuasive because the cases cited by Lannett are all Lanham Act cases against companies *other than Lannett* seeking redress for *trademark infringement* (D.I. 75, Ex.'s A and B). In *Prasco*, the Federal Circuit explained that prior suits asserting different claims against different parties covering different products "is not the type of pattern of prior conduct that makes reasonable an assumption that [the patentee] will also take action against [the declaratory judgment plaintiff]." *Id.* Thus, KV's prior suits cannot "alone create a real and immediate controversy," and given KV's lack of affirmative action prior to the filing of the Complaint, I apply only "minimal weight" to those facts in analyzing whether there was a case or controversy between the parties at the time the Amended Complaint was filed. *Id.*

Third, KV's counterclaim against Lannett for infringement of its patents does not retroactively give rise to subject matter jurisdiction. The counterclaim was filed six days after the Amended Complaint, and it is well established that "[1]ater events **[*12]** may not create jurisdiction where none existed at the time of filing of the complaint." *GAF Bldg. Materials Corp. v. Elk Corp., 90 F.3d 479, 483 (Fed. Cir. 1996)*; *Prase()* (quoting *GAF, 90 F.3d at 483*); *Innovative Therapies, 2008 U.S. Dist. LEXIS 53290, 2008 WL 2746960 at *9* (quoting *GAF, 90 F.3d at 483*). The proper focus in determining jurisdiction for purposes of a declaratory judgment are the facts "at the time the complaint under consideration was filed." *GAF, 90 F.3d at 483*. *See also Grupo Dataflux v. Atlas Global Group, L.P., 541 U.S. 567, 570-71, 124 S. Ct. 1920, 158 L. Ed. 2d 866 (2004)* ("It has long been the case that the jurisdiction of the court depends upon the state of things at the time of the action brought.") (citation omitted); *Keene Corp. v. United States, 508 U.S. 200, 113 S.Ct. 2035, 2040, 124 L. Ed. 2d 118 (1993)* (noting "longstanding principle that the jurisdiction of the Court depends upon the state of things at the time of the action brought"). Therefore, even though Lannett correctly predicted KV's course of action, there was no case or controversy at the time the Amended Complaint was filed.[3]

Similarly, KV's statements that it would "vigorously" defend its patents — after Lannett filed suit[4] — does not cure the previous lack of an actual controversy. Nor are such statements sufficient to create a controversy. *See Baker*

Rule 15(d) of the Federal Rules of Civil Procedure allows supplemental pleadings to cure defects in the original pleadings, the Second Amended Complaint does not supplement the pleadings with regard to jurisdiction — Latnnett fails to plead the filing of the counterclaim. The Second Amended Complaint still claims that "Where is a reasonable likelihood that the KV Defendants *will assert* a claim for patent infringement against Lannett once its product, Multivitamin With Mineral Capsules, enters the marketplace." (DI 77, Ex. A ¶11) (emphasis added). Thus, Lannett did not "mislabel" its *amended* complaint. *Prasco, 537 F.3d at 1337* (explaining that "[p]arties and courts occasionally confuse supplemental pleadings with amended pleadings and mislabeling is common."). The amended complaint is not actually a supplemental complaint, at least with regard to the infringement, invalidity, inequitable conduct, antitrust and unfair trade practices claims. But even if Lannett had actually supplemented the Amended Complaint, it is within the Court's discretion to decide whether to allow the supplemental pleading. *Prasco, 537 F.3d at 1337* at n.5. I decline to recommend the exercise of such discretion. Lannett has a remedy to obtain adjudication on the patents asserted in this suit—KV's counterclaim. Accordingly, the Amended Complaint is the proper complaint under consideration on Lannett's invalidity, non-infringement and inequitable conduct claims.

[3] Lannett cites *Micron Tech., Inc. v. Mosaid Techs., Inc., 518 F.3d 897, 901-02 (Fed. Cir. 2008)* for the proposition that "evidence that the declaratory judgment defendant would sue the declaratory judgment plaintiff soon" creates a case or controversy (D.1. 69 at 9). There is no quarrel with that statement, which is wholly consistent with the cases requiring an affirmative act by the patentee in order to establish the necessary controversy for declaratory judgment jurisdiction. However, the affirmative acts by the patentee in *Micron* (a warning letter strongly suggesting that the plaintiff should license patentee's technology, and three follow-up letters) occurred *prior* to the filing of the complaint, unlike the counterclaim filed by KV here.

[4] According to Lannett, KV's public statement that it would vigorously enforce its patents was issued on the same day that Lannett filed the Amended Complaint, and KV's similar statement to its customers was made "at or about th[e] same time." (D.I.

*Hughes Oilfield Operations, Inc. v. Reedhycalog UK, Ltd., 2008 U.S. Dist. LEXIS 9323, 2008 WL 345849 at *2-3 (D. Utah Feb. 6, 2008)* (dismissing action seeking declaratory judgment of noninfringement, invalidity, and unenforceability of patents due to lack of "affirmative act" by patentee, even though patentee had sent plaintiff numerous letters evidencing that **[*13]** patentee was evaluating possible infringement litigation against plaintiff).

Considering "all the circumstances," *MedImmune, 549 U.S. 118 at 127, 127 S. Ct. 764, 166 L. Ed. 2d 604*, I find that Lannett has failed to establish a case or controversy under Article III for its non-infringement, invalidity and inequitable conduct claims. *See* *Benitec Australia, Ltd. v. Nucleonics, Inc., 495 F.3d 1340, 1344 (Fed. Cir. 2007)* (explaining that the burden is on the declaratory judgment plaintiff to establish that such jurisdiction existed at the time the claim for declaratory relief was filed). Accordingly, I recommend that Counts One, Two, and Three be dismissed for failure to establish a case or controversy under Article III of the Constitution.[5]

C. The Antitrust Claims

In analyzing KV's motion to dismiss both the antitrust and deceptive trade practices act claims, I will consider the Second Amended Complaint because KV opposes Lannett's motion for leave to amend on grounds that those claims would not survive a motion to dismiss (D.I. 91 at 9-11).

In the Second Amended Complaint, Lannett claims that KV "ha[s] obtained and maintained monopoly power in both the relevant product market," which is "multivitamin/mineral products containing omega-3 fatty acids for prenatal and postnatal support, including all products that are reasonably interchangeable," and **[*14]** the relevant geographic market, which is the United States (D.1. 77, Ex. A at ¶¶ 58-60). Lannett alleges that KV violated *Section 2* of the Sherman Act, *15 U.S.C. § 2*, by unlawfully obtaining and maintaining market power in the relevant market by "use of threats to enforce patents that the KV Defendants knew were invalid and/or procured fraudulently" and by "interfering with Lannett's relationships with its suppliers." *(Id*. at ¶ 132).

1. Lannett's Walker Process Claim

As a general rule, "behavior conforming to the patent laws oriented towards procuring or enforcing a patent enjoys immunity from the antitrust laws." *Unitherm Food Sys. v. Swift-Ickrich, Inc., 375 F.3d 1341, 1356 (Fed. Cir. 2004)*, *rev 'd on other grounds* *546 U.S. 394, 126 S. Ct. 980, 163 L. Ed. 2d 974 (2006)*. Because a patentee has a lawful monopoly over an invention, antitrust liability cannot flow from conduct that is permissible under the patent laws. *See* *SCM Corp. v. Xerox Corp., 645 F.2d 1195, 1206 (2d Cir. 1981)* ("we hold that where a patent has been lawfully acquired, subsequent conduct permissible under the patent laws cannot trigger any liability under the antitrust laws"). An exception to this rule arises when a patentee attempts to enforce a patent obtained by fraud. *Id.* (citing *Walker Process Equip., Inv .v Food Mach. & Chem. Corp., 382 U.S. 172, 174, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965))*; *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1072 (Fed. Cir. 1998))*. Patent antitrust claims alleging fraud are called *Walker Process* claims. In a typical *Walker Process* case, a defendant with monopoly power in **[*15]** a well-defined product market uses a fraudulently obtained patent to deter would-be competitors from entering the market. In those circumstances, the threat of litigation (enforcement) may deter market entry and preserve monopoly power. *Walker Process, 382 U.S. at 174*; *Nobelpharma, 141 F.3d at 1072*.

To establish a *Walker Process* claim, Lannett must demonstrate that (1) KV attempted to enforce its patents, (2) KV's patents issued because it defrauded the United States Patent & Trademark Office ("PTO"), (3) attempted

---

82). These assertions are vague about the actual timing of KV's alleged statements, and thus do not satisfy Lannett's burden of proving that they were made *prior* to the filing of the Amended Complaint.

[5] In granting KV's motion to strike Lannett's affirmative defenses of inequitable conduct regarding the '846 and '666 patents, I also dismissed without prejudice Lannett's request to file a second amended complaint, "insofar as it seeks to add new claims of inequitable conduct with respect to the '846 and the '666 patents." Had the jurisdictional issue been presented at that time, I may have recommended that the motion for leave to amend be denied *with prejudice*.

enforcement of the patents harmed competition in the relevant market, (4) Lannett suffered antitrust damages, and (5) the necessary additional elements of an underlying violation of the antitrust laws. Unitherm, 375 F.3d at 1355. Turning to the first element, a plaintiff must plead that the fraudulently-procured patent was enforced. Merely procuring a patent by fraud is not sufficient. Unitherm, 375 F.3d at 1355. If a plaintiff cannot plead the minimum level of enforcement necessary to sustain a declaratory judgment action, the plaintiffs likewise cannot plead a *Walker Process* claim. Unitherm, 375 F.3d at 1358 (holding "that, as a matter of Federal Circuit ***antitrust law***, the standards that we have developed for determining jurisdiction in a Declaratory Judgment Action of patent invalidity also define the minimum **[*16]** level of 'enforcement' necessary to expose the patentee to a Walker Process claim" for monopolization).

Lannett did not plead the minimum level of enforcement necessary to sustain a declaratory judgment action. Absent from the pleadings is any "affirmative" action taken by KV to enforce its patents *prior* to Lannett's bringing this lawsuit. Thus, Lannett's claim essentially boils down to an assertion that KV has fraudulently obtained its patents. But, "the courts lack jurisdiction to entertain" a *Walker Process* claim "if the patentee has done nothing but obtain a patent in a manner that the plaintiff believes is fraudulent." *Id.;* In re Netflix Antitrust Litig., 506 F.Supp. 2d 308, 317-19 (N.D. Cal. 2007) (dismissing *Walker Process* claim for failure to meet the enforcement requirement because "[e]nforcement requires some affirmative act which is lacking in the pleadings"). Accordingly, I recommend that Lannett's *Walker Process* claim be dismissed.[6]

2. An Antitrust Claim Under *Section 2* of the Sherman Act

In addition to its failure to state a *Walker Process* claim, Lannett does not state a claim for monopolization under the antitrust laws. To state a monopolization claim, Lannett must allege "(1) the possession of monopoly power in the relevant market and (2) **[*17]** the willful acquisition or maintenance of that power." Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 307 (3d Cir. 2007) (internal quotation marks omitted); *see also* Verizon Communications Inc. v. Law Offices of Curtis v. Trinko, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004) ("To safeguard the incentive to innovate, the possession of monopoly power will not be found unlawful unless it is accompanied by an element of anticompetitive *conduct.")*. Lannett fails to allege either element.[7]

Possession of Monopoly Power

Lannett's allegations of monopoly power fall short both because Lannett fails to define a relevant market and because it does not allege facts that KV has monopoly power in "the market" for prenatal and postnatal vitamins containing omega-3 fatty acids, or any market.

"Plaintiffs have the burden of defining the relevant market," and

> [w]here the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiffs favor, the relevant market is legally insufficient and a motion to dismiss may be granted.

---

[6] Because Lannett cannot plead the minimum level of enforcement necessary to sustain a *Walker Process* claim, I need not address the other elements of the claim: whether KV's patents issued because it defrauded the PTO; enforcement of KV's patents harmed competition in the relevant market; and Lannett suffered antitrust damages. I address the monopolization issues for purposes of evaluating Lannett's other antitrust claim in Count Eleven.

[7] Even if Lannett is bringing an *attempted* monopolization claim, as opposed to a monopolization claim, it must define a relevant market, which it has not done. Nor has Lannett pled any facts that KV has a "dangerous probability" of achieving monopoly power. Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993).

Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997).[8] The Second Amended Complaint fails to clear this initial hurdle; the **[*18]** market is defined solely as "prenatal and postnatal vitamins containing *omega-3 fatty acids"* and "all products that are reasonably interchangeable." This definition is deficient for at least two reasons.

First, Lannett's referral to the rule of reasonable interchangeability is nothing more than "a formulaic recitation of the elements of a cause of action." Twombly, 127 S. Ct. at 1964-65. Nowhere does the complaint "allege *facts* regarding substitute products, ... distinguish among apparently comparable products, or allege other pertinent facts relating to cross-elasticity of demand." ReAlco Indus. v. Nat'l Ctr. For Health Educ., 812 F. Supp. 387, 391-92 (S.D.N.Y 1993) (granting motion to dismiss because "[p]laintiff has made no showing why [the product] should be considered a market unto [itself]" and failed to discuss "any relevant differences in demand"); B. V. Optische Industrie de Oude Delft v. Hologic, Inc., 909 F. Supp. 162, 172 (S.D.N.Y. 1995) (granting motion to dismiss because plaintiff's failed to "allege facts regarding substitute products, and distinguish among comparable products"). And second, defining the market to that covered by the patents-in-suit does not confer monopoly power in the antitrust sense. Every patent owner has a "monopoly" over the patent that it owns (by definition). *See* Illinois Tool Works Inc. v. Independent Ink, Inc., 547 U.S. 28, 45-46, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006); 3 Philip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 704a, at 159 (2d ed. **[*19]** 2002) ("Neither ownership of the [patent] nor the power to exclude conveys monopoly power unless the property right in question dominates a properly defined relevant market.").

Furthermore, even if Lannett's definition of the relevant market is sufficient, Lannett has failed to allege anything more than the conclusion that KV has monopoly power in the market for prenatal and postnatal vitamins containing omega-3 fatty acids. Both the Amended and Second Amended Complaints are barren of facts that Lannett has any present market share at all. Without any specific facts, Lannett's Sherman Act claim cannot proceed. *See* Doug Grant, Inc. v. Greate Bay Casino Corp., 232 F.3d 173, 183-84 (3d Cir. 2000) (conclusory allegations disregarded in assessing adequacy of complaint).

Exclusionary Conduct

Lannett also fails to allege that KV has engaged in exclusionary conduct that could create or sustain any alleged monopoly power. Monsanto Co. v. Scruggs, 459 F.3d 1328, 1338-39 (Fed. Cir. 2006) ("To establish a section 2 violation, one must prove that the party charged had monopoly power in a relevant market and acquired or maintained that power by anticompetitive practices instead of by competition on the merits."). In the Second Amended Complaint, Lannett claims that KV has maintained and is continuing to maintain its market power by "obstructing interfering **[*20]** with Lannett's relationships with its suppliers." (D.I. 77, Ex. A at ¶ 130). Specifically, Lannett contends that KV interfered with its contract with Albion for the purchase of Ferrochel® chelated iron for use as a source of iron in Lannett's multivitamin with minerals product (*Id.* at 129). This alleged *individual* harm does not suffice. The alleged anticompetitive conduct must have an adverse effect on competition *as a whole* in the relevant market. Brooke Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 224-25, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1995) ("It is axiomatic that the antitrust laws were passed for 'the protection of competition, not competitors.") (citation and quotations omitted); Spanish Broadcasting Sys. of Florida, Inc. v. Clear Channel Commc'ns, Inc., 376 F.3d 1065, 1075-76 (11th Cir. 2004) ("conduct that injures individual firms rather than competition in the market as a whole does not violate Section Two"); Conwood v. U.S. Tobacco Co., 290 F.3d 768, 783-84 (6th Cir. 2002) ("Isolated tortious activity alone does not constitute exclusionary conduct for purposes of a § 2 violation, absent a significant and more than a temporary effect on competition, and not merely on a competitor or

---

[8] "[I]n most cases, proper market definition can be determined only after a factual inquiry into the commercial realities faced by consumers." Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997) (citing Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265, (1992)). However, there is no *per se* rule against dismissal for failure to define a relevant market under Rule 12(b)(6). *Id.*

customer."). Because Lannett's antitrust claims do not allege monopoly power or conduct that injures the market as a whole, those claims should be dismissed for failure to state a claim.

D. The Deceptive Trade Practices Act Claim

Count Five of the Second Amended Complaint alleges **[*21]** that KV has violated the Delaware Deceptive Trade Practices Act ("DTPA"), 6 *Del. C*. *§ 2532*, by representing in the course of its business and in its advertising that PrimaCare ONE® is protected by five patents — the '609 Patent, '846 Patent, '666 Patent and Patent Nos. 4,822,816 ("the '816 Patent") and 5,070,085 ("the '085 Patent") — all of which are alleged to be invalid or unenforceable (the '609, '846 and '666 patents) or expired (the '816 and '085 patents). (D.I. 77, Ex. A at ¶¶ 70-80).

KV argues that Lannett's state law claims are preempted by federal patent law (D.I. 60 at 16, D.I. 91 at 11). A state law claim is preempted by federal patent law only when the state law "stands as an obstacle to the accomplishment and execution of the fall purposes and objectives of Congress." *Cryovac Inc. v. Pechiney Plastic Packaging, Inc., 430 F. Supp.2d 346, 358 (D. Del. 2006)* (quoting *Hines v. Davidowitz, 312 U.S. 52, 67, 61, 61 S. Ct. 399, 85 L. Ed. 581 (1941))*. However, a state law claim is not an obstacle to Congress's regulation of the patent law if the elements of the federal and state law causes of action are not the same. *See* *In re Semiconductor Energy Lab. Co. v. Samsung Elecs. Co., 204 F.3d 1368, 1382 (Fed. Cir. 2000)* (recognizing that state cause of action would not be preempted where it also included elements not found in the patent infringement defense of inequitable conduct) (citing *Dow Chem. Co. v. Exxon Corp., 139 F.3d 1470 (Fed.Cir.1998))*; *Netflix Antitrust Litig., 506 F.Supp. 2d at 319* ("Tort claims under state law are not preempted by federal patent law where they include additional elements not found in federal patent law claims.").

The elements of inequitable misconduct **[*22]** and a DTPA claim are different. An inequitable misconduct claim requires a showing that KV engaged in misconduct before the PTO. *Inline Connection Corp. v. AOL Time Warner Inc., 237 F.R.D. 361, 367 (D. Del. 2006)* (a "claim of patent unenforceability is premised upon inequitable conduct before the" PTO). On the other hand, KV could be liable to Lannett under DTPA if it has engaged in misconduct that "creates a likelihood of confusion or of misunderstanding" in the mind of the consumer. *6 Del. C. § 2532(a)*. Thus, Lannett's DTPA claim contains an "element other than misconduct or fraud before the PTO." *Netflix Antitrust Litig., 506 F.Supp. 2d at 319*. Thus, I find that Lannett's DTPA claim is not preempted.

However, Lannett's DTPA claim still fails because Lannett does not assert a basis for injunctive relief. Absent such a claim, Lannett lacks standing to sustain a cause of action under the DTPA. *Grand Ventures, Inc. v. Whaley, 632 A.2d 63, 70 (Del. 1993)*; *6 Del C. § 2533*. As explained in *Dionisi v. DeCampli, 1995 Del. Ch. LEXIS 88, 1995 WL 398536, at *13 (Del. Ch. June 28, 1995)*:

> A party seeking to recover this Act must have a basis for injunctive relief. The Act is designed to encourage immediate or at least timely enforcement of its provisions to halt unfair or deceptive trade practices between business with 'horizontal relationships.'... Injunctive relief coupled with the possibility of treble damages and counsel fees looms as a powerful deterrent against wrongdoers and an incentive to litigate **[*23]** for the wronged. It is not a vehicle for damages long after the immediacy of the grievance dissipates. When the press for instant action eases, so does the basis for possible concomitant damages. The DTPA is not a platform for an independent common law damage suit.

Accordingly, Count Five of the Second Amended Complaint should be dismissed. *See* *State ex rel Brady v. Pettinaro Enters, 870 A.2d 513, 537 (Del. Ch. 2005)* (dismissing DTPA claim for failing to state a claim for injunctive relief); *Irgau v. Christiana Care Health Servs., C.A. No. 07C-11-180-JOH, 2008 Del. Super. LEXIS 129, 2008 WL 1724250, at *5 (Del. Super. Ct. Apr. 9, 2008)* (dismissing DTPA claim for failing to bring claim for injunctive relief).

III. DISPOSITION OF LANNETT'S MOTION FOR LEAVE TO FILE A SECOND AMENDED COMPLAINT

Rule 15 of the Federal Rules of Civil Procedure provides that after amending the complaint once or after an answer has been filed, the plaintiff may amend "only by leave of court or by written consent of the adverse party; and leave shall be freely given when justice so requires." *Fed. R. Civ.P. 15(a)*. The Third Circuit has adopted a liberal approach to the amendment of pleadings to ensure that "a particular claim will be decided on the merits rather than on technicalities." *Dole v. Arco Chem. Co., 921 F.2d 484, 486-87 (3d Cir. 1990)* (citations omitted). Amendment, however, is not automatic. *See* *Bacon v. Carroll C.A. No. 05-714-JJF, 2008 U.S. Dist. LEXIS 84195, 2008 WL 4681177, at *2 (D. Del. Oct 21, 2008)*.

Leave to amend will not be granted upon a showing of **[*24]** "undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of the allowance of the amendment, futility of amendment, etc." *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*; *Oran v. Stafford, 226 F.3d 275, 291 (3d Cir. 2000)*. Futility of amendment occurs when the complaint, as amended, does not state a claim upon which relief can be granted. *See* *In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410, 1434 (3d Cir. 1997)*.

As discussed, the Court lacks subject matter jurisdiction over Counts One, Two, and Three of the Amended Complaint, and the Second Amended Complaint pleads no new facts that create jurisdiction. Counts Four and Eleven of the Second Amended Complaint do not state a claim upon which relief may be granted. And Lannett lacks standing to assert Count Five - the DTPA claim. Therefore, I recommend that Lannett's motion for leave to file a Second Amended Complaint with respect to those claims be denied for futility. Lannett's motion for leave to file a Second Amended Complaint is granted with respect to Counts Six, Seven, Eight, Nine, and Ten.[9]

IV. DISPOSITION OF KV'S SUMMARY JUDGMENT MOTIONS

A. Summary Judgment Standard

In pertinent part, *Rule 56(c) of the Federal Rules of Civil Procedure* provides that a party is entitled to summary judgment if a court determines from **[*25]** its examination of "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any," that there are no genuine issues of material fact and that the moving party is entitled to judgment as a matter of law. *Fed.R.Civ.P. 56(c)*. In determining whether there is a triable dispute of material fact, a court must review all of the evidence and construe all inferences in the light most favorable to the non-moving party. *Valhal Corp. v. Sullivan Assocs., Inc., 44 F.3d 195, 200 (3d Cir. 1995)*. However, a court should not make credibility determinations or weigh the evidence. *Reeves v. Sanderson Plumbing Prods., Inc., 530 U.S. 133, 150, 120 S. Ct. 2097, 147 L. Ed. 2d 105 (2000)*. To consider properly all of the evidence without making credibility determinations or weighing the evidence, a "court should give credence to the evidence favoring the nonmovant as well as that evidence supporting the moving party that is uncontradicted and unimpeached, at least to the extent that that evidence comes from disinterested witnesses." *Id. at 151* (internal citations omitted).

To defeat a motion for summary judgment, the non-moving party must "do more than simply show that there is some metaphysical doubt as to the material facts.... In the language of the Rule, the non-moving party must come forward with specific facts showing that there is a genuine issue **[*26]** for trial." *Matsushita Elec. Indus. Co., Ltd. v. Zenith Radio Corp., 475 U.S. 574, 586-87, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)* (internal citations omitted). However, the mere existence of some evidence in support of the non-movant will not be sufficient to support a denial of a motion for summary judgment; there must be enough evidence to enable a jury to reasonably find for the non-movant on that issue. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 249, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. Thus, if the evidence for the non-movant is "merely colorable, or is not significantly probative," summary judgment may be granted. *Id.*

---

[9] I note that Counts Six through Ten of the Second Amended Complaint allege supplemental facts that occurred after the Amended Complaint was filed.

B. Tortious Interference with Contract or Prospective Contract or Prospective Contract with Customers

In Counts Six, Seven, and Eight of the Second Amended Complaint, Lannett alleges that KV is liable for commercial disparagement,[10] tortious interference with contract and tortious interference with prospective contractual relationship for mailing false and/or misleading letters to customers and/or potential customers. According to Lannett, the gist of KV's claims in those letters is that the sources of iron in Lannett's product and PrimaCare ONE® are "different," Lannett's product does not use "high quality, pharmaceutical grade fish oils," Lannett's product "contains ferric iron rather than ferrous iron," and "the iron contained in Lannett's product is ten times **[*27]** less soluble than the iron contained in" PrimaCare ONE®. (D.L 77, Ex, A at ¶¶ 81-108).

In Delaware,[11] to state a claim for tortious interference or prospective interference with contract requires proof, among other things, of: (1) a contract, (2) of the interferer's knowledge of the contract, (3) intentional interference that induces or causes breach of the contract, and (4) damages. *See* *Elite Cleaning Co. v. Capel, C.A. No., C.A. No. 2006 Del. Ch. LEXIS 105, 2006 WL 1565161, at *10 (Del. Ch. June 2, 2006)*. The elements of tortious interference with prospective contract are: (1) a "valid business relation or expectancy, (2) the interferer's knowledge of the relationship or expectancy, (3) intentional interference that (4) induces or causes a breach or termination of the relationship or expectancy and that (5) causes resulting damages to the party whose relationship or expectancy is disrupted." *In re Ferederick's of Hollywood S'holders Litig., C.A. No. 15444, 1998 Del. Ch. LEXIS 111, 1998 WL 398244, at *3 (Del. Ch. July 9, 1998)*.

KV asserts that summary judgment on Lannett's claims regarding its customers is warranted because Lannett has not produced evidence that it had a contract or a prospective business relationship with any of the recipients of the letters, or that it suffered economic injury as a result of the mailed letters. (D.I. 129, 198). While that may have been true when KV briefed its motion for summary judgment, at oral argument **[*28]** on the various motions, I granted Lannett leave to submit a counterstatement of genuine issues of material fact. (Transcript of Hearing on Jan. 21, 2009 at 95). In its counterstatement, Lannett claims that it "entered into numerous contracts with its customers for the sale of its Multivitamin with Minerals product." (D.I. 306 at ¶ 24). In support of that claim, Lannett submitted roughly 600 pages of "Return Authorization Forms" from customers who allegedly returned more than 330,000 units of the approximately 400,000 units (approximately 82.6%) that Lannett distributed (*Id.*, at ¶ 25, Ex. 19). The evidence shows that Lannett had either a contract or an expectancy of a business relationship with the customers that KV contacted. (*Id.*).

Turning to the next argument, KV contends that Lannett has not showed that KV *caused* a breach of the contract with Lannett's customers or interfered with Lannett's prospective business relationships. Lannett's causation argument proceeds as follows: KV contacted the national databanks (which provide information to pharmacies regarding generic substitutes of branded drugs) "for the purpose of preventing Lannett's product from being linked to PrimaCare ONE **[*29]** as a generic or reasonably equivalent product" (*Id.* at ¶ 16); as a result of KV's misrepresentations to the databanks that the iron sources of the two drugs are different, the databanks refused to link them (*Id.* at ¶ 21); KV then sent numerous letters stating that Lannett's product was not linked to PrimaCare ONE® on the basis of the difference in the iron sources (*Id.* at ¶¶ 22); consequently, Lannett could not dispense its

[10] There is no common law tort of commercial disparagement in Delaware. Rather, it is subsumed by DTP A, and as discussed previously, Lannett does not state a DTPA claim.

[11] Delaware law applies because Delaware has the most significant relationship to the instant action. "The relevant factors a court must consider when determining the state with the most significant relationship to the action include 1) the place where the injury occurred, 2) the place where the conduct causing the injury occurred, 3) the place of incorporation and principal place of business of the parties, and 4) the place where the relationship between the parties is centered." *Corning Inc. v. SRU Biosystems, LLC, 292 F. Supp.2d 583, 585 (D. Del. 2003)* (citing *Restatement (Second) of Conflicts § 145* (1971)). Because Lannett filed this action in Delaware and both parties are incorporated in Delaware, I conclude for purposes of the pending motions that Delaware has the most significant relationship to the action.

product generically, Lannett's customers returned Lannett's vitamin product, and Lannett suffered millions of dollars in damages (*Id.* at ¶¶ 23, 24, 32).

To prevail on its tortious interference claims, Lannett must show "there would not have been a breach *but for* the activities of [KV]." *Vornado PS, L.L.C. v. Primestone Inv. Partners, L.P., 821 A.2d 296, 318 (Del. Ch. 2002)* (emphasis added). At this stage of the litigation, there is sufficient evidence in the record to conclude that a jury could reasonably find that but for KV's alleged misrepresentations to the databanks *and* to its customers, Lannett's contracts and/or relationships would still be viable. Indeed, in its letters to Lannett's customers, KV stated:

> If you have taken any action to override the decision of the pricing data services to consider PrimaCare ONE® as a sole source product and **[*30]** have linked these products, directly or indirectly, in your own system, we urge you to reconsider your decision, and, in view of the points noted in this and our prior correspondence, discontinue any substitution for PrimaCare ONE®.

(D.I. 306 at Ex. 16). Accordingly, KV's motion for summary judgment on Counts Six, Seven, and Eight should be denied because a jury could reasonably find for Lannett on those tortious interference claims.

C. Tortious Interference With Contract or Prospective Contractual Relationship with Third Party Albion

In Count Nine of the Second Amended Complaint, Lannett contends that KV, after learning about Lannett's multivitamin and minerals product, contacted Lannett's suppliers "for the sole purpose of interrupting and cutting off Lannett's relationships" with those suppliers "so that Lannett could not obtain the ingredients necessary to manufacture its competing product." (D.I. 77, Ex. A at ¶ 111). Specifically, Lannett alleges that KV contacted Albion, which supplies Lannett with Ferrochel®, a chelated iron (*Id.* at ¶ 110). Lannett claims that "[a]s a direct and proximate result of the KV Defendants' actions, Albion has demanded that Lannett return to Albion all **[*31]** quantities of its chelated iron product Ferrochel® which Lannett previously purchased from Albion." (*Id.* at ¶ 112).

In Count Ten of the Second Amended Complaint, Lannett alleges that KV tortiously interfered with a prospective contractual relationship with Albion. "Had it not been for the improper actions of the KV Defendants Lannett would have continued to have a contractual and business relationship with Albion for the purchase of Ferrochel® chelated iron for use as a source of iron" in its product (*Id.* at ¶ 118).

KV argues that summary judgment on counts Nine and Ten should be granted because Lannett has failed to submit any evidence that Lannett had a contract or prospective relationship with KV, that KV interfered with a contract or prospective relationship, or that KV's alleged interference caused Lannett damage (D.I. 130, 195). However, in its supplemental briefing, Lannett submitted a letter from Albion - which demands that Lannett stop using Ferrochel® in its multivitamin product - that raises doubt as to those claims (D.I. 306 at Ex. 23). The letter suggests that there was, at the very least, a business relationship between Lannett and Albion that Lannett expected to continue **[*32]** into the future. Lannett also submitted an email from Albion's general counsel to KV which suggests that KV was involved with Albion's letter to Lannett. This email raises significant doubt as to KV's lack of interference claim (*Id.* at Ex. 22).

Moreover, contrary to KV's assertions, there is some evidence that its alleged improper interference with Albion caused Lannett injury. But for KV's actions, Albion may not have sued Lannett for "patent infringement, trademark misappropriation, and related claims against Lannett for incorporating the purchased Ferrochel® into the Multivitamin with Minerals product and identifying Ferrochel® as a product component." (D.I. 173 at 3). On the other hand, there is also evidence that Lannett voluntarily decided to change the iron source of its product from Ferrochel® to ferrous asparto glycinate (the same source of iron in PrimaCare ONE®) so that it could become a certified generic substitute for PrimaCare ONE® (D.L 195, Ex. C).

Because there are genuine issues of material fact on the tortious interference claims regarding Albion, I recommend that KV's motion for summary judgment on Counts Nine and Ten be denied.

V. DISPOSITON OF KV S MOTION TO BIFURCATE [*33]

As a result of the disposition of Lannett's antitrust, DTP A, and tortious interference claims, KV's motion to bifurcate the antitrust, deceptive trade practices and tortious interference claims should be denied as moot. However, KV's request to realign this action, with KV as the Plaintiff and Lannett as the Defendant should be granted (D.I. 141). At oral argument on the various outstanding motions, the following dialogue occurred:

> SPECIAL MASTER SEITZ: All right So just looking at it practically, the effect of dismissing these counts will be what?
>
> MR. WEISS: To realign, to put the case in what I would say is its normal procedural posture, which is KV is the plaintiff asserting infringement and Lannett is the defendant making its affirmative defenses like virtually every patent case.
>
> SPECIAL MASTER SEITZ: And so—
>
> MR. WEISS: And, of course, able to get an adjudication of its defenses to the extent that they're properly pled and the case is supported in defense of KV's case.
>
> So again, Lannett is not deprived of an opportunity to obtain adjudication of this patent. It's gotten what it wanted. It just can't get it by a declaratory judgment action.

(Transcript of Hearing on Jan. 21, 2009 at 9-10). **[*34]** Because the effect of dismissing Lannett's claims is realignment, I recommend that the case be realigned with KV as Plaintiff and Lannett as Defendant.[12]

VI. DISPOSITION OF LANNETT'S MOTION FOR LEAVE TO FILE A THIRD AMENDED COMPLAINT AND ANSWER TO COUNTERCLAIM

A. AMENDED COMPLAINT

As discussed, Larmett's inequitable conduct claims and antitrust claims in the Second Amended Complaint should be dismissed for lack of subject matter jurisdiction and failure to state a claim. But even if those claims were dismissed without prejudice, Larmett's Third Amended Complaint fails to allege new facts that would confer jurisdiction or state a claim upon which relief can be granted.

Larmett's proposed Third Amended Complaint alleges several new inequitable conduct claims, including claims that KV (1) withheld an abstract from the PTO, which was material prior art to the '846, '666, and '609 patents (D.I. 271 at ¶¶ 11-15); and (2) procured the '666, '846, and '609 patents by misrepresenting to the PTO that: the patents (a) presented "unique, unexpected, and superior therapeutic benefits," including the "optimization of neurological development" to the breastfeeding infant (*Id.* at ¶¶ 33-50); (b) contained omega-2 fatty acid compositions (*Id.* at **[*35]** ¶¶ 51-53); and (c) improved the "bioavailability" of the fatty acid to the mother (*Id.* at ¶¶ 56-60). The proposed Third Amended Complaint also alleges new *Walker Process* claims. Specifically, Lannett contends that KV publicly defamed its product and orchestrated a scheme that caused the major data banks to "de-link" its product from PrimaCare ONE® (*Id.* at ¶¶ 61-70). Lannett also alleges that KV conspired with Albion to develop Sumulate (ferrous asparto glycinate), which has "no medically or nutritionally significant difference from Ferrochel," for purposes of precluding competitors such as Lannett from becoming linked by the data banks as cost effective generic drugs.

These new claims are futile. The inequitable conduct claims regarding the '846 and '666 patents fail to cure the pleading deficiencies of the Second Amended Complaint. As the parties are aware, the Court previously denied Lannett's motion for leave to file a Second Amended Complaint with respect to the '846 and '666 patents as futile because "Lannett as of yet has no basis to allege that KV's representatives had knowledge of the '539 European Application during prosecution of the '846 and the '666 patents." *Lannett Co. Inc. v. KV Pharmaceuticals*, C.A. No.

---

[12] Counts Six through Ten of the Second Amended Complaint should be deemed counterclaims.

08-338 **[*36]** JJF, 2008 WL 4974579, at *5 (D. Del Nov. 21, 2008). However, the Court also found that "Lannett should be afforded an opportunity to amend its pleadings to assert inequitable conduct relating to the '846 and the '666 patents" if "discovery reveals that KV had actual knowledge of the '539 European Application before the '846 and the '666 patents were issued." *Id.* at n.6. Unfortunately for Lannett, discovery does not appear to have revealed any "actual knowledge" of the '539 European Application because the Third Amended Complaint makes the same bare and conclusory allegation as the Second Amended Complaint: that the "KV Defendants knew or should have known of the existence of the '539 Application, but did not disclose to the USPTO the reference of same as a prior art reference." (D.I. 271 at ¶ 32).

Similarly, the Third Amended Complaint's new inequitable conduct claims regarding the '846 and '666 patents (that KV knew about an abstract of an article by Dr. W.E. Connor that is prior art to those patents) fail to allege any "actual knowledge" of the allegedly prior art (*Id.* at ¶¶ 11-15). And even if the allegations in the Third Amended Complaint were sufficient to state a claim for inequitable conduct regarding the '609 patent, the Court **[*37]** lacks subject matter jurisdiction to hear it in a declaratory judgment action.[13] As previously discussed, Lannett has failed to meet its burden of proving that KV took some "affirmative" action to enforce its patents prior to filing the Amended Complaint. *See* Section IIB, supra.

The new *Walker Process* allegations are deficient for the same reason. And Lannett's new *Walker Process* claims do nothing to cure its deficient monopolization claim. *See* Section IIC, supra. The proposed Third Amended Complaint is devoid of any facts that KV has monopoly power or that KV has engaged in exclusionary conduct that could create or sustain any alleged monopoly power. For the foregoing reasons, Lannett's motion for leave to file a Third Amended Complaint should be denied as futile.

B. AMENDED ANSWER

In addition to the new allegations proposed in Lannett's Third Amended Complaint, Lannett also seeks leave to amend its Answer to Lannett's Counterclaim to add patent misuse as an affirmative defense. Lannett argues in its motion that KV misused the asserted patents by (1) enforcing them against Lannett; (2) conspiring to obtain and enforce invalid patents "over new ingredients for its products for the sole purpose of excluding competition"; (3) **[*38]** convincing data banks to not link Lannett's vitamin product to PrimaCare ONE® based on different iron ingredients in the two products; and (4) by identifying expired patents on the package insert of PrimaCare ONE® (D.I. 271, Ex. 3 at ¶ 60).

KV argues that Lannett's affirmative defense of patent misuse does not meet the pleading requirements of Rule 8 of the Federal Rules of Civil Procedure because Lannett does not allege either the facts or elements of a patent misuse defense (D.I. 294 at 10). KV further argues the patent misuse defense fails to comply with the Rule 9(b) requirement of particularity, to the extent that it is based on the alleged fraudulent procurement of patents (*Id.*). However, I need not reach those issues. Even assuming that Lannett's patent misuse defense meets the pleading requirements of both rules, its motion should be denied because none of the new patent misuse allegations, even when assumed to be true, constitute patent misuse.

The purpose of the patent misuse doctrine "is to prevent a patentee from using the patent to obtain market benefit beyond that which inures in the statutory patent right." *Monsanto Co. v. McFarling, 363 F.3d 1336, 1341 (Fed. Cir. 2004)*. To establish a defense, a defendant must show that "by imposing conditions that derive their force from the patent, **[*39]** the patentee has impermissibly broadened the scope of the patent grant with anticompetitive effect." *Id. at 1341*.

Lannett's first contention, that the very act by KV of claiming that Lannett has infringed the asserted patents, is incorrect. "The bringing of a lawsuit to enforce legal rights does not of itself constitute violation of the antitrust laws

[13] Because the Court lacks subject matter jurisdiction over the inequitable conduct claim related to the '609 patent, I need not reach the merits of that claim. Accordingly, Lannett's affirmative defense of inequitable conduct on that issue remains intact.

or patent misuse; there must be bad faith and improper purpose in bringing the suit, in implementation of an illegal restraint of trade." *Glaverbel Societe Anonyme v. Northlake Marketing & Supply, Inc., 45 F.3d 1550, 1558 (Fed. Cir. 1995)* (stating that "[a] purpose is improper if its goal is not to win a favorable judgment, but to harass a competitor and deter others from competition, by engaging the litigation process itself, regardless of the outcome"); *35 U.S.C. § 271(d)* (providing that a patentee does not commit misuse by having "sought to enforce its patent rights against infringement"). Lannett does not allege that KV has acted in bad faith or for an improper purpose in asserting its infringement claims. Indeed, KV's counterclaims for infringement were compulsory (*Fed. R. Civ. P. 13(a)*), and Lannett has admitted that its vitamin product is "arguably within the scope of the KV patent" (D.L 271, Ex. 3 at ¶ 64).

The next three grounds for the patent misuse **[*40]** defense concern conduct by KV that is unrelated to the asserted patents. For example, Lannett's contention that KV engaged in patent misuse by "conspiring to obtain and enforce invalid patents over new ingredients for its products for the sole purpose of excluding competition" (*Id.* at ¶ 64) relates to KV's alleged scheme with Albion to create Sumulate (*Id.* at ¶ 67). However, nowhere does Lannett allege that the Sumulate patent(s) belongs to KV, as opposed to Albion, and nowhere does Lannett allege that KV has asserted that patent.

Lannett's contention that KV caused the databanks to de-link Lannett's vitamin product from PrimaCare ONE® based on "different iron ingredients" is also based on Sumulate patents that KV does not own, and has not asserted. Nor does Lannett contend that KV has asserted the expired patents displayed on the package insert of PrimaCare ONE®. Accordingly, Lannett's motion for leave to file the patent misuse defense should be denied. *Advanced Magnetic Closures, Inc. v. Rome Fastener Corp., C.A. No. 98 Civ. 7766(PAC), 2006 U.S. Dist. LEXIS 83823, 2006 WL 3342655, at *2 (S.D.N.Y. 2006)* (stating that "conduct unrelated to the [asserted] patent is not adequate to support Romag's affirmative defense and counterclaim of patent misuse"); *Carter-Wallace, Inc. v. U.S., 449 F.2d 1374, 1384, 196 Ct. Cl. 35 (Ct. Cl. 1971)* ("Misuse defenses must be directed to the patent or patents alleged to be infringed."). **[*41]**

VII. DISPOSITION OF THE DISCOVERY MOTION

Seeking to exceed the ten deposition limit in the Scheduling Order once again,[14] Lannett moves for leave to take the deposition of Dr. Jonathan Bortz, Vice President of Therapeutic Growth Strategies at KV (D.L 292). KV alleges that Dr. Bortz had a "key role in approaching listing agencies, such as First Data Bank, regarding the 'Unking' of Lannett's accused product to KV's product PrimaCare ONE®." (*Id.* at ¶ 12). According to Lannett, "[t]his conduct is highly important to Lannett's antitrust, unfair competition, and tortious interference claims against KV in that Lannett alleges that this and related activities by KV led to a loss of sales and business opportunities." (*Id.*).

The Federal Rules of Civil Procedure prohibit a party from exceeding the number of depositions provided for in the Court's Scheduling Order unless that party demonstrates that additional depositions are necessary under *Rule 26(b)(2)(C)*. The Rule states:

> On motion or on its own, the court must limit the frequency or extent of discovery otherwise allowed by these rules or by local rule if it determines that:
>
> (i) the discovery sought is unreasonably cumulative or duplicative, or can be obtained from **[*42]** some other source that is more convenient, less burdensome, or less expensive;
> (ii) the party seeking discovery has had ample opportunity to obtain the information by discovery in the action; or
> (iii) the burden or expense of the proposed discovery outweighs its likely benefit, considering the needs of the case, the amount in controversy, the parties' resources, the importance of the issues at stake in the action, and the importance of the discovery in resolving the issues.

[14] Lannett has already taken eleven depositions, and has already been granted leave to take two more: that of Albion and Accucaps Industries, Ltd.

Fed. R. Civ. P. 26(b)(2)(C); *see also* *Fed. R. Civ. P. 30(a)(2)*.

Lannett argues that leave should be granted to depose Dr. Bortz because he is "the likely source - and in some instances, the only source of— information" regarding the "linking" of Lannett's product to KV's PrimaCare ONE® (D.I. 292 at ¶¶ 12, 14). KV claims that Larmett could have used one of its depositions to take Dr. Bortz' testimony early in the litigation, but chose not to, and should not be rewarded now for a poor discovery plan (D J. 298 at 3-5). KV also claims that the testimony that it seeks from Dr. Bortz is cumulative of the testimony it has already obtained from Scott Goedeke, KV's Senior Vice President of Marketing (*Id.* at 5). And KV further claims that the additional deposition is unduly burdensome **[*43]** because fact discovery has ended and the parties are well under way with expert discovery and the production of expert reports (*Id.* at 5-6).

All of KV's arguments are persuasive. I find that Dr. Bortz' testimony would be cumulative of Mr. Goedeke's testimony. I also find that Larmett had ample opportunity to take Mr. Bortz' deposition. And I also find that, given my recommendation that Larmett's antitrust and unfair competition claims should be dismissed for failure to state a claim, the burden of discovery far outweighs the "importance of the discovery in resolving the issues" that remain in the case. *Fed. R. Civ. P. 26(b)(2)(C)(iii)*. Lannett's motion is denied.[15]

VIII. CONCLUSION

For the reasons set forth, I recommend that KV's motion to dismiss be granted, Lannett's motion for leave to file a Second Amended Complaint be granted in part and denied in part, KV's motions for summary judgment on Counts Six, Seven, Eight, Nine, and Ten of the Amended Complaint be denied, KV's motion to bifurcate the antitrust, deceptive trade practices and tort claims for the Lanham Act and patent claims be denied as moot, and Lannett's motion for leave to file a Third Amended Complaint be denied.

/s/ Collins J. Seitz, Jr.

Special Master

Dated: February **[*44]** 4, 2009

End of Document

---

[15] Larmett also filed a motion to take an additional *30(b)(6)* deposition, but at oral argument, Lannett stated that Dr. Bortz' deposition and the additional *30(b)(6)* deposition "could be combined." (Transcript of Hearing on Jan. 21, 2009 at 96). Accordingly, Lannett's *30(b)(6)* motion is denied as well.

Walter Kozak D v. Hillsborough Pub. Transp. Comm'n

United States District Court for the Middle District of Florida, Tampa Division

February 4, 2009, Decided; February 4, 2009, Filed

Case No. 8:04-CV-1162-T-27MSS

Reporter
2009 U.S. Dist. LEXIS 151011 *

WALTER KOZAK d/bla Gunny's Intrastate Travel and Tours, Plaintiff, vs. HILLSBOROUGH PUBLIC TRANSPORTATION COMMISSION, Defendant.

Opinion

ORDER

BEFORE THE [*2] COURT is Defendant's Motion to Dismiss Counts II through V of the Amended Complaint (Dkt. 73), to which Plaintiff has responded in opposition (Dkt. 76). Upon consideration, Defendant's motion is GRANTED.

Background

Plaintiff Walter Kozak, d/b/a Gunny's Intrastate Travel and Tours ("Plaintiff') commenced this action against Defendants Hillsborough County Public Transportation Commission, Hillsborough County, Kathy's Airport & Limo Service, Inc., J&M Limousines, Inc., Carol Martin, and Barney Fletcher, in state court on May 6, 2004. On May 20, 2004, the action was removed to this Court. (Dkt. 1).

The Hillsborough County Public Transportation Commission ("the Commission") is an independent special district created by the Legislature of the State of Florida to "regulate the operation of public vehicles upon the public highways of Hillsborough County and its municipalities." (Dkt. 69, Am. Comp. ¶ 7); 2001 Fla. Laws 299. Plaintiff, a sole proprietorship operating a travel and tour business from Hernando County, Florida, is licensed by the State as a "seller of travel" pursuant to *Fla. Stat. § 559.927(10)*. (Am. Comp. ¶¶ 6, 8). Plaintiff provides chartered passenger transportation "with a concentration on sightseeing **[*3]** charters and transfers to and from the interstate transportation hubs located in St. Petersburg, Tampa, Orlando and Port Canaveral." (Am. Comp. ¶ 8).

The original Complaint alleged that Plaintiff was wrongfully arrested at Tampa International Airport in 2003 by a Commission inspector, in conspiracy with the private Defendants, for operating a public vehicle without obtaining a license and permit from the Commission. (Dkt. 2, Comp. ¶¶ 43-45). Plaintiff alleged that the arrest was wrongful because *Fla. Stat. § 559.939*, *Fla. Stat. § 341.102*, and *Article III, section 11(20) of the Florida Constitution* prohibited the Commission from regulating state-licensed "sellers of travel" such as himself. (Comp. ¶¶ 19, 26, 64).

On September 24, 2004, this Court granted Plaintiff's application for a *Pullman* abstention and stayed the case in order for Plaintiff to commence a declaratory judgment in state court as to whether the Commission could, in accordance with state law, regulate state-licensed "sellers of travel." (Dkt. 44). On March 29, 2007, the Thirteenth Circuit Court in and for Hillsborough County granted the Commission's motion for summary judgment, holding that Commission had the authority to regulate "public vehicles" notwithstanding the provisions of Fla. Stat. § 559.53, *Fla. Stat. § 341.102*, and Article III, section 11(20). (Dkt. 48-4). **[*4]** On March 26,2008, the Second District Court of Appeals affirmed. (Dkt. 57, Exh. A).

This Court held a status conference on June 4, 2008 and granted Plaintiff's oral motion to amend his complaint. (Dkts. 59-61). Plaintiff filed the Amended Complaint on July 25, 2008 against the Commission only, alleging five claims: (1) "Federal authority over intrastate transportation" (Count I); (2) "Economic regulation and manipulation of the passenger ground transportation industry is a violation of the Sherman Act" (Count II); (3) "Commission regulatory scheme places discriminatory undue economic burdens on interstate commerce"(Count III); (4) "Application of 2001-299 is unequal and arbitrary" (Count IV); and (5) "Arrest of Kozak and seizure of property and threatened continued enforcement in unconstitutional" (Count V). (Dkt. 69). In the instant motion, the Commission moves to dismiss Counts II through V for failure to state a claim upon which relief and can be granted.

Standard

Rule 8(a)(2) of the Federal Rules of Civil Procedure requires that a complaint provide "a short and plain statement of the claim showing that the pleader is entitled to relief," in order to "give the defendant fair notice of what the. . . claim is and the grounds upon which **[*5]** it rests." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 1964, 167 L. Ed. 2d 929 (2007)* (quoting *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*; *Davis v. Coca-Cola Bottling Co. Consol., 516 F.3d 955, 974 n.43 (11th Cir. 2008)*. Although a complaint need not include detailed factual allegations, it must contain sufficient factual allegations, which, when taken as true, "raise a right to relief above the speculative level." *Id. at 1964-65*. A conclusory statement of the elements of a cause of action will not suffice to state a claim under *Rule 8*. *Id.* A well-pleaded complaint, however, may survive a motion to dismiss even if it appears "that recovery is very remote and unlikely." *Id. at 1965* (quoting *Scheur v. Rhodes, 416 U.S. 232, 236 (1974))*.

Discussion

1. Sherman Act violation (Count II)

In Count II, Plaintiff alleges that the Commission, acting at the urging of its taxicab industry constituents, "continually explores means to economically block market entry and raise operating costs that will force travelers to seek alternative modes of ground transportation," in an effort "to curb out-of-county motor carriers from the interstate hubs." (Am Comp. ¶ 31). The Commission construes Count II as a monopolization claim under the Sherman Act, *15 U.S.C. § 2*. In order to state a *Section 2* claim, Plaintiff must allege: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power." *Morris Commc'ns Corp. v. PGA Tour, Inc., 364 F.3d 1288, 1293-94 (11th Cir. 2004)*. In the instant motion, the Commission argues that **[*6]** Plaintiff has not pled a relevant market, the Commission does not possess market power because it is not a market participant, the Commission is protected by state immunity, Plaintiff lacks antitrust standing, and the claim is barred by the statute of limitations. Because the Court finds that the Commission is subject to state action immunity as a matter of law, the remaining arguments are not addressed.

Pursuant to the state action immunity doctrine, "states are immune from federal ***antitrust law*** for their actions as sovereign." *Crosby v. Hosp. Auth. of Valdosta and Lowndes County, 93 F.3d 1515, 1521 (11th Cir. 1996)* (citing *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943))*. A municipality may also be afforded state action immunity under certain circumstances. *See id. at 1522*; *Town of Hallie v. City of Eau Claire, 471 U.S. 34,46-47, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)*. To be entitled to immunity, the Commission must demonstrate that: (1) it is a political subdivision of Florida; (2) through statutes, Florida generally authorizes the Commission to perform the challenged action; and (3) through statutes, Florida has clearly articulated a state policy authorizing anticompetitive conduct. *See F.T C. v. Hosp. Bd. of Directors of Lee County, 38 F.3d 1184, 1187-88 (11th Cir. 1994)*.

Plaintiff does not dispute that the Commission constitutes a political subdivision of the state of Florida, and this Court finds that it is, pursuant to its enabling legislation, 2001 Fla. Laws 299 ("S.L. 2001-299" or "the Act"). *See* ***[*7]*** *Hosp. Bd. of Directors of Lee County, 38 F.3d at 1188* (holding that hospital board was political subdivision where it was created by special act of the legislature). Assuming that the Commission's monopoly power is, as Plaintiff alleges, based on its ability to require certificates of public convenience, to set rates, and to set minimum insurance for public vehicles (Am. Comp. ¶¶ 32-33), it is undisputed that S.L. 2001-299 authorizes the Commission to engage in these actions, as required by the second element. The Act specifically provides that the Commission possesses power to fix rates and charges for public vehicles and to require additional insurance coverage for public vehicles. *See* 2001 Fla. Laws. 299, sec. 5(gg), (jj).[1] The Act also mandates that the Commission carry out the Act's provisions for requiring certificates of public convenience from public vehicle operators. *See* 2001 Fla. Laws. 299, sec. 5(g), sec. 7(2).[2]

Finally, the Court finds that S.L. 2001-299 manifests the requisite "clearly articulated state policy" authorizing anticompetitive conduct. It is well-established that the state policy need not be expressly articulated if the relevant

---

[1] Section 5(2) provides that the Commission "has the power to:"

"(gg) Require additional insurance coverage and limitations by rule for certificate holders which coverages may not be less than those required by general law or by this act."

"(jj) Fix or approve zones, rates, fares, and charges for public vehicles other than taxicabs."

[2] Section 5(a) provides that the Commission "shall:"

"(g) Perform the duties required by this action and any rules adopted in accordance with this act relating to the application for and approval, modification, or rejection of certificates, permits, and public vehicle drivers' licenses."

Section 7(2) sets for the requirements for an application for a certificate.

law provides for "a regulatory scheme that inherently displaces unfettered business freedom." *Executive Town & Country Servs., Inc. v. City of Atlanta, 789 F.2d 1523, 1529 (11th Cir. 1986)*. In other words, the **[*8]** policy may be clearly articulated if anticompetitive conduct is "the foreseeable result of the legislation." *Hosp. Bd. of Directors of Lee County, 38 F.3d at 1188*. An anticompetitive effect is foreseeable if it could "reasonably be anticipated to result from the powers granted to a political subdivision by the state. "*Id. at 1191*.

In a factually similar case, the Eleventh Circuit held that there was "no doubt" that the pertinent Georgia statute specifically authorized the City of Atlanta to set rates for motor carriers and that the city was therefore entitled to immunity. *Executive Town & Country Servs., Inc., 789 F.2d at 1529-30*. Consistent with *Executive Town & Country Services, Inc.*, this Court finds that it could be reasonably anticipated that S.L. 2001-299, based on its comprehensive regulatory scheme, would result in an anticompetitive effect on the public vehicle transportation industry. The Commission is therefore entitled to state action immunity as a matter of law. *Id.; see also TEC Cogeneration Inc. v. Fla. Power & Light Co., 76 F.3d 1560, 1568 (11th Cir. 1996)* (finding that utility was subject to state action immunity based on comprehensive regulatory scheme).

Because the application of the state action immunity doctrine appears on the face of the Amended Complaint, the Commission's motion to dismiss Count II is GRANTED. *See Brown v. Crawford County, 960 F.2d 1002, 1009-10 (11th Cir. 1992)* (stating that district court should resolve absolute **[*9]** immunity issues on a motion to dismiss or motion for judgment on the pleadings).

2. Commerce Clause (Count III)

In Count III, Plaintiff alleges that the regulatory provisions in S.L. 2001-299 impose "discriminatory undue burdens on interstate commerce," which the Commission construes as a claim pursuant to the *Commerce Clause of the United States Constitution*. The Clause provides that "[t]he Congress shall have Power . . . [t]o regulate Commerce . . . among the several States." *U.S. Const. Art. I, § 8, cl. 3*. Although the *Commerce Clause* provides an affirmative grant of regulatory power to Congress, it is also "understood to have a 'negative' aspect that denies the States the power unjustifiably to discriminate against or burden the interstate flow of articles of commerce." *Or. Waste Sys/, Inc. v. Dep't of Envtl. Quality of State of Or., 511 U.S. 93, 98, 114 S. Ct. 1345, 128 L. Ed. 2d 13 (1994)*. This so-called "dormant *commerce clause*" "prohibits regulatory measures designed to benefit in-state economic interests by burdening out-of-state competitors." *Island Silver & Spice, Inc. v. Islamorada, 542 F.3d 844, 846 (11th Cir. 2008)* (internal quotations omitted). It is undisputed that a business such as Plaintiff's, which mainly consists of providing prearranged trips to and from international airports, is part of interstate commerce. *See Executive Town & Country Servs., Inc., 789 F.2d at 1526*.

In the instant motion, the Commission argues that Plaintiff has not adequately alleged that S.L. 2001-299 does, in fact, "burden" interstate commerce. The Court agrees. **[*10]** The Amended Complaint alleges that the requirement that any public vehicle operator acquire a certificate to operate in Hillsborough County "effectively blocks any motor carrier providing passenger transportation in a conveyance that would fit the definition of a public vehicle from traversing Hillsborough County regardless of what type of transport is being provided" and "blocks access to regional interstate transportation hubs." (Am. Comp. ¶¶ 39, 40). In alleging that transportation is "effectively blocked," Plaintiff is essentially claiming that commerce is "burdened." This conclusory allegation is insufficient under *Rule 8* notice pleading standards because it requires the Court to speculate as to how commerce is burdened. *Bell Atlantic Corp., 127 S.Ct. at 1964-65* (complaint must contain sufficient allegations to "raise a right to relief above the speculative level"). The Commission's motion to dismiss the *Commerce Clause* Claim (Count III) is therefore GRANTED.

3. Equal Protection Clause (Count IV)

In Count IV, Plaintiff alleges that S.L. 2001-299 is "unequal and arbitrary" as applied to his business. The Commission has construed this as a "class of one" selective enforcement challenge under the *Equal Protection*

Clause of the United States Constitution. U.S. CONST. amend. XIV, § 1. In order to plead this type of equal protection claim, Plaintiff **[*11]** must allege that: (1) he was treated differently from other similarly situated individuals; and (2) the Commission unequally applied a facially neutral ordinance for the purpose of discriminating against Plaintiff. *Young Apartments, Inc. v. Town of Jupiter, 529 F.3d 1027, 1045 (11th Cir. 2008)*. The Commission argues that Plaintiff has failed to allege both that a similarly situated individual exists and that the Commission intentionally discriminated against Plaintiff. This Court agrees.

As to the first element, it is well-established that Plaintiff must identify other similarly individuals or entities with "some specificity." *Campbell v. Rainbow City, 434 F.3d 1306, 1314 (11th Cir. 2006)*. Further, this Court is "obliged to apply the 'similarly situated' requirement with rigor." *Griffin Indus., Inc. v. Irvin, 496 F.3d 1189, 1207 (11th Cir. 2007)*. In the Amended Complaint, Plaintiff alleges that while "dozens of unlicensed limousine companies" were permitted to operate in Hillsborough County without a license during the 2001 Super Bowl, he was arrested in 2003 for operating without a license. (Am. Comp. ¶ 45). This allegation fails to identify a similarly situated entity with the requisite specificity, and is therefore insufficient. *See id.*

Although Plaintiff now argues in the response in opposition that a company called Carey International was one of the companies that received preferential **[*12]** treatment in 2001, the Amended Complaint clearly does not include such an allegation with respect to the 2001 Super Bowl. The Amended Complaint instead alleges that the Commission and the NFL "were cutting a deal" to grant licensing exemptions to Carey International for transportation during the *2009* Super Bowl in Tampa when Plaintiff challenged their authority to waive licensing requirements. (Am. Comp. ¶ 46). Plaintiff has not, however, alleged that any unequal treatment actually occurred in connection with the 2009 Super Bowl.

Moreover, Plaintiff has not alleged facts indicating that the Commission engaged in the requisite "intentional or purposeful discrimination." *E & T Realty v. Strickland, 830 F.2d 1107, 1112-13 (11th Cir. 1987)*. "Even arbitrary administration of a statute, without purposeful discrimination, does not violate the *equal protection clause*." *Id. at 1114*. Plaintiff has alleged only arbitrary enforcement at best, and Count W therefore fails on this additional basis.

Based on the foregoing, the Commission's motion to dismiss the *Equal Protection Clause* claim (Count IV) is GRANTED.

4. Count V

As the Commission correctly argues, Plaintiff fails to identify any constitutional or statutory basis for his claim in Count V, which appears to encompass multiple theories of relief. This claim is accordingly **[*13]** DISMISSED WITHOUT PREJUDICE, with leave to provide a more definite statement pursuant to Rule 12(f). *Davis, 516 F.3d at 983-84*.

Conclusion

Upon consideration, it is **ORDERED AND ADJUDGED**:

1) Defendant's Motion to Dismiss Counts II through V of the Amended Complaint (Dkt. 73) is **GRANTED**. Plaintiff is granted leave to file an Amended Complaint within **twenty (20) days** of the date of this Order.

2) The Clerk is directed to **REOPEN** this case and change the Magistrate Judge as s ignment.[3]

DONE AND ORDERED in chambers this 4th day of February, 2009.

[1124] ORDER RE PSYSTAR'S MOTION FOR LEAVE TO AMEND COUNTERCLAIMS**

INTRODUCTION

Plaintiff Apple Incorporated filed this lawsuit against defendant Psystar Corporation asserting copyright, trademark and other claims related to PsyStar's use of Apple's computer operating system. PsyStar filed counterclaims against Apple alleging violations of federal and state antitrust laws. A previous order granted Apple's motion to dismiss the counterclaims without prejudice. Psystar now moves for leave to amend in order to assert counterclaims under the copyright misuse doctrine and state unfair competition laws. For the **[*2]** reasons stated below, the motion for leave to amend is **GRANTED IN PART AND DENIED IN PART**.

STATEMENT

In its proposed pleading, PsyStar no longer presses its antitrust counterclaims but instead seeks leave to amend in order to assert counterclaims for copyright misuse, and for unfair competition violations predicated on the alleged copyright misuse. The facts of this case were set forth in detail in the order granting Apple's motion to dismiss and do not differ significantly in PsyStar's proposed amendment (Dkt. No. 33).

Apple manufacturers and markets the Macintosh Computer and the OS X Operating System ("Mac OS"). Operating systems like Mac OS control and direct the interaction between software applications such as word processors and internet browsers, and the central processing unit and the various hardware in a computer. Apple is the exclusive manufacturer and master licensor of Mac OS (Countercl. PP 9, 14, 17). [1]

PsyStar manufacturers and distributes a tailored line of computers called Open Computers. PsyStar's Open Computers support a wide range of operating **[*3]** systems including Mac OS, Microsoft Windows XP and XP 64-bit, Windows Vista and Vista 64-bit and Linux 32 and 64-bit kernels. PsyStar allows its customers to choose the operating system on the computers they purchase (Countercl. PP 11-12).

Numerous companies manufacturer entire computer hardware systems, including (but not limited to) Dell, Acer, Lenovo, Sony and Hewlett-Packard. In addition, numerous companies manufacture and sell components -- such as hard drives, processors and graphics processing cards -- used by those computer manufacturers. Few competitors, if any, other than PsyStar, however, currently sell computers compatible with Mac OS (Countercl. PP 18-19, 22, 57).

PsyStar alleges that Apple has improperly leveraged its Mac OS copyrights in order to gain exclusive rights with respect to Mac OS-compatible computer hardware systems not granted in the Mac OS copyrights, in two general respects.

First, PsyStar alleges that Apple has wrongfully extended the scope of its Mac OS copyright via its End User License Agreement ("EULA"), which specifically required that consumers install Mac OS *only* on Apple-labeled computers, as well as by embedding certain technical barriers to interoperability **[*4]** in Mac OS -- kernel panic and infinite loops (Countercl. PP 36-51). [2]

Second, PsyStar alleges that Apple is leveraging its Mac OS copyrights by improperly asserting claims under the Digital Millennium Copyright Act, *17 U.S.C. 1201 et seq.* ("DMCA"). PsyStar alleges, in effect, that Apple is improperly extending its Mac OS copyright into the computer hardware market by intimidating potential competitors into avoiding the market with dubious DMCA claims (Countercl. PP 52-56). **[**1125]**

The proposed counterclaim asserts four claims for relief, all of which seek a declaratory judgment that Apple's Mac OS copyrights are unenforceable. The first claim alleges copyright misuse based on Apple's exclusive licensing of Mac OS in its EULA. The second claim alleges copyright misuse based on Apple's use or threat of DMCA claims against potential competitors for Apple's Mac OS -based computers. The third claim alleges a violation of **[*5]** California's unfair competition laws predicated on the alleged copyright misuse related to the EULA. The fourth claim alleges a violation of California's unfair competition laws predicated on the alleged copyright misuse related Apple's DMCA claims.

ANALYSIS

HN1[] Under *FRCP 15(a)*, leave to amend a complaint shall be freely given when justice so requires, but "[l]eave to amend need not be granted when an amendment would be futile." *In re Vantive Corp. Sec. Litig., 283 F.3d 1079,*

---

[1] All references to the counterclaim and citations to "Countercl." hereafter refer to the proposed first amended counterclaim.

[2] The EULA states, "This license allows you to install, use and run (1) copy of the Apple Software on a single Apple-labeled computer at a time. You agree not to install, use or run the Apple Software on any non-Apple-Labeled computer or enable another to do so" (Countercl. P 47).

1097 (9th Cir. 2002). As stated, in its proposed amendment PsyStar abandons its antitrust claims and instead asserts counterclaims for copyright misuse and for violations of California's unfair competition laws predicated on the alleged copyright misuse. In its answer to Apple's complaint, PsyStar asserted copyright misuse as an affirmative defense. PsyStar now seeks to assert it as a counterclaim as well.

Apple contends that the proposed amendment would be futile, for the following reasons: (1) copyright misuse may be alleged only as a defense, not as a counterclaim; (2) the counterclaims fail adequately to plead copyright misuse; (3) that state unfair competition claims may not be predicated on the defense of copyright **[*6]** misuse.

HN2[] The Ninth Circuit explicitly adopted the doctrine of copyright misuse for the first time in *Practice Management*:

> We have implied in prior decisions that misuse is a defense to copyright infringement. *See* *Triad Sys. Corp. v. Southeastern Express Co., 64 F.3d 1330, 1337 (9th Cir.1995)*; *Supermarket of Homes, Inc. v. San Fernando Valley Bd. of Realtors, 786 F.2d 1400, 1408 (9th Cir. 1986)*. We now adopt that rule.

Practice Management Information Corp. v. American Medical Ass'n, 121 F.3d 516, 520 (9th Cir. 1997). ***HN3***[] The doctrine "forbids the use of the [copyright] to secure an exclusive right or limited monopoly not granted by the [Copyright] Office and which is contrary to public policy to grant." *Altera Corp. v. Clear Logic, Inc., 424 F.3d 1079, 1090 (9th Cir. 2005)* (citation omitted).

HN4[] "Copyright misuse does not invalidate a copyright, but precludes its enforcement during the period of misuse." *Practice Management, 121 F.3d at 520 n.9*. Moreover, "a defendant in a copyright infringement suit need not prove an antitrust violation to prevail on a copyright misuse defense." *Id. at 521*.

Apple contends that copyright misuse may *only* be asserted as a defense, not as a counterclaim. This order **[*7]** is unconvinced, however, that misuse may never be asserted as a counterclaim for declaratory relief. PsyStar may well have a legitimate interest in establishing misuse independent of Apple's claim against it, for example, to clarify the risks it confronts by marketing the products at issue in this case or others it may wish to develop. Moreover, if established, misuse would bar enforcement (for the period of misuse) not only as to defendants who are actually a party to the challenged license but also as to potential defendants not themselves injured by the misuse who may have similar interests. *See* *Lasercomb America, Inc. v. Reynolds, 911 F.2d 970, 979 (4th Cir. 1990)*.

The best analogy is to patent misuse. *See* *Lasercomb America, Inc. v. Reynolds, 911 F.2d 970, 979 (4th Cir. 1990)*. Apple identifies no rule analogous to the one it here urges barring counterclaims for patent misuse, and in fact patent misuse counterclaims have been permitted. *See, e.g.,* *Allan Block Corp. v. County Materials Corp., 512 F.3d 912 (7th Cir. 2008)*; *Glitsch, Inc. v. Koch Engineering Co., Inc., 216 F.3d 1382 (Fed. Cir. 2000)* (both discussing patent misuse counterclaims). This order finds no reason to reject plaintiff's **[*8]** misuse counterclaims as necessarily futile.

It is true that the Ninth Circuit has described the doctrine of copyright misuse as a defense. *Altera Corp. v. Clear Logic, Inc., 424 F.3d 1079, 1090 (9th Cir. 2005)*. The doctrine has, however, been permitted in actions for declaratory relief in this **[**1126]** circuit as well. *Practice Management, 121 F.3d at 518* (describing the doctrine as a defense, but the issue actually arose in an action for declaratory judgment); *Open Source Yoga Unity v. Choudhury, 2005 U.S. Dist. LEXIS 10440, 2005 WL 756558, *8 (N.D. Cal. 2005)* (Hamilton, J.) (declaratory relief action). Insofar as other district courts have concluded that the doctrine may not be asserted as a counterclaim, this order respectfully disagrees. [3]

---

[3] *See, e.g.,* *Metro-Goldwyn-Mayer Studios Inc. v. Grokster, Ltd., 269 F. Supp. 2d 1213, 1225-26 (C.D. Cal. 2003)*, *aff'd*, *380 F.3d 1154*, *vacated on other grounds by* *Metro-Goldwyn-Mayer Studios Inc. v. Grokster, Ltd., 545 U.S. 913, 125 S. Ct. 2764, 162 L. Ed. 2d 781 (2005)*; *Ticketmaster L.L.C. v. RMG Technologies, Inc., 536 F. Supp. 2d 1191, 1199 (C.D. Cal. 2008)*.

It is also true that, in *Altera*, the Ninth Circuit rejected an effort affirmatively to assert a misuse claim and emphasized that the doctrine is ordinarily a defense. **[*9]** *Altera, 424 F.3d at 1090*. That decision, however, is distinguishable. It simply agreed with the district court that the doctrine of copyright misuse should not be extended beyond its "logical place" as a defense to an infringement claim in order to allow it to be used as a defense to *state law* claims or as a "pretext" to avoid enforcement of certain licensing agreements, when no claim or threat of copyright infringement had been asserted. *Altera Corp., 424 F.3d at 1090*. Here, Apple *has* asserted copyright claims against PsyStar, and as stated, Psystar's interest in the issue may not be limited solely to its defense of those claims. As in *Open Source Yoga*, subject-matter jurisdiction exists over the declaratory judgment action. *Open Source Yoga Unity, 2005 U.S. Dist. LEXIS 10440, 2005 WL 756558, at *8*. This order, therefore, rejects the argument that misuse may never be asserted as a counterclaim and declines to find PsyStar's misuse counterclaims futile on that basis.

Apple further argues that amendment would be futile because the proposed amended counterclaims fail to plead sufficient facts to support the claim. In its proposed amended counterclaims, PsyStar alleges that Apple leveraged Mac OS copyrights to secure **[*10]** exclusive rights not within the scope of the monopolies granted by those copyrights, *i.e.*, to Mac OS-compatible computer hardware systems. The complaint avers that Apple accomplished this through its EULA, through allegedly spurious litigation and by other means.

Apple responds that it is within its rights to determine whether, how or by whom its software is reproduced and how it is to be licensed, distributed or used. This may ultimately prove to be true. Apple, however, identifies no reason to bar the claims as a matter of law at the pleading stage. This order declines to find the claims futile.

Apple cites *Triad Systems v. Southeastern Express Company, 64 F.3d 1330 (9th Cir.1995)*. Triad was a seller of computer systems that performed sales, inventory and accounting tasks for auto parts stores. It held copyrights in the computers' operating systems, application software, and in service software. The service software included utilities, diagnostic, and auxiliary software which was used by technicians to repair Triad computers. Triad sued Southeastern, an independent service organization that serviced Triad computers. Triad and Southeastern competed in the business of servicing Triad **[*11]** computers. Triad brought an infringement action against Southeastern claiming that in servicing the computers, Southeastern used the computers' OS and service software, and in so doing it infringed the copyrights because copies of the software were made in the computer's random access memory when the computer was in use. The service potentially also involved making copies onto the computer's hard drive or backup copies. *Triad, 64 F.3d at 1333-34*.

Triad had instituted a regime whereby it licensed rather than sold its software and, under the agreements, customers could not duplicate the software or allow it to be used by third parties. Southeastern asserted that these limitations constituted misuse. The decision agreed with the district court's rejection of the misuse defense, because "Triad did not attempt to prohibit Southeastern or any other ISO from developing its own service software to compete with Triad." *Id. at 1337*. Apple contends that *Triad* governs PsyStar's motion, because "[a]s is the case with the Apple [EULA], Triad did not attempt to control the use of its hardware, but only the use of its copyrighted software" (Opp. at 7).

In *Triad*, the district court had rejected the misuse **[*12]** defense in the course of issuing a preliminary injunction, and the Ninth Circuit simply agreed with that ruling, finding that Southeastern could "[]not show that it is likely to prevail on its asserted copyright misuse defense." The issue did not arise in an effort **[**1127]** to bar a claim or counterclaim. Moreover, *Triad* did not clarify the scope of its holding; its entire analysis consisted of four sentences. Apple interprets the decision to have hinged on whether or not Triad had sought to "control the use of its hardware," but that is not the only interpretation. The decision may eventually be found to provide some degree of guidance, but this order declines to find the proposed pleading futile based on *Triad*. Apple also cites language from the November 2008 order in this case granting Apple's motion to dismiss PsyStar's counterclaims. The order addressed the *antitrust* issues then before the court; it did not opine one way or the other on the merits of Apple's instant *copyright* claims or PsyStar's misuse allegations. For all of these reasons, PsyStar's motion for leave to amend is granted with respect to the proposed misuse counterclaims.

As stated, PsyStar also seeks leave to amend in order **[*13]** to assert Section 17200 claims predicated on the misuse claims. Apple's opposition thereto relies in part on its contentions that the misuse counterclaims themselves fail, and to that extent, its contentions are foreclosed by the conclusions reached above.

Apple also contends that those claims fail because PsyStar has failed adequately to plead any actual or incipient violation of the antitrust laws. Both sides agree that ***HN5***[] "unfair" conduct under *Section 17200* is conduct that threatens or harms competition. *Cel-Tech Communications v. Los Angeles Cellular Telephone Co., 20 Cal.4th 163, 186-87, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)* (requiring "that any finding of unfairness to competitors under *section 17200* be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition"). Thus, although the misuse doctrine does not hinge on antitrust violations, plaintiff's Section 17200 claims survive only if the complaint pleads conduct that "threatens an incipient violation of [] ***antitrust law***[s], or violates the policy or spirit of one of those laws." *Id. at 187*.

PsyStar's single-product-market theory was previously rejected (Dkt. No. 33). Plaintiff fails otherwise to identify an actual **[*14]** or incipient violation of antitrust laws or the spirit thereof -- harm to competition. PsyStar argues that the alleged misuse is, "at the least, unfair in that Apple has attempted (and continues to attempt) to extend the reach of its copyrights by tying them to computer hardware not otherwise protected by the Copyright Act" (Reply at 12). It fails to explain, however, how this conduct constitutes harm to competition or a violation of the spirit of the antitrust laws. In the context of single-firm conduct, tying requires monopolization. PsyStar has identified none -- other than the limited monopolies inherent in the copyrights themselves. The Section 17200 claims, therefore, are futile. PsyStar's motion for leave to amend the Section 17200 claims is denied.

CONCLUSION

For all of the above-stated reasons, PsyStar's motion for leave to amend is **GRANTED IN PART AND DENIED IN PART**. PsyStar should file its amended counterclaims, to the extent here permitted, within seven days of the date of entry of this order and Apple must answer within 20 calendar days. No more motion practice shall be allowed on the pleadings without leave of the Court. Both sides should be taking discovery and preparing **[*15]** themselves for trial and/or summary judgment.

IT IS SO ORDERED.

LexisNexis® Headnotes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

HN1[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is appropriate under *Fed. R. Civ. P. 56(c)* when the moving party demonstrates that there is no genuine issue of material fact and the evidence establishes the moving party's entitlement to judgment as a matter of law.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN2[] **Burdens of Proof, Movant Persuasion & Proof**

Under *Fed. R. Civ. P. 56(c)*, a moving party always bears the initial responsibility of informing the district court of the basis for its motion, and identifying those portions of the pleadings, depositions, answers to interrogatories, and admissions on file, together with affidavits, if any, which it believes demonstrate the absence of a genuine issue of material fact. *Fed. R. Civ. P. 56*.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN3[] **Burdens of Proof, Nonmovant Persuasion & Proof**

Once a moving party has satisfied its initial summary judgment burden, the party opposing the motion must establish that a genuine issue as to a material fact exists.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN4[] **Burdens of Proof, Nonmovant Persuasion & Proof**

A party opposing a summary judgment motion may not rest upon mere allegations or denials of the pleadings, but must set forth specific facts showing that there is a genuine issue for trial. Speculation and conclusory allegations do not satisfy the nonmoving party's duty.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN5[] **Entitlement as Matter of Law, Genuine Disputes**

On summary judgment, a nonmoving party has created a genuine issue of material fact if it has provided sufficient evidence to allow a jury to find in its favor at trial. A dispute is genuine if the evidence is such that a reasonable jury could return a verdict for the non-moving party.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN6[] **Entitlement as Matter of Law, Materiality of Facts**

On summary judgment, a fact is material only if it might affect the outcome of the suit under the applicable rule of law.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN7[] **Sherman Act, Scope**

Section 1 of the Sherman Act declares that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is illegal. *15 U.S.C.S. § 1*. It is well-settled, however, that this provision outlaws only unreasonable restraints of trade. In order to determine whether an unreasonable restraint of trade has taken place, courts have traditionally used one of two different analyses: the per se rule and the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN8[] Per Se Rule & Rule of Reason, Per Se Violations

The per se analysis under § 1 of the Sherman Act, 15 U.S.C.S. § 1, applies only under circumstances where courts have previously considered the type of conduct and found that its expected effects are overwhelmingly anticompetitive and have little prospect of yielding any pro-competitive benefit. For a per se analysis to apply, the courts must have adequate judicial experience with the type of conduct at issue and must have found that it yields anticompetitive effects in the vast majority of cases--almost 100 % of the time. Under the per se approach, a court can condemn an action as a per se illegal restraint on trade without elaborate inquiry into the defendant's market power, the actual anticompetitive effects of the restraint in a particular case, or the rationales offered for it. The per se analysis applies to only a few types of conduct, including naked exit payments (those payments made solely to keep a competitor out of the market), market-division agreements, and price fixing.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN9[] Sherman Act, Scope

In most cases, where the conduct is not so clearly anticompetitive, courts use the rule of reason analysis under § 1 of the Sherman Act, 15 U.S.C.S. § 1. Further, categorization of conduct often is not clear cut, and there is always something of a sliding scale in appraising reasonableness. In the rule of reason analysis, the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Evidence > Burdens of Proof > Burden Shifting

HN10[] Sherman Act, Scope

Courts divide the rule of reason analysis under § 1 of the Sherman Act, 15 U.S.C.S. § 1, into three parts, which involve burden-shifting between the two parties. First, a plaintiff must show that the conduct has produced adverse, anticompetitive effects within the relevant market. If the plaintiff is able to prove this effect, then the burden shifts to the defendant, who must attempt to prove that the conduct promotes a sufficiently pro-competitive objective. If the defendant meets this standard, the burden then shifts back to the plaintiff to prove that the restraint is not reasonably necessary to achieve the pro-competitive objective.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Evidence > Burdens of Proof > Burden Shifting

HN11[] Sherman Act, Scope

In addition to the per se and rule of reason standards under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, a third type of analysis has evolved: the "quick look" or "truncated rule of reason." The truncated rule of reason analysis permits a plaintiff to shift the burden to the defendant more quickly, once the plaintiff has shown that the defendant has engaged in conduct similar to those practices falling into the per se category, for example, restraints on price, output or customers. The plaintiff need not establish the relevant market or the defendant's market power, but the defendant has the opportunity to demonstrate pro-competitive justifications and efficiencies.

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

HN12[] Defenses, Inequitable Conduct

It is not bad faith to assert patent rights that one is not certain will be upheld in a suit for patent infringement pressed to judgment and to settle a suit to avoid risking the loss of the rights. No one can be certain that he will prevail in a patent suit.

Civil Procedure > Settlements > General Overview

Patent Law > Infringement Actions > General Overview

HN13[] Civil Procedure, Settlements

There is a public policy favoring settlement of patent disputes.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN14[] Price Fixing & Restraints of Trade, Vertical Restraints

Ancillary restraints are generally permitted if they are reasonably necessary toward a contract's objective of utility and efficiency.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN15[] Noerr-Pennington Doctrine, Sham Exception

In order to establish that a defendant's patent lawsuits were objectively baseless, a plaintiff must show that the lawsuits were objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits. If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome, the suit is not objectively baseless, and an antitrust claim premised on the sham exception must fail. Where there is no dispute over the predicate facts of an underlying lawsuit, the question of whether the suit was objectively baseless is a matter of law. Predicate facts are the facts and circumstances that were available to the party that brought the underlying lawsuit.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Evidence > Burdens of Proof > Allocation

Evidence > Burdens of Proof > Clear & Convincing Proof

HN16[] **Noerr-Pennington Doctrine, Sham Exception**

A party seeking to establish that a lawsuit was objectively baseless must do so with clear and convincing evidence. Clear and convincing evidence is defined as evidence that places in a court, as factfinder, an abiding conviction that the truth of its factual contentions are highly probable. Clear and convincing falls between the reasonable doubt standard governing criminal cases and the preponderance of the evidence standard typical of civil actions.

Judges: STEPHEN M. ORLOFSKY, SPECIAL MASTER.

Opinion by: STEPHEN M. ORLOFSKY

Opinion

SPECIAL MASTER'S AMENDED REPORT AND RECOMMENDATION ON DEFENDANTS' MOTIONS FOR SUMMARY JUDGMENT AS TO THE UPSHER AND ESI SETTLEMENTS AND DIRECT PURCHASER PLAINTIFFS' PARTIAL MOTIONS FOR SUMMARY JUDGMENT AS TO THE APPLICABLE FRAMEWORK FOR ANALYSIS OF EXCLUSION PAYMENTS AND THE EXCLUSIONARY SCOPE OF THE '743 PATENT

ORLOFSKY, SPECIAL MASTER

I. INTRODUCTION

This consolidated antitrust action has been transferred to the District of New Jersey by the Judicial Panel on Multidistrict Litigation pursuant to *28 U.S.C. § 1407*. Pursuant to *Rule 53 of the Federal Rules of Civil Procedure* [1] and by consent of all parties in the above-captioned action, I have been appointed by order of this Court, dated April 12, 2006, to preside as a Special Master to review and decide all currently pending and future motions directed to Judge Joseph A. Greenaway, Jr. and Magistrate Judge Madeline Cox Arleo including, but not limited to discovery **[*11]** disputes, class certification and summary judgment (the "Appointment Order") (Doc. No. 316). The Appointment Order provides that the decision of the Special Master on any matter before the Special Master will conclusively resolve that matter unless an appropriate objection is filed pursuant to *Fed. R. Civ. P. 53(g)*.

This Report and Recommendation addresses the following Motions: (1) Motion of Defendants Schering-Plough Corporation ("Schering") and Upsher-Smith Laboratories, Inc. ("Upsher) (collectively, "Defendants") for Summary Judgment as to All Claims Brought By Direct Purchaser Plaintiffs ("DP Plaintiffs" or "DPPs") Related to the Upsher Settlement ("Upsher Motion."); [2] (2) Defendants' Motion for Summary Judgment as to All Claims Brought By DPPs Related to the ESI Settlement ("ESI Motion"); [3] (3) DPPs' Motion for Partial Summary Judgment as to the Applicable **[*12]** Framework for Analysis of Exclusion Payments ("Framework Motion"); [4] and (4) DPPs' Motion for Partial Summary Judgment as to the Exclusionary Scope of the '743 Patent ('743 Motion"). [5]

---

[1] **(a) Appointment.**

(1) Unless a statute provides otherwise, a court may appoint a master only to:

(A) perform duties consented to by the parties;

* * *

(C) address pretrial and post-trial matters that cannot be addressed effectively and timely by an available district judge or magistrate judge of the district.

Fed. R. Civ. P. 53(a).

[2] In support of the Upsher Motion, Defendants' submitted an opening Memorandum of Law (accompanied by 125 exhibits attached to the 7/25/08 O'Shaughnessy Decl.) ("Upsher Mem."), a Statement of Undisputed Facts ("Def. Upsher Facts"), a Reply Memorandum of Law in support of the Uphser and ESI Motions (accompanied by 40 exhibits attached to the 10/3/08 O'Shaughnessy Decl.) ("Upsher/ESI Reply"), a Reply to DPPs' Statement of Disputed Facts in Opposition to the Upsher Settlement ("Def. Upsher Reply Facts"), and a 10/21/2008 letter brief regarding a recent Federal Circuit Court of Appeals decision. In response, DPPs submitted a consolidated Memorandum of Law in opposition to the Upsher Motion and the ESI Motion (accompanied by 158 exhibits attached to the 9/5/2008 Refsin Decl.) ("Upsher/ESI Opp."), a Statement of Disputed Facts in Opposition to the Upsher Motion ("DPP Upsher Facts"), and a 10/31/2008 letter brief.

[3] In support of the ESI Motion, Defendants submitted an opening Memorandum of Law (accompanied by **[*13]** 46 exhibits attached to the 7/3/08 O'Shaughnessy Decl.) ("ESI Mem."), a Statement of Undisputed Facts ("Def. ESI Facts"), the Upsher/ESI Reply, a Reply to DPPs' Statement of Disputed Facts in Opposition to the ESI Motion ("Def. ESI Reply Facts") and the above-referenced 10/21/2008 letter brief. In response, DPPs submitted the Upsher/ESI Opp., a Statement of Disputed Facts in Opposition to the ESI Motion ("DPP ESI Facts"), and the above-referenced 10/31/2008 letter brief.

[4] In support of the Framework Motion, DPPs submitted an opening Memorandum of Law (accompanied by four exhibits) ("Framework Mem."), a Statement of Undisputed Facts ("DPP Framework Facts"), and a Reply Brief (accompanied by two appendices with a total of two exhibits) ("Framework Reply"). In response, Defendants submitted a Brief in Opposition to the Framework Motion (accompanied by 14 exhibits attached to the 9/5/08 O'Shaughnessy Decl.) ("Framework Opp.") and a Counterstatement of Material Facts ("Def. Framework Facts").

[5] In support of the '743 Motion, DPPs submitted an opening Memorandum of Law (accompanied by 15 exhibits ("'743 Mem."), a Statement of Undisputed Facts ("DPP '743 Facts"), and a Reply Brief (accompanied **[*14]** by two exhibits) ("'743 Reply"). In response, Defendants' submitted a Brief in Opposition to the '743 Motion accompanied by seven exhibits ("'743 Opp."), and a Counterstatement of Material Facts a ("Def. '743 Facts").

After consideration of the parties' voluminous submissions in support of and in opposition to the above-referenced Motions, [6] as well as the oral argument of counsel presented on December 10, 2008, I conclude, based on the following analysis, that: (1) Defendants' Motion for Summary Judgment as to All Claims Brought By DP Plaintiffs Related to the Upsher Settlement is granted; (2) Defendants' Motion for Summary Judgment as to All Claims Brought By DP Plaintiffs Related to the ESI Settlement is granted; (3) DP Plaintiffs' Motion for Partial Summary Judgment as to the Applicable Framework for Analysis of Exclusion Payments is denied; and (4) DP Plaintiffs' Motion for Partial Summary Judgment as to the Exclusionary Scope of the '743 Patent is denied.

II. BACKGROUND

This action involves the drug K-Dur 20, a potassium chloride supplement **[*15]** manufactured by Schering. Schering entered into separate agreements with Upsher and ESI Lederle ("ESI") settling patent litigation that Schering had initiated after Upsher and ESI sought approval from the Food and Drug Administration ("FDA") for their generic versions of K-Dur. The gravamen of DP Plaintiffs' Complaint is that Schering's settlements with Upsher and ESI were collusive, anticompetitive agreements that had the effect and purpose of preventing and delaying the entry of generic substitutes for K-Dur and allowing Schering to maintain a monopoly in the extended release potassium chloride supplement market. (DPP Am. Compl., P 1). *See also* *In re K-Dur Antitrust Litigation, 338 F. Supp. 2d 517, 522, 526 (D.N.J. 2004)*. Plaintiffs allege that but for payments made by Schering to Upsher and ESI under the agreements, Upsher and ESI would have settled on different terms and their generic products would have entered the market earlier than was permitted under the settlements. (DPP Am. Compl. at PP 1, 109). *See also* *In re K-Dur, 338 F. Supp. 2d at 526*.

As is evident from the discussion to follow, this case involves complex legal and factual issues at the intersection of patent and ***antitrust*** **[*16]** ***law***. Accordingly, before analyzing the parties' motions, it is necessary to outline the regulatory, factual and procedural contexts in which the issues presented arise.

A. Statutory and Regulatory Framework

A pharmaceutical company must obtain FDA approval to market a prescription drug. *21 U.S.C. § 355(a)*. In order to obtain approval for a pioneer drug, a company must submit a New Drug Application ("NDA"), which details all safety and efficacy studies, the components in the drug, the methods used in "the manufacture, process and packaging" of the drug, and any patents issued on the composition or methods of using the drug. *Id.* at *§ 355(b)(1)*. The FDA publishes the patent information in the "Approved Drug Products with Therapeutic Equivalence Evaluations," otherwise known as the "Orange Book." *See* FDA Electronic Orange Book, *http://www.fda.gov/cder/ob/*.

Prior to 1984, a generic drug company also had to undertake its own costly studies regarding the efficacy and safety of a drug, even if the drug was a bioequivalent of a brand name drug already on the market. *See* *Schering-Plough Corp. v. Fed. Trade Comm'n, 402 F.3d 1056, 1058-59 n.2 (11th Cir. 2005)*, *cert. denied, 548 U.S. 919, 126 S. Ct. 2929, 165 L. Ed. 2d 977 (2006)* **[*17]** ("*Schering*") (explaining the NDA process and indicating its potential cost). The generic was then required to file its own NDA for its version of the drug. The generic company could not begin testing the drug until after the patent life on the brand-name drug expired, since before that time the pioneer company could sue the generic for patent infringement. *See* *35 U.S.C. § 271 (2000)* (stating that making or using a patented compound is an act of infringement).

In 1984, Congress enacted the Drug Price Competition & Patent Term Restoration Act, commonly known as the Hatch-Waxman Act, Pub. L. No. 98-417, 98 Stat. 1585 (codified at various sections of titles 21 and 35 of the United States Code). Among its key provisions, the Hatch-Waxman Act: (1) created the Abbreviated New Drug Application ("ANDA"), which allows a generic drug applicant to piggyback on safety and efficacy studies conducted for the pioneer drug, *see generally* *21 U.S.C. § 355(j)*; (2) modified the definition of infringement, so that the conduct of

[6] The parties' summary judgment submissions include more than 400 pages of briefs and factual statements and a total of more than 400 exhibits.

safety and efficacy studies for FDA approval is no longer infringing activity, *see generally* 35 U.S.C. § 271(e); and (3) allowed the extension of patent terms to compensate for the **[*18]** period when a patented drug could not be marketed because it was undergoing the FDA approval process. *See generally* 35 U.S.C. § 156.

Under the The Hatch-Waxman Act, the pioneer drug maker still files a NDA with full-scale safety and efficacy studies and lists the patents that generics might infringe in the future. 21 U.S.C. § 355(b)(1) (enumerating NDA provisions). However, a generic company may file an ANDA, which requires the generic to prove that the new drug is the bioequivalent of a brand-name drug on the market, but does not require the time-consuming studies required for a NDA. *Id.* at § 355(j)(2)(A) (listing the ANDA provisions). *See also* Schering, 402 F.3d at 1058-59 n.2 (generics can use a "truncated" process, "so long as the generic manufacturer proves that its drug is a bio-equivalent to the already-approved brand name/pioneer drug"); Herbert Hovenkamp et al., *Anticompetitive Settlement of Intellectual Property Disputes ("Hovenkamp"),* 87 Minn. L. Rev. 1719, 1753 (2003) (listing ANDA provisions and noting that generic must be bioequivalent of pioneer drug). Further, the generic may begin testing before the pioneer's patent expires. 35 U.S.C. § 271(e)(1).

Under the Hatch-Waxman **[*19]** Act, an ANDA filer must make one of the following certifications: (1) that the "patent information has not been filed" on the generic's brand-name equivalent (a paragraph I certification); (2) that a "patent [on the branded drug] has expired" (a paragraph II certification); (3) that a brand-name patent exists, "the date on which such patent will expire," with a promise not to market until that date (a paragraph III certification); or (4) "that such patent is invalid or will not be infringed by the manufacture, use, or sale of the new drug for which the application is submitted." (a paragraph IV certification). 21 U.S.C. § 355(j)(2)(A)(vii) (emphasis added).

If the ANDA filer makes a paragraph IV certification, it must consult the Orange Book and provide notification to each NDA or patent owner impacted by the ANDA certification "not later than [twenty] days after the date of the postmark on the notice with which the Secretary informs the applicant that the application has been filed." *Id.* at § 355(j)(2)(B)(ii)(I). The filing of an ANDA with a paragraph IV certification allows the patent holders to sue, as it is considered a technical act of infringement, even though the generic has **[*20]** not yet begun marketing its version of the drug. *See* Stephanie Greene, *A Prescription for Change: How the Medicare Act Revises Hatch-Waxman to Speed Market Entry of Generic Drugs,* 30 J. Corp. L. 309, 317 (2005) (noting that paragraph IV certification is a technical act of infringement because the generic intends to market and infringe the patent). The patent owners then have 45 days to bring an infringement suit against the generic. If the affected patent owners do not file suit, the FDA can approve the ANDA without delay. 21 U.S.C. § 355(j)(5)(B)(iii). However, if an affected patent owner brings an infringement suit, approval of the application is automatically stayed for thirty months, or until a district court issues a final decision concluding that the patent has not been infringed or is otherwise invalid. *Id.*

In order to give generic drug makers an incentive to incur the expense and risk of a potential infringement suit by the patent holder, the ANDA procedures give the first ANDA filer a 180-day exclusivity period. Id. at 355(j)(5)(B)(iv). During this exclusivity period, the FDA cannot approve any other generic manufacturer's ANDA until 180 days after the earlier of (1) the date **[*21]** of the first ANDA filer's commercial marketing of its generic drug; or (2) the date of a "court [decision ruling] that the patent is invalid or not infringed." [7] Id at 355(j)(5)(B)(iii)(I).

B. Factual and Procedural Background [8]

[7] Prior to 2000, this was calculated from a "final judgment from which no appeal can be or has been taken." 21 C.F.R. § 314.107(e)(1) (1999). Now, a district court decision is sufficient. Mylan Pharms., Inc. v. Shalala, 81 F. Supp. 2d. 30 (D.D.C. 2000). Also, prior to 1998, FDA regulations had required that ANDA filers would not get the 180-day exclusivity unless they had successfully defended the patent infringement suit. *See* 59 Fed. Reg. 50,338,367 (Oct. 3, 1994). The "successful defense" requirement was subsequently found to be unreasonable, Mova Pharm. Corp. v. Shalala, 140 F.3d 1060, 1069-70, 329 U.S. App. D.C. 341 (D.D.C. 1998), and the FDA dropped the requirement in 1998. *See* 63 Fed. Reg. 59,710,711 (Nov. 5, 1998).

[8] The facts pertinent to the current motions are drawn primarily from the parties' pleadings and their respective statements filed pursuant to Local Rule 56.1 Unless otherwise indicated, the facts set forth below are not in dispute.

1. The Parties

The DP Plaintiff Class, **[*22]** represented by lead Plaintiff Louisiana Wholesale Drug, is essentially comprised of all persons or entities who purchased K-Dur 20 directly from Schering during the period November 20, 1998, through September 1, 2001. [9] The Class includes wholesalers, hospitals, health maintenance organizations and retail drug store chains.

Schering is a New Jersey corporation engaged in the discovery, development and marketing of, *inter alia,* brand name and generic drugs. Upsher is a Minnesota corporation engaged in the discovery, development and marketing of brand name and generic drugs. Former Defendant Wyeth Laboratories ("Wyeth"), formerly known as American Home Products, Inc. ("AHP"), is a Delaware corporation engaged in the development, manufacturing and marketing of, *inter alia,* brand name and generic drugs. Former Defendant ESI is a business unit of Wyeth that engages in the research, manufacture and sale of generic drugs. [10]

2. K-Dur and the '743 Patent

During the time period relevant to the DP Plaintiffs' claims, Schering marketed a potassium chloride supplement under the brand name K-Dur. (DPP Upsher Facts, P 1). [11] K-Dur is used to treat potassium **[*24]** deficiencies such as those that often arise from the treatment of high blood pressure with diuretic products. (DPP '743 Facts, P 1; Def. '743 Facts, P 1). Although the active ingredient in K-Dur -- potassium chloride -- is not patented, K-Dur is covered by a formulation patent, No. 4,863,743 (the "'743 Patent"), owned by Key Pharmaceuticals, Inc. ("Key"), a division of Schering. (Schering Ans. to DPP Am. Compl., P 23-24). The '743 Patent, which claims a controlled-release dispersible potassium chloride tablet, was issued on September 5, 1989 and expired on September 5, 2006. (Schering Ans. to DPP Am. Compl. at P 24; DPP Uphser Facts, P 9).

The '743 Patent has 12 claims, all of which depend on or incorporate Claim **[*25]** 1. (DPP Upsher Facts, P 49; DPP '743 Facts, P 12; Def. '743 Facts, P 12). Claim 1 of the '743 Patent states:

> A pharmaceutical dosage unit in tablet form for oral administration of potassium chloride, comprising;
> a plurality of coated potassium chloride crystals, the amount of potassium chloride being in the range of about 64% to about 86.5% by weight based on the total weight of the dosage unit;
> a coating material for the individual potassium chloride crystals, the coating material comprising ethylcellulose in the amount in the range of about 9% to about 15% by weight based on the total weight of the coated crystals and at least one member selected from hydroxypropylcellulose and polyethylene glycol in an amount in the

---

[9] On April 14, 2008, I issued a Report and Recommendation (the "April 14 R&R") recommending that DP Plaintiffs' Motion for Class Certification be granted and the following Class certified:

> All persons or entities who have purchased K-Dur 20 directly from Schering at any time during the period November 20, 1998, through September 1, 2001.
>
> Excluded from the proposed class shall be:
>
> Defendants and their officers, directors, management and employees, subsidiaries and affiliates, as well as federal government entities. Also excluded are persons or entities who have not purchased generic versions of K-Dur 20 after the introduction of generic versions of K-Dur 20.

(April 14 R&R, Doc. No. 636). On December 30, 2008, Judge Greenaway overruled the objections of Defendants and DP Plaintiffs to the April 14 R&R and adopted the R&R as the opinion of the Court. (Dec. 30, 2008 Order, **[*23]** Doc. No. 731).

[10] On January 24, 2005, Judge Greenaway granted final approval of a settlement between DP Plaintiffs and Wyeth. (Jan. 24, 2005 Order, Doc. No. 226). As part of the settlement, DP Plaintiffs agreed to the release and dismissal with prejudice of all claims against Wyeth and its related entities, including ESI. (DPP/Wyeth Settlement Agreement, Doc. 170-3).

[11] In the interest of brevity, the record citations herein regarding the factual background refer to the parties' statements filed pursuant to *Local Rule 56.1* and, unless necessary, do not separately identify each exhibit cited by the parties in their statements of fact. In addition, because the DPP Upsher Facts and the DPP ESI Facts restate each paragraph of Defendants' Upsher Facts and ESI Facts, it is not necessary to cite separately to Defendants' Upsher Facts and ESI Facts.

range of about 0.5% to about 3% by weight based on the total weight of the coated crystals and said ethylcellulose has a viscosity greater than 40 cp.

('743 Mem., Ex. 1 ('743 Patent) at Col. 8, line 18-Col. 10, line 21). With regard to tablets, the '743 Patent specification states, *inter alia,* "[t]he useful ethylcellulose designations are 7 and higher, corresponding to a viscosity of at least 6 cp, preferably more than 40 cp (designations 45 or higher) for crystals to be **[*26]** compressed into tablets." (*Id.* at Col. 4, lines 63-66).

3. <u>Development and Prosecution of the '743 Patent</u>

The sustained release potassium chloride tablet claimed in the '743 Patent was developed at Key by Charles Hsiao and Chi-Tze Chou using a technique called "microencapsulation." (DPP Upsher Facts, P 4). Microencapsulation is a process in which small particles of a drug are coated to give them sustained release properties. (DPP Upsher Facts, P 5). Tableting exposes the coated microcapsules to compression forces as the individual crystals are compressed into a tablet. (*Id.*). Dr. Hsiao and Ms. Chou used a coating consisting of insoluble ethylcellulose ("EC") with a viscosity of greater than 40 centipoise ("cp") and either hydroxypropylcellulose ("HPC") or polyethylene glycol ("PEG"). (DPP Upsher Facts , P 8). Viscosity is a property of fluid that refers to its resistance to flow. (DPP '743 Facts, P 14; Def. '743 Facts, P 14). The addition of HPC or PEG permits the potassium chloride to leach out through the EC coating. (*Id.*).

The '743 Patent issued from patent application No. 830,981 (the "'981 application"), filed February 19, 1986. (Schering Ans. to DPP Am. Complaint, P 29). The '981 **[*27]** application was a continuation-in-part of application No. 702,714 (the "'714 application"), filed February 19, 1985. (DPP '743 Facts, P 19; Def. '743 Facts, P 19). As originally filed, Claim 1 of the '981 application did not contain any limitation on the viscosity grade of the ethylcellulose used in the coating material. (DPP Upsher Facts, P 50). In addition, as originally filed, Claim 1 described a "dosage unit" for oral administration of potassium chloride, and was not limited to a tablet dosage form. (*Id.*).

On August 31, 1988, the Patent and Trademark Office ("PTO") rejected the then-pending claims of the '981 application based on Patent No. 4,555,399 (the "'399 Patent") and other prior art. (DPP '743 Facts, P 28; Def. '743 Facts, P 28). The '399 Patent had previously been granted to Dr. Hsaio for a controlled release tablet aspirin tablet in which aspirin crystals are coated with EC and HPC and compressed into tablet form. (DPP Upsher Facts, P 51; DPP '743 Facts, P 23; Def. '743 Facts, 23). Example 1 of the '399 Patent describes the use of Ethocel N-10 (Dow), an EC with a viscosity of 9-11 cp. (Upsher/ESI Opp., Ex. 167 ('399 Patent) at Col. 3, line 8; '743 Mem., Ex. 2 (Feb. 27, 1989 Amendment) at 5). **[*28]** However, DP Plaintiffs dispute that the '399 Patent limited the claimed invention in any way to 9-11 cp ethylcellulose. (DPP Upsher Facts, P 51).

After the PTO's August 31, 1988 rejection, Key filed a response that included an amendment to Claim 1 and arguments in support of patentability. (DPP Upsher Facts, P 52). Key amended Claim 1 by specifying that the invention was a "tablet" and by adding the phrase "said ethylcellulose has a viscosity greater than 40 cp" at the end of Claim 1. (DPP Upsher Facts, P 52-53; '743 Mem., Ex. 2 (Feb. 27, 1989 Amendment) at 1-2). In its remarks accompanying the amendment, Key stated, *inter alia,* that "the claims have been amended to more precisely define the claimed invention," and argued that a review of the prior art '399 Patent would not lead one skilled in the art to use EC with a viscosity of greater than 40 cp to make a sustained release potassium chloride tablet as claimed in the '981 application. (DPP Upsher Facts, P 54). Key further stated that the prior art '399 Patent disclosed only EC with a viscosity of 9-11 cp. (*Id.*). On March 31, 1989, the Patent Examiner granted Key the '743 Patent. (DPP Upsher Facts, P 55).

4. <u>The [*29] Upsher Patent Litigation</u>

On August 8, 1995, Upsher filed an ANDA with the FDA seeking permission to sell a generic version of K-Dur. (DPP Upsher Facts, P 12). Upsher's generic product, Klor-Con(c) M20, was a microencapsulated, controlled release 20mEq potassium chloride tablet. (*Id.* at 13). Upsher certified to the FDA that its product was bioequivalent to K-Dur and stated that its product was "the same as the reference drug, K-DUR." (*Id.* at 15-16). In its November 3, 1995 paragraph IV Certification Notice to Schering, Upsher claimed that its generic drug would not infringe the '743 Patent. (DPP Upsher Facts, P 17). Specifically, Upsher asserted that its product did not infringe Key's product because: (1) "the viscosity of ethyl cellulose employed in KLOR-CON(c) M is outside the range limited by claim 1 of the '743 patent;" and (2) "[t]he KLOR-CON(c) M product does not contain hydroxypropylcellulose." (Upsher Mem., Ex. 17 (Nov. 13, 1995 Patent Certification Notice) at 8-9). [12] Uphser's product used sorbitan monooleate ("SMO"). (DPP Upsher Facts, P 18). Upsher disputes "any implication that it used SMO in place of HPC or PEG," and disputes that the SMO used in Upsher's product was present **[*30]** in an amount corresponding to the claimed amount of HPC or PEG required by the claims of the '743 Patent. (*Id.*). In its Patent Certification Notice, Upsher also asserted that because, in its amendment of Claim 1, Key inserted a limitation of viscosity for EC of greater than 40 cp, prosecution history estoppel precluded Key from "assert[ing] the doctrine of equivalents in alleging that the KLOR-CON(c) M product infringes its claims." (Upsher Mem., Ex. 17 (Nov. 13, 1995 Patent Certification Notice) at 9-13).

On December 15, 1995, Key filed an action in the United States District Court for the District of New Jersey against Upsher alleging "willful and deliberate" infringement of the '743 Patent. (DPP Upsher Facts, P 19). The case was assigned to Judge Walls. (*Id.* at P 23). Key's action was timely commenced within the 45-day period specified in the Hatch-Waxman Act. (*Id.* at P 19). Upsher answered Key's complaint, denying infringement and alleging declaratory judgment counterclaims for patent invalidity, non-infringement and unenforceability. **[*31]** (*Id.* at P 23).

Discovery in the case included the exchange of tens of thousands of pages of documents and depositions of the inventors and patent attorneys from Key and Schering, as well as of the Upsher technical people and consultants who developed the Upsher formulation. (*Id.* at P 24). Schering retained as an expert, Dr. Gilbert S. Banker, dean of the University of Iowa College of Pharmacy. (*Id.* at P 25). Key retained as its technical expert, Dr. Christopher Rhodes, a co-editor with Dr. Banker of the textbook, *Modern Pharmaceutics.* (*Id.* at P 27). Drs. Banker and Rhodes each submitted expert reports, and both were deposed for multiple days. (*Id.* at P 28, 30). Dr. Banker opined that the '743 Patent was valid and infringed by Upsher's product; Dr. Rhodes opined that the '743 Patent was invalid and that the Upsher formulation was not equivalent to the claims of the '743 Patent. (*Id.* at 29).

On February 6, 1997, Upsher moved for summary judgment on the issue of non-infringement. (*Id.* at P 31). Upsher argued that Key was barred by prosecution history estoppel from claiming that the Upsher product was equivalent to the '743 Patent, and that no factual equivalency existed between its generic **[*32]** product and the claims of the '743 Patent. (*Id.* at P 31). In opposition to the Motion, Key argued that it was not barred by prosecution history estoppel from asserting equivalency, and that factual disputes existed regarding whether Upsher's formulation was equivalent to the '743 Patent. (*Id.* at P 32). Key separately moved for summary judgment on Upsher's affirmative defenses that the '743 Patent was unenforceable based on inequitable conduct before the PTO. (*Id.* at 34). Upsher opposed Key's motion on the ground that fact disputes concerning the alleged inequitable conduct precluded summary judgment. (*Id.* at P 35).

On June 17, 1997, Judge Walls held a hearing on certain motions, including Upsher's motion for summary judgment. ("743 Mem., Ex. 9). Trial in the *Key v. Upsher* matter was scheduled to being on June 18, 1997.

5. <u>The Upsher Settlement</u>

Upsher initiated contact with Schering to discuss settlement of the patent litigation. (DPP Upsher Facts, P 68). The first settlement meeting took place on May 21, 1997, with subsequent discussions between the parties occurring on May 28, June 3, and June 12, and June 16, 1997. (DPP Upsher Facts, PP 197, 199, 205; Def. Upsher Reply Facts, PP 197, **[*33]** 199, 205). In the early morning hours of June 18, 1997, the parties signed and finalized an agreement, dated June 17, 1997 (the "June 17 Agreement"), "as to the terms under which [Upsher and Schering, on behalf of itself and Key] will settle the [*Key v. Upsher*] action and will enter into a transaction licensing rights to

---

[12] Upsher's Patent Certification Notice also stated that "the KLOR-CON(c) M product does not contain magnesium stearate of polyvinylpyrolidone." (*Id.* at 9).

certain Upsher-Smith products to an affiliate of Schering." (DPP Upsher Facts, P 208; Def. Upsher Reply Facts, P 208; Upsher Mem., Ex. 61 (June 17, 1997 letter from Raman Kapur to Ian Troup) at p. 1).

The terms of the June 17 Agreement pertinent to the instant Motions provided that: (1) Upsher would not market its Klor-Con(c) M20 product, or any other sustained release microencapsulated potassium chloride tablet, prior to September 1, 2001; (2) effective September 1, 2001, Schering would grant Upsher a non-royalty bearing non-exclusive license to market its Klor-Con(c) M20 and Klor-Con(c) M10 product in the United States; (3) Upsher would grant Schering licenses to Upsher's Niacor-SR(c) and five other Upsher products; [13] and (4) "[i]n consideration for the licenses, rights and obligations described in paragraphs 1 through 10" of the agreement, Schering would pay to **[*34]** Upsher a total of $ 60 million, comprised of $ 28 million payable upon approval of the agreement by Schering's Board of Directors, $ 20 million on the first anniversary of the approval date, and $ 12 million on the second anniversary of the approval date. [14] (Upsher Mem., Ex. 61 (June 17 Agreement) at PP 3, 7-11).

The parties dispute the facts regarding the *bona fides* of the Niacor-SR(c) license deal and the reasons it was included in the June 17 Agreement. DP Plaintiffs contend that the deal was effectively a sham and that all or part of the $ 60 million paid to Upsher by Schering under the Agreement was really for Upsher's agreement **[*35]** to delay the entry of its generic K-Dur. (Uphser Opp., pp. 37-66; DPP Upsher Facts, PP 72-106, 192-277). Schering contends that the Niacor-SR(c) license was a separately valued deal, that the $ 60 million was a good faith payment for rights Schering believed -- in its business judgment at the time -- were worth $ 60 million, and that the deal was included in the June 17 Agreement only after Schering was satisfied that the deal stood on its own merit. (Upsher Mem., pp. 41-66; Upsher/ESI Reply, pp. 18-27; DPP Upsher Fact, PP 72-106; 192-277).

6. The ESI Patent Litigation and Settlement

On December 29, 1995, ESI sought FDA approval to market a generic version of K-Dur. (DPP ESI Facts, p 3; Schering Ans. to DPP Am. Complaint, P 78). ESI's product was a sustained release tablet for oral administration of potassium chloride. It used the ingredients potassium chloride, EC and HPC in amounts within the ranges specified by Claim 1 of the '743 Patent. (DPP ESI Facts, P 4). ESI submitted a Paragraph IV Certification and notified Schering of its Paragraph IV Certification and ANDA filing. (Schering Ans. to DPP Am. Complaint, P 78).

On February 16, 1996, Schering (through Key) sued ESI in the United **[*36]** States District Court for the Eastern District of Pennsylvania, alleging that ESI's generic product infringed the '743 Patent. (DPP ESI Facts, P 5; Schering Ans. to DPP Am. Compl., P 80). ESI argued that its product did not literally infringe the "743 Patent because ESI's product did not have a "coating material with different ingredients" as required by the '743 Patent. (ESI Opp., Ex. 145 (ESI Reply Mem. in Support of Defendant's Mot. for a Markman Ruling on Patent Claim Construction and/Or for Partial Summary Judgment of No Literal Infringement and Response to Plaintiff's Cross Motion) at p. 2). ESI stated that its "tablets are made by a completely different technology which produces a multi-layered coating with each layer comprised of a separate material having only a single ingredient." (*Id.* at p. 13).

In the Fall of 1996, Schering and ESI agreed to engage in court-supervised mediation. (DPP ESI Facts, P 7). The mediation session was suggested by the presiding District Judge, the Hon. Jan DuBois, to whom the case was assigned. (*Id.*). U.S. Magistrate Judge Thomas Rueter was appointed mediator. (*Id.*). During the mediation sessions, Magistrate Judge Rueter met with the parties both **[*37]** jointly and separately and urged them to settle. (*Id.* at P 8).

In December 1997, Schering obtained information from ESI concerning problems ESI had encountered in demonstrating the bioequivalence of its generic product to K-Dur, as required for approval of ESI's ANDA. (DPP

---

[13] The five other Upsher products were KLOR CON(c) 8, KLOR CON(c) 10, KLOR CON(c) M20, PREVALITE(c), and Pentoxifylline. (Upsher Mem., Ex. 61 (June 17 Agreement) at PP 7-10).

[14] The Agreement also provided for milestone and royalty payments contingent upon Schering's sales of Niacor-SR(c). Subsequent to the June 17 Agreement, Schering decided not to pursue the Niacor-SR(c) opportunity, and Schering never marketed the drug. However, the facts regarding the reasons for Schering's decision are disputed. (DPP Am. Compl., P 74; Schering Ans. to Am. Compl., P 74).

Upsher Facts, P 9; Def. ESI Reply Facts, P 9; ESI Mem., Ex. 13 (Dec. 15, 1997 letter, AHP 05 00175)). The information showed that the FDA had twice rejected ESI's bioequivalence studies and that ESI's most recent effort to conduct a trial showing bioequivalence had begun on December 8, 1997. (*Id.*). Also in mid-December 1997, the parties discussed a proposed settlement whereby Schering would grant ESI a royalty free license to market its generic Micro-K(R) 20 product on December 31, 2003, and ESI would grant Schering licenses for certain ESI products in exchange for a $ 5 million up-front royalty fee plus additional royalty fees based on sales of the products. (DPP ESI Facts, PP 10-11; Def. ESI Reply Facts, PP 10-11).

Judge DuBois held a Markman hearing on January 21 and 22, 1998. (DPP ESI Facts, P 13). At the close of the January 22, 1998 session of the hearing, Judge DuBois told the parties:

> I want you to take this **[*38]** business decision, and it is a business decision and decide it without any more help than you're getting from Judge Rueter. I don't want you to use the adjudicatory powers of the Court.
> We're talking about the conciliatory services that the Court offers, and that's what I want you to use to resolve the case. I don't want to have to adjudicate either this case or the two-week long or longer trial of this case. I want you to try to do it.
> I think that's the best way to resolve a dispute of this kind, particularly since I think you can craft a settlement among yourselves.

(ESI Mem., Ex. 17 (Jan. 22, 1998 Tr.) at 139). At the end of the hearing, after summoning the parties to his chambers, Judge DuBois directed the parties to Magistrate Judge Rueter to try to settle the case. (DPP ESI Facts, P 13; ESI Mem., Ex. 18 (Herman 10/30/01 Dep.) at 129-130). [15]

The parties had another mediation session with Magistrate Judge Rueter on Friday, January 23, 1998, which began around 5:30 p.m. and continued until 11:30 p.m. (DPP ESI Facts, P 14). Participating in all or part of the session were three of Schering's counsel and one Schering executive, Martin Driscoll, who participated by phone in parts of the session while attending a New Jersey Nets basketball game with his children. (*Id.*). By the time of the January 23, 1998 mediation session, the parties had agreed to a $ 15 million license from ESI to Schering for ESI's two generic products, and ESI had indicated that it required money to settle **[*40]** the case. (DPP ESI Facts, P 15).

Magistrate Judge Rueter encouraged Schering to pay ESI $ 5 million, which he characterized as "nothing more than legal fees." (DPP ESI Facts, P 16-17). During the January 23, 1998 mediation session, Magistrate Judge Rueter called Mr. Driscoll three times at the basketball game. In those calls, Magistrate Judge Rueter told Mr. Driscoll that he had been instructed by the court to reach a settlement that night and that if the parties did not reach a settlement that night, the judge wanted the parties in court at 8 a.m. the next day. (DPP ESI Fact, P 16-18; ESI Mem., Ex. 12 (FTC Trial Tr.) at 2707-11; ESI Mem., Ex. 19 (Driscoll Dep.) at 295; ESI Mem., Ex. 20 (Driscoll I.H. Tr.) at 105-7). Magistrate Judge Rueter also called John Hoffman, Schering's then in-house antitrust counsel, at home and asked Schering to pay ESI $ 5 million. (DPP ESI Facts, P 17; ESI Mem., Ex. 10 (Hoffman Dep.) at 328, 330; ESI Mem., Ex. 11 (FTC Trial Tr.) at 2618-20). Prior to and during the mediation, ESI requested more than $ 5 million to settle the case. (DPP ESI Facts, P 18).

During the January 23 session, Magistrate Judge Rueter urged Mr. Driscoll to settle and emphasized that **[*41]** he thought the parties could reach a middle ground. (DPP ESI Facts, P 18; ESI Mem., Ex. 12 (FTC Trial Tr.) at 2707-11). Mr. Driscoll expressed his belief that ESI might have difficulty getting its product approved and discussed with Magistrate Judge Rueter a proposal under which Schering would pay ESI a certain amount if ESI's ANDA was

---

[15] In their Statement of Disputed Facts, DP Plaintiffs have asserted that certain of the statements cited in Defendants' Statement of Facts regarding the ESI Settlement are inadmissible hearsay. In this regard, I note that hearsay statements may be considered on summary judgment if the statements are capable of being admissible at trial. *Shelton v. Univ. of Med. & Dentistry, 223 F.3d 220, 223 n.2 (3d Cir. 2000)*. **[*39]** Moreover, to the extent that the statements are offered not to show the truth of the matter asserted, but to demonstrate their effect on the listener, they may be admissible. *See Marks v. Marina, 213 Fed. Appx. 147, 213 Fed. Appx. 147, 2007 U.S. App. LEXIS 479, at *10-11 (3d Cir. Jan. 10, 2007)* (court properly admitted evidence offered not for its truth, but to show the effect on the listener); *Faulkner v. Super Valu Stores, Inc., 3 F.3d 1419, 1434 (10th Cir. 1993)* ("statements offered for the effect on the listener . . . are generally not hearsay.").

approved by a certain date, and a lesser amount if ESI received approval at a later date. (DPP ESI Facts, P 19; ESI Mem., Ex. 19 (Driscoll Dep.) at 295-96; ESI Mem., Ex. 12 (FTC Trial Tr.) at 2711-12). Magistrate Judge Rueter discussed the proposal with Mr. Hoffman, and characterized it as a "bet." (DPP ESI Facts, P 21; ESI Mem., Ex. 11 (FTC Trial Tr.) at 2620). Regarding Schering's doubt that ESI would receive FDA approval, Magistrate Judge Rueter told Mr. Hoffman that he should "put [his] money where [his] mouth is," and stated that if Schering's concern was correct, the proposal wouldn't cost Schering anything. (DPP ESI Facts, P 22; ESI Mem., Ex. 11 (FTC Trial Tr.) at 2621).

The January 23, 1998 mediation session concluded with the parties' agreement that Schering would pay ESI $ 10 million if its ANDA was approved by July 1999, with Schering's payment **[*42]** incrementally decreasing to $ 625,000 if ESI's ANDA was approved in 2002. (ESI Mem., Ex. 16 (C2 002196-97) at P II). The parties further agreed that Key would grant ESI a "royalty free, non-exclusive license under US Patent '743 beginning 1/1/04." (*Id.* at P VI). Once the terms had been agreed to by Schering and ESI, Magistrate Judge Rueter called the participants into chambers and asked them to put the terms in writing and initial or sign them. (DPP ESI Facts, 24; ESI Mem., Ex. 11 (FTC Trial Tr.) at 2621). Counsel for ESI prepared a handwritten document summarizing the settlement principles. (ESI Mem., Ex. 16 (C2 002196-97); ESI Mem., Ex. 8 (FTC Trial Tr.) at 2488-89; 2537). The document was prepared, and was signed by representatives of Key and ESI, in the presence of Magistrate Judge Rueter. (*Id.*).

Schering and ESI signed a formal settlement agreement in June of 1998. (DPP ESI Facts, P 26). Among its terms, the Agreement provided that: (1) Key would grant to ESI a non-exclusive, royalty-free license, effective January 1, 2004, to market a "Referencing Product" [16] (ESI Mem., Ex. 24 (Settlement Agreement) at P 3.1(a)(i)); (2) except with respect to a Referencing Product for which ESI **[*43]** was permitted to seek FDA approval pursuant to the Agreement, ESI would not, prior to the expiration of the '743 Patent: (i) apply for, sponsor or support an application for AB rating for any potassium chloride product with respect to K-Dur, or (ii) conduct, sponsor, file or support a substitutability or equivalence study of a potassium chloride product with respect to K-Dur (*id.* at P 2.9); and (3) Key would pay to ESI $ 5 million plus an additional sum ranging from $ 10 million, if ESI's ANDA received FDA approval by June 30, 1999, to $ 625,000, if ESI received approval in 2002 (*id.* at P 4.1). In the Agreement, ESI represented that it was not "developing, or currently intends or plans to develop, a potassium chloride product, other than an ESI KCI Product or other potassium chloride products" that it already made. (*Id.* at P 2.8).

ESI received FDA approval for its generic K-Dur product in May 1999, and Schering paid ESI the $ 10 million required under Paragraph 4.1(b) of the Settlement Agreement. (DPP ESI Facts, P 21). In July 2001, ESI announced that it was exiting the oral generic business altogether, and in 2002, ESI left the oral generics market. (DPP ESI Facts, P 28).

7. <u>The FTC Action</u>

On March 30, 2001, the Federal Trade Commission ("FTC") filed a complaint against Schering, Upsher and AHP (the "FTC Action"). (DPP ESI Facts, P 29). The complaint alleged, *inter alia,* that Schering's settlements with Upsher and ESI unreasonably restrained commerce and constituted unfair methods of competition in violation of *Section 5* of the Federal Trade Commission Act (the "FTC Act"). (ESI Mem., Ex. 29 (FTC Complaint) at PP 68-69). The complaint further alleged that Schering monopolized and conspired with Upsher and ESI to monopolize the potassium supplement market. (*Id.* at P 70-71).

Between January and March 2002, the FTC Action was tried before an Administrative Law Judge ("ALJ"). *In re Schering-Plough, 136 F.T.C. 956, 2002 FTC LEXIS 40, *6 (June 27, 2002)* ("*Schering-ALJ*"). **[*45]** The trial before the ALJ included the testimony of 41 witnesses, thousands of exhibits, and resulted in 8,629 pages of transcript. *Id.*

---

[16] The Agreement defined a "Referencing Product" as an ESI KCI Product, a potassium chloride product that is the subject of an ANDA or NDA that references a Key NDA, or a potassium chloride product marketed by ESI as equivalent to, or otherwise substitutable on a generic basis for, K-Dur. (ESI Mem., Ex. 24 (Settlement Agreement) at P 1.2). An ESI KCI Product **[*44]** was defined as the 20 Meq extended release potassium chloride tablet described in Key's ANDA. (*Id.*).

On June 27, 2002, the ALJ issued a lengthy decision -- including 431 findings of fact -- ruling that the Upsher and ESI Agreements were lawful settlements of legitimate patent disputes and dismissing the FTC complaint. *136 F.T.C. 956, 2002 FTC LEXIS 40 at *8-9*. *See also* *Schering, 402 F.3d at 1061*. The ALJ ruled that the theories advanced by the FTC required a presumption that the '743 Patent was not valid or that Upsher's and ESI's products did not infringe the patent. *136 F.T.C. 956, 2002 FTC LEXIS 40 at * 8-9*. *See also* *Schering, 402 F.3d at 1061*. The ALJ concluded that there was "no basis in law or fact to make that presumption." *Schering-ALJ, 136 F.T.C. 956, 2002 FTC LEXIS 40, at *9*. The ALJ further concluded that a *per se* antitrust analysis of the agreements was not appropriate. *136 F.T.C. 956, 2002 FTC LEXIS 40 at *219-33*. Rather, applying a rule of reason analysis, the ALJ emphasized the need to consider the exclusionary power of the patent at issue. *136 F.T.C. 956, 2002 FTC LEXIS 40 at *235-43* ("Application of ***antitrust law*** to markets affected by exclusionary statutes such as the Patent Act cannot ignore the rights of the patent holder.") Considering **[*46]** the exclusionary power of the '743 Patent and the inability to predict the outcome of the patent litigation, the ALJ rejected the FTC's argument that, absent Schering's payments to Upsher and ESI, the generics could have entered the market earlier. *136 F.T.C. 956, 2002 FTC LEXIS 40 at *242-43*.

The FTC's complaint counsel appealed to the full Commission, which reversed the ALJ. *In re Schering-Plough Corp., 2003 FTC LEXIS 187 (Dec. 8, 2003)* ("*Schering-FTC*"). Although the Commission refrained from holding that Schering's payments to Upsher and ESI made the settlements *per se* illegal, it also declined to apply the full rule of reason analysis employed by the ALJ. *Id. at *13, 22-27*. Instead, under the analysis adopted by the Commission, once the FTC demonstrates the agreements' anticompetitive effects, the "respondents must demonstrate that the challenged provisions are justified by procompetitive benefits that are both cognizable and plausible." *Id. at * 14*. The Commission ruled that the FTC had demonstrated the anticompetitive effect of the agreements, and reasoned that "[a]bsent proof of other offsetting consideration, it is logical to conclude that the *quid pro quo* for the payment was an agreement by the generic **[*47]** to defer entry beyond the date that represents an otherwise reasonable litigation compromise." [17] *Id. at *16, 52*. Although the FTC ostensibly used a truncated rule of reason analysis, it essentially indicated that any settlement involving reverse payments over $ 2 million (an estimated cost of legal fees) would be *quid pro quo* for market delay and, thus, illegal. *Id. at * 175-76*. The FTC further rejected the ALJ's conclusion that the licenses granted to Schering under the agreements were adequate consideration for the payments made by Schering, ruling instead that the payments were for delay. *Id. at * 15-16*.

The Defendants chose to appeal the FTC's decision to the Eleventh Circuit, which reversed the Commission. *Schering, 402 F.3d at 1068*. The Eleventh Circuit's decision in *Schering,* and its previous decision in *Valley Drug Co. v. Geneva Pharms., Inc., 344 F.3d 1294 (11th Cir. 2003)*, **[*48]** *cert. denied, 543 U.S. 939, 125 S. Ct. 308, 160 L. Ed. 2d 248 (2004)*, are discussed, *infra.*

III. DISCUSSION

A. The Parties' Motions

1. Defendants' Upsher and ESI Motions

In their Motions, Defendants contend that unless DP Plaintiffs can show either: (1) that Schering's underlying patent litigation was "objectively baseless"; (2) that the '743 Patent was procured by fraud; or (3) that terms of the settlements extended the patent's coverage beyond the patent's potential exclusionary scope, the Upsher and ESI Settlements were lawful, even if they did include "reverse payments" to Upsher and ESI Defendants argue that under the foregoing standard, DP Plaintiffs cannot establish that Schering's patent infringement suits were baseless. According to Defendants, the patent litigation with Upsher and ESI involved disputed issues of fact and

---

[17] Although the FTC found both the Upsher and ESI Agreements unlawful, it noted the limited evidence presented regarding the ESI settlement and stated that "[a]s a matter of prosecutorial discretion, we might not have brought a stand-alone case based on such relatively limited evidence." *Schering-FTC, 2003 FTC LEXIS 187, at * 166*.

law such that Schering's claim of infringement could not possibly be deemed objectively baseless. Therefore, Defendants argue, summary judgment must be granted in their favor.

With respect to the Upsher Settlement, Defendants further argue that DP Plaintiffs cannot show that there was a "reverse payment" to Upsher and, thus, their antitrust claim must fail. In short, Defendants contend that because **[*49]** the $ 60 million Schering paid Upsher was fair value for the Niacor license -- and not a net payment for delay of Uphser's generic K-Dur -- there can be no antitrust violation.

In their opposition to Defendants' Upsher and ESI Motions, and in their separate Framework Motion, DP Plaintiffs contend that the legal standard proposed by Defendants is incorrect. DP Plaintiffs argue that the correct framework is either a *per se* analysis, or what they term the "FTC/Hovenkamp approach." Under the framework proposed by DP Plaintiffs, settlement agreements involving reverse payments would be subject to a rebuttable presumption of illegality, which could be overcome by proof of a pro-competitive justification for the payment. With respect to whether the payments to Niacor were, in fact, "reverse payments," DPPs argue that the question of whether Schering paid more than fair value for the Niacor license is a "quintessential factual issue" which cannot properly be decided on summary judgment.

In addition to Defendants' two primary summary judgment arguments summarized above, Defendants contend that DP Plaintiffs have failed to present sufficient evidence of an actual anticompetitive effect on the **[*50]** relevant product market resulting from the settlement. According to Defendants, all generic potassium chloride supplements are interchangeable with K-Dur and, thus, must be included in the relevant market. Defendants argue that because DP Plaintiffs have failed to prove the relevant market, they cannot prove that the Upsher Settlement caused any anticompetitive effects in that market.

In response to Defendants' arguments regarding the relevant market, DP Plaintiffs contend that the anticompetitive effects of delayed generic are indisputable, have been admitted by Schering, and can be proved by direct evidence that eliminates a need for the "relevant market" analysis urged by Defendants. DP Plaintiffs further argue that if a market definition is required, the relevant market cannot simply include all potassium chloride supplements that may be therapeutic substitutes for K-Dur. Rather, they argue, the market consists of K-Dur and its AB-rated equivalents.

Finally, Defendants contend that they are entitled to summary judgment on DP Plaintiffs' damages claims on two grounds. First, Defendants argue that this is not a price-fixing case and DP Plaintiffs cannot claim "overcharge" damages because, **[*51]** as distributors, they were not overcharged for K-Dur but, rather, were allegedly prevented from buying additional products, *i.e.,* generic versions of K-Dur. Defendants argue that the proper measure of damages under these circumstances is lost profits, and that DP Plaintiffs have failed to offer any evidence of such damages. Second, Defendants contend that DPPs have no claim for damages for K-Dur purchases that were subject to generic bypass.

In response, DP Plaintiffs assert that overcharge damages have long been the standard remedy for direct purchasers suing for antitrust violations. With respect to generic bypass, DPPs contend that Defendants' position is inconsistent with the only published decision on the issue, as well as with the principles underlying the antitrust laws. (Upsher Opp., p. 78 (citing *In re Relafen Antitrust Litig., 346 F. Supp. 2d 349, 368-70 (D. Mass. 2004))*. DP Plaintiffs further argue that even if an adjustment for bypass were required, it would not affect the amount of overcharges suffered by the Plaintiff Class.

2. DPPs' '743 Motion

DP Plaintiffs also seek partial summary judgment as to the exclusionary scope of Schering's '743 patent. This motion has two principal **[*52]** components. First, DPPs argue that under the doctrine of prosecution history estoppel and the "All Elements Rule," the scope of the '743 patent cannot extend to exclude Upsher's generic product. DPP's second contention is that, by its express terms, the Schering/Upsher Settlement Agreement exceeds the exclusionary scope of the '743 patent. Specifically, DPPs contend that the terms of the agreement prevent Upsher not only from selling the allegedly infringing Klor Con M, but also "any other sustained release microencapsulated potassium chloride tablet," irrespective of whether such products infringed Schering's patent.

B. Summary Judgment Standard

Motions for summary judgment are governed by *Federal Rule of Civil Procedure 56*. ***HN1***[] "Summary judgment is appropriate under *Fed. R. Civ. P. 56(c)* when the moving party demonstrates that there is no genuine issue of material fact and the evidence establishes the moving party's entitlement to judgment as a matter of law." *Med Alert Ambulance, Inc. v. Atlantic Health Sys., Inc., No. 04-1615 (JAG), 2007 U.S. Dist. LEXIS 57083, 2007 WL 2297335, *2 (D.N.J. Aug. 6, 2007)* (citing *Celotex Corp. v. Catrett, 477 U.S. 317, 322-23, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986))*.

HN2[] Under *Rule 56(c)*, the moving party "always bears **[*53]** the initial responsibility of informing the district court of the basis for its motion, and identifying those portions of 'the pleadings, depositions, answers to interrogatories, and admissions on file, together with affidavits, if any,' which it believes demonstrate the absence of a genuine issue of material fact." *Celotex, 477 U.S. at 323 (1986)* (quoting *Fed. R. Civ. P. 56*). ***HN3***[] "Once the moving party has satisfied its initial burden, the party opposing the motion must establish that a genuine issue as to a material fact exists." *Med Alert, 2007 U.S. Dist. LEXIS 57083, 2007 WL 2297335 at *3* (citing *Jersey Cent. Power & Light Co. v. Lacey Twp., 772 F.2d 1103, 1109 (3d Cir. 1985))*. ***HN4***[] The party opposing the motion may not rest upon mere allegations or denials of the pleadings, "but must set forth specific facts showing that there is a genuine issue for trial." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 256, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. *See also* *Ridgewood Bd. of Educ. v. N.E. for M.E., 172 F.3d 238, 252 (3d Cir. 1999)* ("Speculation and conclusory allegations do not satisfy [the nonmoving party's] duty.").

HN5[] "'A nonmoving party has created a genuine issue of material fact if it has provided sufficient evidence to allow a jury to find in its **[*54]** favor at trial.'" *Med Alert, 2007 U.S. Dist. LEXIS 57083, 2007 WL 2297335 at *3* (quoting *Gleason v. Norwest Mortg., Inc., 243 F.3d 130, 138 (3d Cir. 2001))*. *See also* *Dasrath v. Continental Airlines, Inc., 467 F. Supp. 2d 431, 443 (D.N.J. 2006)* ("A dispute is 'genuine' if 'the evidence is such that a reasonable jury could return a verdict for the non-moving party.'") (quoting *Anderson, 477 U.S. at 248*). In addition, ***HN6***[] "[a] fact is 'material' only if it might affect the outcome of the suit under the applicable rule of law." *Id.*

C. Traditional Antitrust Analysis

HN7[] *Section 1* of the Sherman Act declares that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is . . . illegal." *15 U.S.C. § 1*. It is well-settled, however, that this provision outlaws only unreasonable restraints of trade. *See* *State Oil v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. In order to determine whether an "unreasonable restraint" of trade has taken place, courts have traditionally used one of two different analyses: the *per se* rule and the rule of reason. *See* *State Oil Co., 522 U.S. at 10*.

HN8[] The *per se* analysis applies only under circumstances where courts **[*55]** have previously considered the type of conduct and found that its expected effects are overwhelmingly anticompetitive and have little prospect of yielding any pro-competitive benefit. *Id.* For a *per se* analysis to apply, the courts must have adequate judicial experience with the type of conduct at issue and must have found that it yields anticompetitive effects in the vast majority of cases (almost one-hundred percent of the time). *See* Herbert Hovenkamp, *Sensible Antitrust Rules for Pharmaceutical Competition, 39 U.S.F. L. Rev. 11, 19-20*. Under the *per se* approach, a court can condemn the action as a *per se* illegal restraint on trade "without elaborate inquiry into the defendant's market power, the actual anticompetitive effects of the restraint in a particular case, or the rationales offered for it." *Id. at 20*. The *per se* analysis applies to only a few types of conduct, including "naked" exit payments (those payments made solely to keep a competitor out of the market), market-division agreements, and price fixing. *Id. at 20-21*.

HN9[] In most cases, where the conduct is not so clearly anticompetitive, courts use the rule of reason analysis. Further, courts have begun to realize that categorization **[*56]** of conduct often is not clear cut, *id. at 20-21*, and that "[t]here is always something of a sliding scale in appraising reasonableness." *Cal. Dental Ass'n v. Fed. Trade Comm'n, 526 U.S. 756, 780, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*. In the rule of reason analysis, "'the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.'" *In re Tamoxifen Citrate Antitrust Litig., 466 F.3d 187, 201 n.13 (2d Cir. 2006)*, *cert. denied sub. nom., Joblove v. Barr Labs, Inc., 551 U.S. 1144, 127 S.Ct. 3001, 168 L. Ed. 2d 726 (2007) ("Tamoxifen II")* (quoting *State Oil Co., 522 U.S. at 10*). [18]

HN10[] Courts have divided the rule of reason analysis into three parts, which involve burden-shifting between the two parties. First, the **[*57]** plaintiff must show that the conduct has produced adverse, anti-competitive effects within the relevant market. *U.S. v. Brown Univ., 5 F.3d 658, 668 (3d Cir. 1993)*. *See also Tamoxifen II, 466 F.3d at 201 n. 13*. If the plaintiff is able to prove this effect, then the burden shifts to the defendant, who must attempt to prove that the conduct "promotes a sufficiently pro-competitive objective." *Id. at 669*. If the defendant meets this standard, the burden then shifts back to the plaintiff to prove that the restraint is not reasonably necessary to achieve the pro-competitive objective. *Id.*

HN11[] In addition to the *per se* and rule of reason standards, a third type of analysis has evolved: the "quick look" or "truncated rule of reason." *See Fed. Trade Comm'n v. Ind. Fed'n of Dentists, 476 U.S. 447, 459, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*. The truncated rule of reason analysis permits the plaintiff to shift the burden to the defendant more quickly, once the plaintiff has shown that the defendant has engaged in conduct similar to those practices falling into the per se category, e.g., restraints on price, output or customers. *Id.* The plaintiff need not establish the relevant market or the defendant's market power, but the defendant **[*58]** has the opportunity to demonstrate pro-competitive justifications and efficiencies. *Id.*

D. Analyses Applied By Other Courts to "Reverse Payment" Settlements

To date, only a few courts have considered the issue of what analytical framework should be applied to antitrust claims involving reverse payment settlements of patent litigation by pioneer and generic drug companies. Although one Circuit Court has applied a *per se* analysis, the other courts that have considered this issue have adopted approaches that focus on the exclusionary scope of the patent at issue. The reasoning of these cases is summarized below.

1. The Sixth Circuit's *Per Se* Analysis

The Sixth Circuit was the first federal appellate court to consider the legality of a settlement involving a reverse payment. *In re Cardizem CD Antitrust Litig., 332 F.3d 896 (6th Cir. 2003)*, *cert. denied, 543 U.S. 939, 125 S. Ct. 307, 160 L. Ed. 2d 248 (2004)*. In that case, the brand name drug maker, Hochst Marion Roussel ("HMR"), manufactured and sold the drug Cardizem CD. *Id. at 901*. HMR's original patent for the active ingredient of Cardizem CD expired in late 1992. *Id.* In September 1995, a generic manufacturer, Andrx, Inc., filed an ANDA and submitted a Paragraph IV certification, **[*59]** stating that its drug did not infringe the patents covering Cardizem. *Id. at 902*. As the first ANDA filer, Andrx was eligible for the 180-day exclusivity period. *Id.* In November 1995, HMR received a new patent for Cardizem CD's "dissolution profile." *Id.* In January 1996, HMR sued Andrx for patent infringement, thus triggering the 30-month stay of FDA approval of Andrx's ANDA. *Id.* In September 1997, the FDA tentatively approved Andrx's ANDA, indicating that it would be finally approved upon the expiration of the stay or a court ruling of non-infringement. *Id.*

Shortly after the FDA granted tentative approval, HMR and Andrx entered into the agreement that was at issue in the case. *Id.* Among its terms, the agreement provided that Andrx would not market a generic version of Cardizem CD until the earliest of: (1) a final, unappealable determination in favor of Andrx in the infringement case; (2) HMR and Andrx entering into a license agreement; or (3) HMR entering into a license agreement with a third party. *Id.* Andrx further agreed not to "relinquish or otherwise compromise" its right to the 180-day exclusivity period. *Id.* In

[18] The opinion in *Tamoxifen II* amended and superseded *In re Tamoxifen Citrate Antitrust Litig., 429 F.3d 370 (2d Cir. 2005)* ("*Tamoxifen I*"). *Tamoxifen II* predominantly made changes and corrections to the citations in the *Tamoxifen I* opinion, but did not modify the court's analysis or holding.

exchange, HMR agreed to make quarterly payments of $ 10 million **[*60]** to Andrx beginning on the date its ANDA received final FDA approval. *Id.*

On July 9, 1998, the FDA approved Andrx's ANDA, and HMR began making quarterly payments to Andrx. *Id. at 903*. Only in June 1999, after the FDA approved a reformulated generic version submitted by Andrx, did the two companies terminate their agreement and enter into a final settlement of the patent infringement suit. *Id.* At the time of the settlement, HMR made a further payment of $ 50.7 million to Andrx, bringing the total payments to more than $ 89 million. *Id.* On June 23, 1999, Andrx began marketing its generic product, triggering its 180-day exclusivity period. *Id.*

The court found that the parties' agreement was "at its core, a horizontal agreement to eliminate competition" and, thus, "a classic example of a *per se* illegal restraint of trade." *Id. at 908*. In finding the agreement *per se* illegal, the Sixth Circuit appeared particularly troubled by the fact that HMR's agreement with Andrx effectively used the 180-day exclusivity period to delay the entry of other generic competitors. In this regard, the court noted:

> By delaying Andrx's entry into the market, the Agreement also delayed the entry of other generic **[*61]** competitors, who could not enter the market until the expiration of Andrx's 180 period of exclusivity, *which Andrx had agreed not to relinquish or transfer.*

Id. at 907 (emphasis added).

2. The Eleventh Circuit Approach in *Valley Drug* and *Schering v. FTC*

(a) *Valley Drug*

Three months after the *Cardizem* decision, the Eleventh Circuit reached a different result in the case of *Valley Drug Co. v. Geneva Pharms., Inc., 344 F.3d 1294 (11th Cir. 2003)*. *Valley Drug* involved separate settlement agreements between Abbott Laboratories and two generic competitors, Geneva Pharmaceuticals and Zenith Goldine Pharmaceuticals, which had filed ANDAs challenging Abbot's patents relating to Hytrin, a brand name hypertension drug marketed by Abbott since 1987. [19] *Valley Drug, 344 F.3d at 1298*. Abbott filed suit against Geneva alleging infringement of its '207 Patent. *Id. at 1299*. In the suit, Geneva admitted infringement but asserted that Abbott's patent was invalid. *Id.* Zenith filed its own lawsuit against Abbott seeking delisting of the '207 Patent and another Abbott patent (from the Orange Book), and requesting a declaratory judgment that its generic product did not infringe the two patents. *Id.* Abbott asserted **[*62]** counterclaims for infringement against Zenith. *Id.*

Abbott entered into an agreement with Zenith on March 31, 1998 and with Geneva one day later. The Zenith Agreement included the following terms: (1) both parties dropped their lawsuit claims; (2) Zenith acknowledged the validity of Abbott's patents and admitted that any generic terazosin product it might market would infringe those patents; (3) Abbott agreed to make quarterly payments of $ 6 million dollars to Zenith until March 1, 2000 or the termination of the agreement; (4) Zenith agreed not to market any product containing terasozin hydrochloride until Abbott's '207 patent expired on February 17, 2000; and (5) Zenith agreed not to transfer any of its ANDA rights, including the 180-day exclusivity period it earned as the first ANDA filer. *Id. at 1300*.

Similarly, under the terms of the Geneva Agreement: (1) Abbott agreed to pay Geneva $ 4.5 million per month until another manufacturer brought a terazosin product to market, or Abbott **[*63]** won the '207 patent infringement suit; (2) Geneva agreed not to market any terazosin product until a second patent expired in February 2000 or until it obtained a court judgment of non-infringement or invalidity in the '207 patent infringement suit; (3) Geneva agreed not to transfer its rights under the ANDA, including its 180-day exclusivity period; and (4) Geneva agreed to challenge any subsequent ANDA filer's attempt to enforce the "successful defense" requirement. *Id.* On September 1, 1998, the district court hearing Abbott's infringement suit against Geneva declared the '207 Patent invalid. *Id. at*

[19] Abbott had multiple patents relating to terazosin hydrochloride, the active ingredient in Hytrin. *Id.* The patents covered various forms of the terazosin hydrochloride compound and methods for using it. *Id.*

1301 (citing Abbott Labs. v. Geneva Pharms., Inc., 1998 U.S. Dist. LEXIS 13864, 1998 WL 566884 (N.D. Ill. Sept. 1, 1998)). That decision was affirmed by the Federal Circuit, and Abbott's petition for certiorari was denied. *Id.* (citing 182 F.3d 1315 (Fed. Cir. 1999) and *528 U.S. 1078, 120 S. Ct. 796, 145 L. Ed. 2d 671 (2000))*.

In the subsequent private antitrust action, the Eleventh Circuit reversed the district court's decision granting summary judgment against the defendants. [20] Valley Drug, 344 F.3d at 1295. The Eleventh Circuit concluded that the district court misapplied the law when it found the agreements to be *per se* antitrust violations. Id. at 1295. **[*64]** The court reasoned that the "exclusionary potential of the ['207] patent" shielded the agreements' effects from *per se* antitrust evaluation. Id. at 1311. Thus, because the '207 patent would not expire until 2014, the effect of the agreements on competition was "no broader than the potential exclusionary effect of the '207 patent, and was actually narrower to the extent [they] permitted Zenith [and Geneva] to market [their] drug[s] before the '207 patent expired." Id. at 1305.

While the court noted that the agreements resembled a horizontal **[*65]** market allocation, it recognized that the patent rights held by Abbott changed the evaluation. Id. at 1304. The court emphasized that the patent grant involves the right to exclude, which can lead to lawful agreements allocating the market geographically or by customer type. Id. at 1304. The court concluded that the district court erred when it focused on market allocation without considering the lawful exclusionary rights granted to Abbott under the '207 Patent. Id. at 1305.

The court further concluded that it was inappropriate to analyze the agreements under a traditional rule of reason framework because "the anticompetitive effects of exclusion cannot be seriously debated." at 1311. Rather, the court reasoned, a threshold analysis of the exclusionary scope of the patent must precede any specific antitrust inquiry. Id. at 1312. If the terms of the agreements are found to have effects "beyond the exclusionary effects of Abbott's patent," they "may then be subject to traditional antitrust analysis to assess their probable anticompetitive effects in order to determine whether those provisions violate § 1 of the Sherman Act." *Id.*

The court identified a number of factors influencing its **[*66]** reasoning. First, it emphasized the competing regimes of patent and ***antitrust law***. Id. at 1305-06. Second, the fact that the '207 patent subsequently was found to be invalid was not dispositive. Id. at 1308. Rather, the court concluded, the "reasonableness of agreements under the antitrust laws are to be judged at the time the agreements are entered into." Id. at 1306 (citing Polk Bros. v. Forest City Enters., 776 F.2d 185, 189 (7th Cir. 1985); SCM Corp. v. Zerox Corp., 645 F.2d 1195, 1209 (2d Cir. 1981)). Third, noting the "important role played by settlement in the enforcement of patent rights," the court rejected the notion that the mere existence or substantial size of a reverse payment was sufficient to trigger *per se* illegality, especially where the lack of any damages reduces the risk for the generic manufacturers in the infringement suit. Id. at 1309-10 (citing In re Ciprofloxacin Hydrochloride Antitrust Litig., 261 F. Supp. 2d 188, 251-52 (E.D.N.Y. 2003) ("*Cipro I*") (discussing the asymmetries of litigation risk create by Hatch-Waxman and rejecting argument that payments from the patentee to the infringer are subject to *per se* antitrust analysis)).

(b) *Schering v. FTC*

In Schering's **[*67]** appeal of the *Schering-FTC* decision, the Eleventh Circuit reversed the FTC and reaffirmed the reasoning first set forth in Valley Drug. Schering, 402 F.3d 1056. The court restated its view that "neither the rule of reason nor the *per se* analysis is appropriate in this context." Id. at 1065. Recognizing the tension between the antitrust and patent laws, the court observed:

> By their nature, patents create an environment of exclusion, and consequently, cripple competition. the anticompetitive effect is already present. "What is required here is an analysis of the extent to which antitrust

---

[20] On remand, the district court still applied a *per se* analysis and found the agreements at issue in *Valley Drug* to be *per se* illegal. *See* In re Terazosin Hydrochloride Antitrust Litig., 352 F. Supp. 2d 1279 (S.D. Fla. 2005). However, in its subsequent decision in *Schering,* the Eleventh Circuit found the agreements in *Valley Drug* to be "wholly different" from the Upsher and ESI Agreements. Schering, 402 F.3d at 1066, n.14. The court noted that the "critical difference" is that the agreements in *Valley Drug* did not involve final settlements of the patent litigation, and did not permit the generic company to market its product before patent expiration. *Id.*

> liability might undermine the encouragement of innovation and disclosure, or the extent to which the patent laws prevent antitrust liability for such exclusionary effects."

Schering 402 F.3d at 1065-66 (quoting *Valley Drug, 344 F.3d at 1311, n.27*). Clarifying the standard it adopted in *Valley Drug,* the court explained that "the proper analysis of antitrust liability requires an examination of: (1) the scope of the exclusionary potential of the patent; (2) the extent to which the agreements exceed that scope; and (3) the resulting anticompetitive effects." *Id. at 1066*. Applying the foregoing analysis to **[*68]** the Upsher and ESI agreements, the Eleventh Circuit found them well within the scope of the patent and thus legal patent settlements.[21] *Id. at 1076*. In reaching this conclusion, the court emphasized the fact that the agreements permitted Upsher to enter the market more than five years before the '743 Patent expired, and ESI to enter the market more than two years before the expiration of the patent. *Id. at 1067-68*. The court further noted that "there has been no allegation that the '743 patent itself is invalid or that the resulting infringement suits against Upsher and ESI were 'shams.'" *Id. at 1068*. The court rejected the FTC's contention that, absent the payments to Upsher and ESI, the parties could have "simply compromised" on earlier entry dates. Finding no evidence in the record to support this conclusion -- which the court viewed as "somewhat myopic" -- the court reasoned:

> It is uncontested that parties settle cases based on their perceived risk of prevailing in and losing the litigation. Pre-Hatch-Waxman, Upsher and ESI normally would have had to enter the market with their products, incurring the costs of clinical trials, manufacturing and marketing. This market entry would **[*69]** have driven down Schering's profits, as it took sales away. As a result, Schering would have sued ESI and Upsher, seeking damages for lost profits and willful infringement. . . .
>
> By contrast, the Hatch-Waxman Amendments grant generic manufacturers standing to mount a challenge without incurring the cost of entry or risking enormous damages flowing from any possible infringement. *See In re Ciprofloxacin Hydrochloride Antitrust Litig., 261 F. Supp. 2d 188, 251 (E.D.N.Y. 2003)*. Hatch-Waxman essentially redistributes the relative risk assessments and explains the flow of settlement funds and their magnitude. *Id.* Because of the Hatch-Waxman scheme, ESI and Upsher gained considerable leverage in patent litigation: the exposure to liability amounted to litigation costs, but paled in comparison to the immense volume of generic sales and profits. This statutory scheme could then cost Schering its patent.
>
> By entering into the settlement agreements, Schering realized the full potential of its infringement suit -- a determination that the '743 patent was valid and that ESI and Upsher would not infringe in the future. Furthermore, although ESI and Uphser obtained less than they what they would have **[*70]** received from successfully defending the lawsuits (the ability to immediately market their generics), they gained more than if they had lost. A conceivable compromise, then, directs the consideration from the patent owner to the challengers. *Id.*

Schering, 402 F.3d at 1074.

Noting the "private and social benefits" of settlements in avoiding the "the inveterate and costly effects of litigation," the court reiterated its view that neither the presence of a reverse payment, nor its size, should "dictate the availability of a settlement remedy." *Id. at 1075* (citing D. Crane, *Exit Payments in Settlement of Patent Infringement Lawsuits; Antitrust Rules and Economic Implications,* 54 Fla. L. Rev. 747, 760 (2002)). The court further reasoned that "[a]n exception cannot lie, as the [FTC] might think, when the issue turns on validity (*Valley Drug*) as opposed to infringement (the Schering agreements)." *Id. at 1075-76*.

3. The Second Circuit's *Tamoxifen* [*71] Decision

[21] The Eleventh Circuit also rejected the FTC's conclusion that the Niacor license was not worth $ 60 million, but was a payment to keep Upsher off the market, and stated that the FTC's conclusion was "not supported by law or logic." *Id. at 1070*.

In *Tamoxifen II,* the Second Circuit considered a "reverse payment" settlement between the pioneer drug company, Zenica, [22] and generic manufacturer Barr Laboratories. [23] *Tamoxifen II, 466 F.3d at 190*. Zeneca held the patent rights to and manufactured tamoxifen citrate, a leading breast cancer drug. *Id. at 193*. Barr filed an ANDA for a generic version of tamoxifen, which it amended in 1987 to include a Paragraph IV certification. *Id.* After Zeneca timely sued Barr and Barr's raw material supplier for patent infringement, the district court declared Zeneca's patent invalid based on its conclusion that Zeneca deliberately withheld information from the PTO. *Id.* Zeneca appealed the invalidity decision, and in 1993, while the appeal was pending, the parties entered into a settlement agreement. *Id.*

Under the agreement's principal terms: (1) Barr agreed not to market its generic version of tamoxifen until Zeneca's patent expired in 2002 and thus amended its ANDA to a Paragraph III certification; (2) Barr received a non-exclusive license to sell tamoxifen tablets manufactured by Zeneca under Barr's own label; (3) Zeneca agreed to pay Barr $ 21 million plus an additional $ 45 million over ten years to Barr's raw material supplier; and (4) the parties agreed that if Zeneca's patent were subsequently declared invalid or unenforceable in a final, unappealable judgment, Barr would be allowed to revert to a Paragraph IV certification. *Id. 193-94*. In addition, pursuant to the settlement, the parties jointly moved for *vacatur* of the district court's patent invalidity judgment, which motion was granted by the Federal Circuit. *Id. at 194*.

The validity of Zeneca's patent was subsequently challenged by three other ANDA filers, all of whom were unsuccessful in their attempts to rely on the vacated invalidity judgment. *Id. at 195*. In each case, the court upheld the validity of Barr's patent. *Id.* In the meantime, the "successful defense" rule was invalidated, and **[*73]** Barr became eligible for the 180-day exclusivity period, which would only be triggered by Barr marketing its own generic version of tamoxifen. *Id. at 195-96*. In March 1999, the FDA confirmed Barr's entitlement to the exclusivity period. *Id. at 196*.

The private antitrust plaintiffs alleged that the settlement agreement unlawfully: (1) enabled Zeneca and Barr to "resuscitate" a patent that had been held invalid and unenforceable; (2) perpetuated Zeneca's monopolization of the tamoxifen market and allowed Zeneca and Barr to share the monopoly profits; and (3) maintained artificially high prices for tamoxifen and prevented competition from other generic manufacturers. *Id. at 196-97*.

The Second Circuit affirmed the district court's dismissal of the antitrust complaint and upheld the legality of the settlement. *Id. at 197-99*. In reaching its decision, the court noted the tension between the antitrust laws and an innovator's right under patent law to exclude competition. *Id. at 201*. The court further emphasized "our longstanding adherence to the principle that 'courts are bound to encourage' the settlement of litigation." *Id. at 202* (citing *Gambale v. Deutsche Bank AG, 377 F.3d 133, 143 (2d Cir. 2004)*. **[*74]** The court observed:

> It is well settled that '[w]here there are legitimately conflicting [patent] claims . . ., a settlement by agreement, rather than litigation, is not precluded by the [Sherman] Act," although such a settlement may ultimately have an adverse effect on competition. . . .
>
> Rules severely restricting patent settlements might also be contrary to the goals of the patent law because the increased number of continuing lawsuits that would result would heighten the uncertainty surrounding patents and might delay innovation.

Id. (quoting *Standard Oil Co. v. United States, 283 U.S. 163, 171, 51 S. Ct. 421, 75 L. Ed. 926 (1931)* (other citations omitted).

---

[22] Zeneca refers collectively to Imperial Chemical Industries, PLC ("ICI") and its former subsidiaries, Zeneca, Inc., AstraZeneca Pharmaceuticals LP, and Astra Zeneca PLC, which succeeded to ICI's rights to the patent at issue. *Tamoxifen II, 466 F.3d at 190, 193*.

[23] The case was before the Second Circuit on plaintiffs' appeal of the district court's dismissal of their antitrust claims pursuant **[*72]** to *Fed. R. Civ. P. 12(b)(6)*. *Id.*

The court also declined to find the settlements unlawful based on plaintiffs' contention that the Federal Circuit would have affirmed the invalidity of Zeneca's patent. *Id. at 203-05*. "We cannot judge this post-trial, pre-appeal settlement on the basis of the likelihood *vel non* of Zeneca's success had it not settled but rather pursued its appeal." *Id. at 203* (citing, *inter alia, Asahi Glass Co. v. Pentech Pharms., Inc., 289 F. Supp. 2d 986, 993 (N.D. Ill. 2003)* (Posner, J., sitting by designation) ("No one can be *certain* that he will prevail in a patent suit."); **[*75]** *In re Ciprofloxacin Hydrochloride Anititrust Litig., 261 F. Supp. 2d 188, 200-01 (E.D.N.Y. 2003)* (noting that courts should not speculate about the outcome of litigation); *Valley Drug, 344 F.3d at 1306* ("[T]he reasonableness of agreements under the antitrust laws are to be judged at the time the agreements are entered into.")).

Citing with approval the reasoning of the courts in *Cipro I, Valley Drug, Schering,* and *Asahi Glass,* the court further held that the mere existence of a reverse payment, especially in the context of the Hatch-Waxman Act, is not enough to trigger *per se* unlawfulness. *Id. at 205-6* (citing *Valley Drug, 344 F.3d at 1309*; *Asahi Glass, 289 F. Supp. 2d at 994*; *Cipro I, 261 F. Supp. 2d at 252*; *Schering, 402 F.3d at 1074*). While the court acknowledged that reverse payments may seem "suspicious," it reasoned that this "suspicion abates upon reflection." *Id. at 208*. Rather, the court held, "*so long as the patent litigation is neither a sham nor otherwise baseless,* the patent holder is seeking to arrive at a settlement in order to protect that to which it presumably entitled: a lawful monopoly." *Id. at 208-09* (emphasis added). In this sense, the settlement did not exceed **[*76]** the scope of the patent. *Id. at 209 n.22*.

The court also noted its general agreement with the Eleventh Circuit regarding the importance of analyzing the scope of the patent, and concluded: "Whatever damage is done to competition by settlement is done pursuant to the monopoly extended to the patent holder by patent law unless the terms of the settlement enlarge the scope of that monopoly." *Id. at 212*. The court agreed that "'[u]nless and until the patent is shown to have been procured by fraud, or a suit for its enforcement shown to be objectively baseless, there is no injury to the market cognizable under existing ***antitrust law***, as long as competition is restrained only within the scope of the patent.'" *Id. at 213* (quoting *In re Ciprofloxacin Hydrochloride Antitrust Litig., 363 F. Supp. 2d 514, 535 (E.D.N.Y. 2005)* ("*Cipro II*").

4. *In re Cipro*

On October 15, 2008, the Federal Circuit Court of Appeals affirmed the district court's decision in *Cipro II* granting summary judgment in favor of the defendants. *In re Ciprofloxacin Hydrochloride Antitrust Litig., 544 F.3d 1323, (Fed. Cir. 2008)* ("*Cipro III*"). The facts of the *Cipro* case are generally similar to those of the cases discussed above. **[*77]** Bayer held a patent for the active ingredient in the branded drug Cipro, which patent had an expiration date of December 9, 2003. *Id. at 1327-28*. In 1991, Barr Labs, Inc. filed an ANDA with a paragraph IV certification for a generic version of Cipro. *Id. at 1328*. Thereafter, Bayer sued Barr for patent infringement. *Id.*

Shortly before trial, Bayer entered into settlements with Barr and other generic manufacturers. Pursuant to Bayer's settlement with Barr, Barr agreed to convert its paragraph IV ANDA to a paragraph III ANDA, thus certifying that it would not market its generic version of Cipro until after Bayer's patent expired. *Id. at 1328-29*. In exchange, Bayer agreed to make a settlement payment of $ 49.1 million to Barr. *Id. at 1329*. Under a separate "Cipro Supply Agreement," Bayer agreed to either supply Barr with Cipro for resale or make quarterly payments to Barr until December 31, 2003. *Id.* Barr, in turn, agreed not to manufacture, or have manufactured, a generic version of Cipro in the United States. *Id.* Beginning at least six months before the expiration of Bayer's patent, Bayer agreed to allow Barr to sell a competing ciprofloxacin product. *Id.* Bayer and Barr then entered into **[*78]** a consent judgment under which Barr affirmed the validity and enforceability of Bayer's patent and admitted infringement. *Id.*

In the subsequent antitrust action brought by indirect and direct purchasers, the district court granted summary judgment in favor of defendants. *Id. at 1329* (citing *Cipro II, 363 F. Supp. 2d at 548*). Using a rule of reason analysis, the district court first determined that the relevant market was ciprofloxacin and that Bayer had market power within that market. *Id. at 1330*. The court then concluded that "any adverse effects on competition stemming from the Agreements were within the exclusionary zone of [Bayer's patent], and hence could not be redressed by ***antitrust law***." *Id.* Having determined that there was no evidence that the Agreements "created a bottleneck on challenges to [Bayer's patent] or otherwise restrained competition beyond the scope of the patent," the district court concluded that the plaintiffs had failed to show that the Agreements had an anticompetitive effect beyond that authorized by the patent. *Id.*

Affirming the district court, the Federal Circuit distinguished the Sixth Circuit's decision in *Cardizem* and stated:

> We find . . . the district **[*79]** court's analysis to be sound. . . .[T]he district court applied a rule of reason analysis in assessing the lawfulness of the Agreements. In that analysis, it considered whether there was evidence of sham litigation or fraud before the PTO, and whether any anticompetitive effects of the Agreements were outside the exclusionary zone of the patent. The application of a rule of reason analysis to a settlement agreement involving an exclusion payment in the Hatch-Waxman context has been embraced by the Second Circuit, and advocated by the FTC and the Solicitor General. And, although the Sixth Circuit found a per se violation of the antitrust laws in *In re Cardizem,* the facts of that case are distinguishable from this case and from the other circuit court decisions. In particular, the settlement in that case included, in addition to a reverse payment, an agreement by the generic manufacturer to not relinquish its 180-day exclusivity period, thereby delaying the entry of other generic manufacturers. *In re Cardizem, 332 F.3d at 907*. Furthermore, the agreement provided that the generic manufacturer would not market non-infringing versions of the generic drug. *Id. at 908 n. 13*. Thus, the agreement **[*80]** clearly had anticompetitive effects outside the exclusion zone of the patent. [citation omitted] To the extent that the Sixth Circuit may have found a per se antitrust violation based solely on the reverse payments, we respectfully disagree.

Id. at 1335.

Citing with approval the approaches adopted by the Eleventh and Second Circuits, the Federal Circuit concluded:

> [I]n cases such as this, wherein all anticompetitive effects of the settlement are within the exclusionary power of the patent, the outcome is the same whether the court begins its analysis under ***antitrust law*** by applying a rule of reason approach to evaluate the anti-competitive effects, or under patent law by analyzing the right to exclude afforded by the patent. The essence of the inquiry is whether the agreements restrict competition beyond the exclusionary zone of the patent. This analysis has been adopted by the Second and Eleventh Circuits and by the district court below and we find it to be completely consistent with Supreme Court precedent.

Id. at 1336 (citing *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 175-77, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)* (holding that there may be a violation of the Sherman Act when a patent is **[*81]** procured by fraud, but recognizing that a patent is an exception to the general rule against monopolies). The court further noted its agreement with the Second and Eleventh Circuits that "in the absence of evidence of fraud before the PTO or sham litigation, the court need not consider the validity of the patent in the antitrust analysis of a settlement agreement involving a reverse payment." *Id.*

E. Framework Applicable to the Upsher and ESI Settlements

Having considered the analyses of the cases summarized above, I first conclude that the Upsher and ESI settlements were not *per se* unlawful. DP Plaintiffs' arguments that a *per se* approach is consistent with "traditional antitrust principles" and the legislative purpose of the Hatch-Waxman Act ignore the important purpose underlying the exclusionary rights granted by patent law. *See* *Tamoxifen, 429 F.3d at 385*; *Cipro III, 544 F.3d at 1333*. Moreover, with the sole exception of the *Cardizem* case, all of the courts that have considered so-called "reverse payment" settlements, as well as the FTC, have declined to apply a *per se* analysis. *See* *Valley Drug, 344 F.3d at 1304*; *Schering, 402 F.3d at 1065*; *Tamoxifen II, 466 F.3d at 206*; *Schering-FTC, 2003 FTC LEXIS 187, at *13, 22-27*. **[*82]** *But see* *In re Cardizem, 332 F.3d at 908*. To the extent that the *Cardizem* court reached a contrary conclusion, the facts of that case are distinguishable.

Unlike the interim settlement in *Cardizem,* Schering's settlements in this case finally resolved its litigation with Upsher and ESI. Moreover, the settlement agreements in this case permitted the Upsher and ESI generic products to enter the market five years and almost three years, respectively, before the expiration of Schering's '743 Patent. Finally, the agreements in this case did not manipulate the 180-day exclusivity period to create a "bottleneck" precluding the entry of other generic drugs. Upsher's settlement with Schering did not preclude Upsher from transferring or relinquishing the 180-day exclusivity and, because the "successful defense" requirement was in place at the time of the settlement, Upsher arguably was not entitled to the exclusivity period.

I further decline to adopt the "FTC/Hovenkamp" framework proposed by DP Plaintiffs, and note that Plaintiffs have not cited -- nor am I aware of -- any case that has applied this legal framework. The standard articulated by the FTC treats settlements involving reverse payments **[*83]** as presumptively anticompetitive, but purports to allow rebuttal of that presumption with a showing of the pro-competitive effect of the settlement. *Schering-FTC, 2003 FTC LEXIS, at *57-58*. However, the order entered by the FTC prohibited settlements in which the generic company "receives anything of value," with an exception for payments, limited to $ 2 million, linked to litigation costs. *Id. at *176*. Similarly, the framework suggested by Professor Hovenkamp applies a rebuttable presumption of illegality, which the infringement plaintiff can rebut by showing both "(1) that the *ex ante* likelihood of prevailing in the infringement lawsuit is significant, and (2) that the size of the payment is no more than the expected value of the litigation and collateral costs attending the lawsuit." *See* Herbert Hovenkamp et al., Anticompetitive Settlement of Intellectual Property Disputes, *87 Minn. L. Rev. 1719, 1759 (2003)* (emphasis added).

Similar to a *per se* analysis, the FTC/Hovenkamp framework effectively discounts the fact that Schering's '743 Patent gave it the right to exclude infringing competitors. Moreover, it essentially requires a presumption that if the patent holder pays money to **[*84]** the generic company, the patent at issue must be either invalid or not infringed. In my view, the weight of authority counsels against adopting such a presumption. *See, e.g., Schering, 402 F.3d at 1066* (noting presumption of patent validity); *Tamoxifen, 466 F.3d at 208-09*; *Cipro II, 363 F. Supp. 2d at 534-35* (declining to infer invalidity based on reverse payment).

I recognize that in this case, the key disputed issues in the patent case involved infringement, rather than validity. In this regard, DP Plaintiffs note that although patents are presumptively valid by statute; *see* *35 U.S.C. § 282*, there is no corresponding presumption of infringement. *See* Framework Mem., p. 11. Thus, according the DP Plaintiffs, the probabilistic nature of patents is particularly relevant. *Id.* DP Plaintiffs further contend that Schering's payments to Upsher and ESI are *prima facie* evidence that the parties expected the litigation to result in more competition than was provided for under the settlement agreements. Plaintiffs' arguments are unpersuasive. Although there is no presumption of infringement, neither is there a statutory presumption that Schering's patent was not infringed. *See* *Schering-FTC, 2003 FTC LEXIS 187, at * 61* **[*85]** ("We cannot assume that Schering had a right to exclude Upsher's generic competition for the life of the patent any more than we can assume that Upsher had the right to enter earlier.") (emphasis added).

Accordingly, I decline to discount the exclusionary power of Schering's patent based on the *possibility* that it was not infringed by the Upsher and ESI products. *See* *Cipro II, 363 F. Supp. 2d at 514 and n. 19* (rejecting argument that exclusionary power of the patent should be discounted by the probability of an invalidity finding, and noting the applicability of its analysis to cases in which infringement is the dominant issue); *Tamoxifen, 466 F.3d at 211-12* (citing *Cipro II, supra*); *Asahi Glass, 289 F. Supp. 2d at 992-93* (***HN12***[] "It is not 'bad faith' to assert patent rights that one is not certain will be upheld in a suit for infringement pressed to judgment and to settle the suit to avoid risking the loss of the rights. No one can be *certain* that he will prevail in a patent suit."). In addition, I conclude that it is inappropriate to conduct an *ex post* inquiry into infringement issues that were resolved by the parties' settlement. As the *Cipro II* court observed regarding issues of patent **[*86]** validity, "[s]uch an inquiry would undermine any certainty for patent litigants seeking to settle their disputes." *Cipro II, 363 F. Supp. 2d at 530*. *See also* *Schering, 402 F.3d at 1072-73* (noting ***HN13***[] public policy favoring settlement of patent disputes); *Schering-FTC, 2003 FTC LEXIS 187, at *60* (expressing concern that "a mandated inquiry into [the merits of the patent case], as part of an antitrust review, would ultimately have a chilling effect on the efficient settlement of patent litigation").

Finally, I reject DP Plaintiffs' suggestion that Judge Greenaway previously weighed and rejected the analytical framework that has now been adopted by the Second, Eleventh and Federal Circuits. In his Sept. 29, 2004 opinion, Judge Greenaway denied Defendants' 12(b)(6) motion to dismiss, finding, *inter alia,* that Plaintiffs' had adequately *alleged* anti-competitive conduct. As summarized by Judge Greenaway, Defendants had argued that:

> Plaintiffs fail to allege that Defendants engaged in anti-competitive behavior by entering into the settlement agreements. [Defendants] argue that Plaintiffs have not established anti-competitive behavior because the settlement agreements in question do not have an **[*87]** anti-competitive effect. Rather, the settlement agreements are pro-competitive because they allowed Upsher and ESI to enter the market years before Schering's K-Dur patent expired, and such agreements, as a matter of law, are not antitrust violations. By not alleging that the settlements do not reasonably reflect the objective merits of the patent suits, or that Upsher or ESI would have won the patent suit, Plaintiffs have not stated anti-competitive behavior, and thus have no claim.

In re K-Dur, 338 F. Supp. 2d 517, 530-31. Defendants further argued that the settlements (and the payments by Schering allegedly for delay) could not be anti-competitive because Schering had a valid patent and, thus, was entitled to exclude generic competitors until the patent expired. Thus, according to Defendants, absent an allegation of patent invalidity or non-infringement, the entry dates in the agreement are beyond attack. *Id. at 531*.

Contrary to DP Plaintiffs' suggestion, Judge Greenaway did not decide that the framework DP Plaintiffs' now propose (or any other framework) would apply beyond the pleading stage, *i.e.,* at dispositive motions or trial. On the contrary, in denying Defendants' Motion to **[*88]** Dismiss, he stated that "[i]n this Court's view Plaintiffs can sustain a claim of anti-competitive conduct simply by *alleging* facts which show that the outcome of the settlement agreements would have been more pro-competitive absent the cash payments from Schering to Upsher and ESI." [24] *Id. at 532* (emphasis added). Moreover, Judge Greenaway noted the different standards that had been applied by the Sixth Circuit in *Cardizem* (reverse payments *per se* illegal) and the 11th Circuit in *Valley Drug* (rejecting *per se* approach), and expressly stated that he did not need to address whether Defendants' alleged conduct was *per se* illegal. *Id. at 533*. Further, although he noted that the FTC had found the Defendants' conduct unlawful and stated that the FTC's findings were "of some interest," he also stated that the FTC's findings were not binding, and he did not adopt the standard used by the FTC in its analysis.

Finally, Judge Greenaway's decision was issued in 2004, before the 11th Circuit's decision in *Schering* and before the decisions of the Second and Federal Circuits following the 11th Circuit approach. Thus, the Circuit Court case law regarding the appropriate analytical framework has developed significantly since Judge Greenaway decided Defendants' motion to dismiss in 2004.

In summary, I will not adopt the FTC/Hovenkamp framework, but, rather, will apply an analysis consistent with the approach that has been adopted by the Second, Eleventh and Federal Circuits. Under that framework, as long as the Upsher and ESI settlements restrained competition only within the scope of Schering's patent, and the underlying patent lawsuits were not objectively baseless, **[*90]** Defendants are entitled to summary judgment on DP Plaintiffs' antitrust claims.

1. The Settlements Do Not Exceed the Exclusionary Scope of the '743 Patent

It is undisputed that the Schering's '743 Patent gave it the right to exclude infringing products until September 5, 2006. It is likewise undisputed that the Upsher Settlement permitted Upsher to market its generic product more than five years before the '743 Patent expired; and the ESI Settlement permitted ESI to market its generic product more than two years before the patent's expiration. Thus, with respect to the entry dates the parties agreed upon, the Upsher and ESI Agreements clearly were well within the exclusionary scope of the '743 Patent.

---

[24] As Judge Greenaway noted, his opinion addressed a *Rule 12(b)(6)* motion to dismiss and was decided under the framework of that rule, which treats all of Plaintiffs' allegations as true and draws all inferences in Plaintiffs' favor. *Id. at 527* (noting that Plaintiffs' alleged that but **[*89]** for the reverse payments, Upsher and ESI would have settled on different terms and entered the market sooner); 528 (noting the standard for 12(b)(6) and 12(c) motions); 529 (noting that there is no heightened pleading standard in antitrust cases); 533 (stating that Plaintiffs had sufficiently pled anti-competitive conduct and noting that, at pleading stage, court must consider defendants' pro-competitive justifications as unproven).

Having reviewed the Agreements and the record in this case, I further conclude that there is no evidence that any other aspects of the settlement exceeded the exclusionary scope of the '743 Patent. [25] In the Upsher Settlement, Upsher agreed not to market Klor-Con M20(c) or "any other sustained release microencapsulated potassium chloride tablet," prior to Sept. 1, 2001. DP Plaintiffs' contend that by virtue of the above-quoted language, the agreement precluded Upsher from marketing non-infringing **[*91]** products and exceeded the scope of the patent. I disagree. First, there is no evidence in the record that Upsher had developed or planned to develop and market "any other sustained release microencapsulated potassium chloride tablet." Absent evidence that any other such generic product existed or was contemplated by Upsher, there is simply no basis upon which to conclude that the terms of the Upsher Agreement exceeded the scope of the '743 Patent. Moreover, I note that in *Schering,* the Eleventh Circuit determined, on the record before it, [26] that the Upsher Agreement's restraint covering "sustained release microencapsulated potassium chloride tablet[s]" covered the "identical reach of the '743 patent" and was a lawful ancillary restraint. *Schering, 402 F.3d at 1072* (***HN14***[] "Ancillary restraints are generally permitted if they are 'reasonably necessary' toward the contract's objective of utility and efficiency.").

With respect to the ESI Agreement, DP Plaintiffs have not even argued that its terms exceed the exclusionary scope of the patent. Although the terms of the ESI Settlement included ESI's agreement not to conduct, sponsor or support an application for AB rating or equivalence study for a potassium chloride product with respect to K-Dur, ESI also expressly stated in the agreement that neither it nor any of its affiliates were developing, or planned or intended to develop any such product. Accordingly, as with the Upsher Settlement, there is no evidence that **[*93]** the ESI Agreement excluded any non-infringing products.

Finally, I reject DP Plaintiffs' argument in their '743 Motion that under the doctrine of prosecution history estoppel and the "All Elements Rule," the scope of the '743 patent cannot extend to exclude Upsher's generic product. The DPP's '743 Motion would require me not only to conduct a detailed inquiry into the merits of the patent case, but to decide the infringement issues that were resolved when Schering and Upsher settled. For the reasons discussed above regarding the analytical framework applicable to the Upsher and ESI Settlements, I decline to conduct such an inquiry. *See* *Cipro II, 363 F. Supp. 2d at 524-30* (reviewing refusals of courts and the FTC to undertake an after-the-fact inquiry into the merits of the patent issues in a settled case). To the extent that I consider the infringement issues raised by DP Plaintiffs, I do so only to determine whether Schering's patent lawsuits were objectively baseless.

2. Schering's Patent Infringement Lawsuits Against Upsher and ESI Were Not Objectively Baseless

Because I have concluded that the Upsher and ESI settlements did not exceed the exclusionary scope of the '743 Patent, DP **[*94]** Plaintiffs' antitrust claims fail unless they can show that Schering's patent litigation against Upsher and ESI was objectively baseless. [27] As set forth below, I conclude that DP Plaintiffs cannot satisfy the objectively baseless standard with respect to either of the patent lawsuits. ***HN15***[] In order to establish that Schering's patent lawsuits were objectively baseless, DP Plaintiffs must show that the lawsuits were "objectively baseless in the sense that no reasonable litigant could realistically expect success on the merits." *Professional Real Estate Investors, Inc. v. Columbia Pictures, Indus., Inc., 508 U.S. 49, 60, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* ("*PRE*"). If an objective litigant could conclude that the suit is reasonably calculated to elicit a favorable outcome,

---

[25] Contrary to DP Plaintiffs' argument, Judge Greenaway did not decide that the terms of the Upsher and ESI Settlements exceeded the exclusionary scope of Schering's patent. Rather, he merely concluded that Plaintiffs had *alleged* that the settlement agreements exceeded the scope of **[*92]** the patent. *In re K-Dur, 338 F. Supp. 2d at 532*.

[26] The record in *Schering* included the ALJ's factual finding that the quoted language was included in the settlement so that "Upsher-Smith could continue to market its Klor Con 8 and Klor Con 10 wax matrix tablets without any restrictions," and because "Schering wanted to prevent Uphser-Smith from simply renaming its Klor Con M 20 product to get around the language and intent of the settlement agreement." *Schering-ALJ, 2002 FTC LEXIS 40, at * 62-63* (P 158). The ALJ found that "no other restrictions on any of Uphser-Smith's other products were intended by the settlement agreements." *Id.*

[27] DP Plaintiffs do not contend that Schering's '743 Patent was procured by fraud on the PTO.

the suit is [not objectively baseless], and an antitrust claim premised on the sham exception must fail." *Id. See also* *Cheminor Drugs, Ltd. v. Ethyl Corp., 993 F. Supp. 271, 281 (D.N.J. 1998)* (Greenaway, J.) (case must be shown to have "absolutely no objective merit"), *aff'd, 168 F.3d 119 (3d Cir. 1999)*. Where there is no dispute over the "predicate facts" of the underlying lawsuit, the question of whether the suit was objectively baseless is a matter **[*95]** of law. *PRE, 508 U.S. at 63-64*. Predicate facts are the facts and circumstances that were available to the party that brought the underlying lawsuit. *PRE, 508 U.S. at 63* (citing *Nelson v. Miller, 227 Kan. 271, 607 P.2d 438, 444 (Kan. 1980)*. *See also* *In re Relafen Antitrust Litig., 346 F. Supp. 2d 349, 362 n. 7 (D. Mass. 2004)* (recognizing that probable cause is a question of law when the relevant predicate facts involve an unsettled condition of law).

HN16[] The party seeking to establish that a lawsuit was objectively baseless must do so with clear and convincing evidence. *C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1369 (Fed. Cir. 1998)*; *Handgards, Inc. v. Ethicon, Inc., 601 F.2d 986, 996 (9th Cir. 1979)*. "The U.S. Supreme Court has defined 'clear and convincing evidence' as evidence that places in the Court, as factfinder, an 'abiding conviction that the truth of its factual contentions are highly probable.'" *Bayer Schering Pharma AG v. Barr Laboratories, Inc., No. 05-cv-2308, 2008 U.S. Dist. LEXIS 15917, * 50* (quoting *Colorado v. New Mexico, 467 U.S. 310, 316, 104 S. Ct. 2433, 81 L. Ed. 2d 247 (1984)* (internal quotation marks omitted)). *See* ***[*96]*** *also A.K. Stamping Co., Inc. v. Instrument Specialties Co., Inc., 106 F. Supp. 2d 627, 639 n. 13 (D.N.J. 2000)* (Greenaway, J.) ("'Clear and convincing' falls between the 'reasonable doubt' standard governing criminal cases and the "preponderance of the evidence" standard typical of civil actions.").

(a) *The Upsher Case*

(i) *Prosecution History Estoppel*

DP Plaintiffs have argued that even if the objectively baseless standard applies, they have developed a record which establishes that it was virtually certain that Upsher would have won the patent case. DP Plaintiffs' principal argument is that Schering's primary infringement argument was legally baseless because, during prosecution of the '743 Patent, Schering amended its claims to require EC with a viscosity of "greater than 40 cp." Specifically, DP Plaintiffs note that during prosecution of the '743 patent -- in response to the examiner's rejection of its claims as obvious in light of the prior art -- Schering amended its claims to require an EC with a viscosity of "greater than 40 cp." Upsher's generic product, however, uses Ethocel 20, with a viscosity of 18-22 cp and, thus, did not literally infringe the '743 patent. Therefore, Schering **[*97]** could only claim infringement under the "doctrine of equivalents." According to DP Plaintiffs, however, having surrendered its claim to a product using EC with a viscosity of less than 40 cp, Schering was barred by the doctrine of prosecution estoppel from claiming that Upsher's product using Ethocel 20 was equivalent to Schering's product claimed in the '743 patent.

Defendants dispute DPPs' contention that Schering's reliance on the doctrine of equivalents was objectively baseless. In the patent lawsuit, Key conceded that it was estopped from claiming equivalency as to EC described in the prior art '399 Patent, which had a viscosity of 9-11 cp. Key contended, however, that under the applicable law, it was not estopped from claiming equivalency as to EC with a range between the 11 cp disclosed in the prior art and the 40 cp literally claimed in the '743 Patent. Upsher moved for summary judgment contending that Key's amendment of the patent to recite a viscosity of "greater than 40 cp," estopped Key from claiming equivalence as to any product with a viscosity lower than 40 cp.

Defendants note that at the time Schering filed its lawsuit against Upsher, Federal Circuit law imposed a "flexible **[*98]** bar" under which a claim amendment did not necessarily surrender all range of equivalency regarding the subject matter literally given up by the amendment. *See* *Hughes Aircraft Co. v. United States, 717 F.2d 1351, (Fed. Cir. 1983)*. However, shortly before the settlement, the Supreme Court issued a decision in the case of *Warner Jenkinson Co. v. Hilton Davis Chemical Co., 520 U.S. 17, 117 S. Ct. 1040, 137 L. Ed. 2d 146 (1997)*, which called into question the applicability and scope of the "flexible bar" rule. Thus, by the time of the settlement, the law regarding Schering's ability to rely on the doctrine of equivalents was unsettled. *See* *Festo Corp. v. Shoketsu Kinzoku Kogyo Kabushiki, 234 F.3d 558, 574 (Fed. Cir. 2000)* (noting inconsistency in rules as to the scope of prosecution history estoppel), *vacated on other grounds, 535 U.S. 722, 122 S. Ct. 1831, 152 L. Ed. 2d 944 (2002)*. *See also* *In re Wellbutrin SR Antitrust Litig., 2006 U.S. Dist. LEXIS 9687, at *24 (E.D. Pa. Mar. 9, 2006)* (noting that during the 1980s and 1990s, there were two conflicting approaches to prosecution history estoppel, "the more prevalent of which was known as the flexible bar rule, according to which the doctrine of prosecution history estoppel extends only to the subject matter **[*99]** . . . relinquished during the prosecution"). In view of the unsettled state of the law regarding prosecution estoppel at the time of the Upsher litigation and settlement, I conclude that Schering's equivalence argument can not be deemed objectively baseless. To be sure, Schering might have lost the argument had the case proceeded to a decision on summary judgment or at trial. In this regard, I note that at the summary judgment argument, Judge Walls expressed doubt about Schering's infringement claim in light of the claim amendment. However, the test is not whether Schering might have lost the patent suit; it is whether the suit was so objectively baseless "that no reasonable litigant could realistically expect success on the merits." *PRE, 508 U.S. at 60*. I conclude as a matter of law that DP Plaintiffs cannot satisfy that test.

(ii) *Other Equivalence and Inequitable Conduct Issues*

Finally, DP Plaintiffs argue that as a factual matter, Schering's argument in the patent case that the SMO in Upsher's product was equivalent to the HPC and PEG required by the '743 patent was objectively baseless. According to DP Plaintiffs, the facts show that: (1) Schering misrepresented the function of **[*100]** HPC and PEG as plasticizers; (2) Schering misrepresented the function of SMO as a plasticizer; and (3) Schering improperly ignored the principal function of HPC and PEG. DP Plaintiffs further argue that summary judgment should be denied so that a jury can consider the invalidity and unenforceability claims that Schering would have had to overcome to prevail on its infringement claim.

DP Plaintiffs' opposition to the Upsher Motion, and the parties' extensive recitations of the conflicting evidence in the patent case regarding these issues, foreclose any finding that Schering's lawsuit was objectively baseless. In particular, the issue of whether SMO was equivalent to HPC was hotly disputed in the patent case, with both sides offering expert opinion in support of their positions. In addition, as Defendants note, Upsher argued in the patent case that multiple fact disputes precluded summary judgment in favor of Key on Upsher's inequitable conduct claim. Because it is clear that there were genuine factual and legal disputes regarding Schering's claims in the patent lawsuit, DP Plaintiffs cannot establish that those claims were objectively baseless.

(b) *The ESI Case*

DP Plaintiffs have not **[*101]** argued, nor identified any evidence, that Schering's patent litigation against ESI was objectively baseless. Moreover, it is undisputed that ESI had problems demonstrating the bioequivalence of its product to K-Dur and that the FDA had twice rejected ESI's bioequivalence studies. Additional undisputed evidence reflects that Schering believed ESI did not have a viable product and that Schering settled under some pressure from the presiding court. *See Schering-FTC, 2003 FTC LEXIS 187, at *165* (acknowledging that "Schering was subject to intense, and perhaps unseemly, judicial pressure to settle the patent litigation, and [that] Schering may well have been concerned about its future litigation prospects if it resisted."). In sum, there is no evidence that Schering's lawsuit against ESI was objectively baseless, and, thus, Defendants are entitled to summary judgment on DP Plaintiffs' claims relating to the ESI Settlement.

IV. CONCLUSION

For the reasons set forth above, I conclude that Defendants' Motions for Summary Judgment as to DP Plaintiffs' claims relating to the Uphser and ESI Settlements should be granted. I further conclude that DP Plaintiffs' Motions for Partial Summary Judgment **[*102]** as to the Applicable Framework for Analysis of Exclusion Payments and as to the Exclusionary Scope of the '743 Patent should be denied.

As provided in the Order entered by Magistrate Judge Arleo in this matter, the Special Master's decision on any motion can be appealed to Judge Greenaway in the manner, and subject to the standards of review set forth in *Rule 53 of the Federal Rules of Civil Procedure* and applicable Local Rules.

STEPHEN M. ORLOFSKY

SPECIAL MASTER

ORDER

The Special Master having considered: (1) the Motion of Defendants Schering-Plough Corporation and Upsher-Smith Laboratories, Inc. (collectively, "Defendants") for Summary Judgment as to All Claims Brought By Direct Purchaser Plaintiffs ("DPPs") Related to the Upsher Settlement; (2) Defendants' Motion for Summary Judgment as to All Claims Brought By DPPs Related to the ESI Settlement; (3) DPPs' Motion for Partial Summary Judgment as to the Applicable Framework for Analysis of Exclusion Payments; and (4) DPPs' Motion for Partial Summary Judgment as to the Exclusionary Scope of the '743 Patent, the briefs submitted by all parties in support of and in opposition to **[*103]** the Motions, and the oral argument of counsel, for the reasons set forth in the foregoing Amended Report and Recommendation;

IT IS HEREBY ORDERED, this 6th day of February, 2009, that:

(1) Defendants' Motion for Summary Judgment as to All Claims Brought By DP Plaintiffs Related to the Upsher Settlement is **GRANTED;**

(2) Defendants' Motion for Summary Judgment as to All Claims Brought By DP Plaintiffs Related to the ESI Settlement is **GRANTED;**

(3) DP Plaintiffs' Motion for Partial Summary Judgment as to the Applicable Framework for Analysis of Exclusion Payments is **DENIED;** and

(4) DP Plaintiffs' Motion for Partial Summary Judgment as to the Exclusionary Scope of the '743 Patent is **DENIED.**

Judges: JANIE S. MAYERON, United States Magistrate Judge.

Opinion by: JANIE S. MAYERON

Opinion

ORDER

The above matter came on before the undersigned on Defendants' Joint Motion in the Alternative for Leave to Amend Answers to Assert Counterclaims for Violations of the Antitrust Laws and Tortious Interference with Contract [Docket No. 485] and Plaintiffs' Motion to Strike Defendants' Filings on December 4, 2008 [Docket No. 491].

Charles Rule, Esq., Randall Tietjen, **[*6]** Esq., Ronald Schutz, Esq. and Joseph Bial, Esq. appeared on behalf of plaintiffs; Mark A. Jacobson, Esq. and Robert Milne, Esq. appeared on behalf of defendant Experian Information Solutions Inc.; James Gardner, Esq. and Christopher Morris, Esq. appeared on behalf of defendant Trans Union, LLC; and Barbara Berens, Esq. appeared on behalf of defendant VantageScore Solutions, LLC.

The Court, upon all of the files, records, proceedings herein, and for the reasons stated at the hearing, now makes and enters the following Order.

IT IS HEREBY ORDERED that:

1. Defendants' Joint Motion in the Alternative for Leave to Amend Answers to Assert Counterclaims for Violations of the Antitrust Laws and Tortious Interference with Contract [Docket No. 485] is **DENIED**; and

2. Plaintiffs' Motion to Strike Defendants' Filings on December 4, 2008 [Docket No. 491] is **GRANTED**.

3. Defendants Experian and Trans Union shall re-file and serve their respective answers and counterclaims to the Third Amended Complaint without the antitrust and tortious interference with contract counterclaims. VantageScore shall refile and serve its answer and counterclaim to the Third Amended Complaint without the lack of standing affirmative **[*7]** defense, and shall only allege the laches affirmative defense as it relates to plaintiffs' price-fixing claim.

Dated: February 9, 2009

JANIE S. MAYERON

United States Magistrate Judge

MEMORANDUM

I. INTRODUCTION

This matter arises out of the creation of the credit scoring system, VantageScore, by credit bureaus Equifax Information Services LLC ("Equifax"), Experian Information Services, Inc. ("Experian"), and Trans Union LLC ("Trans Union"). This scoring system competes with Fair Isaac Corporation's and its wholly owned subsidiary myFICO Consumer Services, Inc.'s (collectively referred to as "Fair Isaac") credit scoring system (also referred to as "FICO" for the purpose of this Memorandum). The present issues before the Court arise out of the propriety of certain counterclaims and affirmative defenses asserted by defendants Experian, Trans Union and VantageScore on December 4, 2008, to Fair Isaac Third Amended Complaint.

II. FACTUAL BACKGROUND

A. Initial Action and the Court's Deadlines for Amending Pleadings

On October 11, 2006, Fair Isaac initiated the present action against Equifax and the other defendants. See Docket No. 1. Fair Isaac subsequently amended their complaint **[*8]** twice, with the Second Amended Complaint [Docket No. 81] being the operative Complaint in this case prior to the Third Amended Complaint, which led to defendants' addition of the antitrust and tortious interference with contract counterclaims that are the subject of the present motions before the Court. Counts One through Four, Six and Seven of Fair Isaac's Second Amended Complaint related to the alleged similarity of the credit scoring range for VantageScore (501-990) to the credit scoring range for FICO (300-850). In particular, Fair Isaac alleged that the use of the VantageScore scoring range of 501-990 constituted unfair competition under *15 U.S.C. § 1125(a)*; infringement of registered trademark under *15 U.S.C. § 1114*; trademark infringement under Minnesota common law; passing off under Minnesota common law; deceptive trade practices under Minn. Stat. § 523D.44; and unjust enrichment under Minnesota common law. See Second Amended Complaint, ¶¶ 177-196, 204-216. Count Five of the Second Amended Complaint alleged unfair competition and false advertising under *15 U.S.C. § 1125(a)*.

Count Eight claimed an unreasonable and illegal restraint of trade under Section One of the Sherman Act, *15 U.S.C § 1* for the joint creation and ownership by defendants of VantageScore and **[*9]** the agreement to limit competition among credit bureaus. Specifically, Fair Isaac alleged that by agreeing to create, own, and control credit scores through the commonly-owned VantageScore, defendants have combined, conspired and colluded unreasonably to restrain competition in the aggregated credit data and credit scoring markets, in part, by entering into agreements that would limit the credit bureaus' independent decision-making regarding price, output, otherwise reduce the credit bureaus' ability or incentive to compete independently and limited the ability of third-party vendors to compete in the market. See Second Amended Complaint, ¶¶ 222-25.

Count Nine alleged that the creation of VantageScore by defendants gave the bureaus 100% of the market for aggregated credit data and has decreased the competitors in the credit scoring market from four to two, thereby allowing defendants to directly and indirectly exchange competitively sensitive information on costs, prices, and innovations affecting their competition in the market for aggregated credit data and the credit scoring. Id., ¶¶ 233-35. Accordingly, Fair Isaac alleged that the credit bureaus' joint ownership of VantageScore **[*10]** amounted to illegal merger or acquisition under Section Seven of the Clayton Act, *15 U.S.C. § 18*, and Section One of the Sherman Act, *15 U.S.C. § 1*.

Count Ten asserted that defendants attempted to monopolize the market for consumer credit scores in violation of Section Two of the Sherman Act, *15 U.S.C. § 2*. Id., ¶ 241. Specifically, Fair Isaac alleged that defendants are jointly attempting to leverage their collective market power over aggregated credit data in order to provide VantageScore "with monopoly power through various discriminatory and exclusionary means . . . including, but not limited to, the use of unfair methods of competition to exclude Fair Isaac from the market and the manipulation of the relative prices of VantageScore Credit Scores and of Credit Scores generated from Fair Isaac scoring algorithms." Id., ¶ 242.

Count Eleven is a conspiracy to monopolize the market for credit scoring claim under Section Two of the Sherman Act, *15 U.S.C. § 2*. Id., ¶ 248. In this regard, Fair Isaac alleged that defendants are conspiring to use their collective market power over aggregated credit data to move the financial industry to the VantageScore product with the intent of acquiring and maintaining monopoly power over the credit scoring **[*11]** market through "the use of unfair methods of competition to exclude Fair Isaac from the market and the manipulation of the relative prices of Credit Scores generated by the VantageScore algorithm and those generated using Fair Isaac scoring algorithms." Id., ¶¶ 249-50.

Count Thirteen is a breach of contract claim against Trans Union, which alleged that Trans Union violated contract provisions obligating it to keep confidential and not to misuse Fair Isacc's confidential property or trade secrets, and required it to act as an agent for plaintiffs' products and services. Id., ¶ 260. The final Count, Count Fifteen, alleged interference with contract against VantageScore for intentionally inducing Trans Union to breach its contractual duties with Fair Isaac. Id., ¶¶ 270-275.[1]

On January 17, 2007, this Court entered its first pretrial scheduling order, which provided in relevant part that amendments to pleadings were required to be served and filed before April 1, 2007. See Pretrial Scheduling Order [Docket No. 72]. While this Court has issued amendments to the Pretrial Scheduling Order (resulting from the

[1] Counts 12 (state law anticompetitive claims) and 14 (misappropriation of trade secrets) have been dismissed by stipulation of the parties, along with all allegations of misappropriation of plaintiffs' trade secrets by Trans Union and VantageScore Solutions. See June 23, 2008 Order [Docket No. 373].

stipulations of the parties), the date by which amendments to pleadings must be served **[*12]** and filed has never changed. See Docket Nos. 72, 207, 245, 267, 374, 400, 433, 518. With respect to deadlines for fact discovery, expert discovery, dispositive motions, and trial, the parties have been operating under the following deadlines since August 19, 2008.

July 22, 2008 - All fact discovery of any kind shall be commenced in time to be completed by this date.

August 26, 2008 - Expert disclosures by plaintiffs

October 27, 2008 - Expert disclosures by defenda

November 19, 2008 - Rebuttal expert disclosures by plaintiffs

December 19, 2008 - All expert depositions to be completed by this date.[2]

March 1, 2009 - documents dated or created on or after February 16, 2008 and through December 1, 2008 to be produced on or before this date.

April 1, 2009 - All dispositive motions are to be served, filed and heard by this date.

July 1, 2009 - Trial ready date.

Fifth Amended Pretrial Scheduling Order [Docket No. 400].

B. Settlement Agreement Between Fair Isaac and Equifax and Defendants' Discovery Directed to this Agreement

On June 6, 2008, Fair Isaac and Equifax entered into a "Technology Development, Distribution and License Agreement" and a "Data License Agreement" as part of a settlement between **[*13]** Fair Isaac and Equifax. Defendants maintain that they learned of the settlement through a June 10, 2003 email from Fair Isaac' CEO, Dr. Mark Greene, which addressed the partnership with Equifax. See Memorandum of Law in Support of Defendants' Joint Motion in the Alternative for Leave to Amend Answers to Assert Counterclaims for Violations of the Antitrust Laws and Tortious Interference with Contract ("Defs.' Mem.") [Docket No. 487] at p. 8; see also Declaration of James K. Gardner [Docket No. 489] ("Dec. 12, 2008 Gardner Decl.") Ex. 4, FIC1397275 (June 10, 2008 Greene email). Fair Isaac's action against former defendants Equifax and Equifax Information Services LLC, was subsequently dismissed with prejudice, pursuant to a stipulation by the parties. See June 13, 2008 Order [Docket No. 362].

Defendants immediately propounded discovery on Fair Isaac regarding the settlement, as they believed those settlement documents bore on Fair Isaac' antitrust claims and defendants' defense to these claims. See June 27, 2008, Order [Docket No. 377] at p. 2. Fair Isaac, in turn, requested that this Court amend the Amended Protective Order to prohibit any outside litigation counsel for defendants involved **[*14]** in any settlement discussions with Fair Isaac from having access to any Equifax-settlement-related documents or information. Id. at p. 2. Alternatively, Fair Isaac proposed that rather than prohibiting outside litigation counsel for defendants from examining the settlement documents in their entirety, it would redact from the settlement materials those terms that Fair Isaac believed were not relevant to the claims or defenses in the suit. Id. at p. 3. To address Fair Isaac's request, the Court ordered Fair Isaac to deliver to the Court and defendants, on or before July 1, 2008, the Equifax settlement agreement and related business agreements memorializing the settlement and business relationship between Fair Isaac and Equifax with redactions, and a letter describing the nature of all terms redacted from these documents and the basis for each proposed redaction. Id. at p. 4. On July 8, 2008, this Court denied Fair Isaac's request to amend the Amended Protective Order and ordered Fair Isaac to produce to defendants the five documents reflecting the settlement agreement with Equifax and related business agreements without any redactions. See July 8, 2008 Order [Docket No. 383]. Defendants received the unredacted settlement **[*15]** agreement and associated agreements on July 10, 2008. See Declaration of Dao L. Boyle ("Boyle Decl.") [Docket No. 526], ¶ 2, Ex. 1 (July 10, 2008 Letter from Plaintiffs to Defendants Enclosing the Unredacted Agreements); see also Transcript of December 23, 2008 Hearing ("Tr.") [Docket No. 564] at pp. 15-16.

---

[2] On November 5, 2008, the Court issued the Sixth Amended Pretrial Scheduling Order that gave Fair Isaac until January 23, 2009 to depose expert Robert Anderson and defendants the right to depose by this same date any expert who submitted a report on behalf of Fair Isaac in response to the Anderson report. See Docket No. 434.

> On June 17, 2008, defendants issued their Tenth Set of Requests for the Production of Documents, which included a request for the projections and analyses pertaining to the Equifax agreement

On September 10, 2008, defendants moved this Court for an order compelling the production of documents responsive to Document Request No. 3 of their Tenth Set of Document Requests to Fair Isaac, including: the analyses of the impact of the Equifax deal on Fair Isaac; scoring business and/or the scoring marketplace; the analysis or projections and related documents, about which CEO Dr. Mark Greene testified at his deposition; any joint analyses conducted by Equifax and Fair Isaac; and witnesses, including CEO Greene and the head of scoring Lisa Nelson, to testify concerning the above analyses. See Memorandum of Law in Support of Defendants' Motion to Compel Fair Isaac to Provide Discovery of Non-Privileged **[*16]** Business Analyses Related to Business Agreements between Equifax and Fair Isaac [Docket No. 404] at pp. 4, 9-10; see also November 3, 2008 Order [Docket No. 431]. This Court denied defendants' motion. November 3, 2008 Order [Docket No. 431] at pp. 16-21. Defendants filed objections to this Court's Order on November 18, 2008. See Docket No. 437. On January 22, 2008, United States District Judge Ann D. Montgomery overruled defendants' objections and upheld this Court's November 3, 2008 Order on discovery. See Docket No. 566.

C. Events Leading to the Filing of the Amended Pleadings

On August 13, 2008, subsequent to defendants' discovery of the Equifax settlement agreements, defendants brought a Joint Motion (I) to Modify Scheduling Order to Permit Defendants to Move for Leave to Amend Pleadings, and (II) for Leave to Amend Answers to Assert Counterclaims for Cancellation of Registration for "300-850" Trademark [Docket No. 391]. The proposed amended answer only added a counterclaim for the cancellation of Fair Isaac' registration of the "300-850" trademark. Id. The hearing for the motion was noticed for September 24, 2008. See Docket No. 392.

On August 28, 2008, Fair Isaac's counsel sent **[*17]** an email to defendants' counsel asserting that Fair Isaac believed that its Second Amended Complaint was sufficiently broad to encompass a claim of a price-fixing arrangement between defendants under Section One of the Sherman Act. See Dec. 12, 2008 Gardner Decl., Ex. 3 (August 28, 2008, 2:23 p.m. email). To the extent that defendants did not agree with this assessment, Fair Isaac asked that defendants respond as soon as possible so that Fair Isaac could bring a motion to amend to add the claim. Id. Defendants responded by requesting an identification of the portions of the Second Amended Complaint that Fair Isaac believed asserted a price-fixing claim. Id. (August 28, 2008, 2:25 p.m. email). In response, Fair Isaac' counsel represented that the Second Amended Complaint contained sufficient allegations for price-fixing under the notice pleading standards, and also stated in relevant part:

> But we would like to know whether your clients will consent to this amendment or whether a motion will be necessary. As amendment would eliminate the need for your clients to go forward with their motion to amend the pleadings, given that they could do so as a matter of right in response to Fair Isaac's **[*18]** amended pleading.

Id. (August 28, 2008, 3:05 p.m. email). Fair Isaac's counsel sent a subsequent email on September 9, 2008, inquiring whether defendants would accept the proposed amendment without a motion to amend, and attaching the proposed claim for unreasonable and illegal restraint of trade under *15 U.S.C. § 1* (pertaining to defendants' alleged coordination and collusion regarding the pricing of VantageScore and output of in-house credit scores). See Declaration of Randall Tietjen [Docket No. 493] ("Dec. 12, 2008 Tietjen Decl."), Ex. 3.

This Court denied defendants' motion to amend to add the cancellation of registration for "300-850" trademark counterclaim as moot based on the parties' representations at the September 24, 2008 hearing that they had reached an agreement regarding the issues raised by this motion. See September 29, 2008 Order [Docket No. 428], ¶ 1. The parties continued to negotiate the stipulation for amending the pleadings after the September 24, 2008 hearing. See, e.g., Dec. 12, 2008 Tietjen Decl., Ex. 4 (September 28-29, 2008 email exchange between counsel). However, it was not until November 5, 2008, that the parties filed a Stipulation, which set forth their agreement **[*19]** to permit Fair Isaac to amend its Second Amended Complaint to assert a price-fixing claim pursuant to *15 U.S.C. § 1*, and to permit "[d]efendants [to] answer or otherwise plead in response to Plaintiffs' Third Amended Complaint within twenty days of service of the complaint." See Docket No. 434. On November 6, 2008, the Court issued an Order, based on the Stipulation, permitting Fair Isaac to file their Third Amended Complaint and also permitting defendants to "answer or otherwise plead in response to Fair Isaac' Third Amended Complaint within twenty days of service of the complaint." November 6, 2008 Order [Docket No. 435].

D. Defendants' Third Amended Complaint

On November 10, 2008, Fair Isaac filed and served its Third Amended Complaint. See Docket No. 436. The Third Amended Complaint added Count Twelve, alleging an unreasonable and illegal restraint of trade claim under Section One of the Sherman Act, *15 U.S.C. § 1*, for the coordination and collusion regarding the pricing of VantageScore and output of in-house credit scores. Specifically, Count Twelve alleged the following: the credit bureaus conspired to phase out their in-house credit scores in order to ensure that the bureaus were jointly promoting VantageScore; **[*20]** targeted large institutional customers in an attempt to deprive Fair Isaac of its largest customer base and to displace Fair Isaac's scores with VantageScore; and priced VantageScore at or above prices charged for certain scores from Fair Isaac in order to avoid price competition between the bureaus themselves on VantageScore. See Third Amended Complaint, ¶ 256. In support of these allegations, Fair Isaac alleged that since 2004, the credit bureaus planned to develop a credit score to displace Fair Isaac' score and thereby obtain the royalties they had been paying Fair Isaac for its scoring algorithm. Id., ¶ 258. To effectuate this plan, Fair Isaac alleged that the credit bureaus agreed not compete on the price for VantageScore and set a retail price floor below which VantageScore would not be sold. Id., ¶ 259. The alleged focus of the credit bureaus was not to use VantageScore to compete with each other in the national market of credit scores. Id., ¶¶ 260-61. Count Twelve also alleged that the credit bureaus agreed to phase-out their in-house credit scores and algorithms in order to focus their joint efforts to eliminate Fair Isaac as competition. Id., ¶ 265. In addition, Fair Isaac **[*21]** alleged that the credit bureaus agreed to conduct joint validation, marketing and discounted pricing of VantageScore to specific customers and lenders that were Fair Isaac's primary sources of income. Id., ¶ 266. In sum, by agreeing to fix the prices of VantageScore and restraining their separate in-house credit scores, Fair Isaac asserted that defendants have conspired unreasonably to restrain competition in the national market for aggregate credit data and credit scores, thereby resulting in a per-se violation of Section One of the Sherman Act, *15 U.S.C. § 1*. Id., ¶ 269.

E. Defendants' Amended Answers and Counterclaims

On December 4, 2008, defendants served and filed their amended answers and counterclaims to Fair Isaac's Third Amended Complaint. See Docket Nos. 475, 477, 478. Both defendants Trans Union and Experian added the agree-upon trademark cancellation counterclaim. See December 12, 2008 Declaration of Bryan Gant [Docket No. 488], Ex. 1 ("Proposed Experian Answer and Counterclaims") at pp. 50-63; Dec. 12, 2008 Gardner Decl., Ex. 1 ("Proposed Trans Union Answer and Counterclaims") at pp. 32-47. Experian and Trans Union also asserted two additional counterclaims in their December 4, 2008 **[*22]** pleadings. In their first counterclaim, Experian and Trans Union alleged anticompetitive conduct on the part of Fair Isaac in violation of *Section 2* of the Sherman Act, *15 U.S.C. § 2*, Minnesota ***antitrust law*** under *Minn. Stat. § 325D.52*, and an unfair competition claim under California law. See Prop. Experian Answer and Counterclaims at pp. 64, 84-85, ¶¶ 1, 63-75; Prop. Trans Union Answer and Counterclaims at pp. 47-70, ¶¶ 1, 77-86. Relying on the fact that Fair Isaac's scores are entrenched in institutional market and regulatory requirements, statements by industry analysts characterizing Fair Isaac as a monopoly and Fair Isaac's admissions that there is a high barrier into the scoring market, Trans Union and Experian alleged that since 2002, Fair Isaac has achieved a dominant position in the scoring market thereby allowing them to earn monopoly profits. See Prop. Experian Answer and Counterclaims at pp. 67, 68, 75, ¶¶ 16, 18, 39; Prop. Trans Union Answer and Counterclaims at pp. 50, 51, 58, ¶¶ 14, 18, 39. Trans Union and Experian further stated that Fair Isaac undertook steps to eliminate the competitive threat from VantageScore by entering into an anticompetitive business arrangement with former defendant Equifax in June **[*23]** of 2008, at which time Equifax received 20 million from Fair Isaac in the form of cash payments, advantageous licensing terms and dismissal of the action against it, in return for Equifax's agreement to engage in certain acts and refrain from other actions. See Prop.

Experian Answer and Counterclaims at p. 64, 79-84, ¶¶ 3, 50-62; Prop. Trans Union Answer and Counterclaims at pp. 47, 64-69 ¶¶ 3, 64-76. Trans Union and Experian also alleged that Fair Isaac has impermissibly used the present lawsuit to weaken the adoption of VantageScore by clients, in order to maintain control over the credit scoring market. See Prop. Experian Answer and Counterclaims at pp. 76-78, ¶¶ 43-47; Prop. Trans Union Answer and Counterclaims at pp. 59-61, ¶¶ 43-47. In addition, Trans Union asserted that Fair Isaac, as part of its Second Amended Complaint, attempted to maintain its dominant position in the scoring market by challenging Trans Union's attempts to sell competing generic scoring models that have features common to Fair Isaac's models, including VantageScore, and thereby blocking Trans Union's essential involvement in VantageScore, by: (1) bringing a misappropriation claim that was subsequently dismissed; **[*24]** and (2) using an impermissible interpretation of a confidentially provision entered into by Trans Union and Fair Isaac. Id. at pp. 54, 61-63, ¶¶ 26, 48-61. All of these actions, according to defendants have the effect of enhancing and preserving Fair Isaac's illegal monopoly power.[3]

The second counterclaim asserted by Trans Union and Experian was a claim of tortious interference with contract, which is also based on the June 2008 agreement between Fair Isaac and Equifax, and which defendants claim was intentionally undertaken by Fair Isaac to interfere with the contractual relationship between the members of the VantageScore joint venture. See Prop. Experian Answer and Counterclaims at pp. 86-87, ¶ 76-78; Prop. Trans Union Answer and Counterclaims at p. 71, ¶¶ 87-89.

Defendant VantageScore added to its answer the cancellation of the registration for Fair Isaac's "300-850" trademark counterclaim. See Defendant VantageScore Solutions, LLC's Answer, Affirmative Defenses and Counterclaim to Plaintiffs' Third Amended Complaint ("Prop. VantageScore Answer and Counterclaim") at pp. 40-53. VantageScore also added the affirmative defenses of laches, as to all claims, and based on the Court's June 23, 2008 Order **[*25]** dismissing any allegations of misappropriation of trade secrets, a lack of standing affirmative defense as it related to Fair Isaac's misappropriation or use of its trade secrets claim. Id. at pp. 36-37.

F. December 5, 2008 Hearing

At a hearing on December 5, 2008 to address motions brought by defendants and a third party, the Court learned that Fair Isaac had cancelled scheduled expert depositions because of the antitrust and tortious interference counterclaims served by defendants the previous day, and that Fair Isaac intended to file a motion to strike those counterclaims. The Court ordered the depositions to proceed, and after expressing concern at the eleventh-hour addition of the antitrust and tortious interference counterclaims, required the parties to formally submit the issue to the Court as either a motion to strike the answers by Fair Isaac or a motion to amend by defendants. As a consequent, the Court now has before it Plaintiffs' Motion to Strike Defendants' Filings on December 4, 2008 and Defendants' (Trans Union and Experian) Joint Motion in the Alternative for Leave to Amend Answers to Assert Counterclaims for Violations of the Antitrust Laws and Tortious Interference with Contract.

[*26] III. PLAINTIFFS' MOTION TO STRIKE

Fair Isaac brought a motion to strike defendants' December 4, 2008 filings pursuant to *Federal Rule of Civil Procedure 12(f)* on the grounds that Experian and Trans Union impermissibly added antitrust and tortious interference counterclaims, and VantageScore impermissibly added new affirmative defenses.[4] According to Fair Isaac, the counterclaims and affirmative defenses at issue were filed after this Court's deadlines for amending the pleadings, were filed without leave of the Court, were in breach of defendants' agreement with Fair Isaac, and if

---

[3] Included the "antitrust" category of counterclaims is Experian's California Unfair Competition claim. See Prop. Experian Answer and Counterclaims at pp. 86, ¶¶ 73-75.

[4] Fair Isaac did not object to the addition of the agree-upon trademark cancellation counterclaim. See See Plaintiffs' Memorandum of Law in Support of Motion to Strike Defendants' Filings on December 4, 2008 ("Pls.' Strike Mem.") at p. 2.

permitted, would greatly expand the scope of the suit and discovery, and would delay resolution of the case. Additionally, Fair Isaac submitted that defendants did not meet the standard of good cause required by *Rule 16(b)* for amending the scheduling order to permit the belated filing of these counterclaims to their answers.

A. Standard of Review

Under *Federal Rule of Civil Procedure 12(f)*, a court may "order stricken from any pleading any insufficient defense or any redundant, immaterial, impertinent, or scandalous matter." Pursuant to *Rule 7*, pleadings include a complaint and answer. See *Fed. R. Civ. P. 7(a)*. Judges enjoy liberal discretion to strike pleadings under *Rule 12(f)*, however, striking a party's pleading is an **[*27]** extreme and disfavored measure. See *BJC Health Sys. V. Columbia Cas. Co., 478 F.3d 908, 917 (8th Cir. 2007)*; *Stanbury Law Firm, P.A. v. IRS, 221 F.3d 1059, 1063 (8th Cir. 2000)*.

B. Did Defendants Have a Right to Amend Pursuant to the Parties' November 5, 2008 Stipulation and This Court's November 6, 2008 Order?

Defendants argued that this Court's November 6, 2008 Order entitled Experian and Trans Union to propound their antitrust and tortious interference counterclaims, as well as VantageScore's additional affirmative defenses, as a matter of right. See Defs.' Mem. at p. 11. In support of their position, defendants relied on that portion of the Court's Order instructing defendants to "answer or otherwise plead in response to Plaintiffs' Third Amended Complaint within twenty days of service of the complaint." Id.; November 6, 2008 Order [Docket No. 435]. Fair Isaac countered that the Court's Order must be considered within the context of the stipulation that lead to the November 6 Order, which was the parties' agreement to allow defendants to file their trademark cancellation claim outside of the Court's deadline for amending pleadings, in exchange for allowing Fair Isaac to file its price-fixing claim. See Pls.' Strike Mem. at pp. 12-13.

It is true that the language of the parties' stipulation and this Court's November **[*28]** 6, 2008 Order, did not explicitly restrict defendants to asserting their trademark cancellation counterclaim. However, this Court agrees with Fair Isaac that the conduct of the parties leading up to the Stipulation and Order establishes that the parties intended the there was a quid pro quo arrangement — i.e. that in exchange for Fair Isaac agreeing to stipulate to defendants' proposed trademark counterclaim without a motion (the "quid"), defendants agreed to the addition of Fair Isaac's per se price-fixing claim without a motion (the "quo"). There is nothing in the record to suggest that by agreeing to stipulate to defendants' proposed trademark cancellation counterclaim that Fair Isaac agreed that defendants could assert whatever claims they wanted. The parties had reached an understanding as to what each was going to assert by way of claim and counterclaims, and thus, the extent to which the scope and theory of the case was going to be expanded. Defendants' answer to Fair Isaac's new counterclaim without leave of court was constrained by that agreement. It would be both inequitable and inappropriate to allow defendants to unilaterally redefine the bargain they reached with Fair **[*29]** Isaac. As such, this Court concludes that this Court's November 6, 2008 Order did not entitle Experian and Trans Union to propound their antitrust and tortious interference counterclaims, or VantageScore's additional affirmative defenses, as a matter of right.

C. Did Defendants Have the Right to File Their Counterclaims Without Leave of Court Because Fair Isaac's Price-Fixing Claim Changed the Theory or Scope of the Case?

Next, it was defendants' position that they did not need leave from the Court to file their antitrust and tortious interference counterclaims because Fair Isaac's addition of its price-fixing claim, as part of their Third Amended Complaint, changed the theory and scope of Fair Isaac's case. See Defendants' Response in Opposition to Fair Isaac' to Fair Isaac' Motion to Strike ("Defs' Resp.") at p. 8. Fair Isaac argued that its Second Amended Complaint was sufficiently broad to encompass the price-fixing claim, and that defendants' affirmative defenses and subsequent discovery pertaining to the Second Amended Complaint, further demonstrated that defendants believed it encompassed a price fixing claim. See Pls.' Strike Mem. at p. 10. As such, Fair Isaac submitted that **[*30]** its fully articulated price-fixing claim did not change the theory and scope of their case against defendants. Id.

Generally, "a party may amend its pleading only with the opposing party's written consent or the court's leave." See *Fed. R. Civ. P. 15(a)(2)*. Similarly, *Rule 15(d)*, addressing supplemental pleadings, requires that a party bring a motion to the Court to seek permission to file the supplementation. See *Fed. R. Civ. P. 15(d)*; see also *Fed. R. Civ. P. 13(e)* ("Counterclaim Maturing or Acquired After Pleading. The court may permit a party to file a supplemental pleading asserting a counterclaim that matured or was acquired by the party after serving an earlier pleading.") (emphasis added). However, there is an exception to this general rule:

> [W]hen a plaintiff files an amended complaint which changes the theory or scope of the case, the defendant is allowed to plead anew as though it were the original complaint filed by the Plaintiff. . . . The obvious corollary is that if an amended complaint does not change the theory or scope of the case, a [defendant] must seek leave of court pursuant to *Rule 15(a)* before it can amend its answer to assert a counterclaim.

Tralon Corp. v. Cedarapids, Inc., 966 F. Supp. 812, 832 (N.D. Iowa 1997) (quoting *Brown v. E.F. Hutton & Co., 610 F. Supp. 76, 78 (S.D. Fla. 1985))*, aff'd *205 F.3d 1347, 2000 WL 84400 (8th Cir. Jan. 21, 2000)*; see also *Intermedics, Inc. v. Cardiac Pacemakers, Inc., Civ. No. 4-95-716 (JRT/RLE), 1998 U.S. Dist. LEXIS 23751, 1998 WL 35253496 at *2 (D. Minn. July 07, 1998)* ("Where, **[*31]** as here, an Amended Complaint, or Counterclaim, does not change the theory or scope of the case, then the party, who responds to that amended pleading, must seek leave of the Court, pursuant to *Rule 15(a), Federal Rules of Civil Procedure*, before it can amend its Answer or Reply.") (citations omitted).

This Court concludes that Fair Isaac's per se price-fixing claim did not change the scope or theory of the case such that defendants were then free to allege whatever counterclaims they wanted. Fair Isaac had already alleged in Count Eight of its Second Amended Complaint an unreasonable and illegal restraint of trade claim under Section One of the Sherman Act, *15 U.S.C § 1*, for the joint creation and ownership by defendants of VantageScore and an agreement to limit competition among credit bureaus. Specifically, Fair Isaac alleged that by agreeing to create, own, and control a common credit scores through the commonly-owned VantageScore, defendants had combined, conspired and colluded unreasonably to restrain competition in the aggregated credit data market, in part, by entering into agreements that would will limit the credit bureaus' independent decision-making regarding price, limit the bureaus from selling credit scores using other scoring **[*32]** algorithms, otherwise reduce the credit bureaus' ability or incentive to compete independently, and limit the ability of third-party vendors to compete in the market. See Second Amended Complaint, ¶¶ 222-25. In addition, Counts Ten and Eleven alleged an attempt and conspiracy to monopolize the market for credit scoring in violation of Section Two of the Sherman Act, *15 U.S.C. § 2* --they alleged that defendants used their market power over aggregated credit data in order to provide VantageScore with monopoly power through, among other means, the manipulation of the relative prices of VantageScore Credit scores and of credit scores generated from Fair Isaac's scoring algorithm. See Second Amended Complaint, ¶¶ 241-42; 248-50. This Court finds that these allegations in the Second Amended Complaint generally encompassed a per se price-fixing claim as alleged by Fair Isaac.

Further, defendants' assertion that the per se price-fixing claim changed the scope or theory of the case lacks merit as evidenced by Experian's and Trans Union assertion of affirmative defenses in their answers to the Second Amended Complaint that any claims of per se violations of antitrust laws are barred. See Experian Answer to **[*33]** Second Amended Complaint [Docket Nos. 118, 119] at p. 41 ("Insofar as the Second Amended Complaint purports to allege that Experian committed a per se violation of the antitrust laws, such claims are barred . . . ."); Trans Union's Answer to Plaintiffs' Second Amended Complaint [Docket Nos. 123] at p. 31 ("Any affirmative defenses pleaded by other Defendants and not pleaded by Trans Union are incorporated herein to the extent they do not conflict with Trans Union's affirmative defenses."). In the same vein, defendants' claim that the price-fixing claim does not relate to the existing case is belied by their own discovery. In their First Set of Document Requests, propounded on January 17, 2007, they made the following request for documents on Fair Isaac:

> 74. All documents relating to any past, present, or future economic injury to the purchasers of credit reports by reason of the formation or operation of the VantageScore joint venture, including, without limitation, injury

> occurring by reason of an alleged conspiracy to fix prices, coordination of prices, or reduced incentive to innovate.

See Dec. 12, 2008 Tietjen Decl., Ex. 1 (emphasis added).[5]

More importantly, by the time that Fair **[*34]** Isaac proposed adding the per se price-fixing claim to its complaint (on August 28, 2008), fact discovery was over (fact discovery in this case ended on July 22, 2008). See Dec. 12, 2008 Gardner Decl., Ex. 3. Yet defendants never suggested that if the price-fixing claim was going to be part of the case, they needed the opportunity to do more (or any) discovery on it. This is so, even though the facts underlying Fair Isaac's price-fixing claim changed from Fair Isaac initially claiming that the credit bureaus agreed to sell VantageScore for less than what they were selling Fair Isaac's scores, to Fair Isaac claiming that the credit bureaus agreed to sell their product at or above the prices of Fair Isaac's scores. Compare, Second Amended Complaint, ¶¶ 45, 111, 124-26, *with* Third Amended Complaint, ¶¶ 266, 268.

For all the reasons stated above, this Court finds that the Fair Isaac's addition of the per se price-fixing claim to the Third Amended Complaint did not change the theory or scope of the case so as to allow Experian and Trans Union to serve and file their antitrust and tortious interference counterclaims without leave of the Court.

D. VantageScore's Affirmative Defenses

Fair Isaac **[*35]** asked that this Court strike VantageScore's answer because it alleged unspecified "different" affirmative defenses to Fair Isaac's Third Amended Complaint. See Pls.' Strike Mem. at pp. 2, 7. The only grounds offered by Fair Isaac for striking these portions of VantageScore's answer was that the affirmative defenses asserted did not adhere to the stipulation of the parties or this Court's November 6, 2008 Order. Id. at p. 2. As stated previously, VantageScore added the affirmative defenses of laches as to all claims, and a lack of standing as it related to the misappropriation or use of Fair Isaac' trade secrets. See Prop. VantageScore Answer and Counterclaims at pp. 36-37. Based on the same analysis the Court applied to Experian and Trans Union's antitrust and tortious interference counterclaims, the Court concludes that VantageScore did not have leave of the court to file additional affirmative defenses, and the addition of Fair Isaac' price-fixing claim did not change the scope or theory of the case so as to allow VantageScore to add, without leave of court, the affirmative defenses of laches or the lack of standing. On this basis, the Court strikes these affirmative defenses. However, as the laches affirmative **[*36]** defense can pertain to Fair Isaac's price-fixing claim, VantageScore will be allowed to assert this defense in its answer to Third Amended Complaint, as it relates to the per se price-fixing claim. The Court reaches this conclusion because VantageScore was authorized to respond to Fair Isaac price-fixing claim by this Court's November 6, 2008 Order, and the Federal Rules of Civil Procedure allow a party to assert an affirmative defense in response to a pleading. See *Fed. R. Civ. P. 8(c)*. In other words, VantageScore had the right to assert affirmative defenses that directly bear on Fair Isaac's price-fixing claim.

IV. DEFENDANTS' MOTION TO AMEND

Experian and Trans Union have a brought a motion to amend their answers to assert counterclaims for violations of the antitrust laws and tortious interference with contract. Defendants argued that they did not need leave from the Court to file these counterclaims pursuant to this Court's November 6, 2008 Order, which allowed them to "answer or otherwise plead in response to Plaintiffs' Third Amended Complaint. . . ." See Defs.' Mem. at p. 11. This Court has already rejected this argument in its analysis of Fair Isaac' motion to strike in this Order. See Section III, B,C,

---

[5] This Court notes that while the Amended Complaint was in effect during the January 17, 2007 First Set of Document Requests, the Amended Complaint already contained essentially the same allegations as those found in the Second Amended Complaint pertaining to unreasonable and illegal restraint of trade claim under Section One of the Sherman Act, *15 U.S.C § 1*, and attempt and conspiracy to monopolize the market for credit scoring in violation of Section Two of the Sherman Act, *15 U.S.C. § 2*. See Amended Complaint [Docket No. 9] at pp. 56-62, ¶¶ 166-203.

supra. Defendants **[*37]** also asserted that they should be given leave to add the counterclaims under *Rules 15* and *16 of the Federal Rules of Civil Procedure*. The Court now addresses that argument.

A. Standard of Review

The parties are in disagreement as to what section of *Rule 15 of the Federal Rules of Civil Procedure* applies to defendants' motion for leave. Defendants asserted that *Rule 15(d)* apples to their motion. See Defs.' Mem. at p. 12. *Rule 15(d)* provides in relevant part "[o]n motion and reasonable notice, the court may, on just terms, permit a party to serve a supplemental pleading setting out any transaction, occurrence, or event that happened after the date of the pleading to be supplemented." Fair Isaac countered that defendants' proposed counterclaims are not supplemental and that *Rule 15(a)(2)* applies to defendants' motion to amend. See Fair Isaac's Response to Defendants Motion for Leave to Amend ("Pls.' Opp. Mem.") at pp. 9-10. *Rule 15(a)(2)* provides in the relevant part, "a party may amend its pleading only with the opposing party's written consent or the court's leave. The court should freely give leave when justice so requires." The distinction between an amended pleading under *Rule 15(a)* and a supplemental pleading under *Rule 15(d) of the Fed. R. Civ. P.* has been stated as follows:

> An amended pleading is designed to include matters occurring before the filing of the bill **[*38]** but either overlooked or not known at the time. A supplemental pleading, however, is designed to cover matters subsequently occurring but pertaining to the original cause.

*U.S. ex rel. Kinney v. Stoltz, No. Civ. 01-1287 (RHK/JMM), 2002 U.S. Dist. LEXIS 6178, 2002 WL 523869 at *3 (D. Minn. April 05, 2002)* (quoting *United States v. Vorachek, 563 F.2d 884, 886 (8th Cir. 1977)*, quoting *Berssenbrugge v. Luce Mfg. Co., 30 F. Supp. 101 (W.D. Mo. 1939))*. The dispute here is whether the defendants' antitrust and tortious interference counterclaims alleged matters that occurred before or after the Second Amended Complaint.

On the one hand, Experian and Trans Union asserted, as part of their antitrust counterclaims, that since 2002, Fair Isaac has achieved a dominant and entrenched position in the scoring market, thereby allowing them to earn monopoly profits. See Prop. Experian Answer and Counterclaims at pp. 67, 68, 75, ¶¶ 16, 18, 39; Prop. Trans Union Answer and Counterclaims at pp. 50, 51, 58, ¶¶ 14, 18, 39. Trans Union and Experian also alleged that Fair Isaac has impermissibly used the present lawsuit to weaken the adoption of VantageScore by clients in order to maintain control the scoring business. See Prop. Experian Answer and Counterclaims at pp. 76-78, ¶¶ 43-47; Prop. Trans Union Answer and Counterclaims at pp. 59-61, ¶¶ 43-47. Based on these allegations, it is evident that some of the events leading to the establishment of the monopoly **[*39]** are, by defendants' own descriptions, based on events that took place well before or with the initiation of the present case. On the other hand, it is also clear the gravamen of and driving force behind Trans Union's and Experian's counterclaims is Fair Isaac's June 2008 agreement with Equifax, which occurred well after defendants' responsive pleadings to the April 2007 Second Amended Complaint and the deadline to amend pleadings. See Prop. Experian Answer and Counterclaims at p. 64, 79-84, ¶¶ 3, 50-62; Prop. Trans Union Answer and Counterclaims at pp. 47, 64-69 ¶¶ 3, 64-76.

Regardless, the distinction as to whether *Rule 15(a)* or *15(d)* applies is largely academic because this Court finds that the good cause requirement articulated in *Fed. R. Civ. P. 16(b)* applies to both amendments and supplemental pleadings. Trans Union and Experian's counterclaims were filed after this Court's April 1, 2007 deadline for amending pleadings. The Eighth Circuit has held that when a party has filed a motion to amend their complaint after the deadline provided for in a court's pretrial scheduling order, then the court may properly require, pursuant to *Federal Rules of Civil Procedure 16(b)*, that good cause be shown for leave to file a pleading that is out of time with that order. **[*40]** See *Freeman v. Busch, 349 F.3d 582, 589 (8th Cir. 2003)* (citing *In re Milk Prod. Antitrust Litig., 195 F.3d 430, 437 (8th Cir. 1999))* cert. denied, *529 U.S. 1038 (2000))*; see also *Sherman v. Winco Fireworks, Inc., 532 F.3d 709, 715 (8th Cir. 2008)* (summarizing the interplay between *Rule 15* and *16*). If a court were only consider *Rule 15* without regard to *Rule 16(b)*, it "would render scheduling orders meaningless and effectively would read *Rule 16(b)* and its good cause requirement out of the Federal Rules of Civil Procedure." *In re Milk Prod. Antitrust Litig., 195 F.3d at 437-38* (citation omitted). However, neither the Eighth Circuit nor courts within this circuit have addressed whether a party seeking to supplement a pleading under *Rule 15(d)* must meet the good cause standard under *Rule 16(b)* to modify the scheduling order where the motion to supplement is filed after the deadline for amending the pleadings. Outside the Eighth Circuit, district courts have disagreed on the relationship between *Rules 15(d)* and *16(b)*. *Compare* *Ohio Valley Envtl. Coalition v. U.S. Army Corps of Eng'rs, 243 F.R.D. 253, 256 (S.D. W.Va. 2007)* (finding *Rule 16* does not apply to motions to supplement because *Rule 16* does not require courts to set a deadline for supplemental pleadings and the Court did not set such a deadline in the Scheduling Order); *Fremont Inv. & Loan v. Beckley Singleton, Chtd., No. 2:03-CV-1406-PMP-RJJ, 2007 U.S. Dist. LEXIS 30234, 2007 WL 1213677 at *7 (D. Nev. Apr. 24, 2007)* (same) *with* *McGrotha v. Fed Ex Ground Package Sys., Inc., No. 5:05-CV391 (CAR), 2007 U.S. Dist. LEXIS 18794, 2007 WL 640457 at *2 (M.D. Ga. Feb. 24, 2007)* ("[w]hen a motion to supplement is filed after the scheduling order's deadline, . . . a party must first demonstrate good cause under *Rule 16(b)* before a court can consider **[*41]** whether supplementation is proper under *Rule 15(d)*.").

Rule 16(b)(3) describes the "Required Contents" of a pretrial scheduling order as follows, "[t]he scheduling order must limit the time to join other parties, amend the pleadings, complete discovery, and file motions." *Fed. R. Civ. P. 16(b)(3)*. Similarly, United States District Court Local Rule 16.2 requires that a pretrial schedule include "[a] date by which other parties may be joined and the pleadings may be amended." The plain language of *Rule 16* and Local Rule 16.2 governs any pleading that serves to change or amend the previous pleading. As such, this Court concludes that *Rule 16(b)* is equally applicable to supplemental pleadings under *Rule 15(d)* as it is to amendments under *Rule 15(a)*. Therefore, defendants must establish good cause for seeking to modify the operative scheduling order to permit the adding of their antitrust and tortious interference counterclaims at this juncture of the case.

B. Does Good Cause Exist to Add the Counterclaims Now?

Scheduling orders pursuant to *Rule 16(b)(1)* "assure[ ] that at some point both the parties and the pleadings will be fixed, . . ." *Rule 16(b), Federal Rules of Civil Procedure*, *Advisory Committee Notes--1983 Amendment*. Under *Rule 16(b)*, "[a] schedule shall not be modified except upon a showing of good cause and by leave of [court]." *Fed. R. Civ. P. 16(b)*.

The Eighth Circuit has described what constitutes good cause under **[*42]** *Rule 16* as follows:

> "The primary measure of good cause is the movant's diligence in attempting to meet the order's requirements." *Rahn v. Hawkins, 464 F.3d 813, 822 (8th Cir. 2006)*; see also *Fed. R. Civ. P. 16(b)*, advisory committee note (1983 Amendment) ("[T]he court may modify the schedule on a showing of good cause if it cannot reasonably be met despite the diligence of the party seeking the extension."). While the prejudice to the nonmovant resulting from modification of the scheduling order may also be a relevant factor, generally, we will not consider prejudice if the movant has not been diligent in meeting the scheduling order's deadlines. See *Bradford v. DANA Corp., 249 F.3d 807, 809 (8th Cir. 2001)* (concluding that there was "no need to explore beyond the first criterion, [diligence,] because the record clearly demonstrate[d] that Bradford made only minimal efforts to satisfy the [scheduling order's] requirements"). Our cases reviewing *Rule 16(b)* rulings focus in the first instance (and usually solely) on the diligence of the party who sought modification of the order. See, e.g., *Rahn, 464 F.3d at 822* (affirming the district court's denial of Rahn's request for a modification of the scheduling order because the record made clear that Rahn did not act diligently to meet the order's deadlines); *Barstad v. Murray County, 420 F.3d 880, 883 (8th Cir. 2005)* (affirming the district court's denial of leave **[*43]** to amend the Barstads' complaint under *Rule 16(b)* because the Barstads had eight months to request an amendment of the scheduling order and "knew of the claims they sought to add when they filed the original complaint"); *Freeman v. Busch, 349 F.3d 582, 589 (8th Cir. 2003)* (affirming, under *Rule 16(b)*, the district court's denial of Freeman's motion to amend her complaint because she provided no reasons why the amendment could not have been made earlier or why her motion to amend was filed so late).

Sherman, 532 F.3d at 716-17; see also *Scheidecker v. Arvig Enterprises, 193 F.R.D. 630, 632 (D. Minn. 2000)* ("the 'good cause' standard [of *Rule 16(b)*] is an exacting one, for it demands a demonstration that the existing schedule cannot be reasonably be met despite the diligence of the party seeking the extension.") Consequently, a party does not meet the good cause standard under *Rule 16(b)* if the relevant information on which it based the amended claim was available to it earlier in the litigation. See *Parker v. Columbia Pictures Indus., 204 F.3d 326, 340-41 (2nd Cir. 2000)* (citing *Sosa v. Airprint Systems, Inc., 133 F.3d 1417, 1419 (11th Cir. 1998))*. In short, *Rule 16(b)* focuses on "the diligence of the party seeking to modify a Scheduling Order, as opposed to the litany of unpersuasive excuses, inclusive or inadvertence and neglect, which commonly undergird an untimely Motion to Amend." Id. n. 1 (citations omitted). *Rule 16(b)* does not look at prejudice to the non-moving party. See *Archer Daniels Midland v. Aon, 187 F.R.D. 578, 581-82 (D. Minn. 1999)* (citing *Luigino's, Inc. v. Pezrow Cos., Inc., 178 F.R.D. 523, 525 (D. Minn. 1998))*.

This Court does not find "good cause" **[*44]** for permitting the addition of Experian's and Trans Union's antitrust and tortious interference counterclaims in response to the Third Amended Complaint. Having found that defendants impermissibly filed their amended answers and counterclaims on December 4, 2008, the issue is whether defendants had good cause for bringing their motion for leave to amend on December 12, 2008? That is, did they act diligently in bringing their motion for leave to amend? While defendants certainly had good reasons to seek to amend their answer to assert their antitrust and tortious interference counterclaims after the deadline for motions to amend the pleadings (April 7, 2007) had expired, as the operative facts driving these counterclaims did not occur until June 2008 (when Equifax and Fair Isaac settled and entered into a business arrangement), the Court concludes that defendants did not have good cause for waiting 5 months -- until December 2008 -- to spring these new counterclaims on Fair Isaac. Defendants learned of the Fair Isaac's settlement with Equifax in June 2008; and they received the unredacted settlement agreement and business agreements on July 10, 2008. See Boyle Decl., ¶ 1, Ex. 1 (July **[*45]** 10, 2008 Letter from Fair Isaac to Defendants Enclosing the Unredacted Agreements); Tr. 15-16. It is these facts that they relied upon in their antitrust and tortious interference counterclaims (and other facts that occurred well before July 2008). Nonetheless, knowing that the deadline for fact discovery was imminent (July 22, 2008) and that expert discovery was scheduled to begin on August 26, 2008 (date for Fair Isaac's initial expert disclosures) and to be completed on December 19, 2008 (except for expert Anderson), defendants took no steps to address the possibility that they might seek to add the antitrust and tortious interference counterclaims. They did not move the Court to modify the deadlines for fact or expert discovery; they did not alert Fair Isaac that they might seek to add the claim which would clearly impact the timing, scope and substance of fact and expert discovery. This is especially concerning to the Court given that in conjunction with defendants' August 13, 2008 motion to add the trademark cancellation claim, defendants touted how they had moved to add the claim as soon as there was sufficient evidence to establish the claim (the last deposition bearing on **[*46]** claim was taken on July 20, 2008, and they moved on August 13), and they went so far as point out that they had filed their motion well in advance of the hearing date in order to give Fair Isaac an additional time to prepare a response. See Memorandum in Support of Defendants' Joint Motion (I) to Modify Scheduling Order to Permit Defendants to Move for Leave to Amend Pleadings, and (II) for Leave to Amend Answers to Assert Counterclaims for Cancellation of Registration for "300-850" Trademark [Docket No. 393] at pp. 5-6, 23. In other words, defendants moved diligently in bringing a new request for relief before the Court on their trademark cancellation counterclaim, and yet failed to do so in conjunction their antitrust and tortious interference with contract counterclaims.

Defendants argued that they did not immediately file the motion for leave to amend upon the discovery of the settlement agreement between Fair Isaac and Equifax because they were diligently attempting to collect the details of the agreement that Fair Isaac refused to produce. See Defs.' Mem. at p. 13; Defendants' Reply in Support of their Joint Motion in the Alternative for Leave to Amend Answers to Assert Counterclaims **[*47]** for Violations of the Antitrust Laws and Tortious Interference with Contract ("Defs.' Reply") at pp. 4-5. Defendants pointed to their September 10, 2008 motion to compel documents related to the Equifax agreement, which was not denied by this Court until November 3, 2008, and their November 18, 2008 objections to the Court's Order. See Reply at p. 5. Defendants also noted that discovery regarding the Equifax agreement was still ongoing. Id. Yet, at the hearing, defendants' counsel represented that the antitrust and tortious interference counterclaims were for the most part, based on those agreements provided to defendants on July 10, 2008, and this was evidence sufficient for defendants to bring their counterclaims under *Rule 11 of the Federal Rules of Civil Procedure*. Tr. 16. The Court then asked defendants' counsel why defendants waited until December 4, 2008 to present their antitrust and tortious interference counterclaims, given fact discovery was done, expert discovery was near completion, and the counterclaims were primarily based on the settlement agreement between Fair Isaac and Equifax. Id. Counsel's response was that they were attempting to obtain more information regarding the agreements via their failed motion to compel **[*48]** [6] and that they finally went forward when they did "[b]ecause a time period had come up, and the time that had come up was an amended complaint." Tr. 17-18. In summary, defendants stated that they waited to file their antitrust and tortious interference with contract counterclaims until December 4, 2008, as follows:

> Why we waited five months is that it was the time, Your Honor. It was the time to file this Counterclaim based on what happened, based on the discussions with the party, based on the fact that Your Honor entered an order that said by the agreement that we could answer or otherwise plead to their amended complaint.

Tr. 29.

This Court appreciates the fact that defendants may have wanted more facts before they brought their antitrust and tortious interference counterclaims, and wanted to properly analyze the merits of these claims before they brought it into the case. However, at the end of the day, they asserted claims based solely on the facts they possessed as of July 10, 2008, and they could have taken steps to inject the proposed counterclaims into the case long before December 4, 2008. Instead, despite their awareness of their antitrust and tortious interference claims at the time they moved in August to amend their answer to add the trademark cancellation claim, they limited their motion **[*50]** to the trademark cancellation claim. Similarly, as they engaged in discussions with Fair Isaac regarding its potential per se price-fixing claim, defendants made no mention of their potential antitrust and tortious interference counterclaims to Fair Isaac. Then, even after this Court denied their motion for the projections on November 3, 2008, which was two weeks before Fair Isaac's rebuttal expert report was due, they waited until December 4 to assert the antitrust and tortious interference counterclaims for the first time. These are all strategic decisions that parties are within their rights to make. But they are strategic decisions made at their peril, particularly when fact discovery had ended several months before and expert discovery was about to be completed. The timing for defendants' motion to amend their answer to add the antitrust and tortious interference counterclaims was not dictated by the exigencies of the case; it was driven by defendants' own strategic decisions and actions. For all of these reasons, this Court finds that defendants were not diligent in and did not have good cause for their belated effort to amend their answer to add the antitrust and tortious interference **[*51]** counterclaims.

C. Did Defendants Met the *Rule 15* Standard for Amending Their Answer to Assert the Counterclaims?

Even if the Court had concluded that defendants had good cause for bringing their belated counterclaims, the Court would still deny the motion to amend or to supplement under *Rule 15* based on undue delay and prejudice to Fair Isaac.[7] *Federal Rule of Civil Procedure 15(a)* provides that leave to amend pleadings "shall be freely given when

---

[6] In its November 3 decision, the Court summarized defendants' rationale for obtaining the projections considered by Fair Isaac in entering into the agreement with Equifax, despite a finding that they constituted work product:

> Defendants claim that they have substantial need of the revenue projections and analyses, uniquely in the possession of Fair Isaac, because they are "highly relevant" to Fair Isaac's claim in its Second Amended Complaint that it will be driven from the scoring industry due to a lack of access to credit data and distribution. See Defs.' Mem. at p. 22. According to defendants, it is unfair for Fair Isaac's witnesses to contend that the agreement with Equifax will not prevent harm to Fair Isaac's scoring business while at the same time not producing the facts, **[*49]** including the projections that the witnesses considered in entering into the agreement with Equifax. Id. at pp. 22-23. In other words, defendants' assertion of substantial need is that the documents are "highly relevant" and could provide useful impeachment material as to Greene, Campbell and Nelson. In opposition, Fair Isaac submitted that defendants' experts, armed with Fair Isaac's agreements with Equifax, have all of the data necessary to perform their own analysis of what Fair Isaac's revenue might be under the agreements.

November 3, 2008 Order [Docket No. 431] at p. 17. The Court notes that defendants never represented they needed the material to support a potential antitrust or tortious interference with contract counterclaims.

[7] Motions to amend under *Rule 15(a)* and motions to supplement under *Rule 15(d)* are subject to the same standard. See *Glatt v. Chicago Park District, 87 F.3d 190, 194 (7th Cir. 1996)* (standard under *Rule 15(d)* is the same as under *Rule 15(a)*) (citations omitted); *Roller Bearing Co. of America, Inc. v. American Software, Inc., 570 F. Supp.2d 376, 383 n. 1 (D. Conn. 2008)* ("the standards for permitting additional pleading under *Rule 15(a)* and *Rule 15(d)* are the same."); *Muhammad v. Bonner, No. 05 CV*

justice so requires." The determination as to whether to grant leave to amend is entrusted to the sound discretion of the trial court. See, e.g., *Niagara of Wisconsin Paper Corp. v. Paper Indus. Union Mgmt. Pension Fund, 800 F.2d 742, 749 (8th Cir. 1986)* (citation omitted). The Eighth Circuit has held that "[a]lthough amendment of a complaint should be allowed liberally to ensure that a case is decided on its merits, . . . there is no absolute right to amend." *Ferguson v. Cape Girardeau County, 88 F.3d 647, 650-51 (8th Cir. 1996)* (citing *Thompson-El v. Jones, 876 F.2d 66, 67 (8th Cir. 1989)*; *Chesnut v. St. Louis County, 656 F.2d 343, 349 (8th Cir. 1981))*. Denial of leave to amend may be justified by "undue delay, bad faith on the part of the moving party, futility of the amendment or unfair prejudice to the opposing party." *Sanders v. Clemco Indus., 823 F.2d 214, 216 (8th Cir. 1987)* (citing *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962))*.

According to defendants, Fair Isaac will not suffer any prejudice by the addition of the two new counterclaims because little, if any, discovery will be necessary to address the new counterclaims, as the parties have already obtained **[*52]** or are pursuing evidence critical to these claims. See Defs.' Mem. at p. 15. Further, defendants claim that the core issues related to the new counterclaims are also at issue in Fair Isaac' antitrust claims including market definitions, relative market power and the ability of the credit bureaus to compete with Fair Isaac. Id. at pp. 15-16. Defendants also maintained that they should be allowed to file the counterclaims in order to save the time, effort and expense that would be expended if they had to file the counterclaims in a separate law suit and subsequently move to consolidate the two actions under *Rule 42 of the Federal Rules of Civil Procedure*. Id. at pp. 16-17.

Fair Isaac countered that justice will not be served by allowing defendants leave to add their counterclaims because of the prejudice Fair Isaac would experience due to the new theories of recovery asserted and additional discovery it would require so late in this case. See Pls.' Opp. Mem. at p. 17; Pls.' Strike Mem. at pp. 20-21. In particular, Fair Isaac argued that the exclusionary antitrust conduct allegedly undertaken by Fair Isaac in the proposed counterclaims is not related to the exclusionary antitrust conduct allegedly undertaken by defendants as asserted by Fair Isaac. See Pls.' Strike **[*53]** Mem. at p. 21. Fair Isaac maintained that it would need to conduct additional discovery pertaining to whether defendants have standing to assert the antitrust counterclaim, i.e., whether defendants suffered an injury-in-fact as a result of the Fair Isaac's conduct; discovery from the parties and third parties into whether Fair Isaac has monopoly power (as opposed to whether defendants' had market power, which had been the previous focus); discovery into how Fair Isaac obtained a dominant market position, which will require production of information prior to the 1998 cut-off for discovery previously agreed to by the parties); discovery into the conduct and effect of the settlement, which occurred after the cut-off for discovery; fact discovery into whether defendants have been overcharged for royalties; retention of experts to address defendants' *Section 2* monopolization claims; and investigation and discovery into business justifications. See Declaration of Charles F. (Rick) Rule, ¶ 6. Further, Fair Isaac asserted that it will be forced to reopen discovery, including depositions, on issues already addressed, to the extent they may deal with the proposed antitrust counterclaims. Id., ¶ 4; see **[*54]** also Pls.' Strike Mem. at p. 22. Fair Isaac maintained that allowing the claims to go forward would mean that the trial of this case could not take place in 2009. See Pls.' Strike Mem. at p. 1.

For all of the same reasons the Court determined that defendants had not diligently sought to amend their answer, the Court concludes that they engaged in undue delay in moving to amend. In addition, the Court finds that Fair

---

*1851(RJD)(LB), 2008 U.S. Dist. LEXIS 27654, 2008 WL 926574 at *6 (E.D.N.Y. March 31, 2008)* ("Whether a motion for leave to amend under *Rule 15(a)* or under *Rule 15(d)*, the same factors are considered.") (citing *Novak v. National Broadcasting Co., 724 F. Supp. 141, 145 (S.D.N.Y. 1984)* (same standards apply to motions under *Rule 15* subsections (a) and (d)); ***Estate of Williams-Moore v. Alliance One Receivables Management, Inc., 335 F. Supp.2d 636, 644 (M.D. N.C. 2004)*** ("*Rule 15(d)* motions are to be evaluated under the same standards used to evaluate motions to amend pleadings under *Rule 15(a)*, which generally states that leave to amend shall be freely granted when justice requires unless there are valid reasons for denying leave, such as undue delay, bad faith, or futility.") (citing 6A Charles Alan Wright, Arthur R. Miller & Mary Kay Kane, Federal Practice And Procedure § 1504 (2d ed.1990) (discussing *Rule 15(d)*); *Schneeweis v. Northwest Technical College, No. Civ. 97-1742 (JRT/RLE), 1998 U.S. Dist. LEXIS 11389, 1998 WL 420564 at *13 (D. Minn. June 1, 1998)* (citations omitted) (finding that central among the factors, which should be considered in the exercise of the court's broad discretion in deciding whether to allow a complaint to be supplemented, is whether "the supplementation would hinder judicial efficiency, prejudice the rights of other parties to the action, or would insert a frivolous claim.").

Isaac would be substantially prejudiced if these claims were allowed to proceed in this case at this late date. This case has been going on since October of 2006. The schedule has been modified and extended seven different times. At the point that defendants moved to amend, fact discovery was completed (except for scheduled supplementation), and expert discovery was virtually finished. The parties are about to embark on dispositive motion practice (based on the requirement that all dispositive motions are to be served, filed and heard by April 1, 2009, initial moving papers are due to be filed on or about February 16, 2009 (assuming a hearing date of April 1), and the case is to be trial ready as of July 1, 2009. Whether the Court believes Fair Isaac's description of what **[*55]** is needed for discovery and its estimate of the time required to complete this discovery or defendants' description and estimate, the Court finds that defendants' additional counterclaims will require additional and significant fact and expert discovery, additional and significant expense, and will further delay the trial of the matter, all to the prejudice of Fair Isaac. See *Dairy Foods Inc. v. Farmers Co-Operative Creamery, 298 F. Supp. 774, 777 (D. Minn. 1969)* ("[T]his lawsuit is now within a month of three years old, and hope is held that a trial of one or some of the issues may be possible within the next few months. Discovery and extensive preparation has taken place. The court does not feel that the injection of this new issue even though otherwise appropriate is proper or permissible at this time and to allow such would work prejudice to plaintiff."). As the Court observed in Intermedics, Inc. v. Cardiac Pacemakers, Inc.:

> [D]iscovery has either been completed, or it is virtually complete, the time to amend the pleadings has long been expired, and the parties are filing their respective dispositive Motions. To wind back the progress of this case, so as to allow new claims to be alleged, discovered, and subjected to Motions, is inconsistent with the mandate of *Rule 1, Federal Rules of Civil Procedure*, **[*56]** that actions be resolved in a just, speedy, and inexpensive fashion. Absent compelling good cause, the allowance of leave to plead new claims would be the antithesis of *Rule 1*'s command.

*1998 U.S. Dist. LEXIS 23751, 1998 WL 35253496 at *3*.

Finally, the Court rejects defendants' argument that they should be permitted to proceed with their amended answer because it is likely that the Court would consolidate any separate action they might bring on the same claims. It is premature to determine if, and under what circumstances, consolidation would occur, when no separate suit has been filed and no motion for consolidation is before the Court.[8] If defendants are correct in their prediction that ultimately the cases will be consolidated, such a solution can be considered at such time as it is properly before the Court: after the case has been commenced, the motion has been brought, and the pros and cons of consolidation can properly be considered.[9] In any event, where, as defendants assert, they can and will pursue their claims in a separate lawsuit, then the prejudice to them by denying their motion for leave to amend is minimal.

---

[8] Pursuant to *Rule 42(a), Federal Rules of Civil Procedure*, the Court has broad discretion to consolidate actions that "involve a common question of law or fact." *Enterprise Bank v. Saettle, 21 F.3d 233, 235 (8th Cir. 1994)*. *Rule 42(a)* allows a court to "1) join for hearing or trial any or all matters at issue in the actions; (2) consolidate the actions; or (3) issue any other orders to avoid unnecessary cost or delay." The purpose of consolidation is to encourage convenience and economy of administration of cases and avoid unnecessary cost or delay, and in considering such a motion, a court should weigh:

> Whether the specific risks of prejudice and possible confusion [are] overborne by the risk of inconsistent adjudications **[*57]** of common factual and legal issues, the burden on parties, witnesses and available judicial resources of common factual and legal issues, the length of time required to conclude multiple suits as against a single one, and the relative expense to all concerned of the single-trial, multiple-trial alternatives.

*Fratzke v. IC System, Inc., Civil Nos. 05-1115 (JRT/RLE), 06-232 (PJS/RLE), 2007 U.S. Dist. LEXIS 27750, 2007 WL 1114155 at *2 (D. Minn. April 13, 2007)* (quoting *Chill v. Green Tree Financial Corp., 181 F.R.D. 398, 405 (D. Minn. 1998)* (citations omitted). "The party seeking consolidation bears the burden of showing that it would promote judicial convenience, and economy." *Powell v. National Football League, 764 F. Supp. 1351, 1359 (D. Minn. 1991)*.

[9] Presumably any future motion to consolidate will address how a consolidation is merely not an attempt to contravene this Order or the ability of the Court to manage the cases brought before it.

V. CONCLUSION

For all of the reasons, this Court grants Fair Isaac's motion to strike Experian's and Trans Union's antitrust and tortious interference counterclaims, and denies Experian's and Trans Union's motion to amend their answers to add these counterclaims. In addition, Fair Isaac's motion to strike motion VantageScore's laches affirmative defense as to all claims asserted by Fair Isaac, and the lack of standing affirmative defense is granted.[10] On the other hand, Fair Isaac's motion to strike VantageScore's laches affirmative defense to the extent it applies to Fair Isaac' per se price-fixing claim is denied. Accordingly, Experian and Trans Union shall re-file and serve their answer and counterclaim to the Third Amended Complaint without the antitrust and tortious interference with contract counterclaims, and VantageScore shall re-file and serve its **[*58]** answer and counterclaim to the Third Amended Complaint without the lack of standing affirmative defense, and shall limit its laches defense to Fair Isaac's per se price-fixing claim.

J.S.M.

End of Document

[10] This Court notes that defendants' motion [Docket No 485] did not make a request to add affirmative defenses and therefore, the Court does not consider any proposed amendment to allow those defenses to be added to VantageScore's Answer and Counterclaims to the Third Amended Complaint.

HN1[ ] **Alternative Dispute Resolution, Validity of ADR Methods**

When considering a motion to compel arbitration, the appropriate standard of review for the district court is the same standard used in resolving summary judgment motions pursuant to *Fed R. Civ. P. 56(c)*. Thus, the motion should be granted when the pleadings and evidence demonstrate that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN2[] **Alternative Dispute Resolution, Validity of ADR Methods**

In applying the standard for a motion for summary judgment to a motion to compel arbitration, the movant bears the burden of demonstrating the absence of a genuine dispute of material fact. The movant may support its motion by identifying those portions of the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any,' which it believes demonstrate the absence of a genuine issue of material fact. *Fed. R. Civ. P. 56(c)*.

Civil Procedure > ... > Pretrial Judgments > Default & Default Judgments > Relief From Default

HN3[] **Default & Default Judgments, Relief From Default**

A court may set aside an entry of default for good cause. *Fed. R. Civ. P. 55(c)*. Three factors guide courts in determining whether good cause exists: (1) whether the default was willful, (2) whether a set-aside would prejudice plaintiff, and (3) whether the alleged defense was meritorious.

Civil Procedure > ... > Pretrial Judgments > Default & Default Judgments > Relief From Default

HN4[] **Default & Default Judgments, Relief From Default**

Strong policies favor resolution of disputes on their merits. Default is only necessary when a party is essentially unresponsive. Hence, on a motion for relief from the entry of a default or a default judgment, all doubts are resolved in favor of the party seeking relief.

Business & Corporate Compliance > ... > Dispute Resolution > Conflict of Law > Forum Selection

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Validity of ADR Methods

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

HN5[] **Conflict of Law, Forum Selection**

When deciding the enforceability of a foreign forum selection clause, courts focus on two factors: (1) is the arbitration agreement related to a business deal that is international in character, and (2) can the plaintiff vindicate alleged misdeeds under the laws of the chosen forum.

Business & Corporate Compliance > ... > Dispute Resolution > Conflict of Law > Forum Selection

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

HN6[] Conflict of Law, Forum Selection

Agreement in advance on a forum acceptable to both parties is an indispensable element in international trade, commerce, and contracting. Forum-selection clauses should be given full effect when a freely negotiated private international agreement is unaffected by fraud.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

International Law > Dispute Resolution > Arbitration & Mediation > Agreements

International Trade Law > Dispute Resolution > International Commercial Arbitration > Arbitration

HN7[] Arbitration, Arbitrability

Like American Arbitration Association (AAA) Rule R-8(a), U.N. Commission on International Trade Law (UNCITRAL) article 16(1) provides that an arbitration panel may rule on its own jurisdiction in the first instance. Just as incorporation of the AAA rules provide clear and unmistakable evidence that the parties intend an arbitrator, not a court, to determine the arbitrability of certain claims, incorporation of the UNCITRAL rules demonstrates that the parties intended the arbitrator to determine whether certain of a plaintiff's claims can be arbitrated.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

International Law > Dispute Resolution > Arbitration & Mediation > Agreements

International Trade Law > Dispute Resolution > International Commercial Arbitration > Arbitration

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Forum Selection Clauses

Business & Corporate Compliance > ... > Dispute Resolution > Conflict of Law > Forum Selection

HN8[] Arbitration, Arbitrability

U.S. public policy is not thwarted so long as the wrongs alleged by the party resisting arbitration may be vindicated under the laws of the foreign forum selected. There is no basis for a judgment that only United States laws and United States courts should determine a controversy in the face of a solemn agreement between the parties that such controversies be resolved elsewhere. To hold that the complained-of wrongs can only be properly addressed in the United States reflects a parochial concept that all disputes must be resolved under our laws and in our courts.

Opinion

[*76] ***MEMORANDUM OPINION***

On November 12, 2008, this Court dismissed plaintiffs' complaint against BP P.L.C., individual BP defendants, and Statoilhydro ASA and granted those defendants' motion to compel arbitration. Two motions remain pending in this case, both relating to BG Group, P.L.C. ("BG") -- the last defendant standing. BG, a United Kingdom corporation, was served with summons and plaintiffs' complaint on June 10, 2008. [1] By August 4, 2008, BG had not answered or otherwise responded to plaintiffs' complaint and the Clerk declared BG in default. Plaintiffs filed a motion for default judgment on August 7, 2008. BG filed a motion to set aside the default on August 13, 2008, which also sought to dismiss plaintiffs' complaint and to compel arbitration.

BACKGROUND

The parties in this case have a long and complicated history that does not need to be recounted here. The Court described some of this history in its earlier November 12 opinion. *See* Memorandum Opinion ("Mem. Op.") at 2-3. But some **[**3]** background on an ongoing arbitration between plaintiffs and BG is needed to resolve the pending motions. Like BP and Statoil, BG entered into a settlement agreement with plaintiffs to resolve a dispute arising out of a business deal in Kazakhstan that turned sour. BG's settlement agreement was essentially the same as the other defendants' and requires the **[*77]** parties to submit all claims arising out of business dealings in Kazakhstan to arbitration. *See* BG Settlement Agreement at § 10.04. However, one notable difference between BG's settlement agreement and the other settlement agreements prevents a straightforward application of the Court's November 12 opinion to the pending motions. Whereas BP and Statoil entered into arbitration agreements governed by New York law, *see* Mem. Op. at 3, BG entered into an arbitration agreement governed by the law of Alberta, Canada, *see* BG Settlement Agreement at § 10.02. Pursuant to that agreement, plaintiffs initiated arbitration against BG in Alberta in July 2005.

Dissatisfied with proceedings before the Canadian arbitration tribunal, plaintiffs filed suit in this Court on February 21, 2008. Plaintiffs allege that BG, along with the other defendants, **[**4]** violated the Racketeer Influenced and Corrupt Organizations Act ("RICO"), *18 U.S.C. § 1962*, and various state laws. *See* Compl. at PP 57-86. BG, believing that such claims fall within the scope of the settlement agreement (and must therefore be arbitrated), asked the arbitration tribunal to enjoin plaintiffs from pursuing their RICO suit in this Court. Through a series of steps that need not be detailed here, on June 11, 2008 BG obtained an injunction from the Court of Queen's Bench of Alberta -- the court designated to supervise the arbitration -- which enjoined plaintiffs from "taking any further steps" in their RICO claim and enjoined them from pursuing any "issues or matters related to [BG's] business or activities in Kazakhstan . . . in any proceedings other than in an Alberta arbitration." *See* BG's Memorandum in Support of Its Motions ("BG Mem.") at Ex. C-5 at 432. Despite the injunction from the Alberta Court, plaintiffs have filed numerous affidavits and motions in this case seeking to hold BG in default. Upon each filing, BG sought -- and obtained -- a holding from the Alberta Court that plaintiffs were in contempt of that court's orders.

STANDARD

HN1[] When considering a motion to **[**5]** compel arbitration, "the appropriate standard of review for the district court is the same standard used in resolving summary judgment motions" pursuant to *Federal Rule of Civil Procedure 56(c)*. *Brown v. Dorsey & Whitney, LLP, 267 F.Supp.2d 61, 67 (D.D.C. 2003)* (internal quotation marks omitted); *see also* *Par-Knit Mills, Inc. v. Stockbridge Fabrics Co., 636 F.2d 51, 54 & n.9 (3d Cir. 1980)*. Thus, the

---

[1] BG was served in compliance with the Hague Convention on the Service Abroad of Judicial and Extra-Judicial Documents in Civil and Commercial Matters.

motion should be granted when the pleadings and evidence demonstrate that "there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. ***HN2***[] The movant bears the burden of demonstrating the absence of a genuine dispute of material fact. *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. The movant may support its motion by "identifying those portions of 'the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any,' which it believes demonstrate the absence of a genuine issue of material fact." *Id*. (quoting *Fed. R. Civ. P. 56(c)*).

ANALYSIS

The first issue is whether to set aside the default entered by the Clerk against BG. ***HN3***[] A court may set aside an entry **[**6]** of default for "good cause." *Fed. R. Civ. P. 55(c)*. Three factors guide courts in determining whether good cause exists: "whether (1) the default was willful, (2) a set-aside would prejudice plaintiff, and (3) the alleged defense was meritorious." *See* *Keegel v. Key West & Caribbean Trading Co., 200 U.S. App. D.C. 319,* ***[*78]*** *627 F.2d 372, 373 (D.C. Cir. 1980)*. ***HN4***[] "[S]trong policies favor resolution of disputes on their merits." *Jackson v. Beech, 205 U.S. App. D.C. 84, 636 F.2d 831, 836 (D.C. Cir. 1980)*. Default is only necessary when a party is "essentially unresponsive." *Id*. (quoting *H.F. Livermore Corp. v. Aktiengesellschaft Gebruder Loepfe, 139 U.S. App. D.C. 256, 432 F.2d 689, 691 (D.C. Cir. 1970))*. Hence, "[o]n a motion for relief from the entry of a default or a default judgment, all doubts are resolved in favor of the party seeking relief." *Id*.

Based on the history of the Canadian arbitration recounted above, BG has made an ample good cause showing to set aside the Clerk's entry of default. Courts examine the circumstances of the default to determine whether it was willful. *See* *Keegel, 627 F.2d at 374*. Here, BG reasonably assumed that plaintiffs would not (repeatedly) violate the Alberta Court's orders enjoining them from prosecuting the case before this **[**7]** Court. Good faith reliance that another party will not seek entry of default demonstrates that default was not willful. *Id*. Nor would setting aside default prejudice plaintiffs. As discussed below, plaintiffs should have submitted this claim to arbitration under the settlement agreement, and hence should not have been before this Court in the first place. Finally, BG's defense is meritorious for the same reason -- plaintiffs' claim should be arbitrated, not litigated in court.

The second issue, then, is whether to dismiss plaintiffs' complaint against BG and to compel arbitration. The Court did so as to the other defendants -- BP, individual BP defendants, and Statoil -- in its November 12 order. The difference between those defendants and BG, however, is that arbitration with BG is taking place in Alberta, Canada under Alberta law. *See* BG Settlement Agreement at § 10.02. Plaintiffs argue that this difference is crucial and that it defeats BG's motion to compel arbitration. Plaintiffs rely in large part on a footnote from *Mitsubishi Motors Corp. v. Soler Chrysler-Plymouth, Inc., 473 U.S. 614, 637 n.19, 105 S. Ct. 3346, 87 L. Ed. 2d 444 (1985)*. In dictum, the *Mitsubishi* Court wrote that:

> [I]n the event the choice-of-forum **[**8]** and choice-of-law clauses operated in tandem as a prospective waiver of a party's right to pursue statutory remedies for antitrust violations, we would have little hesitation in condemning the agreement as against public policy.

Id. Plaintiffs contend that granting BG's motion to compel would operate as a waiver of plaintiffs' right to pursue its statutory RICO suit and would therefore be against public policy. Plaintiffs' Memorandum in Opposition to BG's Motion at 3.

The *Mitsubishi* footnote notwithstanding, courts that have addressed the argument plaintiffs raise here have nonetheless enforced agreements to arbitrate. Indeed, many courts confronted with the *Mitsubishi* footnote have found it inapplicable. [2] ***HN5***[] When deciding the enforceability **[*79]** of a foreign forum selection clause, courts

---

[2] *See, e.g.,* *Richards v. Lloyd's of London, 135 F.3d 1289, 1295 (9th Cir. 1998)* ("Without question this case would be easier to decide if this **[**9]** footnote in *Mitsubishi* had not been inserted. Nevertheless, we do not believe dictum in a footnote regarding ***antitrust law*** outweighs the extended discussion and holding in *Scherk* on the validity of clauses specifying the forum and applicable law."); *Haynsworth v. The Corporation, 121 F.3d 956, 968 (5th Cir. 1997)* ("We do not read *Mitsubishi* so broadly. Setting aside the fact that it is dictum, the quoted statement, by its own terms, is limited to the antitrust context, as is *Mitsubishi*

instead focus on two factors: is the arbitration agreement related to a business deal that is international in character? And can the plaintiff vindicate alleged misdeeds under the laws of the chosen forum? *See* Scherk v. Alberto-Culver Co., 417 U.S. 506, 516-19, 94 S. Ct. 2449, 41 L. Ed. 2d 270 (1974).

The business deal that plaintiffs and BG agreed to arbitrate is plainly international in character. Plaintiffs are U.S. citizens, BG is a British company, the forum chosen is in Canada, and the business deal involved energy exploration in Kazakhstan. ***HN6***[] Agreement in advance "on a forum acceptable to both parties is an indispensable element in international trade, **[**10]** commerce, and contracting." The Bremen v. Zapata Off-Shore Co., 407 U.S. 1, 13-14, 92 S. Ct. 1907, 32 L. Ed. 2d 513 (1972). "[F]orum-selection clauses 'should be given full effect' when 'a freely negotiated private international agreement [is] unaffected by fraud.'" Scherk, 417 U.S. at 519 n.14 (quoting The Bremen, 407 U.S. at 13). [3] The need for certainty in international business deals thus counsels strongly in favor of compelling arbitration.

That plaintiffs may seek redress for the wrongs BG allegedly committed further counsels in favor of compelling arbitration. As a threshold matter, the Canadian arbitration tribunal has already determined that plaintiffs' RICO claims are arbitrable under the parties' settlement agreement. *See* BG Mem. Ex. C-5 PP 24-25. That agreement incorporated the Model Law of the U.N. Commission on International Trade Law ("UNCITRAL"). BG Settlement Agreement § 10.04(a). ***HN7***[] Like American Arbitration Association Rule R-8(a), UNCITRAL article 16(1) provides that the arbitration panel may rule on its own jurisdiction in the first instance. Just as incorporation of the AAA rules **[**11]** provided "clear and unmistakable evidence" that the parties intended the arbitrator, not a court, to determine arbitrability, *see* Mem. Op. at 7-9, incorporation of the UNCITRAL rules demonstrates that the parties intended the arbitrator to determine whether plaintiffs' RICO claims can be arbitrated. *See Wal-Mart Stores, Inc. v. PT Multipolar Corp., 202 F.3d 280*, *[published in full-text format at 1999 U.S. App. LEXIS 31578], 2007 WL 1079625 at *2 (9th Cir. Nov. 30, 1999)*; *see generally* Alan Scott Rau, *The Arbitrability Question Itself*, 10 AM. REV. INT'L ARB. 287, 369 n.230 (1999) (citing cases).

Compelling arbitration is the correct result even if plaintiffs cannot pursue their claims under the RICO statute itself. ***HN8***[] U.S. public policy is not thwarted so long as the wrongs alleged by the party resisting arbitration may be vindicated under the laws of the foreign forum selected. *See* Scherk, 417 U.S. at 517, 519. There is "no basis for a judgment that only United States laws and United States courts should determine this controversy in the face of a solemn agreement between the parties that such controversies be resolved elsewhere." *Id. at 517*. To hold that the complained-of wrongs could only be properly addressed in the United States would "reflect **[**12]** a 'parochial concept that all disputes must be resolved under our laws and in our courts.'" *Id. at 519* (quoting The Bremen, 407 U.S. at 9).

[*80] Here, the laws of Alberta, Canada allow plaintiffs to pursue their claims. Plaintiffs' RICO allegations boil down to claims for conspiracy, fraud, bribery, and theft. Courts have routinely held that ***HN9***[] the wrongs RICO seeks to prevent can be vindicated in arbitrations applying foreign law. *See* Richards, 135 F.3d at 1296; Roby v. Corp. of Lloyd's, 996 F.2d 1353, 1366 (2d Cir. 1993); *cf.* De Shazo v. Nations Energy Co., Civ.A.No. H-05-3277, 2007 U.S. Dist. LEXIS 21787, 2007 WL 951568 (S.D. Tex. Mar. 27, 2007) (holding that ***HN10***[] a plaintiff's claim of "fraud, a fraudulent scheme under RICO, conspiracy, and breach of fiduciary duties" was "substantially the same" as a claim under Alberta, Canada law alleging "fraud, an oppressive scheme, conspiracy, and breach of fiduciary duties" for the purposes of collateral estoppel). Hence, plaintiffs' claims are arbitrable even if the RICO statute itself is not the vehicle for those claims.

CONCLUSION

---

more generally."); Riley v. Kingsley Underwriting Agencies, Ltd., 969 F.2d 953, 957 (10th Cir. 1992) ("[Plaintiff] relies on an isolated sentence in a footnote in *Mitsubishi* . . . [but] [o]n these facts, we do not read *Mitsubishi* as restrictively as plaintiff when *Mitsubishi* is viewed against the backdrop of Supreme Court decisions in the area.").

[3] Plaintiffs here do not allege that BG fraudulently induced them into selecting Alberta as the forum for their arbitration.

For the foregoing reasons, the Court sets aside the Clerk's entry of default against BG and holds that the arbitrator is the proper entity to decide whether **[**13]** plaintiffs' claims are arbitrable. Accordingly, BG's motion to compel arbitration will be granted and plaintiffs' complaint will be dismissed without prejudice. A separate Order has been issued on this date.

SO ORDERED.

Advanced Scientific Applications, Inc. (ASA), an Internet service provider, filed a complaint for unlawful tying under the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), predatory pricing under the Unfair Practices Act (*Bus. & Prof. Code, § 17000 et seq.*), and unfair competition under the unfair competition law (*Bus. & Prof. Code, § 17200 et seq.*) against Pacific Bell Telephone Company and SBC Advanced Solutions, Inc. (collectively, Pacific Bell). [1] A

[1] All subsequent statutory references are to the Business and Professions Code, except as otherwise expressly stated herein.

demurrer was sustained without leave to amend as to the predatory pricing cause of action. Summary judgment was later granted with respect to the remaining causes of action. ASA assigned all of its interests with respect to the litigation to its chief executive officer, president, and sole shareholder, Shahram Manighalam (Manighalam). Manighalam **[*2]** appeals.

With respect to procedural matters, we conclude that Manighalam, as assignee, has standing to maintain the appeal as to ASA's claims other than those for statutory penalties, which are not assignable. ASA's informal request to be substituted into the litigation in place of Manighalam is denied, inasmuch as ASA has no remaining rights in the litigation left to pursue.

As for the merits, on the sparse record before us, we conclude the court did not err in sustaining the demurrer without leave to amend or in granting summary judgment. With respect to the demurrer, Manighalam has failed to provide an adequate record to show that the trial court erred in concluding that applicable tariffs barred the *section 17043* cause of action for predatory pricing. In opposing the motion for summary judgment, ASA failed to raise a triable issue of material fact as to whether the alleged tying item was a product that would support a cause of action under *section 16727* or a service that would not. Also, its *section 17200 et seq.* unfair competition cause of action failed as a **[*3]** matter of law because the only relief ASA sought was unavailable under that body of law. We affirm.

I

FACTS

A. NATURE OF DISPUTE:

For the purposes of this introduction, we provide a description of the nature of the underlying situation from the perspective of Manighalam, as taken from his opening brief on appeal. This brief provides a more cogent and concise explanation of the underlying technicalities, from the viewpoint of the plaintiff/appellant, than do ASA's filings in the trial court. The statements contained in this introduction are not to be construed as factual findings.

ASA is an Internet service provider (ISP). Pacific Bell owns the Internet access infrastructure in ASA's service area. In order to provide Internet access to its digital subscriber line (DSL) customers, or end users, ASA must contract with Pacific Bell.

ASA needed to use a physical line to access to Pacific Bell's infrastructure. Either a "T1" line or a "T3" line was available for this purpose. A "T1" line handles a smaller volume of data than a "T3" line and is less expensive than a "T3" line. ASA chose to contract for the use of the less expensive "T1" line.

In order to connect either a "T1" or a "T3" line to the **[*4]** equipment of the end user who purchased DSL Internet access from an ISP, an ATM circuit was required. Pacific Bell limited the number of ATM circuits it would provide with respect to a "T1" line to 32, thus limiting to 32 the number of end users with whom an ISP using a "T1" line could contract. Pacific Bell made 255 ATM circuits available with respect to "T3" lines. Consequently, an ISP that desired to sell DSL Internet access to more than 32 end users was required to contract for the use of a "T3" line, even if the "T1" line had a large enough capacity to handle the volume of data from more than 32 end users.

Pacific Bell also offered certain marketing programs to ISP's that contracted for the use of "T3" lines. However, it did not make those same programs available to ISP's using "T1" lines.

In addition, Pacific Bell offered DSL Internet access to individual consumers who chose to contract with it directly, rather than going through ISP's. Pacific Bell provided modems to its direct customers.

ASA filed suit against Pacific Bell, alleging unlawful tying of ATM circuits, unlawful tying of advertizing, predatory pricing, and unfair competition.

B. PROCEDURAL HISTORY:

This is the second **[*5]** appeal arising out of the underlying litigation. In the prior appeal (*Advanced Scientific Applications, Inc. v. Pacific Bell Telephone Company* (Apr. 15, 2004, G030660) [nonpub. opn.]), we reversed a judgment of dismissal following the sustaining of a demurrer without leave to amend. ASA had repeatedly failed to appear in court, and indeed the court had sustained the demurrer when ASA had failed to attend a hearing on the demurrer. Manighalam, as the chief executive officer of ASA, had attended several hearings without an attorney, each time explaining that he had been unable either to contact ASA's original attorney or to hire a new one.

In our opinion, the majority stated: "Clearly, at each hearing, the court underscored the fact that Advanced Scientific could not proceed without an attorney. [Citations.] Having received explicit instruction to hire an attorney, Advanced Scientific nonetheless failed to do so." It further stated: "In our view, it was a clear abuse of discretion not to give substantial time for Advanced Scientific to obtain competent counsel, before the court ruled on the demurrer."

On remand, the court sustained, without leave to amend, a demurrer to ASA's third cause **[*6]** of action, leaving the first, second and fourth causes of action in tact. The court later granted Pacific Bell's motion for summary judgment and judgment was entered accordingly.

A notice of appeal was filed. It stated that notice was given "that Plaintiff, Advanced Scientific Applications, Inc. appeals" from the judgment. The quoted language was repeated thrice more, with respect to: (1) an order denying an application for a stay and denying a request to vacate the summary judgment; (2) an order granting the motion of ASA's counsel to be relieved; and (3) the order sustaining the demurrer as to the third cause of action. [2] The notice of appeal was signed by Manighalam. Below the signature line appeared the following words: "Shahram Manighalam[,] Assignee of All Advanced Scientific Applications, Inc.'s claims against All Defendants, Pacific Bell and SBC Advanced Solutions, Inc."

The **[*7]** civil case information statement identified the party without attorney as "Advanced Scientific Applications, Inc. ('ASA') AND Shahram Manighalam the ASSIGNEE of all of ASA's Claims against all Defendants." The document was signed by Manighalam.

We issued an order inviting the parties to file supplemental letter briefs addressing whether Manighalam was an aggrieved party with standing to maintain the appeal, whether the rights assigned to him were assignable choses in action, and, if not, whether dismissal was required for lack of jurisdiction or whether the problem could be cured by substituting a licensed attorney. Pacific Bell Telephone Company et al. and Manighalam each filed a supplemental letter brief and a responsive supplemental letter brief. We then issued an order stating that the determination of the issues of standing and jurisdiction would be made in conjunction with the decision on appeal.

Thereafter, an appellant's opening brief, a respondent's brief, and an appellant's reply brief were filed. The appellant's opening brief states in the body thereof: "Now that ASA has counsel, appellant requests that ASA be substituted in for and in the place of Shahram Manighalam. The **[*8]** request is made by this reference, as Appellant reads this court's prior order to require handling the issue as to whether Appellant is an 'aggrieved party' as to maintain standing as part of the appeal. Should a formal motion be necessary, Appellant is prepared to file one. In anticipation of this request being granted this brief treats ASA as the Appellant."

We subsequently issued another order stating: "Shahram Manighalam and Advanced Scientific Applications, Inc. are directed to provide this court with copies of any and all assignments relating to the plaintiff's and/or appellant's claims or causes of action that are the subject matter of the underlying litigation in this matter and/or this appeal." We received a copy of a document providing: "Advanced Scientific Applications' Inc. . . . ('ASA') hereby ASSIGNS and TRANSFERS, without any limitation, all of its RIGHTS and CLAIMS for all causes of actions in the California

[2] In his opening brief, Manighalam has not addressed either the order denying an application for a stay and a request to vacate the summary judgment or the order granting the motion of ASA's counsel to be relieved. Consequently, he has abandoned his appeal with respect to those two orders. (*Tanner v. Tanner (1997) 57 Cal.App.4th 419, 422, fn. 2*.)

Superior Court County of Orange, Case Number: 01CC00337, titled as: Advanced Scientific Applications, Inc. . . . [Plaintiff] vs. Pacific Bell Telephone Company . . . , SBC Advanced Solutions, Inc. . . . [Defendants], TO ASA's CEO, President and 100% Share holder, **[*9]** Shahram Manighalam as an INDIVIDUAL and PERSON." The document was dated May 30, 2007, the day after the order granting summary judgment was filed, and was signed by Manighalam as "President, CEO and Owner of 100% of all of all of the Shares of Advanced Scientific Applications, Inc."

II

DISCUSSION

A. STANDING:

(1) As Assignee -

Manighalam says that, as the assignee of ASA's claims, he has standing to appeal. [3] Pacific Bell disagrees. It contends that the causes of action ASA purported to assign are causes of action for statutory penalties, that are not assignable. It also asserts that if any of the causes of action might give rise to remedies other than statutory penalties, the entire assignment should fail in any event because of severability issues.

In assessing the arguments of the parties, we first note the remedies available with respect to the various causes **[*10]** of action. The first two causes of action as described in the third amended complaint are for unlawful tying in violation of *section 16727*. Section 16750 allows for treble damages and injunctive relief in connection with an injury under *section 16727*. The third cause of action is for predatory pricing in violation of *section 17043*. Two separate statutes address damages in connection with *section 17043*. Section 17070 provides for actual damages and injunctive relief and section 17082 provides for treble damages. (*G.H.I.I. v. MTS, Inc. (1983) 147 Cal.App.3d 256, 277* (*G.H.I.I.*).) The fourth cause of action is for unfair competition, in violation of *section 17200 et seq.* Where such violations are concerned, *section 17203* allows injunctive and restitutionary relief. (*Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 179* (*Cel-Tech*).)

It is immediately apparent that, contrary to Pacific Bell's assertion, not all of the causes of action ASA purported to assign give rise to statutory penalties. Where the damages remedies are concerned, we observe that statutory remedies include both some for treble damages and at least one for actual damages.

"[T]he settled **[*11]** rule in California is that statutes which provide for recovery of damages additional to actual losses incurred, such as double or treble damages, are considered penal in nature [citations] . . . ." (*G.H.I.I., supra, 147 Cal.App.3d at p. 277*.) Therefore, the treble damages statutes in question here are penal in nature.

Pacific Bell argues that the penalties available under those statutes are not assignable, citing *Peterson v. Ball (1931) 211 Cal. 461, 462-463, 468-470* (*Peterson*). Manighalam, on the other hand, insists that they are assignable, citing *Essex Ins. Co. v. Five Star Dye House, Inc. (2006) 38 Cal.4th 1252* (*Essex*). We agree with Pacific Bell, for reasons we shall show.

In *Essex, supra, 38 Cal.4th 1252*, the court addressed "whether assignment of a tort action against an insurer for wrongfully withholding policy benefits includes the right to recover *Brandt* fees." [4] (*Id. at p. 1257*.) In addressing this issue, the court stated: "California, as set forth both in case law and by statute, maintains a policy encouraging the free transferability of all types of property. [Citations.]" (*Id. at p. 1259*, fn. omitted.) It also stated: "'As a general

---

[3] Manighalam also asserts several other bases for standing, claiming he is aggrieved as sole shareholder, and is a party of record as one who filed a motion to vacate and as a cross-defendant. However, inasmuch as he professes to pursue the claims as the assignee of ASA, we need not address the significance of these other matters.

[4] See *Brandt v. Superior Court (1985) 37 Cal.3d 813*.

proposition it can be said '"that the **[*12]** only causes or rights of action which are not transferable or assignable in any sense are those which are founded upon wrongs of a purely personal nature, such as slander, assault and battery, negligent personal injuries, criminal conversation, seduction, breach of marriage promise, malicious prosecution, and others of like nature. All other demands, claims and rights of action whatever are generally held to be transferable.'" [Citations.]" (*Id. at p. 1260*.)

Manighalam focuses on this language, stating that statutory penalties are not on the list of items the court identified as being nonassignable. Although that is true, the Essex court was expressing a general rule and clearly did not intend the quoted language to constitute a comprehensive or exhaustive list. Indeed, Manighalam overlooks the subsequent portion of the opinion wherein the *Essex* court noted that punitive damage claims are not assignable. (*Essex, supra, 38 Cal.4th at pp. 1261-1262*.) This is consistent with the court's prior holding in *Peterson, supra, 211 Cal. 461*, to the effect that statutory penalties, being punitive in nature, are not assignable. (*Id. at pp. 462-463, 468-470*.) **[*13]** Consequently, we conclude that the treble damages claims asserted in the underlying litigation are not assignable.

This is not the end of our inquiry, however. Our conclusion prompts the question raised by Pacific Bell, that is, whether ASA's assignment is void in its entirety because some of ASA's claims give rise to nonassignable statutory penalties. Pacific Bell argues, albeit without much detail, that to permit the appeal to proceed only on claims not involving statutory penalties would be to cause substantial issues concerning severability and partial assignments. It asserts that the bulk of ASA's assignment is prohibited and argues that the assignment therefore is unenforceable in its entirety, unless Manighalam can separate the consideration given for the assignable portion and the consideration given for the nonassignable portion, so that only the assignable portion could be enforced and the appeal would be limited to that portion.

Pacific Bell perhaps makes the issue more complicated than it needs to be. In this case, we need not delve into issues of consideration. *Civil Code section 1599* provides: "Where a contract has several distinct objects, of which one at least is lawful, **[*14]** and one at least is unlawful, in whole or in part, the contract is void as to the latter and valid as to the rest." "It is settled that where a contract has both void and valid provisions, a court may sever the void provision and enforce the remainder of the contract. [Citations.] California cases take a very liberal view of severability, enforcing valid parts of an apparently indivisible contract where the interests of justice or the policy of the law would be furthered. [Citations.]" (*Adair v. Stockton Unified School Dist. (2008) 162 Cal.App.4th 1436, 1450*.) *Civil Code section 1599* does not mandate severance. (*Marathon Entertainment, Inc. v. Blasi (2008) 42 Cal.4th 974, 992*.) Rather, the question of severance "in an individual case must be informed by equitable considerations. [Citation.] *Civil Code section 1599* grants courts the power, not the duty, to sever contracts in order to avoid an inequitable windfall or preserve a contractual relationship where doing so would not condone illegality. [Citation.]" (*Ibid.*)

The issue of severability of claims in the context of certain of the Business and Professions Code provisions implicated in this case was addressed in *G.H.I.I., supra, 147 Cal.App.3d 256*. **[*15]** In that case, the court, in its analysis of a statute of limitations issue, stated that a claim for actual damages under section 17070 was "patently severable" from a claim for treble damages pursuant to section 17082. (*Id. at p. 279*.) We see no reason to disagree. The *Essex* court acknowledged that there could be times when a '"hybrid cause of action'" was at issue, in other words, when the cause of action was assignable but an aspect of the damage claim was not. (*Essex, supra, 38 Cal.4th at pp. 1261, 1263*.) As the *Essex* court stated with respect to the issues in question there: "Although some damages potentially recoverable in [the] action, including . . . punitive damages, are not assignable [citation], the cause of action itself remains freely assignable as to all other damages [citation]." (*Essex, supra, 38 Cal.4th at p. 1263*.) This rule fits the case before us as well. Here, the claims are assignable, but the statutory penalties are not. [5]

---

[5] Given our ultimate conclusions in this case, we need not decide whether the treble damages awards made available by statute should be divisible into assignable and nonassignable portions -- that is, whether one-third of the statutory damages **[*16]** should be assignable as the compensatory portion and the remaining two-thirds of the statutory damages should be nonassignable as the penal portion.

To fail to sever the void portions of the assignment, involving statutory penalties, and to hold the entire assignment void, would not be in the interests of justice. Rather, to preclude Manighalam from pursuing any claims at all against Pacific Bell would result in a potential windfall to Pacific Bell, if any of the claims in question had merit. Manighalam has standing to pursue the appeal in his capacity as assignee, but only as to the assignable portions of the claims.

As an aside, we note that Pacific Bell can have no concern over the splitting of causes of action. To the extent that the nonassignable penalty claims could be construed to remain with ASA, it matters not. Since ASA failed to file a notice of appeal from the judgment, the judgment is final as to ASA. Any unassigned claims that ASA may have had with respect to the judgment are now time barred.

As for ASA's informal request to be substituted into the litigation as appellant, the request is denied. ASA has no remaining interest in the litigation to pursue.

(2) Lack of Substitution ***[*17]*** *-*

Pacific Bell, citing *Code of Civil Procedure section 368.5*, claims that there is another reason why Manighalam cannot maintain the appeal. It says that he has no standing because he did not make a formal request to be substituted into the action in his own name.

Code of Civil Procedure section 368.5 provides as follows: "An action or proceeding does not abate by the transfer of an interest in the action or proceeding or by any other transfer of an interest. The action or proceeding may be continued in the name of the original party, or the court may allow the person to whom the transfer is made to be substituted in the action or proceeding." It is true that Manighalam did not request to be substituted into the action in the place of ASA. However, he was not required to, as *section 368.5* makes clear. (*Casey v. Overhead Door Corp. (1999) 74 Cal.App.4th 112, 121*, disapproved on another ground in *Jimenez v. Superior Court (2002) 29 Cal.4th 473, 481, fn. 1*.) He may continue to pursue the action in the name of ASA, as the original party. To hold otherwise would be to deprive Manighalam of a determination of his appeal. "The law abhors the forfeiture of the right to a determination of a cause **[*18]** of action on the merits. [Citation.] Under these facts, the court's refusal to allow [Manighalam] to proceed on the assigned [claims would act] as such a forfeiture." (*Id. at p. 122*.)

B. DEMURRER:

(1) Introduction -

Pacific Bell filed a demurrer to ASA's second amended complaint. The court sustained the demurrer with leave to amend.

ASA then filed a third amended complaint, to which Pacific Bell filed another demurrer. In that demurrer, it challenged each of ASA's four causes of action. The court overruled the demurrer with respect to the first, second and fourth causes of action. It sustained, without leave to amend, the demurrer as to the third cause of action. Manighalam contends the court erred with respect to its ruling on the third cause of action.

At the outset, we observe that Manighalam has not provided this court with as complete a record for review of this matter as would be desirable. Although the caption of Pacific Bell's notice of hearing, demurrer and memorandum of points and authorities would indicate that Pacific Bell filed a memorandum of points and authorities in support of its demurrer to the third amended complaint, the appellant's appendix contains no copy of any such **[*19]** memorandum of points and authorities. Furthermore, the appellant's appendix contains only the face page of ASA's memorandum of points and authorities in opposition to the demurrer and only the face page of Pacific Bell's reply memorandum.

In addition, the minute order on the demurrer to the second amended complaint discloses that Pacific Bell "properly [sought] judicial notice of the FCC Tariffs." This shows that Pacific Bell filed a request for judicial notice of applicable Federal Communications Commission (FCC) tariffs, germane to the determination of issues on demurrer, and that the request was granted. However, our record on appeal contains no copies of the request for judicial notice or its attachments. Therefore, we cannot review those tariffs in connection with the issues on appeal.

Finally, as we shall show, Pacific Bell raises an issue that requires a comparison of the allegations of the second amended complaint to the allegations of the third amended complaint. However, the record does not contain a copy of the second amended complaint, so we cannot make the comparison.

We will review the ruling on the third cause of action as contained in the third amended complaint based **[*20]** on the limited record before us. However, as will become evident, the defects in the record impact the outcome of the appeal.

(2) Standard of Review -

"The standard of review on an appeal from judgment of dismissal following sustaining of a general demurrer is guided by long settled rules. We treat the demurrer as admitting all material facts properly pleaded, as well as those which reasonably arise by implication, but not contentions, deductions or conclusions of fact or law. [Citations.] 'Further, we give the complaint a reasonable interpretation, reading it as a whole and its parts in their context.' [Citation.] When a demurrer is sustained, we determine whether the complaint states facts sufficient to constitute a cause of action on any theory. [Citations.] Moreover, '"the allegations of the complaint must be liberally construed with a view to attaining substantial justice among the parties."' [Citations.] A demurrer challenges only the legal sufficiency of the complaint, not the truth of its factual allegations or the plaintiff's ability to prove those allegations. [Citation.]" (*Yue v. City of Auburn (1992) 3 Cal.App.4th 751, 756-757*.)

(3) Predatory Pricing -

(a) Applicable statutes

Section 17043 **[*21]** provides: "It is unlawful for any person engaged in business within this State to sell any article or product at less than the cost thereof to such vendor, or to give away any article or product, for the purpose of injuring competitors or destroying competition."

The application of this statute is limited by section 17024. Section 17024 provides in pertinent part: "Nothing in this chapter [Bus. & Prof. Code, div. 7, pt. 2, ch. 4, *§ 17000 et seq.*] applies: [P] (1) To any service, article or product for which rates are established under the jurisdiction of the Public Utilities Commission of this State and sold or furnished by any public utility corporation, or installation and repair services rendered in connection with any services, articles or products. [P] (2) To any service, article or product sold or furnished by a publicly owned public utility and upon which the rates would have been established under the jurisdiction of the Public Utilities Commission of this State if such service, article or product had been sold or furnished by a public utility corporation, or installation and repair services rendered in connection with any services, articles or products."

(b) Analysis

In its third **[*22]** cause of action, ASA asserted that Pacific Bell engaged in predatory pricing, in violation of *section 17043*. ASA alleged: "Based on ASA's best estimate of defendants' costs, in dollars, of providing ISP services and DSL modems, defendants, and each of them, have provided their customers with ISP services and have given away DSL modems at a cost below that which it itself incurs to provide them. [P] . . . ASA further alleges that there is a dangerous probability that defendants' conduct, as alleged, will enable them to obtain a monopoly over the DSL market in ASA's market area." ASA alleged more specifically that Pacific Bell gave away for free modems worth approximately $ 80-$ 90 apiece and that Pacific Bell charged residential customers approximately $ 30 per month for providing DSL service, when the actual cost of providing such service was approximately $ 73 per month.

In its demurrer, Pacific Bell asserted that the third cause of action failed because section 17024 made *section 17043* inapplicable to public utility companies selling services pursuant to tariffs. Pacific Bell also said that the cause of action was uncertain, was barred by the ruling in *Verizon Commun. v. Law Off. of Curtis Trinko (2004) 540*

U.S. 398, **[*23]** was barred by the filed rate doctrine, and was insufficient because ASA failed to allege facts to demonstrate that it was injured by restraints on competition.

In the minute order on the demurrer, the trial court stated that *Verizon Commun. v. Law Off. of Curtis Trinko, supra, 540 U.S. 398* did not bar any of the causes of action. However, it held that the third cause of action failed because Pacific Bell's "services were sold under tariffs filed with the [California Public Utilities Commission]" (CPUC) and that such services were not subject to a *section 17043* claim.

On appeal, Manighalam acknowledges that section 17024 barred the portion of his cause of action having to do with the price Pacific Bell charged for its DSL service, because the price was set by tariff. However, he claims that the portion of the cause of action having to do with the allegation that Pacific Bell gave modems away for free was not barred by section 17024. Manighalam claims that he is not aware of any tariff establishing the prices Pacific Bell is permitted to charge for modems.

However, as we stated at the outset, our record on appeal does not contain copies of the applicable tariffs, of which the trial court **[*24]** apparently took judicial notice. Therefore, we cannot review those tariffs to see whether they address only the pricing for the residential DSL service, or whether they also address the pricing for modems. We could, therefore, stop at this point in the analysis and affirm the decision of the trial court with respect to the demurrer on the ground that ASA has not provided an adequate record for review. On appeal, we presume that the order of the trial court is correct. (*Virtanen v. O'Connell (2006) 140 Cal.App.4th 688, 709*.) It is the appellant's burden to show reversible error, by an adequate record. (*Tudor Ranches, Inc. v. State Comp. Ins. Fund (1998) 65 Cal.App.4th 1422, 1433*.)

However, we observe that, while not explicitly conceding the point, Pacific Bell does not directly challenge the assertion that the applicable tariffs did not set a price for modem sales. Rather, Pacific Bell argues, without citation to legal authority, that ASA's pleading was defective because it asserted a violation of *section 17043* based on the *combined* conduct of providing ISP services and DSL modems below cost.

In addition, Pacific Bell maintains that ASA failed to avail itself of a prior opportunity to **[*25]** amend its complaint to cure this defect. As noted above, the court sustained Pacific Bell's demurrer to ASA's second amended complaint, with leave to amend. With respect to the third cause of action, the court stated: "The 3rd cause of action fails as [Pacific Bell's] services were sold under tariffs filed with the CPUC. Such services are not subject to a *B&P § 17043* claim."

Pacific Bell says that ASA did not amend its complaint as to the third cause of action, but rather, that ASA, in its third amended complaint, repeated the allegations of the second amended complaint verbatim, at least as to the third cause of action. Pacific Bell contends that, under the circumstances, case law compels this court to affirm the ruling. "'When a plaintiff elects not to amend the complaint, it is presumed that the complaint states as strong a case as is possible [citation]; and the judgment of dismissal must be affirmed if the unamended complaint is objectionable on any ground raised by the demurrer. [Citations.]' [Citation.]" (*Soliz v. Williams (1999) 74 Cal.App.4th 577, 585*.)

In considering Pacific Bell's point, we are again hampered by the paucity of the record before us. It does not contain copies **[*26]** of either the second amended complaint or the demurrer thereto. Therefore, the record affords us no basis for affirming the ruling on the particular ground offered by Pacific Bell.

What we know is that, in the third amended complaint, ASA alleged that Pacific Bell gave modems away for free and sold its residential DSL service below its cost. The trial court held that the *section 17043* claim was barred because Pacific Bell's services were sold under tariffs. Manighalam asserts that the court erred because the tariffs did not address the issue of the sales price of modems. While Pacific Bell does not attack this assertion, we conclude that Manighalam has failed to provide an adequate record to prove his point. (*Tudor Ranches, Inc. v. State Comp. Ins. Fund, supra, 65 Cal.App.4th at p. 1433*.)

C. SUMMARY JUDGMENT:

(1) Introductory Comment -

Before reaching the merits of the summary judgment issues, we must again note the deficiencies in the record that plague our review. The appellant's appendix contains a copy of the three-page notice of motion and motion for summary judgment. However, it contains only a copy of the face page of Pacific Bell's memorandum of points and authorities in support **[*27]** of its motion. In addition, it contains only the first two pages of ASA's memorandum of points and authorities in opposition to the motion and only the face page of Pacific Bell's reply memorandum. Consequently, we have been deprived of seeing the "guts" of Pacific Bell's motion.

Furthermore, the order granting motion for summary judgment states: "Defendants requested judicial notice of certain tariffs and decisions of the CPUC and FCC in support of their Motion for Summary Judgment. As tariffs and the official acts of administrative agencies are a proper subject for judicial notice, and no objection to such notice was brought, Defendants' Request for Judicial Notice is hereby granted." However, the appellant's appendix, once again, fails to include copies of the request for judicial notice and attachments thereto. Consequently, we are deprived of the opportunity to review the tariffs and certain other materials that Pacific Bell presented in support of its motion.

What ASA has provided is Pacific Bell's separate statement of undisputed facts in support of its motion and ASA's response thereto. It would appear that ASA viewed these items as the only ones of import on appeal. This is **[*28]** not the case. Nonetheless, we will review Manighalam's assertions of error to the extent we are able, based on the parched record before us.

(2) Summary Judgment Review -

"Under summary judgment law, any party to an action, whether plaintiff or defendant, 'may move' the court 'for summary judgment' in his [or her] favor on a cause of action . . . or defense (*Code Civ. Proc., § 437c, subd. (a)*) -- a plaintiff 'contend[ing]

. . . that there is no defense to the action,' a defendant 'contend[ing] that the action has no merit' (*ibid.*). The court must 'grant[]' the 'motion' 'if all the papers submitted show' that 'there is no triable issue as to any material fact' (*id., § 437c, subd. (c)*) -- that is, there is no issue requiring a trial as to any fact that is necessary under the pleadings and, ultimately, the law [citations] -- and that the 'moving party is entitled to a judgment as a matter of law' (*Code Civ. Proc., § 437c, subd. (c)*)." (*Aguilar v. Atlantic Richfield Co. (2001) 25 Cal.4th 826, 843*.)

"[I]n moving for summary judgment, a 'defendant . . . has met' his [or her] 'burden of showing that a cause of action has no merit if' he [or she] 'has shown that one or more elements of the cause **[*29]** of action . . . cannot be established, or that there is a complete defense to that cause of action. Once the defendant . . . has met that burden, the burden shifts to the plaintiff . . . to show that a triable issue of one or more material facts exists as to that cause of action or a defense thereto. . . .' (*Code Civ. Proc., § 437c, subd. (o)(2)*.)" [6] (*Aguilar v. Atlantic Richfield Co., supra, 25 Cal.4th at p. 849*.)

On review of a summary judgment, we "examine the record de novo and independently determine whether [the] decision is correct. [Citation.]" (*Colarossi v. Coty US Inc. (2002) 97 Cal.App.4th 1142, 1149*.)

(3) Third Amended Complaint -

In the third amended complaint, ASA stated: "Plaintiff, a small Internet Service Provider ('ISP') contracted with defendants to provide Digital Subscriber Line ('DSL') services to consumers." It alleged "that defendants violated

---

[6] See now *Code of Civil Procedure section 437c, subdivision (p)(2)*.

Bus. & Prof Code Sections 16727, 17043 and 17200, et seq. by 1) engaging in the unlawful tying of services; 2) engaging in predatory pricing; and 3) by unfairly competing in the marketplace, all to the detriment of plaintiff."

The section 17043 cause of action, **[*30]** for predatory pricing, was resolved by demurrer, as we have already discussed. Only the causes of action based on sections 16727 and 17200 et seq. are at issue in the summary judgment review. However, in his briefing on appeal, Manighalam has failed to address the second cause of action, for violation of section 16727 based on tying of advertising services. [7] Consequently, he has abandoned his appeal as to the ruling on that cause of action. (*Tanner v. Tanner, supra, 57 Cal.App.4th at p. 422, fn. 2*.) We address, in turn, the first cause of action, based on section 16727 and the fourth cause of action, based on section 17200 et seq.

(4) First Cause of Action: Business and Professions Code Section 16727 -

Section 16727 provides: "It shall be unlawful for any person to lease or make a sale or contract for the sale of goods, merchandise, machinery, supplies, commodities for use within the State, or to fix a price charged therefor, or discount from, or rebate upon, such price, on the condition, agreement or understanding that the lessee or purchaser thereof shall not use or deal in the goods, merchandise, machinery, supplies, commodities, or services of a competitor or competitors of the lessor or seller, where the effect of such lease, sale, or contract for sale or such condition, agreement or understanding may be to substantially lessen competition or tend to create a monopoly in any line of trade or commerce in any section of the State."

(a) ASA's allegations

In its third amended complaint, ASA stated in support of its first cause of action: "ASA alleges that at all relevant times defendants . . **[*32]** . provided only 32 ATM circuits to ISPs who leased a T1 circuit, including plaintiff, and dedicated 255 circuits to ISPs who leased a faster and more expensive T3 connection. Plaintiff alleges that there is no technical reason for this distinction; defendants could just as easily assign 255 ATM circuits to both T1 and T3 connections. Plaintiff further alleges that most ISPs, including ASA, neither need nor want the additional speed of the T3. [P] . . . ASA alleges that this condition links the sale of the tying product to the tied product. Specifically, ASA is required by defendants' unlawful condition to lease a product it does not want -- a T3 connection -- in order to obtain a product it does require -- additional ATM circuits."

(b) Pacific Bell's defense

In the three-page notice of motion and motion for summary judgment, Pacific Bell stated: "Plaintiff cannot establish that Defendants sold it any goods, merchandise, machinery, supplies, [or] commodities, an essential element of a cause of action under Business and Professions Code section 16727." Since we do not have Pacific Bell's memorandum of points and authorities in support of its motion, we do not know what legal authorities **[*33]** Pacific Bell cited therein.

However, Manighalam, without citation to the record, assures us that Pacific Bell, in making its motion, "relied heavily upon" *Morrison v. Viacom, Inc. (1998) 66 Cal.App.4th 534*. As that case states, "section 16727 does not apply when the tying item is a service. [Citation.]" (*Id. at p. 546*.) "The term 'services' [as contained in the statute] is used to describe tied items and is not used to described tying items." (*Ibid.) Morrison v. Viacom, Inc., supra, 66*

---

[7] For informational purposes, in framing the second cause of action, ASA, in the third amended complaint, stated: "ASA alleges that . . . defendants . . . would only provide marketing on their own website for customers . . . who purchased T3 lines. Plaintiff alleges that there is no technical reason for doing so; defendants could just as easily provide website marketing for customers purchasing T1 lines. Plaintiff further alleges that most ISPs, including ASA, neither need nor want the additional speed of a T3." The court held that there was no triable issue **[*31]** of fact regarding the second cause of action. It stated, inter alia, that advertising is a service, so no cause of action lies under section 16727, which does not support a cause of action when the tying item is a service.

Cal.App.4th 534 evidently was raised at the trial level, because the court, in granting summary judgment, relied upon it at least in part.

In its order granting summary judgment, the court first stated that ASA proffered no evidence whatsoever in opposition to the motion. It said that ASA did nothing other than repeat its own allegations as contained in the third amended complaint, and that allegations do not constitute evidence in opposition to a motion for summary judgment.

Next, the court, citing Morrison v. Viacom, Inc., supra, 66 Cal.App.4th 534, stated that no cause of action lies under section 16727 when a service is the tying item. It then concluded that the undisputed facts showed that ASA purchased **[*34]** only DSL transport services from Pacific Bell, so that the first cause of action, based on section 16727, necessarily failed.

The court gave six reasons in support of its conclusion, including: "a. Plaintiff's Second Amended Complaint and Third Amended Complaint admit that ATM, T1, and T3 are services. [Citations.] [P] . . . [P] d. Internet Service Providers ('ISPs') such as Plaintiff package Defendants' DSL transport service with their own Internet access service for sale to consumers, but ISPs do not receive equipment, or access to Defendants' equipment, from Defendants. [Citations.] [P] e. Defendants' tariffs, from which Plaintiff placed its orders, define the DSL transport offerings as a service. [Citations.] The terms of these tariffs become incorporated into any contract with a utility and have the force and effect of law. [Citations.] [P] f. Decisions and orders of the California Public Utilities Commission ('CPUC') and the Federal Communications Commission ('FCC') define DSL transport as a service under state and federal law. [Citations.]"

In reviewing this order, we are somewhat hampered by the inadequacy of the record. What we have available to review is Pacific Bell's statement **[*35]** of undisputed facts and ASA's response thereto. As it turns out, this information is enough to show that the trial court was correct.

In its statement of undisputed facts, Pacific Bell quoted four portions of the third amended complaint wherein ASA characterized "T1" lines, "T3" lines, and/or ATM circuits as "services." In its response, ASA did not dispute it had so characterized them, although we happen to observe that ASA was inconsistent in its characterizations in its third amended complaint.

Pacific Bell also quoted two statements from CPUC schedules, five statements from CPUC orders and decisions, four statements from FCC tariffs, and twelve statements from FCC reports, orders, notices and opinions, all describing "T1" lines, "T3" lines, ATM circuits and/or DSL, as services of one nature or another. ASA did not dispute any of the statements. [8]

One of the quoted statements was from a CPUC schedule providing: "'Pacific Bell's FasTrak ATM Cell Relay Service is a fast packet service **[*36]** offering networking capabilities using an industry-recognized technology -- Asynchronous Transfer Mode (ATM). With this high speed, connection-orientated transport service the Utility transmits information in fixed-size segments or cells . . . over various bandwidth capacities.'" It also cited two FCC tariffs and quoted statements therefrom that contained similar information, although they did not name Pacific Bell specifically.

Pacific Bell also cited a CPUC schedule which it characterized as providing that "[a] T1 circuit is simply a service provided over a wire: 'a high performance service providing transmission of 1.544 [T1 or DS1], 3.152, 6.312, 44.736 (DS3, DS3x3, or DS3x12) or 274.176 Mbps . . . . with either an electrical or fiber optic [interface].'"

Furthermore, Pacific Bell quoted an FCC tariff explaining: "'Wholesale Digital Subscriber Line (DSL) Transport Service is a virtual session between Company's ATM network and Customer's designated End User premises utilizing asymmetrical DSL technology over a DSL Line. A DSL Line is the physical facility between the Company's

---

[8] While not disputing any of the statements, ASA did object to the relevancy of some of them. The evidentiary objections were overruled, and Manighalam does not challenge the evidentiary ruling on appeal.

DSLAM . . . and the Network Interface Device (NID) located at the End User premises. Company retains ownership **[*37]** of the overall DSL Line. Company may place special equipment within its DSL Transport and ATM network, to allow for the provisioning and management of multiple applications on each DSL Line. Wholesale DSL Transport Service is intended primarily for Internet Service Provides (ISPs), but may be purchased by any information Service provider or carrier to connect to their End User for the purposes of providing a retail Service.'"

In addition to this FCC tariff addressing ownership of the DSL line, Pacific Bell, in its statement of undisputed fact, cited the declarations of three of its managers who provided explanations concerning such things as ownership of the lines in question. For example, it cited the declaration of Drew Armbruster, product manager of DSL transport for SBC Services, Inc., who said: "Various types of equipment are used by Defendants in order to provide DSL transport service to ISP customers. However, the equipment remains the property of Defendants . . . ." [9]

Reviewing Pacific Bell's statement of undisputed facts, including the aforementioned statements and many others, it is clear that Pacific Bell proffered an abundance of evidence to show that the CPUC and the FCC characterize DSL service, "T1" and "T3" lines, and ATM circuits as part and parcel of a service. Some of the evidence was in the form of tariffs, the significance of which the trial court properly noted.

"The PUC has been vested by the Legislature with broad supervisory and regulatory powers. [Citation.] Pac Bell as a public utility is subject to applicable provisions of the Public Utilities Code. [Citations.] It is required to file tariffs with the PUC covering the terms and conditions, including rates, classifications and attendant liabilities, under which it renders service. [Citation.] 'A public utility's tariffs filed with the PUC have the force and effect of law.' [Citations.]" (*Colich & Sons v. Pacific Bell (1988) 198 Cal.App.3d 1225, 1232*, fns. omitted.)

Pacific Bell met its burden to show that ASA could not establish an element of the first cause of action for violation **[*39]** of *section 16727*, inasmuch as, under that statute, the tying item cannot be a service and Pacific Bell put on evidence to show that only services were at issue.

(c) ASA's burden

The burden shifted to ASA to raise a triable issue of material fact with respect to the first cause of action or a defense thereto. However, ASA did not dispute the statements from the CPUC and FCC schedules, tariffs, reports, opinions, decisions and orders, except with respect to certain relevancy objections that were overruled, as previously noted. Moreover, ASA proffered no contrary evidence. ASA did not meet its burden. The trial court was correct that the first cause of action failed.

(d) Manighalam's arguments on appeal

Manighalam disagrees. He claims that the court decided whether ATM circuits and DSL Internet access are products or services as a matter of law, and erred in doing so. He insists that the issue of whether ATM circuits and DSL Internet access are products or services is a question of fact, which cannot be resolved on summary judgment.

Manighalam misapprehends both the court's orders and the nature of summary judgment proceedings. In the order granting summary judgment, the court cited *Morrison v. Viacom, Inc., supra, 66 Cal.App.4th 534* **[*40]** for the proposition that *section 16727* does not support a cause of action based on a service as the alleged tying item. It did not hold that, based on that case or any other, ATM circuits and DSL Internet access are services as a matter of law. Rather, in the order overruling the demurrer as to the first cause of action, the court stated that the question of whether products or services were at issue required a consideration of fact. Later, in the order granting summary judgment, the court clearly addressed the question as one of fact, and stated that there was no triable issue of material fact as to the first cause of action, because the undisputed facts established that ASA purchased only services.

---

[9] Although ASA objected to the declarations, its objections were overruled in the order granting summary judgment. On appeal, Manighalam does not challenge the order overruling ASA's objections. Moreover, he concedes **[*38]** the one point we note from the declaration of Drew Armbruster, concerning control over the equipment.

Manighalam has cited no portion of the record to show that was error. Rather, the record provided demonstrates that Pacific Bell proffered evidence that ASA did not dispute and ASA proffered no contrary evidence. The court treated the question as one of fact and ASA failed to meet its burden to raise a triable issue of material fact.

(5) Fourth Cause of Action: Business and Professions Code Section 17200 et seq. -

The unfair competition law, set forth in *section 17200 et seq.*, "does not proscribe **[*41]** specific practices. Rather, . . . it defines 'unfair competition' to include 'any unlawful, unfair or fraudulent business act or practice.' [Citation.] Its coverage is 'sweeping, embracing "'anything that can properly be called a business practice and that at the same time is forbidden by law.'"' [Citations.]" (*Cel-Tech, supra, 20 Cal.4th at p. 180*, fn. omitted.) "The statutory language referring to 'any unlawful, unfair or fraudulent' practice . . . makes clear that a practice may be deemed unfair even if not specifically proscribed by some other law." (*Ibid.*)

(a) ASA's allegations

With respect to the fourth cause of action, the third amended complaint stated: "ASA alleges that defendants fill the orders of their PacNet subsidiary faster than the orders of competing ISPs, including plaintiff, coerces ISPs to lease an expensive T3 connection they neither want [n]or require in order to obtain the ATM ports they do need, and give away modems and ISP service to customers, even though defendants incur a loss to do so." ASA further alleged: "The acts and practices of defendants . . . constitute unlawful, unfair, or fraudulent business practices in violation of *California Business and Professions Code Sections 17200, et seq.* **[*42]** Defendants' conduct involves and threatens an incipient violation of California ***antitrust law***, including the above-specified provisions of the Cartwright Act, or otherwise violates the policy or spirit of one of those laws because its effects are comparable to or the same as violations of the law, or otherwise significantly harms or threatens competition." ASA requested general damages, treble damages, special damages, and "restitution or unjust enrichment."

(b) Pacific Bell's defense

In the notice of motion and motion for summary judgment, Pacific Bell stated: "Plaintiff cannot establish that Defendants committed any unfair business practice, an essential element of a cause of action under *Business and Professions Code section 17200*." Once again, because the record on appeal does not contain a copy of Pacific Bell's memorandum of points and authorities in support of the motion for summary judgment, we do not know what legal authorities Pacific Bell cited with respect to its arguments on *section 17200 et seq.* We could end our discussion of the fourth cause of action right here, and hold that Manighalam cannot meet his burden to show error because he has not provided an adequate record **[*43]** for review. (*Tudor Ranches, Inc. v. State Comp. Ins. Fund, supra, 65 Cal.App.4th at p. 1433*.) However, we will continue the discussion with what little information we have in the record.

The statement of undisputed fact was directed to only two matters. The first, as we already know, was whether ASA purchased products or services. The second was the nature of Pacific Bell's advertising program. The statement of undisputed fact, then, was geared toward the determination of the viability of the first and second causes of action under *section 16727*. Because the statement of undisputed fact pertained only to those two matters, we assume that Pacific Bell made only legal arguments with respect to the *section 17200* issues. Whether the legal arguments it made before the trial court were the same as it makes on appeal, we do not know.

In the order granting summary judgment, the court observed that ASA's alleged Cartwright Act violations had failed. Perhaps because the Cartwright Act was the only body of law ASA cited in its third amended complaint in support of its unfair competition claim, and the Cartwright Act claims had failed, the trial court held that Pacific Bell had met its burden to **[*44]** show that one or more elements of the fourth cause of action could not be established or that there was a complete defense thereto, and further that ASA had "failed to plead or present any evidence of an injury to competition from restraints on competition, any statutory violation, or any public policy violation tethered to a specific statute . . . ." Consequently, it held that there were no triable issues of material fact with respect to the fourth cause of action.

The trial court relied upon *Cel-Tech, supra, 20 Cal.4th 163* in rejecting ASA's arguments. As the *Cel-Tech* court stated, in determining whether a plaintiff has stated a cause of action under the unfair competition law, "any finding of unfairness to competitors under *section 17200* [must] be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." (*Id. at pp. 186-187*.) "When a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes *section 17200*, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects **[*45]** are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." (*Id. at p. 187*, fn. omitted.)

As we read the third amended complaint, we too see that ASA alleged no incipient violation of an ***antitrust law*** other than the Cartwright Act. Since, as we have already held, the Cartwright Act provision in question, *section 16727*, does not apply when the alleged tying item is a service, there was no violation, and consequently, no incipient violation, of the Cartwright Act.

There is a separate question as to whether the alleged facts could violate the policy or spirit of the Cartwright Act, without violating the Cartwright Act itself. Again, what arguments the parties made in their papers in support of and in opposition to the motion for summary judgment, we do not know. We are not persuaded by Pacific Bell's assertion on appeal that when a plaintiff fails to state a cause of action under the Cartwright Act any derivative claim he or she may assert under the unfair competition law must necessarily fail. Pacific Bell reads too much into its cited authority.

The Supreme Court in *Cel-Tech, supra, 20 Cal.4th 163* concluded that even if the defendant's **[*46]** actions did not violate the Unfair Practices Act, they might nonetheless violate the unfair competition law. (*Id. at p. 169*.) It expressly stated that "a practice may be deemed unfair [under the unfair competition law] even if not specifically proscribed by some other law." (*Id. at p. 180*.) The case thus left room for an argument that an allegation that was insufficient to state a cause of action under the Cartwright Act might, in a given case, still state a cause of action under the unfair competition law.

The *Cel-Tech* court explained: "'[I]t would be impossible to draft in advance detailed plans and specifications of all acts and conduct to be prohibited [citations], since unfair or fraudulent business practices may run the gamut of human ingenuity and chicanery.' [Citation.]" (*Cel-Tech, supra, 20 Cal.4th at p. 181*, fn. omitted.) True enough, the court also stated that "[a] plaintiff may . . . not 'plead around' an 'absolute bar to relief' simply 'by recasting the cause of action as one for unfair competition.' [Citation.]" (*Id. at p. 182*.) At the same time, it further explained: "The rule does not, however, prohibit an action under the unfair competition law merely because some other **[*47]** statute on the subject does not, itself, provide for the action or prohibit the challenged conduct. To forestall an action under the unfair competition law, another provision must actually 'bar' the action or clearly permit the conduct. There is a difference between (1) not making an activity unlawful, and (2) making that activity lawful." (*Id. at pp. 182-183*.) Here, *section 16727* does not make the tying of services unlawful under the Cartwright Act, yet it also does not make such tying lawful.

Whether or not it would theoretically be possible to state a cause of action under the unfair competition law based on the alleged conduct of Pacific Bell, we are persuaded by Pacific Bell's argument that the cause of action as framed is defective because the unfair competition law does not make available any remedy ASA sought in the third amended complaint. As we recall, ASA requested general and special damages, treble damages, restitution and "unjust enrichment." As Pacific Bell points out in its respondent's brief, those remedies are not available under the unfair competition law.

Under the unfair competition law, "[p]revailing plaintiffs are generally limited to injunctive relief and restitution. **[*48]** [Citations.] Plaintiffs may not receive damages, much less *treble* damages, or attorney fees. [Citations.]" (*Cel-Tech, supra, 20 Cal.4th at p. 179*.) As Pacific Bell points out, ASA, in its third amended complaint, sought restitution, but alleged no basis for the remedy. Indeed, ASA alleged in its third amended complaint that it did not obtain the additional ATM circuits it desired "because it could not justify the cost of a T3 cable." In other words, it did not expend monies on a T3 cable that it sought to have restored to it through restitution.

In his reply brief, Manighalam states: "Restitution of money [Pacific Bell] obtained that, had it not been for [Pacific Bell's] unfair competition, would have been received by ASA is an available remedy." Not surprisingly, he cites no legal authority in support of this proposition. The Supreme Court has rejected such an allegation as the basis for restitution under the unfair claims act, in Korea Supply Co. v. Lockheed Martin Corp. (2003) 29 Cal.4th 1134 (*Korea Supply*).

The *Korea Supply* court "defined an order for 'restitution' as one 'compelling a UCL defendant to return money obtained through an unfair business practice to those persons in **[*49]** interest from whom the property was taken, that is, to persons who had an ownership interest in the property or those claiming through that person.' [Citation.]" (Korea Supply, supra, 29 Cal.4th at pp. 1144-1145.) It held that the remedy the plaintiff therein sought was "not restitutionary because plaintiff [did] not have an ownership interest in the money it [sought] to recover from defendants," explaining that the plaintiff was "not seeking the return of money or property that was once in its possession." (Id. at p. 1149.) The court concluded that "disgorgement of profits allegedly obtained by means of an unfair business practice [was not] an authorized remedy under the UCL where these profits [were] neither money taken from a plaintiff nor funds in which the plaintiff [had] an ownership interest." (Id. at p. 1140.)

Likewise, in the case before us, Manighalam does not seek the return of funds ASA paid to Pacific Bell, or even funds in which ASA had an interest. Rather, "plaintiff relies on general principles of the law of remedies, e.g., that restitution in the broad sense focuses on the defendant's unjust enrichment, rather than the plaintiff's loss. Plaintiff's generalization fails **[*50]** to acknowledge the specific limitation applicable in the UCL context--that restitution means the return of money to those persons from whom it was taken or who had an ownership interest in it. [Citation.] Although this restitution serves to thwart the wrongdoer's unjust enrichment, courts ordering restitution under the UCL 'are not concerned with restoring the violator to the status quo ante. The focus instead is on the victim.' [Citation.] The object is to return to the plaintiff funds in which he or she has an ownership interest. [Citation.] Thus, plaintiff's assertion that defendants received ill-gotten gain does not make a viable UCL claim unless the gain was money in which plaintiff had a vested interest." (Madrid v. Perot Systems Corp. (2005) 130 Cal.App.4th 440, 455.)

As noted above, restitution is not the only remedy available under the unfair competition law; injunctive relief is also available. (Bus. & Prof. Code, § 17203.) As Pacific Bell points out, however, ASA did not request injunctive relief in its third amended complaint. In response, Manighalam states in his reply brief: "ASA's complaint is sufficiently broad to encompass injunctive relief precluding [Pacific Bell] **[*51]** from continuing its specific unfair practices (limitations on ATM circuits, giveaway modems, preferential connection times, etc) or other unfair practices that are proved at time of trial." Whether or not the allegations would have supported a request for injunctive relief had such relief been requested, it remains the case that ASA did not in fact request injunctive relief in its third amended complaint. Since ASA sought only damages, including a damages request disguised as a request for restitution, and damages are unavailable under the unfair competition law, ASA's claim failed as a matter of law.

III

DISPOSITION

The judgment is affirmed. Pacific Bell and SBC shall recover their costs on appeal.

[Savarirayan v. White County Cmty. Hosp.]

United States District Court for the Middle District of Tennessee, Nashville Division

February 10, 2009, Filed

Case No. 2:07-0055

Reporter
2009 U.S. Dist. LEXIS 10933 *; 2009 WL 362462

FRANCIS J. SAVARIRAYAN, Plaintiff, v. WHITE COUNTY COMMUNITY HOSPITAL, et al., Defendants.

Core Terms

Clayton Act, recommended, state court, motions, amend, motion for leave, res judicata, allegations, principles, antitrust, magistrate judge, antitrust claim, summary judgment motion, remaining defendant, summary judgment, amended complaint, plaintiff's claim, defendants', reasons, futile, motion to dismiss, leave to amend, discovery, network, notice

Counsel: **[*1]** Francis J. Savarirayan, M.D. Ex-Major USAF/R Chairman and CEO of Commission on Quality Health Care in America, Plaintiff, Counter Defendant, Pro se, Oswego, IL.

For White County Community Hospital, Community Health Systems, Inc., Defendants, Counter Plaintiffs: Brian D. Cummings, LEAD ATTORNEY, Gideon & Wiseman, Nashville, TN.

For Mark Cain, previous CEO of White County Community Hospital, individually and in his official capacity, Gary Newsome, President of Community Health Systems, Inc., individually and in his official capacity, Defendants: Brian D. Cummings, Clarence J. Gideon, Jr., LEAD ATTORNEYS, Gideon & Wiseman, Nashville, TN.

For Chad Griffin, M.D., Defendant: Daniel Hurley Rader, III, LEAD ATTORNEY, Moore, Rader, Clift & Fitzpatrick, P.C., Cookeville, TN.

For Daniel Barnett, M.D., Blue Cross-Blue Shield of Tennessee, Defendants, Counter Plaintiffs: C. Crews Townsend, LEAD ATTORNEY, Neil A. Brunetz, Miller & Martin, Chattanooga, TN.

For John Wayne Allen, JD, attorney, Defendant: John W. Allen, LEAD ATTORNEY, Cookeville, TN.

Judges: ALETA A. TRAUGER, United States District Judge.

Opinion by: ALETA A. TRAUGER

Opinion

MEMORANDUM

Several matters are pending before the court in this litigation in which the plaintiff **[*2]** is proceeding *pro se.* First, there is Magistrate Judge Griffin's Report & Recommendation ("R&R") (Docket No. 101) and the eight motions that it addressed, that is, defendant John Wayne Allen's two Motions to Dismiss (Docket Nos. 28 and 47), defendants White County Community Hospital ("the Hospital"), Community Health Systems, Inc., ("CHS") and Gary Newsome's Motion for Summary Judgment and two Motions to Dismiss (Docket Nos. 30, 53, and 55, respectively), defendant

Chad Griffin's Motion for Summary Judgment and Motion to Dismiss (Docket Nos. 42 and 46, respectively), and defendants Daniel Barnett and Blue Cross/Blue Shield of Tennessee's (Blue Cross's) Motion for Summary Judgment (Docket No. 59).

Second, there are several motions that have been filed by the plaintiff, Dr. Savarirayan, following the issuance of the R&R. [1] (Docket Nos. 104, 109, 112, 121, 125, and 145.) Docket Nos. 104, 109, and 121, while being captioned as "Motion[s] to Dismiss the Motion for Summary Judgment" of a particular defendant, should properly be considered continued or supplemental responses to the particular defendant(s) motion for summary judgment. Consistent with the approach of the Magistrate, the court **[*3]** will "grant" these "motions" for the limited and sole purpose of considering the material therein. Similarly, Docket Nos. 112 and 125, while titled as an "Omnibus Motion" or an "appeal" are, in fact, simply the plaintiff's objections to the R&R, and, therefore, the court will "grant" these "motions," again, only for the limited and sole purpose of considering the argument therein. Docket No. 145, on the other hand, is the plaintiff's motion for leave to amend the Complaint, a motion that the court will consider, and deny, for the reasons expressed below. Finally, the Hospital has filed a Motion to Strike, for privacy reasons, a document from this court's ECF system and the case file. (Docket No. 146.) The court will grant that motion, for the reasons expressed below.

FACTUAL AND PROCEDURAL BACKGROUND

The factual and procedural background of this case was thoroughly addressed by Magistrate Judge Griffin in the R&R, and, therefore, it is not necessary to fully recount that history. (See Docket No. 101 at 2-7.) For the purposes of understanding the basis for this opinion, however, it is worthwhile to briefly discuss some of the undisputed key points, which are drawn from the R&R. First, this case involves a physician, Dr. Francis J. Savarirayan, who, in October 2002, entered into a Recruitment Agreement with the Hospital. In January 2004, after a period of discord between the parties, the Hospital and Dr. Savarirayan parted ways, with Dr. Savarirayan signing a "Settlement Agreement and Release of Claims" (the "Release"), which provided that Dr. Savarirayan broadly relinquished any claims against the Hospital (and its related entities and employees) arising out of the Recruitment Agreement. In exchange for this Release, the Hospital released its rights to pursue repayment **[*5]** of $ 260,789.44 in salary that it had previously paid to Dr. Savarirayan.

Despite signing the Release, Dr. Savarirayan pursued litigation against the Hospital and other entities. After initial discussions with attorney Tom Nebel, Dr. Savarirayan retained defendant attorney John Wayne Allen, who filed a lawsuit in the Tennessee Circuit Court for White County on January 26, 2007, asserting various claims on behalf of Dr. Savarirayan against various defendants. On March 14, 2007, a notice of voluntary dismissal with prejudice was filed by Allen, and an order of non-suit was entered by the Tennessee state court on April 9, 2007, dismissing all claims against all defendants with prejudice. The plaintiff, apparently disturbed by Allen's actions, fired Allen and pursued his state court litigation *pro se.* By order entered on November 19, 2007, the Tennessee state court set aside the prior order of dismissal. The state court subsequently conducted a hearing on the merits and dismissed all of the plaintiff's claims against all defendants with prejudice, concluding proceedings on January 17, 2008.

While the state court litigation was in flux, on August 24, 2007, the plaintiff, proceeding *pro se,* **[*6]** filed this action, which, while based largely on the same set of facts as the state court action, added additional defendants and additional claims, that is, a Clayton Act (antitrust) claim against defendants Cain, Griffin, Barnett and Blue Cross, and a RICO claim against all defendants. (Docket No. 1.) In an Amended Complaint filed on September 6, 2007, the plaintiff added additional factual allegations against defendant Pincus and added a request for declaratory and

---

[1] Consistent with Magistrate Judge Griffin's assessment, the court considers Dr. Savarirayan to be the lone plaintiff in this case. As the R&R notes, "[t]he caption of the complaint lists both the plaintiff and the Commission on Quality Health Care in America ("CQHCA"), which is described as a 'Federal entity set up under Title IV of *Public Law 99-660*-The Health Care Quality Improvement Act of 1986.' … However, the CQHCA **[*4]** is not specifically named as a plaintiff in the body of the complaint and all references to 'plaintiff' in the complaint are clearly intended to mean the plaintiff." (Docket No. 101 at 5.)

injunctive relief directed at defendant Pincus, who was, as discussed below, subsequently dismissed without prejudice from this litigation. [2] (Docket No. 6.)

On December 21, 2007, the plaintiff filed a notice to dismiss this case, without prejudice. **[*7]** By order dated January 7, 2008, Magistrate Judge Griffin dismissed defendants Cain, Nebel, Pincus, Pekalo, PDBB, NPDB, and the three "John Doe" defendants. Pursuant to *Federal Rule of Civil Procedure 41*, however, the plaintiff could not dismiss, without prejudice, the remaining defendants, that is, the Hospital, CHS, Newsome, Griffin, Barnett, Blue Cross, and Allen, because those defendants had either filed an answer or moved for summary judgment at the time the request for dismissal was filed.

After summary judgment and motion to dismiss briefing, Magistrate Judge Griffin issued her Report & Recommendation on September 12, 2008. (Docket No. 101.) Judge Griffin concluded (1) that the claims against the Hospital, CHS, and Newsome were barred by the doctrine of *res judicata* and the Release; (2) that the claims against Blue Cross, Barnett, and Griffin were barred by *res judicata* and, therefore, it was not necessary to consider these defendants' other stated grounds for relief; and (3) that the claims against defendant Allen should be dismissed for failure to state a claim upon which relief could be granted. Therefore, the R&R made a recommendation as to how all of the pending motions should **[*8]** be resolved and recommended that the case be dismissed as to all remaining defendants. (*Id.* at 17.) [3]

On September 26, 2008 and again on September 29, 2008, the plaintiff filed what can fairly be considered to be objections to the R&R. (Docket Nos. 112 and 125.) The plaintiff did not make specific objections to specific provisions of the R&R. Rather, he argued that the R&R should be vacated because it is supposedly unfounded in "the truth or the facts," because the plaintiff did not have adequate time for discovery, and because Judge Griffin issued the R&R on the same day that the plaintiff filed a series of materials responsive to various defendants' motions. (*Id.*)

In light of these objections, the plaintiff asked (1) for "a *de novo* review of the entire case"; (2) that the stay of discovery be lifted; (3) that Judge Griffin recuse herself and vacate her orders if she has any of several listed biases or interests; (4) that the defendants' dispositive motions be dismissed and all defendants be re-instated for trial; (5) that the plaintiff be provided with notice and an opportunity to cure from this court if there are any "magic words" that he failed to use in his filings that might make a difference in the outcome of the litigation; and, finally, (6) that his **[*10]** objection serve as notice of appeal to the Sixth Circuit if this court rejected his arguments therein. (*Id.*)

On January 20, 2009, the plaintiff filed his motion for leave to amend his Complaint, asking that the court allow him to amend his Complaint such that his claims would, allegedly, no longer be barred by *res judicata* principles. (Docket No. 145.) That day, for reasons that are somewhat unclear, the plaintiff filed an affidavit re-stating his medical qualifications and certain other points. (Docket No. 146.) The plaintiff also attached about forty pages of additional documents, tangentially related to the allegations in this case. (*Id.*) The next day, the Hospital filed a

---

[2] In a response to defendant Pekalo's motion to dismiss, the plaintiff attached another amended Complaint, which added a Title VII claim directed against defendant Pekalo. (Docket No. 35 Ex. 1.) There was no motion for leave to amend filed, and defendant Pekalo has been dismissed, without prejudice, from this litigation. Therefore, consistent with Magistrate Judge Griffin's assessment, the court views the Docket No. 6 Amended Complaint as the plaintiff's operative Complaint.

[3] Formally, Judge Griffin recommended that (1) defendant Allen's First Motion to Dismiss (Docket No. 28) be granted and his Second Motion to Dismiss (Docket No. 47) be denied; (2) the Hospital, CHS, and Newsome's Motion for Summary Judgment and their two Motions to Dismiss (Docket Nos. 30, 53, 55) be granted; (3) defendant Griffin's Motion for Summary Judgment (Docket No. 42) be granted and his Motion to Dismiss (Docket No. 46) be denied; and that (4) Barnett and Blue Cross' Motion for Summary Judgment (Docket No. 59) be granted. According to the R&R, the denial of Allen and Griffin's second motion to dismiss would be technical, and the Magistrate recommended that the plaintiff's claims be dismissed against these defendants on the basis of their respective initial dispositive motion. Judge Griffin also noted that the counterclaims of the Hospital, CHS, Newsome, Barnett, and Blue Cross were not affected by the R&R. (Docket No. 101 at 17.) Since the R&R was issued, the parties have provided no further briefing on any counterclaims, and, therefore, this court's opinion does not bear on **[*9]** any counterclaims either.

motion to strike one of those pages because, it claims, confidential patient information is improperly disclosed on that page. (Docket No. 147.)

I. Standard of Review

Under *Federal Rule of Civil Procedure 72(b)* and *28 U.S.C. § 636(b)(1)*, the court is required to make a *de novo* determination of any part of the Magistrate Judge's R&R to which specific objection has been made. The district judge may accept, reject, or modify the recommended decision, receive further evidence, or recommit the matter to the magistrate **[*11]** judge with instructions. *Fed. R. Civ. P. 72(b)(3)*.

II. Analysis

As noted above, pending before the court are Magistrate Judge Griffin's R&R, the motions that were addressed therein, and two additional motions, that is, the plaintiff's motion for leave to amend his Complaint, and the Hospital's Motion to Strike. When a motion for leave to amend is filed while the R&R is pending, it is proper for the district court to address the R&R first. [4] *City of Columbus v. Hotels.com, L.P., 2007 U.S. Dist. LEXIS 49775, 2007 WL 2029036, *2 (S.D. Ohio July 10, 2007)*.

II. Magistrate Judge Griffin's R&R

As discussed above, Magistrate Judge Griffin recommended that the plaintiff's case be dismissed, with prejudice, against all remaining defendants, that is, the Hospital, CHS, Newsome, Griffin, Barnett, Blue Cross, and Allen. (Docket No. 101 at 14-17.) With the exception of defendant Allen, the primary basis for Judge Griffin's recommendation is that the plaintiff's claims against these defendants are barred by *res judicata* principles. [5] (*Id.* at 9-14.) Judge Griffin also noted that, even if *res judicata* did not bar the plaintiff's claims, the Hospital, CHS, and Newsome should still be entitled to summary judgment on the plaintiff's claims against them because of the Release that the plaintiff signed in January 2004. (*Id.* 12-13.) As to defendant Allen, Judge Griffin recommended that his first Motion to Dismiss be granted, because the plaintiff failed to plead any facts by which one could construe that the alleged legal malpractice caused the plaintiff an injury. (*Id.* at 16.)

As noted above, in his "Omnibus Motions," which this court interprets as the plaintiff's objections to the R&R, the plaintiff did not make any specific objections to Judge Griffin's specific findings, instead arguing that the R&R should be vacated because it is supposedly unfounded in "the truth or the facts," because the plaintiff did not have adequate time for discovery, and because Judge Griffin issued the R&R on the same day that the plaintiff filed a series of materials responsive to various motions. (Docket Nos. 112 and 125.) As to the latter two arguments, they are plainly without merit. The plaintiff has failed to show how additional time for discovery would change the result in this case, which rests entirely on legal principles that will not change no matter the time for discovery allotted. Further, this court has reviewed the materials that the plaintiff filed on the day Judge Griffin issued her R&R, and this court makes the final order. The court will consider, however, whether Judge Griffin's R&R is supported by "the

---

[4] The Hospital's Motion to Strike cites a provision in the Tennessee Rules of Court -- Federal and the Health Insurance Portability and Accountability Act (HIPAA) for the notion that the private information about certain patients disclosed on page 15 of the plaintiff's 44-page filing contained in Docket No. 146 should be stricken. (Docket No. 147.) While the Hospital has failed to show its standing to enforce these patients' HIPAA rights, it is inappropriate and unnecessary for the private medical information of patients not remotely involved in this proceeding to be part of the publicly available case file or to be posted on the ECF. The court will order the page removed **[*12]** from the case file and the ECF but will not sanction the plaintiff, as the Hospital also requested. (*Id.*)

[5] Apparently, the Tennessee state court never issued a final order on the plaintiff's **[*13]** legal malpractice claim against Allen, and, therefore, the R&R concluded that this claim is not barred by *res judicata* principles. (See Docket No. 145 Ex. 1.)

[*14] truth or the facts," that is, based on the plaintiff's objection, the court will consider the legal foundation for the recommendations in the R&R. [6]

This court concludes, with one exception that does not affect the outcome of the litigation as to the remaining defendants, that Judge Griffin's recommendation as to how the motions pending before her should be resolved was well founded.

As noted above, Judge Griffin concluded that the claims **[*15]** against the Hospital, CHS, Newsome, Griffin, Blue Cross and Barnett should be dismissed based on *res judicata* principles. In the R&R, Judge Griffin correctly noted that a federal court must give to a state court judgment the same preclusive effect as would be given that judgment under the law of the state in which the judgment was rendered, here Tennessee. (Docket No. 101 at 10, citing, among other case law, *Hutcherson v. Lauderdale County, 326 F.3d 747, 758 (6th Cir. 2003))*. Judge Griffin also correctly found that, under Tennessee law, the doctrine of *res judicata* bars "all claims that were actually litigated or *could* have been litigated in the first suit between the same parties." (*Id.* citing *Am. Nat'l Bank & Trust Co. of Chattanooga v. Clark, 586 S.W. 2d 825, 826 (Tenn. 1979))* (emphasis added). Noting that the "instant action is a virtual carbon copy of the action which was dismissed with prejudice on the merits by the state court," Judge Griffin concluded, for every defendant but defendant Allen, that all of the claims in the federal action could have been brought in state court and, therefore, were barred by *res judicata* principles. (Docket No. 101 at 10.)

By way of review, in **[*16]** his state court Amended Complaint (Docket No. 42 Ex. B), the plaintiff alleged claims for (1) breach of contract, (2) violation of *42 U.S.C. § 1981*, (3) tortious interference with a business relationship, (4) violation of the Tennessee Consumer Protection Act, and (5) legal malpractice and fraud. In his federal Amended Complaint, the plaintiff re-alleged these five claims, and added Clayton Act (antitrust) and RICO claims. (Docket No. 6.)

Obviously, the state law causes of action and the *section 1981* claim could have been brought in the state court, and, indeed, they were brought in state court. Therefore, Judge Griffin correctly concluded that those claims are barred here by *res judicata* principles. That said, the R&R does not review, claim by claim, whether the federal claims that the plaintiff added in his federal complaint (RICO and the Clayton Act) could have been brought in the state court action. This court's review of the law indicates that it is well settled that claims under RICO may be properly brought in either state or federal court. *Tafflin v. Levitt, 493 U.S. 455, 466, 110 S. Ct. 792, 107 L. Ed. 2d 887 (1990)*. Therefore, the R&R correctly recommended that the RICO claim be dismissed based on *res judicata* **[*17]** principles.

The Clayton Act claim, however, is a different story; jurisdiction for Clayton Act claims is exclusively federal. *See e.g. Tafflin, 493 U.S. at 463* (contrasting Clayton Act and RICO); *In re Copper Antitrust Litig., 436 F.3d 782, 796 (7th Cir. 2006)* (noting the Clayton Act's "exclusive federal jurisdiction"); *Roma Const. Co. v. aRusso, 96 F.3d 566, 582 (1st Cir. 1996)* (Lynch, J. concurring) (noting "the fact that actions under the Clayton Act may only be brought in federal court.") The fact that Clayton Act claims may only be brought in federal court means that the R&R is incorrect when it recommends that the plaintiff's Clayton Act claims be dismissed because they could have been brought in state court. Therefore, the court must consider the merits of the plaintiff's Clayton Act/antitrust claim, in light of the relevant defendants' motions for summary judgment. [7]

---

[6] As mentioned in the factual discussion, following Judge Griffin's R&R, the plaintiff has continued to file various materials, motions, and responses, and, in one of those responses, the plaintiff specifically challenges the *res judicata* finding by arguing that the finding is "irrelevant" because the Tennessee court was not "fair and impartial" and a federal court should not be "subservient" to a state court. (Docket No. 134.) This argument is not supported by anything more than the plaintiff's rampant speculation and innuendo. Further, it is a well-settled principle of comity that the forum in which the civil plaintiff must complain about any unfair treatment at the state court trial level is the state court of appeals, not the federal district court.

[7] *Federal Rule of Civil Procedure 56(c)* provides that summary judgment shall be granted if "the pleadings, the discovery and disclosure materials on file, and any affidavits show that there is no genuine issue as to any material fact and that the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. **[*18]** To prevail, the moving party must meet the burden of

In his Clayton Act/antitrust claim, the plaintiff alleges that former defendant Cain, and current defendants Griffin, Barnett and Blue Cross "acted in a concerted coordinated manner to limit and destroy [the plaintiff's] practice, so that he will not be able to compete against the white ethnic American Medical School graduates practicing in that area." (Docket No. 35 Ex. 1 at 21.) The plaintiff argues that the defendants achieved this result through a two-step process: (1) Cain, as the plaintiff's superior, took a number of administrative measures to undermine the plaintiff's practice and (2) Barnett and Blue Cross denied the plaintiff's request to participate in the Blue Cross/Blue Shield network, but allowed a less qualified "white ethnic American" to participate in the network. (*Id.* at 21-22.) The plaintiff alleges that Blue Cross believes it is "untouchable" because of the large financial contributions **[*19]** it, allegedly, makes to influential political officials. (*Id.* at 22.)

The remaining defendants subject to the plaintiff's Clayton Act/antitrust claim, that is, defendants Griffin, Barnett and Blue Cross, all moved for summary judgment on this claim for reasons aside from *res judicata.* In Barnett and Blue Cross's Brief in Support of their Motion of Summary Judgment, they argue that their only involvement with the plaintiff was to review the plaintiff's 2003 request for "Network Credentialing," which they denied after determining that the plaintiff had not been honest in providing information in support of his request. (Docket No. 60 at 8.) In light of this, these defendants argue that the plaintiff has "failed to plead even the most basic facts supporting" his Clayton Act/antitrust claim. (*Id.* at 9.) In support of his motion for summary judgment, defendant Griffin likewise argues that there are no facts to support the plaintiff's claims, including his Clayton Act/antitrust claim. (Docket No. 44 at 7.)

These defendants are entitled to summary judgment on the plaintiff's Clayton Act/antitrust claims. In order to maintain an antitrust claim, the plaintiff must allege an "antitrust injury," **[*20]** that is an injury of the sort that the antitrust laws were designed to prevent; in other words, the plaintiff must allege an injury to competition, not just allege anti-competitive behavior or behavior that is otherwise tortious or violates federal law. *Expert Masonry v. Boone County, 440 F.3d 336, 347-48 (6th Cir. 2006)*.

Plainly, there are several fatal problems with the plaintiff's Clayton Act/antitrust claim. First, as to defendant Griffin, there is no actual allegation of antitrust wrongdoing, which makes Griffin entitled to summary judgment on this claim. As to Barnett and Blue Cross, the plaintiff alleges behavior that, perhaps, if shown to be true, might be considered discriminatory, but the behavior alleged certainly does not implicate federal ***antitrust law*** and the required "antitrust injury." *Id.* Indeed, an "antitrust injury" arises in a narrowly defined circumstance, in which the plaintiff alleges that, in addition to being potentially tortious or otherwise unlawful, the conduct was injurious to competition generally. *Id.* It is hard to conceive of a circumstance in which one doctor being denied network privileges or being removed from practice at a hospital could be injurious **[*21]** to competition generally, and the plaintiff has certainly failed to allege such a circumstance here. Therefore, the defendants are entitled to summary judgment on the plaintiff's Clayton Act/antitrust claim.

As a final point on the R&R, Judge Griffin recommended that defendant Allen's first Motion to Dismiss be granted, because the plaintiff failed to allege, as required, that any mistakes by Allen as an attorney were the cause of the plaintiff's damages. (Docket No. 101 at 15 citing *Gibson v. Trant, 58 S.W. 3d 103, 108 (Tenn. 2001))*. As Judge Griffin pointed out, because the state court judge set aside the order of dismissal and allowed the state court case to proceed after the plaintiff had discharged Allen, "any damages suffered by the plaintiff which were attributable to how the case had been previously handled by Defendant Allen were cured and the plaintiff remained in the same position in that lawsuit as he had been prior to the entry of dismissal." (*Id.* at 16.) On the basis of this sound reasoning, the court concludes that the R&R makes the appropriate recommendation as to the disposition of defendant Allen's Motion to Dismiss.

Therefore, the court will adopt the R&R's recommendation **[*22]** as to how the motions that were before Magistrate Judge Griffin should be resolved. The court provides the more extended discussion above only to clarify an important point of law related to the Clayton Act. [8]

---

proving the absence of a genuine issue of material fact as to an essential element of the opposing party's claim. *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 323, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*; *Logan v. Denny's, Inc., 259 F.3d 558, 566 (6th Cir. 2001)*.

III. Motion For Leave To Amend

The plaintiff filed a motion for leave to amend his Complaint on January 20, 2009. (Docket No. 145.) In his motion, the plaintiff claims that recently "in Illinois, for the first time [the plaintiff] was able to get legal opinion with reference to **[*23]** Matters of Law. It is the firm opinion of his attorney for matters of law, that a second amended complaint should be filed, to prevent the defendants from escaping the consequences of their actions, on legal technicalities." (Docket No. 145 at 1.) While the proposed amended Complaint contains the same factual allegations as the operative Complaint (including those against dismissed defendants), the plaintiff is very clear that this proposed amended Complaint is only directed at the parties who were not dismissed, without prejudice, from this litigation. (*Id.*)

As to the remaining defendants, the factual allegations in the proposed Complaint and the operative Complaint appear identical. The only distinction between the two Complaints is that some of the claims are different. As with the previous Complaint, based on the same allegations, the plaintiff asserts antitrust and RICO claims. The plaintiff adds a claim for fraud (primarily against CHS, the Hospital and Newsome), defamation, violation of "Title VII/federal Civil Rights" law, and conspiracy to violate his rights under the *Seventh*, *Thirteenth*, and *Fourteenth Amendments to the U.S. Constitution*. (Docket No. 145 Ex. 1.) The plaintiff **[*24]** also recasts his legal malpractice claim, alleging that defendant Allen took money from Blue Cross and the Hospital to "throw the case." (*Id.*) On various grounds, the remaining defendants have all filed briefing objecting to the plaintiff's motion for leave to amend.

Rule 15(a) of the Federal Rules of Civil Procedure provides that leave to amend a pleading should be freely given "when justice so requires." *Fed. R. Civ. P. 15(a)*. The district court is to consider several factors when determining whether to grant a motion for leave to amend, such as "undue delay in filing, lack of notice to the opposing party, bad faith by the moving party, repeated failure to cure deficiencies by previous amendments, undue prejudice to the opposing party, and futility of amendment." *Wade v. Knoxville Utilities Bd., 259 F.3d 452, 458 (6th Cir. 2001)*. Delay in filing, by itself, is not a sufficient reason to deny a motion for leave to amend. *Id.*

Here, delay, prejudice, and futility all dictate that the court should deny the plaintiff's motion for leave to amend. As to delay and prejudice, the *Wade* case is squarely on point. There, the plaintiff, without excuse, "waited a year and a half" before filing his **[*25]** motion for leave to amend. *Id.* Here, the plaintiff also waited about a year and one-half, without any reasonable excuse for doing so. [9] In *Wade,* the Sixth Circuit noted that, "when amendment is sought at a late stage in the litigation, there is an increased burden to show justification for failing to move earlier." *Id.* Here, the plaintiff utterly fails to meet that burden.

Recognizing that delay, by itself, is an insufficient basis for denying a motion for leave to amend, the *Wade* court, in circumstances very similar to this case, determined that prejudice to the defendants, combined with the delay, also indicated that the court should deny the motion for leave to amend. In *Wade,* motions for summary judgment on all of the claims in the initial complaint had already been filed at the time the motion for leave to amend was filed, as is the case here. *Id.* Given the delay and the status of the case, the *Wade* court concluded that it would be unduly prejudicial to the defendants **[*26]** to ask them to now prepare defenses to a whole new set of claims. *Id. at 459*. The same burden is imposed here; the defendants have now been defending this litigation in two forums for several years, and it would be unduly prejudicial, at this late stage, to ask the defendants to commit more time and

---

[8] As noted above, in his R&R objections, the plaintiff asked to be provided with notice and an opportunity to cure from this court if there are any "magic words" that he failed to use in his briefing that might make a difference in the outcome of the litigation, and the plaintiff asked that his R&R objection serve as a notice of appeal to the Sixth Circuit if this court rejected his arguments therein. (Docket Nos. 112 and 125.) The request for "notice of magic words" is unsupported by any law of which this court is aware. Also, importantly, the plaintiff's R&R objections do not serve as a notice of appeal to the Sixth Circuit. The plaintiff must make a formal appeal based on the relevant rules of procedure.

[9] The court does not view the plaintiff's receiving some kind of advice from a lawyer in Illinois who has not entered an appearance of record in this case on behalf of the plaintiff as a reasonable excuse for the delay.

resources to defending this case, particularly in light of the plaintiff's delay in filing his motion for leave to amend and his limited justification for that delay.

Further, it would be futile for the court to grant this motion for leave to amend. Plainly, for the reasons discussed above in the R&R section, the antitrust and RICO claims would not be viable. While it is not clear who is the target of the plaintiff's "Title VII/Civil Rights Act" claims, even assuming that these claims are broadly directed at all remaining defendants, these claims could have been brought in the state court litigation and are, therefore, barred under *res judicata* principles. *See* *Yellow Freight Sys., Inc. v. Donnelly, 494 U.S. 820, 821, 110 S. Ct. 1566, 108 L. Ed. 2d 834 (1990)*. Additionally, the plaintiff's fraud claim (directed at CHS, Newsome and the Hospital and their conduct in inducing the plaintiff to sign the Recruitment Agreement) is **[*27]** barred by *res judicata* principles and the Release that the plaintiff signed when he left the Hospital, which released the Hospital, its parent (i.e. CHS) and their employees (i.e. Newsome) from liability for any and all claims "in any way relating to or arising out of the Recruitment Agreement." (Docket No. 9 Ex. H.) As the R&R noted, "the terms of the Settlement Agreement are clear and unambiguous and bar [the plaintiff] from pursuing" such claims against the Hospital, CHS, and Newsome. (Docket No. 101 at 13 citing *Evans v. Tillett Bros. Const. Co., 545 S.W.2d 8, 11 (Tenn. Ct. App. 1976))*. [10]

Likewise, the plaintiff's defamation claim would not be successful. In one of his more tempered allegations, the plaintiff contends that Blue Cross' refusal to grant him Network privileges and the Hospital's refusal to **[*28]** employ him "caused a cloud to hang over Plaintiff's qualifications as a Physician," resulting in a loss of business. (Docket No. 145 Ex. 1.) This claim, despite its increased focus and clarity, would still fail. Not only would this claim be barred by *res judicata* principles, but, setting aside that and the requirements to state a *prima facie* case of defamation, as Blue Cross points out, the defamation claim would be time-barred, as it concerns events that occurred in 2003 and 2004, and the statute of limitations is six months for slander and one year for libel. (Docket No. 150 at 4 citing *T.C.A. § 28-3-103*; *T.C.A. § 28-3-104*.)

The plaintiff's conspiracy claim is similarly futile. The plaintiff does not explain the basis of his allegation of conspiracy to violate the *Seventh*, *Thirteenth*, and *Fourteenth Amendments*. As to the *Seventh Amendment*, which concerns the right to a civil trial by jury, the plaintiff does frequently mention his frustration with the fact that this case has not been heard by a jury, but the facts of this case fail to show any sort of conspiracy by these defendants to violate that right. As to the *Thirteenth* and *Fourteenth Amendment* violations, it is possible that **[*29]** the plaintiff is attempting to state a claim under *Section 1983*, but the plaintiff would have to show a constitutional violation by a person acting under color of state law, something which does not appear implicated by the facts of this case. *West v. Atkins, 487 U.S. 42, 48, 108 S. Ct. 2250, 101 L. Ed. 2d 40 (1988)*.

Finally, while the plaintiff has re-cast his legal malpractice claim, he has failed to address the fundamental issue raised in the R&R, which is that the plaintiff cannot show that any of Allen's legal mistakes caused him any harm. Therefore, it would likewise be futile to bring this claim. In sum, the plaintiff's motion for leave to amend will be denied because of delay, substantial prejudice, and futility.

CONCLUSION

For the reasons stated herein, the court agrees with the disposition of the motions as described in Judge Griffin's Report and Recommendation. Also, the plaintiff's motion for leave to amend will be denied, and the Hospital's Motion to Strike will be granted. The court considers all pending motions resolved, and all claims raised by the plaintiff in this action will be dismissed, with prejudice, as to Defendants White County Community Hospital, Community Health Systems, Inc., Gary Newsome, Chad **[*30]** Griffin, Daniel Barnett, Blue Cross/Blue Shield of Tennessee, and John Wayne Allen.

---

[10] The rest of the "fraud" claim is a lengthy discussion of what the plaintiff perceives as a "fraudulent liaison" between the defense attorneys in this case and the Tennessee judicial system to get his case transferred to favorable, hand-picked judges. (*Id.*) The court does not view this allegation as helpful to the plaintiff's fraud claim against the defendants in this case.

An appropriate order will enter.

LexisNexis® Headnotes

Antitrust & Trade Law > General Overview

HN1[] **Antitrust & Trade Law**

Federal ***antitrust law*** exists for the protection of competition, not competitors.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Energy & Utilities Law > Oil & Petroleum Products > Gasoline Fuels > Gasoline Dealers & Distributors

Energy & Utilities Law > Antitrust Issues > Pricing Conduct

HN2[] **Sherman Act, Scope**

The motor vehicle fuel provisions of the Wisconsin Unfair Sales Act, *Wis. Stat. § 100.30*, are unconstitutional because they violate the Sherman Act's prohibition against restraints of trade. *15 U.S.C.S. § 1*.

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN3[] **Summary Judgment, Supporting Materials**

Under *Fed. R. Civ. P. 56(c)*, summary judgment is proper if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law.

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Absence of Essential Element

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN4[] **Burdens of Proof, Absence of Essential Element**

The plain language of *Fed. R. Civ. P. 56(c)* mandates the entry of summary judgment, after adequate time for discovery and upon motion, against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN5[] **Estoppel, Collateral Estoppel**

Collateral estoppel, also known as "issue preclusion," refers to the effect of a judgment in foreclosing litigation in a subsequent action of an issue of law or fact that has been actually litigated and decided in the initial action.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN6[] **Estoppel, Collateral Estoppel**

Collateral estoppel is a judge-made doctrine that serves the dual purpose of protecting litigants from the burden of re-litigating an identical issue with the same party or his privy and of promoting judicial economy by preventing needless litigation. Although there is no strict test for privity, the focus is whether the non-party was adequately represented in the original action. A conclusion that the interests of nonparties are sufficiently aligned with earlier litigants would be impossible unless, among other things, the earlier litigants would have been adequate representatives of the later litigant(s).

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Governments > State & Territorial Governments > Claims By & Against

HN7[] **Estoppel, Collateral Estoppel**

As a general matter, an alignment of interests does not compel a conclusion in favor of privity and adequate representation. This is particularly true when collateral estoppel is asserted against a governmental entity. A state, representing the interests of the people of the state, should not be prevented from litigating an issue on behalf of the people merely because the issue has been previously litigated by private parties in an action to which the state was not a party.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Governments > State & Territorial Governments > Claims By & Against

Civil Procedure > Parties > Intervention > General Overview

Governments > Legislation > General Overview

HN8[] **Estoppel, Collateral Estoppel**

There is no authority for the proposition that a governmental entity provided notice of a constitutional challenge to one of its statutes in the context of private litigation must intervene or suffer the consequences. Such a construction is plainly wrong. While a state attorney general may have a general duty to defend state statutes against constitutional attack, this does not mandate intervention and justify the application of preclusion principles. For better or worse, intervention is a strategic decision left to the better judgment of the attorney general.

Constitutional Law > Supremacy Clause > Supreme Law of the Land

HN9[] **Supremacy Clause, Supreme Law of the Land**

U.S. Const. art. VI provides that the laws of the United States shall be the supreme law of the land, any thing in the Constitution or laws of any state to the contrary notwithstanding. *U.S. Const. art. VI, cl. 2*.

Constitutional Law > Supremacy Clause > Federal Preemption

HN10[] **Supremacy Clause, Federal Preemption**

The doctrine of preemption is derived from the *Supremacy Clause, U.S. Const. art. VI, cl. 2*, which operates to prevent the enforcement of state laws that conflict with federal laws or regulations.

Constitutional Law > Supremacy Clause > Federal Preemption

HN11[] **Supremacy Clause, Federal Preemption**

A federal law may preempt a state law expressly, impliedly through the doctrine of conflict preemption, or through the doctrine of field (also known as complete) preemption. Put simply, when federal and state laws conflict, the doctrine of preemption is applied, and it resolves the conflict in favor of the federal statute.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN12[] Sherman Act, Scope

See 15 U.S.C.S. § 1.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN13[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

Courts normally apply a "rule of reason" analysis when analyzing a particular restraint of trade. Under the rule of reason, the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature and effect.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN14[] Per Se Rule Tests, Manifestly Anticompetitive Effects

Per se antitrust liability is reserved for only those agreements that are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Energy & Utilities Law > Antitrust Issues > Pricing Conduct

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN15[] Per Se Rule & Rule of Reason, Per Se Violations

The Wisconsin Unfair Sales Act, Wis. Stat. § 100.30, authorizes and enforces resale price maintenance among competitors, a per se violation of 15 U.S.C.S. § 1 of the Sherman Act since the early years of national antitrust enforcement.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Energy & Utilities Law > Antitrust Issues > Pricing Conduct

HN16[] Scope, Exemptions

Not all restraints imposed upon private actors by government units necessarily constitute unilateral action outside the purview of 15 U.S.C.S. § 1 of the Sherman Act. Certain restraints may be characterized as "hybrid," in that nonmarket mechanisms merely enforce private marketing decisions. Where private actors are thus granted a degree of private regulatory power, the regulatory scheme may be attacked under *§ 1*. The Wisconsin Unfair Sales Act, *Wis. Stat. § 100.30*, is a "hybrid" restraint. When a state compels retailers to follow a parallel price policy, it demands private conduct which the Sherman Act forbids.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN17[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

To the extent that the provisions of the Wisconsin Unfair Sales Act, *Wis. Stat. § 100.30*, create vertical price restraints, they also facilitate the creation of horizontal price fixing. A horizontal cartel among competing manufacturers or competing retailers that decreases output or reduces competition in order to increase price is, and ought to be, per se unlawful.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Energy & Utilities Law > Antitrust Issues > Pricing Conduct

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN18[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The Wisconsin Unfair Sales Act, *Wis. Stat. § 100.30*, is inconsistent with *15 U.S.C.S. § 1* of the Sherman Act under both the rule of reason and the per se rule.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN19[] **Scope, Exemptions**

The Sherman Act does not apply to the anticompetitive conduct of a state acting through its legislature. Therefore, even if a state statute conflicts with the Sherman Act, it may be saved from preemption under Parker and the doctrine of "antitrust immunity." The United States Supreme Court espouses a two-part test for antitrust immunity. First, the challenged restraint must be clearly articulated and affirmatively expressed as state policy. Second, the policy must be actively supervised by the state itself.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN20[] **Exemptions & Immunities, Parker State Action Doctrine**

For purposes of state antitrust immunity, a statute's effectiveness in accomplishing its purpose is immaterial to whether the statute is clear in stating its purpose.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN21[] **Exemptions & Immunities, Parker State Action Doctrine**

To determine whether a pricing restraint is "actively supervised" for purposes of state antitrust immunity, courts examine whether the state establishes prices or reviews the reasonableness of the price schedules; whether it regulates the terms of fair trade contracts; and whether it monitors market conditions or engages in any pointed reexamination of the program.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN22[] **Exemptions & Immunities, Parker State Action Doctrine**

A state may not simply authorize price setting and enforce the prices established by private parties.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN23[] **Cartels & Horizontal Restraints, Price Fixing**

For purposes of state antitrust immunity, enforcement matters little when the act being enforced creates a horizontal pricing mechanism. The national policy in favor of competition cannot be thwarted by casting a gauzy cloak of state involvement over what is essentially a private price-fixing arrangement.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN24[] **Exemptions & Immunities, Parker State Action Doctrine**

Mere debate or discussion without the undertaking of any action does not satisfy the active supervision requirement for state antitrust immunity. The mere presence of some state involvement or monitoring does not suffice.

Constitutional Law > Supremacy Clause > Federal Preemption

HN25[] **Supremacy Clause, Federal Preemption**

The legislative enactments of a state must comply with federal law. Failure to comply simply results in preemption under the *Supremacy Clause, U.S. Const. art. VI, cl. 2*.

Energy & Utilities Law > Antitrust Issues > Pricing Conduct

HN26[] **Antitrust Issues, Pricing Conduct**

Under the Wisconsin Unfair Sales Act, *Wis. Stat. § 100.30*, the State of Wisconsin has displaced competition among gasoline retailers without substituting an adequate system of regulation. This the state cannot do, no matter the rationale.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Energy & Utilities Law > Antitrust Issues > Pricing Conduct

HN27[] **Exemptions & Immunities, Parker State Action Doctrine**

The Wisconsin Unfair Sales Act, *Wis. Stat. § 100.30*, creates an illegal restraint of trade in violation of *15 U.S.C.S. § 1* of the Sherman Act as it pertains to the sale of motor vehicle fuel in the State of Wisconsin. Moreover, the Unfair Sales Act does not qualify for antitrust immunity under Parker. Therefore, the Unfair Sales Act is unconstitutional with respect to its motor vehicle fuel provisions.

Civil Procedure > Remedies > Injunctions > General Overview

Governments > State & Territorial Governments > Claims By & Against

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

HN28[] **Remedies, Injunctions**

A court may enjoin state officers who threaten and are about to commence proceedings, either of a civil or criminal nature, to enforce against parties affected an unconstitutional act, violating the Federal Constitution. The prospect of suit to enforce an unconstitutional law supplies the necessary irreparable injury.

Judges: HON. RUDOLPH T. RANDA, Chief Judge.

Opinion by: RUDOLPH T. RANDA

Opinion

[*851] DECISION AND ORDER

At issue in this case are the motor vehicle fuel provisions of the Wisconsin Unfair Sales Act (the "Unfair Sales Act"), *Wis. Stat. § 100.30*. The express purpose of this depression-era legislation is to restrain the "practice of selling certain items of merchandise below cost" and to protect "merchants who fail because of the competition of those who use such methods…" *§ 100.30(1)*. At the same time, ***HN1***[] federal ***antitrust law*** exists for "the protection of competition, not competitors." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L.*

Ed. 2d 701 (1977). The Court finds **[**2]** that ***HN2***[] the Act's motor vehicle fuel provisions are unconstitutional because they violate the Sherman Act's prohibition against restraints of trade. *See* *15 U.S.C. § 1*.

BACKGROUND

Flying J, Inc. ("Flying J") is a Utah corporation that operates travel plazas in Black River Falls and Oak Creek, Wisconsin. The defendants, J.B. Van Hollen and Rod Nilsestuen, are charged with enforcement of the Unfair Sales Act.

I. The Unfair Sales Act

The Unfair Sales Act was enacted in 1939, when the average retail price of gasoline was 18.8 cents per gallon. *See* *Wis. Stat. § 100.30*. The Unfair Sales Act currently mandates a minimum mark-up of 9.18% above the "average terminal price," a proxy for wholesale costs. The purported purpose of the 9.18% markup is to "cover a proportionate part of the cost of doing business." *§ 100.30(2)(am)(1m)(c)*. In the 69 years following its enactment, the minimum markup formula (originally 6%) was amended only once. In 1997, the Wisconsin legislature amended the markup formula to require a 6% markup above **[*852]** certain actual costs *or* a 9.18% markup above the "average terminal price," whichever is greater. *§ 100.30(2)(am)(1m)(c)*. This amendment took effect in Wisconsin on August 1, 1998.

In August **[**3]** 1998, the average retail price of regular gasoline in the United States was $ 1.03, and the average retail price of diesel was $ 1.01. Applying Wisconsin's 9.18% minimum markup to 1998 prices, and assuming that the retailer purchases at "average terminal price" under the Act, a gallon of motor fuel that retails at between $ 1.01 and $ 1.03 per gallon has a built in markup price between $ .08 and $ .09 per gallon.

Since the 1997 bill, the Wisconsin legislature has not adjusted the markup formula despite intervening changes in technology, economic conditions, and rising prices in the oil and gas industries. In May 2007, gasoline and diesel prices were as follows:

> . In the Midwest region of the United States, the retail price of regular gasoline per gallon reached **$ 3.32** per gallon, and the price of diesel fuel reached **$ 2.78** per gallon.
>
> . Prices for fuel in Wisconsin (charged by competitors of Flying J) reached **$ 3.49** per gallon for regular gasoline and **$ 2.99** per gallon for diesel fuel.
>
> . Applying Wisconsin's 9.18% minimum markup and assuming that the retailer purchases at "average terminal price" under the statute, a gallon of gasoline that retails at **$ 3.43** per gallon has a built in markup **[**4]** price of approximately **$ .29** per gallon. Likewise, a gallon of diesel that retails at **$ 2.99,** has a built in markup price of approximately **$ .25** cents per gallon. *(See* D. 36, Decl. of Richard Peterson, P 6).

In May/June 2008, gasoline and diesel prices were as follows:

> . In the Midwest region of the United States, the retail price of regular gasoline per gallon reached **$ 3.98** per gallon, and the average price of diesel fuel reached **$ 4.61** per gallon.
>
> . In May 2008, prices for fuel in Wisconsin (charged by competitors of Flying J) reached **$ 4.199** per gallon for regular gasoline and **$ 4.859** per gallon for diesel fuel.
>
> . Applying Wisconsin's 9.18% minimum markup and assuming that the retailer purchases at "average terminal price" under the statute, a gallon of gasoline that retails at **$ 3.98** per gallon has a built in markup price of approximately **$ .33** per gallon. Likewise, a gallon of diesel that retails at **$ 4.61,** has a built in markup price of approximately **$ .39** cents per gallon. *(See* D. 36, Decl. of Richard Peterson, P 7).

While gasoline and diesel prices increased between 300% and 360% from 1998 through 2008, during the same ten years inflation has been approximately 33%. Flying J, because **[**5]** of its efficiencies, can sell motor fuel with substantially less markup than the imposed 9.18% markup over the "average terminal price" and still make a reasonable profit.

II. Prior Action

On March 12, 2007, Flying J filed its amended answer and affirmative defenses in a previous case, *Lotus Business Group LLC v. Flying J Inc.,* Case No. 07-C-144. Therein, Flying J challenged the constitutionality of the Unfair Sales Act as it applies to motor vehicle fuel. The parties consented to jurisdiction before Magistrate Judge William Callahan.

In a letter to Attorney General J.B. Van Hollen, Flying J informed the State of Wisconsin of its constitutional challenge to the Statute. Flying J attached copies of the Complaint and Amended Answer. **[*853]** Flying J filed a motion for summary judgment, contending that the Statute was unconstitutional under the Sherman Act and the *Supremacy Clause*. Flying J provided a copy of this motion to Attorney General Van Hollen. In a letter directly to Judge Callahan, the Wisconsin Attorney General's Office acknowledged receiving Flying J's letters and its notice of the proceedings, and informed Judge Callahan of the State's decision not to appear or participate. The letter **[**6]** further informed Judge Callahan that the "Attorney General may seek to appear if the issue of the constitutionality of a statute or ordinance is raised on appeal."

On October 12, 2007, after full summary judgment briefing by the parties and the submission of a record of undisputed evidence, Judge Callahan granted Flying J's motion for summary judgment. Judge Callahan held that the motor vehicle fuel provisions of the Statute were unconstitutional under the *Supremacy Clause of the United States Constitution*. *See Lotus Business Group LLC v. Flying J, Inc., 532 F. Supp. 2d 1011 (E.D. Wis. 2007)*. Judge Callahan then denied a motion to alter or amend judgment. *Id.* The State of Wisconsin chose not to intervene in the Prior Action at any time, including for purposes of reconsideration, and neither Lotus Business Group nor the Wisconsin Attorney General's Office appealed the Court's final judgment.

Despite the Court's ruling in the Prior Action, the State of Wisconsin continues to require Flying J to issue motor fuel reports to the State under the Unfair Sales Act. Thus, on October 12, 2007, the State of Wisconsin sent an enforcement letter to Flying J under the statute concerning Flying J's **[**7]** alleged fuel prices. On October 30, 2007, Flying J responded by informing the State of Wisconsin of Judge Callahan's decision and order finding the Act unconstitutional. Despite Judge Callahan's ruling, the State of Wisconsin continues to require Flying J and other motor fuel retailers to issue pricing reports to the Department of Agriculture under the Statute, with the implicit threat of enforcement actions, civil penalties or other remedies to follow.

Flying J brought the instant action to enjoin the State of Wisconsin from enforcing the Unfair Sales Act. Both parties filed motions for summary judgment.

ANALYSIS

HN3[] Under *Rule 56(c)*, summary judgment is proper "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law." *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. ***HN4***[] The "plain language of *Rule 56(c)* mandates the entry of summary judgment, after adequate time for discovery and upon motion, against a party who fails to make a showing sufficient to establish the existence of an element essential to that **[**8]** party's case, and on which that party will bear the burden of proof at trial." *Celotex, 477 U.S. at 322*.

I. Collateral Estoppel

Flying J argues that the State of Wisconsin should be collaterally estopped from litigating the constitutionality of the Unfair Sales Act. ***HN5***[] Collateral estoppel, also known as "issue preclusion," refers to the "effect of a judgment in foreclosing litigation in a subsequent action of an issue of law or fact that has been actually litigated and decided in the initial action." *LaSalle Nat'l Bank v. County of DuPage, 856 F.2d 925, 930 n.2 (7th Cir. 1988)*.

[*854] ***HN6***[] Collateral estoppel is a judge-made doctrine that serves the "dual purpose of protecting litigants from the burden of re-litigating an identical issue with the same party or his privy and of promoting judicial economy by preventing needless litigation." *Parklane Hosiery Co. v. Shore, 439 U.S. 322, 326, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979)*. Although there is no strict test for privity, the focus is whether the non-party was adequately represented in the original action. *See* *United States ex rel. Yankton Sioux Tribe v. Gambler's Supply, Inc., 925 F. Supp. 658, 664 (D.S.D. 1996)* (citing *Meza v. General Battery Corp., 908 F.2d 1262, 1266 (5th Cir. 1990))*; **[**9]** *Tice v. American Airlines, Inc., 162 F.3d 966, 972 (7th Cir. 1998)* ("a conclusion that the interests of the nonparties were sufficiently aligned with the earlier litigants would be impossible unless, among other things, the earlier litigants would have been adequate representatives of the later litigant(s)").

Flying J argues that Lotus Group was an adequate representative for the State of Wisconsin in the Prior Action. ***HN7***[] As a general matter, an alignment of interests does not compel a conclusion in favor of privity and adequate representation. This is particularly true when, as here, estoppel is asserted against a governmental entity. *See* *Kerr-McGee Chemical Corp. v. Hartigan, 816 F.2d 1177, 1180-81 (7th Cir. 1987)* (the State of Illinois, "representing the interests of the people of the state, [should not] be prevented from litigating an issue on behalf of the people merely because the issue has been previously litigated by private parties in an action to which the state was not a party").

Flying J presumes adequate representation because Lotus Group argued in support of the Unfair Sales Act's constitutionality, and the Attorney General is now pursuing many (if not all) of the same arguments. **[**10]** A private party necessarily has different motives for the pursuit and allocation of resources to litigation than does a governmental entity. That many of the same arguments are being parroted by the Attorney General is not surprising. The Attorney General still brings his own perspective and expertise into the equation. He should not be precluded from having his day in court only because the same issue arose in the context of a private dispute. *See* *Kerr-McGee, 816 F.2d at 1180 n. 4* ("to assume that private individuals can properly be viewed as representative of a particular government" is a "daring analytical leap").

To continue the point, in the Prior Action, Lotus Group sought relief under the Statute's parallel enforcement scheme. *See* *Wis. Stat. § 100.30(5m)* (allowing a private cause of action for "temporary or permanent injunctive relief or an action against the person for *3 times the amount of any monetary loss sustained or an amount equal to $ 2,000,* whichever is greater, multiplied by each day of continued violation, together with costs, including accounting fees and reasonable attorney fees") (emphasis added). Therefore, Lotus Group's interest at least potentially related to **[**11]** the recovery of its own economic losses that were caused by Flying J's unfair sales practices. In this action, Flying J is attempting to enjoin the State of Wisconsin from enforcing the penalty provisions of the Unfair Sales Act. [1] The distinction **[*855]** between the State seeking enforcement and a private party (Lotus Group) attempting to recover damages is obvious. The State's interest in enforcing the Act relates to the regulation of unfair competition in the sale of motor vehicle fuel. A private suit may encourage compliance with the Act's provisions, but this does not mean that Lotus Group was an adequate representative for the State of Wisconsin as it relates to enforcement of the Unfair Sales Act. *See* *Kerr-McGee at 1181* (comparing the private interests of those living near a waste facility with the interests of the State of Illinois, which is "interested not only in improving the welfare of those who live around the facility but also with ensuring that the interests of the people of the State of Illinois as a whole are not adversely affected").

---

[1] The State may "commence an action on behalf of the state to recover a forfeiture of not less than $ 50 nor more than $ 500 for the first violation **[**12]** and not less than $ 200 nor more than $ 2,500 for each subsequent violation." *§ 100.30(4)*. The State may also issue a "special order" requiring a retailer (such as Flying J) to cease and desist sales in violation of the Unfair Sales Act, under penalty of forfeiture "not less than $ 200 nor more than $ 5,000 for each violation." *§ 100.30(5)(a)*.

Finally, Flying J argues that the Attorney General should be collaterally estopped because he was given notice and an opportunity to intervene in the Prior Action. *See* *Fed. R. Civ. P. 5.1(a)(2)*; *28 U.S.C. § 2403(b)* (requiring certification to the Attorney General of a State and an opportunity to intervene when the constitutionality of a state statute is drawn in question); *Wis. Stat. § 806.04(11)*. To the contrary, ***HN8***[] there is no authority for the proposition that a governmental entity provided notice of a constitutional challenge to one of its statutes in the context of private litigation must "intervene or suffer the consequences. Such a construction is plainly wrong." *Estate of Kunkel v. United States, 689 F.2d 408, 420 (3d Cir. 1982)* (Becker, J., concurring) (citing legislative history). While the Attorney General may have a general duty to defend **[**13]** Wisconsin statutes against constitutional attack, this does not mandate intervention and justify the application of preclusion principles. For better or worse, intervention is a strategic decision left to the better judgment of the Attorney General.

II. Preemption

HN9[] Article VI of the Constitution provides that the laws of the United States "shall be the supreme Law of the Land . . . any Thing in the Constitution or Laws of any State to the Contrary notwithstanding." *U.S. Const. art. VI, cl. 2*. ***HN10***[] The doctrine of preemption is derived from the *Supremacy Clause*, which "operates to prevent the enforcement of state laws that conflict with federal laws or regulations." *Fifth Third Bank ex rel. Trust Officer v. CSX Corp., 415 F.3d 741, 745 (7th Cir. 2005)*. ***HN11***[] "A federal law may preempt a state law expressly, impliedly through the doctrine of conflict preemption, or through the doctrine of field (also known as complete) preemption." *Boomer v. AT & T Corp., 309 F.3d 404, 417 (7th Cir. 2002)*. Put simply, when federal and state laws conflict, the doctrine of preemption is applied, and it resolves the conflict in favor of the federal statute. *See* *United States v. Palumbo Bros., Inc., 145 F.3d 850, 862 n.6 (7th Cir. 1998)*.

A. [14] The Sherman Act**

Section 1 of the Sherman Act provides that ***HN12***[] "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. ***HN13***[] Courts normally apply a "rule of reason" analysis when analyzing a particular restraint. Under the rule of reason, "the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the **[*856]** relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature and effect." *County Materials Corp. v. Allan Block Corp., 502 F.3d 730, 735 (7th Cir. 2007)*. ***HN14***[] *Per se* liability "is reserved for only those agreements that are 'so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality.'" *Texaco Inc. v. Dagher, 547 U.S. 1, 5, 126 S. Ct. 1276, 164 L. Ed. 2d 1 (2006)*.

Flying J challenges the Unfair Sales Act's motor fuel provisions as a *per se* restraint of trade in violation of the Sherman Act. The Court agrees that ***HN15***[] the Act authorizes and enforces resale price **[**15]** maintenance among competitors,"a *per se* violation of *§ 1* of the Sherman Act since the early years of national antitrust enforcement." *324 Liquor Corp. v. Duffy, 479 U.S. 335, 341, 107 S. Ct. 720, 93 L. Ed. 2d 667 (1987)*.

To illustrate, the Act allows motor fuel retailers to match (but not undercut) their competitors' prices. *See* *Wis. Stat. § 100.30(6)(a)7*; *Wis. Admin. Code § ATCP 105.009(4)*. It forbids retailers from selling motor vehicle fuel below cost, which is based on the average posted terminal price plus a minimum markup of 9.18%. *See* *Wis. Stat. §§ 100.30(2)(am)(1m)(c)*; *100.30(2)(a)*; *100.30(3)*. In addition, the State's evidence confirms that retailers must hold their posted prices for at least 24 hours. (D. 28, Grunewald Affidavit, P 6). The minimum markup percentage creates a range in which competitors may engage in collusive parallel pricing, which is exacerbated as the wholesale price of gasoline fluctuates. Therefore, the Act is a *per se* restraint of trade because it authorizes and enforces a parallel (or horizontal) pricing policy. "Mandatory industrywide resale price fixing is virtually certain to reduce interbrand competition as well as intrabrand competition, because it prevents manufacturers and wholesalers **[**16]** from allowing or requiring retail price competition." *324 Liquor Corp., 479 U.S. at 342*.

The State argues that the Unfair Sales Act does not violate the Sherman Act because there is no "concerted action." Rather, the State attempts to characterize the restraint of trade as nothing more than a "unilateral act" of its legislature. The State relies on *Fisher v. City of Berkeley, 475 U.S. 260, 106 S. Ct. 1045, 89 L. Ed. 2d 206 (1985)*, which involved a rent control ordinance. The Court held that there was no concerted action and no Sherman Act violation because "control over the maximum rent levels of every affected residential unit has been unilaterally removed from the owners of those properties and given to the Rent Stabilization Board." *Fisher, 475 U.S. at 267*. "A restraint imposed unilaterally by government does not become concerted-action within the meaning of the statute simply because it has a coercive effect upon parties who must obey the law. The ordinary relationship between the government and those who must obey its regulatory commands whether they wish to or not is not enough to establish a conspiracy." *Id.*

However, the Court in *Fisher* clarified that ***HN16***[] "[n]ot all restraints imposed upon private actors by government **[**17]** units necessarily constitute unilateral action outside the purview of *§ 1* [of the Sherman Act]. Certain restraints may be characterized as 'hybrid,' in that nonmarket mechanisms merely enforce private marketing decisions. Where private actors are thus granted 'a degree of private regulatory power,' the regulatory scheme may be attacked under *§ 1*." *Id. at 267-68* (internal citations omitted). For many of the reasons already stated, the Unfair Sales Act is a "hybrid" restraint. When a **[*857]** state "compels retailers to follow a parallel price policy, it demands private conduct which the Sherman Act forbids." *Id. at 268* (quoting *Schwegmann Bros. v. Calvert Distillers Corp., 341 U.S. 384, 389, 71 S. Ct. 745, 95 L. Ed. 1035, 60 Ohio Law Abs. 81 (1951)*); *see also* *California Retail Liquor Dealers Assn. v. Midcal Aluminum, Inc., 445 U.S. 97, 103, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)* (State of California's system for wine pricing "plainly constitutes resale price maintenance in violation of the Sherman Act" because "the wine producer holds the power to prevent price competition by dictating the prices charged by wholesalers").

Finally, the State argues that the restraint should be judged according to a "rule of reason" analysis. *See* *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007)*. **[**18]** *Leegin* overruled longstanding precedent and held that vertical price restraints (typically between a manufacturer and a retailer) should be judged according to a "rule of reason" and are no longer *per se* unreasonable. *Leegin, 127 S. Ct. at 2725*. Presumably, the State means to say that the restraint imposed by the Unfair Sales Act is a vertical restraint. However, the restraint here is also horizontal because it effects competing gasoline retailers in Wisconsin. *See Lotus Business Group, 532 F. Supp. 2d at 1028* (***HN17***[] "to the extent that the provisions of the Wisconsin statute create vertical price restraints, they also facilitate the creation of horizontal price fixing"). *Leegin* reaffirmed that a "horizontal cartel among competing manufacturers or competing retailers that decreases output or reduces competition in order to increase price is, and ought to be, *per se* unlawful." *Leegin at 2717*.

Admittedly, the Supreme Court's pronouncements in *Midcal* and *324 Liquor* are somewhat confusing regarding the distinction between horizontal and vertical restraints. *See* *324 Liquor at 342* ("Although the horizontal restraint in *Midcal* may have provided an additional reason for invalidating the statute, **[**19]** our decision in *Midcal* rested on the 'vertical control' of wine producers, who held 'the power to prevent price competition by dictating the prices charged by wholesalers'"). To the extent the distinction is relevant, the Court agrees with Judge Callahan when he states that ***HN18***[] the Unfair Sales Act "is inconsistent with *§ 1* of the Sherman Act under both the rule of reason and the *per se* rule." *Lotus Business Group at 1028*.

As in *Lotus Business Group,* Flying J submitted a Federal Trade Commission study and a report from the Wisconsin Policy Research Institute, both of which conclude that the Unfair Sales Act restricts competition and harms consumers in the form of higher gas prices. (D. 35-4, Exhibit C; D. 35-5, Exhibit D). According to the FTC,

> the Act aims to protect individual competitors, not competition, thereby discouraging pro-competitive price-cutting. Moreover, the Act defines 'cost' in a way that lacks a firm economic foundation and likely leads to significantly higher prices. Finally, we believe that the Act is unnecessary, both because scholarly studies and court decisions indicate that anticompetitive below-cost pricing happens infrequently, and because the federal antitrust **[**20]** laws already prohibit below-cost pricing.

(D. 35-4 at 2). Similarly, the Wisconsin Policy Research Institute analyzed data which suggested that "the law has indeed kept gasoline prices higher than would otherwise be the case." The Institute concluded that the Act "benefits retail gas station owners at the expense of consumers **[*858]** and should be repealed." (D. 35-5 at 7). The State fails to contradict or undermine this evidence. In other words, the State confusingly argues in favor of a rule of reason but then fails to argue why the Act is a reasonable restraint.

B. Antitrust immunity

In *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*, the Supreme Court held that ***HN19***[] the Sherman Act does not apply to "the anticompetitive conduct of a State acting through its legislature." *Town of Hallie v. Eau Claire, 471 U.S. 34, 38, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)*. Therefore, even though the Unfair Sales Act conflicts with the Sherman Act, it may be saved from preemption under *Parker* and the doctrine of "antitrust immunity." The Supreme Court espouses a two-part test for antitrust immunity. First, the challenged restraint must be "clearly articulated and affirmatively expressed as state policy." *Midcal, 445 U.S. at 105*. Second, the policy must be **[**21]** "actively supervised" by the State itself. *See 324 Liquor at 343*.

The parties are in essential agreement that the first part of the test is met. In this respect, the Court agrees with Judge Callahan that the purpose of the Unfair Sales Act -- to regulate the sale of merchandise below cost in order to prevent deceptive advertising and unfair methods of competition -- is clearly stated by the Act itself. *See Lotus Business Group at 1019* (noting that ***HN20***[] the statute's "effectiveness in accomplishing its purpose is immaterial to whether the statute is clear in stating its purpose"). However, the second part of the test -- active supervision -- is not satisfied.

As an initial matter, the State argues that the Unfair Sales Act meets the active supervision requirement because it does not delegate any degree of control over the markup percentage to private parties. The State seizes on a footnote in *324 Liquor Corp.* where the Court observed that a "simple 'minimum markup' statute requiring retailers to charge 112 percent of their *actual wholesale cost* may satisfy the 'active supervision' requirement, and so be exempt from the antitrust laws under *Parker." 324 Liquor Corp. at 345 n.6* (emphasis added). **[**22]** While it is true that the Unfair Sales Act's markup percentage is fixed, the markup is not based on actual costs. Instead, it is based on the "average posted terminal price" without regard to actual costs. *See Wis. Stat. §§ 100.30(2)(am)(1m)(c)*; *100.30(2)(a)*. As the Court explained, the statute at issue in *324 Liquor Corp.* was not a "simple minimum markup statute because it impose[d] a markup on the 'posted bottle price,' a price that may greatly exceed what the retailer actually paid for the liquor." *Id.* The same is true here as in *324 Liquor Corp.* The "average posted terminal price" may be significantly higher than the actual cost to a particular retailer.

Therefore, some type of state supervision is required, both with regard to the markup percentage and the "average posted terminal price." ***HN21***[] To determine whether a pricing restraint is "actively supervised," courts examine whether the State "establishes prices" or "reviews the reasonableness of the price schedules;" whether it "regulate[s] the terms of fair trade contracts;" and whether it "monitor[s] market conditions or engage[s] in any 'pointed reexamination' of the program." *Midcal at 105*. The Unfair Sales Act's markup percentage was **[**23]** changed by the Wisconsin legislature only one time, from 6% to 9.8% in 1997. [2] More **[*859]** glaring, there is no program or effort to "determine whether the 'average posted terminal price' bears a close (or any) relationship to the actual price paid by retailers." *Lotus Business Group at 1023*. ***HN22***[] A State may not "simply authorize price setting and enforce the prices established by private parties." *Midcal at 105*.

The State argues that it undertakes enforcement efforts to ensure compliance with the Unfair Sales Act. These efforts do nothing to ensure the reasonableness of gas prices in Wisconsin. In other words, ***HN23***[] enforcement

---

[2] As the FTC observed, the Act employs "one of the steepest minimum markups on retail fuels in the country. . . . [T]he Act's use of the 9.18% measure -- as well as the 3% and 6% measures -- appears completely arbitrary. . . In fact, the minimum markup percentages do not, as the Act suggests they should, accurately reflect a 'proportionate part of the cost of doing business.'" D. 35-4 at 5.

matters little when the Act being enforced creates a horizontal pricing mechanism. "The national policy in favor of competition cannot be thwarted by casting such a gauzy cloak of state involvement **[**24]** over what is essentially a private price-fixing arrangement." *Midcal at 105*.

The State argues that it engages in analysis at the administrative and legislative level. ***HN24***[] "Mere debate or discussion without the undertaking of any action" does not satisfy the active supervision requirement. *Lotus Business Group at 1024*; *see also 324 Liquor at 345 n.7* ("Neither the 'monitoring' by the SLA, nor the periodic reexaminations by the state legislature, exerts any significant control over retail liquor prices or markups"); *Patrick v. Burget, 486 U.S. 94, 101, 108 S. Ct. 1658, 100 L. Ed. 2d 83 (1988)* ("The mere presence of some state involvement or monitoring does not suffice"). The Court also rejects the State's arguments that these are policy arguments best left to the state legislature. To the contrary, ***HN25***[] the legislative enactments of the State of Wisconsin must comply with federal law. Failure to comply simply results in preemption under the *Supremacy Clause*. Stated another way, ***HN26***[] the State of Wisconsin "has displaced competition among [gasoline] retailers without substituting an adequate system of regulation." *324 Liquor at 345*. This the State cannot do, no matter the rationale.

IV. Declaration -- Permanent Injunction

For the foregoing **[**25]** reasons, ***HN27***[] the Unfair Sales Act creates an illegal restraint of trade in violation of *§ 1* of the Sherman Act as it pertains to the sale of motor vehicle fuel in the State of Wisconsin. Moreover, the Act does not qualify for antitrust immunity under *Parker.* Therefore, the Unfair Sales Act is unconstitutional with respect to its motor vehicle fuel provisions.

Under *Ex Parte Young, 209 U.S. 123, 156, 28 S. Ct. 441, 52 L. Ed. 714 (1908)*, ***HN28***[] the Court may enjoin state officers "who threaten and are about to commence proceedings, either of a civil or criminal nature, to enforce against parties affected an unconstitutional act, violating the Federal Constitution." Flying J filed this lawsuit as a "first strike" to prevent the defendants' attempts to enforce the Unfair Sales Act. The "prospect of suit" to enforce an unconstitutional law supplies the necessary irreparable injury. *See Morales v. Trans World Airlines, Inc., 504 U.S. 374, 382, 112 S. Ct. 2031, 119 L. Ed. 2d 157 (1992)*.

NOW, THEREFORE, BASED ON THE FOREGOING, IT IS HEREBY ORDERED THAT:

1. Flying J's motion for summary judgment [D. 15, 37] is **GRANTED;**

2. The defendants' motion for summary judgment [D. 27] is **DENIED;**

[*860] 3. The motor vehicle fuel provisions of the Unfair Sales Act are unconstitutional; and

4. **[**26]** The defendants are enjoined from enforcing the motor vehicle fuel provisions of the Unfair Sales Act.

Dated at Milwaukee, Wisconsin, this 11th day of February, 2009.

SO ORDERED,

/s/ Rudolph T. Randa

HON. RUDOLPH T. RANDA

Chief Judge

CIVIL MINUTES - GENERAL

PROCEEDINGS: CV 08-5758-GW(PJWx) - DOMESTIC DEFENDANTS' MOTION TO DISMISS (filed 11/21/08)

DEFENDANT DEPO AUTO PARTS INDUSTRIAL CO., LTD.'S JOINDER TO DOMESTIC DEFENDANT'S MOTION TO DISMISS (filed 01/28/09)

SACV08-1158-GW(PJAVx) - PLAINTIFF'S MOTION FOR APPOINTMENT OF INTERIM LEAD COUNSEL AND FOR ENTRY OF SCHEDULING ORDER (filed 12/18/08)

Hearing is held. The tentative circulated is hereby adopted as the Court's final ruling (attached). In the matter of, CV 08-5758-GW(PJWx), the Domestic Defendants' Motion to Dismiss and Defendant **[*2]** Depo Auto Parts Industrial Co., Ltd.'s Joinder to Domestic Defendant's Motion to Dismiss, are **granted with leave to amend**. Plaintiff will file an amended complaint by no later than February 23, 2009.

In the matter of SACV 08-1158-GW(PJWx), the Plaintiff's Motion for Appointment of Interim Lead Counsel and for Entry of Scheduling Order is **continued** to **February 19, 2009 at 8:30 a.m.**

A Scheduling Conference is set for **February 19, 2009 at 8:30 a.m.**

IT IS SO ORDERED.

I. BACKGROUND

Plaintiff Sabry Lee, Inc. ("Sabry Lee" or "Plaintiff") is suing Defendants Genera Corporation ("Genera"), Maxzone Vehicle Lighting Corp. ("Maxzone"), E-Lite Automotive, Inc. ("E-Lite"), TYC Brother Industrial Co., Ltd. ("TYC"), Depo Auto Parts Industrial Co., Ltd. ("Depo") and Eagle Eyes Traffic Industrial Co., Ltd ("Eagle Eyes") (collectively, "Defendants") based on an alleged "predatory pricing" scheme in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*. This action is the first-filed of many actions (and the only one that is not a putative class action) bringing the same or similar claims, all of which have now been related and transferred to this Court. The factual allegations are as follows.

Defendants are charged with engaging **[*3]** in a conspiracy to fix prices below cost to eliminate Plaintiff as a competitor in the importation, distribution and sale of aftermarket automotive lighting products as retribution for Plaintiff's unwillingness to "abide" an agreement to fix high and arbitrary prices. (Complaint ¶¶ 1, 21(a)). Defendants, in order to subsidize the below cost prices, also allegedly entered into and engaged in an agreement to raise prices above competitive levels on products on which Plaintiff was not a competitor. Id. at ¶¶ 1, 21(b). The relevant product market, for antitrust purposes, is allegedly the market for aftermarket automotive lighting products. Id. at ¶ 13. The relevant geographic market is the United States as a whole. Id. at ¶ 14.

Defendants Genera, Maxzone, and E-Lite are direct competitors of Sabry Lee. Id. at ¶ 2. Sabry Lee is a former customer of the manufacturer defendant, Eagle Eyes. Eagle Eyes allegedly owns or partly owns E-Lite. Id. at ¶¶ 2,15. (Analogous relationships are alleged to exist between manufacturers TYC and Depo and importer-distributers Genera and Maxzone, respectively). Id. at ¶ 2. Because Sabry Lee "failed to abide Eagle Eyes pricing directives," it was forced to seek **[*4]** out a new manufacturer in China, i.e. Vision Auto Parts Industrial Co., Ltd. ("Vision Auto"). Id. Vision Auto has a much more limited product line than the defendant manufacturers, rendering plaintiff "vulnerable to the tactics employed by [D]efendants to eliminate it as a price-cutting competitor." Id.

Sabry Lee alleges that, beginning as early as 2004, the representatives of the manufacturer defendants met in Taiwan to fix the prices at which each manufacturer would sell to its distributors. Id. at ¶ 22. The United States distributors, in turn, held their own price-fixing meetings, usually at the offices of Defendant Genera or at an industry trade show in Las Vegas. Id. Sabry Lee allegedly participated in these meetings until 2005, when Eagle Eyes started selling through its own distributor. Id.

By eliminating other "actual and potential" importer-distributors, Defendants now allegedly control approximately 90% of the relevant market. Id. at ¶¶ 16, 17. Plaintiff has alleged various anticompetitive effects of Defendants' actions, see id. at ¶ 23(a)-(e), and substantial economic injury to itself in an unspecified sum, id. at ¶¶ 24, 25.

The Complaint alleges six counts consisting of (1) **[*5]** violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*; (2) violation of California's Cartwright Act, *Cal. Bus. & Prof Code § 16720, et seq.*; (3) Intentional Interference with Actual and Prospective Economic Advantage; (4) violation of *Cal. Bus. & Prof. Code § 17043*; (5) violation of *Cal. Bus. & Prof. Code § 17047*; and (6) violation of *Cal. Bus. & Prof. Code § 17048*.

II. LEGAL STANDARD

Under *Rule 12(b)(6)*, a defendant may move to dismiss for failure to state a claim upon which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*. While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, the factual allegations of the complaint "must be enough to raise a right to relief above the speculative level." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (U.S. 2007)*. Dismissal is appropriate where the complaint lacks a cognizable legal theory or sufficient facts to support a cognizable legal theory. *Mendiondo v. Centinela Hosp.Med. Ctr., 521 F.3d 1097, 1104 (9th Cir. 2008)*.

In deciding a *12(b)(6)* motion, the Court must construe the complaint in the light most favorable to the plaintiff and must accept all factual allegations as true. *Cahill v. Liberty Mutual Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)*. The Court must also accept as true all reasonable inferences to be drawn from the material allegations in the complaint. *Pareto v. F.D.I.C., 139 F.3d 696, 699 (9th Cir. 1998)*. In its consideration of the motion, the Court is limited to the allegations on the face of the complaint (including documents attached thereto), matters which are properly judicially noticeable and "documents whose contents **[*6]** are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the pleading." See *Lee v. City of Los Angeles, 250 F.3d 668, 688-89 (9th Cir. 2001)*; *Branch v. Tunnell, 14 F.3d 449, 453-54 (9th Cir.)*, cert. denied, *512 U.S. 1219, 114 S. Ct. 2704, 129 L. Ed. 2d 832 (1994)*.

III. ANALYSIS

A. Sherman Act

Count One of Plaintiff's Complaint alleges a scheme to restrain trade by engaging in predatory pricing in violation of *Section 1* of the Sherman Act. The "two prerequisites" for recovery on such a theory under *Section 2* of the Sherman Act have been clearly articulated by the Supreme Court. "First, a plaintiff seeking to establish competitive injury resulting from a rival's low prices must prove that the prices complained of are below an appropriate measure of its rival's costs." *Brooke Group v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (U.S. 1993)*. Second, a plaintiff must demonstrate that the competitor had a "dangerous probability" of recouping its investment in below-cost prices. *Id. at 224*. The principal point in dispute regarding Count One of the Complaint is whether these requirements also apply to claims alleging a conspiracy to set maximum prices under *Section 1*. They do, but this does not render Plaintiff's Sherman Act claim fatally defective.

1. Pricing Below Cost

In contending that it need not plead pricing below cost, Plaintiff solely relies on dicta found in footnote *8 of the Supreme Court*'s decision in *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*, a case alleging, as **[*7]** here, a horizontal conspiracy to engage in predatory pricing. See Plaintiff's Opposition to Domestic Defendant's Motion to Dismiss ("Opp.") at 5-6. The Court in Matsushita wrote that it did not have to resolve the question of what constitutes the relevant measure of costs because, "[f]or purposes of this case, it is enough to note that respondents have not suffered an antitrust injury unless petitioners conspired to drive respondents out of the relevant markets by (i) pricing below the level necessary to sell their products, or (ii) pricing below some appropriate measure of cost." *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 585 n.8, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (U.S. 1986)*. Thus, Plaintiff argues, it need only allege pricing below a market level. In Brooke Group, however, the Supreme Court referred expressly to Matsushita. Noting that Matsushita had reserved the question whether recovery should ever be available for below market pricing, the Court wrote that its "reasoning . . . suggests that only below-cost prices should suffice." *Brooke Group, 509 U.S. at 223*. Moreover, the Court noted that it had "rejected elsewhere the notion that above-cost prices that are below general market levels or the costs of a firm's competitors inflict injury to the competition cognizable under the antitrust laws." Id. (citing **[*8]** *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 340, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990))*. It is unlikely that footnote 8 in *Matsushita* survives the holding in *Brooke Group*.

Similarly, while the Ninth Circuit, in *William Inglis & Sons Baking Co. v. ITT Cont'l Baking Co., 668 F.2d 1014 (9th Cir. 1981)*, appeared to leave open the possibility that pricing below some appropriate measure of cost was not a necessary element of a predatory pricing claim, more recently (without between *§1* and *§2* claims) it has written: of incremental cost," it has never gone so far as to hold that in every predatory pricing case a plaintiff must prove pricing below cost. *Id. at 901*. Nevertheless, it wrote, "the Court's opinions strongly suggest that, in the normal case, above-cost pricing will not be considered exclusionary conduct for antitrust purposes." Id.

> In a number of cases decided before Brooke Group, we held that pricing below marginal cost or average variable cost provided evidence that a pricing scheme was predatory, but also held that that mode of proof was not exclusive. See *Transamerica Computer Co. v. IBM Corp., 698 F.2d 1377, 1385 (9th Cir. 1983)*; *Inglis, 668 F.2d at 1033*. We suggested that an above-cost pricing policy could be predatory if accompanied by evidence of predatory intent, market power, or "long-run behavior." See *Transamerica, 698 F.2d at 1387*. Other circuits rejected the notion that predation could be proved through evidence of intent alone, see, e.g., *Barry Wright, 724 F.2d at 232*, and Brooke Group's holding that "a plaintiff **[*9]** seeking to establish competitive injury resulting from a rival's low prices must prove that the prices complained of are below an appropriate measure of its rival's costs" put to rest any notion that predation can be proven through evidence of intent alone, *Brooke Group, 509 U.S. at 222*.

Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 910 n.20 (9th Cir. 2008). Thus, the rule in this Circuit would appear to be that, generally, below cost pricing is a requirement for any predatory pricing claim.[1] The Ninth Circuit mildly cautioned, however, that while "the Supreme Court has forcefully suggested that we should not condemn prices that are above some measure

Finally, although no Ninth Circuit case has explicitly applied the Brooke Group standard to *§ 1* predatory pricing claims, at least one other circuit has adopted that criteria as the relevant standard for *§ 1* claims. See *Multistate Legal Studies, Inc. v. Harcourt Brace Jovanovich Legal and Prof' 1 Pubs., Inc., 63 F. 3d 1540, 1548-9 (10th Cir. 1995)*. Plaintiff has offered no compelling reason to deviate from this rule, which "as commentators have pointed out . . . is not based on a theory that above-cost pricing strategies can never be anticompetitive, but rather on a cost-benefit rejection of a more nuanced rule. [Citations]." *Cascade Health Solutions, 515 F.3d at 904*.

Notwithstanding the strong likelihood that Plaintiff will be required to prove pricing below cost, the Court rejects Defendants' contention **[*10]** that Count One should be dismissed for failing to plead average variable cost. See Memorandum in Support of Domestic Defendant's Motion to Dismiss ("Motion") § III A(2). Defendants are likely correct that average variable cost is the only appropriate measure of cost in a predatory pricing case.[2] Cascade Health Solutions holds "that the appropriate measure of costs for our cost-based standard is average variable cost," *515 F.3d at 910*, although it is not completely clear from that case that, outside of the context of product bundling, some other measure might not apply. Even if average variable cost were the only applicable standard, however,

---

[1] An exception may still exist for below-tariff pricing. See *Cost Mgmt. Servs. v. Washington Natural Gas Co., 99 F.3d 937, 954 (9th Cir. 1996)* ("[I]n [a] particular, narrow set of circumstances, 'below-tariff pricing may serve as a surrogate for below-cost pricing . . .' [Citation].") (discussing cases).

[2] The dominance of the "average variable cost" standard in predatory pricing cases reflects the influence of the classic law review article by Professors Areeda and Turner. See ***Cascade Health Solutions, 515 F.3d at 909***; see generally Phillip Areeda & Donald F. Turner, Predatory Pricing and Related Practices Under *Section 2* of the Sherman Act, 88 Harv. L. Rev. 697, 712 (1975). Areeda and Turner wrote that marginal cost is the optimal measure of a firm's costs. Areeda & Turner, supra, at 716. "Marginal cost is the increment to total cost that results from producing an additional increment of output." Id.at 700. This cost, however, is often difficult to determine. "Thus, the professors adopted average variable cost as a surrogate for marginal cost." ***Cascade Health Solutions, 515 F.3d at 909***. Average variable cost is defined as follows:

> Variable costs, as the name implies, are costs that vary with changes in output. They typically include such items as materials, fuel, labor directly used to produce the product, indirect labor such as foremen, clerks, and custodial help, utilities, repair and maintenance, and per unit royalties and license fees. The average variable **[*11]** cost is the sum of all variable costs divided by output.

Areeda & Turner, supra, at 700.

Plaintiff's more general allegation of selling below cost is probably sufficient at the pleading stage. See Complaint ¶¶ 21(a), 21(b), 24, 28, 38, 29, 42.

2. Recoupment

The second element of a claim for predatory pricing is proof that there is a "dangerous probability" of the competitor's recouping its investment in below-cost prices. *Brooke Group, 509 U.S. at 224*. Plaintiff's argument that it is not required to allege recoupment flows from its misapprehension regarding the applicability of the rule regarding pricing below cost. Plaintiff argues that, because "selling below market prices does not require a loss," if Matsushita's footnote 8 were still applicable, then "recoupment" would not be a necessary element of a *§ 1* predation claim.

Defendants contest this logic, arguing that recoupment is an important element of any predatory pricing scheme because it is only by the subsequent price increases above competitive levels (and, even then, only if the price increases are "greater overall than the challenged price decreases") that consumers are harmed. See Reply 5:20-28. In any event, footnote 8 is inapplicable, and recoupment is repuired.

Plaintiff also asserts that, even "[a]ssuming recoupment was required," it has been adequately alleged. Opp. at 6:20. It has not been. As noted in Brooke Group, "[r]ecoupment is **[*12]** the ultimate object of an unlawful predatory pricing scheme; it is the means by which a predator profits from predation." *509 U.S. at 224*. At ¶ 21(b) of its Complaint, Plaintiff alleges that "defendants are able to recoup their below cost prices on those lighting products on which they compete with plaintiff, by offsetting price increases on lighting products with which they do not compete with plaintiff" This is not an allegation of recoupment, but, rather, an explanation of the means by which Defendants are able to subsidize their predatory pricing scheme. To properly plead recoupment, Plaintiffs must allege facts showing that there is a dangerous probability that defendants will be able to recoup their losses by raising prices on the same products that they are currently pricing below costs once their competitors have been driven from the market.

Defendants aptly note that even if Plaintiff's premise were correct - i.e., that it could plead recoupment by alleging that plaintiffs charged higher prices within "the very same relevant product market and . . . geographic market," see Opp. at 7:23-24 - the Complaint would still be insufficient. The boundaries of the "product" market are determined by **[*13]** eliminating from the market all products that are not reasonably interchangeable substitutes for the product in question. See *United States v. E.I. Dupont De Nemours & Co., 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. By alleging that Defendants simultaneously charged lower than competitive prices for products sold by Plaintiff and higher than competitive prices for other aftermarket automotive lighting products, Plaintiff is foreclosed from arguing that consumers view the products as interchangeable.

Plaintiff concedes that it has no standing to allege an injury from its allegations of minimum price fixing. See *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 337, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* ("A competitor may not complain of conspiracies . . . that set minimum prices at any level.) (citation and internal quotes omitted). Thus, because the Court agrees that Plaintiff is required to allege recoupment in order to state Sherman Act *§ 1* claim for predatory pricing, Defendants' Motion to Dismiss is GRANTED WITH LEAVE TO AMEND with respect to Count One.

B. Cartwright Act

Defendants contend that Sabry Lee cannot state a claim for violation of the Cartwright Act for the same reasons that it cannot state a claim under *§ 1* of the Sherman Act. (Motion § III C).

The analysis under California's Cartwright Act mirrors the analysis under federal law because the act was modeled **[*14]** after the Sherman Act. *County of Tuolumne v. Sonora Community Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)*; *Aguilar v. Atlantic Richfield Co., 25 Cal. 4th 826, 851-52, 107 Cal. Rptr. 2d 841, 24 P.3d 493 (2001)*; *Cal. Bus. & Prof Code § 16700, et seq.*; see also *Cryptography Research, Inc. v. Visa Int'l Serv. Ass'n, 2008 U.S. Dist. LEXIS 106974 (N.D. Cal. Aug. 12, 2008)*.

Accordingly, the Court, consistently with the above analysis of Plaintiff's Sherman Act claim, finds that the Complaint fails to state a claim for violation of the Cartwright Act because it does not adequately allege recoupment.

C. Intentional Interference with Economic Relations

Count Three of Plaintiff's Complaint is for "intentional interference with actual and prospective economic advantage." The tort of intentional interference with economic relations has the following elements:

> (1) an economic relationship between plaintiff and a third party, with the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) the defendant's intentional and wrongful conduct designed to interfere with or disrupt this relationship; (4) interference with or disruption of this relationship; and (5) economic harm to the plaintiff proximately caused by the defendant's wrongful conduct.

Sole Energy Co. v. Petrominerals Corp., 128 Cal. App. 4th 212, 241, 26 Cal. Rptr. 3d 798 (2005). The interference must be wrongful, i.e., "proscribed by some constitutional, statutory, regulatory, common law, or other determinable legal standard." *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1159, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (Cal. 2003)*. Here, Sabry Lee alleges that Defendants interfered with its economic relations **[*15]** by pricing below cost, fixing minimum prices, and "making false and misleading statements to Sabry Lee's actual and prospective customers, suppliers, and vendors." We need not decide whether Plaintiffs lack of standing to assert the price fixing allegations should bar it from using them as a basis for its claim of intentional interference. As Defendants correctly observe, the alleged minimum price-fixing agreement involved products that did not compete with Sabry Lee's products, and could not have affected its economic relations.

The allegations of "false and leading statements" are not pled with sufficient specificity to support a claim of intentional interference. See *Fed. R. Civ. P. 9(b)* (requiring specific pleading for allegations grounded in fraud).

What is left is the allegations of pricing below cost, which are insufficient for the reasons previously stated. When Plaintiff perfects its Sherman and Cartwright Act allegations, it will also have stated a claim for wrongful conduct which will support the intentional interference claim, but only on those bases.

In its Reply, Defendants also complain that the intentional interference claims are deficient because the Plaintiff fails to identify any specific **[*16]** contractual relations that were the subject of Defendants' alleged interference. Unless Plaintiff intends to expressly plead a claim for intentional interference with contract, the allegations that Defendants interfered with Defendants' relations with prospective customers are probably sufficient for notice pleading.

D. California's Unfair Practices Act ("UPA")

1. Pleading Requirements for UPA Claims

Plaintiff concedes that the Fourth, Fifth, and Sixth Counts of its Complaint are all interrelated. With these claims, Plaintiff asserts that Defendants violated the UPA, *Cal. Bus. & Prof Code §§ 17000-17101*, by selling certain products at price less than their costs. As Defendant observes, Sabry Lee seeks treble damages dating back to 2004 for these alleged violations.[3]

Count 4 of the Complaint asserts a direct claim under *§ 17043* for pricing below cost. Counts 5 and 6 are claims for violations of, respectively, *§§ 17047* and *17048*, both of which are predicated upon establishing a violation of *§ 17043*. "[T]o satisfy the pleading requirements of *section 17043*, the plaintiff must allege defendant's sales price, its cost in the product and its cost of doing business. And the various costs must be stated in other than conclusionary terms." *G.H.I.I., 147 Cal. App. 3d at 275 (1983)*. It is perhaps debatable **[*17]** whether Sabry Lee is in a position to be able to give a rough estimate, based on information and belief, of Defendants' costs. If it is, then it is required to

---

[3] Although not germane to the instant motion to dismiss, it is noted that these claims are governed by a one-year statute of limitations. See *G.H.I.I. v. MTS, Inc., 147 Cal. App. 3d 256, 277, 195 Cal. Rptr. 211 (1983)* ("[T]he settled rule in California is that statutes which provide for recovery of damages additional to actual losses incurred, such as double or treble damages, are considered penal in nature and thus governed by the one-year period of limitations stated in section 340, subdivision (1).") (citations omitted).

amend its Complaint to satisfy the pleading requirements of *section 17043*, the plaintiff must allege defendant's sales price, its cost in the product and its cost of doing business. See *Independent Journal Newspapers v. United Western Newspapers, Inc. 15 Cal.App.3d 583, 587, 93 Cal. Rptr. 299 (1971)*. Otherwise, it would be futile "to require a speculative allegation of cost which adds nothing to the notice given by the pleadings in their present state," and the present pleading permitted to stand with respect to Counts 4, 5, and 6. See *G.H.I.I., 147 Cal. App. 3d at 276*.

2. Preemption

Defendants' final argument relating to Plaintiff's claims under the UPA is that the UPA is preempted by federal ***antitrust law*** because it provides for liability for pricing below fully allocated costs as opposed to just marginal costs.[4] Although Plaintiff's brief does not adequately address the preemption argument, the Court concludes that the UPA is not preempted by federal ***antitrust law***. In Exxon Corp. v. Governor of Maryland, the Supreme Court considered whether a Maryland law preventing producers of petroleum products from operating service stations in the state, and requiring them to extend voluntary **[*18]** allowances to the service stations they supplied, conflicted with federal law. Observing that the law clearly had an anticompetitive effect, the Court wrote:

> In this sense, there is a conflict between the statute and the central policy of the Sherman Act -- our "charter of economic liberty." [Citation]. Nevertheless, this sort of conflict cannot itself constitute a sufficient reason for invalidating the Maryland statute. For if an adverse effect on competition were, in and of itself, enough to render a state statute invalid, the States' power to engage in economic regulation would be effectively destroyed.

Exxon Corp. v. Governor of Maryland, 437 U.S. 117, 133-134, 98 S. Ct. 2207, 57 L. Ed. 2d 91 (1978).

Distinguishing this case, United States District Judge, Judge William W. Schwarzer, wrote in Murphy Tugboat Co. (the principal case upon which defendants rely):

> The question remains, however, whether it would be permissible for plaintiff to recover damages on a theory which, for reasons discussed above, is barred by the pro-competitive policy underlying the Sherman Act. Under *Section 17082*, a plaintiff is entitled to recover treble damages for violation of the state statute. For a state to permit recovery of three times the amount of revenue lost by plaintiff by reason of its competitor's failure **[*19]** to raise its prices above full costs would inflict so large a penalty that it would operate as a potent force compelling price increases.

Murphy Tugboat Co., 454 F. Supp. at 857. The Ninth Circuit, however, has explicitly rejected the type of preemption analysis undertaken by Judge Schwarzer. Writing that "the possibility of proscription by California of conduct that federal law might permit is not sufficient to warrant preemption," the Ninth Circuit held:

> [A]ny conflict between state and federal law, on the facts of this case, is entirely speculative. The California statute does not make all sales below average total cost illegal per se. Instead, such sales must have been made "for the purpose of injuring competitors or destroying competition." [Citations]. The statute enables a plaintiff to create a presumption of unlawful purpose by introducing evidence of sales below cost plus proof of injury to competitors or competition. *Cal. Bus. & Prof. Code § 17071*. However, this presumption may be rebutted by establishing one of the statute's affirmative defenses, such as meeting competition, see *Cal. Bus. & Prof Code § 17050*, or by showing that the sales "were made in good faith and not for the purpose of injuring competitors or destroying competition." [Citation].

William Inglis & Sons Baking Co., 668 F.2d at 1049. Defendant argues that **[*20]** Inglis's reasoning is no longer apt after Brooke Group, because that case established "that there is a specific, considered federal policy to allow price cutting unless prices go below variable, not total cost and there is a likelihood of recoupment" Motion 16 n.10. In the

---

[4] The California statute expressly defines cost as the full cost of doing business, including overhead, depreciation and interest cost. *Cal. Bus. & Prof Code §§ 17026*, *17029*, *17073*; *Murphy Tugboat Co. v. Crowley, 454 F. Supp. 847, 857 (N.D. Cal. 1978)*.

more than fifteen years since Brooke Group was decided, however, no case has held the UPA to be preempted by federal ***antitrust law***.

IV. CONCLUSION

For the foregoing reasons, Defendants' Motion to Dismiss is granted as to each Count of Plaintiff's Complaint. As the Complaint's deficiencies are quite technical, there is no reason to believe - assuming that Plaintiff can, in good faith, allege a likelihood of recoupment-that the Complaint cannot be successfully amended to state a claim under each count. Leave to amend is granted.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

HN1[] **Class Actions, Certification of Classes**

A district court should no longer grant class certification when the plaintiffs had merely made some showing of the *Fed. R. Civ. P. 23* prerequisites, nor should an expert's report be accepted to establish a *Rule 23* requirement on the basis that it was not fatally flawed. Before certifying a class, the district court must undertake a rigorous analysis to determine whether each of the *Rule 23* requirements has been met. Significantly, the judge must resolve any factual dispute material to a *Rule 23* requirement. That obligation is not lessened if the necessary factual finding overlaps with a merits issue--rather, the court should resolve the dispute as it would any other threshold issue.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

HN2[] **Class Actions, Certification of Classes**

The determination as to a Fed. R. Civ. P. 23 requirement is made only for purposes of class certification and is not binding on the trier of facts, even if that trier is the class certification judge. However, considering facts for purposes of determining whether the plaintiff had established all the Rule 23 requirements is not a license to delve into all merits issues, and the district court should not assess any aspect of the merits unrelated to a Rule 23 requirement. Finally, the district judge has ample discretion to circumscribe both the extent of discovery concerning Rule 23 requirements and the extent of a hearing to assure that a class certification hearing does not become a pretext for a partial trial of the merits. Keeping these precautions in mind, however, the district judge must receive enough evidence, by affidavits, documents, or testimony, to be satisfied that each Rule 23 requirement has been met.

Civil Procedure > Special Proceedings > Class Actions > General Overview

HN3[] **Special Proceedings, Class Actions**

Any findings on the merits at the class certification stage would not be binding for the ultimate fact-finder--a trial judge's finding on a merits issue for purposes of a Fed. R. Civ. P. 23 requirement no more binds the court to rule for the plaintiff on the ultimate merits of that issue than does a finding that the plaintiff has shown a probability of success for purposes of a preliminary injunction.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN4[] **Class Actions, Prerequisites for Class Action**

Fed. R. Civ. P. 23(b)(3) requires a plaintiff first to prove the four threshold requirements under Rule 23(a)--numerosity, common questions of law or fact, typicality of the lead plaintiff's claims or defenses, and adequacy of representation--and two additional requirements under Rule 23(b)(3) that: questions of law or fact common to class members predominate over any questions affecting only individual members, and a class action would be superior to other methods for fairly and efficiently adjudicating the controversy. Fed. R. Civ. P. 23(a), (b)(3). Rule 23(b)(3) also considers the following factors relevant when determining whether common issues predominate and whether class certification is a superior method of adjudication: the class members' interests in individually controlling the prosecution or defense of separate actions; the extent and nature of any litigation concerning the controversy already begun by or against class members; the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and the likely difficulties in managing a class action. These requirements ensure that the class will be certified only when it would achieve economies of time, effort, and expense, and promote uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable results.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN5[] **Sherman Act, Claims**

Section 1 of the Sherman Act provides that every conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal. 15 U.S.C.S. § 1. The Clayton Act permits private litigants to seek treble damages for violations of the antitrust laws. 15 U.S.C.S. § 15. A successful antitrust claim requires the plaintiff to prove: (1) a violation of ***antitrust law***; (2) injury and causation; and (3) damages. The injury and causation element has also been referred to as antitrust injury and causation or impact.

Antitrust & Trade Law > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN6[] **Antitrust & Trade Law**

To prevail in a motion for class certification, the plaintiffs must demonstrate that common questions of law or fact predominate over individual ones on the issues relevant to the three elements of an antitrust claim. The predominance requirement is met if the plaintiff can establish that the issues in the class action that are subject to generalized proof, and thus applicable to the class as a whole predominate over those issues that are subject only to individualized proof.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN7[] **Per Se Rule & Rule of Reason, Per Se Violations**

Horizontal price-fixing agreements are per se violations of the Sherman Act. In general, the person who has purchased directly from those who have fixed prices at an artificially high level in violation of the antitrust laws is deemed to have suffered the antitrust injury.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN8[] **Sherman Act, Scope**

A plaintiff must make a two-part showing to establish the antitrust injury element. One prong is the familiar factual question whether the plaintiff has indeed suffered harm, or injury-in-fact. The other is the legal question whether any such injury is injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN9[] **Sherman Act, Scope**

To demonstrate the legal question prong of the antitrust injury element, the plaintiff must prove that the defendants engaged in an anti-competitive manipulation of the markets.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN10[] Sherman Act, Scope

The factual question prong of the antitrust injury element requires the plaintiffs to show that harm actually resulted from the antitrust violation--the injury-in-fact, or impact. To meet the predominance requirement of *Fed. R. Civ. P. 23* for class certification, the plaintiffs must show that injury-in-fact, or impact, can be proven by evidence common to the class.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN11[] Remedies, Damages

Impact (or injury-in-fact) and damages are two distinct elements of an antitrust claim--injury-in-fact is whether the plaintiffs were harmed and damages quantify by how much. At times these terms have been conflated, which can lead to confusion about what a plaintiff's burden precisely is at the motion for class certification stage. Generally speaking, antitrust injury-in-fact and damages are often determined by comparing the but-for price--the price a customer would have paid in the absence of a conspiracy--and the actual price paid. The extent of the difference between the but-for price and the actual price paid is relevant to the question of damages, but it is from a comparison between the two that a court would be asked to decide question of injury-in-fact. In such a scenario, the plaintiff has shown impact and damages in a single calculation: if he paid a higher actual price than the but-for price, he has shown impact; by calculating the extent of that difference he has shown damages. Hence, one way of demonstrating predominance is to show that there is a common method for proving that the class plaintiffs paid higher actual prices than in the but-for world, such as using an econometric regression model incorporating a variety of factors to demonstrate that a conspiracy variable was at work during the class period, raising prices above the but-for level for all plaintiffs.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN12[] Regulated Practices, Price Fixing & Restraints of Trade

Where other methods of common proof exist to show class-wide impact such as lock-step increases of national price lists in an oligopolistic market, comparing but-for prices with actual transaction prices is not the only way for plaintiffs to succeed in a motion for class certification. Whenever actual prices are higher than but-for prices, a plaintiff suffers damages and must necessarily have been impacted, or injured-in-fact, too. Using a damages calculation is often the only way to show impact in antitrust scenarios where the industry is not served by a small number of distributors, where sales occur between diverse and independent merchants and customers, or where there is no direct evidence of class-wide conspiratorial effect. In such scenarios, proving damages may be the only way to show impact.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN13[] **Remedies, Damages**

Proving damages proves injury because damages necessarily indicate that the plaintiff has been impacted or injured by the antitrust violation; the converse, however, is not necessarily true. That is, it is possible for a plaintiff to suffer antitrust injury-in-fact and yet have no damages because it has taken steps to mitigate the actual price paid through rebates, discounts, and other non-price factors such as lowered shipping costs, technical services, or any other type of purchase incentive. By expending resources to negotiate down from the supracompetive prices established by the cartel, plaintiffs who have suffered no damages may still have suffered an injury-in-fact from the antitrust conspiracy. The fact that a plaintiff may have successfully employed bargaining power to fend off the effect of the conspiratorial practices does not mean that it has not been put in a worse position but-for the conspiracy.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN14[] **Regulated Practices, Price Fixing & Restraints of Trade**

Neither a variety of prices nor negotiated prices is an impediment to class certification if it appears that plaintiffs may be able to prove at trial that the price range was affected generally. The proof necessary to demonstrate that the defendants conspired to maintain an inflated base from which all pricing negotiations began and that this base price was higher than the base price which would have been established by competitive conditions would be common to all members of the class. Proof of a conspiracy to establish a base price would establish at least the fact of damage, even if the extent of the actual damages suffered by the plaintiffs would vary. The proof with respect to the base price from which these negotiations began, or the structure of the conspiracy to affect individual negotiations, would be common to the class. Accordingly. the fact of damage is predominantly, if not entirely, a common question.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN15[] **Class Actions, Certification of Classes**

Courts are not to grant motions for class certification if plaintiffs have merely made some showing of the *Fed. R. Civ. P. 23* requirements or because their expert's report is not fatally flawed. The important point is that the requirements of *Rule 23* must be met, not just supported by some evidence. Actual, not presumed, conformance with *Rule 23(a)* remains indispensable. When assessing the predominance requirement of *Rule 23(b)(3)*, however, the court need only determine whether the element of injury-in-fact can be proven by evidence common to the class.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN16[] **Class Actions, Certification of Classes**

The task of a district court at the class certification stage is to determine whether the defendants have successfully debunked the plaintiffs' claim that a class-wide approach can be used to prove impact and damages. The defendants should be focused on disputing the use of the methodology itself, not the results of the methodology. The failure to include certain variables in a multiple regression analysis will affect the analysis probativeness, not its admissibility. In other words, if the defendants' experts are merely disputing the results of the plaintiffs' experts' analysis rather than the feasibility of using a single formula methodology, that would be a merits issue, not a class certification issue. If plaintiffs can present a feasible multiple regression analysis that purports to establish impact and damages using data and information common to the class, they will have met the requirement of demonstrating that damages can be proved by evidence common to the class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN17[] **Class Actions, Prerequisites for Class Action**

A district court is required to parse the plaintiffs' legal theory on the merits where it overlaps with the threshold inquiry of *Fed. R. Civ. P. 23(b)(3)* predominance.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN18[] **Class Actions, Prerequisites for Class Action**

Common questions predominate where even if each class member were to bring suit individually, each plaintiff would have to allege and prove virtually identical facts.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN19[] **Class Actions, Certification of Classes**

The fact that damages may have to be ascertained on an individual basis is not, standing alone, sufficient to defeat class certification. Common issues may predominate when liability can be determined on a class-wide basis, even when there are some individualized damages issues.

Opinion

[*83] **RULING ON MOTION FOR CLASS CERTIFICATION**

This multidistrict litigation arises out of allegations that the defendants conspired to fix, raise, maintain, and stabilize the price of ethylene propylene diene monomer ("EPDM") synthetic rubber at artificially high, non-competitive levels in violation of federal ***antitrust law***. The named plaintiffs, a group of EPDM purchasers, seek to certify a class in this antitrust suit on behalf of all **[*84]** individuals and entities that purchased EPDM from January 1, 1997 to December 31, 2001. The plaintiffs are seeking injunctive relief and treble damages, plus costs, including reasonable attorneys' fees. All the defendants named in the Second Consolidated Amended Complaint have been dismissed or have entered into settlement agreements with the plaintiffs, except for defendants DSM Copolymer, Inc. and DSM Elastomers Europe B.V. (collectively, **[**10]** the "defendants").

The plaintiffs contend they have met their burden of meeting all the requirements of *Federal Rule of Civil Procedure 23*, which governs the procedure for class certification. The defendants dispute that the plaintiffs have met these requirements, specifically contending that the plaintiffs have failed to demonstrate how common questions of law or fact will predominate over individual ones on the issue of antitrust injury. Because I find that plaintiffs have met their burden under *Rule 23*, for the reasons explained more fully below, the motion for class certification is granted.

I. Factual Background

EPDM is a synthetic rubber used primarily in the automotive and roofing industries, but it is also found in glass-run channels, radiators, garden and appliance hoses, tubing, belts, electrical insulation, rubber mechanical goods, plastic impact modifications, thermoplastic vulcanizates, and motor oil additive applications. [1] EPDM is the third-largest type of synthetic rubber consumed worldwide and is popular for its resistence to heat, oxidation, ozone, and weather aging. It is one of the fastest growing synthetic rubber products, reaching sales of 870,000 metric tons in **[**11]** 2002 from 289,000 metric tons in 2000 (an increase of approximately 300%).

The automotive industry accounts for two-thirds of the overall demand for EPDM. Approximately 20% of the rubber used in a typical automobile is EPDM. It is also extremely prevalent in the roofing industry, where it is the most widely used roofing material, accounting for over one billion square feet of new roof coverings in the United States.

The plaintiffs have alleged that the defendants conspired to fix, maintain and/or stabilize EPDM prices in the United States in violation section 1 of the Sherman Act, *15 U.S.C § 1*, by engaging in collusive discussions, meetings, agreements, and understandings to raise prices to supracompetitive levels in tandem and to stabilize the supply of EPDM from competitors outside the cartel. The plaintiffs allege that the defendants met regularly to discuss EPDM

[1] The factual background about the EPDM industry is drawn primarily from the Second Amended Consolidated Complaint. These facts are not material for purposes of this motion and are included for informational purposes only.

prices -- at trade association meetings or at their offices -- and engaged in regular written communications **[**12]** with one another to maintain their collusive agreement. The plaintiffs contend that, pursuant to their collusive agreements, the defendants took turns leading EPDM price increases, conferring months in advance of an announced price increase about whose turn it was to raise prices.

Plaintiffs allege that defendants sought to cut off new sources of capacity by buying up new production in Asia and eventually setting up market allocation agreements between North American suppliers and those Asian suppliers. The plaintiffs allege the global conspiracy was most effective in the U.S. and Canadian markets where prices were approximately 10-15% higher than in the Western Europe market.

The plaintiffs allege that the defendants were so protective of their cartel that when a defendant's production capacity dropped due to plant or production problems, its competitors would provide that defendant with EPDM, so that it could continue to supply its customers, rather than taking the opportunity to compete for those customers directly. In return for receiving the additional supply of EPDM, the plaintiffs allege the struggling supplier would agree not to compete for the supplying party's customers. Thus, **[**13]** set market share and customer allocations were maintained despite individual supplier disruptions.

[*85] The alleged conspiracy was not disclosed to the public until December 2002, when defendant Crompton announced that it was being investigated by competition authorities in the United States, Canada, and Europe. The plaintiffs allege that, despite their exercise of due diligence, they would not have been able to discover the conspiracy prior to December 2002 due to the defendants' active and purposeful concealment of the cartel and its activities.

The plaintiffs wish to certify the following class:

> All individuals or entities (excluding governmental entities, Defendants and their parents, predecessors, subsidiaries, affiliates, and co-conspirators) who purchased ethylene propylene diene monomer ("EPDM") in the United States directly from one or more of the Defendants or any predecessor, subsidiary or affiliate of any Defendant at any time during the period from January 1, 1997 to December 31, 2001.

The plaintiffs allege the class is readily definable, and can be definitively proven through the sales and invoice records of the defendants.

In support of their motion for class certification, the **[**14]** plaintiffs have submitted evidence of six national lock-step price list increases within two broad categories of EPDM products: clear elastomers and oil extended elastomers. [2] Table 1 to the Report of Dr. Martin Asher ("Asher Report"). These price list increases indicate that the five primary EPDM suppliers increased the cost of their products by the same amount, at about the same time, at least six times during the class period. The plaintiffs allege those price hikes were not in line with input prices and were the result of communications between the defendants to sustain supracompetitive prices.

In addition, the plaintiffs have submitted an econometric multiple regression analysis that purports to calculate class-wide damages. The plaintiffs' experts explain that regression modeling reveals that the price of EPDM was affected by more than just the cost of its input and the level of demand for the products, meaning there was an active conspiracy at work to maintain EPDM prices **[**15]** at supracompetitive levels.

II. Standards for Class Certification

The Second Circuit recently clarified the standard of review for assessing motions for class certification in *In re Initial Public Offerings Securities Litigation ("In re IPO"), 471 F.3d 24, 41-42 (2d Cir. 2006)*. The Court disavowed the previous standard of review, holding that ***HN1***[] a district court should no longer grant class certification when the plaintiffs had merely made "some showing" of the *Rule 23* prerequisites, nor should an expert's report be accepted to establish a *Rule 23* requirement on the basis that it was "not fatally flawed." *Id. at 32, 40, 42* (quoting,

[2] Oil extended elastomer EPDM is created by adding petroleum-based extender oil during the manufacturing process, which alters the properties of the polymer and lowers the manufacturing cost. Asher Report at P 22.

respectively, *Caridad v. Metro-North Commuter R.R., 191 F.3d 283, 292 (2d Cir. 1999)* and *In re Visa Check/MasterMoney Antitrust Litig., 280 F.3d 124, 135 (2d Cir. 2001))*.

Before certifying a class, the district court must undertake a "rigorous analysis" to determine whether each of the *Rule 23* requirements has been met. *Id. at 33, 41* (quoting *General Telephone Co. of the Southwest v. Falcon, 457 U.S. 147, 161, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982))*. Significantly, the judge must resolve any factual dispute material to a *Rule 23* requirement. *Id.* That obligation is not lessened if the necessary **[**16]** factual finding overlaps with a merits issue -- rather, the court should resolve the dispute as it would any other threshold issue. *Id. at 41-42*. ***HN2***[] "[T]he determination as to a *Rule 23* requirement is made only for purposes of class certification and is not binding on the trier of facts, even if that trier is the class certification judge." *Id. at 41*. [3] The Court **[*86]** cautioned, however, that considering facts for purposes of determining whether the plaintiff had established all the *Rule 23* requirements is not a license to delve into *all* merits issues, and that the district court should not assess "any aspect of the merits unrelated to a *Rule 23* requirement." *Id.* Finally, the "district judge has ample discretion to circumscribe both the extent of discovery concerning *Rule 23* requirements and the extent of a hearing . . . to assure that a class certification hearing does not become a pretext for a partial trial of the merits." *Id.* Keeping these precautions in mind, however, "the district judge must receive enough evidence, by affidavits, documents, or testimony, to be satisfied that each *Rule 23* requirement has been met." *Id.*

The plaintiffs here seek to certify a class under***HN4***[] *Rule 23(b)(3)*, which requires them first to prove the four threshold requirements under *Rule 23(a)* -- numerosity, common questions of law or fact, typicality of the lead plaintiff's claims or defenses, and adequacy of representation by the lead plaintiff -- and two additional requirements under *Rule 23(b)(3)*: (1) "that questions of law or fact common to class members predominate over any questions affecting only individual members," and (2) that a class action would be "superior to other methods for fairly and efficiently adjudicating the controversy." [4] *Fed. R. Civ. P. 23(a)* and *(b)(3)*; *McLaughlin v. Am. Tobacco Co., 522 F.3d 215, 222 (2d Cir. 2008)*. These requirements "ensure[] that the **[**18]** class will be certified only when it would 'achieve economies of time, effort, and expense, and promote . . . uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable results.'" *Cordes & Co. Fin. Servs. v. A.G. Edwards & Sons, Inc., 502 F.3d 91, 104 (2d Cir. 2007)* (quoting *Amchem Prods., Inc. v. Windsor, 521 U.S. 591, 615, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997))*.

At the February 8, 2008 hearing on the issue of class certification, the defendants conceded that the plaintiffs have met the four threshold requirements under *Rule 23(a)* and I find that they have. The only real **[**19]** issue on this motion for class certification is whether the plaintiffs have met their burden of proving that common questions predominate over individual ones as required by *Rule 23(b)(3)*. The defendants contest the superiority prong of *Rule 23(b)(3)* on the same ground that they contest the predominance prong -- that a class action is not a superior method of adjudication because individual questions predominate over common questions, thus making it more efficient to litigate the claims on an individual basis. Therefore, this ruling will focus on *Rule 23(b)(3)*'s predominance requirement -- whether or not individual questions of law and fact predominate over common questions.

---

[3] Analogizing the *Rule 23* inquiry to the preliminary injunction process, **[**17]** the Court held that ***HN3***[] any findings on the merits at the class certification stage would not be binding for the ultimate fact-finder -- "[a] trial judge's finding on a merits issue *for purposes of a Rule 23 requirement* no more binds the court to rule for the plaintiff on the ultimate merits of that issue than does a finding that the plaintiff has shown a probability of success for purposes of a preliminary injunction." *Id. at 39* (emphasis in original).

[4] In addition, *Rule 23(b)(3)* considers the following factors relevant when determining whether common issues predominate and whether class certification is a superior method of adjudication:

> (A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already begun by or against class members; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (D) the likely difficulties in managing a class action.

III. Discussion

A. Elements of an Antitrust Claim

The plaintiffs filed suit under *section 1 of the Sherman Act*, alleging, *inter alia*, that the defendants conspired "to fix, raise, maintain and/or stabilize the price of EPDM sold in the United States, including limiting supply and/or allocating markets and customers for the sale of EPDM in the United States." Second Consolidated Amended Complaint P44a.***HN5***[] *Section 1 of the Sherman Act* provides that "[e]very . . . conspiracy, in restraint of trade or commerce among the **[**20]** several States, or with foreign nations, is hereby declared to be illegal." *15 U.S.C. § 1*. The Clayton Act permits private litigants to seek treble damages for violations of the antitrust laws. *15 U.S.C. § 15*. A successful antitrust claim requires the plaintiff **[*87]** to prove: "(1) a violation of ***antitrust law***; (2) injury and causation; and (3) damages." *Cordes, 502 F.3d at 105* (internal alterations omitted) (quoting *In re Visa Check, 280 F.3d at 136*). The injury and causation element has also been referred to as "antitrust injury" and "causation or impact." *Id. at 105*.

B. Antitrust Elements and the Predominance Requirement

As explained above, ***HN6***[] to prevail in their motion for class certification, the plaintiffs must demonstrate that common questions of law or fact predominate over individual ones on the issues relevant to the three elements of an antitrust claim. "The predominance requirement is met if the plaintiff can 'establish that the issues in the class action that are subject to generalized proof, and thus applicable to the class as a whole, . . . predominate over those issues that are subject only to individualized proof.'" *Id. at 107-08* (quoting *In re Visa Check, 280 F.3d at 136*). In **[**21]** support of their class action motion, the plaintiffs have proferred the six national price lists and their econometric modeling, which they assert show that the relevant antitrust issues -- and more specifically, antitrust injury -- are susceptible to generalized proof. The defendants argue that the antitrust injury element is not susceptible to common proof and that the econometric model presented by the plaintiffs is incapable of demonstrating class-wide injury or damages.

1. *Violation of* ***Antitrust Law***

HN7[] "Horizontal price-fixing agreements are *per se* violations of the Sherman Act." *Id. at 105*. "In general, the person who has purchased directly from those who have fixed prices at an artificially high level in violation of the antitrust laws is deemed to have suffered the antitrust injury . . . ." *State of N.Y. v. Hendrickson Bros., Inc., 840 F.2d 1065, 1079 (2d Cir. 1988)*. In *Cordes*, the plaintiffs alleged that the defendants, a group of IPO underwriters, entered into a horizontal price-fixing agreement to fix their fees at seven percent of the IPO proceeds for all corporations conducting "mid-sized IPOs" (IPOs that generated between $ 20 million and $ 80 million). *Cordes, 502 F.3d at 96*. **[**22]** Because "allegations of the existence of a price-fixing conspiracy are susceptible to common proof," the Court determined that common questions predominated over individual ones on this first element of an antitrust claim, violation of ***antitrust law***. *Id. at 105*. *See also In re Foundry Resins Antitrust Litig., 242 F.R.D. 393, 409 (S.D. Ohio 2007)* (holding that the plaintiffs' allegations of horizontal price-fixing were sufficient to establish a *per se* violation of ***antitrust law***).

Similarly, the plaintiffs here have alleged that EPDM producers engaged in an illegal price-fixing agreement to raise, maintain, and/or stabilize the price of EPDM in the United States. That issue is common to the class, and if proven true, would satisfy the first element of an antitrust cause of action, namely, a violation of ***antitrust law***. Therefore, the plaintiffs have met their burden of showing predominance on this element.

2. *Antitrust Injury*

In *Cordes*, the Second Circuit held that ***HN8***[] plaintiffs must make a two-part showing to establish the antitrust injury element. *502 F.3d at 106*. "One [prong] is the familiar factual question whether the plaintiff has indeed suffered harm, or 'injury-in-fact.' The other is **[**23]** the legal question whether any such injury is 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *Id.* (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*.

a. Legal Question Prong

HN9[] To demonstrate the legal question prong of the antitrust injury element, the plaintiff must prove that the defendants engaged in an anti-competitive manipulation of the markets. *Id. at 105-07*. In *Cordes,* the Court held the plaintiffs successfully established that the legal question was common to the class and thus predominated over individual questions because the plaintiffs alleged only one type of injury in the complaint -- "overcharges paid to a horizontal price-fixing conspiracy." *Id. at 107*. "Because each class member allegedly suffered the same **[*88]** type of injury, the legal question of whether such an injury is 'of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful,' is a common one." *Id.* (internal citations omitted) (quoting *Brunswick, 429 U.S. at 489*).

Like the plaintiffs in *Cordes*, the EPDM plaintiffs have met the first part of the antitrust **[**24]** injury showing: that the legal question of the antitrust injury is common to the class. The plaintiffs have alleged only one type of injury in the complaint, namely that they paid supracompetitive prices for EPDM due to an illegal conspiracy to raise, maintain, and/or stabilize the prices of EPDM on the U.S. market. The legal question of injury is common to the class.

b. Factual Question Prong

HN10[] The factual question prong of the antitrust injury element requires the plaintiffs to show that harm actually resulted from the antitrust violation -- the "injury-in-fact," *id. at 106*, or "impact." To meet the predominance requirement of *Rule 23* for class certification, the plaintiffs must show that injury-in-fact, or impact, can be proven by evidence common to the class. *Id. at 106*. Plaintiffs have offered two forms of common proof to assert that impact was class-wide: six national price list increases adhered to by all the major EPDM suppliers, showing that the defendants conspired to maintain an elevated "base" price for EPDM, and an economic regression model.

It is important to note at the outset that HN11[] "impact" (or "injury-in-fact") and "damages" are two distinct elements of an antitrust claim **[**25]** -- injury-in-fact is *whether* the plaintiffs were harmed and damages quantify *by how much. Id. at 107 n.11*; *see also In re Urethane Antitrust Litig. ("Urethane II, Polyether Polyol"), 251 F.R.D. 629, 638 (D. Kan. 2008)* ("'[T]he issue in the common impact analysis is the *fact*, not the amount, of injury.'") (quoting *In re Potash Antitrust Litig., 159 F.R.D. 682, 695 (D. Minn. 1995))*. At times these terms have been conflated, which can lead to confusion about what a plaintiff's burden precisely is at the motion for class certification stage. It is true that, generally speaking, antitrust injury-in-fact and damages are often determined by comparing the "but-for" price -- the price a customer would have paid in the absence of the conspiracy -- and the actual price paid. *Cordes, 502 F.3d at 107*. "[T]he *extent* of the difference between the but-for [price] and the actual [price] paid is relevant to the question of *damages*, but it is from a *comparison* between the two that the court would be asked to decide question of *injury-in-fact*." *Id*. (emphasis added). In such a scenario, the plaintiff has shown impact and damages in a single calculation: if he paid a higher actual price than the but-for **[**26]** price, he has shown impact; by calculating the extent of that difference he has shown damages. Hence, one way of demonstrating predominance is to show that there is a common method for proving that the class plaintiffs paid higher actual prices than in the but-for world, such as using an econometric regression model incorporating a variety of factors to demonstrate that a conspiracy variable was at work during the class period, raising prices above the "but-for" level for all plaintiffs.

However, HN12[] where other methods of common proof exist to show class-wide impact such as lock-step increases of national price lists in an oligopolistic market, comparing "but-for" prices with actual transaction prices is not the *only* way for plaintiffs to succeed in a motion for class certification. Whenever actual prices are higher than "but-for" prices, a plaintiff suffers damages and must necessarily have been impacted, or injured-in-fact, too. Using a damages calculation is often the only way to show impact in antitrust scenarios where the industry is not served by a small number of distributors, where sales occur between diverse and independent merchants and customers, or where there is no direct **[**27]** evidence of class-wide conspiratorial effect. In such scenarios, proving damages may be the only way to show impact.

HN13[] Proving damages proves injury because damages necessarily indicate that the plaintiff has been impacted or injured by the antitrust violation; the converse, however, is not necessarily true. That is, it is possible for a plaintiff to suffer antitrust injury-in-fact **[*89]** and yet have no damages because it has taken steps to mitigate the actual price paid through rebates, discounts, and other non-price factors such as lowered shipping costs, technical services, or any other type of purchase incentive. By expending resources to negotiate down from the supracompetive prices established by the cartel, plaintiffs who have suffered no damages may still have suffered an injury-in-fact from the antitrust conspiracy. The fact that a plaintiff may have successfully employed bargaining power to fend off the *effect* of the conspiratorial practices does not mean that it has not been put in a worse position but-for the conspiracy.

HN14[] "Neither a variety of prices nor negotiated prices is an impediment to class certification if it appears that plaintiffs may be able to prove at trial that . . . **[**28]** the price range was affected generally." *In re Nasdaq Market-Makers Antitrust Litig., 169 F.R.D. 493, 523 (S.D.N.Y. 1996)*.

> The proof necessary to demonstrate that the defendants conspired to maintain an inflated "base" from which all pricing negotiations began and that this "base" price was higher than the "base" price which would have been established by competitive conditions *would be common to all members of the class*. Proof of a conspiracy to establish a "base" price would establish at least the *fact* of damage, even if the extent of the actual damages suffered by the plaintiffs would vary. . . . [T]he proof with respect to the "base" price from which these negotiations began, or the structure of the conspiracy to affect individual negotiations, would be common to the class. Accordingly . . . the fact of damage is predominantly, if not entirely, a common question.

Id. (emphasis added) (quoting *Hedges Enterprises, Inc. v. Continental Group, Inc., 81 F.R.D. 461, 475 (E.D. Pa. 1979))*. *See also* *Urethane II, Polyether Polyol, 251 F.R.D. at 638* ("[E]vidence of a standardized pricing structure, which (in light of the alleged conspiracy) presumably establishes an artificially inflated baseline **[**29]** from which any individualized negotiations would proceed, provides generalized proof of class-wide impact."); *In re Urethane Antitrust Litig. ("Urethane I, Polyester Polyol"), 237 F.R.D. 440, 450-51 (D. Kan. 2006)* (accepting the plaintiffs' expert's structural analysis of the urethane market and opinion that price lists can be used as proof of common impact; "conspiratorial behavior elevates list prices and list prices serve as a reference or benchmark for pricing or pricing negotiations"); *Fears v. Wilhelmina Model Agency, Inc., 2003 U.S. Dist. LEXIS 11897, 2003 WL 21659373, at *6 (S.D.N.Y. 2003)* (noting that, even if the plaintiffs had been able to negotiate for a lower commission rate with the defendant modeling agencies, they were nonetheless impacted by the conspiracy because those negotiations still began at the artificially elevated rate established by the cartel); *In re Industrial Diamonds Antitrust Litig., 167 F.R.D. 374, 383 (S.D.N.Y. 1996)* (noting that "[t]he theory that underlies these decisions is, of course, that the negotiated transaction prices would have been lower if the starting point for negotiations had been list prices set in a competitive market. Hence, if a plaintiff proves that the alleged **[**30]** conspiracy resulted in artificially inflated list prices, a jury could reasonably conclude that each purchaser who negotiated an individual price suffered some injury").

The plaintiffs here assert that the six across-the-board list price increases for EPDM, which the defendants do not dispute, suffice as common proof of impact to the class, particularly when the EPDM market's characteristics tending to support collusive activity are also considered, because those price list increases had the effect of raising prices for all EPDM purchasers. Defendants argue that, because the plaintiffs have not conclusively demonstrated how those price increases raised prices for each transaction with each plaintiff, they cannot serve as common proof of impact, pointing to individual discounts, price rebates, and contract terms that would have lowered the price of EPDM below the list price for certain plaintiffs. The defendants misconstrue the plaintiffs' burden at the class certification stage. The plaintiffs need not demonstrate to an absolute certainty that *all* EPDM purchasers ultimately suffered damages as a result of inflated list prices. Addressing a similar argument in *Urethane II, Polyether* ***[**31]*** *Polyol,* the **[*90]** Court noted that the absence of an actual price increase for an individual plaintiff following a price list increase was not a relevant issue at the class certification stage. *251 F.R.D. at 637 n.6*. "Aside from the fact that this argument goes to the merits of the case and not the issue of whether plaintiffs' case concerning impact is amenable to class-wide proof, the mere fact that prices did not *increase* at the seemingly appropriate times does not conclusively establish that they were not artificially inflated so as to keep them from falling to the extent that they might have done so in a competitive market." *Id.* (emphasis in original).

In re IPO directs HN15[] courts not to grant motions for class certification if plaintiffs have merely made "some showing" of the Rule 23 requirements or because their expert's report is "not fatally flawed." As the In re IPO Court stated, "the important point is that the requirements of Rule 23 must be met, not just supported by some evidence. . . . '[A]ctual, not presumed, conformance with Rule 23(a) remains . . . indispensable.'" [5] 471 F.3d at 33 (quoting Falcon, 457 U.S. at 160). When assessing the predominance requirement of Rule 23(b)(3), **[**32]** however, I need only determine whether the element of injury-in-fact can be proven by evidence common to the class. Urethane II, Polyether Polyol, 251 F.R.D. at 636 (noting that the pertinent legal inquiry at class certification is not whether the plaintiffs have proven on the merits that they paid an artificially high price due to the defendants' alleged price-fixing conspiracy, but rather "'whether class-wide impact may be proven by evidence common to all class members.'") (quoting In re Bulk (Extruded) Graphite Prods. Antitrust Litig., 2006 U.S. Dist. LEXIS 16619, 2006 WL 891362, at *2 (D.N.J. 2006)). The plaintiffs have offered sufficient proof and explanation to convince me that these six national price list increases *could* have the effect of affecting the base price for EPDM, from which all negotiations started, on a class-wide basis.

The plaintiffs have not merely alleged that these price lists existed and that they affected all EPDM purchasers -- they have shown undisputed evidence of lock-step price increases and provided expert opinions that the structural characteristics **[**33]** of the EPDM market would support collusive increases of prices to artificially high levels. As discussed more fully below, the defendants do not dispute the price list increases, nor do their experts truly contest the nature of the EPDM market, but instead argue that the plaintiffs cannot prevail on the merits, because they cannot prove that every class member ultimately suffered damages. That argument is best reserved for their argument that common questions do not predominate on the issue of damages and for trial on the merits.

The plaintiffs' expert, Dr. Martin Asher, compiled the following chart, demonstrating that the defendants participated in at least six across-the-board announced list price increases during the class period:

Effective Date	**Type of Elastomer**	**Bayer (Miles)**	**Crompton/ Uniroyal**	**DSM**
October/ November 1997	Clear Oil Extended	$ 0.04/ lb.	$ 0.04/ lb. Increased commensurate with polymer content	$ 0.04/ lb. $ 0.03 /lb.- 50 and/or 75 part oil extended $ 0.02/ lb. - 100 part oil extended
March/ April 1998	Clear Oil Extended	$ 0.05/ lb. $ 0.03/ lb.	$ 0.05/ lb. $ 0.03/ lb.	$ 0.05/ lb. $ 0.03/ lb.
January/ February 1999	Clear Oil Extended	$ 0.05/ lb. $ 0.04/ lb. - medium oil extension $ 0.03 /lb. - high oil	$ 0.05/ lb. $ 0.03/ lb.	$ 0.05/ lb. $ 0.03/ lb.

[5] As discussed above, the Court held this requirement applies with "equal force to all Rule 23 requirements." In re IPO, 471 F.3d at 33 n.3.

Effective Date	Type of Elastomer	Bayer (Miles)	Crompton/ Uniroyal	DSM
		extension		
January/ February 2000	Clear	$ 0.05/ lb.	$ 0.05/ lb. ($ 0.07/ lb. for palletized)	$ 0.05/ lb.
	Oil Extended	$ 0.04/ lb. - medium oil extension $ 0.03 /lb. - high oil extension	$ 0.03/ lb.	$ 0.03/ lb.
July 2000	Clear	$ 0.06/ lb.	$ 0.06/ lb. ($ 0.07/ lb. for palletized)	$ 0.06/ lb.
	Oil Extended	$ 0.05/ lb. - medium oil extension $ 0.04 /lb. - high oil extension	$ 0.04/ lb.	$ 0.04/ lb.
February/ March 2001	Clear	$ 0.06/ lb.	$ 0.06/ lb. ($ 0.07/ lb. for palletized)	$ 0.06/ lb. ($ 0.06/ lb. for palletized)
	Oil Extended	$ 0.05/ lb. - medium oil extension $ 0.04 /lb. - high oil extension	$ 0.04/ lb.	$ 0.04/ lb.

Effective Date	DuPont Dow	Exxon Mobil
October/ November 1997	$ 0.04/ lb. $ 0.04/ lb. on all grades of Nordel EPDM	$ 0.04/ lb.

Effective Date	DuPont Dow	Exxon Mobil
March/ April 1998	$ 0.05/ lb. $ 0.05 lb. on all grades of Nordel EPDM	$ 0.05/ lb. $ 0.03/ lb.
January/ February 1999	$ 0.05/ lb. $ 0.05 lb. on all grades of Nordel EPDM	$ 0.05/ lb. $ 0.03/ lb.
January/ February 2000	$ 0.05/ lb.	$ 0.05/ lb. ($ 0.07/ lb. for palletized)
	$ 0.05 lb. on all grades of Nordel EPDM	$ 0.03/ lb.
July 2000	$ 0.06/ lb.	$ 0.05/ lb. ($ 0.07/ lb. for palletized)
	$ 0.06 lb. on all grades of Nordel EPDM	$ 0.03/ lb.
February/ March 2001	$ 0.06/ lb.	$ 0.05/ lb. ($ 0.07/ lb. for palletized)
	$ 0.06 lb. on all grades of Nordel EPDM	$ 0.03/ lb.

Effective	DuPont	Exxon
Date	Dow	Mobil

(a) Plaintiffs' Expert Reports

Plaintiffs' experts, Drs. Martin Asher, John Beyer, and Keith Leffler, [6] also explain precisely why the EPDM market was susceptible to collusive activity. Each expert concludes that the EPDM market was conducive to creation and implementation of an antitrust conspiracy to raise and/or maintain prices, and therefore, if the alleged collusive activity did occur -- i.e., in the form of the six lock-step price increases -- those structural characteristics make it more likely that the impact of those price increases would be felt class-wide.

Specifically, they assert that because of: (1) EPDM's commodity-like nature; (2) the lack of economic substitutes; (3) the product's price inelastic demand; (4) defendants' dominance of the market; **[**35]** (5) the barriers to market entry; (6) and defendants' use of national (as opposed to regional) price lists and price increase announcements, the EPDM market was susceptible to collusive behavior, which would have had a class-wide impact on EPDM purchasers. The experts **[*92]** interpret these factors as limiting the possibility of competition and making the EPDM market conducive to a price-fixing scheme. They lay the groundwork for plaintiffs' argument that, if collusive behavior did occur, it would have been effective in raising prices across the class, thus demonstrating class-wide injury-in-fact.

Market power. Over the relevant class period, the defendants controlled over 90% of the domestic EPDM market. Asher Report, P 15; Report of Dr. John Beyer ("Beyer Report"), Ex. 1; Report of Dr. Keith Leffler ("Leffler Report") P 28. According to Beyer, the EPDM market can be described as an oligopoly -- "a market with relatively few producers . . . account[ing] for a large percent of the total market" -- which is particularly susceptible to coordinated behavior. Beyer Report, P 10; Leffler Report, P 22. Under basic economic theory, the more concentrated market power is (i.e., a relatively small number **[**36]** of firms possess a large percentage of the market), the more easily firms can assert collusive power over production/supply and prices in a market. Beyer Report at P 11.

Barriers to Entry. When industry profits are high, it encourages new firms to enter the market or existing firms to add capacity. Increased supply will eventually drive prices and profits down. However, where there are high barriers to entry, new firms will be dissuaded from entering the market, potentially leaving prices artificially high, resulting in more profits for existing firms. *Id*. at P 12. Barriers to entry also create incentives for existing firms to raise prices out of line with the cost of inputs, knowing that the higher profits will not be enough to attract new firms. Examples of barriers to entry include: high investment costs and long production facility construction schedules.

The average cost to build a 100,000-ton EPDM plant is between $ 300 and $ 500 million, taking approximately three to five years to complete. *Id*. at P 13; Reply Report of Dr. Martin Asher ("Asher Reply Report"), Ex. 31 (Declaration of James R. McKinley), at P 37-40. Furthermore, possessing the technology to produce EPDM requires **[**37]** proprietary information, which also raises a barrier to entry. *Id*. Beyer concludes these facts present high barriers to entry. Beyer Report at P 13; Leffler Report at P 33-38.

---

[6] Dr. Leffler is the opt-out plaintiffs' (Parker Hannifin Corporation, PolyOne One Corporation, and The Goodyear Tire & Rubber Company) expert. Although those plaintiffs are not party to the class certification motion, I will include Leffler's analysis of the EPDM market because the defense experts address Leffler's analysis in an expert report submitted in this action.

Fungible, commodity-like product. Drs. Asher, Beyer, and Leffler assert that EPDM is a commodity-like product, meaning it is easy to substitute one producer's EPDM for another's (i.e., "supply-side substitutibility"). This has two implications for the EPDM market: first, the defendants could easily compete over customers and, second, that price was the primary factor for purchasers in choosing the supplier from which to buy EPDM. Beyer Report at P 26. Beyer relies on various internal documents from the defendants that show which grades and brands of their competitors' EPDM products were the equivalent of their own grades and brands. Beyer Report, Ex. 2; Asher Reply Report, Ex. 27. This demonstrates not only that the defendants were aware of the commodity-like nature of their product, but also that they could easily produce each other's products if they so desired. Leffler Report at P 40-42. Without a collusive agreement to maintain and/or raise prices, it is likely that any EPDM supplier could have increased market **[**38]** share vis-a-vis its competitors by lowering or refusing to raise its own prices. To Beyer, this indicates a high probability of collusive potential in the EPDM market. Beyer Report at P 16.

No viable economic substitutes & price inelastic demand. According to Beyer, EPDM has several unique characteristics that make it difficult for purchasers to substitute another product for EPDM. This keeps demand relatively inelastic -- without other options, purchasers are essentially held hostage to price increases. *Id*. at P 17. Knowing that purchasers will not turn elsewhere if the price increases, EPDM suppliers would be able to raise prices without losing demand, painlessly increasing their profits. *Id*. at P 19-21; Asher Reply Report at P 35-43, Exs. 32-33; Leffler Report at P 30-32. Furthermore, the demand for EPDM is dependent primarily on the downstream demand for the end-use products that contain EPDM. As long as end-use consumers continue to demand those products, manufacturers of those products (the plaintiffs) would **[*93]** need to continue to purchase EPDM. Beyer Report at P 21.

Price Lists. There were no regional differences in price, meaning the defendants' price lists applied to the national **[**39]** market. Beyer Report at P 22. The defendants consistently raised prices in tandem, alternating which supplier was the first to raise prices. *Id*., Exs. 3-4, Asher Reply Report, Ex.10. Plaintiffs allege this was the result of illegal collusive activity. If so, the price lists are proof common to the class, which demonstrate a class-wide impact on prices -- "[t]he character and purpose of the announced price increases demonstrates that all purchasers of EPDM would have paid elevated prices." Beyer Report at P 26.

Communication. Leffler focused on the high level of communications between competitors, noting the exchanges of emails on prices and capacity and numerous meetings held in the guise of industry association meetings and planning meetings for potential joint ventures, raw material purchases, and buy-sell arrangements. Leffler Report at P 44. According to Leffler, "[c]ooperation creates an atmosphere of trust in which understanding rather than explicit agreements can be implemented." *Id*. at P 43.

(b) Defendants' Expert Reports

Defendants' expert, Dr. Kenneth Elzinga, was charged with examining the structural characteristics of the EPDM market relied upon by plaintiffs' experts Beyer **[**40]** and Leffler. Report of Dr. Kenneth Elzinga ("Elzinga Report") at 17-34. At the outset, Elzinga states that he "agree[s], for the most part, that the factors on the Beyer-Leffler list are present in the market for EPDM." *Id*. at 19. Rather than attacking their analyses of the EPDM market, Elzinga takes issue with the idea that the EPDM market fits as neatly into the traditional oligopoly model as they suggest it does, and questions the relevancy of those structural characteristics where they are present. *Id*.

On the issue of commodity-like fungibility, Elzinga concedes that EPDM is "often substitutable across defendants." *Id*. However, he notes that many EPDM brands do *not* have corresponding competing products, suggesting that EPDM purchasers of those grades are locked into a single supplier. Essentially, Elzinga disputes that EPDM is as easily substitutable as the plaintiffs' experts claim.

On the issue of demand inelasticity, Elzinga argues that there are available EPDM substitutes, though he acknowledges that "[m]arket demand may tilt to being inelastic." *Id*. at 22. Plaintiffs' experts do not assert a complete absence of viable substitutes, but note that the available substitutes are **[**41]** not so interchangeable with EPDM that a price increase would cause significant numbers of purchasers to switch from EPDM to a substitute. Elzinga appears to agree with that point, but emphasizes that switching products is easier than Beyer and Leffler claim it is.

Moving to market concentration, Elzinga again agrees that the EPDM market is "characterized by a small number of sellers." *Id*. at 23. He takes issue, however, with the fact that the plaintiffs have not concentrated enough on ExxonMobil's participation in the alleged conspiracy, noting that they have not called any ExxonMobil witnesses. *Id*. The plaintiffs' experts did note ExxonMobil's market share when analyzing market concentration, so this point is not particularly relevant to the issue of market concentration. Elzinga also believes that Beyer and Leffler have not fully accounted for producers not named as defendants, which he claim hold a 16% stake in the global EPDM market. *Id*. at 24. Given that plaintiffs are arguing that there was a conspiracy to set prices in the domestic EPDM market, I am not persuaded that the global market share held by foreign EPDM suppliers is particularly relevant to this antitrust suit.

Elzinga **[**42]** does not disagree that the cost to build a new EPDM plant is high and that barriers to entry generally help cartel members to control prices. *Id*. at 25-26. Elzinga strives to point out that, despite these high costs, new and existing EPDM suppliers added capacity during the alleged conspiracy period, pointing to one new plant by a new EPDM supplier and one new plant by an existing EPDM supplier. *Id*. at 25. As he later notes in his report, however, one of **[*94]** those plants -- the DDE Plaquemine plant -- "struggled to produce acceptable material and to operate at capacity through 2001." *Id*. at 52-53. The other new plant that opened during the class period, the Seadrift Plant, never produced at rates higher than 15% through 2001. *Id*. at 54. Also, Elzinga notes that during the class period, several existing EPDM producers announced plans to add additional capacity, though I am not sure that *announcing* plans to open new plants during the class period would affect the plaintiffs' barriers to entry analysis. Those plants opened well after the alleged conspiracy period and one was in the Netherlands, not the United States. *Id*. at 26. Furthermore, the effect of the new capacity on the alleged conspiracy's **[**43]** ability to control prices above what they would otherwise have been is an issue for the merits. The bottom line is that Elzinga does not contest that the EPDM market has high barriers to entry, just that those barriers did not entirely thwart new capacity.

Finally, Elzinga takes strong issue with the plaintiffs' experts' lack of explanation regarding the mechanics of the cartel's operations. Elzinga disputes Leffler's "atmosphere of trust" theory, arguing that cartels do not operate in such a nebulous fashion, but actually require explicit agreements and enforcement between players to operate properly. *Id*. at 30-31. As a contrast to the EPDM scheme alleged by plaintiffs, Elzinga points to studied cartels in the vitamin, lysine, and citric acid industries. He notes that, in those industries, executives met frequently to discuss pricing of their products and that "none of these cartels . . . left the functioning of their conspiracy up to a vague understanding that their members would like prices to be higher or complaints that prices were too low." *Id*. at 33. Elzinga notes that the few documents produced by the defendants suggesting the need to avoid price wars or make industry-wide lock-step **[**44]** price increases contrast with the level of "intense competition" demonstrated by the majority of documents produced in this litigation. *Id*. at 34. Elzinga believes that there is simply not enough evidence to show that EPDM producers met with sufficient frequency and with the required attendance by all major players to adequately form and manage a working cartel. *Id*. Beyer's response to this criticism is that there is enough documentation of industry-wide price increases to support the allegation of an explicit conspiracy. Beyer Response Report P 9. This is an issue for the merits, because it touches on the ultimate question of the of the antitrust lawsuit -- whether the defendants explicitly agreed to engage in price-fixing, thus violating the antitrust laws prohibiting collusion to stifle competition in the market.

My understanding is that the primary purpose of Elzinga's report on EPDM structural characteristics is not to show that the plaintiffs' experts have mischaracterized the dynamics of the EPDM market, but rather to assert that there is not enough evidence to prove that a conspiracy occurred. At this stage of the proceedings, however, the issue for the court is not whether **[**45]** the conspiracy actually occurred -- that is the ultimate issue in the case and one for the factfinder to decide at the merits stage. The narrow issue at this juncture is whether the elements of an antitrust cause of action are demonstrable across the class on the basis of common proof, or whether individual questions predominate.

The other defense expert, Dr. Edward Snyder, disputes Asher's theory that the lock-step price increases can serve as common proof of impact. In his report, Snyder discusses how it is not necessarily true that the lock-step price list increases resulted in higher "but-for" prices for all class plaintiffs due to list price rebates, discounts, and non-price factors such as research and development, shipping costs, and technical services provided to customers in lieu of discounts. Although those issues may be relevant for calculating *damages* -- those rebates, discounts, and non-price factors might mean that a particular plaintiff suffered no damages -- they do not mean that the plaintiffs were not *impacted* in some way. Having a higher but-for price is one way of proving impact, but not the only way. Snyder's disagreements with Asher are primarily focused on the **[**46]** merits of whether the plaintiffs can ultimately demonstrate the three necessary elements of an antitrust claim on the merits. **[*95]** That is not the issue for this motion for class certification. I need only determine whether the plaintiffs have demonstrated that the issue of antitrust impact is susceptible to proof applicable to the whole class.

The fact that Elzinga supports the plaintiffs' characterization of the EPDM market is noteworthy: they make their point on structural characteristics primarily to show that the market was conducive to a conspiracy, i.e., that if those six price list increases indicate the workings of a conspiracy, then it had a good chance of being successful, not whether a conspiracy actually existed. Therefore, in light of the general agreement among the experts that the EPDM market was susceptible to a conspiracy, I find that the plaintiffs have met their burden of demonstrating that the element of injury-in-fact can be proved by evidence common to the class -- the six national price lists that ostensibly applied to every customer, in conjunction with the general analysis of the characteristics of the EPDM market, support the notion that the price list increases **[**47]** had class-wide impact.

Pursuant to *In re IPO*, of course, these findings about the EPDM market are not binding on the ultimate fact-finder who would remain free to determine whether the price lists and structural characteristics demonstrate adequate classwide antitrust impact on the merits. I am merely finding that the plaintiffs have met their burden of demonstrating how proof common to the class is available to demonstrate the injury-in-fact element of an antitrust claim.

3. *Damages*

Proving damages is the final element of a successful antitrust claim, although courts have routinely held that class certification is not defeated by the need to undertake individualized damages determinations. *See, e.g., In re Visa Check, 280 F.3d at 139-40*. Nonetheless, the plaintiffs have offered the econometric multiple regression analysis of their experts, Asher and Beyer, to demonstrate that damages can be proven on a class-wide basis (and simultaneously demonstrate class-wide impact).

a. Methods and Standards

Multiple regression analysis is "a statistical tool for understanding the relationship between two or more variables." Daniel L. Rubinfeld, *Reference Guide on Multiple Regression* 181 (Federal Judicial **[**48]** Center, 2d ed. 2000). The "dependent variable" is the variable to be explained (here, the price of EPDM) and the "independent variables" are factors that are thought to influence the dependent variable. Using multiple regression analysis allows economists to estimate whether a certain market factor has an effect on the dependent variable and to what degree. By determining whether a particular variable in the equation influences the dependent variable, the economist can accept or reject that variable as having an influence on the dependent variable. This statistical tool is used frequently in employment discrimination and antitrust lawsuits. For example, in employment discrimination suits, an employee may argue that sex or race is a statistically significant variable on the value of the dependent variable -- the employee's salary. The Supreme Court has already accepted the use of multiple regression analysis in employment discrimination suits. *See Bazemore v. Friday, 478 U.S. 385, 106 S. Ct. 3000, 92 L. Ed. 2d 315 (1986)*. In an antitrust suit, plaintiffs will generally use multiple regression analysis to demonstrate that a "conspiracy" variable has influence over the dependent variable (price) -- that is, class members **[**49]** paid a higher price than the basic economic principles of supply and demand would otherwise dictate, thus demonstrating collusive behavior was at work.

In a multiple regression analysis, the model must be correctly set up for the results to be valid. The expert's choices are crucial for the success of the analysis and the ultimate fact-finder should consider the following when evaluating the efficacy of the expert's analysis: has the expert correctly identified the dependent variable; has he or she chosen the correct explanatory variable that is relevant to the question at issue; are the additional variables chosen all correct or are some missing and/or irrelevant; is the form of the analysis correct? Rubinfeld, *Reference* ***[*96]*** *Guide on Multiple Regression*, at 186-88.

Notwithstanding the unique posture of this case -- full merits discovery is essentially complete and the parties have submitted their expert reports, ordinarily presented for the first time at summary judgment or trial -- what the court must decide at the class certification stage remains the same. Based on the standard of proof required by *IPO Securities*,***HN16***[] the task of the district court at the class certification stage is to **[**50]** determine whether the defendants have successfully debunked the plaintiffs' claim that a class-wide approach can be used to prove impact and damages. *Cordes, 502 F.3d at 107*. The defendants should be focused on disputing the use of the methodology itself, not the results of the methodology. As the Supreme Court noted in *Bazemore*, the failure to include certain variables in a multiple regression analysis "will affect the analysis' *probativeness*, not its admissibility." *478 U.S. at 400*. In other words, if the defendants' experts are merely disputing the results of the plaintiffs' experts' analysis rather than the feasibility of using a single formula methodology, that would be a merits issue, not a class certification issue. If plaintiffs can present a feasible multiple regression analysis that purports to establish impact and damages using data and information common to the class, they will have met the requirement of demonstrating that damages can be proved by evidence common to the class.

In *Cordes,* the Second Circuit was primarily concerned with whether a single formula could be constructed, because of the individualized nature of the underwriting industry. *502 F.3d at 107*. The district **[**51]** court identified the ten factors that the defendants' expert believed accounted for an IPO underwriter's fee: "1) underwriter costs; 2) analyst coverage; 3) price stabilization and market making; 4) other underwriter compensation; 5) regulatory issues; 6) prospective issuer investment banking business; 7) the risk of the offering; 8) underwriter prestige and reputation; 9) share pricing; and 10) syndicate composition." *In re Public Offering Fee Antitrust Litig., 2006 U.S. Dist. LEXIS 21076, at *22 (S.D.N.Y. 2006)*, *vacated by* *Cordes, 502 F.3d at 109*. As the defense expert explained, "[b]ecause underwriting services are not fungible products but, rather, are customized by differentiated underwriter suppliers for each issuer . . . an assessment of whether a particular issuer's net proceeds were reduced by the alleged conspiracy involves an individualized inquiry based on non-common factors that will vary from one issuer and IPO to the next." *Public Offering Fee, 2006 U.S. Dist. LEXIS 21076, at *21*. That expert claimed that the multitude of factors accounting for an underwriter's fee made it impossible to create a working multiple regression model. *Id. at *30*. The plaintiffs' expert claimed **[**52]** that he could create a working multiple regression model, despite acknowledging that there are at least six factors that accounted for an underwriter's fee (risk of the offering, quality and reputation of the underwriter firm, whether the IPO involved the privatization of a government-owned entity, whether the initial stock price was relatively low, the year the IPO was conducted, and the type of IPO process used). *Id. at *22 n.7, *26*. The plaintiffs' expert never presented an actual equation and consequently the defendants did not offer specific methodological criticisms beyond the claim that no such formula could be created. The district court accepted the defense expert's report, which focused on the relevant issue -- whether antitrust impact can be proven by evidence common to the class -- whereas the plaintiffs' expert report was focused on whether damages could be proven on a class-wide basis. *Id. at *27-28*. On appeal, the Second Circuit noted that the two experts' analyses were actually directed to the same question, "whether injury-in-fact is susceptible to common proof in this case," and concluded that, if such a formula could be constructed, "the injury-in-fact question is **[**53]** common to the class. Otherwise, it poses individual ones." *Cordes, 502 F.3d at 107*. Therefore, the Court remanded the case to the district court to determine "which expert **[*97]** is correct," i.e., whether a single formula can be created, or whether there really were too many factors at work for a multiple regression model to be methodologically sound. *Id*.

Before proceeding further, I must note several key points. First, the plaintiffs in *Cordes* were depending on their multiple regression models to prove class-wide injury-in-fact *and* damages. The plaintiffs here present not only an econometric analysis to prove damages (which also demonstrates injury-in-fact) but have presented six lock-step national price list increases for a fungible product in an industry with structural characteristics supporting the efficacy of collusive activity. Without that type of evidence, the *Cordes* plaintiffs were necessarily dependent on their econometric model to meet the requirements of *Rule 23*. Second, unlike an underwriter fee that necessarily depends on a combination of highly individualized factors, EPDM is a commodity-like product whose price results from only a small number of variables that are readily **[**54]** determined using publicly available data. Therefore, the plausibility of a multiple regression analysis in the EPDM context is necessarily higher than in the IPO underwriting context. In *Cordes,* the Second Circuit was not asking the district court to assess the efficacy of the plaintiffs' modeling on the merits, but rather to determine why, given the individualized nature of the IPO underwriting industry as acknowledged by both sides' experts, a single formula could nonetheless be constructed. As discussed more fully below, the biggest problem for the EPDM defendants is that, although they claim to be attacking the methodology employed by the plaintiffs' experts, they are, in practice, attacking the multiple regression analysis on the merits by challenging the results of the modeling rather than the conception of the modeling.

b. Plaintiffs' Economic Experts

Plaintiffs seek to show that class-wide damages can be proven by relying, in part, on Beyer's econometric modeling. Beyer's model is a "reduced-form multiple regression equation, i.e., a single equation that takes into consideration factors of both supply and demand, as well as the impact of the alleged conspiracy." [7] Beyer Report **[**55]** at P 28. Beyer next identifies a class period: October 1997 to December 2001. *Id*. at P 29. Beyer explains that it is during the latter portion of 1997 that the coinciding price increases became most apparent. *Id*. at P 29-31. By 2002, however, Beyer's analysis of the market indicates a price war had begun, thus indicating an end to collusive dealings among EPDM producers. *Id*. at P 31. Having identified the class period, Beyer explains that he will compare prices during the class period to EPDM prices after the class period (aka the "benchmark period"). *Id*. at P 32. He notes that, because he believes that collusive dealings began even before 1997, pre-class period pricing would offer an unacceptable benchmark for comparison. *Id*.

Beyer's reduced form equation is: "P[EPDM] = f(D[EPDM], [SEPDM], Cons)" [8] -- the price of EPDM is a function of the demand for EPDM, the supply of EPDM, and the conspiracy. *Id*. at P 36. **[**56]** Beyer conjectures that the supply of EPDM is a function of the cost of its inputs. *Id*. at P 33. Identifying the primary inputs for the production of EPDM -- ethylene, propylene, energy, and labor -- Beyer states that, all other things being equal, he would expect that an increase in the cost of the inputs will increase the price of EPDM. *Id*. at P 34. Beyer calculated the supply variable by multiplying each input's percentage of overall input cost for EPDM by price indices collected from the U.S. Bureau of Labor Statistics or Platts [9] and then adding all the results together. *Id*. at P 40.

The D[EPDM] variable is determined by the demand in industries that use EPDM in their **[*98]** products. *Id*. at P 35. As demand for those downstream products increases (or decreases), the demand for EPDM increases (or decreases). *Id*. As the demand increases (decreases), basic economic theory dictates that the price of EPDM would increase **[**57]** (decrease) as a result. "The demand index was created by multiplying the percentages for each of the individual components [shown in Exhibit 6] by its respective industrial output index as reported by the U.S. Federal Reserve Bank." *Id*. at P 41.

The Cons variable becomes relevant in the equation during the class period by taking on a value of "1" between October 1997 and December 2001 and "0" at all other times. *Id*. at P 36. The "Cons" variable is Beyer's "dummy" variable, that is, it captures all unexplained impact on the price of EPDM in a single variable. Beyer concludes that the "regression analysis shows that, while supply and demand factors were at work in determining the price of

---

[7] Beyer's regression technique is described as "Ordinary Least Squares" ("OLS") and uses "fixed effects." *Id*. at P 38. Beyer explains that using "fixed effects" enables the considerations of customer buying power, negotiating strength, and the like to be taken into consideration. *Id*.

[8] "P[EPDM]" stands for the price of EPDM, "D[EPDM]" stands for the demand of EPDM, "S[EPDM]" stands for the supply of EPDM. "Cons" stands for the conspiracy variable.

[9] According to Beyer, Platts is a "leading global supplier of energy and metals related information." P 40 n.56.

EPDM, they do not alone explain the price of EPDM during the damage period," meaning collusive activity must also have been at work. *Id*. at P 44.

c. Defendants' Economic Experts

Essentially, the defendants' experts' critique of Beyer's methodology centers on the one-size-fits-all nature of his dummy variable, which they argue is too indefinite to capture any true data because key variables are missing. The defendants attack plaintiffs' experts' conclusions, relying primarily on Dr. Christopher James's **[**58]** expert report, which purports to demonstrate the fallacy of Beyer's multiple regression analysis calculations. Although James claims to show how Beyer's regression is methodologically flawed, an examination of his report reveals that his primary dispute is with the *conclusions* that Beyer draws from his calculations, not whether a single formula can be used to estimate class-wide damages. James's report does not appear to be disputing that the plaintiffs would be able to use common proof, i.e., a single formula, to show that there was a classwide impact or damages. Rather, he appears to dispute the efficacy of that calculation by arguing that Beyer has omitted key variables that would explain the positive value of his "conspiracy" variable. Whether the price of EPDM increased disproportionately to the cost of inputs as the result of a conspiracy to raise/maintain prices, or instead resulted from a non-collusive cause, is a question on the ultimate merits of the case.

Rather than dispute that it is not feasible to measure antitrust damages or impact in the way Beyer proposes, James disputes the accuracy of his calculations. He criticizes how Beyer calculated the demand and supply variables. **[**59]** James says that Beyer: (1) failed to properly calculate the variables used in the demand index, (2) failed to properly account for changes in the structure of demand from the downstream industries -- i.e., that it cannot account for such factors as "changes such as long-term substitution between materials or changes in the manufacturing of downstream applications that might increase or decrease their reliance on EPDM," (3) has not captured changes in the buyers' bargaining power over the course of the conspiracy, (4) has not properly accounted for changes in U.S. consumption through 2000, and (5) makes findings inconsistent with the economic theory that cartels in general should not lead to both higher prices and higher demand. *Id*. at PP 23-30. James argues that Beyer's supply index variable is also inaccurate because it does not account for capacity-related effects on supply. *Id*. at PP 31-32. James contends that higher capacity utilization over the alleged class period is what caused the higher prices for EPDM, not a conspiracy. *Id*. at P 32. James claims to test the Beyer model's predictive ability outside the alleged conspiracy period, when the conspiracy variable would hypothetically **[**60]** be statistically insignificant, and finds that even outside the class period Beyer's model shows unexplained influences on EPDM pricing. *Id*. at P 34.

In their reply brief, defendants acknowledge that in order to defeat class certification they must demonstrate that "Beyer's own reduced form model is not capable of answering the question of antitrust injury on a classwide basis." Defendants' Reply at 3. Even accepting the structure of Beyer's model, defendants contend that they can demonstrate that nearly half of the class members **[*99]** paid lower prices than they would have in Beyer's hypothetical non-conspiratorial world. Declaration of Christopher James (attached to Defendant's Reply), at P 4, 6. To show this using Beyer's model, James created a customer-specific conspiracy dummy for each customer in Beyer's dataset that purchased EPDM during and after the class period. James Declaration, at P 5. He then replaced Beyer's single conspiracy variable with his new customer specific variables, known in econometrics as "interaction effects." *Id*. With interaction effects, each customer's average price *outside* the class period acts as the benchmark against which its average price *during* the alleged **[**61]** conspiracy period is measured. The customer-specific conspiracy dummy variable accounts for the difference between these two averages. *Id*. Using that method to test whether there was a uniform effect across EPDM customers, James found that the effects varied widely and therefore, contrary to Beyer's contention that the alleged conspiracy had uniform effects, no common damages can be proven. James Report, P 46. Therefore, the defendants argue, plaintiffs have not met their burden of establishing that common questions predominate.

James then goes on to construct his own model using class-wide proof that he claims better demonstrates what factors were affecting the price of EPDM during the alleged class period. Calling this model a "structural model" of supply and demand, James says it better accounts for the "joint determination of price and capacity utilization in the marketplace," which the plaintiffs' reduced form model does not adequately account for. *Id*. at P 41. James explains that Beyer's reduced form model erroneously conflates the effects of supply and demand factors on the dependent variable, without isolating the extent to which those factors affected price.

Using a two-step **[**62]** analysis known as the "two-stage least squares" technique, James first estimates the effect of plaintiffs' experts' variables on capacity utilization (the first stage's dependent variable) in order to control for the effect of demand on capacity utilization. James adds in the result of the first stage calculation as the variable in the second stage, making *price* the new dependent variable. Any remaining unexplained supply-side effect could be attributed to a hypothetical conspiracy variable. *Id*. at P 42. James says the results of his model show that price was barely higher during the conspiracy period and that the conspiracy variable (once he controls for his additional variables) is statistically insignificant. Thus, there was no conspiracy. *Id*. at P 43.

In summary, James concludes that, contrary to Beyer's report, he can prove that nearly half of the class members paid *lower* prices during the conspiracy than in Beyer's "but for" hypothetical, non-conspiratorial world. Therefore, James concludes, there is no way of demonstrating class-wide impact or damages due to the conspiracy. James purports to offer another model for demonstrating effects on the class, which the plaintiffs in turn **[**63]** challenge.

Defendants also rely on Elzinga's report to refute plaintiffs' claim of proof of classwide impact. The pertinent portion of Elzinga's report is focused on substantive arguments about whether or not a conspiracy existed in the EPDM market, which is not the question before the court at the class certification stage. For instance, Elzinga devotes whole sections of his report to discussing reasons why the six price increases were the result of unilateral increases, not collusion (Section VI Part C.2); offering a variety of explanations for several plants' low output to explain that EPDM producers did not collude to limit supply of EPDM, (Section VII); and arguing that, contrary to the plaintiffs' allegations in the complaint, there was no coordination among EPDM producers for allocating customers. Elzinga cites evidence that EPDM purchasers switched between various suppliers and that market shares among EPDM suppliers were not consistent over the class period (Section VIII). These arguments all go to the ultimate issue whether there was a conspiracy among EPDM producers to raise and/or maintain EPDM prices above competitive levels. Although Elzinga's report sets forth valid arguments **[**64]** on the merits, those arguments are not relevant when determining whether the plaintiffs have met their **[*100]** burden to demonstrate all the *Rule 23* requirements for class certification.

Elzinga's focus on the plaintiffs' multiple regression analysis comes in Section X of his report, where he faults Beyer and Leffler for failing to include a provision controlling for capacity in their cost input variable. Elzinga Report, at 70. Elzinga argues that Beyer and Leffler "both ignore the effects of capacity on prices, thereby undercutting their analysis of pricing trends and their attempt to identify the effect of an alleged cartel on prices." *Id*. at 71. Elzinga's analysis focuses on the role of the Plaquemine and Seadrift plants before and after the class period. Those plants did not open when planned, so EPDM producers experienced significant capacity constraints throughout the class period. As a result, existing plants ran at or near capacity, which put an upward pressure on prices. *Id*. at 71-75. Price pressure eased when new capacity finally came on line, a period that coincided with the end of the class period in 2001. *Id*. at 76. "The surge in productive capacity and resulting decrease in prices **[**65]** coincides with what Plaintiffs claim is the end of the alleged cartel period. But by elementary economic logic, prices fell because of increased supply, not the end of the alleged cartel." *Id*.

Next Elzinga debunks Beyer and Leffler's demand variable, arguing they have omitted "certain aspects of demand" and overall that the index "appears out of step with actual trends in industry demand." *Id*. at 78. First, Elzinga notes the steady growth of EPDM sales between 1997 and 2000. By 2001, however, the demand for EDPM had dropped due to the economic recession precipitated by the terrorist attacks on September 11, 2001. Elzinga says Beyer and Leffler mistakenly assign the drop in prices to the end of the cartel period, rather than to an economy-wide recession. *Id*. at 81. Elzinga asserts that Beyer and Leffler's demand index erroneously indicates that demand was higher in 2002 than it was in 2001, when in reality price and quantity data indicate that demand fell in 2002 from 2001. Beyer and Leffler's failure to accurately reflect a drop in demand, Elzinga argues, calls into question the accuracy of their demand index. *Id*. at 82.

d. Discussion

The defendants, I believe, have misconstrued the extent **[**66]** of the "merits" inquiry that a court must make under the class certification analysis required by *In re IPO*. The defendants and their experts have focused their opposition to the motion for class certification primarily on the *merits* of the plaintiffs' antitrust claims. Although characterized as a dispute over the very feasibility of plaintiffs' analysis, defendants are actually arguing that plaintiffs' multiple regression analysis, done a slightly different way (i.e., the "right" or "better" way), does not prove what they claim it proves, classwide damages. The defendants claim the model, done slightly differently, demonstrates that at least half the class suffered no damages and thus plaintiffs have not presented a feasible method for proving classwide damages. In essence, the defendants are asking the court to determine which multiple regression model is *most* accurate, which is ultimately a merits decision.

The real question before this court is whether the plaintiffs have established a *workable* multiple regression equation, not whether plaintiffs' model actually *works*, because the issue at class certification is not which expert is the most credible, or the most accurate modeler, **[**67]** but rather have the plaintiffs demonstrated that there is a way to prove a class-wide measure of damages through generalized proof. The defendants contend that James has successfully refuted the efficacy of Beyer's model to show class-wide damages (and injury). It seems to me, however, that rather than refuting the *efficacy* of Beyer's model, defendants are disputing the results by manipulating Beyer's model to show that no common impact can be shown and then, in the alternative, proffering their own model using common class-wide data to show there is *not* a class-wide impact. Beyer contests James's use of individual customer-conspiracy variables; James claims Beyer's model is flawed because Beyer does not use that type of variable. Each has arrived at a polar opposite finding concerning **[*101]** common impact to the class of EPDM purchasers, but significantly both employ single formulas.

Certainly, *In re IPO* heightened the plaintiffs' burden on a class certification motion. No longer may plaintiffs slide by the class certification stage on unsupported legal conclusions or merely plausible expert methodologies. Even *In re IPO,* however, does not require plaintiffs to prove the merits of their case-in-chief **[**68]** at the class certification stage. They need not demonstrate that their multiple regression analysis captures all the proper variables and thus reaches the "right" answer, as the defendants would require them to do. The defendants have failed to convince me that it is methodologically impossible to use a single formula to estimate class-wide damages. It is unnecessary to delve further into the merits by going point-by-point through each expert's theory to decide who has designed the "better" multiple regression equation.

A brief analysis of the facts of *In re IPO* reveals how the heightened standard is intended to work in practice. In that case, the Second Circuit vacated the district court's grant of class certification, holding that the plaintiffs' allegations and evidence could *never* meet the *Rule 23* requirements *as a matter of law*. *In re IPO, 471 F.3d at 42*. Although the district court accepted that the plaintiffs had established the presence of an "efficient" market, enabling them to invoke the "fraud-on-the-market" theory to show that common questions of reliance would predominate over individual questions, the Second Circuit did not accept that conclusion on its face. [10] *Id.*

Under the "some showing" standard, the district court accepted that the plaintiffs had satisfied their burden of demonstrating that the fraud-on-the-market presumption was applicable in their case. *Id*. Upon closer examination, however, the Second Circuit determined that it would be impossible for the plaintiffs to *ever* establish the fraud-on-the-market theory because there is no developed market for newly offered securities and thus the market for initial public offerings ("IPOs") is not an "efficient" market by definition. *Id*. Furthermore, the Court concluded that the plaintiffs' own allegations that the market was slow to correct the collusive price inflation, despite widespread knowledge of the scheme, belied the essential theory of how an "efficient" market, which relies on price to **[**70]** reflect accurate value, is expected to work. *Id. at 43*.

---

[10] The **[**69]** "fraud-on-the-market" doctrine established in *Basic Inc. v. Levinson, 485 U.S. 224, 245-37, 108 S. Ct. 978, 99 L. Ed. 2d 194 (1988)*, creates a rebuttable presumption that (1) an issuer's misrepresentations will affect the price of securities that are traded on the open market, and (2) investors rely on market price to reflect an accurate value for that security. *Id*. (citing *Hevesi v. Citigroup, Inc., 366 F.3d 70, 77 (2d Cir. 2004))*.

The Second Circuit concluded that, in the absence of the fraud-on-the-market presumption, individual questions of reliance *necessarily* would predominate over common questions. *Id*. Because the plaintiffs could not show that they would ever meet the *Rule 23* requirement of showing that common questions of reliance would predominate over individual questions as a matter of law, class certification was not warranted. *Id*. Even though determining whether the fraud-on-the-market theory applied was a necessary inquiry on the merits, it was also an essential stepping-stone for the plaintiffs' predominance showing under *Rule 23(b)(3)*. Therefore, *In re IPO* established that ***HN17***[] a district court is required to parse the plaintiffs' legal theory on the merits where it overlaps with the threshold inquiry of *Rule 23(b)(3)* predominance.

Here, the defendants are not arguing that any legal theory that the plaintiffs are relying on to demonstrate predominance is inapplicable as a matter of law. They are instead claiming that plaintiffs' common proof does not sufficiently demonstrate the merits of their antitrust claim. In *Cordes*, the plaintiffs were attempting **[**71]** to prove both impact and damages through the use of multiple regression analysis. *502 F.3d at 96-97*. Unlike the EPDM plaintiffs, however, the *Cordes* plaintiffs did not have, in addition to their econometric modeling, common proof in the form of six national lock-step price list increases, in combination with largely unchallenged structural economic characteristics **[*102]** that support the efficacy of such lock-step increases. The *Cordes* defendants' expert contested whether a single formula could be constructed to determine whether a particular plaintiff would have paid a lower "but-for" underwriter fee. *Id. at 106*. The defense expert believed that no such formula could be constructed because calculating the "but for" fee, against which the actual fee paid could be compared, required "an individualized, plaintiff-by-plaintiff analysis of ten factors including underwriter costs, price stabilization, and the risk of the offering." *Id. at 97*. The Second Circuit remanded the case in order for the district court to determine "which expert is correct," that is, whether a single formula could or could not be employed to make a valid comparison between the but-for and actual fee paid. *Id. at 107*. I **[**72]** do not understand the Second Circuit to be asking the district judge to determine which expert's report is more persuasive on the merits, but rather which expert is correct about whether or not the plaintiffs' method of proof is a form of common evidence.

The same problem is not present in this case. I understand the defendants to be contesting the merits of the plaintiffs' analysis, that is, that their econometric model does not properly account for the correct variables, and that a model that incorporates the correct factors will show that at least half the class suffered no damages. Whether the plaintiffs' multiple regression analysis incorporates the necessary variables/factors to reach the correct economic conclusion is an issue to be reserved for the merits, because it has no bearing on whether the plaintiffs can meet the predominance prong or *Rule 23(b)(3)* by establishing that common proof of impact is available in this case. "While the omission of variables from a regression analysis may render the analysis less probative than it otherwise might be, it can hardly be said, absent some other infirmity, that an analysis which accounts for the major factors 'must be considered unacceptable **[**73]** as evidence of discrimination.' Normally, failure to include variables will affect the analysis' probativeness, not its admissibility." *Bazemore, 478 U.S. at 400* (internal citations omitted, quoting the appellate court ruling).

In *Hnot v. Willis Group Holdings, Ltd*., District Judge Gerald E. Lynch considered and rejected a similar interpretation of *In re IPO*. *241 F.R.D. 204, 210 (S.D.N.Y. 2007)*. Where the plaintiffs and defendants disagreed about whose experts' statistical findings were more persuasive, Judge Lynch noted that:

> this disagreement is relevant only to the merits of plaintiffs' claim . . . and not to whether plaintiffs have asserted common *questions* of law or fact. By asking the Court to decide which expert report is more credible, defendants are requesting that the Court look beyond the *Rule 23* requirements and decide the issue on the merits, a practice *In re IPO* specifically cautions against.

Id. *Cf. In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305 (3d Cir. 2008)* (vacating class certification order on ground that the district court did not undertake the necessary rigorous analysis of the parties' experts' opinions and remanding with the direction that the district [**74] court should resolve the dispute between the experts whether impact was susceptible to class-wide proof or not). [11]

[*103] In any event, regardless of the efficacy of the plaintiffs' econometric modeling to show impact and/or damages, the plaintiffs have presented factual evidence of the allegedly collusive activity -- the six lock-step price increases and the EPDM market's structural characteristics -- that would be common to all plaintiffs. ***HN18***[] Common questions predominate where "even if each Class Member . . . were to bring suit individually, each plaintiff would have to allege and prove virtually identical facts." *In re Merrill Lynch & Co. Research Reports Sec. Litig., 246 F.R.D. 156, 165 (S.D.N.Y. 2007)*. That is certainly the case here; a primary component of an individual EPDM plaintiff's case would revolve around proving how the price list increases are evidence of illegal collusive activity.

Furthermore, even if the defendants are correct that the measure of damages is not susceptible to classwide proof, that is not enough to defeat class certification. *McLaughlin, 522 F.3d at 231*. ***HN19***[] "[T]he fact that damages may **[**76]** have to be ascertained on an individual basis is not, standing alone, sufficient to defeat class certification." *Id*. (citing *In re Visa Check, 280 F.3d at 140*). "Common issues may predominate when liability can be determined on a class-wide basis, even when there are some individualized damages issues." *In re Visa Check, 280 F.3d at 139*. *See also* *In re Scrap Metal Antitrust Litig., 527 F.3d 517, 535 (6th Cir. 2008)* (affirming district court's grant of class certification where "the court found that the 'fact of damages' was a question common to the class even if the amount of damages sustained by each individual class member varied."); *Urethane II, Polyether Polyol, 251 F.R.D. at 639* ("The possibility that individual issues may predominate on the issue of damages, however, does not defeat class certification by making this aspect of the case unmanageable."); *In re Carbon Black Antitrust Litig., 2005 U.S. Dist. LEXIS 660, 2005 WL 102966, at *20 (D. Mass. 2005)* ("Even if the damage assessments end up being too individualized to resolve as a class, that does not warrant denial of the plaintiffs' motion at this stage."). In the present case, it may very well be that damages will need to be calculated individually, **[**77]** particularly if some plaintiffs received sufficient rebates, discounts, and other quantifiable favored treatment to mitigate all damages from the defendants' allegedly illegal, collusive behavior.

The defendants have made a strong argument that it may be impossible to calculate damages on a class-wide basis, that there is no single percentage of overcharge that can be applied to the class as whole. It may be that a customer-by-customer examination is necessary to determine pricing provisions of long-term contracts, negotiated rebates, and other discounts off the artificially inflated list price. However, those pricing incentives may have been available even in the absence of a conspiracy, to lower prices below even the non-inflated competitive level. It could be that industry custom or course of dealing between a particular supplier and purchaser dictated those types of rebates and discounts even in the absence of supracompetitive pricing. Thus, it seems to me that individual questions of damages could predominate over common questions.

That is not enough to defeat class certification, however, on the issue of liability. The Second Circuit has suggested at least five ways to address **[**78]** individualized damages issues:

> (1) bifurcating liability and damage trials with the same or different juries; (2) appointing a magistrate judge or special master to preside over individual damages proceedings; (3) decertifying the class after the liability trial

---

[11] The facts of *Hydrogen Peroxide* are distinguishable from the present case. At the 11 class certification stage, the plaintiffs' expert -- the same Dr. Beyer employed by plaintiffs in this case - merely asserted that he *could* create an economic model using proof common to the class, but never actually completed his proposed models/analyses. *Hydrogen Peroxide, 552 F.3d at 313, 315*. The defendants' expert, on the other hand, contended that Beyer's modeling would fail. *Id. at 313-14*. In this case, Beyer has actually presented an econometric model that purports to show that antitrust impact is susceptible to common proof. Although the defense experts claim to dispute the feasibility of constructing an econometric model using proof common to the class, their reports are better characterized as disputing the results of the plaintiffs' modeling. To resolve this dispute would be to place myself in the role of the ultimate factfinder by choosing which expert's econometric model or theory is "correct." Therefore, having presented a working econometric model that demonstrates class-wide **[**75]** impact and injury using proof common to the class, the plaintiffs here have gone further than the plaintiffs in *Hydrogen Peroxide* in establishing that the requirements of *Rule 23* have been met.

> and providing notice to class members concerning how they may proceed to prove damages; (4) creating subclasses; or (5) altering or amending the class.

Id. at 141 (internal footnote omitted). Because the defendants have presented a strong argument that damages may need to be determined on an individual basis, one or more of these alternatives may be appropriate in this case.

For the foregoing reasons, I find that the plaintiffs have met their burden of demonstrating how common questions will predominate over individual ones on the three elements of an antitrust claim.

[*104] C. Superiority

The final *Rule 23* requirement the plaintiffs must meet is that a class action is superior to other methods of adjudicating this dispute. The plaintiffs contend that individual lawsuits would be duplicative and a waste of judicial resources given the large number of affected EPDM purchasers with overlapping legal claims that arise out of the same course **[**79]** of conduct. Furthermore, they argue that the relatively small amount of damages that each class member stands to recover makes individual adjudication financially impractical for most class members who could not afford to mount a full-scale antitrust suit against the defendants on their own. Finally, given the similarity in claims and ease of determining members of the class, the plaintiffs assert that a class action here would comply with *Rule 23(b)(3)*'s directive that it be a superior method for the fair and efficient adjudication of the claims. The defendants argue that it would be more efficient to litigate the claims on an individual basis because individual questions of impact and damages predominate over common questions.

Having found that the plaintiffs have successfully demonstrated that common liability questions predominate over individual ones, I also find that a class action is a superior method of adjudication. A risk of inconsistent results and conservation of judicial resources dictate that this case should be litigated as a class action, at least on the issue of liability. Considering that a large number of class plaintiffs would have little or no financial incentive **[**80]** to prosecute the alleged antitrust violation individually, class certification is clearly a superior method of adjudication because it is most likely to promote fairness and efficiency.

IV. Conclusion

For the foregoing reasons, the plaintiffs' motion for class certification (**doc. # 184**) is **GRANTED**.

It is so ordered.

Dated at Bridgeport, Connecticut, this 13th day of February 2009.

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss tests whether the allegations in a complaint, if true, amount to an actionable claim. In evaluating a defendant's motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a court must accept as true all allegations of material fact in the complaint and read the complaint in the light most favorable to the nonmoving party. However, a court should not accept as true unreasonable inferences; nor should it accept legal conclusions cast in the form of factual allegations. A court reads the complaint as a whole, together with facts appropriate for judicial notice, rather than isolating allegations and taking them out of context.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

The principles of notice pleading do not eliminate the requirement that a plaintiff plead sufficient factual allegations to demonstrate a plausible claim. Where a particularly complex claim or set of claims is alleged, the factual burden to overcome a motion to dismiss is more difficult in practice: a court may require more detail to assess the plausibility of complex allegations. For example, antitrust allegations must be sufficiently detailed for a court to determine whether they are economically plausible. Such demands are all the more reasonable when the factual basis underlying the allegations is within the plaintiff's knowledge. None of this gives courts license to blur the line between a motion to dismiss and summary judgment: a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

HN3[] Actual Monopolization, Claims

The 15 U.S.C.S. § 2 monopolization offense requires (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN4[] Standing, Requirements

For a plaintiff to maintain private antitrust claims, it must show injury and causation. Therefore, a plaintiff must adequately plead that the defendant's misconduct caused an injury to competition or the competitive process that harmed the plaintiff.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN5[] Standing, Requirements

On a private antitrust claim, the minimum required injury for standing is some damage flowing from the unlawful antitrust misconduct; inquiry beyond this minimum point goes only to the amount and not the fact of damage. Standing also requires that the antitrust violation be a material cause of that damage. Material causation and injury in fact are jurisdictional issues; even if they are satisfied at the pleading stage, the requirements must continue to be satisfied at all stages of the case.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN6[] Standing, Requirements

The antitrust injury element of a substantive antitrust offense asks whether the injury in fact is the type the antitrust laws remedy; not whether there has been injury in fact.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN7[] Private Actions, Sherman Act

Judicial precedent recognizes that, at the fact-finding stage, antitrust plaintiffs are entitled to the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each. That is, relevant circumstantial evidence should be considered in making a fact determination. The same principle applies at the pleading stage: allegations should generally be taken as a whole, together with matters appropriate for judicial notice.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN8[] Exemptions & Immunities, Noerr-Pennington Doctrine

The Noerr-Pennington doctrine serves *First Amendment* interests by protecting the petitioning and political activity of market participants. Subject to a limited sham exception, speech directed to obtaining government action cannot give rise to an antitrust violation. The Noerr-Pennington doctrine applies equally to federal and state claims.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

HN9[] Noerr-Pennington Doctrine, Right to Petition Immunity

Pleading a sham under the Noerr-Pennington doctrine does not suffice to state a claim. Rather, a plaintiff must survive the Noerr-Pennington doctrine and adequately plead *15 U.S.C.S. § 2*'s elements.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN10[] Noerr-Pennington Doctrine, Sham Exception

Although the Noerr-Pennington doctrine applies to activities directed at any branch of government, the scope of the sham exception depends on the type of governmental entity involved.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN11[] Exemptions & Immunities, Noerr-Pennington Doctrine

The Noerr-Pennington doctrine itself recognized that objectively legitimate petitioning conduct, even when undertaken in subjective bad faith, is not illegal, either standing alone or as part of a broader scheme itself violative of the Sherman Act. However, some petitioning conduct may be aggregated into a petitioning scheme to determine whether the Noerr-Pennington doctrine applies to that conduct.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN12[] Noerr-Pennington Doctrine, Sham Exception

Under the broadest possible range of exceptions, litigation activity constitutes a sham for purposes of the Noerr-Pennington doctrine by meeting any of three tests: (1) the lawsuit is objectively baseless and the defendant's motive in bringing it was unlawful; (2) a party commits knowing fraud on a court by making intentional misrepresentations severe enough to deprive the litigation of its legitimacy; or (3) the conduct involves a series of lawsuits brought pursuant to a policy of starting legal proceedings without regard to the merits and for an unlawful purpose.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN13[] **Noerr-Pennington Doctrine, Sham Exception**

The United States Court of Appeals for the Federal Circuit expressly recognizes only two types of sham litigation: (1) the lawsuit is objectively baseless and the defendant's motive in bringing it was unlawful, and (2) a party commits knowing fraud on a court by making intentional misrepresentations severe enough to deprive the litigation of its legitimacy.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN14[] **Noerr-Pennington Doctrine, Sham Exception**

The United States Court of Appeals for the Ninth Circuit reconciles two precedents that coexist in some tension by recognizing a third type of sham litigation, i.e., where the conduct involves a series of lawsuits brought pursuant to a policy of starting legal proceedings without regard to the merits and for an unlawful purpose. The Ninth Circuit has long held that type (b) sham litigation, i.e., where a party commits knowing fraud on a court by making intentional misrepresentations severe enough to deprive the litigation of its legitimacy, applies to determine whether a single action constitutes sham petitioning. Type (b) sham litigation is essentially retrospective.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN15[] **Noerr-Pennington Doctrine, Sham Exception**

Type (c) sham litigation, i.e., where the conduct involves a series of lawsuits brought pursuant to a policy of starting legal proceedings without regard to the merits and for an unlawful purpose, is prospective. It applies when there is a series of lawsuits and other legal actions without regard to the merits because when dealing with a series of lawsuits, the question is not whether any one of them has merit, some may turn out to, just as a matter of chance, but whether they are brought pursuant to a policy of starting legal proceedings without regard to the merits and for the purpose of injuring a market rival. This amounts to potential liability for a petitioning scheme.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN16[] **Noerr-Pennington Doctrine, Sham Exception**

Judicial precedent requires all Noerr-Pennington shams to pass both an objective and a subjective test.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN17 [] **Noerr-Pennington Doctrine, Sham Exception**

Under the Noerr-Pennington doctrine, a type (c) theory must allege both (1) a subjective policy of starting legal proceedings for the purpose of injuring a market rival; and (2) an objective policy of starting legal proceedings without regard to the merits. Precisely how the objective prong works is unclear, but it appears that the Ninth Circuit favors determining whether a substantial number of the suits lacked objective merit.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN18 [] **Noerr-Pennington Doctrine, Sham Exception**

The first method of alleging sham litigation has two steps. First, the litigation must be alleged to be objectively baseless. Second, the defendant must subjectively intend to use the judicial process, as opposed to the outcome of that process, as an anticompetitive weapon.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN19 [] **Noerr-Pennington Doctrine, Sham Exception**

As to the objective test for determining sham litigation under the Noerr-Pennington doctrine, the challenged lawsuit's legal viability is assessed first. Thus, conduct that includes ignoring the law, filing administrative or legal actions that do not request reasonable extensions or development of the law and mischaracterization of the relevant issues or legal standards may be stripped of immunity. If the lawsuit is legally viable, a court may turn to whether the defendant had factual probable cause to institute the suit.

Civil Procedure > ... > Justiciability > Ripeness > Tests for Ripeness

HN20 [] **Ripeness, Tests for Ripeness**

Prudential ripeness involves two over-arching considerations: the fitness for judicial review and the hardship to the parties of withholding court consideration.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Fraudulent Procurement of Patent

HN21 [] **Noerr-Pennington Doctrine, Sham Exception**

In the patent context, the second method of alleging sham litigation comes from the Walker Process theory. The thrust of a Walker Process theory is that the obtaining, maintaining, and enforcing a patent are all premised on a knowing and willful fraud.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Fraudulent Procurement of Patent

HN22 [] **Defenses, Fraudulent Procurement of Patent**

The Walker Process theory requires the knowing assertion of a patent procured by fraud on the United States Patent and Trademark Office. Further, the patent must have been enforced with awareness that the patent was fraudulently obtained. In contrast to the Columbia Pictures test, which protects litigants' legal and factual positions, the Walker Process theory looks only to whether there was an actual fraud in patent procurement and whether the defendant knew of the fraud when asserting the patent.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Fraudulent Procurement of Patent

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN23[] **Defenses, Fraudulent Procurement of Patent**

The United States Court of Appeals for the Federal Circuit has repeatedly emphasized that the Walker Process theory, unlike inequitable conduct, requires all elements of traditional fraud, including actual reliance, causation, and damages. One implication of the traditional fraud requirement is that a mere technical violation in the patent office does not satisfy the Walker Process theory. Another implication is that *Fed. R. Civ. P. 9(b)*'s heightened pleading requirements apply to the circumstances constituting fraud.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Fraudulent Procurement of Patent

HN24[] **Defenses, Fraudulent Procurement of Patent**

The Walker Process theory requires (1) fraud in patent procurement and (2) fraudulent enforcement of the patent, including awareness of its fraudulent procurement.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN25[] **Private Actions, Sherman Act**

One indispensable element to a *15 U.S.C.S. § 2* claim is antitrust injury.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN26[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

To determine how the Noerr-Pennington doctrine applies to such a proceeding, the court must first characterize the proceeding.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN27[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

If petitioning in an administrative proceeding bears the indicia of a true adjudicatory proceeding, then Noerr-Pennington rules developed for the judicial branch will apply. This is because only where administrative officials must follow rules is it meaningful to ask whether a petition before an agency was objectively baseless, or whether there has been a pattern of petitioning without regard to the merits of the petitions. Adjudicatory indicia include public hearings, written and oral statements, representation by counsel, and questioning witnesses.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN28[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Where administrative petitioning more closely resembles petitioning in the legislative realm, few or no exceptions under the Noerr-Pennington doctrine may apply. This is because legislative lobbying is the quintessential political realm in which petitioning rights enjoy their greatest protection; where legislative action supersedes private action and thereby makes determining causation impossible; and where it is inappropriate for the judiciary to intrude, even assuming it could divine manageable standards.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN29[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

To the extent a drug is challenged on a statute binding upon the Food and Drug Administration and not admitting of administrative discretion, Noerr-Pennington rules developed for the judiciary apply. And to the extent an application is challenged based on specific factual allegations, Noerr-Pennington rules developed for the judiciary apply.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN30[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

To the extent a citizen petition urges the Food and Drug Administration to exercise administrative discretion, the process more closely resembles traditional legislative or executive lobbying. In this context, courts must exercise great caution, if not abstain from interfering with the process entirely.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN31[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

A type (a) theory under the Noerr-Pennington doctrine, using the Columbia Pictures test, is designed for in-court litigation. Its inquiry into the legal and factual bases of an action translates only roughly to the administrative context. It can only apply to the extent the petition makes arguments on the law.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN32[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The Columbia Pictures test requires that the alleged conduct be objectively baseless. Second, the defendant must subjectively intend to use the petitioning process, as opposed to the outcome of that process, as an anticompetitive weapon.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN33[] Exemptions & Immunities, Noerr-Pennington Doctrine

Pleading a Noerr-Pennington type (b) theory outside the patent context requires a plaintiff to allege that the defendant so misrepresented the truth that the entire proceeding was deprived of its legitimacy.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN34[] Exemptions & Immunities, Noerr-Pennington Doctrine

A Noerr-Pennington type (b) theory requires fraud. The United States Court of Appeals for the Ninth Circuit therefore applies *Fed. R. Civ. P. 9(b)*'s heightened pleading standard. *Rule 9(b)* applies to all circumstances constituting fraud. Which elements of fraud are subject to *Rule 9(b)* is somewhat unsettled, but falsity, materiality, and reliance are subject to *Rule 9(b)*, at least where plaintiffs can reasonably be expected to have access to the underlying facts.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN35[] Exemptions & Immunities, Noerr-Pennington Doctrine

Judicial precedent's demanding fraud requirements, the fraud must be so great that the entire proceeding is deprived of its legitimacy, recognizes that ***antitrust law*** does not give courts carte blanche to regulate the regulators. Almost always, the agency's expertise puts it in a better position than a court to determine whether a petitioner is making fraudulent arguments.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN36[] Private Actions, Sherman Act

The United States Court of Appeals for the Federal Circuit held that a company lacking Food and Drug Administration (FDA) approval can still allege causation if it can allege the intent and capacity to enter the market but for the defendant's antitrust violation. Without this causation test, the Hatch-Waxman Act's automatic stay would always bar causation, even if the FDA or patent enforcement conduct was plainly anticompetitive. *21 U.S.C.S. § 355(c)(3)(C)*.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN37[] Private Actions, Sherman Act

Only an actual competitor or one ready to be a competitor can suffer antitrust injury. Patent defense expenses alone may constitute antitrust injury if the defendant is an actual competitor or ready to be a competitor.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN38[] **Private Actions, Sherman Act**

In the Hatch-Waxman Act context, a company alleging an antitrust claim is ready to be a competitor if it meets the Andrx intent and preparedness test.

Opinion by: Mariana R. Pfaelzer

Opinion

ORDER GRANTING Aventis' Motion to Dismiss and DENYING Amphastar's Discovery Application

INTRODUCTION

One of the plaintiff-counterdefendants (collectively, "Aventis") holds a patent covering enoxaparin, an important anti-clotting drug. Aventis sells enoxaparin under the brand name "Lovenox."

Defendant-counterplaintiff Amphastar wishes to market generic enoxaparin. Seeking to do so, Amphastar in 2003 filed an application with the Food and Drug Administration ("FDA"). In the application, Amphastar certified that Aventis' patent was invalid, unenforceable, or would not be infringed. *21 C.F.R. § 314.94(a)(12)(i)(A)(4)*.

Aventis then sued Amphastar for patent infringement in August 2003. Amphastar counterclaimed for federal antitrust and state unfair competition violations. Both sides amended their pleadings several times between 2003 and 2004. Extensive discovery continued for years.

The case was transferred to this Court in June 2006. Due to this case's peculiar procedural history, Amphastar's inequitable conduct defense to patent infringement was tried first. The counterclaims **[*9]** were stayed. *See Aventis, 475 F. Supp. 2d at 972, 974-75*.

Aventis' patent was found unenforceable for inequitable conduct, with this Court's finding entered in February 2007. *Aventis, 475 F. Supp. 2d 970*, *aff'd* *525 F.3d 1334 (Fed. Cir. 2008)*, *reh'g and reh'g en banc denied* (Sept. 25, 2008), *petition for cert. filed* (U.S. Jan. 23, 2009) (No. 08-937) [cert. denied, *556 U.S. 1208, 129 S. Ct. 2053, 173 L. Ed. 2d 1133 (2009)*]. In finding inequitable conduct, this Court concluded that Aventis and its single proffered witness [1] "intended to deceive" the patent office and that "[n]egligence played no role." *Id. at 994*.

After the Federal Circuit affirmed the inequitable conduct ruling, this Court granted Amphastar's request to lift the stay on its counterclaims. Amphastar filed another Amended Answer and Second Amended Counterclaims ("SAC"). Aventis now moves to dismiss the SAC.

For the following reasons, the Court GRANTS Aventis' motion to dismiss because the allegations that survive *Noerr-Pennington* immunity fail to allege antitrust injury, a necessary element. Because no federal issue survives, the state claims **[*10]** will not be addressed at this time. In light of these rulings, Amphastar's application for additional discovery is DENIED.

I.

---

[1] Others involved in the events surrounding the inequitable conduct stated in depositions that they had no recollection of any relevant facts. *Id. at 988 n.17*.

BACKGROUND

A. The Drug Approval Process

A manufacturer seeking approval of a new drug must file a New Drug Application ("NDA") with the FDA. An NDA includes detailed safety and efficacy data, as well as a listing of the components and composition of the drug, "a full description of the methods used in, and the facilities and controls used for, the manufacture, processing, and packing of such drug," samples of the drug, and proposed labeling. *21 U.S.C § 355(b)(1)*.

In addition, the NDA must include the patent numbers and the expiration dates of any patents which claim the drug and methods of using the drug, but not methods of manufacturing the drug. *Id.* After approval, these patents are listed in a publication commonly known as the "Orange Book." Drugs with NDA approval are known as "brand-name" drugs.

The "Hatch-Waxman Act" aims to speed generic approval. *21 U.S.C. § 355*. Under the Act, a generic drug manufacturer may file an Abbreviated New Drug Application ("ANDA") so it can market a generic version of a previously approved brand-name drug. The ANDA must include **[*11]** data showing that the active ingredient or ingredients of the generic drug are the "same" as that of the brand-name drug, that the generic drug is bioequivalent to the brand-name drug, and that the proposed labeling of the generic drug is the same as the brand-name drug. *Id. § 355(j)(2)(A)(ii)*. The ANDA applicant is not required to duplicate the clinical trials that were required for approval of the brand-name drug.

In addition, the ANDA applicant must certify for each relevant Orange Book-listed patent:

> (I) that such patent information has not been filed,
> (II) that such patent has expired,
> (III) of the date on which such patent will expire, or
> (IV) that such patent is invalid or will not be infringed by the manufacture, use, or sale of the new drug for which the application is submitted[.]

Id. § 355(j)(2)(A)(vii).

FDA regulations interpret patent unenforcability to meet Paragraph IV's invalidity or noninfringement requirement. *See Teva Pharms., USA, Inc. v. United States FDA, 182 F.3d 1003, 1010, 337 U.S. App. D.C. 204 (D.C. Cir. 1999)* (citing 59 Fed. Reg. at 50,353, 59 Fed. Reg. at 50,339); *21 C.F.R. § 314.94(a)(12)(i)(A)(4)*.

An ANDA applicant making a Paragraph IV certification must give the NDA applicant and patent **[*12]** holder notice of the ANDA and the basis of its patent invalidity, unenforceability, or noninfringement position. *21 U.S.C. § 355(j)(2)(B)(iv)*; *21 C.F.R. § 314.94(a)(12)(i)(A)(4)*.

A Paragraph IV certification constitutes a constructive act of infringement, giving the patent holder standing to sue. *35 U.S.C. § 271(e)(2)(A)*. Once Paragraph IV notice is received, the patent holder has forty-five days to file suit. *21 U.S.C. § 355(c)(3)(C)*.

Filing suit prevents the FDA from approving the ANDA for thirty months from the notice date, subject to some exceptions for court action. *Id.* This provision, the "thirty-month stay," is significant to this case and has begun to generate a body of antitrust case law: unlike an ordinary infringement suit, a Paragraph IV suit bars the FDA from approving an ANDA, thereby excluding the would-be entrant from the market.

The first successful ANDA applicant receives a 180-day period of generic marketing exclusivity, beginning on the earlier of the generic manufacturer's first marketing date or the date of a judicial decision of patent invalidity or noninfringement. *Id.* at *§ 355(j)(5)(B)(iv)*.

Any person may try to affect FDA action, including action on an ANDA. The **[*13]** FDA encourages this, maintaining an open invitation to the public to file a "citizen petition." 21 C.F.R. § 10.30(a). A petitioner can urge the FDA to issue, amend, or revoke a regulation or order; or to act or refrain from acting. *Id.* § 10.30(b). The petition is then "docketed," the FDA invites comment on the petition, and the FDA "rule[s]" on each petition. *Id.* § 10.30(c)-(e). The FDA must approve, deny, or provide a tentative response to the petition within 180 days. *Id.* at § 10.30(e). A party may supplement, amend, or withdraw the petition before it has been ruled on by the FDA. *Id.* at § 10.30(g). The FDA's decision is limited by the record generated in the citizen petition process. *Id.* § 10.30(j).

B. The Enoxaparin Applications and Litigation

Enoxaparin is somewhat unusual for a pharmaceutical drug: it is a mixture of complex molecules. The molecules' structure and mixture's composition are not entirely known (i.e., enoxaparin has not been "fully characterized"). *See* *Aventis v. Amphastar, 475 F. Supp. 2d 970 (C.D. Cal. 2007)* (discussing some technical aspects of enoxaparin).

Aventis received FDA approval for its Lovenox NDA. The Orange Book-listed patents material to this motion **[*14]** are 5,389,618 and RE 38,743. The latter is a reissue patent that replaced the original patent after suit was filed. The distinction is immaterial to this motion; "the Lovenox Patent" therefore refers to either patent, as relevant.

Aventis filed a citizen petition on February 19, 2003, before any enoxaparin ANDAs were filed. FDA docket no. 2003P-0064:CP1, *available at* http://www.fda.gov/ohrms/dockets/DOCKETS/03p0064/03p0064.htm. The citizen petition argues that since enoxaparin is not fully characterized, its manufacturing process determines the product. *Id.* at 1-2. Unless and until enoxaparin can be fully characterized, generic entrants should submit to the full NDA process or show that their manufacturing processes are equivalent to Aventis' process. *Id.* Otherwise, an entrant cannot show its enoxaparin is the "same" within the meaning of the statute. *Id.*; 21 U.S.C. § 355(j)(2)(A)(ii)(I). To illustrate, Aventis argues that a particular chemical feature present in a certain proportion is important to enoxaparin's safety and efficacy. *Id.* at 3.

Amphastar filed an ANDA for approval of generic enoxaparin in March 2003. Amphastar made a Paragraph IV certification for the Lovenox patent and **[*15]** notified Aventis on June 19, 2003. As the first ANDA filer to challenge the validity of a patent covering enoxaparin, if successful, Amphastar will enjoy 180 days' exclusivity under 21 U.S.C. § 355(j)(5)(B)(iv).

Aventis filed this lawsuit against Amphastar on August 4, 2003, alleging infringement of the Lovenox patent. The lawsuit triggered the thirty-month stay of Amphastar's ANDA under *id.* § 355(j)(2)(B)(iii). The automatic stay was removed by court judgment before thirty months elapsed. 21 U.S.C. § 355(j)(2)(B)(iii); *Aventis, 390 F. Supp. 2d 936*.

The day after Aventis filed suit, August 5, 2003, the FDA issued a tentative response to Aventis' citizen petition. The response stated, "FDA has been unable to reach a decision on your requests because they raise complex issues requiring extensive review by Agency officials." Letter from Jane A. Axelrad, Assoc. Dir. for Policy, Center for Drug Eval. and Research, Dept. of Heath & Human Services, to Peter O. Safir and Scott L. Cunningham, Covington & Burling (Aug. 5, 2003), *available at* http://www.fda.gov/ohrms/dockets/dailys/03/Aug03/080603/03p-0064-let0001-vol3.pdf.

Amphastar filed a comment on the citizen petition on May 13, 2004, stating **[*16]** that Aventis had changed its manufacturing process seventeen times in eight years, undermining its argument that the manufacturing process must be the same to result in the same active ingredient. Letter from Stephen A. Campbell, Senior VP, Regulatory Affairs, Amphastar Pharm., Inc. to Lester M. Crawford, Acting Commissioner, FDA (June 1, 2004), *available at* http://www.fda.gov/ohrms/dockets/dailys/04/June04/060804/03p-0064-c00002-vol3.pdf. The letter characterized Aventis' citizen petition as an "endless delay tactic[] in order to keep their drug 'Evergreen.'" *Id.* at 2. Amphastar also discussed studies that "answered all of the FDA's questions [about its ANDA] in detail" and asserted that its enoxaparin was equivalent to Aventis' Lovenox.

A series of supplements to the citizen petition by Aventis and comments on the citizen petition from Amphastar and other parties followed.

To date, the FDA has not taken final action on Aventis' citizen petition. Amphastar's ANDA has not been approved.

C. Antitrust and Unfair Competition Allegations

Amphastar alleges that Aventis has engaged in anticompetitive conduct and unfair competition by obtaining and enforcing its patents through fraud. ¶¶ 20-31, **[*17]** 45(a)-(d), 45(f). [2] For example, Amphastar alleges that the Lovenox patent infringement case was "sham litigation for the anticompetitive purpose of delaying or preventing Amphastar's entry into the relevant market." ¶ 45(c).

In addition, Amphastar alleges that Aventis' citizen petition is frivolous. *Id.* Amphastar points to the statement:

> Since the initial development of enoxaparin in 1981, the steps of the manufacturing process have remained unchanged. Clinical supplies used in a few of the initial clinical studies, however, were made from batches where some of the conditions (e.g., time and temperature) were modified.

in footnote 33 of Aventis' citizen petition, claiming it constitutes a materially false representation. Barrett Decl. in Opp'n to Aventis' Mot. to Dismiss, Ex. 1; ¶ 45(e). [3]

Amphastar also alleges that Aventis "has, or has attempted to, control the supply of components or compositions necessary for market approval or the marketing of enoxaparin." ¶ 45(g).

Finally, and only in support of its state claims, Amphastar alleges that Aventis has made false statements about Lovenox's therapeutic levels. ¶ 50.

II.

LEGAL STANDARD

HN1[] A motion to dismiss tests whether the allegations in a complaint, if true, amount to an actionable claim. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. In evaluating a defendant's motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a court must accept as true all allegations of material fact **[*19]** in the complaint and read the complaint in the light most favorable to the nonmoving party. *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001)*; *Parks Sch. of Bus., Inc. v. Symington, 51 F.3d 1480, 1484 (9th Cir. 1995)*. However, a court should not accept as true unreasonable inferences; nor should it accept legal conclusions cast in the form of factual allegations. *Sprewell, 266 F.3d at 988*. A court reads the complaint as a whole, together with facts appropriate for judicial notice, rather than isolating allegations and taking them out of context. *Tellabs, Inc. v. Makor Issues & Rights, Ltd., 551 U.S. 308, 127 S. Ct. 2499, 2509, 168 L. Ed. 2d 179 (2007)*.

---

[2] These and all subsequent paragraph citations refer to the SAC.

[3] Amphastar filed the SAC under seal, with this allegation redacted in the public version. Amphastar's ground was that it obtained the information in ¶ 45(e) earlier in this case and that this information was subject to the Court's protective order. Aventis did not seek to keep this allegation confidential—in fact, it was discussed in open **[*18]** court at the hearing—but neither did Aventis oppose Amphastar's motion to file it under seal. *See, e.g.* Hearing Tr. at 46, 1-3 (Jan. 26, 2009) (statement of counsel for Amphastar). *See also* Letter from Stephen A. Campbell, Senior VP, Regulatory Affairs, Amphastar Pharm., Inc. to Lester M. Crawford, Acting Commissioner, FDA (June 1, 2004), *available at* *http://www.fda.gov/ohrms/dockets/dailys/04/June04/060804/03p-0064-c00002-vol3.pdf* (pointing out that publicly available records show Aventis' process has changed at least seventeen times in eight years).

HN2[] The foregoing principles of notice pleading do not eliminate the requirement that a plaintiff plead sufficient factual allegations to demonstrate a plausible claim. *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 1964-66, 167 L. Ed. 2d 929 (2007)*. Where a particularly complex claim or set of claims is alleged, the factual burden to overcome a motion to dismiss is more difficult in practice: a court may require more detail to assess the plausibility of complex allegations. *See id.* For example, antitrust allegations must be sufficiently detailed for a court to determine **[*20]** whether they are economically plausible. *Twombly, 127 U.S. at 1955*. Such demands are all the more reasonable when the factual basis underlying the allegations is within the plaintiff's knowledge. *Cf. Concha v. London, 62 F.3d 1493, 1503 (9th Cir. 1995)* (making a similar observation in the Rule 9(b) context), *cert. denied*, *517 U.S. 1183, 116 S. Ct. 1710, 134 L. Ed. 2d 772 (1996)*. None of this gives courts license to blur the line between a motion to dismiss and summary judgment: "a well-pleaded complaint may proceed even if it strikes a savvy judge that actual proof of those facts is improbable." *Twombly, 127 U.S. at 1965*. [4]

III.

DISCUSSION

Amphastar alleges that Aventis has violated Sherman Act *§ 2* by monopolizing the market for enoxaparin products in the United States. ¶ 45; *15 U.S.C. § 2* (hereinafter "*§ 2*").

Amphastar also alleges that Aventis has violated California state law for "common law unfair competition and statutory unfair business practices." *Cal. Bus. & Prof. Code §§ 17200 et seq.* The conduct alleged under state law is the same as that under the federal law, with the addition of allegedly **[*21]** false statements regarding Lovenox's therapeutic levels. ¶ 52.

HN3[] The *§ 2* monopolization offense requires "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*.

HN4[] For Amphastar to maintain its private antitrust claims, it must also show injury and causation. Therefore, Amphastar must adequately plead (3) that Aventis' misconduct caused (4) an injury to competition or the competitive process that harmed Amphastar. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *Andrx Pharms., Inc. v. Biovail Corp. Int'l, 256 F.3d 799, 806-07, 347 U.S. App. D.C. 178 (D.C. Cir. 2001)* (discussing antitrust injury and causation in the Hatch-Waxman context); *15 U.S.C. § 15* (creating the private antitrust cause of action). [5]

---

[4] Some SAC allegations trigger *Rule 9(b)*'s heightened standard for pleading fraud. *Rule 9(b)* is discussed below where it applies.

[5] HN5[] The minimum required injury for standing is "*some* damage flowing from the unlawful [antitrust misconduct]; inquiry beyond this minimum point goes only to the amount and not the fact of damage." *Zenith Radio Corp. v. Hazeltine Research, Inv.., 395 U.S. 100, 114 n.9, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)* **[*22]** (emphasis in original). Standing also requires that the antitrust violation be a "material cause" of that damage. *Id.* Material causation and injury in fact are jurisdictional issues; even if they are satisfied at the pleading stage, the requirements must continue to be satisfied at all stages of the case.

Contrary to Aventis' implications, these jurisdictional requirements are not the same as antitrust injury. HN6[] The antitrust injury element (4) of the substantive antitrust offense asks whether the injury in fact is the type the antitrust laws remedy; not whether there has been injury in fact. PHILLIP E. AREEDA ET AL., ***ANTITRUST LAW***, ¶¶ 335b, e-f (3d ed. 2007) (emphasizing that the standing test remains the same at all stages and clarifying that antitrust injury is not the same as standing).

A. The Alleged Courses of Conduct Must Be Analyzed Separately

Amphastar contends that all Aventis' alleged conduct, even if each act is legal on its own, must be reviewed as a single course of conduct. The theory is that the whole is greater than the sum of its parts. However, that cannot be the law in a case where special immunity exempts some conduct from antitrust scrutiny.

HN7[] The Supreme Court recognizes **[*23]** that, at the fact-finding stage, antitrust plaintiffs are entitled to "the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each." *Continental Ore Co. v. Union Carbide and Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*. That is, relevant circumstantial evidence should be considered in making a fact determination. *Id. at 697-98*. The same principle applies at the pleading stage: allegations should generally be taken as a whole, together with matters appropriate for judicial notice. *Tellabs, 127 S. Ct. at 2509*.

But antitrust is not devoid of areas where alleged conduct is analyzed discretely as a matter of law. *See, e.g., Cascade Health Solutions v. PeaceHealth, 515 F.3d 883 (9th Cir. 2008)* (holding that alleged predatory pricing conduct must meet a price test). *See generally* AREEDA, ***ANTITRUST LAW*** ¶ 310 (discussing when conduct aggregation is appropriate). Some acts must be segregated where the *Noerr-Pennington* doctrine immunizes some conduct from antitrust scrutiny. *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*.

HN8[] *Noerr-Pennington* **[*24]** serves *First Amendment* interests by protecting the petitioning and political activity of market participants. Subject to a limited "sham" exception, speech directed to obtaining government action cannot give rise to an antitrust violation. *Kaiser Found.Health Plan, Inc. v. Abbott Labs., Inc., 552 F.3d 1033, 1044-45 (9th Cir. 2009)*, *pet. for reh'g and reh'g en banc filed* (Jan. 28 2009), *resp. to pet. ordered* (Feb. 2, 2009). *Noerr-Pennington* applies equally to federal and state claims. *Kottle v. Nw. Kidney Ctrs., 146 F.3d 1056, 1059 (9th Cir. 1998)*.

HN9[] Pleading a "sham" under *Noerr-Pennington* does not suffice to state a claim. Rather, a plaintiff must survive *Noerr-Pennington* and adequately plead *§ 2*'s elements. *Prof'l Real Estate Investors, Inc. v. Columbia Pictures Industries, 508 U.S. 49, 61, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)* [hereinafter "*Columbia Pictures*"].

HN10[] "Although the *Noerr-Pennington* doctrine applies to activities directed at any branch of government, the scope of the sham exception depends on the type of governmental entity involved." *Kottle, 146 F.3d at 1060*. This is because the petitioning interests in the executive and legislative realm are strongly protected to serve the political process; because government **[*25]** action confounds private causation; and because those realms lack judicially manageable standards. *See id. at 1060-62*. Administrative petitioning poses definitional difficulties: different administrative proceedings receive different levels of protection according to whether they more resemble legislative or judicial proceedings. *Id.*

Noerr-Pennington, and its constitutional underpinnings, would be destroyed if an antitrust plaintiff could subject otherwise protected speech to antitrust scrutiny by alleging additional misconduct. ***HN11***[] *Pennington* itself recognized that objectively legitimate petitioning conduct—even when undertaken in subjective bad faith—"is not illegal, either standing alone or as part of a broader scheme itself violative of the Sherman Act." *381 U.S. at 670*. However, as discussed more fully below, some petitioning conduct may be aggregated into a "petitioning scheme" to determine whether *Noerr-Pennington* applies to that conduct. *Kaiser, 552 F.3d 1033, at 1046* (citing *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972))*.

The SAC alleges two courses of conduct to which *Noerr-Pennington* applies: patent-enforcement conduct and FDA conduct. Under *Kottle*, **[*26]** different legal standards apply to these courses of conduct. *146 F.3d 1056, 1060-62*. Thus, even if these two courses of conduct could be conceived as a unified "petitioning scheme" within the meaning of *Kaiser* and *California Motor*, the two courses of conduct must be separately evaluated. The conduct, if any, which loses its immunity may then be considered together with the remaining allegations. *Cf.* HERBERT HOVENKAMP ET AL., IP AND ANTITRUST § 11.4f (2009 Supp.) (observing that such an approach properly "avoid[s] the risk of such mixed allegations being used as a subterfuge to avoid the stringent requirements of [petitioning] immunity").

C. Allegations Regarding Aventis' Patent Enforcement Survive *Noerr-Pennington*

The first alleged course of conduct involves patents. Amphastar alleges that Aventis engaged in sham enforcement of the Lovenox patent. [6]

Because this course of conduct involves prosecuting and enforcing a patent, Supreme Court and Federal Circuit law governs. *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1068 (Fed. Cir. 1998)*, *cert. denied 525 U.S. 876, 119 S. Ct. 178, 142 L. Ed. 2d 145 (1998)*.

HN12[] Under the broadest possible range of exceptions, litigation activity constitutes a sham by meeting any of three tests: (a) "the lawsuit is objectively baseless and the defendant's motive in bringing it was unlawful"; (b) a party commits "knowing fraud" on a court by making "intentional misrepresentations" severe enough to "deprive the litigation of its legitimacy"; or (c) "the conduct involves a series of lawsuits **[*28]** brought pursuant to a policy of starting legal proceedings without regard to the merits and for an unlawful purpose." *Kaiser, 552 F.3d at 1045* (quoting *Sosa v. DirecTV, Inc., 437 F.3d 923, 938 (9th Cir. 2006))*.

However, ***HN13***[] the Federal Circuit expressly recognizes only two types of sham litigation—types (a) and (b), above. *Id. at 1068* ("Each [t]ype provides its own basis for depriving a patent owner of immunity . . . either or both may be applicable to a particular party's conduct . . . ."). Nevertheless, the Ninth Circuit recently applied its own type (c) law to a patent case. *Kaiser, 552 F.3d at 1046*.

HN14[] The Ninth Circuit reconciles two Supreme Court cases that coexist in some tension by recognizing a third type of sham, type (c), above. The Ninth Circuit has long held that type (b) applies to determine "whether a single action constitutes sham petitioning." *Id.* (quoting *USS-POSCO Indus. v. Contra Costa County Bldg. & Constr. Trades Council, 31 F.3d 800, 810-11 (9th Cir. 1993))*. Type (b) sham litigation is "essentially retrospective." *Id.*

HN15[] Type (c), on the other hand, "is prospective." *Id.* It applies when there is a "series of lawsuits and other legal actions without regard to the merits [because **[*29]** when] dealing with a series of lawsuits, the question is not whether any one of them has merit—some may turn out to, just as a matter of chance—but whether they are brought pursuant to a policy of starting legal proceedings without regard to the merits and for the purpose of injuring a market rival." *Id.* This amounts to potential liability for a "petitioning scheme."

HN16[] The Supreme Court requires all *Noerr-Pennington* shams to pass both an "objective" and a "subjective" test. *Columbia Pictures, 508 U.S. at 59* ("[N]either *Noerr* immunity nor its sham exception turns on subjective intent alone."). The Ninth Circuit's articulation of type (c) immunity lacks a clearly expressed objective element. *See Abbott Labs. v. Teva Pharms. USA, Inc., 432 F. Supp. 2d 408, 428-30 (D. Del. 2006)* (discussing this tension between type (c) and subsequent Supreme Court doctrine and ultimately rejecting type (c)).

Therefore, ***HN17***[] a type (c) theory must allege both (1) a subjective policy of starting legal proceedings for the purpose of injuring a market rival; and (2) an objective policy of starting legal proceedings without regard to the merits. Precisely how the objective prong works is unclear, but it appears that **[*30]** the Ninth Circuit favors

[6] Amphastar also alleges that Aventis also fraudulently listed Patent No. 4,692,435 ("the '435 patent") in the Orange Book, but that patent expired in 2001. *See* ¶ 45(b). Because the '435 patent had expired, it was not the subject of a Paragraph IV certification and did not trigger a Hatch-Waxman stay. Further, there is no allegation that this **[*27]** patent was ever asserted against Amphastar. Nor is there any allegation that the patent caused Amphastar any harm not caused by the Lovenox patent. Therefore, the '435 patent is immaterial. *Cf. In re Buspirone Patent Litig., 185 F. Supp. 2d 363 (S.D.N.Y. 2002)* (fraudulently listing a patent in the Orange Book and bringing an enforcement action after a Paragraph IV certification regarding that patent may constitute enforcement conduct). *See also* HOVENKAMP, IP & ANTITRUST § 74.e1 (discussing antitrust concerns about Orange Book patent listing).

determining whether a substantial number of the suits lacked objective merit. Kaiser, 552 F.3d at 1046-47 (discussing with approval a district court's dissection of seventeen different lawsuits, noting that the district court viewed only six of the suits "as presenting the closest question" of sham litigation). [7]

This Court assumes that the Federal Circuit would agree with the Ninth Circuit's type (c) sham exemption. Whether the Federal Circuit would agree makes no difference to the resolution of the present motion.

1. Type (a): objectively baseless and subjective abuse of process

Legal standard. ***HN18***[] The first method of alleging sham litigation has two steps. First, the litigation must be alleged to be "objectively baseless." *Columbia Pictures, 508 U.S. at 60 (1993)*. Second, the defendant must subjectively intend to use the judicial "*process*—as opposed to the *outcome* of that process—as an anticompetitive weapon." *Id.* (emphasis in original).

HN19[] As to the objective test, the "challenged lawsuit's *legal* viability" is assessed first. *Id. at 61* (emphasis in original). Thus, conduct that includes "ignoring the law, filing administrative or legal actions that do not request reasonable extensions or development of the law and mischaracterization of the relevant issues or legal standards" may be stripped of immunity. *Louisiana Wholesale Drug Co., Inc. v. Sanofi-Aventis, 2008 U.S. Dist. LEXIS 81328, at *13-18, 2008 WL 4580016, at *4-5 (S.D.N.Y. Oct. 14, 2008)*. **[*32]** If the lawsuit is legally viable, a court may turn to whether the defendant had factual probable cause to institute the suit. *Columbia Pictures, 508 U.S. at 62*.

Ripeness. As a threshold matter, this issue is not yet ripe. Aventis has pending a petition for certiorari on inequitable conduct. Aventis' legal position could yet be vindicated. Therefore, the *Columbia Pictures* "retrospective" test is not yet fit for judicial application. *Alaska Right to Life Pol. Action Comm. v. Feldman, 504 F.3d 840, 849 (9th Cir. 2007)* (***HN20***[] "Prudential ripeness . . . involves two overarching considerations: the fitness for judicial review and the hardship to the parties of withholding court consideration.") (internal quotations and citation omitted).

Objectively baseless. However, even assuming ripeness, Amphastar cannot meet *Columbia Pictures*' objectively baseless prong. Aventis' legal contentions cannot be seen as objectively baseless. The Court is well aware of this case's long and complicated procedural history, including two Federal Circuit analyses on the merits, with a dissent on this case's most recent Federal Circuit visit. *176 Fed. Appx. 117 (Fed. Cir. 2006)*; *525 F.3d 1334 (Fed. Cir. 2008)*. Even though **[*33]** Aventis' factual position suffered from "a total absence of indicia of credibility," *475 F. Supp. 2d at 993*, Aventis has made credible legal arguments to change the law or to adopt a not-unreasonable legal interpretation that may change the legal implications of the facts. *See, e.g.*, *525 F.3d 1334*; Petition for Certiorari (U.S. 08-937 Jan. 23, 2009) [cert. denied, *556 U.S. 1208, 129 S. Ct. 2053, 173 L. Ed. 2d 1133 (2009)*]. Such arguments further doctrinal development and are unquestionably protected petitioning activity.

The Court takes judicial notice of the foregoing facts. Granting Amphastar all reasonable inferences in its favor, Amphastar cannot plead that Aventis' legal positions were objectively baseless.

2. Type (b): knowing and willful fraud

---

[7] A Court in the Northern District recently observed a similar problem with the type (c) theory. It held that otherwise protected conduct could be included in the antitrust analysis if a court "first find[s] that the other aspects of the scheme independently produce anticompetitive harms." *Hynix Semiconductor, Inc. v. Rambus, Inc., 527 F. Supp. 2d 1084, 1090-91 (N.D. Cal. 2007)*. *Hynix* was decided before *Kaiser*, where the Ninth Circuit's approach is incompatible with the *Hynix* test. Further, the *Hynix* test conflates *Noerr-Pennington* immunity with the substantive *§ 2* element of antitrust injury. Not only is that doctrinally incorrect, it may not be necessary: if, in the but-for world, the patent could not have been enforced, damages flowing from enforcement may be recoverable, even if the substance of the petitioning activity cannot be used to plead or **[*31]** prove an antitrust violation. *Cf.* HOVENKAMP, IP AND ANTITRUST § 11.4f (approving *Hynix*'s damages outcome but not the doctrine).

Legal standard. **HN21**[] In the patent context, the second method of alleging sham litigation comes from *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. The thrust of a *Walker Process* theory is that the obtaining, maintaining, and enforcing a patent are all premised on a knowing and willful fraud. *Kaiser, 552 F.3d at 1047*; *Nobelpharma, 141 F.3d at 1071*.

HN22[] *Walker Process* requires "the knowing assertion of a patent procured by fraud on the PTO." *Nobelpharma, 141 F.3d at 1071*. Further, **[*34]** the patent must have been enforced with awareness that the patent was fraudulently obtained. *Id. at 1069*. In contrast to the *Columbia Pictures* test, which protects litigants' legal and factual positions, *Walker Process* looks only to whether there was an actual fraud in patent procurement and whether the defendant knew of the fraud when asserting the patent. *Nobelpharma, 141 F.3d at 1070-71*.

HN23[] The Federal Circuit has repeatedly emphasized that *Walker Process*, unlike inequitable conduct, requires all elements of traditional fraud, including actual reliance, causation, and damages. *Nobelpharma, 141 F.3d at 1070-71*; *Unitherm Food Sys., Inc. v. Swift-Eckrich, Inc., 375 F.3d 1341, 1358-59* (discussing cases), *rev'd on other grounds*, *546 U.S. 394, 126 S. Ct. 980, 163 L. Ed. 2d 974 (2006)*. One implication of the traditional fraud requirement is that a mere technical violation in the patent office does not satisfy *Walker Process. Nobelpharma, 141 F.3d at 1069-71*. Another implication is that *Rule 9(b)*'s heightened pleading requirements apply to the circumstances constituting fraud. *Unitherm, 375 F.3d at 1358*.

Therefore, **HN24**[] *Walker Process* requires (1) fraud in patent procurement and (2) fraudulent enforcement of the patent, including **[*35]** awareness of its fraudulent procurement.

Fraud in patent procurement. The SAC contains plausible and reasonably specific allegations of all patent-procurement fraud elements with respect to the Lovenox patent. ¶¶ 20-31. While the SAC only uses the magic words "[b]ut for" to allege reliance and causation as to one act, ¶ 24, the allegations, fairly read, state that the patent office relied on Aventis' factual representations and duty of candor and that this reliance caused the Lovenox patent to issue and thereby harmed Amphastar. ¶ 31.

Fraud in patent enforcement. Amphastar adequately alleges that Aventis was aware of the Lovenox patent's fraudulent underpinnings when Aventis engaged in enforcement conduct against Amphastar. ¶¶ 45(a)-(d), (f). This caused Amphastar damage by forcing it to defend the alleged sham. [8]

However, this alleged fraud only removes *Noerr-Pennington* immunity. "[T]he other elements necessary to a *§ 2* case" must also be present. *Walker Process, 382 U.S. at 174*. **HN25**[] One indispensable element is antitrust injury. *Brunswick, 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701*. **[*36]** Whether injury-in-fact from this *Walker Process* fraud amounts to antitrust injury is addressed below in Section III.F.

Amphastar's *Walker Process* allegations survive *Noerr-Pennington* at the pleading stage.

3. Type (c): fraudulent course of conduct

Assuming without deciding that the Federal Circuit would adopt the Ninth Circuit's type (c) theory, the SAC fails both prongs: (1) the subjective policy of instituting lawsuits, (2) a substantial number of which suits lack objective merit.

Aventis is on record in this case explaining that it instituted an array of patent enforcement actions to preserve its rights under the Hatch-Waxman Act. This Court presided over most of Aventis' actions and, indeed, stayed those actions pending the outcome of this litigation. Aventis consented to the stay, stating that it filed the series of suits to preserve its rights rather than to harm all potential generic competitors with frivolous litigation. *See, e.g., Aventis Pharma S.A. v. Sandoz Inc.*, CV 07-3658-MRP (PLAx), Notice of Amended Complaint at 2 (Aug. 29, 2007)

---

[8] For purposes of this motion, the Court assumes that Amphastar's attorney fee award did not negate all damages flowing from Aventis' patent enforcement conduct.

(discussing some background) & Ex. C (letter of June 6, 2007 from Aventis to potential generic entrant explaining Aventis' intentions with regard **[*37]** to the suit).

The volume of Aventis' suits in the Hatch-Waxman context matters little, if at all. *Kaiser, 552 F.3d at 1046-47* (finding at summary judgment that no reasonable jury could find a pattern within the meaning of the type (c) exception where a drug company instituted seventeen infringement suits to protect its rights under Hatch-Waxman). Moreover, for the same reasons explained above in dismissing Amphastar's type (a) theory, Aventis' legal position must be viewed as objectively tenable in all these suits.

The Court takes judicial notice of the foregoing facts. Granting Amphastar all reasonable inferences in its favor, Aventis' legal position was not objectively baseless. Further, it is merely conceivable that Aventis instituted a series of patent suits without regard to the merits and for the purpose of injuring competitors. It is much more plausible that Aventis' several lawsuits were undertaken to preserve its rights under the Hatch-Waxman Act and not as a policy of instituting patent suits without regard to the merits. *Twombly, 127 S. Ct. at 1974*.

D. Allegations Regarding Aventis' FDA Conduct Do Not Survive *Noerr-Pennington*

Legal standard. Aventis' conduct in the FDA is not "unique **[*38]** to patent law" and therefore is not subject to the Federal Circuit's exclusive jurisdiction. *Nobelpharma, 141 F.3d at 1068*. Accordingly, Ninth Circuit law applies.

The FDA citizen petition process is an administrative proceeding that the Ninth Circuit has not yet addressed. ***HN26***[] To determine how *Noerr-Pennington* applies to such a proceeding, the Court must first characterize the proceeding. *Kottle, 146 F.3d at 1062-63*.

HN27[] If petitioning in an administrative proceeding bears the "indicia of a true adjudicatory proceeding," then *Noerr-Pennington* rules developed for the judicial branch will apply. *Id. at 1062*. This is because "[o]nly where administrative officials must follow rules is it meaningful to ask whether a petition before an agency was 'objectively baseless,' or whether there has been a pattern of petitioning without regard to the 'merits' of the petitions." *Id. at 1061-62*. Adjudicatory indicia include "public hearings . . . written and oral statements . . . representation by counsel . . . and question[ing] witnesses." *Id.*

On the other hand, ***HN28***[] where administrative petitioning more closely resembles petitioning in the legislative realm, few or no exceptions may apply. This is because legislative **[*39]** lobbying is the quintessential political realm in which petitioning rights enjoy their greatest protection; where legislative action supersedes private action and thereby makes determining causation impossible; and where it is inappropriate for the judiciary to intrude, even assuming it could divine manageable standards. *Id. at 1060-62*.

The FDA's citizen petition process contains some adjudicatory indicia. The FDA maintains an open invitation to the public to petition. *21 C.F.R. § 10.30(a)*. The petition is then "docketed," the FDA invites comment on the petition, and the FDA "rule[s]" on each petition. *Id. § 10.30(c)-(e)*. Importantly, the FDA's decision is limited by the record generated in the citizen petition process. *Id. § 10.30(j)*.

On the other hand, the citizen petition process resembles lobbying to some extent. A petitioner can urge the FDA to exercise its administrative discretion by issuing, amending, or revoking a regulation or order; or by taking or refraining from an action. *Id. § 10.30(b)*.

When a citizen petition challenges a drug approval, the process will closely resemble an adjudicatory proceeding. Because the petition record is the sole basis on which the FDA may act on **[*40]** the petition, an applicant (or potential applicant) will need to respond to generate the appropriate record. *Id. § 10.30*.

HN29[] To the extent a drug is challenged on a statute binding upon the FDA and not admitting of administrative discretion, *Noerr-Pennington* rules developed for the judiciary apply. And to the extent an application is challenged based on specific factual allegations, *Noerr-Pennington* rules developed for the judiciary apply.

But ***HN30***[] to the extent a citizen petition urges the FDA to exercise administrative discretion, the process more closely resembles traditional legislative or executive lobbying. In this context, courts must exercise great caution, if not abstain from interfering with the process entirely.

Allegations. The SAC alleges: "Aventis filed a frivolous citizen petition that falsely represented that Aventis had not changed its manufacturing process since 1981. This false representation was highly material to the representations Aventis made to the FDA in its citizen petition." ¶ 45(e). *See also* ¶ 27 (discussing the alleged falsity in more detail).

The Court takes notice of the citizen petition. FDA docket no. 2003P-0064:CP1, *available at* *http://www.fda.gov/ohrms/dockets/DOCKETS/03p0064/03p0064.htm*. **[*41]** The petition's legal basis is the statutory requirement that an ANDA applicant demonstrate that the proposed generic has the "same" active ingredient as the approved drug. *See id.* at 1-2. The petition makes factual arguments why generic enoxaparin products should not be determined to be the "same" in ways that Aventis contends are relevant. *Id.*

1. Type (a): objectively baseless and subjective abuse of process

HN31[] A type (a) theory—using the *Columbia Pictures* test—is designed for in-court litigation. Its inquiry into the legal and factual bases of an action translates only roughly to the administrative context. It can only apply to the extent the petition makes arguments on the law.

HN32[] *Columbia Pictures* requires that the alleged conduct be "objectively baseless." *508 U.S. at 60 (1993)* Second, the defendant must subjectively intend to use the petitioning "*process*—as opposed to the *outcome* of that process—as an anticompetitive weapon." *Id.*

Ripeness. A type (a) theory cannot be sustained at this time. Whether Aventis' interpretation of the statutory "sameness" requirement is objectively baseless is a matter of administrative discretion, subject to a separate body of law for judicial review. Unless **[*42]** and until the FDA acts on the petition, this dispute is not ripe.

If the FDA denies a citizen petition, then a *Columbia Pictures* theory may lie. This was the position of a court in the Southern District of New York when it evaluated Aventis' alleged conduct in a citizen petition unrelated to the petition here at issue. *Louisiana Wholesale, 2008 U.S. Dist. LEXIS 3611, at *13-17, 2008 WL 169362, at *5 (S.D.N.Y. Jan. 18, 2008)*. The FDA rejected that citizen petition, expressly stating the reasons why the petition was "unfounded" on both the law and the facts. *Id. at n.6*. Relying on the FDA's statement of reasons for rejecting that petition, together with additional allegations as to why Aventis "had no reasonable chance of success," the *Louisiana Wholesale* Court refused to dismiss the claim against Aventis. *Id.*

On the other hand, if the FDA acts favorably on Aventis' petition, and that action is caused by Aventis' petition, and a court determines that Aventis' and the FDA's position violated the applicable legal standard for reviewing administrative action, then a *Columbia Pictures* theory may be available. These events would be the necessary predicates for the Court to determine whether **[*43]** Aventis' position, and the FDA's decision in reliance on it, were objectively baseless. *Nat'l Park Hospitality Ass'n v. Dept. of Interior, 538 U.S. 803, 808, 123 S. Ct. 2026, 155 L. Ed. 2d 1017 (2003)*. This is an extremely heavy burden.

2. Type (b): knowing and willful fraud

Legal standard. ***HN33***[] Pleading a type (b) theory outside the patent context requires a plaintiff to allege that the defendant "so misrepresented the truth . . . that the entire . . . proceeding was deprived of its legitimacy." *Kottle, 146 F.3d at 1063*.

HN34[] A type (b) theory requires fraud. The Ninth Circuit therefore applies *Rule 9(b)*'s heightened pleading standard. *Kottle, 146 F.3d at 1063*. *Rule 9(b)* applies to "all circumstances constituting fraud." Which elements of fraud are subject to *Rule 9(b)* is somewhat unsettled, but falsity, materiality, and reliance are subject to *Rule 9(b)*, at least where plaintiffs "can reasonably be expected to have access" to the underlying facts. Concha v. London, 62 F.3d 1493, 1503 (9th Cir. 1995), *cert. denied*, *517 U.S. 1183, 116 S. Ct. 1710, 134 L. Ed. 2d 772 (1996)*. The Court therefore subjects these elements to Rule 9(b) and assumes, but does not hold, that ordinary Rule 8(a) notice pleading applies to the other elements.

HN35[] *Kottle's* demanding fraud requirements—the **[*44]** fraud must be so great that the entire proceeding is "deprived of its legitimacy"—recognizes that ***antitrust law*** does not give courts *carte blanche* to regulate the regulators. *See* Verizon Commc'ns, Inc. v. Law Offices of Curvis V. Trinko, LLP, 540 U.S. 398, 405-07, 124 S. Ct. 872, 157 L. Ed. 2d 823 (cautioning against antitrust intervention in regulatory schemes). Almost always, the agency's expertise puts it in a better position than a court to determine whether a petitioner is making fraudulent arguments.

In this case, however, it is not implausible under Twombly that Amphastar is in a better position than the FDA to recognize the fraud. This is because Amphastar had access to voluminous discovery documents during litigation of the patent claims in this case. Further, it is not implausible that this Court's protective order prevents Amphastar from disclosing to the FDA facts that would enable the FDA to detect Aventis' alleged fraud. *Accord* AREEDA, ***ANTITRUST LAW*** ¶ 205c2 (observing *Noerr-Pennington* should not apply where facts undermining false information are "peculiarly within the control of the antitrust defendant").

Falsity. The only falsity allegations go to whether Aventis has changed its manufacturing process since **[*45]** 1981. ¶¶ 27, 45(e). Given Amphastar's unique position—its discovery with respect to the patent infringement claims in this case—some degree of falsity is plausible under *Twombly.*

However, Amphastar has not met the Rule 9(b) standard for alleging why the falsity is severe enough to deprive the citizen petition proceeding of its legitimacy. Vess v. Ciba-Geigy Corp., 317 F.3d 1097, 1106 (9th Cir. 2003) ("The plaintiff must set forth what is false or misleading about a statement, and why it is false.") (quoting In re GlenFed, Inc. Sec. Litig., 42 F.3d 1541, 1548 (9th Cir. 1994) (emphasis added). Amphastar is in a position to explain how its discovered documents undermine Aventis' allegedly false representation and why it is plausible that the FDA cannot detect the alleged false representation itself, thereby undermining the citizen petition process. This is especially true in light of the fact that Amphastar has already pointed out to the FDA, in the citizen petition proceeding, Aventis' frequent process changes. Letter from Stephen A. Campbell, Senior VP, Regulatory Affairs, Amphastar Pharm., Inc. to Lester M. Crawford, Acting Commissioner, FDA (June 1, 2004), *available at* http://www.fda.gov/ohrms/dockets/dailys/04/June04/060804/03p-0064-c00002-vol3.pdf **[*46]** (pointing out that publicly available records show Aventis' process has changed at least seventeen times in eight years).

Materiality. Amphastar alleges that Aventis' representation to the FDA "was highly material" to the citizen petition. ¶ 45(e). The Court has already taken notice of the citizen petition. The central argument in the petition is that, for complex products such as enoxaparin, the manufacturing process determines the product.

However, the materiality allegations do not satisfy Rule 9(b). Notwithstanding the conclusory assertion of high materiality, the face of the citizen petition is ambiguous as to whether Aventis' process representation is material to the process-determines-the-product argument. FDA Docket No. 2003P-0064:CP1, at 11 n.33. It appears likely that the representation about Aventis' own process— stated in a footnote—is immaterial to its broader process-determines-the-product argument. The SAC does not remedy the ambiguity by alleging how or why Aventis' process representation is material to the argument.

Reliance. Even assuming materiality as to the process-determines-the-product argument, the petition contains an argument about characterizing enoxaparin products **[*47]** that may not rely on the alleged representation: Aventis appears to contend that it has discovered structural features unique to Lovenox. However, such a determination is more appropriate at the fact-finding stage. The Court further notes a potential ripeness problem: if the alleged misrepresentation is material as to a product-determines-the-process argument, but immaterial to a characterization argument, the type (b) theory may not become ripe until after the FDA acts and explains the arguments it relied on. Nevertheless, the Court assumes that the applicable reliance pleading standard has been met.

Causation & damages. Contrary to Aventis' position, lack of FDA approval does not bar causation or damages per se. There are two types of possible damages flowing from the alleged fraud. First, exclusion from the market is potentially cognizable. *Andrx, 256 F.3d at 806-08*; *Louisiana Wholesale, 2008 U.S. Dist. LEXIS 3611, at *17-20, 2008 WL 169362, at *6*; *Amgen, Inc. v. Hoffmann-La Roche Ltd., 480 F. Supp. 2d 462, 467-68 (D. Mass. 2007)*. Second, expenses related to defending a type (b) sham flow from the fraud.

For its market exclusion theory, Amphastar must plead that it intends to enter **[*48]** the market, that it is prepared to enter the market, and that it would have entered the market by now but for Aventis' conduct. The D.C. Circuit addressed a similar complaint in *Andrx Pharms., Inc. v. Biovail Corp. Int'l, 256 F.3d 799, 807, 347 U.S. App. D.C. 178 (D.C. Cir. 2001)*. ***HN36***[] The *Andrx* Court held that a company lacking FDA approval can still allege causation if it can allege the "intent and capacity to enter the market" but for the defendant's antitrust violation. *Id.* Without this causation test, Hatch-Waxman's automatic stay would always bar causation, even if the FDA or patent enforcement conduct was plainly anticompetitive. *See* *21 U.S.C. § 355(c)(3)(C)*; HOVENKAMP, IP AND ANTITRUST § 7.4e1.

Aventis mischaracterizes the D.C. Circuit's holding as turning only on the fact that the *Andrx* District Court was not informed that the FDA had approved the plaintiff's application. This is incorrect: *Andrx* used this fact to illustrate why dismissal with prejudice was improper—the *Andrx* plaintiff was plainly able to allege facts that would meet the causation standard. *Id. at 808* ("And even before the FDA approved [plaintiff's] ANDA, [plaintiff] could have alleged its intent and preparedness to enter the market . **[*49]** . . ."). The market exclusion test is intent and preparedness to enter the market, but for the defendant's misconduct.

But Amphastar has not pled intent and preparedness but for Aventis' conduct. Amphastar must allege that (1) that the citizen petition is a material cause of delay to FDA approval, *Zenith 395 U.S. at 114 n.9*; (2) that Amphastar intends to enter the market with reasonable speed upon FDA approval; and (3) that Amphastar is prepared to enter the market with reasonable speed upon FDA approval. The factual allegations that would support causation are within Amphastar's knowledge. Such facts may include whether the FDA has expressed other concerns with regard to Amphastar's application, whether Amphastar has a good faith basis to believe the FDA will not grant approval before the citizen petition has been disposed, whether Amphastar has completed all other FDA-required steps thus far to the FDA's satisfaction, and whether Amphastar has the manufacturing capacity and suppliers available to enter the market with reasonable speed upon approval. *See* *Andrx, 256 F.3d at 807* (discussing indicia of preparedness).

Further, one SAC allegation undermines Amphastar's preparedness: Amphastar **[*50]** alleges that it is having difficulty obtaining "the supply of components or compositions necessary for market approval or marketing of enoxaparin." ¶ 45(g). The Court turns to another problem with this allegation in Section III.E *infra.*

On the damages flowing from Aventis' enforcement conduct, the SAC adequately pleads that Aventis' citizen petition conduct caused Amphastar to expend resources defending Aventis' allegation. ¶ 47. This states damages for a type (b) fraud, but the other elements have not been pled. Whether these damages, without more, could constitute antitrust injury is discussed in the substantive antitrust analysis below in Section III.F.

3. Type (c): fraudulent course of conduct

A type (c) theory to deprive Aventis' FDA conduct of *Noerr-Pennington* immunity requires (1) a subjective policy of making representations regarding enoxaparin before the FDA, (2) a substantial number of which lack objective merit.

Amphastar alleges a single citizen petition with a single alleged misrepresentation. ¶¶ 27, 45(e). This is not a fraudulent course of conduct.

As the foregoing discussion should make clear, it is not impossible to allege a *Noerr-Pennington* exception in the citizen petition **[*51]** process, but it is extraordinarily difficult. Amphastar has not satisfied the requirements.

E. The Vague Allegation Regarding Market Foreclosure Does Not Suffice

Noerr-Pennington does not facially apply to one antitrust allegation in the SAC: "On information and belief, Aventis has, or has attempted to, control the supply of components or compositions necessary for market approval or the marketing of enoxaparin." ¶ 45(g).

This vague allegation does not give Aventis adequate notice of anything. It also fails the *Twombly* plausibility test as a matter of law. It is always possible that one competitor attempts to exclude (or does exclude) another from a market; and that exclusion may, in some circumstances, amount to an antitrust violation. But such a bare and conclusory allegation of exclusion is not enough to cross "the line from the conceivable to plausible." *Twombly, 127 S. Ct. at 1974*. Amphastar must plead the facts, if any, that give rise to its inference that Aventis is engaging in illegal exclusion. Facts about Amphastar's difficulty obtaining supplies, and the factual foundation for the inference that exclusionary conduct by Aventis caused the difficulty, are within Amphastar's knowledge. **[*52]** *Concha, 62 F.3d at 1503*. [9]

F. The SAC Does Not State a Claim

The only allegations that survive *Noerr-Pennington* and *Twombly* are those related to Aventis' patent conduct. ¶¶ 20-31, 45(a)-(d), (f). These allegations fail on antitrust injury.

Ninth Circuit law governs *§ 2*'s substantive elements. *Nobelpharma, 141 F.3d at 1068*. Again, monopolization requires (1) monopoly power in the relevant market and (2) willful acquisition or maintenance of that power (3) by misconduct that (4) caused injury to competition or the competitive process, thereby harming the plaintiff. *Supra* Section III.A.

Monopoly power in the relevant market. Amphastar alleges that Aventis has monopoly power in a plausible market. The alleged market is that for enoxaparin products in the United States. ¶ 45. Aventis plausibly has monopoly power in this market because it has the only enoxaparin product approved for marketing in the United States. ¶¶ 45(a)-(d).

Anticompetitive misconduct. Amphastar adequately alleges that Aventis' patent-related conduct was fraudulent **[*53]** and thereby escapes *Noerr-Pennington* immunity under *Walker Process. Supra* Section III.B.2. This fraud suffices for *§ 2*'s conduct element under *Walker Process. Nobelpharma, 141 F.3d at 1071*.

Antitrust injury & causation. ***HN37***[] "Only an actual competitor or one ready to be a competitor can suffer antitrust injury." *Bourns, Inc. v. Raychem Corp., 331 F.3d 704, 711 (9th Cir. 2003)*. Patent defense expenses alone may constitute antitrust injury if the defendant is an actual competitor or ready to be a competitor. *Handgards, Inc. v. Ethicon, Inc., 601 F.2d 986, 988-89 (9th Cir. 1979)* (holding that patent litigation expenses may be an antitrust injury where both parties were competitors in the relevant market when enforcement began). *Accord* *Indium Corp. of America v. Semi-Alloys, Inc., 781 F.2d 879, 882 (Fed. Cir. 1985)* (holding that there can be no antitrust injury unless plaintiff was prepared to enter the market); *Amgen, 480 F. Supp. 2d at 468* (holding that *Walker Process* litigation expenses in a Hatch-Waxman suit can be an antitrust injury after concluding intent and preparedness was adequately pled); *Brotech Corp. v. White Eagle Int'l Techs. Group, Inc., 2004 U.S. Dist. LEXIS 11552, at *14-17, 2004 WL 1427136, at *6-7 (E.D. Pa. June 21, 2004)* **[*54]** (holding that litigation expenses alone are not an antitrust injury). [10]

---

[9] Even giving Amphastar the benefit of inferences from its *Walker Process* claim, the SAC still has not made this non-*Walker Process* conduct any more than conceivable.

[10] To the extent *Bristol-Myers Squibb Co. v. Ben Venue Lab., 90 F. Supp. 2d 540, 544-46 (D.N.J. 2000)*, may suggest that Hatch-Waxman requires a different approach, it is disapproved in light of the 2003 decision in *Bourns* and the 2001 in decision in

HN38[] In the Hatch-Waxman context, a company is "ready to be a competitor" if it meets the *Andrx* intent and preparedness test. *256 F.3d at 806-08*.

Again, only the *Walker Process* allegations survive *Noerr-Pennington.* The only damages that are cognizable are those flowing from *Walker Process* enforcement. ¶ 47. Therefore, lack of FDA approval is a causation **[*55]** bar that Amphastar cannot surpass unless it pleads a *Noerr-Pennington* exception to the Aventis' FDA-related conduct and alleges market exclusion injury under the *Andrx* intent-and-preparedness test. Amphastar has not done so; it therefore cannot claim to have suffered antitrust injury as a matter of law. *Supra* Section III.G.3.

G. The Court Declines to Address the State Law Claims at this Time

Because the SAC states no federal claim, the Court declines to address its state claims at this time. *See Carnegie-Mellon Univ. v. Cohill, 484 U.S. 343, 350 n.7, 108 S. Ct. 614, 98 L. Ed. 2d 720 (1988)*.

The Court does observe that the SAC does not provide adequate notice of which common law business tort Amphastar proposes—"common law unfair competition" is not enough. *See Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 192-93, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)* (discussing the amorphous scope of California common law unfair competition and some theories it may encompass). Nor is it clear whether Aventis' alleged false statements about Lovenox's therapeutic levels were made to the FDA—and therefore would be subject to *Noerr-Pennington*—or if they were made to the prescribing and consuming public. *See* ¶ 50.

IV.

CONCLUSION

The SAC is DISMISSED **[*56]** WITHOUT PREJUDICE. Because Amphastar does not state a claim, Amphastar's application for discovery is DENIED.

The Court will set a status conference to discuss whether Amphastar may replead.

IT IS SO ORDERED.

DATED: February 17, 2009

/s/ Mariana R. Pfaelzer

Hon. Mariana R. Pfaelzer

United States District Judge

End of Document

Andrx. However, the better reading of *Bristol-Myers* is that the plaintiff there had adequately shown on summary judgment that the Hatch-Waxman automatic thirty-month stay may have been a material cause of the approval delay and that, in light of the automatic stay, requiring further indicia of preparedness was unreasonable. *Id. at 546* (rejecting the proposed legal standard that a company subject to the Hatch-Waxman stay must be "fully prepared to enter the market" and emphasizing the automatic nature of the stay (emphasis added)).

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

An appellate court reviews the grant of a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss de novo. In doing so, the appellate court asks whether there is plausibility in the complaint. The complaint "does not need detailed factual allegations, but the factual allegations must be enough to raise a right to relief above the speculative level. When the United States Supreme Court emphasized the need for plausibility in the complaint rather than wholly conclusory statements, it warned particularly of the high costs and frequent abuses associated with antitrust discovery. The concept of plausibility at the dismissal stage refers not to whether the allegations are likely to be true; the court must assume them to be true. The question is whether, if the allegations are true, it is plausible and not merely possible that the plaintiff is entitled to relief under the relevant law.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN2[] **Actual Monopolization, Claims**

The offense of monopoly under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, has two elements: (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power. Similarly, an attempt claim must show: (1) that the defendant has engaged in predatory or anticompetitive conduct; with (2) a specific intent to monopolize; and (3) a dangerous probability of achieving monopoly power, with the third element requiring consideration of the relevant market and the defendant's ability to lessen or destroy competition in that market. Under both types of *§ 2* claims a plaintiff must therefore plead both power in a relevant market and anticompetitive conduct. To define one small component of the overall product as the relevant product market is simply implausible.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN3[] **Actual Monopolization, Claims**

Even if a firm has monopoly power in a relevant market, a plaintiff must also show the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN4[] **Actual Monopolization, Claims**

The United States Supreme Court has recognized the economic value of allowing businesses to decide with whom they will deal, as it recently re-emphasized: As a general matter, the Sherman Act, *15 U.S.C.S. § 1 et seq.*, does not restrict the long recognized right of a trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal. In rare circumstances a refusal to cooperate with competitors might constitute a *15 U.S.C.S. § 2* violation, but such exceptions, because of the uncertain virtue of forced sharing and the difficulty of identifying and remedying anticompetitive conduct by a single firm, should be few.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Real Property Law > Encumbrances > Restrictive Covenants > General Overview

HN5[] **Attempts to Monopolize, Sherman Act**

Restrictive covenants limiting immediate competition may promote competition in a broader market. When a landowner divides his property and sells part to a third party while retaining the rest, attachment of a restrictive covenant to one of the two parcels can promote competition by enabling the owner of the other parcel to start a business without potentially crippling competition on its doorstep. It does not matter, legally or economically, whether the business will be started by the purchaser, or the original property owner. Just as a property owner who operates a business on his land has no obligation to sell part of his property to a person who intends to open a competing facility, he generally has no obligation, if he sells part of the property, to allow a competing facility to be opened there. ***Antitrust law*** is designed to ensure an appropriate blend of cooperation and competition, not to require all economic actors to compete full tilt at every moment.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN6[] **Actual Monopolization, Claims**

In the context of a claim for violation of *15 U.S.C.S. § 2*, courts cannot infer the absence of anticompetitive behavior simply by comparing the level of raw output before and after the alleged violation; the courts must still consider the underlying behavior.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN7[] **Actual Monopolization, Claims**

The proposition that an allegation of actual anticompetitive effects obviates any need to allege a relevant market because such effects are direct evidence of monopoly power is more commonly associated with claims under *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, which inquire into whether a defendant acts to restrain trade rather than to monopolize a market. A *§ 1* claim and a claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act are different inquiries. The former prohibits restraints of trade that are accomplished through concerted action, while the latter prohibits unilateral conduct but only when it rises to the more severe offense of threatening a monopoly. Because the Sherman Act does not prohibit unreasonable restraints of trade as such, but only restraints effected by a contract, combination, or conspiracy, it leaves untouched a single firm's anticompetitive conduct that may be indistinguishable in economic effect from the conduct of two firms subject to *§ 1* liability.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN8[] **Actual Monopolization, Claims**

A resort operator's ability to reserve to itself the operation of ancillary businesses within the resort is not dependent on the quantity of output being as high or the price being as low as they would be if there were competition from third parties within the resort. It depends, instead, on either the proposition that a market that involves only one component of an interrelated package of services is not a relevant market for purposes of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, or that it is not anticompetitive conduct for a resort owner to refuse to invite competitors to supply ancillary services within its resort.

Opinion by: McCONNELL

Opinion

[*1190] McCONNELL, Circuit Judge.

When the Deer Valley Resort Company ("DVRC") was developing its world-renowned ski resort in the Wasatch Mountains, it sold parcels of land within the resort village to third parties, while reserving the right of approval over the conduct of certain ancillary businesses on the property, including ski rentals. For about fifteen years, DVRC granted permission to Cole Sports and plaintiff-appellant Christy Sports to rent skis in competition with its own ski rental outlet. More recently, however, DVRC revoked that permission, presumably in order to gain more business for its own newly-opened mid-mountain ski rental store. The question is whether this revocation violated the antitrust laws. We conclude **[**2]** that it did not.

I. Background

Deer Valley is one of three resorts in the vicinity of Park City, Utah. Many--indeed, "the vast majority," according to the Complaint, P 25--of Deer Valley's patrons are destination skiers who fly into Salt Lake City and then take a forty-five minute bus or shuttle ride to the resort. The resort itself is divided into two areas: the base area, located at the bottom of the mountain, and the ritzier mid-mountain village, located halfway up the slope. DVRC has always been the sole provider of ski rentals at the base area, but at the mid-mountain village, Christy and Cole Sports have operated rental facilities; DVRC itself opened a mid-mountain ski rental facility in 2005.

Originally, DVRC owned all the property at the mid-mountain village, but over the years it has sold parcels to third parties. In 1990, DVRC sold one such parcel to S.Y. and Betty Kimball, subject to a restrictive covenant that prohibited use of the property for either ski rental or real estate sales office purposes without DVRC's express written consent. The Kimballs built a commercial building and leased space in it to Christy's corporate predecessor, Bulrich Corporation. The lease expressly **[**3]** prohibited both the rental of skis and the operation of a real estate office. The next year, though, DVRC gave Bulrich permission to rent skis in return for 15% of the rental revenue. When Bulrich **[*1191]** merged with another company in 1994 and formed Christy Sports, LLC, Christy continued to operate the rental business. According to the complaint, Christy stopped paying DVRC 15% of its rental revenue in 1995, though the reason for this change is unknown. Christy rented skis at the Deer Valley mid-mountain village with no objection from DVRC until 2005. During that time, DVRC was the sole purveyor of rental skis at the base area but did not have a ski rental operation at mid-mountain.

DVRC opened a mid-mountain ski rental outlet in 2005. In August of that year, the resort notified Christy that, beginning the following year's ski season, the restrictive covenant would be enforced and Christy would no longer be allowed to rent skis. Christy believes that DVRC issued the same message to Cole's, leaving DVRC as the only rental ski provider at Deer Valley, with the exception of a small operation at the Stein Eriksen Lodge, which serves its own lodgers. This leaves that majority of skiers who fly **[**4]** into Salt Lake City and then shuttle to Deer Valley with few choices: they can carry unwieldy ski equipment onto the plane, [1] take a shuttle into Park City and hunt for cheaper ski rentals in town, or rent from the more conveniently located DVRC location. Christy predicts, not improbably, that most consumers will choose the third option.

Christy argues that DVRC's decision to begin enforcing its restrictive covenant is an attempt to monopolize the market of ski rentals available to destination skiers in Deer Valley, or, alternatively, to the destination skiers in the mid-mountain **[**5]** village itself. It alleges that by eliminating its competitors, DVRC will be able to increase prices and reduce output, thus harming consumers. The complaint states that the number of skis available for rental mid-mountain will decline by 620 pairs, and the price will increase by at least twenty-two to thirtytwo percent.

The district court dismissed Christy's antitrust complaints. In this appeal, Christy challenges only the dismissal of its claims under *§ 2 of the Sherman Act*.

II. Analysis

HN1[] We review the grant of a *Rule 12(b)(6)* motion to dismiss de novo. *Teigen v. Renfrow, 511 F.3d 1072, 1078 (10th Cir. 2007)*. In doing so, we ask whether there is "plausibility in [the] complaint." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S.Ct. 1955, 1970, 167 L. Ed. 2d 929 (2007)*. The complaint "does not need detailed factual allegations," *id. at 1964*, but the "[f]actual allegations must be enough to raise a right to relief above the speculative level." *Id. at 1965*. When, in *Twombly*, the Supreme Court emphasized the need for plausibility in the complaint rather than "wholly conclusory statement[s]," *id. at 1966-67*, it warned particularly of the high costs and frequent abuses associated with antitrust discovery. **[**6]** *Id. at 1959* ("It is one thing to be cautious before dismissing an antitrust complaint in advance of discovery, but quite another to forget that proceeding to antitrust discovery can be expensive.") (internal citations omitted). The concept of "plausibility" at the dismissal stage refers not to whether **[*1192]** the allegations are likely to be true; the court must assume them to be true. The question is whether, if the allegations are true, it is plausible and not merely possible that the plaintiff is entitled to relief under the relevant law. *Robbins v. Oklahoma, 519 F.3d 1242, 1247 (10th Cir. 2008)*.

Christy has alleged that DVRC violated *§ 2 of the Sherman Act* by either actual or attempted monopolization. ***HN2***[] "The offense of monopoly under *§ 2 of the Sherman Act* has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. Similarly, an attempt claim must show "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power," with the third element **[**7]** requiring "consider[ation] [of] the relevant market and the defendant's ability to lessen or destroy competition in that market." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*. Under both types of *§ 2* claims Christy must therefore plead both power in a relevant market and anticompetitive conduct. The relevant market, according to Christy's complaint, is the market for ski rentals to destination skiers in Deer Valley in general or, even

---

[1] We decline Christy's request to take judicial notice of newspaper stories reporting that airlines have made it more difficult and costly for passengers to transport their skis. Whether or not such materials would be admissible in district court, this is an appeal of an order dismissing the complaint at the pleading stage. The question before this court is whether the complaint states a claim upon which relief may be granted. For that purpose, we assume that the factual allegations of the complaint are true, and are not concerned with evidence that the parties might bring supporting or challenging those allegations.

more narrowly, the market for ski rentals in the mid-mountain village. Compl. P 61. The alleged anticompetitive conduct is the enforcement of the restrictive covenant.

A great many pages in the briefs are devoted to whether the defined market set forth in the complaint--destination skiers at Deer Valley, or alternatively at Deer Valley's mid-mountain village--is too small to constitute a market for antitrust purposes, in light of the proximity of a number of ski rental outlets in Park City, just down the road. For purposes of analyzing the complaint, however, we find it not implausible that destination skiers who arrive at the resort by bus or shuttle will find it sufficiently inconvenient to travel into town to rent skis that a successful **[**8]** monopolist over ski rental at Deer Valley could charge supracompetitive prices. The question, we believe, is not whether DVRC might be able to raise prices and reduce output by becoming the only purveyor of rental skis at the resort, but whether such a market is legally cognizable under the antitrust laws and whether the decision of a resort owner to reserve to itself the right to provide ancillary services counts as anticompetitive conduct.

The defendant argues that these issues must be analyzed primarily from the temporal perspective of DVRC's decision to impose a restrictive covenant on the sale of the property to the Kimballs. It points out that DVRC had the right not to sell the property at issue at all; it could have operated its own ski rental facilities at mid-mountain as it did at the base, without allowing competitors to enter the business. None of this would have violated the antitrust laws. Such an arrangement would not have diminished competition; on the contrary, by creating a resort and providing all the services ancillary to it, DVRC increased competition in the ski industry as a whole. The defendant argues that the analysis is the same when it allows an outside ski **[**9]** rental provider to operate for a period of time, and later changes its mind. If it is permissible for a resort owner to impose a covenant on land sales restricting potential competition in the provision of ancillary services, defendants argue, it must be permissible to exercise those rights under the covenant at a later date.

The plaintiff argues, on the contrary, that the temporal focus should be on DVRC's decision to withdraw its consent **[*1193]** to the operation of Cole and Christy's ski rental facilities. It argues that this decision diminished competition in the ski rental business for destination skiers at Deer Valley (or, alternatively, at mid-mountain), and will result in lowered output and higher prices for ski rentals, as compared to the situation before DVRC withdrew its consent.

We begin our analysis with DVRC's original decision to impose the restrictive covenant.

A. Imposition of the Restrictive Covenant

We agree with the defendant that the creator of a resort has no obligation under the antitrust laws to allow competitive suppliers of ancillary services on its property. A theme park, for example, does not have to permit third parties to open restaurants, hotels, gift shops, or other **[**10]** facilities within the park; it can reserve to itself the right to conduct such businesses and receive revenues from them. Accordingly, if it sells land within the resort to third parties, the antitrust laws do not bar the resort owner from imposing a covenant against use of the property for competitive businesses. This is so even if food, rooms, gifts, or other ancillary goods and services would be cheaper and more plentiful if the resort owner allowed competition in these businesses.

This conclusion can be reached either by reference to the proper definition of a market or by reference to the absence of anticompetitive conduct. Some courts, faced with cases of this sort, have found the market definition implausible. The Seventh Circuit took this approach in *Elliott v. United Center, 126 F.3d 1003 (7th Cir. 1997)*, when a peanut vendor challenged a sports arena's decision to ban outside food and thereby monopolize the market for food concessions within the arena. The court rejected that market definition as implausible, saying:

> The logic of [the] argument would mean that exclusive restaurants could no longer require customers to purchase their wines only at the establishment, because **[**11]** the restaurant would be "monopolizing" the sale of wine within its interior. Movie theaters, which traditionally (and notoriously) earn a substantial portion of their revenue from the sale of candies, popcorn, and soda, would be required by the antitrust laws to allow patrons to bring their own food.

Id. at 1005. Other courts agree. Hospitals alleged to have monopolized the market for medical services within that single hospital, *Collins v. Associated Pathologist, Ltd.*, 844, F.2d 473, 480 n.5 (7th Cir. 1988); Ginzburg v. Memorial Healthcare Systems, Inc., 993 F.Supp. 998, 1013 (S.D. Tex. 1997), and a cemetery alleged to have monopolized the market for tombstones within that cemetery, Monument Builders of N.A. v. Michigan Cemetery Ass'n, 524 F.3d 726, 733-37 (6th Cir. 2008), were all declared too narrow to constitute a relevant market. Perhaps even closer to this case is Hack v. President & Fellows of Yale College, 237 F.3d 81, 85 (2d Cir. 2000), in which Yale University was alleged to have monopolized the market for on-campus housing within its sprawling complex of facilities. The Second Circuit rejected the idea that it is impermissible for an institution to monopolize one particular **[**12]** product within an establishment that provides a variety of interrelated services, the most important one of which is education. The alleged market was too narrow.

Although discussion of sports arenas and universities seems to suggest that Christy's shortcomings lie with its alleged geographic market, the actual problem lies with its product market. In these cases the two are difficult to disentangle because **[*1194]** the product (rental skis, as here, or housing, as in *Hack*) is intimately related to the location. Consumers do not travel to Deer Valley for rental skis, just as they do not attend Yale to live in an Eero Saarinen-designed dormitory. The true product in these cases is the overall experience. Deer Valley offers a cluster of products that combine to create a destination ski experience; rental skis are only one small component. *Cf.* United States v. Phillipsburg Nat. Bank & Trust Co., 399 U.S. 350, 361, 90 S. Ct. 2035, 26 L. Ed. 2d 658 (1970) ("[T]he cluster of products and services termed commercial banking has economic significance well beyond the various products and services involved."); United States v. Philadelphia Nat. Bank, 374 U.S. 321, 356, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963) (defining the relevant market under the Clayton Act merger analysis **[**13]** as "the cluster of products (various kinds of credit) and services (such as checking accounts and trust administration) denoted by the term 'commercial banking'"). The complaint alleges nothing to suggest that destination skiers are choosing their ski resort based on the price of rental skis, separate and apart from the cluster of services associated with the destination-ski experience. To define one small component of the overall product as the relevant product market is simply implausible. [2]

Alternatively, one could say that the monopolization claim would fail because the alleged conduct is not anticompetitive. ***HN3***[] Even if a firm has monopoly power in a relevant market, a plaintiff must also show "the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." Grinnell Corp., 384 U.S. at 570-71. **[**14]** Deer Valley is not required to invite competitors onto its property to rent skis to its patrons, even if a failure to do so would mean it is the sole supplier of rental skis at the ski area.

HN4[] The Supreme Court has recognized the economic value of allowing businesses to decide with whom they will deal, as it recently re-emphasized: "[A]s a general matter, the Sherman Act 'does not restrict the long recognized right of [a] trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal.'" Verizon Commc'ns, Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004) (quoting United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)). In *Trinko*, the Court acknowledged that in rare circumstances a refusal to cooperate with competitors might constitute a § 2 violation, but that "such exceptions, because of the uncertain virtue of forced sharing and the difficulty of identifying and remedying anticompetitive conduct by a single firm," *id*., should be few.

Having invested time and money in developing a premier ski resort that attracts skiers from across the nation, DVRC could recoup its investment **[**15]** in a number of ways. It could increase the price of lift tickets, raise room rates, serve only high-priced food, or, as it seems to have chosen, delve more deeply into the rental ski market. *See* Elliott, 126 F.3d at 1005 ("[The United Center] can charge very high ticket prices, and allow unlimited numbers of food concessions in and around the stadium, or it can charge somewhat lower ticket prices **[*1195]** and restrict the

---

[2] We should not be misread as suggesting the implausibility of a rental ski product market within a reasonably well-defined geographic area. We simply hold implausible Christy's attempt to suggest a product market exists in rental skis for destination skiers, disaggregated from the full destination ski experience.

number of concessions (thereby earning some of its profits from the food sales)."). This does not mean consumers have no protection. The ski resort industry is competitive (and Christy does not allege otherwise). Families contemplating ski vacations have many options, and they presumably compare quality and price. If they are rational, the price they are concerned about is the sum of all of their prospective vacation costs, including not just lift ticket prices and resort lodging, but air fare, food and drink, apres-ski entertainment, ski rentals, and the like. A resort that facilitates lower ski rental prices by allowing competition is able to price other aspects of the ski vacation experience more aggressively. The competitive discipline comes not from introducing competition **[**16]** with respect to each component of the experience, but from competition with other ski resorts with respect to the entire package. Christy has not alleged, and it would not likely be plausible to allege, that DVRC's decision to foreclose competition in the ski rental business at the mid-mountain village will have any effect on the market for ski resort vacations as a whole.

Indeed, allowing resorts to decide for themselves what blend of vertical integration and third party competition will produce the highest return may well increase competition in the ski resort business as a whole, and thus benefit consumers. This flexibility about business strategies induces entrants into the ski resort business by allowing them to reserve the benefits of their investments to themselves. Disneyland may have made a business miscalculation in locating where third parties could conveniently supply hotels, restaurants, and other services to its guests. *See* *Elliott, 126 F.3d at 1005* (citing Jim Molnar, *A Tale of 2 Disneys: Out of a Single Mouse Different Playgrounds Grew*, Seattle Times, May 19, 1991, at L1). The antitrust laws do not make such miscalculations legally obligatory.

The idea that ***HN5***[ ] restrictive **[**17]** covenants limiting immediate competition may promote competition in a broader market finds support in this court's decision in *Drury Inn--Colorado Springs v. Olive Co., 878 F.2d 340 (10th Cir. 1989)*, a case on which the district court below heavily relied. In *Drury Inn*, a motel chain purchasing a tract of land insisted that the seller attach a restrictive covenant to a neighboring lot that would prevent a competing motel from operating next door. The court held that the restrictive covenant was not a per se violation of *§ 1 of the Sherman Act*, concluding that the arrangement was one that "merely regulates and perhaps thereby promotes competition." *Id. at 342*. To be sure, in an immediate sense the restrictive covenant barred competition against the motel chain, but in a broader sense it facilitated the entry of a new market participant, to the benefit of consumers and competition overall. Without the covenant, Drury Inn might not have entered the market. This case is similar, in that DRVC insisted on attaching a restrictive covenant to its sale of land to the Kimballs to protect its future ability to profitably operate a ski rental business. Because both the land deal and the potential **[**18]** opening of a ski rental business would expand the market, the arrangement "merely regulates and perhaps thereby promotes competition." *Id*.

Drury Inn of course has differences from this case. As Christy points out, *Drury Inn* was a *§ 1* case; the antitrust issue was raised as an affirmative defense to a breach of contract action rather than as a freestanding antitrust claim; the restrictive covenant was more limited in time; and the restriction operated to the benefit of the buyer rather than the seller. But despite these surface differences, **[*1196]** the underlying economic logic of *Drury Inn* is equally applicable here: that when a landowner divides his property and sells part to a third party while retaining the rest, attachment of a restrictive covenant to one of the two parcels can promote competition by enabling the owner of the other parcel to start a business without potentially crippling competition on its doorstep. It does not matter, legally or economically, whether the business will be started by the purchaser (as in *Drury Inn*), or the original property owner (as in our case). Just as a property owner who operates a business on his land has no obligation to sell part of his property **[**19]** to a person who intends to open a competing facility, he generally has no obligation, if he sells part of the property, to allow a competing facility to be opened there. *See* *Polk Bros., Inc. v. Forest City Enters., Inc., 776 F.2d 185, 188 (7th Cir. 1985)* (Easterbrook, J.) ("***Antitrust law*** is designed to ensure an appropriate blend of cooperation and competition, not to require all economic actors to compete full tilt at every moment.").

Either line of reasoning--whether based on market definition or lack of anticompetitive conduct--leads to the same conclusion. Indeed, they are two sides of the same coin: having created a resort destination, antitrust will not force a resort developer to share its internal profit-making opportunities with competitors. The relevant market requirement reaches this result by finding implausible a market definition that singles out a small component of the cluster of services that constitutes the actual product; the anticompetitive conduct requirement reaches it by saying that it is not anticompetitive to refuse to grant access to competitors.

B. Revocation of Consent to Operate a Ski Rental Facility

The plaintiff does not seriously argue that it was impermissible **[**20]** for DVRC to impose the restrictive covenant back in 1990, or that it would have been impermissible for DVRC to use its ownership of the land to bar competition in the ski rental business from the beginning. Rather, the plaintiff argues primarily that, having allowed third parties to engage in the ski rental business for almost fifteen years, DVRC violated *§ 2 of the Sherman Act* when it revoked that permission and took over the ski rental business for itself.

We do not see the logic in this argument. If ***antitrust law*** permits a resort operator to organize its business in either of two ways, by providing ancillary services itself or by allowing third parties to provide the service on a competitive basis, we do not see why an initial decision to adopt one business model would lock the resort into that approach and preclude adoption of the other at a later time. Conceivably, such a change might lead to a claim under contract law or as a business tort. We would not even preclude the theoretical possibility that such a change could give rise to an antitrust claim, for example, if by first inviting an investment and then disallowing the use of the investment the resort imposed costs on a competitor **[**21]** that had the effect of injuring competition in a relevant market. But there are no such allegations here. Indeed, Christy knew from the beginning that it could operate a ski rental business only by permission of DVRC, on a year-to-year basis. It cannot claim unfair surprise.

The closest case in support of the plaintiff's position is *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*. In *Aspen Skiing*, two companies had successfully cooperated to offer skiers joint passes to both companies' mountains, until the larger of those companies decided to end the relationship. *Id. at 587-95*. Indeed, it not only stopped offering **[*1197]** the joint pass, but, when its former partner tried to recreate the multi-mountain pass by giving its customers vouchers equal to a price of a full day's lift ticket, it also refused to honor those vouchers. *Id. at 593-94*. The Court held that termination of the relationship was anticompetitive. The case could be interpreted as holding that even if a firm has the right to refuse to do business with a competitor, it may not necessarily have the right to do so after establishing a business relationship. The Court has since said, however, that "*Aspen Skiing* **[**22]** is at or near the outer boundary of *§ 2* liability," *Trinko, 540 U.S. at 409*, and noted that the key fact in *Aspen Skiing* was that the defendant terminated a profitable relationship without any economic justification, showing "a willingness to forsake short-term profits to achieve an anticompetitive end," *id*., especially when it refused to renew the joint ticket "*even if compensated at retail price*." *Id*. The critical fact in *Aspen Skiing* was that there were no valid business reasons for the refusal.

Here, in contrast, we have no indication that DVRC is terminating a profitable business relationship. There is no allegation that DVRC was motivated by anything other than a desire to make more money for itself. For all that appears from the complaint, DVRC expects to increase (not forsake) short-term profits by operating its own ski rental facility at the mid-mountain village. The Sherman Act does not force DVRC to assist a competitor in eating away its own customer base, especially when that competitor is offering DVRC nothing in return. Moreover, by using the restrictive covenant DVRC had explicitly informed its competitors from the beginning that the relationship could change at any time. **[**23]** Unlike the competitor in *Aspen Skiing*, Christy should have been aware that the relationship was temporary and subject to DVRC's business judgment. DVRC's behavior does not reach the "outer boundary of § 2 liability," *id*., at which *Aspen Skiing* lies.

At oral argument Christy argued that our opinion in *Full Draw Productions v. Easton Sports, Inc., 182 F.3d 745 (10th Cir. 1999)* requires us to view any decrease in competition as an antitrust violation, even when that decrease represents simply a return to a formerly valid level of competition. In that case, a group of archery manufacturers boycotted a trade show sponsored by a trade show promoter in order to run that promoter out of business and begin promoting shows itself. *Id. at 748*. The boycott organizers argued that "[their] alleged activities were not anticompetitive because [they] actually increased the output of exhibition space, albeit briefly, and because the output of exhibition space merely returned to the pre-boycott level after the [competitor] failed." *Id. at 755*. We rejected that argument, saying that "the bare fact that the output of exhibition space before and after the alleged boycott stayed the same says nothing about **[**24]** whether the process in between was anticompetitive, which it allegedly was." *Id*.

Full Draw indicates only that ***HN6***[] we cannot infer the absence of anticompetitive behavior simply by comparing the level of raw output before and after the alleged violation; we must still consider the underlying behavior. It does *not* suggest that any decrease in the number of competitors or total output will automatically violate the antitrust laws. The defendants in *Full Draw* did not experiment with a new business plan and then return to their earlier status; they actively changed that earlier status by driving a pre-existing competitor out of the market. Rather than inviting a competitor into its market and then rescinding the invitation, the *Full Draw* defendants actively invaded another market **[*1198]** through anticompetitive behavior and substantially changed what that market looked like. Whereas DVRC returned to a position it had a right to from the beginning, the *Full Draw* defendants created a position they never had a right to in the first place.

DVRC should not be forever locked into a business decision made in 1990, especially when it took an affirmative step to preserve its future flexibility by bargaining **[**25]** for a restrictive covenant. This is so even if Christy is correct that by enforcing the restrictive covenant DVRC could increase the price and decrease the output of ski rentals at Deer Valley. It had the right to do so from the beginning, and the fact that it chose to do otherwise for some time does not eliminate that right. The antitrust laws should not be allowed to stifle a business's ability to experiment in how it operates, nor forbid it to change course upon discovering a preferable path.

C. Whether Definition of a Relevant Market Is Required

The plaintiff also argues that, having pled actual anticompetitive effects stemming from DVRC's enforcement of the restrictive covenant, it was not required to plead a relevant market. It reasons that an allegation of actual anticompetitive effects obviates any need to allege a relevant market because such effects are direct evidence that DVRC has monopoly power. ***HN7***[] This proposition is more commonly associated with § 1 claims, which inquire into whether a defendant acts to restrain trade rather than to monopolize a market. *See F.T.C. v. Ind. Fed. of Dentists, 476 U.S. 447, 460-61, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)* ("Since the purpose of the inquiries into market definition **[**26]** and market power is to determine whether an arrangement has the potential for genuine adverse effects on competition, proof of actual detrimental effects, such as a reduction of output, can obviate the need for an inquiry into market power, which is but a surrogate for detrimental effects.") (internal quotations omitted); *Law v. NCAA, 134 F.3d 1010, 1019 (10th Cir. 1998)*. A § 1 claim and a § 2 claim are different inquiries, though. The former prohibits "restraints of trade" that are accomplished through concerted action, while the latter prohibits unilateral conduct but only when it rises to the more severe offense of threatening a monopoly. "Because the Sherman Act does not prohibit unreasonable restraints of trade as such--but only restraints effected by a contract, combination, or conspiracy--it leaves untouched a single firm's anticompetitive conduct . . . that may be indistinguishable in economic effect from the conduct of two firms subject to § 1 liability." *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 775, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*. *See also Anserphone, Inc. v. Bell Atlantic Corp., 955 F.Supp. 418, 428 (W.D. Pa. 1996)* (relying on this distinction to reject argument that anticompetitive **[**27]** effects are sufficient to state a claim under § 2).

Nonetheless, at least one circuit has applied the plaintiff's logic to the § 2 context. *Re/Max Intern., Inc. v. Realty One, Inc., 173 F.3d 995, 1018 (6th Cir. 1999)* ("[A]n antitrust plaintiff is not required to rely on indirect evidence of a defendant's monopoly power, such as high market share within a defined market, when there is direct evidence that the defendant has actually set prices or excluded competition."). This circuit has neither accepted nor rejected the theory. In two cases, *Tarabishi v. McAlester Regional Hospital, 951 F.2d 1558, 1569 n.15 (10th Cir. 1991)*, and *Reazin v. Blue Cross & Blue Shield of Kansas, Inc., 899 F.2d 951, 968 n.24 (10th Cir. 1990)*, this court discussed the possibility that proof of anticompetitive effects rendered definition of a relevant market unnecessary in a § 2 case, but in both cases found it unnecessary to reach the issue **[*1199]** either because the plaintiffs had failed to prove detrimental effects, *Tarabishi, 951 F.2d at 1569 n.15*, or because the plaintiffs had proved power in a relevant market, *Reazin, 899 F.2d at 968 n.24*. We are in a similar position.

Although Christy insists that it has shown **[**28]** anticompetitive effects by its allegations of a decline in quantity and increase in price of rental skis at the mid-mountain village, this is just a repackaging of the argument rejected above. ***HN8***[] A resort operator's ability to reserve to itself the operation of ancillary businesses within the resort is not dependent on the quantity of output being as high or the price being as low as they would be if there were competition from third parties within the resort. It depends, instead, on either the proposition that a market that involves only one component of an interrelated package of services is not a relevant market for purposes of the Sherman Act or that it is not anticompetitive conduct for a resort owner to refuse to invite competitors to supply ancillary services within its resort. The fact (even if it is a fact, as the complaint alleges) that fewer skis will be available for rental and that prices for rental skis will be higher, does not refute either of these legal propositions.

The plaintiff also devotes much of its briefing to the argument that the restrictive covenant is a "naked" rather than "ancillary" restraint, making it per se illegal regardless of market power. This was the **[**29]** principal point at issue in *Drury Inn, 878 F.2d at 343*, where we found a restrictive covenant ancillary rather than naked. Christy acknowledges, however, that the naked/ancillary restraint distinction pertains only to its § 1 claim, the appeal of which Christy decided to withdraw subsequent to briefing. Aplt. R. Br. 14 ***HN9***[] ("Those concepts apply *only* in the context of Section 1 restraint of trade claims; they do *not* apply to Section 2 monopoly claims."). Thus, now that the § 1 claim is no longer at issue and only § 2 claims remain, we need not address whether the restrictive covenant is a "naked restraint."

III. Conclusion

Because Christy Sports has failed to plead a plausible claim for either attempted or actual monopolization under *§ 2 of the Sherman Act*, we **AFFIRM** the district court's dismissal for failure to state a claim.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] Motions to Dismiss, Failure to State Claim

Fed. R. Civ. P. 12(b)(6) provides that a motion to dismiss may be made if the plaintiff fails to state a claim upon which relief can be granted.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN4[] Motions to Dismiss, Failure to State Claim

Motions to dismiss under *Fed. R. Civ. P. 12(b)(6)* are disfavored and rarely granted.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN5[] Motions to Dismiss, Failure to State Claim

In deciding whether to grant a motion to dismiss for failure to state a claim, the court accepts all factual allegations of the complaint as true and draws all reasonable inferences in the light most favorable to the nonmoving party. The court is not required to accept as true allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN6[] Motions to Dismiss, Failure to State Claim

The question before the court on a motion to dismiss for failure to state a claim is not whether the plaintiff will ultimately prevail; rather, it is whether the plaintiff could prove any set of facts in support of his claim that would entitle him to relief.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN7[] Motions to Dismiss, Failure to State Claim

A complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that plaintiff can prove no set of facts in support of his claim which would entitle him to relief.

Patent Law > Statutory Bars > Public Use Bar > Elements

HN8[] Public Use Bar, Elements

See *35 U.S.C.S. § 120(b)*.

Governments > Local Governments > Claims By & Against

International Law > Foreign & International Immunity > Sovereign Immunity > General Overview

Governments > Federal Government > Claims By & Against

Governments > State & Territorial Governments > Claims By & Against

HN9[] Local Governments, Claims By & Against

Where sovereign immunity is asserted, and the sovereign's claims are not frivolous, dismissal must be ordered where there is a potential for injury to the absent sovereign's interests.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN10[] Compulsory Joinder, Indispensable Parties

See *Fed. R. Civ. P. 19*.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN11[] Compulsory Joinder, Indispensable Parties

The application of *Fed. R. Civ. P. 19* involves three successive inquiries. First, the court must determine whether a nonparty should be joined under *Rule 19(a)*. The term "necessary" is used to describe those persons to be joined if feasible. The inquiry is a practical one and fact specific, and is designed to avoid the harsh results of rigid application. Second, if an absentee is a necessary party under *Rule 19(a)*, the court is to determine whether it is feasible to order that the absentee be joined. Finally, and thirdly, if joinder is not feasible, the court must determine at the third stage whether the case can proceed without the absentee, or whether the absentee is an indispensable party such that the action must be dismissed. In the final analysis, *Rule 19* uses the word "indispensable" only in a conclusory sense, that is, a person is regarded as indispensable when he cannot be made a party and, upon consideration of the factors in *Rule 19(b)*, it is determined that in his absence it would be preferable to dismiss the action, rather than to retain it.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN12[] Compulsory Joinder, Indispensable Parties

The terms "necessary" and "indispensable" are terms of art in *Fed. R. Civ. P. 19* jurisprudence: "Necessary" refers to a party who should be joined if feasible. "Indispensable" refers to a party whose participation is so important to the resolution of the case that, if the joinder of the party is not feasible, the suit must be dismissed.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

Patent Law > ... > Defenses > Patent Invalidity > General Overview

HN13[] Compulsory Joinder, Indispensable Parties

The patent owner is an indispensable party in a case challenging the validity of the patent.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

Patent Law > Remedies > Declaratory Judgments

Patent Law > ... > Defenses > Patent Invalidity > General Overview

HN14[] Compulsory Joinder, Indispensable Parties

The general rule in patent infringement suits, which applies in declaratory relief actions seeking invalidity of a patent, is that the patent owner is to be joined when fewer than all substantial rights have been transferred in an exclusive license to the licensee.

Business & Corporate Compliance > ... > Patent Law > Ownership > Federal Government Inventions

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN15[] Ownership, Federal Government Inventions

See *35 U.S.C.S. § 207(a)(2)*.

Business & Corporate Compliance > ... > Patent Law > Ownership > Federal Government Inventions

Civil Procedure > Parties > Joinder of Parties > General Overview

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN16[] Ownership, Federal Government Inventions

In conjunction with *35 U.S.C.S. § 207(a)(2)*, federal regulations provide, pursuant to *37 C.F.R. § 404.5*, licenses may contain provisions permitting the right to enforce the patent by the licensee, without joining the United States: Licenses shall contain such terms and conditions as the federal agency determines are appropriate for the protection of the interests of the federal government and the public and are not in conflict with law or this part. The following terms and conditions apply to any license: Any patent license may grant the licensee the right of enforcement of the licensed patent without joining the federal agency as a party as determined appropriate in the public interest. *37 C.F.R. § 404.5(b)(2)*.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN17[] Compulsory Joinder, Necessary Parties

When it has been determined that an absent party to the suit is "necessary" under *Fed. R. Civ. P. 19(a)*, the inquiry is whether that party can be joined in the action.

Administrative Law > Sovereign Immunity

Governments > Federal Government > Claims By & Against

HN18[] Administrative Law, Sovereign Immunity

Absent a waiver, sovereign immunity shields the federal government and its agencies from suit.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Governments > Federal Government > Claims By & Against

HN19[] Subject Matter Jurisdiction, Jurisdiction Over Actions

The United States may not be sued without its consent and that the existence of consent is a prerequisite for jurisdiction.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Governments > Federal Government > Claims By & Against

HN20[] Subject Matter Jurisdiction, Jurisdiction Over Actions

The United States, as sovereign, is immune from suit save as it consents to be sued, and the terms of its consent to be sued in any court define the court's jurisdiction to entertain the suit.

Governments > Federal Government > Claims By & Against

HN21[] Federal Government, Claims By & Against

Absent a waiver, sovereign immunity bars any proceeding against property in which the United States has an interest.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

Governments > Federal Government > Claims By & Against

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN22[] Compulsory Joinder, Indispensable Parties

If the United States is immune from suit and no waiver is available, the United States cannot be joined under *Fed. R. Civ. P. 19(a)*, and is an indispensable party under *Rule 19(b)*.

Administrative Law > Sovereign Immunity

Governments > Federal Government > Claims By & Against

HN23[] **Administrative Law, Sovereign Immunity**

A waiver of sovereign immunity must be unequivocally expressed. The Government's consent to be sued must be construed strictly, in favor of the sovereign.

Administrative Law > Sovereign Immunity

Governments > Federal Government > Claims By & Against

Governments > Legislation > Interpretation

HN24[] **Administrative Law, Sovereign Immunity**

Whether sovereign immunity has been waived depends on the language of a federal statute.

Administrative Law > Sovereign Immunity

Governments > Federal Government > Claims By & Against

HN25[] **Administrative Law, Sovereign Immunity**

Any suit against a federal agency is a suit against the United States for the purposes of sovereign immunity.

Business & Corporate Compliance > ... > Patent Law > Ownership > Federal Government Inventions

Governments > Federal Government > Claims By & Against

Patent Law > Remedies > Declaratory Judgments

HN26[] **Ownership, Federal Government Inventions**

A declaratory judgment seeking invalidity of a U.S.-owned patent squarely implicates sovereign immunity.

Business & Corporate Compliance > ... > Patent Law > Ownership > Federal Government Inventions

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN27[] **Ownership, Federal Government Inventions**

Property owners are generally necessary parties to actions that could affect their property interests adversely. The United States, as a patent owner, is no exception.

Business & Corporate Compliance > ... > Patent Law > Infringement Actions > Corporate & Government Infringers

Governments > Federal Government > Claims By & Against

Patent Law > ... > Damages > Patentholder Losses > Compensation From United States

HN28[] Infringement Actions, Corporate & Government Infringers

Under the only patent-related waiver of sovereign immunity, *28 U.S.C.S. § 1498* permits private parties to bring patent infringement suits in United States Federal Claims Court to seek money damages only. *28 U.S.C.S. § 1498*.

Business & Corporate Compliance > ... > Patent Law > Infringement Actions > Corporate & Government Infringers

Governments > Federal Government > Claims By & Against

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > Declaratory Judgments

Governments > Courts > Courts of Claims

HN29[] Infringement Actions, Corporate & Government Infringers

A suit under *28 U.S.C.S. § 1498* must be brought in U.S. Court of Federal Claims against the United States, and by its plain terms *28 U.S.C.S. § 1498* does not cover declaratory judgments seeking to invalidate a patent.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Governments > Federal Government > Claims By & Against

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > Scope of Declaratory Judgments

HN30[] Subject Matter Jurisdiction, Jurisdiction Over Actions

The federal statute covering declaratory relief actions, the Declaratory Judgment Act, *28 U.S.C.S. § 2201*, standing alone, does not waive sovereign immunity. The act does not of itself create jurisdiction; it merely adds an additional remedy where the district court already has jurisdiction to entertain the suit.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN31[] Compulsory Joinder, Indispensable Parties

If a necessary party cannot be joined, a court must consider whether the party is indispensable. *Fed. R. Civ. P. 19(b)*.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

HN32[] Compulsory Joinder, Indispensable Parties

A party is indispensable if in equity and good conscience, the court should not allow the action to proceed in its absence.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

Governments > Federal Government > Claims By & Against

International Law > Foreign & International Immunity > Sovereign Immunity > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN33[] **Compulsory Joinder, Indispensable Parties**

Fed. R. Civ. P. 19(b) sets out four factors to determine whether a case must be dismissed. However, where the absent party cannot be joined in light of sovereign immunity, there may be very little need for balancing because immunity itself may be viewed as the compelling factor. The four factors are: (1) prejudice to any party or to the absent party; (2) whether relief can be shaped to lessen prejudice; (3) whether an adequate remedy, even if not complete, can be awarded without the absent party; and (4) whether there exists an alternative forum.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

HN34[] **Compulsory Joinder, Indispensable Parties**

The first *Fed. R. Civ. P. 19(b)* factor directs the court to consider, in determining whether the action may proceed, the prejudice to absent entities and present parties in the event judgment is rendered without joinder.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

HN35[] **Compulsory Joinder, Indispensable Parties**

Under *Fed. R. Civ. P. 19(b)*, "adequacy" refers not to satisfaction of the plaintiffs' claims, but to the public stake in settling disputes by wholes, whenever possible.

Patent Law > Infringement Actions > Defenses > General Overview

HN36[] **Infringement Actions, Defenses**

See *35 U.S.C.S. § 282*.

Patent Law > ... > Defenses > Inequitable Conduct > Elements

HN37[] **Inequitable Conduct, Elements**

A claim for inequitable conduct requires proof that the defendant, one, affirmatively failed to disclose material information, or submitted false material information, and two, did so with an intent to deceive.

Patent Law > ... > Defenses > Inequitable Conduct > Elements

HN38[] Inequitable Conduct, Elements

To be guilty of inequitable conduct, one must have intended to act inequitably.

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Patent Law > ... > Defenses > Inequitable Conduct > Elements

HN39[] Inequitable Conduct, Burdens of Proof

Materiality and intent to deceive are distinct factual inquiries concerning inequitable conduct, and each must be shown by clear and convincing evidence.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

HN40[] Pleadings, Heightened Pleading Requirements

Inequitable conduct must be pled with particularity.

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

HN41[] Defenses, Inequitable Conduct

Inequitable conduct encompasses deception, fraud, or failure to disclose material information.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Failure to Fulfill Duties

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > General Overview

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

HN42[] Inequitable Conduct, Failure to Fulfill Duties

Inequitable conduct is a breach of the patentee's duties to the United States Patent and Trademark Office of candor, good faith, and honesty, may be stricken pursuant to *Fed. R. Civ. P. 12(f)* for failure to plead with particularity.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN43[] Heightened Pleading Requirements, Fraud Claims

Fed. R. Civ. P. 9(b) requires the identification of the circumstances constituting fraud so that the defendant can prepare an adequate answer from the allegations.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN44[] **Heightened Pleading Requirements, Fraud Claims**

The U.S. Court of Appeals for the Ninth Circuit interprets *Fed. R. Civ. P. 9(b)* to mean that the pleader must state the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentation.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN45[] **Sherman Act, Scope**

A claim for the enforcement of a patent procured by fraud on the United States Patent and Trademark Office may be violative of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, provided the other elements necessary to a *§ 2* case are present. Antitrust liability may arise when a patent has been procured by knowing and willful fraud and the patentee gaining market power in the relevant market through the use of its fraudulently obtained patent to restrain competition.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN46[] **Scope, Monopolization Offenses**

See *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN47[] **Attempts to Monopolize, Elements**

In a Walker Process fraud case, the antitrust claimant must show: (1) that the asserted patent was obtained by knowingly and willfully misrepresenting the facts to the United States Patent and Trademark Office; (2) that the party enforcing the patent was aware of the fraud when bringing suit; (3) independent and clear evidence of deceptive intent; (4) a clear showing of reliance, i.e., that the patent would not have issued but for the misrepresentation or omission; and (5) the necessary additional elements of an underlying violation of the antitrust laws.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Governments > Courts > Courts of Claims

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN48[] **Antitrust & Trade Law, Exemptions & Immunities**

Whether conduct in procuring or enforcing a patent is sufficient to strip a patentee of its immunity from the antitrust laws is to be decided as a question of U.S. Court of Appeals for the Federal Circuit law.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Governments > Courts > Courts of Claims

HN49[] **Inequitable Conduct, Anticompetitive Conduct**

When the courts consider a patentee's behavior under U.S. Court of Appeals for the Federal Circuit law and determine that it involved either an inappropriate attempt to procure a patent or an inappropriate attempt to enforce a patent, the remainder of the antitrust inquiry must proceed under the law of the regional circuit.

Patent Law > ... > Defenses > Inequitable Conduct > Elements

HN50[] **Inequitable Conduct, Elements**

Fraud in the procurement of a patent requires proof of the elements of common law fraud: (1) that a false representation of a material fact was made; (2) with the intent to deceive; (3) which induced the deceived party to act in justifiable reliance on the misrepresentation; and (4) which caused injury that would not otherwise have occurred.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Defenses > Inequitable Conduct > Elements

HN51[] **Inequitable Conduct, Anticompetitive Conduct**

To establish fraud for purposes of antitrust violation, the defendant must make a greater showing of scienter and materiality than when seeking unenforceability based on conduct before the U.S. Patent and Trademark Office.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN52[] **Antitrust & Trade Law, Exemptions & Immunities**

The enforcement of a patent procured by fraud on the U.S. Patent and Trademark Office may be violative of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*. Obtaining a patent by knowing and willfully misrepresenting facts to the Patent Office is sufficient to strip the patentee of its exemption from the antitrust laws. This conclusion applies with equal force to an assignee who maintains and enforces the patent with knowledge of the patent's infirmity.

Antitrust & Trade Law > Sherman Act > Claims

HN53[] **Sherman Act, Claims**

The gravamen of a 15 U.S.C.S. § 2 claim is the deliberate use of market power by a competitor to control price or exclude competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN54[] **Actual Monopolization, Monopoly Power**

Monopoly power is defined as the power to control prices or exclude competition. The existence of such power ordinarily may be inferred from the predominant share of the market.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN55[] **Regulated Practices, Monopolies & Monopolization**

To determine if a monopoly exists, it is first necessary to determine the market, both in terms of geography and product, that is being monopolized, that is the "relevant market." The definition of the relevant market is a factual inquiry for the jury, and the court may not weigh evidence or judge witness credibility. A submarket exists if it is sufficiently insulated from the larger market so that supply and demand are inelastic with the larger market.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN56[] **Market Definition, Relevant Market**

The relevant market is the narrowest market which is wide enough so that products from adjacent areas or from other producers in the same area cannot compete on substantial parity with those included in the market.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN57[] **Market Definition, Relevant Market**

The term "relevant market" encompasses notions of geography as well as product use, quality, and description.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN58[] **Relevant Market, Geographic Market Definition**

The geographic market extends to the area of effective competition where buyers can turn for alternative sources of supply.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN59[] Relevant Market, Product Market Definition

The product market includes the pool of goods or services that enjoy reasonable interchangeability of use and cross-elasticity of demand.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN60[] Regulated Practices, Market Definition

The proper market definition in any particular case can be determined only after a factual inquiry into the commercial realities faced by consumers. The purpose of market definitions is not to frustrate antitrust plaintiffs by requiring the proof of bright lines which do not exist, but is to help identify monopoly power, that is, the power to control prices or exclude competition.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN61[] Regulated Practices, Market Definition

Because market definition is a deeply fact-intensive inquiry, courts hesitate to grant motions to dismiss for failure to plead a relevant product market. To survive a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss, an alleged product market must bear a rational relation to the methodology courts prescribe to define a market for antitrust purposes--analysis of the interchangeability of use or the cross-elasticity of demand and it must be plausible. Dismissals in such cases on the pleadings typically occur in matters involving (1) a failure to attempt to limit a product market to a single brand, franchise, institution, or comparable entity that competes with potential substitutes; or (2) a failure to attempt a plausible explanation as to why a market should be limited in a particular way. A complaint may be dismissed under *Rule 12(b)(6)* if the complaint's "relevant market" definition is facially unsustainable.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN62[] Relevant Market, Product Market Definition

The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. However, within this broad market, well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes. The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN63[] **Relevant Market, Product Market Definition**

In some instances one brand of a product can constitute a separate market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN64[] **Relevant Market, Product Market Definition**

The market must include all economic substitutes; it is legally permissible to premise antitrust allegations on a submarket. That is, an antitrust claim may, under certain circumstances, allege restraints of trade within or monopolization of a small part of the general market of substitutable products. In order to establish the existence of a legally cognizable submarket, a plaintiff must be able to show (but need not necessarily establish in the complaint) that the alleged submarket is economically distinct from the general product market.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN65[] **Inequitable Conduct, Anticompetitive Conduct**

The concept of patent misuse arose to restrain practices that did not in themselves violate any law, but that drew anticompetitive strength from the patent right, and thus were deemed to be contrary to public policy. The policy purpose was to prevent a patentee from using the patent to obtain market benefit beyond that which inheres in the statutory patent right.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN66[] **Inequitable Conduct, Anticompetitive Conduct**

Patent misuse is viewed as a broader wrong than antitrust violation because of the economic power that may be derived from the patentee's right to exclude. Thus misuse may arise when the conditions of antitrust violation are not met.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN67[] **Inequitable Conduct, Anticompetitive Conduct**

A court's inquiry into a misuse claim is whether, by imposing conditions that derive their force from the patent, the patentee has impermissibly broadened the scope of the patent grant with anticompetitive effect. Since patent misuse arises in equity, if found to be patent misuse, the patent is rendered unenforceable. And it remains unenforceable until the misuse ends; the patent, however, is not invalidated.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN68[] Per Se Rule Tests, Manifestly Anticompetitive Effects

When a practice alleged to constitute patent misuse is neither per se patent misuse (e.g. tying arrangements or post-expiration royalties) nor specifically excluded from a misuse analysis by the Patent Misuse Reform Act, *35 U.S.C.S. § 271(d)*, a court must determine if that practice is reasonably within the patent grant, i.e., that it relates to subject matter within the scope of the patent claims. If so, the practice does not have the effect of broadening the scope of the patent claims and thus cannot constitute patent misuse. If, on the other hand, the practice has the effect of extending the patentee's statutory rights and does so with an anticompetitive effect, that practice must then be analyzed in accordance with the rule of reason. Under the rule of reason, the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN69[] Inequitable Conduct, Anticompetitive Conduct

License agreements entered into after a patent application has been filed but before the patent issues are not necessarily unenforceable. The key inquiry to patent misuse is whether, by imposing conditions that derive their force from the patent, the patentee has impermissibly broadened the scope of the patent grant with anticompetitive effect. Pre-issuance, there is no patent right to impermissibly broaden.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN70[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

A patent holder may lawfully restrict a licensee's right to use or sell a patented invention, so long as the restriction is reasonably within the patent grant, but not if the patentee has ventured beyond the patent grant and into behavior having an anticompetitive effect not justifiable under the rule of reason.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN71[] Defenses, Misuse

In the cases in which the restriction is reasonably within the patent grant, the patent misuse defense can never succeed.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN72[] Trade Practices & Unfair Competition, State Regulation

The purpose of the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, is to protect both consumers and competitors by promoting fair competition in commercial markets for goods and services.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN73[] Trade Practices & Unfair Competition, State Regulation

The Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, defines "unfair competition" to mean and include any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising and any act prohibited by the false advertising law, *Cal. Bus. & Prof. Code § 17500 et seq.* *Cal. Bus. & Prof. Code § 17200*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN74[] Trade Practices & Unfair Competition, State Regulation

The scope of the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, has been viewed by California Courts as quite broad.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN75[] State Regulation, Claims

Because the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, is framed in the disjunctive, a business practice need only meet one of the three criteria to be considered unfair competition. Such a claim can cover anticompetitive business practices and injuries to consumers. It can encompass violations of other laws, treating them as unlawful practices, that are independently actionable under the unfair competition law, but a practice can be deemed unfair even if not specifically proscribed by some other law.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN76[] State Regulation, Claims

To state an Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, claim under the "unlawful" prong, the plaintiffs are required to allege a violation of another law. The "unlawful" practices prohibited by *§ 17200* are any practices forbidden by law, be it civil or criminal, federal, state, or municipal, statutory, regulatory, or court-made.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN77[] **Trade Practices & Unfair Competition, State Regulation**

An unfair act under *Cal. Bus. & Prof. Code § 17200* is defined as one that offends an established public policy or is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers. "Unfair" simply means any practice whose harm to the victim outweighs its benefits.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > General Overview

HN78[] **Defenses, Demurrers & Objections, Motions to Strike**

Fed. R. Civ. P. 12(f) provides that redundant, immaterial, impertinent, or scandalous matters may be stricken from any pleading. *Fed. R. Civ. P. 12(f)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > General Overview

HN79[] **Defenses, Demurrers & Objections, Motions to Strike**

A motion to strike is limited to pleadings. However, a motion to strike materials that are not part of the pleadings may be regarded as an invitation by the movant to consider whether the proffered material may properly be relied upon.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > General Overview

HN80[] **Defenses, Demurrers & Objections, Motions to Strike**

A motion to strike is sometimes used to call to courts' attention questions about the admissibility of proffered material in ruling on motions.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > General Overview

HN81[] **Defenses, Demurrers & Objections, Motions to Strike**

Motions to strike are disfavored and infrequently granted. Such motions should be granted only where it can be shown that none of the evidence in support of an allegation is admissible.

Opinion

[*1148] MEMORANDUM DECISION AND ORDER [GRANTING IN PART AND DENYING IN PART] DEFENDANT'S MOTION TO DISMISS AND [DENYING] DEFENDANT'S MOTION TO STRIKE (Doc. 19)

I. INTRODUCTION

Defendant, The California Table Grape Commission ("Commission"), moves to dismiss **[*1149]** **[**2]** Plaintiffs' Delano Farms Company ("Delano"), Four Star Fruit, Inc. ("Four Star"), and Gerawan Farming, Inc. ("Gerawan"), entire complaint pursuant to *Federal Rule of Civil Procedure 19(a)*, claiming the United States is a necessary party, and moves to dismiss pursuant to *Federal Rule of Civil Procedure 19(b)*, claiming the government is an indispensable party and immune from this suit. Defendant additionally moves to dismiss Plaintiffs' remaining claims for (1) Inequitable Conduct, (2) Sherman and Clayton Anti-Trust violations, (3) Patent Misuse, (4) Unfair Competition, (5) Unjust Enrichment and (6) Constructive Trust. Defendant moves to strike certain portions of Plaintiffs' complaint pursuant to *Federal Rule of Civil Procedure 12(f)*. (Doc. 20, Motion to Dismiss, Filed December 14, 2007). Plaintiffs oppose the motion. (Doc. 24, Opposition, filed January 9, 2008.) Defendant filed a notice of supplemental authority on June 17, 2008, (Doc. 39). This matter was heard on May 19, 2008.

II. PROCEDURAL BACKGROUND

Plaintiffs filed their complaint on November 5, 2007. (Doc. 1, Complaint). The Commission filed its Motion to Dismiss on December 14, 2007, (Doc. 20), which Plaintiffs opposed on January **[**3]** 9, 2008. (Doc. 24, Opposition). On January 21, 2008, Defendant filed a reply to Plaintiffs' Opposition. (Doc. 26, Reply).

III. FACTUAL BACKGROUND

A. Parties

Plaintiff Delano is a corporation duly organized and existing under the laws of the State of Washington, with its principal place of business at Hoquiam, Washington. Plaintiff Four Star is a corporation duly organized and existing under the laws of the State of California, with its principal place of business at Delano, California. Plaintiff Gerawan is a corporation duly organized and existing under the laws of the State of California, with its principal place of business at Sanger, California. Plaintiffs are engaged in the business, *inter alia,* of growing, harvesting and selling table grapes.

Defendant is a corporation of the State of California, established by the 1967 Ketchum Act. *Cal. Food & Agric. Code §§ 65550-65551*. Defendant's principal place of business is at Fresno, California. The stated purpose of the Commission is to expand and maintain the market for California table grapes for the benefit of the State of California as well as the State's over five hundred California table grape growers. The Commission is funded primarily **[**4]** by assessments levied on each shipment of California table grapes and paid by the State's table grape shippers. No general revenues of the State fund the Commission. (Doc. 1, Complaint, PP 4-9).

B. USDA Research Program

California table grape growers and shippers have funded a research program under the U.S. Department of Agriculture ("USDA") to develop new table grape varieties. Growers and shippers fund the USDA research program through the Commission by an assessment on each box of table grapes shipped in California. Prior to 2002, the USDA provided the new varieties under development to area growers for evaluation of growing potential and commercial marketability. Once new varieties appeared commercially viable, the USDA "released" the variety, and distributed plant material of the variety to area growers free-of-charge. The USDA did not charge California growers for the new varieties since California growers and shippers already paid for a large portion of the development. (Complaint, P 10). Accordingly, when a variety under development appeared commercially successful, it **[*1150]** was not uncommon for many growers to have reproduced and commercially sold the variety prior to an official **[**5]** "release" by the USDA. (Complaint, P 43).

C. Commission Patents Grape Varieties

In the late 1990s, the Commission developed a scheme by which it and a few select nurseries could profit from the new varieties that the USDA distributed for free. At the urging of the Commission, the USDA agreed to begin patenting new table grape varieties. California shippers already funded much of the development, but the USDA agreed to give the Commission an exclusive license to all new patented varieties, and to allow the Commission to charge royalties when growers wished to obtain the new varieties. The USDA also agreed to give the Commission exclusive enforcement powers over its new patent rights. (Complaint, P 21).

Under the Commission's "patent and licensing" scheme, the Commission hand-selected three nurseries to exclusively sell all new patented table grape varieties ("Licensed Nurseries"). Unlike the prior free distribution, the nurseries would be allowed to sell new varieties to growers. (Complaint, P 13). The Licensed Nurseries are responsible for paying the royalty, but the Licensed Nurseries are allowed to pass the royalty amount on to the purchasing growers, which they do and have done. The **[**6]** Commission pays a portion of the royalty to the USDA. (Complaint, P 28).

When a grower seeks to obtain a new variety from a nursery, it is required to enter a "Domestic Grower License Agreement" or "License Agreement" with the Commission. Under the terms of the License Agreement, the grower cannot propagate the variety beyond the plant purchased. If the Commission believes the grower has violated the License Agreement, it can void the License Agreement and order that all purchased plants be destroyed. (Complaint, P 13).

The first three varieties that the Commission identified to the USDA for patenting had been under development for years. At least one of the varieties had been distributed to growers for wide-scale commercial evaluation and sale. (Complaint, P 14). Recognizing that at least one of the new varieties identified for patenting (and perhaps all three) had been previously in public use and/or sold commercially, the Commission created a so-called "amnesty program" designed to hide the fact that valid patents could not be obtained, and to extort funds from growers already in possession of the varieties. Under the amnesty program, the Commission widely disseminated notices to **[**7]** growers and shippers stating that they were in violation of the law if they possessed the varieties intended for patenting. The notices also offered confidential "settlements" to any growers who, within a narrow window, agreed to license the varieties, pay a "penalty" to the Commission, and accept the Commission's license restrictions on further propagation. (Complaint, P 15).

In May 2004, the commission sent a notice to all California table grape growers and shippers stating that the USDA had applied for a patent on the Sweet Scarlet variety. Although no enforceable patent had yet issued, the Commission offered "amnesty" for any grower who had previously reproduced Sweet Scarlet. Under its so-called "amnesty" program, a grower with Sweet Scarlet could keep the vines reproduced, so long as the grower (i) admitted to possession prior to July 2004, (ii) paid $ 2 per vine reproduced, (iii) paid $ 2 per box of Sweet Scarlet grapes previously shipped, and (iv) agreed to no further propagation of the Sweet Scarlet variety from the plants possessed. (Complaint, P 60).

[*1151] In July 2004, the Commission sent another notice to all California table grape growers and shippers extending the "amnesty" **[**8]** time period for one month, and extending the "amnesty" to include Autumn King and Scarlet Royal varieties. (Complaint P 61). In both notices, the Commission threatened to sue growers who did not come forward, and to seek money damages and injunctions. Yet, at the time of the second notice, the USDA patent application on Sweet Scarlet not only remained un-issued, but had been rejected by the USPTO. Moreover, the USDA had not even applied for a patent on either Autumn King or Scarlet Royal. The USDA had no patent rights, and the Commission lacked any enforcement rights. (Complaint, P 62). On information and belief, at the time the Commission sent the "amnesty" notices in May and June, 2004, the USDA, and Dr. Ramming knew of the public use and sale with respect to the Sweet Scarlet that occurred prior to February 20, 2002 - more than one year prior to the filing of the '512 Application on the Sweet Scarlet variety. (Complaint, P 63). On information and belief, the Commission, the USDA, and Dr. Ramming learned (prior to the July 25, 2005, issue date for Sweet Scarlet) that at least some of the 17 growers who agreed to the Commission's "amnesty" program for that variety had possessed and **[**9]** reproduced Sweet Scarlet prior to February 2002. On information and belief, the Commission, the USDA, and Dr. Ramming knew that such information was material to the patentability of the Sweet Scarlet variety. (Complaint, P 64). Seventeen growers confirmed possession of the varieties and agreed to pay the penalties demanded by the Commission, confirming its expectation that varieties identified for patenting were in public use. (Complaint, P 17).

D. <u>Patents in Prior Use</u>

The USDA and inventor of the new varieties breached their duty of candor to the United States Patent & Trademark Office ("USPTO") by not reporting these prior public uses and sales when applying for patents on the new varieties. Under Patent Law, public use or sale of an invention more than one year prior to filing a patent application bars patentability. Based on these facts, none of the patents on the new varieties are valid. The USDA and inventor committed inequitable conduct before the USPTO. The Commission demanded licenses and accepted royalties on knowingly invalid patents.

Plaintiffs seek to hold the patents invalid so the varieties can be freely distributed, to obtain the return of royalty payments illegally collected **[**10]** from growers and shippers, and to stop the Commission from engaging in further illegal activities through the use of patents. (Complaint, P 17).

E. <u>Patents</u>

1. <u>Sweet Scarlet</u>

On February 20, 2003, the USDA filed patent application No. 371,512 (the "'512 Application") on a grapevine denominated "Sweet Scarlet." On July 26, 2005, the '512 Application issued as U.S. Patent No. PP 15,891, entitled "Grapevine Denominated Sweet Scarlet" (the "'891 patent"). (Complaint, P 18). The United States of America, as represented by the Secretary of Agriculture, is the owner by assignment of the '891 patent. (Complaint, P 19). On information and belief, the Commission is the exclusive licensee of the '891 patent pursuant to a license agreement entered into between the United States Government, as represented by the United States Department of Agriculture, Agricultural Research Services, and the Commission. The exclusive license includes the right to **[*1152]** license the '891 patent and to enforce the '891 patent against alleged infringers. (Complaint, P 20).

2. <u>Autumn King</u>

On September 28, 2004, the USDA filed patent application No. 953,387 (the "'387 Application") on a grapevine denominated "Autumn King." On February **[**11]** 21, 2006, the '387 Application issued as U.S. Patent No. PP 16,284, entitled "Grapevine Denominated Autumn King" (the "Autumn King or '284 patent"). The United States of America, as represented by the Secretary of Agriculture, is the owner by assignment of the '284 patent. (Complaint, PP 21, 22). On information and belief, the Commission is the exclusive licensee of the '284 patent pursuant to a license agreement entered into between the United States Government, as represented by the United States Department of Agriculture, Agricultural Research Services, and the Commission. The exclusive license includes the right to license the '284 patent and to enforce the '284 patent against alleged infringers. (Complaint, P 23).

3. <u>Scarlet Royal</u>

On September 28, 2004, the USDA filed patent application No. 953,124 (the "'124 Application") on a grapevine denominated "Scarlet Royal." On January 31, 2006, the '124 Application issued as U.S. Patent No. PP 16,229, entitled "Grapevine Denominated Scarlet Royal" (the "Scarlet Royal or '229 patent"). The United States of America, as represented by the Secretary of Agriculture, is the owner by assignment of the '229 patent. (Complaint, PP 24, 25). On information **[**12]** and belief, the Commission is the exclusive licensee of the '229 patent pursuant to a License Agreement entered into between the United States Government, as represented by the United States Department of Agriculture, Agricultural Research Services, and the Commission. The exclusive license includes the right to license the '229 patent and to enforce the '229 patent against alleged infringers. (Complaint, P 26).

E. <u>Plaintiffs' License Agreements</u>

Plaintiffs are in possession of the Autumn King, Sweet Scarlet and Scarlet Royal varieties, which they purchased through Licensed Nurseries. Plaintiffs paid the royalties imposed by the Commission on each purchased plant. (Complaint, P 30). Plaintiffs have entered into a License Agreement with the Commission for each of the Patented Varieties. In consideration for this limited, nonexclusive license, Plaintiffs have paid a license fee to a Licensed Nursery. Under the terms of this agreement, Plaintiffs have a limited, nonexclusive license of the Patented Varieties, to grow the variety and sell the fruit produced. Plaintiffs cannot propagate the grapevines or distribute the vines to third parties. Further, Plaintiffs are obligated to destroy all **[**13]** Patented Varieties' plant material upon termination of the agreement. (Complaint, PP 31-33).

F. <u>Commission's Patent and Licensing Program</u>

The Commission requires that California grape shippers pay an assessment of approximately $ 0.13 per box of table grapes. The Commission operates at an annual surplus from these assessments, but does not return any of the assessment money back to the California growers or shippers. (Complaint, P 34). Dr. Ramming, the co-inventor of the patented Autumn King, Sweet Scarlet and Scarlet Royal varieties, is a researcher at the Agriculture Research Center ("ARC") of the USDA located in Fresno, California. For at least 20 years, Dr. Ramming has operated a research program at the ARC relating to the development of new table grape varieties. Since the early 1980s, the Commission has **[*1153]** funded a portion of Dr. Ramming's grapevine breeding program with funds collected through the shipper assessments. In many years, the Commission's funding has amounted to over one-third of the total table grape research budget at the ARC, excluding employee salaries. (Complaint, P 35). Prior to 2003, the USDA had never sought patent protection for any new table grape variety developed **[**14]** at the ARC.

The USDA agreed that the Commission could serve as the exclusive licensee for patented varieties in the collection of royalties and enforcement against infringers. (Complaint, P 37). In exchange for seeking patent protection, and providing an exclusive license to the Commission, the Commission and the USDA agreed that revenues from the patent licensing program would be shared between the USDA and the Commission. However, the USDA indicated that it was not interested in profiting from the patenting program. Additionally, Dr. Ramming received no extra compensation from the patenting of varieties he developed. (Complaint, P 39).

In accordance with the agreement between the Commission and the USDA, the Commission charges nurseries that distribute patented varieties a $ 5,000 participation fee per patented variety and an additional $ 1 per production unit royalty. These costs are then passed on by the nurseries to the California grape growers, who purchase the patented plant material from the nurseries, including Plaintiffs who purchased the Patented Varieties. (Complaint, P 40). The California grape growers who bear the ultimate costs of the royalty fees imposed by the Commission **[**15]** are the same California grape growers who bear the cost of the per box assessment charged by the Commission, which funds much of Dr. Ramming's breeding program. Thus, California table grape growers essentially pay for the development of patented varieties, then pay again to obtain the varieties. (Complaint, P 41).

The Commission's Research Committee and Board oversee and administer the patent and licensing program. Specifically, the Board sets the royalty rates on patented plants, determines penalties for infringement, and establishes enforcement policy. The Research Committee oversees Dr. Ramming's breeding program and makes recommendations regarding which new varieties should be patented and released. To date, the USDA has only patented new varieties that the Commission has recommended for patenting, and has only applied for patents once receiving a recommendation from the Commission to do so. (Complaint, P 42).

1. Prior Uses and Sales of Patented Varieties

Development of the Patented Varieties began in about 1993. Prior to 2003, Dr. Ramming had reproduced each of the Patented Varieties, Sweet Scarlet, Autumn King, and Scarlet Royal, produced fruit from each of the Patented Varieties, **[**16]** and had evaluated the potential commercialization of each Patented Variety. (Complaint, P 46).

Dr. Ramming did not keep the development of the Patented Varieties secret. To the contrary, Dr. Ramming discussed each of the Patented Varieties with the Commission over many years, including between 2001 and 2003. Dr. Ramming discussed the Patented Varieties during public meetings of the Commission's Research Committee. Additionally, prior to 2003, Dr. Ramming displayed fruit from the Patented Varieties at Commission meetings, which area growers and shippers attended. Attendees were allowed to take samples of fruit from the three varieties. (Complaint, P 47).

[*1154] By 2001, the Commission's Research Committee was actively evaluating the Sweet Scarlet, Autumn King, and Scarlet Royal varieties (among others) for USDA release. The Commission recommended that Sweet Scarlet should be released in 2002. The Commission also recommended that the USDA seek patent protection on Sweet Scarlet as the first variety for patenting under the Commission's new patent and licensing program. After receiving the Commission's recommendation, the USDA proceeded with the release of Sweet Scarlet and filed a patent application **[**17]** on the Sweet Scarlet variety in February 2003. (Complaint, P 48). Although the Commission recommended proceeding with the release of Sweet Scarlet, the Commission decided to delay any release and patenting of Autumn King and Scarlet Royal. Instead, the Commission recommended that Autumn King and Sweet Scarlet undergo further evaluation prior to release. Eventually, the Commission recommended release of Autumn King and Scarlet Royal approximately two years later, in 2004. At that time, the Commission further recommended that the USDA seek patent protection for Autumn King and Scarlet Royal. (Complaint, P 49).

Despite waiting for the Commission's recommendations on releasing new varieties to seek patent protection, Dr. Ramming could have filed patent applications much earlier. All three Patented Varieties had been reproduced and undergone several growing cycles well before the Commission recommended release in 2002 for Sweet Scarlet, and 2004 for Autumn King and Scarlet Royal. By 2001-2002 (if not before), all three varieties had been developed to a point at which they were ready for patenting. The Commission's recommendations regarding continued evaluation of the Autumn King and Sweet **[**18]** Scarlet varieties prior to release did not prevent the USDA from seeking patent protection on these varieties long before receiving a recommendation regarding releases. (Complaint, P 50).

Although the USDA delayed the decision to apply for patents on Autumn King and Scarlet Royal, it made little effort to prevent these varieties from entering the public domain. The USDA did not conceal the varieties. To the contrary, prior to seeking patent protection, the USDA displayed and discussed the varieties at public meetings. Moreover, the USDA kept its fully developed Autumn King and Scarlet Royal plants at unsecured facilities at California State University at Fresno ("Fresno State"), which could be accessed through the Fresno State grounds. The USDA never made efforts to secure plant materials sent to other facilities for testing. (Complaint, P 51). [1]

While delaying the decision to seek patent protection, and failing to implement security measures at its facilities, the USDA knew that public use had been made of new varieties more than one year before applying for a patent would bar later filing for patent protection. Indeed, the Commission and Dr. Ramming discussed the fact that public uses and sales of new varieties prior to seeking patent protection could jeopardize the Commission's patenting program.

---

[1] The USDA considered placing a fence around its facilities adjacent to the Fresno State campus, but declined to do so. Although the USDA purportedly told employees that they were not to take or distribute plant materials from new varieties, the USDA made no efforts to examine materials removed from the USDA facility to ensure that persons entering **[**19]** the facility did not remove plant material for these varieties. (Complaint, P 51).

(Complaint, P 52). All three Patented Varieties entered the public domain more than one year before the USDA sought patent protection **[*1155]** on each respective variety. (Complaint, P 53).

The Sweet Scarlet variety and its fruit was publicly used, distributed, offered for sale and sold by growers and shippers prior to February 20, 2002 - more than one year prior to the filing of the '512 Application on the Sweet Scarlet variety. Specifically, approximately nine growers received Sweet Scarlet from Dr. Ramming for trials in 1999 and 2000. At least three of these growers sold fruit produced into commercial markets before 2002. (Complaint, P 54). Additionally, **[**20]** at least 17 other growers, who were not part of trials, received and reproduced the Sweet Scarlet variety. On information and belief, these reproductions took place prior to 2002. Neither the USDA, nor Dr. Ramming oversaw or controlled the reproductions created by these 17 growers. (Complaint, P 55).

In early 2002, more than two years before filing the patent applications for Autumn King and Scarlet Royal, a grower in Delano, California (J&J Farms, owned by Jim and Jack Ludy) obtained "sticks" of several new varieties, including Autumn King and Scarlet Royal. Jim and Jack Ludy provided some of the plant material for the new varieties (including Autumn King and Scarlet Royal) to their cousin (Lawrence Ludy) who owned and operated an adjacent farm ("Ludy Farms"). With these sticks, the Ludys reproduced Autumn King and Scarlet Royal grapevines on their farms in 2002. Lawrence Ludy reproduced additional Autumn King on his farm in mid-2003. In total, J&J Farms and Ludy Farms reproduced more than five hundred Autumn King and Scarlet Royal plants before September 2003. (Complaint, P 57). J&J Farms and Ludy Farms received the Autumn King and Scarlet Royal plant material without any written **[**21]** or verbal agreement or restrictions on disclosure or use. Neither the USDA, nor Dr. Ramming oversaw or controlled the reproductions that occurred on the Ludy Farms. Although Ludy Farms was privately owned, it placed no special restrictions such as fences or gates limiting public access to its fields and the location of the Autumn King and Scarlet Royal plants. Nor did Ludy Farms place any confidentiality restrictions on employees who viewed the reproduced new varieties. Finally, prior to September 2003, both J&J Farms and Ludy Farms showed the reproduced varieties to members of the public, including neighboring farmers, without any confidentiality restrictions. (Complaint, P 57). The USDA and Dr. Ramming did not disclose to the USPTO the information regarding all the growers who possessed and reproduced Sweet Scarlet prior to February 20, 2002, which the Commission learned through its "amnesty" program. (Complaint, P 65).

On information and belief, both the USDA and the Commission knew, before the respective patents issued on the Patented Varieties, that (i) Sweet Scarlet had been in the public domain since before February 2002, and (ii) either knew or suspected that Autumn King and/or **[**22]** Scarlet Royal had been in the public domain since before September 2003. (Complaint, P 58). Because the known public use and sale of the Patented Varieties, more than one year before the patent application filing would prevent issuance of valid patents, the Commission (with the USDA's knowledge and approval), created a scheme to prevent challenges to patentability based on these prior uses and sales. (Complaint, P 59).

IV. REQUEST FOR JUDICIAL NOTICE

Defendant Commission requests judicial notice pursuant to *Federal Rule of Evidence Rule 201*, of Defendant Party-United States of America's memorandum of **[*1156]** points and authorities filed in the District Court case of *Nutrition 21 v. Thorne Research, Inc., 130 F.R.D. 671 (D.Wash. 1990)* and Appellee Party-United States of America's brief filed in Federal District appeal case of *Nutrition 21 v. United States, 930 F.2d 862 (Fed. Cir. 1991)*. (Doc. 27, Commission Request for Judicial Notice, filed January 21, 2007, Exhibit 1 and Exhibit 2). Plaintiffs provide no objection to this request. ***HN1***[] "A judicially noticed fact must be one not subject to reasonable dispute in that it is either (1) generally known within the territorial jurisdiction of the trial **[**23]** court or (2) capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned." *Fed. R. Evid. 201(b)*; *see Biggs v. Terhune, 334 F.3d 910, 916, n.3 (9th Cir. 2003)* (***HN2***[] "Materials from a proceeding in another tribunal are appropriate for judicial notice.")

Defendant's request for judicial notice is GRANTED as to the documents and their existence, but not as to any disputed contents of those papers.

V. LEGAL STANDARD

HN3[] Fed. R. Civ. P. 12(b)(6) provides that a motion to dismiss may be made if the plaintiff fails "to state a claim upon which relief can be granted." However, HN4[] motions to dismiss under Fed. R. Civ. P. 12(b)(6) are disfavored and rarely granted. Gilligan v. Jamco Development Corp., 108 F.3d 246, 249 (9th Cir. 1997). HN5[] In deciding whether to grant a motion to dismiss, the Court "accept[s] all factual allegations of the complaint as true and draw[s] all reasonable inferences" in the light most favorable to the nonmoving party. TwoRivers v. Lewis, 174 F.3d 987, 991 (9th Cir. 1999); *see also,* Rodriguez v. Panayiotou, 314 F.3d 979, 983 (9th Cir. 2002). A court is not "required to accept as true allegations that are merely conclusory, unwarranted **[**24]** deductions of fact, or unreasonable inferences." *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001)*.

HN6[] The question before the court is not whether the plaintiff will ultimately prevail; rather, it is whether the plaintiff could prove any set of facts in support of his claim that would entitle him to relief. *See* Hishon v. King & Spalding, 467 U.S. 69, 73, 104 S. Ct. 2229, 81 L. Ed. 2d 59 (1984). HN7[] "A complaint should not be dismissed unless it appears beyond doubt that plaintiff can prove no set of facts in support of his claim which would entitle him to relief." Van Buskirk v. CNN, Inc., 284 F.3d 977, 980 (9th Cir. 2002) (citations omitted).

VI. ANALYSIS

A. Joinder of Parties

Defendant argues that the United States is not a named defendant and is a necessary and indispensable party to certain claims under Federal Rule of Civil Procedure 19. Further, because the United States is not subject to suit under the doctrine of sovereign immunity, Plaintiffs cannot join the United States to this action, and this action must be dismissed under Rule 19(b).

Plaintiffs' first three causes of action seek a declaration of the invalidity of the three U.S.-owned patents under 35 U.S.C. § 102(b) ('891 Patent, '284 Patent and **[**25]** '229 Patent). Defendant seeks to dismiss these causes of action. Defendant's argument that the United States is a necessary and indispensable party is based on the fact that the patents sought to be invalidated are owned by the U.S., a sovereign entity, and Plaintiffs have failed to identify a waiver of sovereign immunity. Plaintiffs allege in the Complaint that the USDA and Dr. Ramming, of the USDA, knowingly did not disclose to the USPTO that the Patented Varieties had been in the public **[*1157]** domain more than one year before the patent application filing dates in violation of the Patent Act. And they allegedly knew that this information would prevent issuance of valid patents. (Doc. 1, Complaint, PP 53, 58-9). Plaintiffs' Complaint is brought against the Commission only. Section 120 of the Patent Act states:

> HN8[] A person shall be entitled to a patent *unless*- (b) *the invention was* patented or described in a printed publication in this or a foreign country or *in public use* or on sale in this country, *more than one year prior to the date of the application* for patent in the United States…

35 U.S.C. § 120(b) (emphasis added).

Defendant also seeks to dismiss Plaintiffs' fourth and sixth claims on **[**26]** the same basis as the first three claims, the U.S. is a necessary and indispensable party and is a sovereign entity immune from this suit. Plaintiffs' fourth claim seeks a declaration that the U.S.-owned patents are unenforceable, in part, due to alleged "inequitable conduct" by the USDA. This directly implicates the interests of the United States, the patent owner, as it would render the patents useless if they are found unenforceable. Claim six is a patent misuse claim, in which Plaintiffs seek a declaration that the patent is also unenforceable due to the Commission's misuse of the patents. Defendant argues this makes the United States a necessary and indispensable party to claims one through four and six.

HN9[] "[W]here sovereign immunity is asserted, and the sovereign's claims are not frivolous, dismissal must be ordered where there is a potential for injury to the absent sovereign's interests." Republic of Philippines v. Pimentel, 553 U.S. 851, 128 S.Ct. 2180, 2182-83, 171 L. Ed. 2d 131 (2008). Rule 19 governs the circumstances under which persons must be joined as parties to a lawsuit. Rule 19 provides in relevant part:

> (a) Persons Required to Be Joined if Feasible.

(1) Required Party. ***HN10***[] A person who is subject to service **[**27]** of process and whose joinder will not deprive the court of subject-matter jurisdiction must be joined as a party if:
(A) in that person's absence, the court cannot accord complete relief among existing parties; or
(B) that person claims an interest relating to the subject of the action and is so situated that disposing of the action in the person's absence may:
(i) as a practical matter impair or impede the person's ability to protect the interest; or
(ii) leave an existing party subject to a substantial risk of incurring double, multiple, or otherwise inconsistent obligations because of the interest . . . .

(b) When Joinder Is Not Feasible. If a person who is required to be joined if feasible cannot be joined, the court must determine whether, in equity and good conscience, the action should proceed among the existing parties or should be dismissed. The factors for the court to consider include:

(1) the extent to which a judgment rendered in the person's absence might prejudice that person or the existing parties;
(2) The extent to which any prejudice could be lessened or avoided by:
(A) protective provisions in the judgment;
(B) shaping the relief; or
(C) other measures;

(3) whether a judgment **[**28]** rendered in the person's absence would be adequate; and

[*1158] (4) whether the plaintiff would have an adequate remedy if the action were dismissed for non-joinder.

Fed. R. Civ. P. 19.

HN11[] The "[a]pplication of *Rule 19* involves three successive inquiries." *Wilbur v. Locke, 423 F.3d 1101, 1111 (9th Cir. 2005)*. "First, the court must determine whether a nonparty should be joined under *Rule 19(a)*." The term "necessary" is used to describe those persons to be joined if feasible. *Id. at 1112*. "The inquiry is a practical one and fact specific, and is designed to avoid the harsh results of rigid application." *Shermoen v. United States, 982 F.2d 1312, 1317 (9th Cir. 1992)*.

Second, "[i]f an absentee is a necessary party under *Rule 19(a)*," the court is to determine "whether it is feasible to order that the absentee be joined." *Wilbur, 423 F.3d at 1112*. "Finally, [and thirdly,] if joinder is not feasible, the court must determine at the third stage whether the case can proceed without the absentee, or whether the absentee is an 'indispensable party' such that the action must be dismissed." *Id.; Shermoen, 982 F.2d at 1317* (a court must determine whether the absent party is "indispensable" so that in 'equity **[**29]** and good conscience" the suit should be dismissed). In the final analysis, "[r]ule 19 uses the word 'indispensable' only in a conclusory sense, that is, a person is 'regarded as indispensable' when he cannot be made a party and, upon consideration of the factors [in *Rule 19(b)*], it is determined that in his absence it would be preferable to dismiss the action, rather than to retain it." *Wilbur, 423 F.3d at 1112*. [2]

1. United States is a Necessary Party Under *Rule 19(a)*.

The United States has an "interest relating to the subject of the action" - which is the validity and enforceability of the three patents it owns and the royalties under those patents that it receives. *Fed. R. Civ. P. 19(a)(1)(B)(I)*. Disposition of the claims without the participation of the **[**30]** United States will "as a practical matter impair or impede" the United States' "ability to protect [its] interests." *Id.*

---

[2] ***HN12***[] The terms "necessary" and "indispensable" are terms of art in Rule 19 jurisprudence: "Necessary" refers to a party who should be "[j]oined if [f]easible." *Disabled Rights Action Comm. v. Las Vegas Events, Inc., 375 F.3d 861, 867 n.5 (9th Cir. 2004)*. "'Indispensable' refers to a party whose participation is so important to the resolution of the case that, if the joinder of the party is not feasible, the suit must be dismissed." *Id.*

a. Joinder Voluntarily or Involuntarily of Patent Owner.

The U.S. has retained substantive rights in a patent that is the subject of the exclusive license and therefore is an indispensable party. *Waterman v. Mackenzie, 138 U.S. 252, 255, 11 S. Ct. 334, 34 L. Ed. 923, 1891 Dec. Comm'r Pat. 320 (1890)*. The Ninth Circuit case *Massa v. Jiffy Products Co., 240 F.2d 702 (9th Cir. 1957)*, holds that ***HN13***[] the patent owner is an indispensable party in a case challenging the validity of the patent. "When ownership of the patent and the trademark in *Massa* appeared from his deposition, an involuntary joinder of *Massa* as a party defendant under *Rule 19, Fed. R. Civ. P.* became proper. Massa, appearing as the registered owner of the patent and trade mark, became an indispensable party in the declaratory judgment action, *in order that the alleged infringer might have tried in the one action, as to all parties, the invalidity of the patent and the alleged improper recordation of the trade mark." Id. at 705* (emphasis added). The one exception to this rule, is when a licensee is transferred all "substantial rights" in the patent from the patent owner. **[**31]** This exception **[*1159]** is not here applicable to the License Agreements between the Commission and the United States.

In the Federal Circuit case describing the "rule of reciprocity," *Enzo APA & Son, Inc. v. Geapag A.G., 134 F.3d 1090 (Fed.Cir. 1998)*, the court held that where the non-exclusive licensee did not hold an exclusive license with all "substantial rights," *i.e.,* the right to bring an enforcement action without joining the patent owner, there can no declaratory judgment brought against the licensee, without joining the patent owner. "We have accorded standing, in certain limited circumstances, where all substantial rights under the patent have been transferred in the form of an exclusive license, rendering the licensee the virtual assignee." *Id. at 1093-94*, *citing* *Vaupel Textilmaschinen KG v. Meccanica Euro Italia S.P.A., 944 F.2d 870 (Fed.Cir. 1991)*.

HN14[] The general rule in patent infringement suits, which applies in declaratory relief actions seeking invalidity of a patent, is that the patent owner is to be joined when fewer than all substantial rights have been transferred in an exclusive license to the licensee. *Intellectual Property Development, Inc. v. TCI Cablevision of Cal., 248 F.3d 1333 (Fed.Cir. 2001)*. **[**32]** "As a general rule, in accordance with *Independent Wireless,* this court adheres to the principle that a patent owner should be joined, either voluntarily or involuntarily, in any patent infringement suit brought by an exclusive licensee having fewer than all substantial patent rights." *Id. at 1347*; [3] *see also* *Independent Wireless Tel. Co. v. Radio Corp. of Am., 269 U.S. 459, 468, 46 S. Ct. 166, 70 L. Ed. 357, 1926 Dec. Comm'r Pat. 294 (1926)* (patent owner is an indispensable party in infringement suit brought by a licensee); *see also* *Tol-O-Matic, Inc. v. Proma Produkt-Und Marketing Gesellschaft, m.b.H., 690 F.Supp. 798 (D.Minn. 1987)*.

There are two reasons in infringement actions for requiring joinder of the patent owner when fewer than all "substantial rights" have been transferred, in a suit for declaratory relief to invalidate a patent. First, there is the possibility that the alleged infringer would be subject to multiple **[**33]** actions. *Schwarz Pharma, Inc. v. Paddock Laboratories, Inc., 504 F.3d 1371, 1374 (Fed. Cir. 2007)*. Second, to ensure that the rights of the patent owner are protected in a suit brought by the licensee. *Id.* Although Plaintiffs' action is not an infringement action, the second reason applies where patent invalidation is sought. The United States and the USDA both have an interest in whether the Patents in suit are invalidated. If the patent is declared invalid, the United States loses the ownership and value of its patents and any royalty derived from the patents. [4] Second, the patent owner is at risk that a licensee did not diligently defend the patent in pending litigation. The patent owner may have a different perspective because the licensee's interests are limited.

---

[3] "As a prudential principle, an exclusive licensee having fewer than all substantial patent rights possesses standing under the Patent Act as long as it sues in the name of, and jointly with, the patent owner and meets the Lujan requirements. *Id.; citing* *Prima Tek II L.L.C. v. A-Roo Co., 222 F.3d 1372 (Fed.Cir. 2000)*.

[4] Patents have long been considered a species of property. *See* *Brown v. Duchesne, 60 U.S. 183, 197, 15 L. Ed. 595 (1856)* ("For, by the laws of the United States, the rights of a party under a patent are his private property"); *cf.,* *Consolidated Fruit-Jar Co. v. Wright, 94 U.S. 92, 96, 24 L.Ed. 68 (1876)*; *Florida Prepaid Postsecondary Educ. Expense Bd. v. College Savings Bank, 527 U.S. 627, 642, 119 S. Ct. 2199, 144 L. Ed. 2d 575 (1999)*.

Here, the USDA did not transfer all **[**34]** "substantial rights" as required under case law, specifically the right of assignment **[*1160]** and the ability to bring enforcement actions. The Commission ostensibly is unauthorized to defend the declaratory suit seeking to invalidate the U.S.-owned patents, without the joinder of the United States. "[A] patent should not be placed at risk of invalidation by the licensee without the participation of the patentee," *Schwarz Pharma, Inc., 504 F.3d at 1374*, especially here where fewer than all "substantial rights" have been transferred from patent owner to licensee. In *Intellectual Property Development Inc. v. TCI Cablevision of California, 248 F.3d 1333, 1347 (Fed. Cir. 2001)*, the court gave dispositive weight to the licensee's ability to only bring enforcement actions in limited circumstances, and only with consent of the patent owner. The Court also noted the licensee had no assignment rights. As a result, no "substantial rights" existed with the exclusive licensee. "In light of CPL's [patent holder] right to permit infringement in certain cases, the requirement that CPL [patent holder] consent to certain actions and be consulted in others, and the limits in IPD's right to assign its interests **[**35]** in the '202 patent, we find that the CPL IPD agreement at issue transfers fewer than all substantial rights in the '202 patent from CPL [patent holder] to IPD." *Id. at 1345*; *see also* *Vaupel Textilmaschinen KG v. Meccanica Euro Italia, 944 F.2d 870, 875 (Fed.Cir. 1991)* (The court noted the importance of having the right to sue for infringement in determining whether joinder of patent owner is required.)

In *Abbott Laboratories v. Diamedix Corp., 47 F.3d 1128 (Fed. Cir. 1995)*, the exclusive licensee did not have "substantial rights" because it lacked full enforcement rights, and possessed no assignment rights: 1) the exclusive licensee, while possessing the right of first refusal to sue alleged infringers of the patent, could not "indulge" or permit an infringement, which the court noted normally accompanies a complete conveyance of the right to sue; 2) the exclusive licensee was prevented from assigning its rights under the license to any other party other than a successor in business; and 3) the patent owner retained the right to participate in a suit brought by the exclusive licensee.

Here, the License Agreements specify that the Commission, as licensee, cannot file an infringement suit **[**36]** without first obtaining authorization from USDA, the patent holder:

> In the event of [] infringement, the parties hereto shall confer and shall use best efforts to reach mutual agreement upon the best course of action.

See Ex. 1 (Sweet Scarlet License Agreement) § 8.1; Ex. 2 (Autumn King License Agreement) § 8.1; & Ex. 3 (Scarlet Royal License Agreement) § 8.1.5.

The License Agreements further provide:

> USDA may grant the right of enforcement to THE COMMISSION, pursuant to Title 35, *Section 207(a)(2)* and Title 35, Chapter 29, of the U.S. Code.

Id. at § 8.2 (emphasis added).

> The granting of the right of enforcement to THE COMMISSION shall be given thorough consideration on a *case by case basis.*

Id. (emphasis added).

The agreements reserve the right in the United States, to forego enforcement against infringers: The United States may "elect[] not to enforce the Licensed Patents or other intellectual property rights for the Licensed Variety against infringers." *Id.* There is no indication here that the Commission sought or received authorization from the USDA to defend this declaratory judgment suit against the USDA's patents. Last, the license agreements do not provide for assignment rights in **[**37]** the Commission:

> **[*1161]** This Agreement shall not be transferred or assigned by THE COMMISSION to any party other than to a successor or assignee of the entire business interest of THE COMMISSION relating to the Licensed Variety, but in no event shall THE COMMISSION assign or transfer this Agreement to a party not a citizen, resident, or entity of the United States of America. THE COMMISSION shall notify USDA in writing prior to any transfer or assignment.

(EL § 12.1).

While Section *35 U.S.C. § 207(a)(2)* provides federal agencies, such as the USDA, the ability to grant exclusive licenses, the USDA did not do so here:

> (a) ***HN15***[] Each Federal agency is authorized to-
>
> > (2) grant nonexclusive, exclusive, or partially exclusive licenses under federally owned inventions, royalty-free or for royalties or other consideration, and on such terms and conditions, *including the grant to the licensee of the right of enforcement* pursuant to the provisions of chapter 29 of this title as determined appropriate in the public interest.

35 U.S.C. § 207(a)(2) (emphasis added). And ***HN16***[] in conjunction with *35 U.S.C. § 207(a)(2)*, Federal Regulations provide, pursuant to *37 C.F.R. § 404.5*, licenses may contain provisions permitting **[**38]** the right to enforce the patent by the licensee, without joining the United States:

> (b) Licenses shall contain such terms and conditions as the Federal agency determines are appropriate for the protection of the interests of the Federal Government and the public and are not in conflict with law or this part. The following terms and conditions apply to any license:
>
> > (2) Any patent license may grant the licensee the right of enforcement of the licensed patent without joining the Federal agency as a party as determined appropriate in the public interest.

37 C.F.R. § 404.5(b)(2).

Plaintiffs cite to various portions of the License Agreements to demonstrate the rights transferred to the Commission are "substantial rights" to the Patented Varieties. [5] But none of these rights include the "right of enforcement" or the "right of assignment," two determinative rights defining "substantial rights" under present case law: [6]

> . The Commission has an "exclusive license" to "make, use, offer for sale, propagate, maintain, sell and otherwise exploit" the patented varieties. (EL §2.1)
>
> . The Commission has the exclusive right to sublicense the patented varieties. (EL §2.2)
>
> . The exclusive license has no expiration **[**39]** date. (EL §7.1)
>
> **[*1162]** . The Commission is entitled to "use all commercially reasonable efforts to protect USDA's property rights in the Licensed Variety" and the USDA is required to confer with and reach mutual agreement with the Commission regarding infringement of the patents. (EL §8.1) [7]

Under the sublicense agreements, Plaintiffs cite the following: [8]

> . right to terminate the sub-license. (DGL §8.2)
>
> . Right to force grower to destroy all wood of the Patented Variety. (DGL §8.4)

---

[5] Plaintiffs cite *Speedplay, Inc. v. Bebop, Inc., 211 F.3d 1245 (Fed.Cir. 2000)*, which states "the proper focus is on the 'substance of what was granted.'" *Id. at 1250*. In *Speedplay,* the licensor retained the right to bring infringement actions. Specifically, if the licensee did not halt an infringement on the patent, it had the right to bring an infringement action. This right was found "illusory" by the court because the licensee could grant a royalty-free sublicense to an alleged infringer under the license agreement, thereby making the licensor's right to sue nugatory. Here, the USDA does not have such an "illusory" right.

[6] "EL" refers to the exclusive licenses for the Patented Varieties, attached as Exhibits 1-3 to the Commission's Motion to Dismiss. "DGL" refers to the Domestic Grower License Agreements for the Patented Varieties, attached as Exhibits 1-3 to Plaintiffs' Opposition.

[7] Plaintiffs' also **[**40]** cite sections: EL §1.1; EL §1.2; EL §1.3; EL §2.2.

[8] Plaintiffs also cite sections DGL §5.1 and DGL §8.4.

Plaintiffs cite *Dow Chemical Co. v. Exxon Corp., 139 F.3d 1470 (Fed.Cir. 1998)*. But the *Dow Chemical* court, in affirming the district court's decision that joinder of the patent owner was not required, noted first that the patent owner was a wholly-owned subsidiary of the licensee defendant, and was thus not required because its interests were adequately protected, and second, because the licensee had been granted the right to sue for infringement and defend the patent owner in litigation:

> [J]oinder was not required because, "as a practical matter, "Exxon [Corp.] has both the duty and the capability of protecting ECPI's interests." [citation] Although ECPI remains the owner of the '783 patent, it has granted certain significant rights in the patent to Exxon Chemical Company ("ECC"), an unincorporated division of Exxon Corp. These rights include the right to sue for infringement of the patent, **[**41]** the right to defend ECPI in litigation concerning the patent, and the right to sublicense the patent without notifying ECPI.

Id. at 1479 (citation omitted). The facts differ here.

Plaintiffs also cite Eastern District of Pennsylvania, *Pennsalt Chemicals Corp. v. Dravo Corp., 240 F. Supp. 837 (E.D. Pa. 1965)*. The Court held in a declaratory suit seeking to invalidate a patent, that the patent owner was not an indispensable party even though the licensee did not have specific right to sue infringers. The court permitted the suit to proceed against a licensee who had no enforcement rights. [9] The Court noted that intervention was an option if further protection was sought by the patent owner. Despite this holding, the overall weight of the cases heavily favors evaluating license agreements on whether substantial rights are granted to the licensee. Here, the USDA did not provide the Commission, as the licensee, with the right of enforcement, nor the right of assignment, "substantial rights" in licensing the Patented Varieties.

Plaintiffs argue that Defendant overlooks case law where courts have applied a different standard in determining necessary and indispensable defendants in actions for declaratory judgment seeking invalidity. They argue that courts have allowed declaratory judgment actions for invalidity to proceed against exclusive licensees without joining the patent owner. Plaintiffs cite *A.L. Smith Iron Co. v. Dickson, 141 F.2d 3, 6-7 (2d Cir. 1944)* and *Capri Jewelry Inc. v. Hattie Carnegie Jewelry Enterprises, Ltd., 539 F.2d 846, 847 (2d Cir. 1976)* (Friendly, J.).

Capri Jewelry, however, is not applicable, as it was a case of shared counsel, and the facts here are not similar. Counsel in **[*1163]** *Capri Jewelry* represented both the patent owner and the licensee and a 19(b) dismissal was reversed because the patent owner's interest was determined to be adequately protected. "Counsel representing [the licensee], Hattie Carnegie in this suit are *acting both for it [licensee] and for [the patent owner,] James* in the infringement suit [brought against another jewelry distributor]." *Id. at 853* (emphasis added); *see also* *Parkson Corp. v. Andritz Sprout-Bauer, Inc., 866 F.Supp. 773, 775 (S.D.N.Y. 1994)* **[**43]** (highlighting *shared counsel* as critical fact in *Capri Jewelry*). The United States is not represented by the Commission's counsel.

A.L. Smith Iron Co. v. Dickson, 141 F.2d 3, 6-7 (2d Cir. 1944) ("Dickson"), Plaintiffs' second cite, a Second Circuit decision, does not comport with the more general and recent case law in this area. *Dickson* first noted the patent owner has an interest in deciding the forum and was a factor to be weighed:

> [I]ts only interest in the dismissal of the complaint is the interest of every patent owner in the choice of the forum in which, and the time at which, he will assert his rights. That too is an interest proper to be weighed against the plaintiff's interest in settling its present controversy with [licensee] Dickson… Indeed, the owner may have granted a number of licenses, and it would be exceedingly oppressive to subject him to the will of all his licensees.

Id. at 6. But due to the unique facts of the case, the court held that the patent owner did not need to be joined to proceed with the case:

[9] "The fact that the agreement does not specifically authorize defendant to sue alleged infringers does not preclude a finding that defendant is the substantial owner **[**42]** of the patent for purposes of this declaratory judgment action." *Id. at 839*.

> The Court however, found that the patent owner had "plainly" used the licensee to enforce its right, and though it may not have surrendered its choice of forum, it **[**44]** had permitted the licensee to license, thus the court found it clearly had dwindled its right to choose a forum.

Id. (emphasis added).

Case law after *Dickson,* recognizes that it is an outlier case with its unique set of facts: "Recent case law has tended to articulate the implicit denominator in the *Dickson* case. The emphasis today is upon the ability to bring suit to protect the patent against infringement; and, as a manifestation of that power, to be free to select the forum in which the question of infringement should be tried. Instead of predicating the right to sue upon the semantic categorization of litigants as 'licensees' or 'assignees,' the more recent cases have tended to place reliance upon the right to bring suit in affirmance of the patent. Then, assuming that right exists in the licensee, the licensee may be sued to test the validity of the licensed patent without the licensor-patentees being joined as a party defendant." *Caldwell Mfg. Co. v. Unique Balance Co., 18 F.R.D. 258, 263-264 (S.D.N.Y. 1955)*; *see also* *Alamo Refining Co. v. Shell Development Co., 99 F.Supp. 790, 800 (D.Del. 1951)*; *Messerschmitt-Boelkow-Blohm v. Hughes Aircraft Co., 483 F.Supp. 49, 52 (S.D.N.Y. 1979)*; **[**45]** *Alamo Refining Co. v. Shell Dev. Co., 99 F.Supp. 790, 800 (D. Del. 1951)*. "The rationale of the general rule is that, whether the exclusive license is considered an assignment of all the patentee's rights or not, the owner suffers no prejudice from a judgment of invalidity in his absence if by agreement he has entrusted the licensee with the right to protect his interests by suing for infringement." *Messerschmitt-Boelkow-Blohm, 483 F.Supp. at 52*. "A patent owner has a property right which ought not to be adjudicated in his absence. This is a salutary principle which the courts have long recognized." *Technical Tape Corp. v. Minnesota Min. & Mfg. Co., 135 F.Supp. 505, 508 (S.D.N.Y. 1955)*.

[*1164] Because the United States, as patent owner, owns and controls enforcement of the patents and assignability rights of the patents, and insufficient enforcement rights, without consent, were transferred to the Commission, the United States is a necessary party to this action under *Rule 19*.

2. Sovereign Immunity: Joinder Not Possible.

HN17[] When it has been determined that an absent party to the suit is "necessary" under *Rule 19(a)*, the inquiry is whether that party, the United States, can be joined in the action. **[**46]** *Dawavendewa v. Salt River Project Agr. Imp. and Power Dist., 276 F.3d 1150, 1159 (9th Cir. 2002)* ("Having determined that the Nation is thrice over a necessary party to the instant litigation, we next consider whether it can feasibly be joined as a party.") Here, unless it is clearly shown that the United States has waived its sovereign immunity, it cannot be joined.

HN18[] "Absent a waiver, sovereign immunity shields the Federal government and its agencies from suit." *F.D.I.C. v. Meyer, 510 U.S. 471, 475, 114 S. Ct. 996, 127 L. Ed. 2d 308 (1994)*. "It is axiomatic that ***HN19***[] the United States may not be sued without its consent and that the existence of consent is a prerequisite for jurisdiction." *United States v. Mitchell, 463 U.S. 206, 212, 103 S. Ct. 2961, 77 L. Ed. 2d 580 (1983)*. "It long has been established, of course, that ***HN20***[] the United States, as sovereign, 'is immune from suit save as it consents to be sued . . . and the terms of its consent to be sued in any court define that court's jurisdiction to entertain the suit.'" *United States v. Testan, 424 U.S. 392, 399, 96 S. Ct. 948, 47 L. Ed. 2d 114 (1976)* (internal quotation marks omitted, omission in original). ***HN21***[] Absent a waiver, sovereign immunity bars any proceeding against property in which the United States has an interest. *See* *United States v. Alabama, 313 U.S. 274, 282, 61 S. Ct. 1011, 85 L. Ed. 1327 (1941)*. **[**47]** ***HN22***[] If the United States is immune from suit and no waiver is available, the United States cannot be joined under *Rule 19(a)*, and is an indispensable party under *Rule 19(b)*. *See e.g.,* *Dawavendewa, 276 F.3d at 1161* (because tribe enjoys tribal sovereign immunity, it cannot be joined).

HN23[] A waiver of sovereign immunity must be unequivocally expressed. *Department of Army v. Blue Fox, Inc., 525 U.S. 255, 256, 119 S. Ct. 687, 142 L. Ed. 2d 718 (1999)*. The Government's consent to be sued must be construed strictly, in favor of the sovereign. *Id.* ***HN24***[] Whether sovereign immunity has been waived depends on the language of a federal statute. *Good Samaritan Hosp. v. Shalala, 508 U.S. 402, 409, 113 S. Ct. 2151, 124 L. Ed. 2d 368 (1993)* ("The starting point in interpreting a statute is its language, for '[i]f the intent of Congress is clear, that is the end of the matter.'"); *United States v. Turkette, 452 U.S. 576, 580, 101 S. Ct. 2524, 69 L. Ed. 2d 246 (1981)*

("In determining the scope of a statute, we look first to its language.") This suit is against a United States' agency, USDA. ***HN25***[] Any suit against a federal agency is a suit against the United States for the purposes of sovereign immunity. *United States v. Mitchell, 463 U.S. 206, 212, 103 S. Ct. 2961, 77 L. Ed. 2d 580 (1983)*.

HN26[] A declaratory judgment seeking invalidity of a U.S.-owned patent squarely **[**48]** implicates sovereign immunity. Further, ***HN27***[] property owners are generally necessary parties to actions that could affect their property interests adversely. [10] The United **[*1165]** States, as owner of the Patented Varieties, is no exception. In *Tegic Communications Corp. v. Board of Regents of the University of Texas System, 458 F.3d 1335 (Fed. Cir. 2006)*, *Eleventh Amendment* immunity barred a suit against a state University. Plaintiffs sought a declaratory judgment to invalidate the University-owned patent. As a result, the patent owner, the University, was dismissed. *Id. at 1345*; *see also* *Xechem Intern., Inc. v. University of Tex. M.D. Anderson Cancer Center, 382 F.3d 1324 (Fed. Cir. 2004)* (parties and court accepted that absent waiver or abrogation, state sovereign immunity precluded litigation against the state university in a suit seeking to correct inventorship of patents owned by the university).

Plaintiffs argue that Defendant's *Eleventh Amendment* state sovereignty cases are not applicable here, because they concern state immunity. However, the state immunity cases demonstrate **[**49]** the importance of adhering to an entity's sovereign immunity, and absent a waiver of sovereign immunity, suits to invalidate a patent, owned by a sovereign, federal or state, are barred. If there is uncertainty, case law concludes that sovereign immunity applies. If ambiguity about waiver of sovereign immunity remains, that ambiguity must be interpreted to preserve sovereign immunity of the United States. "[A] waiver of the Government's sovereign immunity will be strictly construed, in terms of its scope, in favor of the sovereign." *Lane v. Pena, 518 U.S. 187, 192, 116 S. Ct. 2092, 135 L. Ed. 2d 486 (1996)*.

HN28[] Under the only patent-related waiver of sovereign immunity, *28 U.S.C. § 1498* permits private parties to bring patent infringement suits in United States Federal Claims Court to seek money damages only. *28 U.S.C. § 1498*. "In waiving its own immunity from patent infringement actions in *28 U.S.C. § 1498(a) (1994)* ed. and Supp. III)," the United States did not consent to treble damages nor injunctive relief, and permitted reasonable attorney's fees in a narrow class of specified instances. *Florida Prepaid Postsecondary Educ. Expense Bd. v. College Sav. Bank, 527 U.S. 627, 648, n.11, 119 S. Ct. 2199, 144 L. Ed. 2d 575 (1999)*. ***HN29***[] This suit must be brought in **[**50]** Federal Claims Court against the United States and by its plain terms *28 U.S.C. § 1498* does not cover declaratory judgments seeking to invalidate a patent. Further, ***HN30***[] the federal statute covering declaratory relief actions, the Declaratory Judgment Act, *28 U.S.C. §2201*, standing alone, does not waive sovereign immunity. *Wyoming v. United States, 279 F.3d 1214, 1225 (10th Cir. 2002)* (the declaratory judgment statute, *28 U.S.C. §2201*, itself does not confer jurisdiction on a federal court where none otherwise exists). "It is well settled, however, that said Act [Declaratory Act] does not of itself create jurisdiction; it merely adds an additional remedy where the district court already has jurisdiction to entertain the suit." *Wells v. United States, 280 F.2d 275, 277 (9th Cir. 1960)*.

There are limited waivers of sovereign immunity enacted by Congress for suits involving property interests of the United States, but such statutes do not address a waiver for patent-property interests of the U.S. [11] Generally property owners are necessary parties to actions that could adversely **[*1166]** affect their property interests and the

---

[10] *McShan v. Sherrill, 283 F.2d 462, 463 (9th Cir. 1960)*; *Stewart v. United States, 242 F.3d 49, 51 (5th Cir. 1957)*.

[11] For example, actions brought under the Quiet Title Act, *28 U.S.C. § 2409a*, waiving immunity for actions brought against the United States involving "real property" in which the United States claims an interest, and *Section 2410, Title 28*, waiving immunity for certain actions involving "real or personal property on which the United States has or claims a mortgage or other lien." *28 U.S.C. § 2410*. The Tucker Act, *28 U.S.C. § 1491*, permits monetary suits brought against the United States based on an alleged violation of a constitutional provision, statute, or regulation, if brought in the Federal Claims Court. *28 U.S.C. § 1498(a)*. It authorizes suits against the United States for patent infringement by the United States, but limits the patent owner's recovery to monetary damages in the Federal Claims Court. *35 U.S.C. § 282* provides affirmative defenses that can be asserted by the federal government in suits brought under *28 U.S.C. § 1498*.

United States is no exception, as a patent owner. [12] The United States cannot **[**51]** be joined absent a clear waiver of sovereign immunity. Plaintiffs have not shown such a waiver exists. The United States cannot be joined.

Plaintiffs argue *§ 702* of the Administrative Procedure Act ("APA"), Title 5 United States Code, eliminates in almost every circumstance, the defense of sovereign immunity to actions seeking non-monetary relief against unlawful action by government agencies and officials. *Section 702* of the APA states:

> A person *suffering legal wrong because of agency action,* or adversely affected or aggrieved by agency action within the meaning of a relevant statute, is entitled to judicial review thereof. An action is a court of the United States *seeking relief other than money damages* and stating a claim that an agency or an officer or employee *thereof acted or failed to act in an official capacity or under color of legal authority* shall not be dismissed nor relief therein be denied on the ground that it is against the United States or that the United States is an indispensable party. The United States may be named as a defendant in any such action, and a judgment or decree may be entered against the United States: Provided, that any **[**53]** mandatory or injunctive decree shall specify the Federal officer or officers (by name or by title), and their successors in office, personally responsible for compliance.

5 U.S.C. § 702 (emphasis added).

The one limitation to this waiver of sovereign immunity for non-monetary actions against the United States is if "any other statute that grants consent to suit expressly or *impliedly* forbids the relief which is sought." *5 U.S.C. § 702(2)* (emphasis added). Defendant refers to the text of *§ 702* to argue that it forecloses Plaintiffs' argument concerning the APA as a waiver of sovereign immunity because Plaintiffs are not seeking a review of agency "action" or "inaction," as the suit is brought against the Commission only, the state agency and seeks, based on the actions of the Commission, a declaration of invalidity of the U.S.-owned patents.

In addition, Defendant for the first time in its Reply, discusses the split in the Ninth Circuit on whether final agency action is required to seek review under *§ 702* of the APA. Plaintiffs were not afforded an opportunity to respond. However, in the later case, *Gallo Cattle Co. v. U.S. Dept. of Agriculture, 159 F.3d 1194 (9th Cir. 1998)*, the Court **[**54]** held that review of agency action under the APA, only is available if it constitutes "final agency action" for which there is no other adequate remedy in a court or agency action that is made reviewable by statute. *5 U.S.C. § 704*. However, in an earlier Ninth Circuit Court decision, *The Presbyterian Church (U.S.A.) v. U.S., 870 F.2d 518 (9th Cir. 1989)*, which involved an injunctive suit brought against the Immigration and Naturalization Service ("INS"), for violation of *First* and *Fourteenth Amendment* rights, the court did not limit *§ 702*'s sovereign immunity waiver to "agency action" as is technically defined in *§ 551(13)* of the APA: "'agency action' includes the whole or a part of an agency rule, order, license, sanction, relief, or the equivalent or denial **[*1167]** thereof, or failure to act." *5 U.S.C. § 551(13)*.

> Nothing in the language of the amendment suggests that the waiver of sovereign immunity is limited to claims challenging conduct falling in the narrow definition of "agency action"…Moreover, nothing in the legislative history of the 1978 amendment of *§ 702* suggests that Congress intended to limit the waiver of sovereign immunity to the specific forms of "agency action" enumerated **[**55]** in *§ 551(13)*. On the contrary, Congress stated that "the time [has] now come to eliminate the sovereign immunity defense in all equitable actions for specific relief against a Federal agency or officer acting in an official capacity." H.Rep. No. 1656, 94th Cong., 2d Sess. 9, reprinted in 1976 U.S.Code Cong. & Admin.News 6121, 6129 (emphasis supplied). Congress singled out types of government conduct similar to the alleged INS conduct in this case-"tax investigations" and "control of subversive activities"-as appropriate for judicial review under the amended version of *§ 702*….This

[12] *See* *McShan v. Sherrill, 283 F.2d 462, 463 (9th Cir. 1960)* (Any order that would affect title to property requires **[**52]** all parties interested in the title and that will be directly affected by the judgment, be before the court); *Stewart v. United States, 242 F.3d 49, 51 (5th Cir. 1957)*.

> waiver was clearly intended to cover the full spectrum of agency conduct, regardless of whether it fell within the technical definition of "agency action" contained in § 551(13).

870 F.2d at 525. A later Ninth Circuit decision, Gros Ventre Tribe v. United States, 469 F.3d 801, 808-809 (9th Cir. 2006) recognized the split, but provided no further guidance. "The parties go to great pains to argue the issue whether the APA's waiver of sovereign immunity under 5 U.S.C. § 702 for non-monetary actions against the government is conditioned upon the parties challenging a 'final agency action' as set forth in 5 U.S.C. § 704. **[**56]** We now recognize that there is a conflict in our caselaw regarding this issue; however, we need not resolve it as we affirm the district court on its alternative." Id. at 808. While the *Gros Ventre Tribe* court did not provide any further guidance, it discussed the issue of § 702's waiver of sovereign immunity, at length:

> Under *The Presbyterian Church,* § 702's waiver is not conditioned on the APA's "agency action" requirement. Therefore, it follows that § 702's waiver cannot then be conditioned on the APA's "final agency action" requirement. *See* Reno v. Am-Arab Anti-Discrimination Comm., 525 U.S. 471, 510 n.4, 119 S.Ct. 936, 142 L.Ed.2d 940 (1999) (Souter, J., dissenting) ("[The waiver of sovereign immunity found in 5 U.S.C. § 702] is not restricted by the requirement of final agency action that applies to suits under the [APA]." (citing The Presbyterian Church, 870 F.2d at 523-26)). But that is directly contrary to the holding in *Gallo Cattle* where we stated that "the APA's waiver of sovereign immunity contains several limitations," including § 704's final agency action requirement… Nevertheless, we need not make a sua sponte en banc call to resolve this conflict…

469 F.3d at 809. Plaintiffs **[**57]** have cited no case where the APA § 702 was invoked as an asserted waiver of sovereign immunity for purposes of bringing a patent invalidity case against the United States. However, if Plaintiff can amend the Complaint to adequately state a § 702 APA claim against the United States, it may.

3. United States is an Indispensable Party and the Disputed Claims Must be Dismissed.

HN31[] If a necessary party cannot be joined, a court must consider whether the party is indispensable. *See* Fed. R. Civ. P. 19(b). ***HN32***[] "A party is indispensable if in 'equity and good conscience,' the court should not allow the action to proceed in its absence." Dawavendewa v. Salt River Project Agr. Imp. and Power Dist., 276 F.3d 1150, 1161 (9th Cir. 2002), *quoting* Fed. R. Civ. P. 19(b).

[*1168] ***HN33***[] Rule 19(b) sets out four factors to determine whether a case must be dismissed. However, where the absent party cannot be joined in light of sovereign immunity, "there may be very little need for balancing . . . because immunity itself may be viewed as the compelling factor." Kescoli v. Babbitt, 101 F.3d 1304, 1311 (9th Cir. 1996). [13]

The four factors are:

> (1) prejudice to any party or to the absent party;
> (2) whether relief can be shaped to lessen prejudice;
>
> (3) whether an adequate remedy, even if not complete, can be awarded without the absent party; and
>
> (4) whether there exists an alternative forum.

Id. at 1310-11.

---

[13] In regard to challenges to real property interests, i.e., interests in federal land, implicating sovereign **[**58]** immunity, the Supreme Court and Appeals Courts have consistently held that the United States is an indispensable party. *See e.g.* United States v. Alabama, 313 U.S. 274, 282-83, 61 S. Ct. 1011, 85 L. Ed. 1327 (1941) (invalidating tax sale of federal land. "A proceeding against property in which the United States has an interest in a suit against the United States."); Stewart v. U.S., 242 F.2d 49, 51 (1957) (affirming dismissal of quiet title action against United States); Lambert v. R.F.C., 71 F.Supp. 509, 513 (E.D.N.Y. 1947) (dismissing suit to cancel lease and force sale of government land).

The first factor weighs in favor of dismissal. ***HN34***[] "The first factor directs the court to consider, in determining whether the action may proceed, the prejudice to absent entities and present parties in the event judgment is rendered without joinder." *Republic of Philippines, 128 S.Ct. at 2182*. Plaintiffs seek to invalidate and declare unenforceable patents **[**59]** owned by the United States. The validity of the USDA's patent has been challenged. If invalidated, the USDA's assets, the Patents, would be destroyed, Patented Varieties would be freely marketed, and the USDA would lose royalties. The patents would be declared invalid under claims one through three of the Complaint and unenforceable under claim four for inequitable conduct and claim six for patent misuse.

Plaintiffs, however, argue that the Commission can and will adequately protect the USDA's interest in preserving the validity of the patents-in-suit. The Commission conceived of the patenting programs that resulted in the Patented Varieties and lobbied for its acceptance by the USDA. There is a Memorandum of Understanding between the Commission and the USDA that recognizes that their interests in the patenting program are aligned. The Commission has aggressively enforced and litigated the patents-in-suit in the past. If its interests are prejudiced, Plaintiffs argue the United States could intervene.

Plaintiffs cite *Dainippon Screen Mfg. Co., Ltd. v. CFMT, 142 F.3d 1266 (Fed. Cir. 1998)*, to support their argument that in an action challenging the validity of a patent, the action can **[**60]** proceed without the patent owner. Here, however, unlike in *Dainippon,* there is no unity of ownership or interest between the patent owner and licensee. The facts of *Dainippon* are instructive. The patent owner in the suit was not an indispensable party because the suit was brought by a competitor against the parent company, who held an exclusive license from its wholly-owned subsidiary. *Dainippon* found no indispensability in part because the patent holder was the parent company's holding company for patents and held an identity of interest and ownership with the subsidiary. *Id. at 1273*. As to the first 19(b) factor, there was an adequacy of protection of the subsidiary's interests, the patent owner, by the parent company, the licensee. Further, the patent owner could intervene at any time. *Id. at 1272*.

[*1169] The second factor, whether prejudice can be lessened by shaping the relief provided, also weighs in favor of dismissal. No declaratory, injunctive or compensatory relief would be granted under the Complaint if the patent's validity were not challenged. "Any measures to lessen these prejudices would necessarily dilute the efficacy of the judgment sought." *Messerschmitt-Boelkow-Blohm GmgH v. Hughes Aircraft, 483 F.Supp. 49, 53 (S.D.N.Y. 1979)*. **[**61]** Although the Complaint is brought against the Commission alone, granting declaratory relief requires finding that the Commission had no authority to enforce an invalid patent, that the patent is invalid and unenforceable, a patent which is owned by the USDA, a branch of the United States. Here, any judgment cannot be tailored to eliminate the prejudice to the United States. A finding for Plaintiffs would declare invalid patents owned by the United States, abrogating the United States' interest in the patents, not only depriving the United States of royalties under the patents, but ending the United States' ability to license the patents. In a Western District of Pennsylvania case, *Suprex Corp. v. Lee Scientific, Inc., 660 F.Supp. 89 (W.D. Pa. 1987)*, the court addressed similar facts relating to a university, stated:

> Because the university [patent owner] is a necessary party, we must consider whether the action can proceed in its absence. First, a judgment of patent invalidity in the university's absence would be prejudicial. Such a judgment would devalue the university's asset, reduce royalties now accruing and severely restrict or even destroy the university's ability to develop and **[**62]** market the chromatography technology. Second, the prejudice to the absent patent owner cannot be lessened through the "shaping of relief" because no declaratory, injunctive or compensatory relief would be granted under the existing complaint if the patent's validity were not questioned…such relief requires a finding that Lee Scientific has no authority to enforce an invalid patent owned by the university.

Id. at 93.

The third factor, adequacy of remedy, also favors dismissal. ***HN35***[] "'[A]dequcy' refers not to satisfaction of [Plaintiffs'] claims, but to the 'public stake in settling disputes by wholes, whenever possible.'" *Republic of Philippines, 128 S.Ct. at 2183*, *citing* *Provident Tradesmens Bank & Trust Co. v. Patterson, 390 U.S. 102, 111, 88 S. Ct. 733, 19 L. Ed. 2d 936 (1968)*. As in *Republic of Phillippines,* "[g]oing forward with the action in the absence of" the United States, "would not further this public interest because they could not be bound by a judgment to which they were not parties." *Id.* The Court held the University had not waived its *Eleventh Amendment* immunity.

The fourth factor is whether there is an available alternative forum. First is the Court of Federal Claims, expressly authorized by statute. Plaintiffs **[**63]** have an opportunity to raise the defense of patent invalidity and unenforceability in an action brought against them for patent infringement brought by the United States or the Commission. *See 35 U.S.C. § 282*. [14]

[*1170] However, to require Plaintiffs to violate the license and wait to see whether the patent owner sues for infringement creates an unfavorable situation as damages could be exacerbated. Where "no alternative forum exists, the district court should be 'extra cautious' before dismissing an action." *Kescoli v. Babbitt, 101 F.3d 1304, 1311 (9th Cir. 1996)*. But just as the courts have held in actions involving tribal immunity and state immunity, sovereign immunity **[**64]** of the United States can justify dismissal for inability to join an indispensable party, despite the fact that no alternative forum is available. "If the necessary party is immune from suit, there may be very little need for balancing *Rule 19(b)* factors because immunity itself may be viewed as the compelling factor." *Id. at 1311* (internal citations and quotations omitted). The latest Supreme Court case, *Republic of Philippines v. Pimentel, 553 U.S. 851, 128 S.Ct. 2180, 171 L. Ed. 2d 131 (2008)*, to address *Rule 19*, held as to immunity barring an action from proceeding without the sovereign party:

> The analysis of the joinder issue in those cases was somewhat perfunctory, but the holdings were clear: A case may not proceed when a required-entity sovereign is not amenable to suit. These cases instruct us that where sovereign immunity is asserted, and the claims of the sovereign are not frivolous, dismissal of the action must be ordered where there is a potential for injury to the interests of the absent sovereign.

128 S.Ct. at 2190-91. In this context, dismissal is appropriate even if Plaintiffs have no alternative forum for their claim. *See Dawavendewa, 276 F.3d at 1162*.

Because the proceedings in this case threaten both **[**65]** the property and sovereign immunity of the United States, the United States' failure to waive its immunity from suit strongly supports dismissing this litigation in its absence.

Defendant also seeks to dismiss claims four and six, for inequitable conduct and patent misuse on the same grounds that the United States is a necessary and indispensable party. Plaintiffs' fourth claim alleges inequitable conduct against Defendant Commission. In the fourth claim for inequitable conduct, Plaintiffs allege actions by the USDA and Mr. Ramming, and actions of the patent prosecuting attorneys ("Margaret A. Conner, John D. Fado, and/or Lesley Shaw, who prosecuted the application Sweet Scarlet variety") amount to inequitable conduct. (Doc. 1, Complaint PP 90, 91). The United States was not a named Defendant in this claim, although its rights will clearly be implicated if there is a finding in Plaintiffs' favor. Claim six is a patent misuse claim, seeking a judgment that the patents are unenforceable. Again, the United States is not a named party, although this claim, if decided for Plaintiffs, will adversely effect the rights of the United States. Because Plaintiffs are seeking a judgment that the **[**66]** '284, '891 and '229 patents are unenforceable for misuse, the United States is a necessary party and indispensable party under *Rule 19* to this claim. (Complaint, P 109).

---

[14] ***HN36***[] The following shall be defenses in any action involving the validity or infringement of a patent and shall be pleaded:

> (1) Noninfringement, absence of liability for infringement or unenforceability,
>
> (2) Invalidity of the patent or any claim in suit on any ground specified in part II of this title as a condition for patentability.
>
> (3) Invalidity of the patent or any claim in suit for failure to comply with any requirement of *sections 112* or *251* of this title,
>
> (4) Any other fact or act made a defense by this title.

35 U.S.C. § 282.

Defendant's motion to dismiss pursuant to *Rule 19(b)* is GRANTED WITHOUT LEAVE TO AMEND, except if Plaintiffs amend to name the united States and consent to transfer of the case to the Federal Court of Claims.

B. INEQUITABLE CONDUCT.

Defendant seeks, separately from its Rule 19 motion, to dismiss Plaintiffs' fourth claim for inequitable conduct on other grounds. Defendant's motion to dismiss on Rule 19 grounds has been granted **[*1171]** with conditional leave to amend. The other grounds on which Defendant argues for dismissal of the fourth claim are briefly addressed here. Defendant moves to dismiss Plaintiffs' fourth claim for inequitable conduct, which seeks a judgment that the '891 Patent for Sweet Scarlet is unenforceable. Defendant argues that Plaintiffs fail to allege an intent by USDA, and by Dr. Ramming, to deceive the PTO. Defendant also claims that Plaintiffs fail to allege their claim with the specificity required under *Rule 9(b)*. Plaintiffs rejoin that although the Complaint does not allege the specific words "fraudulent **[**67]** intent," all the allegations pled by Plaintiffs regarding inequitable conduct are more than sufficient to state such a claim and comply with *Rule 9(b)*.

HN37[] A claim for inequitable conduct requires proof that Defendant, one, affirmatively failed to disclose material information, or submitted false material information, and two, did so with an intent to deceive. ***HN38***[] "To be guilty of inequitable conduct, one must have intended to act inequitably." *FMC Corp. v. Manitowoc Co., Inc., 835 F.2d 1411, 1415 (Fed. Cir. 1987)*. ***HN39***[] "Materiality and intent to deceive are distinct factual inquiries, and each must be shown by clear and convincing evidence." *Life Technologies, Inc. v. Clontech Laboratories, 224 F.3d 1320, 1324 (Fed. Cir. 2000)*. ***HN40***[] Inequitable conduct must be pled with particularity. *See* *Central Admixture Pharmacy Servs., v. Advanced Cardiac Solutions, 482 F.3d 1347, 1356 (Fed. Cir. 2007)* (inequitable conduct must be pled with particularity). ***HN41***[] "Inequitable conduct encompasses deception, fraud, or failure to disclose material information." *Chiron Corp. v. Abbott Laboratories, 156 F.R.D. 219 (N.D. Cal. 1994)*; *Multimedia Patent Trust v. Microsoft Corp., 525 F.Supp.2d 1200 (S.D. Cal. 2007)*. (***HN42***[] Inequitable **[**68]** conduct is a breach of the patentee's duties to the PTO of candor, good faith, and honesty, may be stricken pursuant to *Rule 12(f)* for failure to plead with particularity).

The Ninth Circuit has described the requirements of sufficiently pleading the facts to meet the requirements of *Rule 9(b)*:

> We have held that ***HN43***[] *Rule 9(b)* "requires the identification of the circumstances constituting fraud so that the defendant can prepare an adequate answer from the allegations." *Bosse v. Crowell Collier & MacMillan, 565 F.2d 602, 611 (9th Cir. 1977)*; *see also* *Walling v. Beverly Enterprises, 476 F.2d 393, 397 (9th Cir. 1973)*.
>
> ***HN44***[] We have interpreted *Rule 9(b)* to mean that the pleader must state the *time, place, and specific content of the false representations* as well as the *identities of the parties* to the misrepresentation.

Schreiber Distributing Co. v. Serv-Well Furniture, 806 F.2d 1393, 1400-01 (9th Cir. 1986) (RICO suit) (emphasis added).

Plaintiffs in their Complaint allege that the '891 patent for Sweet Scarlet is unenforceable because of the inequitable conduct by the USDA and Dr. Ramming, co-inventor of Sweet Scarlet, who "knew of prior possession and reproduction under the Commission's 'amnesty program' **[**69]** and the group of individuals who "prosecuted the application on the Sweet Scarlet Variety before the USPTO, [who] knew of the prior possession and reproduction of the Sweet Scarlet variety by growers who admitted to such possession and reproduction under the Commission's 'amnesty program.'" (Doc. 1, Complaint, P 90, IV. Claim, Inequitable Conduct). Plaintiffs allege in their Complaint, that prior to the issuance of the '891 patent, neither the USDA, nor Dr. Ramming, nor Ms. Conner, Mr. Fado and/or Mr. Shaw notified the USPTO of the prior possession and reproduction by the growers and this breached the duty of candor owed to the USPTO. **[*1172]** The "breach of the duty of candor constitutes inequitable conduct." (*Id.* at PP 91-92).

Plaintiffs state:

> Specifically, approximately nine growers received Sweet Scarlet from Dr. Ramming for trials in 1999 and 2000. At least three of these growers sold fruit produced into commercial markets before 2002. Additionally, at least 17 other growers, who were not part of trials, received and reproduced the Sweet Scarlet variety. On information and belief, these reproductions took place prior to 2002. Neither the USDA nor Dr. Ramming oversaw or controlled the reproductions **[**70]** created by these 17 growers.

(Doc. 1, Complaint, PP 54-55). The totality of these assertions provide sufficient specificity for Plaintiffs have sufficiently pled a claim for inequitable conduct. This Rule 9(b) motion to dismiss is DENIED.

C. ANTI-TRUST

Defendant moves to dismiss Plaintiffs' fifth claim for antitrust violations, specifically, Plaintiffs' claim under *Section 2* of the Sherman Act, *15 U.S.C. § 2*. Defendant argues that Plaintiffs' anti-trust claim fails on three bases: (1) Plaintiffs have failed to allege a cognizable relevant market that the Commission could have monopolized; (2) Plaintiffs have failed to allege that the Commission even participates in the alleged market for the Patented Varieties; (3) and last, Defendant argues that Plaintiffs are indirect purchasers and therefore lack standing to seek damages under the anti-trust laws. Plaintiffs rejoin that they have identified a relevant market, "the worldwide market," for table grapes of these varieties; they have also alleged active participation by the Commission in the worldwide market; and they have standing to seek damages.

"Fraud in the procurement of intellectual property rights can, upon a proper showing, give **[**71]** rise to antitrust liability." 4 J. von Kalinowski, Antitrust Laws and Trade Regulation § 73.03 (2007). The seminal Supreme Court case on this claim is *Walker Process Equip., Inc. v. Food Machinery & Chem. Corp. 5, 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. *Walker* established that ***HN45***[] a claim for "the enforcement of a patent procured by fraud on the Patent Office may be violative of *§ 2* of the Sherman Act provided the other elements necessary to a *§ 2* case are present." *Id. at 174*. Antitrust liability may arise when a patent has been procured by knowing and willful fraud and the patentee gaining market power in the relevant market through the use of its fraudulently obtained patent to restrain competition. *C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1367 (Fed. Cir. 1998)*.

Section 2 of the Sherman Act provides:

> ***HN46***[] Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States . . . shall be deemed guilty of a felony . . ."

15 U.S.C. § 2.

HN47[] In a Walker Process fraud, the antitrust claimant must show:

> (1) that the asserted patent was obtained by knowingly and willfully misrepresenting the facts **[**72]** to the PTO;
> (2) that the party enforcing the patent was aware of the fraud when bringing suit;
> (3) independent and clear evidence of deceptive intent;
>
> (4) a clear showing of reliance, *i.e.,* that the patent would not have issued but **[*1173]** for the misrepresentation or omission; and
>
> (5) the necessary additional elements of an underlying violation of the antitrust laws.

In re Netflix Antitrust Litigation, 506 F.Supp.2d 308, 314 (N.D. Cal. 2007), *citing* *Nobelpharma, Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1068-71 (Fed. Cir. 1998)*. [15]

---

[15] The law of the circuit in which the district court sits governs the ***antitrust law*** issues. ***HN48***[] "[W]hether conduct in procuring or enforcing a patent is sufficient to strip a patentee of its immunity from the antitrust laws is to be decided as a question of Federal Circuit law." *Nobelpharma, 141 F.3d at 1068*. ***HN49***[] "When…the courts consider a patentee's behavior

Plaintiffs' *§ 2* claim rests on allegations that Defendant **[**73]** illegally monopolized interstate and foreign commerce in bad faith by enforcing alleged patent rights, as the exclusive licensee of the patents and collecting royalty fees on the Patented Varieties under its "amnesty" program, prior to issuance of a valid U.S. patent. It then enforced patent rights and collected royalties on the Sweet Scarlet variety knowing that the patent could not be enforced due to prior public use.

In *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*, the Court clarified that "knowing and willful" fraud must be shown, and is a predicate to a potential antitrust violation. ***HN50***[] "Fraud in the procurement of a patent requires proof of the elements of common law fraud: (1) that a false representation of a material fact was made, (2) with the intent to deceive, (3) which induced the deceived party to act in justifiable reliance on the misrepresentation, and (4) which caused injury that would not otherwise have occurred." *C.R. Bard, Inc. v. M3 Systems, Inc., 157 F.3d 1340, 1364 (Fed. Cir. 1998)*. ***HN51***[] "To establish fraud for purposes of antitrust violation, the defendant 'must make a greater showing of scienter and materiality' than when seeking **[**74]** unenforceability based on conduct before the Patent Office." *Id. (Bard).*

1. Indirect Purchasers.

Defendant argues that Plaintiffs cannot sue for anti-trust damages as indirect purchasers under the *Illinois Brick* doctrine, which denies standing to indirect purchasers affected by allegedly anti-competitive activity - that is, plaintiffs purchasing products indirectly or through intermediaries. *Illinois Brick v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. Defendant contends that Plaintiffs cannot seek damages by claiming that the prices of the grape vines they bought from the nurseries were inflated because of the royalties the Commission impermissibly charged the nurseries.

Defendant cites a Fourth Circuit case decision in *Kloth v. Microsoft Corp., 444 F.3d 312 (4th Cir. 2006)*. In *Kloth,* the Court dismissed a monopolization claim against manufacturers brought by purchasers of computers with pre-installed software. The purchasers bought the computers from and paid intermediaries and retailers, not the manufacturer. The Court held that Plaintiffs who purchased Microsoft licenses from intermediaries and retailers when they purchased their pre-installed software computers fit the *Illinois Brick* paradigm. **[**75]** They were indirect purchasers prohibited from asserting a claim against the manufacturer. *Id. at 323*.

[*1174] Plaintiff's antitrust claim is not however solely premised on inflated prices by indirect purchasers. Rather, Plaintiffs' antitrust claim is more broadly based on the enforcement of a patent, knowingly procured through fraud, by an exclusive licensee. Plaintiffs allege that the Commission's threat of enforcement and enforcement of a fraudulently obtained patent caused Plaintiffs to obtain a license it would not have otherwise been required to obtain. Under that license, Plaintiffs must comply with a number of anticompetitive clauses. (Doc. 24, Opposition, p. 23:22-24 - 24:1-4). Plaintiffs state that "[b]ecause [it's] antitrust claim is not based on an inflated price paid by an indirect purchaser, *Illinois Brick* is wholly inapplicable." (*Id.* at p. 24:10-12).

In *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*, the Supreme Court held that ***HN52***[] "the enforcement of a patent procured by fraud on the Patent Office may be violative of *§2* of the Sherman Act…" *Id. at 174*. As the Supreme Court explained, obtaining a patent "by knowing and willfully misrepresenting **[**76]** facts to the Patent Office…would be sufficient to strip [the patentee] of its exemption from the antitrust laws." *Id. at 177*. "This conclusion applies with equal force to an assignee who maintains and enforces the patent with knowledge of the patent's infirmity." *Id. at 177 n.5*.

Defendant also argues that Plaintiffs have not alleged that they have suffered compensable damages from having been unable to propagate their own vines or distribute vines to other distributors. However, Plaintiffs' Complaint makes a general allegation in paragraph 101 of their anti-trust claim that "[t]he existence and misuse of the patents on the Patented Varieties has deprived Plaintiffs of revenues and profits that it would have otherwise enjoyed absent the Commission's anticompetitive activities and patent misuse." (Complaint, P 101). Although Plaintiffs do

---

under Federal Circuit law and determine that it involved either an inappropriate attempt to procure a patent or an inappropriate attempt to enforce a patent, the remainder of the antitrust inquiry must proceed under the law of the regional circuit."

not specify what is the basis for such lost revenues and profits, they are alleging a basic *Walker Process* claim, but must add these necessary facts.

1. Active Participation.

Defendant also contends that the Commission does not participate in the market, because the Commission's only involvement is the hand-selecting three nurseries to exclusively sell **[**77]** all new patented table grape varieties. Plaintiffs do not allege that the Commission itself sells the Patented Varieties, rather the three nurseries are marketers and their firms are not named parties in this litigation.

Plaintiffs claim the Commission has been an active participant with direct and significant anti-competitive activities in the relevant market, sufficient to uphold an antitrust claim for:

(1) the Commission was the party that collected on-going royalties for each sale of the Patented Varieties;
(2) the Commission threatened enforcement of the patents for the Patented Varieties;
(3) the Commission threatened and sought removal of plant material for the Patented Varieties from growers' land, including growers who have licensed the Patented Varieties;
(4) the Commission required growers to pay for and obtain new licenses in order to expand existing crops of the Patents Varieties;
(5) the Commission granted "amnesty" to growers in exchange for royalty fees for the Patented Varieties under the threat of enforcement of fraudulently procured patent(s); and

[*1175] (6) the Commission granted licenses to a limited number of nurseries to distribute the plant material for the Patented Varieties **[**78]** to the exclusion of other nurseries and on terms dictated by the Commission.

(Doc. 24, Opposition, p. 23).

HN53[] "The gravamen of a *section 2* claim is the deliberate use of market power by a competitor to control price or exclude competition." *Mercy-Peninsula Ambulance, Inc. v. County of San Mateo, 791 F.2d 755, 758 (9th Cir. 1986)*. If the Commission does not compete in the relevant market, then it cannot be liable for monopolizing a business in which it does not compete. *Id. at 759*. In *Mercy-Peninsula,* an ambulance company sued San Mateo County for a monopolization claim, claiming the county wrongfully excluded it from a health care provision market by refusing to grant it a contract to provide such services. *Id.* In its decision, the Ninth Circuit noted that the County, during the brief period prior to the enactment of the EMS Act, which provided it state immunity under antitrust laws, the County was not a competitor in the health care provision market, the relevant market. *Id.* The Court provided no discussion, nor cited to relevant law on the issue. But it is clear from case law that Plaintiffs must allege that Defendant has monopoly power in the relevant market, that is, the power to control **[**79]** prices and exclude competition. *U.S. v. Grinnell Corp., 384 U.S. 563, 570, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. Here, the Commission sub-licenses the patented grape stock to the nurseries and the nurseries sell grape stock to Plaintiffs, with restrictions, imposed and monitored by the Commission, on use, re-sale ability and propagation. The Commission sets the prices. It is the primary party enforcing the licenses. The nurseries do not have the power to lessen or destroy competition, they only sell the Patented Varieties based on the restrictions placed by the Commission and the USDA. The Commission remains the primary actor dictating terms of marketing and use for the varieties in-suit.

3. Relevant Market.

HN54[] Monopoly power is defined as "'the power to control prices or exclude competition.' The existence of such power ordinarily may be inferred from the predominant share of the market." *Id. at 571*. ***HN55***[] To determine if a monopoly exists, it is first necessary to determine the market, both in terms of geography and product, that is being monopolized, that is the "relevant market." *Thurman Industries, Inc. v. Pay 'n Pak Stores, 875 F.2d 1369, 1373 (9th Cir. 1989)*. "[T]he definition of the relevant market is a factual inquiry **[**80]** for the jury, and the court may not weigh evidence or judge witness credibility." *Rebel Oil, 51 F.3d at 1435*. "A submarket exists if it is sufficiently insulated from the larger market so that supply and demand are inelastic with the larger market." *Morgan, Strand, Wheeler & Biggs v. Radiology, Ltd., 924 F.2d 1484, 1490 (9th Cir. 1991)*.

Defendant cites *Tanaka v. University of Southern California, 252 F.3d 1059 (9th Cir. 2001)* and *Apani Southwest, Inc. v. Coca-Cola Enterprises, Inc., 300 F.3d 620 (5th Cir. 2002)*. In *Tanaka,* a college soccer player seeking to play for a college program in Los Angeles made a conclusory allegation that the "UCLA women's soccer program" constituted its own relevant product market. *Tanaka, 252 F.3d at 1063*. The court rejected such a limited definition of the relevant market and held that women's college soccer programs "compete in the recruiting of student-athletes and, hence, are interchangeable with each other for antitrust purposes." *Id. at 1064*. In *Apani,* the Court stated: "where the plaintiff fails to define its proposed relevant **[*1176]** market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant **[**81]** market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient, and a motion to dismiss may be granted." *Apani, 300 F.3d at 628*. Defendant argues that just as in *Tanaka* and *Apani,* the instant Complaint should be dismissed because it fails to allege any facts even remotely suggesting that the Patented Varieties are not interchangeable with a host of other varieties.

HN56[] "The relevant market is 'the narrowest market which is wide enough so that products from adjacent areas or from other producers in the same area cannot compete on substantial parity with those included in the market.' Sullivan, Antitrust 41 (1977)." *Home Placement Service, Inc. v. Providence Journal Co., 682 F.2d 274, 280 (1st Cir. 1982)*. ***HN57***[] "[T]he term 'relevant market' encompasses notions of geography as well as product use, quality, and description. ***HN58***[] The geographic market extends to the 'area of effective competition'…where buyers can turn for alternative sources of supply.' ***HN59***[] The product market includes the pool of goods or services that enjoy reasonable interchangeability of use and cross-elasticity **[**82]** of demand." *Tanaka v. University of Southern California, 252 F.3d 1059, 1063 (9th Cir. 2001)*, *quoting* *Oltz v. St. Peter's Cmty. Hosp., 861 F.2d 1440, 1446 (9th Cir. 1988)*.

The Supreme Court in *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*, stated: ***HN60***[] "The proper market definition in this case can be determined only after a factual inquiry into the 'commercial realities' faced by consumers." *504 U.S. at 482*. "The purpose of market definitions is not to frustrate anti-trust plaintiffs by requiring the proof of bright lines which do not exist, but is to help identify monopoly power, that is, 'the power to control prices or exclude competition.'" *Home Placement Service, Inc. v. Providence Journal Co., 682 F.2d 274, 280 (1st Cir. 1982)*, *quoting* *United States v. E. I. DuPont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*.

Motions to dismiss are not the place to delve into a factual inquiry on whether, in the market, local, regional, national, or international, for table grapes, if other varieties of table grapes are effective substitutes. As the Second Circuit court case discussed, *Todd v. Exxon Corp., 275 F.3d 191, 199-200 (2d Cir. 2001)*, ***HN61***[] "[b]ecause market definition **[**83]** is a deeply fact-intensive inquiry, courts hesitate to grant motions to dismiss for failure to plead a relevant product market." "To survive a *Rule 12(b)(6)* motion to dismiss, an alleged product market must bear a 'rational relation to the methodology courts prescribe to define a market for antitrust purposes--analysis of the interchangeability of use or the cross-elasticity of demand… and it must be 'plausible.'" *Id. at 200* (citations omitted). The court further explained: dismissals in such cases on the pleadings typically occur in matters involving (1) a failure to attempt to limit a product market to a single brand, franchise, institution, or comparable entity that competes with potential substitutes or (2) a failure to attempt a plausible explanation as to why a market should be limited in a particular way. *Id.* (citations omitted). "[A] complaint may be dismissed under *Rule 12(b)(6)* if the complaint's 'relevant market' definition is facially unsustainable." *Newcal Indus., Inc. v. Ikon Office Solution, 513 F.3d 1038, 1045 (9th Cir. 2008)*.

Brown Shoe Co. v. United States, 370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 ***[*1177]*** *(1962)* set forth the standards for defining relevant product markets and submarkets and demonstrates **[**84]** the fact-intensive considerations:

> ***HN62***[] The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. However, within this broad market, well-defined submarkets may exist which, in themselves, constitute product markets for antitrust

> purposes. *United States v. E. I. du Pont de Nemours & Co., 353 U.S. 586, 593-595, 77 S. Ct. 872, 877, 1 L. Ed. 2d 1057*. The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.

370 U.S. at 325.

"This Court's prior cases support the proposition that ***HN63***[] in some instances one brand of a product can constitute a separate market." *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. Plaintiffs' Complaint alleges that the Commission conspires to "monopolize the world-wide market for the four Patented Varieties of table grapes…" (Complaint, P 102). **[**85]** Plaintiffs' claim the geographic market is the "world-wide market" and the relevant product market is each Patented Variety, the existence of the plant patents limits the myriad of other varieties of table grapes from being substitutes for the Patented Varieties in the world-wide market. This does not follow logically or legally without further definition and description of the table grape market, such as unique characteristics that set the three varieties apart in sub-markets.

If there are effective substitutes, they must be considered part of the relevant market. Plaintiffs do not allege in the Complaint that no other substitutes for each Patented Variety exist, but state for the first time in their opposition papers, that there are submarkets and that each Patented Variety, Sweet Scarlet, Autumn King and Scarlet Royal, are inherently unique as each grapevine and fruit must derive from the single parent plant. Although dubious, it is not impossible that each Patented Variety constitutes a relevant market. *See* *Walker, 382 U.S. at 177-178* ("To establish monopolization or attempt to monopolize a part of trade or commerce under *§ 2* of the Sherman Act, it would then be necessary to appraise **[**86]** the exclusionary power of the illegal patent claim in terms of the relevant market for the product involved. Without a definition of that market there is no way to measure Food Machinery's ability to lessen or destroy competition. It may be that the device-knee-action swing diffusers - used in sewage treatment systems, does not comprise a relevant market. There may be effective substitutes for the device, which do not infringe the patent. This is a matter of proof, as is the amount of damages suffered by Walker.")

HN64[] The market must include all economic substitutes, "…it is legally permissible to premise antitrust allegations on a submarket. That is, an antitrust claim may, under certain circumstances, allege restraints of trade within or monopolization of a small part of the general market of substitutable products. In order to establish the existence of a legally cognizable submarket, the plaintiff must be able to show (but need not necessarily establish in the complaint) that the alleged submarket is economically distinct from the general product market." *Newcal Industries, Inc. **[*1178]** v. Ikon Office Solution, 513 F.3d 1038, 1045 (9th Cir. 2008)*.

Because Plaintiffs allege for the first time **[**87]** in their Opposition to these Motions that each Patented Variety is a distinct product market within the table grape market, and do not allege that the Commission holds market power in each Patented Variety market or the scope of that market, they are GRANTED LEAVE TO AMEND to allege the relevant market.

D. Patent Misuse.

Defendant seeks, on separate grounds from its Rule 19 motion, to dismiss Plaintiffs' sixth claim for patent misuse. Defendant's motion to dismiss on Rule 19 grounds has been granted. Nonetheless, the other grounds Defendant advances for dismissal of the sixth claim are briefly addressed. ***HN65***[] "The concept of patent misuse arose to restrain practices that did not in themselves violate any law, but that drew anticompetitive strength from the patent right, and thus were deemed to be contrary to public policy. The policy purpose was to prevent a patentee from using the patent to obtain market benefit beyond that which inheres in the statutory patent right." *Mallinckrodt, Inc. v. Medipart, Inc., 976 F.2d 700, 705 (Fed. Cir. 1992)*. ***HN66***[] "Patent misuse is viewed as a broader wrong than antitrust violation because of the economic power that may be derived from the patentee's right to **[**88]** exclude. Thus misuse may arise when the conditions of antitrust violation are not met." *C.R. Bard, Inc. v. M3 Systems, Inc., 157 F.3d 1340, 1372 (Fed. Cir. 1998)*.

HN67[] A court's inquiry into a misuse claim is whether, by imposing conditions that derive their force from the patent, the patentee has impermissibly broadened the scope of the patent grant with anticompetitive effect. *Id.* Since patent misuse arises in equity, if found to be patent misuse, the patent is rendered unenforceable. And remains unenforceable until the misuse ends, the patent however is not invalidated. *Id.*

HN68[] "When a practice alleged to constitute patent misuse is neither per se patent misuse [e.g. tying arrangements or post-expiration royalties] nor specifically excluded from a misuse analysis by § 271(d) [Patent Misuse Reform Act, 35 U.S.C. § 271(d)], a court must determine if that practice is 'reasonably within the patent grant, *i.e.,* that it relates to subject matter within the scope of the patent claims.' [citation.] If so, the practice does not have the effect of broadening the scope of the patent claims and thus cannot constitute patent misuse. [citation.] If, on the other hand, the practice has the effect of extending **[**89]** the patentee's statutory rights and does so with an anti-competitive effect, that practice must then be analyzed in accordance with the 'rule of reason.' [citation]. Under the rule of reason, 'the finder of fact must decide whether the questioned practice imposes an unreasonable restraint on competition, taking into account a variety of factors, including specific information about the relevant business, its condition before and after the restraint was imposed, and the restraint's history, nature, and effect.'" Virginia Panel Corp. v. MAC Panel Co., 133 F.3d 860, 869 (Fed. Cir. 1997) (citations omitted).

Defendant claims that two of Plaintiffs' theories do not constitute patent misuse: collecting royalties before a patent issues, and imposing post-sale restrictions on propagation of new vines and distributions to third parties. Plaintiffs' third theory also fails because Plaintiffs have failed to identify a cognizable market required for this type of patent misuse claim. This last argument has already been addressed for the anti-trust claim and need not be repeated.

Plaintiffs' complaint alleges the following three theories of patent misuse:

> **[*1179]** (i) enforcing alleged patent rights and collecting **[**90]** royalty fees on the Patented Varieties under its "amnesty" program prior to issuance of a valid United States patent,
> (ii) enforcing patent rights (including demanding the removal of Patented Varieties) and collecting royalties on the Sweet Scarlet variety while knowing that the patent on Sweet Scarlet could not be enforced due to prior public use and inequitable conduct, and
> (iii) imposing on growers a Domestic Growers' License Agreement, which purport to extend the Commission's rights to Patented Varieties even after sale despite the exhaustion of those rights upon sale of the patented plant.

(Complaint, P 106).

As to the first theory, there is no viable claim for the "amnesty program" as the Commission could not have misused patents that did not exist and at most were inventions in the pre-issuance stage. HN69[] License agreements entered into after a patent application has been filed but before the patent issues are not necessarily unenforceable. Aronson v. Quick Point Pencil Co., 440 U.S. 257, 264-65, 99 S. Ct. 1096, 59 L. Ed. 2d 296 (1979). The "key inquiry is whether, by imposing conditions that derive their force from the patent, the patentee has impermissibly broadened the scope of the patent grant with anticompetitive **[**91]** effect." C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1372 (Fed.Cir. 1998). Pre-issuance, there is no patent right to impermissibly broaden. The doctrine of patent misuse could not be brought into play in *Aronson,* which concerned a license agreement entered into before issuance of the patent, but after patent application submitted. 440 U.S. at 264- 65; *see also* Technology Licensing Corp. v. Gennum Corp., No. 01- 04204, 2007 U.S. Dist. LEXIS 35521, 2007 WL 1319528, at *23 (N.D. Cal. May 4, 2007) ("As to Gennum's argument that TLC's interactions with Ross Video constituted misuse of the '250 patent, it is a peculiar notion that a party could "misuse" a patent that is not in existence. While it has been called patent misuse where a patentee seeks to collect royalties after the expiration of the patent term, it appears that in such cases the patentee and licensor have typically entered into the royalty agreement at a time when the patent is in force. Again, to the extent a party demands royalties or demands that another cease using a product where no patent has yet issued, the other party is not put to the type of choice that patent misuse doctrine normally guards against. The other party is free to ignore the **[**92]** demands.") [16]

The motion to dismiss the pre-issuance claim of misuse is GRANTED WITHOUT LEAVE TO AMEND.

Defendant also seeks to dismiss Plaintiffs' claim about the restrictions imposed through the License Agreements prohibiting the propagation of the grapevines or distribution of the vines to third parties (Plaintiffs' third theory - extending "the Commission's rights to Patented Varieties even after sale despite the exhaustion of those rights upon sale of the patented varieties.") (Complaint, P 27). Plaintiffs appear to concede in their Opposition that they cannot assert a patent misuse claim on the basis that the Commission has allegedly attempted to extend patent rights by **[*1180]** prohibiting "growers who purchased the Patented Varieties from propagating the grapevines or distributing the vines to third parties." **[**93]** (*Id.*) "Second, the Commission contends that its restrictions on propagation of new vines and distribution to third parties do not constitute misuse. While this may be true, the Commissions licensing agreements do not simply limit growers from distributing new vines." (Opposition, p. 26); [17] *see* *Mallinckrodt, Inc. v. Medipart, Inc., 976 F.2d 700, 708 (Fed. Cir. 1992)* (***HN70***[] a patent holder may lawfully restrict a licensee's right to use or sell a patented invention, so long as the restriction is "reasonably within the patent grant," but not if "the patentee has ventured beyond the patent grant and into behavior having an anticompetitive effect not justifiable under the rule of reason."); *Monsanto Co. v. McFarling, 363 F.3d 1336, 1341 (Fed.Cir. 2004)* (***HN71***[] "In the cases in which the restriction is reasonably within the patent grant, the patent misuse defense can never succeed."); *B. Braun Med. v. Abbott Labs., 124 F.3d 1419, 1426 (Fed.Cir. 1997)* ("[E]xpress conditions accompanying the … license of a patented product are generally upheld.") Here, it is not misuse of a plant patent to prevent the plant's disclosure to prevent its reproduction.

Defendant's motion to dismiss Plaintiffs' sixth claim as to theories one and portions of three is GRANTED WITHOUT LEAVE TO AMEND.

E. Unfair Competition.

Defendant moves to dismiss Plaintiffs' seventh claim for unfair competition under *California Business and Professional Code § 17200* and California Common Law. Defendant contends that Plaintiffs have not alleged unlawful conduct because Plaintiffs' only allegation of violation of another law is *Section 2* of the Sherman Act. Absent a *Section 2* violation, Defendant argues Plaintiffs fail to state a claim under the "unlawful" prong of *§ 17200*.

HN72[] The purpose of the Unfair Competition Law, *Cal. Bus. & Prof. Code § 17200 et seq.*, "is to protect both consumers and competitors by promoting fair competition in commercial markets for goods and services. [Citation.]" *Kasky v. Nike, Inc., 27 Cal.4th 939, 949, 119 Cal.Rptr.2d 296, 45 P.3d 243 (2002)*. **[**95]** ***HN73***[] It "defines 'unfair competition' to mean and include 'any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising and any act prohibited by [the false advertising law (*§ 17500 et seq.*)].' (*§ 17200*.)." *Id. at 949*. ***HN74***[] The scope of the UCL has been viewed by California Courts as "quite broad." *McKell v. Washington Mut., Inc., 142 Cal.App.4th 1457, 1471, 49 Cal.Rptr.3d 227 (2006)*. ***HN75***[] "Because the statute is framed in the disjunctive, a business practice need only meet one of the three criteria to be considered unfair competition." *Id.* Such a claim can cover anticompetitive business practices and injuries to consumers. It can encompass violations of other laws, treating them as unlawful practices, that are independently actionable under

---

[16] Plaintiffs cite several cases which do not support a patent misuse claim pre-issuance patent, including a Texas Court of Appeals case, *Reich v. Reed Tool Co., 582 S.W.2d 549 (Tex.App. 1970)*, which is not applicable in the Ninth Circuit. And none of these cases addresses whether collecting royalties per-issuance of patent on its own constitutes a "rule of reason" patent misuse claim.

[17] Plaintiffs also argue in response to Defendant's motion **[**94]** to dismiss its' sixth claim that the Commission restricts third party distribution that extends into foreign territories and cite *Extractol Process v. Hiram Walker & Sons, 153 F.2d 264 (7th Cir. 1946)*. *Extractol* is an older Seventh Circuit decision that does not address patent misuse. Neither party fully briefed this issue, which cannot be resolved as the arguments are unclear.

the unfair competition law, but a practice can be deemed unfair even if not specifically proscribed by some other law. *Cel-Tech Communications, Inc. v. Los Angeles, 20 Cal.4th 163, 180, 83 Cal.Rptr.2d 548, 973 P.2d 527 (1999)*.

[*1181] The seventh claim states: "The Commission has unlawfully and unfairly exploited the '284, '891 and '229 patents in a manner that violates antitrust laws and in a manner that attempts to extend these **[**96]** patents beyond their lawful scope. Such acts constitute unfair trade practices and unfair competition under *California Business and Professions Code §17200, et seq.*, and under the common law of the State of California, entitling Plaintiffs to relief." (Complaint, P 111).

HN76[] To state an UCL claim under the "unlawful" prong, Plaintiffs are required to allege a violation of another law. "The 'unlawful' practices prohibited by *section 17200* are any practices forbidden by law, be it civil or *839 criminal, federal, state, or municipal, statutory, regulatory, or court-made." *Saunders v. Superior Court, 27 Cal.App.4th 832, 839, 33 Cal.Rptr.2d 438 (1994)*. Defendant moves to dismiss this portion of the Unfair Competition claim.

Plaintiffs argue that they have stated a cognizable antitrust claim for relief under *Walker Process,* including the allegation of a relevant market. Defendant contends that Plaintiffs have failed to state a claim under the "unfair" prong, because the anticompetitive acts Plaintiffs allege for an unfair practice claim are based primarily on the same conduct as their antitrust claim. Plaintiffs rejoin that their allegations of the Commission's unfair actions go beyond antitrust **[**97]** complaints and that California's unfair competition law is "broad" and "sweeping" and may include a vast range of unfair conduct. ***HN77***[] An unfair act under *§ 17200* is defined as one that "offends an established public policy or…is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." *Heighley v. J.C. Penney Life Ins. Co., 257 F. Supp. 2d 1241, 1259 (C.D. Cal. 2003)*; *quoting* *Walker v. Countrywide Home Loans, Inc., 98 Cal.App.4th 1158, 1170, 121 Cal. Rptr. 2d 79 (2002)*. "'Unfair' simply means any practice whose harm to the victim outweighs its benefits." *Saunders v. Superior Court, 27 Cal.App.4th 832, 839, 33 Cal.Rptr.2d 438 (1994)*.

Plaintiffs argue they have satisfied the "broad and sweeping" "unfair" competition claim requirement because they have alleged that the Commission has engaged in a broad range of unlawful and unfair activities, including the enforcement of a patent known to be fraudulently procured, improperly seeking to extend the scope of the patent monopoly, and collecting patent royalties from growers who paid for the research and development of the patented varieties through assessment fees.

Defendant disputes Plaintiffs' contention that they alleged the Commission was **[**98]** "collecting royalties from grower" who already paid assessments. Defendant asserts that the theory is not alleged in Plaintiffs' Complaint. Plaintiffs' Complaint provides adequate notice to Defendant by the allegations:

> For years, California table grape growers and shippers have funded a research program under the U.S. Department of Agriculture ("USDA") to develop new table grape varieties. Growers and shippers fund the USDA research program through the Commission by an assessment on each box of table grapes shipped in California. Prior to 2002, the USDA provided the new varieties under development to area growers for evaluation of growing potential and commercial marketability. Once new varieties appeared commercially viable, the USDA "released" the variety, and distributed plant material of the variety to area growers free-of-charge. The USDA did not charge California growers for the new varieties since California growers **[*1182]** and shippers already paid for a large portion of the development.
>
> In the late 1990s, the Commission developed a scheme by which it and a few select nurseries could profit from the new varieties that the USDA distributed for free. At the urging of the Commission, the **[**99]** USDA agreed to begin patenting new table grape varieties. Although California shippers already funded much of the development, the USDA agreed to give the Commission an exclusive license to all new patented varieties, and to allow the Commission to charge royalties when growers wished to obtain the new varieties. The USDA also agreed to give the Commission exclusive enforcement powers over its new patent rights.

(Complaint, PP 10-11). This alleged "double payment scheme" is entirely premised on the patent laws and the monopoly effect resulting from a valid patent. This claim is entirely derivative of the patent claim, which cannot proceed in this Court.

Defendant's motion to dismiss Plaintiffs' seventh claim is DENIED.

F. Unjust Enrichment and Constructive Trust

Defendant moves to dismiss Plaintiffs' eighth and ninth causes of action for unjust enrichment and constructive trust, respectively. These claims are dependent upon Plaintiffs' substantive claims seeking monetary relief, the antitrust claims and unfair competition claims. Defendant's motion to dismiss the eighth and ninth causes of action is based on the argument that they have proved that the substantive claims must be dismissed, **[**100]** therefore the unjust enrichment and constructive trust claims must also be dismissed as well. Plaintiffs' substantive claim for unfair competition has not been dismissed.

Defendant's motion to dismiss Plaintiffs' eighth and ninth causes of action is DENIED.

G. Motion to Strike.

Defendant moves to strike certain portions of the Complaint. ***HN78***[] *Rule 12(f)* provides that "redundant, immaterial, impertinent, or scandalous matters" may be "stricken from any pleading." *Fed. R. Civ. P. 12(f)* (emphasis added). ***HN79***[] A motion to strike is limited to pleadings. *See* *Sidney-Vinstein v. A.H. Robins Co., 697 F.2d 880, 885 (9th Cir. 1983)*. However, a "motion to strike" materials that are not part of the pleadings may be regarded as an "invitation" by the movant "to consider whether [proffered material] may properly be relied upon." *United States v. Crisp, 190 F.R.D. 546, 551 (E.D. Cal. 1999)*; *quoting* *Monroe v. Board of Educ., 65 F.R.D. 641, 645 (D. Con. 1975)*. ***HN80***[] A motion to strike has sometimes been used to call to courts' attention questions about the admissibility of proffered material in ruling on motions. *Id.*

Defendant moves to strike allegations in Plaintiffs' antitrust claim regarding the Commission's "amnesty" **[**101]** program because Plaintiffs have not alleged they participated in the program nor that they suffered any injury in fact as a result of the amnesty program. Plaintiffs rejoin that these allegations are highly relevant to their claim and not stated simply for antitrust damages suffered by Plaintiffs. The allegations regarding the "amnesty" program are that 17 growers were in possession of Sweet Scarlet prior to February 2002 and show: (1) the Commission's knowledge that the patent on Sweet Scarlet was fraudulently procured; (2) the Commission's attempts to avoid invalidity challenges to the Sweet Scarlet Patent, knowing it was fraudulently procured; (3) the Commission's threat of enforcement and **[*1183]** enforcement of patents known to be fraudulently procured; and (4) the Commission's attempt to extend the scope of its patents beyond their legal bounds.

HN81[] Motions to strike are however disfavored and infrequently granted. *See* *Pease & Curren Refining, Inc. v. Spectrolab, Inc., 744 F. Supp. 945, 947 (C.D. Cal. 1990)*, *abrogated on other grounds by* *Stanton Road Ass'n v. Lohrey Enters., 984 F.2d 1015 (9th Cir. 1993)*. Such motions should be granted only where it can be shown that none of the evidence in **[**102]** support of an allegation is admissible. *See id.*

Defendant's motion to strike the "amnesty program" allegations is DENIED.

Defendant also moves to strike portions of Plaintiffs' prayer for relief sections. Plaintiffs respond that striking certain prayers for relief is not the proper subject of a motion to strike and cite to a Massachusetts District Court case, *Massachusetts v. Russell Stover Candies, Inc., 541 F.Supp. 143, 145 (D. Ma. 1982)* which denied a motion to strike prayers for relief, finding it did not fall within any of the categories referred to in *Rule 12(f)*. *Rule 12(f)* states ***HN82***[] "The court may strike from a pleading an insufficient defense or any redundant, immaterial, impertinent, or scandalous matter." *Fed. R. Civ. P. 12(f)*. There does not appear to be any Ninth Circuit law addressing the striking of the prayer for relief sections. However, the prayer for relief section is not a substantive part of the pleading and is irrelevant if not supported by evidence. The relief provided for the various claims will be determined if any entitlement to remedies is proved.

Defendant's request to strike various portions of the prayer for relief sections is DENIED.

VI. CONCLUSION

For all the **[**103]** reasons stated above:

1. Defendant's motion to dismiss Plaintiffs' declaratory relief claims pursuant to *Rule 19* is GRANTED WITH LEAVE TO AMEND to transfer the case to the Federal Court of Claims;

2. Defendant's motion to dismiss Plaintiffs' inequitable conduct claim is DENIED;

3. Defendant's motion to dismiss Plaintiffs' antitrust claim is GRANTED WITH LEAVE TO AMEND;

4. Defendant's motion to dismiss all Plaintiffs' patent misuse claims is GRANTED WITHOUT LEAVE TO AMEND;

5. Defendant's motion to dismiss Plaintiffs' unfair competition claim is DENIED;

6. Defendant's motion to dismiss Plaintiffs' claims for constructive trust and disgorgement is DENIED; and

7. Defendant's motion to strike is DENIED.

IT IS SO ORDERED.

Opinion by: JEROME B. SIMANDLE

Opinion

MEMORANDUM OPINION

SIMANDLE, DISTRICT JUDGE:

This matter comes before the Court on three motions for issuance of request for international judicial assistance pursuant to *Rule 28(b), Fed. R. Civ. P.*, and *28 U.S.C. § 1781*, filed by Plaintiffs [Docket Items 140, 141 and 146]. THIS COURT FINDS AS FOLLOWS:

1. Plaintiffs seek to depose three non-party witnesses -- Robin D. Emerson, Richard Fourcault, and Jacques Marquand -- all of whom reside abroad and all of whom, Plaintiffs allege, were involved in an international conspiracy to fix the price of electrical carbon product in the United States. Both Mr. Fourcault and Mr. Marquand were employed by Defendant Le Carbone Lorraine, S.A. ("LCL") -- Mr. Fourcault as Vice President of LCL's Consumer Division and Mr. **[*4]** Marquand as President of that division. Mr. Emerson was employed by a subsidiary of The Morgan Crucible Company, PLC, which is a former defendant in this matter. The facts are well-known to all parties and the Court will not reiterate them here.

2. Defendants do not oppose Plaintiffs' motions in their entirety, but instead ask the Court to limit the questions that may be asked in the following ways:

. Questions relating to the European Commission's investigation should be stricken from the request
. Questions for examination relating to Defendants' activities in Europe should be stricken
. Questions for examination relating to the isostatic graphite industry should be stricken from the request
. Questions relating to Mr. Emerson's communications with and documents he produced to the U.S. Department of Justice relating to his obstruction of justice guilty plea should be stricken from the request
. The request should be limited to cover the defined relevant period of October 1988 to September 2001
. The request should be amended to make clear that Defendants will be entitled to attend any examination proceedings and question the witness

3. The scope of proper discovery is governed by *Rule 26(b)(1), Fed. R. Civ. P.*:

> Parties **[*5]** may obtain discovery regarding any nonprivileged matter that is relevant to any party's claim or defense--including the existence, description, nature, custody, condition, and location of any documents or other tangible things and the identity and location of persons who know of any discoverable matter. For good cause, the court may order discovery of any matter relevant to the subject matter involved in the action. Relevant information need not be admissible at the trial if the discovery appears reasonably calculated to lead to the discovery of admissible evidence. All discovery is subject to the limitations imposed by *Rule 26(b)(2)(C)*.

4. *Rule 26(b)(2)(C)* incorporates the rule of proportionality. Thus, *Rule 26(b)(2)(C)* requires the Court to limit the extent of the discovery when, inter alia, "the burden or expense of the proposed discovery outweighs its likely benefit" or the information can be obtained from another, less burdensome, source.

5. The Court rejects Defendants' request to strike questions related to the European Commission investigation and the witnesses' conduct in Europe. In previous discovery disputes, Defendants have similarly argued that Plaintiffs are not entitled **[*6]** to information about the European conspiracy to fix the price of electrical carbon products, given this Court's decision that it lacks subject matter jurisdiction over claims of conspiracy to purchase these products abroad. *Emerson Elec. Co. v. Le Carbone Lorraine, S.A., 500 F.Supp.2d 437 (D.N.J. 2007)* ("Emerson I"). Plaintiffs maintain, however, that efforts to fix prices in the United States occurred, and may have been based, in Europe. In particular, Plaintiffs accuse LCL, a French business, of orchestrating a conspiracy targeted, at least in part, in the United States. Further, the European Commission, though it ultimately found insufficient evidence that the European cartel extended beyond Europe and the Middle East, was investigating the "same conspiracy" at issue here. *Emerson Elec. Co. v. Le Carbone Lorraine, S.A., No. 05-6042, 2008 U.S. Dist. LEXIS 72705, 2008 WL 4126602, at *8 (D.N.J. Aug. 27, 2008)* ("Emerson II"). Finally, the Court has reviewed the proposed questions for each of the three motions and does not find undue emphasis placed on European activity and does not find the burden of answering those questions that do pertain to European activities outweigh their relevance. Therefore, these questions **[*7]** will be permitted.

6. The Court likewise will not strike questions relating to the isostatic graphite industry. Defendants LCL and its North American subsidiaries pled guilty to a price-fixing conspiracy in the isostatic graphite industry. The Court has previously found that information about this conspiracy is relevant because "[s]imilar cartel activities undertaken in a similar marketplace may be probative of the motive, opportunity, intent, preparation, plan knowledge, identity or absence of mistake" of Defendants. *Emerson II, 2008 U.S. Dist. LEXIS 72705, [WL] at *6*. Furthermore, the Court finds that the few, relatively narrow, proposed questions on the isostatic graphite industry are focused on its connection to electrical carbon products and are not unduly burdensome, and should be permitted.

7. The Court further will not strike questions related to Mr. Emerson's guilty plea for obstruction of justice. Plaintiffs maintain, and Defendants do not contest, that Mr. Emerson pled guilty to obstructing the Department of Justice investigation into price-fixing in the electrical carbon products industry. It makes little difference that Mr. Emerson was convicted of obstruction of justice, not violating ***antitrust law***. The **[*8]** Court, therefore, finds this subject highly relevant and questioning on the subject would not be unduly burdensome and will be allowed.

8. The Court does accept Defendants' request that these probing questions be limited to the defined "relevant period" of October 1988 to September 2001. Plaintiffs have offered no defense for inquiring beyond this period - already a lengthy one. Information beyond this period has limited relevance and creates the risk of a truly limitless inquiry. The Court finds the period to be a reasonable, and necessary, limit tailored to the relevant time period.

9. The Court also orders Plaintiffs to permit Defendants to attend any examination proceedings. To the extent that the judiciary of the United Kingdom permit counsel for both parties to question the witnesses, Defendants are permitted to question the witnesses within the scope of Plaintiffs' examination. To the extent that the French judiciary will provide an official inquisitor, Defendants' questions are included with the proposed questions to be attached to the Court's request for international assistance. The Court has reviewed all proposed questions from both Plaintiffs and Defendants and concludes **[*9]** that all questions are proper for the purpose of these depositions.

10. An accompanying Order will be entered.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

HN1[] **Sherman Act, Claims**

A price-squeeze claim may not be brought under *§ 2* of the Sherman Act when a defendant is under no antitrust obligation to sell the inputs to a plaintiff in the first place.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN2[] Regulated Practices, Monopolies & Monopolization

Section 2 of the Sherman Act makes it unlawful to monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states, or with foreign nations. Ch. 647, 26 Stat. 209, 15 U.S.C.S. § 2. Simply possessing monopoly power and charging monopoly prices does not violate § 2; rather, the statute targets the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > Sherman Act > Claims

HN3[] Sherman Act, Claims

If a firm has no antitrust duty to deal with its competitors at wholesale, it certainly has no duty to deal under terms and conditions that the rivals find commercially advantageous.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN4[] Sherman Act, Claims

Cutting prices in order to increase business often is the very essence of competition. In cases seeking to impose antitrust liability for prices that are too low, mistaken inferences are especially costly because they chill the very conduct the antitrust laws are designed to protect. To avoid chilling aggressive price competition, the circumstances under which plaintiffs can state a Sherman Act claim by alleging that prices are too low are carefully limited. Specifically, to prevail on a predatory pricing claim, a plaintiff must demonstrate that: (1) the prices complained of are below an appropriate measure of its rival's costs; and (2) there is a dangerous probability that the defendant will be able to recoup its investment in below-cost prices. Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN5[] Anticompetitive & Predatory Practices, Predatory Pricing

As a general rule, the exclusionary effect of prices above a relevant measure of cost either reflects the lower cost structure of the alleged predator, and so represents competition on the merits, or is beyond the practical ability of a judicial tribunal to control without courting intolerable risks of chilling legitimate price cutting.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

HN6[] Anticompetitive & Predatory Practices, Predatory Hiring & Price Squeezes

An upstream monopolist with no duty to deal is free to charge whatever wholesale price it would like; ***antitrust law*** does not forbid lawfully obtained monopolies from charging monopoly prices. Similarly, the Sherman Act does not forbid--indeed, it encourages--aggressive price competition at the retail level, as long as the prices being charged are not predatory. If both the wholesale price and the retail price are independently lawful, there is no basis for imposing antitrust liability simply because a vertically integrated firm's wholesale price happens to be greater than or equal to its retail price.

Lawyers' Edition Display

Decision

[*836]** Internet service providers' (ISPs') claim that digital subscriber line (DSL) providers "squeezed" ISPs' profit margins held not cognizable under *15 U.S.C.S. § 2*, as (1) DSL providers lacked antitrust obligation to sell wholesale service to ISPs; and (2) there was no showing of retail predatory pricing.

Summary

Procedural posture: Respondent Internet service providers (ISPs) brought an action against petitioner providers of digital subscriber line (DSL) service for connecting to the Internet, alleging that the providers "squeezed" the ISPs' profit margins in setting retail prices. Upon the grant of a writ of certiorari, the providers appealed the judgment of the U.S. Court of Appeals for the Ninth Circuit which held that the claim was cognizable under *15 U.S.C.S. § 2*.

Overview: The providers participated in both the wholesale and retail markets for DSL service and, while the providers were otherwise not required to deal with the ISPs, federal approval of a prior merger required the providers to provide wholesale DSL service to the ISPs at a price no greater than retail. The ISPs contended that the providers raised wholesale prices while cutting retail prices, resulting in the ISPs being forced to pay the higher wholesale price while cutting their own retail prices to compete with the providers. The U.S. Supreme Court held that the ISPs' price-squeeze claim could not brought under *§ 2* since the providers were under no antitrust obligation to sell wholesale DSL service to the ISPs and there was no showing of predatory retail pricing. The providers' duty to sell to the ISPs arose from federal regulations rather than antitrust obligations under *§ 2*, there was no allegation that the providers' retail price was below cost, and, in the absence of a duty to deal at the wholesale level and no predatory pricing at the retail level, the providers **[***837]** were not required to set both wholesale and retail prices in a manner which preserved the ISPs' profit margins.

Outcome: The judgment which held that the ISPs' price-squeeze claim was cognizable under *§ 2* was reversed and the case was remanded for further proceedings. 5-4 Decision; 1 concurrence in the judgment.

Headnotes

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36.7 > PRICE SQUEEZE > Headnote:
LEdHN[1][] [1]

A price-squeeze claim may not be brought under *§ 2* of the Sherman Act when a defendant is under no antitrust obligation to sell the inputs to a plaintiff in the first place. (Roberts, Ch. J., joined by Scalia, Kennedy, Thomas, and Alito, JJ.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §14 > SHERMAN ACT -- MONOPOLIZATION > Headnote:
LEdHN[2][] [2]

Section 2 of the Sherman Act makes it unlawful to monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states, or with foreign nations. 15 U.S.C.S. § 2. Simply possessing monopoly power and charging monopoly prices does not violate § 2; rather, the statute targets the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. (Roberts, Ch. J., joined by Scalia, Kennedy, Thomas, and Alito, JJ.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §30.3 > REFUSAL TO DEAL > Headnote:
LEdHN[3][] [3]

If a firm has no antitrust duty to deal with its competitors at wholesale, it certainly has no duty to deal under terms and conditions that the rivals find commercially advantageous. (Roberts, Ch. J., joined by Scalia, Kennedy, Thomas, and Alito, JJ.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36.5 RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §41.5 > PREDATORY PRICING -- SHERMAN ACT > Headnote:
LEdHN[4][] [4]

Cutting prices in order to increase business often is the very essence of competition. In cases seeking to impose antitrust liability for prices that are too low, mistaken inferences are especially costly because they chill the very conduct the antitrust laws are designed to protect. To avoid chilling aggressive price competition, the circumstances under which plaintiffs can state a Sherman Act claim by alleging that prices are too low are carefully limited. Specifically, to prevail on a predatory pricing claim, a plaintiff must demonstrate that: (1) the prices complained of are below an appropriate measure of its rival's costs; and (2) there is a dangerous probability that the defendant will be able to recoup its investment in below-cost prices. Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition. (Roberts, Ch. J., joined by Scalia, Kennedy, Thomas, and Alito, JJ.) **[***838]**

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36.5 > PRICE CUTTING > Headnote:
LEdHN[5][] [5]

As a general rule, the exclusionary effect of prices above a relevant measure of cost either reflects the lower cost structure of the alleged predator, and so represents competition on the merits, or is beyond the practical ability of a judicial tribunal to control without courting intolerable risks of chilling legitimate price cutting. (Roberts, Ch. J., joined by Scalia, Kennedy, Thomas, and Alito, JJ.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36.7 RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §41.5 > WHOLESALE PRICES -- PREDATORY PRICES > Headnote:
LEdHN[6][] [6]

An upstream monopolist with no duty to deal is free to charge whatever wholesale price it would like; ***antitrust law*** does not forbid lawfully obtained monopolies from charging monopoly prices. Similarly, the Sherman Act does not forbid--indeed, it encourages--aggressive price competition at the retail level, as long as the prices being charged are not predatory. If both the wholesale price and the retail price are independently lawful, there is no basis for imposing antitrust liability simply because a vertically integrated firm's wholesale price happens to be greater than or equal to its retail price. (Roberts, Ch. J., joined by Scalia, Kennedy, Thomas, and Alito, JJ.)

Syllabus

[*438] **[***839]** **[**1112]** Petitioners (hereinafter AT&T) own infrastructure and facilities needed to provide "DSL" service, a method of connecting to the Internet at high speeds over telephone lines. As a condition for a recent merger, the Federal Communications Commission requires AT&T to provide wholesale DSL transport service to independent firms at a price no greater than the retail price of AT&T's DSL service. The plaintiffs in this case, respondents here, are independent Internet service providers that compete with AT&T in the retail DSL market in California. The plaintiffs do not own all the facilities needed to supply DSL service, and must lease wholesale DSL transport service from AT&T. They filed suit under *§ 2* of the Sherman Act, asserting that AT&T unlawfully "squeezed" their profit margins by setting a high price for the wholesale DSL transport service it sells and a low price for its own retail DSL service. This maneuver allegedly placed the plaintiffs at a competitive disadvantage, allowing AT&T to maintain monopoly power in the DSL market. AT&T moved for judgment on the pleadings, **[****2]** arguing that the plaintiffs' claims were foreclosed by *Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 410, 124 S. Ct. 872, 157 L. Ed. 2d 823*, in which this Court held that a firm with no antitrust duty to deal with its rivals has no obligation to provide those rivals with a "sufficient" level of service. The District Court found that AT&T had no antitrust duty to deal with the plaintiffs, but nonetheless denied the motion, holding that *Trinko* did not address price-squeeze claims. The court certified its order for interlocutory appeal on the question whether *Trinko* bars price-squeeze claims when the parties are required to deal by federal communications law, but not ***antitrust law***. The Ninth Circuit affirmed, holding that *Trinko* did not address the viability of price-squeeze claims, and thus the plaintiffs' complaint stated a potentially valid *§ 2* claim.

Held:

1. The case is not moot. The plaintiffs now agree that their claims must meet the *Brooke Group* test for predatory pricing, apparently apart from their price-squeeze theory. That test established two requirements for predatory pricing: below-cost retail pricing and a "'dangerous **[*439]** probability'" that the defendant will recoup any lost **[****3]** profits, see *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222-224, 113 S. Ct. 2578, 125 L. Ed. 2d 168*. Despite the plaintiffs' new position, the parties continue to seek different relief: AT&T seeks reversal of the decision below and dismissal of the complaint, while the plaintiffs seek leave to amend their complaint to allege a *Brooke Group* claim. It is also not clear that the plaintiffs have unequivocally abandoned their price-squeeze **[***840]** claims. Prudential concerns favor answering the question presented; absent a decision on the merits, the Circuit conflict that this Court **[**1113]** granted certiorari to resolve would persist. Pp. 5-7.

2. A price-squeeze claim may not be brought under *§ 2* when the defendant has no antitrust duty to deal with the plaintiff at wholesale. Pp. 7-17.

(a) Businesses are generally free to choose the parties with whom they will deal, as well as the prices, terms, and conditions of that dealing. See *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460* But in rare circumstances, a dominant firm may incur antitrust liability for purely unilateral conduct, such as charging "predatory" prices. *Brooke Group, supra, at 222-224, 113 S. Ct. 2578, 125 L. Ed. 2d 168*. There are also limited circumstances in which a firm's unilateral **[****4]** refusal to deal with its rivals can give rise to antitrust liability. See *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 608-611, 105 S. Ct. 2847, 86 L. Ed. 2d 467*. Here, plaintiffs do not allege predatory pricing, and the District Court concluded that there was no antitrust duty to deal. Plaintiffs challenge a different type of unilateral conduct in which a firm "squeezes" its competitors' profit margins. This requires the defendant to operate in both the wholesale ("upstream") and retail ("downstream") markets. By raising the wholesale price of inputs while cutting its own retail prices, the defendant can raise competitors' costs while putting downward pressure on their revenues. Price-squeeze plaintiffs assert that defendants must leave them a "fair" or "adequate" margin between wholesale and retail prices. Pp. 7-9.

(b) Where there is no duty to deal at the wholesale level and no predatory pricing at the retail level, a firm is not required to price both of these services in a manner that preserves its rivals' profit margins. Pp. 9-12.

(i) Any challenge to AT&T's *wholesale* prices is foreclosed by a straightforward application of *Trinko.* The claim in *Trinko* addressed the quality of Verizon's support **[****5]** services, while the claims in this case challenge AT&T's pricing structure. But for antitrust purposes, there is no meaningful distinction between price and nonprice components of a transaction. The nub of the complaint in both cases is identical--the plaintiffs alleged that the defendants (upstream monopolists) abused their power in the wholesale market to prevent rival firms from competing **[*440]** effectively in the retail market. But a firm with no antitrust duty to deal in the wholesale market has no obligation to deal under terms and conditions favorable to its competitors. See *Trinko, supra, at 410, 124 S. Ct. 872, 157 L. Ed. 2d 823*. Had AT&T simply stopped providing DSL transport service to the plaintiffs, it would not have run afoul of the Sherman Act. Thus, it was not required to offer this service at the wholesale prices the plaintiffs would have preferred. Pp. 9-10.

(ii) The other component of a price-squeeze claim is the assertion that the defendant's *retail* prices are "too low." Here too plaintiffs' claims find no support in existing antitrust doctrine. "[C]utting prices in order to increase business often is the very essence of competition." *Matsushita Elec. Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 594, 106 S. Ct. 1348, 89 L. Ed. 2d 538*. **[****6]** To avoid chilling aggressive price competition, the Court has carefully limited the **[***841]** circumstances under which plaintiffs can state a Sherman Act claim by alleging that the defendant's prices are too low. See *Brooke Group, supra, at 222-224, 113 S. Ct. 2578, 125 L. Ed. 2d 168*. The complaint at issue here has no allegation that AT&T's conduct met either *Brooke Group* requirement. Recognizing a price-squeeze claim where the defendant's retail price remains above cost would invite the **[**1114]** precise harm the Court sought to avoid in *Brooke Group*: Firms might raise retail prices or refrain from aggressive price competition to avoid potential antitrust liability. See *509 U.S., at 223, 113 S. Ct. 2578, 125 L. Ed. 2d 168*. Pp. 11-12.

(c) Institutional concerns also counsel against recognizing such claims. This Court has repeatedly emphasized the importance of clear rules in ***antitrust law***. Recognizing price-squeeze claims would require courts simultaneously to police both the wholesale and retail prices to ensure that rival firms are not being squeezed. Courts would be aiming at a moving target, since it is the *interaction* between these two prices that may result in a squeeze. Moreover, firms seeking to avoid price-squeeze liability will have no safe harbor for their pricing **[****7]** practices. The most commonly articulated standard for price squeezes is that the defendant must leave its rivals a "fair" or "adequate" margin between wholesale and retail prices; this test is nearly impossible for courts to apply without conducting complex proceedings like rate-setting agencies. Some *amici* argue that a price squeeze should be presumed if the defendant's wholesale price exceeds its retail price. But if both the wholesale price and the retail price are independently lawful, there is no basis for imposing antitrust liability simply because a vertically integrated firm's wholesale price is greater than or equal to its retail price. Pp. 12-15.

(d) The District Court on remand should consider whether an amended complaint filed by the plaintiffs states a claim upon which relief may be granted under the pleading standard articulated in *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 561-563, 127 S. Ct. 1955, 167 L. Ed. 2d 929*; whether plaintiffs should be **[*441]** given leave to amend their complaint to bring a *Brooke Group* claim; and such other matters properly before it. Pp. 15-17.

503 F.3d 876, reversed and remanded.

Counsel: Aaron Panner argued the cause for petitioners. **Deanne E. Maynard** argued the cause for the United States, as amicus curiae, by special leave of court. **Maxwell M. Blecher** argued the cause for respondents. **Richard M. Brunell** argued the cause for the American Antitrust Institute, as amicus curiae, by special leave of court.

Judges: Roberts, C. J., delivered the opinion of the Court, in which Scalia, Kennedy, Thomas, and Alito, JJ., **[****8]** joined. Breyer, J., filed an opinion concurring in the judgment, in which Stevens, Souter, and Ginsburg, JJ., joined *post*, p.___.

Opinion by: ROBERTS

Opinion

[*442] Chief Justice **Roberts** delivered the opinion of the Court.

The plaintiffs in this case, respondents here, allege that a competitor subjected them to a "price squeeze" in violation of *§ 2* of the Sherman Act. They assert that such a claim can arise when a vertically integrated firm sells inputs at wholesale and also sells finished goods or services at retail. If that firm has power in the wholesale market, it can simultaneously raise the wholesale price of inputs and cut the retail price of the finished good. This will have the effect of "squeezing" the profit margins of any competitors in the retail market. Those firms will have to pay more for the inputs they need; at the same time, they will have to cut their retail **[***842]** prices to match the other firm's prices. The question before us is whether such ***HN1***[] ***LEdHN[1]***[] [1] a **[**1115]** price-squeeze claim may be brought under *§ 2* of the Sherman Act when the defendant is under no antitrust obligation to sell the inputs to the plaintiff in the first place. We hold that no such claim may be brought.

I

This case involves the market for digital subscriber line **[****9]** (DSL) service, which is a method of connecting to the Internet at high speeds over telephone lines. AT&T[1] owns much of the infrastructure and facilities needed to provide DSL service in California. In particular, AT&T controls most of what is known as the "last mile"--the lines that connect homes and businesses to the telephone network. Competing DSL providers must generally obtain access to AT&T's facilities in order to serve their customers.

Until recently, the Federal Communications Commission (FCC) required incumbent phone companies such as AT&T **[*443]** to sell transmission service to independent DSL providers, under the theory that this would spur competition. See *In re Appropriate Framework for Broadband Access to Internet Over Wireline Facilities, 20 FCC Rcd. 14853, 14868 (2005)*. In 2005, the FCC largely abandoned this forced-sharing requirement in light of the emergence of a competitive market beyond DSL for high-speed Internet service; DSL now **[****10]** faces robust competition from cable companies and wireless and satellite services. *Id., at 14879-14887*. As a condition for a recent merger, however, AT&T remains bound by the mandatory interconnection requirements, and is obligated to provide wholesale "DSL transport" service to independent firms at a price no greater than the retail price of AT&T's DSL service. *In re AT&T Inc., 22 FCC Rcd. 5662, 5814 (2007)*.

The plaintiffs are four independent Internet service providers (ISPs) that compete with AT&T in the retail DSL market. Plaintiffs do not own all the facilities needed to supply their customers with this service. They instead lease DSL transport service from AT&T pursuant to the merger conditions described above. AT&T thus participates in the DSL market at both the wholesale and retail levels; it provides plaintiffs and other independent ISPs with wholesale DSL transport service, and it also sells DSL service directly to consumers at retail.

In July 2003, the plaintiffs brought suit in District Court, alleging that AT&T violated *§ 2* of the Sherman Act, *15 U.S.C. § 2*, by monopolizing the DSL market in California. The complaint alleges that AT&T refused to deal **[****11]** with the plaintiffs, denied the plaintiffs access to essential facilities, and engaged in a "price squeeze." App. 18-19. Specifically, plaintiffs contend that AT&T squeezed their profit margins by setting a high wholesale price for DSL transport and a low retail price for DSL Internet service. This maneuver allegedly "exclude[d] and

---

[1] Petitioners consist of several corporate entities and subsidiaries, and their names and corporate structures have changed frequently over the course of this litigation. For simplicity, we will refer to all the petitioners as "AT&T."

unreasonably impede[d] competition," **[*444]** thus allowing AT&T to "preserve and maintain its monopoly control of DSL access to the Internet." *Ibid.*

In *Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, LLP,* ***[***843]*** *540 U.S. 398, 410, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*, we held that a firm with no antitrust duty to deal with its rivals at all is under no obligation to provide those rivals with a "sufficient" level of service. Shortly after we issued that decision, AT&T moved for judgment on the pleadings, arguing **[**1116]** that plaintiffs' claims in this case were foreclosed by *Trinko.* The District Court held that AT&T had no antitrust duty to deal with plaintiffs, App. to Pet. for Cert. 77a-85a, but it denied the motion to dismiss with respect to the price-squeeze claims, *id.*, at 86a-90a. The court acknowledged that AT&T's argument "has a certain logic to it," but held that *Trinko* "simply **[****12]** does not involve price-squeeze claims." App. to Pet. for Cert. 86a. The District Court also noted that price-squeeze claims have been recognized by several Circuits and "are cognizable under existing antitrust standards." *Id.*, at 89a, and n 27.

At the District Court's request, plaintiffs then filed an amended complaint providing greater detail about their price-squeeze claims. AT&T again moved to dismiss, arguing that price-squeeze claims could only proceed if they met the two established requirements for predatory pricing: below-cost retail pricing and a "'dangerous probability'" that the defendant will recoup any lost profits. See *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222-224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*. The District Court did not reach the issue whether *all* price-squeeze claims must meet the *Brooke Group* requirements, because it concluded that the amended complaint, "generously construed," satisfied those criteria. App. to Pet. for Cert. 46a-49a, 56a. The court also certified its earlier order for interlocutory appeal on the question whether "*Trinko* bars price squeeze claims where the parties are compelled to deal under the federal communications laws." *Id.*, at 56a-57a.

[*445] On interlocutory **[****13]** appeal, the Court of Appeals for the Ninth Circuit affirmed the District Court's denial of AT&T's motion for judgment on the pleadings on the price-squeeze claims. *linkLine Communications, Inc. v. SBC California, Inc., 503 F.3d 876 (2007)*. The court emphasized that "*Trinko* did not involve a price squeezing theory." *Id., at 883*. Because "a price squeeze theory formed part of the fabric of traditional* ***antitrust law*** prior to *Trinko*," the Court of Appeals concluded that "those claims should remain viable notwithstanding either the telecommunications statutes or *Trinko.*" *Ibid.* Based on the record before it, the court held that plaintiffs' original complaint stated a potentially valid claim under *§ 2* of the Sherman Act.

Judge Gould dissented, noting that "the notion of a 'price squeeze' is itself in a squeeze between two recent Supreme Court precedents." *Id., at 886*. A price-squeeze claim involves allegations of both a high wholesale price and a low retail price, so Judge Gould analyzed each component separately. He concluded that "*Trinko* insulates from antitrust review the setting of the upstream price." *Id., at 886-887*. With respect to the downstream price, he argued that "the retail side of a price squeeze cannot be considered to create an **[****14]** antitrust violation if the retail pricing does not satisfy the requirements of *Brooke Group*, which set unmistakable limits on what can be considered to be predatory within the meaning of the antitrust laws." *Id., at 887* (citing *Brooke Group, supra, at 222-224, 113 S. Ct. 2578, 125 L. Ed. 2d 168*). Judge Gould concluded that the plaintiffs' complaint did not **[***844]** satisfy these requirements because it contained no allegations that the retail price was set below cost and that those losses could later be recouped. *503 F.3d, at 887*. Judge Gould would have allowed the plaintiffs to amend their complaint if they could, in good faith, raise predatory pricing claims meeting the *Brooke Group* requirements. *503 F.3d, at 887*.

We granted certiorari, *554 U.S. 916, 128 S. Ct. 2957, 171 L. Ed. 2d 883 (2008)*, to resolve a conflict over whether a plaintiff can bring price-squeeze **[*446]** claims under *§ 2* of the Sherman Act when the defendant **[**1117]** has no antitrust duty to deal with the plaintiff. See *Covad Communs. Co. v. Bell Atl. Corp., 398 F.3d 666, 673-674, 365 U.S. App. D.C. 78 (CADC 2005)* (holding that *Trinko* bars such claims). We reverse.

II

This case has assumed an unusual posture. The plaintiffs now assert that they agree with Judge Gould's dissenting position that price-squeeze claims must meet the *Brooke Group* **[****15]** requirements for predatory pricing. They ask us to vacate the decision below in their favor and remand with instructions that they be given leave to amend their complaint to allege a *Brooke Group* claim. In other words, plaintiffs are no longer pleased with their initial theory of the case, and ask for a mulligan to try again under a different theory. Some *amici* argue that the case is moot in light of this confession of error. They contend that "[w]ith both petitioners and respondents now aligned on [the same] side of the question presented, *no party* with a concrete stake in this case's outcome is advocating for the contrary position." Brief for COMPTEL 6.

We do not think this case is moot. First, the parties continue to seek different relief. AT&T asks us to reverse the judgment of the Court of Appeals and remand with instructions to dismiss the complaint at issue. The plaintiffs ask that we vacate the judgment and remand with instructions that they be given leave to amend their complaint. The parties thus continue to be adverse not only in the litigation as a whole, but in the specific proceedings before this Court.

Second, it is not clear that the plaintiffs have unequivocally abandoned **[****16]** their price-squeeze claims. In their brief and at oral argument, the plaintiffs continue to refer to their "pricing squeeze claim." See Brief for Respondents 13. They appear to acknowledge that those claims must meet the *Brooke Group* requirements, but it is not clear whether they believe the necessary showing can be made in at least partial **[*447]** reliance on the sort of pricesqueeze theory accepted by the Court of Appeals. At one point, for example, the plaintiffs suggest that "the DSL transport price" may be pertinent to their claims going forward under the theory of Judge Gould's dissent; that opinion, however, concluded that *Trinko* "in essence takes the issu[e] of wholesale pricing out of the case." *503 F.3d at 886*. Given this ambiguity, the case before us remains a live dispute appropriate for decision. Cf. *Friends of Earth, Inc. v. Laidlaw Environmental Services (TOC), Inc., 528 U.S. 167, 189, 120 S. Ct. 693, 145 L. Ed. 2d 610 (2000)* (a party's voluntary conduct renders a case moot only if it is "'absolutely clear'" the party will take that course of action).

Amici also argue that we should dismiss the writ of certiorari because of the "lack of adversarial presentation" by an interested party. Brief for **[***845]** COMPTEL 7. To **[****17]** the contrary, prudential concerns favor our answering the question presented. Plaintiffs defended the Court of Appeals' decision at the certiorari stage, and the parties have invested a substantial amount of time, effort, and resources in briefing and arguing the merits of this case. In the absence of a decision from this Court on the merits, the Court of Appeals' decision would presumably remain binding precedent in the Ninth Circuit, and the Circuit conflict we granted certiorari to resolve would persist. Two *amici* have submitted briefs defending the Court of Appeals' decision on the merits, and we granted the motion of one of those *amici* to participate in oral argument. *555 U.S. 1029, 129 S. Ct. 617, 172 L. Ed. 2d 454 (2008)*. We think it appropriate to proceed to address the question presented.

[1118]** III

A

HN2[] ***LEdHN[2]***[] [2] *Section 2* of the Sherman Act makes it unlawful to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations." Ch. 647, 26 Stat. 209, *15 U.S.C. § 2*. Simply possessing **[*448]** monopoly power and charging monopoly prices does not violate *§ 2*; rather, the statute targets "the willful acquisition or maintenance of that power **[****18]** as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*.

As a general rule, businesses are free to choose the parties with whom they will deal, as well as the prices, terms, and conditions of that dealing. See *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)*. But there are rare instances in which a dominant firm may incur antitrust liability for purely unilateral conduct. For example, we have ruled that firms may not charge "predatory" prices--below-cost prices that drive rivals out of the market and allow the monopolist to raise its prices later and recoup its losses. *Brooke Group, 509 U.S., at 222-224, 113 S. Ct. 2578, 125 L. Ed. 2d 168*. Here, however, the complaint at issue does not contain allegations meeting those requirements. App. 10-24.

There are also limited circumstances in which a firm's unilateral refusal to deal with its rivals can give rise to antitrust liability. See *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 608-611, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*. Here, however, the District Court held that AT&T had no such antitrust duty to deal with its competitors, App. to Pet. for **[****19]** Cert. 84a-85a, and this holding was not challenged on appeal.[2]

[*449] The challenge here focuses on retail prices--where there is no predatory pricing--and the terms of dealing--where there is no duty to **[***846]** deal. Plaintiffs' price-squeeze claims challenge a different type of unilateral conduct in which a firm "squeezes" the profit margins of its competitors. This requires the defendant to be operating in two markets, a wholesale ("upstream") market and a retail ("downstream") market. A firm with market power in the upstream market can squeeze its downstream competitors **[****20]** by raising the wholesale price of inputs while cutting its own retail prices. This will raise competitors' costs (because they will have to pay more for their inputs) and lower their revenues (because they will have to match the dominant firm's low retail price). Price-squeeze plaintiffs assert that defendants must leave them a "fair" or "adequate" margin between the wholesale price and the retail price. In this case, we consider whether a plaintiff can state a price-squeeze claim when the defendant has no obligation under the antitrust laws to deal with the plaintiff at wholesale.

[1119]** B

1. A straightforward application of our recent decision in *Trinko* forecloses any challenge to AT&T's *wholesale* prices. In *Trinko*, Verizon was required by statute to lease its network elements to competing firms at wholesale rates. *540 U.S., at 402-403, 124 S. Ct. 872, 157 L. Ed. 2d 823*. The plaintiff--a customer of one of Verizon's rivals--asserted that Verizon denied its competitors access to interconnection support services, making it difficult for those competitors to fill their customers' orders. *Id., at 404-405, 124 S. Ct. 872, 157 L. Ed. 2d 823*. The complaint alleged that this conduct in the upstream market violated *§ 2* of the Sherman Act by impeding the ability **[****21]** of independent carriers to compete in the downstream market for local telephone service. *Ibid.*

We held that the plaintiff's claims were not actionable under *§ 2*. Given that Verizon had no antitrust duty to deal with its rivals at all, we concluded that "Verizon's alleged **[*450]** insufficient assistance in the provision of service to rivals" did not violate the Sherman Act. *Id., at 410, 124 S. Ct. 872, 157 L. Ed. 2d 823*. *Trinko* thus makes clear that ***HN3***[] ***LEdHN[3]***[] [3] if a firm has no antitrust duty to deal with its competitors at wholesale, it certainly has no duty to deal under terms and conditions that the rivals find commercially advantageous.

In this case, as in *Trinko*, the defendant has no antitrust duty to deal with its rivals at wholesale; any such duty arises only from FCC regulations, not from the Sherman Act. See *supra, at 448, 172 L. Ed. 2d, at 845-846*. There is no meaningful distinction between the "insufficient assistance" claims we rejected in *Trinko* and the plaintiffs' price-squeeze claims in the instant case. The *Trinko* plaintiff challenged the quality of Verizon's interconnection service, while this case involves a challenge to AT&T's pricing structure. But for antitrust purposes, there is no reason to distinguish between price and nonprice components of **[****22]** a transaction. See, *e.g.*, *American Telephone & Telegraph Co. v. Central Office Telephone, Inc., 524 U.S. 214, 223, 118 S. Ct. 1956, 141 L. Ed. 2d 222 (1998)* ("Any claim for excessive rates can be couched as a claim for inadequate services and vice versa"). The nub of the complaint in both *Trinko* and this case is identical--the plaintiffs alleged that the defendants (upstream monopolists) abused their power in the wholesale market to prevent rival firms from competing effectively in **[***847]** the retail market. *Trinko* holds that such claims are not cognizable under the Sherman Act in the absence of an antitrust duty to deal.

---

[2] The Court of Appeals assumed that any duty to deal arose only from FCC regulations, *503 F.3d 876, 878-879, n 6*(CA9 2007), and the question on which we granted certiorari made the same assumption. Even aside from the District Court's reasoning, App. to Pet. for Cert. 77a-85a, it seems quite unlikely that AT&T would have an antitrust duty to deal with the plaintiffs. Such a duty requires a showing of monopoly power, but--as the FCC has recognized, *In re Appropriate Framework for Broadband Access to Internet Over Wireline Facilities, 20 FCC Rcd. 14853, 14879-14887* --the market for high-speed Internet service is now quite competitive; DSL providers face stiff competition from cable companies and wireless and satellite providers.

The District Court and the Court of Appeals did not regard *Trinko* as controlling because that case did not directly address price-squeeze claims. *503 F.3d at 883*; App. to Pet. for Cert. 86a; see also Brief for COMPTEL as *Amicus Curiae* 27-30. This is technically true, but the reasoning of *Trinko* applies with equal force to price-squeeze claims. AT&T could have squeezed its competitors' profits just as effectively by providing poor-quality interconnection service to the plaintiffs, as Verizon allegedly did in *Trinko.* But a firm with no duty to deal in the wholesale market has no **[*451]** obligation to deal under terms and conditions **[****23]** favorable to its competitors. If AT&T had simply stopped providing DSL transport service to the plaintiffs, it would not have run afoul of the Sherman Act. Under these circumstances, AT&T was not required to offer this service at the wholesale prices the plaintiffs would have preferred.

2. The other component of a price-squeeze claim is the assertion that the defendant's *retail* prices are "too low." **[**1120]** Here too plaintiffs' claims find no support in our existing antitrust doctrine.

HN4[] ***LEdHN[4]***[] [4] "[C]utting prices in order to increase business often is the very essence of competition." *Matsushita Elec. Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 594, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*. In cases seeking to impose antitrust liability for prices that are too low, mistaken inferences are "especially costly, because they chill the very conduct the antitrust laws are designed to protect." *Ibid.*; see also *Brooke Group, 509 U.S., at 226, 113 S. Ct. 2578, 125 L. Ed. 2d 168*; *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 121-122, n 17, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. To avoid chilling aggressive price competition, we have carefully limited the circumstances under which plaintiffs can state a Sherman Act claim by alleging that prices are too low. Specifically, to prevail on a predatory **[****24]** pricing claim, a plaintiff must demonstrate that: (1) "the prices complained of are below an appropriate measure of its rival's costs"; and (2) there is a "dangerous probability" that the defendant will be able to recoup its "investment" in below-cost prices. *Brooke Group, supra, at 222-224, 113 S. Ct. 2578, 125 L. Ed. 2d 168*. "Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition." *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 340, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*.

In the complaint at issue in this interlocutory appeal, App. 10-24, there is no allegation that AT&T's conduct met either of the *Brooke Group* requirements. Recognizing a price-squeeze claim where the defendant's retail price remains above cost would invite the precise harm we sought to avoid **[*452]** in *Brooke Group*: Firms might raise their retail prices or refrain from aggressive price competition to avoid potential antitrust liability. See *509 U.S., at 223, 113 S. Ct. 2578, 125 L. Ed. 2d 168* (***HN5***[] ***LEdHN[5]***[] [5] "As a general rule, the exclusionary effect of prices above a relevant measure of cost either reflects the lower cost structure of the alleged predator, and so represents competition on the merits, or is beyond the practical ability **[****25]** of a judicial tribunal to control without **[***848]** courting intolerable risks of chilling legitimate price cutting").

3. Plaintiffs' price-squeeze claim, looking to the relation between retail and wholesale prices, is thus nothing more than an amalgamation of a meritless claim at the retail level and a meritless claim at the wholesale level. If there is no duty to deal at the wholesale level and no predatory pricing at the retail level, then a firm is certainly not required to price *both* of these services in a manner that preserves its rivals' profit margins.[3]

C

---

[3] Like the Court of Appeals, *503 F.3d at 880*, *amici* argue that price-squeeze claims have been recognized by Courts of Appeals for many years, beginning with Judge Hand's opinion in *United States v. Aluminum Co. of America, 148 F.2d 416 (CA2 1945)* (*Alcoa*). In that case, the Government alleged that Alcoa was using its monopoly power in the upstream aluminum ingot market to squeeze the profits of downstream aluminum sheet fabricators. The court concluded: "That it was unlawful to set the price of 'sheet' so low and hold the price of ingot so high, seems to us unquestionable, provided, as we have held, that on this record the price of ingot must **[****26]** be regarded as higher than a 'fair price.'" *Id., at 438*. Given developments in economic theory and antitrust jurisprudence since *Alcoa*, we find our recent decisions in *Trinko* and *Brooke Group* more pertinent to the question before us.

1. Institutional concerns also counsel against recognition of such claims. We have repeatedly emphasized the importance **[**1121]** of clear rules in ***antitrust law***. Courts are ill suited "to act as central planners, identifying the proper price, quantity, and other terms of dealing." *Trinko, 540 U.S., at 408, 124 S. Ct. 872, 157 L. Ed. 2d 823*. "'No court should impose a duty to deal that it cannot **[*453]** explain or adequately and reasonably supervise. The problem should be deemed irremedia[ble] by ***antitrust law*** when compulsory access requires the court to assume the day-to-day controls characteristic of a regulatory agency.'" *Id., at 415, 124 S. Ct. 872, 157 L. Ed. 2d 823* (quoting Areeda, Essential Facilities: An Epithet in Need of Limiting Principles, 58 Antitrust L. J. 841, 853 (1989)); see also *Concord v. Boston Edison Co., 915 F.2d 17, 25 (CA1 1990)* (Breyer, C. J.) ("[A]ntitrust courts normally avoid direct price administration, relying on rules and remedies . . . that are easier to administer").

It is difficult enough for courts **[****27]** to identify and remedy an alleged anticompetitive practice at one level, such as predatory pricing in retail markets or a violation of the duty-to-deal doctrine at the wholesale level. See *Brooke Group, supra, at 225, 113 S. Ct. 2578, 125 L. Ed. 2d 168* (predation claims "requir[e] an understanding of the extent and duration of the alleged predation, the relative financial strength of the predator and its intended victim, and their respective incentives and will"); *Trinko, supra, at 408, 124 S. Ct. 872, 157 L. Ed. 2d 823*. Recognizing price-squeeze claims would require courts simultaneously to police both the wholesale and retail prices to ensure that rival firms are not being squeezed. And courts would be aiming at a moving target, since it is the *interaction* between these two prices that may result in a squeeze.

Perhaps most troubling, firms that seek to avoid price-squeeze liability will have no safe harbor for their pricing practices. See *Concord, supra, at 22* (antitrust rules "must be clear enough for lawyers to explain them to clients"). At least in the predatory pricing context, firms know they will not incur liability as long as their retail prices are above cost. *Brooke Group, supra, at 223, 113* ***[***849]*** *S. Ct. 2578, 125 L. Ed. 2d 168*. No such guidance is available for price-squeeze **[****28]** claims. See, *e.g.*, 3B P. Areeda & H. Hovenkamp, ***Antitrust Law*** P 767c, p 138 (3d ed. 2008) ("[A]ntitrust faces a severe problem not only in recognizing any *§ 2* [price-squeeze] offense, but also in formulating a suitable remedy").

[*454] The most commonly articulated standard for price squeezes is that the defendant must leave its rivals a "fair" or "adequate" margin between the wholesale price and the retail price. See *Concord, supra, at 23-25*; *Alcoa, 148 F.2d 416, 437-438 (CA2 1945)*. One of our colleagues has highlighted the flaws of this test in Socratic fashion:

> "[H]ow is a judge or jury to determine a 'fair price?' Is it the price charged by other suppliers of the primary product? None exist. Is it the price that competition 'would have set' were the primary level not monopolized? How can the court determine this price without examining costs and demands, indeed without acting like a rate-setting regulatory agency, the rate-setting proceedings of which often last for several years? Further, how is the court to decide the proper size of the price 'gap?' Must it be large enough for all independent competing firms to make a 'living profit,' no matter how inefficient they may be? . . **[****29]** . And how should the court respond when costs or demands change over time, as they inevitably will?" *Concord, supra, at 25*.

Some *amici* respond to these concerns by proposing a "transfer price test" for identifying an unlawful price squeeze: A price squeeze should be presumed if the upstream monopolist could **[**1122]** not have made a profit by selling at its retail rates if it purchased inputs at its own wholesale rates. Brief for American Antitrust Institute (AAI) 30; Brief for COMPTEL 16-19; see *Ray v. Indiana & Mich. Elec. Co., 606 F. Supp. 757, 776-777 (ND Ill. 1984)*. Whether or not that test is administrable, it lacks any grounding in our antitrust jurisprudence. ***HN6***[] ***LEdHN[6]***[] [6] An upstream monopolist with no duty to deal is free to charge whatever wholesale price it would like; ***antitrust law*** does not prohibit lawfully obtained monopolies from charging monopoly prices. *Trinko, supra, at 407, 124 S. Ct. 872, 157 L. Ed. 2d 823* ("The mere possession of monopoly power, and the concomitant charging of monopoly prices, is not only not unlawful; it **[*455]** is an important element of the free-market system"). Similarly, the Sherman Act does not forbid--indeed, it *encourages*--aggressive price competition at the retail level, as long as the prices **[****30]** being charged are not predatory. *Brooke Group, 509 U.S., at 223-224, 113 S. Ct. 2578, 125 L. Ed. 2d 168*. If both the wholesale price and the retail price are independently lawful, there is no basis for imposing antitrust liability simply because a vertically integrated firm's wholesale price happens to be greater than or equal to its retail price.

2. *Amici* assert that there are circumstances in which price squeezes may harm competition. For example, they assert that price squeezes may raise entry barriers that fortify the upstream monopolist's position; they also contend that price squeezes may impair nonprice competition and innovation in the downstream market by driving independent firms out of business. See Brief for AAI 11-15; *Concord, supra, at 23-24*.

The problem, however, is that *amici* have not identified any independent **[***850]** competitive harm caused by price squeezes above and beyond the harm that would result from a duty-to-deal violation at the wholesale level or predatory pricing at the retail level. See 3A P. Areeda & H. Hovenkamp, ***Antitrust Law*** P 767c, p 126 (2d ed. 2002) ("[I]t is difficult to see any *competitive* significance [of a price squeeze] apart from the consequences of vertical integration itself"). **[****31]** To the extent a monopolist violates one of these doctrines, the plaintiffs have a remedy under existing law. We do not need to endorse a new theory of liability to prevent such harm.

IV

Lastly, as mentioned above, plaintiffs have asked us for leave to amend their complaint to bring a *Brooke Group* predatory pricing claim. We need not decide whether leave to amend should be granted. Our grant of certiorari was limited to the question whether price-squeeze claims are cognizable in the absence of an antitrust duty to deal. The **[*456]** Court of Appeals addressed only AT&T's motion for judgment on the pleadings on the plaintiffs' *original* complaint.[4] For the reasons stated, **[**1123]** we hold that the price-squeeze claims set forth in that complaint are not cognizable under the Sherman Act.

Plaintiffs have also filed an amended complaint, and the District Court concluded that this complaint, generously construed, could be read as alleging conduct that met the *Brooke Group* requirements for predatory pricing. App. to Pet. for Cert. 47a-52a, 56a. That order, however, applied the "no set of facts" pleading standard that we have since rejected as too lenient. See *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 561-563, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. It is for the District Court on remand to consider whether the amended complaint states a claim upon which relief may be granted in light of the new pleading standard **[****33]** we articulated in *Twombly*, whether plaintiffs should be given leave to amend their complaint to bring a claim under *Brooke Group*, and such other matters properly before it. Even if the amended complaint is further amended to add a *Brooke Group* claim, it may not survive a motion to dismiss. For if AT&T can bankrupt the plaintiffs by refusing to deal altogether, the plaintiffs must demonstrate why the law prevents AT&T from putting them out of **[*457]** business by pricing them out of the market. Nevertheless, such questions are for the District Court to decide in the first instance. We do not address these issues here, as they are outside the scope of the question presented and were not addressed by the Court of Appeals in the decision below. See *Cutter v. Wilkinson, 544 U.S. 709, 718, n 7, 125 S. Ct. 2113, 161 L. Ed. 2d* ***[***851]*** *1020 (2005)* ("[W]e are a court of review, not of first view").

* * *

Trinko holds that a defendant with no antitrust duty to deal with its rivals has no duty to deal under the terms and conditions preferred by those rivals. *540 U.S., at 409-410, 124 S. Ct. 872, 157 L. Ed. 2d 823*. *Brooke Group* holds that low prices are only actionable under the Sherman Act when the prices are below cost and there is a dangerous probability that the predator will be **[****34]** able to recoup the profits it loses from the low prices. *509 U.S., at 222-224, 113 S. Ct. 2578, 125 L. Ed. 2d 168*. In this case, plaintiffs have not stated a duty-to-deal claim under *Trinko* and have not stated a predatory pricing claim under *Brooke Group.* They have nonetheless tried to join a wholesale

---

[4] We note a procedural irregularity with this case: Normally, an amended complaint supersedes the original complaint. See 6 C. Wright & A. Miller, Federal Practice & Procedure § 1476, pp 556-557 (2d ed. 1990). Here, the District Court addressed the amended complaint in its 2005 order, App. to Pet. for Cert. 36a-52a, but the court only certified its 2004 order--addressing the *original* complaint--for interlocutory appeal, **[****32]** *id.*, at 56a-57a. Both parties, as well as the Solicitor General, have expressed confusion about whether the amended complaint and the 2005 order are properly before this Court. See Brief for Petitioners 9, n 6 (noting "some ambiguity" about which order was certified); Brief for United States as *Amicus Curiae* 17 ("[I]t is unclear whether the 2005 Order and the amended complaint are properly at issue in this interlocutory appeal"); Brief for Respondents 8-10. The Court of Appeals majority did not address any of the District Court's holdings from the 2005 order, so we decline to consider those issues at this time.

claim that cannot succeed with a retail claim that cannot succeed, and alchemize them into a new form of antitrust liability never before recognized by this Court. We decline the invitation to recognize such claims. Two wrong claims do not make one that is right.

The judgment of the Court of Appeals is reversed, and the case is remanded for further proceedings consistent with this opinion.

It is so ordered.

Concur by: BREYER

Concur

Justice **Breyer** with whom Justice **Stevens** Justice **Souter** and Justice **Ginsburg** join, concurring in the judgment.

I would accept respondents' concession that the Ninth Circuit majority's "price squeeze" holding is wrong, I would vacate the Circuit's decision, and I would remand the case in order to allow the District Court to determine whether respondents may proceed with their "predatory pricing" claim **[*458]** as set forth in Judge Gould's dissenting Ninth Circuit opinion. *linkline Communs., Inc. v. SBC Cal, Inc., 503 F.3d 876, 887 (2007)*.

[1124]** A **[****35]** "price squeeze" claim finds its natural home in a Sherman Act *§ 2* monopolization case where the Government as plaintiff seeks to show that a defendant's monopoly power rests, not upon "skill, foresight and industry," *United States v. Aluminum Co. of America, 148 F.2d 416, 430 (CA2 1945)* *(Alcoa)*, but upon exclusionary conduct, *United States v. Grinnell Corp., 384 U.S. 563, 576, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. As this Court pointed out in *Verizon Communications Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*, the "'means of illicit exclusion, like the means of legitimate competition, are myriad.'" *Id., at 414, 124 S. Ct. 872, 157 L. Ed. 2d 823* (quoting *United States v. Microsoft Corp., 346 U.S. App. D.C. 330, 253 F.3d 34, 58 (CADC 2001)* (en banc) *(per curiam)*). They may involve a "course of dealing" that, even if profitable, indicates a "willingness to forsake short-term profits to achieve an anticompetitive end." *Trinko, supra, at 409, 124 S. Ct. 872, 157 L. Ed. 2d 823*. See, *e.g.*, *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 610-611, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*; Complaint in *United States* v. *International Business Machines Corp.*, Civil Action No. 69 Civ. 200 (SDNY, filed Jan. 17, 1969), P 20(c), reprinted in F. Fisher, J. McGowan, & J. Greenwood, **[***852]** Folded, Spindled, and Mutilated: Economic **[****36]** Analysis and *U. S.* v. *IBM*, App. 357 (1983). And, as Judge Hand wrote many years ago, a "price squeeze" may fall within that latter category. *Alcoa, supra, at 437-438*. As a matter of logic, it may be that a particular price squeeze can only be exclusionary if a refusal by the monopolist to sell to the "squeezed customer" would also be exclusionary. But a court, faced with a price squeeze rather than a refusal to deal, is unlikely to find the latter (hypothetical) question any easier to answer than the former.

I would try neither to answer these hypothetical questions here nor to foreshadow their answer. We have before us a regulated firm. During the time covered by the complaint, **[*459]** petitioners were required to provide wholesale digital subscriber line (DSL) transport service as a common carrier, charging "just and reasonable" rates that were not "unreasonabl[y] discriminat[ory]." *47 U.S.C. §§ 201(b)*, *202(a) (2000 ed.)*. And, in my view, a purchaser from a regulated firm (which, if a natural monopolist, is lawfully such) cannot win an antitrust case simply by showing that it is "squeezed" between the regulated firm's wholesale price (to the plaintiff) and its retail price (to customers for whose **[****37]** business both firms compete). When a regulatory structure exists to deter and remedy anticompetitive harm, the costs of antitrust enforcement are likely to be greater than the benefits. See *Concord v. Boston Edison Co., 915 F.2d 17, 26-29 (CA1 1990)*. Cf. 3 P. Areeda & D. Turner, ***Antitrust Law*** PP 834-836, pp 344-355 (1978) (whether a particular course of conduct counts as "exclusionary" for antitrust purposes depends upon a host of factors, including, for example, the market position of the defendant, the nature of the market, and the nature of the defendant's conduct).

Unlike *Concord,* the regulators here controlled prices only at the wholesale level. See *915 F.2d at 29*. But respondents do not claim that that regulatory fact makes any difference; and rightly so, for as far as I can tell, respondents could have gone to the regulators and asked for petitioners' wholesale prices to be lowered in light of the alleged price squeeze. Cf. *FPC v. Conway Corp., 426 U.S. 271, 279, 96 S. Ct. 1999, 48 L. Ed. 2d 626 (1976)*; 3 Areeda & Turner, *supra*, P 726e, at 219-220.

Respondents now seek to show only that the defendant engaged in predatory pricing, within the terms of this Court's decision **[**1125]** in *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*. **[****38]** The District Court can determine whether there is anything in the procedural history of this case that bars respondents from asserting their predatory pricing claim. And if not, it can decide the merits of that claim. As I said, I would remand the case so that it can do so.

Opinion

[*1125] *ORDER RE: DEFENDANT'S MOTION TO DISMISS (Doc. # 869)*

Presently before this Court is Defendant Reliant Energy, Inc.'s Motion to Dismiss for Lack of Personal **[**23]** Jurisdiction (Doc. # 869), [1] filed on March 3, 2008. Plaintiffs filed an Opposition (Doc. # 1103) and supporting declaration (Doc. # 1104) on June **[*1126]** 4, 2008. Defendant Reliant Energy, Inc. filed a Reply (Doc. # 1185) on June 24, 2008.

I. BACKGROUND

A. Procedural Background

This case is one of many in consolidated Multidistrict Litigation arising out of the energy crisis of 2000-2001. Plaintiffs originally filed this action in the Circuit Court, Dane County, Wisconsin. (Notice of Removal [Doc. # 2 in 2:07-CV-01019-PMP-PAL], Compl.) Defendants removed the case to the United States District Court for the District of Wisconsin. (*Id.*) The Judicial Panel on Multidistrict Litigation entered a Transfer Order pursuant to *28 U.S.C. § 1407* centralizing the foregoing action in this Court for coordinated or consolidated pretrial proceedings.

Plaintiffs Arandell Corporation, Merrick's, Inc., Safety-Kleen Systems, Inc., Sargento Foods, Inc., and Ladish Co., Inc. are Wisconsin corporations. (Corrected Second Am. Compl. [Doc. # 190 in 2:07-CV-01019-PMP-PAL] [2] at 5-6.) According to the Corrected Second Amended Complaint **[**24]** ("SAC"), Defendants are natural gas companies that buy, sell, transport, and store natural gas, including their own and their affiliates' production, in the United States and in the State of Wisconsin. (*Id.* at 6-51.) In this litigation, Plaintiffs allege Defendants conspired to engage in anti-competitive activities with the intent to manipulate and artificially increase the price of natural gas for

---

[1] Document numbers refer to the base file, 2:03-CV-01431-PMP-PAL, unless otherwise noted.

[2] Plaintiffs' Second Amended Complaint is located at docket number 847 in the base file. Plaintiffs filed the Corrected Second Amended Complaint only in the individual case file.

consumers. (*Id.*) Specifically, Plaintiffs allege Defendants, directly and through their affiliates, conspired to manipulate the natural gas market by knowingly delivering false reports concerning trade information to trade indices and engaging in wash trades, in violation of Wisconsin Statutes chapter 133. (*Id.*)

The SAC asserts two causes of action. Count one arises under *Wisconsin Statutes § 133.14*, which voids contracts to which an antitrust conspirator is a party and allows recovery of payments made pursuant to such a contract. (*Id.* at 54-56.) Count two seeks trebled actual damages under *Wisconsin Statutes § 133.18* **[**25]** for Defendants' alleged antitrust violations. (*Id.* at 56-57.)

The SAC's allegations are directed generally at two types of Defendants: the natural gas companies that actually engaged in natural gas sales and the related reporting of allegedly manipulated gas prices to the trade indices, and those companies' parent corporations. The SAC does not allege the parent company Defendants themselves engaged in natural gas trading and price reporting. Rather, the SAC alleges these Defendants are the parent companies of subsidiaries which engage in such activity generally, and which also made natural gas sales in Wisconsin during the relevant time period.

Plaintiffs seek to establish personal jurisdiction over the parent company Defendants based on their out-of-forum activities directed at Wisconsin along with their subsidiaries' and affiliates' contacts within Wisconsin. According to the SAC, the parent company Defendants dominated and controlled their respective subsidiaries and the parent company Defendants "entered into a combination and conspiracy . . . which tended to prevent full and free competition in the trading and sale of natural gas, or which tended to advance or control the market **[**26]** prices of natural gas." (*Id.* at 6-7, 9, 14-15, 18-19, 23, 26-27, 30-31, 35-36.) Plaintiffs allege the parent **[*1127]** company Defendants intended their actions to have a direct, substantial, and foreseeable effect on commerce in the State of Wisconsin. (*Id.* at 7, 10, 15, 19, 23-24, 27, 31, 36.) According to the SAC, the parent company Defendants "made strategic marketing policies and decisions concerning natural gas and the reporting of natural gas trade information to reporting firms for use in the calculation of natural gas price indices that affected the market prices of natural gas, and those policies and decisions were implemented on an operational level by affiliates . . . in the United States and in Wisconsin." (*Id.* at 8, 10, 15, 19, 24, 27-28, 32, 36.)

Defendant Reliant Energy, Inc. ("REI") now moves to dismiss, arguing this Court lacks personal jurisdiction over REI. According to REI, it conducts no business in Wisconsin and has no other contacts supporting general or specific jurisdiction. REI also argues it cannot be subject to jurisdiction in Wisconsin based on its subsidiary's contacts with the forum because its subsidiary is not its agent or alter ego, and Wisconsin would not support **[**27]** the conspiracy theory of jurisdiction. REI thus argues personal jurisdiction does not exist under the Wisconsin long-arm statute, and even if it did, exercising personal jurisdiction in this case would violate constitutional due process requirements.

Plaintiffs respond that REI's subsidiary has submitted to jurisdiction in Wisconsin and REI is subject to personal jurisdiction based on agency and alter ego principles based on its subsidiary's contacts. Additionally, Plaintiffs argue that because Wisconsin's antitrust statutes contemplate imposing liability on an antitrust conspirator who performs acts outside of Wisconsin that have an impact in Wisconsin, the Court has personal jurisdiction over REI under Wisconsin's long-arm statute.

B. Facts Related to Personal Jurisdiction

Defendant REI is a Delaware corporation with its principal place of business in Texas. (Def. Reliant Energy, Inc.'s Mot. to Dismiss for Lack of Pers. Juris. (Doc. # 869), Ex. A ["Jines Decl."] at 2.) REI as it currently exists came into being in response to changes in Texas regulatory laws. (*Id.*) The company formerly known as Reliant Energy, Incorporated divided itself into CenterPoint Energy, Inc. ("CenterPoint") **[**28]** and Reliant Resources, Inc. ("RRI"). (*Id.*) After CenterPoint divested itself of its RRI stock, the two companies became separate entities and RRI changed its name to REI, the Defendant in this action. (*Id.* at 2-3.) Under the Master Separation Agreement resulting in RRI's existence as a separate entity, RRI agreed that it would indemnify, defend, and hold harmless Reliant Energy, Incorporated, and in certain cases, that it would cause its subsidiaries to do so as well, for liabilities arising out of RRI and its subsidiaries' business operations, including business operations that pre-dated the agreement. (App. of Docs. Filed Under Seal ["Sealed App."] (Doc. # 1126), Ex. E at REILJ012883, Ex. F at REILJ009719.)

REI is a holding company that does not itself buy, sell, or transport natural gas, nor does it report natural gas prices to any price reporting firms or price index publishers. (Jines Decl. at 3-4; Joint Supplemental Mem. of Defs. CMS Energy Corp., Duke Energy Carolinas, LLC, and Reliant Energy, Inc. in Supp. of Mots. to Dismiss for Lack of Pers. Juris. (Doc. # 963), Reliant Energy, Inc.'s App. in Supp. of Its Mots. to Dismiss for Lack of Pers. Juris. ["REI App."], Ex. B at 2.) **[**29]** REI does not have any offices, employees, property, bank accounts, phone listings, or mailing addresses in Wisconsin. (Jines Decl. at 3; REI App., Ex. C at 2, Ex. D at 2, Ex. E at **[*1128]** 2.) REI does not pay taxes in Wisconsin and has never sold or traded natural gas in Wisconsin. (Jines Decl. at 3; REI App., Ex. B at 2, Ex. F at 2.) REI has not itself conducted any business in Wisconsin. (Jines Decl. at 3.) Other than advertising in publications available nationwide, REI has not directed advertising specifically towards Wisconsin. (REI App., Ex. G at 2.)

REI has a wholly owned subsidiary, Reliant Energy Services, Inc. ("RES"). (Jines Decl. at 3.) RES sold millions of dollars worth of natural gas to the Wisconsin Public Service Corporation and Integrys Energy Services, Inc., Wisconsin corporations, and had a natural gas supply agreement with the Wisconsin Electric Power Company ("WEPCO") and Wisconsin Gas, LLC, during the 2000 to 2002 time period. (Decl. of Andy Hess (Doc. # 1089); Revised Decl. of Kristie J. Wiegand, Revised Decl. of Julie Baumgart (Doc. # 1131); Notice of Filing of Docs. Under Seal (Doc. # 1180); Notice of Filing of Docs. Under Seal (Doc. # 1184); Decl. of Timothy J. McCollow **[**30]** (Doc. # 993); Decl. of William E. Fischer (Doc. # 1097), Second Decl. of James H. Voss.) State of Wisconsin billing records show RES also sold thousands of dollars of natural gas from July 2001 to June 2002 to the State of Wisconsin. (Decl. of William E. Fischer (Doc. # 1104) ["Fischer Decl."], Ex. B, Jines Ex. 16.) Plaintiff Ladish Co., Inc. ("Ladish") purchased over $ 19 million in natural gas from RES between January 2000 and August 2002. (*Id.,* Jines Ex. 11.)

According to Ladish's accounting manager, RES marketed itself under the name "Reliant Energy" in making these sales. (*Id.*) Timothy J. McCollow ("McCollow"), a former WEPCO employee, likewise avers that Reliant-related companies sold gas to WEPCO using a common logo. (Decl. of Timothy J. McCollow at 4.) McCollow avers that several Reliant marketing employees traveled to Wisconsin and personally met with WEPCO employees, including McCollow. (*Id.*) McCollow also states that he and his coworkers spoke with Reliant marketing personnel on a nearly daily basis when WEPCO actively was seeking to purchase natural gas. (*Id.*)

REI and RES share physical offices in Texas. (Sealed App., Ex. D at 163-64.) REI and its subsidiaries, including **[**31]** RES, share some common officers and directors. (Sealed App., Ex. B.) For example, Michael Jines ("Jines") was an officer for REI, RES, and several other REI subsidiaries, including some for which he could not recall the subsidiary's name. (Sealed App., Ex. D at 15-19, 107-110.) At his deposition, Jines stated his duties and responsibilities as an officer and director of those subsidiaries would be "no different" than his duties and responsibilities as REI's general counsel. (*Id.* at 119-20.) As RES's one hundred percent owner, REI nominates and elects the directors for RES. (*Id.* at 88-89.)

At the present time, REI and RES have no employees of their own. (*Id.* at 248, 288-89.) Rather, Reliant Energy Corporate Services ("RECS"), an REI subsidiary, acts as the payroll entity for REI and all of its subsidiaries. (*Id.* at 9-10.) RECS employs personnel who provide services to REI and RES. (*Id.* at 10.) For example, lawyers employed by RECS provide legal services to REI and all of its subsidiaries. (*Id.* at 111-13.) RECS also provides accounting, finance, legal, human resources, and facilities management services to REI and its subsidiaries. (*Id.* at 20.) As part of these services, RECS prepares **[**32]** separate financial documents, including tax filings, for RES. (*Id.* at 56-57, 267.)

In terms of financial dealings between REI and its subsidiaries, the subsidiaries are funded by borrowing from or receiving equity capital infusions from REI. (*Id.* at 239-40.) In turn, REI receives either loan **[*1129]** repayments or dividends when money is transferred from the subsidiaries to REI. (*Id.* at 291-92.) In some circumstances, REI provides guarantees to third parties in transactions involving REI subsidiaries. (*Id.* at 204-05.) REI agreed to be RES's guarantor in an agreement in 2001 with a Wisconsin company. (Fischer Decl., Jines Ex. 17.) In setting forth its financial guarantee policy, REI (then RRI) described RES as a "business unit." (Sealed App., Ex. H at REILJ010083.)

Although describing itself as a holding company, REI does not passively hold stock in its subsidiaries and leave them to operate on their own. Rather, REI establishes overall policies and guidelines for its subsidiaries, establishes a capital structure, and issues consolidated financial reports. (Sealed App., Ex. D at 131.) Among the guidelines REI requires its subsidiaries to follow is a policy for best principles and practices. (Sealed **[**33]** App., Ex. I at REILJ012703.) This policy requires compliance with applicable laws and regulations, and requires that all transactions be for a bona fide business purpose and be reported accurately. (*Id.*) The best practices policy prohibits wash sales and fictitious transactions. (*Id.* at REILJ012704.) This policy applied to RES during the relevant period. (Sealed App., Ex. N at 93.)

Additionally, REI sets certain risk control limits on its subsidiaries. For example, REI set limits on RES's value at risk ("VAR"). (Sealed App., Ex. F at REILJ009749.) REI's board of directors sets the overall limit on VAR. (*Id.*) The Audit Committee of REI's board meets at least three times a year to approve the risk control organization structure, approve the overall risk control policy, monitor compliance with trading limits, and review risk control issues. (*Id.* at REILJ009752.)

REI also has a Risk Oversight Committee consisting of REI and subsidiary officers which allocates VAR to various business segments, including RES. (Sealed App., Ex. M at 17, Ex. F at REILJ009752.) The Risk Oversight Committee meets at least monthly to monitor compliance, review daily position reports for trading and marketing activity, **[**34]** recommend to REI's board of directors adjustments to trading limits, approve new trading activity, monitor information systems related to risk management, and place guidelines and limits on hedging activity. (Sealed App., Ex. F at REILJ009752-53.) Management for each business segment then allocates risk limits among individual traders within the limits set by the Risk Oversight Committee. (*Id.* at REILJ009754.) RES allocates VAR to its "head book traders" who in turn authorize other traders to execute trades. (Sealed App., Ex. M at 17.) Thus, the VAR limit set by REI was "an overall limit." (Sealed App., Ex. N at 155.) RES would engage in multiple transactions in one day, and the limit set by REI was evaluated against the net result of a set of RES's transactions or activities. (*Id.*)

REI oversight of its subsidiaries includes daily reporting of mark-to-market valuation, [3] VAR, and "other risk measurement metrics." (Sealed App., Ex. L.) RES's VAR is reported daily to REI's Risk Oversight Committee. (Sealed App., Ex. M at 17.) Additionally, violations of any risk limits are reported to the business segment management as well as to the appropriate committees. (Sealed App., Ex. F at REILJ009754.) **[**35]** While the reports from the subsidiary to the various committees **[*1130]** may occur daily, communications from REI down to the subsidiaries occurs "only to the extent that the activity ended up in a violation." (Sealed App., Ex. N at 156.) For example, if RES exceeded its VAR limit, an REI officer may inform RES management and inquire as to what RES management intended to do to correct the situation. (*Id.*) However, "in terms of the day-to-day buying and selling of gas or power, [REI officers have] limited or no interaction." (*Id.*)

In November 2003, the Commodity Futures Trading Commission ("CFTC") entered into a settlement with RES regarding the CFTC's allegations that RES violated the Commodities Exchange Act. (Fischer Decl., Ex. B, Jines Ex. 4.) According to the settlement, the CFTC found RES's Houston offices made false price reports regarding natural gas transactions from 1999 through May 2002. (*Id.* at 4-5.) Additionally, the CFTC found RES engaged in wash trades in 2000. (*Id.* at 6-7.) As part of the settlement, RES and REI agreed to entry of the order finding violations, as well **[**36]** as requiring RES to cease and desist from its misconduct, imposing an $ 18 million civil penalty on RES, and requiring RES and REI to undertake certain activities. (*Id.* at 7-9.) Specifically, REI agreed to cooperate with the CFTC in the future, including preserving and producing records regarding the reporting of price or trade volumes in natural gas transactions and producing RES and REI employees to provide assistance in any trial, proceeding, or investigation related to the CFTC's investigation. (*Id.* at 8-9.) Additionally, REI agreed not to make any public

[3] "Mark-to-market" means the value of a contract relative to current market prices. (Sealed App., Ex. N at 128.)

statements denying the CFTC's findings in the order. (*Id.* at 9.) Jines represented both RES and REI relating to the CFTC's investigation and the terms of the CFTC's order. (Sealed App., Ex. D at 41-44.)

The parties now dispute the significance of these contacts under the Wisconsin long-arm statute. The parties also dispute whether this Court's exercise of personal jurisdiction over REI would violate constitutional due process requirements.

II. PERSONAL JURISDICTION

"When a defendant moves to dismiss for lack of personal jurisdiction, the plaintiff bears the burden of demonstrating that the court has jurisdiction over the defendant." **[**37]** *Pebble Beach Co. v. Caddy, 453 F.3d 1151, 1154 (9th Cir. 2006)*. To meet this burden, a plaintiff must demonstrate that personal jurisdiction over a defendant is (1) permitted under the applicable state's long-arm statute and (2) that the exercise of jurisdiction does not violate federal due process. *Id.* The Court must analyze whether personal jurisdiction exists over each defendant separately. *Harris Rutsky & Co. Ins. Servs., Inc. v. Bell & Clements Ltd., 328 F.3d 1122, 1130 (9th Cir. 2003)*.

Where the issue is before the Court on a motion to dismiss based on affidavits and discovery materials without an evidentiary hearing, the plaintiff must make "a prima facie showing of facts supporting jurisdiction through its pleadings and affidavits to avoid dismissal." *Glencore Grain Rotterdam B.V. v. Shivnath Rai Harnarain Co., 284 F.3d 1114, 1119 (9th Cir. 2002)*. The Court accepts as true any uncontroverted allegations in the complaint and resolves any conflicts between the facts contained in the parties' evidence in the plaintiff's favor. *Id.* However, for personal jurisdiction purposes, a court "may not assume the truth of allegations in a pleading which are contradicted by affidavit." *Alexander v. Circus Circus Enters., Inc., 972 F.2d 261, 262 (9th Cir. 1992)* **[**38]** (quotation omitted).

[*1131] In diversity cases such as this, "a federal court applies the personal jurisdiction rules of the forum state provided the exercise of jurisdiction comports with due process." *Scott v. Breeland, 792 F.2d 925, 927 (9th Cir. 1986)*. However, "federal law is controlling on the issue of due process under the United States Constitution." *Data Disc, Inc. v. Sys. Tech. Assoc., Inc., 557 F.2d 1280, 1286 n.3 (9th Cir. 1977)*; *see also* *Dole Food Co., Inc. v. Watts, 303 F.3d 1104, 1110 (9th Cir. 2002)*. Therefore, the Court will apply law from the United States Court of Appeals for the Ninth Circuit in deciding whether jurisdiction is appropriate under the *Due Process Clause*. *See* *In re Korean Air Lines Disaster of Sept. 1, 1983, 829 F.2d 1171, 1174, 265 U.S. App. D.C. 39 (D.C. Cir. 1987)* (concluding that "the transferee court [should] be free to decide a federal claim in the manner it views as correct without deferring to the interpretation of the transferor circuit"); *Menowitz v. Brown, 991 F.2d 36, 40 (2d Cir. 1993)* (holding that "a transferee federal court should apply its interpretations of federal law, not the constructions of federal law of the transferor circuit").

To satisfy federal due process **[**39]** standards, a nonresident defendant must have "minimum contacts" with the forum state so that the assertion of jurisdiction does not offend traditional notions of fair play and substantial justice. *Pebble Beach Co., 453 F.3d at 1155* (citing *Int'l Shoe Co. v. Washington, 326 U.S. 310, 315, 66 S. Ct. 154, 90 L. Ed. 95 (1945))*. A federal district court may exercise either general or specific personal jurisdiction. *See* *Helicopteros Nacionales de Colombia, S.A. v. Hall, 466 U.S. 408, 414-15, 104 S. Ct. 1868, 80 L. Ed. 2d 404 (1984)*.

To establish general personal jurisdiction, the plaintiff must demonstrate the defendant has sufficient contacts to "constitute the kind of continuous and systematic general business contacts that 'approximate physical presence.'" *Glencore Grain, 284 F.3d at 1124* (quoting *Bancroft & Masters, Inc. v. Augusta Nat'l Inc., 223 F.3d 1082, 1086 (9th Cir. 2000)*, *modified,* *Yahoo! Inc. v. La Ligue Contre Le Racisme Et L'Antisemitisme, 433 F.3d 1199, 1207 (9th Cir. 2006))*. Courts consider such factors as whether the defendant makes sales, solicits or engages in business in the state, serves the state's markets, designates an agent for service of process, holds a license, or is incorporated there. *Bancroft, 223 F.3d at 1086*. "[A] defendant **[**40]** whose contacts are substantial, continuous, and systematic is subject to a court's general jurisdiction even if the suit concerns matters not arising out of his contacts with the forum." *Glencore Grain, 284 F.3d at 1123* (citing *Helicopteros, 466 U.S. at 415 n.9*).

A nonresident defendant's contacts with the forum state may permit the exercise of specific jurisdiction if: (1) the defendant has performed some act or transaction within the forum or purposefully availed himself of the privileges of conducting activities within the forum, (2) the plaintiff's claim arises out of or results from the defendant's forum-related activities, and (3) the exercise of jurisdiction over the defendant is reasonable. *Pebble Beach Co., 453 F.3d at 1155-56*. "If any of the three requirements is not satisfied, jurisdiction in the forum would deprive the defendant of due process of law." *Omeluk v. Langsten Slip & Batbyggeri A/S, 52 F.3d 267, 270 (9th Cir. 1995)*.

Under the first prong of the "minimum contacts test," the plaintiff must establish either that the defendant "(1) purposefully availed himself of the privilege of conducting his activities in the forum, or (2) purposefully directed his activities toward **[**41]** the forum." *Pebble Beach Co., 453 F.3d at 1155*. "Evidence of availment is typically action taking place in the forum that invokes the benefits and protections **[*1132]** of the laws in the forum." *Id.* Evidence of direction usually consists of conduct taking place outside the forum that the defendant directs at the forum. *Id. at 1155-56*.

The purposeful direction aspect of the first prong is satisfied when a foreign act is both aimed at and has effect in the forum. *Id.* In other words, the defendant "must have (1) committed an intentional act, which was (2) expressly aimed at the forum state, and (3) caused harm, the brunt of which is suffered and which the defendant knows is likely to be suffered in the forum state." *Id.* To satisfy the third element of this test, the plaintiff must establish the defendant's conduct was "expressly aimed" at the forum; a "mere foreseeable effect" in the forum state is insufficient. *Id.* The "express aiming" requirement is satisfied when the defendant is alleged to have engaged in wrongful conduct "individually targeting a known forum resident." *Bancroft, 223 F.3d at 1087*.

The second prong of the specific jurisdiction test requiring that the contacts constituting purposeful **[**42]** availment or purposeful direction give rise to the current action is measured in terms of "but for" causation. *Id. at 1088*. "If the plaintiff establishes both prongs one and two, the defendant must come forward with a 'compelling case' that the exercise of jurisdiction would not be reasonable." *Boschetto v. Hansing, 539 F.3d 1011, 1016 (9th Cir. 2008)* (quotation omitted).

No evidence in the record demonstrates REI itself had any contacts with Wisconsin other than acting as a guarantor on a single contract between RES and a Wisconsin entity. A single contact does not support general jurisdiction. Plaintiffs' claims do not arise out of that contract and thus specific jurisdiction also does not exist based on this single contact. Consequently, REI is subject to personal jurisdiction in Wisconsin only if the forum acts of its subsidiary, RES, are attributable to it through principles of alter ego, agency, or a conspiracy theory of personal jurisdiction. [4]

A. Alter Ego

A "parent-subsidiary relationship alone is insufficient to attribute the contacts of the subsidiary **[**43]** to the parent for jurisdictional purposes." *Harris Rutsky & Co. Ins. Servs., Inc., 328 F.3d at 1134*. However, a subsidiary's contacts may be imputed to its parent for personal jurisdiction purposes where the subsidiary is the parent's alter ego. *Id.*

To demonstrate a parent and its subsidiary are alter egos, the plaintiff must establish a prima facie case that the two companies share "such unity of interest and ownership" that the companies' separateness no longer exists and "failure to disregard [their separate identities] would result in fraud or injustice." *Doe v. Unocal Corp., 248 F.3d 915, 926 (9th Cir. 2001)* (quotation omitted). To demonstrate a unity of interest warranting disregard of corporate separateness, the plaintiff must show the parent controls its subsidiary to such a degree as to render the subsidiary a "mere instrumentality" of its parent. *Id.* (quotation omitted). Typically, this would involve showing the parent

[4] The Court will assume that if RES's forum-related acts are attributable to REI, the Wisconsin long-arm statute is satisfied.

controls the subsidiary's internal affairs or daily operations. *Kramer Motors, Inc. v. British Leyland, Ltd., 628 F.2d 1175, 1177 (9th Cir. 1980)*. [5]

[*1133] A parent corporation may be involved directly in certain aspects of its wholly owned subsidiary's affairs without subjecting itself to alter ego status. For example, a parent may provide financing to its subsidiary so long as it maintains corporate formalities and properly documents loans and capital contributions to its subsidiaries, and it may act as its subsidiary's guarantor. *Doe, 248 F.3d at 927-28*. Additionally, a parent may refer to its subsidiaries as divisions of the parent in annual reports. *Id. at 928*. Further, a parent may review and approve major decisions, place its own directors on the **[**45]** subsidiary's board, and share offices and staff with its wholly owned subsidiary without being considered its alter ego. *Id.; Harris Rutsky & Co. Ins. Servs., Inc., 328 F.3d at 1135*.

In sum, a parent may involve itself directly in its subsidiary's activities without becoming an alter ego "so long as that involvement is consistent with the parent's investor status." *Harris Rutsky & Co. Ins. Servs., Inc., 328 F.3d at 1135* (quotation omitted). Activities consistent with investor status include "'monitoring of the subsidiary's performance, supervision of the subsidiary's finance and capital budget decisions, and articulation of general policies and procedures[.]'" *Doe, 248 F.3d at 926* (quoting *United States v. Bestfoods, 524 U.S. 51, 72, 118 S. Ct. 1876, 141 L. Ed. 2d 43 (1998))*.

In addition to showing lack of corporate separateness, the plaintiff also must show that failure to disregard the corporate form would promote fraud or injustice. The fraud or injustice must relate to the forming of the corporation or abuse of the corporate form, not a fraud or injustice generally. *Laborers Clean-Up Contract Admin. Trust Fund v. Uriarte Clean-Up Serv., Inc., 736 F.2d 516, 524-25 n.12 (9th Cir. 1984)*. For example, undercapitalization **[**46]** at the subsidiary's inception may be evidence of the parent's fraudulent intent. *Id.* However, a corporation that once was capitalized adequately but "subsequently fell upon bad financial times" does not support a finding of fraud or injustice. *Id. at 525*. Further, evidence that the corporation existed as an ongoing enterprise engaged in legitimate business suggests no fraudulent intent or injustice to support piercing the corporate veil. *Seymour v. Hull & Moreland Eng'g, 605 F.2d 1105, 1113 (9th Cir. 1979)*. An inability to collect on a judgment "does not, by itself, constitute an inequitable result." *Id.*

Plaintiffs have failed to establish a prima facie case of personal jurisdiction based on RES being REI's alter ego. REI provided financing to RES and in return received loan repayments and/or dividends, but no evidence in the record suggests REI failed to maintain corporate formalities or to properly document these loans and capital contributions. Rather, the evidence indicates RECS prepared separate books and records for RES and REI.

REI's conduct in acting as a guarantor for RES also does not support an alter ego finding, and the evidence presented on this point suggests the opposite. **[**47]** REI had in place specific policies regarding when it would consider acting as its subsidiary's guarantor, suggesting that the two corporations and their counterparties viewed the two as separate entities not liable for the **[*1134]** other's obligations except where they contractually agreed to such an arrangement. Further, REI's reference to RES as a "business unit" in a report does not suggest RES was REI's mere instrumentality. Nor does the fact that the two companies shared office space and staff.

REI's oversight of RES is consistent with the parent's investor status. As one hundred percent owner of RES's shares, REI was entitled to nominate and elect RES's board of directors. Additionally, REI is entitled as an investor to monitor RES's performance. Consequently, the daily reporting of information from RES to REI is consistent with REI's investor oversight role. Although REI received daily reporting from RES, no evidence suggests REI gave daily control commands to RES. Rather, the record demonstrates that, consistent with its investor status, REI set general

---

[5] Wisconsin utilizes similar principles. In Wisconsin, the party attempting to pierce the corporate veil must show **[**44]** the subsidiary corporation "has no separate existence of its own and is the mere instrumentality of the shareholder and the corporate form is used to evade an obligation, to gain an unjust advantage or to commit an injustice." *Wiebke v. Richardson & Sons, Inc., 83 Wis. 2d 359, 265 N.W.2d 571, 573 (Wis. 1978)*. To the extent Wisconsin would look to the law of the state of incorporation to determine alter ego status, Delaware has similar requirements. *See* *Maloney-Refaie v. Bridge at Sch., Inc., 958 A.2d 871, 881 (Del. Ch. 2008)*; *In re Sunstates Corp. Shareholder Litig., 788 A.2d 530, 534 (Del. Ch. 2001)*.

policies and guidelines regarding best policies and practices, as well as certain overall limits, such as the limit on VAR. However, **[**48]** when it came to RES's day-to-day conduct of its business within these guidelines, REI had little to no role. For example, with respect to natural gas trading, while REI set overall limits on certain metrics, REI had no role in making the day-to-day decisions of who RES was to trade with, when, for what amount of natural gas, and at what price. Only when RES exceeded REI's overall limits would REI become involved by inquiring of its subsidiary what it intended to do to correct any violations. Plaintiffs also present no evidence REI had any role in RES's price reporting to indices.

Even if Plaintiffs had established a lack of corporate separateness, Plaintiffs have not established a fraud or injustice would result if the Court failed to pierce the corporate veil. Plaintiffs contend it would be unjust to permit REI to reap the benefits of RES's alleged unlawful behavior by enjoying profits from RES's trading activities while escaping liability for RES's alleged misconduct. However, the alleged illegal price manipulation cannot itself constitute the fraud or injustice necessary to pierce the corporate veil. Rather, REI must have had some fraudulent intent at RES's inception or some later **[**49]** abuse of the corporate form such that failing to treat the entities as one would be inequitable. Plaintiffs present no evidence RES was undercapitalized at its inception. Further, the fact that RES operated as a legitimate business for years suggests a lack of fraudulent intent or perpetration of a fraud through use of the corporate structure on the parent's part.

Plaintiffs' fear that they may not be able to collect on a judgment in this action against RES does not constitute fraud or injustice to support piercing the corporate veil. The Court therefore finds Plaintiffs have not met their burden of establishing RES is REI's alter ego, and the Court will not attribute RES's contacts with Wisconsin to REI for purposes of determining personal jurisdiction based on alter ego principles.

B. Agency

A subsidiary's contacts also may be imputed to its parent for personal jurisdiction purposes where the subsidiary is the parent's general agent in the forum. *Harris Rutsky & Co. Ins. Servs., Inc., 328 F.3d at 1134*. A subsidiary is its parent's agent for purposes of attributing its forum-related contacts to the parent if the subsidiary "performs services that are 'sufficiently important to the foreign **[**50]** corporation that if it did not have a representative to perform them, the corporation's own officials would undertake to perform substantially similar services.'" *Doe, 248 F.3d at 928* (quoting *Chan v. Society Expeditions, Inc., 39 F.3d 1398, 1405 (9th Cir. 1994))*. The ultimate inquiry is whether **[*1135]** the subsidiary's presence in the forum "substitutes" for its parent's presence. *Id. at 928-29* (quotation omitted).

Where the parent is merely a holding company, the subsidiary's forum-related contacts are not done as the parent's agent because the holding company "could simply hold another type of subsidiary" as an investment and thus the subsidiary conducts business not as the parent's agent but as its investment. *Id. at 929*. "Where, on the other hand, the subsidiaries are created by the parent, for tax or corporate finance purposes, there is no basis for distinguishing between the business of the parent and the business of the subsidiaries." *Id.* (quotation omitted). The inquiry as to whether a subsidiary is its parent's general agent in the forum is "a pragmatic one." *Gallagher v. Mazda Motor of Am., Inc., 781 F. Supp. 1079, 1085 n.10 (E.D. Pa. 1992)*.

For example, where a Japanese parent company **[**51]** was engaged in the manufacture of watches, its subsidiaries that acted as its sole sales agents in America were "almost by definition . . . doing for their parent what their parent would otherwise have to do on its own." *Bulova Watch Co., Inc. v. K. Hattori & Co., Ltd., 508 F. Supp. 1322, 1342 (E.D.N.Y. 1981)*. The *Bulova* court thus attributed the subsidiaries' contacts to the parent company. *Id.; see also* *Chan, 39 F.3d at 1405-06* (remanding to the district court for additional findings of fact regarding agency where the German parent corporation owned and operated cruise ships and its local subsidiary marketed cruises and chartered cruise ships and sold the cruise ticket to the plaintiffs out of which the claims arose); *Modesto City Schs. v. Riso Kagaku Corp., 157 F. Supp. 2d 1128, 1135 (E.D. Cal. 2001)* (holding subsidiary was parent's agent for personal jurisdiction purposes where subsidiary acted as sole conduit for marketing and selling parent's products in the United States).

In contrast, where the parent company owned a subsidiary mining company's stock but did not itself engage in the business of gold mining, imputing the subsidiary's forum contacts to the parent was not appropriate. **[**52]** Sonora Diamond Corp. v. Superior Court, 83 Cal. App. 4th 523, 99 Cal. Rptr. 2d 824, 840-41 (Ct. App. 2000). As the *Sonora Diamond* court explained, had the parent company owned "the rights to the gold and used Sonora Mining as the operating and marketing entity," then perhaps general jurisdiction over the parent company would be appropriate because under those circumstances the parent company "could not reap the benefits of its rights unless it or someone else removed and sold the ore." *Id.* But where the parent simply held the mining company as an investment, the subsidiary's forum-related contacts could not be imputed to the parent company. *Id.*

Likewise, in *Doe,* the Ninth Circuit concluded a foreign company's subsidiaries were not its general agents in California because the plaintiffs presented no evidence that in the absence of the California subsidiaries' involvement in petrochemical and chemical operations, the parent would have conducted and controlled those operations. Doe, 248 F.3d at 929. The Court reached this conclusion even though the parent company issued consolidated reporting, referred to a subsidiary in an annual report as its "US unit," and stated that use of the subsidiary "would enable **[**53]** it to expand its marketing network and produce higher value-added specialty products in the United States." *Id.*

Plaintiffs have failed to establish a prima facie case that RES was REI's general agent in Wisconsin. REI's business is not purely as a holding company in the sense that it does not passively hold stock **[*1136]** in companies from an unrelated range of businesses. REI (then RRI) has described itself as a "provider of electricity and energy services with a focus on the competitive segments of the electric power industry in the United States and Europe." (Sealed App., Ex. K at REILJ009826.) REI describes its business as acquiring, developing, and operating electric power generation facilities; trading and marketing power, natural gas, and other energy-related commodities; and providing retail electric services in Texas. (*Id.*) REI has asserted in public filings that its--

> trading, marketing, and risk management skills complement [its] generation positions. The combination provides greater scale and skill associated with the management of our fuel and power positions, sophisticated commercial insights and an understanding of the key regions in which we participate, and a wider range of ways **[**54]** in which we participate in the market and are able to meet customer needs.

(*Id.*)

In practice, REI itself does not perform these activities, but, as Jines stated in his deposition, REI "holds the shares of the different subsidiaries that are actually engaged in the different business operations of [REI]." (Sealed App., Ex. D at 129-30.) Among those business operations was REI's "wholesale" group, which included a variety of subsidiaries involved in wholesale-related activities, including RES's natural gas-related activities. (*Id.* at 285-86.)

Although REI identifies natural gas trading and marketing as one of its business lines, Plaintiffs have not established that RES's sales of natural gas in Wisconsin were sufficiently important to REI that if RES did not make the sales in Wisconsin, REI would have done so itself. As the California Court of Appeal found in evaluating this same question involving a similar lawsuit against REI and RES in California, "[t]his portion of the energy business appears to be sufficiently fragmentary so that [REI] could have operated without the assistance of RES." Reliant Energy, Inc. v. Superior Court, No. D049988, 2007 Cal. App. Unpub. LEXIS 10019, 2007 WL 4329488, at *18 (Cal. Ct. App. 2007) **[**55]** (unpublished). Further, the fact that REI subsequently ceased "proprietary trading activities" due to a significant trading loss arising from "the extreme volatility in natural gas prices" suggests that RES's trading activities were not sufficiently important to REI that it would perform the activities itself if RES did not do so on its behalf. (Sealed App., Ex. G.)

Moreover, Plaintiffs have presented no evidence that RES's natural gas sales in Wisconsin in particular were sufficiently important to REI's business that REI would have performed the sales in Wisconsin itself absent its subsidiary's representation in the forum. *See* Modesto City Schs., 157 F. Supp. 2d at 1135 (noting twenty percent of parent's products were sold through subsidiary which acted as parent's "sole conduit for marketing and selling its products in the United States"); Bulova Watch Co., Inc., 508 F. Supp. at 1344 (noting that sixty percent of parent's products were sold as exports and the United States was the parent company's largest export market through its

New York subsidiaries' sales in the United States). Consequently, Plaintiffs have not shown that RES's Wisconsin natural gas sales played a significant **[**56]** role in REI's "'organizational life'" such that it acted as a substitute for REI in the forum. *Bulova Watch Co., Inc., 508 F. Supp. at 1344*.

The Court acknowledges that the California Court of Appeal upheld a state trial court's ruling that RES was REI's agent **[*1137]** in California for natural gas trading activity during the relevant time period. *Reliant Energy, Inc., 2007 Cal. App. Unpub. LEXIS 10019, 2007 WL 4329488, at *17*. Although arising out of the same factual background and involving the same parent and subsidiary, the ruling is distinguishable on several grounds. The evidence presented to the California state court indicated REI had many more significant contacts with California than the single contact REI had with Wisconsin as reflected in the evidence before this Court. According to the evidence in *Reliant,* REI owned another subsidiary that had purchased natural-gas-fueled power plants located in California. *2007 Cal. App. Unpub. LEXIS 10019, [WL] at *2*. Additionally, REI obtained a certificate of qualification to do business and designated an agent for service of process in California, acted as guarantor on seven agreements between RES and California utilities, engaged in a marketing campaign in the state, subleased a small office in Sacramento which **[**57]** was used by a lobbyist, and employed an individual who allegedly engaged in illegal churning and wash trades in California. *2007 Cal. App. Unpub. LEXIS 10019, [WL] at *3-4*.

In accord with this Court's ruling, the California Court of Appeal specifically rejected RES was REI's agent under the same test the Ninth Circuit employs to determine whether a subsidiary is its parent's agent for personal jurisdiction purposes. *Compare* *2007 Cal. App. Unpub. LEXIS 10019, [WL] at *17-18*, *with* *Doe, 248 F.3d at 928*. The California Court of Appeal referred to this test as the "representative services doctrine." *Reliant Energy, Inc., 2007 Cal. App. Unpub. LEXIS 10019, 2007 WL 4329488, at *17-18*. While finding RES was not REI's agent under the representative services doctrine, the *Reliant* court concluded RES was REI's agent in California under general agency principles based on REI's control over RES. *2007 Cal. App. Unpub. LEXIS 10019, [WL] at *15-17*. Although not calling it the "representative services doctrine," the Ninth Circuit has set forth that test as the applicable one for due process purposes. The California Court of Appeal's reference to other agency principles goes beyond the applicable agency test for exercising personal jurisdiction consistent with due process as set forth in controlling precedent for this Court.

Moreover, in making **[**58]** its finding under general agency principles, the California Court of Appeal relied on evidence not presented to this Court and not relevant to REI's contacts with Wisconsin. For example, the *Reliant* court considered the fact that RES made a daily report to REI of the California power plant's hedging activities, "regarding the coordination of power generation and supply of natural gas," and RES's trading activities impacted that supply of natural gas. *2007 Cal. App. Unpub. LEXIS 10019, [WL] at *16*. Additionally, evidence in the record permitted an inference that the employee who allegedly engaged in wash trades and churning in California was an REI (then RRI) employee. *Id.*

The California Court of Appeal also found REI's setting and raising of overall limits such as VAR to be significant evidence of REI's daily control of RES. However, as explained above, the evidence before this Court indicates REI sets overall limits but does not involve itself in RES's day-to-day decisions as to what actions to take within those limits. That RES violated those limits and requested a higher limit, to which REI agreed, is not evidence of day-to-day control. It is evidence of a change in the overall limit under which RES was to perform **[**59]** its day-to-day operations.

To the extent the setting and changing of VAR and other limits constitutes day-to-day control, Plaintiffs have not demonstrated that REI's setting or altering of overall limits on any metric constituted day-to-day interference with RES's sales in Wisconsin. Plaintiffs have presented no evidence that REI's oversight impacted RES's daily decisions regarding whether, when, to whom, in what **[*1138]** volume, or at what price RES decided to sell natural gas in Wisconsin. While daily oversight of trading activities may have been significant in the *Reliant* case where an employee of REI or one of its subsidiaries allegedly engaged in illegal trading activity in California, REI's daily oversight mechanisms as presented to this Court do not suggest a significant level of control over RES's Wisconsin sales activity. Because Plaintiffs have not established a prima facie case that RES acted as REI's agent in Wisconsin, the Court will not attribute RES's Wisconsin contacts to REI on this basis. [6]

C. Conspiracy Theory

The conspiracy theory of personal jurisdiction is based on the premise that a conspirator's acts in furtherance **[**61]** of a conspiracy are attributable to the other members of the conspiracy. *Textor v. Bd. of Regents of N. Ill. Univ., 711 F.2d 1387, 1392 (7th Cir. 1983)*. Consequently, some courts attribute a conspirator's in-forum acts to his co-conspirators for personal jurisdiction purposes.

The Ninth Circuit has not expressly accepted or rejected the conspiracy theory of personal jurisdiction. In its only published opinion addressing the issue, the Ninth Circuit noted that the two district court opinions upon which the plaintiff relied required the plaintiff either to allege specific overt acts in the forum state that furthered the conspiracy, or to allege substantial acts in furtherance of the conspiracy in the forum and that the co-conspirator knew or should have known his co-conspirator would perform those acts in the forum. *Underwager v. Channel 9 Australia, 69 F.3d 361, 364 (9th Cir. 1995)*. Without expressing any opinion on the validity of the conspiracy theory of personal jurisdiction, the Ninth Circuit concluded the plaintiff alleged no facts suggesting a conspiracy and failed to dispute the defendants' claims that they did not know certain acts would take place in the forum. *Id.* The Court **[**62]** therefore affirmed the district court's dismissal for lack of personal jurisdiction. *Id.*

Since this case, the Ninth Circuit has noted that "a great deal of doubt" surrounds the conspiracy theory's legitimacy. *Chirila v. Conforte, 47 Fed. Appx. 838, 842, 2002 WL 31105149, at *3 (9th Cir. 2002)* (unpublished). Some courts have adopted it. [7] Others have rejected its **[*1139]** application as inconsistent with due process. [8] Still others follow the Ninth Circuit's lead in *Underwager* and decline to address whether the theory comports with due process, but find the plaintiff failed to meet the test even if it applied. *See* *Melea, Ltd. v. Jawer SA, 511 F.3d 1060, 1070 (10th Cir. 2007)*; *Glaros v. Perse, 628 F.2d 679, 682 (1st Cir. 1980)*.

---

[6] The result would be the same under general Wisconsin agency law. In Wisconsin, an express agency relationship exists "only if there has been a manifestation by the principal to the agent **[**60]** that the agent may act on his account, and consent by the agent so to act." *Johnson v. Minn. Mut. Life Ins. Co., 151 Wis. 2d 741, 445 N.W.2d 736, 738 (Wis. Ct. App. 1989)* (quotation omitted). Wisconsin also recognizes apparent agency upon a showing of "(1) acts by the agent or principal justifying belief in the agency; (2) knowledge of such acts by the parties sought to be held; and (3) reliance on the apparent agency consistent with ordinary care and practice." *Id. at 739*.

Here, Plaintiffs have presented no evidence of any express manifestation from REI to RES that RES may act as REI's agent in Wisconsin. As to apparent agency, Plaintiffs have presented evidence that REI permitted RES to use the "Reliant" name and logo in marketing natural gas in Wisconsin. However, Plaintiffs have presented no evidence that anyone relied on an apparent agency relationship between REI and RES. Plaintiffs do not identify any evidence in the record supporting such reliance. None of the affiants who purchased natural gas from RES averred that they relied upon RES's status as REI's apparent agent.

[7] *See, e.g., Jungquist v. Sheikh Sultan Bin Khalifa Al Nahyan, 115 F.3d 1020, 1031-32, 325 U.S. App. D.C. 117 (D.C. Cir. 1997)* (applying theory but finding no personal jurisdiction); *Textor, 711 F.2d at 1392-93* (applying Illinois long-arm statute); *Res. Ventures, Inc. v. Res. Mgmt. Int'l, Inc., 42 F. Supp. 2d 423, 434 (D. Del. 1999)*; *Santana Prods., Inc. v. Bobrick Washroom Equip., 14 F. Supp. 2d 710, 718 (M.D. Pa. 1998)*; *see also* *Roy v. Brahmbhatt, No. 07-5082 (PGS), 2008 U.S. Dist. LEXIS 97525, 2008 WL 5054096, at *7 (D.N.J. 2008)* **[**63]** (unpublished) (collecting cases).

[8] *See, e.g., Silver Valley Partners, LLC v. De Motte, 400 F. Supp. 2d 1262, 1268 (W.D. Wash. 2005)*; *Karsten Mfg. Corp. v. U.S. Golf Ass'n, 728 F. Supp. 1429, 1434 (D. Ariz. 1990)*; *Kipperman v. McCone, 422 F. Supp. 860, 873 n.14 (N.D. Cal. 1976)*; *Ploense v. Electrolux Home Prods, Inc., 377 Ill. App. 3d 1091, 882 N.E.2d 653, 666-68, 317 Ill. Dec. 773 (Ill. App. Ct. 2007)*; *Mansour v. Super Ct. of Orange County, 38 Cal. App. 4th 1750, 46 Cal. Rptr. 2d 191, 196-98 (Ct. App. 1995)*; *Hewitt v. Hewitt, 78 Wn. App. 447, 896 P.2d 1312, 1315-16 (Wash. Ct. App. 1995)*; *Nat'l Indus. Sand Ass'n v. Gibson, 897 S.W.2d 769, 773 (Tex. 1995)*; *see also* *Roy, 2008 U.S. Dist. LEXIS 97525, 2008 WL 5054096, at *7* (collecting cases).

Although not in the personal jurisdiction context, the Ninth Circuit has rejected a similar conspiracy theory in the venue context. *Piedmont Label Co. v. Sun Garden Packing Co., 598 F.2d 491 (9th Cir. 1979)* (rejecting conspiracy theory of venue). In *Piedmont,* the Ninth Circuit considered whether venue in an antitrust action could be based "solely on allegations that a defendant was a member of a conspiracy and that a co-conspirator performed acts in the forum district." *Id. at 492*. The plaintiff argued that because a conspirator committed acts in the venue and **[**64]** a conspirator acts as his co-conspirator's agent, a defendant who otherwise had not conducted business in the forum could be said to have an agent and "transacted business" there under the relevant venue statutes. *Id. at 492-93*. Based on United States Supreme Court dictum casting doubt on the conspiracy theory of venue under the Clayton Act, the Ninth Circuit concluded that deeming a conspirator an agent of his co-conspirators would expand the venue statute beyond what Congress contemplated. *Id. at 494-95*.

Piedmont is of limited value to the question in this case, as *Piedmont* was focused on the plaintiff's attempt to expand a specific venue statute contrary to congressional intent. To the extent *Piedmont* cautions against freely attributing one party's acts to another, existing personal jurisdiction law already provides that this Court must examine each defendant's contacts with the forum individually. *Harris Rutsky & Co. Ins. Servs., Inc., 328 F.3d at 1130*.

It is unclear whether and under what conditions the Ninth Circuit would find it consistent with due process to attribute a conspirator's forum-related contacts to his coconspirators for personal jurisdiction purposes. However, general **[**65]** due process considerations still would apply to outline the contours of a conspiracy theory of personal jurisdiction, if one is to exist at all.

Under these principles, the Court concludes that to the extent a conspiracy theory of personal jurisdiction is viable, it must be limited to the context of specific jurisdiction and cannot support general jurisdiction. To hold otherwise would create satellite litigation regarding conspiracies completely unrelated to the underlying claims simply to establish personal jurisdiction. Such a trial-within-a-trial situation based on an already tenuous basis to attribute a third party's contacts to a defendant to support personal jurisdiction is untenable.

Within the specific jurisdiction analysis, a plaintiff must establish the defendant purposefully availed himself of the forum. An allegation that a particular defendant **[*1140]** caused or contributed to an effect in the forum state, by itself, is insufficient, even if it is foreseeable that the defendant's conduct would have an effect in the forum. *World-Wide Volkswagen Corp. v. Woodson, 444 U.S. 286, 296, 100 S. Ct. 559, 62 L. Ed. 2d 490 (1980)*. The defendant, not his coconspirator, must choose to direct his activities at the forum in causing **[**66]** the effect in the forum. *Hanson v. Denckla, 357 U.S. 235, 253, 78 S. Ct. 1228, 2 L. Ed. 2d 1283 (1958)* ("The unilateral activity of those who claim some relationship with a nonresident defendant cannot satisfy the requirement of contact with the forum State."). Consequently, a co-conspirator's activity directed at the forum, even if in furtherance of a conspiracy of which the foreign defendant is a member, cannot constitute purposeful direction at the forum by the foreign defendant. The Court thus concludes that allegations of specific acts committed by a co-conspirator in the forum in furtherance of the conspiracy, alone, are insufficient to establish minimum contacts by a defendant who otherwise has no contacts with the forum.

Additionally, a "forseeable effect" in the forum state is inadequate to show the purposeful direction necessary to establish specific jurisdiction. *Pebble Beach, 453 F.3d at 1155*. Consequently, a defendant's mere awareness or ability to foresee in-forum effects from his out-of-forum conduct is insufficient to establish minimum contacts with the forum. Rather, under established Ninth Circuit law regarding specific jurisdiction, a foreign defendant expressly aims his conduct at the forum when **[**67]** he is alleged to have engaged in wrongful conduct "individually targeting a known forum resident." *Bancroft, 223 F.3d at 1087*. The Court thus concludes that if a conspiracy theory of jurisdiction is viable, a plaintiff must set forth non-conclusory allegations that the defendant was a member of a conspiracy, that the defendant's or his co-conspirator's acts in furtherance of the conspiracy caused harm in the forum, and that the conspiracy individually targeted a known forum resident.

Absent requiring this sort of purposeful direction at the forum, the conspiracy theory of personal jurisdiction "threatens to confuse the standards applicable to personal jurisdiction and those applicable to liability." *Melea, Ltd.,* *511 F.3d at 1070*. Personal jurisdiction is more restrictive than the scope of liability on a particular claim. A state "does not acquire [personal] jurisdiction by being the 'center of gravity' of the controversy, or the most convenient location for litigation." *Hanson, 357 U.S. at 254*. That a particular court lacks personal jurisdiction over a member of a conspiracy does not immunize the defendant from liability, it merely affects in what forum the plaintiff may seek to enforce **[**68]** that liability. *Ploense, 882 N.E.2d at 668*.

Here, Plaintiffs' SAC does not allege REI purposefully availed itself of Wisconsin by individually targeting known Wisconsin residents. Rather, the SAC alleges a nationwide conspiracy to manipulate natural gas prices resulting in inflated prices generally, including in Wisconsin. The mere likelihood that the price manipulation allegedly occurring in other states foreseeably would affect natural gas prices in Wisconsin does not amount to purposeful direction at Wisconsin. Other conspirators, not REI, chose to sell natural gas at allegedly inflated prices to customers in Wisconsin. The SAC does not allege the conspirators made an agreement specifically regarding Wisconsin or its residents. While other alleged conspirators such as RES may have purposefully directed their conduct at known Wisconsin residents, the **[*1141]** SAC contains no non-conclusory allegations that REI purposefully did so. [9]

Plaintiffs argue that Wisconsin has expanded its antitrust laws to reach conduct which impacts Wisconsin "even if the illegal activity resulting in those impacts occurred predominantly or exclusively outside this state." *Olstad v. Microsoft Corp., 2005 WI 121, 284 Wis. 2d 224, 700 N.W.2d 139, 158 (Wis. 2005)*. Plaintiffs thus contend Wisconsin must have meant to acquire personal jurisdiction over foreign antitrust co-conspirators whose out-of-forum acts impact Wisconsin.

This confuses liability with personal jurisdiction. While REI may be liable under Wisconsin ***antitrust law*** for its alleged illegal conduct, that does not automatically equate to Wisconsin having personal jurisdiction over REI. If Wisconsin does not have personal jurisdiction over a particular defendant, it must depend on other states to enforce its antitrust laws. Even if Wisconsin would adopt the conspiracy theory of personal jurisdiction for purposes of its long-arm statute, the exercise of personal jurisdiction by this Court still must comport with due process of law.

Moreover, Plaintiffs have failed to present evidence that REI was a member of any conspiracy directed at known **[**70]** Wisconsin targets. Although Plaintiffs contend they were not permitted to conduct discovery on the conspiracy issue, and thus the Court should not allow REI to argue no evidence of conspiracy exists, REI answered Plaintiffs' discovery on the issue of conspiracy as it relates to REI. REI had no documents related to communications between REI and the other Defendants about natural gas prices and had no documents in which REI directed a subsidiary's communications, price reporting, or trading. (Partial Tr. (Doc. # 1128) at 49-50.) REI objected to the extent that Plaintiffs sought every communication made by its subsidiary, RES, to other alleged co-conspirators. Such communications would not demonstrate REI's participation in a conspiracy, and thus would not demonstrate REI was a member of a conspiracy directed at Wisconsin.

Plaintiffs have not convinced the Court that further discovery would produce a different result. The Court therefore will decline Plaintiffs' request to defer the personal jurisdiction issue to be resolved with the merits. Because Plaintiffs have failed to allege Defendant REI purposefully directed its activities at a known forum resident, and because Plaintiffs have **[**71]** failed to present any evidence of REI's participation in any such conspiracy, the Court will grant Defendant REI's motion to dismiss for lack of personal jurisdiction.

The Court will not attribute RES's contacts with the forum to REI, and REI has no contacts of its own sufficient to support personal jurisdiction. The Court therefore will grant REI's motion to dismiss for lack of personal jurisdiction.

III. CONCLUSION

---

[9] The SAC contains only one allegation regarding any direction towards Wisconsin: "Reliant Energy, Inc., f/k/a Reliant Resources, Inc.'s actions were intended to have, and did have, a direct, substantial and reasonably foreseeable effect on commerce in Wisconsin **[**69]** during the Relevant Time Period." (Corrected Second Am. Compl. at 35-36.)

IT IS THEREFORE ORDERED that Defendant Reliant Energy, Inc.'s Motion to Dismiss for Lack of Personal Jurisdiction (Doc. # 869) is hereby GRANTED. Defendant Reliant Energy, Inc. is hereby dismissed from this action for lack of personal jurisdiction.

DATED: February 26, 2009

Jazayeri, LEAD ATTORNEY, Stroock & Stroock & Lavan LLP, Los Angeles, CA; Jennifer Dorsey, LEAD ATTORNEY, PRO HAC VICE, Kemp, Jones & Coulthard, LLP, Las Vegas, NV; William R. Urga, LEAD ATTORNEY, Jolley Urga Wirth Woodbury & Standish, Las Vegas, NV; J. Randall Jones, Harrison, Kemp & Jones, LLP, Las Vegas, NV.

For Williams Companies, Inc., Williams Energy Marketing & Trading Company, Williams Merchant Services Company, Inc., Williams Power (2:03-cv-01431-PMP-PAL), Defendant: Graydon Dean Luthey, Jr., Sarah Jane Gillett, LEAD ATTORNEYS, Heather L. Cupp, Stephanie A. Horton, Hall, Estill, Hardwick, Gable, Golden & Nelson, P.C., Tulsa, OK; Stacey R. Gilman, Thomas P. Schult, LEAD ATTORNEYS, Berkowitz, Oliver, Williams, Shaw & Eisenbrandt, LLP, Kansas City, MO; Brandon B Rule, Hall Estill, Tulsa, OK; Craig A. Fitzgerald, Gable Gotwals, Tulsa, OK; Jeffrey M. Shohet, Nancy L. Stagg, Stanley J. Panikowski, DLA Piper Rudnick Gray Cary US LLP, San Diego, CA; Joel B. Kleinman, Dickstein Shapiro **[*26]** LLP, Washington, DC; Mark H. Hamer, Piper Rudnick Gray Cary, San Diego, CA; Noah A. Katsell, San Diego, CA; Stuart G Mondschein, Wheeler, Van Sickle & Anderson, S.C., Madison, WI.

For Williams Energy Services Company (2:03-cv-01431-PMP-PAL), Defendant: Craig A. Fitzgerald, Gable Gotwals, Tulsa, OK; Jeffrey M. Shohet, Nancy L. Stagg, Stanley J. Panikowski, DLA Piper Rudnick Gray Cary US LLP, San Diego, CA; Mark H. Hamer, Piper Rudnick Gray Cary, San Diego, CA; Noah A. Katsell, San Diego, CA.

For Kathleen M. Zanaboni (2:03-cv-01431-PMP-PAL), Defendant: Brian J. O'Neill, pro hac vice, O'Neill & Sun, Santa Monica, CA; Christopher J. Healey, Luce, Forward, Hamilton & Scripps LLP, San Diego, CA; D. Neal Tomlinson, Snell & Wilmer L.L.P., Las Vegas, NV; Elizabeth S Parker, Las Vegas, NV; Jefferson Gregory Copeland, LEAD ATTORNEY, Houston, TX; Jeffrey D Wexler, Luce Forward Hamilton & Scripps, San Diego, CA; Luan K. Phan, Paz & Phan, Los Angeles, CA; Mark A. James, Bullivant Houser Bailey, PC, Las Vegas, NV; Mark R Robeck, LEAD ATTORNEY, Baker Botts L.L.P, Houston, TX.

For Western Gas Resources, Inc. (2:03-cv-01431-PMP-PAL), Defendant: James E Scarboro, LEAD ATTORNEY, Arnold & Porter LLP, Denver, **[*27]** CO; Jessica Brody, Matthew Douglas, LEAD ATTORNEYS, Arnold & Porter, Denver, CO.

For Kansas Gas Marketing Company (2:03-cv-01431-PMP-PAL), Defendant: Oliver S Howard, LEAD ATTORNEY, Amelia A Fogleman, Mason G Patterson, Gable & Gotwals, Tulsa, OK; Craig A. Fitzgerald, Gable Gotwals, Tulsa, OK; Jef Feibelman, Burch, Porter & Johnson, PLLC, Memphis, Te; Joel B. Kleinman, Dickstein Shapiro LLP, Washington, DC.

For OneOK Energy Services Company, L.P. (2:03-cv-01431-PMP-PAL), Defendant: Amelia A Fogleman, Oliver S Howard, LEAD ATTORNEYS, Thomas Kirby, Gable & Gotwals, Tulsa, OK; James W. Richgels, LEAD ATTORNEY, Quarles & Brady, LLP, Madison, WI; Kelly H Twigger, LEAD ATTORNEY, Quarles & Brady LLP, Milwaukee, WI; Scott R. Rowland, LEAD ATTORNEY, GableGotwals, Tulsa, OK; Thomas F Reese, LEAD ATTORNEY, Brown, Drew & Massey, LLP, Casper, WY; Craig A. Fitzgerald, Gable Gotwals, Tulsa, OK; Daniel D. Crabtree, Stinson Morrison Hecker, LLP, Overland Park, KS; David S Steefel, Holme Roberts & Owen LLP, Denver, CO; Jef

Feibelman, Burch, Porter & Johnson, PLLC, Memphis, Te; Joel B. Kleinman, Dickstein Shapiro LLP, Washington, DC.

For Center Point Energy, Inc. (2:03-cv-01431-PMP-PAL), Defendant: Heather **[*28]** L Peckham, Walter L McInnis, LEAD ATTORNEYS, Akin Gump Strauss Hauer & Feld LLP, Dallas, TX.

For Northern States Power Company (2:03-cv-01431-PMP-PAL), Defendant: Michael John Miguel, LEAD ATTORNEY, Morgan, Lewis & Bockius LLP, Los Angeles, CA; Joel B. Kleinman, Dickstein Shapiro LLP, Washington, DC; Joseph Duffy, Morgan Lewis & Bockius, Los Angeles, CA; Michael J. Modl, Madison, WI; Steven M. Streck, Axley Brynelson, Madison, WI.

For Cantera Gas Company, CMS Energy (2:03-cv-01431-PMP-PAL), Defendant: Mark E Haddad, Michelle B Goodman, LEAD ATTORNEYS, Sidley Austin LLP, Los Angeles, CA; David Gordon, Sidley Austin LLP, Chicago, IL.

For Duke Energy Carolinas, LLC (2:03-cv-01431-PMP-PAL), Defendant: Joel B. Kleinman, Lisa M Kaas, LEAD ATTORNEYS, Dickstein Shapiro LLP, Washington, DC; Clifford Joe Cavitt, Hurley, Burish & Stanton, S.C., Madison, WI; Marie A. Stanton, Madison, WI.

For Dynegy GP Inc DMT Holding, LP (2:03-cv-01431-PMP-PAL), Defendant: Douglas R. Tribble, LEAD ATTORNEY, Pillsbury Winthrop Shaw Pittman LLP, San Diego, CA; Michael J. Kass, LEAD ATTORNEY, Pillsbury Winthrop Shaw Pittman LLP, San Francisco, CA; Joel B. Kleinman, Dickstein Shapiro LLP, Washington, DC; Michael J. Modl, **[*29]** Madison, WI; Steven M. Streck, Axley Brynelson, Madison, WI.

For El Paso Marketing, LP (2:03-cv-01431-PMP-PAL), Defendant: Paul R. Norman, LEAD ATTORNEY, Boardman, Suhr, Curry & Field LLP, Madison, WI; Diane E. Pritchard, Morrison & Foerster, San Francisco, CA.

For DYNEGY GP INC. (2:03-cv-01431-PMP-PAL), Defendant: Michael J. Kass, LEAD ATTORNEY, Pillsbury Winthrop Shaw Pittman LLP, San Francisco, CA; Joel B. Kleinman, Dickstein Shapiro LLP, Washington, DC; Douglas R. Tribble, Pillsbury Winthrop Shaw Pittman LLP, San Diego, CA.

For Centerpoint Energy Services, Inc. (2:03-cv-01431-PMP-PAL), Defendant: Heather L Peckham, Walter L McInnis, LEAD ATTORNEYS, Orrin L Harrison, III, Akin Gump Strauss Hauer & Feld LLP, Dallas, TX.

For Michael Beck (2:03-cv-01431-PMP-PAL), Interested Party: Michael J. Beck, Clerk Of The Panel, LEAD ATTORNEY, Washington, DC.

Judges: PHILIP M. PRO, United States District Judge.

Opinion by: PHILIP M. PRO

Opinion

ORDER RE: DEFENDANT'S MOTION TO DISMISS (Doc. # 872)

Presently before this Court is Defendant Duke Energy Carolinas, LLC's Renewed Motion to Dismiss for Lack of Personal Jurisdiction (Doc. # 872), [1] filed on March 3, 2008. [2] Defendant Duke Energy Carolinas, LLC filed an appendix (Doc. # 968) **[*30]** and sealed exhibits (Doc. # 969) [3] in support. Plaintiffs filed an Opposition (Doc. #

[1] Document numbers refer to the base file, 2:03-CV-01431-PMP-PAL, unless otherwise noted.

[2] Duke Energy Carolinas, LLC subsequently withdrew the attached supporting declaration of Brent C. Bailey (Doc. # 1009).

[3] Duke Energy Carolinas, LLC manually filed the sealed exhibits with the Court but never electronically filed the sealed exhibits after the Court granted the related motion to seal. The Court by this Order directs Duke Energy Carolinas, LLC to electronically file the exhibits under seal so those exhibits are part of the official electronic record of this case.

1096) and supporting declaration (Doc. # 1097) on June 2, 2008. Plaintiffs also filed supporting exhibits (Doc. # 1084, # 1125). Defendant Duke Energy Carolinas, LLC filed a Reply (Doc. # 1176) with supporting exhibits (Doc. # 1179) [4] on June 23, 2008.

I. BACKGROUND

A. Procedural Background

This case is one of many in consolidated Multidistrict Litigation arising out of the energy crisis of 2000-2001. Plaintiffs originally filed this action in the Circuit Court, Dane County, Wisconsin. (Notice of Removal [Doc. # 2 in 2:07-CV-01019-PMP-PAL], Compl.) Defendants removed the case to the United States District Court for the District of Wisconsin. (*Id.*) The Judicial Panel on Multidistrict Litigation entered a Transfer Order pursuant to *28 U.S.C. § 1407* centralizing the foregoing action in this Court for coordinated or consolidated pretrial proceedings.

Plaintiffs Arandell Corporation, Merrick's, Inc., Safety-Kleen Systems, Inc., Sargento Foods, Inc., and Ladish Co., Inc. are Wisconsin corporations. (Corrected Second Am. Compl. [Doc. # 190 in 2:07-CV-01019-PMP-PAL] [5] at 5-6.) According to the Corrected Second Amended Complaint ("SAC"), Defendants are natural gas companies that buy, sell, transport, and store natural gas, including their own and their affiliates' production, in the United States and in the State of Wisconsin. (*Id.* at 6-51.) In this litigation, Plaintiffs allege **[*32]** Defendants conspired to engage in anti-competitive activities with the intent to manipulate and artificially increase the price of natural gas for consumers. (*Id.*) Specifically, Plaintiffs allege Defendants, directly and through their affiliates, conspired to manipulate the natural gas market by knowingly delivering false reports concerning trade information to trade indices and engaging in wash trades, in violation of Wisconsin Statutes chapter 133. (*Id.*)

The SAC asserts two causes of action. Count one arises under *Wisconsin Statutes § 133.14*, which voids contracts to which an antitrust conspirator is a party and allows recovery of payments made pursuant to such a contract. (*Id.* at 54-56.) Count two seeks trebled actual damages under *Wisconsin Statutes § 133.18* for Defendants' alleged antitrust violations. (*Id.* at 56-57.)

The SAC's allegations are directed generally at two types of Defendants: the natural gas companies that actually engaged in natural gas sales and the related reporting of allegedly manipulated **[*33]** gas prices to the trade indices, and those companies' parent corporations. The SAC does not allege the parent company Defendants themselves engaged in natural gas trading and price reporting. Rather, the SAC alleges these Defendants are the parent companies of subsidiaries which engage in such activity generally, and which also made natural gas sales in Wisconsin during the relevant time period.

Plaintiffs seek to establish personal jurisdiction over the parent company Defendants based on their out-of-forum activities directed at Wisconsin along with their subsidiaries' and affiliates' contacts within Wisconsin. According to the SAC, the parent company Defendants dominated and controlled their respective subsidiaries and the parent company Defendants "entered into a combination and conspiracy . . . which tended to prevent full and free competition in the trading and sale of natural gas, or which tended to advance or control the market prices of natural gas." (*Id.* at 6-7, 9, 14-15, 18-19, 23, 26-27, 30-31, 35-36.) Plaintiffs allege the parent company Defendants intended their actions to have a direct, substantial, and foreseeable effect on commerce in the State of Wisconsin. (*Id.* at 7, 10, 15, 19, 23-24, 27, 31, 36.) **[*34]** According to the SAC, the parent company Defendants "made strategic marketing policies and decisions concerning natural gas and the reporting of natural gas trade information

---

[4] Duke Energy Carolinas, LLC manually filed the sealed exhibits with the Court but never electronically filed the sealed exhibits after the Court granted the related motion to seal. The Court by this Order directs Duke Energy Carolinas, LLC to electronically file the exhibits under seal so those **[*31]** exhibits are part of the official electronic record of this case.

[5] Plaintiffs' Second Amended Complaint is located at docket number 847 in the base file. Plaintiffs filed the Corrected Second Amended Complaint only in the individual case file.

to reporting firms for use in the calculation of natural gas price indices that affected the market prices of natural gas, and those policies and decisions were implemented on an operational level by affiliates . . . in the United States and in Wisconsin." (*Id.* at 8, 10, 15, 19, 24, 27-28, 32, 36.)

Defendant Duke Energy Carolinas, LLC ("DEC") now moves to dismiss, arguing this Court lacks personal jurisdiction over DEC. According to DEC, it conducts no business in Wisconsin and has no other contacts supporting general or specific jurisdiction. DEC also argues it cannot be subject to jurisdiction in Wisconsin based on its subsidiary's contacts with the forum because its subsidiary is not its agent or alter ego, and Wisconsin would not support the conspiracy theory of jurisdiction. DEC thus argues personal jurisdiction does not exist under the Wisconsin long-arm statute, and even if it did, exercising personal jurisdiction in this case would violate constitutional due process requirements.

Plaintiffs respond that **[*35]** DEC's subsidiary has submitted to jurisdiction in Wisconsin and DEC is subject to personal jurisdiction based on agency and alter ego principles based on its subsidiary's contacts. Additionally, Plaintiffs argue that because Wisconsin's antitrust statutes contemplate imposing liability on an antitrust conspirator who performs acts outside of Wisconsin that have an impact in Wisconsin, the Court has personal jurisdiction over DEC under Wisconsin's long-arm statute.

B. Facts Related to Personal Jurisdiction

DEC is a North Carolina limited liability company formerly known as Duke Energy Corporation, a North Carolina corporation. (Renewed Mot. to Dismiss for Lack of Pers. Juris. (Doc. # 872) ["DEC Mot."], Ex. A at 2.) Duke Energy Corporation converted to a limited liability company and renamed itself DEC in April 2006. (*Id.*) DEC primarily engages in the business of generating, transmitting, distributing, and selling electric energy in North and South Carolina. (*Id.* at 3.)

DEC does not maintain offices, conduct business, have employees, own property, or maintain a bank account in Wisconsin. (*Id.*) DEC has not purchased, sold, or transported natural gas in Wisconsin. (DEC Mot., Ex. B at 3.) **[*36]** DEC has not applied for or received a certificate of authority to transact business in Wisconsin and has no registered agent for service of process in Wisconsin. (DEC Mot., Ex. A at 3.)

DEC wholly owns Duke Capital Corporation, which in turn wholly owns Pan Energy Corp. (App. to Pls.' Joint Opp'n to Duke Energy Carolinas, LLC's Mot. to Dismiss for Lack of Pers. Juris. (Doc. # 1084) ["Pls.' App."], Ex. F.) Pan Energy Corp. wholly owns Duke Energy Services, Inc., which wholly owns Duke Energy Natural Gas Corporation. (*Id.*) Duke Energy Natural Gas Corporation wholly owns DETMI Management, Inc. (*Id.*) DETMI Management, Inc. owns a sixty percent interest in Duke Energy Trade and Marketing, LLC ("DETM"), a Defendant in this action and the subsidiary whose contacts with Wisconsin Plaintiffs seek to attribute to DEC. (DEC Mot., Ex. C at 2.) Mobil Natural Gas, Inc. ("MNGI"), an indirect subsidiary of Exxon Mobil Corporation, owns the other forty percent of DETM. (*Id.* at 2-3.)

DETM was created in 1996 as a Delaware limited liability company pursuant to a limited liability company agreement and limited partnership agreement. (Pls.' App., Ex. E at 34-35; App. of Docs. Filed Under Seal (Doc. # 1125) **[*37]** ["Sealed App."], Ex. L at DEMDL000383; Separate Vol. of Evid. in Supp. of the Separate App. of Facts Regarding Duke Energy Carolinas, LCC (Doc. # 968) ["Separate Vol. Evid."], Ex. 7.) The company now known as DETM originally was called PanEnergy Trading and Marketing Services, LLC, and was created by an agreement between PTMSI Management, Inc. and MNGI. (Separate Vol. Evid., Ex. 7 at 1, 6, 7, 10.) PTMSI Management, Inc.'s parent company at the time was PanEnergy Corp. (*Id.* at 7, 10.) PanEnergy Corp. was acquired by Duke Energy Corporation in 1997 and PanEnergy Trading and Marketing Services, LLC was renamed to DETM. (Separate Vol. Evid., Ex. 9 at 2.) DETM is engaged in the purchase and sale of natural gas and electricity at wholesale. (DEC Mot., Ex. C at 3.) DETM concedes personal jurisdiction in this action. (Pls.' App., Ex. A at 2.)

DETM is run by a Management Committee consisting of three representatives from the Duke Energy side and two representatives from the Exxon Mobil side. (Sealed App., Ex. L at DEMDL000400.) The Management Committee acts through the delegation of certain responsibilities and authority to the managing member, which in 2001 and 2002 was DETMI Management, Inc. **[*38]** (*Id.*) Although DETMI Management, Inc. was the managing member, and through its majority status on the committee could outvote the MNGI members on certain matters, the limited liability company agreement mandated that some actions required unanimous approval by the Management Committee. (Separate Vol. Evid., Ex. 7 at 17, 24, 26-27.) In at least one instance, the MNGI members refused to agree to a business plan supported by the DETMI Management, Inc. members. (Pls.' App., Ex. E at 67-69.)

No DEC director serves as an officer or director for DETM. (DEC Mot., Ex. A at 4.) In DEC's 2000 annual report, DEC identified a "management team" which includes Jim W. Mogg ("Mogg"), Chief Executive Officer of Duke Energy Field Services; Kirk B. Michael ("Michael"), Vice President and Chief Financial Officer for Finance and Planning; James Donnell ("Donnell"), President and Chief Executive Officer for Duke Energy North America; and Ronald Green ("Green"), President and Chief Executive Officer for Duke/Fluor Daniel. (Pls.' App., Ex. B at DEMDL001901.) Mogg, Michael, Donnell, and Green were members of the DETM Management Committee at one point or another. (Sealed App., Ex. L at DEMDL001702, DEMDL001706, **[*39]** DEMDL001711.)

DEC and DETM maintain separate corporate records. (DEC Mot., Ex. A at 4.) DEC provided corporate services to DETM, including administering employee health insurance, human resources, computer technology, legal services, and credit risk management. (Pls.' App., Ex. A at 4-5.) Throughout the relevant time period, DETM regularly used, and was permitted to use, the "Duke Energy" and "Mobil" logos. (*Id.* at 5.) DETM did not have any agency agreements or power of attorney for DEC, and did not register to do business on DEC's behalf in Wisconsin during the relevant time period. (*Id.*)

DETM was financed through a $ 150 million funding facility, of which DETMI Management, Inc. provided sixty percent and MNGI funded the other forty percent. (Separate Vol. Evid., Ex. 3 at 35.) In DETM's financial statements, it twice indicated that DEC was responsible for providing operational interest-free contributions, on a proportionate basis with Exxon Mobil, to fund DETM's operations. (Sealed App., Ex. L at DEMDL00383, DEMDL00400.) According to Richard McGee ("McGee"), former general counsel for energy services for DEC and current president of DEC's international business, these statements were **[*40]** a mistake, as PanEnergy Corp., not DEC, is responsible for making contributions under the funding facility agreement. (Pls.' App., Ex. E at 6, 138-40.) DEC's consolidated financial reports reflected sixty percent of DETM's profits and losses during the relevant time period. (Pls.' App., Ex A at 6.)

DEC describes itself, collectively with its subsidiaries, as "an integrated energy and energy services provider with the ability to offer physical delivery and management of both electricity and natural gas throughout the U.S. and abroad." (Pls.' App., Ex. B at DEMDL001846.) DEC provides these services through various "business segments," one of which includes DETM's natural gas trading. (*Id.*) DEC describes its business strategy as "develop[ing] integrated energy businesses in targeted regions where Duke Energy's extensive capabilities in developing energy assets, operating electricity, natural gas and NGL plants, optimizing commercial operations and managing risk can provide comprehensive energy solutions for customers and create superior value for shareholders." (*Id.*)

DEC has created "[c]omprehensive risk management polices" to monitor and manage market, commodity price, credit, and other **[*41]** risks to which DEC and its subsidiaries are exposed. (*Id.* at DEMDL001854-55.) As part of its risk management policies, DEC monitors certain metrics, such as value-at risk ("VAR") and daily earnings at risk ("DER") on a daily basis. (*Id.* at DEMDL001855.) DEC has several committees which perform risk management, including the Corporate Risk Management Committee, the Energy Risk Management Committee, and the Financial Risk Management Committee. (Pls.' App., Ex. E at 80.) DEC appointed the members of each of these committees. (*Id.*) Through these polices and committees, DEC sets overall risk guidelines for its subsidiaries.

For example, DEC adopted a Code of Business Ethics which applied to every DEC subsidiary. (Pls.' App., Ex. J, Ex. E at 100-01.) This policy mandated compliance with applicable antitrust laws. (Pls.' App., Ex. J at 12.) This policy was implemented and supervised by DEC's Corporate Compliance Committee. (*Id.* at 15.) The Corporate Compliance Committee was responsible for updating the code, establishing education programs for employees about ethics and compliance issues, providing guidance under the code, monitoring and auditing compliance, reporting periodically to management **[*42]** and the Audit Committee of DEC's Board of Directors, and reporting violations to the appropriate governmental authorities. (*Id.*) DETM either incorporated this policy by reference or adopted a similar policy. (Pls.' App., Ex. E at 115-16.)

DEC also has a Corporate Credit Risk policy. (Sealed App., Ex. L at DEMDL001382, DEMDL001388.) Under this policy, DEC's Chief Risk Officer chairs the Risk Management Committee. (*Id.*) The Risk Management Committee meets at least monthly and is responsible for reviewing business trends and credit exposure, monitoring compliance with the policy, identifying where new policies are needed, and ensuring "consistent and mutually reinforcing credit and market risk management strategies through various corporate risk policies and associated guidelines for implementing policy." (*Id.*) The policy also sets forth the duties of the Chief Credit Officer, which includes the ability to "stop business activity that would increase credit exposure, as is necessary, to protect Duke Energy's balance sheet." (*Id.*) The Chief Credit Officer reports to the Chief Risk Officer. (*Id.*)

DEC has a Corporate Risk Management Committee consisting of DEC's chief financial officer and **[*43]** DEC Policy Committee members. (*Id.* at DEMDL001488.) This Committee establishes "comprehensive risk management policies to monitor and control identified risks." (*Id.*) DEC's Corporate Risk Management Committee delegates some responsibilities to the Energy Risk Management Committee and the Financial Risk Management Committee, but retains oversight responsibilities. (*Id.*) The Energy Risk Management Committee has responsibility for overseeing energy risk management practices and recommending energy commodity exposure limits, subject to approval by the Corporate Risk Management Committee. (*Id.*) The Financial Risk Management Committee is responsible for managing risks related to interest rates, foreign currency, and credit. (*Id.*)

Within DETM, "[u]ltimate risk control responsibility resides with the DETM Management Committee." (*Id.* at DEMDL001489.) The DETM Management Committee oversees the risk management and control function and approves policies and controls for DETM. For example, DETM adopted its own Risk Management and Trading Policies and Controls. (*Id.* at DEMDL001484.) DETM's Management Committee "delegates the day-to-day overview of the risk management and control function" to the **[*44]** DEC Energy Risk Management Committee. (*Id.* at DEMDL001489.) "However, overall responsibility for DETM's performance targets, business plans and approved risk levels remains with the Management Committee." (*Id.*) Although DETM's Risk Management and Trading Policies and Controls states that the Management Committee delegates "day-to-day overview" to the DEC Energy Risk Management Committee, it describes the Energy Risk Management Committee's functions as meeting "at least monthly" to establish risk management policies, controls, and practices, and overseeing and approving excesses of overall limits. (*Id.* at DEMDL001489-90.) When it comes to operational control, the policy vests that authority in DETM Senior Management. (*Id.* at DEMDL001490.) DETM Senior Management is responsible for "[d]evelopment of trading strategies; [a]ctive management of trading within overall limits; [a]llocation of limits to traders and/or books; [e]nforcing the risk control environment; [a]dvocating new limits and products; and [a]dvocating exceptions or revisions to policy when appropriate." (*Id.*) Beneath DETM Senior Management, the origination and trading groups actually conduct the transactions with customers. **[*45]** (*Id.*)

DEC's Energy Risk Management Committee is not responsible for managing energy price risk for DETM. (Separate Vol. Evid., Ex. 10 at DEMDL001569.) Instead, DETM manages its own energy price risk pursuant to its own risk management policy. (*Id.*) However, that policy is subject to approval by the Corporate Risk Management Committee. (*Id.*) In similar fashion, DETM decides whether to extend credit, subject to the Financial Risk Committee's Credit Quality Guidelines. (*Id.* at DEMDL001495.) According to McGee, DEC's risk management policies "would have applied to DETM only to the extent that . . . the management committee of DETM had adopted a policy that was similar to this or [DETMI,] in discharging its responsibilities as a managing member of DETM . . . adopt[ed] policies that it saw fit in connection with discharging those duties." (Pls.' App., Ex. E at 100.) These policies "were either largely consistent with or in some cases maybe identical to some of" DEC's policies. (*Id.*)

At a July 2000 DETM management committee meeting, the MNGI representative expressed some concern that certain personnel now working for DETM would be shared between DETM and Duke Energy North America, LLC. (Sealed **[*46]** App., Ex. L at DEMDL001707.) Specifically, the MNGI representative was concerned that because DETM senior managers "would have dual responsibilities, working for both DETM and Duke Energy or Duke affiliates, [they] would face conflicts because their compensation is based on performance of two entities with differing Duke ownership shares." (*Id.*) At a September 2001 DETM management committee meeting, the Exxon

Mobil representative "objected to the way the business had been run including a perceived lack of separation between [Duke Energy North America] and DETMI." (*Id.* at DEMDL001718.)

In May 2002, DETM's outside auditor, Deloitte & Touche, sent a letter to the DETM management committee highlighting certain areas of concern. (*Id.* at DEMDL002687.) Among the concerns Deloitte & Touche highlighted was that DETM's operations were "highly integrated into the overall strategy of Duke Energy North America ('DENA'). There are instances where the distinctiveness between DETM and other affiliates of its owners could be enhanced." [6] (*Id.* at DEMDL002692.)

In September 2003, the Commodity Futures Trading Commission ("CFTC") entered into a settlement with DETM regarding allegations that DETM manipulated the natural gas market. (DEC Mot., Ex. F.) The CFTC found that from January 2000 through August 2002, DETM's Houston office reported to price reporting firms false price and volume information regarding natural gas transactions. (*Id.* at 2-3.) As part of the settlement, DETM agreed to cease and desist from any future violations, and agreed to pay a $ 28 million fine. (*Id.* at 5.) Additionally, both DETM and Duke Energy Corporation (DEC's predecessor) agreed to cooperate in any future investigations arising out of this investigation, to preserve records, to produce documents when requested, and to provide assistance in locating and contacting any prior employees. (*Id.*) DETM and Duke Energy Corporation also agreed not to publicly deny the CFTC's findings of fact. (*Id.* at 6.) DEC attorneys and senior executives participated in internal investigations into DETM's price reporting activities. (Pls.' App., Ex. A at 6.)

In April 2003, DEC announced that two of its subsidiaries, Duke Energy **[*48]** North America and Duke Energy Merchants, would cease proprietary trading of natural gas and power. (DEC Mot., Ex. G.) DETM also ceased speculative natural gas trading in 2003. (Pls.' App., Ex. A at 5.) After that time, DETM continued to buy and sell natural gas "for the purpose of meeting and hedging its obligations to supply gas-fired power plants owned by Duke Energy North America, Inc. and other affiliates and to meet natural gas supply commitments it has made." (*Id.*) By the end of 2004, DEC "made substantial progress on winding down" the DETM joint venture with Exxon Mobil, and had "completed or signed transactions to sell about 90 percent of that business." (Pls.' App., Ex. G.)

The parties now dispute the significance of these contacts under the Wisconsin long-arm statute. The parties also dispute whether this Court's exercise of personal jurisdiction over DEC would violate constitutional due process requirements.

II. PERSONAL JURISDICTION

"When a defendant moves to dismiss for lack of personal jurisdiction, the plaintiff bears the burden of demonstrating that the court has jurisdiction over the defendant." *Pebble Beach Co. v. Caddy, 453 F.3d 1151, 1154 (9th Cir. 2006)*. To meet this **[*49]** burden, a plaintiff must demonstrate that personal jurisdiction over a defendant is (1) permitted under the applicable state's long-arm statute and (2) that the exercise of jurisdiction does not violate federal due process. *Id.* The Court must analyze whether personal jurisdiction exists over each defendant separately. *Harris Rutsky & Co. Ins. Servs., Inc. v. Bell & Clements Ltd., 328 F.3d 1122, 1130 (9th Cir. 2003)*.

Where the issue is before the Court on a motion to dismiss based on affidavits and discovery materials without an evidentiary hearing, the plaintiff must make "a prima facie showing of facts supporting jurisdiction through its pleadings and affidavits to avoid dismissal." *Glencore Grain Rotterdam B.V. v. Shivnath Rai Harnarain Co., 284 F.3d 1114, 1119 (9th Cir. 2002)*. The Court accepts as true any uncontroverted allegations in the complaint and resolves any conflicts between the facts contained in the parties' evidence in the plaintiff's favor. *Id.* However, for personal jurisdiction purposes, a court "may not assume the truth of allegations in a pleading which are contradicted by affidavit." *Alexander v. Circus Circus Enters., Inc., 972 F.2d 261, 262 (9th Cir. 1992)* (quotation **[*50]** omitted).

---

[6] DEC objects to the admission of the Deloitte & Touche letter as inadmissible hearsay. Because consideration of the letter does not affect the **[*47]** outcome of this decision, the Court will deny DEC's objection.

In diversity cases such as this, "a federal court applies the personal jurisdiction rules of the forum state provided the exercise of jurisdiction comports with due process." *Scott v. Breeland, 792 F.2d 925, 927 (9th Cir. 1986)*. However, "federal law is controlling on the issue of due process under the United States Constitution." *Data Disc, Inc. v. Sys. Tech. Assoc., Inc., 557 F.2d 1280, 1286 n.3 (9th Cir. 1977)*; *see also* *Dole Food Co., Inc. v. Watts, 303 F.3d 1104, 1110 (9th Cir. 2002)*. Therefore, the Court will apply law from the United States Court of Appeals for the Ninth Circuit in deciding whether jurisdiction is appropriate under the *Due Process Clause*. *See* *In re Korean Air Lines Disaster of Sept. 1, 1983, 829 F.2d 1171, 1174, 265 U.S. App. D.C. 39 (D.C. Cir. 1987)* (concluding that "the transferee court [should] be free to decide a federal claim in the manner it views as correct without deferring to the interpretation of the transferor circuit"); *Menowitz v. Brown, 991 F.2d 36, 40 (2d Cir. 1993)* (holding that "a transferee federal court should apply its interpretations of federal law, not the constructions of federal law of the transferor circuit").

To satisfy federal due process standards, **[*51]** a nonresident defendant must have "minimum contacts" with the forum state so that the assertion of jurisdiction does not offend traditional notions of fair play and substantial justice. *Pebble Beach Co., 453 F.3d at 1155* (citing *Int'l Shoe Co. v. Washington, 326 U.S. 310, 315, 66 S. Ct. 154, 90 L. Ed. 95 (1945))*. A federal district court may exercise either general or specific personal jurisdiction. *See* *Helicopteros Nacionales de Colombia, S.A. v. Hall, 466 U.S. 408, 414-15, 104 S. Ct. 1868, 80 L. Ed. 2d 404 (1984)*.

To establish general personal jurisdiction, the plaintiff must demonstrate the defendant has sufficient contacts to "constitute the kind of continuous and systematic general business contacts that 'approximate physical presence.'" *Glencore Grain, 284 F.3d at 1124* (quoting *Bancroft & Masters, Inc. v. Augusta Nat'l Inc., 223 F.3d 1082, 1086 (9th Cir. 2000)*, *modified*, *Yahoo! Inc. v. La Ligue Contre Le Racisme Et L'Antisemitisme, 433 F.3d 1199, 1207 (9th Cir. 2006))*. Courts consider such factors as whether the defendant makes sales, solicits or engages in business in the state, serves the state's markets, designates an agent for service of process, holds a license, or is incorporated there. *Bancroft, 223 F.3d at 1086*. "[A] defendant whose **[*52]** contacts are substantial, continuous, and systematic is subject to a court's general jurisdiction even if the suit concerns matters not arising out of his contacts with the forum." *Glencore Grain, 284 F.3d at 1123* (citing *Helicopteros, 466 U.S. at 415 n.9*).

A nonresident defendant's contacts with the forum state may permit the exercise of specific jurisdiction if: (1) the defendant has performed some act or transaction within the forum or purposefully availed himself of the privileges of conducting activities within the forum, (2) the plaintiff's claim arises out of or results from the defendant's forum-related activities, and (3) the exercise of jurisdiction over the defendant is reasonable. *Pebble Beach Co., 453 F.3d at 1155-56*. "If any of the three requirements is not satisfied, jurisdiction in the forum would deprive the defendant of due process of law." *Omeluk v. Langsten Slip & Batbyggeri A/S, 52 F.3d 267, 270 (9th Cir. 1995)*.

Under the first prong of the "minimum contacts test," the plaintiff must establish either that the defendant "(1) purposefully availed himself of the privilege of conducting his activities in the forum, or (2) purposefully directed his activities toward the **[*53]** forum." *Pebble Beach Co., 453 F.3d at 1155*. "Evidence of availment is typically action taking place in the forum that invokes the benefits and protections of the laws in the forum." *Id.* Evidence of direction usually consists of conduct taking place outside the forum that the defendant directs at the forum. *Id. at 1155-56*.

The purposeful direction aspect of the first prong is satisfied when a foreign act is both aimed at and has effect in the forum. *Id.* In other words, the defendant "must have (1) committed an intentional act, which was (2) expressly aimed at the forum state, and (3) caused harm, the brunt of which is suffered and which the defendant knows is likely to be suffered in the forum state." *Id.* To satisfy the third element of this test, the plaintiff must establish the defendant's conduct was "expressly aimed" at the forum; a "mere foreseeable effect" in the forum state is insufficient. *Id.* The "express aiming" requirement is satisfied when the defendant is alleged to have engaged in wrongful conduct "individually targeting a known forum resident." *Bancroft, 223 F.3d at 1087*.

The second prong of the specific jurisdiction test requiring that the contacts constituting purposeful **[*54]** availment or purposeful direction give rise to the current action is measured in terms of "but for" causation. *Id. at 1088*. "If the plaintiff establishes both prongs one and two, the defendant must come forward with a 'compelling case' that the exercise of jurisdiction would not be reasonable." *Boschetto v. Hansing, 539 F.3d 1011, 1016 (9th Cir. 2008)* (quotation omitted).

No evidence in the record demonstrates DEC itself had any contacts with the state of Wisconsin. Consequently, DEC is subject to personal jurisdiction in Wisconsin only if the forum acts of its indirect subsidiary, DETM, are attributable to it through principles of alter ego, agency, or a conspiracy theory of personal jurisdiction. [7]

A. Alter Ego

A "parent-subsidiary relationship alone is insufficient to attribute the contacts of the subsidiary to the parent for jurisdictional purposes." *Harris Rutsky & Co. Ins. Servs., Inc., 328 F.3d at 1134*. However, a subsidiary's contacts may be imputed to its parent for personal jurisdiction purposes where the subsidiary is the parent's alter ego. *Id.*

To demonstrate **[*55]** a parent and its subsidiary are alter egos, the plaintiff must establish a prima facie case that the two companies share "such unity of interest and ownership" that the companies' separateness no longer exists and "failure to disregard [their separate identities] would result in fraud or injustice." *Doe v. Unocal Corp., 248 F.3d 915, 926 (9th Cir. 2001)* (quotation omitted). To demonstrate a unity of interest warranting disregard of corporate separateness, the plaintiff must show the parent controls its subsidiary to such a degree as to render the subsidiary a "mere instrumentality" of its parent. *Id.* (quotation omitted). Typically, this would involve showing the parent controls the subsidiary's internal affairs or daily operations. *Kramer Motors, Inc. v. British Leyland, Ltd., 628 F.2d 1175, 1177 (9th Cir. 1980)*. [8]

A parent corporation may be involved directly in certain aspects of its wholly owned subsidiary's affairs without subjecting itself to alter ego status. For example, a parent may provide financing to its subsidiary so long as it maintains corporate formalities and properly documents loans and capital contributions to its subsidiaries, and it may act as its subsidiary's guarantor. *Doe, 248 F.3d at 927-28*. Additionally, a parent may refer to its subsidiaries as divisions of the parent in annual reports. *Id. at 928*. Further, a parent may review and approve major decisions, place its own directors on the subsidiary's board, and share offices and staff with its wholly owned subsidiary without being considered its alter ego. *Id.; Harris Rutsky & Co. Ins. Servs., Inc., 328 F.3d at 1135*.

In sum, a parent may involve itself directly in its subsidiary's activities **[*57]** without becoming an alter ego "so long as that involvement is consistent with the parent's investor status." *Harris Rutsky & Co. Ins. Servs., Inc., 328 F.3d at 1135* (quotation omitted). Activities consistent with investor status include "'monitoring of the subsidiary's performance, supervision of the subsidiary's finance and capital budget decisions, and articulation of general policies and procedures[.]'" *Doe, 248 F.3d at 926* (quoting *United States v. Bestfoods, 524 U.S. 51, 72, 118 S. Ct. 1876, 141 L. Ed. 2d 43 (1998))*.

In addition to showing lack of corporate separateness, the plaintiff also must show that failure to disregard the corporate form would promote fraud or injustice. The fraud or injustice must relate to the forming of the corporation or abuse of the corporate form, not a fraud or injustice generally. *Laborers Clean-Up Contract Admin. Trust Fund v. Uriarte Clean-Up Serv., Inc., 736 F.2d 516, 524-25 n.12 (9th Cir. 1984)*. For example, undercapitalization at the subsidiary's inception may be evidence of the parent's fraudulent intent. *Id.* However, a corporation that once was capitalized adequately but "subsequently fell upon bad financial times" does not support a finding of fraud or

---

[7] The Court will assume that if DETM's forum-related acts are attributable to DEC, the Wisconsin long-arm statute is satisfied.

[8] Wisconsin utilizes similar principles. In Wisconsin, the party attempting to pierce the corporate veil must show the subsidiary corporation "has no separate existence of its own and is the mere instrumentality of the shareholder and the corporate form is used to evade an obligation, to gain an unjust advantage or to commit an injustice." *Wiebke v. Richardson & Sons, Inc., 83 Wis. 2d 359, 265 N.W.2d 571, 573 (Wis. 1978)*. **[*56]** To the extent Wisconsin would look to the law of the state of incorporation to determine alter ego status, North Carolina has similar requirements. *See State ex rel. Cooper v. Ridgeway Brands Mfg., LLC, 362 N.C. 431, 666 S.E.2d 107, 112-15 (N.C. 2008)*; *East Market Street Square, Inc. v. Tycorp Pizza IV, Inc., 175 N.C. App. 628, 625 S.E.2d 191, 196-201 (N.C. Ct. App. 2006)*.

injustice. *Id. at 525*. **[*58]** Further, evidence that the corporation existed as an ongoing enterprise engaged in legitimate business suggests no fraudulent intent or injustice to support piercing the corporate veil. *Seymour v. Hull & Moreland Eng'g, 605 F.2d 1105, 1113 (9th Cir. 1979)*. An inability to collect on a judgment "does not, by itself, constitute an inequitable result." *Id.*

Plaintiffs have failed to establish a prima facie case of personal jurisdiction based on DETM being DEC's alter ego. DEC indirectly owns only sixty percent of DETM. DETM thus is neither DEC's direct subsidiary nor its wholly owned subsidiary. The companies did not share offices and had virtually no overlapping officers or directors. That other officers and directors of other DEC subsidiaries may have overlapped or that DEC identified certain DETM Management Committee members as part of an overall "management team" does not indicate a lack of separateness between DEC and DETM. Likewise, the fact that MNGI and/or Deloitte & Touche perceived a possible lack of separateness between DETM and Duke Energy North America does not establish a lack of separateness between DETM and DEC. Nor does the possibility that DEC was responsible for making **[*59]** contributions under the funding facility or that DEC provided corporate services, such as legal or human resources support.

Plaintiffs have presented no evidence that DEC controlled DETM's daily operations. Under the limited liability company agreement, DETMI Management, Inc. was the managing agent, not DEC. And as to DETMI Management, Inc., it did not have complete control over DETM as the MNGI representatives' approval was required for any material decisions. In at least one instance, DETMI Management, Inc. was unable to implement the business plan it desired because it could not obtain the approval of the MNGI representatives on the Management Committee.

DEC's promulgation of general policies for its subsidiaries is consistent with its indirect investor status. DEC, as an investor up the corporate chain, is entitled to monitor DETM's performance. Consequently, any daily reporting of information from DETM to DEC is in accord with DEC's investor oversight role. No evidence suggests DEC gave daily control commands to DETM or even to DETMI Management, Inc. Rather, the record demonstrates that, consistent with its investor status, DEC set general policies and guidelines regarding best **[*60]** policies and practices, as well as certain overall limits, such as limits on credit risk. However, DEC's broad policies applied to DETM only to the extent DETM's Management Committee adopted those policies, in whole or in part, through DETMI Management, Inc.'s status as a majority member.

Moreover, DETM's delegation of certain risk management oversight to DEC's Energy Risk Management Committee does not demonstrate daily control. The Energy Risk Management Committee meets "at least monthly," and is responsible for establishing risk managing practices and controls, monitoring daily reports, and overseeing and approving any excesses of a risk limit. (Sealed App., Ex. L at DEMDL001490.) The Energy Risk Management Committee thus established broad guidelines under which DETM operated and became involved, if ever, only when overall limits were exceeded. Actual operational decisions, such as developing trading strategy, actively managing trading within overall limits, allocating limits among traders, and enforcing risk control, were the responsibility of DETM Senior Management.

Further, with respect to DETM's day-to-day conduct of its business within these guidelines, Plaintiffs present no evidence **[*61]** DEC had any role. For example, with respect to natural gas trading, while DEC set overall limits on certain metrics, DEC had no role in making the day-to-day decisions of who DETM was to trade with, when, for what amount of natural gas, and at what price. Plaintiffs also present no evidence DEC had any role in DETM's price reporting to indices. Plaintiffs present evidence that DEC policies granted DEC's chief credit officer with veto power over any DETM business activity, but Plaintiffs present no evidence that authority ever was exercised over DETM generally or particularly with respect to any natural gas trades in Wisconsin or anywhere else.

Even if Plaintiffs had established a lack of corporate separateness, Plaintiffs have not established a fraud or injustice would result if the Court failed to pierce the corporate veil. Plaintiffs contend it would be unjust to permit DEC to reap the benefits of DETM's alleged unlawful behavior by enjoying profits from DETM's trading activities while escaping liability for DETM's alleged misconduct. However, the alleged illegal price manipulation cannot itself constitute the fraud or injustice necessary to pierce the corporate veil. Rather, DEC **[*62]** must have had some fraudulent intent at DETM's inception or some later abuse of the corporate form such that failing to treat the entities as one would be inequitable. Plaintiffs present no evidence DETM was undercapitalized at its inception. DEC was not involved in forming DETM and became its indirect parent through DEC's acquisition of DETM's ultimate parent, PanEnergy Corp. Further, the fact that DETM operated as a legitimate business for years suggests a lack of fraudulent intent or perpetration of a fraud through use of the corporate structure on the parent's part.

Plaintiffs' fear that they may not be able to collect on a judgment in this action against DETM does not constitute fraud or injustice to support piercing the corporate veil. The Court therefore finds Plaintiffs have not met their burden of establishing DETM is DEC's alter ego, and the Court will not attribute DETM's contacts with Wisconsin to DEC for purposes of determining personal jurisdiction based on alter ego principles.

B. Agency

A subsidiary's contacts also may be imputed to its parent for personal jurisdiction purposes where the subsidiary is the parent's general agent in the forum. *Harris Rutsky & Co. Ins. Servs., Inc., 328 F.3d at 1134*. **[*63]** A subsidiary is its parent's agent for purposes of attributing its forum-related contacts to the parent if the subsidiary "performs services that are 'sufficiently important to the foreign corporation that if it did not have a representative to perform them, the corporation's own officials would undertake to perform substantially similar services.'" *Doe, 248 F.3d at 928* (quoting *Chan v. Society Expeditions, Inc., 39 F.3d 1398, 1405 (9th Cir. 1994))*. The ultimate inquiry is whether the subsidiary's presence in the forum "substitutes" for its parent's presence. *Id. at 928-29* (quotation omitted).

Where the parent is merely a holding company, the subsidiary's forum-related contacts are not done as the parent's agent because the holding company "could simply hold another type of subsidiary" as an investment and thus the subsidiary conducts business not as the parent's agent but as its investment. *Id. at 929*. "Where, on the other hand, the subsidiaries are created by the parent, for tax or corporate finance purposes, there is no basis for distinguishing between the business of the parent and the business of the subsidiaries." *Id.* (quotation omitted). The inquiry as to whether a subsidiary **[*64]** is its parent's general agent in the forum is "a pragmatic one." *Gallagher v. Mazda Motor of Am., Inc., 781 F. Supp. 1079, 1085 n.10 (E.D. Pa. 1992)*.

For example, where a Japanese parent company was engaged in the manufacture of watches, its subsidiaries that acted as its sole sales agents in America were "almost by definition . . . doing for their parent what their parent would otherwise have to do on its own." *Bulova Watch Co., Inc. v. K. Hattori & Co., Ltd., 508 F. Supp. 1322, 1342 (E.D.N.Y. 1981)*. The *Bulova* court thus attributed the subsidiaries' contacts to the parent company. *Id.; see also Chan, 39 F.3d at 1405-06* (remanding to the district court for additional findings of fact regarding agency where the German parent corporation owned and operated cruise ships and its local subsidiary marketed cruises and chartered cruise ships and sold the cruise ticket to the plaintiffs out of which the claims arose); *Modesto City Schs. v. Riso Kagaku Corp., 157 F. Supp. 2d 1128, 1135 (E.D. Cal. 2001)* (holding subsidiary was parent's agent for personal jurisdiction purposes where subsidiary acted as sole conduit for marketing and selling parent's products in the United States).

In contrast, **[*65]** where the parent company owned a subsidiary mining company's stock but did not itself engage in the business of gold mining, imputing the subsidiary's forum contacts to the parent was not appropriate. *Sonora Diamond Corp. v. Superior Court, 83 Cal. App. 4th 523, 99 Cal. Rptr. 2d 824, 840-41 (Ct. App. 2000)*. As the *Sonora Diamond* court explained, had the parent company owned "the rights to the gold and used Sonora Mining as the operating and marketing entity," then perhaps general jurisdiction over the parent company would be appropriate because under those circumstances the parent company "could not reap the benefits of its rights unless it or someone else removed and sold the ore." *Id.* But where the parent simply held the mining company as an investment, the subsidiary's forum-related contacts could not be imputed to the parent company. *Id.*

Likewise, in *Doe,* the Ninth Circuit concluded a foreign company's subsidiaries were not its general agents in California because the plaintiffs presented no evidence that in the absence of the California subsidiaries' involvement in petrochemical and chemical operations, the parent would have conducted and controlled those operations. *Doe, 248 F.3d at 929*. The Court **[*66]** reached this conclusion even though the parent company issued consolidated reporting, referred to a subsidiary in an annual report as its "US unit," and stated that use of the subsidiary "would enable it to expand its marketing network and produce higher value-added specialty products in the United States." *Id.*

Here, Plaintiffs have failed to establish a prima facie case that DETM was DEC's general agent in Wisconsin. DEC's primary business is the generation and supply of electricity to end users in North and South Carolina. DEC also acts as a holding company, but it is not purely a holding company in the sense that it does not passively hold stock in companies from an unrelated range of businesses. DEC has described itself as a "an integrated energy and energy services provider with the ability to offer physical delivery and management of both electricity and natural gas throughout the U.S. and abroad." (Pls.' App., Ex. B at DEMDL001846.)

In practice, DEC itself does not perform these activities beyond the generation and transmission of electricity in North and South Carolina, but holds the shares of various subsidiaries which either engage in those activities or which in turn own subsidiaries **[*67]** which perform those business operations. Among these business operations was DEC's North American Wholesale Energy business segment, which included DETM's natural gas-related activities. (*Id.*)

Although DEC identifies natural gas trading and marketing as one of its business segments, Plaintiffs have not established that DETM's sales of natural gas in Wisconsin were sufficiently important to DEC that if DETM did not make the sales in Wisconsin, DEC would have done so itself. DEC's primary business was electricity generation and transmission in North and South Carolina. Natural gas trading activity was a separate, fragmented component of one of DEC's other business segments operated through an indirect, partially owned subsidiary. Further, the fact that DETM subsequently ceased natural gas trading in 2003 suggests that DETM's trading activities were not sufficiently important to DEC that it would perform the activities itself if DETM did not do so on its behalf.

Moreover, Plaintiffs have presented no evidence that DETM's natural gas sales in Wisconsin in particular were sufficiently important to DEC's business that DEC would have performed the sales in Wisconsin itself absent its subsidiary's **[*68]** representation in the forum. *See* *Modesto City Schs., 157 F. Supp. 2d at 1135* (noting twenty percent of parent's products were sold through subsidiary which acted as parent's "sole conduit for marketing and selling its products in the United States"); *Bulova Watch Co., Inc., 508 F. Supp. at 1344* (noting that sixty percent of parent's products were sold as exports and the United States was the parent company's largest export market through its New York subsidiaries' sales in the United States). Consequently, Plaintiffs have not shown that DETM's Wisconsin natural gas sales played a significant role in DEC's "'organizational life'" such that it acted as a substitute for DEC in the forum. [9] *Bulova Watch Co., Inc., 508 F. Supp. at 1344*.

C. Conspiracy Theory

The conspiracy theory of personal jurisdiction is based on the premise that a conspirator's acts in furtherance of a conspiracy are attributable to the other members of the conspiracy. *Textor v. Bd. of Regents of N. Ill. Univ., 711 F.2d 1387, 1392 (7th Cir. 1983)*. Consequently, some courts attribute a conspirator's in-forum acts to his co-conspirators for personal jurisdiction purposes.

---

[9] The result would be the same under general Wisconsin agency law. In Wisconsin, an express agency relationship exists "only if there has been a manifestation by the principal to the agent that the agent may act on his account, and consent by the agent so to act." *Johnson v. Minn. Mut. Life Ins. Co., 151 Wis. 2d 741, 445 N.W.2d 736, 738 (Wis. Ct. App. 1989)* (quotation omitted). Wisconsin also recognizes apparent agency upon a showing of "(1) acts by the agent or principal **[*69]** justifying belief in the agency; (2) knowledge of such acts by the parties sought to be held; and (3) reliance on the apparent agency consistent with ordinary care and practice." *Id. at 739*.

Plaintiffs present no evidence of any manifestation by DEC to DETM that DETM may act on DEC's account. Although Plaintiffs have presented evidence DEC permitted DETM to market natural gas using the "Duke Energy" name and logo, Plaintiffs have not presented any evidence that any third party relied on an apparent agency between DEC and DETM.

The Ninth Circuit has not expressly accepted or rejected the conspiracy theory of personal jurisdiction. In its only published opinion addressing the issue, the Ninth Circuit noted that the two district court opinions upon which the plaintiff relied required the **[*70]** plaintiff either to allege specific overt acts in the forum state that furthered the conspiracy, or to allege substantial acts in furtherance of the conspiracy in the forum and that the co-conspirator knew or should have known his co-conspirator would perform those acts in the forum. *Underwager v. Channel 9 Australia, 69 F.3d 361, 364 (9th Cir. 1995)*. Without expressing any opinion on the validity of the conspiracy theory of personal jurisdiction, the Ninth Circuit concluded the plaintiff alleged no facts suggesting a conspiracy and failed to dispute the defendants' claims that they did not know certain acts would take place in the forum. *Id.* The Court therefore affirmed the district court's dismissal for lack of personal jurisdiction. *Id.*

Since this case, the Ninth Circuit has noted that "a great deal of doubt" surrounds the conspiracy theory's legitimacy. *Chirila v. Conforte, 47 Fed. Appx. 838, 842, 2002 WL 31105149, at *3 (9th Cir. 2002)* (unpublished). Some courts have adopted it. [10] Others have rejected its application as inconsistent with due process. [11] Still others follow the Ninth Circuit's lead in *Underwager* and decline to address whether the theory comports with due process, **[*71]** but find the plaintiff failed to meet the test even if it applied. *See* *Melea, Ltd. v. Jawer SA, 511 F.3d 1060, 1070 (10th Cir. 2007)*; *Glaros v. Perse, 628 F.2d 679, 682 (1st Cir. 1980)*.

Although not in the personal jurisdiction context, the Ninth Circuit has rejected a similar conspiracy theory in the venue context. *Piedmont Label Co. v. Sun Garden Packing Co., 598 F.2d 491 (9th Cir. 1979)* (rejecting conspiracy theory of venue). In *Piedmont,* the Ninth Circuit considered whether venue in an antitrust action could be based "solely on allegations that a defendant was a member of a conspiracy and that a co-conspirator performed acts in the forum district." *Id. at 492*. The plaintiff argued that because a conspirator committed acts in the venue and a conspirator acts as his co-conspirator's agent, a defendant who otherwise had not conducted business in the forum could be said to have an agent and "transacted business" there under the relevant venue statutes. *Id. at 492-93*. Based on United States Supreme Court dictum casting doubt on the conspiracy theory of venue under the Clayton Act, the Ninth Circuit concluded that deeming a conspirator an agent of his co-conspirators would expand the venue statute beyond what Congress contemplated. *Id. at 494-95*.

Piedmont is of limited value to the question in this case, as *Piedmont* **[*73]** was focused on the plaintiff's attempt to expand a specific venue statute contrary to congressional intent. To the extent *Piedmont* cautions against freely attributing one party's acts to another, existing personal jurisdiction law already provides that this Court must examine each defendant's contacts with the forum individually. *Harris Rutsky & Co. Ins. Servs., Inc., 328 F.3d at 1130*.

It is unclear whether and under what conditions the Ninth Circuit would find it consistent with due process to attribute a conspirator's forum-related contacts to his co-conspirators for personal jurisdiction purposes. However, general due process considerations still would apply to outline the contours of a conspiracy theory of personal jurisdiction, if one is to exist at all.

[11] *See, e.g.,* *Silver Valley Partners, LLC v. De Motte, 400 F. Supp. 2d 1262, 1268 (W.D. Wash. 2005)*; *Karsten Mfg. Corp. v. U.S. Golf Ass'n, 728 F. Supp. 1429, 1434 (D. Ariz. 1990)*; *Kipperman v. McCone, 422 F. Supp. 860, 873 n.14 (N.D. Cal. 1976)*; *Ploense v. Electrolux Home Prods, Inc., 377 Ill. App. 3d 1091, 882 N.E.2d 653, 666-68, 317 Ill. Dec. 773 (Ill. App. Ct. 2007)*; *Mansour v. Super Ct. of Orange County, 38 Cal. App. 4th 1750, 46 Cal. Rptr. 2d 191, 196-98 (Ct. App. 1995)*; *Hewitt v. Hewitt, 78 Wn. App. 447, 896 P.2d 1312, 1315-16 (Wash. Ct. App. 1995)*; *Nat'l Indus. Sand Ass'n v. Gibson, 897 S.W.2d 769, 773 (Tex. 1995)*; **[*72]** *see also* *Roy, 2008 U.S. Dist. LEXIS 97525, 2008 WL 5054096, at *7* (collecting cases).

Under these principles, the Court concludes that to the extent a conspiracy theory of personal jurisdiction is viable, it must be limited to the context of specific jurisdiction and cannot support general jurisdiction. To hold otherwise would create satellite litigation regarding conspiracies completely unrelated to the underlying claims simply to establish personal jurisdiction. Such a trial-within-a-trial situation based on an **[*74]** already tenuous basis to attribute a third party's contacts to a defendant to support personal jurisdiction is untenable.

Within the specific jurisdiction analysis, a plaintiff must establish the defendant purposefully availed himself of the forum. An allegation that a particular defendant caused or contributed to an effect in the forum state, by itself, is insufficient, even if it is foreseeable that the defendant's conduct would have an effect in the forum. *World-Wide Volkswagen Corp. v. Woodson, 444 U.S. 286, 296, 100 S. Ct. 559, 62 L. Ed. 2d 490 (1980)*. The defendant, not his co-conspirator, must choose to direct his activities at the forum in causing the effect in the forum. *Hanson v. Denckla, 357 U.S. 235, 253, 78 S. Ct. 1228, 2 L. Ed. 2d 1283 (1958)* ("The unilateral activity of those who claim some relationship with a nonresident defendant cannot satisfy the requirement of contact with the forum State."). Consequently, a co-conspirator's activity directed at the forum, even if in furtherance of a conspiracy of which the foreign defendant is a member, cannot constitute purposeful direction at the forum by the foreign defendant. The Court thus concludes that allegations of specific acts committed by a co-conspirator in the forum in furtherance **[*75]** of the conspiracy, alone, are insufficient to establish minimum contacts by a defendant who otherwise has no contacts with the forum.

Additionally, a "forseeable effect" in the forum state is inadequate to show the purposeful direction necessary to establish specific jurisdiction. *Pebble Beach, 453 F.3d at 1155*. Consequently, a defendant's mere awareness or ability to foresee in-forum effects from his out-of-forum conduct is insufficient to establish minimum contacts with the forum. Rather, under established Ninth Circuit law regarding specific jurisdiction, a foreign defendant expressly aims his conduct at the forum when he is alleged to have engaged in wrongful conduct "individually targeting a known forum resident." *Bancroft, 223 F.3d at 1087*. The Court thus concludes that if a conspiracy theory of jurisdiction is viable, a plaintiff must set forth non-conclusory allegations that the defendant was a member of a conspiracy, that the defendant's or his co-conspirator's acts in furtherance of the conspiracy caused harm in the forum, and that the conspiracy individually targeted a known forum resident.

Absent requiring this sort of purposeful direction at the forum, the conspiracy theory **[*76]** of personal jurisdiction "threatens to confuse the standards applicable to personal jurisdiction and those applicable to liability." *Melea, Ltd., 511 F.3d at 1070*. Personal jurisdiction is more restrictive than the scope of liability on a particular claim. A state "does not acquire [personal] jurisdiction by being the 'center of gravity' of the controversy, or the most convenient location for litigation." *Hanson, 357 U.S. at 254*. That a particular court lacks personal jurisdiction over a member of a conspiracy does not immunize the defendant from liability, it merely affects in what forum the plaintiff may seek to enforce that liability. *Ploense, 882 N.E.2d at 668*.

Here, Plaintiffs' SAC does not allege DEC purposefully availed itself of Wisconsin by individually targeting known Wisconsin residents. Rather, the SAC alleges a nationwide conspiracy to manipulate natural gas prices resulting in inflated prices generally, including in Wisconsin. The mere likelihood that the price manipulation allegedly occurring in other states foreseeably would affect natural gas prices in Wisconsin does not amount to purposeful direction at Wisconsin. Other conspirators, not DEC, chose to sell natural **[*77]** gas at allegedly inflated prices to customers in Wisconsin. The SAC does not allege the conspirators made an agreement specifically regarding Wisconsin or its residents. While other alleged conspirators such as DETM may have purposefully directed their conduct at known Wisconsin residents, the SAC contains no non-conclusory allegations that DEC purposefully did so. [12]

Plaintiffs argue that Wisconsin has expanded its antitrust laws to reach conduct which impacts Wisconsin "even if the illegal activity resulting in those impacts occurred predominantly or exclusively outside this state." *Olstad v. Microsoft Corp., 2005 WI 121, 284 Wis. 2d 224, 700 N.W.2d 139, 158 (Wis. 2005)*. Plaintiffs thus contend

---

[12] The SAC contains only one allegation regarding any direction towards Wisconsin: "Duke Energy Corporation's actions were intended to have, and did have, a direct, substantial and reasonably foreseeable effect on commerce in Wisconsin during the Relevant Time Period." (Corrected Second Am. Compl. at 19.)

Wisconsin must have meant to acquire personal jurisdiction over foreign antitrust co-conspirators whose out-of-forum acts impact Wisconsin.

This confuses liability with personal jurisdiction. While DEC may be liable under **[*78]** Wisconsin ***antitrust law*** for its alleged illegal conduct, that does not automatically equate to Wisconsin having personal jurisdiction over DEC. If Wisconsin does not have personal jurisdiction over a particular defendant, it must depend on other states to enforce its antitrust laws. Moreover, even if Wisconsin would adopt the conspiracy theory of personal jurisdiction for purposes of its long-arm statute, the exercise of personal jurisdiction by this Court still must comport with due process of law.

Moreover, Plaintiffs have failed to present evidence that DEC was a member of any conspiracy directed at known Wisconsin targets. Although Plaintiffs contend DEC obstructed jurisdictional discovery regarding its participation in the conspiracy, DEC provided Plaintiffs with every DEC document which DEC provided to the CFTC in conjunction with the CFTC's investigation of DETM's natural gas trading activity in the relevant time period. (Mem. of Defs. Duke Energy Carolinas, LLC & Duke Energy Trading & Marketing, LLC in Opp'n to Pls.' Mot. to Compel Disc. (Doc. # 935) ["Opp'n to Mot. Compel"], Ex. B at 2; Tr. of Proceedings (Doc. # 1138) at 55.) The documents provided to the CFTC consisted almost **[*79]** entirely of DETM documents. (Opp'n to Mot. Compel, Ex. B at 2; Tr. of Proceedings at 55.) The only DEC documents consisted of general risk management policies and board of director meeting minutes, which DEC has provided to Plaintiffs. (Opp'n to Mot. Compel, Ex. B at 2; Tr. of Proceedings at 55-56.)

Plaintiffs have not convinced the Court that further discovery would produce a different result. The Court therefore will decline Plaintiffs' request to defer the personal jurisdiction issue to be resolved with the merits. The Court will not attribute DETM's contacts with the forum to DEC, and DEC has no contacts of its own sufficient to support personal jurisdiction. The Court therefore will grant DEC's motion to dismiss for lack of personal jurisdiction.

III. CONCLUSION

IT IS THEREFORE ORDERED that Defendant Duke Energy Carolinas, LLC's Renewed Motion to Dismiss for Lack of Personal Jurisdiction (Doc. # 872) is hereby GRANTED. Defendant Duke Energy Carolinas, LLC is hereby dismissed for lack of personal jurisdiction.

IT IS FURTHER ORDERED that Defendant Duke Energy Carolinas, LLC shall electronically file under seal the exhibits previously filed manually in association with Doc. # 969 and **[*80]** Doc. # 1179.

Judges: Nancy K. Johnson, United States Magistrate Judge.

Opinion by: Nancy K. Johnson

Opinion

MEMORANDUM AND RECOMMENDATION

Pending before the court[1] is Defendant's Motion for Summary Judgment(Docket Entry No. 32). The court has considered the motion, all relevant filings, and the applicable law. For the reasons set forth below, the court **RECOMMENDS** that Defendant's Motion for Summary Judgment be **GRANTED** in part and **DENIED** in part.

I. Case Background

---

[1] This case was referred to the undersigned magistrate judge pursuant to *28 U.S.C. §§ 636(b)(1)(A)* and *(B)*, the Cost and Delay Reduction Plan under the Civil Justice Reform Act, and *Federal Rule of Civil Procedure 72*. Docket Entry No. 34.

The instant case arises out of a dispute between Union Pacific Railroad Company ("Defendant") and Bullet Concrete Materials, Inc., ("Plaintiff") over Defendant's mistaken delivery of **[*2]** railcars to Plaintiff's rail terminal facility in Tamina, Texas ("Plaintiff's Facility").[2]

A. Factual Background

In 1974, Plaintiff executed a contract with Defendant[3] to provide rail service to Plaintiff's Facility.[4] The parties operated pursuant to this agreement without incident for almost twenty years.

In 1993, Plaintiff and Defendant entered into an amended track agreement ("Amended Agreement") that provided terms for the construction, maintenance, and operation of the track at Plaintiff's Facility.[5] In addition, the Amended Agreement contained a termination provision permitting either party to terminate the Amended Agreement with thirty days written notice.[6] The Amended Agreement also permitted Defendant "the right to use the Track when not to the detriment of the industry."[7]

Between the years 2002 and 2005, on numerous occasions, Defendant delivered railcars to Plaintiff's Facility that were intended to be transported to another customer.[8] When the mistaken deliveries occurred, Plaintiff notified Defendant and Defendant's locomotive would return to retrieve the railcars from Plaintiff's facility. Between the time of delivery and the time Defendant's locomotive returned to retrieve the **[*3]** railcars, the railcars sat on Plaintiff's private track and blocked access to parts of Plaintiff's Facility.[9] Because the tracks were not prepared prior to the railcars' arrival, Plaintiff alleges that these cars caused significant wear and tear on the tracks.[10] In response to Plaintiff's complaints, Defendant assured Plaintiff that it was taking steps to prevent these occurrences in the future and compensated Plaintiff for several of the mistaken railcar deliveries.[11]

Significant to the dispute before this court, on April 5, 2006, Defendant delivered railcars to Plaintiff's Facility that were intended for another customer's facility.[12] Defendant discovered the mistake immediately and attempted to retrieve the railcars from Plaintiff's Facility.[13] However, an employee of Plaintiff placed a derail device between the

---

[2] In the initial state court proceeding, Union Pacific Railroad Company was the plaintiff and Bullet Concrete Materials, Inc., and Harold Denton were the defendants. For the sake of clarity, this court refers to the parties as they are before this court. As plaintiffs Bullet Concrete Materials, Inc., and Harold Denton make identical claims, the court refers to them collectively as "Plaintiff."

[3] The original parties to the contract were Missouri Pacific Railroad Company ("MOPAC") and Plaintiff. Subsequently, Defendant acquired MOPAC and assumed the contract between Plaintiff and MOPAC. For purposes of clarity, this court uses the term Defendant to denote Union Pacific and its predecessor, MOPAC.

wheels of one of the railcars, preventing Defendant from removing the railcars.[14] Defendant requested that Plaintiff remove the derail device, and in response, Plaintiff demanded that Defendant compensate Plaintiff for the mistaken delivery in order to remove the derail device.[15] Defendant then filed an application for and was granted a temporary restraining order requiring Plaintiff **[*4]** to release the railcars.[16] Subsequently, Plaintiff released the railcars.

On April 20, 2006, Plaintiff received a letter from Defendant that terminated the Amended Agreement as of May 22, 2006.[17] Sometime after May 22, 2006, Defendant severed Plaintiff's rail connection to Defendant's main railroad line, effectively terminating rail access to Plaintiff's Facility.

B. Procedural Background

As noted above, on April 6, 2006, Defendant filed an application for a temporary restraining order in state court in Montgomery County, Texas.[18] Plaintiff then filed an answer and counter-claim against Defendant that included federal causes of action.[19]

On September 28, 2007, Defendant removed this case from Montgomery County, Texas, to this court.[20] Plaintiff filed an amended complaint asserting numerous causes of action against Defendant, including breach of contract, breach of good faith and fair dealing, tortious interference with contract, tortious interference with land, and violations of the Sherman Antitrust Act and the Clayton Act.[21]

On May 2, 2008, Global Fabrication Services, Inc., ("Global") filed a motion to intervene and this court granted Global's motion.[22] Global alleged a breach of contract claim **[*5]** against Plaintiff.[23] Global also asserted causes of action against Defendant for tortious interference with a contract, violations of the Sherman Antitrust Act, and violations of the Clayton Act.[24]

Subsequently, Defendant filed a motion for summary judgment and motion to dismiss that is currently pending before this court.[25] Before addressing the merits of Defendant's motion for summary judgment and motion to dismiss, this court must address Defendant's objections to Harold Denton's ("Denton") affidavit.

II. Defendant's Objections to Denton's Affidavit

Defendant objects to Denton's affidavit on numerous grounds and argues that this court should strike the affidavit in its entirety.[26] Defendant, without particularity and adequate explanation, objects to Denton's affidavit because it contains hearsay, is conclusory, contains statements that violate the best evidence rule, and asserts legal conclusions.[27]

The court agrees that some of Denton's self-serving statements are hearsay; however, Denton's testimony relating statements of Defendant's agents is not hearsay. However, because the court does not rely on any incompetent summary judgment evidence in reaching the decision explained in this Memorandum **[*6]** and Recommendation, Defendant's objections are overruled.

III. Summary Judgment Standard

Summary judgment is warranted when the evidence reveals that no genuine dispute exists regarding any material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*; *Celotex Corp. v. Catrett, 477 U.S. 317, 322 (1986)*; *Brown v. City of Houston, Tex., 337 F.3d 539, 540-41 (5th Cir. 2003)*. A material fact is a fact that is identified by applicable substantive law as critical to the outcome of the suit. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248 (1986)*. To be genuine, the dispute regarding a material fact must be supported by evidence such that a reasonable jury could resolve the issue in favor of either party. *Id. at 250*.

The movant must inform the court of the basis for the summary judgment motion and must point to relevant excerpts from pleadings, depositions, answers to interrogatories, admissions, or affidavits that demonstrate the absence of genuine factual issues. *Celotex Corp., 477 U.S. at 323*; *Topalian v. Ehrman, 954 F.2d 1125, 1131 (5th Cir. 1992)*. If the moving party can show an absence of record evidence in support of one or more elements of the case for which the nonmoving party bears the burden, the movant will be entitled to summary judgment. *Celotex Corp., 477 U.S. at 322*. In response to a showing of lack of evidence, the party opposing summary judgment must go beyond the pleadings and proffer evidence that establishes each of the challenged elements of the **[*7]** case, demonstrating that genuine issues of material fact do exist which must be resolved at trial. *Id. at 324*.

When considering the evidence, "[d]oubts are to be resolved in favor of the nonmoving party, and any reasonable inferences are to be drawn in favor of that party." *Evans v. City of Houston, 246 F.3d 344, 348 (5th Cir. 2001)*; see also *Boston Old Colony Ins. Co. v. Tiner Assocs. Inc., 288 F.3d 222, 227 (5th Cir. 2002)*. The court should not "weigh evidence, assess credibility, or determine the most reasonable inference to be drawn from the evidence." *Honore v. Douglas, 833 F.2d 565, 567 (5th Cir. 1987)*.

The nonmoving party, however, must show more than "some metaphysical doubt as to the material facts." *Meinecke v. H & R Block of Houston, 66 F.3d 77, 81 (5th Cir. 1995)*. Conclusory allegations, unsubstantiated assertions, improbable inferences, unsupported speculation, or only a scintilla of evidence will not carry this burden. *Brown, 337 F.3d at 541*; *Ramsey v. Henderson, 286 F.3d 264, 269 (5th Cir. 2002)*. The court must grant summary judgment if, after an adequate period of discovery, the nonmovant fails "to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." *Celotex Corp., 477 U.S. at 322*.

IV. Analysis

---

[26] Defendant's Reply to Plaintiff's and Global's Response to Defendant's Motion for Summary Judgment, Docket Entry No. 41, pp. 6-7.

[27] Id.

Defendant moves for summary judgment[28] on the following causes of action: (1) breach of contract; (2) breach of duty of good faith and fair dealing; (3) tortious interference with a contract; (4) tortious interference with land; (5) violations **[*8]** of the Sherman Antitrust Act; and (6) violations of the Clayton Act. The court examines each in turn.

A. Breach of Contract

According to Texas law, "[t]he essential elements in a breach of contract claim are as follows: (1) the existence of a valid contract; (2) that the plaintiff performed or tendered performance; (3) that the defendant breached the contract; and (4) that the plaintiff was damaged as a result of the breach." *Bridgmon v. Array Sys. Corp., 325 F.3d 572, 577 (5th Cir. 2003)*.

Defendant argues that summary judgment is proper on Plaintiff's claim for breach of contract related to the termination of the Amended Agreement because either party was permitted to terminate the Amended Agreement with thirty days prior written notice.[29] In response, Plaintiff does not refute that the plain language of the termination provision permits either party to terminate the Amended Agreement,[30] and instead argues that the provision is unconscionable because Defendant is the only rail carrier that services Plaintiff's facility, that "[Defendant] provided its contract on a take-it-or-leave-it basis . . .[,]" and that Defendant refused to negotiate."[31]

"In general, the term 'unconscionability' describes a contract that is unfair because of its overall one-sidedness **[*9]** or the gross one-sidedness of its terms." Canatxx Gas Storage Ltd. v. Silverhawk Capital Partners, LLC, No. H-06-1330, 2008 WL 1999234 at 19 (S.D. Tex. May 8, 2008)(quoting *Kendziorski v. Saunders, 191 S.W.3d 395, 406 (Tex. App.—Austin 2006, no pet.))*. Texas law recognizes procedural unconscionability and substantive unconscionability. *Carter v. Countrywide Credit Indus., Inc., 362 F.3d 294, 301 (5th Cir. 2004)*. Procedural unconscionability "refers to the circumstances surrounding the adoption of the [contract]," and substantive unconscionability refers to the fairness of the terms of the contract. Id.

The party seeking to invalidate a contract on the basis of unconscionability bears the burden of proof. *Ski River Dev., Inc. v. McCalla, 167 S.W.3d 121, 136 (Tex. App.—Waco 2005, pet. denied)*; *In re Turner Bros. Trucking Co., 8 S.W.3d 370, 375 (Tex. App.—Texarkana 1999, no pet)*. The court looks at the totality of the circumstances at the time the contract was formed, including an examination of: "(1) the entire atmosphere in which the agreement was made; (2) the alternatives, if any, available to the parties at the time the contract was made; (3) the non-bargaining ability of one party; (4) whether the contract was illegal or against public policy; and (5) whether the contract is oppressive or unreasonable." *Ski River Dev., Inc., 167 S.W.3d at 136* (citing *Wade v. Austin, 524 S.W.2d 79, 86 (Tex. Civ. App.—Texarkana 1975, no writ))*. "The grounds for substantive abuse must be sufficiently shocking or gross to compel the court to intercede, and the same is true for procedural abuse-the circumstances surrounding the negotiations must be shocking." *Ski River Dev., Inc., 167 S.W.3d at 136*. A party who enters into a merely

---

[28] This case is past the pleading stage and Plaintiff has presented evidence in response to Defendant's Motion for Summary Judgment and Motion to Dismiss; therefore, the court will analyze Defendant's motion under the *Rule 56* standard.

[29] Defendant's Motion for Summary Judgment, Docket Entry No. 32, p. 6-7.

[30] The termination provision provides that the "[Amended Agreement] may be terminated by either party on thirty days written notice to the other party." Plaintiff's Response to Defendant's Motion for Summary Judgment, Docket Entry No. 37, Ex. D, Industry Track Agreement, p. 7 (unnumbered), Sec. 8(b). Although Plaintiff does not challenge Defendant's interpretation of the plain language of the termination provision, this court finds that as a matter of law, the termination provision in the Amended Agreement permitted Defendant to terminate the contract as long as thirty days written notice was provided.

[31] Plaintiff's Response to Defendant's Motion for Summary Judgment, Docket Entry No. 37, pp. 12-13. Plaintiff, in response, also argues that Defendant breached the contract by parking railcars on the track in violation of the provision that contemplates fair usage. This allegation was briefly mentioned in Plaintiff's Amended Complaint. Plaintiff's Amended Complaint, Docket Entry No. 18, p. 8, ¶¶ 47, 48. Defendant does not move for summary judgment on this claim; therefore, the court does not address this issue.

imprudent contract is not entitled to protection, and the determination **[*10]** of unconscionability is a question of law for the court. *Wade, 524 S.W.2d at 85-86*; *Ski River Dev., Inc., 167 S.W.3d at 136*.

Plaintiff has failed to present sufficient evidence to create a fact issue regarding either procedural or substantive unconscionability. After reciting the law to the court, Plaintiff's unconscionability argument is as follows:

> The termination provision urged by [Defendant] is unenforceable because it is procedurally and substantively unconscionable. [Defendant] and [Plaintiff] were in very different bargaining positions at the time the contract was made. [Defendant] is the only railroad that provides service at [Plaintiff's] facility—there is no alternative common rail carrier. [Defendant] provided its contract on a take-it-or-leave-it basis to [Plaintiff] and despite repeated attempts by [Plaintiff] to negotiate terms, [Defendant] refused to negotiate. In fact, [Plaintiff] repeatedly attempted to negotiate the termination provision and such attempts were refused.[32]

In this instance, Plaintiff is a sophisticated commercial enterprise and there is no evidence that the contract resulted from unfair surprise or oppression that might lead to a finding that the contract was procedurally unconscionable. See Perez v. Lemarroy, No. B-08-141, **[*11]** 2008 WL 5453604 at 5 (S.D. Tex. Sep. 12, 2008). In addition, even if this court were to assume that the Amended Agreement was an adhesion contract, as suggested by Plaintiff, under Texas law, adhesion contracts are not per se unconscionable. *In re AdvancePCS Health, L.P., 172 S.W.3d 603, 608 (Tex. 2005)*. Plaintiff also fails to cite the court to any evidence that the contract is substantively unconscionable. The contract provision at issue permits either Plaintiff or Defendant to unilaterally cancel the contract with the proper written notice.[33]

Having reviewed all of Plaintiff's allegations of unconscionability in light of the applicable Texas law, none of the allegations are sufficient to invalidate the termination provision of the Amended Agreement for unconscionability. Therefore, this court recommends that Defendant's motion for summary judgment on the breach of contract claim related to the termination of the Amended Agreement be granted.

B. Breach of the Duty of Good Faith and Fair Dealing

Under Texas law, there is no duty of good faith and fair dealing implied in every contract. *Arnold v. Nat'l County Mut. Fire Ins. Co., 725 S.W.2d 165, 167 (Tex. 1987)*; *Bradley v. Phillips Petroleum Co., 527 F.Supp.2d 661, 686 (S.D. Tex. 2007)*. Texas courts do, however, recognize that a special relationship between the parties may create a duty of good faith and fair dealing. Id. "The special relationship necessary to create [a duty of good faith **[*12]** and fair dealing] either arises from the element of trust necessary to accomplish the goals of the contract, or has been imposed by the courts because of an imbalance of bargaining power." *Bradley, 527 F.Supp.2d at 687* (quoting *Lovell v. W. Nat'l Life Ins. Co., 754 S.W.2d 298, 302 (Tex. App.—Amarillo 1988)*(citing *Arnold, 725 S.W.2d at 167*)). In regards to commercial contracts, "[t]here is no general duty of good faith and fair dealing in ordinary, arms-length commercial transactions." *Formosa Plastics Corp. USA v. Presidio Engineers and Contractors, Inc., 960 S.W.2d 41, 52 (Tex. 1998)*.

Defendant argues that summary judgment is proper on Plaintiff's claim for breach of the duty of good faith and fair dealing, because there is no contractual language requiring good faith and fair dealing and there is no special relationship giving rise to a duty of good faith and fair dealing.[34] Plaintiff responds that the Amended Agreement involved a special relationship because Defendant was the only provider of rail services to Plaintiff's Facility and Plaintiff had expanded the facility to receive larger trains, thus, increasing revenue for Defendant.[35]

[33] The provision states that the "[Amended Agreement] may be terminated by either party on thirty days' written notice to the other party." Plaintiff's Response to Defendant's Motion for Summary Judgment, Docket Entry No. 37, Ex. D, Industry Track Agreement, p. 7 (unnumbered), Sec. 8(b).

[34] Defendant's Motion for Summary Judgment, Docket Entry No. 32, pp. 7-11.

[35] Plaintiff's Response to Defendant's Motion for Summary Judgment, Docket Entry No. 37, pp. 14-16.

Plaintiff has not cited the court to any express contractual language giving rise to a duty of good faith and fair dealing on the part of Defendant. Plaintiff has also failed to raise a fact issue of the existence of a special relationship necessary to recover for a breach of the duty **[*13]** of good faith and fair dealing. There is no evidence that the Amended Agreement involved an element of trust necessary to accomplish the goals of the Amended Agreement or that there was a fiduciary relationship between the parties. And, while Plaintiff argues an imbalance in bargaining power, Plaintiff fails to support its argument with case law that a railroad owes a duty of good faith and fair dealing to its customer simply because of the nature of its business. In addition, Texas courts have specifically noted that there is no "general duty of good faith and fair dealing in ordinary, arms-length commercial transactions." *Formosa Plastics Corp. USA, 960 S.W.2d at 52*.

Plaintiff has failed in its burden to present evidence of genuine issues of material fact; therefore, Defendant's motion for summary judgment on Plaintiff's claim for a breach of the duty of good faith and fair dealing should be granted.

C. Tortious Interference with Existing Contracts [36]

In order to establish a claim for tortious interference with a contract, "a plaintiff must prove: (1) the existence of a contract subject to interference; (2) a willful and intentional act of interference; (3) the act was a proximate cause of the plaintiff's damages; and (4) actual **[*14]** damage or loss." *Texas Beef Cattle Co. v. Green, 921 S.W.2d 203, 210 (Tex. 1996)* see also *Lewallen v. Conmed Corp., 261 F.App'x 704, 707 (5th Cir. 2008)*(unpublished). "Intentional interference does not require intent to injure, it does require that the actor desires to cause the consequences of his act, or that he believes that the consequences are substantially certain to result from it." *Lewallen, 261 F.App'x at 707* (internal quotations omitted)(quoting *Sw. Bell Tel. Co. v. John Carlo Tex., Inc., 843 S.W.2d 470, 472 (Tex. 1992))*. In other words, "[l]iability for intentional interference may not be based on a simple allegation that the defendant performed certain acts; instead, there must be a finding that the defendant performed certain acts with the knowledge or belief that interference with a contract would result." 5860-*5888 Westheimer Ltd. v. Orvis Houston, Inc., No. H-08-1327, 2009 WL 47124 at 2 (Jan. 6, 2009)*.

If a plaintiff is successful at establishing the elements of a tortious interference with contract claim, a defendant still has an affirmative defense to the claim. *Texas Beef Cattle Co., 921 S.W.2d at 210*. "A party is justified in interfering with another's contract if it exercises (1) its own legal rights or (2) a good-faith claim to a colorable legal right, even though that claim ultimately proves to be mistaken." *Gulf Shores Council of Co-Owners, Inc. v. Raul Cantu No. 3 Family Ltd. P'ship, 985 S.W.2d 667, 674 (Tex. App.—Corpus Christi 1999, pet. denied)* citing *Texas Beef Cattle Co., 921 S.W.2d at 211*. A justification defense is conclusively established "if the trial court finds as a matter of law that the defendant had a legal right to interfere with a contract . . . ." *Texas Beef Cattle Co., 921 S.W.2d at 211*.

Defendant argues that summary **[*15]** judgment is proper on Plaintiff's and Global's claims for tortious interference with existing contracts because there is no evidence that Defendant intended to interfere with the contracts and it had an independent right under the Amended Agreement to cancel the contract. In response, Plaintiff and Global argue that Defendant interfered with their contracts by terminating the Amended Agreement and removing the switch that gave Plaintiff access to Defendant's rail line.

Plaintiff and Global have failed to present sufficient facts or evidence to create a fact issue regarding their claims for tortious interference with an existing contract. As noted above, this court has recommended a finding, as a matter of

---

[36] In response to Defendant's motion, Plaintiff attempts to assert a claim for tortious interference with future contracts. Plaintiff's Response to Defendant's Motion for Summary Judgment, Docket Entry No. 37, pp. 17-18; Plaintiff's Motion for Leave to File an Amended Complaint, Docket Entry No. 30, p. 1. In Defendant's reply, it asserts that the court should strike Plaintiff's arguments for the tortious interference with future contracts claim because Plaintiff has not pled that cause of action. Defendant's Reply to Plaintiff's Response to Defendant's Motion for Summary Judgment, Docket Entry No. 41, p. 6. Having previously denied Plaintiff's motion to amend its complaint to include a cause of action for tortious interference with a future contract, this court agrees with Defendant. Order Denying Plaintiff's Motion for Leave to File an Amended Complaint, Docket Entry No. 35. Plaintiff's arguments in support of a claim for tortious interference with a future contract are stricken and will not be considered by the court because Plaintiff has failed to properly plead this cause of action in its live complaint.

law, that Defendant's termination of the Amended Agreement was not a breach of contract. If this recommendation is adopted, it follows that Defendant's actions are not a willful and intentional act of interference. In addition, neither Plaintiff nor Global has presented any other evidence of a willful and intentional act of interference that would permit a reasonable jury to conclude that Defendant interfered with any existing contracts.

Therefore, Defendant's motion for summary judgment **[*16]** on Plaintiff's and Global's claims for intentional interference with existing contracts should be granted.

D. Interference with Property

In Texas, "[a]ny intentional invasion of, or interference with, property, property rights, personal rights or personal liberties causing injury without just cause or excuse is an actionable tort." *Suprise v. DeKock, 84 S.W.3d 378, 380 (Tex. App.-Corpus Christi 2002, no pet.)*(quoting *King v. Acker, 725 S.W.2d 750, 754 (Tex. App.-Houston [1st Dist.] 1987, no writ))*. The elements of an interference with property cause of action are: 1) interference with one's property or property rights; 2) the interference was intentional and caused damage; and 3) the interference was without just cause or legal excuse. *Martinez v. Benavides, No. 04-05-00618-CV, 2006 WL 1993773, at *2 (Tex. App.-San Antonio, July 19, 2006, no writ)*.

Defendant argues that it is entitled to summary judgment on Plaintiff's claim for intentional interference with property because there is no evidence that Defendant intended to invade Plaintiff's property and the express terms of the contract permitted this conduct.[37] Plaintiff responds that it has presented sufficient evidence on all the required elements to survive a motion for summary judgment.[38]

In this instance, Defendant has failed to show that there are no genuine issues of material fact on Plaintiff's claim for intentional interference with property. Although the Amended Agreement permitted Defendant "to **[*17]** use the Track when not to the detriment of [Plaintiff,]"[39] Plaintiff has presented evidence that on at least seven occasions Defendant delivered railcars to Plaintiff's facility that were designated for another facility without just cause or legal excuse.[40] Denton also avers that the railcars caused wear and tear to the premises, blocked Plaintiff's intra-plant roads, and prevented proper access and use of its property for its business operations.[41]

Based on the above, a reasonable jury could conclude that Defendant's actions amounted to a tortious interference with property. Therefore, Defendant has failed to demonstrate that there are no genuine issues of material fact on Plaintiff's cause of action for tortious interference with property and summary judgment is improper.

E. Sherman Antitrust Act

Defendant moves for summary judgment on Plaintiff's and Global's claims for violations of the Sherman Antitrust Act. In response, Plaintiff and Global argue that summary judgment is improper because Defendant violated *15 U.S.C. § 1* ("*Section 1*") and *15 U.S.C. § 2* ("*Section 2*") of the Sherman Antitrust Act.

---

[37] Defendant's Motion for Summary Judgment, Docket Entry No. 32, pp. 16-17.

[38] Plaintiff's Response to Defendant's Motion for Summary Judgment, Docket Entry No. 37, pp. 18-19.

[39] Plaintiff's Response to Defendant's Motion for Summary Judgment, Docket Entry No. 37, Ex. D, Industry Track Agreement, p. 4 (unnumbered), *Sec. 2(a)*.

[40] Plaintiff's Response to Defendant's Motion for Summary Judgment, Docket Entry No. 37, Ex. A, Affidavit of Harold Denton, Jr., pp. 5-7.

[41] Id.

1. *Section 1*

Section 1 of the Sherman Antitrust Act states that, "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint **[*18]** of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. *Section 1* "forbids contracts or conspiracies in restraint of trade or commerce . . . ." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 454 (1993)*.

Defendant argues that Plaintiff cannot present evidence that it engaged in a conspiracy. In response, Plaintiff and Global argue that a conspiracy can be inferred from Defendant's conduct.

In order to state a cause of action under *Section 1* of the Sherman Antitrust Act, a plaintiff must offer evidence "that the defendant (1) engaged in a conspiracy (2) that restrained trade (3) in a particular market." *Spectators' Commc'n Network Inc. v. Colonial Country Club, 253 F.3d 215, 220 (5th Cir. 2001)*. The conspiracy element requires proof that the conspirators had a "conscious commitment to a common scheme designed to achieve an unlawful objective." Id.; *Tunica Web Adver. v. Tunica Casino Operators, 496 F.3d 403, 409 (5th Cir. 2007)*.

In this instance, neither plaintiff alleges any facts or evidence of an actual conspiracy or any facts or any facts or evidence that would lead to an inference of conspiracy. Plaintiff's and Global's conclusory allegation that the court can infer that Defendant engaged in a conspiracy does not demonstrate genuine issues of material fact and is not sufficient to survive a motion for summary judgment.

Having found that the plaintiffs failed to present any evidence **[*19]** that would permit a reasonable jury to conclude that Defendant engaged in a conspiracy, summary judgment for Defendant is proper on Plaintiff's and Global's causes of action under *Section 1* of the Sherman Antitrust Act.

2. *Section 2*

Section 2 of the Sherman Antitrust Act provides that "[e]very person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce . . . shall be deemed guilty of a felony . . . ." *15 U.S.C. § 2*. *Section 2* forbids actual monopolization, attempts to monopolize, and conspiracy to monopolize. *Mississippi Communications, Inc. v. Jones, 792 F.2d 1330, 1335 (5th Cir. 1986)*; *15 U.S.C. § 2*. "Monopoly power is the power to control price or exclude competition." *Seidenstein v. Nat'l Med. Enter., Inc., 769 F.2d 1100, 1105 (5th Cir. 1985)*(internal quotations omitted).

A *Section 2* monopoly claim "has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *Eastman Kodak Co. v. Image Technical Serv., Inc., 504 U.S. 451, 481 (1992)*; *Seidenstein, 769 F.2d at 1106*.

In order to prove attempted monopolization, a plaintiff must show "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc., 506 U.S. at 456* **[*20]** ; *Taylor Pub. Co. v. Jostens, Inc., 216 F.3d 465, 474 (5th Cir. 2000)*.

"A prerequisite to success under *section 2* on either a completed or attempted monopolization claim is proof of the relevant market." *C.E. Services, Inc. v. Control Data Corp., 759 F.2d 1241, 1244 (5th Cir. 1985)* cert. denied, *474 U.S. 1037 (1985)*; see also *Alcatel USA, Inc. v. DGI Technologies, Inc., 166 F.3d 772, 781 (5th Cir. 1999)*(stating that to prove a *Section 2* monopoly claim a plaintiff must first establish the relevant product market); (National Athletic Trainers' Ass'n, Inc. v. Am. Physical Therapy Ass'n, No. 3:08-CV-0158, 2008 WL 4146022 at *12 (N.D. Tex. Sept. 9, 2008)(quoting *United States v. Eastman Kodak Co., 63 F.3d 95, 104 (2nd Cir. 1995)* for the proposition that "[w]ithout a definition of the relevant market, there is no way to measure a company's ability to act as a monopolist.")). "The relevant market establishes the backdrop against which to measure economic power." *C.E.*

Services, Inc., 759 F.2d at 1244 (quoting In re Mun. Bond Reporting Antitrust Litig., 672 F.2d 436, 441 (5th Cir. 1982)).

"The relevant market inquiry . . . has both geographical and product elements . . . ." C.E. Services, Inc., 759 F.2d at 1244 (internal citations omitted). Ultimately, the plaintiff is required to prove the relevant market. Id. "A definition of the market is essential because otherwise there is no context in which to determine whether defendant had the ability to lessen or destroy competition." O'Dell v. Gen. Motors Corp., 122 F.Supp.2d 721, 733-34 (E.D. Tex. 2000) (quoting Total Benefits Services, Inc. v. Group Ins. Admin., Inc., 875 F.Supp 1228, 1234 (E.D. La. 1995)). The definition of the relevant market is normally a fact question to be determined by the jury; however, "[i]n some instances, . . . the relevant market may be determined as a matter of law . . . ." Seidenstein, 769 F.2d at 1106. In addition, the Fifth Circuit **[*21]** has noted the difficulty the court faces in defining the relevant market at the summary judgment stage. See C.E. Services, Inc., 759 F.2d at 1244-45.

In this case, to the extent the parties briefed the issue, it is clear the parties do not agree on the definition of the relevant market in this case. Plaintiff argues that the relevant market should be defined narrowly to include only "the rail access for transportation of steel, soybean oil, and aggregates to [Plaintiff's facility]."[42] In contrast, although it is not perfectly clear, Defendant defines the relevant market as the "transportation services, including rail and non-rail."[43] Neither Plaintiff nor Defendant has adequately briefed the relevant market issue or sufficiently explained the reasoning behind each's proffered market definition. Although it is ultimately Plaintiff's burden to prove the relevant market, in this instance, Defendant has not met its burden on summary judgment to prove there are no genuine issues of material fact regarding the relevant market. Both Plaintiff and Defendant have only presented the court with conclusions regarding the relevant market, and Defendant has failed to present the court with sufficient facts or evidence for the court to determine **[*22]** as a matter of law the relevant market. Therefore, this court is unable to determine the relevant market that "establishes the backdrop against which to measure economic power." In re Municipal Bond Reporting Antitrust Litigation, 672 F.2d 436, 441 (5th Cir. 1982). Based on the above, this court is unwilling to take the extraordinary step of ruling as a matter of law that there is no set of facts under which Plaintiff could recover under Section 2.

Therefore, Defendant's motion for summary judgment on the Section 2 attempted monopoly claim and actual monopoly claim should be denied.

Having found no evidence of a conspiracy above, to the extent Plaintiff asserts a cause of action for conspiracy to monopolize under Section 2, this court recommends that summary judgment be granted for Defendant.

F. Clayton Act

The Clayton Act prohibits numerous types of anticompetitive behavior, including engaging in price discrimination and exclusive dealing contracts. 15 U.S.C. §§ 13-14. In addition, the Clayton Act permits any person whose business or property is harmed by a violation of an ***antitrust law*** to maintain a private cause of action. 15 U.S.C. § 15(a). "The Supreme Court has long held that suits under section 4 of the Clayton Act (15 U.S.C. § 15(a)) for violation of either Section 1 or Section 2 of the Sherman Antitrust Act require not only injury to the plaintiff's business or property **[*23]** resulting from the alleged violation, but also a showing of antitrust injury and standing." Norris v. Hearst Trust, 500 F.3d 454, 465 (5th Cir. 2007).

"Standing to pursue an antitrust suit exists only if a plaintiff shows: 1) injury-in-fact, an injury to the plaintiff proximately caused by the [defendant's] conduct; 2) antitrust injury; and 3) proper plaintiff status, which assures that other parties are not better situated to bring suit." Doctor's Hosp. of Jefferson, Inc. v. Se. Medical Alliance, Inc., 123 F.3d 301, 305 (5th Cir. 1997). In order for this court to determine whether a plaintiff has standing, the court should

---

[42] Plaintiff's Response to Defendant's Motion for Summary Judgment, Docket Entry No. 37, p. 24.

[43] Defendant's Motion for Summary Judgment, Docket Entry No. 32, p. 21.

assume that the defendant committed the antitrust violations. *David Aldridge Co. v. Microsoft Corp., 995 F.Supp. 728, 748 (S.D. Tex. 1998)*; *Doctor's Hosp. of Jefferson, Inc., 123 F.3d at 305*.

The first element, injury-in-fact, requires a showing that the injury alleged by plaintiff was proximately caused by the conduct of the defendant. *David Aldridge Co., 995 F.Supp. at 748*; See *Doctor's Hosp. of Jefferson, Inc., 123 F.3d at 305*; *United Indus., Inc. v. Eimco Process Equip. Co., 61 F.3d 445, 448 (5th Cir. 1995)*.

For the purposes of the second element, antitrust injury is "injury of the type the antitrust laws were intended to prevent and that flows from that which makes the [defendant's] acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489 (1977)*. The injury should reflect that anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be the type of loss that the claimed violations . . . would be likely to cause." *Doctor's Hosp. of Jefferson, Inc., 123 F.3d at 305*.

The third element of antitrust standing, proper plaintiff status, **[*24]** requires the court to examine whether: (1) plaintiff's injuries or their casual link to defendant are speculative; (2) other parties have been more directly harmed; and (3) allowing plaintiff to sue would risk multiple lawsuits, duplicative recoveries, or complex damage apportionment. *David Aldridge Co., 995 F.Supp. at 748* (citing *McCormack v. Nat'l Collegiate Athletic Ass'n, 845 F.2d 1338, 1341 (5th Cir. 1988))*.

Defendant challenges Global's standing to assert antitrust claims against it based on two discreet arguments and not its failure to meet one of the elements of antitrust standing. Defendant argues that "Global has no standing to assert an [antitrust] claim against [Defendant] because Global was not a direct purchaser of [Defendant's] service under the "direct purchaser" doctrine . . . ."[44] Defendant also argues that Global has no standing to bring an antitrust claim because it is not a third-party beneficiary under the contract between Plaintiff and Defendant. In response, Global argues that it has standing to sue because it was directly injured by Defendant's conduct that violated the antitrust act.

In this instance, neither argument proffered by Defendant justifies dismissal because of a lack of standing. Without discussing the cases in any detail, Defendant cites the court two cases in support **[*25]** of its argument that the "direct purchaser" doctrine proves Global has no standing to assert its claim. *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481 (1968)*; *Illinois Brick Co. v. Illinois, 431 U.S. 720 (1977)*. Both cases, however, are distinguishable from the instant case and neither case justifies dismissal for a lack of standing.[45] In addition, Global

---

[44] Defendant's Motion for Summary Judgment, Docket Entry No. 32, p. 25.

[45] In Hanover Shoe, Inc., the defendant argued, pursuant to the "passing on defense," that the plaintiff was not financially injured because of the defendant's antitrust violations, as the extra costs incurred by the plaintiff, were "passed on" to the final consumer. *392 U.S. 481, 487-89 (1968)*. Thus, the defendant argued that the plaintiff suffered no injury. Id. The Court rejected the defendant's assertion of the "passing on defense," and stated "that [the plaintiff] proved injury . . . when it proved that [the defendant] had overcharged it during the damage period and showed the amount of the overcharge . . . ." *Id. at 494*.

Similarly, in Illinois Brick Co., the Court rejected the plaintiffs' attempt to use the "passing on defense" offensively. *431 U.S. 720, 728 (1977)*. In that case, the plaintiffs, indirect purchasers of the defendants' concrete blocks, argued that the extra costs charged by the defendant were passed through the intermediaries to the plaintiffs. *Id. at 727*. Therefore, the plaintiffs asserted that they were injured because they were charged a higher price for the final product due to the defendants' antitrust violations. Id. Discussing at length the remote connection between the plaintiffs and the defendant in this case, the court determined that the plaintiffs were not permitted to use the "passing on defense" to prove that they were injured by the defendant's actions. *Id. at 727-29*.

In addition, it is not clear that the cases were even addressing the issue of standing. In Illinois Brick Co., the court noted that "[b]ecause we find Hanover Shoe dispositive here, we do not address the standing issue, except to note, . . . that the question of which persons have been injured by an illegal overcharge . . . is analytically distinct from the question of which persons have sustained injuries too remote to give them standing to sue for damages . . . ." *Id. at 728-29, n. 7*.

has offered direct evidence that Defendant's conduct directly injured Global because it had to pay additional transportation costs to have steel delivered to its facility.[46]

As to Defendant's second argument, Defendant generally cites the court to cases discussing third-party beneficiaries; however, Defendant has not presented the court with any legal authority in support of its argument that Global's lack of status as a third-party beneficiary to the Amended Agreement prevents it from suing for violations of the antitrust laws.

Therefore, Defendant's arguments that Global does not have standing are without merit.

Defendant also generally argues that Plaintiff and Global have failed to present any evidence of a cause of action under the Clayton Act because they have failed to come forward with any facts to support the essential element that Defendant acted anti-competitively **[*26]** on pricing, services, or use of facilities. As discussed above, a fact issue exists on the *Section 2* attempted monopolization and actual monopolization claims, and the Clayton Act permits any person whose business or property is harmed by a violation of an ***antitrust law*** to maintain a private cause of action. *15 U.S.C. § 15(a)*. Therefore, Defendant's motion for summary judgment on the Clayton Act claims should be denied.

V. Conclusion

Based on the foregoing, the court **RECOMMENDS** that Defendant's motion for summary judgment be **GRANTED IN PART** and **DENIED IN PART**.

The Clerk shall send copies of this Memorandum and Recommendation to the respective parties who have ten days from the receipt thereof to file written objections thereto pursuant to *Federal Rule of Civil Procedure 72(b)* and General Order 2002-13. Failure to file written objections within the time period mentioned shall bar an aggrieved party from attacking the factual findings and legal conclusions on appeal.

The original of any written objections shall be filed with the United States District Clerk electronically. Copies of such objections shall be mailed to opposing parties and to the chambers of the undersigned, 515 Rusk, Suite 7019, Houston, Texas 77002.

SIGNED in Houston, Texas, this 27th **[*27]** day of February, 2009.

Opinion

ORDER:

(1) DENYING DEFENDANT'S MOTION TO DISMISS OR STRIKE

[Doc. No. 11]

(2) GRANTING DEFENDANT'S MOTION TO DISMISS THE REQUEST FOR DECLARATORY JUDGMENT

[Doc. No. 12]

Before the Court are defendant's *Rule 12(b)(6)* motion to dismiss, *Rule 12(f)* motion to strike, and motion to stay the action. (Doc. Nos. 11 and 12.) Plaintiffs opposed and defendant filed a reply.

BACKGROUND

The following factual background is drawn from plaintiffs' first amended complaint. All facts alleged are taken as true for the limited purposes of this motion.

A. [*2] Parties

Plaintiff Macquarie Group Limited ("MGL") and plaintiff Macquarie Bank Limited ("Macquarie") are Australian corporations with principal places of business in Sydney, Australia. Macquarie is a wholly owned subsidiary of MGL. Plaintiff Allan Moss was the Managing Director and Chief Executive of Macquarie until November 2007, when he became the Managing Director and Chief Executive of MGL. Plaintiff Ben Bruck was the Head of Macquarie Funds Management Group, a business division within MGL. Plaintiff Jeff Blakely was the head of Macquarie Funds Management Group's Alternative Investments private equity management business. Defendant, Pacific Corporate Group, is a Delaware limited liability corporation with its principal place of business in La Jolla, California. Defendant also maintains an office in New York, New York.

B. Facts Underlying the Request for Declaratory Relief

In October 2006, Peter Martenson, an employee of a MGL subsidiary, allegedly sent e-mail messages to a number of defendant's employees in which he falsely identified the author of the emails as defendant's chairman, Christopher Bower. Martenson also sent an email to Dow Jones reporter Laura Kreutzer, in which he **[*3]** falsely identified the email's author as defendant's former president. In these emails, Martenson purported to transmit disparaging information about defendant gathered from the website of one of defendant's clients.

In January 2008, defendant notified plaintiffs it intended to bring claims for violations of various federal and state laws arising from Martenson's conduct. Defendant presented plaintiffs with a proposed complaint, which defendant intended to file in the Superior Court of the State of California for the County of San Diego ("draft complaint"). (FAC, Ex. A.) In the draft complaint, defendant claimed plaintiffs were responsible for Martenson's conduct and conspired with Martenson to damage defendant. Defendant's draft complaint alleged $ 25 million in damages. Plaintiffs commenced this action in the Southern District of New York on April 7, 2008. Defendant filed a complaint in the Superior Court of the State of California for the County of San Diego on May 23, 2008.

C. The Alleged Refusal To Deal

The alleged refusal to deal stems from plaintiffs' attempted entry into the investment management services for public pension funds market in 2005. A pension fund is a pool of assets **[*4]** bought with contributions made under a pension plan. When an employee retires, she receives payment from the pension fund. Pension plans funded by governments are pubic pension funds.

Public pension funds have trillions of dollars in capital to invest on behalf of their beneficiaries. These funds are highly risk averse and are often restricted by complicated laws and regulations governing how the public pension fund can invest. Most of the funds have extensive internal rules and regulations which require a public pension fund investment manager to develop highly specialized knowledge and understanding.

Before hiring a manager, public pension funds engage in extensive due diligence, including a review of the manager's track record. Reputation is therefore essential to secure investment business. Part of this reputation is premised on a new investment manager's first investments. The ability to acquire initial investment opportunities will have a disproportionately high impact on the investment manager's ability to enter the market. For example, an investment manager's initial inability to secure access to significant investment opportunities signals the new manager may not be able to **[*5]** secure adequate, long-term investment returns.

In July 2005, Macquarie attempted to enter the public pension fund investment management market. As part of the effort, Macquarie attempted to secure the business of the Government Employees Superannuation Board ("GESB"). In August 2005, Macquarie approached Aisling Capital LLC ("Aisling"), a life science venture capital fund manager with an office in New York, New York. Aisling was amenable to dealing with Macquarie and indicated Macquarie would receive a commitment of at least $ 15 million in the Aisling fund.

On November 9, 2005, Jan Hoerrner, Aisling's Director of Investor Relations and Marketing, telephoned Macquarie concerning Macquarie's investment in the Aisling fund. Hoerrner told Macquarie she had received a call on November 9, 2005 from defendant's president. Defendant's president told Aisling to not allow Macquarie into the Aisling Fund, requested priority over Macquarie in the fund, and threatened to not recommend Aisling to clients if Macquarie entered the fund. Aisling subsequently lowered Macquarie's investment opportunity from $ 15 million to $ 5 million.

This reduction in investment opportunity signaled to investors Macquarie **[*6]** could not secure meaningful investments for its clients. Plaintiffs allege defendant knew the importance of this investment opportunity and coerced Aisling into reducing the opportunity to prevent Macquarie's entry into the market. Subsequently, defendant circulated rumors in the marketplace that Macquarie was having difficulties getting access to funds like Aisling's. As a result, Macquarie failed to receive allocations from several public pension funds.

Defendant's conduct damaged not only Macquarie, but also the market. Macquarie offered lower management fees. Therefore, by preventing Macquarie's entry into the market, defendant was able to sustain higher fees and offer lower quality service. Macquarie, as well as consumers in general, suffered financial harm from defendant's acts.

Further, without Macquarie's consent, defendant obtained confidential documents belonging to Macquarie. For example, defendant's California complaint quotes a confidential email.

D. Procedure

On October 31, 2008, Judge Castel transferred this case from the Southern District of New York to the Southern District of California pursuant to *28 U.S.C. § 1404(a)*. On November 26, 2008, plaintiffs filed a first amended **[*7]** complaint, alleging defendant (1) violated *section 1 of the Sherman Act*; (2) violated *New York General Business Law § 349* (deceptive acts and practices); (3) tortiously interfered with prospective economic relations; and (4) committed conversion. Plaintiff also requests declaratory judgment arising from the Martenson incident. On December 15, 2008, defendant filed (1) a motion to strike portions of the first amended complaint and (2) a motion to dismiss or stay the action. (Doc. Nos. 11, 12.) Plaintiffs filed an opposition and defendant replied.

LEGAL STANDARD

A. Motion to Dismiss

A motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)* tests the legal sufficiency of the claims asserted in the complaint. *Fed. R. Civ. P. 12(b)(6)*. To avoid a *Rule 12(b)(6)* dismissal, a complaint need not contain detailed factual allegations; rather, it must plead "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S.544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. The court's review is limited to the contents of the complaint and must accept all factual allegations pled in the complaint as true, drawing all reasonable inferences from them in favor of the nonmoving party. *Cahill v. Liberty Mutual Ins. Co., 80 F.3d 336, 337-38 (9th Cir.1996)*. **[*8]** In spite of this deference, it is not proper for the court to assume that "the [plaintiff] can prove facts which [he or she] has not alleged." *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 526, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*. Furthermore, a court is not required to credit conclusory legal allegations cast in the form of factual allegations, unwarranted deductions of fact, or unreasonable inferences. *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001)*.

B. Motion to Strike

Rule 12(f) permits the court to strike any "redundant, immaterial, impertinent, or scandalous matter." Fed. R. Civ. P. 12(f). Motions to strike are a drastic remedy and generally disfavored. 5C Wright & A. Miller, Federal Practice and Procedure §1380 (3d ed. 2004). A matter is impertinent if the statements do not pertain, and are not necessary, to the issues in question. *Fantasy, Inc.v. Fogerty, 984 F.2d 1524, 1527 (9th Cir. 1993)* rev'd on other grounds *510 U.S. 517, 114 S. Ct. 1023, 127 L. Ed. 2d 455 (1994)*. "Scandalous" matters "casts a cruelly derogatory light on a party or other person." *In re 2TheMart.com Sec. Litig., 114 F. Supp. 2d 955, 965 (C.D. Cal. 2000)*; see, e.g. *Jacobsen-Wayne v. Calvin C.M. Kam, M.D., Inc., 198 F.3d 254 (9th Cir. 1999)* **[*9]** (striking the words "date rape" and "rape" from a reply brief in a case arising from a medical examination); *Alvarado-Morales v. Digital Equip. Corp., 843 F.2d 613 (1st Cir. 1988)* (striking the terms "concentration camp," "brainwashing," and "torture" in a tort case in the employment context).

DISCUSSION

A. Motion to Dismiss Sherman Act Claim

Plaintiffs allege a vertical agreement between defendant and Aisling, through which defendant attempted to bar plaintiffs' entry into the market for investment management for public pension funds. [1] Defendant allegedly knew a failure to procure initial investment opportunities would be a barrier to market entry and knew of plaintiffs' relationship with Aisling. Defendant allegedly called Aisling and asked the company to reduce plaintiffs' investment opportunity. Aisling subsequently reduced plaintiffs' opportunity from $ 15 million to $ 5 million. Further, defendant allegedly spread rumors regarding plaintiffs' ability to procure investment opportunities. Plaintiffs contend this, coupled with the reduction of their investment opportunity, effectively barred their entry into the market.

Section 1 of the Sherman Act states, "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade . . . is declared to be illegal." *15 U.S.C. § 1*. Because many beneficial business contracts restrain trade, courts interpret *section 1* to prohibit only those that are "unreasonably restrictive of competitive conditions." *Standard Oil Co. v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*. To prevail on an section 1 claim, a plaintiff must prove three elements: (1) an agreement or conspiracy intended to restrain trade; (2) which actually restrains trade; and (3) which causes an injury to competition. *Les Shockley Racing, Inc. v. Nat'l Hot Rod Ass'n, 884 F.2d 504, 507 (9th Cir.1989)*. Further, the plaintiff must establish both the relevant market and market power. See *Newcal Industries, Inc. v. Ikon Office Solution, 513 F.3d 1038, 1045 (9th Cir. 2008)*.

If the plaintiffs establish these elements, the Court must determine whether to implement the *per se* rule or the "rule of reason." See *Paladin Assocs., Inc. v. Montana Power Co., 328 F.3d 1145, 1154 (9th Cir.2003)*. **[*11]** *Per se* liability is reserved for those agreements "so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality." *National Soc. of Professional Engineers v. United States, 435 U.S. 679, 692, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. An agreement between a single customer and a single supplier to terminate a second supplier is not unlawful *per se.* *NYNEX Corp. v. Discon, 525 U.S. 128, 119 S. Ct. 493, 142 L. Ed. 2d 510 (1998)*. Therefore, the Court analyzes this type of vertical agreement using the rule of reason. *A.H. Cox & Company v. Star Machinery Co., 653 F.2d 1302, 1305-6 (9th Cir. 1981)*. The rule of reason requires the Court to "weigh the anticompetitive effects and the procompetitive effects or business justifications advanced for the challenged restraint to determine whether it is unreasonable." *Les Shockley, 884 F.2d at 507*. Below, the Court evaluates whether plaintiffs meet the *section 1* elements before applying the rule of reason.

[1] A "vertical agreement" is an agreement between entities operating **[*10]** on different marketing levels. A prototypical example would be an agreement between a manufacturer and a distributor.

1. Agreement or Conspiracy

i. Parties' Argument

Defendant argues plaintiffs cannot show an agreement because the facts alleged do not exclude the possibility defendant and Aisling Capital each acted independently. Defendant notes that, generally, a market participant may freely **[*12]** choose his clients, citing *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 761, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)* ("A distributor is free to acquiesce in the manufacturer's demand in order to avoid termination."); *Sorisio v. Lenox, Inc., 701 F. Supp. 950, 956 (D. Conn. 1988)*("[P]ersuasion, pressure, even argument, is permissible."); *America Channel, LLC v. Time Warner Cable, Inc., 2007 U.S. Dist. LEXIS 47966, 2007 WL 1892227 at *5 (D. Minn. June 28, 2007)*("allegations regarding [the defendant's] refusal to deal are insufficient to allege a claim of conspiracy because . . . they fail . . . to exclude the possibility of independent action.").

Plaintiffs argue coerced conduct satisfies the joint conduct requirement, citing *Spectators' Commc's Network v. Colonia Country Club, 253 F.3d 215, 225 (5th Cir. 2001)*; *MCM Partners, Inc. v. Andrews-Bartlett & Assocs., 62 F.3d 967, 973-74 (7th Cir. 1995)*; *Pinhas v. Summit Health, Ltd., 894 F.2d 1024 (9th Cir. 1990)*; *Oltz v. St. Petter's Cmty. Hosp., 861 F.2d 1440, 1445 (9th Cir. 1988)*.

ii. Analysis

For an agreement to constitute a restraint of trade, plaintiffs must show the conspirators had "conscious commitment to a common scheme designed to achieve an unlawful objective." *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 768, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*. **[*13]** The agreeing parties need not share a motive and "acquiescence in an illegal scheme is as much a violation of the Sherman act as the creation and promotion of one." *Spectators', 253 F.3d at 221*. An agreement to exclude a competitor from the market has been widely found to be a unlawful objective. See *Klor's Inc. v. Broadway-Hale Stores, 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*; *Quemos Theatre Co. v. Warner Bros. Pictures, 35 F. Supp. 949 (D.C.N.J. 1940)*.

In Spectator's, the Fifth Circuit found an agreement when one conspirator was allegedly "enticed or coerced into knowingly curtailing competition by another conspirator who has an anticompetitive motive." *Id. at 222*. In that case, the plaintiff alleged the PGA Tour, in an attempt to drive a competitor out of the on-site radio broadcast market, pressured Anheuser-Busch to withdraw sponsorship from a competitor's radio broadcast. *Id. at 221*. After Anheuser-Busch rescinded the agreement, its product became the official beer of the PGA Tour. Id. The Fifth Circuit found this circumstantial connection sufficient to survive a motion to dismiss.

In the instant case, plaintiffs sufficiently allege an agreement with an unlawful object. The agreement between the parties **[*14]** is evidenced by defendant's alleged phone call to Aisling and Aisling's subsequent reduction of plaintiffs' investment opportunity. Like the court in *Spectator's*, this Court may infer an agreement between the parties from this circumstantial evidence for the limited purposes of this motion. Further, the agreement was intended to exclude plaintiffs from the market, a clearly unlawful object. Plaintiffs satisfy the agreement element.

The cases cited by defendant are irrelevant because they involve either a different type of antitrust violation or are factually distinct. *Monsanto, 465 U.S. 752, 104 S. Ct. 1464, 79 L. Ed. 2d 775* (evaluating a vertical price-fixing agreement); *Sorisio, 701 F. Supp. at 956* (same); *American Channel, 2007 U.S. Dist. LEXIS 47966, 2007 WL 1892227 at *5* (evaluating a vertical refusal to deal in which the plaintiff only alleged parallel conduct without any other proof of agreement). [2] In the instant case, plaintiffs allege an explicit agreement, evidenced by an admission by one of the co-conspirators and supported by circumstantial proof.

---

[2] "Parallel conduct" refers to the inference of agreement or concerted action which a Court may draw from "the conscious parallelism of the defendants' acts of price cutting and the like." *54 Am. Jur. 2d Monopolies § 486*. **[*15]** Parallel conduct alone, as opposed to explicit agreements, has widely been held insufficient to maintain an antitrust claim. Id.

2. Restraint on Trade

i. Parties' Argument

Defendant argues plaintiffs fail to articulate a plausible restraint on trade. Instead, defendant argues, this case involves a supplier choosing to deal with one prospective purchaser instead of another, an act that is presumptively legal absent extraordinary market power. *Republic Tobacco Co. v. North Atlantic Trading Co., Inc., 381 F.3d 717, 736 (7th Cir. 2004)*; *E&L Consulting Ltd. v. Doman Industries Ltd., 472 F.3d 23, 29 (2d Cir. 2006)*. Plaintiffs, defendant argues, are complaining of too much competition because defendant received a larger share of the Aisling fund.

Plaintiffs allege defendant harmed competition by barring plaintiffs' entry into the investment management services for public pension funds market. According to plaintiffs, this market is concentrated in a few firms and has "high entry barriers." One of these barriers is a lack of confidence in new investment managers - which hinges, in part, on the manager's ability to secure initial investment opportunities. Allegedly, defendant ensured plaintiffs **[*16]** would not clear this barrier by depriving them of the full Aisling investment opportunity. Accordingly, plaintiffs have been unable to enter the market and defendant has been able to charge higher fees and offer lesser service.

ii. Analysis

"Not every agreement is *per se* 'in restraint of trade' within the meaning of *section 1*." *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71,76 (9th Cir. 1969)*. A single seller may unilaterally transfer his business to a competitor without violating the antitrust laws. Id. However, a refusal to deal where "there was a purpose either to exclude a person or group from the market, or to accomplish some other anti-competitive objective" is a restraint on trade. Id.; see, e.g., *United States v. General Motors Corp., 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*(finding a *section 1* violation when the objective was to put "discounters" out of business); *Silver v. New York Stock Exchange, 373 U.S. 341, 83 S. Ct. 1246, 10 L. Ed. 2d 389 (1963)*(finding a *section 1* violation when a group worked to put a competitor out of business or, at least, impair their ability to compete); *Quemos Theatre Co., Inc. v. Warner Bros. Pictures, 35 F. Supp. 949 (D.C.N.J. 1940)*.

At this stage in the proceedings, plaintiffs **[*17]** sufficiently allege defendant's vertical agreement with Aisling was a restraint on trade. Defendant allegedly pressured Aisling to reduce plaintiffs' investment opportunity in order to prevent their entry into the market, which is a form of a refusal to deal. Defendant's alleged anticompetitive motive is further evidenced by the rumors it allegedly spread about plaintiffs' inability to obtain investment opportunities. These agreements restrain trade by reducing the number of participants in the market and, as a result, plaintiffs allege defendant is able to charge supracompetitive prices. Evaluating the totality of these allegations, the Court concludes plaintiffs sufficiently allege a restraint on trade.

3. Injury to Competition (Anti-Trust Injury)

Defendant alleges plaintiffs do not properly alleged an injury to competition. A plaintiff must allege more than an injury to itself, it must allege an injury to the marketplace as a whole. *Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. The complaint alleges defendant's actions allowed it "to sustain higher fees and offer lower quality of service . . . and consumers in general will suffer significant financial harm from the absence **[*18]** of an effective alternative to [defendant]." (FAC P65.) This allegation of supracompetitive prices is sufficient to satisfy the injury to competition requirement at this stage of the proceedings. See *Rebel Oil Co, Inc. v. Atl. Richfield Co., 51 F.3d 1421, 1424 (9th Cir. 1995)* (noting evidence of "restricted output and supracompetitive prices" is proof of injury to competition.).

4. Relevant Market

i. Parties' Arguments

Defendant argues there is no relevant market because "investment management services to public pension funds" are indistinguishable from general investment management services. According to defendant, there are hundreds of thousands of professionals who could potentially provide services to public pension funds. Given this vast potential market, defendant argues plaintiffs fail to plead sufficient facts other than conclusory allegations of market, citing as an example *Rick-Mik Enterprises, Inc. v. Equilon Enterprises LLC, 532 F.3d 963 (9th Cir. 2008)*.

Plaintiffs argue the relevant market is investment management services for public pension funds. This is typically a factual rather than a legal element. *Newcal Indus., Inc. v. Ikon Office Solution, 513 F.3d 1038, 1045 (9th Cir. 2008)*. **[*19]** At this stage, plaintiffs argue defendant cannot defeat a well-pleaded complaint by counter-pleading another relevant market.

ii. Analysis

To state a valid Sherman Act claim, plaintiffs must allege "a 'relevant market' exists." *Newcal Industries, Inc. v. Ikon Office Solution, 513 F.3d 1038, 1044 (9th Cir. 2008)*. A complaint survives a *Rule 12(b)(6)* motion "unless it is apparent from the face of the complaint that the alleged market suffers a fatal legal defect." *Id. at 1045*. Determination of the existence of a relevant market is generally a factual question, but there are some legal requirements. Plaintiffs must allege both a geographic market and a product market. The product "market must encompass the product at issue as well as all economic substitutes for the product." *Id. at 1046*.

Here, plaintiffs have alleged a plausible geographic and product market - the United States market for investment management of public pension funds. Plaintiffs allege this market is highly regulated, with a limited number of investment opportunities available due to the regulation; therefore, there are few economic substitutes. Although a factual inquiry may test the legitimacy of the market, it is not **[*20]** appropriate for determination at the motion to dismiss stage.

4. Market Power

i. Parties' Arguments

Defendant argues plaintiffs do not allege market power. Defendant contends, even if it had frozen plaintiffs out of the market, "exclusive dealing is an unreasonable restraint on trade only when a significant fraction of buyers or sellers are frozen out of a market by the exclusive deal." *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 45, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*(requiring market share greater than 30%). Plaintiffs aver defendant's ability to exclude competition proves its market power.

ii. Analysis

"Market power may be demonstrated through . . . direct evidence of the injurious exercise of market power." *Rebel Oil, 51 F.3d at 1421*. Plaintiffs allege defendant manages billions of dollars for large, public pension funds. Defendant allegedly exercised its market power to exclude plaintiffs from the market, which is direct evidence of the injurious exercise of market power.

Defendant's citation to *Jefferson Parish Hosp*. is unpersuasive. That case involved a tying agreement, which occurs when a monopolist attempts "to use a tie-in to a product to extend its monopoly power into a second market . . . ." Herbert **[*21]** Hovenkamp, Federal Antitrust Policy: The Law of Competition and its Practice § 7.8 (3d ed 2005). Under ***antitrust law***, tying agreements are analyzed under a different rubric than refusals to deal. See generally id.

5. Weighing the Procompetitive and Anticompetitive factors

In general, courts find vertical agreements "among traders at different marketing levels, designed to exclude from the market direct competitors" to be impermissible. See 10A Fletcher Cyc. Corp. § 5007 (collecting cases). When a large appliance dealer used its purchasing power to induce manufacturers to sell at a higher price to competing appliance dealer, the effect of the agreement was unlawful because it drove the competitor out of business. *Klor's Inc. v. Broadway-Hale Stores, 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*. The exclusion of competitors from the market place has the anticompetitive effect of allowing defendant to charge supracompetitive prices and, additionally, reduces consumer options.

The procompetitive factor involved is the freedom of a party to choose one client over another. The freedom of choice is a fundamental tenant of a the market system and the antitrust statutes do not restrict the right of any entity to choose **[*22]** with whom it does business. *Shawver & Son, Inc. v. Oklahoma Gas & Elec. Co., 463 F.2d 204 (10th Cir. 1972)*.

Balancing this freedom of choice against the anticompetitive factors, the Court finds plaintiffs satisfy the rule of reason. Although businesses are generally free to contract, there is a strong prohibition against agreements designed to prevent entry of a competitor into the market. Plaintiffs allege they can provide services to public pension funds at a lower price, therefore, its exclusion from the market damages consumers as a whole. The alleged damage to consumers outweighs the freedom of choice, making this alleged restraint on trade unreasonable. Accordingly, the Court DENIES defendant's motion to dismiss the antitrust claim.

B. Motion to Dismiss *New York General Business Law § 349* Claim

The complaint alleges defendant's alleged phone call to Aisling constituted a violation of *New York General Business Law § 349*.

i. Parties' Argument

Defendant argues *New York General Business Law § 349* is a consumer protection law and not applicable to this factual situation. First, defendant argues the complaint does not allege an act directed toward any New York consumers. Second, defendant **[*23]** asserts the phone call between it and Aisling was not deceptive. Finally, it argues, the damage claimed was to plaintiffs, not consumers.

Plaintiffs contend defendant's actions were consumer-oriented because they deprived New York consumers of access to a lucrative investment opportunity. Defendant's actions were deceptive because they were intended to deceive the market as to plaintiff's ability to compete for lucrative investment opportunities. Finally, defendant's actions were misleading toward New York consumers and injured plaintiffs.

ii. Analysis

Section 349 of new York's General Business Law provides: "Deceptive acts or practices in the conduct of any business, trade or commerce or in the furnishing of any service in this state are hereby declared unlawful." *N.Y. Gen. Bus. law § 349(a)*. To establish prima facie case, plaintiff must demonstrate that: (1) defendant's deceptive acts were directed at consumers, (2) acts are misleading in material way, and (3) plaintiffs have been injured as result. *Gristede's Foods, Inc. v. Unkechauge Nation, 532 F. Supp. 2d 439 (E.D.N.Y. 2007)*. There is no dispute plaintiffs allege they were injured as a result, therefore, the Court turns to the other **[*24]** elements.

The first element requires plaintiffs allege a "consumer injury or harm to the public interest." *New York v. Feldman, 210 F. Supp. 2d 294, 301 (S.D.N.Y. 2002)* (citation omitted). This requirement is construed "liberally." Id. "[P]laintiffs suing as corporate competitors under *§349* must show that defendants allegedly deceptive practice 'affects the public interest of New York.'" *Boule v. Hutton, 320 F. Supp. 2d 132, 137 (S.D.N.Y. 2004)* (citation omitted). In Feldman, the court found injury to the public interest when defendants allegedly engaged in a scheme to manipulate public stamp auctions, thereby, "undermin[ing] New York's interest in an 'honest marketplace in which economic activity is conducted in a competitive manner." *Feldman, 210 F. Supp. 2d at 302*. In the instant case, plaintiffs allege defendant orchestrated a refusal to deal designed to prevent its entry into the market, thereby, allowing defendant to charge supracompetitive prices. This undermines New York's interest in an honest marketplace in which economic activity is conducted in a competitive manner.

Next, the Court must determine if plaintiffs adequately allege the practice was deceptive or misleading. "[A] **[*25]** deceptive act or practice has an 'objective definition, . . . limited to those [acts] likely to mislead a reasonable consumer acting reasonably under the circumstances.'" *Leider v. Ralfe, 387 F. Supp. 2d 283, 292 (S.D.N.Y. 2005)* (quoting *Oswego Laborers' Local 214 Pension Fund v. Marine Midland Bank, N.A., 85 N.Y.2d 20, 647 N.E.2d 741, 623 N.Y.S.2d 529 (1995))*. In this case, the alleged collusive activity falls within *section 349*'s definition of "deceptive acts or practices." In Feldman, the court detailed a line of cases applying *section 349* "by looking to the definition of deceptive acts under *section 5 of the Federal Trade Commission Act*." *Feldman, 210 F. Supp. 2d at 302*. The *Feldman* court noted many courts routinely treated antitrust violations as deceptive acts; therefore, the court found an alleged antitrust violation was a deceptive act for pleading purposes. Id. Similarly, this Court finds the particular antitrust violation alleged constitutes a deceptive act for the purposes of *section 349*. Accordingly, the Court DENIES defendant's motion to dismiss the *section 349* claim.

C. Motion to Dismiss Other State Law Claims

1. Choice of Law Issues

As an initial matter, the parties disagree which state's laws govern **[*26]** plaintiffs' tortious interference and conversion claims. Defendant's motion rests upon the assumption both these claims are governed by California law. Plaintiffs argue New York law controls.

Following a transfer for "convenience" under *28 U.S.C. § 1404(a)*, the transferee court applies the same substantive rules - including statute of limitations - that the transferor court would have applied. *Van Dusen v. Barrack, 376 U.S. 612, 637-39, 84 S. Ct. 805, 11 L. Ed. 2d 945 (1964)*; Muldoon v. Tropitone Furn. Co., *1 F.3d 964, 965 (9th Cir. 1993)*. However, the law applied will not necessarily be the law of New York, but rather the law a New York court would have applied under a choice of law analysis. See, e.g., *Myelle v. American Cyanamid Co., 57 F.3d 411, 413 (4th Cir. 1995)*.

The first step is to determine whether an actual conflict exists between the laws of the jurisdictions involved. *In re Allstate Ins. Co., 81 N.Y.2d 219, 613 N.E.2d 936, 937, 597 N.Y.S.2d 904 (N.Y. 1993)*. When no conflict exists, "the court should apply the law of the forum state in which the action is being heard." *Frazer Exton Dev., LP v. Kemper Envtl., Ltd., 2004 WL 1752580 at * 12 (S.D.N.Y. July 29, 2004)*. If there is a conflict, "New York has adopted an 'interest analysis,' which **[*27]** requires . . . 'the law of the jurisdiction having the greatest interest in the litigation … be applied.'" *Kalb, Voorhis & Co. v. American Fin. Corp., 8 F.3d 130, 132 (2d Cir.1993)* (quoting *Intercontinental Planning, Ltd. v. Daystrom, Inc., 24 N.Y.2d 372, 248 N.E.2d 576, 582, 300 N.Y.S.2d 817 (1969))*. The most important contacts to consider are "the locus of the tort and the domicile of the parties." *Cooney v. Osgood Mach., Inc., 179 A.D. 2d 240, 242, 582 N.Y.S.2d 873 (N.Y. App. Div., 1992)*. "Where the parties are domiciled in different states, the locus of the tort will almost always be determinative in cases involving conduct regulating laws." *Krock v. Lipsay, 97 F.3d 640, 646 (2d Cir. 1996)*. Interference with prospective economic relations is a conduct regulating law. The locus of the tort is where the last event occurred that triggered liability. *Hamilton v. Accu-Tek, 47 F. Supp. 2d 330, 337 (E.D.N.Y. 1999)*.

The tortious interference claim is governed by New York law because there is no conflict between New York and California law. [3] New York requires a plaintiff establish: "(1) the plaintiff had a business relationship with a third party; (2) defendant knew of such relationship and intentionally interfered with it; (3) defendant **[*28]** acted solely out of malice, or used dishonest, unfair, or improper means; and (4) defendant's actions injured the relationship between plaintiff and third party." *Henneberry v. Sumitomo Corp. of America, 415 F. Supp. 2d 423, 467 (S.D.N.Y. 2006)*. California requires a plaintiff establish:

> [1] An economic relationship between plaintiff and some third party . . .; [2] The defendant's knowledge of the relationship; [3] Intentional acts by the defendant designed to disrupt the relationship; [4] Actual disruption of the relationship; [5] Economic harm to the plaintiff proximately caused by the acts of the defendant; [6] Conduct that was wrongful by some legal measure other than the fact of interference itself.

5 Witkin, Summary of California Law, Torts, § 742 (10th ed. 2005). The only arguable difference is California's requirement the act be "wrongful by some other legal measure." However, this is a false distinction as New York defines "improper means" to mean the conduct "must amount to a crime or an independent tort." *Henneberry, 415 F. Supp. 2d at 468* (citation omitted). Because there is no material difference, a New York court would find New York law controls this claim.

The conversion claim is also governed by New York law because there is not conflict between the two potential laws. The elements of conversion in California are: (1) plaintiff's right of possession; (2) defendant's conversion by a wrongful act or disposition of plaintiff's property rights; and (3) damages. *Burlesci v. Petersen, 68 Cal. App. 4th 1062, 80 Cal. Rptr. 2d 704 (1998)*. The elements of conversion in New York, (1) the plaintiff's right to possession, (2) intent of the defendant, and (3) defendant's interference with plaintiff's property rights to the exclusion of plaintiff's rights. *Meese v. Miller, 79 A.D.2d 237, 436 N.Y.S.2d 496 (N.Y. App. Div., 1981)*. A New York court would apply New York conversion law.

Because there is no true conflict between these laws, rebriefing is unnecessary because defendant's arguments apply with equal vigor to New York law.

2. Tortious Interference with Prospective Economic [*30] Relations

Defendant allegedly interfered with plaintiffs' prospective economic relations by placing a phone call to Aisling, thereby convincing Aisling to reduce plaintiffs' investment opportunity.

i. Parties' Argument

As a threshold matter, defendant asserts plaintiffs' claim is time-barred. Defendant then argues the claim fails because plaintiffs have failed to show the act was independently wrongful, citing *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal 4th 1134, 1159, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)* ("[T]he requirement of pleading that a defendant has engaged in an act that was independently wrongful distinguishes lawful competitive behavior from tortious interference."). Finally, defendant claims its conduct was fully privileged under the doctrine of competition privilege and California's statutory common interest privilege, *California Civil Code § 47(c)*.

Plaintiffs argue the claim is timely under New York law. Further, plaintiffs argue the complaint alleges the prima facie elements for its interference claim. Finally, plaintiffs argue neither the competition privilege nor the common interest privileges support dismissal.

ii. Analysis

[3] Even if a reviewing **[*29]** court finds a conflict, New York law still controls because the locus of the tort was New York. The majority of alleged tortious conduct occurred in New York: Aisling received defendant's phone call in New York, decided to reduce plaintiff's subscription in New York, and in fact reduced plaintiff's subscription.

The statute of limitations for this claim is three years from the date **[*31]** injury. *N.Y. CPLR § 214*. The injury did not occur until "Aisling succumbed to [defendants] threats and agreed to reduce [plaintiff's] $ 15 million investment in the Aisling Fund to $ 5 million." (FAC, P 57.) Plaintiffs assert this occurred after November 26, 2005, less than three years before the filing of the FAC. Therefore, the statute of limitations does not bar the claim.

Under New York law, a claim for tortious interference with prospective economic advantage lies where "(1) the plaintiff had a business relationship with a third party; (2) defendant knew of such relationship and intentionally interfered with it; (3) defendant acted solely out of malice, or used dishonest, unfair, or improper means; and (4) defendant's actions injured the relationship between plaintiff and third party." *Henneberry, 415 F. Supp. 2d at 467*. The complaint satisfies elements one, two and four by adequately alleging plaintiffs had a relationship with Aisling, defendant knew of the relationship, defendant intentionally interfered with the relationship, and defendant's actions injured the relationship. Accordingly, the Court turns its analysis to the third element.

Plaintiffs must allege conduct that "amount[s] **[*32]** to a crime or an independent tort, or must be engaged in 'for the sole purpose of inflicting intentional harm to the plaintiffs.'" *Henneberry, 415 F. Supp. 2d at 468* (quoting *Carvel Corp. v. Noonan, 3 N.Y.3d 182, 818 N.E.2d 1100, 1103, 785 N.Y.S.2d 359 (N.Y. 2004))*. Plaintiffs satisfy the third element because, as stated above, they adequately allege defendant's conduct constituted an antitrust violation.

The competition privilege and the common interest privilege are affirmative defenses and, as such, not grounds for dismissal. The "justification [for the competition privilege] is a question for the jury" based on various factual elements. *United Euram Corp. v. Occidental Petroleum Corp., 123 Misc. 2d 574, 474 N.Y.S.2d 372, 375 (N.Y. Sup. Ct. 1984)*. Similarly, the common interest privilege "constitutes an affirmative defense . . ., [therefore,] it does not lend itself to a pre-answer motion to dismiss." *Demas v. Levitsky, 291 A.D.2d 653, 738 N.Y.S.2d 402, 410 (NY. App. Div. 2002)*. Accordingly, the Court DENIES defendant's motion to dismiss the interference claim.

3. Conversion

Defendant allegedly converted "confidential documents (including the referenced e-mail)." (FAC P 76.) The "referenced e-mail" was an internal email defendant allegedly took **[*33]** from plaintiffs.

i. Parties Argument

Defendant argues (1) an email cannot be converted, (2) plaintiffs have failed to allege defendant wrongfully obtained the email, (3) the possession of the email did not substantially interfere with plaintiffs' possession, and (4) plaintiffs have not identified any confidential documents converted.

Plaintiffs argue they have pled (1) ownership and right to possession of the confidential e-mail, (2) defendant's intentional interference with plaintiffs' right of possession, and (3) damages. Plaintiffs discuss at length whether email can be converted.

ii. Analysis

The elements of conversion in New York are (1) the plaintiff's right to possession, (2) intent of the defendant, and (3) defendant's interference with plaintiff's property rights to the exclusion of plaintiff's rights. *Meese v. Miller, 79 A.D.2d 237, 436 N.Y.S.2d 496 (N.Y. App. Div., 1981)* Plaintiffs allege a right to possess the confidential documents (including the email), defendant intended to convert the documents, and defendant interfered with plaintiffs' property right by using the documents to the exclusion of plaintiffs' rights. Further plaintiffs allege the conversion has caused damages in excess of **[*34]** $ 75,000. This is sufficient to maintain a conversion action in New York.

The issue of whether an email can be converted is irrelevant because the complaint clearly alleges the conversion of "confidential documents (including the referenced e-mail)." (FAC P 77.) A plain reading of this paragraph implies defendant also converted documents other than the referenced email. Even if the email cannot be converted, plaintiffs have sufficiently alleged defendant converted other confidential documents. Therefore, the Court need not reach the question at this juncture and DENIES defendant's motion to dismiss the conversion claim.

D. Motion to Strike Pursuant to *Rule 12(f)*

i. Parties' Argument

Defendant urges the Court strike paragraphs 18-43 of plaintiffs' complaint because they purportedly violate California's litigation privilege and the Federal Noerr-Pennington doctrine. Defendant cites cases extending both doctrines to prelawsuit communications. *Sengchanthalangsy v. Accelerated Recovery Specialists, Inc., 473 F. Supp. 2d 1083, 1088 (S.D. Cal. 2007)* (extending California litigation privilege to demand letters); *Sosa v. DIRECTV, Inc., 437 F.3d 923, 933 (9th Cir. 2006)* (extending Noerr-Pennington **[*35]** doctrine to demand letters). Defendant argues the factual allegations reference a draft complaint it sent to plaintiffs as a prelawsuit invitation to settle, therefore, these allegations should be barred under both Sengchanthalangsy and Sosa.

Plaintiffs argue defendant's motion fails to identify the privileged communication and does not explain how plaintiffs' use violated the privilege. Plaintiffs also argue the reliance on the draft complaint does not violate either privilege.

ii. Analysis

As a preliminary matter, for the reasons discussed above, the Court applies New York litigation privilege law. In New York, "a statement made in the course of legal proceedings is absolutely privileged if it is at all pertinent to the litigation." *Lacher v. Engel, 33 A.D.3d 10, 817 N.Y.S.2d 37 (N.Y. App. Div. 2006)* (citing *Youmans v. Smith, 153 N.Y. 214, 47 N.E. 265 (N.Y. 1897))*. The privilege extends to "preliminary stages or investigative stages of the process." *Rosenberg v. MetLife, Inc., 8 N.Y.3d 359, 866 N.E.2d 439, 443, 834 N.Y.S.2d 494 (N.Y. 2007)*. The privilege is intended to prevent parties from being held liable for exercising their right to access the courts. Id. The usual context in which this arises is suits for defamation based upon the filing **[*36]** of a complaint. See, e.g., *Toker v. Pollak, 44 N.Y.2d 211, 376 N.E.2d 163, 405 N.Y.S.2d 1 (N.Y. 1978)*.

The Noerr-Pennington doctrine "ensures that those who petition the government for redress of grievances remain immune from liability for statutory violations, notwithstanding the fact that their activity might otherwise be proscribed by the statute involved." *White v. Lee, 227 F.3d 1214, 1231 (9th Cir. 2000)*. The purpose of the doctrine is to protect the right to petition the government. Id.

Both the litigation privilege and the Noerr-Pennington doctrine seek to prohibit suits aimed to punish parties for seeking access to the courts. In the instant case, plaintiffs do not bring any cause of action to punish defendant for its prelawsuit communications. This is not an action for defamation and plaintiffs do not rely on the act of sending the complaint as a basis for a cause of action. The draft complaint may have been a catalyst for the instant litigation, but these doctrines do not bar access to the courts in this situation. Accordingly, the Court DENIES defendant's motion to strike.

E. Motion to Dismiss or Stay the Declaratory Relief Claim

Plaintiffs request the Court declare the rights of the parties concerning the **[*37]** alleged conduct of Macquarie's former employee Peter Martenson. Martenson allegedly sent emails to defendant's employees and the press pretending to be an executive working for defendant. These actions allegedly caused $ 25,000,000 in damages to defendant. On May 23, 2008, defendant filed a complaint in California state court based on these facts.

i. Parties' Arguments

Defendant moves the Court to dismiss or stay plaintiffs' declaratory judgement action in favor of defendant's California state lawsuit. Defendant notes the Court has broad discretion to exercise its jurisdiction under the Declaratory Judgment act. Assessing factors set forth in *Brillhart v. Excess Ins. Co. of America, 316 U.S. 491, 62 S.*

Ct. 1173, 86 L. Ed. 1620 (1942), defendant argues dismissal would avoid needless determination of state laws issues, discourage forum shopping, and avoid duplicative litigation. Further, defendant argues the declaratory judgment action serves no useful purpose, would not finalize the controversy, is merely "procedural fencing," and raises unnecessary federalism issues. [4] Government Employees Ins. Co. v. Dizol, 133 F.3d 1220, 1225 (9th Cir. 1998).

Plaintiffs argue the presence of their other substantive claims weighs in favor of the Court retaining jurisdiction, citing Dizol, 133 F.3d at 1225-26. Plaintiffs assert adjudication of the declaratory judgment action would not be duplicative because the state court has stayed the action and the parties are substantially similar. Further, plaintiffs argue adjudication of the declaratory judgment action would not lead to needless determination of state law. Plaintiffs aver they have not engaged in forum shopping and the action serves the useful purpose of clarifying liabilities.

ii. Analysis

"The Declaratory Judgment Act embraces both constitutional and prudential concerns." Dizol, 133 F.3d at 1222. A plaintiff seeking federal declaratory relief must have Article III standing, satisfy the case and controversy requirement, and fulfill all statutory prerequisites. Id. at 1222-23. The parties do not dispute plaintiff has fulfilled these requirements and the Court, upon its own review, finds plaintiff satisfies these prerequisites. "If the suit passes constitutional and statutory muster, the district court **[*39]** must also be satisfied that entertaining the action is appropriate. This determination is discretionary . . .." Id.

A federal district court's broad discretion to abstain in declaratory relief actions empowers it to stay or dismiss such actions in favor of pending state court proceedings involving the same issue and parties. Wilton v. Seven Falls Co., 515 U.S. 277, 287-89, 115 S. Ct. 2137, 132 L. Ed. 2d 214 (1995). The Court is guided by the factors first articulated in Brillhart - avoidance of needless determination of state law issues, discouragement of forum shopping, and avoidance of duplicative litigation. Brillhart, 316 U.S. 491, 495, 62 S. Ct. 1173, 86 L. Ed. 1620 (1942). Additionally, courts may inquire: (1) whether the declaratory action will settle all aspects of the controversy; (2) whether the declaratory action will serve a useful purpose; (3) whether the action is brought merely for "procedural fencing"; and (4) whether the declaratory action will unnecessarily entangle the state and federal courts. Dizol, 133 F.3d at 1225 n.5 (citations omitted).

Turning first to the Brillhart factors, entertaining the declaratory judgment claim would result in needless determination of state law issues. When the sole basis of jurisdiction is diversity **[*40]** of citizenship, the federal interest is at its nadir and the policy of avoiding unnecessary determination of state law is especially strong. Allstate Life Ins. Co. v. Sundboll, 1995 U.S. Dist. LEXIS 14247, 1995 WL 566040 at *3 (N.D. Cal. 1995). According to plaintiffs, defendant does not allege plaintiffs violated any federal laws (see defendant's draft complaint (FAC, Ex. A)); therefore, diversity would be the sole basis of jurisdiction. Further, the declaratory judgment claim arises from a different case and controversy than plaintiffs' other claims. The declaratory judgment claim concerns Peter Martenson, who allegedly sent false materials to defendant's employees and the press, pretending to be an executive working for defendant. Plaintiffs' other claims involve defendant's interference with its investment opportunities, a factually and temporally distinct controversy. Therefore, the Court need not determine the state law issues underlying the declaratory judgment claim. Further, entertaining the declaratory judgment claim would encourage forum shopping. "A **[*41]** party should not be allowed to choose a less appropriate federal forum by hasty initiation of a federal proceeding which is parallel to a state proceeding." Allstate, 1995 U.S. Dist. LEXIS 14247, 1995 WL 566060 at *3. Here, the federal forum is inappropriate because the federal proceeding involves only state claims and is parallel to a state proceeding; therefore plaintiffs should not be allowed to force defendant, who is the natural plaintiff, into the federal forum. Finally, duplicative litigation would result if both this Court and the

[4] "Procedural fencing" means that the action is merely the product of forum **[*38]** shopping. Sherwin-Williams Co. v. Holmes County, 343 F.3d 383, 390 n. 2 (5th Cir. 2003).

state court allow the claims to proceed. All of these factors weigh against entertaining the declaratory judgment claim.

Similarly, the other Ninth Circuit factors also weigh against hearing the declaratory judgment claim. The declaratory judgment claim would not completely resolve the controversy because plaintiff omitted key parties in interest - most notably Peter Martenson. Further, the action serves no useful purpose. "The 'useful purpose' served by the declaratory judgment action is the clarification of legal duties for the future, rather than the past harm a coercive tort action is aimed at redressing." *Amsouth Bank v. Dale, 386 F.3d 763, 786 (6th Cir. 2004)*. Plaintiffs **[*42]** merely seek to have the court conduct a tort-style inquiry into the past conduct of Peter Martenson and determine liability - this is not the useful purpose described in Amsouth. See also, 10B C. Wright, A. Miller & M. Kane, Federal Practice & Procedure §2758 (3d ed 1998) ("[I]t is not the function of the federal declaratory action merely to anticipate a defense that otherwise could be presented in a state action."). Additionally, the declaratory judgment claim appears to be procedural fencing, an attempt to place the action in a federal forum rather than the appropriate state forum. Finally, the claim would unnecessarily cause friction between the state and federal courts because both courts would be adjudicating the same issue simultaneously. These factors weigh against entertaining the declaratory judgment claim in this Court.

The next issue is whether the Court should dismiss the claim or stay the action. In *Exxon Shipping Co. v. Airport Depot Diner, Inc., 120 F.3d 166 (9th Cir. 1997)*, the Ninth Circuit remanded a declaratory judgment action with directions to dismiss when the court determined the declaratory judgment served the improper purpose of attempting to displace a state **[*43]** court ruling. Similarly, in the instant case, plaintiffs are trying to bring this state action into a federal court by bringing a declaratory judgment claim. This Court GRANTS defendant's motion to dismiss the declaratory judgment claim.

CONCLUSION

For the foregoing reasons, the Court DENIES defendant's motion to dismiss the antitrust claim, the New York Business Law Claim, the conversion claim, and the tortious interference with prospective economic advantage claim. The Court DISMISSES WITH PREJUDICE plaintiff's declaratory judgment claim because any amendment to that claim would be futile.

IT IS SO ORDERED.

Opinion

[*344] *MEMORANDUM AND ORDER*

WILLIAM H. PAULEY III, District Judge:

Plaintiffs, fourteen record companies and music publishers (collectively "EMI"), bring this copyright infringement action against Defendant MP3tunes, LLC ("MP3tunes"). Plaintiffs move to dismiss MP3tunes's counterclaims. For the following reasons, Plaintiffs' motion is granted in part and denied in part.

BACKGROUND

For the purposes of this motion, the Court accepts the following facts as true. MP3tunes operates two websites: *www.mp3tunes.com* and *www.sideload.com*. (Amended Answer, Affirmative Defenses, and Counterclaims dated Nov. 3, 2008 ("Answer") P 35.) Mp3tunes.com offers online storage "lockers" where users can store music, while sideload.com is a search engine that allows users to search for free music downloads. (Answer PP 36, 38.)

Plaintiffs allege that MP3tunes violates federal copyright law by enabling users to listen to infringing music through its websites, make copies **[**2]** of infringing music to store in a "locker," and download copies of music to myriad locations and individuals. On September 4, 2007, Plaintiffs sent MP3tunes a take-down notice alleging that the conduct of both websites constituted copyright infringement (the "Take Down Notice"). (Answer Ex. A: Letter from Steven Fabrizio dated Sept. 4, 2007.) While Plaintiffs provided a "representative list" of over 350 songs that were "copied, performed, stored, distributed, and made available for download on or by MP3tunes," they also demanded that MP3tunes take action with respect to all of Plaintiffs' copyrighted recordings, even if not included on the representative list. (Answer Ex. A at 2.) MP3tunes removed the songs identified on the representative list from its websites, but took no action concerning the broader demand to take down other copyrighted recordings. (Answer P 55.)

Prior to the commencement of this action, MP3tunes filed a declaratory judgment action against EMI in the Southern District of California. There, MP3tunes **[*345]** sought both a declaration that its activities did not constitute infringement and money damages on the grounds that EMI violated the Digital Millennium Copyright Act **[**3]** ("DMCA") by knowingly materially misrepresenting that certain recordings on MP3tunes's websites were infringing. MP3tunes's complaint alleged that the Take Down Notice included "some songs" that "are freely available for digital download," but only specified two such songs and alleged that many songs were from the "Paste Store," which lawfully distributes promotional songs. *See* Order Granting Defendants' Motion to Dismiss (the "California Order"), 07 Civ. 1844 (WQH), at 11 (S.D. Cal. Apr. 18, 2008). Judge Hayes dismissed the declaratory judgment claim as an anticipatory filing. Judge Hayes also dismissed the DMCA claim without prejudice on the grounds that MP3tunes had not identified a single track "as definitely lawful, non-infringing, and wrongfully included in the cease-and-desist letter," that the complaint failed to allege facts showing that Plaintiffs knew or should have known the recordings were non-infringing, and that the non-infringing songs alleged in the Complaint were not material given the breadth of infringement complained of in the Take Down Notice. *See* California Order at 12-13.

In this action, MP3tunes alleges as a counterclaim that in addition to the songs identified **[**4]** in the California action, there are five more recordings on the Take Down Notice that "appear to be authorized by EMI for free download" or that "MP3tunes believes ? [are] lawfully available." (Answer PP 49-52.) These are "merely examples of the many links EMI represented as being associated with infringing copies of their allegedly copyrighted works, which were not, in fact, infringing." (Answer P 54.) MP3tunes asserts it was injured by Plaintiffs' misrepresentations because it relied on the Take Down Notice to remove links to allegedly infringing material and was forced to counterclaim. (Answer P 95.)

In addition, MP3tunes submits a declaration from Michael Robertson enumerating additional allegations it would plead if this Court concludes that the counterclaims fail to state a claim as pled. According to Mr. Robertson, EMI pays third-parties to distribute free MP3s over the internet; at least six of Plaintiffs' record label websites distribute songs for free; and EMI engages in active marketing of its music directly and through "hundreds if not thousands" of online music partners. (Declaration of Michael Robertson dated Dec. 30, 3008 ("Robertson Decl.") PP 9-13, 15.) In addition, **[**5]** EMI and other record companies are aware that music blogs and related online sites post infringing downloads, but "either choose to ignore them or, in many cases, openly cooperate with and license them, because exposure of artists on such web sites can lead to increased sales." (Robertson Decl. P 14.) More than 140 links on the Take Down Notice are to music blogs and related online sites. (Robertson Decl. P 14.)

DISCUSSION

I. *Legal Standard*

On a motion to dismiss, the Court must accept the material facts alleged in the complaint as true and construe all reasonable inferences in the plaintiff's favor. *Grandon v. Merrill Lynch & Co., 147 F.3d 184, 188 (2d Cir. 1998)*. Nonetheless, "factual allegations must be enough to raise a right of relief above the speculative level, on the assumption that all of the allegations in the complaint are true." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 1965, 167 L. Ed. 2d 929 (2007)* (requiring plaintiff to plead "enough fact[s] to raise a reasonable expectation that discovery **[*346]** will reveal evidence of [his claim]"); *see also* *ATSI Commc'ns, Inc. v. Shaar Fund, Ltd., 493*

F.3d 87, 98 (2d Cir. 2007) ("We have declined to read *Twombly's* flexible 'plausibility standard' **[**6]** as relating only to antitrust cases.").

A court may also consider "documents appended to the complaint or incorporated in the complaint by reference, and to matters of which judicial notice may be taken." Allen v. WestPoint-Pepperell, Inc., 945 F.2d 40, 44 (2d Cir. 1991).

II. *DMCA Claim*

A. *Collateral Estoppel*

"The litigation of an issue presented and necessarily decided in a prior action between the same parties is foreclosed by the doctrine of issue preclusion." Deutsch v. Flannery, 823 F.2d 1361, 1364 (2d Cir. 1987). In considering the preclusive effect of the dismissal of a prior action, "[i]t matters not that the prior action resulted in a dismissal without prejudice, so long as the determination being accorded preclusive effect was essential to the dismissal." Deutsch, 823 F.2d at 1364. "To the extent that there are no differences in the two complaints, or that the differences obviously lack substantive significance," the later complaint is precluded. Deutsch, 823 F.2d at 1364.

MP3tunes's Section 512(f) counterclaim adds little to the complaint dismissed by Judge Hayes. The accretion of five songs which "appear to be authorized by EMI for free download" or that "MP3tunes believes … **[**7]** [are] lawfully available" and the conclusory allegation that they are "merely examples" of works that are not infringing does not transform the counterclaim in any meaningful way from the DMCA claim dismissed in the California action. Because the counterclaim suffers from the same defects as the prior claim in California, it is precluded.

B. *Proposed Amendments*

In light of Rule 15(a)'s lenient standard for amendment, this Court considers the allegations MP3tunes proposes to add to the counterclaim. *See* Oliver Sch. v. Foley, 930 F.2d 248, 253 (2d Cir. 1991) ("[W]hen a motion to dismiss is granted, the usual practice is to grant leave to amend the complaint.")

The DMCA requires that copyright owners follow the notice provisions provided in 17 U.S.C. 512(c)(1)--a DMCA "Take Down Notice"--in order to hold internet service providers liable for copyright infringement. *See* Io Group, Inc. v. Veoh Networks, Inc., 586 F. Supp. 2d 1132, 2008 WL 4065872, at *7-21 (N.D. Cal. 2008). Section 512(f) provides that a person who "knowingly materially misrepresents under [Section 512]--(1) that material or activity is infringing . . . shall be liable for any damages, including costs **[**8]** and attorneys' fees, incurred by the alleged infringer … or by a service provider, who is injured by such misrepresentation, as a result of the service provider relying on such misrepresentation in removing or disabling access to the material or activity claimed to be infringing." 17 U.S.C. § 512(f).

A material misrepresentation is one that "affected the [infringer or service provider's] response to a DMCA letter." Online Policy Group v. Diebold, Inc., 337 F. Supp. 2d 1195, 1204 (N.D. Cal. 2004). Here, MP3tunes only removed the songs on the representative list. It did not respond to the demand that it remove all links to any of Plaintiffs' copyrighted recordings. Accordingly, Plaintiffs' representation that any link to its copyrighted recording was infringing cannot be a material misrepresentation. Moreover, MP3tunes suffered no injury because it **[*347]** took no action other than filing an anticipatory lawsuit in California.

As for the songs that MP3tunes removed as a result of the Take Down Notice, MP3tunes's proposed additional allegations that Plaintiffs distribute music for free over the internet through a variety of methods amounts to no more than an allegation that some of the songs on **[**9]** the representative list might be non-infringing. An allegation that there is a possibility that some songs on the representative list are non-infringing is too speculative to meet the Twombly standard. Accordingly, amendment of the counterclaims would be futile and the motion to dismiss the DMCA claim is granted.

III. *State Law Claims*

A. New York General Business Law §349

To state a claim under *N.Y.G.B.L. § 349*, a plaintiff must demonstrate, *inter alia*, that the defendant's deceptive acts were directed at consumers. *Maurizio v. Goldsmith, 230 F.3d 518, 521 (2d Cir. 2000)*; *S.Q.K.F.C., Inc. v. Bell Atl. Tricon Leasing Corp., 84 F.3d 629, 636 (2d Cir. 1996)* (*Section 349* claims "requires a finding of conduct that is consumer-oriented"); *International Sport Divers Ass'n v. Marine Midland Bank, N.A., 25 F. Supp. 2d 101, 114 (W.D.N.Y. 1998)* ("[T]he gravamen of the Complaint must be consumer injury or harm to the public interest."). Business-to-business transactions generally do not give rise to *§ 349* claims. *See Exxonmobil Inter-America v. Advanced Info. Eng'g Servs., 328 F. Supp. 2d 443, 448 (S.D.N.Y. 2004)*.

MP3tunes's *§ 349* claim alleges that Plaintiffs engaged in unfair, deceptive, or illegal **[**10]** acts or practices because they were aware their conduct violated *17 U.S.C. § 512(f)*. The Take Down Notice was directed to MP3tunes, not consumers. Accordingly, Plaintiffs' motion to dismiss the *§ 349* claim is granted.

B. *Common Law Unfair Competition*

"New York courts have noted the incalculable variety of illegal practices falling within the unfair competition rubric, . . . calling it a broad and flexible doctrine that depends more upon the facts set forth . . . than in most causes of action." *Roy Export Co. Estab. Of Vaduz, Liechtenstein v. Columbia Broad. Sys., Inc., 672 F.2d 1095, 1105 (2d Cir. 1982)* (internal quotation marks and citations omitted). While some courts have stated that common law unfair competition claims can be "grounded in *either* deception or appropriation of the exclusive property of the plaintiff," *see, e.g., H.L. Hayden Co. of N. Y. Inc. v. Siemens Med. Sys., Inc., 879 F.2d 1005, 1025 (2d Cir. 1989)* (emphasis added), "[t]he essence of an unfair competition claim under New York law is that the defendant misappropriated the fruit of plaintiff's labors and expenditures by obtaining access to plaintiff's business idea either through fraud or deception, or an abuse **[**11]** of a fiduciary or confidential relationship," *Telecom Intern. Am., Ltd. v. AT & T Corp., 280 F.3d 175, 197 (2d Cir. 2001)*; *see also Sears Petroleum & Transp. Corp. v. Archer Daniels Midland Co., No. 5:03-CV-1120 (DEP), 2006 U.S. Dist. LEXIS 27540, 2006 WL 1304699 (N.D.N.Y. May 9, 2006)* (considering and rejecting plaintiff's claim that allegations of deception are sufficient to state a claim for unfair competition without allegations of misappropriation under the vast majority of law in this Circuit and in New York state courts).

Because MP3tunes's fails to allege that Plaintiffs misappropriated MP3tunes's labors or expenditures, Plaintiffs' motion to dismiss the common law unfair competition claim is granted.

[*348] C. *California Business and Professional Code § 17200*

Section 17200 of the California Business and Professional Code prohibits business acts or practices that are "unlawful, unfair, or fraudulent." Unlawful conduct is defined as "any practices forbidden by law, be it civil or criminal, federal, state, or municipal, statutory, regulatory, or court-made." *Express, LLC v. Fetish Group, Inc., 464 F. Supp. 2d 965, 980 (CD. Cal. 2006)* (internal quotation marks and citations omitted). "[T]he word 'unfair' in *[§ 17200]* **[**12]** means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Carter v. Variflex, Inc., 101 F. Supp. 2d 1261, 1270 (CD. Cal. 2000)* (quoting *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 544 (1999))*. "Fraudulent as used in *§ 17200* does not refer to the common law tort of fraud but only requires a showing members of the public are likely to be deceived." *Express, 464 F. Supp. 2d at 980*; *see also Nat'l Rural Telcoms. Coop. v. DIRECTV, Inc., 319 F. Supp. 2d 1059, 1077-78 (CD. Cal. 2003)* ("A business practice is fraudulent if members of the public are likely deceived.").

Since this Court dismisses all the other counterclaims seeking monetary relief, MP3tunes's *§ 17200* claim cannot be based on allegedly unlawful acts or business practices. As for unfair acts or business practices, MP3tunes does not allege any anti-competitive conduct. Finally, as this Court held with respect to the *N.Y.G.B.L. § 349* counterclaim, MP3tunes's allegations have nothing to do with consumer **[**13]** or public harm. Accordingly, the *§ 17200* counterclaim is also dismissed.

IV. *Declaratory Judgment Claim*

MP3 tunes seeks a declaratory judgment that it is a service provider protected by the safe harbor provision in *17 U.S.C. § 512*, that it complied with its obligations under the DMCA, that the Take Down Notice was deficient, and that the activities of its websites do not constitute copyright infringement. This claim is duplicative of MP3tunes's affirmative defense that it is protected by the DMCA safe harbor provisions and the Plaintiffs' copyright infringement claims. However, there is no harm to Plaintiffs in letting these claims stand. Discovery relating to Plaintiffs' claims and MP3tunes's defense will proceed regardless of whether the declaratory judgment claim is dismissed. Allowing the counterclaim to remain ensures that the dispute will be resolved, even if Plaintiffs decide not to pursue their claims. Accordingly, Plaintiffs' motion to dismiss the declaratory judgment counterclaim is denied.

CONCLUSION

For the foregoing reasons, Plaintiffs' motion to dismiss MP3tunes's counterclaims is granted in part and denied in part. All of Defendant's state law counterclaims and the Digital **[**14]** Millennium Copyright Act counterclaim seeking affirmative relief are dismissed. The motion to dismiss the declaratory judgment counterclaim is denied. In view of this Memorandum and Order, the motion for a stay of discovery relating to the counterclaims is moot.

Civil Procedure > Remedies > General Overview

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN1[] **Civil Procedure, Remedies**

The *Seventh Amendment* requires a court to apply the jury's implicit and explicit factual determinations when ruling on equitable claims that are based on the same facts as the legal claims tried to the jury.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN2[] Trade Practices & Unfair Competition, State Regulation

Cal. Bus. & Prof. Code § 17200 defines "unfair competition" as any unlawful, unfair, or fraudulent business act or practice. It establishes three varieties of unfair competition--acts or practices which are unlawful, or unfair, or fraudulent. Although the unfair competition law is broadly written to permit courts to restrain dishonest or unfair business dealings, the scope of the law is not unlimited. Courts may not simply impose their own notions of the day as to what is fair or unfair.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN3[] State Regulation, Claims

The California Supreme Court has set the standard for establishing a violation of *Cal. Bus. & Prof. Code § 17200* by an "unfair" act or practice. When a plaintiff who claims to have suffered injury from a direct competitor's "unfair" act or practice invokes *§ 17200*, the word "unfair" in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Patent Law > ... > Defenses > Estoppel & Laches > Elements

HN4[] Estoppel & Laches, Elements

Equitable estoppel, which bars a patentee from receiving relief, consists of three elements: (i) the patentee must communicate to the accused infringer (by words, conduct or silence) that the patentee will not pursue an infringement claim; (ii) the accused infringer must rely on that communication; and (iii) the accused infringer must establish that it would be materially prejudiced if the patentee is now permitted to proceed with the infringement claim. Silence alone will not create an estoppel unless there is a clear duty to speak or somehow the patentee's continued silence reinforces the defendant's belief that the defendant will be unmolested. Even if the three elements are met, the court must take into consideration all other evidence respecting the equities of the parties in exercising its discretion in deciding whether to allow the defense to bar the suit.

Patent Law > Infringement Actions > Burdens of Proof

Patent Law > ... > Defenses > Estoppel & Laches > General Overview

HN5[] Infringement Actions, Burdens of Proof

In the context of a patent infringement action, except where equitable estoppel is based solely upon intentional fraud, the burden of proof is the preponderance of evidence. While the facts relied upon to establish equitable estoppel must be clear, positive, and unequivocal in their implication, these facts need not be established by any more than a fair preponderance of the evidence.

Patent Law > ... > Defenses > Estoppel & Laches > General Overview

HN6[] Defenses, Estoppel & Laches

In the context of a patent infringement action, an estoppel may be found even though the party estopped did not actually intend to mislead or to defraud the other person.

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > General Overview

Evidence > Burdens of Proof > Clear & Convincing Proof

Patent Law > Infringement Actions > Burdens of Proof

Patent Law > Infringement Actions > Defenses > General Overview

Patent Law > ... > Defenses > Estoppel & Laches > General Overview

HN7[] Defenses, Demurrers & Objections, Affirmative Defenses

Although often discussed together, waiver and equitable estoppel are separate concepts with different requirements. Waiver always rests upon intent. Waiver is the intentional relinquishment of a known right after knowledge of the facts. The burden, moreover, is on the party claiming a waiver of a right to prove it by clear and convincing evidence that does not leave the matter to speculation, and doubtful cases will be decided against a waiver.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN8[] Defenses, Misuse

Patent misuse arises from the equitable doctrine of unclean hands, and relates generally to the use of patent rights to obtain or to coerce an unfair commercial advantage. The key inquiry is whether, by imposing conditions that derive their force from the patent, the patentee has impermissibly broadened the scope of the patent grant with anticompetitive effect. The United States Court of Appeals for the Federal Circuit has cautioned that the defense not be read broadly to capture any generally-alleged "wrongful" use of patents. Rather, the defense is generally directed towards conduct that affects competition in unpatented goods or that otherwise extends the economic effect beyond the scope of the patent grant.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Implied Licenses

Patent Law > ... > Defenses > Estoppel & Laches > General Overview

HN9[] Defenses, Implied Licenses

In patent law, an implied license merely signifies a patentee's waiver of the statutory right to exclude others from making, using, or selling the patented invention. An implied license can also arise from conduct that supports a finding of equitable estoppel.

Evidence > Inferences & Presumptions > Presumptions > Creation

Patent Law > ... > Defenses > Estoppel & Laches > Elements

HN10[] **Presumptions, Creation**

A defendant, in order to invoke the defense of laches, must prove: (1) that the plaintiff delayed filing suit for an unreasonable and inexcusable length of time from the time the plaintiff knew or reasonably should have known of its claim against the defendant; and (2) that the delay operated to the prejudice or injury of the defendant. A presumption of laches arises upon proof that the patentee delayed filing suit for more than six years after actual or constructive knowledge of the defendant's alleged infringing activity.

Opinion

[*990] PHASE III (CONDUCT TRIAL) FINDINGS OF FACT AND CONCLUSIONS OF LAW

This patent/antitrust litigation involves dynamic random access memory ("DRAM") interface technology patented by Rambus and incorporated into industry-standard DRAMs. The litigation involves four actions. In the first action (Case No. 00-20905 or "*Hynix I*"), Hynix [1] (then Hyundai Electronics Industries Co., Ltd. and its subsidiaries) sued Rambus for a declaratory judgment regarding various Rambus patents. The court divided the issues into three trial phases. The **[**10]** issue in the first phase concerned whether Rambus's patent infringement counterclaims were barred by the doctrine of unclean hands. On January 5, 2006 the court issued its Findings of Fact and Conclusions of Law on Unclean Hands in favor of Rambus. *Hynix Semiconductor Inc. v. Rambus Inc., 591 F. Supp. 2d 1038 (N.D. Cal. 2006)*. The second phase concerned Rambus's allegations that Hynix's DRAMs infringed several of its patents. On April 26, 2006 a jury returned a verdict that Rambus's patent claims were infringed and not invalid and that Rambus was entitled to $ 306,967,272 in damages. The court remitted the jury's award to $ 133,584,129, which Rambus accepted.

The third phase concerned Hynix's **[**11]** allegations that Rambus obtained its patents in violation of a disclosure obligation to members of the Joint Electron Device Engineering Council ("JEDEC"), a standards setting organization of which Rambus was a member. Hynix alleged that Rambus committed antitrust and related violations by

[1] By "Hynix," the court refers to the four entities sued by Rambus: Hynix Semiconductor Inc., Hynix Semiconductor America Inc., Hynix Semiconductor U.K. Ltd., and Hynix Semiconductor Deutschland GmbH. The latter three entities are all wholly-owned subsidiaries of Hynix Semiconductor, Inc. *See* Docket No. 1649, C-00-20905-RMW, at 5, P 4 (N.D. Cal. Feb. 2, 2006). "Hynix" also includes Hynix Semiconductor Manufacturing America, a subsidiary named in the 05-00334 case but not the 00-20905 case.

attempting to assert its patent claims against manufacturers of DRAMs that complied with the JEDEC standard. Hynix also raised a number of defenses to its infringement based on this conduct. On March 26, 2008 a jury returned a verdict in favor of Rambus and against the Manufacturers on their legal claims. With these Findings of Fact and Conclusions of Law on the equitable claims and defenses, all issues in *Hynix I* have been resolved.

As mentioned, there are three other cases involving Rambus, DRAM manufacturers, and Rambus's conduct at JEDEC. The court and the parties identified the issues regarding Rambus's conduct common to these cases and *Hynix I* and the court consolidated those issues for trial. Thus, these findings and conclusions apply equally to these further cases as discussed below.

I. THE SCOPE OF THE CONSOLIDATED TRIAL PROCEEDINGS

These Findings of Fact and Conclusions of Law are made with **[**12]** respect to the non-jury claims and defenses asserted by the **[*991]** following entities: Hynix in cases C-00-20905 and C-05-00334; Nanya Technology Corp. and Nanya Technology Corp. U.S.A. ("Nanya") in case C-05-00334; and Micron Technology, Inc., and Micron Semiconductor Products, Inc. ("Micron") in case C-06-00244. The court refers to these entities collectively as "the Manufacturers." The court consolidated for trial the claims and defenses delineated in Attachments 1-3 and 5 of the parties' July 31, 2007 Joint Case Management Statement. [2] The trial, which the court and the parties refer to as "the Conduct Trial," involved the following claims and defenses:

A. Consolidated Issues From *Hynix I*

The *Hynix I* action commenced on August 29, 2000, when Hyundai Electronics Industries **[**13]** Co., Ltd. and Hyundai Electronics America sought a declaratory judgment of noninfringement, invalidity, and unenforceability with respect to the following Rambus patents: U.S. Patents Nos. 5,915,105, 5,953,263, 5,954,804, 5,995,443, 6,032,214, 6,032,215, 6,034,918, 6,035,365, 6,038,195, 6,067,592, and 6,101,152. [3] Hyundai Electronics Industries Co., Ltd. and Hyundai Electronics America amended their complaint on October 17, 2000 to add Hyundai Electronics U.K., Ltd. and Hyundai Electronics Deutschland GmbH as plaintiffs and to add antitrust and other claims against Rambus. In response, Rambus counterclaimed on February 5, 2001 for infringement of the patents listed above. Hynix filed a Second Amended Complaint on June 11, 2001, which added claims against Rambus for fraud and constructive fraud and reflected the intervening change in the names of the Hynix entities. On November 25, 2002, Rambus amended its counterclaim to add infringement of four additional Rambus patents: U.S. Patents Nos. 6,324,120, 6,378,020, 6,426,916, and 6,452,863. On December 16, 2002, Hynix answered the counterclaims and asserted various affirmative defenses.

As discussed, the court held a bench trial in 2005 on Hynix's unclean hands defense. Hynix contended that Rambus spoliated evidence resulting in prejudice to Hynix. The court rejected Hynix's allegations of unclean hands. In the second phase of trial, held in March and April 2006, Rambus elected to assert infringement of certain claims from the '105, '918, '120, '020, '916 and '863 patents. A jury found that the patents-in-suit were not invalid and infringed by Hynix's DDR SDRAM, GDDR SDRAM, DDR SGRAM, DDR2 SDRAM, GDDR2 SDRAM, DDR3 SDRAM, and GDDR3 SDRAM devices, and that a subset of those claims were also infringed by Hynix's SDRAM, SGRAM, and Handy SDRAM products.

As a result of the prior two trial phases and the court's rulings on Rambus's motions for summary adjudication, the following claims and defenses involving Hynix were left for trial in the consolidated Conduct Trial:

---

[2] The Samsung entities - Samsung Electronics Co., Ltd., Samsung Electronics America, Inc., Samsung Semiconductor, Inc., and Samsung Austin Semiconductor, L.P. ("Samsung") - that are parties to Case No. C-05-00334 and C-05-02298 did not assert antitrust claims, did assert some claims that uniquely applied to them and did not make a jury demand. Therefore, the court tried the Samsung claims and defenses in a separate proceeding.

[3] Throughout this order, the court refers to specific **[**14]** patents by the patent's last three digits, i.e., U.S. Patent No. 5,915,105 is referred to as "the '105 patent."

Claim/Defense	Nature	Trier of Fact
First Claim For Relief	Monopolization (15 U.S.C. § 2)	Jury
Second Claim for Relief	Attempted Monopolization (15 U.S.C. § 2)	Jury
Third Claim For Relief	Unfair Competition (Cal. Bus. & Prof. Code § 17200)	Court
Eighth Claim For Relief	Actual Fraud	Jury
Fifth Affirmative Defense	Equitable Estoppel "relating to JEDEC [and] JEDEC's Disclosure Rules"	Court
Sixth Affirmative Defense	Equitable Estoppel based on Rambus's conduct during the course of its RDRAM relationship with Hynix	Court
Seventh Affirmative Defense	Waiver	Court
Ninth Affirmative Defense	Prosecution Laches	Court
Eleventh Affirmative Defense	Unclean Hands (not including spoliation)	Court

[*992]

B. [15] Consolidated Issues From Case No. 05-00334**

The '334 action commenced on January 25, 2005, when Rambus sued Hynix, Infineon, Nanya, and Inotera Memories, Inc. for infringement of the following Rambus patents: U.S. Patent Nos. 6,182,184, 6,260,097, 6,266,285, 6,314,051, 6,324,120, 6,378,020, 6,426,916, 6,452,863, 6,493,789, 6,496,897, 6,546,446, 6,564,281, 6,584,037, 6,697,295, 6,701,446, 6,715,020, 6,781,696, and 6,807,598. Inotera Memories, Inc. and Infineon were later dismissed from the case.

Rambus filed its First Amended Complaint on June 6, 2005, asserting the same patents as the original January 25, 2005 complaint, but adding the Samsung entities as defendants. Hynix answered the First Amended Complaint and counterclaimed on June 27, 2005. It filed a First Amended Answer and First Amended Counterclaims on February 22, 2007. Nanya answered the First Amended Complaint and counterclaimed on July 18, 2005. Nanya filed a First Amended Answer and First Amended Counterclaims on July 9, 2007. The Hynix and Nanya answers and counterclaims assert equitable defenses including prosecution laches, equitable estoppel, waiver, laches, and claims for declaratory judgment, monopolization, attempted **[**16]** monopolization, fraud, and unfair competition (*Cal. Bus. & Prof. Code § 17200*).

In response to Hynix and Nanya's answers and counterclaims, Rambus filed its answer and Counterclaims in Reply on July 9, 2007 and July 24, 2007 respectively. In these Counterclaims in Reply, Rambus added infringement claims against, *inter alia,* DDR3 SDRAM and GDDR4 SDRAM products. On July 30, 2007, Hynix replied to Rambus's Counterclaims in Reply and filed its own Counterclaims in Reply to the Counterclaims in Reply, alleging the same claims and defenses as its First Amended Answer and First Amended Counterclaims had alleged. Rambus replied to Hynix's Counterclaims in Reply on August 20, 2007. On December 21, 2007, Nanya replied to Rambus's Counterclaims in Reply and filed its own Counterclaims in Reply to the Counterclaims in Reply, alleging the same claims and defenses as its First Amended Answer and First Amended Counterclaims had alleged earlier. From these pleadings, the court consolidated for trial the following claims and defenses:

[*993] 1. Hynix's Claims and Defenses in C-05-00334

Hynix's claims and defenses from the '334 action that were tried in the Conduct Trial are:

Claim/Defense	Nature	Trier of Fact
First Counterclaim	Monopolization (15 U.S.C. § 2)	Jury
Second Counterclaim	Attempted Monopolization (15 U.S.C. § 2)	Jury
Third Counterclaim	Unfair Competition (Cal. Bus. & Prof. Code § 17200)	Court
Fourth Counterclaim	Fraud	Jury
Eighth Affirmative Defense	Prosecution Laches	Court
Ninth Affirmative Defense	Estoppel regarding JEDEC	Court
Tenth Affirmative Defense	Estoppel regarding "Other DRAM"	Court
Eleventh Affirmative Defense	Waiver	Court
Twelfth Affirmative Defense	Unclean Hands (not including spoliation)	Court
Thirteenth Affirmative Defense	Laches	Court

2. [**17] Nanya's Claims and Defenses

Nanya's claims and defenses from the '334 action that were tried in the Conduct Trial are:

Claim/Defense	Nature	Trier of Fact
First Counterclaim	Monopolization (15 U.S.C. § 2)	Jury
Second Counterclaim	Attempted Monopolization (15 U.S.C. § 2)	Jury
Third Counterclaim	Unfair Competition (Cal. Bus. & Prof. Code § 17200)	Court
Fourth Counterclaim	Fraud	Court [4]
Seventh Counterclaim	Declaratory Judgment of Unenforceability	Court
Eighth Affirmative Defense	Prosecution Laches	Court
Ninth Affirmative Defense	Estoppel regarding JEDEC	Court
Eleventh Affirmative Defense	Laches	Court
Twelfth Affirmative Defense	Equitable Estoppel	Court

---

[4] Rambus moved *in limine* to prelude presentation of the Manufacturers' fraud claims to a jury because, according to Rambus, the Manufacturers had no evidence that they had suffered damages as the result of the alleged fraud. The court found that Nanya had not offered any evidence of fraud damages but nevertheless let the fraud issue as to Nanya go to the jury for an advisory verdict. Sufficient evidence was offered to support a claim for fraud damages by Hynix and Micron. *Hynix Semiconductor Inc. v. Rambus, Inc., 527 F. Supp. 2d 1084 (N.D. Cal. 2007)*.

Claim/Defense	Nature	Trier of Fact
Thirteenth Affirmative Defense	Waiver	Court
Sixteenth Affirmative Defense	Patent Misuse	Court

[*994]

C. [**18] Consolidated Issues From Case No. 06-00244

The '244 action commenced on January 13, 2006, when Rambus sued Micron for patent infringement. Rambus then filed a Corrected First Amended Complaint on April 18, 2006 alleging infringement of the following Rambus patents: U.S. Patent Nos. 6,182,184, 6,260,097, 6,266,285, 6,314,051, 6,493,789, 6,496,897, 6,546,446, 6,564,281, 6,584,037, 6,697,295, 6,701,446, 6,715,020, 6,781,696, and 6,807,598. Micron answered the Corrected First Amended Complaint and alleged its own Counterclaims on June 2, 2006. It then filed a First Amended Answer and First Amended Counterclaims on May 30, 2007. Micron's answer and counterclaims include equitable defenses of prosecution laches, equitable estoppel, waiver, implied license, promissory estoppel, laches, and claims for declaratory judgment, monopolization, attempted monopolization, fraud, and unfair competition (*Cal. Bus. & Prof. Code §17200*) and fraud. In response to Micron's answers and counterclaims, Rambus filed its answer and Counterclaims in Reply on July 9, 2007. In these Counterclaims in Reply, Rambus added infringement claims against DDR3 SDRAM products. On December 3, 2007, Micron replied to Rambus's **[**19]** Counterclaims in Reply and filed its own Counterclaims in Reply to the Counterclaims in Reply, alleging the same claims and defenses as its First Amended Answer and First Amended Counterclaims had alleged. Rambus answered Micron's Counterclaims in Reply on December 26, 2007.

Micron's claims and defenses from the '244 action that were tried in this phase of the trial of this action are:

Claim/Defense	Nature	Trier of Fact
Fifteenth Counterclaim	Monopolization and Attempted Monopolization (15 U.S.C. § 2)	Jury
Eighteenth Counterclaim	Fraud	Jury
Twenty-first Counterclaim	Unfair Competition (Cal. Bus. & Prof. Code § 17200)	Court
First through Fourteenth Counterclaims	Declaratory Judgments of Unenforceability	Court
Ninth Affirmative Defense	Implied License	Court
Thirteenth Affirmative Defense	Equitable Estoppel	Court
Fourteenth Affirmative Defense	Waiver	Court
Sixteenth Affirmative Defense	Laches	Court

II. FINDINGS OF FACT

The focus of the Conduct Trial was on the disclosure obligation, if any, that Rambus had to JEDEC or its members with respect to possible patent coverage of any DRAM built in accordance with industry standards adopted by JEDEC. The court first makes findings of fact with respect to whether JEDEC members had an **[**20]** expectation that Rambus would disclose any intent it had to seek patent coverage of any standard being proposed at JEDEC. The **[*995]** court then sets forth its factual findings relevant to whether Rambus misled any of the Manufacturers by its conduct at JEDEC. Finally, the court makes findings relevant to whether Rambus misled any Manufacturer by its dealings with that Manufacturer.

A. 1991-1996: Rambus and its Involvement with JEDEC

1. Rambus was founded in 1990 by two professors, Dr. Michael Farmwald and Dr. Mark Horowitz, who had been working together to address the increasing gap between microprocessor performance and DRAM performance. Conduct Trial Transcript at 4079:8-4081:24, 4091:9-4095:10, 5489:23-5490:3 ("Tr. __").

2. On April 18, 1990, Drs. Farmwald and Horowitz filed a patent application, serial number 07/510,898 ("the '898 application") containing numerous claims relating to their efforts to solve this performance gap problem. Exh. 5131.

3. On April 16, 1991, Rambus filed an international patent application pursuant to the Patent Cooperation Treaty (the "PCT application"). Exh. 3583. The PCT application was published on October 31, 1991. The specification contained in the PCT application **[**21]** was identical to that contained in the '898 application and described, according to Rambus, the inventions that are at issue in Rambus's infringement claims. *Id.*

4. Rambus attended its first JEDEC meeting as a guest on December 4-5, 1991. Ex. 3001 at 2. Rambus attended its final JEDEC meeting in December 1995. Tr. 1288:5-9. Rambus formally resigned from JEDEC by letter in June of 1996. Tr. 960:24-961:4.

5. Hynix was found to infringe all the patents Rambus selected to assert in the *Hynix I* trial. None of those patents were applied for until well after Rambus had resigned from JEDEC. Those patents are:

Patent Number	Title	Date of Application	Date of Issue
5,915,105	Integrated Circuit I/O Using a High Performance Bus Interface	11/26/1997	06/22/1999
6,034,918	Method of operating a Memory Having a Variable Data Output Length and a Programmable Register	02/19/1999	03/07/2000
6,324,120 B2	Memory Device Having a Variable Data Output Length	02/08/2001	11/27/2001
6,378,020 B2	System Having Double Data Transfer Rate and Integrated Circuit Therefor	04/10/2000	04/23/2002
6,426,916 B2	Memory Device Having a Variable Data Output Length and a Programmable Register	02/27/2001	07/30/2002
6,452,863 B2	Method of Operating a Memory Device Having a Variable Data Input Length	02/27/2000	09/17/2002

[*996] 6. **[**22]** Rambus's patent infringement claims against Hynix, Nanya and Micron in the '334 and '244 cases have been consolidated for trial but trial has not yet occurred. Not one of the patents Rambus has selected for assertion in the consolidated proceeding was applied for until approximately three-and-one-half years after Rambus resigned from JEDEC. Those patents include the '120, '020, '916, and '863 listed above plus the following:

Patent Number	Title	Date of Application	Date of Issue
6,182,184	Method of Operating a Memory Device Having a Variable Data Input Length	02/22/2000	01/30/2001
6,266,285	Method of Operating a Memory Device Having Write Latency	05/08/2000	07/24/2001
6,314,051	Method of Operating a Memory Device Having Write Latency	07/31/2000	11/06/2001
6,546,446	Synchronous Memory Device Having Automatic Precharge	12/21/2001	04/08/2003
6,584,037	Memory Device Which Samples Data after an Amount of Time Transpires	02/04/2002	06/25/2003
6,751,696	Memory Device Having a Programmable Register	04/13/2001	06/15/2004

B. Background Regarding JEDEC

7. JEDEC is a standards development organization. It develops standards for semiconductor products, including DRAMs. Tr. 444:9-24.

8. JEDEC is a non-profit organization. It formerly existed **[**23]** as part of the Electronic Industry Association (EIA), but it is now an independent organization. Tr. 457:13-458:3; 619:5-621:18. While Rambus was a member of JEDEC, JEDEC operated as part of the EIA.

9. JEDEC has a board of directors. Below the board of directors, JEDEC has approximately 50 committees. *See* Tr. 457:21-460:13.

10. The DRAM standards relevant to this case were developed by one such committee, JC-42.3. *See* Tr. 539:1-11.

11. JEDEC's membership comprises numerous companies involved in industries related to semiconductors. It includes manufacturers like Hynix, Micron, Nanya and Samsung. It also includes users like HP, IBM, Intel and Sun. Tr. 446:5-446:25.

12. The JC-42.3 committee met about four to seven times a year. Meetings typically revolved around presentations made by committee members, which triggered discussions about the technology or feature that was the subject of the presentation. *See* Tr. 460:14-462:13. Meetings also included balloting during which members voted (2/3 majority required) on the contents of the standard being developed. Tr. 463:21-464:9.

13. JEDEC typically prepared minutes for all of its committee meetings. The minutes covered the "highlights" of activity **[**24]** at the meetings and are distributed to every member. Tr. 464:10-24. The minutes strived to reflect the "key decisions" and to "note presentations." *Id.* After a meeting, the minutes were distributed to every member. Tr. 464:21-24. A meeting's minutes were normally approved at the next committee meeting. *See, e.g.,* **[*997]** Ex. 3005 at 4 (agenda item immediately following introductions was corrections and approval of prior meeting minutes). The fidelity of the minutes is significant because on various topics the minutes disagree with the trial testimony of various witnesses. Given that approximately fifteen years have elapsed and the natural biases of many of the

witnesses, the court finds that the minutes are a more trustworthy source of evidence regarding what happened at JC-42.3's meetings than most of the witness testimony.

C. JEDEC's Patent Policy - JEDEC's Manuals

14. When asked whether JEDEC had a "big rule book," Desi Rhoden - a JEDEC board member and paid expert witness of the Manufacturers - responded, "Not really. Engineers wouldn't read it anyway, I suppose." Tr. 479:25-480:2. [5]

15. Nonetheless, a few manuals existed. When Rambus joined JEDEC in 1991, JEDEC Manual of Organization and Procedure 21-H was in effect. Tr. 595:22-596:5; Ex. 6769. Manual 21-H lacks any rules or guidelines regarding disclosure of patent rights. *See* Ex. 6769.

16. Thus, while Manual 21-H was in effect, any written patent policy applicable to JEDEC trickled down from EIA's rules. *See* Tr. 620:8-622:9. For example, at Richard Crisp's first JEDEC meeting, the minutes reflect that JC-42.3 chairman Jim Townsend presented "the EIA patent policies." Ex. 3002 at 5; Tr. 1039:8-1040:6. The "patent policy," section 3.4 of the EIA Style Manual from August 1990, shown to the attendees was:

> Avoid requirements in EIA standards that call for the exclusive use of a patented item or process. No program standardization shall refer to a patented item or process unless **[**26]** all of the technical information covered by the patent is known to the formulating committee or working group, and the committee chairman has received a written expression from the patent holder that one of the following conditions prevails:
> (1) a license shall be made available without charge to applicants desiring to utilize the patent for the purpose of implementing this standard, or
> (2) a license shall be made available to applicants under reasonable terms and conditions that are demonstrably free of any unfair discrimination.
>
> Ex. 3002 at 28; *see* Tr. 1040:7-1041:15.

17. The EIA patent policy shown at the February 1992 JC-42.3 meeting says nothing about patent applications. It says nothing about a member's intentions to file for patent coverage. It is unclear whether or how it imposes a duty on members of JEDEC to disclose issued patents, but it does require JEDEC not to include patented items or processes in a standard unless certain licensing conditions pertain.

[*998] 18. At the September 1993 JC-42.3 meeting, the attendees saw a different patent policy presented. Tr. 506:10-507:16; 509:10-510:6; Ex. 3214 at 10. This "EIA/JEDEC PATENT POLICY SUMMARY" read as follows:

> Standards that call for **[**27]** the use of a patented item or process may not be considered by a JEDEC committee unless all of the relevant technical information covered by the patent *or pending patent* is known to the committee, subcommittee, or working group. In addition, the committee Chairperson must have received written notice from the patent holder *or applicant* that one of the following conditions prevails:
> (1) a license shall be made available without charge to applicants desiring to utilize the patent for the purpose of implementing this standard(s), or
> (2) a license shall be made available to applicants under reasonable terms and conditions that are demonstrably free of any unfair discrimination
>
> Ex. 3214 at 12 (emphasis added to note substantive changes); see Tr. 509:10-15. At page 3 of the minutes, this attachment is described as "the policies." Ex. 3214 at 3. On the actual attachment, the policy is clearly

---

[5] On cross-examination, Mr. Rhoden wavered, testifying that JEDEC's patent policy was "written down." Tr. 627:25-628:20. **[**25]** Mr. Rhoden then backed off, suggesting he believed that he understood JEDEC's patent policy more as something that was explained at meetings to the engineers present. *Id.* 628:22-25. Incidents like this one, and other conflicts in his testimony described below, as well as an obvious pro-JEDEC, anti-Rambus bias, undermined Mr. Rhoden's credibility.

marked "JEDEC Manual No. 21-I (Draft 3.1)." Ex. 3214 at 12. It also states "This material is a proposed revision of Std. 21-H and has not been approved by JEDEC." *Id.*

19. Unlike the EIA policies previously shown at JC-42.3 meetings, this policy mentions patent applications but still does not mention "intentions" **[**28]** to file patent applications. The policy remains focused on the work of the committee and whether it may approve standards including patented technology. The policy does not clearly explain any disclosure mechanism.

20. The "final" version of Manual 21-I contains language that is much more detailed than the draft summary shown in September 1993. The version of Manual 21-I in evidence contains three provisions touching on patent disclosure, section 9.3, 9.3.1, and 9.3.2. *See* Ex. 3215, 19-20; Tr. 517:14-22 (admitting exhibit 3215).

21. The pertinent portion of section 9.3, titled "Reference to Patented Products in EIA Standards," reads as follows:

> EIA and JEDEC standard and nonproduct registration (e.g., package outline drawings) that require the use of patented items should be considered with great care. While there is no restriction against drafting a proposed standard in terms that include the use of a patented item ** if technical reasons justify the inclusion, committees should ensure that no program of standardization shall refer to a product on which there is a known patent unless all the relevant technical information covered by the patent is known to the formulating committee [sic] **[**29]** subcommittee, or working group. If the committee determines that the standard requires the use of patented items, then the committee chairperson must receive a written assurance from the organization holding the rights to such patents that a license will be made available without compensation to applicants desiring to implement the standard, or written assurance that a license will be made available to all applicants under reasonable terms and conditions that are demonstrably free if any unfair discrimination.
> . . .
>
> ** For the purpose of this policy, the word "patented" also includes items and **[*999]** processes for which a patent has been applied and may be pending.

22. The pertinent portion of section 9.3.1, titled "Committee Responsibility Concerning Intellectual Property," reads as follows:

> The Chairperson of any JEDEC committee, subcommittee, or working group must call to the attention of all those present the requirements contained in the EIA Legal Guides, and call attention to the obligation of all participants to inform the meeting of any knowledge they may have of any patents, or pending patents, that might be involved in the work they are undertaking. Appendix E (Legal Guidelines Summary) **[**30]** provides copies of viewgraphs that should be used at the beginning of the meeting to satisfy this requirement. Additionally, all participants must be asked to read the statement on the back of each EIA Sign-in/Attendance Roster. . . .

23. Section 9.3.2, "Policy Statements on EIA/JEDEC Sign-in/Attendance Rosters," states that "[t]he policy statements reproduced on the reverse side of EIA/JEDEC Sign-in/Attendance Rosters shall become an integral part of all Committee and working group meetings' minutes, and a statement shall be included in the minutes indicating compliance with the foregoing policy."

24. Finally, Appendix E includes the sample viewgraph that was intended to convey the patent policies to committee meeting attendees. Ex. 3215 at 27. The sample viewgraph is substantially similar to the one shown at the September 1993 meeting and reproduced above in paragraph 18. The sample viewgraph does not mention section 9.3.1's "obligation of all participants to inform the meeting of any knowledge they may have of any patents, or pending patents, that might be involved in the work they are undertaking."

25. It is not clear when or whether JEDEC Manual 21-I was approved. The admitted version **[**31]** of manual 21-I bears the date "October 1993." *See* Ex. 3215 at 1. Mr. Rhoden believed that the seals and appearance of the manual confirm that it was approved by JEDEC by October 1993. Tr. 767:4-768:1. On the other hand, testimony from John Kelly, the president of JEDEC and general counsel to EIA in 2001, suggested that manual 21-I was

never properly approved by the appropriate governing body. *See* Tr. 5168:24-5169:22l; Docket No. 3573 (Mar. 19, 2008) (lodged video testimony of John Kelly played at trial).

26. It is also not clear when or how JEDEC Manual 21-I was distributed to JEDEC members. Rambus's JEDEC representative Richard Crisp did not receive a copy of Manual 21-I until the middle of 1995, and he received it only after making a special request for "some rules" because "[he] was considering making a proposal for standardization." Tr. 1083:14-1084:8.

27. Putting aside whether Manual 21-I was ever officially approved, it appears to have guided JEDEC's activities throughout the remaining period of Rambus's attendance, at least in name. Tr. 771:13-772:5. For example, the minutes from the JC-42.3 committee meeting of September 1994 conclude with the prominent statement "THIS MEETING **[**32]** WAS CONDUCTED IN ACCORDANCE WITH EIA **[*1000]** LEGAL GUIDES AND THE JEDEC MANUAL OF ORGANIZATION AND PROCEDURE 21-I." Ex. 3005 at 13; Tr. 611:3-14; 1208:10-20 (admitting exhibit into evidence). On the other hand, the "patent policies" presented by the chairman, Jim Townsend, and included as attachment A to the minutes of the September 1994 meeting, continue to recite the EIA policy from 1990 discussed above and attached to the 1992 minutes. *See* Ex. 3005 at 14; Tr. 611:21-612:10. Attachment A does not include the viewgraph purportedly required by Manual 21-I. It does not mention an obligation by members to disclose anything.

28. Whichever official manual governed JEDEC's conduct, it is clear from the testimony of the secretary of JC-42 Kenneth McGhee and the manuals in evidence that no written policy ever required a JEDEC member to "reveal its intention . . . to file patent applications in the future." Docket No. 3551 (Mar. 17, 2008) (lodged video testimony of Kenneth McGhee played at trial).

D. JEDEC's Patent Policy - JEDEC's Sign-in Sheets

29. Mr. Rhoden also testified at length about the sign-in sheets used at JC-42.3 meetings. *See* Tr. 520:17-522:6; Ex. 3233. According to Mr. Rhoden, JEDEC's **[**33]** patent policies were "very important" and the sign-in sheets "ma[de] sure that nobody can forget it." Tr. 521:17-21. To that end, the sign-in sheet included on its backside language about JEDEC's patent policies. Tr. 521:23-522:6.

30. The sample sign-in sheet reproduces what, at first glance, appears to be section 9.3 of Manual 21-I. *Compare* Ex. 3233 at 2 *with* Ex. 3215 at 19. Upon inspection, an important difference emerges. The sample sign-in sheet refers only to a "patented item." It does not mention anything about features covered by pending applications. The sample sign-in sheet also lacks any language resembling section 9.3.1 of Manual 21-I. The sign-in sheet says nothing about any obligation to disclose any known patents or applications. It speaks only of using "great care" in considering whether to use a patented feature in a standard and of the obligation of the committee chairperson to ensure that no standard include a patented feature unless assurances have been made.

31. Notably, the sign-in sheet includes other reminders aimed at ensuring JEDEC's and its members' compliance with the antitrust laws. Among those provisions is the reminder that "the exchange of company information **[**34]** relating to future plans affecting the design, research and development, production, and distribution or marketing of products" is improper. Ex. 3233 at 2; *see* Tr. 623:8-627:24. From the evidence presented at trial, a JEDEC member did not have guidance and would probably not understand, at least from any information acquired from JEDEC, how a JEDEC member could safely comply with both (a) the purported duty requiring a member to disclose its "intentions" to file a patent application as advocated by the Manufacturers and (b) the duty *not* to disclose a company's future plans relating to the research and development of products given the intertwined nature **[*1001]** of conducting research and preparing a patent application.

32. By contrast to Mr. Rhoden's testimony that JEDEC's patent policies were "very important" and that the sign-in sheets were used to "make sure that nobody can forget it," Micron's Terry Lee (a JEDEC representative) explained the flaws in the sign-in process: "[T]he way the sign-in process worked is they would just pass around a stapled form and you'd check your name off, or you'd sign your name on. And if I was out of my seat at the time, I would

sign in. But sometimes you **[**35]** were out of the room talking or checking in or out of the hotel." Tr. 3169:10-22. This process explains why Mr. Lee "usually" but "not always" signed in at meetings. Tr. 3169:10-15. Based on Mr. Lee's testimony, it is doubtful that many JEDEC representatives read the EIA patent policy on the reverse side of the sign-in sheet or that it meaningfully informed their expectations.

E. JEDEC's Patent Policy - JEDEC's Ballots

33. In addition to sign-in sheets, Mr. Rhoden testified that JEDEC's ballots were "another expression of the importance that JEDEC placed upon disclosure of [intellectual property]." Tr. 524:1-4. The Manufacturers submitted a ballot from June 1992 as a sample of the "ballot form used at JEDEC at or about [1992]." *Id.* 522:12-523:3; Ex. 3613.

34. The Manufacturers did not submit ballot forms from the 1993-1996 period, leading the court to infer that JEDEC did not change the ballot forms with respect to patent disclosure during that time period.

35. The 1992 ballot form states: "If anyone receiving this ballot is aware of patents involving this ballot, please alert the committee accordingly during your voting response." Ex. 3613 at 2; Tr. 522:17-25. The ballot form does *not* **[**36]** state that anyone receiving the ballot must disclose patent applications or intentions to file applications of which the recipient is aware.

36. Rambus's JEDEC representatives received ballots instructing them to disclose such patents. Tr. 524:5-9.

37. When asked whether Rambus "actually voted in any of the elections that they . . .were presented ballots for," Mr. Rhoden testified: "Yes. They, they voted quite often, actually. I counted the ballots. That's how I know." Tr. 524:10-25. He further testified: "The chairman - the person that's actually doing the, the distribution of the ballots is the person that winds up counting them. So in this case, it was associated with SDRAM, and I was the one who actually counted the ballots. So, yes, I counted their ballots many times." *Id.*

38. To the extent Mr. Rhoden's testimony suggests that Rambus voted at more than one meeting, it is misleading. On the contrary, the unrebutted evidence of Rambus's voting record presented at trial is as follows. Rambus voted at only one meeting. Tr. 1003:23-1004:6. The ballots concerned four technologies that the committee was considering to be included in SDRAM. *Id.* Rambus's representative at the time, Richard **[**37]** Crisp, voted "no" as to each technology. *Id.;* Tr. 1154:23-25; Tr. 1383:12-18. The **[*1002]** technologies on the ballot included programmable CAS latency and programmable burst length. *See* Ex. 3613 at 3.

39. After Rambus voted "no," Hitachi's representative Farhad Tabrizi criticized Rambus for its vote. Tr. 1385:7-23 (Crisp); Tr. 3780:9-13 (Tabrizi). Mr. Tabrizi explained that his criticism was based on his opinion that Rambus's "no" vote was intended to delay the standardization of SDRAM. Tr. 3780:9-3782:16. While Mr. Tabrizi initially testified that he made this criticism privately, Tr. 3780:20-3781:1, his refreshed recollection was that he criticized Rambus in front of many other JEDEC members and that the rest of the committee agreed with his criticism of Rambus, Tr. 3782:8-16.

40. Following this incident, Mr. Crisp's superior Dave Mooring instructed him not to vote at JEDEC meetings. Rambus (through Mr. Crisp) never voted again. Tr. 1385:24-1386:9.

F. JEDEC's Patent Policy - Other Minutes' Records of the Patent Policy Presentations

41. As discussed above, the JC 42.3 committee meeting minutes from February 1992 attached EIA's policy referring to the use of features covered by issued patents. **[**38]** The September 1993 minutes attached a draft of the "policy summary" of Manual 21-I that suggested that standards should not include features covered by pending patents. The September 1994 minutes state that Manual 21-I governed the conduct of the meeting, but attached the old EIA guidelines that do not mention pending patents.

42. The minutes from the September 11, 1995 meeting include the familiar 1990 EIA policy (seen in the February 1992 and September 1994 minutes) regarding the use of features covered by issued patents. Ex. 3224 at 20; Tr. 1107-20-1109:5 (admitting the exhibit into evidence). The attachment of the "patent policy" does not include the 21-I viewgraph mentioning applications. The minutes include no other "patent policy."

43. The attachment from the September 1995 meeting lays out the following procedure:

- Show JEDEC Patent Policy at each Task Group and Committee meeting.
- Include JEDEC Policy in each committee's official minutes.
- Request Presentation Sponsors to state their Company's patent position.
- Continue to ask for ballot response forms to indicate patent position.
- Submit proposed ballot items known to have patents to EIA Legal Counsel.

- Review items identified **[**39]** as of potential patent interest at each meeting, and resolve patent status prior to (choose one):
  - A. Presentation
  - B. Approval to go to Ballot
  - C. Ballot Approval
  - D. Ballot Submission to Council
  - E. Ballot Approval by Council

Ex. 3224 at 20. An identical "procedure" appears in the attachment to the September 1994 minutes. *See* Ex. 3005 at 14.

44. This procedure - in use long after the purported adoption of Manual 21-I - "request[ed] *presentation sponsors* to state their Company's patent position." Such a requirement **[*1003]** accords well with principles of equitable estoppel - that a JEDEC member could rely on the assumption that if a sponsor advocated a particular standard the sponsor's company did not have and had not applied for patent coverage on the standard. A reasonable inference, however, is that members other than presentation sponsors were not expected to disclose any knowledge they possessed of patents, patent applications, or intentions to file patent applications anytime such materials related to the work of the committee. Also curious is the procedure's repeated reference to a need to "*continue* to ask for ballot response forms to indicate patent position." The sensible inference from this **[**40]** bullet point in the patent policy procedure is that members of JC-42.3 *repeatedly* failed to disclose patent positions on ballots, despite the wording on the ballots. Such repeated failure does not reconcile with Mr. Rhoden's belief that JEDEC members shared a broad disclosure expectation.

45. Before every JC-42.3 meeting, JEDEC held a plenary session for all of the JC-42 committees. Tr. 3839:16-25. At the December 9, 1996 JC-42 plenary session (i.e., shortly after Rambus's resignation), the combined committees went over the "EIA/JEDEC patent policies" and attached them. Ex. 8307 at 4; Tr. 3838:23-3839:4 (admitting pages 1, 4 and 10 of Ex. 8307). Page 10 of the minutes show the "patent policy." Tr. 3840:21-3841:3. The attached "patent policy" is an updated (1995) version of the EIA rule urging the committee to "avoid requirements in EIA Standards that call for use of a patented item or process." Ex. 8307 at 10. No mention of patent applications appears in the attachment. *See id.* No mention of disclosure obligations appears in the attachment. *See id.* The same 5-step procedure discussed above also appears in the December 1996 plenary session minutes. *Id.*

46. In 1997 in correspondence between **[**41]** Hynix's Farhad Tabrizi and JEDEC, Mr. Tabrizi asked for "a copy of the JEDEC patent laws or part of the JEDEC bylaws that deals with patent and patent disclosure and licensing." Jim Townsend wrote back: "[T]hat is in every set of minutes- we shgow [sic] it at the plenary session each time. The exact p[aragraphs [sic] are cited and reproduced as part of the cover material." Ex. 6293; Tr. 3835:10-3838:5. Mr. Tabrizi understood Mr. Townsend to be telling him that if Mr. Tabrizi consulted the minutes, he would find the patent policy. Tr. 3838:2-5.

47. Minutes from other JC-42.3 meetings following the 21-I policy were authenticated, e.g., December 1994 (Ex. 3491), March 1995 (Ex. 3492), May 1995 (Ex. 3033), January 1996 (Ex. 3070), and March 1996 (Ex. 3080). Tr.

1301:17-1304:5. Most of these exhibits were never received into evidence, and the pages of the exhibits that were eventually received did not relate to patent policies.

G. JEDEC's Patent Policy - Patent Tracking List

48. A prominent feature of the committee's minutes was Jim Townsend's "patent tracking list." According to Desi Rhoden, the list kept track of everything "that has been disclosed **[*1004]** inside the committee so we can make appropriate **[**42]** decisions as we're moving forward on the standards." Tr. 471:21-473:13.

49. Jim Townsend introduced the patent tracking list at JC-42.3's meeting in December of 1991 (Rambus's first meeting). *See* Ex. 3003 at 11. The minutes reflect that Texas Instruments (TI) "asked what the purpose of the list was." *Id.* The minutes note the response: "The purpose was only to track and identify patented items of Committee proposals. Companies who hold patents identified can respond to Committee, *if they wish.*" *Id.* (emphasis added).

50. When confronted with the minutes' statement that members could respond to the patent tracking list "if they wish," Mr. Rhoden testified "well, they - they - perhaps the wording is not right. But they are required to disclose. They were required to disclose at this time. So the - they can respond if they wish, but it was - it's not optional." Tr. 637:17-22. Mr. Rhoden previously testified that the minutes reflect the "highlights" and "key decisions" of meetings. He conceded that no one corrected the minutes to reflect the "not optional" nature of patent disclosure in 1991. *Id.* 637:23-638:8.

51. The patent tracking list from the September 1993 meeting was admitted into evidence **[**43]** and discussed. *See* Tr. 471:13-474:22; Ex. 3005 at 16-18. The entries listed the "patent number," holder, subject matter or feature, the source of the information, and the committee whose work the patent involved. Ex. 3005 at 16-18. A portion of the September 1993 tracking list is reproduced below:

__Patent Issues to Track__

Patent Number	**Holder**	**Subject**	**Source**	**Status**
3,771,145	P. Weiner	ROM Addressing	Toshiba	JC42.3
7	AMD	Slew Rate-CTT	Ramtron	JC42.3
		Negative GTL	AT&T	JC16
Japan?	AMP	Small Outline SIMM	AMP	JC42.5
(3)	AMP	SIMM SOCKETS	AMP	JC42.5
4,851,834	DEC	3-Port VRAM	DEC	JC42.3
	Foxconn	card polarization	Foxconn	JC42.5
pending	Fujitsu	VSMP	Fujitsu	JC42.3
	Gould	ZIP-SIP	HP	JC42.5
4,811,299	Hitachi	WCBR	Hyundei	JC42.3
pending	Hitachi	ST-ZIP Package	Hitachi	JC42.5
Further Study	Hitachi?	Addressing with Redundant Address	IBM	JC42.3
4,928,265	Hitachi	SDRAM	Toshiba	JC42.3
5,083,296	Hitachi	SDRAM	Toshiba	JC42.3
4,984,214	IBM	Half SAM	IBM	JC42.3
pending	IBM	8 byte SIMM	IBM	JC42.5
	IBM?	BGA	Toshiba	JC42.3
5,126,975	IDTI	Burst Mode	Unisys	JC42.3

[*1005]

52. A few aspects of the list deserve attention. First, the entire list runs three pages and contains sixty entries. Three of the entries (all included in the excerpt shown above) are "pending," i.e., patent applications. In other words, the patent **[**44]** tracking list reflects that as of September 1993 there had been only three instances of a JEDEC representative disclosing a pending patent application that related to the work of the committee.

53. Approximately one-third of the entries on the list reflect a "source" that is different than the "holder." In other words, a substantial portion of the "patent issues to track" were not voluntarily disclosed but first raised by others. This explains why the patent tracking list was referred to as "the squealer's list" among the members of JC-42.3. Tr. 4707:17-4708:9 (testimony of Alan Grossmeier, Cray's JEDEC representative).

54. The last patent tracking list in evidence comes from JC 42's plenary session from December 1996. *See* Ex. 8307 at 11-12; Tr. 8341:4-17 (admitting pages 11 and 12). For comparison, the same portion of the list is reproduced below:

[*1006] Patent Issues to Track

Patent Number	**Holder**	**Subject**	**Source**	**Status**
1,771,145	P. Weiner	ROM Addressing	Toshiba	JC42.1
	AMD	Slew Rate-CTT	Ramtron	JC42.3
		Negative GTL	AT&T	JC16
5,383,792	AMP	SO SIMM Socket	AMP	JC42.5
431	AMP	SIMM SOCKETS	AMP	JC42.5
4,649,372	AT&T	EDO		JC42.3
4,851,834	DEC	3-Port VRAM	DEC	JC42.3
	Foxconn	card polarization	Foxconn	JC42.5
pending	Fujitsu	VSMP	Fujitsu	JC42.1
	Gould	ZIP-SIP	HP	JC42.5
4,811,299	Hitachi	WCBR	Hyundai	JC42.3
pending	Hitachi	ST-ZIP Package	Hitachi	JC42.5
Further Study	Hitachi?	Addressing with Redundant Address	IBM	JC42.3
4,928,265	Hitachi	SDRAM	Toshiba	JC42.3
5,083,296	Hitachi	SDRAM	Toshiba	JC42.3
5,396,102	Hitachi	DRAM offset on SIMM		JC42.3
pending	Hitachi	SSTL	Hitachi	16/42.3
4,984,214	IBM	Half SAM	IBM	JC42.3
pending	IBM	8 byte SIMM	IBM	JC42.5
	IBM?	BGA	Toshiba	JC42.3
	IBM	FPM/MDO/SD DIMM COMPAC	Micron	JC42.3
5,513,135	IBM	SDRAM DIMM	IBM	JC42.3
5,126,975	IDTI	Burst Mode	Unisys	JC42.3

55. **[**45]** The list is notable for its similarities. The three previously disclosed "pending" patent applications remain pending, over three years later. The Hitachi matter that required "further study" in September of 1993 continued to require "further study" at the end of 1996.

56. In total, the tracking list as of December 1996 comprised 84 entries. In addition to three prior "pending" disclosures (all of which remained "pending"), the list identified two further disclosures of "pending" applications related to a feature.

57. In other words, over the span of two years (implying at least eight meetings of JC-42), the committee had identified 24 new patent issues to track, or approximately 3 per meeting. At each meeting of JC 42's various committees, Desi Rhoden believed that "fifty or one hundred [presentations] would not be **[*1007]** uncommon." Tr. 463:6-11. Based on Mr. Rhoden's approximation and the two patent tracking lists, the court estimates that roughly (and generously) 1 in 15 presentations about a feature or technology at JEDEC also included a disclosure of a "patent issue." *Compare with* Tr. 552:2-22 (Rhoden testimony about how disclosures happened at presentations).

58. The December 1996 list **[**46]** reflects no disclosures of Hyundai (now Hynix) intellectual property. The list reflects two disclosures of Micron intellectual property, both of which were on the September 1993 list. The list reflects no disclosures of VLSI (Desi Rhoden's employer) intellectual property. In other words, trial witnesses Farhad Tabrizi, Terry Lee, and Desi Rhoden made no disclosures of their companies' intellectual property between 1993 and 1996.

59. In its June 1996 resignation letter, Rambus identified a number of patents. JEDEC did not add any of those patents to the December 1996 patent tracking list. *Compare* Ex. 3120 at 2 *with* Ex. 8307 at 11-12.

60. As seen on both of the patent tracking list excerpts reproduced above, Toshiba suggested by September of 1993 that IBM might have intellectual property rights to "BGA" or "ball grid array." This confrontation produced substantial testimony at trial about how the patent tracking list and any JEDEC disclosure duty functioned in practice, *e.g.,* Tr. 644:14-654:5.

61. Following Toshiba's disclosure, IBM's representative, Gordon Kelley, responded regarding the BGA feature with an August 31, 1993 fax to JC-42.3 chairman Jim Townsend and JC-42.3 secretary Ken **[**47]** McGhee. *See* Ex. 6092. The subject of the fax was "BGA Patent/License Rights" and read:

> Jim: IBM Intellectual Property Law attorney's [sic] have informed me that we will not use JEDEC as a forum for discussing this subject. It is the responsibility of the producer to evaluate the subject and to workout [sic] the proper use of rights. So, I can not confirm or deny any [intellectual property law] rights,
> Gordon Kelley
> IBM Member JC-42.3

62. Mr. Kelley testified that he believed that his response complied with his understanding of any disclosure duty. He explained that he further investigated the subject of whether IBM had patents to ball grid arrays, and his investigation uncovered 5,000 (five thousand) such patents held by IBM and relating to ball grid arrays. He "looked at the first 200 to 300 of those patents" and determined that those patents did not apply to the standard under consideration and that he told this to the JC-42.3 committee following the fax. Tr. 3605:12-3608:9; *see also* Docket No. 3508 (lodged Kelley video testimony).

63. The December 1993 JC-42.3 meeting also involved "lots of patent issues" (related to TI) and more involvement by Gordon Kelley. Tr. 654:6-656:5. The minutes **[**48]** state that "[a]s a side issue, IBM noted that in the future they will not come to the Committee with a list of applicable patents on standards proposals. It is up to the user of **[*1008]** the standard to discover which patents apply." Ex. 6098 at 8.

64. Mr. Rhoden testified that with both BGA and this December 1993 disclosure, Mr. Kelley actually said to the committee that IBM would not search their patent database. This did not bother Mr. Rhoden because he understood JEDEC's policy to be that if a member does not disclose a patent, that member could not enforce the patent against the standard. Thus, Mr. Rhoden felt that IBM's declination was "no harm, no foul." Tr. 656:6-658:4. Mr. Rhoden's testimony on this point is not credible because the actual documents - the minutes and the August fax - are inconsistent with the theory that IBM did not intend to assert its BGA, or other, patents. They are also inconsistent with Mr. Kelley's "promise" to the committee that he would "give you all of the information that I am aware of as the member for IBM, but I cannot promise to give you all of the tens of thousands of patents that are created annually by IBM Corporation." Docket No. 3508 (lodged Kelley **[**49]** video testimony).

65. Gordon Kelley also testified that he disclosed more patents and patent applications than ended up on the patent tracking list. *See* Tr. 3627:9-21. Mr. Kelley admitted that he made no effort to correct the minutes to reflect such

additional disclosures. *Id.* 3627:22-3628:9. To the extent Mr. Kelley did make disclosures on IBM's behalf that do not appear on the patent tracking list, it appears that Mr. Kelley would have made those disclosures in conflict with directions he received from IBM's lawyers. *See id.* 3628:10-3629:3. This might explain Mr. Kelley's failure to correct the minutes, but raises the possibility that JEDEC representatives like Mr. Kelley deliberately disobeyed their principals' instructions in favor of JEDEC. Furthermore, his testimony calls into question the accuracy of the minutes and their trustworthiness. In short, if the testimony is true, it implies that JEDEC's records are deliberately incomplete and that some JEDEC representatives acted in JEDEC's interests at the expense of their principals'. This is a plausible interpretation of the evidence, but the court is more inclined to believe that Mr. Kelley's memory about additional disclosures **[**50]** was incorrect, that the patent tracking list is accurate, and that JEDEC representatives like Mr. Kelley did not act at cross-purposes to their lawyers. The court therefore declines to credit the testimony that additional disclosures were made that were not reflected on the list.

66. Mr. Rhoden testified that the patent tracking list helped the committee "make appropriate decisions as we're moving forward on the standards." After a critical analysis of the patent tracking lists in evidence, how the lists were updated, and how many entries there are, the court draws three conclusions. First, if any disclosure duty within JEDEC was as broad as suggested, the patent tracking list should have been substantially longer. Second, the gaps and failures to follow up on "?" entries on the list suggest that JEDEC's members did not consider tracking patent issues to be terribly important. Third, the JEDEC disclosure duty advocated by the Manufacturers could not **[*1009]** have possibly accomplished the purported goal of creating an "open standard" because the alleged duty was limited to the knowledge (and potential willful ignorance) of JEDEC's member representatives. Because it would have been ineffectual, **[**51]** it is less likely the disclosure duty advocated by the Manufacturers existed.

H. JC-42.3 Committee Members' Expectations and Recollections

67. Desi Rhoden testified that his understanding of JEDEC's patent disclosure policy was: "JEDEC members are required to disclose anything in the patent process for which they have knowledge that's relevant to or involving work for JEDEC." Tr. 481:15-19; *see id.* 473:4-13; 510:7-22. He believed such disclosures had to be made "as early as possible whenever presentations are made." *Id.* 552:23-553:8. He summarized it as "early and often" and testified that disclosures had to be repeated. *Id.* 553:9-13.

68. Richard Crisp, Rambus's representative, believed that he should disclose any patents or pending patents that he thought related to a feature if he proposed that feature, but that he also had the impression that any disclosure was voluntary. Tr. 1368:7-13; 1400:12-1401:16.

69. Richard Crisp's contemporaneous documents from his time as a JEDEC representative support the prevailing confusion about the scope of any duty. *See* Tr. 1057:22-1059:22; Ex. 3030. Exhibit 3030, an email of Mr. Crisp's reporting on a December 1992 JEDEC meeting, indicated that a patent **[**52]** lawyer from Bronson, Bronson, & McKinnon had come to speak to the committee and that the lawyer was unclear on what JEDEC required its members to disclose and that it would be "inadvisable" to require the disclosure of patent applications. Ex. 3030.

70. Alan Grossmeier was Cray's representative at JC-42.3 meetings from 1989 through 2000. Tr. 4704:14-4705:3. There was no indication that Mr. Grossmeier was biased in favor of either Rambus or the Manufacturers. On the other hand, Mr. Grossmeier conceded that "patent issues were not necessarily the priority for [him]" and that others at JEDEC were more interested in the requirements of the patent policy. *Id.* 4710:8-15. Taken as a whole, the court found Mr. Grossmeier's testimony credible.

71. Mr. Grossmeier recalled Jim Townsend's presentations differently than Desi Rhoden: "Typically he would flash these slides, usually not long enough to read them. He would just kind of, these are the JEDEC patent policy and don't worry about reading them. They will be in the minutes. He would flash the, the first couple slides and then he had a tracking list of, it was humorously referred to as the squealer's list, basically." *Id.* 4707:9-20.

72. Mr. Grossmeier **[**53]** recalled that Mr. Townsend presented EIA's patent policy and that JEDEC was governed by EIA's patent policy. Tr. 4708:18-4709:1. He did not recall "any formal documentation" of the patent policies and "[his] interpretation was based more on how the committee members themselves handled it." *Id.* 4709:2-11.

[*1010] 73. Mr. Grossmeier believed that JEDEC required sponsors presenting features to disclose patents and that the rules were otherwise vague about disclosing issued patents. Tr. 4709:12-4709:25. He was adamant that patent applications did *not* have to be disclosed. *Id.* 4710:1-7 ("They were not. They were not. No, I did not expect that someone would [disclose applications].").

74. Gordon Kelley of IBM testified that he understood the JEDEC disclosure duty to require members to disclose patents and patent applications of which the member was aware that would be required for use of the patented feature. Tr. 3602:13-3603:3. He felt the need to be clear though that any duty was limited to the JEDEC representative's personal knowledge; he was not willing "to crawl through 5,000 patents" held by IBM. Docket No. 3508 (Mar. 11, 2008) (lodged video testimony of Gordon Kelley); Tr. 3620:12-16.

75. The **[**54]** Manufacturers also presented expert testimony from Graham Allan, an engineer who attended JC-42.3 meetings and was "very active" in setting the SDRAM, DDR, and DDR2 standards. Tr. 2578:10-2580:22. Mr. Allan represented Mosaid, a "third party designer" that does not build DRAMs; rather, Mosaid designs memory schematics for other people. *See id.* 2578:4-9; 2578:15-2579:1. Despite Mr. Allan's intimate involvement with JEDEC, the Manufacturers explicitly declined to ask him about his expectations and understanding of any disclosure duties. *See id.* 2581:12-21. Although the Manufacturers had their reasons for not asking Mr. Allan such questions, the court infers that had Mr. Allan testified on this topic, his testimony would not have supported the broad disclosure duty urged by the Manufacturers. [6]

76. Hynix's JEDEC representative, Farhad Tabrizi, testified that his understanding of the JEDEC disclosure duty was: "The policy was you have to disclose anything that you know about your intention of patent, patent application, your intention of filing. If you don't disclose, you cannot collect later." Tr. 3722:25-3724:1. Squaring Mr. Tabrizi's testimony about his memory of the disclosure duty with his 1997 email **[**56]** requesting copies of "the JEDEC patent laws or part of the JEDEC bylaws that deals with patent and patent disclosure and licensing" **[*1011]** is somewhat difficult. Mr. Tabrizi's testimony supports a broad disclosure duty based on expectations, but his writing in 1997 suggested that he (a) did not know where to find JEDEC's rules regarding patent disclosure, and (b) believed that such rules would be written down. Further, his intense bias against Rambus may have colored his testimony.

77. Micron's JEDEC representative, Terry Lee, also testified about the JEDEC disclosure duty from 1994 to 1996. *See* Tr. 3242:17-3243:25. His testimony corroborated Mr. Grossmerier's that the committee chairman Jim Townsend would take a transparency and "stick one down on the overhead and say this is the patent policy." *Id.* 3243:12-18. He described Mr. Townsend as a "colorful character" and that sometimes people would ask him questions about the policy and "Jim would usually answer them." *Id.* 3243:15-21. Mr. Lee remembered the disclosure duty as: "a requirement to disclose any patents or patent pending that may relate to the work of the committee. And the committee had the responsibility to avoid the use of the patents **[**57]** in the standard. And in

---

[6] The Manufacturers took this approach to avoid opening the door to evidence about Micron's litigation with Mosaid in which Micron makes similar allegations that Mosaid breached JEDEC's disclosure duty by failing to disclose information about its patent portfolio. Tr. 2376:25-2378:20; 2381:16-22.

The Manufacturers argued in their new trial motion that such an inference cannot ethically be drawn because **[**55]** Mr. Allan's expert report suggests that he understood the disclosure obligation at JEDEC to extend to applications and the intent to file patent applications. The court disagrees, as stated in its denial of the new trial motion. *Hynix Semiconductor Inc. v. Rambus Inc.,* 2008 WL 2951341, *9-*10 (N.D. Cal. Jul. 24, 2008).

Neither Mr. Allan's report, nor the reason the Manufacturers did not question Mr. Allan, is in evidence. The court is left with evidence that someone with first hand knowledge about the disclosure policy was not asked about it. This permits the inference drawn by the court and the court sees no ethical problem in drawing that inference. However, it is not an inference on which the court places much weight in light of the testimony of Messrs. Crisp and Grossmeier.

the case that a patent was identified, then there was a requirement to provide what we called a rand licensing term, or whoever held the patent had to agree on a reasonable and non-discriminatory licensing term." *Id.* 3244:17-3245:1. In other words, Mr. Lee - a Micron witness - did not recall a duty to disclose intentions to file patent applications. He did, however, testify that he believed he had to disclose patent applications.

I. Rambus Did Not Breach Any Clearly Defined Disclosure Expectation

78. The evidence suggests that the scope of a JEDEC member's expectation of disclosure ranged from non-existent to astonishingly broad. The jury found that the JEDEC members did not share a clearly defined expectation that members would disclose relevant knowledge they had about patent applications or the intent to file patent applications:

> <u>Disclosure expectations.</u> "Did JEDEC members share a clearly defined expectation that members would disclose relevant knowledge they had about patent applications or the intent to file patent applications on technology being considered for adoption as a JEDEC standard? No.
> Special Verdict Form P 45.

79. It does appear, however, that members **[**58]** at least expected those making sponsoring presentations to disclose any patents the sponsoring company had covering the advocated standard. The members may well have had a broader disclosure expectation. However, Mr. Rhoden's testimony suggesting that the applications Rambus had in prosecution during its membership should have been disclosed was equivocal and lacking in analysis. He testified that he believed certain applications should have been disclosed based on his reading of the claim language. Tr. 553:14-559:2. This analysis was cursory and turned on Mr. Rhoden's belief that the applications should have been disclosed because they "involved the work of JEDEC," a standard that has no clear definition or meaningful support. In any **[*1012]** event, Rambus's alleged conduct - failing to disclose intentions to seek patents and failing to disclose certain applications it had in prosecution (which were based on the same specification that was disclosed twice to JEDEC) - did not violate any clearly defined disclosure expectation. By the time it withdrew from JEDEC, Rambus had not filed a patent application claiming a standardized feature under consideration during its JEDEC membership.

J. Rambus's [59] Representations at JEDEC - The 1992 SDRAM Ballot**

The Manufacturers' also base their estoppel defense arising from JEDEC on the nature of the few statements Rambus actually made at JEDEC.

80. As discussed above, Rambus voted on one set of ballots involving SDRAM. The members of JC-42.3 were aware of Rambus's voting and publicly disapproved of Rambus's behavior because of their belief that Rambus was trying to stall the standardization of SDRAM.

81. In light of the narrow scope of the duty to disclose defined on the ballot, no reasonable person within JEDEC could interpret Rambus's ballots as a statement that Rambus would not seek intellectual property on matters related to the ballot.

K. Rambus's Representations at JEDEC - Richard Crisp's Head Shake

82. According to Mr. Rhoden, the JC-42.3 chairman Gordon Kelley asked Richard Crisp "if Rambus had any, any I.P. that related to any of the things that were present." Tr. 539:1-17. Mr. Rhoden testified that Mr. Crisp "just shook his head. He didn't say a word." Tr. 539:21. Mr. Rhoden testified that he personally witnessed this because he was in the room at the time. Tr. 540:4-5. Mr. Rhoden could not recall clearly when this occurred however. **[**60]** Tr. 538:14-19.

83. Mr. Crisp remembered the interaction differently. *See* Tr. 1138:21-1139:1. Mr. Crisp testified that "he asked me if I cared to comment." Mr. Crisp says that he declined to comment. Tr. 1138:21-1139:10. Mr. Crisp did this by shaking his head "no." Tr. 1140:7-14. Mr. Crisp also testified that no one followed up on his refusal to comment or complained that "not commenting" was forbidden. *Id.* 1347:5-1348:9.

84. Mr. Crisp sent contemporaneous emails from JEDEC meetings to other Rambus personnel. In an email he sent from this JEDEC meeting, Mr. Crisp wrote: "Siemens expressed concern over potential Rambus Patents covering 2 bank designs. Gordon Kelly [sic] of IBM asked me if we would comment which I declined." Ex. 3412; Tr. 1144:12-23 (admitting exhibit).

85. The portions of the JEDEC minutes from the meeting in evidence contain no mention of this discussion. *See* Tr. 1128:8-13; Ex. 3003, 1-2, 30-37. The court infers from the absence of evidence in the record that the minutes lack any record of this event.

86. The deposition testimony of Gordon Kelley accords with Mr. Crisp's version of events. *See* Docket No. 3568, 379:14-380:2 ("I remember that both Motorola and Rambus were **[**61]** represented at that meeting and did not comment on those patents.").

[*1013] 87. Of the two versions of the events, the court believes Mr. Crisp's. First, his story is confirmed by contemporaneous documentation that long pre-dated any litigation. Second, Mr. Crisp's testimony is corroborated by Mr. Kelley's. Third, Mr. Crisp's testimony was consistent with Rambus's policy of not commenting. Finally, Mr. Rhoden's testimony was contradicted by the contemporaneous documentation of events, suggesting that Mr. Rhoden's memory of these events (which took place about 15 years ago) has slipped.

88. The court therefore finds that when Rambus was asked to comment about patents related to 2-bank memory architecture (a feature not at issue in this case), Rambus declined to comment. The committee did not follow up on the issue, nor consider the issue worth following with its patent tracking lists.

89. Mr. Crisp's head shake could not have been reasonably construed as a statement that Rambus lacked any form of intellectual property on the 2-bank design, let alone a statement that Rambus lacked any form of intellectual property covering any other feature under consideration.

L. Rambus's Representations at JEDEC [62] - The '703 Patent**

90. Richard Crisp disclosed one Rambus patent to the JC-42.3 committee, U.S. Patent No. 5,423,703 (Exhibit 3219). The '703 patent has the same specification as all of the patents-in-suit. The claims-in-suit, however, were not even drafted while Rambus was a member of JEDEC.

91. The '703 patent was Rambus's first issued patent. Tr. 928:5-16. Mr. Crisp was proud of Rambus's first issued patent. *Id.* 1143:6-11. He was, however, later reprimanded by Rambus for disclosing a patent to JEDEC without authorization. *Id.* 1212:6-21.

92. Richard Crisp did not believe the patent related to JEDEC's work, but he disclosed it at the September 1993 JEDEC meeting. Tr. 928:22-931:24. Despite the patent's "unrelatedness" to the work of JEDEC, the '703 patent was placed on the patent tracking list and remained there until at least December of 1996. *See* Ex. 8307 at 11.

93. Nobody at the September 1993 JEDEC meeting followed up the '703 disclosure with questions about the patent, or the list of related applications listed on the patent. Tr. 1346:16-25.

94. Farhad Tabrizi, a Hitachi JEDEC representative and eventually Hynix's JEDEC representative, "looked at" the '703 patent but "did not analyze **[**63]** it." By "looked at," Mr. Tabrizi meant that he reviewed the first page, i.e., the abstract. *See* Tr. 3940:5-3941:12. The '703 patent was the only Rambus patent Farhad Tabrizi reviewed before the litigation began. *Id.* 3938:22-3939:8.

95. Mr. Crisp's disclosure of the '703 patent could have given JEDEC members the impression in 1993 that Rambus would disclose its issued patents. Rambus's later statements clarified this point. Whether or not Rambus disclosed issued patents, however, is not relevant, because the Manufacturers do **[*1014]** not accuse Rambus of failing to disclose an issued patent.

M. Rambus's Representations at JEDEC - Rambus's SyncLink Statement

96. In May 1995, a proposal for a different DRAM architecture - SyncLink or SLDRAM - was introduced at JEDEC. Tr. 1254:2-20. Because the SyncLink proposal resembled Rambus's RDRAM, [7] Rambus was asked whether it possessed patents related to SyncLink. *Id.* 1254:21-1255:16. Richard Crisp did not answer at that meeting, but instead consulted with his superiors at Rambus about how to answer. *Id.* The Manufacturers authenticated the minutes from this meeting through Mr. Crisp, but did not move the document into evidence during Mr. Crisp's examination. **[**64]** *Id.* 1302:20-23. The court infers from this that nothing in the minutes would bolster the Manufacturers' case.

97. Mr. Crisp prepared a response to the committee's concern with the help of Rambus's in-house counsel, Anthony Diepenbrock. Messrs. Crisp and Diepenbrock were concerned about equitable estoppel, and they prepared Rambus's response accordingly. Tr. 1256:9-1258:2. It bears noting that Mr. Diepenbrock was concerned about Rambus's attendance at JEDEC, and Rambus stopped attending JEDEC by the end of 1995 and formally resigned in 1996.

98. Accordingly, Mr. Crisp read a prepared statement at the September 1995 statement to address the committee's concerns about Rambus's intellectual property and SLDRAM. Tr. 1258:3-25; 1259:10-21. Rambus's statement to the committee, Exhibit 3090, was as follows:

> At the last JEDEC meeting it was noted that the subject of the Synclink DRAM proposal bears a strong resemblance to Rambus DRAMs and so I was asked to make a comment about the Rambus intellectual property **[**65]** position as it may relate to the Synclink proposal.
> The first Rambus patents were filed more than five years ago, with development starting years before. We have confirmed that the first Ramlink and Synclink committee meetings and draft proposals occurred years after Rambus began development.
> Today there is no finalized Synclink specification or DRAMs to analyze for potential infringement. Best case, it will be several years before they will exist. So to fully determine Synclink patent risk, this committee should look not just to Rambus but also internally.
> For example, we are aware of 13 US patents relating to SDRAMs which were issued to member companies of this committee. All were active participants in the SDRAM standardization process. Included in this list are Hitachi, Mitsubishi, Mosaid, Motorola, Oki, Samsung, TI, and Toshiba.
>
> Additionally, Synclink is being sponsored by an organization with a less stringent patent policy than JEDEC. Under the bylaws of the IEEE working groups, attendees represent themselves only, not their employers. Furthermore they are free to patent whatever they desire, and are not bound to relinquish **[*1015]** any of their rights to their patents by presenting their **[**66]** ideas for standardization.
> Therefore, we conclude that products defined by committees are not guaranteed to be free of patent encumberances [sic].
> At this time, Rambus elects to not make a specific comment on our intellectual property position relative to the Synclink proposal. Our presence or silence at committee meetings does not constitute an endorsement of any proposal under the committee's consideration nor does it make any statement regarding potential infringement of Rambus intellectual property.

---

[7] "RDRAM" or "Rambus DRAM" refers to Rambus's proprietary memory architecture that it developed in the early 1990s and that competed with JEDEC's standards and SLDRAM throughout the 1990s.

> Ex. 3090. In addition to reading the statement, Mr. Crisp showed it on the overhead and provided a copy to be included in the minutes. Tr. 1265:2-10; *accord* Tr. 1392:6-1393:4; Ex. 3224 at 26 (including Mr. Crisp's statement as Attachment C to the September 1995 minutes).

99. The committee's response to Rambus's statement was less than enthusiastic. The chairman, Gordon Kelley, responded "I heard a lot of words, but I don't know if anything was said." Tr. 1265:11-15.

100. Construed in isolation, portions of Rambus's statement could be misleading, specifically the insinuation that JEDEC had stronger rules than IEEE. Taken as a whole, however, no reasonable JEDEC member could have been misled **[**67]** by this statement. The statement is replete with warnings, and ends with the most clear warning of all: "Our presence or silence at committee meetings does not constitute an endorsement of any proposal under the committee's consideration nor does it make any statement regarding potential infringement of Rambus intellectual property."

101. Even were it reasonable to be misled by Mr. Crisp's statement, the JC-42.3 committee was not, as evidenced by chairman Gordon Kelley's skeptical and pointed response.

N. Rambus's Representations at JEDEC - Rambus's Resignation Letter and the Omitted Patent

102. Rambus sent its resignation letter to JEDEC on June 17, 1996. Tr. 1293:13-1294:1; Ex. 3120. The letter contained two substantive paragraphs:

> Recently at JEDEC meetings the subject of Rambus patents has been raised. Rambus plans to continue to license its proprietary technology on terms that are consistent with the business plan of Rambus, and those terms may not be consistent with the terms set by standards bodies, including JEDEC. A number of major companies are already licensees of Rambus technology. We trust you will understand that Rambus reserves all rights regarding its intellectual property. **[**68]** Rambus does, however, encourage companies to contact Dave Mooring of Rambus to discuss licensing terms and sign up as licensees.
> To the extent that anyone is interested in the patents of Rambus, I have enclosed a list of Rambus U.S. and foreign patents. Rambus has also applied for a number of additional patents in order to protect Rambus technology.
> Ex. 3120 at 1.

103. The resignation letter contains a number of explicit warnings to JEDEC and JEDEC's members. First, it emphasizes that Rambus's business model and licensing plan are not necessarily the same **[*1016]** as JEDEC's. Second, Rambus clarified that it "reserve[d] all rights regarding its intellectual property." While such a phrase is somewhat vague, it does communicate the position that Rambus did not believe it had waived any rights or intend to waive any rights. Third, it concluded with a clear statement that Rambus had a number of patent applications pending.

104. The letter also included a list of over twenty Rambus patents. Ex. 3120 at 2. The letter omitted one Rambus patent, the '327 patent, which issued on April 30, 1996. Tr. 1298:8-1299:5.

105. The omission was innocent. Rambus's outside patent attorney, Lester Vincent, generated **[**69]** the list of Rambus patents by doing a Lex Pat database search in March of 1996 when helping Richard Crisp prepare a draft of the resignation letter. *See* Tr. 1814:16-1817:9. Because the '327 patent issued after the database search but before Rambus sent the resignation letter, it was accidentally left off the list.

106. There is no evidence that any JEDEC member relied on the letter's list of Rambus's patents. The December 1996 tracking list does not include *any* of the patents disclosed in the letter. *See* Ex. 8307 at 11-12. No witness for any Manufacturer testified that they read or relied on Rambus's resignation letter.

O. Rambus's Representations at JEDEC - Reasons Not to Disclose Patent Applications

107. Rambus had a number of reasons for choosing not to disclose patent applications or its intentions to seek patents. Rambus's outside patent prosecutor, Lester Vincent, repeatedly advised Rambus to keep its patent applications confidential. Tr. 1634:5-8; 1707:21-1708:5. Mr. Vincent advised Rambus that disclosing its patent applications could lead others to file interferences and to give others a head start at designing around (or copying) Rambus's technology. *Id.* 1708:6-1711:6.

108. Mr. **[**70]** Vincent's advice to Rambus was the generic advice he gave to all of his clients. *Id.* 1711:7-13.

P. Rambus's Representations at JEDEC - Conclusions

109. Rambus made no affirmative representations that it had no intellectual property pertaining to the work of JEDEC. *See* Jury's Special Verdict PP 12, 19 and 26. Further, Rambus uttered no half-truths about its intellectual property coverage or potential coverage of products compliant with synchronous DRAM standards being considered by JEDEC. *Id.* at P 31. Consistent with the jury's finding, the court agrees that Rambus made no misrepresentations and uttered no deceptive half-truths to JEDEC and its members.

Q. 1993-2000: Rambus's Dealings with Hynix: The "Other DRAM" Clause

110. Rambus contacted Hynix about licensing Rambus's technology in 1993 and began negotiations. Tr. 1847:12-21. In December 1995, Dr. Kye Hwan Oh signed a license agreement with Rambus on behalf of Hynix (then Hyundai Electronics). **[*1017]** Tr. 1845:2-1846:24; Ex. 4028 (the license agreement).

111. While Rambus and Hynix were negotiating the license agreement, Hynix was a member of the SyncLink consortium, an organization of DRAM manufacturers seeking to develop a next-generation **[**71]** DRAM. Tr. 1857:22-1858:12. Rambus cautioned Hynix that a SyncLink DRAM might infringe Rambus's patents. *Id.* 1861:3-18.

112. The December 1995 agreement licensed Hynix to make Rambus's RDRAM. Tr. 1862:3-14. The agreement also licensed Hynix to make "Other DRAM," which the contract defined as: "each DRAM which incorporates part of the Rambus Interface Technology but is not Compatible with the Rambus Interface Specification." Ex. 4028 P 1.5. The license set a royalty rate of 2.5% for "Other DRAMs." *Id.* P 5.3(a)(ii).

113. Dr. Oh believed that "Other DRAM means SyncLink." Tr. 1862:24-1863:1; 1864:212-1865:19. He did not believe "Other DRAM" encompassed Hynix's JEDEC-standard SDRAM and did not intend to pay royalties to Rambus under the Other DRAM provision on Hynix's SDRAM sales. *See id.* 1863:11-18. [8] On the other hand, the clause was written without making a specific reference to SyncLink and former Rambus CEO Geoff Tate did not believe that Hynix ever told Rambus that the clause was "intended to apply only to a SyncLink device." *Id.* 3094:19-23. Mr. Tate understood the clause to be broader "[o]therwise we would have called it the SyncLink clause." *Id.* 3095:4-9.

114. The license lacked provisions dictating how the parties would decide whether an "Other DRAM" incorporates part of the Rambus Interface Technology such that Hynix would owe Rambus royalties on such a DRAM. *See generally* Ex. 4028. Rambus asked Dr. Oh whether Hynix would have paid 2.5% royalties on SyncLink DRAM sales without proof that "SyncLink infringed Rambus patents." Tr. 1908:16-1909:5. Dr. Oh's response was clear: "of course not." *Id.* 1909:5. Dr. Oh clearly affirmed again that Hynix would only have paid royalties under the Other DRAM clause if Rambus proved that the "Other DRAM" infringed a Rambus patent. *Id.* 1909:6-10; *see also* Docket No. 3578, 268:5-11, 15-17 (testimony of Hynix employee D.S. Chung that "I think that we would have refused to

---

[8] Min Kwon Yoo, the Hynix employee **[**72]** responsible for memory technical marketing and for negotiating with Rambus three years later in 1998, admitted that at that time "I myself didn't quite understand as to what 'Other DRAMs' was in reference to, so I asked the folks at Rambus about that, but didn't really get a straight answer." Docket No. 3322, 12:1-13:3; 43:2-43:8 (video testimony).

pay any royalty even if you had asked for that."); Tr. 5069:16-5070:6 (Hynix's refusals **[**73]** to admit that it would have paid royalties with respect to SDRAM and DDR SDRAM pursuant to the "Other DRAM" clause).

115. Mr. Tate's testimony suggested that Hynix perhaps should have paid even if Rambus did not have an issued patent, but he believed that "practically speaking" Rambus **[*1018]** would have to prove the "Other DRAM" infringed a patent. *Id.* 3095:22-3096:4.

116. Rambus did not possess issued patents that read on Hynix's SDRAM in 1995. The first patent Hynix was found by the jury to infringe issued on June 22, 1999.

117. Rambus never demanded royalties from Hynix for its SDRAM and DDR SDRAM sales under the "Other DRAM" clause. Tr. 3096:6-8. According to Mr. Tate, there was a "very small number of months, two or three months, where we had issued patents and the, this contract was in effect[.]" *Id.* 3096:21-23.

R. 1993-2000: Rambus's Dealings with Hynix: Negotiations About Amending the "Other DRAM" Provision

118. In April 1998, a dispute arose between Hynix and Rambus regarding whether Hynix was complying with the license and making its "best efforts" to manufacture and market Rambus's RDRAM memories. *See* Exs. 3226; 3228 (correspondence between Mr. Yoo and Deepak Mithani, Rambus's then-Director **[**74]** of Business Development).[9]

119. In June 1998, Hynix and Rambus met to discuss issues related to Hynix's efforts to develop and promote RDRAM. *See* Ex. 3229. In exchange for excusing Hynix's obligations with respect to RDRAM, Rambus proposed "removing the clause on 'Other DRAMs.'" *Id.*

120. July of 1998 saw further negotiations regarding the "Other DRAM" clause. Docket No. 3322, 44:8-11; 53:16-54:1. At a meeting on July 6, Hynix shared its product roadmap with Rambus and revealed its intentions and timeline for developing and selling SDRAM, DDR SDRAM, Rambus's concurrent RDRAM and SyncLink (or "SLDRAM"). *Id.* 60:9-61:15; Ex. 3238. Following the meeting, Rambus responded with another proposal for modifying the "Other DRAM" clause. *Id.* 74:22-75:5; Ex. 3156.

121. Rambus's letter proposed amending the agreement's royalty rate provision for "Other DRAMs" to read "an 'Other DRAM Product' means a particular type of Other DRAM (e.g., if otherwise within the definition of Other DRAM, each of a SDRAM, DDR SDRAM, and SLDRAM would be a separate Other Dram [sic] Product, **[**75]** regardless of density). The royalty rate for each Other DRAM Product shall be negotiated separately by the parties upon Hyundai's first Sale of that Other DRAM Product[.]" Ex. 3156 at 2. Notwithstanding the timing of the proposal, Mr. Yoo testified that there was "none whatsoever" discussion of SDRAM, DDR, or SLDRAM being "Other DRAM" at the July 6 meeting. Docket No. 3322, 76:6-76:10.

122. Hynix responded to the proposed changes to the "Other DRAM clause" and found them "difficult to accept." Ex. 3239. Hynix explained that under Rambus's proposal, if a dispute arose as to whether a Hynix DRAM incorporated "Rambus Interface Technology" **[*1019]** (and thus would be an "Other DRAM" under the license), Hynix would "always bear the burden to prove that it has not made use of the Rambus Interface Technology in every future DRAM product developed by itself if Rambus should simply assert [Hynix's] use of Rambus Interface Technology." *Id.* at 1-2. Hynix believed that "[n]o one will treat this language as fair or consistent with the License Agreement." *Id.* at 2.

123. Hynix further explained that it believed Rambus had been hesitant to grant the Other DRAM clause, and that "SLDRAM, DDR SDRAM, and Synchronous **[**76]** DRAMs might be counted as Other DRAMs from the perspective of Rambus." *Id.* at 2; *accord* Tr. 3094:6-13 (former Rambus CEO Geoff Tate testified that the "Other

---

[9] Various trial exhibits corresponding to documents used in Mr. Yoo's depositions were admitted into evidence. *See* Tr. 2177:5-2179:8.

DRAM" clause "was a concession that we made very reluctantly"). The following lines are significant, but their meaning is unclear: "Undoubtedly, [Hynix] has been, and will be, willing and ready to protect Rambus' valuable intellectual properties developed with huge amount of money and time invested. Nonetheless, please be reminded that Rambus already withdrew from its initial position that it eventually granted [Hynix] the license that Rambus Interface Technology could be incorporated by [Hynix] into the competitive DRAM products, including, but not limited to, SLDRAM, DDR and Synchronous DRAMs, as well, subject to [Hynix] paying running royalties calculated at the rate of 2.5%. We believe that [Hynix] shall not be required to concede any more in terms of the running royalty rates applicable to Other DRAMs." *Id.* It is not clear what the middle line means. One interpretation is that Hynix is conceding that SDRAM and DDR SDRAM are covered and should be subject to a 2.5% royalty, and no more. Another interpretation is that Hynix **[**77]** is reminding Rambus that Rambus withdrew its contention that SDRAM and DDR SDRAM were "Other DRAMs."

124. That aside, Mr. Yoo stated that by the time Hynix saw Rambus's July 10 proposal and responded with its letter, Hynix knew that Rambus believed that SDRAM and DDR SDRAM used "Rambus Interface Technology" and that Rambus believed Hynix owed Rambus royalties under the "Other DRAM" clause. Docket No. 3322, 124:10-14; 124:17-126:25. Mr. Yoo responded that Hynix took no action, however, because Hynix did not believe that SDRAM and DDR SDRAM used "Rambus Interface Technology" and were not "Other DRAMs." *Id.* 127:1-5, 9-12. Mr. Yoo also expressed disappointment that Rambus had not shared this interpretation of the "Other DRAM" clause in 1997 when Hynix began work on those products because Hynix might then have "taken certain measures to do things differently." *Id.* 129:6-9; 129:12-130:5.

125. There is no evidence of how Rambus responded to Hynix's rejection of the proposed amendment to the "Other DRAM" clause. In August of 1999, Rambus internally considered looking into how much **[*1020]** it stood to gain if Hynix were to pay royalties under the "Other DRAM" clause for DDR SDRAM. Tr. 3636:19-3638:10; **[**78]** Ex. 3163. The tone of the Rambus email - Exhibit 3163 - suggests that Rambus did not believe Hynix would pay royalties on DDR SDRAM pursuant to the "Other DRAM" clause.

126. In 1999, Hynix (then Hyundai) merged with LG Electronics, which also had a license with Rambus. The resulting entity operated under LG's version of the license, and this version of the license lacked an "Other DRAM" clause. Tr. 3096:9-15.

S. 1993-2000: Rambus's Dealings with Hynix: Understanding of the Parties Regarding the Meaning of the "Other DRAM" Clause

127. The parties' decision to word the "Other DRAM" clause such that it was not explicitly limited to SyncLink, and Rambus's reluctance in granting the provision at all, suggest that Hynix in 1995 understood, or should have realized, that Rambus's intellectual property coverage might one day extend to SDRAM and other designs Hynix might pursue.

128. By 1998, Rambus and Hynix were both aware that the other side possessed a different understanding of the scope of "Rambus Interface Technology" and of the universe of products covered by the "Other DRAM" clause.

129. Hynix's unwillingness to pay royalties under the clause without proof of infringement was known to Rambus **[**79]** and explains Rambus's failure to press Hynix for royalties. Furthermore, Rambus's desire to encourage Hynix to produce RDRAM explains its unwillingness at the time to push Hynix on the "Other DRAM" clause.

130. Hynix was not misled about the possible scope of Rambus's patent portfolio by Rambus's failure to seek royalty payments. On the contrary, Hynix suspected that Rambus might have patent coverage of products like SDRAM in 1995 when it sought the expansive language in the "Other DRAM" clause and knew that Rambus believed it would have patents covering SDRAM and DDR SDRAM by the middle of 1998.

T. 1995-2000: Rambus's Dealings with Micron - The December 1995 Meeting

131. Terry Lee, Micron's JC-42.3 representative, first met with Rambus in December 1995 at Micron's facility in Boise. Tr. 3149:18-22; 3152:16-21. Mr. Lee, Gene Cloud (VP of marketing), Kevin Ryan, and Jeff Mailloux represented Micron at the meeting. *Id.* 3152:22-3153:2. The meeting was called to discuss an RDRAM license. *See id.* 3153:6-14. Rambus had contacted Micron to license it as an RDRAM manufacturer. *Id.* 3153: 6-10.

132. To prepare for the meeting, Mr. Lee downloaded information from Rambus's website because he "didn't **[**80]** know too much about Rambus." Tr. 3153:15-23. Mr. Lee also reviewed a collection of Rambus's patents' abstracts. Tr. 3153:24-3154:2.

133. Rambus presented its RDRAM technology to Micron at the meeting. **[*1021]** Tr. 3158:16-22. At no point did Rambus indicate anything about SDRAM. *Id.* 3158:23-3159:9. Rambus did not disclose whether or not it was seeking patents on SDRAM. *Id.* 3159:7-9.

134. The meeting ended with Micron declining to take an RDRAM license. *Id.* 3159:10-15.

U. 1995-2000: Rambus's Dealings with Micron - The December 1996 Meeting

135. Micron (represented by Mr. Lee, Kevin Ryan, Jeff Mailloux, and Gene Cloud) next met with Rambus and Intel in December 1996. Tr. 3159:16-3160:6. At this point, Rambus had resigned from JEDEC. Intel had announced that it had selected Rambus's RDRAM design as the next memory that would work with the chips Intel designed. *Id.* 3160:14-23. The purpose of the meeting was to license Micron to manufacture RDRAM. *Id.* 3161:4-21.

136. SDRAM was not discussed at the meeting. Tr. 3162:8-15.

137. Micron entered into an RDRAM license with Rambus around March of 1997. Tr. 3163:12-18.

V. 1995-2000: Rambus's Dealings with Micron - Rambus Did Not Mislead Micron

138. Rambus did not **[**81]** make any misrepresentations or utter any half-truths about the scope of its intellectual property during its RDRAM license negotiations with Micron. *See* Special Verdict Form PP 19, 31.

W. Nanya's Failed RDRAM Negotiations

139. Nanya Technology Corp. was formed around 1995. It founded its subsidiary, Nanya Technology Corp. USA, in 1997. *Id.* 2730:9-12. Nanya formed its American subsidiary to sell JEDEC-standard DRAMs. *Id.* 2741:3-23.

140. Rambus met with Ken Hurley (the founder of Nanya USA) in late 1998 to discuss an RDRAM license. Tr. 2749:13-2750:4. The negotiations lasted about a year. *Id.* 2750:10-2752:3.

141. At no point did Rambus advise Nanya that Rambus believed that its JEDEC-standard DRAMs were infringing Rambus patents. Tr. 2750:10-2752:3. However, Nanya only began selling some infringing SDRAM at the end of 1998. *Id.* 2752:3-23. It began selling DDR SDRAM "in the 2000 time frame." In other words, when Rambus first negotiated with Nanya, Nanya did not sell any infringing devices. As negotiations progressed, Nanya began to sell some infringing SDRAM. At no point in Nanya's negotiations with Rambus did Nanya sell infringing DDR SDRAM.

142. Mr. Hurley confirmed that during these negotiations, **[**82]** he was *not* told that Rambus's intellectual property was limited to RDRAM and he was *not* told what Rambus's intellectual property did cover. Tr. 2763:18-2764:3.

143. Mr. Hurley first learned that Rambus believed its patents covered SDRAM and DDR SDRAM when he read about Rambus's litigation against Hitachi in early 2000. Tr. 2765:9-2766:7. Despite **[*1022]** learning about this litigation in 2000, Mr. Hurley was not aware of any steps taken by Nanya (a) to determine if it needed a license from Rambus, and (b) to develop a non-infringing DRAM. *Id.* 2777:6-20.

144. Rambus sued Nanya alleging that Nanya's DDR2 SDRAM infringed Rambus's patents in January 2005. Rambus accused Nanya's SDRAM and DDR SDRAM of infringement in its counterclaims in reply in July 2007. Tr. 2754:23-2756:2.

145. Nanya did not rely to its detriment on any misrepresentation or concealment by Rambus of its patent coverage of SDRAM and DDR SDRAM or on the fact that Rambus delayed in instituting suit against Nanya. *See* Special Verdict Form PP 26, 31.

X. Jury's Findings from Conduct Trial Adopted by Court

146. The Conduct Trial commenced before a jury selected on January 31, 2008 and concluded on March 26, 2008 when the jury rendered its **[**83]** Special Verdict. The jury found in favor of Rambus on each of the Manufacturers' claims submitted to it. Special Verdict Form (Docket No. 3613, *Hynix Semiconductor, Inc. v. Rambus Inc.,* C-00-20905-RMW).

147. The jury found that the six technology markets alleged by the Manufacturers existed (latency technology market, burst length technology market, data acceleration technology market, clock synchronization technology market, precharge technology market, and write latency technology market) (*id.* at P 1) but that Rambus did not commit anticompetitive conduct in any of the six technology markets. *Id.* at P 8; *see also* P 4.

148. The jury also found that Rambus did not make important representations that it did not have any intellectual property pertaining to the work of JEDEC and intend or reasonably expect that the representations would be heard by or repeated to others including Hynix, Micron and Nanya. *Id.* at PP 12, 19, and 26.

149. In addition, the jury found that Rambus did not utter half-truths about its intellectual property coverage or potential coverage of products compliant with synchronous DRAM standards then being considered by JEDEC by disclosing some facts but failing to disclose **[**84]** other important facts, making the disclosure deceptive. *Id.* at P 31.

150. Finally, the jury found that JEDEC members did not share a clearly defined expectation that members would disclose relevant knowledge they had about patent applications or the intent to file patent applications on technology being considered for adoption as a JEDEC standard. *Id.* at P 45.

III. CONCLUSIONS OF LAW

A. The *Seventh Amendment* Requirement to Adopt Jury's Factual Findings

HN1[] The *Seventh Amendment* requires the court to apply the jury's "implicit [and] explicit factual determinations" when ruling on equitable claims that are "based on the same facts" as the legal claims tried to the jury. *Los Angeles Police Protective League v. Gates, 995 F.2d 1469, 1473 (9th* **[*1023]** *Cir. 1993)*. Because of the substantial factual overlap between the claims tried to the jury and the Manufacturers' equitable claims and defenses, the court therefore adopts the findings of the jury.

B. Unfair Competition (*Cal. Bus. & Prof. Code § 17200 et seq.*)

All three Manufacturers claim that Rambus engaged in unfair competition in violation of *California Business & Profession Code §17200*. ***HN2***[] That statute defines "unfair competition" as "any unlawful, unfair, **[**85]** or fraudulent business act or practice." *Cal. Bus. Prof. Code. §17200*. "[I]t establishes three varieties of unfair competition - acts or practices which are unlawful, or unfair, or fraudulent." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. "Although the unfair competition law is broadly written to permit courts to restrain dishonest or unfair business dealings, the scope of the law is not unlimited. 'Courts may not simply impose their own notions of the day as to what is fair or unfair.'" *Scripps Clinic v. Superior Court, 108 Cal. App. 4th 917, 938, 134 Cal. Rptr. 2d 101 (2003)* (quoting *Cel-Tech, 20 Cal 4th at 180*).

The Manufacturers described their *§ 17200* claims in the Joint Case Management Conference Statement dated July 31, 2007. Hynix said: "Claim arises out of Rambus's anticompetitive conduct at JEDEC; the continuing exercise of its unlawful monopoly and deception outside of JEDEC; and Rambus's conduct arising out of the Rambus/Hynix RDRAM relationship." Attachment 1 to 7/31/07 PTC Stmt. Nanya similarly described the claim: "This claim arises, without limitation, out of Rambus's anticompetitive conduct at JEDEC; the continuing exercise of its unlawful monopoly **[**86]** and deception outside of JEDEC including its enforcement of patents known to be invalid; and Rambus's conduct during the course of its relationships with the DRAM manufacturers, and others."

Attachment 3 to 7/31/07 PTC Stmt. [10] Micron gave an essentially identical description: "This arises, without limitation, out of Rambus's anticompetitive conduct at JEDEC; and the continuing exercise of its unlawful monopoly and deception outside of JEDEC." Attachment 2 to 7/31/07 PTC Stmt.

To support their *§ 17200* claims, the Manufacturers focused on attempting to show that Rambus failed to disclose its intent to seek patent coverage of the DRAM standards being considered by JEDEC. The jury's findings defeat any claim by the Manufacturers that Rambus's conduct was "unlawful" or "fraudulent," specifically the findings: (1) that Rambus did not commit anticompetitive conduct in any of the six technology markets (Finding of Fact 147 ("FOF __")); (2) that Rambus did not make any misrepresenations about having intellectual **[**87]** property pertaining to the work of JEDEC (FOF 148); (3) that Rambus did not utter half-truths about its intellectual property coverage or potential coverage of products compliant with synchronous DRAM standards then being considered by JEDEC (FOF 149); and (4) that JEDEC members did not share a clearly defined expectation that members would disclose patent applications or the intent to file patent applications on technology being considered for adoption as a JEDEC standard. (FOF 150).

The Manufacturers, nonetheless, assert that the evidence showed that Rambus's **[*1024]** conduct was "unfair" and violated *§ 17200*. ***HN3***[] The California Supreme Court has set the standard for establishing a violation of *§ 17200* by an "unfair" act or practice.

> When a plaintiff who claims to have suffered injury from a direct competitor's "unfair" act or practice invokes *section 17200*, the word "unfair" in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Cel-Tech., 20 Cal. 4th at 187. Since the jury **[**88]** found that Rambus's conduct was not anti-competitive and that JEDEC members did not have a clearly defined expectation of disclosure, Rambus's failure to disclose cannot be considered "unfair." Not only did Rambus not have an obligation to disclose pending or anticipated patent applicatioins, it had sound reasons for not doing so. As advised by counsel, Rambus understood that patent applications were confidential and that disclosure of the contents of an application before a patent actually issued exposed the applicant to various risks or claims. (FOF 107-08). In light of the jury's findings and the evidence presented, the court concludes that the Manufacturers failed to establish that Rambus violated *§ 17200* by its conduct before JEDEC.

The totality of the evidence concerning a disclosure duty showed that, as the jury found, there was no clearly understood agreement of JEDEC members to disclose patent applications or the intent to seek patents relevant to standards being discussed at JEDEC. The strongest evidence of such an obligation appears in section 9.3.1 of Manual 21-I dated "October 1993" which may or may not have been adopted and distributed. (FOF 18-28). Even if adopted and **[**89]** distributed, the purported obligation in Manual 21-I goes further than any contemporaneous

---

[10] Any claim by Nanya that the PTO issued patents to Rambus which Rambus knew were invalid but yet attempted to enforce was not included in the trial and reserved by Nanya for later resolution.

disclosure request or requirement recited in sign-in sheets (refer only to "patented item" (FOF 30; *see* 29-32)), printed on ballots ("if anyone receiving this ballot is aware of patents involving this ballot, please alert the committee accordingly during you voting response" (FOF 35; *see* 33-40)), or contained in the meeting minutes (FOF 41-47; *see, e.g.* FOF 43-44 which refers to disclosure by "presentation sponsors"). In any event, nothing ever required a JEDEC member to reveal an intent to file for a patent in the future. *See* *Rambus, Inc. v. Infineon Techs. AG, 318 F.3d 1081, 1102 (Fed. Cir. 2003)* (holding on a similar record "that the record supports only the conclusion that a member's intentions to file or amend applications do not fall within the scope of JEDEC's disclosure duty.").

The testimony of JEDEC members concerning any disclosure obligations was varied and, in some cases, inconsistent, thus bolstering the conclusion that there was no clearly defined disclosure obligation at least with respect to a member's patent applications or intentions to file for patents in the future. *See, e.g.,* **[**90]** FOF 73 (Grossmeier); 75 (Tabrizi). The relatively modest length and static nature of the patent tracking list also suggests that JEDEC members were not generally disclosing patent applications or even making much effort to disclose their companies' relevant patents. The minutes of the December 1991 committee meeting, the first that Rambus attended and the meeting at which the tracking list was introduced, described the list's purpose: "The purpose was only to track and identify items of Committee proposals. Companies who hold patents identified can respond to Committee, *if they wish.*" FOF 49 (emphasis added). The subsequent development of the list seems consistent with this purpose and not with a broader disclosure obligation.

[*1025] At the time of its withdrawal from JEDEC, Rambus had not even applied for any of the patents-in-suit. *See* FOF 5-6. Accordingly, the court concludes that the Manufacturers are not entitled to recover on their unfair competition claims. *See also infra* § III-E (Equitable Estoppel).

C. Fraud

Nanya was the only Manufacturer whose fraud claim was tried to the court. Although the jury's verdict as to the fraud issues was only advisory as to Nanya, the court accepts the **[**91]** advisory verdict. The evidence did not support a finding of any material misrepresentation, half truths or fraudulent concealment by Rambus related to JEDEC upon which Nanya relied.

D. Prosecution Laches

The Manufacturers did not put on evidence relevant to their prosecution laches defenses. For example, the Manufacturers did not call either of their two disclosed expert witnesses (Gerald Mossinghoff and R. Polk Wagner) on prosecution laches. This absence led Rambus to move for judgment as a matter of law. Tr. 4066:3-8; Docket No. 3444 (Mar. 10, 2008). Following Rambus's motion, the Manufacturers indicated that they did not "intend to proceed with the prosecution laches part of the case." *Id.* 4511:4-12.

The only evidence related to Rambus's patent prosecution came from its patent attorney in the mid-nineties, Lester Vincent. Nothing in his testimony established that Rambus unduly delayed in prosecuting the claims in suit.

E. Equitable Estoppel

1. Elements of Equitable Estoppel

All the Manufacturers assert the doctrine of equitable estoppel as a bar to Rambus's claims for patent infringement.

> *HN4*[] Equitable estoppel, which bars a patentee from receiving relief, consists of three elements: (i) the **[**92]** patentee must communicate to the accused infringer (by words, conduct or silence) that the patentee will not pursue an infringement claim; (ii) the accused infringer must rely on that communication; and (iii) the

> accused infringer must establish that it would be materially prejudiced if the patentee is now permitted to proceed with the infringement claim.

B. Braun Med., Inc. v. Abbott Labs., 124 F.3d 1419, 1425 (Fed. Cir. 1997); *see* *A. C. Aukerman Co. v. R. L. Chaides Const. Co., 960 F.2d 1020 (Fed. Cir. 1992)*. Silence alone will not create an estoppel unless there is a clear duty to speak or somehow the patentee's continued silence reinforces the defendant's belief that the defendant will be unmolested. *Id. at 1043-44*; *see also* *Hemstreet v. Computer Entry Sys. Corp., 972 F.2d 1290, 1295 (Fed. Cir. 1992)* ("mere silence must be accompanied by some other factor which indicates that the silence was sufficiently misleading as to amount to bad faith"). Even if the three elements are met, the court must take into consideration all other evidence respecting the equities of the parties in exercising its discretion in deciding whether to allow the defense to bar the suit. *Id. at 1043*.

2. Burden [93] of Proof**

HN5[] Except where equitable estoppel is based solely upon intentional fraud, the burden of proof is the preponderance of evidence. "[W]hile the facts relied upon to establish equitable estoppel must be clear, positive, and unequivocal in their implication, these facts need not be established by any more than a fair preponderance of the evidence." *Aukerman Co., 960 F.2d at 1046*.

3. Equitable Estoppel Based Upon Rambus's Participation in JEDEC

All the Manufacturers assert that Rambus's words, conduct and silence in **[*1026]** connection with its participation in JEDEC communicated an intent by Rambus not to enforce the patents-in-suit. Although the Manufacturers did offer some evidence supporting an obligation by JEDEC members to make disclosures concerning their patents relevant to any standard being considered, the evidence was not persuasive that there was any understanding among members that they had to disclose pending patent applications or the intent to file such applications. The jury specifically found that JEDEC members did *not* share a clearly defined expectation that such disclosures would be made (FOF 150).

The recent case of *Qualcomm Inc. v. Broadcom Corp., 548 F.3d 1004 (Fed. Cir. 2008)* **[**94]** involved similar issues but is factually distinguishable in several critical ways. It held that Qualcomm had a duty to disclose the existence of patents it owned that "reasonably might be necessary" to practice the standard being considered by the standards setting organization of which it was a member. The court found that Qualcomm participated in the standard setting during the time the relevant standard was being considered despite Qualcomm's denials and affirmative attempts to conceal that participation. The court found that not only the written policies of the SSO required disclosure (*id. at 1012-15*) but that the understanding among the members required disclosure of patents that reasonably might be necessary to practice the standard. *Id. at 1015-17*. The court further found that Qualcomm's intentional nondisclosure in face of the duty to speak constituted an implied waiver of the right to assert infringement. *Id. at 1019-22*. It also suggested that such conduct would result in a defense of equitable estoppel, but did not remand the action for consideration of that defense since there had been an implied waiver.

The instant case is distinguishable from *Qualcomm* in the following material **[**95]** ways. First, the written JEDEC disclosure policies did not clearly require members to disclose information about patent applications and the intent to file applications in the future and there is no indication that members ever legally agreed to do so. FOF 14-77; *see* *Infineon, 318 F.3d at 1098*. In *Infineon,* a case involving similar claims against Rambus based upon its involvement with JEDEC, the court observed "there is a staggering lack of defining details in the EIA/JEDEC patent policy." *318 F.3d 1081, 1102 (Fed. Cir. 2003)*. Similarly, in *Rambus Inc. v. F.T.C., 380 U.S. App. D.C. 431, 522 F. 3d 456, 462 (D.C. Cir. 2008)*, the D.C. Circuit commented in reversing the Federal Trade Commission's finding that Rambus, as a member of JEDEC, had engaged in an unfair method of competition and unfair or deceptive acts or practices prohibited by § 5(a) of the FTC Act:

> We . . . conclude that the Commission failed to demonstrate that Rambus's conduct was exclusionary under settled principles of ***antitrust law***. Given that conclusion, we need not dwell very long on the substantiality of the evidence, which we address only to express our serious concerns about the breadth the Commission ascribed to JEDEC's disclosure policies **[**96]** and their relation to what Rambus did or did not disclose.

Id. at 462.

Second, the jury in this case expressly found that JEDEC members did not share a clearly defined expectation that members would disclose relevant knowledge they had about patent applications or the intent to file patent applications on technology being considered for adoption as a JEDEC standard. The evidence supported that finding (FOF 67-79).

Third, Qualcomm failed to disclose existing patents which it intentionally concealed. **[*1027]** The patent-at-issue in this case had not even been applied for during Rambus's membership in JEDEC. The only suggestion that other patents that Rambus had obtained or applied for might reasonably have been of interest to JEDEC came from Mr. Rhoden who was both vague and not convincing in his testimony on the subject (FOF 67, 82).

However, ***HN6***[] an estoppel may be found even though the party estopped did not actually intend to mislead or to defraud the other person. *See A.C. Aukerman Co., 960 F.2d at 1044, fn 18*. The Manufacturers assert that in addition to Rambus's knowledge that at least some members of JEDEC believed there was an obligation to disclose, Rambus was aware that JEDEC had taken adverse **[**97]** action against Wang and Texas Instruments for their failures to disclose. However, both those situations involved affirmative conduct at JEDEC and the failure to disclose relevant, issued patents and not mere silence about an intent to obtain future patents with particular coverage.

Rambus's involvement at JEDEC was primarily through Richard Crisp, Rambus's representative at JEDEC. Essentially, his only outward expressions of significance were his negative shake of his head at a May 1992 JEDEC meeting when Rambus was asked if it cared to comment on specific patent issues (FOF 82-89), his disclosure of the '703 patent in 1993 (FOF 90-95) and his reading of a letter dated September 12, 1995 at a JEDEC meeting concerning Rambus's refusal to comment on potential patent coverage of the SyncLink design (FOF 96-101). Mr. Crisp did not discuss non-public Rambus intellectual property at JEDEC, nor did he actively advocate adopting the standards JEDEC eventually adopted. Further, at the time Mr. Crisp attended his last meeting of JEDEC in late 1995 (Rambus officially withdrew in June 1996), Rambus did not have any patent application pending that covered a JEDEC standard and it was months before **[**98]** it did. (FOF 5-6).

The Manufacturers' suggestion that Rambus misled JEDEC's members when Mr. Crisp read the letter wherein Rambus responded to a question about Synclink, a type of DRAM being developed that bore a strong resemblance to Rambus DRAMs, is not persuasive. *See* Ex. 3090. In the letter Rambus noted that Synclink was being sponsored by an organization with a less stringent patent policy than JEDEC. *Id.* At the close of the letter Rambus stated that it "elects to not make a specific comment on our intellectual property position relative to the Synclink proposal. Our presence or silence at committee meetings does not constitute an endorsement of any proposal under the committee's consideration nor does it make any statement regarding potential infringement of Rambus intellectual property." *Id.* The Manufacturers suggest that this comment about Synclink implied that Rambus did not have intellectual property that covered standards that were being developed at JEDEC. Since Rambus was responding to a question raised specifically about Synclink, it is not reasonable to infer that Rambus was commenting beyond Synclink or that patents it might obtain in the future would cover DRAMs built **[**99]** in accordance with standards then being developed by JEDEC. Further, the last sentence of the letter is consistent with Rambus's policy of not commenting on potential infringement of Rambus's intellectual property.

4. Estoppel Based On the "Other DRAM" Clause in Hynix License

Hynix contends that Rambus's silence during its licensing negotiations with Rambus resulting in the December 1995 licensing agreement between Hynix and Rambus supports its asserted defense of **[*1028]** equitable estoppel. In particular, Hynix contends that Rambus's silence about the scope of its intellectual property in light of the inclusion of the "Other DRAM" clause in the agreement misled the company into believing that the "Other DRAM" clause would not require Hynix to pay royalties on SDRAMs or DDR SDRAMs incorporating Rambus's inventions and that Rambus should therefore be estopped from enforcing its patent rights against Hynix for these products. However, Hynix offered little more than a statement by its former Executive Vice President for Semiconductors, Dr. Kye-hwan Oh, that "Other DRAM means Synclink." (FOF 110-130). Although he insisted that Hynix understood that "Other DRAM" carried this specific meaning, Dr. **[**100]** Oh could not explain why the 1995 licensing agreement never refers to Synclink. His credibility on this issue was questionable. Moreover, Dr. Oh acknowledged that, at the time of the negotiations with Rambus, he was aware of Rambus's royalty-based business model and knew Rambus had 40 patent applications related to its technologies, that he had read about Rambus's inventions in the international and trade press, and that it was a common practice for companies seeking to protect their intellectual property to file broad applications. Although it may well be that Hynix did not appreciate the extent of Rambus's intellectual property at the time, its failure to appreciate the scope does not mean that Rambus communicated to Hynix that it would not pursue an infringement claim. Accordingly, Hynix has failed to establish the first element of its equitable estoppel claim by a preponderance of the evidence.

5. Estoppel Based on Conduct with Micron Outside of JEDEC

In their Proposed Findings of Fact and Conclusions of Law, the Manufacturers propose as Finding of Fact 194 that "Rambus's conduct and communications with Micron outside of JEDEC were also deceptive and misleading." However, they do **[**101]** not explain what particular conduct or communications were deceptive or misleading.

In December 1995 Rambus met with Micron and presented its RDRAM technology in the hope of being able to license that technology to Micron. No agreement was reached. There was no discussion concerning SDRAM and no reason for Rambus to discuss its patenting intentions with Micron. (FOF 131-134).

Micron next met with Rambus and Intel in December 1996. (FOF 135-137). At this point, Rambus had resigned from JEDEC and Intel had announced that it had selected Rambus's RDRAM design as the next memory that would work with the chips Intel designed. The purpose of the meeting was to license Micron to manufacture direct RDRAM. Micron entered into a license with Rambus around March of 1997. SDRAM was not discussed at the December 1996 meeting, and Rambus did not suggest that it had patent rights that extended to SDRAM.

Neither Rambus's conduct nor communications with Micron with respect to RDRAM was misleading nor did the relationship between them create any obligation on Rambus's part to disclose its intent to obtain patent coverage (FOF 138). Rambus is not estopped from asserting its infringement claims based upon **[**102]** any conduct toward or communications with Micron.

6. Estoppel Based on Conduct with Nanya Outside JEDEC

Nanya dropped any claim for equitable estoppel other than with respect to Rambus's conduct at JEDEC. Tr. 803:24-804:5.

[*1029] F. Waiver Defenses

1. Waiver Based Upon Participation in JEDEC

The Manufacturers contend that Rambus's "misleading omissions and unfair conduct as a whole" manifested a waiver of its right to sue for infringement. *See* Manu. Brf. Re: Clms. and Def. at 15. The Manufacturers focus on the same evidence as they do for their claim of equitable estoppel-- Rambus's participation in JEDEC and its failure to disclose its intent to obtain patents covering the JEDEC standard. Nanya asserts that Rambus's failure to file suit against it until 2005 further supports a finding of waiver, particularly in light of Rambus's failure to reveal its intent from 1998 to 2000 when Rambus unsuccessfully negotiated an RDRAM licensing agreement with Nanya. ***HN7***[] Although often discussed together, waiver and equitable estoppel are separate concepts with different requirements.

> Waiver always rests upon intent. Waiver is the intentional relinquishment of a known right after knowledge of the facts. The burden, **[**103]** moreover, is on the party claiming a waiver of a right to prove it by clear and convincing evidence that does not leave the matter to speculation, and doubtful cases will be decided against a waiver.

DRG/Beverly Hills, Ltd. v. Chopstix Dim Sum Cafe & Takeout III, Ltd., 30 Cal. App. 4th 54, 60, 35 Cal. Rptr. 2d 515 (1994).

Rambus's conduct at JEDEC, and specifically its alleged failure to comply with the alleged JEDEC disclosure policy, did not constitute a waiver of its rights to enforce its patents. The Manufacturers' evidence did not show clearly and convincingly, or even by a preponderance of the evidence, that Rambus's conduct at JEDEC manifested an intent to relinquish any right to sue for infringemnt of any patents it should later obtain. As the jury found, there was no clearly defined expectation that patent applications or anticipated applications would be disclosed. Rambus's refusal to comment on its intellectual property tends to negate any inference that its silence manifested an intent to relinquish. Moreover, the Manufacturers failed to establish that Rambus's conduct at JEDEC violated any "clear duty to speak" that might have implied a waiver. *See* *Kaha v. Allstate Ins. Co., 140 Cal. App. 4th 1023, 1034, 45 Cal. Rptr. 3d 92 (2006)*.

2. [**104] Nanya's Waiver Defense

Nanya's waiver defense focuses on the delay between the alleged abandonment of licensing negotiations between Rambus and Nanya for SDRAM in April 2001 (evidence of such negotiations is lacking) and April 2004 when Rambus contacted Nanya about infringement. An infringement suit was filed by Rambus against Nanya on January 25, 2005. Between April 2001 and April 2004 Nanya claims to have spent millions of dollars producing JEDEC compliant DRAM products. These facts do not establish that Rambus in any way intended to relinquish any patent rights. In fact, during that time Rambus was in, or had been in, litigation with other DRAM manufacturers which was public knowledge and illustrated that Rambus intended to pursue infringement claims. Also, many of the patents asserted against Nanya did not issue until after April 2001 thus showing Rambus filed suit within a short time after many of the patents issued. [11] Further, there is no evidence suggesting that Nanya would have done anything differently had it been sued in 2001 rather than 2005. Nanya's waiver defense lacks both evidentiary and legal support.

[*1030] G. Patent Misuse Defenses Asserted By Nanya and Micron

Nanya and Micron assert that Rambus's patent claims are not enforceable because Rambus engaged in patent misuse. The patent misuse defense in this consolidated proceeding appears to be based upon Rambus's alleged anticompetitive conduct in failing to disclose patent applications and intended applications to JEDEC and then asserting the patents after they issued. [12] ***HN8***[] Patent misuse "arises from the equitable doctrine of unclean hands, and relates generally to the use of patent rights to obtain or to coerce an unfair commercial advantage." *C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1372 (Fed. Cir. 1998)*. "The key inquiry is whether, by imposing conditions that derive their force from the patent, the patentee has impermissibly broadened the scope of the patent

---

[11] The latest patent-in-suit was U.S. Patent No. 6,751,696 issued June **[**105]** 15, 2004.

[12] Nanya's patent misuse defense base upon Rambus's alleged procurement of the patents-in-suit by fraud on the patent office was not tried in this phase of the lawsuit Rambus brought against Nanya and is reserved for later resolution.

grant with anticompetitive effect." *Id.* The Federal Circuit has cautioned that the defense not be read broadly to capture any generally-alleged "wrongful" use of patents. *Id. at 1373* ("Although the defense of patent misuse . . . evolved to protect against 'wrongful' use of patents, the catalog of practices labeled 'patent misuse' does not include a general notion **[**106]** of 'wrongful' use."). Rather, the defense is generally directed towards conduct that "affect[s] competition in unpatented goods or that otherwise extend[s] the economic effect beyond the scope of the patent grant." *Id.* Since Micron and Nanya base that their patent misuse defense on the same allegations as their antitrust and unfair competition claims and since those claims were not proved, the defense necessarily fails.

H. Micron's Claim of an Implied License

Micron alleges as a defense that it had an implied license to use Rambus's patents. This defense is asserted on the theory that Rambus either waived its right to assert the patents-in-suit or that it is equitably estopped from doing so. ***HN9***[] "In patent law, an implied license merely signifies a patentee's waiver of the statutory right to exclude others from making, using, or selling the patented invention." *Wang Labs., Inc. v. Mitsubishi Electronics America, Inc., 103 F.3d 1571, 1580 (Fed. Cir. 1997)*. An **[**107]** implied license can also arise from conduct that supports a finding of equitable estoppel. *Id. at 1580-2*. Since Micron failed to prove that Rambus either waived its right to enforce its patents or is estopped from attempting to enforce them, Micron cannot claim it has an implied license.

I. Laches

All of the Manufacturers assert the defense of laches. Nanya contends that Rambus unreasonably delayed in bringing suit against it following the termination of licensing negotiations between them. The only evidence of negotiations between Rambus and Nanya involved RDRAM and occurred in the late 1990's. However, what Nanya's papers appear to allege is unreasonable delay between April of 2001 (when there were purportedly negotiations for SDRAM and DDR SDRAM) and April of 2004.

> ***HN10***[] A defendant, in order to invoke the defense of laches, must prove: "(1) [that] the plaintiff delayed filing suit for an unreasonable and inexcusable length of time from the time the plaintiff knew or reasonably should have known of its **[*1031]** claim against the defendant, and (2) [that] the delay operated to the prejudice or injury of the defendant." *A.C. Aukerman Co. v. R.L. Chaides Constr. Co., 960 F.2d 1020, 1032 (Fed. Cir. 1992)* **[**108]** (en banc). A presumption of laches arises "upon proof that the patentee delayed filing suit for more than six years after actual or constructive knowledge of the defendant's alleged infringing activity." *Id. at 1035-36*.

Symantec Corp. v. Computer Associates Int'l, Inc., 522 F.3d 1279, 1294 (Fed. Cir. 2008).

Nanya's evidence fails to show that Rambus unreasonably delayed in bringing suit against Nanya. The earliest issue date of a patent selected by Rambus for assertion against Nanya is January 30, 2001 (the issue date of the '184 patent) and the latest is June 24, 2004 (the issue date of the '696 patent). Although calculation should probably be made from the date Rambus knew of its claim under the '696 patent, even if Rambus knew of its claim under the '184 patent the day it issued and if that is the beginning date for calculating laches, the delay in bringing suit was not unreasonable or inexcusable. *See* *Meyers v. Asics Corp., 974 F.2d 1304, 1307 (Fed. Cir. 1992)* (suggesting time runs from the latest issue date of the patents on which suit is brought). Further, Nanya made no showing of reliance to its prejudice on any statement or conduct of Rambus.

Hynix and Micron do not appear to be **[**109]** seriously pursuing laches as a separate defense. They offered no proposed Findings of Fact and Conclusions of Law directed to the defense. In the July 31, 2007 Joint Case Management Conference Statement Hynix said its defense is based upon "Rambus's deception of the industry as to the scope of its proprietary technology, including the conduct arising out of the Rambus/Hynix RDRAM relationship." July 31, 2007 Joint Case Management Conference Statement Attachment 1 at 2:24-27. Micron set forth its defense as "Rambus's failure to timely assert claims for patent infringement and its deception regarding its alleged proprietary technology." *Id.,* Attachment 2 at 5:20-25. The court believes that Hynix and Micron are just putting another label on their equitable estoppel defense that Rambus should be barred from suing for infringement for its allegedly misleading conduct concerning its patenting intentions during the time it was a member of JEDEC and during licensing negotiations. Neither Hynix nor Micron, to the extent either is relying on a laches defense, has explained or marshaled the evidence supporting the defense.

The Manufacturers' laches defenses fail.

J. Unenforceability and Unclean [110] Hands**

Finally, Hynix asserts a defense of unclean hands, distinct from Rambus's alleged spoliation, arising from Rambus's conduct discussed above. Micron and Nanya seek a declaratory judgment that Rambus's patents are unenforceable based on Rambus's conduct. In light of the jury's verdict and the court's findings, there is no basis for the unclean hands defense or unenforceability claim.

DATED: 3/3/2009

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **Motions to Dismiss, Failure to State Claim**

Dismissal of a complaint may be based on the lack of a cognizable legal theory or the absence of sufficient facts alleged under a cognizable legal theory. On a motion to dismiss, the court accepts the facts alleged in the complaint as true.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Complaints, Requirements for Complaint**

Fed. R. Civ. P. 8 requires that a complaint contain a short and plain statement of the claim showing that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)*. While a complaint attacked by a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the "grounds" of his "entitlement to relief" requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. The complaint must contain sufficient factual allegations to raise a right to relief above the speculative level.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN3[] **Sherman Act, Claims**

In complex antitrust litigation, motive and intent play leading roles, and the proof is largely in the hands of the alleged conspirators.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN4[] **Sherman Act, Claims**

With regard to an antitrust action, although the plaintiffs will need to provide evidence of each defendants' participation in any conspiracy, they only need to make allegations that plausibly suggest that each defendant participated in the alleged conspiracy.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN5[] **Private Actions, Standing**

Virginia's harmonization statute broadly mandates: this chapter shall be applied and construed to effectuate its general purposes in harmony with judicial interpretation of comparable federal statutory provisions. *Va. Code Ann. § 59.1-9.17*. The Virginia Act specifically provides that it is to be interpreted and applied in harmony with federal ***antitrust law***. *Va. Code Ann. § 59.1-9.17*.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN6[] **Sherman Act, Claims**

The Supreme Court of Montana holds that sections of the Montana Unfair Trade Practices Act, *Mont. Code Ann. § 30-14-201 et seq.*, are modeled after the Sherman Act, and that where the statutes are similar, the court will give due weight to the federal courts' interpretation of the alleged antitrust violation. Montana law differs from the Sherman Act is some respects, such as the Sherman Act's requirement of two or more persons to be involved in an lawful restraint of trade, while one person acting alone may violate the Montana act.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN7[] **Private Actions, Standing**

With regard to antitrust claims, the standing provision of the Montana statute allows any "person who is or will be injured" to sue for damages and injunctive relief. *Mont. Code Ann. § 30-14-222*. Section 4 of the Clayton Act, *15 U.S.C.S. § 15*, allows any person who shall be injured to sue for damages and injunctive relief.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN8[] **Private Actions, Standing**

P.R. Laws Ann. tit. 32, § 3342 states that there is recognized the right to merchants, to consumers of goods and services and to the Commonwealth of Puerto Rico to file a class suit on behalf of said merchants or consumers based on the Antitrust Act of the Commonwealth, *P.R. Laws Ann. tit. 10, §§ 257-274*.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN9[] **Regulated Practices, Private Actions**

Mississippi's antitrust laws prohibit understandings or agreements to restrain trade, increase the price of a commodity, or hinder competition in the production, importation, or sale or purchase of a commodity. *Miss. Code Ann. § 75-21-1*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN10[] **Private Actions, Standing**

The Mississippi Antitrust Act requires some allegations of intrastate conduct.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN11[] **Private Actions, Standing**

The Mississippi Antitrust Act should be construed to require allegations of at least some activity or conduct occurring in intrastate commerce or trade. Courts will dismiss a complaint with leave to amend where the plaintiffs failed to allege any activity of any kind -- sales, purchases, or other activities in trade or commerce.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN12[] **Private Actions, Standing**

Nevada's ***antitrust law*** states that monopolization of trade or commerce in this state, including, without limitation, attempting to monopolize or otherwise combining or conspiring to monopolize trade or commerce in this state constitutes a contract, combination or conspiracy in restraint of trade, and it is unlawful to conduct any part of such activity in this state. *Nev. Rev. Stat. § 598A.060(1)(e)*.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN13[] **Equitable Relief, Quantum Meruit**

Under Michigan law, a party can bring an unjust enrichment claim against a defendant even in the absence of privity or a contract between the parties.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN14[] **Equitable Relief, Quantum Meruit**

With regard to a claim of unjust enrichment, whether or not the benefit is directly conferred on the defendant is not the critical inquiry; rather, the plaintiff must show that his detriment and the defendant's benefit are related and flow from the challenged conduct.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN15[] **Equitable Relief, Quantum Meruit**

Under North Carolina law, in order to establish a claim for unjust enrichment, a party must have conferred a benefit on the other party. The benefit must not have been conferred officiously, that is it must not be conferred by an interference in the affairs of the other party in a manner that is not justified in the circumstances. The benefit must not be gratuitous and it must be measurable.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN16[] **Equitable Relief, Quantum Meruit**

The North Dakota Supreme Court holds that the doctrine of unjust enrichment is invoked when a person has and retains money or benefits which in justice and equity belong to another. For a complainant to recover, it is sufficient if another has, without justification, obtained a benefit at the direct expense of the complainant, who then has no legal means of retrieving it.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN17[] **Equitable Relief, Quantum Meruit**

With regard to a claim of unjust enrichment, a "direct benefit" is required under North Dakota law.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

HN18[] **Regulated Practices, Private Actions**

Arkansas ***antitrust law*** only permits predatory pricing claims alleging that items were sold "at less than cost" and does not create a private right of action for an alleged conspiracy to raise prices. *Ark. Code Ann. § 4-75-310*.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN19[] **Regulated Practices, Private Actions**

In jurisdictions which possess antitrust statutes conferring standing on indirect purchasers, an indirect purchaser may only bring a statutory claim for alleged anti-competitive behavior.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN20[] **Regulated Practices, Private Actions**

Tennessee, Arizona, and Vermont all permit indirect purchasers to pursue antitrust claims; thus, an unjust enrichment claim will not circumvent the procedural and substantive limitations of these antitrust statutes.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN21[] **Equitable Relief, Quantum Meruit**

Under Tennessee law, a plaintiff must demonstrate that he or she has exhausted all remedies against the person with whom the plaintiff enjoyed privity of contract. However, to maintain an action for unjust enrichment, a plaintiff is not required to exhaust all remedies against the party with whom the plaintiff is in privity if the pursuit of the remedies would be futile.

Opinion by: SUSAN ILLSTON

Opinion

[*1182] ORDER DENYING DEFENDANTS' MOTIONS TO DISMISS DIRECT PURCHASER PLAINTIFFS' FIRST AMENDED CONSOLIDATED COMPLAINT AND GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTIONS TO DISMISS INDIRECT PURCHASER PLAINTIFFS' SECOND AMENDED CONSOLIDATED COMPLAINT; GRANTING DIRECT PURCHASER PLAINTIFFS' MOTION TO FILE SECOND AMENDED CONSOLIDATED AMENDED COMPLAINT

On February 27, 2009, the Court heard argument on defendants' motions to dismiss the direct purchaser plaintiffs' first amended consolidated complaint, defendants' motions **[*1183]** to dismiss the indirect purchaser plaintiffs' second amended consolidated complaint, and the direct purchaser plaintiffs' motion to amend the complaint. [1] For the reasons set **[**29]** forth below, the Court DENIES defendants' motions to dismiss the direct purchaser plaintiffs' first amended complaint, [2] GRANTS IN PART and DENIES IN PART defendants' motions to dismiss the indirect purchaser plaintiffs' second amended consolidated complaint, and GRANTS the direct purchaser plaintiffs' motion to file a second amended consolidated complaint.

BACKGROUND

---

[1] The motion to amend was set for hearing on March 6, 2009. However, defendants' opposition to the motion to amend centers on the same issues which are decided in this order. Hence, the March 6, 2009 hearing on the motion to amend is VACATED and the motion will be decided in this order.

[2] The Court will issue a separate order on Tatung Company of America, Inc.'s motion to dismiss the direct purchaser plaintiffs' first amended consolidated complaint.

By order filed August 25, 2008, the Court largely denied defendants' motions to dismiss the direct and indirect purchaser consolidated complaints. Docket No. 666. The Court found, however, that the complaints lacked sufficient allegations specific to each defendant, and granted defendants' motions to dismiss in that respect. The Court granted plaintiffs leave to amend to more specifically **[**30]** plead how each defendant joined the alleged price-fixing conspiracy. The Court stated that "plaintiffs need not plead each defendant's involvement in the alleged conspiracy in elaborate detail, but must simply include allegations specific to each defendant alleging that defendant's role in the alleged conspiracy." *Id*. at 6-7.

On December 5, 2008, the direct purchaser plaintiffs filed a first amended consolidated complaint and the indirect purchaser plaintiffs filed a second amended consolidated complaint. The complaints include new allegations about the alleged price-fixing conspiracy, including details about group and bilateral meetings through which the alleged conspiracy was effectuated. The complaints also add new information about guilty pleas recently entered by three TFT-LCD manufacturers who are defendants in this multi-district litigation: LG Display Co. Ltd. (and its U.S. subsidiary, LG Display America, Inc.), Sharp Corporation, and Chunghwa Picture Tubes, Ltd. DP-FACC PP 137-145; IP-SACC PP 189-191.

Defendants have moved to dismiss the complaints on several grounds. Defendants contend that the complaints do not adequately allege each defendant's participation in the alleged **[**31]** conspiracy, and that the case should be limited to the 2001 - 2006 time period, the same time period covered by the related criminal pleas. [3] Defendants raise additional arguments with respect to particular state law claims alleged by the indirect purchaser plaintiffs.

The direct purchaser plaintiffs seek leave to file a second amended consolidated complaint to add a new plaintiff, Texas Digital Systems, Inc. Defendants oppose the motion solely on the grounds articulated in the motion to dismiss the first amended consolidated complaint.

LEGAL STANDARD

HN1[] Dismissal of a complaint may be based "on the lack of a cognizable legal theory or the absence of sufficient facts alleged under a cognizable legal theory." *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1990)*. On a motion to dismiss, the Court accepts the facts alleged in the complaint as true. *NL Indus., Inc. v. Kaplan, 792 F.2d 896, 898 (9th Cir. 1986)*.

HN2[] *Federal Rule of Civil Procedure 8* **[**32]** requires that a complaint contain a "short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)*. "While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the 'grounds' of his 'entitlement to relief' requires more than labels and conclusions, and a formulaic recitation of the elements **[*1184]** of a cause of action will not do." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 1964-65, 167 L. Ed. 2d 929 (2007)*. The complaint must contain sufficient factual allegations "to raise a right to relief above the speculative level." *Id. at 1965*.

DISCUSSION

I. Sufficiency of allegations specific to each defendant

Defendants contend that the amended consolidated complaints do not adequately allege each defendant's role in the alleged conspiracy. Defendants argue that the complaints continue to "lump together" the twenty-six different

[3] Notwithstanding their entry of guilty pleas to felony violations of *15 U.S.C. § 1*, defendants LG Display Co. Ltd., LG Display America, Inc., and Sharp Corporation have joined in the motions to dismiss the amended complaints for failure to meet the notice pleading requirements of the Federal Rules of Civil Procedure.

named defendants in general allegations referring to "defendants," or groups of defendants sorted by country or corporate family. All plaintiffs counter that the new paragraphs added to the amended complaints sufficiently allege each defendant's participation **[**33]** and role in the alleged conspiracy.

The Court finds that the amended consolidated complaints more than adequately allege the involvement of each defendant and put defendants on notice of the claims against them. Contrary to defendants' suggestion, neither *Twombly* nor the Court's prior order requires elaborate fact pleading. Further, the Supreme Court has recognized that ***HN3***[] "in complex antitrust litigation," "motive and intent play leading roles," and "the proof is largely in the hands of the alleged conspirators." *Poller v. Columbia Broad. Sys., Inc., 368 U.S. 464, 473, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*. The amended complaints add detail about numerous illicit conspiratorial communications between and among defendants (DP-FACC PP 105-133; IP-SACC PP 130-148), and facts of the guilty pleas entered by four defendants for fixing prices of TFT-LCD. DP-FACC PP 137-147; IP-SACC PP 189-191. The complaints contain additional specific information about the group and bilateral meetings by which the alleged price-fixing conspiracy was effectuated. The complaints allege that group or "crystal" meetings were attended by employees at three general levels of defendants' corporations, and contains details about the structure and **[**34]** content of these meetings, as well as the types of employees who attended the meetings. DP-FACC PP 106-113; IP-SACC PP 133-141. The complaints allege that the "crystal" meetings were supplemented by bilateral discussions between various defendants about past and future pricing, as well as information about shipments, and that these discussions took the form of in-person meetings, telephone calls, e-mails and instant messages. DP-FACC PP 114-115; IP-SACC PP 142-143. The complaint also alleges which types of meetings the defendants and co-conspirators participated in, and in some instances includes more detail such as the year of a meeting and other meeting participants. *See, e.g*. DP-FACC PP 126-128; IP-SACC PP 144-148.

Defendants complain that the complaints still do not differentiate between related corporate entities. As described in the complaints, the alleged conspiracy was organized at the highest level of the defendant organizations and carried out by both executives and subordinate employees. The complaints allege that the conspiracy was implemented by subsidiaries and distributors within a corporate family, and that "individual participants entered into agreements on behalf of, **[**35]** and reported these meetings and discussions to, their respective corporate families." DP-FACC P 130; *see also* IPSACC PP 96, 100. Plaintiffs also allege that "the individual participants in conspiratorial meetings and discussions did not always know the corporate affiliation of their counterparts, **[*1185]** nor did they distinguish between the entities within a corporate family." *Id*. The complaints allege a complex, multinational price-fixing conspiracy and, taken as a whole, they sufficiently allege each defendants' participation in that conspiracy, as well as present a factual basis for the allegations of agency. *See In re Static Random Access Memory (SRAM) Antitrust Litig., 580 F. Supp. 2d 896, 904 (N.D. Cal. 2008)* (***HN4***[] "Although Plaintiffs will need to provide evidence of each Defendants' participation in any conspiracy, they now only need to make allegations that plausibly suggest that each Defendant participated in the alleged conspiracy.").

II. Proper time period

Defendants contend that plaintiffs have not alleged any facts that would support a plausible inference of anticompetitive conduct before 2001. Defendants argue that the complaints allege that the "crystal" meetings only began in 2001, **[**36]** the guilty pleas in the criminal cases only cover the 2001-2006 time period, and that the "price dispersion" charts in the complaints do not show diminished price dispersion consistent with a conspiracy prior to 2001.

Plaintiffs counter that the complaints include numerous allegations about the period prior to 2001, including allegations that beginning in at least 1996, Hitachi, Sharp and Toshiba met or talked with at least one other defendant in order to agree on TFT-LCD product prices and the amount of TFTLCD products each would produce. DP-FACC P 4; IP-SACC P 130. The complaints also allege indicia of price-fixing and market manipulation, such as unusual pricing practices, prior to 2001. *See, e.g*., DP-FACC PP 147, 150, 157; IP-SACC PP 153-157. Plaintiffs also argue that defendants' arguments are misplaced at the pleadings stage of the litigation, and that there are any number of plausible reasons why the criminal guilty pleas would cover the 2001-2006 time period while still allowing for civil liability during the 1996-2001 period, such as criminal statutes of limitation and higher burdens of proof in criminal cases.

The Court finds that the complaints sufficiently allege anticompetitive **[**37]** conduct during the 1996-2001 time period, and will not limit the class period at this stage of the litigation. [4] Whether discovery bears out plaintiffs' allegations regarding the earlier time period is a different matter, and defendants may renew their challenges to the pre-2001 claims upon a fuller factual record.

III. State law claims alleged in indirect purchaser plaintiffs' second amended consolidated complaint

A. Virginia, Montana, and Puerto Rico

The indirect purchaser plaintiffs have alleged claims under the state antitrust laws of Virginia, Montana and Puerto Rico. Defendants move to dismiss these claims on the ground that these state antitrust laws are, pursuant to either statutory harmonization provisions or case law, required to be interpreted in accordance with federal ***antitrust law***. Defendants contend that because indirect purchasers lack **[**38]** standing under federal law pursuant to *Illinois Brick*, and Virginia, Montana and Puerto Rico have not repealed *Illinois Brick* either by statute or case law, the indirect purchaser plaintiffs lack standing here. Defendants note that there are no antitrust **[*1186]** cases in Virginia, Montana or Puerto Rico permitting indirect purchasers to bring suit under the state antitrust laws, and that both Judge Alsup and Judge Hamilton have held that indirect purchasers lack standing under similar circumstances. *See* *California v. Infineon Techs. AG, 531 F. Supp. 2d 1124, 1150 (N.D. Cal. 2007)* (indirect purchasers lack standing to seek antitrust damages under Virginia Antitrust Act); *In re Graphics Processing Units Antitrust Litig. ("GPU"), 527 F. Supp. 2d 1011, 1027 (N.D. Cal. 2007)* (stating, in context of striking allegations of nationwide class under California law, that in states that have not repealed *Illinois Brick*, "indirect purchasers are barred from bringing antitrust claims, other than for injunctive relief").

1. Virginia

With regard to Virginia, plaintiffs respond that the state harmonization provision, *Va. Code Ann. § 59.1-9.17*, was enacted prior to *Illinois Brick*, at a time when indirect purchasers **[**39]** had standing under federal law. Thus, plaintiffs contend that the harmonization provision indicates legislative intent to allow indirect purchaser suits under the then-prevailing federal law. Plaintiffs also argue that the differences between the Virginia statute -- namely the statement of the Virginia statute's purpose, and the fact that treble damages are discretionary under the state statute -- support a determination that Virginia law would permit indirect purchaser suits.

The Court disagrees, and finds that in light of Virginia's harmonization provision requiring courts to interpret the Virginia Antitrust Act in harmony with federal law, and the absence of any Virginia authority holding that indirect purchasers have standing under the state statute, indirect purchasers may not seek damages under the Virginia statute. ***HN5***[] Virginia's harmonization statute broadly mandates: "This chapter shall be applied and construed to effectuate its general purposes in harmony with judicial interpretation of comparable federal statutory provisions." *See* *Va. Code Ann. § 59.1-9.17*; *see also* *Oksanen v. Page Memorial Hosp., 945 F.2d 696, 710 (4th Cir. 1991)* ("[T]he Virginia Act specifically provides that **[**40]** it is to be interpreted and applied in harmony with federal ***antitrust law***. *Va.Code Ann. § 59.1-9.17*. Because Oksanen has failed to establish his restraint of trade and monopoly claims under federal law, his state law antitrust claims likewise fail."). Once *Illinois Brick* was decided, the Virginia legislature was free to pass an *Illinois Brick* repealer statute, as many states did. Virginia did not, and the Court is required to follow the plain language of the harmonization provision, rather than attempt to divine the

[4] Defendants have also moved to dismiss direct purchaser plaintiff Phelps Technology Inc. on the ground that Phelps' claims arise out of pre-2001 purchases of TFT-LCD panels. Because the Court finds that the complaint's pre-2001 allegations are sufficient, the Court denies defendants' motion to dismiss Phelps Technology Inc. on this ground.

legislative intent of the *pre-Illinois Brick* legislature in passing the harmonization provision. The Virginia Antitrust Act does not explicitly confer standing on indirect purchaser plaintiffs, and plaintiffs have not cited any Virginia case law suggesting that indirect purchasers have standing under the state statute. Plaintiffs have not articulated any reason why the purported differences between the Virginia statute and the Sherman Act are relevant to the question of indirect purchaser standing. Accordingly, the Court agrees with Judge Hamilton's ruling in *Infineon Technologies, 531 F. Supp. 2d at 1150*, and holds that the indirect purchaser plaintiffs lack standing under **[**41]** the Virginia Antitrust Act. The Court GRANTS defendants' motion to dismiss this claim.

2. Montana

In *Smith v. Video Lottery Consultants, Inc., 260 Mont. 54, 858 P.2d 11 (Mont. 1993)*, ***HN6***[] the Supreme Court of Montana noted that sections of the Montana Unfair Trade Practices Act, *Mont. Code Ann. §§ 30-14-201 et seq*., were modeled after the Sherman **[*1187]** Act, and that where "the statutes are similar, we will give due weight to the federal courts' interpretation of this type of alleged antitrust violation." *Id. at 13*. The Smith court noted that Montana law differed from the Sherman Act is some respects, such as the Sherman Act's requirement of two or more persons to be involved in an lawful restraint of trade, while one person acting alone may violate the Montana act. *Id. at 11*.

Defendants contend that there is no facial difference between the standing provisions of federal and Montana law, and thus this Court must give "due weight" to *Illinois Brick* and dismiss the indirect purchaser plaintiffs' claims under Montana law. ***HN7***[] The standing provision of the Montana statute allows any "person who is or will be injured" to sue for damages and injunctive relief. *Mont. Code Ann. § 30-14-222*. Section 4 of the Clayton Act, *15 U.S.C. § 15*, **[**42]** allows "any person who shall be injured" to sue for damages and injunctive relief. Plaintiffs respond that *Smith* stands for the proposition that the Montana statute is generally broader than the Sherman Act, and thus that the Court should construe the Montana act to confer standing on indirect purchaser plaintiffs.

In the absence of any Montana authority holding that indirect purchaser plaintiffs have standing under Montana ***antitrust law***, the Court declines to find so. Contrary to plaintiffs' characterization of *Smith*, the Supreme Court of Montana did not hold, as a general matter, that the Montana statute is broader than federal law. Instead, the court distinguished between instances when state and federal law differed, and those sections of the Montana statute that were modeled after the Sherman Act. With regard to the latter, the *Smith* court instructed that where "the statutes are similar, we will give due weight to the federal courts' interpretation of this type of alleged antitrust violation." *858 P.2d at 13*. Here, the standing provisions of the Montana act and the Sherman Act are almost identically worded. Plaintiffs have not identified any relevant difference between the two **[**43]** statutes that would require a different result, nor have plaintiffs cited any Montana authority holding that indirect purchaser plaintiffs have standing under Montana law. Accordingly, the Court GRANTS defendants' motion to dismiss the claims under Montana law.

3. Puerto Rico

Defendants similarly contend that plaintiffs' claims under the Puerto Rico Antitrust Act are barred because that statute is to be construed in harmony with federal ***antitrust law***, and there has been no repeal of *Illinois Brick*. Plaintiffs respond that the Puerto Rico legislature has specifically recognized the rights of "consumers" to bring class actions under the Puerto Rico Antitrust Act, and that thus indirect purchasers -- who are consumers -- have standing under the statute. *See* ***HN8***[] *32 L.P.R.A. § 3342* ("There is recognized the right to merchants, to consumers of goods and services and to the Commonwealth of Puerto Rico to file a class suit on behalf of said merchants or consumers based on the Antitrust Act of the Commonwealth, *§§ 257-274* of Title 10."). Plaintiffs also cite *Arroyo-Melecio v. Puerto Rican American Insurance Co., 398 F.3d 56, 72 (1st Cir. 2005)*, which held that the plaintiff consumers had standing **[**44]** under the Puerto Rico Antitrust Act. However, that case involved a class action brought by consumers of compulsory automobile insurance against insurance companies, and thus the plaintiffs there were not akin to indirect purchasers. Plaintiffs also cite *Comes v. Microsoft Corporation, 646 N.W.2d*

440, 448 (Iowa 2002), which states in dicta that "In total, nineteen states, the District of Columbia, and Puerto Rico have statutes **[*1188]** explicitly authorizing indirect purchasers to maintain an antitrust suit." The *Comes* court does not cite a Puerto Rico statute in support of this statement.

The Court finds, for the same reasons discussed above, that the indirect purchaser plaintiffs lack standing under the Puerto Rico statute. The Court is reluctant to find standing in the absence of an explicit *Illinois Brick* repealer, either by statute or case law. Accordingly, the Court GRANTS defendants' motion to dismiss plaintiffs' claims under the Puerto Rico antitrust statute.

B. Mississippi and Nevada

Defendants move to dismiss the indirect purchaser plaintiffs' state law antitrust claims under Mississippi and Nevada law because plaintiffs have not alleged that any part of defendants' conduct took place **[**45]** in those states. ***HN9***[] Mississippi's antitrust laws prohibit understandings or agreements to "restrain trade," "increase . . . the price of a commodity," or "hinder competition in the production, importation, . . . or sale or purchase of a commodity." *Miss. Code Ann. § 75-21-1*. Defendants note that the indirect purchaser plaintiffs allege that defendants' conduct occurred mainly in the State of California, and that the complaint only alleges *effects* in Mississippi, not *conduct*.

The Court agrees with defendants that ***HN10***[] the Mississippi Antitrust Act requires some allegations of intrastate conduct, but finds that plaintiffs have sufficiently alleged such conduct. The complaint alleges that "LCD price competition was restrained, suppressed, and eliminated throughout Mississippi," "LCD prices were raised, fixed, maintained and stabilized at artificially high levels throughout Mississippi," and that plaintiffs "were deprived of free and open competition" and "paid supra competitive, artificially inflated prices for LCD." IP-SACC P 269(a). Courts have held that similar allegations are sufficient to state a claim under the Mississippi Act. *See* **[**46]** *In re Graphics Processing Units Antitrust Litig. ("GPU II"), 540 F. Supp. 2d 1085, 1099 (N.D. Cal. 2007)* (permitting claim under Mississippi law where plaintiffs alleged that defendants' conspiracy substantially affected commerce in state, injured Mississippi residents, defendants promoted products in state and harmed competition in state); *see also Infineon Techs., 531 F. Supp. 2d at 1158-59* (***HN11***[] "the Mississippi Antitrust Act should be construed to require allegations of at least some activity or conduct occurring in intrastate commerce or trade"; dismissing complaint with leave to amend where plaintiffs failed to allege "any activity of any kind -- sales, purchases, or other activities in trade or commerce"). Plaintiffs' allegation that defendants' conduct occurred mainly in California is not inconsistent with alleging anticompetitive conduct in Mississippi. *See Standard Oil Co. of Ky. v. State ex rel. Attorney General, 107 Miss. 377, 65 So. 468 (Miss. 1914)*, *overruled in part on other grounds sub nom. Mladinich v. Kohn, 250 Miss. 138, 164 So. 2d 785 (Miss. 1964)* (sustaining claim where plaintiffs alleged nationwide conspiracy to monopolize trade in petroleum and petroleum products, no petroleum produced in Mississippi, defendants sold and distributed petroleum products **[**47]** in Mississippi).

Likewise, ***HN12***[] Nevada's ***antitrust law*** states that "[m]onopolization of trade or commerce in this state, including, without limitation, attempting to monopolize or otherwise combining or conspiring to monopolize trade or commerce in this state" constitutes a "contract, combination or conspiracy in restraint of trade, and it is unlawful to conduct any part of such activity in this state." *Nev. Rev. Stat. Ann. § 598A.060(1)(e)*. Plaintiffs' allegations **[*1189]** with regard to Nevada are similar to those for Mississippi. IP-SACC P 271(a). The Court finds these allegations are sufficient to state a claim under the Nevada statute. *See In re Intel Corp. Microprocessor Antitrust Litig., 496 F. Supp. 2d 404, 413-14 (D. Del. 2007)* (denying motion to dismiss Nevada claim where complaint alleged nationwide price-fixing conspiracy and goods sold in Nevada).

Accordingly, the Court DENIES defendants' motion to dismiss plaintiffs' Mississippi and Nevada state law antitrust claims.

C. Michigan, Florida, North Carolina and North Dakota

Defendants argue that plaintiffs' unjust enrichment claims under Michigan, Florida, North Carolina, and North Dakota law must be dismissed because the law of these states **[**48]** require that plaintiffs have conferred a "direct benefit" on defendants, and the indirect purchasers cannot allege such a direct benefit.

1. Michigan

Citing *A & M Supply Co. v. Microsoft Corp., No. 274164, 2008 Mich. App. LEXIS 433, 2008 WL 540883, (Mich. App. Feb. 28, 2008)* (per curiam), defendants contend that Michigan's "highest court" recently held that indirect purchasers in a price-fixing case cannot bring a claim for unjust enrichment because a plaintiff must have conferred a direct benefit upon the defendant. Joint motion at 14; Reply at 12. [5] In *A&M Supply*, the Michigan Court of Appeals (not the Michigan Supreme Court, which is Michigan's highest court), affirmed a trial court's dismissal for failure to prosecute. In an unpublished per curiam decision, the court alternatively held that the lawsuit was subject to dismissal on the merits because, "the unjust enrichment doctrine does not apply under the facts alleged by plaintiff here." *2008 Mich. App. LEXIS 433, [WL] at *2*. The court noted that there was "no [] direct contact between Microsoft and the indirect purchasers in the class they seek to have certified. Nor can they show that Microsoft received any direct payment or other benefit from those purchasers." *2008 Mich. App. LEXIS 433, [WL] at *2*. There is **[**49]** no further discussion of the facts of the case. While *A& M* provides some support for defendants' position, it is hardly the controlling authority that defendants suggest.

Plaintiffs cite several cases, including a Michigan Supreme Court case, for the proposition that they need not allege a direct benefit to defendants to state an unjust enrichment claim in Michigan. *See, e.g., Kammer Asphalt Paving Co., Inc. v. East China Tp. Schools, 443 Mich. 176, 504 N.W.2d 635, 640-41 (Mich. 1993)*; *Morris Pumps v. Centerline Piping, Inc., 273 Mich. App. 187, 729 N.W.2d 898, 904-905 (Mich. Ct. App. 2006)*; *In re Cardizem CD Antitrust Litig., 105 F. Supp. 2d 618, 670-71 (E.D. Mich. 2000)*. These three cases hold that a ***HN13***[] party can bring an unjust enrichment claim against a defendant even in the absence of privity or a contract between the parties. *In re Cardizem* is the most factually apposite. In that antitrust case, the indirect purchaser plaintiffs "alleged that they conferred a benefit, in the form of overpayments and increased profits, on Defendants, that Defendants accepted that **[**50]** benefit and that it would be unjust under the alleged circumstances for Defendants to retain that benefit." *105 F. Supp. 2d at 671*. The court rejected the defendants' "narrow" argument that a direct benefit was required under Michigan law. ***HN14***[] "Whether or not the benefit is directly conferred on the defendant is not the critical inquiry; rather, the plaintiff must **[*1190]** show that his detriment and the defendant's benefit are related and flow from the challenged conduct." *Id*.

Here, plaintiffs' allegations are similar to those alleged in *In re Cardizem*. The Court finds that plaintiffs have stated a claim for unjust enrichment under Michigan law, and DENIES defendants' motion to dismiss this claim.

2. North Carolina

Defendants rely on *Effler v. Pyles, 94 N.C. App. 349, 380 S.E. 2d 149 (N.C. Ct. App. 1989)*, in which the North Carolina Court of Appeals affirmed summary judgment in favor of a defendant because the plaintiff had not shown that she conferred a benefit directly on the defendant. Cases since *Effler*, however, have suggested that *Effler's* holding is narrow, and that there is no requirement of "direct benefit" in cases alleging fraud or civil conspiracy. *See, e.g., Perkins v. HealthMarkets, Inc., 2007 NCBC 25, 2007 WL No. 06 CVS 21053, 2007 WL 2570242, at *9 (N.C. Super. Ct. July 30, 2007)*. **[**51]** In any event, in affirming the trial court's summary judgment, the *Effler* court relied on the North Carolina Supreme Court's decision in *Booe v. Shadrick, 322 N.C. 567, 369 S.E.2d 554 (N.C. 1988)*. *Booe* did not, however, require that a benefit be direct to state an unjust enrichment claim. ***HN15***[] "In order to establish a claim for unjust enrichment, a party must have conferred a benefit on the other party. The benefit must

[5] Indeed, defendants strenuously argue that plaintiffs' lower court authority should be disregarded because *A&M* was issued by the highest court in Michigan.

not have been conferred officiously, that is it must not be conferred by an interference in the affairs of the other party in a manner that is not justified in the circumstances. The benefit must not be gratuitous and it must be measurable." *Booe, 322 N.C. at 570*.

Here, plaintiffs have alleged that they conferred a benefit on defendants by paying higher prices for LCD products than they would have in the absence of the alleged price-fixing conspiracy. The Court finds under *Booe* that these allegations are sufficient to state a claim, and DENIES defendants' motion to dismiss plaintiffs' unjust enrichment claims under North Carolina law.

3. North Dakota

Relying on *Apache Corporation v. MDU Resources Group, Inc., 1999 ND 247, 603 N.W.2d 891, 895 (N.D. 1999)*, defendants move to dismiss the indirect purchaser **[**52]** plaintiffs' unjust enrichment claim under North Dakota law. In *Apache*, ***HN16***[] the North Dakota Supreme Court stated that the doctrine of unjust enrichment "is invoked when a person has and retains money or benefits which in justice and equity belong to another. . . . For a complainant to recover, it is sufficient if another has, without justification, *obtained a benefit at the direct expense* of the [complainant], who then has no legal means of retrieving it." (internal quotations omitted, emphasis added). Apache alleged that it was a third-party beneficiary of contracts between the defendant and a third party, and that when the defendant breached that contract, the defendant was unjustly enriched at Apache's expense. The court affirmed the dismissal of Apache's unjust enrichment claim, noting that "the money MDU saved by breaching its contract with Koch was not a 'benefit at the direct expense of' Apache." *Id. at 895*.

Plaintiffs argue that *Apache* does not establish that a "direct benefit" is a requirement under North Dakota law, and they emphasize language in *Apache* that "the essential element of recovering under a theory of unjust enrichment -- receipt of a benefit by the defendant from the **[**53]** plaintiff which would be inequitable to retain without paying for its value -- is present here." *Id*. (internal quotations and citations omitted). Plaintiffs distinguish *Apache* on the ground that there the plaintiff had not in fact conferred any benefit **[*1191]** on the defendant, whereas here plaintiffs do allege that they have conferred a benefit on defendants. Although this factual distinction is correct, the broader language of *Apache* suggests that a ***HN17***[] "direct benefit" is required under North Dakota law. See *In re Relafen Antitrust Litig., 225 F.R.D. 14, 28 (D. Mass. 2004)* (interpreting *Apache* to require direct benefit and dismissing unjust enrichment claims brought by indirect purchasers). Plaintiffs have not cited any authority holding that North Dakota law does not require a direct benefit, and in the face of *Apache*, the Court is inclined to agree with defendants.

Accordingly, the Court GRANTS defendants' motion to dismiss plaintiffs' unjust enrichment claims under North Dakota law.

D. Unjust enrichment-- Arkansas, Virginia, Montana and Puerto Rico

Defendants move to dismiss plaintiffs' unjust enrichment claims under Arkansas, Virginia, Montana and Puerto Rico law, arguing that plaintiffs are **[**54]** improperly attempting to circumvent the antitrust laws of those jurisdictions, under which they lack antitrust standing. [6] Defendants contend that plaintiffs may not circumvent the restrictions on antitrust claims under Arkansas, Virginia, Montana and Puerto Rico law by reframing those claims as unjust enrichment actions, and they cite a number of cases which stand for that general proposition. *See, e.g., In re Microsoft Corp. Antitrust Litig., 401 F. Supp. 2d 461, 464 (D. Md. 2005)* ("[T]he specific bar on indirect purchaser recovery incorporated into South Carolina's antitrust statutes prohibits Plaintiff's general common-law [unjust

[6] Defendants contend -- and plaintiffs do not disagree -- that plaintiffs do not have standing to seek relief under ***HN18***[] Arkansas ***antitrust law*** because that law only permits predatory pricing claims alleging that items were sold "at less than cost" and does not create a private right of action for an alleged conspiracy to raise prices. *See Ark. Code Ann. § 4-75-310*; *see also FTC v. Mylan Labs, Inc., 62 F. Supp. 2d 25, 44-45 (D.D.C. 1999)*.

enrichment] claim."); *In re New Motor Vehicles Canadian Export Antitrust Litig., 350 F. Supp. 2d 160, 211 (D. Me. 2004)* ("For those states that have maintained the *Illinois Brick* prohibition on indirect purchaser recovery, I conclude that it would subvert the statutory scheme to allow these same indirect purchasers to secure, for the statutory violation, restitutionary relief at common law (or in equity)."); *see also* *GPU II, 540 F. Supp. 2d at 1100* (allowing plaintiffs to maintain unjust enrichment claims because they have "excised unjust-enrichment claims **[**55]** for states that do not recognize antitrust remedies for indirect purchasers, so this claim is no longer attempting to circumvent the laws of states that do not recognize claims for damages by indirect purchasers.").

Plaintiffs rely on *In re Cardizem* to argue that in that case, "defendants made a similar argument that plaintiff indirect purchasers could not proceed with unjust enrichment claims in states where they could not recover under the state's antitrust or consumer protection laws," and that the court "resoundly rejected" that argument. Indirect Purchasers' Opposition at 19. In fact, in *In re Cardizem*, the defendants moved to dismiss state law antitrust claims on a variety of grounds, but did not contend that indirect purchaser plaintiffs lacked antitrust **[**56]** standing based on *Illinois Brick* and harmonization with federal law. *See generally, In re Cardizem, 105 F. Supp. 2d at 645* (antitrust injury); *Id at 659* (whether state law claims preempted by Hatch-Waxman Act); *Id at 664* (whether state claims required court to enforce FTC consent decree); *Id at 665-68* (whether Wisconsin and Tennessee antitrust **[*1192]** statutes require wholly intrastate conduct). Further, the *In re Cardizem* court *denied* the defendants' motion to dismiss the state antitrust claims. The *Cardizem* defendants moved to dismiss the state unjust enrichment claims arguing first "that Plaintiffs' unjust enrichment claims are dependent upon the allegations supporting their state law antitrust claims and thus suffer from the same flaws that preclude Plaintiffs from stating an antitrust claim." *Id. at 669*. It is within this context that the court denied the motion to dismiss, holding "[t]he first of Defendants' arguments fails to read Plaintiffs' complaint in the light most favorable to Plaintiffs and confuses Plaintiffs' right to recover an equitable remedy under a common law claim based upon principles of unjust enrichment with its right to recover a remedy at law for an alleged violation of a state's **[**57]** antitrust laws." *Id*. Contrary to plaintiffs' suggestion, the *Cardizem* court did not hold that indirect purchaser plaintiffs who lacked standing under a state antitrust statute could repackage that claim as an unjust enrichment claim.

Plaintiffs also cite *D.R. Ward Construction Company v. Rohm & Haas Co., 470 F. Supp. 2d 485 (E.D. Pa. 2006)*. There, the defendants moved to dismiss unjust enrichment claims under Tennessee, Arizona and Vermont law, and argued that ***HN19***[] "in jurisdictions which possess antitrust statutes conferring standing on indirect purchasers, an indirect purchaser may only bring a statutory claim for alleged anti-competitive behavior." *Id. at 506*. The defendants also argued that if the plaintiffs' state antitrust claims were defective, the plaintiffs could not recover restitution through an unjust enrichment claim based on the same predicate wrong. *Id*. The court rejected the defendants' arguments and permitted the three state unjust enrichment claims, holding that "the viability of these claims does not hinge upon the success of the state statutory antitrust claims." *Id*. However, unlike the situation presented here, and as the *D.R. Ward* court noted "most importantly" in reaching **[**58]** its conclusion, ***HN20***[] "Tennessee, Arizona, and Vermont all permit indirect purchasers to pursue antitrust claims; thus, an unjust enrichment claim would not circumvent the procedural and substantive limitations of these antitrust statutes." *Id. at 507*. Thus, rather than supporting plaintiffs' position, *D.R. Ward* undermines it.

Here, plaintiffs have not cited any authority from Arkansas, Virginia, Montana or Puerto Rico holding that an indirect purchaser plaintiff may bring an unjust enrichment claim when that same claim would be barred under state ***antitrust law***. In the absence of such authority, the Court declines to recognize such a claim because the Court agrees with defendants that permitting such claims would allow plaintiffs to circumvent limitations of state antitrust laws.

E. Unjust enrichment-- Tennessee and Florida

[7]

[7] As previously indicated, plaintiffs have agreed to dismiss their Florida unjust enrichment claims. Therefore, the Court need not address the issue of exhaustion of remedies as to Florida law.

Defendants argue that plaintiffs' unjust enrichment claims under Tennessee law must be dismissed because plaintiffs have not alleged that they first exhausted their administrative **[**59]** remedies. ***HN21***[] Under Tennessee law, a plaintiff must demonstrate that he or she has exhausted "all remedies against the person with whom the plaintiff enjoyed privity of contract." *Freeman Indus., LLC v. Eastman Chemical Co., 172 S.W. 3d 512, 525 (Tenn. 2005)*. However, "to maintain an action for unjust **[*1193]** enrichment, a plaintiff is not required to exhaust all remedies against the party with whom the plaintiff is in privity if the pursuit of the remedies would be futile." *Id. at 526*.

Plaintiffs respond that futility is self-evident in these circumstances where the alleged price-fixing was done by the defendants in the manufacture of LCD panels and LCD products, and there has been no allegation that the resellers were involved in the conspiracy. The Court agrees that under the facts alleged in the complaint, futility is evident. Accordingly, the Court DENIES defendants' motion to dismiss the Tennessee claim.

CONCLUSION

For the foregoing reasons, the Court hereby DENIES defendants' motions to dismiss the direct purchaser plaintiffs' first amended complaint, and GRANTS IN PART AND DENIES IN PART defendants' motions to dismiss the indirect purchaser plaintiffs' second amended complaint. (Docket Nos. **[**60]** 769, 771, 777, 778, 779, 782). The Court GRANTS the direct purchaser plaintiffs' motion to amend the complaint, and VACATES the March 6, 2009 hearing scheduled for that motion. (Docket No. 806). The direct purchaser plaintiffs shall file the amended complaint by *March 13, 2009*.

IT IS SO ORDERED.

Dated: March 3, 2009

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

Dismissal of a complaint may be based on the lack of a cognizable legal theory or the absence of sufficient facts alleged under a cognizable legal theory. On a motion to dismiss, a court accepts the facts alleged in the complaint as true.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Complaints, Requirements for Complaint**

Fed. R. Civ. P. 8 requires that a complaint contain a short and plain statement of the claim showing that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN3[] Motions to Dismiss, Failure to State Claim

While a complaint attacked by a Fed. R. Civ. P. 12(b)(6) motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the grounds of his entitlement to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do. A complaint must contain sufficient factual allegations to raise a right to relief above the speculative level.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN4[] Regulated Practices, Price Fixing & Restraints of Trade

The Twombly decision does not require elaborate fact pleading. In complex antitrust litigation, motive and intent play leading roles, and the proof is largely in the hands of the alleged conspirators.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Evidence > Burdens of Proof > Allocation

HN5[] Complaints, Requirements for Complaint

Although a plaintiff will need to provide evidence of each defendants' participation in any conspiracy, he or she at the pleading stage only needs to make allegations that plausibly suggest that each defendant participated in the alleged conspiracy.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN6[] State Regulation, Claims

In light of Virginia's harmonization provision requiring courts to interpret the Virginia Antitrust Act in harmony with federal law and the absence of any Virginia authority holding that indirect purchasers have standing under the state statute, indirect purchasers may not seek damages under the Virginia statute.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Governments > Legislation > Interpretation

HN7[] **Trade Practices & Unfair Competition, State Regulation**

Virginia's harmonization statute broadly mandates that the chapter shall be applied and construed to effectuate its general purposes in harmony with judicial interpretation of comparable federal statutory provisions. *Va. Code Ann. § 59.1-9.17*. That statute specifically provides that it is to be interpreted and applied in harmony with federal ***antitrust law***. *Va. Code Ann. § 59.1-9.17*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > General Overview

HN8[] **Private Actions, Standing**

The Virginia Antitrust Act does not explicitly confer standing on indirect purchasers.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > General Overview

Governments > Legislation > Interpretation

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Trade Practices & Unfair Competition, State Regulation**

The Supreme Court of Montana has noted that sections of the Montana Unfair Trade Practices Act, *Mont. Code Ann. § 30-14-201 et seq.*, were modeled after the Sherman Act, and that where the statutes are similar, it will give due weight to the federal courts' interpretation of that type of alleged antitrust violation.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > General Overview

HN10[] **Standing, Clayton Act**

The standing provision of the Montana Unfair Trade Practices Act, *Mont. Code Ann. § 30-14-201 et seq.*, allows any person who is or will be injured to sue for damages and injunctive relief. *Mont. Code Ann. § 30-14-222*. Section 4 of the Clayton Act, *15 U.S.C.S. § 15*, allows any person who shall be injured to sue for damages and injunctive relief.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN11[] Trade Practices & Unfair Competition, State Regulation

In the Smith decision, the Supreme Court of Montana did not hold, as a general matter, that the Montana Unfair Trade Practices Act (Montana Act), *Mont. Code Ann. § 30-14-201 et seq.*, is broader than federal law. Instead, the court distinguished between instances when state and federal law differed, and those sections of the Montana statute that were modeled after the Sherman Act. The standing provisions of the Montana Act and the Sherman Act are almost identically worded.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN13[] Trade Practices & Unfair Competition, State Regulation

Mississippi's antitrust laws prohibit understandings or agreements to restrain trade, increase the price of a commodity, or hinder competition in the production, importation, or sale or purchase of a commodity. *Miss. Code Ann. § 75-21-1*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

HN14[] State Regulation, Claims

The Mississippi Antitrust Act requires some allegations of intrastate conduct.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Governments > Legislation > Interpretation

HN15[] State Regulation, Claims

The Mississippi Antitrust Act should be construed to require allegations of at least some activity or conduct occurring in intrastate commerce or trade.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN16[] Trade Practices & Unfair Competition, State Regulation

Nevada's ***antitrust law*** states that monopolization of trade or commerce in the state, including, without limitation, attempting to monopolize or otherwise combining or conspiring to monopolize trade or commerce in this state constitutes a contract, combination or conspiracy in restraint of trade, and it is unlawful to conduct any part of such activity in this state. Nev. Rev. Stat. Ann. § 598A.0601(e).

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN17[] **State Regulation, Claims**

In the context of an indirect purchaser's claim for unjust enrichment in a price-fixing case under Michigan law, whether or not the benefit is directly conferred on the defendant is not the critical inquiry; rather, the plaintiff must show that his detriment and the defendant's benefit are related and flow from the challenged conduct.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN18[] **Equitable Relief, Quantum Meruit**

In order to establish a claim for unjust enrichment under North Carolina law, a party must have conferred a benefit on the other party. The benefit must not have been conferred officiously, that is it must not be conferred by an interference in the affairs of the other party in a manner that is not justified in the circumstances. The benefit must not be gratuitous and it must be measurable.

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN19[] **Equitable Relief, Quantum Meruit**

In the Apache decision, the North Dakota Supreme Court stated that the doctrine of unjust enrichment is invoked when a person has and retains money or benefits which in justice and equity belong to another. For a complainant to recover, it is sufficient if another has, without justification, obtained a benefit at the direct expense of the complainant, who then has no legal means of retrieving it.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN20[] **Private Actions, Standing**

For those states that have maintained the Illinois Brick prohibition on indirect purchaser recovery, it would subvert the statutory scheme to allow those same indirect purchasers to secure, for the statutory violation, restitutionary relief at common law or in equity.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN21[] Private Actions, Standing

The Arkansas ***antitrust law*** only permits predatory pricing claims alleging that items were sold at less than cost and does not create a private right of action for an alleged conspiracy to raise prices. *Ark. Code Ann. § 4-75-310*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN22[] State Regulation, Claims

The Cardizem decision does not hold that indirect purchaser plaintiffs who lack standing under a state antitrust statute could repackage that claim as an unjust enrichment claim.

Administrative Law > Judicial Review > Reviewability > Exhaustion of Remedies

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN23[] Reviewability, Exhaustion of Remedies

Under Tennessee law, a plaintiff must demonstrate that he or she has exhausted all remedies against the person with whom the plaintiff enjoyed privity of contract. However, to maintain an action for unjust enrichment, a plaintiff is not required to exhaust all remedies against the party with whom the plaintiff is in privity if the pursuit of the remedies would be futile.

Opinion by: SUSAN ILLSTON

Opinion

ORDER DENYING DEFENDANTS' MOTIONS TO DISMISS DIRECT PURCHASER PLAINTIFFS' FIRST AMENDED CONSOLIDATED COMPLAINT AND GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTIONS TO DISMISS INDIRECT PURCHASER PLAINTIFFS' SECOND AMENDED CONSOLIDATED COMPLAINT; GRANTING DIRECT PURCHASER PLAINTIFFS' MOTION TO FILE SECOND AMENDED CONSOLIDATED AMENDED COMPLAINT

On February 27, 2009, the Court heard argument on defendants' motions to dismiss the direct purchaser plaintiffs' first amended consolidated complaint, defendants' **[*8]** motions to dismiss the indirect purchaser plaintiffs' second amended consolidated complaint, and the direct purchaser plaintiffs' motion to amend the complaint. [1] For the reasons set forth below, the Court DENIES defendants' motions to dismiss the direct purchaser plaintiffs' first amended complaint, [2] GRANTS IN PART and DENIES IN PART defendants' motions to dismiss the indirect purchaser plaintiffs' second amended consolidated complaint, and GRANTS the direct purchaser plaintiffs' motion to file a second amended consolidated complaint.

BACKGROUND

By order filed August 25, 2008, the Court largely denied defendants' motions to dismiss the direct and indirect purchaser consolidated complaints. Docket No. 666. The Court found, however, that the **[*9]** complaints lacked sufficient allegations specific to each defendant, and granted defendants' motions to dismiss in that respect. The Court granted plaintiffs leave to amend to more specifically plead how each defendant joined the alleged price-fixing conspiracy. The Court stated that "plaintiffs need not plead each defendant's involvement in the alleged conspiracy in elaborate detail, but must simply include allegations specific to each defendant alleging that defendant's role in the alleged conspiracy." *Id*. at 6-7.

On December 5, 2008, the direct purchaser plaintiffs filed a first amended consolidated complaint and the indirect purchaser plaintiffs filed a second amended consolidated complaint. The complaints include new allegations about the alleged price-fixing conspiracy, including details about group and bilateral meetings through which the alleged conspiracy was effectuated. The complaints also add new information about guilty pleas recently entered by three TFT-LCD manufacturers who are defendants in this multi-district litigation: LG Display Co. Ltd. (and its U.S. subsidiary, LG Display America, Inc.), Sharp Corporation, and Chunghwa Picture Tubes, Ltd. DP-FACC PP 137-145; IP-SACC **[*10]** PP 189-191.

Defendants have moved to dismiss the complaints on several grounds. Defendants contend that the complaints do not adequately allege each defendant's participation in the alleged conspiracy, and that the case should be limited to the 2001 - 2006 time period, the same time period covered by the related criminal pleas. [3] Defendants raise additional arguments with respect to particular state law claims alleged by the indirect purchaser plaintiffs.

The direct purchaser plaintiffs seek leave to file a second amended consolidated complaint to add a new plaintiff, Texas Digital Systems, Inc. Defendants oppose the motion solely on the grounds articulated in the motion to dismiss the first amended consolidated complaint.

LEGAL STANDARD

HN1[] Dismissal of a complaint may be based "on the lack of a cognizable legal theory or the absence of sufficient facts alleged under a cognizable **[*11]** legal theory." *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1990)*. On a motion to dismiss, the Court accepts the facts alleged in the complaint as true. *NL Indus., Inc. v. Kaplan, 792 F.2d 896, 898 (9th Cir. 1986)*.

[1] The motion to amend was set for hearing on March 6, 2009. However, defendants' opposition to the motion to amend centers on the same issues which are decided in this order. Hence, the March 6, 2009 hearing on the motion to amend is VACATED and the motion will be decided in this order.

[2] The Court will issue a separate order on Tatung Company of America, Inc.'s motion to dismiss the direct purchaser plaintiffs' first amended consolidated complaint.

[3] Notwithstanding their entry of guilty pleas to felony violations of *15 U.S.C. § 1*, defendants LG Display Co. Ltd., LG Display America, Inc., and Sharp Corporation have joined in the motions to dismiss the amended complaints for failure to meet the notice pleading requirements of the Federal Rules of Civil Procedure.

HN2[] *Federal Rule of Civil Procedure 8* requires that a complaint contain a "short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)*. **HN3**[] "While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss does not need detailed factual allegations, a plaintiff's obligation to provide the 'grounds' of his 'entitlement to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 1964-65, 167 L. Ed. 2d 929 (2007)*. The complaint must contain sufficient factual allegations "to raise a right to relief above the speculative level." *Id. at 1965*.

DISCUSSION

I. Sufficiency of allegations specific to each defendant

Defendants contend that the amended consolidated complaints do not adequately allege each defendant's role in the alleged conspiracy. Defendants argue that the complaints continue to "lump together" the twenty-six different **[*12]** named defendants in general allegations referring to "defendants," or groups of defendants sorted by country or corporate family. All plaintiffs counter that the new paragraphs added to the amended complaints sufficiently allege each defendant's participation and role in the alleged conspiracy.

The Court finds that the amended consolidated complaints more than adequately allege the involvement of each defendant and put defendants on notice of the claims against them. Contrary to defendants' suggestion, neither **HN4**[] *Twombly* nor the Court's prior order requires elaborate fact pleading. Further, the Supreme Court has recognized that "in complex antitrust litigation," "motive and intent play leading roles," and "the proof is largely in the hands of the alleged conspirators." *Poller v. Columbia Broad. Sys., Inc., 368 U.S. 464, 473, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*. The amended complaints add detail about numerous illicit conspiratorial communications between and among defendants (DP-FACC PP 105-133; IP-SACC PP 130-148), and facts of the guilty pleas entered by four defendants for fixing prices of TFT-LCD. DPF-ACC PP 137-147; IP-SACC PP 189-191. The complaints contain additional specific information about the group and **[*13]** bilateral meetings by which the alleged price-fixing conspiracy was effectuated. The complaints allege that group or "crystal" meetings were attended by employees at three general levels of defendants' corporations, and contains details about the structure and content of these meetings, as well as the types of employees who attended the meetings. DP-FACC PP 106-113; IP-SACC PP 133-141. The complaints allege that the "crystal" meetings were supplemented by bilateral discussions between various defendants about past and future pricing, as well as information about shipments, and that these discussions took the form of in-person meetings, telephone calls, e-mails and instant messages. DP-FACC PP 114-115; IP-SACC PP 142-143. The complaint also alleges which types of meetings the defendants and co-conspirators participated in, and in some instances includes more detail such as the year of a meeting and other meeting participants. *See, e.g*. DP-FACC PP 126-128; IP-SACC PP 144-148.

Defendants complain that the complaints still do not differentiate between related corporate entities. As described in the complaints, the alleged conspiracy was organized at the highest level of the defendant organizations **[*14]** and carried out by both executives and subordinate employees. The complaints allege that the conspiracy was implemented by subsidiaries and distributors within a corporate family, and that "individual participants entered into agreements on behalf of, and reported these meetings and discussions to, their respective corporate families." DP-FACC P 130; *see also* IPS-ACC PP 96, 100. Plaintiffs also allege that "the individual participants in conspiratorial meetings and discussions did not always know the corporate affiliation of their counterparts, nor did they distinguish between the entities within a corporate family." *Id*. The complaints allege a complex, multinational price-fixing conspiracy and, taken as a whole, they sufficiently allege each defendants' participation in that conspiracy, as well as present a factual basis for the allegations of agency. *See In re Static Random Access Memory (SRAM) Antitrust Litig., 580 F. Supp. 2d 896, 904 (N.D. Cal. 2008)* (**HN5**[] "Although Plaintiffs will need to provide evidence of each Defendants' participation in any conspiracy, they now only need to make allegations that plausibly suggest that each Defendant participated in the alleged conspiracy.").

II. [*15] Proper time period

Defendants contend that plaintiffs have not alleged any facts that would support a plausible inference of anticompetitive conduct before 2001. Defendants argue that the complaints allege that the "crystal" meetings only began in 2001, the guilty pleas in the criminal cases only cover the 2001-2006 time period, and that the "price dispersion" charts in the complaints do not show diminished price dispersion consistent with a conspiracy prior to 2001.

Plaintiffs counter that the complaints include numerous allegations about the period prior to 2001, including allegations that beginning in at least 1996, Hitachi, Sharp and Toshiba met or talked with at least one other defendant in order to agree on TFT-LCD product prices and the amount of TFT-LCD products each would produce. DP-FACC P 4; IP-SACC P 130. The complaints also allege indicia of price-fixing and market manipulation, such as unusual pricing practices, prior to 2001. *See, e.g.*, DPF-ACC PP 147, 150, 157; IP-SACC PP 153-157. Plaintiffs also argue that defendants' arguments are misplaced at the pleadings stage of the litigation, and that there are any number of plausible reasons why the criminal guilty pleas would **[*16]** cover the 2001-2006 time period while still allowing for civil liability during the 1996-2001 period, such as criminal statutes of limitation and higher burdens of proof in criminal cases.

The Court finds that the complaints sufficiently allege anticompetitive conduct during the 1996-2001 time period, and will not limit the class period at this stage of the litigation. [4] Whether discovery bears out plaintiffs' allegations regarding the earlier time period is a different matter, and defendants may renew their challenges to the pre-2001 claims upon a fuller factual record.

III. State law claims alleged in indirect purchaser plaintiffs' second amended consolidated complaint

A. Virginia, Montana, and Puerto Rico

The indirect purchaser plaintiffs have alleged claims under the state antitrust laws of Virginia, Montana and Puerto Rico. Defendants move to dismiss **[*17]** these claims on the ground that these state antitrust laws are, pursuant to either statutory harmonization provisions or case law, required to be interpreted in accordance with federal ***antitrust law***. Defendants contend that because indirect purchasers lack standing under federal law pursuant to *Illinois Brick*, and Virginia, Montana and Puerto Rico have not repealed *Illinois Brick* either by statute or case law, the indirect purchaser plaintiffs lack standing here. Defendants note that there are no antitrust cases in Virginia, Montana or Puerto Rico permitting indirect purchasers to bring suit under the state antitrust laws, and that both Judge Alsup and Judge Hamilton have held that indirect purchasers lack standing under similar circumstances. *See* *California v. Infineon Techs. AG, 531 F. Supp. 2d 1124, 1150 (N.D. Cal. 2007)* (indirect purchasers lack standing to seek antitrust damages under Virginia Antitrust Act); *In re Graphics Processing Units Antitrust Litig. ("GPU"), 527 F. Supp. 2d 1011, 1027 (N.D. Cal. 2007)* (stating, in context of striking allegations of nationwide class under California law, that in states that have not repealed *Illinois Brick*, "indirect purchasers are barred **[*18]** from bringing antitrust claims, other than for injunctive relief").

1. Virginia

With regard to Virginia, plaintiffs respond that the state harmonization provision, *Va. Code Ann. § 59.1-9.17*, was enacted prior to *Illinois Brick*, at a time when indirect purchasers had standing under federal law. Thus, plaintiffs

[4] Defendants have also moved to dismiss direct purchaser plaintiff Phelps Technology Inc. on the ground that Phelps' claims arise out of pre-2001 purchases of TFT-LCD panels. Because the Court finds that the complaint's pre-2001 allegations are sufficient, the Court denies defendants' motion to dismiss Phelps Technology Inc. on this ground.

contend that the harmonization provision indicates legislative intent to allow indirect purchaser suits under the then-prevailing federal law. Plaintiffs also argue that the differences between the Virginia statute -- namely the statement of the Virginia statute's purpose, and the fact that treble damages are discretionary under the state statute -- support a determination that Virginia law would permit indirect purchaser suits.

The Court disagrees, and finds that ***HN6***[] in light of Virginia's harmonization provision requiring courts to interpret the Virginia Antitrust Act in harmony with federal law, and the absence of any Virginia authority holding that indirect purchasers have standing under the state statute, indirect purchasers may not seek damages under the Virginia statute. ***HN7***[] Virginia's harmonization statute broadly mandates: "This chapter shall be applied and construed to effectuate **[*19]** its general purposes in harmony with judicial interpretation of comparable federal statutory provisions." *See Va. Code Ann. § 59.1-9.17*; *see also Oksanen v. Page Memorial Hosp., 945 F.2d 696, 710 (4th Cir. 1991)* ("[T]he Virginia Act specifically provides that it is to be interpreted and applied in harmony with federal ***antitrust law***. *Va.Code Ann. § 59.1-9.17*. Because Oksanen has failed to establish his restraint of trade and monopoly claims under federal law, his state law antitrust claims likewise fail."). Once *Illinois Brick* was decided, the Virginia legislature was free to pass an *Illinois Brick* repealer statute, as many states did. Virginia did not, and the Court is required to follow the plain language of the harmonization provision, rather than attempt to divine the legislative intent of the *pre-Illinois Brick* legislature in passing the harmonization provision. ***HN8***[] The Virginia Antitrust Act does not explicitly confer standing on indirect purchaser plaintiffs, and plaintiffs have not cited any Virginia case law suggesting that indirect purchasers have standing under the state statute. Plaintiffs have not articulated any reason why the purported differences between the Virginia statute **[*20]** and the Sherman Act are relevant to the question of indirect purchaser standing. Accordingly, the Court agrees with Judge Hamilton's ruling in *Infineon Technologies, 531 F. Supp. 2d at 1150*, and holds that the indirect purchaser plaintiffs lack standing under the Virginia Antitrust Act. The Court GRANTS defendants' motion to dismiss this claim.

2. Montana

In *Smith v. Video Lottery Consultants, Inc., 260 Mont. 54, 858 P.2d 11 (Mont. 1993)*, ***HN9***[] the Supreme Court of Montana noted that sections of the Montana Unfair Trade Practices Act, *Mont. Code Ann. §§ 30-14-201 et seq*., were modeled after the Sherman Act, and that where "the statutes are similar, we will give due weight to the federal courts' interpretation of this type of alleged antitrust violation." *Id. at 13*. The *Smith* court noted that Montana law differed from the Sherman Act is some respects, such as the Sherman Act's requirement of two or more persons to be involved in an lawful restraint of trade, while one person acting alone may violate the Montana act. *Id. at 11*.

Defendants contend that there is no facial difference between the standing provisions of federal and Montana law, and thus this Court must give "due weight" to *Illinois Brick* and dismiss **[*21]** the indirect purchaser plaintiffs' claims under Montana law. ***HN10***[] The standing provision of the Montana statute allows any "person who is or will be injured" to sue for damages and injunctive relief. *Mont. Code Ann. § 30-14-222*. Section 4 of the Clayton Act, *15 U.S.C. § 15*, allows "any person who shall be injured" to sue for damages and injunctive relief. Plaintiffs respond that *Smith* stands for the proposition that the Montana statute is generally broader than the Sherman Act, and thus that the Court should construe the Montana act to confer standing on indirect purchaser plaintiffs.

In the absence of any Montana authority holding that indirect purchaser plaintiffs have standing under Montana ***antitrust law***, the Court declines to find so. Contrary to plaintiffs' characterization of ***HN11***[] *Smith*, the Supreme Court of Montana did not hold, as a general matter, that the Montana statute is broader than federal law. Instead, the court distinguished between instances when state and federal law differed, and those sections of the Montana statute that were modeled after the Sherman Act. With regard to the latter, the *Smith* court instructed that where "the statutes are similar, we will give due weight to **[*22]** the federal courts' interpretation of this type of alleged antitrust violation." *858 P.2d at 13*. Here, the standing provisions of the Montana act and the Sherman Act are almost identically worded. Plaintiffs have not identified any relevant difference between the two statutes that would require a different result, nor have plaintiffs cited any Montana authority holding that indirect purchaser plaintiffs have standing under Montana law. Accordingly, the Court GRANTS defendants' motion to dismiss the claims under Montana law.

3. Puerto Rico

Defendants similarly contend that plaintiffs' claims under the Puerto Rico Antitrust Act are barred because that statute is to be construed in harmony with federal ***antitrust law***, and there has been no repeal of *Illinois Brick*. Plaintiffs respond that the Puerto Rico legislature has specifically recognized the rights of "consumers" to bring class actions under the Puerto Rico Antitrust Act, and that thus indirect purchasers -- who are consumers -- have standing under the statute. *See 32 L.P.R.A. § 3342* (***HN12***[] "There is recognized the right to merchants, to consumers of goods and services and to the Commonwealth of Puerto Rico to file a class suit on behalf **[*23]** of said merchants or consumers based on the Antitrust Act of the Commonwealth, *§§ 257-274* of Title 10."). Plaintiffs also cite *Arroyo-Melecio v. Puerto Rican American Insurance Co., 398 F.3d 56, 72 (1st Cir. 2005)*, which held that the plaintiff consumers had standing under the Puerto Rico Antitrust Act. However, that case involved a class action brought by consumers of compulsory automobile insurance against insurance companies, and thus the plaintiffs there were not akin to indirect purchasers. Plaintiffs also cite *Comes v. Microsoft Corporation, 646 N.W.2d 440, 448 (Iowa 2002)*, which states in dicta that "In total, nineteen states, the District of Columbia, and Puerto Rico have statutes explicitly authorizing indirect purchasers to maintain an antitrust suit." The *Comes* court does not cite a Puerto Rico statute in support of this statement.

The Court finds, for the same reasons discussed above, that the indirect purchaser plaintiffs lack standing under the Puerto Rico statute. The Court is reluctant to find standing in the absence of an explicit *Illinois Brick* repealer, either by statute or case law. Accordingly, the Court GRANTS defendants' motion to dismiss plaintiffs' claims under **[*24]** the Puerto Rico antitrust statute.

B. Mississippi and Nevada

Defendants move to dismiss the indirect purchaser plaintiffs' state law antitrust claims under Mississippi and Nevada law because plaintiffs have not alleged that any part of defendants' conduct took place in those states. ***HN13***[] Mississippi's antitrust laws prohibit understandings or agreements to "restrain trade," "increase . . . the price of a commodity," or "hinder competition in the production, importation, . . . or sale or purchase of a commodity." *Miss. Code Ann. § 75-21-1*. Defendants note that the indirect purchaser plaintiffs allege that defendants' conduct occurred mainly in the State of California, and that the complaint only alleges *effects* in Mississippi, not *conduct*.

The Court agrees with defendants that ***HN14***[] the Mississippi Antitrust Act requires some allegations of intrastate conduct, but finds that plaintiffs have sufficiently alleged such conduct. The complaint alleges that "LCD price competition was restrained, suppressed, and eliminated throughout Mississippi," "LCD prices were raised, fixed, maintained and stabilized at artificially high levels throughout Mississippi," and that plaintiffs "were deprived of free and **[*25]** open competition" and "paid supracompetitive, artificially inflated prices for LCD." IP-SACC P 269(a). Courts have held that similar allegations are sufficient to state a claim under the Mississippi Act. *See In re Graphics Processing Units Antitrust Litig. ("GPU II"), 540 F. Supp. 2d 1085, 1099 (N.D. Cal. 2007)* (permitting claim under Mississippi law where plaintiffs alleged that defendants' conspiracy substantially affected commerce in state, injured Mississippi residents, defendants promoted products in state and harmed competition in state); *see also Infineon Techs., 531 F. Supp. 2d at 1158-59* (***HN15***[] "the Mississippi Antitrust Act should be construed to require allegations of at least some activity or conduct occurring in intrastate commerce or trade"; dismissing complaint with leave to amend where plaintiffs failed to allege "any activity of any kind -- sales, purchases, or other activities in trade or commerce"). Plaintiffs' allegation that defendants' conduct occurred mainly in California is not inconsistent with alleging anticompetitive conduct in Mississippi. *See Standard Oil Co. of Ky. v. State ex rel. Attorney General, 107 Miss. 377, 65 So. 468 (Miss. 1914)*, *overruled in part on other grounds* ***[*26]*** *sub nom. Mladinich v. Kohn, 250 Miss. 138, 164 So. 2d 785 (Miss. 1964)* (sustaining claim where plaintiffs alleged nationwide conspiracy to monopolize trade in petroleum and petroleum products, no petroleum produced in Mississippi, defendants sold and distributed petroleum products in Mississippi).

Likewise, ***HN16***[] Nevada's ***antitrust law*** states that "[m]onopolization of trade or commerce in this state, including, without limitation, attempting to monopolize or otherwise combining or conspiring to monopolize trade or commerce in this state" constitutes a "contract, combination or conspiracy in restraint of trade, and it is unlawful to conduct any part of such activity in this state." *Nev. Rev. Stat. Ann. § 598A.0601(e)*. Plaintiffs' allegations with regard to Nevada are similar to those for Mississippi. IP-SACC P 271(a). The Court finds these allegations are sufficient to state a claim under the Nevada statute. *See In re Intel Corp. Microprocessor Antitrust Litig., 496 F. Supp. 2d 404, 413-14 (D. Del. 2007)* (denying motion to dismiss Nevada claim where complaint alleged nationwide price-fixing conspiracy and goods sold in Nevada).

Accordingly, the Court DENIES defendants' motion to dismiss plaintiffs' Mississippi **[*27]** and Nevada state law antitrust claims.

C. Michigan, Florida, North Carolina and North Dakota

Defendants argue that plaintiffs' unjust enrichment claims under Michigan, Florida, North Carolina, and North Dakota law must be dismissed because the law of these states require that plaintiffs have conferred a "direct benefit" on defendants, and the indirect purchasers cannot allege such a direct benefit.

1. Michigan

Citing *A & M Supply Co. v. Microsoft Corp., No. 274164, 2008 Mich. App. LEXIS 433, 2008 WL 540883, (Mich. App. Feb. 28, 2008)* (per curiam), defendants contend that Michigan's "highest court" recently held that indirect purchasers in a price-fixing case cannot bring a claim for unjust enrichment because a plaintiff must have conferred a direct benefit upon the defendant. Joint motion at 14; Reply at 12. [5] In *A&M Supply*, the Michigan Court of Appeals (not the Michigan Supreme Court, which is Michigan's highest court), affirmed a trial court's dismissal for failure to prosecute. In an unpublished per curiam decision, the court alternatively held that the lawsuit was subject to dismissal on the merits because, "the unjust enrichment doctrine does not apply under the facts alleged by plaintiff here." *2008 Mich. App. LEXIS 433, [WL] at *2*. **[*28]** The court noted that there was "no [] direct contact between Microsoft and the indirect purchasers in the class they seek to have certified. Nor can they show that Microsoft received any direct payment or other benefit from those purchasers." *2008 Mich. App. LEXIS 433, [WL] at *2*. There is no further discussion of the facts of the case. While *A& M* provides some support for defendants' position, it is hardly the controlling authority that defendants suggest.

Plaintiffs cite several cases, including a Michigan Supreme Court case, for the proposition that they need not allege a direct benefit to defendants to state an unjust enrichment claim in Michigan. *See, e.g., Kammer Asphalt Paving Co., Inc. v. East China Tp. Schools, 443 Mich. 176, 504 N.W.2d 635, 640-41 (Mich. 1993)*; *Morris Pumps v. Centerline Piping, Inc., 273 Mich. App. 187, 729 N.W.2d 898, 904-905 (Mich. Ct. App. 2006)*; *In re Cardizem CD Antitrust Litig., 105 F. Supp. 2d 618, 670-71 (E.D. Mich. 2000)*. These three cases hold that a party can bring an unjust enrichment claim against a defendant even in the absence of privity or a contract **[*29]** between the parties. *In re Cardizem* is the most factually apposite. In that antitrust case, the indirect purchaser plaintiffs "alleged that they conferred a benefit, in the form of overpayments and increased profits, on Defendants, that Defendants accepted that benefit and that it would be unjust under the alleged circumstances for Defendants to retain that benefit." *105 F. Supp. 2d at 671*. The court rejected the defendants' "narrow" argument that a direct benefit was required under Michigan law. ***HN17***[] "Whether or not the benefit is directly conferred on the defendant is not the critical inquiry; rather, the plaintiff must show that his detriment and the defendant's benefit are related and flow from the challenged conduct." *Id*.

[5] Indeed, defendants strenuously argue that plaintiffs' lower court authority should be disregarded because *A&M* was issued by the highest court in Michigan.

Here, plaintiffs' allegations are similar to those alleged in *In re Cardizem*. The Court finds that plaintiffs have stated a claim for unjust enrichment under Michigan law, and DENIES defendants' motion to dismiss this claim.

2. North Carolina

Defendants rely on *Effler v. Pyles, 94 N.C. App. 349, 380 S.E. 2d 149 (N.C. Ct. App. 1989)*, in which the North Carolina Court of Appeals affirmed summary judgment in favor of a defendant because the plaintiff had not shown that she conferred a benefit **[*30]** directly on the defendant. Cases since *Effler*, however, have suggested that *Effler's* holding is narrow, and that there is no requirement of "direct benefit" in cases alleging fraud or civil conspiracy. *See, e.g., Perkins v. Healthmarkets, Inc., No. 06 CVS 21053, 2007 NCBC 25, 2007 NCBC LEXIS 25, 2007 WL 2570242, at *9 (N.C. Super. Ct. July 30, 2007)*. In any event, in affirming the trial court's summary judgment, the *Effler* court relied on the North Carolina Supreme Court's decision in *Booe v. Shadrick, 322 N.C. 567, 369 S.E.2d 554 (N.C. 1988)*. *Booe* did not, however, require that a benefit be direct to state an unjust enrichment claim. ***HN18***[] "In order to establish a claim for unjust enrichment, a party must have conferred a benefit on the other party. The benefit must not have been conferred officiously, that is it must not be conferred by an interference in the affairs of the other party in a manner that is not justified in the circumstances. The benefit must not be gratuitous and it must be measurable." *Booe, 322 N.C. at 570*.

Here, plaintiffs have alleged that they conferred a benefit on defendants by paying higher prices for LCD products than they would have in the absence of the alleged price-fixing conspiracy. The Court finds **[*31]** under *Booe* that these allegations are sufficient to state a claim, and DENIES defendants' motion to dismiss plaintiffs' unjust enrichment claims under North Carolina law.

3. North Dakota

Relying on *Apache Corporation v. MDU Resources Group, Inc., 1999 ND 247, 603 N.W.2d 891, 895 (N.D. 1999)*, defendants move to dismiss the indirect purchaser plaintiffs' unjust enrichment claim under North Dakota law. ***HN19***[] In *Apache*, the North Dakota Supreme Court stated that the doctrine of unjust enrichment "is invoked when a person has and retains money or benefits which in justice and equity belong to another. . . . For a complainant to recover, it is sufficient if another has, without justification, *obtained a benefit at the direct expense* of the [complainant], who then has no legal means of retrieving it." (internal quotations omitted, emphasis added). Apache alleged that it was a third-party beneficiary of contracts between the defendant and a third party, and that when the defendant breached that contract, the defendant was unjustly enriched at Apache's expense. The court affirmed the dismissal of Apache's unjust enrichment claim, noting that "the money MDU saved by breaching its contract with Koch was not a 'benefit **[*32]** at the direct expense of' Apache." *Id. at 895*.

Plaintiffs argue that *Apache* does not establish that a "direct benefit" is a requirement under North Dakota law, and they emphasize language in *Apache* that "the essential element of recovering under a theory of unjust enrichment -- receipt of a benefit by the defendant from the plaintiff which would be inequitable to retain without paying for its value -- is present here." *Id*. (internal quotations and citations omitted). Plaintiffs distinguish *Apache* on the ground that there the plaintiff had not in fact conferred any benefit on the defendant, whereas here plaintiffs do allege that they have conferred a benefit on defendants. Although this factual distinction is correct, the broader language of *Apache* suggests that a "direct benefit" is required under North Dakota law. *See In re Relafen Antitrust Litig., 225 F.R.D. 14, 28 (D. Mass. 2004)* (interpreting *Apache* to require direct benefit and dismissing unjust enrichment claims brought by indirect purchasers). Plaintiffs have not cited any authority holding that North Dakota law does not require a direct benefit, and in the face of *Apache*, the Court is inclined to agree with defendants.

Accordingly, **[*33]** the Court GRANTS defendants' motion to dismiss plaintiffs' unjust enrichment claims under North Dakota law.

D. Unjust enrichment-- Arkansas, Virginia, Montana and Puerto Rico

Defendants move to dismiss plaintiffs' unjust enrichment claims under Arkansas, Virginia, Montana and Puerto Rico law, arguing that plaintiffs are improperly attempting to circumvent the antitrust laws of those jurisdictions, under which they lack antitrust standing. [6] Defendants contend that plaintiffs may not circumvent the restrictions on antitrust claims under Arkansas, Virginia, Montana and Puerto Rico law by reframing those claims as unjust enrichment actions, and they cite a number of cases which stand for that general proposition. *See, e.g., In re Microsoft Corp. Antitrust Litig., 401 F. Supp. 2d 461, 464 (D. Md. 2005)* ("[T]he specific bar on indirect purchaser recovery incorporated into South Carolina's antitrust statutes prohibits Plaintiff's general common-law [unjust enrichment] claim."); *In re New Motor Vehicles Canadian Export Antitrust Litig., 350 F. Supp. 2d 160, 211 (D. Me. 2004)* (***HN20***[] "For those states that have maintained the *Illinois Brick* prohibition on indirect purchaser recovery, I conclude that **[*34]** it would subvert the statutory scheme to allow these same indirect purchasers to secure, for the statutory violation, restitutionary relief at common law (or in equity)."); *see also GPU II, 540 F. Supp. 2d at 1100* (allowing plaintiffs to maintain unjust enrichment claims because they have "excised unjust-enrichment claims for states that do not recognize antitrust remedies for indirect purchasers, so this claim is no longer attempting to circumvent the laws of states that do not recognize claims for damages by indirect purchasers.").

Plaintiffs rely on *In re Cardizem* to argue that in that case, "defendants made a similar argument that plaintiff indirect purchasers could not proceed with unjust enrichment claims in states where they could not recover under **[*35]** the state's antitrust or consumer protection laws," and that the court "resoundly rejected" that argument. Indirect Purchasers' Opposition at 19. In fact, in *In re Cardizem*, the defendants moved to dismiss state law antitrust claims on a variety of grounds, but did not contend that indirect purchaser plaintiffs lacked antitrust standing based on *Illinois Brick* and harmonization with federal law. *See generally, In re Cardizem, 105 F. Supp. 2d at 645* (antitrust injury); *659* (whether state law claims preempted by Hatch-Waxman Act); *664* (whether state claims required court to enforce FTC consent decree); *665-68* (whether Wisconsin and Tennessee antitrust statutes require wholly intrastate conduct). Further, the *In re Cardizem* court *denied* the defendants' motion to dismiss the state antitrust claims. The *Cardizem* defendants moved to dismiss the state unjust enrichment claims arguing first "that Plaintiffs' unjust enrichment claims are dependent upon the allegations supporting their state law antitrust claims and thus suffer from the same flaws that preclude Plaintiffs from stating an antitrust claim." *Id. at 669*. It is within this context that the court denied the motion to dismiss, holding **[*36]** "[t]he first of Defendants' arguments fails to read Plaintiffs' complaint in the light most favorable to Plaintiffs and confuses Plaintiffs' right to recover an equitable remedy under a common law claim based upon principles of unjust enrichment with its right to recover a remedy at law for an alleged violation of a state's antitrust laws." *Id*. Contrary to plaintiffs' suggestion, ***HN22***[] the *Cardizem* court did not hold that indirect purchaser plaintiffs who lacked standing under a state antitrust statute could repackage that claim as an unjust enrichment claim.

Plaintiffs also cite *D.R. Ward Construction Company v. Rohm & Haas Co., 470 F. Supp. 2d 485 (E.D. Pa. 2006)*. There, the defendants moved to dismiss unjust enrichment claims under Tennessee, Arizona and Vermont law, and argued that "in jurisdictions which possess antitrust statutes conferring standing on indirect purchasers, an indirect purchaser may only bring a statutory claim for alleged anti-competitive behavior." *Id. at 506*. The defendants also argued that if the plaintiffs' state antitrust claims were defective, the plaintiffs could not recover restitution through an unjust enrichment claim based on the same predicate wrong. *Id*. **[*37]** The court rejected the defendants' arguments and permitted the three state unjust enrichment claims, holding that "the viability of these claims does not hinge upon the success of the state statutory antitrust claims." *Id*. However, unlike the situation presented here, and as the *D.R. Ward* court noted "most importantly" in reaching its conclusion, "Tennessee, Arizona, and Vermont all permit indirect purchasers to pursue antitrust claims; thus, an unjust enrichment claim would not circumvent the

---

[6] Defendants contend -- and plaintiffs do not disagree -- that plaintiffs do not have standing to seek relief under Arkansas ***antitrust law*** because ***HN21***[] that law only permits predatory pricing claims alleging that items were sold "at less than cost" and does not create a private right of action for an alleged conspiracy to raise prices. *See Ark. Code Ann. § 4-75-310*; *see also FTC v. Mylan Lab., Inc.., 62 F. Supp. 2d 25, 44-45 (D.D.C. 1999)*.

procedural and substantive limitations of these antitrust statutes." *Id. at 507*. Thus, rather than supporting plaintiffs' position, *D.R. Ward* undermines it.

Here, plaintiffs have not cited any authority from Arkansas, Virginia, Montana or Puerto Rico holding that an indirect purchaser plaintiff may bring an unjust enrichment claim when that same claim would be barred under state ***antitrust law***. In the absence of such authority, the Court declines to recognize such a claim because the Court agrees with defendants that permitting such claims would allow plaintiffs to circumvent limitations of state antitrust laws.

E. Unjust enrichment-- Tennessee and Florida

7

Defendants argue that plaintiffs' unjust enrichment claims under Tennessee law must be dismissed because plaintiffs have not alleged that they first exhausted their administrative remedies. ***HN23***[] Under Tennessee law, a plaintiff must demonstrate that he or she has exhausted "all remedies against the person with whom the plaintiff enjoyed privity of contract." *Freeman Indus., LLC v. Eastman Chemical Co., 172 S.W. 3d 512, 525 (Tenn. 2005)*. However, "to maintain an action for unjust enrichment, a plaintiff is not required to exhaust all remedies against the party with whom the plaintiff is in privity if the pursuit of the remedies would be futile." *Id. at 526*.

Plaintiffs respond that futility is self-evident in these circumstances where the alleged pricefixing was done by the defendants in the manufacture of LCD panels and LCD products, and there has been no allegation that the resellers were involved in the conspiracy. The Court agrees that under the facts alleged in the complaint, futility is evident. Accordingly, the Court DENIES defendants' **[*39]** motion to dismiss the Tennessee claim.

CONCLUSION

For the foregoing reasons, the Court hereby DENIES defendants' motions to dismiss the direct purchaser plaintiffs' first amended complaint, and GRANTS IN PART AND DENIES IN PART defendants' motions to dismiss the indirect purchaser plaintiffs' second amended complaint. (Docket Nos. 769, 771, 777, 778, 779, 782). The Court GRANTS the direct purchaser plaintiffs' motion to amend the complaint, and VACATES the March 6, 2009 hearing scheduled for that motion. (Docket No. 806). The direct purchaser plaintiffs shall file the amended complaint by **March 13, 2009**.

IT IS SO ORDERED.

Dated: March 3, 2009

/s/ Susan Illston

SUSAN ILLSTON

United States District Judge

End of Document

---

[7] As previously indicated, plaintiffs **[*38]** have agreed to dismiss their Florida unjust enrichment claims. Therefore, the Court need not address the issue of exhaustion of remedies as to Florida law.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **In Personam Actions, Challenges**

Motions to dismiss for lack of personal jurisdiction under *Fed. R. Civ. P. 12(b)(2)*, like those for failure to state a claim under *Rule 12(b)(6)*, require the court to accept as true the allegations of the pleadings and all reasonable inferences therefrom. However, unlike *Rule 12(b)(6)*, *Rule 12(b)(2)* does not limit the scope of the court's review to the face of the pleadings. Consideration of affidavits submitted by the parties is appropriate and, typically, necessary.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Challenges

Evidence > Burdens of Proof > Initial Burden of Persuasion

Evidence > Burdens of Proof > Preponderance of Evidence

HN2[] **In Personam Actions, Challenges**

Although plaintiffs bear the ultimate burden of proving personal jurisdiction by a preponderance of the evidence, such a showing is unnecessary at the preliminary stages of litigation. Rather, the plaintiffs must merely allege sufficient facts to establish a prima facie case of jurisdiction over the person. Once these allegations are contradicted by an opposing affidavit, however, the plaintiffs must present similar evidence in support of personal jurisdiction.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Challenges

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN3[] **In Personam Actions, Challenges**

At no point may a plaintiff rely on the bare pleadings alone in order to withstand a defendant's *Fed. R. Civ. P. 12(b)(2)* motion to dismiss for lack of in personam jurisdiction. Once the motion is made, the plaintiff must respond with actual proofs, not mere allegations. When the plaintiff responds with affidavits or other evidence in support of its position, however, the court is bound to accept these representations and defer final determination as to the merits of the allegations until a pretrial hearing or the time of trial.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Challenges

Evidence > Burdens of Proof > Initial Burden of Persuasion

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Evidence > Burdens of Proof > Ultimate Burden of Persuasion

HN4[] **In Personam Actions, Challenges**

If a party moving to dismiss for lack of personal jurisdiction fails to submit evidence contravening the allegations of the complaint, the court is bound to accept the plaintiff's allegations regardless of whether the plaintiff presents further evidence in support thereof. Unless the court hears evidence on the jurisdictional issues, all allegations must be taken as true for purposes of assessing whether the plaintiff has established a prima facie case of jurisdiction. In other words, although the burden of persuasion always lies with the non-moving party, the burden of production rests initially with the party moving for dismissal under *Fed. R. Civ. P. 12(b)(2)*.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Substantial Contacts

HN5[] **In Personam Actions, Minimum Contacts**

A federal court entertaining a suit must possess one of two forms of personal jurisdiction over each defendant. The first type of jurisdiction, known as specific jurisdiction, requires that the plaintiff's claim arise from the defendant's contacts with the forum in which the court sits. In contrast, the court may exercise general jurisdiction over a defendant who possesses systematic and continuous contacts with the forum regardless of whether the plaintiff's claim derives from the defendant's in-forum activities. The court must determine whether to exercise either form of jurisdiction in light of the relationship among the defendant, the forum, and the litigation.

Antitrust & Trade Law > Sherman Act > Jurisdiction

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > Constitutional Limits

HN6[] Sherman Act, Jurisdiction

When a statute such as the Sherman Act permits nationwide service of process, the *Fifth Amendment Due Process Clause* guides a court's personal jurisdiction inquiry.

Antitrust & Trade Law > Sherman Act > Jurisdiction

Antitrust & Trade Law > Clayton Act > Jurisdiction

HN7[] Sherman Act, Jurisdiction

Section 12 of the Clayton Act, *15 U.S.C.S. § 22*, authorizes nationwide service of process in antitrust cases, including those brought under *15 U.S.C.S. § 1* of the Sherman Act.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN8[] In Personam Actions, Minimum Contacts

Specific jurisdiction allows a court to adjudicate claims related to the defendants' contacts with the forum.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Placement of Product in Commerce

Torts > Procedural Matters > Commencement & Prosecution > In Personam Jurisdiction

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Purposeful Availment

HN9[] In Personam Actions, Placement of Product in Commerce

Three alternative theories allow a court to acquire specific jurisdiction over a defendant. First, under principles of purposeful availment, the court may exercise jurisdiction over a defendant that has directed its activities into a forum, thereby producing the alleged injury. Second, the stream-of-commerce theory provides jurisdiction over an out-of-forum defendant if plaintiff's in-forum injury arises from a product that defendant placed into channels of commerce. Third, the effects test announced in Calder v. Jones confers jurisdiction over a defendant whose tortious conduct performed outside the forum produced effects within the forum.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Purposeful Availment

HN10[] In Personam Actions, Minimum Contacts

Under purposeful availment doctrine, a court may exercise specific jurisdiction if (1) the defendant purposefully directs its activities into a forum, (2) the case arises from those activities, and (3) the exercise of jurisdiction comports with fair play and substantial justice. The purposeful availment and relatedness inquiries are often described collectively as requiring "minimum contacts" between the defendant and the relevant forum. If a federal statute authorizes nationwide service of process, the court appraises the defendant's contacts with the United States as a whole.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Purposeful Availment

HN11[] In Personam Actions, Purposeful Availment

The first component of the jurisdictional inquiry assays whether a defendant availed himself of the privilege of conducting activities within the forum. It requires the defendant to invoke the forum's laws by performing a volitional act directed toward the forum.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Purposeful Availment

HN12[] In Personam Actions, Purposeful Availment

To establish specific personal jurisdiction, a plaintiff's claim must arise from one of the defendant's forum-related activities. The inquiry ensures that the defendant's "jurisdictional exposure" remains proportionate to its in-forum activities. The cost of enjoying the benefits of a forum is specific jurisdiction. The link between the defendant's action and the plaintiff's claim need not rise to the level of proximate causation, but the connection must be intimate enough to keep the quid pro quo between in-forum activity and jurisdictional exposure proportional and personal jurisdiction reasonably foreseeable.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN13[] In Personam Actions, Minimum Contacts

Minimum contacts alone will not confer personal jurisdiction over a defendant. The plaintiff must also establish that the exercise of jurisdiction harmonizes with traditional notions of fair play and substantial justice. At this stage of the analysis, the court evaluates the reasonableness of jurisdiction in light of a variety of interests, including burden that litigation places on the defendant, the forum's interest in the litigation, plaintiff's interest in obtaining convenient relief, the interest of the interstate judicial system in efficient resolution of controversies, and the shared interests of the several states in furthering fundamental substantive social policies. No single factor is dispositive of the jurisdictional analysis. A court rejects any talismanic jurisdictional formulas. In federal question cases, when concerns of comity among the states are less pronounced, courts should consider the policies of the federal laws from which the dispute arises.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Evidence > Burdens of Proof > General Overview

HN14[] In Personam Actions, Minimum Contacts

While minimum contacts alone are insufficient to support personal jurisdiction, a defendant that possesses minimum contacts must make a compelling case that litigation in the forum state would be unreasonable and unfair to prevent jurisdiction from attaching.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Challenges

Evidence > Burdens of Proof > General Overview

HN15[] In Personam Actions, Challenges

When defendants challenge personal jurisdiction and have supplied affidavits in support of their motions, the plaintiffs incur the burden of rebutting the defendants' assertions through sworn affidavits or other competent evidence.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Challenges

Evidence > Burdens of Proof > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN16[] In Personam Actions, Challenges

Fed. R. Civ. P. 12(b)(2) motions require that plaintiffs establish personal jurisdiction as to each particular corporate defendant. The specific jurisdiction determination is both claim-specific and defendant-specific. The plaintiffs will be required to demonstrate that each of the defendants individually possesses sufficient contacts with the forum to warrant exercise of personal jurisdiction regardless of whether their corporate families, considered as a whole, possess such contacts.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN17[] Regulated Practices, Price Fixing & Restraints of Trade

A plaintiff cannot hold a manufacturer liable for a price-fixing harm occurring after the product left the manufacturer's hands absent a showing that the manufacturer retained control over product pricing.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

HN18[] In Personam Actions, Minimum Contacts

Specific jurisdiction requires a plaintiff's injury to be related and proportional to the defendant's in-forum activities.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Challenges

Evidence > Burdens of Proof > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN19[] In Personam Actions, Challenges

Upon a motion to dismiss, although all allegations in the complaint are taken as true, a plaintiff may not solely rely on bare pleadings to satisfy his jurisdictional burden.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Placement of Product in Commerce

HN20[] In Personam Actions, Placement of Product in Commerce

The stream-of-commerce theory generally allows a court to exercise personal jurisdiction over a defendant that directs its products into a forum.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Placement of Product in Commerce

HN21[] In Personam Actions, Placement of Product in Commerce

As a specific jurisdiction doctrine the stream-of-commerce theory requires that a plaintiff's claim arise out of the flow of the defendant's products into the forum. Specific jurisdiction requires a link between the defendant's activity directed in the forum and the plaintiff's harm.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Placement of Product in Commerce

HN22[] In Personam Actions, Placement of Product in Commerce

The stream-of-commerce test for jurisdiction is met if a nonresident's product is purchased by or delivered to a consumer in the forum state, so long as the nonresident's conduct and connection with the forum state are such that he should reasonably anticipate being haled into court there for claims arising out of that conduct.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Placement of Product in Commerce

HN23[] In Personam Actions, Placement of Product in Commerce

The basic theory of the stream-of-commerce analysis is one of foreseeability: One who puts a product into the stream of commerce in such a fashion as to reasonably foresee its sale in a certain jurisdiction cannot complain of having to defend against claims in that jurisdiction arising out of the product's presence there.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Placement of Product in Commerce

HN24[] In Personam Actions, Minimum Contacts

Stream-of-commerce jurisdiction must comport with notions of fair plan and substantial justice. Even if a defendant has the requisite minimum contacts with the forum, other factors may militate against exercising jurisdiction.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Placement of Product in Commerce

Torts > Products Liability > General Overview

HN25[] **In Personam Actions, Placement of Product in Commerce**

Originally developed in the products liability context, courts have extended the stream-of-commerce doctrine to a variety of cases in which the plaintiff's claims are directly related to particular characteristics of the defendant's product or to the defendants' act of shipping the product into the forum.

Antitrust & Trade Law > Sherman Act > Jurisdiction

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Placement of Product in Commerce

Antitrust & Trade Law > Clayton Act > Jurisdiction

HN26[] **Sherman Act, Jurisdiction**

No antitrust case has been identified imposing jurisdiction upon a defendant that simply shipped products into a forum and lacked control over in-forum pricing.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Torts > Procedural Matters > Commencement & Prosecution > In Personam Jurisdiction

HN27[] **In Rem & Personal Jurisdiction, In Personam Actions**

A plaintiff may predicate specific jurisdiction upon a defendant's activities outside of the relevant forum if the plaintiff suffered the effects of the conduct within the forum. Often denominated the "Calder effects test" after the U.S. Supreme Court decision from which it derives, this form of specific jurisdiction requires the plaintiff to establish: (1) the defendant committed an intentional tort; (2) the plaintiff felt the brunt of the harm in the forum such that the forum can be said to be the focal point of the harm suffered by the plaintiff as a result of the tort; and (3) the defendant expressly aimed his tortious conduct at the forum such that the forum can be said to be the focal point of the tortious activity. To satisfy the final element of the test, the plaintiff must (a) demonstrate that the defendant knew that the plaintiff would suffer the brunt of the harm caused by the tortious conduct in the forum and (b) point to specific activity indicating that the defendant expressly aimed its tortious conduct at the forum. A plaintiff may rely upon the Calder effects test to acquire jurisdiction over a defendant in cases involving business torts, including price fixing.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Substantial Contacts

HN28[] **In Personam Actions, Substantial Contacts**

General jurisdiction arises when a defendant possesses continuous and systematic contacts with the forum. It empowers a court to hear any claim against a defendant regardless of the claim's relationship to the defendant's in-forum contacts.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Substantial Contacts

HN29[] **In Personam Actions, Substantial Contacts**

If general jurisdiction exists, the contacts between the defendant and the forum need not be specifically related to the underlying cause of action in order for an exercise of personal jurisdiction over the defendant to be proper.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Substantial Contacts

HN30[] **Piercing the Corporate Veil, Alter Ego**

A court may acquire general jurisdiction over a defendant under two alternative theories. First, a court may obtain jurisdiction over any defendant that exhibits systematic and continuous contacts with the forum. Second, a court, already imbued with general jurisdiction over a corporation, may obtain jurisdiction over an affiliated entity when the two companies have fully integrated their operations and function as a single, unified entity. The latter doctrine is frequently identified as alter ego jurisdiction.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Substantial Contacts

HN31[] **In Personam Actions, Substantial Contacts**

A defendant must possess significantly more than mere minimum contacts to support exercise of general jurisdiction; rather, the defendant's contacts with the forum must be systematic and continuous. The court must evaluate the nature and quality of a defendant's contacts in light of factors such as whether the defendant sells products, maintains a sales staff, derives significant revenue from, or advertises in the forum. Other activities favoring general jurisdiction include holding a business license, filing tax returns or administrative reports, owning land or personal property, purchasing products, or employing an agent in the forum.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN32[] **In Rem & Personal Jurisdiction, In Personam Actions**

Execution of a contract with a forum resident is alone insufficient to subject a defendant to the court's jurisdiction.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Substantial Contacts

HN33[] **In Personam Actions, Substantial Contacts**

Issuance of American Depository Receipts does not support general jurisdiction without additional in-forum contacts.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Substantial Contacts

Patent Law > Jurisdiction & Review > Personal Jurisdiction & Venue > Foreign Defendants

HN34[] **In Personam Actions, Substantial Contacts**

Ownership of a United States patent, without more, cannot support the assertion of personal jurisdiction over a foreign patentee in any state besides the District of Columbia.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Doing Business

HN35[] **In Personam Actions, Doing Business**

Mere purchases, even if occurring at regular intervals, are not enough to warrant a state's assertion of in personam jurisdiction over a nonresident corporation in a cause of action not related to those purchase transactions.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Substantial Contacts

HN36[] **In Personam Actions, Minimum Contacts**

A non-resident's contracting with a forum resident, without more, is insufficient to establish the requisite minimum contacts for specific or general jurisdiction.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Mergers & Acquisitions Law > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Substantial Contacts

HN37[] **In Personam Actions, Minimum Contacts**

A holding company's acquisition of a domestic entity may confer specific jurisdiction in actions related to the transaction, but they do not support general jurisdiction in the absence of additional contacts with the forum.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Substantial Contacts

HN38[] **In Personam Actions, Substantial Contacts**

It is illogical to predicate general jurisdiction upon a defendant's employment of attorneys to effectuate transactions that fail ex proprio vigore to establish such jurisdiction.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Doing Business

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Substantial Contacts

HN39[] **In Personam Actions, Doing Business**

Business visits and purchases within a forum, even if occurring at regular intervals, are not enough to support general jurisdiction over a defendant.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Substantial Contacts

HN40[] **Piercing the Corporate Veil, Alter Ego**

A court may exercise general jurisdiction over a foreign corporation if it possesses jurisdiction over a parent or subsidiary and the two companies operate de facto as a single, organic entity. The applicability of alter ego jurisdiction depends upon whether (1) the parent owns all or a significant majority of the subsidiary's stock; (2) commonality of officers or directors exists between the two corporations; (3) the corporate family possesses a unified marketing image, including common branding of products; (4) corporate insignias, trademarks, and logos are uniform across corporate boundaries; (5) corporate family members share employees; (6) the parent has integrated its sales and distribution systems with those of its subsidiaries; (7) the corporations exchange or share managerial or supervisory personnel; (8) the subsidiary performs business functions that would ordinarily be handled by a parent corporation; (9) the parent uses the subsidiary as a marketing division or as an exclusive distributor; and (10) the parent exercises control or provides instruction to the subsidiary's officers and directors. No single factor is dispositive, and the court may consider all relevant evidence to determine whether the parent exercises actual control over a subsidiary beyond that which is characteristic of a usual parent-subsidiary relationship.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Inadequate Capitalization

HN41[] **Piercing the Corporate Veil, Alter Ego**

Alter ego factors developed in the corporate veil-piercing context, such as gross undercapitalization and extensive parental control, are also relevant to the personal jurisdictional analysis.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Doing Business

HN42[] **Piercing the Corporate Veil, Alter Ego**

A plaintiff may invoke alter ego jurisdiction against nonresident corporations upon a finding that either the "dominant" or "subservient" corporation does business within the forum.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN43[] Piercing the Corporate Veil, Alter Ego

Courts evaluate alter egos in the veil-piercing context by reference to factors such as undercapitalization of a subsidiary, failure to observe corporate formalities, nonpayment of dividends, insolvency of the debtor corporation, siphoning of funds from the debtor corporation by the dominant stockholder, nonfunctioning of officers and directors, absence of corporate records, and whether the corporation is merely a facade for the operations of the dominant stockholder. These factors also affect the alter ego jurisdictional analysis but do not preclude consideration of other indicia of corporate control.

Business & Corporate Law > ... > Shareholder Duties & Liabilities > Piercing the Corporate Veil > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN44[] Shareholder Duties & Liabilities, Piercing the Corporate Veil

The factors considered in deciding whether to pierce the corporate veil for liability purposes are similar to the factors considered in deciding whether to pierce the corporate veil in the jurisdictional context, but a court should address all relevant factors when resolving questions of jurisdiction. The court should examine all relevant factors that relate to the intimacy of the relationship between the parent and subsidiary.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Doing Business

Computer & Internet Law > Civil Actions > Jurisdiction > General Overview

HN45[] In Personam Actions, Doing Business

A website may support exercise of jurisdiction if a defendant intentionally interacts with the forum via the web site. Websites that passively furnish information do not confer jurisdiction over the defendant, whereas sites that allow users to purchase goods or services generally provide a jurisdictional anchor. A defendant's conscious choice to conduct business with residents of a forum state via its website is pivotal to this inquiry.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN46[] Piercing the Corporate Veil, Alter Ego

Alter ego jurisdiction does not arise merely because a parent corporation refers to its subsidiaries as corporate divisions.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > Corporate Formalities

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN47[] Alter Ego, Corporate Formalities

Defendants cannot be subject to alter ego jurisdiction without additional evidence that they have beclouded corporate boundaries and that two or more affiliated entities are de facto one.

Business & Corporate Law > ... > Piercing the Corporate Veil > Alter Ego > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Doing Business

HN48[] **Piercing the Corporate Veil, Alter Ego**

Alter ego jurisdiction does not attach merely because a parent corporation participates in its subsidiary's business.

Civil Procedure > Discovery & Disclosure > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN49[] **Civil Procedure, Discovery & Disclosure**

A plaintiff who fails to establish a prima facie case of personal jurisdiction may request a period of limited discovery for the purpose of obtaining further jurisdictional evidence. Courts are to assist the plaintiff by allowing jurisdictional discovery unless the plaintiff's claim is clearly frivolous. The plaintiffs must identify particular facts that demonstrate the likelihood of contacts sufficient to corral the defendants within the court's jurisdiction.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Doing Business

Civil Procedure > Discovery & Disclosure > General Overview

HN50[] **In Personam Actions, Doing Business**

General allegations that the defendants transact business within the forum do not entitle plaintiffs to jurisdictional discovery; the plaintiffs must produce evidence suggesting that discovery will bear fruit.

Civil Procedure > Discovery & Disclosure > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN51[] **Civil Procedure, Discovery & Disclosure**

Jurisdictional discovery is inappropriate if it constitutes a "fishing expedition" to procure evidence in support of a plaintiff's claim.

Civil Procedure > Discovery & Disclosure > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN52[] Civil Procedure, Discovery & Disclosure

A court weighing a jurisdictional discovery request must accept the plaintiff's allegations as true, and construe disputed facts in favor of the plaintiff. The court should generally permit jurisdictional discovery prior to dismissing a defendant for lack of personal jurisdiction.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN53[] Motions to Dismiss, Failure to State Claim

Fed. R. Civ. P. 12(b)(6) provides for the dismissal of complaints that fail to state a claim upon which relief can be granted.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Inferences & Presumptions > Inferences

HN54[] Motions to Dismiss, Failure to State Claim

When ruling on a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, a court must accept as true all factual allegations in the complaint and all reasonable inferences that can be drawn therefrom, and view them in the light most favorable to the plaintiff. Although the court is generally limited in its review to the facts in the complaint, it may also consider matters of public record, orders, exhibits attached to the complaint and items appearing in the record of the case.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN55[] Complaints, Requirements for Complaint

Federal notice and pleading rules require a complaint to give the defendant notice of what the claim is and the grounds upon which it rests. The plaintiff must present facts that, if true, demonstrate a plausible right to relief. *Fed. R. Civ. P. 8(a)* states that the complaint should include a short and plain statement of the claim showing that the pleader is entitled to relief. Plaintiffs are required to allege facts sufficient to raise a right to relief above the speculative level.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN56[] Motions to Dismiss, Failure to State Claim

Courts should not dismiss a complaint for failure to state a claim if it contains enough factual matter (taken as true) to suggest a required element. This does not impose a probability requirement at the pleading stage, but instead simply calls for enough facts to raise a reasonable expectation that discovery will reveal evidence of the necessary element. Under this liberal pleading standard, courts should generally grant plaintiffs leave to amend their claims before dismissing a complaint that is merely deficient.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN57[] Sherman Act, Claims

15 U.S.C.S. § 1 of the Sherman Act proscribes contracts, combinations or conspiracies, in restraint of trade or commerce. *15 U.S.C.S. § 1*. A *§ 1* claim requires the plaintiff to demonstrate that the defendants engaged in unlawful, concerted activity that both produced anticompetitive effects in the relevant market and resulted in harm to the plaintiff.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN58[] Sherman Act, Claims

The existence of an agreement is an essential component of any *15 U.S.C.S. § 1* claim. A plaintiff must establish that the defendants possessed a "conscious commitment" to a common scheme contrived for the purpose of advancing an unlawful objective such as fixing prices.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Evidence > Inferences & Presumptions > Inferences

HN59[] Sherman Act, Claims

At the pleading stage, a plaintiff's complaint under *15 U.S.C.S. § 1* of the Sherman Act must aver facts creating a plausible inference that the defendants entered an agreement to restrain trade. The plaintiff must raise a reasonable expectation that discovery will reveal evidence of an illegal agreement.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN60[] Complaints, Requirements for Complaint

Sufficiency of a complaint depends upon the particular facts alleged and the context in which they appear. The complaint must, when evaluated macroscopically, raise a plausible right to relief and notify the defendants of the ground from which it arises.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Inferences & Presumptions > Inferences

HN61[] Sherman Act, Claims

Mere averments of parallel conduct by the defendants are inadequate to state a 15 U.S.C.S. § 1 claim because such action may reflect either an anticompetitive agreement or independent, competitive activity. Rather, the plaintiff must allege a factual framework sufficient to nudge the claims across the line from conceivable to plausible. Any plaintiff may raise this inference of plausibility through allegations that contextually suggest an anticompetitive agreement.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Inferences & Presumptions > Inferences

HN62[] Sherman Act, Claims

For purposes of a claim under 15 U.S.C.S. § 1 of the Sherman Act, various market characteristics raise an inference of plausibility when juxtaposed with parallel conduct. For example, a plaintiff may aver that the relevant market is ripe for collusion due to the presence of oligarchic sellers, diffuse buyers, prohibitive entry barriers, and standardized products. Allegations that demand is in decline, that the market features high fixed costs, or that competitors possess excess capacity may also implicate an agreement when joined with averments of anticompetitive or parallel conduct. The court should also consider whether the alleged collusion makes economic sense.

Antitrust & Trade Law > Sherman Act > Claims

HN63[] Sherman Act, Claims

For purposes of a claim under 15 U.S.C.S. § 1 of the Sherman Act, allegations of observed conduct--actual forbearance from competition for customers, parallel price increases, and excess production capacity--are placed among other factual allegations that plausibly suggest a preceding agreement.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > International Aspects > Foreign Trade Antitrust Improvements Act

HN64[] Sherman Act, Claims

The Foreign Trade Antitrust Improvement Act of 1982 (FTAIA), 15 U.S.C.S. § 6a, does not foreclose consideration of defendants' conduct in a foreign country for purposes of Fed. R. Civ. P. 12(b)(6) motions to dismiss a claim under 15 U.S.C.S. § of the Sherman Act. The FTAIA places foreign anticompetitive conduct beyond the reach of the Sherman Act if it adversely affects only foreign markets. It does preclude a Sherman Act claim based upon foreign conduct that has a direct, substantial, and reasonably foreseeable effect on domestic commerce.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN65[] Motions to Dismiss, Failure to State Claim

Unlike *Fed. R. Civ. P. 12(b)(2)* challenges, a *Rule 12(b)(6)* motion restricts a court's review to the face of the complaint and documents upon which it relies.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN66[] **Class Actions, Certification of Classes**

Courts generally address challenges to standing as threshold matters. In class actions, however, the U.S. Supreme Court has crafted an exception to this general rule: Courts may evaluate class certification issues before U.S. Const. art. III standing concerns if the former are logically antecedent to the latter.

Civil Procedure > ... > Class Actions > Class Members > Absent Members

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

Civil Procedure > ... > Justiciability > Standing > General Overview

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN67[] **Class Members, Absent Members**

The Ortiz exception to the rule that challenges to standing are addressed as threshold matters appears to rest on the long-standing rule that, once a class is properly certified, statutory and U.S. Const. art. III standing requirements must be assessed with reference to the class as a whole, not simply with reference to the individual named plaintiffs. Accordingly, *Fed. R. Civ. P. 23* certification should be addressed first in those cases where it is the possibility of class certification that gives rise to the jurisdictional issue as to standing. Stated differently, the Ortiz exception treating class certification as the antecedent consideration does not apply if the standing issue would exist regardless of whether the named plaintiff filed his claim alone or as part of a class.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Constitutional Law > ... > Case or Controversy > Standing > Particular Parties

HN68[] **Class Actions, Certification of Classes**

Ortiz allows a court to defer ruling on U.S. Const. art. III standing issues when they are circumscribed by the act of certifying a class.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

Civil Procedure > Special Proceedings > Class Actions > General Overview

HN69[] **Private Actions, State Regulation**

New York law prohibits a plaintiff from maintaining a class action under any statutory claim that imposes a penalty or minimum recovery. N.Y. C.P.L.R. 901(b). The Donnelly Act imposes such penalties and cannot be advanced on behalf of a class. N.Y. Gen. Bus. Law § 340(5) provides for treble damages.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN70[] Regulated Practices, Price Fixing & Restraints of Trade

The Nevada Unfair Trade Practices Act proscribes anticompetitive conduct including price fixing and renders it unlawful to conduct any part of any such activity within the state. Nev. Rev. Stat. § 598A.060(1). Hence, the statute creates a remedy against an interstate conspiracy that produces harm in Nevada.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN71[] Regulated Practices, Price Fixing & Restraints of Trade

See S.D. Codified Laws § 37-1-3.1.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN72[] Regulated Practices, Price Fixing & Restraints of Trade

The statutory language of S.D. Codified Laws § 37-1-3.1 is ambiguous as to whether it is a part of the conspiracy or a part of the trade or commerce that must be within the state. Courts have resolved this ambiguity by adopting the latter statutory interpretation. Therefore, a plaintiff must allege only that a defendant's conduct produced anticompetitive effects within South Dakota.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN73[] Regulated Practices, Price Fixing & Restraints of Trade

The Tennessee Trade Practices Act forbids all arrangements which tend to lessen full and free competition in the importation or sale of articles imported into the state or which tend to advance, reduce, or control the price of any such product or article. Tenn. Code Ann. § 47-25-101. Substantial effects of the defendant's allegedly anticompetitive conduct must be felt within the state.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN74[] **Regulated Practices, Price Fixing & Restraints of Trade**

The Tennessee Trade Practices Act creates a claim against all anticompetitive conduct that decreases competition in or increases the price of goods paid by consumers in Tennessee regardless of whether the goods arrive in consumers' homes exclusively through intrastate means.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN75[] **Regulated Practices, Price Fixing & Restraints of Trade**

The West Virginia Antitrust Act (WVAA) outlaws conspiracies in restraint of trade or commerce in the state. *W. Va. Code § 47-18-3(a)*. Substantive provisions of the WVAA must be interpreted consistently with federal law (per se antitrust rules apply, and courts are instructed to "harmonize" the WVAA with federal antitrust statutes), and federal courts have recognized that the Act applies to all anticompetitive conduct that produces in-state effects.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN76[] **Regulated Practices, Price Fixing & Restraints of Trade**

The West Virginia Antitrust Act prohibits a conspiracy that restrains West Virginia trade or commerce, regardless of the locus of the conspiracy.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

HN77[] **Purchasers, Indirect Purchasers**

Although West Virginia looks to federal law when interpreting the West Virginia Antitrust Act (WVAA), the prohibition against indirect purchaser recovery announced in Illinois Brick does not apply to claims under the WVAA.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN78[] **Regulated Practices, Price Fixing & Restraints of Trade**

Like other states, Wisconsin prohibits antitrust conspiracies in restraint of trade or commerce. *Wis. Stat. § 133.03(1)*. A plaintiff may bring an antitrust claim arising from conduct outside the state's borders if it substantially affects the people of Wisconsin and has impacts in the state.

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN79[] Sherman Act, Scope

The consumer protection statutes of Arkansas, the District of Columbia, Kansas, Maine, New Mexico, and Rhode Island prohibit, inter alia, fraudulent or deceptive conduct. However, statutory prohibitions on consumer deception do not subsume conduct violative of the Sherman Act.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN80[] Trade Practices & Unfair Competition, State Regulation

The Arkansas Deceptive Trade Practices Act (ADTPA) prohibits any "unconscionable" trade conduct as well as false or deceptive acts or practices in business commerce or trade. *Ark. Code Ann. § 4-88-107(a)(10)*. The Act does not define the extent of "unconscionable" conduct; however, the Supreme Court of Arkansas has concluded that use of the word "unconscionable" illustrates that a liberal construction of the ADTPA is appropriate.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN81[] Regulated Practices, Price Fixing & Restraints of Trade

The Arkansas Deceptive Trade Practices Act reaches any action that shows no regard for conscience, affronting the sense of justice, decency, or reasonableness. Hence, courts have concluded that claims of price fixing are cognizable under the Act.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN82[] Deceptive & Unfair Trade Practices, State Regulation

The District of Columbia Consumer Protection Procedures Act (DCCPPA) proscribes a litany of trade practices involving deception of consumers. *D.C. Code § 28-3904*. The Act's prohibitions are not exclusive, however, and the DCCPPA does not require a showing of concealment or deception to support a claim.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN83[] Trade Practices & Unfair Competition, State Regulation

The District of Columbia Consumer Protection Procedures Act (DCCPPA) is a comprehensive statute designed to provide remedies for a broad spectrum of practices which injure consumers. Trade practices that violate other laws, including the common law, also fall within the purview of the DCCPPA. The DCCPPA is designed to assure that a just mechanism exists to remedy all improper trade practices.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN84[] **Sherman Act, Claims**

The District of Columbia Consumer Protection Procedures Act subsumes a Sherman Act claim and creates an indirect purchaser cause of action for conspiratorial price fixing regardless of whether the defendants have engaged in deceptive conduct.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN85[] **Deceptive & Unfair Trade Practices, State Regulation**

See Kan. Stat. Ann. § 50-627(a).

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN86[] **Regulated Practices, Price Fixing & Restraints of Trade**

Despite the Kansas Consumer Protection Act's seemingly broad language, the Supreme Court of Kansas has distinguished between consumer harms redressable thereunder and pricing harms governed by the Kansas antitrust statute. The statute is therefore inapplicable to price-fixing claims.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN87[] **Deceptive & Unfair Trade Practices, State Regulation**

The Kansas Consumer Protection Act is not designed to remedy the consequences per se of uneven bargaining power or even a simple old-fashioned bad bargain.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN88[] **Trade Practices & Unfair Competition, State Regulation**

The Maine Unfair Trade Practices Act forbids unfair methods of competition as well as unfair or deceptive conduct of any trade. *Me Rev. Stat. Ann. tit. 5, § 207*. A business practice is "unfair" if the injury it produces is (1) substantial, (2) not outweighed by any countervailing benefits to consumers or competition that the practice produces, and (3) not reasonably avoidable by consumers. In pricing cases, the allegedly unfair practice must also induce the consumer to acquire something that he or she would not otherwise have purchased.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN89[] **Regulated Practices, Price Fixing & Restraints of Trade**

The Maine Unfair Trade Practices Act creates no remedy in a case involving collusive prices because higher prices cannot induce individuals to purchase something they would not otherwise purchase.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN90[] **Deceptive & Unfair Trade Practices, State Regulation**

A change in consumer conduct forms the marrow of a Maine Unfair Trade Practices Act violation. Unfairness requires a detrimental change in consumer behavior as a result of confusion fomented by the defendant.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN91[] **Deceptive & Unfair Trade Practices, State Regulation**

A pricing claim under the Maine Unfair Trade Practices Act requires proof that the defendant induced consumers to alter their behavior to their detriment.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN92[] **Trade Practices & Unfair Competition, State Regulation**

The New Mexico Unfair Practices Act censures both unfair or deceptive and unconscionable trade practices. *N.M. Stat. § 57-12-3*. "Unconscionable trade practices" include all sales that either take advantage of the lack of knowledge, ability, experience or capacity of a person to a grossly unfair degree or result in a gross disparity between the value received by a person and the price paid. *N.M. Stat. § 57-12-2(E)*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN93[] Trade Practices & Unfair Competition, State Regulation

The New Mexico Unfair Practices Act is primarily remedial in nature, and courts construe its provisions broadly to facilitate this purpose.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN94[] Regulated Practices, Price Fixing & Restraints of Trade

Federal courts generally permit New Mexico Unfair Practices Act (NMUPA) actions in price-fixing cases provided that the plaintiff alleges a "gross disparity" between the price paid for a product and the value received. Allegations that a plaintiff has paid approximately 30% more for a product as a result of price fixing are sufficient to plead a NMUPA claim, as are averments that a conspiracy produced significant artificial increases in product price.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN95[] Trade Practices & Unfair Competition, State Regulation

The Rhode Island Unfair Trade Practice and Consumer Protection Act prohibits unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce. *R.I. Gen. Laws § 6-13.1-2*. The statute enumerates twenty methods of unfair or deceptive competition, including conduct that creates a likelihood of confusion or of misunderstanding. *R.I. Gen. Laws § 6-13.1-1(6)(xii)*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN96[] State Regulation, Claims

A plaintiff possesses standing to advance a Rhode Island Unfair Trade Practice and Consumer Protection Act claim if he or she purchases or leases goods or services primarily for personal, family or household purposes. *R.I. Gen. Laws § 6-13.1-5.2(a)*.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN97[] **Regulated Practices, Price Fixing & Restraints of Trade**

The following factors determine whether a trade practice qualifies as "unfair" under the Rhode Island Unfair Trade Practice and Consumer Protection Act (RIUTPCPA): (1) whether the practice affronts public policy, as delineated by the common law, statutes, and other established concepts of unfairness; (2) whether it is immoral, unethical, oppressive, or unscrupulous; and (3) whether it causes substantial injury to consumers (or competitors or other businessmen). These factors encompass price-fixing injuries, and consumers subject to collusive pricing possess a cognizable claim under the RIUTPCPA.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN98[] **Trade Practices & Unfair Competition, State Regulation**

The Rhode Island Unfair Trade Practice and Consumer Protection Act is intended to declare unlawful a broad variety of activities that are unfair or deceptive.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN99[] **Trade Practices & Unfair Competition, State Regulation**

While the Rhode Island Unfair Trade Practice and Consumer Protection Act provides a statutory remedy for common law unfair competition claims, its reach is not limited to the common law.

Civil Procedure > Remedies > General Overview

HN100[] **Civil Procedure, Remedies**

Restitution remedies vary considerably from state to state.

Antitrust & Trade Law > Regulated Practices > Private Actions > State Regulation

HN101[] **Private Actions, State Regulation**

The availability of relief in an antitrust case may depend upon whether a particular state has adopted an Illinois Brick repealer or whether it limits antitrust recovery to compensatory damages. Several courts presented with generic restitution claims have required plaintiffs to identify at the pleading stage those states under whose law they advance their claims.

Counsel: [1]** For Michael McNamara, on behalf of himself and all others similarly situated, Plaintiff: Christopher Lovell, Peggy J. Wedgworth, LEAD ATTORNEY, Lovell Stewart Halebian, LLP, New York, NY; Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; James J. McCarthy, Jr., LEAD ATTORNEY, McCarthy Weisberg Cummings, P.C., Harrisburg, PA; Walter W. Cohen, LEAD ATTORNEY, Obermayer Rebmann Maxwell & Hippel LLP, Harrisburg, PA.

For Katherine Woodman, Plaintiff: Daniel A. Small, LEAD ATTORNEY, Cohen Milstein Sellers & Toll PLLC, Washington, DC; Gregory P. Hansel, LEAD ATTORNEY, Preti, Flaherty, Beliveau, Pachios, & Haley, LLC, Portland, Me; Roger P. Poorman, Steven Dane Irwin, David V. For Cadbury Holdings Ltd., Cadbury PLC, Defendant: Leah A. Ramos, LEAD ATTORNEY, Morrison & **[**26]** Forester LLP, New York, NY; Thomas M Mueller, LEAD ATTORNEY.

For Government of Canada, Defendant: Bradley H. Blower, John P. Relman, Katherine A. Gillespie, LEAD ATTORNEYS, PRO HAC VICE, Relman & Dane, PLLC, Washington, DC; Joseph K. Goldberg, Law Office of Joseph K. Goldberg, Harrisburg, PA.

Judges: CHRISTOPHER C. CONNER, United States District Judge.

Opinion by: CHRISTOPHER C. CONNER

Opinion

[*548] **MEMORANDUM**

This is a multidistrict antitrust matter brought under Section 1 of the Sherman Act, *15 U.S.C. § 1*, and various state antitrust and consumer protection statutes. Plaintiffs allege that defendants conspired to fix the prices of chocolate confectionary products in the United States. Defendants, who control approximately 75% of the American market for chocolate candy, allegedly entered pricing agreements, resulting in coordinated price increases on three distinct occasions between 2002 and 2007. Defendants argue that the amended complaints fail to raise a plausible inference of an agreement to fix prices as required by *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. Defendants have filed motions to dismiss (Docs. 464, 469, 477) the complaints under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*.

Defendants **[**27]** Cadbury plc, Cadbury Holdings, Mars Canada, Nestle S.A., and Nestle Canada have also filed motions to dismiss (Docs. 466, 471, 473, 474) under *Rule 12(b)(2)* for lack of *in personam* jurisdiction. These defendants contend that they do not sell chocolate candy in the United States, maintain no facilities inside the U.S., and have no pricing authority in the U.S. chocolate market.

For the reasons that follow, the *Rule 12(b)(2)* motions will be deferred during a period of jurisdictional discovery. The *Rule 12(b)(6)* motions filed by the remaining **[*549]** defendants will be denied except with respect to certain common law and consumer protection claims. The *Rule 12(b)(6)* motions filed by Cadbury plc, Cadbury Holdings, Mars Canada, Nestle S.A. and Nestle Canada will be deferred until resolution of their jurisdictional challenges.

I. Factual Background [1]

Defendants are members of four multinational corporate families that produce chocolate confectionary products for markets around the globe. Plaintiffs **[**28]** allege that from December 2002 to April 2007 defendants conspired to fix prices in the American chocolate candy market, [2] as evidenced by three synchronized price increases that occurred during the early- and mid-2000s. In August 2008, three putative subclasses of plaintiffs and one group of individual plaintiffs filed consolidated amended complaints against all defendants.

A. Defendants' Respective Corporate Structures and Market Shares

Defendant The Hershey Company (hereinafter "Hershey Global") dominates the American chocolate confectionary market, supplying more than 40% of the chocolate candy sold in the U.S. (Doc. 418 P 19; Doc. 420 P 80; Doc. 448 P 31.) Defendant Hershey Canada, a wholly owned subsidiary of Hershey Global, distributes Hershey products in Canada. (Doc. 418 P 20; Doc. 420 P 50; Doc. 448 P 28.) Hershey Global has integrated its American and Canadian **[**29]** operations, and Hershey North America, a division of Hershey Global, oversees sales and marketing operations in both countries. (Doc. 418 P 20; Doc. 448 P 30.)

Defendant Mars, Inc. ("Mars Global") possesses a 26% share of the American chocolate candy market. (Doc. 418 P 22; Doc. 420 P 80; Doc. 448 P 38.) In the U.S. and Canada, Mars Global operates through two subsidiaries: defendants Mars Snackfood U.S. LLC ("Mars Snackfood") and Mars Canada, Inc. ("Mars Canada"). (Doc. 418 PP 23-24; Doc. 420 PP 53-54; Doc. 448 PP 36-38.) These subsidiaries collectively form Mars Global's North America division (Doc. 418 PP 23-24; Doc. 420 PP 53-54; Doc. 448 PP 36-38.)

Defendant Nestle S.A. is the world's largest food and beverage corporation and controls 8% of the American chocolate candy market. (Doc. 418 P 26; Doc. 420 P 80; Doc. 448 P 47.) Nestle S.A., based in Vevey, Switzerland, does not operate directly in either the United States or Canada. (Doc. 418 P 26; Doc. 420 P 56; Doc. 422 P 10; Doc. 448 P 42.) Rather, its subsidiaries, defendants Nestle U.S.A., Inc. ("Nestle U.S.A.") and Nestle Canada, Inc. ("Nestle Canada"), market and distribute Nestle products in the nations for which they are named. **[**30]** (Doc. 418 PP 27-28; Doc. 420 PP 57-58; Doc. 422 PP 9, 11; Doc. 448 PP 43-44.) Both Nestle U.S.A. and Nestle Canada are members of Nestle S.A.'s Zone Americas division. (Doc. 418 P 26; Doc. 448 P 46.)

---

[1] In accordance with the standard of review for motions to dismiss under *Rule 12(b)(2)* and *Rule 12(b)(6)*, the court will present the facts as alleged in the amended complaints. See infra Parts II.A, III.A.

[2] As used in this memorandum, "chocolate candy" and "chocolate confectionary products" refer to chocolate bars and other mass-produced chocolate confections manufactured and packaged for sale to retail consumers. Examples of these products include Nestle Crunch(R), Hershey's Kisses(R), M&M's(R), and Cadbury Creme Eggs(R).

Defendant Cadbury plc is also a titan in worldwide chocolate markets. Cadbury plc is the corporate parent of defendant **[*550]** Cadbury Holdings Ltd. ("Cadbury Holdings") and defendant Cadbury Adams Canada, Inc. ("Cadbury Canada"). (Doc. 418 PP 30-32; Doc. 420 PP 60-62; Doc. 422 P 13-14; Doc. 448 P 51-53.) Cadbury Canada produces and distributes Cadbury products in Canada. (Doc. 418 P 32; Doc. 420 P 62; Doc. 422 P 14; Doc. 448 P 53.) In the U.S., Hershey Global distributes Cadbury-branded products under license agreements with Cadbury Holdings and Cadbury plc. (Doc. 418 PP 30, 89; Doc. 420 PP 61, 82; Doc. 422 PP 13, 61; Doc. 448 PP 51, 107.g.) The amended complaints contain few other details about the role that Cadbury plc, Cadbury Holdings, and Cadbury Canada play in the American market.

B. Integration of the American and Canadian Markets for Chocolate Candy

Defendants collectively control approximately 75% of the chocolate candy market in the U.S. and 64% in Canada. (Doc. 418 P 52; Doc. 420 P 80; **[**31]** Doc. 422 P 35; Doc. 448 P 107.a.) Plaintiffs contend that these markets are tightly interwoven and consist of homogenous, interchangeable chocolate candy products. (Doc. 418 P 52; Doc. 420 P 80; Doc. 422 P 35; Doc. 448 P 107.a.) They bolster this assertion with trade statistics that allegedly demonstrate synergism between the markets. For example, in 2003 the United States imported approximately $ 1.8 billion in confectionary products, 40% of which consisted of chocolate candy. (Doc. 418 P 49.) According to the amended complaints, much of this chocolate originated in Canada, where defendants manufactured and packaged it for sale in the United States. (Doc. 418 PP 49, 53; Doc. 422 P 40; Doc. 448 P 107.h) The U.S. also ships chocolate products to Canada. American manufacturers purportedly supply approximately 45% of Canada's chocolate candy imports. (Doc. 420 P 90; Doc. 422 P 40.)

Defendants have allegedly integrated their American and Canadian operations. Plaintiffs assert that defendants have developed manufacturing and distribution systems designed to serve consumers across international borders. Defendants supply similar chocolate products to both markets. In addition, defendants **[**32]** have created North American divisions that oversee U.S. and Canadian operations. (Doc. 418 PP 82-83; Doc. 420 P 92; Doc. 422 PP 85-89; Doc. 448 P 107.b.)

According to the pleadings, Hershey Global has instituted a single corporate division to coordinate all North American sales and marketing, and the company aggregates operations in the United States, Canada, Mexico, and Brazil for purposes of its reporting obligations under the Securities Exchange Act of 1934. (Doc. 418 PP 83-84; Doc. 420 P 92; Doc. 422 P 85; Doc. 448 P 107.b.) Hershey allegedly groups these nations based upon "similar economic characteristics, and similar products and services, production processes, types of consumers, distribution methods, and the similar nature of the regulatory environment in each location." (Doc. 418 P 84.) Similarly, Mars Canada manufactures and packages chocolate candy products in Canada for sale in the United States. (Doc. 418 P 53; Doc. 420 P 53; Doc. 422 P 21; Doc. 448 PP 37, 39.) Either Mars Canada or another member of Mars Global's corporate family purportedly manages the sale of these products. (Doc. 418 P 22, 24, 53; Doc. 420 P 52-53; Doc. 422 P 20-21; Doc. 448 PP 37, 39.) Nestle S.A., **[**33]** Cadbury plc, and Cadbury Holdings likewise fuse the United States and Canada for purposes of corporate operations. Nestle's Zone Americas is the company's leading sales territory and includes the U.S., Canada, Mexico, and Central and South America. (Doc. 418 PP 86-87; Doc. 420 P 92; Doc. 422 P 88; Doc. 448 P 107.b.) **[*551]** And the president of Cadbury's Americas Confectionery division possesses ultimate responsibility for the daily management and operation of the Cadbury chocolate business in both the United States and Canada. (Doc. 418 PP 8687; Doc. 420 P 92; Doc. 422 P 87; Doc. 448 P 107.b.)

Licensing agreements among defendants further contribute to the coalescence of these markets. Cadbury Holdings and Hershey Global have executed asset purchase and trademark licensing agreements [3] under which Hershey

---

[3] Cadbury Holdings and Hershey Global have executed three separate agreements. Pursuant to an asset purchase agreement, dated July 22, 1988, Hershey Global's predecessor in interest purchased all assets owned by the then-existing U.S. division of the Cadbury business portfolio. (See Doc. 478 at 14.) Two trademark licensing agreements, both dated August 25, 1988, granted Hershey Global the exclusive right to sell Cadbury-branded products in the U.S. (See Doc. 478-4 at 24; Doc. 478-7 at 21.) The parties have submitted all three agreements, **[**35]** which span eleven separate docket entries. (See Docs. 478

possesses an exclusive license to manufacture and market Cadbury-branded products in the United States. (Doc. 418 PP 30, 89; Doc. 420 PP 61, 82; Doc. 422 PP 13, 61; Doc. 448 PP 51, 107.g.) Brands subject to the license include York Peppermint Patties TM, Mounds(R), and Almond Joy(R). (Doc. 418 P 30; Doc. 420 P 61; Doc. 422 P 13; Doc. 448 P 51.) Hershey also has a similar licensing arrangement **[**34]** for certain Nestle-branded products including Kit-Kat(R) and Rolo(R). (Doc. 418 P 90; Doc. 420 P 82; Doc. 422 P 62; Doc. 448 P 107.g.) Under the Hershey-Cadbury agreements, Hershey Global remits quarterly royalty payments to Cadbury plc and Cadbury Holdings, which may audit Hershey's accounting records, observe its manufacturing processes, and test its products for quality. (Doc. 478-6 at 3, 13-14; Doc. 478-8 at 10, 16-18; Doc. 418 PP 89-90; Doc. 420 P 84.) The agreements require personnel from both companies to meet on a quarterly basis to discuss marketing, promotion, and development of Cadbury-branded products. (Doc. 478-6 at 16; Doc. 478-8 at 18-19.)

In contrast to monolithic supply points, demand in the American and Canadian markets for chocolate candy is diffuse. (Doc. 418 P 55; Doc. 420 P 80; Doc. 422 P 36; Doc. 448 PP 65, 103.) Direct buyers include supermarkets, convenience stores, retail chains, and other wholesale customers, none of which possesses a dominant share of the demand market. (Doc. 418 P 55; Doc. 420 P 80; Doc. 422 P 36; Doc. 448 P 103.) These disparate purchasers form the markets' predominant distribution channels with no single buyer capable of exercising power over defendants' pricing structures. (Doc. 418 P 55; Doc. 420 P 80; Doc. 422 P 36; Doc. 448 P 104.)

Material to the antitrust claims, the supply market for chocolate candy features formidable entry barriers. (Doc. 418 P 56; Doc. 420 P 89; Doc. 422 P 42; Doc. 448 P 63.) Confectionery is a highly technical business, requiring significant capital outlay for manufacturing facilities, engineering expertise, and distribution channels **[**36]** to compete on a market-wide scale. (Doc. 418 P 56; Doc. 420 P 89; Doc. 422 P 42; Doc. 448 P 63.) New entrants must also invest considerable sums to promote new products and build brand loyalty among consumers presented with a wide selection of interchangeable goods. (Doc. 418 PP 55-57; Doc. 420 P 89; Doc. 422 PP 36-39; Doc. 448 P 64.) In contrast, an established market player can expand production at will. (Doc. 422 P 43; Doc. 448 P 66.) Market leaders, including defendants, typically operate at less than full capacity, **[*552]** giving them the ability to compete against one another by increasing output and by launching new products. (Doc. 422 P 43; Doc. 448 P 66.)

C. Price Increases in the U.S. Chocolate Confectionary Market

Plaintiffs contend that this cross-national market garrisoned within high entry barriers facilitated defendants' collusive pricing. From the mid-1990s until 2002, chocolate candy prices in the United States remained stable. (Doc. 418 P 59; Doc. 448 P 95.) None of the defendants implemented permanent price increases during this period because a unilateral increase would have caused a decline in sales as consumers purchased competitors' products at lower prices. (Doc. 448 P 95.) **[**37]** Hence, plaintiffs assert that no defendant could have raised prices without first confirming that other defendants would reciprocate the increase.

The first allegedly anticompetitive price jump occurred on December 9, 2002, when Mars instituted a 10.7% increase for its standard-size chocolate bars and a 22% increase on packages of six bars. (Doc. 418 P 60; Doc. 420 P 94.a; Doc. 422 P 45; Doc. 448 P 79.) Two days later, Hershey followed Mars's lead, boosting prices by 10.7% for standard-size bars and 7.6% for six-packs. [4] (Doc. 418 P 61; Doc. 420 P 94.a; Doc. 422 P 46; Doc. 448 P 80.) Another two days saw an upsurge of 10.3% for Nestle's standard-size bars. [5] (Doc. 418 P 62; Doc. 420 P 94.a; Doc. 422 P 47; Doc. 448 P 81.) Defendants allegedly reaped extensive financial benefits from this initial price swell despite stable costs and stagnating demand. For example, in July 2003 Hershey Global reported second-quarter net profits of $ 71.5 million, an increase of $ 8.4 million compared with the same period for 2002. (Doc. 418

through 478-11.) For ease of identification, the court will cite the agreements by referencing the document and page numbers assigned by the Electronic Case Filing system.

[4] Hershey simultaneously raised prices for king-size bars and ten-packs by 13.6% and 15.4%. (Doc. 418 P 61; Doc. 420 P 94.a; Doc. 422 P 46; Doc. 448 P 80.)

[5] Prices for other Nestle sizes also jumped, including a 14.5% increase on king-size bars and a 16.8% increase on ten-packs. (Doc. 418 P 62; Doc. 422 P 47; Doc. 448 P 81.)

PP 80-81; Doc. 420 P 102; Doc. 422 P 48; Doc. 448 P 98.) Representatives of Hershey Global publicly acknowledged that this growth in profits was attributable, in part, **[**38]** to the December 2002 price increase. (Doc. 418 P 80; Doc. 422 P 48; Doc. 448 P 98.)

Prices climbed again on November 19, 2004, when Mars announced increases of between 2.9% and 15.6% on variously sized bags of chocolate candy. (Doc. 418 P 65; Doc. 420 P 94.b; Doc. 422 P 49; Doc. 448 P 82.) The next month, Hershey promulgated a 5.5% rise in the price of standard-size bars, which Mars followed with an identical increase. (Doc. 418 PP 65-66; Doc. 420 P 94.b; Doc. 422 PP 49-50; Doc. 448 PP 83-84.) Hershey also raised prices for bags of chocolate candy between 2.5% and 7.6%. [6] (Doc. 418 P 66; Doc. 422 P 50; Doc. 448 P 84.) Prices for Nestle standard-size bars and bags of chocolate candy grew by 5.7% the next week. [7] (Doc. 418 P 67; Doc. 420 P 94.b; Doc. 422 P 51; Doc. 448 P 85.)

A third series of price increases commenced in the spring of 2007 with Mars again serving as bellwether. On March 23, 2007, Mars raised the prices of its **[*553]** standard-size and king-size bars by 5.3% and 4.5% respectively. (Doc. 418 P 69; Doc. 420 P 94.c; Doc. 422 P 53; Doc. 448 P 87.) Hershey joined Mars on April 4, raising standard-size bar prices by 5.2% and king-size bar prices by 4.5%. (Doc. 418 P 70; Doc. 420 P 94.c; Doc. 422 P 54; Doc. 448 P 88.) Nestle completed the series the following day with price hikes of 5.4% on standard-size chocolate bars and 4.6% on king-size bars and six-packs. [8] (Doc. 418 P 71; Doc. 420 P 94.c; Doc. 422 P 55; Doc. 448 P 89.)

Throughout the period of these increases, the cost of defendants' raw materials remained stable, benefitting from **[**40]** relative calm in commodity markets as well as defendants' investment in futures contracts as a hedge against price fluctuations. (Doc. 418 PP 59, 79; Doc. 420 P 97; Doc. 422 P 58; Doc. 448 P 91.) Energy costs also remained stable, (Doc. 418 P 79), but demand for chocolate candy products waned as consumers sought healthier snack options. (Doc. 418 PP 75, 80; Doc. 420 P 91; Doc. 422 P 57; Doc. 448 P 96.)

D. <u>Defendants' Pricing Conduct in the Canadian Market</u>

Plaintiffs contend that evidence of defendants' price-fixing agreements in the Canadian chocolate confectionary market corroborates the conspiracy that allegedly occurred in the United States. In July 2007, Canadian antitrust officials commenced an investigation into alleged price fixing by Cadbury Canada, Hershey Canada, Mars Canada, and Nestle Canada (hereinafter "the Canadian defendants"). The investigation purportedly revealed that Glenn Stevens ("Stevens"), president of non-defendant candy distributor ITWAL, Inc., provided the catalyst for a Canadian price-fixing agreement by transmitting several letters to senior managers of the Canadian defendants. (Doc. 418 P 100; Doc. 420 P 110.c; Doc. 422 P 82; Doc. 448 P 113.) The recipients **[**41]** included Bob Leonidas ("Leonidas"), president and chief executive officer of Nestle Canada, as well as executives of Cadbury Canada, Hershey Canada, and Mars Canada. (Doc. 418 P 100; Doc. 420 P 110.f; Doc. 422 P 82; Doc. 448 P 113.) The initial letter, entitled "TAKE ACTION NOW!!," proposed that defendants reduce trade spending, which is the practice of providing promotional discounts and rebates to consumers:

> At the 'end of the day' it is only the suppliers' control and discipline of the trade spending that can restore functionality in the marketplace. The problem is completely out of control on the part of the suppliers. I am being forced to reexamine how we operate in the market and I am not sure it would be in the best interests of [Cadbury Canada, Hershey Canada, Mars Canada, and Nestle Canada.]
>
> *I urge you to meet and take action* before this chocolate bar 'bubble bursts."

(Doc. 173, Ex. E P 5.7; [9] Doc. 418 P 100; Doc. 420 P 110.f; Doc. 422 P 83; Doc. 448 P 113 (emphasis added.)

---

[6] Hershey implemented price increases on other products at the same time: its king-size bars surged **[**39]** by 4.7%, its six-packs by 8.5%, and its variety packs by 5.5%. (Doc. 418 P 66; Doc. 420 P 94.b; Doc. 422 P 50; Doc. 448 P 84.)

[7] Nestle contemporaneously raised prices by 4.8% on its king-size bars and 7.7% on six-packs. (Doc. 418 P 67; Doc. 420 P 94.b; Doc. 422 P 51; Doc. 448 P 85.)

[8] Mars also raised prices for packages of Dove brands by 15% during the third round of increases. (Doc. 418 P 69; Doc. 422 P 53; Doc. 448 P 87.)

[*554] During the ensuing fifteen months, the Canadian defendants received more than twenty additional "Take Action Now" notices (hereinafter "TAN notices") from Stevens evidencing various facets of the alleged price-fixing conspiracy in the Canadian market. (Doc. 420 P 110.h-.o; Doc. 448 PP 115-16.) An April 2002 TAN notice reflects that the Canadian defendants instituted audit procedures and hired third-party investigators to curtail retail discounting and agreed to "immediate termination" of buyers that failed to adhere to their trade spending policies. (Doc. 173, Ex. E P 5.10.) TAN notices dated December 2002 document that the Canadian defendants had undertaken "concerted and committed efforts to clean up the dysfunctional retail trade spending" in the Canadian market by reducing or eliminating 2-for-99 [cent] **[**43]** and 3-for-99 [cent] promotions. (Doc. 173, Ex. E P 5.12.) During this time period, defendants' executives in the United States were purportedly aware of and condoned the price-control efforts in Canada. (Doc. 420 P 65; Doc. 448 P 107.c.)

In February 2004, Leonidas met with a senior executive (hereinafter "Cooperating Individual 1" or "CI-1") of a company (hereinafter "the cooperating party") that would later assist with the Canadian antitrust investigation. [10] (Doc. 420 P 109.a; Doc. 422 P 74; Doc. 448 P 121.) Leonidas and Cooperating Individual 1 discussed trends in trade spending and agreed that such expenditures should be further reduced. (Doc. 420 P 109.a; Doc. 422 P 74; Doc. 448 P 121.) The meeting caused CI-1 to believe that he and Leonidas shared a common perspective on trade spending, and CI-1 understood that he had "an open line to call Leonidas if there were any issues in the market, including trade spend [sic] practice." (Doc. 420 P 109.a; Doc. 422 P 74; Doc. 448 P 121 (all cited complaints quoting Doc. 173, Ex. D P 5.21)).

The Canadian defendants' pricing communications sharpened in June 2005, when Cooperating Individual 1 met with Leonidas at a trade association convention. Leonidas informed CI-1 that Nestle Canada "[took] pricing seriously," that the company planned to implement a price increase in the near future, and that Leonidas wanted CI-1 to "hear it from the top" of Nestle Canada's leadership. [11] (Doc. 418 P 101; Doc. 420 P 109.b; Doc. 448 P 123.) CI-1 reciprocated Leonidas's sentiment and believed that Leonidas would have concluded that the cooperating party would follow a price increase led by Nestle Canada. (Doc. 420 P 109.c; Doc. 448 P 123.)

Emails exchanged among employees of the cooperating party confirm that the Canadian defendants exchanged pricing information. The following is a verbatim excerpt of one of these emails:

> "At ITWAL I was informed by a reliable source that both Nestle and [Mars Canada] have been to customers hinting at 2005 price increases. No details or confirmation. I suggested that we would seriously consider appropriate actions once firm details known, and that I **[*555]** would be concerned about the other leading player not following Which my contact said they would inquire about. This is similar to info we had picked up a couple months ago. . . ."

(Doc. 420 P 109.b; Doc. 448 P 122 (all cited complaints quoting Doc. 173, Ex. D P 5.22)). CI-1 later received documentation reflecting Nestle Canada's plans to increase chocolate candy prices during 2005. (Doc. 420 PP 109.d-.h; Doc. 422 P 75; Doc. 448 PP 123-25.) The cooperating party announced a price increase on July 29, 2005

---

[9] Exhibits D and E to Docket Entry No. 173 are the sworn statements that Daniel Wilcock, an attorney for the Canadian Competition Bureau, prepared in furtherance of the Bureau's investigation into alleged price-fixing **[**42]** activities in Canada. Plaintiffs' amended complaints rely upon these statements to describe defendants' alleged price-fixing activities, and defendants do not dispute the authenticity of these documents. (Doc. 477 at 30 n.7.) The court may therefore consider them when ruling on the motions to dismiss. See *In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410, 1426 (3d Cir. 1997)*.

[10] The cooperating party is widely presumed to be Cadbury Canada, (see, e.g., Doc. 420 P 108), though the current record does not confirm its identity. **[**44]** The court has retained the anonymous descriptors utilized in Wilcock's sworn statements to identify the company and employees who participated in the Canadian antitrust investigation.

[11] Cooperating Individual 1 did not recall the precise words that Leonidas used during the encounter but informed Canadian antitrust authorities that Leonidas stated, "I want you to hear it from the top--I take my pricing seriously" or "We are going to take a price increase and I want you to hear it from the top" or language to similar effect. (Doc. 418 P 101; Doc. 420 P 109.c; **[**45]** Doc. 448 P 123.)

in accordance with Nestle Canada's proposed increase. (Doc. 420 P 109.i.) Following suit, Hershey Canada and Mars Canada announced increases before the end of 2005. (Doc. 420 P 109.j-.k.)

CI-1 also communicated with representatives **[**46]** of Hershey Canada and Hershey Global during the alleged Canadian price-fixing conspiracy. In early 2007, Hershey Global appointed Eric Lent ("Lent"), vice president of its American confectionery operations, to head Hershey Canada. (Doc. 173, Ex. D P 5.45.) Following his transfer, Humberto Alfonso ("Alfonso"), chief financial officer of Hershey Global, transmitted an email to CI-1 with Lent's new contact information. Alfonso's email read, in pertinent part, as follows:

> As we discussed, Hershey has recently appointed Eric Lent as Vice President and General Manager for the Canada business. In keeping with the good advice from 'The Godfather,' keep close to your competition, I am including contact info below in an effort to introduce you both. All kidding aside, I know Eric is looking forward to meeting you.

(Doc. 418 P 103; Doc. 420 P 109.t; Doc. 422 P 80; Doc. 448 P 132 (all complaints quoting Doc. 173, Ex. D P 5.45)). By late 2007, Lent had obtained or solicited pricing information from Leonidas and his counterparts at Mars Canada and the cooperating party. (Doc. 418 P 104; Doc. 420 P 109.v-.w; Doc. 422 P 80; Doc. 448 P 134.)

Plaintiffs contend that the Canadian defendants' alleged misconduct **[**47]** lends particular credence to their claims of price fixing in the American market. They assert that the fluidity between the two markets, the integration of defendants' Canadian and American corporate structures, and fusion of U.S. and Canadian manufacturing and distribution channels provided the means to implement an inter-market price-fixing conspiracy. Plaintiffs aver that all defendants regularly participate in trade associations and conferences and subscribe to industry publications, providing ready fora in which to exchange pricing information. (Doc. 418 P 48, 92-97; Doc. 420 P 77; Doc. 422 P 64, 90-91; Doc. 448 PP 102, 106, 120.)

E. Procedural History

A total of eighty-seven actions are currently affiliated with the above-captioned multidistrict litigation. The Judicial Panel on Multidistrict Litigation consolidated all pretrial matters in the Middle District of Pennsylvania on April 7, 2008 pursuant to *28 U.S.C. § 1407(a)*. (See Doc. 1.) Three putative subclasses and one group of individual plaintiffs filed amended complaints on August 13 and 14, 2008, and the instant motions to dismiss (Docs. 464, 466, 469, 471, 473, 474, 476) followed on September 29, 2008.

Cadbury plc, Cadbury **[**48]** Holdings, Mars Canada, Nestle S.A., and Nestle Canada move to dismiss the complaints for lack of personal jurisdiction. All defendants move for dismissal on the ground that the amended complaints fail to allege facts demonstrating a plausible right to relief under Twombly. The parties have fully briefed these issues, and the court received the benefit of approximately five **[*556]** hours of oral argument on January 16, 2009. [12]

II. Motions to Dismiss for Lack of Personal Jurisdiction

Cadbury plc, Cadbury Holdings, Mars Canada, Nestle S.A., and Nestle Canada (hereinafter collectively "the *Rule 12(b)(2)* defendants") move for dismissal under *Rule 12(b)(2)* for lack of personal jurisdiction. These defendants contend that they performed no pricing activity in the U.S. giving rise to specific jurisdiction and that their contacts with the nation as a **[**49]** whole fail to confer general jurisdiction over them.

A. Standard of Review Applicable *Rule 12(b)(2)* Motions

HN1[] Motions to dismiss for lack of personal jurisdiction under *Federal Rule of Civil Procedure 12(b)(2)*, like those for failure to state a claim under *Rule 12(b)(6)*, require the court to accept as true the allegations of the

[12] The court commends counsel for the insightful advocacy contained in their briefs and displayed at oral argument. Counsels' written submissions thoroughly canvassed pertinent areas of law, and these materials clearly represent the collaborative work of many capable attorneys. The court expresses its appreciation to all counsel involved in these efforts.

pleadings and all reasonable inferences therefrom. *Pinker v. Roche Holdings Ltd., 292 F.3d 361, 368 (3d Cir. 2002)*. However, unlike *Rule 12(b)(6)*, *Rule 12(b)(2)* does not limit the scope of the court's review to the face of the pleadings. See id.; *Carteret Sav. Bank, F.A. v. Shushan, 954 F.2d 141, 142 & n.1 (3d Cir. 1992)*. Consideration of affidavits submitted by the parties is appropriate and, typically, necessary. *Patterson by Patterson v. FBI, 893 F.2d 595, 603-04 (3d Cir. 1990)*.

HN2[] Although plaintiffs bear the ultimate burden of proving personal jurisdiction by a preponderance of the evidence, such a showing is unnecessary at the preliminary stages of litigation. *Mellon Bank (E.) PSFS, Nat'l Ass'n v. Farino, 960 F.2d 1217, 1223 (3d Cir. 1992)*. Rather, plaintiffs must merely allege sufficient facts to establish a prima facie case of jurisdiction over the person. Id. **[**50]** Once these allegations are contradicted by an opposing affidavit, however, plaintiffs must present similar evidence in support of personal jurisdiction. [13] *Carteret Sav. Bank, 954 F.2d at 142 & n.1, 146*; *Patterson, 893 F.2d at 603-04*. ***HN3***[] "[A]t no point may a plaintiff rely on the bare pleadings alone in order to withstand a defendant's *Rule 12(b)(2)* motion to dismiss for lack of in personam jurisdiction. . . . Once the motion is made, plaintiff must respond with actual **[*557]** proofs, not mere allegations." *Patterson, 893 F. 2d at 604*. When plaintiff responds with affidavits or other evidence in support of its position, however, the court is bound to accept these representations and defer final determination as to the merits of the allegations until a pretrial hearing or the time of trial. *Carteret Sav. Bank, 954 F.2d at 142 n.1* (stating that the "plaintiff need only plead [a] prima facie case to survive the initial [*Rule 12(b)(2)*] motion, but must eventually establish jurisdiction by a preponderance of the evidence") (citing *Behagen v. Amateur Basketball Ass'n, 744 F.2d 731, 733 (10th Cir. 1984))*.

B. Discussion

HN5[] A federal court **[**52]** entertaining a suit must possess one of two forms of personal jurisdiction over each defendant. The first type of jurisdiction, known as specific jurisdiction, requires that the plaintiff's claim arise from the defendant's contacts with the forum in which the court sits. *Helicopteros Nacionales de Colombia, S.A. v. Hall, 466 U.S. 408, 414 n.8, 104 S. Ct. 1868, 80 L. Ed. 2d 404 (1984)*; *Telcordia Tech Inc. v. Telkom S.A., 458 F.3d 172, 177 (3d Cir. 2006)*. In contrast, the court may exercise general jurisdiction over a defendant who possesses systematic and continuous contacts with the forum regardless of whether the plaintiff's claim derives from the defendant's in-forum activities. *Helicopteros, 466 U.S. at 415 n.9*; *Marten v. Godwin, 499 F.3d 290, 296 (3d Cir. 2007)*. The court must determine whether to exercise either form of jurisdiction in light of the "relationship among the defendant, the forum, and the litigation." *Helicopteros, 466 U.S. at 414 (1984)* (quoting *Shaffer v. Heitner, 433 U.S. 186, 204, 97 S. Ct. 2569, 53 L. Ed. 2d 683 (1977))*. ***HN6***[] When a statute such as the Sherman Act permits nationwide service of process, [14] the *Fifth Amendment Due Process Clause* guides the court's personal jurisdiction inquiry. *Max Daetwyler Corp v. R. Meyer, 762 F.2d 290, 295 (3d Cir. 1985)*; **[**53]** *Holland v. King Knob Coal Co., 87 F. Supp. 2d 433, 436 (W.D. Pa. 2000)*.

1. Specific Jurisdiction

---

[13] The court is aware of case law suggesting that plaintiff may not rely on the pleadings alone but **[**51]** must produce affidavits or other affirmative evidence to overcome a jurisdictional challenge under *Rule 12(b)(2)*. See, e.g., *Rodi v. S. New Eng. Sch. of Law, 255 F. Supp. 2d 346, 348 (D.N.J. 2003)*. However, this misstates plaintiff's burden. ***HN4***[] If the moving party fails to submit evidence contravening the allegations of the complaint, the court is bound to accept plaintiff's allegations regardless of whether plaintiff presents further evidence in support thereof. See *Miller Yacht Sales, Inc. v. Smith, 384 F.3d 93, 97 (3d Cir. 2004)* (observing that, unless the court hears evidence on the jurisdictional issues, all allegations must be taken as true for purposes of assessing whether the plaintiff has established a prima facie case of jurisdiction); *Carteret Sav. Bank, 954 F.2d at 142 n.1* (stating that the "plaintiff need only plead [a] prima facie case to survive the initial [*Rule 12(b)(2)*] motion, but must eventually establish jurisdiction by a preponderance of the evidence"). In other words, although the burden of persuasion always lies with the non-moving party, the burden of production rests initially with the party moving for dismissal under *Rule 12(b)(2)*.

[14] ***HN7***[] Section 12 of the Clayton Act, *15 U.S.C. § 22*, authorizes nationwide service of process in antitrust cases, including those brought under *§ 1* of the Sherman Act.

HN8[] Specific jurisdiction allows the court to adjudicate claims related to defendants' contacts with the forum. HN9[] Three alternative theories allow a court to acquire specific jurisdiction over a defendant. First, under principles of purposeful availment, the court may exercise jurisdiction over a defendant that has directed its activities into a forum, thereby producing the alleged injury. Second, the stream-of-commerce theory provides jurisdiction over an out-of-forum defendant if plaintiff's in-forum injury arises from a product that defendant placed into channels of commerce. Third, the effects test announced in *Calder v. Jones, 465 U.S. 783, 104 S. Ct. 1482, 79 L. Ed. 2d 804 (1984)*, confers jurisdiction over a defendant whose tortious conduct performed outside the forum produced effects within the forum. Plaintiffs argue that each theory supplies jurisdiction over the *Rule 12(b)(2)* defendants.

a. Purposeful Availment

HN10[] Under purposeful availment doctrine, a court may exercise **[**54]** specific jurisdiction if (1) the defendant purposefully directs its activities into a forum, (2) the case arises from those activities, and (3) the exercise of jurisdiction "comport[s] with 'fair play and substantial justice.'" *O'Connor v. Sandy Lane Hotel Co., 496 F.3d 312, 317 (3d Cir. 2007)* (quoting *Burger [*558] King Corp. v. Rudzewicz, 471 U.S. 462, 476, 105 S. Ct. 2174, 85 L. Ed. 2d 528 (1985)* (alteration in original)). The purposeful availment and relatedness inquiries are often described collectively as requiring "minimum contacts" between the defendant and the relevant forum. See, e.g., *Toys "R" Us, Inc. v. Step Two, S.A., 318 F.3d 446, 451 (3d Cir. 2003)* (quoting *Asahi Metal Indus. Co. v. Superior Court, 480 U.S. 102, 109, 107 S. Ct. 1026, 94 L. Ed. 2d 92 (1987)* (plurality opinion))). If, as in the instant case, a federal statute authorizes nationwide service of process, [15] the court appraises the defendant's contacts with the United States as a whole. *In re Auto. Refinishing Paint Antitrust Litig., 358 F.3d 288, 298 (3d Cir. 2004)*.

HN11[] The first component of the jurisdictional inquiry assays whether the defendant "availed[ed] himself of the privilege of conducting activities within the forum." *O'Connor, 496 F.3d at 317* (quoting *Hanson v. Denckla, 357 U.S. 235, 253, 78 S. Ct. 1228, 2 L. Ed. 2d 1283 (1958)*); **[**55]** see also *World-Wide Volkswagen Corp. v. Woodson, 444 U.S. 286, 297, 100 S. Ct. 559, 62 L. Ed. 2d 490 (1980)*. It requires the defendant to invoke the forum's laws by performing a volitional act directed toward the forum. *Asahi Metal Indus. Co. v. Superior Court, 480 U.S. 102, 112, 107 S. Ct. 1026, 94 L. Ed. 2d 92 (1987)* (plurality opinion); *Pinker, 292 F.3d at 370*.

Second, HN12[] the plaintiff's claim must arise from one of the defendant's forum-related activities. *Marten, 499 F.3d at 296* (internal quotation omitted). The inquiry ensures that the defendant's "jurisdictional exposure" remains proportionate to its in-forum activities. *O'Connor, 496 F.3d at 323*; *Leone v. Cataldo, 574 F. Supp. 2d 471, 480 (E.D. Pa. 2008)* ("[T]he cost of enjoying the benefits of a forum is specific jurisdiction."). The link between the defendant's action and the plaintiff's claim need not rise to the level of proximate causation, but the connection must be "intimate enough to keep the quid pro quo [between in-forum activity and jurisdictional exposure] proportional and personal jurisdiction reasonably foreseeable." *O'Connor, 496 F.3d at 323*; *Watiti v. Walden Univ., No. Civ.A. 07-4782, 2008 U.S. Dist. LEXIS 43217, 2008 WL 2280932, at *9 (D.N.J. May 30, 2008)*.

Third, HN13[] minimum contacts alone will not confer personal **[**56]** jurisdiction over the defendant. [16] The plaintiff must also establish that the exercise of jurisdiction harmonizes with "traditional notions of fair play and substantial justice." *Int'l Shoe Co. v. Washington, 326 U.S. 310, 316, 66 S. Ct. 154, 90 L. Ed. 95 (1945)*. At this stage of the analysis, the court evaluates the reasonableness of jurisdiction in light of a variety of interests, including burden that litigation places on the defendant, the forum's interest in the litigation, plaintiff's interest in obtaining convenient relief, the interest of the interstate judicial system in efficient resolution of controversies, and "the shared interests of the several States in furthering fundamental substantive social policies." *Pinker, 292 F.3d at 370* (quoting *Burger King, 471 U.S. at 477*). No single factor is dispositive of the jurisdictional analysis. *Burger King,*

[15] See supra note 14.

[16] HN14[] While minimum contacts alone are insufficient **[**57]** to support personal jurisdiction, a defendant that possesses minimum contacts "must make a compelling case that litigation in [the forum state] would be unreasonable and unfair" to prevent jurisdiction from attaching. *O'Connor, 496 F.3d at 325* (internal quotation omitted).

471 U.S. at 485 ("We . . . reject any talismanic jurisdictional formulas . . . ."); Mellon Bank, 960 F.2d at 1224-25. In federal question cases, when **[*559]** concerns of comity among the states are less pronounced, courts should consider the policies of the federal laws from which the dispute arises. Pinker, 292 F.3d at 370-71.

Turning to the case *sub judice*, the moving defendants challenge the court's personal jurisdiction over them and have supplied affidavits in support of their motions. Mars Canada attests that it is not registered to transact business in the United States, maintains no physical presence or employees here, sells no products in the U.S., and exercises no control over the prices of products sold by its American counterparts. (Doc. 472 PP 6-10.) Nestle S.A.'s contacts with the American chocolate market are similarly limited, (Doc. 479, Ex. A PP 5-11), as are those of Nestle Canada, (Doc. 479, Ex. B PP 5-12). Cadbury plc, as a holding company, does not sell chocolate products anywhere in the world, (Doc. 468 P 7), and neither Cadbury plc nor Cadbury Holdings maintain bank accounts, employees, manufacturing facilities, or distribution centers in the United States, (id. PP 18-26). Moreover, the licensing agreements between **[**58]** Cadbury Holdings and Hershey Global do not allow the Cadbury entities to control U.S. pricing or create an obligation to consult about the protocols used to price Cadbury-licensed products.

HN15[] Plaintiffs therefore incur the burden of rebutting defendants' asseverations "through sworn affidavits or other competent evidence." Patterson, 893 F.2d at 604-05. Plaintiffs, however, rely in large measure upon their amended complaints, which describe an integrated market between the United States and Canada and allege that defendants "sold and/or made available for purchase Chocolate Candy to purchasers in the United States." [17] (Doc 418 PP 24, 26, 28, 30-31; Doc. 420 PP 53, 56, 58, 60-61; Doc. 422 PP 10-11, 13, 15, 21; Doc. 448 PP 35, 37, 39, 42, 44, 51-52); see also supra Part I.B; (Doc. 520 at 40-41; Doc. 523 at 24-25). Plaintiffs may not repose upon their pleadings in this manner. Rather, they must counter defendants' affidavits with contrary evidence in support of purposeful availment jurisdiction. [18] Patterson, 893 F.2d at 604-05 **[*560]** ; Dayhoff, Inc. v. H.J. Heinz Co., 86 F.3d 1287, 1302 (3d Cir. 1996); Howard Hess Dental Labs., Inc. v. Dentsply Int'l, Inc., 516 F. Supp. 2d 324, 336 (D. Del. 2007). **[**59]** The evidence propounded by plaintiffs does not establish a prima facie showing of purposeful availment jurisdiction over the Rule 12(b)(2) defendants.

First, plaintiffs offer evidence that Mars Canada and Nestle Canada manufactured products in Canada and then transferred them to their American counterparts, Mars Snackfood and Nestle U.S.A. (Doc. 472, Ex. A PP 10-11; Doc. 479, Ex. B PP 11-12.) These transactions, however, do not raise an inference that Mars Canada or Nestle Canada influenced the post-transfer pricing of the products. **[**61]** Their status as remote suppliers of chocolate confectionary products does not buttress the claims of alleged antitrust harm that occurred after the products left their dominion and control. [19] See, e.g., Ware v. Ball Plastic Container Corp., 432 F. Supp. 2d 434, 438 n.3 (D. Del.

---

[17] During oral argument, counsel for Nestle S.A., Nestle U.S.A., and Nestle Canada observed that the amended complaints muddle the jurisdictional inquiry by referring to parent and subsidiary corporations collectively as "Mars," "Nestle," and "Cadbury." (Doc. 571 at 32.) The court agrees. This pleading practice--while permissible under the Federal Rules of Civil Procedure--disadvantages plaintiffs when responding to the ***HN16***[] Rule 12(b)(2) motions, which require that plaintiffs establish personal jurisdiction as to *each particular* corporate defendant. See Miller Yacht Sales, Inc. v. Smith, 384 F.3d 93, 101 (3d Cir. 2004) ("[T]he specific jurisdiction determination is both claim-specific, . . . and defendant-specific." (citations omitted)). Plaintiffs will be required to demonstrate that *each* of the moving defendants *individually* possesses sufficient contacts with the United States to warrant exercise of personal jurisdiction regardless of whether their corporate families, considered as a whole, possesses such contacts.

[18] In this regard, a Rule 12(b)(2) **[**60]** motion differs significantly from one under Rule 12(b)(6), which requires the court to adopt plaintiffs' allegations regardless of defendants' contrary evidence. See Time Share Vacation Club v. Atl. Resorts, Ltd., 735 F.2d 61, 66 n.9 (3d Cir. 1984); Eagle Computer Assocs. v. Chesapeake Software Servs., Inc., No. 99-CV-2583, 1999 U.S. Dist. LEXIS 17509, 1999 WL 1030441, at *1 (E.D. Pa. Nov. 12, 1999). The court thus credits plaintiffs' averments of fusion between the U.S. and Canadian chocolate markets for purposes of the Rule 12(b)(6) motions. The jurisdictional challenges, in contrast, require plaintiffs to rebut the Rule 12(b)(2) defendants' affidavits with evidence reflecting in-forum contacts. In the absence of such evidence, the court must espouse the facts described in defendants' evidentiary submissions. See supra Part II.A.

2006) (holding that the court lacked specific jurisdiction to hear a discrimination claim against the defendant, whose sole contact with the forum was the shipment of products into the state); Patent Incentives, Inc. v. Seiko Epson Corp., No. Civ.A. 88-1407, 1988 U.S. Dist. LEXIS 9933, 1988 WL 92460, at *5 (D.N.J. Sept. 6, 1988) (declining to exercise specific jurisdiction in a patent infringement action over a foreign manufacturer who sold its products to its U.S. subsidiary because the manufacturer's mere importation of products was unrelated to the plaintiff's claim). **HN17**[] A plaintiff cannot hold a manufacturer liable for a price-fixing harm occurring after the product left the manufacturer's hands absent a showing that the manufacturer retained control over product pricing. Plaintiffs have made no such showing here. Based upon the record before the court, Mars Canada and Nestle Canada's production and supply of chocolate candy into the **[**62]** United States bear no clear relationship to the price-fixing harms of which plaintiffs complain [20] and cannot support personal jurisdiction under purposeful availment theory. [21] See O'Connor, 496 F.3d at 323 **[*561]** (stating that **HN18**[] specific jurisdiction requires the plaintiff's injury to be related and proportional to the defendant's in-forum activities).

Second, plaintiffs rely upon the asset purchase and trademark licensing agreements with Hershey Global. The agreements require Hershey Global to remit periodic royalty payments based on formulae provided in the agreement. (Doc. 478-6 at 9-14; Doc. 478-8 at 12-18.) They also obligate the Cadbury entities to provide technical assistance with production and promotion of Cadbury brands, permit them to inspect Hershey Global facilities and products, and require them to approve changes to the trade dress of Cadbury-branded goods. (See Doc. 478-5 at 19-20, 25; Doc. 478-6 at 1-5; Doc. 478-8 at 4-5, 9-12.) The agreements do not allow Cadbury plc or Cadbury Holdings to influence prices for the licensed products, to consult with Hershey Global about price structures, to inspect the protocols that Hershey Global uses to establish prices, or to obtain or disclose any pricing information whatsoever. The agreements do not suggest that pricing information actually passes between Hershey Global and

---

[19] Many of the cases cited by the parties as applicable to the conduct of Mars Canada and Nestle Canada apply stream-of-commerce doctrine rather than a pure purposeful availment analysis. The present discussion addresses only purposeful availment and minimum contacts concerns. The stream-of-commerce doctrine is considered at infra Part II.B.1.b.

[20] This conclusion results from the paucity of record evidence about the product transfers. The record does not outline the distribution system by which Mars Canada and Nestle Canada move products into the U.S., nor does it explain the terms of the transactions. Such evidence is highly relevant to Mars Canada and Nestle Canada's participation in the American chocolate candy market and could demonstrate that these entities possess more extensive contacts with the U.S. than the current record reveals. The **[**63]** court will therefore grant plaintiff jurisdictional discovery to explore the precise contours of these transactions. See infra Part II.B.3.

[21] Plaintiffs rely upon MM Global Services v. The Dow Chemical Co., 404 F. Supp. 2d 425 (D. Conn. 2005) for the proposition that "manufacturing chocolate products sold throughout the United States [is] undoubtedly relevant to Plaintiffs' claims." (Doc. 523 at 26; see also Doc. 520 at 35-36; Doc. 521 at 33.) MM Global, however, is inapposite. In MM Global, the plaintiffs produced evidence that foreign defendants purchased products worth several million dollars from U.S. suppliers via American communication facilities and distribution networks. 404 F. Supp. 2d at 430-31. The defendants then fixed prices for these products in resale transactions conducted abroad and arbitrarily refused to accept orders from the plaintiffs. Id. at 431. The court concluded that the foreign defendants in-forum purchases "were part and parcel" of subsequent resales at anticompetitive price levels and provided appropriate grounds for purposeful availment jurisdiction. Id. at 435. In the present matter, by contrast, plaintiffs have produced no evidence that either Mars Canada **[**64]** or Nestle Canada participated in the anticompetitive sales underlying their claims. Rather, the record suggests that these defendants are remote suppliers who possess no U.S. pricing authority, and their absence from the allegedly suspect American pricing scheme places them beyond MM Global's reach.

Emerson Electric Co. v. Le Carbone Lorraine, S.A., No. Civ.A. 05-6042, 2008 U.S. Dist. LEXIS 72705, 2008 WL 4126602 (D.N.J. Aug. 27, 2008) is likewise unavailing to plaintiffs. In Emerson Electric, a foreign defendant moved to dismiss for lack of personal jurisdiction. The court denied the motion because the defendant allegedly exerted pricing control in the American market by dictating prices to its American subsidiaries and by acquiring an American corporation to eliminate market competition. 2008 U.S. Dist. LEXIS 72705, [WL] at *3-4. In the instant matters, plaintiffs allege no such conduct on the part of Mars Canada or Nestle Canada. A similar distinction exists with regard to In re Isostatic Graphite Antitrust Litig., No. 00-CV-1857, 2002 U.S. Dist. LEXIS 21656, 2002 WL 31421920, at *3 (E.D. Pa. Sept. 19, 2002) (concluding that exercise of personal jurisdiction over foreign defendants was proper because "[p]laintiffs have presented evidence which suggests that the allegedly **[**65]** anticompetitive actions of the American subsidiaries were directed, at least in part, by their foreign parent corporations").

the Cadbury entities, nor does the record evidence support such an inference. **[**66]** To the contrary, the agreements essentially reflect the disengagement of Cadbury entities from the American chocolate confectionary market. Exercise of specific jurisdiction based upon mere consultation clauses would be disproportionate to the in-forum activities and benefits contemplated by the agreements. *O'Connor, 496 F.3d at 323*.

Finally, plaintiffs have produced no evidence connecting Nestle S.A. to the alleged price-fixing harms in the United States. Plaintiffs broadly aver that Nestle S.A. made chocolate candy "available for purchase" to U.S. consumers, maintained "tightly interwoven" operations between the United States and Canada, and "participated in a conspiracy to fix prices in the United States." (Doc. 520 at 34.) These conclusory allegations are insufficient to establish personal jurisdiction over Nestle S.A. See, e.g., *Mass. Sch. of Law at Andover, Inc. v. Am. Bar Ass'n, 107 F.3d 1026, 1042 (3d Cir. 1997)* (refusing to allow jurisdictional discovery because plaintiffs averments that defendant "transact[ed] business" in the relevant forum were insufficient to ascribe actual forum contacts to the defendants); *Patterson, 893 F.2d at 604*.

At oral argument, plaintiffs advocated **[**67]** for jurisdiction over Nestle S.A. based upon a license agreement under which Hershey Global manufactures and distributes **[*562]** Kit-Kat(R) and Rolo(R) in the United States using Nestle trademarks. (Doc. 571 at 111.) However, Nestle S.A. has proffered evidence that it is not party to this agreement. (Doc. 479, Ex. A P 11.) Based upon Hershey Global's filings with the Securities and Exchange Commission, it appears that an entity known as Societe des Produits Nestle S.A. ("Societe") owns the trademarks subject to the agreement. See Hershey Foods Corp., Annual Report (Form 10-K), at 11 (April 15, 1991) (reflecting that Hershey Global previously maintained the license agreement with Rowntree Mackintosh Confectionery Limited, which transferred it to Societe on January 1, 1990); see also The Hershey Co., Annual Report (Form 10-K), at 108 (February 20, 2009) (same), available at *http://idea.sec.gov/Archives/edgar/data/47111/000119312509033670/d10k.htm* (last visited Mar. 3, 2009). Societe is not a party to the above-captioned matters, and the record does not describe the relationship, if any, between Nestle S.A. and Societe. At present, the record is devoid of evidence that Nestle S.A. receives any **[**68]** financial benefit from the agreement. The limited information about the agreement therefore prevents it from serving as a basis for personal jurisdiction over Nestle S.A.

Plaintiff's have failed to "establish[] jurisdictional facts through sworn affidavits or other competent evidence" with respect to any of the *Rule 12(b)(2)* defendants. *Patterson, 893 F.2d at 604*; *Poole v. Sasson, 122 F. Supp. 2d 556, 557 (E.D. Pa. 2000)* (***HN19***[] "Although all allegations in the complaint are taken as true, a plaintiff may not solely rely on bare pleadings to satisfy his jurisdictional burden."). The court concludes that the current record does not establish a prima facie showing of personal jurisdiction under purposeful availment theory.

b. Stream-of-Commerce Theory

Plaintiffs invoke the stream-of-commerce theory against only Mars Canada. ***HN20***[] The theory, recognized by the Supreme Court in Asahi Metal Industry Co. v. Superior Court, generally allows a court to exercise personal jurisdiction over a defendant that directs its products into a forum. Application of Asahi, a plurality decision, is somewhat complicated in that it contains multiple perspectives on the theory. [22] Under the first perspective, articulated **[**69]** by Justice O'Connor, a defendant's isolated act of placing a product into the stream of commerce does not subject the defendant to personal jurisdiction. *Asahi, 480 U.S. at 112*. Rather, the defendant must engage in additional conduct that evidences a desire to participate in a market within the forum. *Id*. Examples of such conduct include designing a product for particular consumers, establishing a customer support network, retaining a sales agent, and marketing the product in the forum. Id. The second perspective from Asahi, presented by Justice Brennan, espouses a broader jurisdictional scope. Under this perspective, jurisdiction arises from the "regular and anticipated flow of products from manufacture to distribution to retail sale" regardless of whether the defendant otherwise directs activity at the forum. *Id. at 117*. The critical inquiry is whether the defendant possesses knowledge that the product will enter a particular forum, making litigation a foreseeable result of commerce. *Id*. Justice

[22] Asahi was decided by a vote of 4-4-1. The perspectives articulated by Justices O'Connor and Brennan represent the two pluralities. Justice Stevens joined neither plurality and posited a third jurisdictional analysis.

Stevens, discussing a third perspective, eschewed a direct correlation between defendant's awareness of a product's destination **[*563]** and purposeful availment of the forum's laws. *Id. at 122* (Stevens, **[**70]** J., concurring). Instead, a court's exercise of jurisdiction depends upon "the volume, the value, and the hazardous character of the components" that defendant places into the stream of commerce. *Id.*

The United States Court of Appeals for the Third Circuit has embraced an amalgamation of these perspectives, resulting in a holistic stream-of-commerce analysis adapted to the facts of each particular case. *Renner v. Lanard Toys Ltd., 33 F.3d 277, 282-83 (3d Cir. 1994)*. ***HN21***[] As a specific jurisdiction doctrine, however, the stream-of-commerce theory requires that plaintiff's claim arise out of the flow of defendant's products into the forum. See *Pennzoil Prods. Co. v. Colelli & Assocs., 149 F.3d 197, 201 (3d Cir. 1998)* (stating that specific jurisdiction requires a link between the defendant's activity directed in the forum and the plaintiff's harm); *Simeone ex rel. Estate of Albert Francis Simeone, Jr. v. Bombardier-Rotax GMBH, 360 F. Supp. 2d 665, 672 (E.D. Pa. 2005)* (declining **[**71]** to exercise jurisdiction under stream-of-commerce principles because no connection existed between the activities that the defendant directed toward the forum and the harm for which the plaintiff brought suit); see also *Ruiz de Molina v. Merritt & Furman Ins. Agency, 207 F.3d 1351, 1357 (11th Cir. 2000)* (***HN22***[] "The stream of commerce test for jurisdiction is met if the nonresident's product is purchased by or delivered to a consumer in the forum state, so long as the nonresidents's conduct and connection with the forum state are such that he should reasonably anticipate being haled into court there *for claims arising out of that conduct*." (emphasis added)); *Mason v. Mooney Aircraft Corp., No. 02-3323-CV-S, 2003 U.S. Dist. LEXIS 16977, 2003 WL 21244160, at *8 (W.D. Mo. May 8, 2003)* (***HN23***[] "The basic theory of the stream of commerce analysis is one of foreseeability: One who puts a product into the stream of commerce in such a fashion as to reasonably foresee its sale in a certain jurisdiction cannot complain of having to defend against claims in that jurisdiction arising out of the product's presence there."). ***HN24***[] Stream-of-commerce jurisdiction must also "comport[] with notions of fair plan and substantial justice." *Pennzoil, 149 F.3d at 205* **[**72]** ("[E]ven if a defendant has the requisite minimum contacts with the forum . . . , other factors may militate against exercising jurisdiction.").

HN25[] Originally developed in the products liability context, courts have extended the stream-of-commerce doctrine to a variety of cases in which plaintiff's claims are directly related to particular characteristics of defendant's product or to defendants' act of shipping the product into the forum. For example, courts have invoked the theory in patent infringement cases. See, e.g., *Horne v. Adolph Coors Co., 684 F.2d 255, 259-60 (3d Cir. 1982)* (applying the stream-of-commerce theory to a patent case because the defendant could anticipate plaintiff's claim, which related to an allegedly infringing product design); *Electro Med. Equip. Ltd. v. Hamilton Med. AG, No. Civ.A. 99-579, 1999 U.S. Dist. LEXIS 18483, 1999 WL 1073636, at *6 (E.D. Pa. Nov. 16, 1999)* (same). This court has applied stream-of-commerce theory to Lanham Act claims relating to false product labeling, *Hershey Pasta Group v. Vitelli-Elvea Co., 921 F. Supp. 1344, 1348-50 (M.D. Pa. 1996)*, and our sister court for the District of New Jersey has concluded that customizing a product for an in-forum purchaser provides **[**73]** stream-of-commerce jurisdiction over a breach-of-contract claim for alleged product defects, *Synergy, Inc. v. Manama Textile Mills, W.L.L., No. Civ.A. 06-4129, 2008 U.S. Dist. LEXIS 12791, at *31-42 (D.N.J.* ***[*564]*** *Feb. 20, 2008)*. However, ***HN26***[] plaintiffs have not cited and the court has not identified any antitrust case imposing jurisdiction upon a defendant that simply shipped products into a forum and lacked control over in-forum pricing. At least two courts have refused to apply the stream-of-commerce theory in this context. See, e.g., *Four B Corp. v. Ueno Fine Chems. Indus., 241 F. Supp. 2d 1258, 1265-66 (D. Kan. 2003)* (declining to apply stream-of-commerce theory in a price-fixing case because the defendant's mere insertion of products into channels of commerce was insufficient to create a relationship between the defendant and the in-forum price fixing); *Dee-K Enters. v. Heveafil Sdn. Bhd., 982 F. Supp. 1138, 1146-47 (E.D. Va. 1997)* (refusing to exercise stream-of-commerce jurisdiction over a defendant who shipped products into and attended periodic meetings in the U.S. but possessed no domestic pricing authority).

Based upon the present record, Mars Canada is beyond the court's stream-of-commerce **[**74]** jurisdiction because plaintiffs' claims lack a nexus with its placement of goods into conduits of commerce. Mars Canada's status as a fountainhead of chocolate products cannot support specific jurisdiction for purposes of a harm unrelated to its manufacture of goods. Defendants have presented sworn statements that Mars Canada neither sells chocolate confectionary products to U.S. consumers nor possesses pricing power in the American market. Plaintiffs have not confuted these assertions. The present record therefore does not establish a prima facie case of stream-of-commerce jurisdiction over Mars Canada. [23]

c. Effects Test of *Calder v. Jones*

HN27[] A plaintiff may predicate specific jurisdiction upon a defendant's activities outside of the relevant forum if the plaintiff suffered the effects of the conduct within the forum. See *Calder, 465 U.S. at 789-90*; *Imo Indus. v. Kiekert AG, 155 F.3d 254, 265-66 (3d Cir. 1998)*. Often denominated the "Calder effects test" after the Supreme **[**75]** Court decision from which it derives, this form of specific jurisdiction requires the plaintiff to establish:

(1) The defendant committed an intentional tort;

(2) The plaintiff felt the brunt of the harm in the forum such that the forum can be said to be the focal point of the harm suffered by the plaintiff as a result of the tort; [and]

(3) The defendant expressly aimed his tortious conduct at the forum such that the forum can be said to be the focal point of the tortious activity.

Marten, 499 F.3d at 297 (quoting *Imo Indus., 155 F.3d at 265-66*). To satisfy the final element of the test, plaintiff must (a) demonstrate that "the defendant knew that the plaintiff would suffer the brunt of the harm caused by the tortious conduct in the forum" and (b) "point to specific activity indicating that the defendant expressly aimed its tortious conduct at the forum." *Id. at 298* (quoting *Imo Indus., 155 F.3d at 265*). A plaintiff may rely upon the Calder effects test to acquire jurisdiction over a defendant in cases involving business torts, including price fixing. *In re Bulk [Extruded] Graphite Prods., No. Civ. 02-6030, 2007 U.S. Dist. LEXIS 54906, 2007 WL 2212713, at *6 (D.N.J. July 30, 2007)*; see also *Imo Indus., 155 F.3d at 265-66* **[**76]** (establishing a framework for application **[*565]** of the Calder test to business torts).

In the matter *sub judice*, plaintiffs contend that the Calder effects test confers personal jurisdiction over Mars Canada. Plaintiffs assert that Mars Canada committed an intentional antitrust tort with domestic effects. However, plaintiffs have not raised a prima facie evidentiary showing that the company directed its conduct at the United States. None of plaintiffs' evidence suggests that Mars Canada engaged in discussions--either domestic or foreign--regarding prices of American confectionary products. [24] Based upon the current evidentiary record, the inter-

---

[23] Plaintiffs apparently do not assert stream-of-commerce jurisdiction over Nestle Canada. Even if the court were to infer such an argument, the *ratio decidendi* set forth above applies with equal force to Nestle Canada.

[24] In re Bulk [Extruded] Graphite Products illustrates the evidentiary showing that a plaintiff must proffer to acquire jurisdiction under the Calder effects test. In Bulk [Extruded] Graphite, a foreign defendant moved to dismiss for lack of personal jurisdiction. Plaintiffs introduced deposition testimony confirming that the moving defendant **[**77]** had attended meetings concerning price fixing in foreign graphite markets. *Bulk [Extruded] Graphite, 2007 U.S. Dist. LEXIS 54906, 2007 WL 2212713 at *6*. During these meetings, a co-conspirator recommended that the defendant "establish contacts" with the co-conspirator's American company in order to exert upward pressure on U.S. prices. *2007 U.S. Dist. LEXIS 54906, [WL] at *7-8*. In furtherance of this recommendation, the defendant informed the co-conspirator that he desired to implement a global price-fixing scheme to prevent arbitrage across markets. *2007 U.S. Dist. LEXIS 54906, [WL] at *8-9*. The court concluded that although the co-conspirator "did not expressly state [that the defendant] acted to fix prices in the United States, [the co-conspirator] clearly did state that a conspiracy to fix prices in Europe must necessarily involve the fixing of prices in other markets, including the United States." *2007 U.S. Dist. LEXIS 54906, [WL] at *9*. Plaintiffs therefore marshaled "thin" evidence that the defendant "expressly directed acts in furtherance of price fixing in the United States." Id.

In the instant matter, plaintiffs' evidentiary proffer is more diaphanous than that provided in Bulk [Extruded] Graphite. Plaintiffs have not submitted evidentiary support for their contentions that the American and **[**78]** Canadian confectionary markets are interwoven or that arbitrage opportunities exist across international boundaries. Absent an evidentiary showing consistent with that advanced in Bulk [Extruded] Graphite, plaintiffs have failed to establish a prima facie case of *Calder* effects jurisdiction.

company shipment of products constitutes the only activity of Mars Canada that crosses the border. Standing alone, these shipments do not establish a basis for personal jurisdiction under the *Calder* effects test. [25]

2. General Jurisdiction

HN28[] General jurisdiction arises when the defendant possesses "continuous and systematic contacts with the forum." *Mellon Bank, 983 F.2d at 554* (internal quotation omitted). It empowers a court to hear any claim against a defendant regardless of the claim's relationship to the defendants' in-forum contacts. *Kehm Oil Co. v. Texaco, 537 F.3d 290, 300 (3d Cir. 2008)*; *Pinker, 292 F.3d at 368 n.1* (***HN29***[] "If general jurisdiction exists, the contacts between the defendant and the forum need not be specifically related to the underlying cause of action in order for an exercise of personal jurisdiction over the defendant to be proper."). ***HN30***[] A court may acquire general jurisdiction over a defendant under two alternative theories. First, a court may obtain jurisdiction over any defendant that **[**79]** exhibits systematic and continuous contacts with the forum. Second, a court, already imbued with general jurisdiction over a corporation, may obtain jurisdiction over an affiliated entity when the two companies have fully integrated their operations and function as a single, unified entity. The latter doctrine is frequently identified as alter ego jurisdiction.

[*566] a. Systematic and Continuous Contacts

HN31[] A defendant must possess "significantly more than mere minimum contacts" to support exercise of general jurisdiction; rather, the defendant's contacts with the forum must be systematic and continuous. [26] *Provident Nat'l Bank v. Cal. Fed. Sav. & Loan Ass'n, 819 F.2d 434, 437 (3d Cir. 1987)*. The court must evaluate the "nature and quality" of a defendant's contacts in light of factors such as whether the defendant sells products, maintains a sales staff, derives significant revenue from, or advertises in the forum. *Clark v. Matsushita Elec. Indus. Co., 811 F. Supp. 1061, 1067 (M.D. Pa. 1993)* (quoting *Allied Leather Corp. v. Altama Delta Corp., 785 F. Supp. 494, 497-98 (M.D. Pa. 1992)*); accord *BP Chems. Ltd. v. Formosa Chem. & Fibre Corp., 229 F.3d 254, 262 (3d Cir. 2000)*. Other activities favoring **[**80]** general jurisdiction include holding a business license, filing tax returns or administrative reports, owning land or personal property, purchasing products, or employing an agent in the forum. See *ClubCom, Inc. v. Captive Media, Inc., No. 02:07-cv-1462, 2009 U.S. Dist. LEXIS 7960, 2009 WL 249446, at *16 (W.D. Pa. Jan. 31, 2009)*; *Farina v. Nokia, 578 F. Supp. 2d 740, 750 (E.D. Pa. 2008)*.

In the instant matter, plaintiffs predicate general jurisdiction over Nestle S.A. upon the issuance of American **[**81]** Depository Receipts ("ADRs"), [27] ownership of U.S. patents, maintenance of a global website, participation in U.S. merger transactions, submission to the jurisdiction of U.S. courts, control over U.S. subsidiaries, and execution of the Societe-Hershey license agreement. None of these contacts alone confers general jurisdiction over Nestle S.A. See *BP Chems., 229 F.3d at 261, 263* (concluding that ***HN32***[] execution of a contract with a forum resident is alone insufficient to subject defendant to the court's jurisdiction); *Allen v. Russian Fed'n, 522 F. Supp. 2d 167, 195 (D.D.C. 2007)* (concluding that the ***HN33***[] issuance of ADRs does not support general jurisdiction without additional in-forum contacts); [28] *Telcordia Techs. v. Alcatel S.A., No. Civ.A. 04-874, 2005 U.S. Dist. LEXIS*

---

[25] Plaintiffs' briefs do not address Calder's applicability to Cadbury plc, Cadbury Holdings, or Nestle Canada.

[26] At oral argument, counsel sparred over the variety of adjectives used to describe the type of contacts that are prerequisite to an exercise of general jurisdiction, including *systematic, continuous, substantial, significant, extensive*, and *pervasive*. (Doc. 571 at 75-76, 91.) To allay lexical concerns, the court will confine its discussion to the analysis of *systematic* and *continuous* contacts upon which the Supreme Court predicated general jurisdiction in *Perkins v. Benguet Consol. Mining Co., 342 U.S. 437, 445, 72 S. Ct. 413, 96 L. Ed. 485, 63 Ohio Law Abs. 146 (1952)*. The court notes that Helicopteros later reaffirmed "continuous and systematic" contacts as the standard for exercise of general jurisdiction. *466 U.S. at 414-15* & n.9 (quoting *Perkins, 342 U.S. at 438, 445)*.

[27] ADRs are investment devices that allow American investors to trade shares of foreign corporations in the same manner as those of domestic companies. ADRs are issued by intermediary banks that acquire **[**82]** securities from foreign corporations and repackage them as instruments that investors can freely trade on U.S. exchanges. See *Pinker, 292 F.3d at 367*.

10194, 2005 WL 1268061, at *4 (D. Del. 2005) (**HN34**[] "[O]wnership of a United States patent, **[*567]** without more, cannot support the assertion of personal jurisdiction over a foreign patentee in any state besides the District of Columbia." (citation omitted)). [29], [30]

On the present record, these activities when aggregated are also insufficient to confer general jurisdiction over Nestle S.A. The listing of ADRs, prosecution of patents, and investigation of corporate acquisitions do not implicate systematic, continuous business dealings in the United States. Nestle S.A. is not a party to the Societe-Hershey license agreement, and its website passively provides general information **[*568]** about the Nestle corporate family. It neither offers products for purchase nor solicits business in the United States. *In toto*, the company's

---

[28] Rejection of ADRs as the foundation for general jurisdiction is consistent with Pinker, which held only that ADRs, standing alone, may provide a basis for *specific* jurisdiction in a securities fraud case. See Pinker, 292 F.3d at 372-73. The Pinker court declined to address the relationship between ADRs and general jurisdiction, id. at 368 n.1. To be clear, the court considers Nestle S.A.'s ADRs relevant to the general jurisdiction analysis but not sufficient in isolation to bring Nestle S.A. before the court. See Allen, 522 F. Supp. 2d at 195; accord Newport Components, Inc. v. NEC Home Elecs. (U.S.A.), Inc. 671 F. Supp. 1525, 1540 (C.D. Cal. 1987) (relying upon ADRs as one of several contacts supporting general jurisdiction in a case decided prior to Pinker).

[29] Plaintiffs have cited no case in which a court invoked general jurisdiction over a holding company as the result of acquisitions or "due diligence" activity undertaken in the relevant forum, and the court will not announce such a rule in this case. See, e.g., Helicopteros, 466 U.S. at 418 **[**83]** ("**HN35**[] [M]ere purchases, even if occurring at regular intervals, are not enough to warrant a State's assertion of in personam jurisdiction over a nonresident corporation in a cause of action not related to those purchase transactions."); BP Chems., 229 F.3d at 261, 263 (**HN36**[] "[A] non-resident's contracting with a forum resident, without more, is insufficient to establish the requisite minimum contacts" for specific or general jurisdiction.). **HN37**[] A holding company's acquisition of a domestic entity may confer specific jurisdiction in actions related to the transaction, but they do not support general jurisdiction in the absence of additional contacts with the forum. See, e.g., Perkins v. Benguet Consol. Mining Co., 342 U.S. 437, 438, 445, 72 S. Ct. 413, 96 L. Ed. 485, 63 Ohio Law Abs. 146 (1952) (documenting activities sufficient to support exercise of general jurisdiction, such as maintaining files, conducting business correspondence, distributing checks, opening bank accounts, and implementing management decisions within the forum); cf. Telcordia Techs., 2005 U.S. Dist. LEXIS 10194, 2005 WL 1268061, at *7 ("[I]ncorporating a subsidiary in the United States does not give rise to jurisdiction unless the litigation is related to the act of incorporation . . . ."); compare Ross v. Altria Group, Inc., No. C 04-01453, 2004 U.S. Dist. LEXIS 18558, 2004 WL 2055712, at *4 (N.D. Cal. 2004) **[**84]** (declining to exercise general jurisdiction over a holding company that engaged in national advertising campaigns but conducted no operations in the forum and maintained no physical presence there); with Shepherd Inv. Int'l v. Verizon Commc'ns, Inc., 373 F. Supp. 2d 853, 864-67 (E.D. Wis. 2005) (subjecting a holding company to general jurisdiction based upon its solicitation of in-forum capital, direct mailings to shareholders, promotional activities, interactive website for the sale of stock, and business relationships with 140 in-forum banks).

The court also rejects plaintiffs' assertion that Nestle S.A.'s retention of counsel in the U.S. establishes general jurisdiction. Plaintiffs have identified several U.S. law firms hired by Nestle S.A. to undertake its acquisitions. (Doc. 520, Exs. 11-15.) However, **HN38**[] it is illogical to predicate general jurisdiction upon Nestle S.A.'s employment of attorneys to effectuate transactions that fail *ex proprio vigore* to establish such jurisdiction. A decision to the contrary would suggest that *any* retention of counsel could give rise to general jurisdiction, including hiring attorneys for purposes of litigation. The court does not suggest that the **[**85]** activities of a defendant's legal representatives in a forum are irrelevant. Indeed, a defendant's propensity for litigation may result in the conferrence of general jurisdiction. The cases *sub judice*, however, do not present such a scenario.

[30] Plaintiffs assert that general jurisdiction over Nestle S.A. is appropriate because Nestle S.A. has consented to submit disputes arising under a 1989 joint venture contract to the United States District Court for the District of Minnesota. (Doc. 520, Ex. 36 P 5(b)). Plaintiffs have identified no precedent in which a court predicated exercise of general jurisdiction upon such a fleeting contact with a forum. The court finds that this minimal contact is entitled to little weight in the analysis of general jurisdiction. See infra p. 41.

Sterling Merchandising, Inc. v. Nestle S.A., No. Civ. 06-1015, 2008 U.S. Dist. LEXIS 31938 (D.P.R. Apr. 15, 2008) is also unavailing to plaintiffs' jurisdictional quest. In Sterling Merchandising, Nestle S.A. mounted a jurisdictional defense against the plaintiff's claim that it monopolized the Puerto Rican ice cream market through various corporate acquisitions. The court determined that it possessed specific jurisdiction over Nestle **[**86]** S.A. and, consequently, did not address the issue of general jurisdiction. (Id. at 5, 15.)

actions depict little more than the predictable measures employed by a holding company to coordinate usual business among its subsidiaries.

Further, Nestle S.A. does not engage in any of the activities to which courts have traditionally looked to find general jurisdiction. It does not buy or sell products in the United States, it has no employees in the U.S., and it does not own property, advertise, or maintain bank accounts here. As a holding company, Nestle S.A. manufacturers no goods, it ships no products, and it maintains no sales or marketing **[**87]** force anywhere in the United States.

Telcordia Technologies, Inc. v. Alcatel, S.A. provides an apt analogy for Nestle S.A.'s in-forum conduct. In Telcordia, a patent infringement case, the plaintiff attempted to obtain general jurisdiction over a foreign holding company based upon its issuance of ADRs, ownership of U.S. patents, global website and corporate image, and incorporation of an American subsidiary. *2005 U.S. Dist. LEXIS 10194, 2005 WL 1268061 at *6*. The court rejected these contacts--both individually and collectively--as sufficient grounds for general jurisdiction. *2005 U.S. Dist. LEXIS 10194, [WL] at *7-8*. The company owned no property, consummated no business transactions, and engaged in no operations in the U.S., rendering general jurisdiction improper. *2005 U.S. Dist. LEXIS 10194, [WL] at *1, 8*. Like the foreign corporation in *Telcordia*, Nestle S.A. possesses no contacts that result in a systematic, continuous presence in the United States. The present record fails to support general jurisdiction over Nestle S.A. [31]

The remaining *Rule 12(b)(2)* defendants are also beyond the court's general jurisdiction. Plaintiffs predicate jurisdiction over Nestle Canada upon the products that it shipped into the United States. However, those transactions, collectively valued at approximately C$ 500,000, [32] involved specialized chocolate products and occurred on a sporadic basis. See, e.g., *Kimball v. Countrywide Merch. Servs., No. Civ.A. 04-3466, 2005 U.S. Dist. LEXIS 1817, 2005 WL 318752, at *3 (E.D. Pa. Feb. 8, 2005)* **[**89]** (concluding that five sporadic in-forum sales representing less than 1% of the defendant's annual sales failed to sustain general jurisdiction). Nestle Canada has shipped no products into the U.S. since 2007. In light of these limitations, and in the absence of additional product distribution, the present record does not support the exercise of general jurisdiction over Nestle Canada.

Plaintiffs seek to acquire general jurisdiction over Cadbury plc and Cadbury Holdings on substantially the same grounds advanced against Nestle S.A. Plaintiffs claim that the periodic business **[*569]** inspections, quality auditing procedures, and royalty payments required by the Cadbury-Hershey agreements permit the court to exercise general jurisdiction. However, these regular but infrequent business dealings are precisely the type of contacts that the Supreme Court rejected as a basis for general jurisdiction in *Helicopteros. 466 U.S. at 417-18* (holding that ***HN39***[] business visits and purchases within a forum, "even if occurring at regular intervals, are not enough" to support general jurisdiction over a defendant). Hence, the court finds this argument **[**90]** unavailing.

Finally, plaintiffs contend that the court may impose jurisdiction upon Mars Canada based upon bills of lading that document shipments of Mars Canada products through American ports and upon the inter-company transfer of Mars Canada products to Mars Snackfood. These bills of lading identify thirty-one different product shipments between February 26, 2007 and October 31, 2008. [33] Importantly, the shipments occurred over a twenty-month

---

[31] *In re Automotive Refinishing Paint Antitrust Litigation, No. 1426, 2002 U.S. Dist. LEXIS 15099, 2002 WL 31261330 (E.D. Pa. July 31, 2002)* and *Newport Components, 671 F. Supp. 1525*, cited by plaintiffs, do not dictate a contrary result. In both cases, the court concluded **[**88]** that plaintiffs had established a prima facie case of jurisdiction based upon systematic contacts with the United States, including extensive activity in furtherance of direct sales. See *Auto. Refinishing Paint, 2002 U.S. Dist. LEXIS 15099, 2002 WL 31261330, at *9* (allowing plaintiffs to engage in jurisdictional discovery after establishing that the foreign defendant moving for dismissal had directly sold products worth $ 1.5 billion to its U.S. subsidiary); *Newport Components, 671 F. Supp. at 1538-1540* (predicating general jurisdiction upon defendant's use of federal courts to assert legal claims, issuance of ADRs, in-forum advertising, and domestic television sales). As Nestle S.A. does not sell products, maintain personnel, or advertise in the U.S., these cases are factually dissimilar.

[32] The value of these exports is calculated in Canadian dollars.

[33] Plaintiffs submitted fifty-nine bills of lading, many of which appear to be duplicative.
