Opinion

ORDER REGARDING MOTION FOR LEAVE TO AMEND AND MOTION TO DISMISS SECOND AMENDED COUNTERCLAIMS

Re: Dkt. Nos. 161, 169

I. INTRODUCTION

Plaintiff Facebook, Inc. brought this action asserting that Defendants BrandTotal Ltd. and Unimania, Inc. (collectively, "BrandTotal") improperly collected data from Facebook's social networks. BrandTotal, which is in the business of analyzing advertising data collected from social media websites, asserts counterclaims based on Facebook's efforts to block its collection of data. The Court previously dismissed some of BrandTotal's counterclaims, including a counterclaim under the "unfair" prong of California's Unfair Competition Law (the "UCL"), which the Court dismissed with leave to amend. BrandTotal has amended that counterclaim and seeks leave to assert a new counterclaim for defamation. Facebook opposes adding the new defamation counterclaim and moves again to dismiss the amended UCL "unfairness" counterclaim. The Court held a hearing on August 27, 2021. For the reasons discussed below, BrandTotal's motion for leave to add a defamation counterclaim is DENIED, and Facebook's motion **[*3]** to dismiss the "unfairness" counterclaim is GRANTED. Facebook shall answer the surviving counterclaims, which are not affected by this order, no later than September 14, 2021.[1]

II. BACKGROUND

This order assumes the parties' familiarity with the background of the case, which is set forth at greater length in the Court's previous orders denying BrandTotal's motion for a temporary restraining order, Order Denying TRO (dkt. 63),[2] granting Facebook's motion to dismiss BrandTotal's original counterclaims with leave to amend, Order re 1st MTD (dkt. 108),[3] and granting in part Facebook's motion to dismiss BrandTotal's first amended counterclaims, Order re 2d MTD (dkt. 158).[4] The factual allegations summarized here are drawn from BrandTotal's counterclaims, which are taken as true for the purpose of Facebook's motion to dismiss. Nothing in this order should be construed as resolving any issue of fact that might be disputed at a later stage of the case.

A. BrandTotal's Allegations

In brief, and as is relevant to the present motions, Facebook operates social networks with billions of users, including the eponymous Facebook network and Instagram. BrandTotal collects advertising data from various social **[*4]** networks, including Facebook's, to prepare analysis that it sells to corporate advertisers. One of the means that BrandTotal has used to collect such data is a program called UpVoice, where users whom BrandTotal calls "panelists" voluntarily install a browser extension that tracks and records the advertisements displayed to those users through social media, and in return, BrandTotal provides those panelists gift cards as compensation. The version of UpVoice in use before commencement of this litigation automatically recorded not only data about the ads that users saw, but also users' demographic information, which the browser extension collected from Facebook.

On September 21, 2020, Facebook wrote to Google that UpVoice was "improperly scraping user PII (e.g., gender, relationship status, ad interests, etc.) without proper disclosure." 2d Am. Counterclaim ("SACC," dkt. 161-2) ¶ 69. Google removed UpVoice from its Chrome web store, significantly limiting UpVoice's availability and effectiveness, which in turn limited BrandTotal's ability to gather data for its corporate customers. *Id.* ¶ 72. Facebook has also removed BrandTotal's accounts from Facebook's networks. *Id.* ¶ 68.

---

[1] The parties have consented to the jurisdiction of a magistrate judge for all purposes pursuant to *28 U.S.C. § 636(c)*.

[2] *Facebook, Inc. v. BrandTotal Ltd., 499 F. Supp. 3d 720 (N.D. Cal. 2020)*. Citations herein to previous orders in this case refer to page numbers of the versions filed in the Court's ECF docket.

[3] *Facebook, Inc. v. BrandTotal Ltd., No. 20-cv-07182-JCS, 2021 U.S. Dist. LEXIS 31558, 2021 WL 662168 (N.D. Cal. Feb. 19, 2021)*.

[4] *Facebook, Inc. v. BrandTotal Ltd., No. 20-cv-07182-JCS, 2021 U.S. Dist. LEXIS 108137, 2021 WL 2354751 (N.D. Cal. June 3, 2021)*.

During this **[*5]** litigation, BrandTotal modified UpVoice to automatically collect only data about ads and to rely on panelists self-reporting their demographic information, and Facebook has agreed not take action against that modified version of UpVoice pending the outcome of this case without providing advance notice to BrandTotal. *See* Order Denying as Moot Mot. for Prelim. Inj. (dkt. 160).

B. Previous Orders and Relevant Procedural History

The Court previously dismissed BrandTotal's claim for violation of the "unfair" prong of the UCL, with leave to amend, for failure to allege at least a threatened violation of the antitrust laws, or some special circumstances that would allow that a claim to proceed without a clear connection to the antitrust laws. Order re 1st MTD at 16-17; Order re 2d MTD at 24-28. The Court noted that BrandTotal had not alleged either a coherent and plausible product market or an exception to the general rule that a market participant may permissibly refuse to deal with a rival. Order re 2d MTD at 26-28.

At a case management conference on February 19, 2021, the Court set a deadline of March 22, 2021 for the parties to seek leave to amend their pleadings, adopting the date jointly **[*6]** proposed in the parties' case management statement. Civil Minute Order (dkt. 106); *see* Case Mgmt. Statement (dkt. 99) at 12. On March 18, 2021, the Court granted the parties' stipulation to extend the deadline to amend pleadings from March 22, 2021 to May 21, 2021 to accommodate the time needed for BrandTotal to produce discovery that might be relevant to Facebook amending its complaint. *See* dkt. 130. As an exception to that deadline, the Court's June 3, 2021 order on Facebook's second motion to dismiss allowed BrandTotal to amend certain claims the Court dismissed without prejudice—for interference with BrandTotal's contracts with investors, for interference with BrandTotal's prospective economic advantage with respect to potential customers, and for violation of the "unfair" prong of the UCL—no later than June 25, 2021. Order re 2d MTD at 30.

C. Counterclaims at Issue

BrandTotal's second amended counterclaims include counterclaims the Court previously allowed to proceed (which are not at issue in the present motion), as well as a new counterclaim for defamation, SACC ¶¶ 140-51, and an amended counterclaim for violation of the UCL's "unfair" prong, *see id.* ¶¶ 152-77. The latter now **[*7]** rests on an alleged "market for Third-Party Commercial Advertising Information on personal social networking services in the United States," or in the alternative, such information pertaining to advertising "on the Facebook.com site and Instagram platform." *Id.* ¶¶ 155-59. "Third-Party Commercial Advertising Information" is defined as "analytics about non-SIEP advertisements run by third-party business[es]." *Id.* ¶ 15.[5]

D. The Parties' Arguments

BrandTotal moves for leave to add the new defamation counterclaim, arguing there is good cause to modify the scheduling order under *Rule 16(b)(4) of the Federal Rules of Civil Procedure* because "facts of this case are unusual and identifying the cause of action that fits and redresses the full harm of this situation, complex." Defs.' Mot. (dkt. 161) at 6. BrandTotal also argues that amendment should be allowed under the liberal standard of *Rule 15(a)(2)*. *Id.* at 6-7. Facebook contends that BrandTotal learned of the relevant facts underlying its defamation counterclaim months before it filed its first amended counterclaims in March of 2021, and thus was not diligent in waiting until well after the May 2021 deadline for amendment to seek to add this new counterclaim. Pl.'s Mot. & Opp'n (dkt. 169) at 5-7. Facebook **[*8]** also argues that leave to amend would be futile because its statement to

[5] "SIEP" refers to "social issues, elections or politics." Facebook provides more public information about SIEP advertisements than it provides about to other ads. *See* SACC ¶ 22. SIEP ads are not directly at issue in this case and are generally not relevant to BrandTotal's clients.

Google about BrandTotal's failure to provide sufficient disclosures was true, citing a potential issue with shared computers. *Id.* at 7-8.

Facebook moves to dismiss once again BrandTotal's counterclaim under the UCL's "unfair" prong for failure to allege a plausible relevant market, *id.* at 9-12, failure to allege monopoly power, *id.* at 12-13, and failure to allege an exception to the rule allowing refusal to deal, *id.* at 13-17.[6] BrandTotal argues that it has alleged a violation of the spirit of the antitrust laws because Facebook is unfairly relying on an order the Federal Trade Commission ("FTC") to exclude competitors from the market for advertising data. Defs.' Opp'n & Reply (dkt. 170) at 8-10. BrandTotal also contends that it has sufficiently alleged a product market (or more specifically, two potential product markets in the alternative) and monopoly power. *Id.* at 10-14. As for refusal to deal, BrandTotal argues that it "is not asking Facebook to authorize BrandTotal's access" to advertising data, but instead seeking to bar Facebook from using third parties like Google and the FTC to interference with BrandTotal's **[*9]** business, and challenging Facebook's removal of BrandTotal's accounts on Facebook, which eliminated BrandTotal's ability to advertise its own services on Facebook. *Id.* at 14-16. BrandTotal contends that Facebook's reports to Google and the FTC do not implicate the refusal-to-deal rule, and that BrandTotal's accounts and past course of dealing in advertising on Facebook fall within the exception recognized by *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*. Defs.' Opp'n & Reply at 10-14.

In a "Notice of Supplemental Event" filed after briefing on the present motions had closed, BrandTotal submitted: (1) an August 3, 2021 press release by Facebook indicating that it had disabled access by certain New York University researchers who had been collecting advertising data in a manner at least arguably similar to BrandTotal, with Facebook having acted purportedly to protect user privacy and comply with an order by the FTC; and (2) an August 5, 2021 letter from an FTC official to Facebook's CEO asserting that the FTC's order did not prohibit Facebook allowing the sort of research at issue, that Facebook had failed to comply with a commitment to update the FTC about significant events, and that Facebook's press release was misleading. **[*10]** *See* dkt. 173. These developments are not relevant to the Court's analysis of the present motions.

III. ANALYSIS

A. Motion for Leave to Amend

1. Legal Standard

Deviations from scheduling orders, including with respect to amendment of pleadings, are governed by *Rule 16 of the Federal Rules of Civil Procedure*, which provides that such orders "may be modified only for good cause and with the judge's consent." *Fed. R. Civ. P. 16(b)(4)*. BrandTotal concedes that *Rule 16(b)(4)* governs its motion in this case. *See* Defs.' Opp'n & Reply at 3-4.

The Ninth Circuit has established a standard for such modification that focuses on the diligence of the party seeking relief from a deadline:

> Unlike *Rule 15(a)*'s liberal amendment policy . . . , *Rule 16(b)*'s "good cause" standard primarily considers the diligence of the party seeking the amendment. The district court may modify the pretrial schedule "if it cannot reasonably be met despite the diligence of the party seeking the extension." *Fed. R. Civ. P. 16* advisory committee's notes (1983 amendment). Moreover, carelessness is not compatible with a finding of diligence and

---

[6] Facebook also moves to dismiss BrandTotal's counterclaim under the "unlawful" prong of the UCL to the extent that it rests on the new defamation counterclaim. The parties agree that to the extent that counterclaim is based on the defamation counterclaim (as opposed to the tortious interference counterclaims the Court previously allowed to proceed) they rise or fall together. *See* Defs.' Opp'n & Reply at 17.

> offers no reason for a grant of relief. Although the existence or degree of prejudice to the party opposing the modification might supply additional reasons to deny a motion, the focus of the inquiry is upon **[*11]** the moving party's reasons for seeking modification. If that party was not diligent, the inquiry should end.

Johnson v. Mammoth Recreations, Inc., 975 F.2d 604, 609 (9th Cir. 1992) (citations omitted). Courts look to a party's diligence not only in complying with the scheduling order after it has been issued, but also "in creating a workable *Rule 16* scheduling order," as well as "in seeking amendment of the *Rule 16* order, once it became apparent that [the party] could not comply with the order." *Jackson v. Laureate, Inc., 186 F.R.D. 605, 607 (E.D. Cal. 1999)*.

2. BrandTotal Has Not Shown Diligence

"BrandTotal does not dispute that it learned of Facebook's false statement to Google through discovery in the December 2020-January 2021 timeframe and then sought to amend in June 2021," but argues that the complexity of factual and legal issues in this case, and its good faith attempt to assert a related claim under the "fraudulent" prong of the UCL in the first instance, demonstrate good cause for delay. Defs.' Opp'n & Reply at 4-5.

While this case contains a number of complex issues, the question of whether a purportedly false statement about BrandTotal that harmed BrandTotal's business interests might support a defamation claim is not among them. BrandTotal has identified no complexity with respect to that counterclaim that would have **[*12]** prevented BrandTotal from including it in BrandTotal's March 5, 2021 first amended counterclaims (which included all of the factual allegations on which BrandTotal now rests its defamation counterclaim)—much less anything that prevented BrandTotal from at least raising the possibility of amendment and seeking an extension of the amendment deadline before it expired on May 21, 2021, several months after BrandTotal discovered the facts at issue.

District courts have rejected motions to amend a scheduling order to permit amendment based on facts previously alleged:

> In sum, the allegations Plaintiff seeks to add to the complaint are not comprised of newly discovered facts, but facts that have already been known and pled by Plaintiff in the FAC or facts that Plaintiff has known, or should have known since the inception of the lawsuit or at the time he amended his complaint in 2012, but failed to raise. Thus, the basis for amendment does not establish Plaintiff's diligence in seeking to amend the complaint to include these allegations.

*Bever v. CitiMortgage, Inc., No. 1:11-cv-01584-AWI, 2014 U.S. Dist. LEXIS 54390, 2014 WL 1577250, at *9 (E.D. Cal. Apr. 18, 2014)*, *aff'd on other grounds*, *708 F. App'x 341 (9th Cir. 2017)*. BrandTotal identifies no case holding a party's failure to recognize a legal **[*13]** theory implicated by the facts it has already alleged to be consistent with diligence under *Rule 16(b)(4)*. Instead, the cases BrandTotal cites that permitted comparable amendments were decided under *Rule 15*'s liberal standard for amendment, not the more stringent standard applicable to modifying a scheduling order. *See* Defs.' Opp'n & Reply at 5-6 (citing *Eminence Cap., LLC v. Aspeon, Inc., 316 F.3d 1048, 1053 (9th Cir. 2003)*; *Ill. Tool Works, Inc. v. MOC Prod. Co., No. 09CV1887 JLS (AJB), 2010 U.S. Dist. LEXIS 113702, 2010 WL 4314296 (S.D. Cal. Oct. 26, 2010)*).

In the first amended counterclaims that BrandTotal filed before the amendment deadline, it chose to pursue a relatively complex claim under the "fraudulent" prong of the UCL based on Facebook's purported misrepresentation to Google. It is not clear why BrandTotal chose that claim over a relatively more straightforward defamation claim, or why it did not bring both claims—BrandTotal states only that it "admittedly struggled to identify the right cause of action (almost all of which pre-date the Internet age)." Defs.' Opp'n & Reply at 4. If BrandTotal made a tactical choice to pursue only the UCL claim in the first instance, it did so knowing the risk that the amendment deadline would expire before the Court assessed that claim's viability. If BrandTotal merely overlooked its potential defamation claim, "carelessness is not compatible with a finding **[*14]** of diligence and offers no reason for a grant of relief." *Johnson, 975 F.2d at 609*.

Because BrandTotal has not shown diligence in seeking to comply with the scheduling order, the motion for leave to amend to add a defamation counterclaim, and to expand BrandTotal's counterclaim under the "unlawful" prong of the UCL to encompass defamation as a predicate, is DENIED. The Court does not reach the parties' arguments as to whether amendment would be futile.

B. Motion to Dismiss

1. Legal Standard

A complaint may be dismissed for failure to state a claim on which relief can be granted under *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. "The purpose of a motion to dismiss under *Rule 12(b)(6)* is to test the legal sufficiency of the complaint." *N. Star Int'l v. Ariz. Corp. Comm'n, 720 F.2d 578, 581 (9th Cir. 1983)*. Generally, a claimant's burden at the pleading stage is relatively light. *Rule 8(a) of the Federal Rules of Civil Procedure* states that a "pleading which sets forth a claim for relief . . . shall contain . . . a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)*.

In ruling on a motion to dismiss under *Rule 12(b)(6)*, the court takes "all allegations of material fact as true and construe[s] them in the light most favorable to the non-moving party." *Parks Sch. of Bus. v. Symington, 51 F.3d 1480, 1484 (9th Cir. 1995)*. Dismissal may be based on a lack of a cognizable legal theory or on the absence of facts that would support **[*15]** a valid theory. *Balistreri v. Pacifica Police Dep't, 901 F.2d 696, 699 (9th Cir. 1990)*. A pleading must "contain either direct or inferential allegations respecting all the material elements necessary to sustain recovery under some viable legal theory." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 562, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (citing *Car Carriers, Inc. v. Ford Motor Co., 745 F.2d 1101, 1106 (7th Cir. 1984)*). "A pleading that offers 'labels and conclusions' or 'a formulaic recitation of the elements of a cause of action will not do.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 555*). "[C]ourts 'are not bound to accept as true a legal conclusion couched as a factual allegation.'" *Twombly, 550 U.S. at 555* (quoting *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)*). "Nor does a complaint suffice if it tenders 'naked assertion[s]' devoid of 'further factual enhancement.'" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 557*). Rather, the claim must be "'plausible on its face,'" meaning that the claimant must plead sufficient factual allegations to "allow the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* (quoting *Twombly, 550 U.S. at 570*).

2. The UCL

California's UCL broadly prohibits unlawful, unfair, and fraudulent business acts. *Korea Supply Co., 29 Cal. 4th at 1143*. "Unlawful acts are anything that can properly be called a business practice and that at the same time is forbidden by law . . . be it civil, criminal, federal, state, or municipal, statutory, regulatory, or court-made, where court-made law is, for example a violation of a prior court order." **[*16]** *Sybersound Records, Inc. v. UAV Corp., 517 F.3d 1137, 1151 (9th Cir. 2008)* (ellipsis in original) (citations and internal quotation marks omitted). "Unfair acts among competitors means 'conduct that threatens an incipient violation of an ***antitrust law***, or violates the spirit or policy of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.'" *Id. at 1152* (quoting *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*). "Finally, fraudulent acts are ones where members of the public are likely to be deceived." *Id.*

An "unfair" claim by a competitor under the UCL generally must implicate the antitrust laws. *See Sybersound, 517 F.3d at 1152*. "When a plaintiff who claims to have suffered injury from a direct competitor's 'unfair' act or practice invokes *section 17200*, the word 'unfair' in that section means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech, 20 Cal. 4th at 187*.

Courts have dismissed competitors' claims under this prong of the statute where plaintiffs fail to identify "any 'unusual' aspect of the alleged conduct that would make that conduct something that violates the 'policy **[*17]** and spirit' of the antitrust laws without violating the actual laws themselves," comparable to the *Cel-Tech* defendant's "'privileged status as one of two holders of a lucrative government-licensed duopoly.'" *Synopsys, Inc. v. ATopTech, Inc., No. C 13-2965 MMC, 2015 U.S. Dist. LEXIS 104763, 2015 WL 4719048, at *10 (N.D. Cal. Aug. 7, 2015)* (quoting *Cel-Tech, 20 Cal. 4th at 190*); *see also* *Creative Mobile Techs., LLC v. Flywheel Software, Inc., No. 16-cv-02560-SI, 2017 U.S. Dist. LEXIS 24173, 2017 WL 679496, at *6 (N.D. Cal. Feb. 21, 2017)*.

3. BrandTotal's Theories of Unfair Competition

BrandTotal primarily pursues three theories of unfair competition: (1) the theory that "Facebook's failure to give permission to any entities to collect Third-Party Commercial Advertising Information . . . allows Facebook to shirk its legal obligations under the FTC Order by failing to establish a Privacy Program," violating the spirit of the antitrust laws, *see* SACC ¶ 155;[7] (2) the theory that Facebook has "has refused to deal with [BrandTotal] by terminating both the business and personal Facebook accounts of [BrandTotal] and [its] principals and by refusing to accept advertising from [BrandTotal]," *id.* ¶ 168; and (3) the theory that "Facebook interjects itself into the marketplace and takes active steps to destroy competitors" by, for example, having "contacted Google and made false and misleading statements about the operation of UpVoice and another of [BrandTotal's] applications, knowing that Google would **[*18]** remove those applications from the Google Chrome Store," *id.* ¶ 163.

a. Failure to Grant Permission

BrandTotal contends that Facebook's refusal to grant BrandTotal and others permission to access advertising data violates the *spirit* of the antitrust laws, such that BrandTotal need to track the precise contours of a Sherman Act claim to pursue a claim under the "unfair" prong of the *Sherman Act*. Defs.' Opp'n & Reply at 8-9. As described in a decision from this district, the California Supreme Court has recognized "that it is not just conduct that threatens a violation of an actual ***antitrust law*** that supports a UCL unfairness claim," but also "conduct that 'violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.'" *Diva Limousine, Ltd. v. Uber Techs., Inc., 392 F. Supp. 3d 1074, 1090-91 (N.D. Cal. 2019)* (quoting *Cel-Tech, 20 Cal. 4th at 187*). Such a violation must be "be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." *Cel-Tech, 20 Cal. 4th at 186-87*.

As a starting point, the U.S. Supreme Court has recognized that a market participant's right to refuse to deal with competitors generally serves procompetitive purposes, and **[*19]** that restricting that right can have anticompetitive effects:

> Firms may acquire monopoly power by establishing an infrastructure that renders them uniquely suited to serve their customers. Compelling such firms to share the source of their advantage is in some tension with the underlying purpose of ***antitrust law***, since it may lessen the incentive for the monopolist, the rival, or both to invest in those economically beneficial facilities. Enforced sharing also requires antitrust courts to act as central planners, identifying the proper price, quantity, and other terms of dealing—a role for which they are ill suited.

[7] The extent to which BrandTotal intends to pursue a theory based on Facebook's refusal to provide permission to access data is unclear. *Compare* Defs.' Opp'n & Reply at 8 (asserting that Facebook violates the spirit of the antitrust laws by "using the FTC Order to gain a competitive advantage by intentionally refusing to provide permission to any entity that seeks to collect Third-Party Commercial Advertising Information from Facebook's sites"); *with id.* at 14 ("BrandTotal's SAC presents two theories under which Facebook's behavior violates the unfair prong of the UCL. First, BrandTotal alleges Facebook interjects itself into the marketplace by petitioning Google to remove applications and extensions that compete with Facebook's advertising services. . . . Second, BrandTotal alleges Facebook stifles competition by punishing entities by removing the business and personal account pages of its competition and their principals and employees."). Despite BrandTotal's assertion that it "is not asking Facebook to authorize BrandTotal's access," *id.* at 14, the Court addresses in an abundance of caution BrandTotal's allegation that failure to authorize such access is anticompetitive, *see id.* at 8; SACC ¶ 155.

> Moreover, compelling negotiation between competitors may facilitate the supreme evil of antitrust: collusion. Thus, as a general matter, the Sherman Act "does not restrict the long recognized right of [a] trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal." *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992, 1919 Dec. Comm'r Pat. 460 (1919)*.

Verizon Commc'ns Inc. v. L. Offs. of Curtis V. Trinko, LLP, 540 U.S. 398, 407-08, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004) (alteration in original). That general rule is subject to "one, limited exception" involving termination of a course of past dealing, which is not applicable to advertising data that Facebook has never authorized anyone **[*20]** to access. *See* *Fed. Trade Comm'n v. Qualcomm Inc., 969 F.3d 974, 994-95 (9th Cir. 2020)* (citing *Aspen Skiing, 472 U.S. 585*). In light of Supreme Court precedent treating the right to refuse to deal as generally procompetitive, BrandTotal faces an uphill battle to show that Facebook's refusal to grant permission to access advertising data violates the spirit of the antitrust laws.

The only case BrandTotal cites allowing a UCL unfairness claim to proceed based on the spirit of the antitrust laws is *Diva Limousine, 392 F. Supp. 3d 1074*, which involved allegations that Uber had misclassified its drivers as independent contractors rather than employees. In holding that the plaintiff stated a claim under the "unfair" prong, Judge Chen cited the California Labor Code's statement of "'the policy of this state to vigorously enforce minimum labor standards in order . . . to protect employers who comply with the law from those who attempt to gain a competitive advantage at the expense of their workers by failing to comply with minimum labor standards,'" and the California Supreme Court's recognition of "'the unfair competitive advantage the business may obtain over competitors that properly classify similar workers as employees.'" *Id. at 1091* (quoting *Cal. Lab. Code § 90.5(a)*; *Dynamex Operations W. v. Superior Court, 4 Cal. 5th 903, 913, 232 Cal. Rptr. 3d 1, 416 P.3d 1 (2018)*) (emphasis omitted).

Here, BrandTotal has not identified any legislatively declared **[*21]** policy *related to competition* implicated by Facebook's alleged conduct. In a footnote, BrandTotal cites a provision of the *California Consumer Privacy Act ("CCPA")* defining "personal information" as including "'information regarding a consumer's interaction with an internet website, application, or advertisement.'" Defs.' Opp'n & Reply at 8 n.4 (quoting *Cal. Civ. Code § 1798.140(o)(1)(F)*) (emphasis omitted). The Court has previously rejected BrandTotal's scattershot citations to the CCPA that failed to tie that law's actual requirements to the conduct at issue in this case. *See* Order Denying TRO at 22 n.11. So too here. The fact that information about advertising interactions falls within the statute's definition of "personal information" does not, in itself, say anything about whether Facebook must provide BrandTotal access to such information, nor whether the legislature has identified restrictions of such access as implicating competition.

BrandTotal also relies heavily on the FTC's April 27, 2020 order requiring Facebook to take certain steps to protect user privacy. *See* SACC Ex. C. Nothing on the face of the FTC's order requires Facebook to allow BrandTotal the sort of access it seeks. BrandTotal cites the order's requirement that Facebook create a "Privacy **[*22]** Program," which it argues Facebook breached by failing to grant any third parties permission to collect advertising data. Defs.' Opp'n & Reply at 8-9; SACC ¶¶ 40-43, 155. While BrandTotal is correct that the FTC's order "does *not* direct Facebook to ban *all* automated collection of data from its platforms," SACC ¶ 42, it also does not *require* Facebook to authorize any such collection. The FTC issued its order to protect user privacy, *see* SACC ¶ 37, not to facilitate competition, and denying third parties access to user data is consistent with the mandate in section VII of that order (which calls for the establishment of a "Privacy Program") to "protects the privacy, confidentiality, and Integrity of the Covered Information collected, used, or shared by [Facebook]," SACC Ex. C at 8, § VII. BrandTotal has raised colorable arguments that the order may not have required Facebook to block its access, *see* Order re 2d MTD at 12-14, but it has not shown that the order required Facebook to provide access, or that it was in any way motivated by protecting competition in the market for advertising analytics.

Neither the FTC's order nor the CCPA resembles the sort of policy specifically linked to **[*23]** competition that supported the decision in *Diva Limousines*. Even if they did, BrandTotal has not shown a violation of either of those authorities. Having failed to identify any legislatively declared policy related to competition implicated by Facebook's failure to grant BrandTotal permission to access advertising data, BrandTotal cannot proceed on its counterclaim for a violation of the "spirit" of the antitrust laws. Facebook's motion to dismiss BrandTotal's unfairness counterclaim is GRANTED to the extent it rests on that theory.

b. Deactivation of Accounts and Advertising; Interference with Google

As for BrandTotal's theories based on Facebook's deactivation of its accounts, refusal to allow it to advertise on Facebook,[8] and successfully petitioning for Google to remove UpVoice from its store, BrandTotal asserts that even if it cannot proceed on a violation of the "spirit" of the antitrust laws, it has sufficiently alleged a product market and market power to proceed on a more conventional claim for actual or threatened violation of the antitrust laws.

As the Court noted previous in dismissing this claim with leave to amend, an antitrust plaintiff generally must identify **[*24]** a plausible product market. Order re 2d MTD at 26.

> Plaintiffs must plead a relevant market to state an antitrust claim under the Sherman Act, unless they assert a per se claim. While plaintiffs need not plead a relevant market with specificity, there are some legal principles that govern the definition of an antitrust "relevant market," and a complaint may be dismissed under *Rule 12(b)(6)* if the complaint's 'relevant market' definition is facially unsustainable.
> The relevant market must include both a geographic market and a product market. The latter . . . must encompass the product at issue as well as all economic substitutes for the product. Economic substitutes have a reasonable interchangeability of use or sufficient cross-elasticity of demand with the relevant product. Including economic substitutes ensures that the relevant product market encompasses the group or groups of sellers or producers who have actual or potential ability to deprive each other of significant levels of business.

Hicks v. PGA Tour, Inc., 897 F.3d 1109, 1120-21 (9th Cir. 2018) (cleaned up). "[O]ne method of determining whether a proposed market is viable is assessing 'whether a monopolist in the proposed market could profitably impose a small but significant and nontransitory price **[*25]** increase." *Id. at 1122-23* (quoting *Theme Promotions, Inc. v. News Am. Mktg. FSI, 546 F.3d 991, 1002 (9th Cir. 2018)*). A complaint that "merely restate[s] a test for market definition without any factual elaboration" is not sufficient. *Id. at 1122*. That said, "[t]here is no requirement that these elements of the antitrust claim be pled with specificity," and an "antitrust complaint therefore survives a *Rule 12(b)(6)* motion unless it is apparent from the face of the complaint that the alleged market suffers a fatal legal defect." *Newcal Indus., Inc. v. Ikon Off. Sol., 513 F.3d 1038, 1045 (9th Cir. 2008)*.

BrandTotal's alleges a market for "Third-Party Commercial Advertising Information," defined as "analytics about non-SIEP advertisements run by third-party business," either "on personal social networking services in the United States," or in the alternative, "on the Facebook.com site and Instagram platform." SACC ¶¶ 15, 155; *see also id.* ¶¶ 158-59. The second amended counterclaims include few if any factual allegations to support the conclusion that such a market definition meets the criteria for a viable product market in the antitrust context, and the markets proposed in an FTC enforcement action and congressional report that BrandTotal cites are of little value, because both concerned markets for social networking rather than for advertising analytics. *Cf.* SACC ¶¶ 156-57. **[*26]**

Nevertheless, there is some logic to this market, and Facebook's arguments for dismissal generally miss the mark. Facebook contends that courts have generally been skeptical of markets based on a single form of advertising that fail to treat other forms of advertising as potential substitutes. Pl.'s Mot. & Opp'n at 10-11 (citing *Hicks, 897 F.3d at*

---

[8] BrandTotal argues that its claims based on deactivation of accounts and refusal to permit advertising fall within the *Aspen Skiing* exception to the refusal-to-deal doctrine, which requires three elements: (1) unilateral termination of a voluntary and profitable course of dealing; (2) that could only be intended to sacrifice short-term benefits for long-term monopolist profits; (3) involving products already sold to other similarly situated customers. *See Qualcomm, 969 F.3d at 994-95*. Here, Facebook purportedly terminated BrandTotal's accounts and advertising based on BrandTotal's violation of Facebook's terms of service, including a prohibition of automated data collection without Facebook's permission. Given a party's general right to refuse to deal from the outset, it seems likely that a party may set conditions on such dealing and enforce those conditions if violated by terminating the relationship. The parties have not addressed that question in detail, however, and the Court need not resolve that issue in light of the separate basis for dismissal discussed below. Regardless, the refusal-to-deal doctrine does not apply to the extent BrandTotal's claim is based on Facebook's communication with Google.

1123). Here, however, BrandTotal's proposed market is not for advertising, but instead for analysis of advertising. A company that has chosen to advertise on social media would presumably not consider analysis of, say, billboard advertising to be a substitute for analysis of the advertising it has already placed on Facebook or other social networks. And while single-brand markets are also disfavored, *see* *Apple, Inc. v. Psystar Corp., 586 F. Supp. 2d 1190, 1198 (N.D. Cal. 2008)*, the market for analysis of advertising on Facebook and Instagram bears at least some resemblance to the sort of "derivative aftermarket" that courts have recognized as an exception to that rule, because a company that has purchased advertising on Facebook might have little to gain from analysis of other platforms where its ads do not appear, *see* *id. at 1196-97* (citing *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*; *Newcal Indus., 513 F.3d at 1049*). Neither party's arguments on this point—BrandTotal's incomplete sentence that advertising on Facebook **[*27]** "is not interchangeable with Third-Party Commercial Advertising Information on other sites (e.g., YouTube, Twitter, etc.) because," Defs.' Opp'n & Reply at 12, or Facebook's conclusory assertion that "this Facebook-only 'market' has none of the features that could even conceivably make it a derivative market," Pl.'s Reply at 3—are particularly helpful. BrandTotal's failure to address potential substitutes and to define the market clearly, including its failure to allege any particular definition of "personal social networking services" that would help the parties and the Court determine which platforms fall within the alleged market, raise concerns. The Court nevertheless assumes for the sake of argument that BrandTotal's alleged markets are sufficiently plausible to survive the limited scrutiny of *Rule 12(b)(6)*.

The next issue is market power, which "the Supreme Court has defined . . . as the power to 'control prices or exclude competition.'" *Cost Mgmt. Servs. v. Washington Natural Gas Co., 99 F.3d at 950* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*). "Whether monopoly power exists depends on a variety of factors," with market share relevant to that analysis but not the only factor; depending on market conditions, courts have found both market power and a lack of market power when a defendant's **[*28]** market share is in the sixty to seventy percent range. *Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc., 627 F.2d 919, 924 (9th Cir. 1980)*. The typical way in which an incomplete monopolist—a defendant with less than full control of the market—can nevertheless exert monopoly power is when that party controls enough of the market that "by restricting its own output, it can restrict marketwide output and, hence, increase marketwide prices." *Rebel Oil v. Atl. Richfield Co., 51 F.3d 1421, 1434 (9th Cir. 1995)*; *see also* *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2288, 201 L. Ed. 2d 678 (2018)* ("'Market power is the ability to raise price profitably by *restricting output*.'" (quoting a treatise; emphasis added in *Am. Express*)). "Prices increase marketwide in response to the reduced output because consumers bid more in competing against one another to obtain the smaller quantity available." *Rebel Oil, 51 F.3d at 1434*.

Here, BrandTotal alleges that a Congressional subcommittee reported that Facebook has claimed to control ninety-five percent of the market for social media. SACC ¶ 157. While market share alone does not determine market power, a share that high could likely support a plausible inference of market power sufficient to survive dismissal under *Rule 12(b)(6)*, although BrandTotal's failure to allege clearly that Facebook actually *has* that market share or to define how it is measured does not help its cause. *Cf.* *FTC v. Facebook, Inc., ___ F. Supp. 3d ___, 2021 U.S. Dist. LEXIS 119540, 2021 WL 2643627, at *12-13* ("Even accepting that merely **[*29]** alleging market share 'in excess of 60%' might sometimes be acceptable, it cannot suffice in this context, where Plaintiff does not even allege what it is measuring."). The larger problem is that this case is not about the market for social media—a market in which BrandTotal does not participate. This case concerns advertising analytics, and BrandTotal's allegation that by virtue of "[p]ossessing a monopoly in the market of personal social networking services . . . Facebook also necessarily possesses a monopoly market [sic] in Third-Party Commercial Advertising Information on personal social networking services," *id.* ¶ 158, is wholly conclusory, and undermined by the fact that BrandTotal holds at least some share of the market for social media advertising analytics without participating in the market for social media. Even to the extent Facebook can regulate control of automated data collection on its platforms, an advertising consulting company could presumably produce at least some degree of analysis of advertising on Facebook based on other methods like surveys and focus groups. BrandTotal has wholly failed to address the degree of competition in the market it has alleged—including **[*30]** the market share Facebook controls, whether there are other competitors besides BrandTotal and Facebook, and whether Facebook has the power to unilaterally restrict marketwide output of the analytical services at issue.[9] Facebook's motion to dismiss BrandTotal's unfairness claim under the UCL is therefore GRANTED for failure to present plausible allegations of market power.

It is at least conceivable that this defect could cured by further amendment. In considering whether to grant leave to amend, the Supreme Court has identified as an incomplete list of relevant factors "'undue delay, bad faith or dilatory motive on the part of the [party seeking to amend], repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, [and] futility of amendment, etc.'" *Eminence Cap., 316 F.3d at 1051-52* (quoting *Foman v. Davis, 371 U.S. 178, 182, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*). Multiple attempts at amendment do not always support a conclusion to deny further leave, and "it is the consideration of prejudice to the opposing party that carries the greatest weight." *Id. at 1052*.

Here, BrandTotal has made three unsuccessful attempts to state a UCL unfairness claim. *See* Order re 1st MTD at 16-17; Order re 2d MTD at 24-28. **[*31]** Unlike *Eminence Capital*, this *is* " a case where plaintiffs took 'three bites at the apple' by alleging and re-alleging the same theories in an attempt to cure pre-existing deficiencies." *316 F.3d at 1053* (reversing a district court's decision to dismiss with prejudice and deny leave to amend, based on the Ninth Circuit's conclusion that it was not such a case, and the plaintiff had instead sought to present new legal theories). BrandTotal's repeated failure to state a viable claim, as well as its failure to identify at the hearing specific allegations it could add to cure the defects addressed in this order, suggests that further leave to amend is likely to be futile. Moreover, continuing to litigate the pleadings would require at least a narrow exception to the scheduling order's deadline for amendment (which, as discussed above, expired months ago), and would require extending fact discovery—currently scheduled to close in November of this year—by many months if not much longer. Such delay would prejudice Facebook not only in delaying a resolution of BrandTotal's counterclaims against it, but also in delaying resolution of Facebook's affirmative claims against BrandTotal. The Court therefore denies **[*32]** leave to amend further, and dismisses BrandTotal's counterclaim under the "unfair" prong of the UCL with prejudice.

IV. CONCLUSION

For the reasons discussed above, BrandTotal's motion for leave to amend to add a defamation counterclaim (and to expand its counterclaim under the "unlawful" prong of the UCL to encompass defamation) is DENIED, and Facebook's motion to dismiss BrandTotal's counterclaim under the "unfair" prong of the UCL with prejudice is GRANTED.

For convenience and clarity, BrandTotal is instructed to file its second amended counterclaims as a separate docket entry no later than September 7, 2021. Facebook shall file its answer to the surviving counterclaims no later than September 14, 2021.

IT IS SO ORDERED.

Dated: August 31, 2021

Chief Magistrate Judge

End of Document

---

[9] At the hearing, BrandTotal cited its allegation that Facebook has taken similar actions against at least six other entities. *See* SACC ¶ 164. That allegations says nothing about Facebook's position in the market for the advertising information at issue, or whether other competitors exist that have not been subject to any such action by Facebook, or whether other competitors have been able to compete successfully despite Facebook taking similar action.

Torrey v. Infectious Diseases Soc'y of Am.

United States District Court for the Eastern District of Texas, Texarkana Division

September 1, 2021, Decided; September 1, 2021, Filed

CIVIL ACTION NO. 5:17-CV-00190-RWS

Reporter

2021 U.S. Dist. LEXIS 252509 *; 2021 WL 6773094

LISA TORREY, et al., Plaintiffs, v. INFECTIOUS DISEASES SOCIETY OF AMERICA, et al., Defendants.

Prior History: *Torrey v. Infectious Diseases Soc'y of Am., 2018 U.S. Dist. LEXIS 231522, 2018 WL 10124894 (E.D. Tex., Sept. 27, 2018)*

Core Terms

Lyme, disease, guidelines, IDSA, asserts, argues, antitrust, insurance company, antitrust claim, conspiracy, no evidence, summary judgment, antibiotic, patients, genuine, coverage, health insurance company, monopolization, long-term, contends, nonmovant, discovery, panelists, replies, summary judgment motion, alleged conspiracy, present evidence, relevant market, material fact, allegations

Counsel: **[*1]** For Alarie Bowerman, Individually and as Next Friend of Elisa Emory and Anais Bowerman, Brienna Reed, Randy Sykes, Plaintiffs: James Brunsting Hartle, Shrader & Associates LLP - Houston, Houston, TX; Ryan Kees Higgins, Rusty Hardin & Associates LLP, Houston, TX.

For Allison Lynn Caruana, Jessica McKinnie, Carol Fisch, Amy Hanneken, Jane Powell, John Valerio, Individually and as Next Friend of Christopher Valerio, Gayle Clarke, Kathryn Kocurek, Individually and on behalf of the Estate of J. David Kocurek PH.D, Plaintiffs: Ryan Kees Higgins, Rusty Hardin & Associates LLP, Houston, TX.

For Amber Boyles, Caitlin McGrory, Intervenor Plaintiffs: Daniel Raymond Dutko, Rusty Hardin & Associates LLP, Houston, TX.

For Amy Hanneken, Kristine Woodard, Plaintiffs: Daniel Raymond Dutko, Rusty Hardin & Associates LLP, Houston, TX; James Brunsting Hartle, Shrader & Associates LLP - Houston, Houston, TX; Lance Lee, Lance Lee, Texarkana, TX.

For Anthem Inc, Defendant: Eileen Regina Ridley, Foley & Lardner - San Francisco, San Francisco, CA.

For Blue Cross and Blue Shield of Texas, Defendant: William Sheridan, PRO HAC VICE, Reed Smith LLP-Pittsburgh, Pittsburgh, PA.

For Brienna Reed, Carol Fisch, Rosetta Fuller, **[*2]** Alarie Bowerman, Individually and as Next Friend of Elisa Emory and Anais Bowerman, Tawnya Dawn Smith, Individually and as Next Friend of Monet Pitre, Plaintiffs: Daniel Raymond Dutko, Rusty Hardin & Associates LLP, Houston, TX.

For Chloe Lohmeyer, Plaintiff: Daniel Raymond Dutko, Ryan Kees Higgins, Rusty Hardin & Associates LLP, Houston, TX; Eugene Roger Egdorf, Shrader & Associates LLP - Houston, Houston, TX.

For Dr. Allen Steere, Dr. Gary P. Wormser, Defendants: Michael A Warley, Pillsbury Winthrop Shaw Pittman LLP - Washington, Washington, DC; Ronald Casey Low, Pillsbury Winthrop Shaw Pittman LLP - Austin, Austin, TX.

For Dr. Eugene Shapiro, Dr. John J. Halperin, Dr. Leonard Sigal, Infectious Diseases Society of America, Dr. Raymond J. Dattwyler, Defendants: Ronald Casey Low, Pillsbury Winthrop Shaw Pittman LLP - Austin, Austin, TX.

For Dr. Gary P. Wormser, Dr. Eugene Shapiro, Dr. John J. Halperin, Defendants: Alvin Dunn, Pillsbury Winthrop Shaw Pittman LLP - Washington, Washington, DC; Peter John Chassman, Reed Smith LLP, Houston, TX.

For Dr. Leonard Sigal, Defendant: Alvin Dunn, Michael A Warley, Pillsbury Winthrop Shaw Pittman LLP - Washington, Washington, DC.

For Gayle Clarke, Adriana **[*3]** Monteiro Moreira, Carol Fisch, Chloe Lohmeyer, Alarie Bowerman, Individually and as Next Friend of Elisa Emory and Anais Bowerman, Allison Lynn Caruana, John Valerio, Individually and as Next Friend of Christopher Valerio, Lisa Torrey, Jane Powell, Plaintiffs: Lance Lee, Lance Lee, Texarkana, TX.

For John Valerio, Individually and as Next Friend of Christopher Valerio, Gayle Clarke, Plaintiffs: Daniel Raymond Dutko, Rusty Hardin & Associates LLP, Houston, TX; Eugene Roger Egdorf, Shrader & Associates LLP - Houston, Houston, TX.

For Kristine Woodard, Plaintiff: Eugene Roger Egdorf, Shrader & Associates LLP - Houston, Houston, TX; Ryan Kees Higgins, Rusty Hardin & Associates LLP, Houston, TX.

For Lisa Torrey, Plaintiff: Daniel Raymond Dutko, Ryan Kees Higgins, Rusty Hardin & Associates LLP, Houston, TX.

For Mike Peacher, Individually and as Next Friend of Ashleigh Preacher, Rosetta Fuller, Alarie Bowerman, Individually and as Next Friend of Elisa Emory and Anais Bowerman, Amy Hanneken, Jane Powell, Kathryn Kocurek, Individually and on behalf of the Estate of J. David Kocurek PH.D, Allison Lynn Caruana, Jessica McKinnie, Randy Sykes, Adriana Monteiro Moreira, Carol Fisch, Lisa Torrey, Plaintiffs: **[*4]** Eugene Roger Egdorf, Shrader & Associates LLP - Houston, Houston, TX.

For Tawnya Dawn Smith, Individually and as Next Friend of Monet Pitre, Rosetta Fuller, Plaintiffs: Lance Lee, Lance Lee, Texarkana, TX; Ryan Kees Higgins, Rusty Hardin & Associates LLP, Houston, TX.

For United Healthcare Group Incorporated, Defendant: Maria Wyckoff Boyce, Hogan Lovells US LLP - Houston, Houston, TX.

For United HealthCare Services Inc., Defendant: Benjamin F. Holt, Hogan Lovells US LLP - Washington DC, Washington, DC.

For Anthem Inc, Defendant: Julia B. Hartley, Nelson Mullins Riley & Scarborough LLP - Charlotte, Charlotte, NC; Lucile H. Cohen, Nelson Mullins Riley & Scarborough - Columbia, Columbia, SC; Sara Ann Brown, Gardere Wynne Sewell LLP - Dallas, Dallas, TX.

For Blue Cross and Blue Shield Association, Defendant: Daniel E. Laytin, LEAD ATTORNEY, Cameron Ginder, Kirkland & Ellis LLP - Chicago, Chicago, IL; Peter John Chassman, Reed Smith LLP, Houston, TX.

For Blue Cross and Blue Shield of Texas, Defendant: Debra H. Dermody, Reed Smith LLP- Pittsburgh, Pittsburgh, PA; Michael John Forbes, Reed Smith LLP - Houston, Houston, TX.

For Dr. Allen Steere, Dr. Raymond J. Dattwyler, Infectious Diseases Society **[*5]** of America, Defendants: Alvin Dunn, Pillsbury Winthrop Shaw Pittman LLP - Washington, Washington, DC.

For Hon. David Folsom (Ret.), Mediator: David Folsom, LEAD ATTORNEY, Jackson Walker LLP, Texarkana, TX.

For Randy Sykes, Kathryn Kocurek, Individually and on behalf of the Estate of J. David Kocurek PH.D, Jessica McKinnie, Plaintiffs: Daniel Raymond Dutko, Rusty Hardin & Associates LLP, Houston, TX; Lance Lee, Lance Lee, Texarkana, TX.

For Steve Hepler, Intervenor Plaintiff: Daniel Raymond Dutko, Rusty Hardin & Associates LLP, Houston, TX; Jeffrey E. Gewirtz, **[*7]** Jeffrey Scott LLP, Atlanta, GA.

For United Healthcare Group Incorporated, Defendant: Blayne R Thompson, Hogan Lovells US LLP - Houston, Houston, TX.

For Blue Cross and Blue Shield Association, Defendant: Sarah J. Donnell, Kirkland & Ellis LLP - Chicago, Chicago, IL.

For Caitlin McGrory, Amber Boyles, Intervenor Plaintiffs: Jeffrey E. Gewirtz, Jeffrey Scott LLP, Atlanta, GA.

For Tawnya Dawn Smith, Individually and as Next Friend of Monet Pitre, Plaintiff: Eugene Roger Egdorf, James Brunsting Hartle, Shrader & Associates LLP - Houston, Houston, TX.

For United Healthcare Group Incorporated, Defendant: Benjamin F. Holt, Hogan Lovells US LLP - Washington DC, Washington, DC; Michael E Jones, Potter Minton a Professional Corporation, Tyler, TX.

For United HealthCare Services Inc., Defendant: Earl Glenn Thames Jr, Potter Minton a Professional Corporation, Tyler, TX.

For Aetna Inc., Defendant: Jeffrey Randall Roeser, Haltom & Doan, Texarkana, TX; Earl B Austin, LEAD ATTORNEY, Baker Botts, New York, NY.

For Anthem Inc, Defendant: John D. Martin, Nelson Mullins Riley & Scarborough - Columbia, Columbia, SC; Thomas Hetherington, McDowell Hetherington LLP - Houston, Houston, TX; Michael James Tuteur, LEAD **[*8]** ATTORNEY, Foley & Lardner LLP--Boston, Boston, MA.

For Blue Cross and Blue Shield of Texas, Defendant: Peter John Chassman, Reed Smith LLP, Houston, TX; Martin James Bishop, LEAD ATTORNEY, Reed Smith LLP - Dallas, Dallas, TX.

For George Matteson, Guardian ad Litem: Daniel Raymond Dutko, Rusty Hardin & Associates LLP, Houston, TX.

For Kaiser Permanente Inc., Defendant: Derek Shane Davis, Cooper & Scully PC - Dallas, Dallas, TX.

For Aetna Inc., Defendant: Jennifer Haltom Doan, Haltom & Doan, Texarkana, TX.

For Allison Lynn Caruana, Jane Powell, Plaintiffs: Daniel Raymond Dutko, Rusty Hardin & Associates LLP, Houston, TX; James Brunsting Hartle, Shrader & Associates LLP - Houston, Houston, TX.

For Anthem Inc, Defendant: Kimberly Ann Klinsport, Foley & Lardner - Los Angeles, Los Angeles, CA; Peter John Chassman, Reed Smith LLP, Houston, TX.

For Brienna Reed, Plaintiff: Eugene Roger Egdorf, Shrader & Associates LLP - Houston, Houston, TX; Lance Lee, Lance Lee, Texarkana, TX.

For Kaiser Permanente Inc., Defendant: Alan F. Law, Cooper & Scully P.C. - San Francisco, San Francisco, CA.

For United Healthcare Group Incorporated, Defendant: Earl Glenn Thames Jr, Potter Minton a Professional Corporation, **[*9]** Tyler, TX; Peter John Chassman, Reed Smith LLP, Houston, TX.

For United HealthCare Services Inc., Defendant: Blayne R Thompson, Hogan Lovells US LLP - Houston, Houston, TX; Peter John Chassman, Reed Smith LLP, Houston, TX.

Judges: ROBERT W. SCHROEDER III, UNITED STATES DISTRICT JUDGE.

Opinion by: ROBERT W. SCHROEDER III

Opinion

ORDER

Before the Court is Defendant Infectious Diseases Society of America's ("IDSA") Motion for Summary Judgment on Plaintiffs' RICO and Antitrust Claims.[1] ,[2] Docket No. 357. The Court heard argument on the motion on April 23, 2021. Docket No. 397. For the reasons set forth below, Defendant's motion is **GRANTED**.

BACKGROUND

Plaintiffs sued Defendant in November 2017, alleging that the Defendant, Doctors and Insurance Defendants have engaged in a decades-long conspiracy to deny the existence of and to prevent treatment of chronic Lyme disease. Docket No. 1. Plaintiffs alleged that doctors have known for a long time that while many patients who contract Lyme disease may be cured with short-term antibiotics, up to 40 percent of patients do not respond to short-term antibiotic treatment. *Id.* ¶ 45. These patients require long-term antibiotic treatment until the symptoms are resolved. *Id.* Though the Insurance **[*10]** Defendants initially provided coverage for long-term antibiotic treatment of Lyme disease, the health insurance industry made a concerted effort in the 1990's to deny coverage because long-term treatment was too expensive. *Id.* ¶¶ 47-48. The Insurance Defendants enlisted the help of doctors who were researching Lyme disease—the IDSA panelists—and paid them large fees to develop arbitrary guidelines for testing Lyme disease. *Id.* ¶ 48. Once these guidelines were established, the Insurance Defendants denied coverage for patients who did not meet the new stringent Lyme disease testing protocols and prevented Plaintiffs from obtaining the antibiotics needed to treat their disease. *Id.* ¶ 49.

Plaintiffs' Third Amended Complaint alleges four counts of Racketeer Influenced and Corrupt Organization ("RICO") violations (Docket No. 361 at 45-49), one count of antitrust violations (*id.* at 49-52) and two counts of misrepresentation (*id.* at 52-60). Plaintiffs have since filed a stipulation dismissing their RICO allegations. Docket No. 396. Defendant now moves for summary judgment on Plaintiffs' antitrust claim.

---

[1] At the time the motion was filed, several individual doctors were also defendants in the case and signed onto the motion, including Dr. Gary P. Wormser, Dr. Allen Steere, Dr. Raymond J. Dattwyler, Dr. John J. Halperin, Dr. Eugene Shapiro and Dr. Leonard Sigal (collectively, the "Doctors"). They have since been dismissed from the case. Docket No. 396.

[2] Plaintiffs also sued the insurance providers Anthem, Inc., Blue Cross and Blue Shield of Texas, Aetna, Inc., Cigna Health and Life Insurance Company (sued as Cigna Corporation), Kaiser Foundation Health Plan, Inc. (sued as Kaiser Permanente, Inc.), United Healthcare Services, Inc., Unitedhealth Group Inc. and Blue Cross and Blue Shield Association (collectively, the "Insurance Defendants"). At this time, the suit against these parties has either been stayed for notice of settlement or dismissed.

LEGAL STANDARD

The purpose of summary judgment is to isolate and dispose of factually unsupported **[*11]** claims or defenses. *See* *Celotex Corp. v. Catrett, 477 U.S. 317, 327, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)* ("The Federal Rules of Civil Procedure have for almost 50 years authorized motions for summary judgment upon proper showings of the lack of a genuine, triable issue of material fact."). Summary judgment is proper if the pleadings, the discovery and disclosure materials on file and any affidavits "[show] that there is no genuine dispute as to any material fact and that the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. A dispute about a material fact is genuine "if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. The trial court must resolve all reasonable doubts in favor of the party opposing the motion for summary judgment. *Casey Enters. Inc. v. Am. Hardware Mut. Ins. Co., 655 F.2d 598, 602 (5th Cir. 1981)*. The substantive law identifies which facts are material. *Anderson, 477 U.S. at 248*.

The party moving for summary judgment has the burden to show that there is no genuine issue of material fact and that it is entitled to judgment as a matter of law. *Id. at 256*. Where the nonmovant bears the burden of proof, the movant may discharge its burden by showing that there is an absence of evidence to support the nonmovant's case. *Celotex, 477 U.S. at 325*; *Byers v. Dall. Morning News, Inc., 209 F.3d 419, 424 (5th Cir. 2000)*. Once the movant has carried its burden, the nonmovant must "respond to the motion for summary **[*12]** judgment by setting forth particular facts indicating there is a genuine issue for trial." *Byers, 209 F.3d at 424* (citing *Anderson, 477 U.S. at 248-49*). The nonmovant must adduce affirmative evidence. *Anderson, 477 U.S. at 256-57*. No "mere denial of material facts nor . . . unsworn allegations [nor] arguments and assertions in briefs or legal memoranda" will suffice to carry this burden. *Moayedi v. Compaq Computer Corp., 98 F. App'x 335, 338 (5th Cir. 2004)*. The Court must consider all the evidence, but must refrain from making any credibility determinations or weighing the evidence. *See* *Turner v. Baylor Richardson Med. Ctr., 476 F.3d 337, 343 (5th Cir. 2007)*.

DISCUSSION

Defendant contends that (1) Plaintiffs cannot present significant probative evidence of payments or communications linking it to the Insurance Defendants' alleged antitrust conspiracy; (2) Plaintiffs lack significant probative evidence to support their antitrust claims against it; (3) Plaintiffs' damages are derivative of their personal injuries and are not recoverable under ***antitrust law***; and (4) Plaintiffs' claim is barred by the statute of limitations. Because the Court finds that there is no genuine issue of material fact on Defendant's first and second contentions regarding probative evidence, it does not reach the issue of whether Plaintiffs' damages are proper or Plaintiff's claims are barred by the statute of limitations.

I. [*13] Lack of Evidence Linking Defendant to the Insurance Defendants

Defendant asserts that Plaintiffs brought this case against the Insurance Defendants, alleging that one aspect of their longstanding and open business activities is a fraudulent criminal conspiracy in violation of ***antitrust law*** designed to save themselves millions of dollars by denying coverage for chronic Lyme disease; Plaintiffs joined Defendant to the case by asserting that the Insurance Defendants brought it into their criminal conspiracy through long-term, ongoing payments related to Lyme disease. Docket No. 357 at 13. Defendant argues that Plaintiffs must produce significant probative evidence showing it participated in the alleged conspiracy by receiving payments from the Insurance Defendants—otherwise, it cannot be liable for a criminal conspiracy that it did not conceive, that it never even discussed with any Insurance Defendant and that was not designed to benefit it. *Id.* at 14. Defendant argues that Plaintiffs cannot reach this burden because there is no evidence that it ever received any payments from any Insurance Defendant related to Lyme disease.

Defendant also preemptively argues that Plaintiffs may not rely **[*14]** on a press release from the Connecticut Attorney General or testimony before Congress from Dr. Joseph Burrascano. *Id.* Defendant asserts that these statements do not identify a single doctor, Insurance Defendant or consulting arrangement or payment, and thus do not create a genuine factual dispute. *Id.* And, Defendant argues, the press release and Congressional testimony are both inadmissible hearsay that cannot be considered in ruling on summary judgment. *Id.* at 14-15 (citing *Fed. R. Civ. P. 56(c)(2)*; *Cruz v. Aramark Servs., 213 Fed. App'x 329, 332 (5th Cir. 2007)*; *In re Oil Spill by the Oil Rig Deepwater Horizon, MDL No. 2179, 2012 U.S. Dist. LEXIS 15905, 12 WL 425164, at *2 (E.D. La. Feb. 9, 2012)*; *Fat Butter, Ltd. v. BBVA USA Bancshares, Inc., No. 4:09-cv-3053, 2010 U.S. Dist. LEXIS 144558, 2010 WL 11646900, at *8 (S.D. Tex. Apr. 13, 2010)*).

Plaintiffs first respond that, due to the destruction of evidence in this case (*see* Docket No. 373 at 5-9), Plaintiffs are relying on circumstantial evidence to support the conspiracy between Defendant and health insurance companies. *Id.* at 12. As part of its circumstantial case, Plaintiffs assert that health insurance companies paid for long term antibiotics for Lyme disease until they determined it cut into profits in the mid-1990's. *Id.* at 13 (citing Docket No. 373-1 at 90:8-93:14). Plaintiffs assert that Empire Blue Cross/Blue Shield created an arbitrary policy of only covering short-term antibiotic treatment that had no medical or scientific justification, and other medical companies shortly followed **[*15]** suit. *Id.* (citing Docket No. 373-1 at 114:3-9; PAMELA WEINTRAUB, CURE UNKNOWN, INSIDE THE LYME EPIDEMIC 306-31 (2008)). Plaintiffs also assert that from the mid-1990's until enactment of the 2000 IDSA Guidelines, health insurance companies began denying insurance coverage for antibiotics after short-term treatment. *Id.* Plaintiffs further assert that at the same time health insurance companies created arbitrary guidelines for Lyme disease, they began paying large consulting fees to some of the most influential Lyme disease experts. *Id.*

Plaintiffs then allege that three doctors involved in the IDSA Guidelines received payments from insurance companies. One, Plaintiffs allege that Dr. Sigal—who was hired by Defendant to review the Lyme disease guidelines before they were published—was an "active expert witness for insurance companies." *Id.* (citing Docket No. 373-2 at 44:7-19, 59:9-24). Two, Plaintiffs allege that Dr. Shapiro—who was hired by Defendant to author the 2000 and 2006 IDSA Guidelines—testified that he provided expert testimony in around 75 to 80 cases, offered testimony in court more than a "dozen" times and twice testified in front of medical boards. *Id.* at 13-14 (citing Docket **[*16]** No. 373-4 at 6:3-24). Three, Plaintiffs allege that Dr. Dattwyler—who was also one of the guideline authors retained by Defendant—testified that he was hired by insurance companies to testify as an expert witness in Lyme cases, to consult and to review medical records for Lyme patients. *Id.* at 14 (citing Docket No. 373-5 at 13:1-4, 13:7-16, 189:19-190:6).

Plaintiffs then rely on a 2006 Investigation by then Connecticut Attorney General Richard Blumenthal. *Id.* Plaintiffs assert that Blumenthal investigated the IDSA Guidelines and served Civil Investigative Demands ("CIDs") on many of the IDSA panelists and health insurance companies. *Id.* (citing Docket No. 373-6). Plaintiffs then point to a press release from Blumenthal that concluded several of the most powerful IDSA panelists had undisclosed financial interests in insurance companies including consulting arrangements with insurance companies. *Id.* (citing http://www.empirestatelymediseaseassociation.org/Archives/CTAGPressReleaseIDSAResponse.htm).

Plaintiffs assert that after receiving the large consulting fees from insurance companies, the IDSA panelists put the same arbitrary guidelines into the IDSA Guidelines that the insurance companies **[*17]** created in the 1990's. *Id.* Plaintiffs argue that insurance companies have since used the IDSA Guidelines to justify restricting coverage of long-term antibiotic treatment of Lyme disease. *Id.* at 15 (citing https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2435453/).

Plaintiffs then rely on the fact that several states passed or proposed legislation that requires insurers to pay for long-term antibiotic treatment for Lyme disease patients who experience treatment failure. *Id.* Plaintiffs assert that Defendant criticized legislation "[r]equiring health insurers to cover Lyme disease treatments that are not supported by scientific evidence, including long-term antibiotic use." *Id.* (citing https://www.idsociety.org/globalassets/idsa/topics-of-interest/lyme/lyme-state-policy-primer-update-2016-final.pdf). Plaintiffs posit that an independent organization with no connection to insurance companies would not publish such a statement. *Id.*

Plaintiffs conclude that this circumstantial evidence supports an inference of conspiracy between Defendant and health insurance companies and establishes that the only reason the IDSA panelists created guidelines claiming there is no treatment failure in Lyme disease **[*18]** is because they engaged in a conspiracy with health insurance companies. *Id.* at 16 (citing *Abraham & Veneklasen Joint Venture v. Am. Quarter Horse Ass'n, 776 F.3d 321, 331-32 (5th Cir. 2015)*; *Viazis v. Am. Ass'n of Orthodontists, 314 F.3d 758, 763 (5th Cir. 2002)*).

Plaintiffs next respond that the circumstantial evidence tends to exclude independent conduct. *Id.* Plaintiffs assert that the IDSA panelists involved with the IDSA Guidelines agree that there is treatment failure in Lyme disease but allowed the IDSA Guidelines to publish with the statement: "[t]here is no convincing biologic evidence for the existence of symptomatic chronic *B. burgdorferi* infection among patients after receipt of recommended treatment regimens for Lyme disease." *Id.* (citing Docket No. 373-8 at 36:11-13; Docket No. 373-2 at 42:4-19, 58:12-59:24; Docket No. 357-2). Plaintiffs posit that the only reason the IDSA panelists would allow this to occur is due to large payments made by the health insurance companies in their conspiracy to restrain competition. *Id.*

Defendant first replies that no evidence was destroyed or not produced in this matter. Docket No. 386 at 3. Defendant asserts that Plaintiffs have always contended that this case is about alleged large consulting fees the Insurance Defendants paid to the Doctors to write false Lyme disease guidelines. *Id.* at 4 (citing Docket **[*19]** No. 1 ¶¶ 54, 76; Docket No. 377 ¶¶ 38-49; Docket No. 373 at 1). Defendant asserts that discovery in this matter has at all times been limited to finding consulting payments from the Insurance Defendants to the Doctors or Defendant related to Lyme disease: Plaintiffs' written discovery requests focused on payments from the Insurance Defendants to the Doctors; Plaintiffs never challenged Defendant's objections regarding payments by "insurance companies" that were not limited to the Insurance Defendants; and Plaintiffs never asked Defendant or the Doctors to produce documents regarding payments to the Doctors from disability or medical malpractice insurance companies. *Id.* Defendant further argues that the scope of discovery has already been litigated in this Court and that the scope of the subject matter searched for would be limited to Defendant and the Doctors searching and producing documents sufficient to show any consulting payments by the Insurance Defendants. *Id.* at 5 (citing Docket No. 181 ¶ I.2).

Defendant argues that Plaintiffs cannot complain now, well after the close of fact discovery and in response to Defendant's summary judgment motion, that it and the Doctors "destroyed **[*20]** or failed to produce relevant documents." *Id.* at 5. Defendant asserts that there is no evidence of such alleged destruction or failure to produce, and Plaintiffs never raised these allegations with Defendant or the Doctors; never asked for a meet-and-confer; and never filed a motion to compel.[3]*Id.* Concerning Dr. Sigal, Defendant asserts that he served as an expert for Standard Insurance Company, a disability carrier, and he testified that he and his wife destroyed hard-copy documents that had been stored in their garage just before they moved in 2014 or 2015—well before Plaintiffs filed this case. *Id.* at 6 (citing *Schwob v. Standard Insurance Co., 248 Fed. App'x 22, 23, 26 (10th Cir. 2007)*; *Dutkewych v. Standard Insurance Co., 781 F.3d 623, 625, 629 (1st Cir. 2015)*; Docket No. 386-1 at 20:18-21:16). Concerning

---

[3] Discovery closed in this matter on January 15, 2021. Docket No. 376. The instant motion for summary judgment motion was filed on February 3, 2021. Docket No. 357. In response to summary judgment, for the first time, Plaintiffs allege that evidence was destroyed; they did not, however, file a motion to compel at that point. Defendant raised this in its reply on March 16, and at oral argument on April 23, the Court questioned Plaintiffs about their failure to move on the alleged discovery dispute. Docket No. 405 at 34:5-14. Only after that, on May 3, did Plaintiffs file a motion to compel. Docket No. 402. That is too late. *See*, *Lectec Corp. v. Chattem, Inc., No. 5:08-CV-130, 2011 U.S. Dist. LEXIS 156898, 2011 WL 13085199, at *2 (E.D. Tex. January 4, 2011)* (Folsom, J.) ("Plaintiff has not shown that it moved to compel production from [Defendant], however, so Plaintiff cannot now rely on any purported discovery misconduct to compensate for a deficiency in Plaintiff's evidence.").

Moreover, Plaintiffs provide no evidence to support their allegation that Defendant has not met its discovery obligations in this case. The parties *agreed* on the scope of the subject matter that would be searched for—and relevant to this issue—and that scope was limited to evidence of payments from the Insurance Defendants. *See* Docket No. 181 ¶ I.2 ("For all Defendants, copies of payments, checks, wire transfers, or other documents sufficient to show any consulting payments by the insurance defendants to the doctor defendants and/or Infectious Diseases Society of America (IDSA[]) related to Lyme disease. These documents would not include payments made for claims for the provision of medical services to patients by the doctor defendants."). Work that a doctor has done with other disability or medical malpractice insurance companies is irrelevant to the Plaintiffs' allegations in this suit and does not support Plaintiffs' speculation that documents were not produced.

Dr. Shapiro, Defendant asserts that he testified that he never served as an expert witness for an Insurance Defendant or any health insurance company—which Plaintiffs themselves recognize, referring to Dr. Shapiro's work "related to the disability claims he worked on for insurance companies" and "in malpractice cases involving Lyme disease." *Id.* at 7 (citing Docket No. 373 at 6). Concerning Dr. Dattwyler, Defendant asserts that he did not work for any Insurance Defendant or any other health insurance company, only having engagements **[*21]** with medical malpractice carriers and disability carriers. *Id.* at 8 (citing Docket No. 386-5 at 13:1-16). Concerning Defendant, it asserts that it preserved documents at the beginning of this case, including the materials submitted to the Connecticut Attorney General from more than ten years before Plaintiffs filed this case. *Id.* at 9 (citing Docket No. 386-6 at 77:23-78:16, 82:3-83:7). Defendant asserts that it searched its records and provided to Plaintiffs all relevant documents in accordance with limits on discovery agreed to by the parties or as ordered by the Court. *Id.* (citing Docket No. 357-5 ¶ 9).

Defendant next replies that its lobbying efforts cannot support Plaintiffs' antitrust claims. *Id.* at 11. Defendant asserts that the *Noerr-Pennington* doctrine, which holds that petitioning the government in an effort to influence public policy cannot constitute evidence in support of an antitrust claim, is well established. *Id.* (citing *E. R. R. Presidents Conf. v. Noerr Motor Freight, Inc., 365 U.S. 127, 135, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 670-71, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; *see also* *Gibbes v. Ameristar Casino Vicksburg Inc., 137 F. App'x 673, 674 (5th Cir. 2005)*; *Bayou Fleet, Inc. v. Alexander, 234 F.3d 852, 854 (5th Cir. 2000)*).

II. Lack Evidence to Support Antitrust Claims

Defendant contends that Plaintiffs bear a heavy burden that they cannot meet in pursuing an antitrust claim. Docket No. 357 at 22 (citing *Matsushita Elec. Indus. Co, Ltd. v. Zenith Radio Corp., 475 U.S. 574, 588, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*). Defendant **[*22]** argues that the entirety of the evidence produced in this matter supports that it and the Doctors acted independently from the Insurance Defendants to write the IDSA Guidelines—which dooms Plaintiffs' antitrust claims. *Id.* at 22-23 (citing *Stewart Glass & Mirror, Inc. v. USA Glas, Inc., 17 F.Supp.2d 649, 657 (5th Cir. 1998)*). Defendant contends that Plaintiffs cannot meet their burden to produce probative evidence that it agreed with the Insurance Defendants to restrain trade, as there is no evidence of an agreement, much less one to restrain trade. *Id. at 23* (citing *Marucci Sports LLC v. Nat'l Collegiate Athletic Ass'n, 751 F.3d 368, 374 (5th Cir. 2014)*; *Golden Bridge Tech., Inc. v. Motorola, Inc., 547 F.3d 266, 272 (5th Cir. 2008)*; *Spectators' Commun. Network, Inc. v. Colonial Country Club, 253 F.3d 215, 222 (5th Cir. 2001)*).

Defendant further contends that Plaintiffs have no evidence to show that the alleged markets are relevant antitrust product markets, which are defined based on the interchangeability of products and competition amongst brands. *Id.* at 22-23 (citing *Apani Southwest, Inc. v. Coca-Cola Enterprises, Inc., 300 F.3d 620, 626 (5th Cir. 2002)*). Defendant states that Plaintiffs asserted relevant antitrust markets are the market for the "treatment of chronic Lyme disease" and the market for insurers to provide "coverage for such treatment." *Id.* at 23. But, Defendant contends, the IDSA Guidelines are not a product because they are available for free, and the proliferation of other guidelines for the treatment of Lyme disease illustrates that the existence of the IDSA Guidelines does not prevent any other **[*23]** organization from issuing its own guidelines. *Id.* at 24 (citing *Kinderstart.com LLC v. Google, Inc., No. C 06-2057, 2007 U.S. Dist. LEXIS 22648, 2007 WL 831806, *5 (N.D. Cal. Mar. 16, 2007)*; Docket No. 357-3 at 2). And although Plaintiffs allege that Defendant conspired to monopolize the markets for "treatment of chronic Lyme disease" and for the insurance coverage for Lyme disease, Defendant points out that it is not an insurance company and does not compete in the insurance coverage market. *Id.*

Moreover, to the extent the IDSA Guidelines recommend to doctors certain treatments for Lyme disease, Defendant argues that Plaintiffs cannot present evidence that the IDSA Guidelines function as a "monopoly" as required under the *Sherman Act*. *Id.* Defendant asserts that a monopolization claim fails at summary judgment if Plaintiffs cannot allege a market share of "at least fifty percent," and "it is doubtful whether 60 or 64 percent would be enough." *Id.* (citing *Domed Stadium Hotel, Inc. v. Holiday Inns, Inc., 732 F.2d 480, 489 (5th Cir. 1984)*). Defendant contends Plaintiffs cannot meet that threshold here. *Id.* at 25 (citing Docket No. 357-3 at 2).

Finally, Defendant contends that for Plaintiffs' _Section 2_ monopolization claims, they must prove that it engaged in "predatory" or "exclusionary" conduct, and for their _Section 1_ conspiracy claims, they must prove that it engaged in an "unreasonable restraint" on competition. ***[*24]*** *Id.* Defendant argues that it is well settled that setting forth professional guidance that is voluntary on its face is not an unreasonable restraint of trade. *Id.* (citing _Consol. Metal Prod., Inc. v. Am. Petrol. Inst., 846 F.2d 284, 296 (5th Cir. 1988)_). Defendant asserts that the Fifth Circuit discourages treble damages actions that are nothing more than disagreements with the recommendations set forth in voluntary guidelines, regardless whether most doctors rely on the IDSA Guidelines. _Id. at 25-26_ (citing _Golden Bridge, 547 F.3d at 273_; _DM Research, Inc. v. Coll. of Am. Pathologists, 170 F.3d 53, 57 (1st Cir. 1999)_; _Schachar v. Am. Acad. Of Ophthalmology, Inc., 870 F.2d 397, 398 (7th Cir. 1989)_).

Plaintiffs respond that the relevant antitrust market is the Lyme disease treatment market in the United States, which is relevant and proper for an antitrust case. Docket No. 373 at 18 (citing *Wilk v. Am. Med. Ass'n, 671 F. Supp. 1465, 1478 (N.D. Ill. 1987)*, *aff'd*, _895 F.2d 352 (7th Cir. 1990)_; _Oltz v. St. Peter's Cmty. Hosp., 861 F.2d 1440, 1447 (9th Cir. 1988)_; _Weiss v. York Hosp., 745 F.2d 786, 827 (3d Cir. 1984)_; _Bio-Med. Applications Mgmt. Co., Inc v. Dallas Nephrology Assoc., No. 4:94CV37, 1995 U.S. Dist. LEXIS 20179, 1995 WL 215302, at *2 (E.D. Tex. Feb. 6, 1995)_; *Leyba v. Renger, 874 F. Supp. 1229, 1238 (D.N.M. 1994)*).

Plaintiffs next responds that Defendant dominates and controls a monopoly share of the Lyme disease treatment market, as it represents to the country that it is the leading authority in the treatment of Lyme disease and continually pushes for its guidelines to be the only thing doctors need to follow when treating Lyme disease. *Id.* at 20 (citing Docket No. 373-10). Plaintiffs contend that to protect its monopoly in the Lyme treatment market, Defendant tries to influence state legislators and Congress. *Id.* at 20-21. Plaintiffs also argue that it is impossible **[*25]** for doctors to rely on other guidelines because of Defendant's dominance in the Lyme disease treatment market. *Id.* at 22 (citing https://www.hhs.gov/sites/default/files/tbdwg-2020-reportto-ongress-final.pdf). Plaintiffs argue that Defendant works to perpetuate its dominance. *Id.*

Plaintiffs also respond that voluntary guidelines can be an unreasonable restraint on competition. *Id.* at 23 (citing _Am. Soc. of Mech. Engineers, Inc. v. Hydrolevel Corp., 456 U.S. 556, 558, 102 S. Ct. 1935, 72 L. Ed. 2d 330 (1982)_). Plaintiffs argue that a standard-setting organization can obtain monopoly power by allowing members with an economic interest in restraining competition to bias its standard-setting process. *Id.* at 17 (citing _Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 501, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)_).[4]

Defendant replies that all of Plaintiffs' antitrust claims allege that it conspired with the Insurance Defendants and the Doctors to restrain competition, yet Plaintiffs have no evidence of an actual agreement and no evidence of the large consulting fees. Docket No. 386 at 12. Defendant asserts that in the absence of proof, Plaintiffs instead recycle 2008 statements from the Connecticut Attorney General and Burrascano's 1993 Congressional testimony. *Id.* at (citing Docket No. 373 at 8-10). But, Defendant argues, it demonstrated in its motion—and Plaintiffs did not refute—that these **[*26]** statements do not identify a single communication between an Insurance Defendant and a Doctor or Defendant regarding Lyme disease and do not identify a single payment from an Insurance Defendant to a Doctor or Defendant for a consulting arrangement related to Lyme disease. *Id.* Defendant argues that these statements are thus irrelevant, as well as inadmissible. *Id.* With no evidence of large consulting fees paid by the Insurance Defendants to the Doctors, Defendant asserts that Plaintiffs stretch to assert that its lobbying efforts regarding Lyme disease and alleged false statements in the Lyme disease guidelines make sense only if the Insurance Defendants have paid substantial sums to it and the Doctors. *Id.* at 14. But not only can lobbying efforts not be used to support a conspiracy per the *Noerr-Pennington* doctrine, Defendant argues that there "is a persuasive, rational and non-conspiratorial explanation for its lobbying efforts": it believes that Lyme disease diagnosis and treatment should be based on scientific evidence. *Id.* (citing Docket No. 373-10 at 1 ("IDSA must oppose H.R. 4701, as we believe it will inappropriately bias federal activities that must remain science-based in **[*27]** order to ensure optimal patient care and protect the public's health and safety.")).

---

[4] Plaintiffs further assert that Defendant said nothing about Plaintiffs' _Section 2_ antitrust claim. *Id.* at 24.

Defendant argues that Plaintiffs have also not contested the sworn declarations from it and the Doctors that they did not communicate with or interact with the Insurance Defendants in developing the IDSA Guidelines. *Id.* at 15. Defendant argues that there can be no "meeting of the minds" without any "meeting." *Id.* (citing *H & B Equip. Co. v. Int'l Harvester Co., 577 F.2d 239, 245 (5th Cir. 1978)*; *In re High Fructose Corn Syrup Antitrust Litig., 295 F.3d 651, 654 (7th Cir. 2002)*).

Defendant then replies that Plaintiffs present no evidence to support their alleged antitrust market. *Id.* at 16. Defendant asserts that the Fifth Circuit recently held that an antitrust plaintiff must "meet his burden of presenting evidence" to establish an antitrust market, such as setting forth the potential competitors in the alleged market or presenting evidence of "all interchangeable substitute products." *Id.* (citing *Shah v. VHS San Antonio Partners LLC, 985 F.3d 450, 455, 452 (5th Cir. 2021)*). But Plaintiffs only cite the Center for Disease Control's statement regarding the scope of Lyme disease in the United States and the fact that the IDSA Guidelines state that they seek to assist clinicians who diagnose and treat Lyme disease. *Id.* (citing Docket No. 373 at 19).

Defendant further replies that Plaintiffs do not provide any evidence that it competes **[*28]** in the alleged market for the treatment of Lyme disease—or evidence of how it would benefit economically if it limited competition in that market. *Id.* at 17 (citing *United Farmers Agents Ass'n v. Farmers Ins. Exch., 89 F.3d 233, 236 (5th Cir. 1996)*; *Kinderstart.com, 2007 U.S. Dist. LEXIS 22648, 2007 WL 831806, at *5*). And, Defendant argues, the case law Plaintiffs rely on is inapposite, as the cases cited address medical services markets involving actual medical professionals who were competitors in the proposed market. *Id.* (citing *Oltz, 861 F.2d at 1447* (finding medical doctor anesthesiologists and nurse anesthesiologists competed in the market for anesthesia care); *Weiss, 745 F.2d at 826* (finding medical doctors and osteopathic doctors competed in market for inpatient hospital care)).

Defendant also replies that there is no evidence it possesses a monopoly market share. *Id.* First, Defendant argues that Plaintiffs are attempting to revise their original, joint monopolization claim to allege that Defendant alone monopolizes the market for Lyme disease treatment. *Id.* at 17-18. But even with recasting the monopolization claims as Plaintiffs do, there is no support for the proposition that Defendant's claim to be a premier authority is evidence that it participates in the actual market for the treatment and diagnosis of Lyme disease. *Id.* at 19 (citing *Retractable Tech., Inc. v. Becton Dickinson & Co., 842 F.3d 883, 894-95 (5th Cir. 2016)*). Defendant asserts that **[*29]** there is still no evidence that it treats Lyme disease patients. *Id.* Defendant further argues that Plaintiffs passing mention of an antitrust market for "Lyme treatment guidelines" has no more viability, as Defendant publishes Lyme disease guidelines for free, as do numerous other organizations—at least six other sets of guidelines are in the record here. *Id.* at 18 (citing Docket No. 373 at 22), 19 n.6. Defendant argues that monopoly power would be nonsensical in this context, as a monopolist has the "power to control prices or exclude competition." *Id.* at 19 (citing *United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*). But there are no prices for treatment guidelines and no barriers to others issuing guidelines. *Id.* As to the one document Plaintiffs cite, Defendant argues that it does nothing to support Plaintiffs' claims, as the report states that "for patients with persistent symptoms associated with Lyme disease, almost all . . . select practitioners who follow the guidelines of ILADS. Very few (6%) of these same patients report being treated by infectious disease physicians who follow only the IDSA guidelines." *Id.* (citing Docket No. 386-8 at 70).

Defendant finally replies that Plaintiffs have no evidence that the IDSA Guidelines **[*30]** actually are unreasonable restraints. *Id.* (citing Docket No. 373 at 23). Defendant further contends that Plaintiffs rely on inapposite cases where actual market participants orchestrated conspiracies to secretly infiltrate the standard-setting organization in order to draft guidelines designed to prevent new competitors from entering the market. *Id.* (citing *Am. Soc. of Mech. Eng'rs, 456 U.S. at 560-61* (finding a company's VP secretly ghostwrote the document and got an unaffiliated ASME official to sign it); *Allied Tube, 486 U.S. at 496* (finding a company recruited hundreds of new members to rig the vote on a new guideline)). In fact, Defendant argues, Plaintiffs admit that the Insurance Defendants began denying long-term treatment in the mid-1990's, yet present no evidence that the publication of the IDSA Guidelines actually had any effect on this pre-existing practice. *Id.* at 21 (citing *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*). Indeed, the only evidence Plaintiffs proffer of the IDSA Guidelines impact is a letter to the editor making the uncorroborated statement that "[unnamed] insurance companies have used these guidelines to justify their restrictive coverage of long-term antibiotic treatment." *Id.* (citing Docket No. 373 at 15). Defendant contends that this is inadmissible. *Id.*

III. Analysis [*31]

To survive summary judgment after a movant "identif[ies] those portions of the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, which it believes demonstrate the absence of a genuine issue of material fact," *Celotex, 477 U.S. at 323*, the nonmovant must bear the burden of establishing otherwise by supporting its contentions with some evidence. *Geiserman, 1990 U.S. App. LEXIS 1483, 893 F.2d at 793* (citing *id. at 324*); *Anderson, 477 U.S. at 248* (holding that the non-moving party cannot "rest upon mere allegations or denials of [the] pleading but must set forth specific facts showing there is a genuine issue for trial"). But Plaintiffs fail to produce any summary judgment evidence to support their antitrust claims.

After almost three years of discovery, Plaintiffs do not point to a single communication between Defendant and the Insurance Defendants—let alone any large fees—to support Plaintiffs' allegations of a conspiracy. Even assuming that the two pieces of evidence Plaintiffs have relied on from the start of this case are admissible summary judgment evidence—Burrascano's testimony from 1993, seven years prior to the first set of IDSA Guidelines issuing, and the Connecticut Attorney General's press release—neither identifies a single **[*32]** agreement or payment between the Insurance Defendants, the Doctors and Defendant. Thus, viewing the evidence in the light most favorable to them as the nonmovant, Plaintiffs have not adduced any affirmative evidence in response to Defendant's motion for summary judgment to support their allegations of a conspiracy to deny the existence of chronic Lyme disease in exchange for payment.

Further, to survive summary judgment in an antitrust case[5] when relying on circumstantial evidence, Plaintiffs bear the burden of "present[ing] evidence 'that tends to exclude the possibility' that the alleged conspirators acted independently . . . [and] must show that the inference of conspiracy is reasonable in light of the competing inferences of independent action or collusive action that could not have harmed respondents." *Matsushita, 475 U.S. at 588*; *see also* *Golden Bridge Tech., 547 F.3d at 273* ("It is not sufficient under *Matsushita* for [Plaintiff] to simply propose conceivable motives for conspiratorial conduct; [Plaintiff's] evidence must tend to show that the possibility of independent conduct is excluded."). An antitrust claim must also show "a conscious commitment to a common scheme designed to achieve an unlawful objective." *Marucci, 751 F.3d at 374* (quoting *Monsanto Co. v. Spray—Rite Serv. Corp., 465 U.S. 752, 764 (1984)*); *see also* *H & B Equip., 577 F.2d at 245* ("To establish **[*33]** [a party's] complicity, the evidence must warrant a finding that [the conspiring parties] had a 'meeting of minds in an unlawful arrangement.'"). And "if there is not sufficient evidence of a conspiracy to support a *Section 1* claim, then there is not sufficient evidence of a conspiracy to support a *Section 2* claim [under a theory of joint monopolization]." *Stewart Glass, 17 F.Supp.2d at 657*.

An antitrust plaintiff must also present evidence to establish an antitrust market. *See* *Shah, 985 F.3d at 454* ("Whether a relevant market has been identified is usually a question of fact; however, in some circumstances, the issue may be determined as a matter of law. If [Plaintiff] fails to define his proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in [his] favor, the relevant market is legally insufficient. That is, in order for [Plaintiff's] definition to be legally sufficient, it must include all commodities reasonably interchangeable by consumers for the same purposes." (citation omitted)). In a relevant market, a monopolist has "the power to **[*34]** control prices or exclude competition." *Grinnell, 384 U.S. at 571*. And "[t]he offense of monopolization requires that the defendant dominate

[5] The Fifth Circuit has held that in antitrust cases "[w]e no longer maintain that summary judgment is especially disfavored in categories of cases. Stearns' attempt to invoke earlier cases in which we suggested that summary judgment should be shunned when complex antitrust claims are involved thus fails." *Stearns Airport Equip. Co. v. FMC Corp., 170 F.3d 518, 521 (5th Cir. 1999)* (citation omitted).

the relevant market," meaning that—absent special circumstances—"a defendant must have a market share of at least fifty percent before he can be guilty of monopolization." *Domed Stadium Hotel, 732 F.2d at 489*.

Assuming *arguendo* that Plaintiffs here have properly identified and supported the market for the treatment of Lyme disease as an antitrust market, they cannot meet their burden to survive summary judgment on their antitrust claims. As discussed above, Plaintiffs do not present evidence that gives rise to a genuine issue of fact of an agreement between the alleged conspirators. *See* *Marucci, 751 F.3d at 374*. Nor do they present evidence that tends to exclude the possibility of independent conduct on the part of Defendant; instead, they offer merely speculation, conclusory assertions and attorney argument. *See* *Golden Bridge Tech., 547 F.3d at 273*; see *also* *Sojitz Energy Venture, Inc. v. Union Oil Co. of California, 394 F. Supp. 3d 687, 714 (S.D. Tex. 2019)* (citing *Velasco v. Cameron Cty., 721 F. App'x 387, 388-89 (5th Cir. 2018)*; *Blue Spike, LLC v. Audible Magic Corp., No. 6:15-CV-584, 2016 U.S. Dist. LEXIS 130890, 2016 WL 3653516, at *4 (E.D. Tex. May 31, 2016)* ("Conclusory assertions and attorney argument are insufficient to defeat summary judgment.")). Further, there is no evidence that Defendant actually participates in the market for the treatment of Lyme disease as a monopolist—let alone controls fifty percent of that market. *See* *United Farmers Agents, 89 F.3d at 236* (finding that a proposed **[*35]** market fails because defendant did not sell services in that market but provided a free product); *Domed Stadium Hotel, 732 F.2d at 489*. Defendant promulgates free guidelines for doctors about treating Lyme diseases and is one of many groups to do so. *See* Docket No. 357-3 at 2. Defendant does not treat patients for Lyme disease and is not an insurance company that pays for those treatments. Under these circumstances, it is implausible that Defendant controls fifty percent of the Lyme disease treatment market. Plaintiffs' antitrust claims thus fail. *See* *Stewart Glass, 17 F.Supp.2d at 657*.

The time for speculation on what may have occurred has passed. Because Plaintiffs cannot provide evidence that Defendant formed an agreement with the Doctors and the Insurance Defendants to create and enforce arbitrary guidelines for the treatment of Lyme disease, that Defendant received money from the Insurance Defendants in furtherance on the alleged conspiracy, or that Defendant participates in or controls fifty percent of the proposed antitrust market, there is no genuine issue of fact remaining for trial on Plaintiffs' antitrust violations allegation. Defendant IDSA's Motion for Summary Judgment on Plaintiffs' RICO and Antitrust Claims (Docket No. 357) is thus **GRANTED** **[*36]** . It is

ORDERED that Plaintiffs' antitrust claims (Docket No. 361 at 49-52) are **DISMISSED WITH PREJUDICE**.

So ORDERED and SIGNED this 1st day of September, 2021.

/s/ Robert W. Schroeder III

ROBERT W. SCHROEDER III

UNITED STATES DISTRICT JUDGE

LexisNexis® Headnotes

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN1[] **Standing, Elements**

Lack of U.S. Const. art. III standing requires dismissal for lack of subject matter jurisdiction under Fed. R. Civ. P. 12(b)(1). Those who seek to invoke the jurisdiction of the federal courts must satisfy the threshold requirement imposed by U.S. Const. art. III by alleging an actual case or controversy. To satisfy Article III's standing requirements, a plaintiff must show (1) it has suffered an injury in fact; (2) the injury is fairly traceable to the challenged action of the defendant; and (3) it is likely, as opposed to merely speculative, that the injury will be redressed by a favorable decision. For purposes of ruling on a motion to dismiss for want of standing, courts must accept as true all material allegations of the complaint and must construe the complaint in favor of the complaining party. On a motion to dismiss, courts presume that general allegations embrace those specific facts that are necessary to support the claim.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN2[] Motions to Dismiss, Failure to State Claim

Although a complaint challenged by a Fed. R. Civ. P. 12(b)(6) motion to dismiss need not provide detailed factual allegations, it must offer more than labels and conclusions and contain more than a formulaic recitation of the elements of a cause of action. In ruling on a motion to dismiss, the court must assume the truth of the plaintiff's allegations and draw all reasonable inferences in the plaintiff's favor. The question for the court is whether the facts in the complaint sufficiently state a plausible ground for relief. If the court dismisses the complaint or portions thereof, it must consider whether to grant leave to amend.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN3[] Sherman Act, Claims

To state a 15 U.S.C.S. § 1 claim under the rule of reason, a plaintiff must plead facts which, if true, will prove: (1) a contract, combination or conspiracy among defendants; (2) by which the defendants intended to harm or restrain trade or commerce among several States; (3) which actually injures competition; and (4) plaintiff is the proper party to bring the antitrust action because it was harmed by defendants' contract, combination, or conspiracy, and the harm it suffered was caused by the anticompetitive aspect of defendants' conduct.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

HN4[] Regulated Practices, Price Fixing & Restraints of Trade

Concerted efforts to enforce (rather than just agree upon) private product standards face more rigorous antitrust scrutiny.

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > Professional Associations

HN5[] Higher Education & Professional Associations, Professional Associations

The interpretation and promotion of a trade association's so-called voluntary standards by the association's agents and members can be deemed to be repugnant to the antitrust laws, and the association should be encouraged to eliminate the anticompetitive practices of all its agents acting with apparent authority.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Evidence > Burdens of Proof > Allocation

HN6[] Per Se Rule & Rule of Reason, Sherman Act

The rule of reason requires courts to conduct a fact-specific assessment of the market power and market structure to assess the restraint's actual effect on competition. The plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market. A threshold step in any antitrust case is to accurately define the relevant market, which refers to the area of effective competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Burdens of Proof > Allocation

HN7[] **Per Se Rule & Rule of Reason, Sherman Act**

The U.S. Court of Appeals for the Ninth Circuit has adopted a three-part, burden-shifting test, under which a plaintiff must meet its initial burden to prove that a challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market and only then the burden shifts to the defendant to show a procompetitive rationale for the restraint. If the defendant makes this showing, then the burden shifts back to the plaintiff to demonstrate the procompetitive efficiencies could reasonably be achieved through less anticompetitive means. In ruling on a Fed. R. Civ. P. 12(b)(6) motion, the court exclusively focuses on whether plaintiff has sufficiently pleaded the first element. At the motion to dismiss stage, the court's job is not to balance the anticompetitive effects of the challenged restraints against procompetitive justifications, but instead to evaluate whether the complaint presents facts, which show the challenged conduct plausibly exerts an unreasonable restraint on trade.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN8[] **Market Definition, Relevant Market**

Regardless of whether a defendant's practices are interrelated, actual or alleged harms to customers and consumers outside the relevant markets are beyond the scope of ***antitrust law***.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN9[] **False Advertising, Lanham Act**

The majority of district courts within the Ninth Circuit have applied Fed. R. Civ. P. 9(b)'s pleading standards to false advertising claims under the Lanham Act, particularly when the claim relies on factual allegations that necessarily constitute fraud. The better reasoned authority is that, where a Lanham Act claim is predicated on the theory that the defendant engaged in a knowing and intentional misrepresentation, then Rule 9(b) is applicable. The U.S. District court for the Western District of Washington has also applied Rule 9(b)'s pleading requirements to Washington Consumer Protection Act claims.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN10[] Heightened Pleading Requirements, Fraud Claims

For purposes of Fed. R. Civ. P. 9(b), in the event a plaintiff alleges a unified course of fraudulent conduct, the claim is said to be grounded in fraud or to sound in fraud.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN11[] Heightened Pleading Requirements, Fraud Claims

Fed. R. Civ. P. 9(b)'s heightened pleading requirements apply only to averments of fraud supporting a claim rather than to the claim as a whole, and fraud can be averred by specifically alleging fraud, or by alleging facts that necessarily constitute fraud (even if the word fraud is not used). Allegations of fraud must be accompanied by the who, the what, when, where and how of the misconduct charged.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN12[] Heightened Pleading Requirements, Fraud Claims

Fed. R. Civ. P. 9(b) can apply where plaintiffs allege some fraudulent and some non-fraudulent conduct.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

Constitutional Law > ... > Freedom of Speech > Commercial Speech > Misleading Speech

HN13[] False Advertising, Lanham Act

The Lanham Act creates a private cause of action for any person who believes that he or she is or is likely to be damaged by a person who uses false or misleading representation of fact, which, in commercial advertising or promotion, misrepresents the nature, characteristics, or qualities of another person's goods, services, or commercial activities. 15 U.S.C.S. § 1125(a)(1)(B). The Act itself does not define advertising or promotion, but the U.S. Court of Appeals for the Ninth Circuit has adopted the following definition: (1) commercial speech, (2) by a defendant who is in commercial competition with plaintiff, (3) for the purpose of influencing consumers to buy defendant's goods or services, and (4) that is sufficiently disseminated to the relevant purchasing public. Although jurists debate whether the second element is still valid in light of the U.S. Supreme Court's decision in Lexmark Int'l, Inc. v. Static Control Components, there is no question that the third element flows from the statutory language and remains valid after Lexmark. The representations need not be made in a classic advertising campaign, but may instead consist of more informal types of promotion.

HN15[] **Trade Practices & Unfair Competition, State Regulation**

To state a claim under Wash. Rev. Code § 19.86.020, a plaintiff must plausibly allege (1) an unfair or deceptive act or practice, (2) occurring in trade or commerce, (3) affecting the public interest, (4) injury to a person's business or property, and (5) causation.

Counsel: [*1] For REX - Real Estate Exchange Inc, a Delaware corporation, Plaintiff: Cristina Moreno, Darren McCarty, LEAD ATTORNEYS, PRO HAC VICE, MCCARTY LAW PLLC, AUSTIN, TX; Michael K Vaska, Rylan L. S. Weythman, LEAD ATTORNEYS, FOSTER GARVEY PC (SEA), SEATTLE, WA.

Judges: Thomas S. Zilly, United States District Judge.

Opinion by: Thomas S. **[*2]** Zilly

Opinion

ORDER

THIS MATTER comes before the Court on the motion to dismiss filed by Defendants Zillow Inc., Zillow Group Inc., Zillow Homes Inc., Zillow Listing Services Inc., and Trulia LLC ("Zillow"), docket no. 83, and the motion to dismiss filed by the National Association of REALTORS® ("NAR"), docket no. 84. Having reviewed all papers filed in support of, and in opposition to, the motions, the Court enters the following Order.

Background

NAR is the nation's largest trade association for real estate professionals, consisting of multiple listings services ("MLSs"), more than a thousand local associations, and around 1.45 million real estate agents. Compl. at ¶ 24 (docket no. 1). NAR promulgates rules governing how its members operate their businesses, which have allegedly become ubiquitous within the marketplace. *Id.* at ¶ 29. For example, NAR has adopted an optional rule, known as the Segregation Rule,[1] which requires members' listings that are obtained through MLSs' internet data exchange

[1] The complaint refers to the "segregation rule" or "IDX segregation rule," *e.g.*, Compl. at ¶¶ 85 & 93, but the parties, and the Court's prior order (docket no. 80), have also referred to this rule as the No-Commingling Rule. This order will refer to the rule as the Segregation Rule.

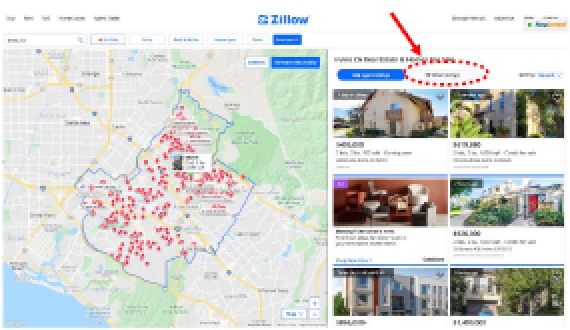
("IDX") feeds to be "displayed separately from listings obtained from other sources." *Id.* at ¶¶ 83 & 85. NAR has also adopted a mandatory rule, known as the Buyer Agent Commission Rule, which requires **[*3]** a seller's agent to include in any MLS listing a predetermined offer of commission to a buyer's agent, thereby prohibiting any party from later modifying that commission. *Id.* at ¶¶ 31 & 33. NAR's members allegedly encourage their customers to offer high commissions for buyers' agents, resulting in historically high, static commissions throughout the United States, with total commissions averaging about 5.5 percent of a home's sale price. *See id.* at ¶¶ 34 & 42.

Established in 2015, Plaintiff REX — Real Estate Exchange Inc. is a licensed broker that employs licensed real estate agents across the nation, including in Washington. Compl. at ¶¶ 40, 44, & 47. Plaintiff is not a member of NAR or any MLS and thus has not agreed to comply with any of NAR's rules. *Id.* at ¶ 35. Home sellers who choose Plaintiff's services are able to avoid paying a predetermined buyer agent commission and can instead negotiate that fee—as a result, Plaintiff's clients pay a total average commission of 3.3 percent of a home's sale price. *Id.* at ¶ 42.

Plaintiff has developed proprietary digital technology to market its customers' homes, allegedly saving customers more than $29 million in commissions over the past **[*4]** five years. Compl. at ¶¶ 40-43. Plaintiff lists its customers' homes on various real estate aggregator websites, including two of Zillow's websites, Zillow.com and Trulia.com, which are the first and fourth most visited real estate aggregator sites in the United States. *Id.* at ¶ 54. Zillow's websites are alleged to be a "dominant doorway into the residential real estate market." *Id.* Plaintiff's listings were historically displayed on Zillow's primary search page alongside the listings of MLS participants. *Id.* at ¶ 63.

In 2018, Zillow launched its "Zillow Offers" business, allowing Zillow to "transact[] thousands of homes annually" as an "ibuyer" of homes. Compl. at ¶ 58. Based on Plaintiff's information and belief, "the growth and substantial inventory of Zillow-owned homes placed Zillow in a new position: Instead of focusing on being an open access point for consumers to display and access residential real estate listings, Zillow's interests turned to its own substantial home inventory." *Id.* In late 2020, Zillow announced that it would join forces with NAR and several MLSs, publicly committing that "all Zillow-owned homes will be listed on the MLSs with commissions paid to agents representing **[*5]** buyers." *Id.* at ¶ 59. Plaintiff alleges that NAR's Buyer Agent Commission Rule, which is "now adopted by Zillow, is the paramount reason that real estate commissions are two to three times higher in the United States than in comparable international markets." *Id.* Zillow also announced that it would begin to use MLS data feeds to populate its websites. *Id.* at ¶ 60.

In January 2021, Zillow unveiled its newly designed website display to be implemented nationwide on its websites to comply with the NAR and MLS "guidelines" or "rules." Compl. at ¶¶ 64 & 70-71. The new display created a separate page or tab, called "Other listings," that is concealed behind the primary results page or tab, called "Agent listings," as depicted below:



Id. at ¶ 64. As a result of this new display, consumers see only a portion of the homes at one time, based on whether they are viewing the primary "Agents listings" tab or the secondary "Other listings" tab; and they must now move back and forth between these two tabs. *Id.* at ¶ 66. Although Plaintiff's customers' homes are all listed by licensed real estate agents, its listings are now being displayed in the "Other listings" category to comply with NAR and MLS rules, **[*6]** rather than in the "Agent listings" category. *Id.* at ¶¶ 67-68 & 71. Zillow allegedly knows that Plaintiff is a licensed broker with licensed agents, as Plaintiff pays Zillow to be a part of Zillow's Premier Agent Program. *Id.* at ¶ 69. Plaintiff alleges that this new display and labeling system "is not only inaccurate and nonsensical, it is misleading and deceptive," as it "degrades non-MLS listings" by placing them on the "Other listings" tab. *Id.* at ¶¶ 67 & 71.

After Zillow redesigned its websites, views of Plaintiff's listings "plummeted" on Zillow's websites, causing "a corresponding drop in sales and . . . lost brokerage service revenues to" Plaintiff. Compl. at ¶¶ 73-74 & 88. For example, views of one of Plaintiff's listings on Zillow.com dropped dramatically after January 2021, when Zillow added the "Other listings" tab to the website, as depicted below:

Id. at ¶ 74. Zillow's and NAR's actions are also allegedly harming other non-MLS agents, *see id.* at ¶ 71, as well as the sellers of the homes that are listed on Zillow's "Other listings" tab, "causing them to list the home for more days on market and accept lower sales prices." *Id.* at ¶ 73.

In March 2021, Plaintiff brought this **[*7]** action against Zillow and NAR, asserting four claims: (1) an unreasonable restraint of trade in violation of *Section 1 of the Sherman Act, 15 U.S.C. § 1*; (2) false advertising in violation of the *Lanham Act, 15 U.S.C. § 1125*; (3) an unfair or deceptive act or practice in violation of the *Washington Consumer Protection Act ("CPA"), RCW 19.86.020*; and (4) conspiracy to restrain trade in violation of the CPA, *RCW 19.86.030*. Compl. at ¶¶ 114-64. Plaintiff simultaneously filed a motion for a preliminary injunction, docket no. 5, seeking to enjoin Defendants from implementing any rule requiring the segregation of Plaintiff's listings from MLS listings, excluding Plaintiff's listings from the "Agent listings" tab, and categorizing Plaintiff's listings as "Other listings" on Zillow's websites. The Court denied that motion, concluding that Plaintiff failed to satisfy its burden to show a likelihood of prevailing on its federal and state law claims, or a likelihood of suffering irreparable harm in the absence of an injunction. Order (docket no. 80 at 23).

Defendants now move to dismiss the claims asserted against them, *see* docket nos. 83 & 84. NAR also requests that the Court take judicial notice of certain documents, docket no. 85. Plaintiff partially opposes the request, docket no. 91, with respect **[*8]** to two of the documents, a complaint filed in a civil case, *see* Ex. C to request (docket no. 85-3), and the final judgment entered in that case, including a 2008 consent decree between NAR and the United States, *see* Ex. D to request (docket no. 85-4). The United States also filed a statement of interest, docket no. 95, asking this Court to decline to draw any inference in NAR's favor from the 2008 consent decree, which is now expired. *See id.* at 2. The Court previously noted the existence of that consent decree in ruling on the motion for a preliminary injunction, *see* docket no. 80 at 13. Because no one disputes the authenticity of these court records, the Court GRANTS NAR's request to take judicial notice of them (docket nos. 85-3 & 85-4), as well as the unopposed documents (docket nos. 85-1 & 85-2), in ruling on the instant motions.

Discussion

1. Article III Standing

NAR argues that Plaintiff fails to plausibly allege that its injury is traceable to NAR or that such injury is redressable. ***HN1***[] "[L]ack of Article III standing requires dismissal for lack of subject matter jurisdiction under *Federal Rule of*

Civil Procedure 12(b)(1)." *Maya v. Centex Corp., 658 F.3d 1060, 1067 (9th Cir. 2011)*. "[T]hose who seek to invoke the jurisdiction of the federal courts must satisfy the threshold requirement **[*9]** imposed by Article III of the Constitution by alleging an actual case or controversy." *Id.* (quoting *City of Los Angeles v. Lyons, 461 U.S. 95, 101, 103 S. Ct. 1660, 75 L. Ed. 2d 675 (1983)*). "[T]o satisfy Article III's standing requirements, a plaintiff must show (1) it has suffered an 'injury in fact' . . . ; (2) the injury is fairly traceable to the challenged action of the defendant; and (3) it is likely, as opposed to merely speculative, that the injury will be redressed by a favorable decision." *Id.* (quoting *Friends of the Earth, Inc. v. Laidlaw Env't Servs., Inc., 528 U.S. 167, 180-81, 120 S. Ct. 693, 145 L. Ed. 2d 610 (2000)*). "For purposes of ruling on a motion to dismiss for want of standing, . . . courts must accept as true all material allegations of the complaint and must construe the complaint in favor of the complaining party." *Id.* (quoting *Warth v. Seldin, 422 U.S. 490, 501, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)*). On a motion to dismiss, courts "presum[e] that general allegations embrace those specific facts that are necessary to support the claim." *Id.* (citation omitted).

The Court first considers whether Plaintiff's allegations are sufficient to show that its alleged injuries are traceable to NAR. In arguing that Plaintiff has failed to plead causation, NAR points to the complaint's allegations that the Segregation Rule applies only to MLSs (and not Zillow, who is merely an "MLS participant"), it is "optional" and has not been adopted by all MLSs, and it was implemented by Zillow alone. **[*10]** *See* NAR Mot. (docket no. 84 at 9-11). NAR also relies on allegations purportedly showing that Zillow's selection of a new website design was done independently of NAR. *See id.* at 10. According to NAR, such allegations are "breaks in the chain of causation," demonstrating that "the specific website changes made by Zillow that allegedly harmed REX were the product of Zillow's independent actions," and *not* NAR's actions. *Id.*

NAR's argument fails for the simple reason that it ignores the other allegations that NAR is a direct participant in the challenged conduct. The complaint challenges not only the Segregation Rule but also the Buyer Agent Commission Rule, both of which were "written by NAR and enforced by its member MLSs"; moreover, the Buyer Agent Commission Rule allegedly "*mandate*[*s*] offers of commissions to buyer agents." *See* Compl. at ¶¶ 7 & 59. The complaint also alleges that NAR "coopt[ed] Zillow" and that Zillow's "[t]op sites . . . now all have restrictions based on NAR and MLS guidelines." *Id.* at ¶¶ 61 & 71. In addition, one Zillow representative allegedly stated that they changed the websites as "a result of [Zillow] joining the MLS" and "to comply with MLS rules." *Id.* at **[*11]** ¶ 88. The complaint plausibly alleges that, absent NAR's actions in drafting the rules and effectively forcing Zillow and other MLS participants to comply with them, Zillow would not have changed its websites. Plaintiff's alleged injuries are thus fairly traceable to NAR's actions.

As to whether Plaintiff's alleged injuries are redressable, Plaintiff seeks not just injunctive relief, it also seeks statutory damages under *15 U.S.C. §§ 15* and *1117*, other "damages and statutory damages to be proven at trial," and "attorneys' fees and costs." *See* Compl. at ¶¶ D-G. Plaintiff has standing to bring these claims against NAR.

2. *Rule 12(b)(6)* Standard

HN2[] Although a complaint challenged by a *Rule 12(b)(6)* motion to dismiss need not provide detailed factual allegations, it must offer "more than labels and conclusions" and contain more than a "formulaic recitation of the elements of a cause of action." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. In ruling on a motion to dismiss, the Court must assume the truth of the plaintiff's allegations and draw all reasonable inferences in the plaintiff's favor. *See* *Usher v. City of Los Angeles, 828 F.2d 556, 561 (9th Cir. 1987)*. The question for the Court is whether the facts in the complaint sufficiently state a "plausible" ground for relief. *Twombly, 550 U.S. at 570*. If the Court dismisses the complaint or portions thereof, it must **[*12]** consider whether to grant leave to amend. *See* *Lopez v. Smith, 203 F.3d 1122, 1130 (9th Cir. 2000)*.

3. Antitrust Violations

Defendants argue that Plaintiff's complaint fails to state an antitrust claim, both under *Section 1* of the Sherman Act and under Washington law,[2] regardless of whether the Court applies the *per se* analysis or the "rule of reason" analysis. Plaintiff responds that "[t]he Court is not required to decide which rule applies in [ruling on] a motion to dismiss." Resp. (docket no. 90 at 14). The Court has already ruled that Plaintiff's challenge to a less-than-obvious restraint,[3] as well as the complicated nature of the parties' business relationships, do not lend themselves to *per se* analysis. *See* Order (docket no. 80 at 13). The Court therefore analyzes the complaint under the rule of reason to determine whether Plaintiff has sufficiently pleaded antitrust claims.

HN3[] To state a *Section 1* claim under the rule of reason, Plaintiff "must plead facts which, if true, will prove: (1) a contract, combination or conspiracy among [Defendants]; (2) by which the [Defendants] intended to harm or restrain trade or commerce among several States . . . ; (3) which actually injures competition"; and "(4) [Plaintiff **[*13]** is] the proper part[y] to bring the antitrust action because [it was] harmed by [Defendants'] contract, combination, or conspiracy, and the harm [it] suffered was caused by the anticompetitive aspect of [Defendants'] conduct."[4] *In Re Nat'l Football League's Sunday Ticket Antitrust Litig., 933 F.3d 1136, 1150 (9th Cir. 2019)* (quoting *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1197 (9th Cir. 2012)*).

A. Anticompetitive Agreement

Defendants contend that Plaintiff has failed to plead the first two elements of a *Section 1* violation, namely that they entered an anticompetitive agreement or conspiracy. According to Zillow, the complaint fails to allege a "conscious commitment to a common scheme designed to achieve an unlawful objective." Zillow Mot. (docket no. 83 at 14) (quoting *Toscano v. Prof. Golfers Assoc., 258 F.3d 978, 984 (9th Cir. 2001)*). Although the complaint alleges that Zillow implemented the new website display as "a result of joining the MLS and changing over to IDX feeds" and to "comply with MLS rules," Compl. at ¶ 88, the complaint also alleges that it was "*Zillow's* decision to conceal non-MLS listings under the misleading and inferior 'other' category," causing "listings from non-MLS brokers such as [Plaintiff] [to] be far less competitive." *Id.* at ¶ 90; *see id.* at ¶ 108 (alleging that Zillow is "using" the MLS rules "to implement a change in" its website designs). The complaint **[*14]** further alleges that "Zillow signaled its dedication to . . . inflated commissions—by committing that 'all Zillow-owned homes will be listed on the MLSs with commissions paid to agents representing buyers.'" *Id.* at ¶ 59. ***HN4***[] As the Supreme Court has held, "[c]oncerted efforts to *enforce* (rather than just agree upon) private product standards face more rigorous antitrust scrutiny." *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 501 n.6, 108 S. Ct. 1931, 100 L. Ed. 2d 497 (1988)* (emphasis in original). At times, the complaint appears to allege that Zillow's mere act of entering

---

[2] The parties do not separately brief Plaintiff's state law claim for conspiracy to restrain trade under the CPA, *RCW 19.86.030*, and Zillow argues that this claim should be dismissed on the same basis that the *Section 1* claim should be dismissed. *See* Zillow Mot. (docket no. 83 at 20-21). The Court recognizes that the state and federal standards are essentially the same and thus analyzes both claims under the federal standards. *See State v. LG Elecs., Inc., 186 Wn.2d 169, 186 n.3, 375 P.3d 1035 (2016)* (concurring, McCloud, J.).

[3] Although the complaint alleges a "group boycott," it is clear from the face of the complaint that Defendants are not alleged to be competitors who *refuse to do business* with Plaintiff—but rather, they are alleged to have "segregate[d]" Plaintiff's listings, "denying them *effective*" or "*equal*" access to Zillow's websites. Compl. at ¶¶ 101, 109, 118 & 122. *See Boycott*, BLACK'S LAW DICTIONARY (11th ed. 2019) (defining "group boycott" as "[a] type of secondary boycott by two or more competitors who refuse to do business with one firm unless it refrains from doing business with an actual or potential competitor of the boycotters," and noting that such claims are "analyzed under either the per se rule or the rule of reason, depending on the nature of the boycott").

[4] Neither Defendant appears to challenge Plaintiff's alleged harm or so-called antitrust standing to bring this action. Although NAR argues (unsuccessfully) that Plaintiff lacks constitutional standing, *see supra*, Section 1 of this Order, and suggests that Plaintiff also lacks standing to bring an antitrust action, NAR confines its argument to the complaint's purported failure to plead harm to *competition*—rather than any failure to plead harm to Plaintiff as a result of Defendants' anticompetitive conduct. *See* NAR Mot. (docket no. 84 at 13-15). The Court concludes that Plaintiff has adequately pleaded that it has suffered harm as a result of the anticompetitive aspects of Defendants' actions. *See* Compl. at ¶¶ 73 & 111.

agreements with MLSs constitutes "horizontal agreements between competitors." Compl. at ¶¶ 93 & 97; *see also* Resp. (docket no. 90 at 20). Such acts, standing alone, would be insufficient to plead an anticompetitive agreement or conspiracy. *See* *Toscano, 258 F.3d at 984* (finding no evidence of concerted action to restrain trade where a third party "independently set the terms of the contracts, and [defendants] merely accepted them"). Because the complaint also alleges that Zillow went a step further—e.g., by affirmatively redesigning its websites to enforce an allegedly misleading labeling system—Plaintiff has plausibly alleged that Zillow agreed to use the MLS rules to restrain trade. *See id.*

For its part, NAR argues that Plaintiff cannot **[*15]** plausibly allege the existence of an unlawful agreement because NAR's challenged rules are "optional." *See* NAR Reply (docket no. 93 at 7-8). This argument is unavailing for two reasons. First, Plaintiff challenges not just the optional Segregation Rule, but also the mandatory Buyer Agent Commission Rule. *See* Compl. at ¶¶ 29, 34, & 59. Second, the Supreme Court has concluded that ***HN5***[] the interpretation and promotion of a trade association's "so-called voluntary standards" by the association's agents and members could be deemed to be "repugnant to the antitrust laws," and the association "should be encouraged to eliminate the anticompetitive practices of all its agents acting with apparent authority." *Am. Soc'y of Mech. Eng'rs, Inc. v. Hydrolevel Corp., 456 U.S. 556, 561-62, 570 & 574, 102 S. Ct. 1935, 72 L. Ed. 2d 330 (1982)*. The complaint alleges that the challenged rules were "written" by NAR and are being "promulgated" or "enforced" by its members, namely the MLSs and their members (including Zillow), and that these "combined" actions constitute illegal restraints on trade. *See* Compl. at ¶¶ 7, 86, & 120-21. The complaint further alleges that "NAR is the rare trade association that sets the rules of competition among its members," promulgating "mandates governing [IDX feeds] and the structure of compensation **[*16]** offers." *Id.* at ¶ 29. Allegedly, "[b]ecause of the size and scope of NAR and MLSs, these rules have become ubiquitous within the marketplace—essentially making consumers subject to them." *Id.* In other words, brokerages, agents, and even customers allegedly have *no choice* but to comply with NAR's so-called optional rules. *See* *Hydrolevel, 456 U.S. at 570* (emphasizing that the trade association was "in reality an extra-governmental agency, which prescribes rules for the regulation and restraint of interstate commerce"); *see also* *Top Agent Network, Inc. v. Nat'l Assoc. of Realtors, No. 20-cv-3198, 2021 U.S. Dist. LEXIS 154201, 2021 WL 3616480, at *6 (N.D. Cal. Aug. 16, 2021)* ("That NAR exercises control over the operating rules of the market for home sales in most major markets across the country is not, in and of itself, good for competition."). The complaint plausibly alleges NAR's involvement in an anticompetitive agreement or conspiracy.

B. Harm to Competition

HN6[] "The rule of reason requires courts to conduct a fact-specific assessment of the 'market power and market structure . . . to assess the [restraint's] *actual* effect' on competition." *FTC v. Qualcomm Inc., 969 F.3d 974, 989 (9th Cir. 2020)* (citation omitted) (emphasis in original). "[T]he plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market."[5] *Id.* (citation **[*17]** omitted). "A threshold step in any antitrust case is to accurately define the relevant market, which refers to 'the area of effective competition.'" *Id.* (quoting *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2285, 201 L. Ed. 2d 678 (2018)*).

i. Relevant Market

---

[5] ***HN7***[] This circuit has adopted a three-part, burden-shifting test, under which a plaintiff must meet this initial burden and only "then the burden shifts to the defendant to show a procompetitive rationale for the restraint." *Qualcomm, 969 F.3d at 991*. "If the defendant makes this showing, then the burden shifts back to the plaintiff to demonstrate the procompetitive efficiencies could reasonably be achieved through less anticompetitive means." *Id.* In ruling on a *12(b)(6)* motion, the Court exclusively focuses on whether Plaintiff has sufficiently pleaded the first element. *See* *Sitzer v. Nat'l Assoc. of Realtors, 420 F. Supp. 3d 903, 915 (W.D. Mo. 2019)* (concluding that at the motion to dismiss stage, "the [c]ourt's job is not to balance the anticompetitive effects of [the challenged restraints] against procompetitive justifications," but instead to "evaluate whether [the complaint] presents facts, which . . . show the challenged conduct plausibly exerts an unreasonable restraint on trade").

Plaintiff alleges that the relevant market is the "market for the provision of real estate brokerage services to sellers and buyers of residential real estate in local markets throughout the country where REX operates." Compl. at ¶ 102; *see id.* at ¶ 44 & n.9. Zillow contends that the only harm to competition that is alleged in the complaint has been suffered by consumers *outside* of the relevant market. *See Qualcomm, 969 F.3d at 993* (holding that **HN8**[] regardless of whether a defendant's "practices are interrelated, actual or alleged harms to customers and consumers outside the relevant markets are beyond the scope of **antitrust law**"). Zillow, like Qualcomm, "is no one-trick pony." *Id. at 983*. According to the complaint, Zillow has traditionally operated aggregator websites that display and market homes for sale, as well as its related "Premier Agent" program, through which Zillow charges a fee to promote brokers and agents on its websites. Compl. at ¶¶ 47-48 & 69. In 2018, Zillow also started "transacting thousands of homes annually" as **[*18]** an "ibuyer" through its Zillow Offers business. *Id.* at ¶ 58. Zillow then joined NAR as an "MLS participant." *Id.* at ¶ 59.

Zillow argues that because the Segregation Rule was implemented in Zillow's capacity as a *data aggregator* (and not in connection with providing *real estate brokerage* services), Plaintiff cannot plausibly allege that the restraint occurred within the relevant market. Zillow Mot. (docket no. 83 at 20). Even assuming that Zillow's implementation of a new website design, which displays real estate listings nationwide, can be deemed as occurring "outside" the market for real estate brokerage services, Zillow does not address the other restraint at issue: the Buyer Agent Commission Rule, which was allegedly implemented in Zillow's capacity as a real estate broker and MLS participant. *See* Compl. at ¶¶ 34 & 59 (alleging that "all Zillow-owned homes will be listed on the MLSs with commissions paid to agents representing buyers," thereby "preserv[ing] sky-high real estate fees across the United States"). As other courts have concluded, NAR's Buyer Agent Commission Rule, which mandates a "blanket offer of some compensation to the buyer-broker, . . . *by itself*, raises antitrust **[*19]** concerns given that the offer is the same regardless of the buyer-broker's experience or the value of services provided by the buyer-broker." *Moehrl v. Nat'l Assoc. of Realtors, 492 F. Supp. 3d 768, 784 (N.D. Ill. 2020)* (emphasis added); *see also Sitzer v. Nat'l Assoc. of Realtors, 420 F. Supp. 3d 903, 915 (W.D. Mo. 2019)*. The court in *Moehrl* also noted that the anticompetitive aspects of this NAR rule are exacerbated by the fact that "many prospective homebuyers [now] use online websites like Zillow to find homes," and that Zillow and other websites "have agreed not to compete with the MLSs by becoming licensed brokerages or offering compensation or cooperation." *492 F. Supp. 3d at 784*. The Court rejects Zillow's argument that *Qualcomm* precludes relief in this case.

NAR likewise contends that the complaint fails to allege sufficiently specific geographic markets, or that NAR has market power within those markets. The complaint identifies twenty states in which Plaintiff employs or will employ licensed real estate agents, *see* Compl. at ¶ 44 & n.9, and alleges that at least 70 percent of licensed agents are NAR members, *id.* at ¶ 26 & n.3. Although NAR members might make up more or less than 70 percent of the active licenses in a given state or local market, the complaint sufficiently alleges that NAR enjoys substantial market power within the market for real **[*20]** estate brokerage services in the states that Plaintiff operates. *See Moehrl, 492 F. Supp. 3d at 782* (noting that NAR and the other defendants did not "deny that they have market power" in the relevant market and that "the Seventh Circuit and several other courts have recognized that MLSs have market power"); *see also Sitzer, 420 F. Supp. 3d at 915* (concluding "[g]iven the sheer market power possessed by the . . . MLS," NAR and the other defendants have "significant influence" in the relevant market).[6]

ii. Substantial Anticompetitive Effect

Defendants also argue that the complaint lacks sufficient allegations to plead harm to competition, principally arguing that Plaintiff merely assumes that harm to itself is harm to competition. *See* Zillow Reply (docket no. 92 at

---

[6] NAR also argues that the relevant market alleged in the complaint is "implausible" because it fails to include individuals who "provide real estate brokerage services to themselves," or other reasonable substitutes. *See* NAR Mot. (docket no. 84 at 17). The complaint alleges that "Zillow and NAR are . . . harming the sellers of the[] homes" that are listed on the "Other listings" tab, including "For Sale by Owner" listings. *Id.* at ¶¶ 73 & 77. The complaint clearly alleges harm to individuals who sell their homes *themselves*, as well as those who use non-MLS brokers like Plaintiff.

10); NAR Mot. (docket no. 84 at 13-14). The Court disagrees, as the complaint is replete with allegations of harm to competition. Specifically, the complaint alleges that "Zillow and NAR are . . . harming the sellers of the[] homes" that are listed on the "Other listings" tab, "causing them to maintain the home for more days on the market and accept lower sales prices" because "[i]interested buyers are likely to continue avoiding or missing 'Other listings' altogether." **[*21]** Compl. at ¶¶ 73 & 77. Home listings on the "Other listings" tab include, in addition to Plaintiff's listings, "For Sale by Owner (FSBO)" and "foreclosure" listings. *Id.* at ¶ 77. Plaintiff plausibly alleges that Defendants' actions have a substantial anticompetitive effect that harms consumers in the relevant market. *See id.* at ¶¶ 8, 59, 61, 65, 71, 80 & 106 (collectively, alleging that the enforcement of NAR's rules have harmed non-MLS agents and sellers, as well as buyers); *see* *Moehrl, 492 F. Supp. 3d at 785* (concluding the "Buyer-Broker Commission Rules have caused an artificial inflation of commission rate"); *Sitzer, 420 F. Supp. 3d at 915* (same).

The Court therefore DENIES Defendants' motions to dismiss, docket nos. 83 & 84, the antitrust claims brought under *Section 1* of the Sherman Act and under the CPA, *RCW 19.86.030*.

4. False Advertising or Other Deceptive Acts

A. Pleading Standard

Zillow argues that Plaintiff's claims for false advertisement or other deceptive acts under the Lanham Act and Washington's CPA, *RCW 19.86.020*, "sound in fraud" and that Plaintiff must therefore satisfy *Rule 9(b)*'s heightened pleading standards. Zillow further argues that Plaintiff "does not meaningfully contest that *Rule 9(b)* governs." Zillow Reply (docket no. 92 at 13). The Court concludes that Plaintiff sufficiently **[*22]** contests the rule's applicability. *See* Resp. (docket no. 90 at 30 n.9).

Rule 9(b) provides that "in alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake." *Fed. R. Civ. P. 9(b)*. "[T]he Ninth Circuit has not definitively spoken as to whether *Rule 9(b)* applies to Lanham Act claims," *Clorox Co. v. Reckitt Benckiser Grp. PLC, 398 F. Supp. 3d 623, 634 (N.D. Cal. 2019)*, or to claims brought under the CPA, *see* *Vernon v. Quest Commc'ns Int'l, Inc., 643 F. Supp. 2d 1256, 1264-65 (W.D. Wash. 2009)*. ***HN9***[] "[T]he majority of district courts within the Ninth Circuit" have applied "*Rule 9(b)*'s pleading standards . . . to false advertising claims under the Lanham Act," particularly "when the claim relies on factual allegations that necessarily constitute fraud." *A.H. Lundberg Assocs., Inc. v. TSI, Inc.*, No. C14-1160, 2014 U.S. Dist. LEXIS 149603, 2014 WL 5365514, at *7 (W.D. Wash. Oct. 21, 2014) (listing cases); *see also* *23andMe, Inc. v. Ancestry.com DNA, LLC, 356 F. Supp. 3d 889, 908 (N.D. Cal. 2018)* (concluding that the "better reasoned authority is that, where a Lanham Act claim is predicated on the theory that the defendant engaged in a knowing and intentional misrepresentation, then *Rule 9(b)* is applicable"). This District has also applied *Rule 9(b)*'s pleading requirements to CPA claims. *See, e.g.,* *Fidelity Mortg. Corp. v. Seattle Times Co., 213 F.R.D. 573, 575 (W.D. Wash. 2003)*; *but see* *Vernon, 643 F. Supp. 2d at 1265*.[7] These cases principally rely on the Ninth Circuit's application of *Rule 9(b)* to other types of claims involving false or misleading conduct. *See, e.g.,* *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1100 & 1106-08 (9th Cir. 2003)* (applying *Rule 9(b)* to claims brought under *California's Consumer Legal Remedies Act*); *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125-27 (9th Cir. 2009)* (concluding that ***HN10***[] in the event a plaintiff alleges "a unified course of fraudulent conduct," **[*23]** "the claim is said to be 'grounded in fraud' or to 'sound in fraud'").

HN11[] In *Vess*, the Ninth Circuit held that "*Rule 9(b)*'s heightened pleading requirements [apply] only to 'averments' of fraud supporting a claim rather than to the claim as a whole," and clarified that "[f]raud can be averred by specifically alleging fraud, or by alleging facts that necessarily constitute fraud (even if the word 'fraud' is

---

[7] In *Vernon*, this Court did not apply *Rule 9(b)* to the plaintiffs' CPA claim because the plaintiffs did "not allege[] facts that constitute fraud and the gravamen of the complaint [was] not fraud." *643 F. Supp. 2d at 1265*. That case is distinguishable from the instant case for the reasons explained in this Section.

not used)." *317 F.3d at 1104-05*. Allegations "of fraud must be accompanied by 'the who, the what, when, where and how' of the misconduct charged." *Id. at 1106* (quoting *Cooper v. Pickett, 137 F.3d 616, 627 (9th Cir. 1997)*).

The Court acknowledges that the complaint never uses the words "fraud" or "intent" in support of Plaintiff's Lanham Act or CPA claims. Those omissions, however, are not dispositive because the complaint also alleges facts that necessarily constitute fraud. In support of the Lanham Act claim, for example, the complaint alleges that "Zillow and NAR *knowingly* adopted this labeling system for all [nationwide] listings on Zillow as part of a *common plan or scheme* to confuse, mislead, *and deceive* consumers" and that such actions were "*deliberately calculated* to confuse and/or *deceive*." Compl. at ¶¶ 132 & 134 (emphasis added). Likewise, in support of Plaintiff's **[*24]** CPA claim, the complaint alleges that "Zillow changed its display *so that* the first page of results is presented under a *deceptive* and misleading heading, . . . while hiding [Plaintiff's] listings" and that "Zillow's *deceptive* search listing practice" has injured Plaintiff and others. *See id.* at ¶¶ 141 & 145-46 (emphasis added). In contrast, the complaint also alleges, at times, that Zillow's websites have the "tendency" or the "capacity to deceive consumers." Compl. at ¶¶ 130-31 & 143. Although Plaintiff has alleged some fraudulent and some non-fraudulent conduct, the Court concludes that Plaintiff has alleged "a unified fraudulent course of conduct" in support of the Lanham Act claims asserted against both Defendants and the CPA claim asserted against Zillow. *See Vess, 317 F.3d at 1105*; *see also Vernon, 643 F. Supp. 2d at 1265* (***HN12***[] "*Rule 9(b)* can also apply where . . . [p]laintiffs allege some fraudulent and some non-fraudulent conduct."). Because these claims are "grounded in fraud," the Court applies *Rule 9(b)*'s heightened pleading requirements the claims.

Plaintiff also asserts a CPA claim against NAR, but it does not implicate NAR in any of the fraud-based allegations supporting that claim. *See* Compl. at ¶¶ 136-51. The Court therefore does not apply **[*25]** *Rule 9(b)* to the CPA claim asserted against NAR.[8]

B. Lanham Act Violation

Defendants contend that Plaintiff has failed to sufficiently plead a Lanham Act claim for false advertising. ***HN13***[] The Lanham Act creates a private cause of action for "any person who believes that he or she is or is likely to be damaged by" a "person who" uses "false or misleading representation of fact," which, "in commercial advertising or promotion, misrepresents the nature, characteristics, [or] qualities" of "another person's goods, services, or commercial activities." *15 U.S.C. § 1125(a)(1)(B)*. "The Act itself does not define 'advertising' or 'promotion,' but [the Ninth Circuit] has adopted the following definition: (1) commercial speech, (2) by a defendant who is in commercial competition with plaintiff, (3) for the purpose of influencing consumers to buy defendant's goods or services, and (4) that is sufficiently disseminated to the relevant purchasing public." *Ariix, LLC v. NutriSearch Corp., 985 F.3d 1107, 1115 (9th Cir. 2021)* (quoting *Coastal Abstract Serv., Inc. v. First Am. Title Ins. Co., 173 F.3d 725, 735 (9th Cir. 1999)*).[9] "[T]he representations need not be made in a 'classic advertising campaign,' but may instead consist of more informal types of 'promotion.'" *Coastal Abstract Serv., 173 F.3d at 735* (citation omitted).

Zillow does not dispute that the complaint plausibly alleges that Zillow's commercial speech—adopting **[*26]** a new labeling system for its website displays—misrepresents the nature of Plaintiff's services and was sufficiently disseminated to the public. Zillow Mot. (docket no. 83 at 21-24). Zillow instead relies on the complaint's purported failure to allege that Zillow made the misleading statements *to influence consumers to purchase Zillow's products or services. See id.* at 22-23. The complaint alleges, however, that in late 2020, Zillow joined the NAR and MLSs to promote its "Zillow Offers" business. Compl. at ¶¶ 58-59. According to the complaint, the "growth and substantial

---

[8] The Court nevertheless concludes that Plaintiff has failed to state a Lanham Act claim against NAR under the less demanding pleading requirements. *See infra*, Section 4(C).

[9] Although jurists debate whether the second element is still valid in light of the Supreme Court's decision in *Lexmark Int'l, Inc. v. Static Control Components, Inc., 572 U.S. 118, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)*, there is no question that the third element, the only element at issue in this case, "flows from the statutory language and remains valid after *Lexmark*." *Ariix, 985 F.3d at 1124* (Collins, J., dissenting).

inventory of Zillow-owned homes placed Zillow in a new position: Instead of focusing on being an open access point for consumers to display and access residential real estate listings, Zillow's interests turned to its own substantial home inventory." *Id.* The complaint further alleges that Zillow changed its websites "to comply with the new MLS rules" and that the "new web display includes several features that . . . *insulate MLS brokers from competition*." *Id.* at ¶¶ 65 & 88 (emphasis added).

The complaint alleges that Zillow adopted the misleading labeling system for the purpose of influencing its customers to use the **[*27]** Zillow Offers business, as well as the services of other MLS agents, by concealing or discouraging the services of non-MLS agents like Plaintiff. *See* *Ariix, 985 F.3d at 1120 n.10* (noting that to satisfy this element, "it might be useful" to explore defendants' relationships with third parties). The Court concludes that these allegations are sufficient to state a Lanham Act claim. *Cf.* *Alfasigma USA, Inc. v. First Databank, Inc., 398 F. Supp. 3d 578, 591 (N.D. Cal. 2019)* (concluding plaintiff's allegations that the representations influenced consumers' decisions to buy plaintiff's goods, but not defendant's own goods, were insufficient to state a claim).[10] The Court further concludes that the fraud-based allegations implicating Zillow also satisfy *Rule 9(b)*'s heightened pleading standard, as such allegations specify "what is false or misleading" about Zillow's websites, "why it is false," and how Zillow knew it was false. *See* Compl. at ¶¶ 128-34; *see* *Vess, 317 F.3d at 1106*.

Although the Court concludes that Plaintiff has plausibly stated a Lanham Act claim against Zillow in accordance with *Rule 9(b)*'s pleading requirements, its allegations fall short of stating such a claim against NAR. The complaint alleges, in a conclusory fashion, that "Zillow and NAR knowingly adopted this labeling system for all [nationwide] listings on Zillow as part **[*28]** of a common plan or scheme to confuse, mislead, and deceive consumers." Compl. at ¶ 132; *see id.* at ¶ 134. There are no other allegations explaining what NAR did to design or encourage this particular labeling system on Zillow's websites, let alone when, where, and how NAR did it. *See* *Fed. R. Civ. P. 9(b)*, *12(b)(6)*; *see also A.H. Lundberg Assocs.*, 2014 U.S. Dist. LEXIS 149603, 2014 WL 5365514, at *8 (dismissing a Lanham Act claim where the plaintiff failed to satisfy, "at a minimum," the "what" and the "how" aspects of *Rule 9(b)*). Plaintiff has failed to plausibly state a Lanham Act claim against NAR.

Accordingly, the Court DENIES Zillow's motion to dismiss the Lanham Act claim, docket no. 83, but GRANTS NAR's motion to dismiss this claim, docket no. 84, and hereby DISMISSES, without prejudice, the Lanham Act claim against NAR.[11]

C. CPA Violation - *RCW 19.86.020*

Defendants also assert that Plaintiff fails to state a claim for unfair or deceptive acts under the CPA, *RCW 19.86.020*. ***HN15***[] To state a claim under *RCW 19.86.020*, a plaintiff must plausibly allege "(1) an unfair or deceptive act or practice, (2) occurring in trade or commerce, (3) affecting the public interest, (4) injury to a person's business or property, and (5) causation." *Panag v. Farmers Ins. Co. of Wash., 166 Wn.2d 27, 37, 204 P.3d 885 (2009)*.

Zillow does not argue that the complaint fails to sufficiently plead the elements of a CPA claim. **[*29]** *See* Zillow Mot. (docket no. 83 at 24-25). Instead, Zillow invokes the so-called "business purposes defense," citing the complaint's allegations that Zillow changed its websites merely to comply with NAR's Segregation Rule. Zillow argues that the complaint shows that Zillow's conduct was "reasonable in relation to the development and

---

[10] Zillow also points to contradictory allegations contained in the complaint, namely that Zillow's decision to join NAR and MLSs, and requiring Zillow to change its websites, increased its own costs and negatively impacted its data-aggregation business. Zillow Mot. (docket no. 83 at 23) (citing Compl. at ¶¶ 54 & 65). The Court perceives no contradiction: Zillow could plausibly be motivated to join NAR and MLSs to boost its Zillow Offers business (and other MLS members' services) irrespective of whether that change was costly to implement or ultimately hurt Zillow's data-aggregation business.

[11] ***HN14***[] Leave to amend a complaint should be freely given, *see* *Fed. R. Civ. P. 15(a)(2)*, and at this stage, it is not clear to the Court that an amendment would be futile. *See* *Lopez, 203 F.3d at 1130*.

preservation of [its] business." *Id.* at 24; *see* Zillow Reply (docket no. 92 at 15). Regardless of whether Zillow may rely on the business purposes defense in this case, Zillow's argument is premature at this stage in the proceedings.[12] The complaint emphasizes only the harmful effects of Zillow's actions, including that "Zillow's new search listing practice has the capacity to deceive its more than 240 million annual unique users," e.g., "by concealing from them the opportunity to list or buy a home from a licensed real estate agent who may charge significantly lower commissions than" an MLS agent. *See* Compl. at ¶¶ 147-48. The complaint says nothing about whether Zillow's allegedly deceptive practices were *reasonable* in relation to the development or preservation of its business. Because the Court concludes that the fraud-based allegations in support of this **[*30]** claim also satisfy *Rule 9(b)*'s heightened pleading standards, Plaintiff has plausibly alleged a CPA claim against Zillow.

With respect to NAR, however, the allegations are insufficient. The allegations made in support of the CPA claim do not once mention NAR. *See* Compl. at ¶¶ 136-51. Even if the Court considers the complaint's other factual allegations, including those made in support of the other claims (*see id.* at ¶¶ 132 & 134), such allegations are simply too conclusory to plausibly allege that NAR had any involvement in designing or encouraging Zillow's misleading website display. *See supra*, Section 4(B). In light of these deficiencies, Plaintiff has not stated a CPA claim against NAR under the less demanding pleading requirements. *See* *Fed. R. Civ. P. 8(a)(2)*, *12(b)(6)*.

The Court DENIES Zillow's motion to dismiss the CPA claim under *RCW 19.86.020*, docket no. 83; but the Court GRANTS NAR's motion to dismiss this claim, docket no. 84, and hereby DISMISSES, without prejudice, the CPA claim asserted against NAR. *See supra*, n.11.

Conclusion

For the foregoing reasons, the Court ORDERS:

(1) Zillow's motion to dismiss, docket no. 83, the claims asserted against Zillow (Counts I, II, III, & IV) is DENIED;

(2) NAR's motion to dismiss, docket **[*31]** no. 84, is DENIED in part as to the antitrust claims brought under *Section 1* of the Sherman Act and the CPA, *RCW 19.86.030* (Counts I & IV); the motion is GRANTED in part as to the claims for false advertising or deceptive acts brought under the Lanham Act and the CPA, *RCW 19.86.020* (Counts II & III), and these claims are DISMISSED without prejudice and with leave to amend. Plaintiff may file any amended complaint on or before September 30, 2021. Any answer or response is due on or before October 14, 2021. *See* *Fed. R. Civ. P. 15(a)(3)*; and

(3) The Clerk is directed to send a copy of this Order to all counsel of record.

IT IS SO ORDERED.

Dated this 2nd day of September, 2021.

/s/ Thomas S. Zilly

Thomas S. Zilly

United States District Judge

End of Document

---

[12] The Court expressly does not decide whether Zillow could later prevail on a business purposes defense. *See* Order (docket no. 80 at 21). That determination must await discovery and any further motion practice.

HN1[] **Judges, Discretionary Powers**

Fed. R. Civ. P. 12(b)(3) permits a court to dismiss a matter that is filed in an improper venue. When confronted with a motion to dismiss for improper venue, the court may consider both the complaint and evidence outside the complaint. The court accepts the allegations in the complaint as true unless they are contradicted by the defendant's affidavits. The defendant bears the burden of showing improper venue. The proper venue for a civil action is: (1) a judicial district in which any defendant resides, if all defendants are residents of the State in which the district is located; (2) a judicial district in which a substantial part of the events or omissions giving rise to the claim occurred, or a substantial part of property that is the subject of the action is situated; or (3) if there is no district in which an action may otherwise be brought as provided in this section, any judicial district in which any defendant is subject to the court's personal jurisdiction with respect to such action. 28 U.S.C.S. § 1391(b). A district court has broad discretion when it comes to deciding whether to transfer or dismiss a case for improper venue.

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Venue > Motions to Transfer > Interests of Justice

Civil Procedure > ... > Venue > Motions to Transfer > Convenience of Parties

HN2[] **Challenges to Venue, Transfers**

A federal district court may transfer a civil action to a different venue under 28 U.S.C.S. § 1406(a) or 28 U.S.C.S. § 1404(a). To determine which provision applies, the court first ascertains whether venue is proper in the original forum. Section 1404(a) provides for the transfer of a case where both the original and the requested venue are proper. Section 1406, on the other hand, applies where the original venue is improper and provides for either transfer or dismissal of the case. When a plaintiff has laid a proper venue, the decision whether to transfer falls in the sound discretion of the trial court. The burden of establishing the need for transfer rests with the movant.

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

Civil Procedure > ... > Venue > Motions to Transfer > Convenience of Witnesses

Civil Procedure > ... > Venue > Motions to Transfer > Interests of Justice

Civil Procedure > ... > Venue > Motions to Transfer > Convenience of Parties

HN3[] **Challenges to Venue, Transfers**

The court must consider three factors when determining whether to grant a transfer under 28 U.S.C.S. § 1404(a): (1) the convenience of the parties; (2) the convenience of the witnesses; and (3) the interests of justice. These factors are not exclusive and must be applied through a flexible and individualized analysis made on the unique facts presented in each case. The first two factors have been refined into a non-exhaustive list of private and public interests that courts should consider. The private interests a court should consider include: (1) plaintiff's forum preference as manifested in the original choice; (2) the defendant's preference; (3) whether the claim arose elsewhere; (4) the convenience of the parties as indicated by their relative physical and financial condition; (5) the convenience of the witnesses; and (6) the location of books and records. The public interests a court should consider include: (1) the enforceability of the judgment; (2) practical considerations that could make the trial easy, expeditious, or inexpensive; (3) the relative administrative difficulty in the two fora resulting from court congestion; (4) the local interest in deciding local controversies at home; (5) the public policies of the fora; and (6) the familiarity of the trial judge with the applicable state law in diversity cases.

Business & Corporate Compliance > ... > Causes of Action Involving Trademarks > Infringement Actions > Determinations

Civil Procedure > Preliminary Considerations > Venue > Individual Defendants

HN4[] **Infringement Actions, Determinations**

Intellectual property infringement occurs, among other places, where any allegedly infringing articles are sold. In the context of trademark infringement cases, courts focus their venue inquiry on the location where the unauthorized passing off takes place—whether that occurs solely within one district or in many. As to claims of trademark infringement and unfair competition, the cause of action occurs where the passing off occurs. Passing off occurs where the deceived customer buys defendant's product in the belief that he is buying plaintiff's product.

Civil Procedure > Preliminary Considerations > Venue > Individual Defendants

Constitutional Law > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Jurisdiction

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Same Case & Controversy

HN5[] **Venue, Individual Defendants**

Although venue must generally be established for each cause of action asserted in the complaint, there is an exception where claims arise out of the same operative facts. This doctrine, known as pendent venue, allows venue to be sustained over a federal claim even if venue over pendent state law claims would not be proper. When venue is proper on federal claims, it is also proper on pendent state claims. The doctrine of pendent venue borrows largely from the principles of supplemental jurisdiction.

Civil Procedure > Preliminary Considerations > Venue > Individual Defendants

HN6[] **Venue, Individual Defendants**

28 U.S.C.S. § 1391(b)(2) does not require that a majority of the events take place in the chosen venue. Section 1391(b) does not require the court to determine the best forum, or the forum with the most substantial events. If the infringement occurred in other districts as well, then venue could be proper in more than one district. More than one federal district may be the site of substantial events or omissions and therefore more than one federal district may be a proper venue in a given case.

Civil Procedure > Preliminary Considerations > Venue > Corporations

Civil Procedure > Preliminary Considerations > Venue > Individual Defendants

HN7[] **Venue, Corporations**

In the venue analysis, an entity with the capacity to sue and be sued shall be deemed to reside, if a defendant, in any judicial district in which such defendant is subject to the court's personal jurisdiction with respect to the civil action in question. 28 U.S.C.S. § 1391(c)(2). Personal jurisdiction is waivable.

Civil Procedure > Preliminary Considerations > Venue > Corporations

HN8[] **Venue, Corporations**

For venue purposes, a corporation may reside in more than one state.

Civil Procedure > ... > Venue > Motions to Transfer > Choice of Forum

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

HN9[] **Motions to Transfer, Choice of Forum**

In the Third Circuit, a plaintiff's choice of forum is a paramount concern in deciding a motion to transfer venue. The choice is entitled to greater deference when a plaintiff chooses its home forum. In contrast, a plaintiff's choice of forum is afforded less deference when the plaintiff has chosen a foreign forum. One situation where deference to the plaintiff's forum preference is curbed is where the plaintiff has not chosen his or her home forum. The issue of how much deference should be afforded a foreign plaintiff in her choice of forum is simply a matter of convenience. In other words, if the plaintiff demonstrates that her choice of a foreign forum as based on convenience, the reluctance to grant full deference to plaintiff's choice may be overcome.

Civil Procedure > ... > Venue > Motions to Transfer > Choice of Forum

HN10[] **Motions to Transfer, Choice of Forum**

For venue purposes, less deference is afforded to plaintiff's choice of forum.

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

Civil Procedure > ... > Venue > Motions to Transfer > Interests of Justice

HN11[] **Federal Venue Transfers, Convenience Transfers**

The third factor, where the claims arose, is the most critical to the court's venue analysis. Its inquiry involves a consideration of which forum constitutes the center of gravity of the dispute, its events, and transactions. The third factor weighs in favor of transfer to the forum where the majority part of events and omissions from which plaintiff's claims arise, took place. Typically the most appropriate venue is where a majority of events giving rise to the claim arose. Under 28 U.S.C.S. § 1404(a), courts must select the most appropriate venue, which is where a majority of events giving rise to the claim arose and where the center of gravity is.

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

HN12[] **Federal Venue Transfers, Convenience Transfers**

For venue purposes, the fourth factor requires the court to examine the convenience of the parties as indicated by their relative physical and financial condition. While courts in the United States District Court for the District of New Jersey have found that a large financial disparity between parties will sometimes sway this factor either in favor of transfer or against it, that typically occurs in scenarios where one party is a large company or conglomerate, the other is an individual or a small business, and the financial disparity is extreme. If the transfer would merely switch the inconvenience from the defendant to plaintiff, the transfer should not be allowed.

Civil Procedure > ... > Venue > Motions to Transfer > Convenience of Witnesses

Civil Procedure > Discovery & Disclosure > Discovery > Subpoenas

HN13[] Motions to Transfer, Convenience of Witnesses

For venue purposes, the fifth factor must be considered only to the extent that the witnesses may actually be unavailable for trial in one of the fora. The burden is on the defendant to identify specific nonparty witnesses who may be unavailable for trial, and to demonstrate why those witnesses would find it more convenient to testify in another forum. The only relevant witnesses for this fifth factor analysis are non-party witnesses outside the court's subpoena power. The convenience of witnesses who are employees of a party carries no weight because the parties are obligated to procure their attendance at trial.

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

Evidence > Types of Evidence > Testimony > Presentation of Evidence

HN14[] Federal Venue Transfers, Convenience Transfers

When arguing for transfer on the basis of witness availability at trial and witness convenience, movant has the responsibility to specify clearly the key witnesses to be called.

Civil Procedure > Preliminary Considerations > Venue > Individual Defendants

HN15[] Venue, Individual Defendants

For venue purposes, the sixth factor is only relevant to the extent that the files could not be produced in the alternative forum. When documents can be transported and/or easily photocopied, their location is entitled to little weight. The technological advances of recent years have significantly reduced the weight of this factor in the balance of convenience analysis.

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

HN16[] Federal Venue Transfers, Convenience Transfers

For venue purposes, potential delays caused by witnesses needing to travel may be considered for the practice consideration inquiry. The likelihood that parties, documents, and witnesses will have to be transported from one forum to another regardless of where the case is litigated means that practical considerations that could make the trial easy, expeditious, or inexpensive do not favor either forum. Practical considerations do not favor either forum because both parties have witnesses and records located in their home states.

Civil Procedure > ... > Venue > Federal Venue Transfers > Jurisdictional Transfers

Governments > Courts > Authority to Adjudicate

HN17[] Federal Venue Transfers, Jurisdictional Transfers

For venue purposes, regarding the administrative difficulties associated with proceeding in either district, the court is required to evaluate this factor in light of the relative docket congestion of the fora.

Civil Procedure > ... > Venue > Federal Venue Transfers > Jurisdictional Transfers

Governments > Courts > Authority to Adjudicate

HN18[] Federal Venue Transfers, Jurisdictional Transfers

Transfer is favored when the transferee court experiences a lower level of judicial emergency.

Civil Procedure > ... > Venue > Federal Venue Transfers > Jurisdictional Transfers

HN19[] Federal Venue Transfers, Jurisdictional Transfers

The focus of the venue factor of the judge's familiarity with applicable state laws is whether judges in one of the districts would have greater familiarity with the applicable state law, particularly in diversity cases.

Antitrust & Trade Law > Consumer Protection > Likelihood of Confusion > Trademark Infringement

Business & Corporate Compliance > ... > Causes of Action Involving Trademarks > Infringement Actions > Determinations

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

Business & Corporate Compliance > ... > Unfair Competition > Federal Unfair Competition Law > Lanham Act

HN20[] Likelihood of Confusion, Trademark Infringement

The elements for a claim for trademark infringement under the Lanham Act are the same as the elements for a claim of unfair competition under the Lanham Act and for claims of trademark infringement and unfair competition under New Jersey statutory and common law. The elements of a claim of unfair competition under the Lanham Act are the same as for claims of unfair competition and trademark infringement under New Jersey statutory and common law. As a result, the court need not conduct any separate inquiry into the state and/or common law requirements, and the court's Lanham Act analysis extends the analog state and common law claims. Analysis under New Jersey common law for trademark infringement is the same as under § 43(a) of the Lanham Act. Hence, violation of the act leads to a finding of common law infringement. It is well established that the test for a common law unfair competition claim under New Jersey law is essentially the same as under the federal Lanham Act. Accordingly, a separate analysis of plaintiff's common law claims is not required.

Civil Procedure > ... > Venue > Federal Venue Transfers > Convenience Transfers

Civil Procedure > ... > Venue > Federal Venue Transfers > Improper Venue Transfers

Civil Procedure > ... > Venue > Motions to Transfer > Interests of Justice

Civil Procedure > ... > Venue > Motions to Transfer > Convenience of Parties

HN21[] **Federal Venue Transfers, Convenience Transfers**

Transfer under 28 U.S.C.S. § 1404(a) or 28 U.S.C.S. § 1406(a) is permitted despite lack of personal jurisdiction over defendants. The Third Circuit has held that § 1404(a) is an appropriate authority for discretionary transfer where venue is proper, even if the forum court lacks personal jurisdiction.

Counsel: [*1] For THE SNACK JOINT LLC, Plaintiff: GE LI, KEVIN KERVENG TUNG, P.C., FLUSHING, NY; KEVIN KERVENG TUNG, FLUSHING, NY.

For OCM GROUP USA, NJ, INC., OCM GLOBE INC., OCM GROUP USA INC., GANG WANG, YAOTIAN LI, XIAOHUI CHAI, Defendants: DARREN M. GELIEBTER, LEAD ATTORNEY, LOMBARD & GELIEBTER LLP, NEW YORK, NY.

Judges: HON. BRIAN R. MARTINOTTI, UNITED STATES DISTRICT JUDGE.

Opinion by: BRIAN R. MARTINOTTI

Opinion

MARTINOTTI, DISTRICT JUDGE

Before this Court is: (1) a Motion to Dismiss filed by Defendants OCM Group USA, NJ, Inc. ("OCM NJ"), OCM Globe Inc. ("OCM Globe"), OCM Group USA Inc. ("OCM USA"), Gang Wang ("Wang"), Yaotian Li ("Li"), and Xiaohui Chai ("Chai") (collectively, "Defendants") seeking to dismiss Plaintiff The Snack Joint LLC's ("Snack") Complaint for lack of personal jurisdiction as to Li pursuant to *Federal Rule of Civil Procedure 12(b)(2)*; (2) Defendants' Motion to Dismiss for improper venue pursuant to *Federal Rule of Civil Procedure 12(b)(3)*; and (3) Defendants' Motion to Transfer Venue to the United States District Court for the Central District of California (the "Central District of California") pursuant to *28 U.S.C. § 1404(a)*. (ECF No. 33.) Snack opposed Defendants' motions. (ECF No. 34.) Defendants filed a reply in support of their motions. (ECF No. 35.) Also before this Court is Snack's Motion **[*2]** for Preliminary Injunction. (ECF No. 36.) Defendants opposed Snack's motion. (ECF No. 37.) Snack filed a reply in support of its motion. (ECF No. 38.) Having reviewed the submissions filed in connection with the motions and having declined to hold oral argument pursuant to *Federal Rule of Civil Procedure 78(b)*, for the reasons set forth below and for good cause appearing, Defendants' Motion to Dismiss for improper venue is **DENIED**, Defendants' Motion to Transfer Venue is **GRANTED**, and Defendants' Motion to Dismiss for lack of personal jurisdiction and Snack's Motion for Preliminary Injunction are **DENIED as moot**.

I. BACKGROUND

Snack is in the food, beverage importation and wholesale business, selling beverages, condiments, and oil products across the U.S. (ECF No. 36-1 at 5.) One of Snack's products is a coconut juice product distributed under the trademark of YeShu federally registered in the U.S. (the "Asserted Mark"). (*Id.* at 5-6.) The Asserted Mark is owned by a Chinese company named Coconut Palm Group Limited ("Coconut Palm Group"). (*Id.* at 6.) Snack claims to have authorization from Coconut Palm Group to use the Asserted Mark exclusively and enforce it in the U.S. (*Id.*) Snack is incorporated and has its principal place **[*3]** of business in Brooklyn, New York. (ECF No. 1 ¶ 5.)

OCM Globe and OCM USA are in the food and beverage importation and distribution business. (ECF No. 33-1 at 5; ECF No. 37 at 7.) They imported from China and distributed in the U.S. certain coconut juice products (the "Accused Products"), which were manufactured by a Chinese company named Yeshu Group Co. Ltd. ("YeShu Group"). (ECF No. 37 at 7.) Defendants claim YeShu Group has authorized OCM Globe and OCM USA to sell and distribute the Accused Products in the U.S. (*Id.*) The Accused Products were sold under several trademarks that are owned by YeShu Group and officially registered in China (the "Accused Marks").[1] (*Id.* at 8.) OCM Globe and OCM USA are based in City of Industry, California (near Los Angeles). (ECF No. 33-1 at 5.) Their related company OCM NJ is based in New Jersey.[2] (*Id.*; ECF No. 33-4 ¶ 2.) Wang, the chief executive officer of OCM Globe and OCM USA, is an individual residing in Orange County, California (near Los Angeles). (ECF No. 33-1 at 6.) Li, an employee of OCM USA, is an individual residing in Chino, California (near Los Angeles). (*Id.*) Chai, the chief executive officer of OCM NJ, is an individual residing in Los Angeles **[*4]** County, California. (*Id.* at 7.)

Snack argues the Accused Marks are identical or closely similar to the Asserted Mark. (ECF No. 36-1 at 6.) Snack alleges Defendants have no association with Snack or Coconut Palm Group, and have no authorization from Snack or Coconut Palm Group to use the Accused Marks in the U.S. (*Id.*) Snack contends Defendants have infringed upon Snack and Coconut Palm Group's trademark rights. (*Id.* at 7.) On January 15, 2021, Snack filed a Complaint in this Court against Defendants for importing and distributing the Accused Products in the U.S. under the Accused Marks, asserting claims for: (1) trademark infringement under *Section 32 of the Lanham Act, 15 U.S.C. § 1114* (Count 1); (2) unfair competition, false designation of origin and false description under *Section 43(a) of the Lanham Act, 15 U.S.C. § 1125(a)* (Count 2); (3) trademark infringement under New Jersey common law (Count 3); and (4) unfair competition under New Jersey common law (Count 4). (ECF No. 1.)

On June 1, 2021, Defendants filed: (1) a Motion to Dismiss for lack of personal jurisdiction as to Li pursuant to *Federal Rule of Civil Procedure 12(b)(2)*; (2) a Motion to Dismiss for improper venue pursuant to *Federal Rule of Civil Procedure 12(b)(3)*; and (3) a Motion to Transfer Venue to the Central District of California pursuant to *28 U.S.C. § 1404(a)*. **[*5]** (ECF No. 33.) On June 2, 2021, Snack opposed Defendants' motions. (ECF No. 34.) On June 2, 2021, Defendants filed a reply in support of their motions. (ECF No. 35.) On June 14, 2021, Snack filed a Motion for Preliminary Injunction to enjoin Defendants' allegedly infringing activities. (ECF No. 36.) On June 15, 2021, Defendants opposed Snack's motion. (ECF No. 37.) On June 15, 2021, Snack filed a reply in support of its motion. (ECF No. 38.)

II. LEGAL STANDARD

A. Motion to Dismiss for Improper Venue

"*Federal Civil Rule of Procedure 12(b)(3)* ***HN1***[] permits a court to dismiss a matter that is filed in an improper venue." *Wilson v. JPMorgan Chase, Civ. A. No. 18-13789, 2020 U.S. Dist. LEXIS 103695, at *3 (D.N.J. June 15, 2020)*. "[W]hen confronted with a motion to dismiss for improper venue, the [c]ourt may consider both the complaint and evidence outside the complaint." *Boston Sci. Corp. v. Cook Grp., Inc., 269 F. Supp. 3d 229, 234 (D. Del. 2017)* (citing 14D Wright & Miller, Federal Practice & Procedure § 3826 (4th ed. 2017)). "[T]he court accepts the allegations in the complaint as true unless they are contradicted by the defendant's affidavits." *Adams, Nash & Haskell, Inc. v. United States, Civ. A. No. 19-3529, 2020 U.S. Dist. LEXIS 47471, at *3 (D.N.J. Mar. 19, 2020)* (citing *Bockman v. First Am. Mktg. Corp., 459 F. App'x 157, 158 n.1 (3d Cir. 2012)*). The defendant "bear[s] the burden of showing improper venue." *Wilson, 2020 U.S. Dist. LEXIS 103695, at *4* (quoting *Myers v. Am. Dental Ass'n, 695 F.2d 716, 724-25, 19 V.I. 642 (3d Cir. 1982)*). The proper venue for a civil action is:

> (1) a judicial district in which any defendant resides, if all defendants are residents of the State in which the district is located;
>
> (2) a judicial **[*6]** district in which a substantial part of the events or omissions giving rise to the claim occurred, or a substantial part of property that is the subject of the action is situated; or

---

[1] The Chinese characters for YeShu (*i.e.*, 椰 树)—which appear on Snack's coconut juice products, the Accused Product, and the Accused Mark-mean coconut palm. (ECF No. 1-2 Ex. B; ECF No. 37 at 7.)

[2] Hereinafter, OCM Globe, OCM USA, and OCM NJ are collectively termed the "OCM Parties."

(3) if there is no district in which an action may otherwise be brought as provided in this section, any judicial district in which any defendant is subject to the court's personal jurisdiction with respect to such action.

28 U.S.C. § 1391(b). "A district court has broad discretion when it comes to deciding whether to transfer or dismiss a case for . . . improper venue." *Konica Minolta, Inc. v. ICR Co., Civ. A. No. 15-1446, 2015 U.S. Dist. LEXIS 171277, at *13 (D.N.J. Dec. 22, 2015)* (citing *Cote v. Wadel, 796 F.2d 981, 985 (7th Cir. 1986)*).

B. Motion to Transfer Venue

HN2[] "A federal district court may transfer a civil action to a different venue under 28 U.S.C. § 1406(a) ('Section 1406') or 28 U.S.C. § 1404(a) ('Section 1404')." *Bonavito v. President & Fellows of Harvard Coll., Civ. A. No. 20-14657, 2021 U.S. Dist. LEXIS 123146, at *11-12 (D.N.J. June 30, 2021)*. "To determine which provision applies, the court first ascertains whether venue is proper in the original forum." *Adams, 2020 U.S. Dist. LEXIS 47471, at *3* (citing *Lafferty v. St. Riel, 495 F.3d 72, 78 (3d Cir. 2007)*). "Section 1404(a) provides for the transfer of a case where both the original and the requested venue are proper." *Jumara v. State Farm Ins. Co., 55 F.3d 873, 878 (3d Cir. 1995)*. "Section 1406, on the other hand, applies where the original venue is improper and provides for either transfer or dismissal of the case." *Id.*

Section 1404(a) states: "For the convenience of the parties and witnesses, in the interest of justice, a district court may transfer any civil action to any other district or division **[*7]** where it might have been brought or to any district or division to which all parties have consented." 28 U.S.C. § 1404(a). When a plaintiff has laid a proper venue, "[t]he decision whether to transfer falls in the sound discretion of the trial court." *Park Inn Int'l, L.L.C. v. Mody Enters., Inc., 105 F. Supp. 2d 370, 377 (D.N.J. 2000)*. "[T]he burden of establishing the need for transfer . . . rests with the movant." *Jumara, 55 F.3d at 879*.

HN3[] The Court must consider three factors when determining whether to grant a transfer under § 1404(a): (1) the convenience of the parties; (2) the convenience of the witnesses; and (3) the interests of justice. *Liggett Grp., Inc. v. R.J. Reynolds Tobacco Co., 102 F. Supp. 2d 518, 526 (D.N.J. 2000)* (citing 28 U.S.C. § 1404(a)). These factors are not exclusive and must be applied through a "flexible and individualized analysis . . . made on the unique facts presented in each case." *Id. at 527* (citations omitted). The first two factors have been refined into a non-exhaustive list of private and public interests that courts should consider. *See Jumara, 55 F.3d at 879-80*.

The private interests a court should consider include: (1) plaintiff's forum preference as manifested in the original choice; (2) the defendant's preference; (3) whether the claim arose elsewhere; (4) the convenience of the parties as indicated by their relative physical and financial condition; (5) the convenience of the witnesses; and (6) the location of books **[*8]** and records. *Danka Funding, L.L.C. v. Page, Scrantom, Sprouse, Tucker & Ford, P.C., 21 F. Supp. 2d 465, 474 (D.N.J. 1998)* (citing *Jumara, 55 F.3d at 879*). The public interests a court should consider include: (1) the enforceability of the judgment; (2) practical considerations that could make the trial easy, expeditious, or inexpensive; (3) the relative administrative difficulty in the two fora resulting from court congestion; (4) the local interest in deciding local controversies at home; (5) the public policies of the fora; and (6) the familiarity of the trial judge with the applicable state law in diversity cases. *Id.* (citing *Jumara, 55 F.3d at 879-80*).

III. DECISION

A. The District of New Jersey Is a Proper Venue

The parties agree § 1391(b)(2) governs the venue inquiry with respect to the District of New Jersey; that is, in which judicial district did a substantial part of the events or omissions giving rise to Snack's claims occur? (ECF No. 34 at 12; ECF No. 35 at 10.) Defendants argue the District of New Jersey is not a proper venue under § 1391(b)(2), because a substantial part of the events or omissions giving rise to Snack's claims occurred in California's Los

Angeles area, not New Jersey. (ECF No. 33-1 at 11.) Defendants present Wang's declaration that only about 4% of the U.S. sales of the Accused Products occurred in New Jersey, whereas about a half **[*9]** in California. (*Id.*) Defendants further indicate they all operated from the Los Angeles area: the management of the importation and distribution of the Accused Products was conducted in the Los Angeles area; the related documents and information pertaining to the Accused Products were maintained in the Los Angeles area; the communication with the OCM Parties' other U.S. locations was done from their Los Angeles area headquarters; and the importation of Accused Products was not handled by OCM NJ, but the Los Angeles area headquarters. (*Id.* at 12.) Defendants maintain, in cases involving trademark infringement, the events giving rise to the claim occur where the allegedly infringing sales occur, not where the injury is felt. (ECF No. 35 at 10.) Defendants state Snack provides no admissible evidence to show OCM NJ is the nerve center of Defendants' accused activities on the East Coast. (*Id.* at 12.)

Snack contends the District of New Jersey is a proper venue for its New Jersey common law claims, which are based on Defendants' accused activities conducted through OCM NJ within New Jersey. (ECF No. 34 at 13.) Snack maintains its Lanham Act claims also focus on Defendants' New Jersey activities, **[*10]** because Defendants use OCM NJ as a hub to distribute the Accused Products from California to the East Coast states, including but not limited to, New Jersey, New York, Connecticut, Massachusetts, Pennsylvania, and Florida. (*Id.* at 13-14.) Snack explains, because it is a New York company, the main events giving rise to its claims are related to Defendants' accused activities conducted through OCM NJ, not those committed by OCM Globe and OCM USA in California without the help of OCM NJ. (*Id.* at 14.) Snack also argues Wang's declaration that the sales of the Accused Products into New Jersey accounted for 4% of the overall U.S. sales is misleading and immaterial, because the real question is how much of the sales were initiated by or conducted through OCM NJ, which is the main focus and nerve center of Defendants' accused activities. (*Id.*)

HN4[] "Intellectual property infringement occurs, among other places, where any allegedly infringing articles are sold." *Master Cutlery, Inc. v. Panther Trading Co., Civ. A. No. 12-4493, 2012 U.S. Dist. LEXIS 178639, at *9-10 (D.N.J. Dec. 17, 2012)*. "In the context of trademark infringement cases, courts focus their venue inquiry on 'the location where the unauthorized passing off takes place—whether that occurs solely within one district or in many.'" *Vision Wine & Spirits, LLC v. Winery Exch., Inc., Civ. A. No. 12-6677, 2013 U.S. Dist. LEXIS 56942, at *10-11 (D.N.J. Apr. 22, 2013)* (quoting *Cottman Transmission Sys., Inc. v. Martino, 36 F.3d 291, 295 (3d Cir. 1994)*). "As to claims of **[*11]** trademark infringement and unfair competition, the cause of action occurs where the passing off occurs." *Allied Old English, Inc. v. Uwajimaya, Inc., Civ. A. No. 11-1239, 2012 U.S. Dist. LEXIS 116261, at *15 (D.N.J. Aug. 16, 2012)* (quoting *Elite Sports Enters., Inc. v. Lococo, Civ. A. No. 07-4947, 2008 U.S. Dist. LEXIS 67472, at *13 (D.N.J. Sept. 5, 2008)*) (internal quotation marks omitted); *see also* *Ceramica Falcinelli, S.p.A. v. Am. Marazzi Tile, Inc., Civ. A. No. 99-1223, 1999 U.S. Dist. LEXIS 15526, at *12 (D.N.J. Sept. 29, 1999)* ("In cases of trademark infringement and unfair competition, the wrong takes place where the 'passing off' occurs." (citations omitted)). "Passing off occurs where the deceived customer buys defendant's product in the belief that he is buying plaintiff's [product]." *Vision Wine, 2013 U.S. Dist. LEXIS 56942, at *11* (quoting *Taylor & Francis Grp., PLC v. McCue, 145 F. Supp. 2d 627, 630 (E.D. Pa. 2001)*); *see also* *Ezaki Glico Kabushiki Kaisha v. Lotte Int'l Am. Corp., Civ. A. No. 15-5477, 2017 U.S. Dist. LEXIS 12246, at *10 (D.N.J. Jan. 30, 2017)* ("Trademark infringement claims are deemed to arise where the 'passing off' occurs, or where the allegedly infringing products are sold to consumers who may become confused." (citing *Cottman, 36 F.3d at 294*)).[3]

Here, as to customer confusion, Snack contends: (1) Defendants intended to "confuse consumers in order to profit from the goodwill associated with [the Asserted Marks];" (2) "Defendants' use of the Accused Mark in connection with the [Accused Products] have caused and will continue to cause consumers' confusion between the [Asserted

[3] In addition to trademark infringement and unfair competition, Snack alleges under Count 2 that Defendants made false designation of origin and false description regarding the Accused Products by using the Accused Marks, thereby misrepresenting the Accused Products' association with Snack or Coconut Palm Group, so that consumers were confused as to the source of the Accused Products. (ECF No. 1 ¶ 54.) In other words, Snack's allegations of false designation of origin and false description are also directed to the potential passing off with the Accused Products. Such false designation of origin and false description also occur when passing off occurs.

Mark] and the Accused Mark;" and (3) "consumers would be confused by Defendants' use of the Accused Mark and would believe Defendants to be associated with [Snack or the Asserted Mark]." (ECF No. 38 at 13-14.) In other words, **[*12]** the passing off, if any, occurred when an Accused Product was sold to a consumer, who may be confused as to the origin or other characters of the Accused Product. In this regard, Defendants present Wang's declaration that the sales of the Accused Products into New Jersey constituted about 4% of the overall sales in the U.S. from August 2019 to April 2021, while those for California took up about 50%. (ECF No. 33-2 ¶ 9.) Therefore, Defendants have presented evidence that suggests a substantial portion of the alleged passing off, *i.e.*, events giving rise to Snack's claims, occurred in California.

Snack's refuting of Defendants' position is unavailing. First, Snack's focus on OCM NJ as an alleged distribution hub of the Accused Products is of no moment. How the Accused Products are distributed says nothing about the place of potential passing off, which does not occur in a product's distribution process before it is sold. Second, the Court rejects Snack's argument on Wang's declaration regarding the U.S. sales of the Accused Products. Snack argues Wang's declaration, when referring to "the sales into New Jersey," fails to clarify whether it means the Accused Products were sold to New Jersey **[*13]** customers or, alternatively, the Accused Products were sent from California to New Jersey. (ECF No. 34 at 14.) The Court disagrees. Wang's declaration unambiguously refers to the percentage of the U.S. sales of the Accused Products that were made to New Jersey customers. After all, Wang's declaration never mentions the distribution process of the Accused Products in the U.S. or admits OCM NJ is a distribution hub. As a result, there is no context to alternatively interpret the plain language—"the sales into New Jersey"—as referring to the distribution of the Accused Products into New Jersey before they could be sold elsewhere. Even if this alternative interpretation is correct, it would only suggest less than 4% of the Accused Products were sold to New Jersey customers, which could only weaken Snack's position that a substantial portion of the events giving rise to its claims occurred in New Jersey. Third, the Court need not entertain Snack's argument that its New Jersey common law claims focus on Defendants' accused activities in New Jersey. In the Complaint, Snack "realleges and incorporates by reference all prior allegations as though fully set forth herein" for its two common law **[*14]** claims under Counts 3 and 4, without presenting any factual allegations specific to the two claims. (ECF No. 1 ¶¶ 57-60.) In other words, Snack's common law claims arose out of the same operative facts with those for its Lanham Act claims under Counts 1 and 2. Therefore, under the doctrine of pendent venue,[4] any court with proper venue over Snack's federal Lanham Act claims may exercise pendent venue over its common law claims.

Nevertheless, the Court finds the District of New Jersey is a proper venue here. In *Tefal*,[5] the court found New Jersey to be a proper venue in a trademark infringement case, based on a reasonable inference that the defendants, who were California entities, had "sold substantial dollar amounts of the allegedly infringing products in New Jersey," when "New Jersey sales by [the defendants] under the contested trademark accounted for about 5

---

[4] ***HN5***[↑] "Although venue must generally be established for each cause of action asserted in the complaint, there is an exception 'where claims arise out of the same operative facts.'" *Neopart Transit, LLC v. Mgmt. Consulting, Inc., Civ. A. No. 16-3103, 2017 U.S. Dist. LEXIS 25255, at *20-21 (E.D. Pa. Feb. 23, 2017)* (quoting *Phila. Musical Soc., Loc. 77 v. Am. Fed'n of Musicians of U.S. & Canada, 812 F. Supp. 509, 517 n.3 (E.D. Pa. 1992)*). "This doctrine, known as pendent venue, allows venue to be sustained over a federal claim even if venue over pendent state law claims would not be proper." *Id. at *21* (citing *High River Ltd. P'ship v. Mylan Labs., Inc., 353 F. Supp. 2d 487, 493 (M.D. Pa. 2005)*); *see also* *CIBC World Mkts., Inc. v. Deutsche Bank Sec., Inc., 309 F. Supp. 2d 637, 649 (D.N.J. 2004)* ("[W]hen venue is proper on federal claims, it is also proper on pendent state claims." (citing *Travis v. Anthes Imperial Ltd., 473 F.2d 515, 529 (8th Cir. 1973)*)). "The doctrine of pendent venue borrows largely from the principles of supplemental jurisdiction." *High River, 353 F. Supp. 2d at 493* (citations omitted). Because all of Snack's claims arose out of the same operative facts, the pendent venue doctrine is triggered.

[5] "Although *Tefal* was decided under an earlier version of *28 U.S.C. § 1391(b)(2)* which provided that venue was proper in 'the judicial district . . . in which the claim arose,' instead of the current version, which analyzes where 'a substantial part of the events . . . occurred,' the *Tefal* court analyzed where the claim arose by determining whether the defendant did 'substantial business in products which allegedly infringe plaintiff's products' in that district." *Spectathlete P'ship v. Rhubarb Sports, Civ. A. No. 93-4294, 1993 U.S. Dist. LEXIS 19191, at *7 n.3 (E.D. Pa. Dec. 14, 1993)* (quoting *Tefal, 529 F.2d at 497*). Therefore, *Tefal* "remains valid precedent even after the 1990 amendments to the statute." *Id.*

per cent of [the defendants'] total national sales." 529 F.2d at 496. Even though the *Tefal* defendants "emphasize[d] that a far greater percentage of [their] business in the relevant articles was conducted in California than in New Jersey during the pertinent period," the court found "it not unreasonable to infer that [the defendants] **[*15]** sold substantial dollar amounts of the allegedly infringing products in New Jersey." *Id.* The *Tefal* court explained this was because, "[w]hile the value of sales of the critical products in New Jersey and California [wa]s given by defendants in relative terms as a percentage of national sales, there [wa]s no evidence of the actual dollar value of the sales in each state." *Id.* The factual situation here is analogous to *Tefal*: Defendants, mostly California companies and individuals, admit 4% of the total U.S. sales of the Accused Products occurred in New Jersey, without providing the actual dollar amounts of the sales in any state. As a result, the Court finds it reasonable to infer a substantial dollar amount of the Accused Products was sold in New Jersey, which allegedly led to passing off and gave rise to Snack's claims. Therefore, the District of New Jersey is a proper venue.

Even if the sales of the Accused Products in California were greater than those in New Jersey, it does not automatically make this District an improper venue. *See* *Ezaki, 2017 U.S. Dist. LEXIS 12246, at *11* ("[The defendant] certainly does not state that [its allegedly infringing] sales in New Jersey are *de minimis*—just that more product **[*16]** is sold in California. Because sales of [the defendant's] allegedly infringing product are admittedly made in New Jersey, the trademark claims, in part, arose here as well as in California." (citations omitted)). ***HN6***[] The District of New Jersey will be a proper venue as long as "a substantial part of the events or omissions giving rise to the claim" occurred in New Jersey. *28 U.S.C. § 1391(b)(2)*. "The statute does not require that a majority of the events take place in the chosen venue." *Omega Fin. Servs. v. Innovia Estates & Mortg. Corp., Civ. A. No. 07-1470, 2007 U.S. Dist. LEXIS 90125, at *10 (D.N.J. Dec. 6, 2007)* (citing *Park Inn Int'l, 105 F. Supp. 2d at 376*); *see also* *Lannett Co., Inc. v. Asherman, Civ. A. No. 13-2006, 2014 U.S. Dist. LEXIS 23501, at *12 (E.D. Pa. Feb. 24, 2014)* ("*Section 1391(b)* does not require this [c]ourt to determine the 'best' forum, or 'the forum with the most substantial events.'" (citations omitted)). "[I]f the infringement occurred in other districts as well, then venue could be proper in more than one district." *Cottman, 36 F.3d at 294* (citing *Tefal, 529 F.2d at 497*); *see also* *Superior Precast, Inc. v. Safeco Ins. Co. of Am., 71 F. Supp. 2d 438, 444 (E.D. Pa. 1999)* ("[M]ore than one federal district may be the site of substantial events or omissions and therefore more than one federal district may be a proper venue in a given case." (citations omitted)).

Accordingly, Defendants' Motion to Dismiss for improper venue is **DENIED**. Because the District of New Jersey is a proper venue, Defendants may request transfer under *§ 1404(a)*.

B. The Court Will Transfer this Action to the Central District of California

1. The [*17] Central District of California Is a Proper Transferee Venue

Defendants maintain the Central District of California is a proper transferee venue, where all Defendants are subject to personal jurisdiction: OCM Globe, OCM USA, Wang, Li, and Chai all reside in the Central District of California, and OCM NJ consents to personal jurisdiction and venue there. (ECF No. 33-1 at 13.) Defendants argue, even without OCM NJ's consent, California may exercise personal jurisdiction and venue over OCM NJ, which has purposefully directed its activities there by maintaining operations in the Los Angeles area, where a substantial part of the events giving rise to Snack's claims occurred. (ECF No. 35 at 13.) Snack insists the Central District of California is not a proper venue, because OCM NJ is a New Jersey company and its consent is irrelevant. (ECF No. 34 at 17.) The Court disagrees.

OCM Globe, OCM USA, Li, Wang, and Chai all reside in California. To determine whether this action could have been brought in the Central District of California pursuant to *§ 1391(b)(1)*, the only venue question is whether OCM

NJ also resides in California.[6] HN7[] In the venue analysis, "an entity with the capacity to sue and be sued . . . **[*18]** shall be deemed to reside, if a defendant, in any judicial district in which such defendant is subject to the court's personal jurisdiction with respect to the civil action in question." 28 U.S.C. § 1391(c)(2). Because "personal jurisdiction is waivable, and based on Defendants' motion . . . to transfer this action, ... it is apparent that [OCM NJ] consents to the exercise of personal jurisdiction over [it] in" the Central District of California. *Real Estate Sols. Today LLC v. Scifo, Civ. A. No. 20-4512, 2021 U.S. Dist. LEXIS 25328, at *20 n.6 (D.N.J. Feb. 10, 2021)*. Therefore, OCM NJ's consent makes it subject to personal jurisdiction in the Central District of California, where it is deemed to reside for venue purposes. Consequently, the Central District of California is a proper venue for OCM NJ under § 1391(b)(1). *See* *Toll Glob. Forwarding Scs United States v. Curtis Int'l, Civ. A. No. 20-5753, 2021 U.S. Dist. LEXIS 86410, at *4 (D.N.J. Jan. 5, 2021)* ("Defendant . . . consented to this [c]ourt's jurisdiction. Venue in New Jersey is thus proper under 28 U.S.C. § 1391(b)(1)." (citations omitted)); *see also* *Hamm v. Wyndham Resort Dev. Corp., Civ. A. No. 19-426, 2020 U.S. Dist. LEXIS 188027, at *18 (M.D. Tenn. Oct. 9, 2020)* ("Section 1391(c)(2) means that [the defendant], by failing to object to personal jurisdiction and thus consenting to this court's exercise of personal jurisdiction, is deemed to 'reside' in this district for purposes of § 1391(b)(1). As a result, venue in this district is proper under the statute."); *Discovery Pier Land Holdings, LLC v. Visioneering Envision.Design.Build, Inc., Civ. A. No. 14-2073, 2015 U.S. Dist. LEXIS 43497, at *3 (E.D. Mo. Apr. 2, 2015)* ("[T]he action could have been brought in the Central District of California, because the parties consented **[*19]** to jurisdiction there and venue is proper there." (citing 28 U.S.C. § 1391(b)(1))).

Accordingly, the Central District of California is a proper transferee venue. The next question is whether the private and public interest factors as set forth in *Jumara* favor transfer.

2. Private Interest Factors Favor Transfer

a. Plaintiff's Forum Preference

Defendants maintain New Jersey is a foreign forum to Snack, whose choice of forum is therefore entitled to less deference. (ECF No. 33-1 at 15.) Snack counters it is not a foreign company here, because it is in the same NY-NJ-PA metropolitan area with this Court and OCM NJ, which is a New Jersey company it competes with. (ECF No. 34 at 17.) Snack explains it filed the action in this District because: (1) most of its business is generated from the NY-NJ-PA metropolitan area; and (2) its claims mainly arose from Defendants' sales of the Accused Products on the East Coast conducted through OCM NJ. (*Id.*) The Court disagrees.

HN9[] "In the Third Circuit, a plaintiff's choice of forum is a 'paramount concern' in deciding a motion to transfer venue." *Wm. H. McGee & Co. v. United Arab Shipping Co., 6 F. Supp. 2d 283, 289 (D.N.J. 1997)*. "The choice is 'entitled to greater deference' when a plaintiff chooses its home forum." *Id.* (citations omitted). In contrast, "a plaintiff's **[*20]** choice of forum is afforded less deference . . . when the plaintiff has chosen a foreign forum." *Id. at 290* (citations omitted); *see also Tischio v. Bontex, Inc., 16 F. Supp. 2d 511, 521 (D.N.J. 1998)* ("One situation where deference [to the plaintiff's forum preference] is curbed is where the plaintiff has not chosen his or her home forum." (citations omitted)). "[T]he issue of how much deference should be afforded a foreign plaintiff in her choice of forum is simply a matter of convenience." *Nieminen v. Breeze-Eastern, Div. of Transtechnology Corp., 736 F. Supp. 580, 583-84 (D.N.J. 1990)*. "In other words, if the plaintiff demonstrates that her choice of a foreign forum as based on convenience, the reluctance to grant full deference to plaintiff's choice may be overcome." *Id. at 584* (citing *Lony v. E.I. DuPont de Nemours & Co., 886 F.2d 628, 634 (3d Cir. 1989)*); *see also* *Windt v. Qwest Communs. Int'l, Inc., 529 F.3d 183, 190 (3d Cir. 2008)* ("Foreign plaintiffs . . . may bolster the amount of deference due their choice by making a strong showing of convenience." (citing *Lony, 886 F.2d at 634*)).

---

[6] HN8[] OCM may reside in both New Jersey and California, because "a corporation may 'reside' in more than one state." *Great W. Mining & Mineral Co. v. ADR Options, Inc., 434 F. App'x 83, 87 (3d Cir. 2011)* (citing 28 U.S.C. § 1404(a)).

Snack, which is incorporated and has its principal place of business in New York, is a foreign company here. Snack cites no legal authority supporting its argument that a company, which is based outside New Jersey, is not a foreign company in this District due to its geographical proximity with New Jersey. Snack's argument is therefore not entitled to the Court's consideration. *See* *Hilburn v. State Dep't of Corr., Civ. A. No. 07-6064, 2012 U.S. Dist. LEXIS 106536, at *91 (D.N.J. July 31, 2012)* ("The absence of authority is fatal to [d]efendant's **[*21]** argument."). As a result, Snack's forum preference is entitled to less deference.

In addition, Snack fails to show its choice of filing this action in New Jersey, as opposed to New York, was based on convenience considerations. First, even though Snack operates in the same NY-NJ-PA metropolitan area with this Court and OCM NJ, it does not suggest New Jersey is a more convenient forum than New York. After all, Snack resides in New York and is not shown to have more competition or business in New Jersey than New York. Second, as explained in Part III.A, *supra*, Snack's claims did not arise from OCM NJ's alleged role as a distribution hub for the Accused Products on the East Coast, which should not represent a significant convenience consideration for Snack. Instead, Snack's claims arose from the alleged passing off when the Accused Products were sold across the U.S., a major portion of which occurred in California. Third, even if Snack intends to obtain evidence from OCM NJ, Snack does not show it would be inconvenient to do so if this action is filed in its home forum in New York.

Accordingly, the first factor only slightly disfavors transfer.

b. Defendant's Forum Preference

The factor for **[*22]** the defendant's preference favors transfer, because Defendants seek to transfer this case to the Central District of California. Here, this factor should be given more weight, because less deference is afforded to Snack's choice of forum. *Virag, S.R.L. v. Sony Comput. Entm't Am. LLC, Civ. A. No. 14-4786, 2015 U.S. Dist. LEXIS 39910, at *16 (D.N.J. Mar. 30, 2015)* ("[B]ecause ***HN10***[] less deference is afforded to [p]laintiff's choice of forum, [d]efendant's choice of forum should be given more weight." (quoting *N. Am. Dental Wholesalers, Inc. v. Danaher Corp., Civ. A. No. 11-247, 2011 U.S. Dist. LEXIS 91140, at *12 (E.D. Pa. Aug. 15, 2011)*)).

c. Whether the Claim Arose Elsewhere

Snack maintains its New Jersey common law claims arose from New Jersey, because they focus on Defendants' accused activities within this District and conducted through OCM NJ. (ECF No. 34 at 18.) Snack asserts its Lanham Act claims also primarily arose from New Jersey, because: (1) Defendants used OCM NJ as an infringement focal point to distribute the Accused Products on the East Coast; and (2) Snack's main concern is Defendants' accused activities conducted through OCM NJ, as its sales on the East Coast account for more than 80% of its total sales. (*Id.*) Defendants contend California is the locus of their accused activities, because: (1) the Accused Products were manufactured in China and imported to California, and then distributed throughout the U.S. from California; **[*23]** (2) only a fraction of products distributed throughout the U.S. ended up in New Jersey, whereas about a half in California; and (3) the sales and distribution decisions regarding the Accused Products were made in California. (ECF No. 33-1 at 17-18.) The Court agrees.

HN11[] "The third factor, where the claims arose, is the most critical to the Court's analysis." *Metro. Life Ins. Co. v. Bank One, N.A., Civ. A. Nos. 03-1882, 03-2784, 2012 U.S. Dist. LEXIS 137119, at *16 (D.N.J. Sept. 25, 2012)*. Its inquiry "involves a consideration of which forum constitutes the center of gravity of the dispute, its events, and transactions." *Rosen v. Lieberman, Civ. A. No. 16-7341, 2018 U.S. Dist. LEXIS 181005, at *12 (D.N.J. Oct. 18, 2018)* (citations and internal quotation marks omitted). The third factor "weighs in favor of transfer to the [forum] where the majority part of events and omissions from which [p]laintiff's claims arise, took place." *Hassett v. Beam Suntory, Inc., Civ. A. No. 19-8364, 2019 U.S. Dist. LEXIS 217406, at *11 (D.N.J. Dec. 18, 2019)*; *see also* *In re Amkor Tech., Inc. Sec. Litig., Civ. A. No. 06-298, 2006 U.S. Dist. LEXIS 93931, at *15 (E.D. Pa. Dec. 28, 2006)* ("Typically the most appropriate venue is where a majority of events giving rise to the claim arose." (citing *Siegel v. Homestore, Inc., 255 F. Supp. 2d 451, 456 (E.D. Pa. 2003)*)). "[U]nder *§ 1404(a)*, courts must select 'the most appropriate venue,' which 'is where a majority of events giving rise to the claim arose' and where the 'center of gravity' is." *Tang v. Eastman Kodak Co., Civ. A. No. 20-10462, 2021 U.S. Dist. LEXIS 100395, at *17 n.8 (D.N.J. May 27, 2021)* (citations omitted).

As discussed in Part III.A, *supra*, the events giving rise to Snack's claims are the passing off that may have occurred when the Accused Products were sold. Because nearly half of the **[*24]** U.S. sales of the Accused Products occurred in California, while only 4% occurred in New Jersey, the majority (or close to majority) of the events giving rise to Snack's claims arose from California. Transfer is therefore favored. *C.f.* *Ezaki, 2017 U.S. Dist. LEXIS 12246, at *11-13* (finding that the third factor was neutral in a trademark infringement case where the defendant sought to transfer the case from New Jersey to California, in part because the defendant only stated it "s[old] hundreds of thousands more [allegedly infringing] products in California than in New Jersey" and "provide[d] no overall sales figures that might put [the defendant's] statement into context").

Moreover, the parties' locations suggest transfer is favored. The only party that is based in New Jersey is OCM NJ, whose alleged role as a distribution hub does not indicate where Snack's claims arose. All the other Defendants are based in California, and Snack is based in New York. Therefore, even if New Jersey has any meaningful connection to this action other than being one of many states in which the alleged infringement occurs, such a connection is much weaker than that for California. *C.f. Ezaki, 2017 U.S. Dist. LEXIS 12246, at *12* (finding that the third factor was neutral, though both parties' **[*25]** "headquarters [we]re located" in the proposed transferee forum of California, because "both parties also ha[d] significant connections to" New Jersey, where the plaintiff "maintain[ed] an office and employees" and where the defendant "[wa]s incorporated . . . and ha[d] at least one employee," so that the case "d[id] not present a situation in which the forum state ha[d] no meaningful connection to the litigation other than being one of many states in which the alleged infringement occur[red]" (citations omitted)).

Finally, the Court need not entertain Snack's argument that its New Jersey common law claims focus on Defendants' accused activities in New Jersey. As discussed in Part III.A, *supra*, Snack's claims all arise from the operative facts. As a result, no separate transfer analysis for Snack's common law claims is needed. *See* *Cigna Corp. v. Celgene Corp., Civ. A. No. 21-90, 2021 U.S. Dist. LEXIS 97590, at *14-15 (E.D. Pa. May 24, 2021)* (finding that the court's "analysis of the public and private *Jumara* factors for the federal antitrust claims [wa]s also applicable for the state claims and weigh[ed] in favor of transfer," when "all the federal ***antitrust law*** claims against [defendants] [we]re properly venued in both [transferor and transferee districts], and the remaining state law claims **[*26]** . . . all ar[o]se out of the same operative facts"); *McKinney v. Pinter, Civ. A. No. 18-4185, 2019 U.S. Dist. LEXIS 30715, at *11, 15 (E.D. Pa. Feb. 26, 2019)* (finding that "the third private interest factor[] strongly favor[ed] transfer because the claims arose primarily in Alabama," when the plaintiff asserted a federal law claim and several "appended [Pennsylvania] state law claims" that "ar[o]se out of the same operative facts," without considering whether the events giving rise to the plaintiff's state law claims primarily occurred in Pennsylvania).

Accordingly, the third factor favors transfer.

d. Convenience of the Parties

Defendants state it would be inconvenient for them to keep the case in this District, because all Defendants except OCM NJ reside in California. (ECF No. 33-1 at 15-18.) Snack counters it is equally inconvenient, if not more inconvenient, for Snack to litigate this case in California, where Snack has little business with the coconut juice products and no witness or documents on its side. (ECF No. 34 at 18.) Snack suggests New Jersey is not a rather inconvenient forum for Defendants, who voluntarily choose to do business in New Jersey by setting up OCM NJ as a distribution hub. (*Id.*)

HN12[] The fourth factor requires the court to examine "the convenience of the parties as **[*27]** indicated by their relative physical and financial condition." *Partners of Mass., LLC v. Fantasia, Civ. A. No. 15-7960, 2016 U.S. Dist. LEXIS 179898, at *22 (D.N.J. Dec. 28, 2016)* (citing *Jumara, 55 F.3d at 879*); *see also* *Gourmet Video, Inc. v. Alpha Blue Archives, Inc., Civ. A. No. 08-2158, 2008 U.S. Dist. LEXIS 87645, at *22 (D.N.J. Oct. 29, 2008)* (finding that "convenience of the parties d[id] not strongly favor transfer to a California forum," when "defendants ha[d] not shown any physical or financial limitations to their ability to litigate the action in New Jersey" (citations omitted)).

> While courts in this District have found that a large financial disparity between parties will sometimes sway this factor either in favor of transfer or against it, that typically occurs in scenarios where one party is a large company or conglomerate, the other is an individual or a small business, and the financial disparity is extreme.

*Hytera Communs. Corp. v. Motorola Sols., Inc., Civ. A. No. 17-12445, 2018 U.S. Dist. LEXIS 207162, at *25-26 (D.N.J. Dec. 6, 2018)* (citing *Goldstein v. MGM Grand Hotel & Casino, Civ. A. No. 15-4173, 2015 U.S. Dist. LEXIS 150982, 2015 WL 9918414, at *3 (D.N.J. Nov. 5, 2015)*). "If the transfer would merely switch the inconvenience from the defendant to plaintiff, the transfer should not be allowed." *NPR, Inc. v. Am. Int'l Ins. Co., Civ. A. No. 00-242, 2001 U.S. Dist. LEXIS 3463, at *14-15 (D.N.J. Mar. 28, 2001)* (citations omitted).

Here, all Defendants except OCM NJ are based in California. For them, traveling to New Jersey to litigate is just as inconvenient as requiring Snack, a New York company, to litigate in California. Also, neither party points to any physical or financial difficulties that may limit its ability to sue in a distant forum. Instead, the parties both represent companies that **[*28]** conduct businesses across the U.S. This is not a case between an individual and a large company where the financial disparity is evident. Accordingly, the fourth factor is neutral.

e. Convenience of the Witnesses

Defendants assert the management of all the OCM Parties is done from the Los Angeles area headquarters. (ECF No. 33-1 at 16.) Defendants indicate the witnesses with knowledge about Defendants' accused activities, if further identified, are likely to be in the Los Angeles area and can be compelled to attend trials in the Central District of California. (*Id.* at 16, 19.) In particular, Defendants state Li, who handles the communication with the Chinese supplier of the Accused Products and could provide relevant evidence, resides in the Los Angeles area, where Li would be available to attend trials. (*Id.*) Snack maintains OCM NJ must have employees in New Jersey, and these employees can testify in this District about OCM NJ's allegedly infringing activities. (ECF No. 34 at 19.)

HN13[] The fifth factor must be considered "only to the extent that the witnesses may actually be unavailable for trial in one of the fora." *Danka, 21 F. Supp. 2d at 474* (citing *Jumara, 55 F.3d at 879*). Here, neither party has identified any witness that would actually **[*29]** be unavailable for trials in either forum.

First, it is irrelevant that Defendants identify Li as a witness that may be out of this Court's subpoena power. Li is a party here and therefore should not be considered for the fifth factor analysis, whose "focus should be on non-party witnesses and their relative importance." *Navetta v. KIS Career Sch., Inc., Civ. A. No. 14-5724, 2016 U.S. Dist. LEXIS 59113, at *11 (E.D. Pa. May 4, 2016)* (citations omitted); *see also* *Morrison v. Lindsey Lawn & Garden, Inc., Civ. A. No. 13-1467, 2014 U.S. Dist. LEXIS 27150, at *13 (E.D. Pa. Mar. 4, 2014)* ("The burden is on the defendant to identify specific nonparty witnesses who may be unavailable for trial, and to demonstrate why those witnesses would find it more convenient to testify in another forum." (citations omitted)); *Tessera, Inc. v. Sony Elecs. Inc., Civ. A. No. 10-838, 2012 U.S. Dist. LEXIS 46324, at *23 n.7 (D. Del. Mar. 30, 2012)* ("[T]he only relevant witnesses for this [fifth factor] analysis are non-party witnesses outside the [c]ourt's subpoena power.").

Second, the Court should not consider the convenience of Li, an employee of OCM USA, and the employees of OCM NJ (if any) that Snack intends to call. After all, "the convenience of witnesses [who] are employees of a party carries no weight because the parties are obligated to procure their attendance at trial." *Liggett, 102 F. Supp. 2d at 534 n.19* (quoting *Mentor Graphics Corp. v. Quickturn Design Sys., 77 F. Supp. 2d 505, 510 (D. Del. 1999)*). "In any event, these employee witnesses are already taken into account in an analysis of the 'convenience of the parties' private interest *Jumara* factor." *Papst Licensing GmbH & CO. KG v. Lattice Semiconductor Corp., 126 F. Supp. 3d 430, 442 n.6 (D. Del. 2015)*.

Third, **[*30]** the parties do not provide any specific information on the identity and the potential testimonies of the non-party witnesses that they intend to call. This is insufficient to argue for or against transfer under the fifth factor. *See* *Szabo v. CSX Transp., Inc., Civ. A. No. 05-4390, 2006 U.S. Dist. LEXIS 3862, at *5 (E.D. Pa. Feb. 1, 2006)*

("HN14[] When arguing for transfer on the basis of witness availability at trial and witness convenience, movant has the responsibility to specify clearly the key witnesses to be called." (quoting Coble v. Conrail, Civ. A. No. 92-2386, 1992 U.S. Dist. LEXIS 12761, at *5-6 (E.D. Pa. Aug. 24, 1992))); Affymetrix, Inc. v. Synteni, Inc., 28 F. Supp. 2d 192, 205 (D. Del. 1998) ("Given the complete lack of specificity with which these witnesses were identified and the absence of 'adequate information with respect to the content and materiality' of their testimony, the [c]ourt has no other choice but to discount them in its weighing test [for the fifth factor]." (citations omitted)); Lucent Techs. v. Aspect Telcoms. Corp., Civ. A. No. 97-1618, 1997 U.S. Dist. LEXIS 12811, at *18 (E.D. Pa. Aug. 20, 1997) (finding that the fifth factor was neutral, because the defendant "fail[ed] to meet its heightened burden under § 1404 by not identifying with particularity the unavailability and materiality of specific witnesses," and the plaintiff's "assertions concerning the relevance of [its] witnesses fail[ed] in the same respects as [the defendant's]").

Because "neither party is able to identify any witness who would be unavailable for trial in either district, the court **[*31]** must find that this factor is neutral." Navetta, 2016 U.S. Dist. LEXIS 59113, at *11; *see also* Dynamic Data Techs., LLC v. Amlogic Holdings, Ltd., Civ. A. No. 19-1239, 2020 U.S. Dist. LEXIS 68756, at *7 (D. Del. Apr. 20, 2020) ("Because no record evidence demonstrates that necessary witnesses will refuse to appear in [the transferor forum] for trial without a subpoena, the convenience of the witnesses factor is neutral."); Morrison, 2014 U.S. Dist. LEXIS 27150, at *14 ("Because neither party has identified any nonparty witnesses who would be unavailable for trial in either forum, this factor does not weigh in favor of transfer.").

f. Locations of Relevant Books and Records

Defendants argue the records related to the importation of the Accused Products from China to the U.S. and Defendants' first sale doctrine defense are in the Central District of California, where OCM Globe and OCM USA are headquartered. (ECF No. 33-1 at 16, 19.) Snack counters the relevant records can be easily moved electronically to different venues, and Defendants fail to give any reason why these records cannot be produced in New Jersey. (ECF No. 34 at 19.) The Court agrees.

HN15[] The sixth factor is only relevant "to the extent that the files could not be produced in the alternative forum." Danka, 21 F. Supp. 2d at 474 (citing Jumara, 55 F.3d at 879). "[W]hen documents can be transported and/or easily photocopied, their location is entitled to little weight." Santi v. Nat'l Bus. Records Mgmt., LLC, 722 F. Supp. 2d 602, 608 (D.N.J. 2010) (quoting Clark v. Burger King Corp., 255 F. Supp. 2d 334, 339 (D.N.J. 2003)). "[T]he technological **[*32]** advances of recent years have significantly reduced the weight of [this factor] in the balance of convenience analysis." Fantasia, 2016 U.S. Dist. LEXIS 179898, at *24 (quoting Lomanno v. Black, 285 F. Supp. 2d 637, 647 (E.D. Pa. 2003)). Here, neither party has "indicated that relevant books and records will not be available in New Jersey," id. at *23 (finding the sixth factor neutral), or "suggested that the transportation, if necessary, of the relevant documents to either forum would be unduly burdensome or expensive." Uwajimaya, 2012 U.S. Dist. LEXIS 116261, at *19 (finding the sixth factor neutral). Therefore, this factor is neutral.

Accordingly, among the six private interest factors, the first factor slightly disfavors transfer, the second and the third factors favor transfer, and the other three factors are neutral. As a result, the private interest factors weigh in favor of transfer.

3. Public Interest Factors Favor Transfer

a. Enforceability of the Judgment

Snack maintains the enforceability of the judgment factor is neutral, because the judgment rendered here in one forum would be enforceable in the other. (ECF No. 34 at 19.) The Court does not discern, and Defendants do not provide, any reason why a judgment of this case may be unenforceable in New Jersey or California. This factor is therefore neutral.

b. Practical Considerations

Snack **[*33]** contends the practical considerations regarding coordinating schedule and traveling arrangements for the witnesses weigh against transfer, because many non-party witnesses are located in the NY-NJ metropolitan area. (ECF No. 34 at 20.) The Court disagrees.

HN16[] "[P]otential delays caused by witnesses needing to travel may be considered" for the practice consideration inquiry. *Kane v. Ollie's Bargain Outlet Holdings, Inc., Civ. A. No. 18-3475, 2018 U.S. Dist. LEXIS 199168, at *14 (D.N.J. Nov. 26, 2018)*. "[T]he likelihood that parties, documents, and witnesses will have to be transported from one forum to another regardless of where this case is litigated means that 'practical considerations that could make the trial easy, expeditious, or inexpensive' do not favor either forum." *Yocham v. Novartis Pharms. Corp., 565 F. Supp. 2d 554, 559 (D.N.J. 2008)* (citing *Jumara, 55 F.3d at 879*); *see also* *Gourmet, 2008 U.S. Dist. LEXIS 87645, at *24* ("Practical considerations . . . do not favor either forum because both parties have witnesses and records located in their home states."). Here, the parties, the potential witnesses, and the relevant documents are located in New Jersey, New York, and California. There is a likelihood that the parties, witnesses, and documents will need to be transferred from one forum to another regardless of where this case is litigated. Therefore, this factor is neutral.

c. Court Congestion and Administrative Difficulty

Neither party **[*34]** has addressed this factor. However, "***HN17***[] [r]egarding the administrative difficulties associated with proceeding in either District, the Court is required to evaluate this factor in light of the relative docket congestion of the fora." *Hytera Communs. Corp. v. Motorola Sols., Inc., Civ. A. No. 17-12445, 2018 U.S. Dist. LEXIS 207162, at *33 (D.N.J. Dec. 6, 2018)*. The most recent federal court management statistics shows the civil cases in the District New Jersey have a longer median time (10.1 months) from filing to disposition than those in the Central District of California (4.8 months).[7] This suggests the District of New Jersey is experiencing a higher level of court congestion, which favors transfer.

HN18[] On the other hand, transfer is favored when the transferee court experiences a lower level of judicial emergency. *See* *Mehta v. Angell Energy, Civ. A. No. 18-2319, 2019 U.S. Dist. LEXIS 171612, at *23-24 (D.N.J. Sept. 30, 2019)* (finding that the analysis of "the relative administrative difficulty weigh[ed] heavily in favor of transfer," because "the District of New Jersey [wa]s . . . experiencing a judicial emergency and lack[ed] six District Judges," while "[t]he District of Minnesota, on the other hand, ha[d] a full complement of District Judges"). The most recent federal court management statistics shows: the District of New Jersey lacks four District Judges, and nominations have been made for two of the four **[*35]** vacancies; the Central District of California lacks six District Judges, and no nomination has been made for any vacancy.[8] Therefore, the Central District of California is experiencing a greater level of judicial emergency, which disfavors transfer.

On balance, the third factor is neutral.

d. Local Interest in Deciding Local Controversies

Defendants argue, because the locus of their accused conducts is in California, it is in the local interest of the California public, not the New Jersey public, to have such matters decided in California. (ECF No. 33-1 at 19-20.)

---

[7] National Judicial Caseload Profile, United States Courts, (Mar. 2021), *available at*: https://www.uscourts.gov/sites/default/files/data_tables/fcms_na_distprofile0331.2020.pdf.

[8] Current Judicial Vacancies, United States Courts, (Aug. 3, 2021), *available at* https://www.uscourts.gov/judges-judicial-vacancies/current-judicial-vacancies.

Snack maintains the District of New Jersey has an interest in deciding this case, which involves a New Jersey company OCM NJ used as a focal point for the alleged trademark infringement activities. (ECF No. 34 at 20.) The Court disagrees.

As discussed in Parts III.A and Part III.B.2.c, *supra*, a much greater proportion of the events giving rise to Snack's claims occurred in California than New Jersey. Therefore, California has a stronger local interest in adjudicating this case. *See DGVault, LLC v. Dunne, Civ. A. No. 18-14152, 2020 U.S. Dist. LEXIS 1320, at *18 (D.N.J. Jan. 6, 2020)* ("[T]he majority of the events and omissions giving rise to the claims at issue occurred in Florida, not New Jersey. Accordingly, Florida **[*36]** has a stronger local interest than New Jersey in adjudicating this matter." (citing *Hoffer v. Infospace.com, Inc., 102 F. Supp. 2d 556, 576 (D.N.J. 2000)*)); *Jackson v. Equifax Info. Servs., LLC, No. 14-15, 2014 U.S. Dist. LEXIS 25877, at *11 (M.D. Pa. Feb. 28, 2014)* ("[T]he local interest factor weighs in favor of transfer to the Northern District of Georgia because . . . most of the conduct giving rise to [the plaintiff's] claim occurred in that district."). Accordingly, the fourth factor favors transfer.

e. Public Policies of the Fora

The Court does not discern, and the parties do not assert, any differences in the applicable public policies regarding trademark infringement or unfair competition between New Jersey and California. Therefore, this factor is neutral.

f. Trial Judge's Familiarity with Applicable State Laws

Snack argues two of its claims are based on New Jersey common law, with which New Jersey judges would have better familiarity. (ECF No. 34 at 20.) The Court finds Snack's argument irrelevant.

HN19[] "The focus of this factor is whether judges in one of the districts would have greater familiarity with the applicable state law, particularly in diversity cases." *Rosen, 2018 U.S. Dist. LEXIS 181005, at *26* (citing *Jumara, 55 F.3d at 879*). Here, a judge's familiarity with the applicable state laws is irrelevant, because Snack's state law claims need no separate analysis on the merits. ***HN20***[] "[T]he elements for a claim for trademark **[*37]** infringement under the Lanham Act are the same as the elements for a claim of unfair competition under the Lanham Act and for claims of trademark infringement and unfair competition under New Jersey statutory and common law." *J&J Snack Foods Corp. v. The Earthgrains Co., 220 F. Supp. 2d 358, 374 (D.N.J. 2002)*; *see also Buying for the Home, LLC v. Humble Abode, LLC, 459 F. Supp. 2d 310, 317 (D.N.J. 2006)* ("[T]he elements of a claim of unfair competition under the Lanham Act are the same as for claims of unfair competition and trademark infringement under New Jersey statutory and common law." (citations omitted)). "As a result, the [c]ourt need not conduct any separate inquiry into the state and/or common law requirements, and the [c]ourt's Lanham Act analysis extends . . . the analog state and common law claims." *Smart Vent Prods. v. Crawl Space Door Sys., Civ. A. No. 13-5691, 2016 U.S. Dist. LEXIS 108052, at *18 n.10 (D.N.J. Aug. 15, 2016)* (citing *Smart Vent, Inc. v. USA Floodair Vents, Ltd., 193 F. Supp. 3d 395, 424 n.43 (D.N.J. 2016)*); *see also Smith v. Ames Dep't Stores, 988 F. Supp. 827, 833 n.5 (D.N.J. 1997)* ("Analysis under New Jersey common law for trademark infringement is the same as under *Section 43(a)* of the Lanham Act. Hence, violation of the act leads to a finding of common law infringement." (citing *FM 103.1 v. Universal Broad. of New York, 929 F. Supp. 187 (D.N.J. 1996)*)); *Birthright v. Birthright, Inc., 827 F. Supp. 1114, 1140-41 (D.N.J. 1993)* ("It is well established that the test for a common law unfair competition claim under New Jersey law is essentially the same as under the federal Lanham Act. Accordingly, a separate analysis of plaintiff's common law claims is not required." (citations omitted)). Therefore, the sixth factor is neutral.

Accordingly, among the **[*38]** six public interest factors, the fourth factor favors transfer and the other five factors are neutral, which means the public interest factors favor transfer. Because the private interest factors also favor transfer, Defendants' Motion to Transfer Venue pursuant to *28 U.S.C § 1404(a)* is **GRANTED**.

The Court need not determine whether it has personal jurisdiction over Li in reaching this decision. *Harris v. City of Wilmington, Civ. A. No. 10-1899, 2011 U.S. Dist. LEXIS 2135, at *15 (D.N.J. Jan. 7, 2011)* (***HN21***[] "[T]ransfer under *Section 1404(a)* or *1406(a)* is permitted despite lack of personal jurisdiction over defendants." (citing

Lomanno, 285 F. Supp. 2d at 640)); *Allegheny Techs., Inc. v. Strecker, Civ. A. No. 06-666, 2007 U.S. Dist. LEXIS 98674, at *16 (E.D. Pa. Feb. 12, 2007)* ("The Third Circuit has held that *§ 1404(a)* is an appropriate authority for discretionary transfer where venue is proper, even if the forum [c]ourt lacks personal jurisdiction." (citing *United States v. Berkowitz, 328 F.2d 358 (3d Cir. 1964)*)). "To the extent that there are any doubts about whether the Court lacks personal jurisdiction" over Li, "transfer under *§ 1404(a)* fairly resolves the issue and avoids needless and costly expenditures on what is, after all, a non-merits issue." *Baby Merlin Co. v. Cribculture, LLC, Civ. A. 18-3288, 2018 U.S. Dist. LEXIS 241241, at *6 n.1 (E.D. Pa. Dec. 17, 2018)*.

IV. CONCLUSION

For the reasons set forth above, Defendants' Motion to Dismiss for improper venue is **DENIED**, Defendants' Motion to Transfer Venue is **GRANTED**, and Defendants' Motion to Dismiss for lack of personal jurisdiction and Snack's Motion for Preliminary Injunction are **DENIED as moot**. An appropriate **[*39]** order follows.

Date: September 8, 2021

/s/ Brian R. Martinotti

HON. BRIAN R. MARTINOTTI

UNITED STATES DISTRICT JUDGE

ORDER

THIS MATTER is opened to this Court by (1) a Motion to Dismiss filed by Defendants OCM Group USA, NJ, Inc. ("OCM NJ"), OCM Globe Inc. ("OCM Globe"), OCM Group USA Inc. ("OCM USA"), Gang Wang ("Wang"), Yaotian Li ("Li"), and Xiaohui Chai ("Chai") (collectively, "Defendants") seeking to dismiss Plaintiff The Snack Joint LLC's ("Snack") Complaint for lack of personal jurisdiction as to Li pursuant to *Federal Rule of Civil Procedure 12(b)(2)*; (2) Defendants' Motion to Dismiss for improper venue pursuant to *Federal Rule of Civil Procedure 12(b)(3)*; (3) Defendants' Motion to Transfer Venue to the United States District Court for the Central District of California pursuant to *28 U.S.C. § 1404(a)* (ECF No. 33); and (4) Snack's Motion for Preliminary Injunction (ECF No. 36). Having reviewed the submissions filed in connection with the motions and having declined to hold oral argument pursuant to *Federal Rule of Civil Procedure 78(b)*, for the reasons set forth in the accompanying Opinion and for good cause shown,

IT IS on this 8th day of September 2021,

ORDERED that Defendants' Motion to Dismiss for improper venue (ECF No. 33) is **DENIED**; and it is further

ORDERED that Defendants' Motion to Transfer Venue (ECF No. **[*40]** 33) is **GRANTED**; and it is further

ORDERED that Defendants' Motion to Dismiss for lack of personal jurisdiction as to Li (ECF No. 33) is **DENIED as moot**; and it is further

ORDERED that Snack's Motion for Preliminary Injunction (ECF No. 36) is **DENIED as moot**; and it is further

ORDERED that the Clerk of the Court shall mark this case **CLOSED**.

/s/ Brian R. Martinotti

HON. BRIAN R. MARTINOTTI

LexisNexis® Headnotes

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN1[] **Standing, Requirements**

Antitrust law protects competition and not competitors. Competition results in innovation and consumer satisfaction and is essential to the effective operation of a free market system. Antitrust jurisprudence also evaluates both market structure and behavior to determine whether an actor is using its place in the market to artificially restrain competition.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN2[] **Relevant Market, Product Market Definition**

Central to antitrust cases is the appropriate determination of the relevant market.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN3[] **Scope, Monopolization Offenses**

To determine the relevant market in an antitrust case, the Court must first understand the industry and the markets in that industry. This is a heavily factual inquiry.

Civil Procedure > Pleading & Practice > Motion Practice > Content & Form

HN4[] **Motion Practice, Content & Form**

Courts prefer to rule on the merits of claims rather than disregard on procedural grounds.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN5[] **Per Se Rule & Rule of Reason, Sherman Act**

In an antitrust case, whether the conduct is procompetitive depends on other factors, including timing and whether the stickiness is at least partly tied to product attractiveness which can then decrease if the products become less attractive (for instance, through higher game prices).

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN6[] **Expert Witnesses, Daubert Standard**

Fed. R. Evid. 702(b) asks whether the expert considered enough information to make the proffered opinion reliable, while Fed. R. Evid. 703 asks whether the data considered itself is of a type that is reliable.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN7[] **Attempts to Monopolize, Elements**

A threshold step in any antitrust case is to accurately define the relevant market, which refers to the area of effective competition. Monopoly power under the first element can be defined as the power to control prices or exclude competition and may be inferred from the defendant's predominant market share in the relevant market. In addition, courts usually cannot properly apply the rule of reason without an accurate definition of the relevant market. Without a relevant market definition, there is no way to measure the defendant's ability to lessen or destroy competition.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN8[] **Relevant Market, Geographic Market Definition**

In an antitrust case, the relevant market must include both a geographic market and a product market. The latter must encompass the product at issue as well as all economic substitutes for the product. Economic substitutes have a reasonable interchangeability of use or sufficient cross-elasticity of demand with the relevant product. Including economic substitutes ensures that the relevant product market encompasses the group or groups of sellers or producers who have actual or potential ability to deprive each other of significant levels of business.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN9[] **Relevant Market, Geographic Market Definition**

Interchangeability implies that one product is roughly equivalent to another for the use to which it is put: while there may be some degree of preference for the one over the other, either would work effectively.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN10[] **Relevant Market, Product Market Definition**

A plaintiff cannot ignore economic reality and arbitrarily choose the product market relevant to its claims; rather, the plaintiff must justify any proposed market by defining it with reference to the rule of reasonable interchangeability and cross-elasticity of demand. The proper market definition can be determined only after a factual inquiry into the commercial realities faced by consumers.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Evidence > Burdens of Proof > Allocation

HN11[] **Relevant Market, Product Market Definition**

In an antitrust case, it is the plaintiff's burden to establish the relevant product and geographic markets. To meet that burden, a plaintiff must produce specific evidence supporting the proposed market definition that is relevant to the particular legal issue being litigated.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN12[] **Relevant Market, Product Market Definition**

The relevant product market in an antitrust case must encompass the product at issue as well as all economic substitutes for the product. Economic substitutes have a reasonable interchangeability of use or sufficient cross-elasticity of demand with the relevant product.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN13[] Relevant Market, Product Market Definition

In limited settings the relevant product market may be narrowed beyond the boundaries of physical interchangeability and cross-price elasticity to account for identifiable submarkets or product clusters. A submarket is a small part of the general market of substitutable products and is economically distinct from the general product market. Although there are several practical indicia of an economically distinct submarket, including industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors,, they are practical aids for identifying the areas of actual or potential competition and their presence or absence does not decide automatically the submarket issue.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN14[] Per Se Rule & Rule of Reason, Per Se Violations

Determining whether a single-brand market is proper requires a factual inquiry into the commercial realities' faced by consumers. Single-brand markets are, at a minimum, extremely rare and courts have rejected such market definitions even where brand loyalty is intense. Antitrust markets consisting of just a single brand, however, are not per se prohibited.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN15[] Relevant Market, Product Market Definition

In an antitrust case, in some instances one brand of a product can constitute a separate market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN16[] Actual Monopolization, Claims

The first indicator of an aftermarket is that the market is wholly derivative from and dependent on the primary market. The second indicator is that the illegal restraints of trade and illegal monopolization relate only to the aftermarket, not to the initial market. The third indicator is that the defendant's market power "flows from its relationship with its consumers" and the defendant did "not achieve market power in the aftermarket through contractual provisions that it obtains in the initial market. The fourth indicator is that competition in the initial market does not necessarily suffice to discipline anticompetitive practices in the aftermarket.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Evidence > Inferences & Presumptions > Presumptions > Creation

HN17[] **Relevant Market, Product Market Definition**

To establish a single-brand aftermarket under Kodak and Newcal, the restriction in the aftermarket not have been sufficiently disclosed to consumers in advance to enable them to bind themselves to the restriction knowingly and voluntarily. Indeed, market imperfections may prevent consumers from discovering that purchasing a product in the initial market could restrict their freedom to shop in the aftermarket. In other words, a plaintiff must show evidence to rebut the economic presumption that defendant's consumers make a knowing choice to restrict their aftermarket options when they decide in the initial (competitive) market to purchase in the foremarket.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN18[] **Relevant Market, Geographic Market Definition**

The criteria to be used in determining the appropriate geographic market are essentially similar to those used to determine the relevant product market. A geographic market is an area of effective competition where buyers can turn for alternate sources of supply.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN19[] **Sherman Act, Claims**

As Qualcomm instructs, the similarity of the burden-shifting tests under §§ 1 and 2 of the Sherman Act means that courts often review claims under each section simultaneously. Indeed, if, in reviewing an alleged Sherman Act violation, a court finds that the conduct in question is not anticompetitive under § 1, the court need not separately analyze the conduct under § 2. That result is logical as proving an antitrust violation under § 2 of the Sherman Act is more exacting than proving a § 1 violation.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN20[] Sherman Act, Claims

Although the tests are largely similar, a plaintiff may not use indirect evidence to prove unlawful monopoly maintenance via anticompetitive conduct under § 2 of the Sherman Act.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN21[] Attempts to Monopolize, Elements

Market power and monopoly power are related but distinct concepts. As the U.S. Supreme Court has stated: market power is the ability to raise prices above those that would be charged in a competitive market. Monopoly power is the power to control prices or exclude competition.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN22[] Scope, Monopolization Offenses

Monopoly power under § 2 of the Sherman Act requires, of course, something greater than market power under § 1 of the Sherman Act. Courts have described the distinction as substantial market power or an extreme degree of market power. Courts have also required that the monopoly power be beyond fleeting or ephemeral which the Court understands to be durable and sustaining.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN23[] Attempts to Monopolize, Elements

Market share is just the starting point for assessing market power. It should not be equated with monopoly power but instead is evidence from which the existence of monopoly power may be inferred. Indeed, as the Ninth Circuit has cautioned, blind reliance upon market share, divorced from commercial reality, could give a misleading picture of a firm's actual ability to control prices or exclude competition. In other words, market share, while being perhaps the most important factor, does not alone determine the presence or absence of monopoly power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN24[] Attempts to Monopolize, Elements

The threshold of market share for finding a prima facie case of monopoly power is generally no less than 65% market share.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN25[] Sherman Act, Claims

Numerous cases hold that a market share of less than 50 percent is presumptively insufficient to establish the requisite level of market power under a § 2 of the Sherman Act claim.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN26[] Sherman Act, Claims

Section 1 of the Sherman Act claims can be satisfied with less market power.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN27[] Per Se Rule Tests, Manifestly Anticompetitive Effects

Direct evidence is evidence of the injurious exercise of market power such as evidence of restricted output and supracompetitive prices. This kind of evidence is direct proof of the injury to competition which a competitor with market power may inflict, and thus, direct proof of the actual exercise of market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Evidence > Types of Evidence > Circumstantial Evidence

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN28[] Actual Monopolization, Monopoly Power

The second and more common type of proof is circumstantial evidence pertaining to the structure of the market. To demonstrate market power indirectly, a plaintiff must: (1) define the relevant market, (2) show that the defendant owns a dominant share of that market, and (3) show that there are significant barriers to entry and show that existing competitors lack the capacity to increase their output in the short run.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN29[] Scope, Monopolization Offenses

Because a mere showing of substantial or even dominant market share alone cannot establish market power sufficient to carry out a predatory scheme, a plaintiff must show that new rivals are barred from entering the market and show that existing competitors lack the capacity to expand their output to challenge the predator's high price. Entry barriers are market characteristics that prevent new rivals from timely responding to an increase in price above the competitive level. They include additional long-run costs that were not incurred by incumbent firms but must be incurred by new entrants, or factors in the market that deter entry while permitting incumbent firms to earn monopoly returns.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN30[] Attempts to Monopolize, Elements

Supracompetitive pricing, on its own, is not direct evidence of monopoly power. Indeed, to prove monopoly power directly, supracompetitive pricing must be accompanied by restricted output. In other words, both are required to prove monopoly power directly.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN31[] Scope, Monopolization Offenses

A share between 52 and 57 percent is not high enough to sustain a prima facia case of a monopoly, but is enough to permit the Court to evaluate the state and durability of the market. This evaluation includes whether (i) new rivals are barred from entering the market (i.e., the degree of entry barriers) and (ii) whether existing competitors lack the capacity to expand their output to challenge the predator's high price. In general, entry barriers are additional long-run costs that were not incurred by incumbent firms but must be incurred by new entrants or factors in the market that deter entry while permitting incumbent firms to earn monopoly returns. Such barriers include (1) legal license requirements, (2) control of an essential or superior resource, (3) entrenched buyer preferences for established brands; (4) capital market evaluations imposing higher capital costs on new entrants; and, in some situations, (5) economies of scale.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN32[] **Sherman Act, Claims**

Section 1 of the Sherman Act prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations. 15 U.S.C.S. § 1. Section 1 is understood to outlaw only unreasonable restraints. To establish liability under § 1, a plaintiff must prove (1) the existence of an agreement, and (2) that the agreement was in unreasonable restraint of trade.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN33[] **Sherman Act, Claims**

Despite the broad language of the statute, ***antitrust law*** has developed to find that the essence of a Section 1 of the Sherman Act claim is concerted action. Express agreements' are direct evidence of concerted activity. A plaintiff need not prove intent to control prices or destroy competition to demonstrate the element of an agreement among two or more entities. Unilateral conduct by a single firm, even if it appears to restrain trade unreasonably, is not unlawful under Section 1 of the Sherman Act. Thus, in evaluating the first element, the Sherman Act distinguishes between concerted conduct and unilateral conduct and treats concerted behavior more strictly than unilateral behavior.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN34[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

With respect to the second element of § 1 of the Sherman Act, some restraints are per se unreasonable. Where they are not, they are judged under the rule of reason. The rule of reason requires courts to conduct a fact-specific assessment of market power and market structure to assess the restraint's actual effect on competition. Under this rule, the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition. Appropriate factors to consider include specific information about the relevant business and the restraint's history, nature, and effect.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN35[] **Per Se Rule & Rule of Reason, Sherman Act**

Whether the businesses involved have market power is a further, significant consideration. In its design and function the rule distinguishes between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN36[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

To determine whether a restraint violates the rule of reason, a three-step, burden shifting framework applies. Under this framework, the plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market. If the plaintiff carries its burden, then the burden shifts to the defendant to show a procompetitive rationale for the restraint. If the defendant makes this showing, then the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means. The three steps do not represent a rote checklist and are not an inflexible substitute for careful analysis. Rather, their purpose is to furnish an enquiry meet for the case, looking to the circumstances, details, and logic of a restraint.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Evidence > Types of Evidence > Circumstantial Evidence

HN37[] **Conspiracy to Monopolize, Elements**

Express agreements provide direct evidence of concerted activity.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN38[] Scope, Monopolization Offenses

The Sherman Act distinguishes between unilateral and concerted activity. Concerted activity subject to § 1 is judged more sternly than unilateral activity under § 2 because it deprives the marketplace of the independent centers of decisionmaking that competition assumes and demands. It thus warrants scrutiny even in the absence of incipient monopoly. Unilateral conduct, by contrast, may simply represent robust competition. Thus, even unreasonable unilateral restraints are not subject to antitrust scrutiny unless they pose a danger of monopolization.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN39[] Remedies, Damages

A business may set conditions for dealing unilaterally and refuse to deal with anyone who does not meet those conditions. However, where the conduct extends beyond announcing a policy and refusing to deal with non-compliant partners to coercing an agreement, the conduct falls under Section 1 of the Sherman Act.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN40[] Per Se Rule Tests, Manifestly Anticompetitive Effects

As the Court described in Amex:The rule of reason requires courts to conduct a fact-specific assessment of market power and market structure to assess the restraint's actual effect on competition. The goal is to distinguish between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest. Recognizing that the rule of reason is not a rote checklist, the Court examines the app distribution restrictions and considers their anticompetitive effects, procompetitive rationales, and less restrictive alternatives.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Evidence > Inferences & Presumptions > Presumptions > Creation

HN41[] Attempts to Monopolize, Elements

Novel business practices—especially in technology markets—should not be conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN42[] Deceptive & Unfair Trade Practices, State Regulation

A procompetitive rationale is a nonpretextual claim that defendant's conduct is indeed a form of competition on the merits because it involves, for example, greater efficiency or enhanced consumer appeal. It is not enough that conduct has the effect of reducing consumers' choices or increasing prices to consumers.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN43[] Per Se Rule Tests, Manifestly Anticompetitive Effects

In a two-sided transaction market, a court must consider procompetitive effects on both sides of the market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN44[] Exclusive & Reciprocal Dealing, Exclusive Dealing

The U.S. Supreme Court has recognized that limiting intrabrand competition can promote interbrand competition. It is this interbrand competition that the antitrust laws are designed primarily to protect.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Governments > Courts > Authority to Adjudicate

HN45[] Trade Practices & Unfair Competition, State Regulation

Generally, ***antitrust law*** does not require businesses to use anything like the least restrictive means of achieving legitimate business purposes. To the contrary, courts should not second-guess degrees of reasonable necessity so that the lawfulness of conduct turns upon judgments of degrees of efficiency.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN46[] Per Se Rule Tests, Manifestly Anticompetitive Effects

An alternative must be a significantly (not marginally) less restrictive means for achieving the same procompetitive benefits. It must be virtually as effective in serving the procompetitive purposes as current rules without significantly increased cost. Where a restraint is patently and inexplicably stricter than is necessary to accomplish the proffered procompetitive objective, an antitrust court can and should invalidate it and order it replaced with a viable less restrictive alternative.

Governments > Courts > Authority to Adjudicate

HN47[] **Courts, Authority to Adjudicate**

In evaluating remedies, no court should impose a duty that it cannot explain or adequately and reasonably supervise.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Governments > Courts > Authority to Adjudicate

HN48[] **Private Actions, Remedies**

Antitrust courts must give wide berth to business judgments before finding liability.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

HN49[] **Actual Monopolization, Claims**

Section 2 of the Sherman Act prohibits persons from monopolizing, or attempting to monopolize, or combining or conspiring with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations. 15 U.S.C.S. § 2. A claim for unlawful monopolization under Section 2 of the Sherman Act requires that a plaintiff show: (a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal antitrust injury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN50[] **Attempts to Monopolize, Elements**

Monopoly power is the power to control prices or exclude competition. A firm is a monopolist if it can profitably raise prices substantially above the competitive level, without inducing so rapid and great an expansion of output from competing firms as to make the supracompetitive price untenable.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN51[] **Sherman Act, Claims**

Section 2 of the Sherman Act monopolization claims must be judged on a market-by-market basis.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN52[] **Sherman Act, Claims**

Because the three-part burden-shifting test under the rule of reason is essentially the same under §§ 1 and 2 of the Sherman Act, and proving an antitrust violation under § 2 of the Sherman Act is more exacting than proving a § 1 violation, the analysis applies to the monopolization claims if required and fails for the same reasons.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN53[] **Tying Arrangements, Per Se Rule**

Tying involves the linking of two separate products from two separate product markets. The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN54[] **Per Se Rule & Rule of Reason, Per Se Violations**

Tying arrangements may be evaluated under § 1 of the Sherman Act under either per se or rule of reason analysis. The per se rule applies only after considerable experience with certain business relationships, shows that a restraint always or almost always tend to restrict competition and decrease output.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN55[] **Tying Arrangements, Per Se Rule**

For a tying claim to suffer per se condemnation, a plaintiff must prove: (1) that the defendant tied together the sale of two distinct products or services; (2) that the defendant possesses enough economic power in the tying product market to coerce its customers into purchasing the tied product; and (3) that the tying arrangement affects a not insubstantial volume of commerce in the tied product market.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Tying Arrangements

Evidence > Burdens of Proof > Allocation

HN56[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The first element of a tying claim requires that the plaintiff must prove that the alleged tying product and the alleged tied product are separate and distinct products.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN57[] **Relevant Market, Product Market Definition**

The answer to the question whether one or two products are involved turns not on the functional relation between them, but rather on the character of the demand for the two items. There must be sufficient demand for the purchase of the tied product separate from the tying product to identify a distinct product market in which it is efficient to offer the tied product separately from the tying product.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN58[] **Actual Monopolization, Monopoly Power**

The purchaser demand test of Jefferson Parish examines direct and indirect evidence of consumer demand for the tied product separate from the tying product. Direct evidence addresses the question whether, when given a choice, consumers purchase the tied good from the tying good maker, or from other firms. Indirect evidence includes the behavior of firms without market power in the tying good market, presumably on the notion that (competitive) supply follows demand.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN59[] **Tying Arrangements, Per Se Rule**

With respect to the second element, a tie exists where sale of the desired (tying) product is conditioned on purchase of another (tied) product. The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. A plaintiff must present evidence that the defendant went beyond persuasion and coerced or forced its customer to buy the tied product in order to obtain the tying product.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

HN60[] **Actual Monopolization, Monopoly Power**

The Supreme Court has condemned tying arrangements when the seller has the market power to force a purchaser to do something that he would not do in a competitive market. In all cases involving a tying arrangement, the plaintiff must prove that the defendant has market power in the tying product.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Tying Arrangements

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN61[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Because a tying claim cannot be sustained where the alleged good is not a separate and distinct product.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN62[] **Market Definition, Relevant Market**

Integration is common among technological products and services.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN63[] **Trade Practices & Unfair Competition, State Regulation**

The Cartwright Act makes unlawful, against public policy and void every trust, which is defined as a combination of capital, skill, or acts by two or more persons to create or carry out restrictions in trade or commerce. Cal. Bus. & Prof. Code §§ 16720(a), 16726.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN64[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

As in the context of claims under Section 1 of the Sherman Act, California courts employ the rule of reason to determine whether a restraint of trade that is not subject to per se treatment is unreasonable and, therefore, unlawful under the Cartwright Act. The rule of reason inquiry in the context of the Cartwright Act, as in the federal context, looks to whether the challenged conduct promotes or suppresses competition, based on the facts peculiar to the business in which the restraint is applied, the nature of the restraint and its effects, and the history of the restraint and the reasons for its adoption.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN65[] **Sherman Act, Claims**

As is the case with a tying claim in violation of the Sherman Act, a tying claim under the Cartwright Act requires the existence of two separate products.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Evidence > Burdens of Proof > Allocation

HN66[] **Actual Monopolization, Claims**

To establish an essential facility claim, a plaintiff must show that (i) the defendant is a monopolist in control of an essential facility; (ii) the plaintiff is unable reasonably or practically to duplicate the facility; (iii) the defendant has refused to provide the plaintiff access to the facility; and (iv) it is feasible for the defendant to provide such access.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN67[] **Standing, Requirements**

The term "essential facility" is a term of art under the antitrust laws. Caselaw describes essential facilities as those that are not capable of being replicated by competitors and serve as a conduit for the distribution of another product. While prior cases have focused only on physical infrastructures of a finite availability (such as a bridge or a power network), an essential facility can exist even in the absence of such traditional physical attributes.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

HN68[] **Actual Monopolization, Claims**

To constitute an essential facility, access to the facility or resource must be truly essential in the sense that competitors cannot simply duplicate it or find suitable alternatives, and that absent access, competitors' ability to compete will be substantially constricted.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

HN69[] **Actual Monopolization, Claims**

The essential facility doctrine does not demand an ideal or preferred standard.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN70[] **Trade Practices & Unfair Competition, State Regulation**

States have regulated against monopolies and unfair competition for longer than federal government, and federal law is intended only to supplement, not to displace, state antitrust remedies.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN71[] **Trade Practices & Unfair Competition, State Regulation**

California's Unfair Competition Law (UCL) prohibits business practices that constitute unfair competition, which is defined, in relevant part, as any unlawful, unfair or fraudulent business act or practice. Cal. Bus. & Prof. Code § 17200. Each of these descriptions provides a separate "variety" of unfair competition. Thus, a practice may be deemed unfair even if not specially proscribed by some other law and even if not violating an antitrust statute.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN72[] **Trade Practices & Unfair Competition, State Regulation**

California's Unfair Competition Law (UCL) permits claims to be brought by any person, which includes natural persons, corporations, firms, partnerships, joint stock companies, associations and other organizations of persons. Cal. Bus. & Prof. Code §§ 17201, 17204. To bring a claim under the UCL, a plaintiff must (1) establish a loss or deprivation of money or property sufficient to quantify as injury in fact, i.e., economic injury, and (2) show that the economic injury was the result of, i.e., caused by, the unfair business practice. Cal. Bus. & Prof. Code § 17204.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN73[] **Deceptive & Unfair Trade Practices, State Regulation**

The injury-in-fact requirement of California's Unfair Competition Law (UCL) incorporates standing under Article III of the United States Constitution. Accordingly, the injury in fact must be concrete and particularized and actual or imminent, not conjectural or hypothetical. In addition, the UCL requires an economic injury. For example, a plaintiff may (1) surrender in a transaction more, or acquire in a transaction less, than he or she otherwise would have; (2) have a present or future property interest diminished; (3) be deprived of money or property to which he or she has a cognizable claim; or (4) be required to enter into a transaction, costing money or property, that would otherwise have been unnecessary. Last, a plaintiff must show a causal connection between the defendant's conduct and the alleged injury.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN74[] **Deceptive & Unfair Trade Practices, State Regulation**

Generally, California's Unfair Competition Law makes a distinction between consumer and competitor suits. There is no specific third category for non-competitor business.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN75[] **State Regulation, Claims**

Under the unlawful prong of California's Unfair Competition Law, a plaintiff must show that the defendant's conduct can properly be called a business practice and that at the same time is forbidden by law. Virtually any law can serve as a predicate for an action under Cal. Bus. & Prof. Code § 17200.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN76[] **Trade Practices & Unfair Competition, State Regulation**

The unfair prong of California's Unfair Competition Law may differ for consumer and competitor suits. As a competitor who claims to have suffered injury from the defendant's unfair practices, the plaintiff must show that the defendant's conduct (1) threatens an incipient violation of an ***antitrust law***, (2) violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or (3) otherwise significantly threatens or harms competition. These findings must be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN77[] **Deceptive & Unfair Trade Practices, State Regulation**

The balancing test under California's Unfair Competition Law involves an examination of that practice's impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN78[] **Trade Practices & Unfair Competition, State Regulation**

Under the tethering test, California courts require a close nexus between the challenged act and the legislative policy. That is because courts may not apply purely subjective notions of fairness or determine the wisdom of any economic policy, which rests solely with the legislature. However, unfair practices under this test are not limited to violations of existing laws. Instead, California courts distinguish between conduct made lawful (or for which relief is barred) by a statute and conduct not prohibited by any statute. The latter may be actionable under the unfair prong.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN79[] **Conspiracy to Monopolize, State Regulation**

Cel-Tech expressly recognizes that incipient violations of antitrust laws and violations of the policy or spirit of those laws with comparable effects are prohibited.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN80[] **Trade Practices & Unfair Competition, State Regulation**

California's Unfair Competition Law has broad, sweeping language precisely to enable judicial tribunals to deal with the innumerable new schemes which the fertility of one's invention would contrive.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Torts > Business Torts > Unfair Business Practices > Remedies

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN81[] **Trade Practices & Unfair Competition, State Regulation**

A California's Unfair Competition Law action is equitable in nature. Courts have broad discretion to fashion equitable remedies to serve the needs of justice. The statute reinforces that discretion by permitting courts to make such orders or judgments as may be necessary to prevent the use or employ by any person of any practice which constitutes unfair competition. Cal. Bus. & Prof. Code § 17203.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

Constitutional Law > ... > Freedom of Speech > Commercial Speech > Misleading Speech

HN82[] **Vertical Restraints, Price Fixing**

Courts have long recognized that commercial speech, which includes price advertising, performs an indispensable role in the allocation of resources in a free enterprise system.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN83[] **Regulated Practices, Trade Practices & Unfair Competition**

Under the balancing test, the Court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim. Under this test the focus is on the injury to consumers.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Civil Procedure > Preliminary Considerations > Equity > Relief

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN84[] **Trade Practices & Unfair Competition, State Regulation**

The primary form of relief available under California's Unfair Competition Law (UCL) to protect consumers from unfair business practices is an injunction. A private party seeking injunctive relief under the UCL may request public injunctive relief, which is relief that by and large benefits the general public and that benefits the plaintiff, if at all, only incidentally and/or as a member of the general public. Federal courts must apply equitable principles derived from federal common law to claims for equitable relief under California's Unfair Competition Law. This means that, even if a state authorizes its courts to provide equitable relief when an adequate legal remedy exists, such relief may be unavailable in federal court because equitable remedies are subject to traditional equitable principles unaffected by state law.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Balance of Hardships

Trademark Law > ... > Equitable Relief > Injunctions > Permanent Injunctions

Civil Procedure > Remedies > Injunctions > Permanent Injunctions

HN85[] **Grounds for Injunctions, Balance of Hardships**

Accordingly, under Sonner, a plaintiff seeking equitable relief under the UCL in federal court must demonstrate: (1) that it has suffered an irreparable injury; (2) that remedies available at law, such as monetary damages, are inadequate to compensate for that injury; (3) that, considering the balance of hardships between the plaintiff and defendant, a remedy in equity is warranted; and (4) that the public interest would not be disserved by a permanent injunction.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Severability Clauses

Contracts Law > Defenses > Illegal Bargains

Contracts Law > Contract Interpretation > Severability

Contracts Law > Defenses > Public Policy Violations

HN86[] **Contract Conditions & Provisions, Severability Clauses**

The general rule is that the courts will deny relief to either party who has entered into an illegal contract or bargain which is against public policy. Where a contract has several distinct objects, of which one at least is lawful, and one at least is unlawful, in whole or in part, the contract is void as to the latter and valid as to the rest. Cal. Civ. Code § 1599. Thus, if the alleged illegality is collateral to the main purpose of the contract, and the illegal provision can be extirpated from the contract by means of severance or restriction, then such severance and restriction are appropriate. The burden ordinarily rests upon the party asserting the invalidity of the contract to show how and why it is unlawful.

Contracts Law > Defenses > Public Policy Violations

HN87[] **Defenses, Public Policy Violations**

In general, a contract contrary to public policy will not be enforced. A contract need not be contrary to a statute for it to be deemed contrary to public policy.

Contracts Law > Defenses > Public Policy Violations

HN88[] **Defenses, Public Policy Violations**

The authorities all agree that a contract is not void as against public policy unless it is injurious to the interests of the public as a whole or contravenes some established interest of society. California has a settled public policy in favor of open competition. It also has a public policy of protecting consumers of goods and services. Where a contract has several distinct objects, of which one at least is lawful, and one at least is unlawful, in whole or in part, the contract is void as to the latter and valid as to the rest. Cal. Civ. Code § 1599.

Commercial Law (UCC) > ... > Contract Provisions > Contract Terms > Unconscionable Terms

Contracts Law > Defenses > Unconscionability

HN89[] **Contract Terms, Unconscionable Terms**

A contract or provision, even if consistent with the reasonable expectations of the parties, will be denied enforcement if, considered in its context, it is unduly oppressive or unconscionable. Unconscionability has generally been recognized to include an absence of meaningful choice on the part of one of the parties together with contract terms which are unreasonably favorable to the other party. Phrased another way, unconscionability has both a procedural and a substantive element. Both the procedural and substantive elements must be met before a contract or term will be deemed unconscionable. Both, however, need not be present to the same degree. A sliding scale is applied so that the more substantively oppressive the contract term, the less evidence of procedural unconscionability is required to come to the conclusion that the term is unenforceable, and vice versa.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Adhesion Contracts

Contracts Law > Defenses > Unconscionability > Adhesion Contracts

HN90[] **Types of Contracts, Adhesion Contracts**

Unconscionability analysis begins with an inquiry into whether the contract is one of adhesion. The term contract of adhesion signifies a standardized contract, which, imposed and drafted by the party of superior bargaining strength, relegates to the subscribing party only the opportunity to adhere to the contract or reject it. The procedural element of the unconscionability analysis concerns the manner in which the contract was negotiated and the circumstances of the parties at that time.

Contracts Law > Defenses > Unconscionability > Adhesion Contracts

HN91[] **Unconscionability, Adhesion Contracts**

Oppression arises from an inequality of bargaining power that results in no real negotiation and an absence of meaningful choice. Surprise is defined as the extent to which the supposedly agreed-upon terms of the bargain are hidden in the prolix printed form drafted by the party seeking to enforce the disputed terms.

Contracts Law > Defenses > Unconscionability

HN92[] **Defenses, Unconscionability**

The substantive element of the unconscionability analysis focuses on overly harsh or one-sided results, or whether a contractual provision reallocates risks in an objectively unreasonable or unexpected manner, Substantive unconscionability traditionally involves contract terms that are so one-sided as to shock the conscience, or that impose harsh or oppressive terms.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Severability Clauses

Contracts Law > Contract Interpretation > Severability

HN93[] **Contract Conditions & Provisions, Severability Clauses**

In California, where a single contract provision is invalid, but the balance of the contract is lawful, the invalid provision is severed, and the balance of the contract is enforced. For example, when a contract is held to be unconscionable, the strong legislative and judicial preference is to sever the offending term and enforce the balance of the agreement. Cal. Civ. Code § 1670.5.

Contracts Law > Defenses > Unconscionability

HN94[] **Defenses, Unconscionability**

A contractual term is not unconscionable unless it is found to be both procedurally and substantively unconscionable.

Contracts Law > Defenses > Unconscionability

HN95[] Defenses, Unconscionability

A contractual term is not substantively unconscionable unless it so one-sided so as to shock the conscience.

Business & Corporate Compliance > ... > Breach > Breach of Contract Actions > Elements of Contract Claims

HN96[] Breach of Contract Actions, Elements of Contract Claims

Under California law, the elements of a cause of action for breach of contract are (1) the existence of the contract, (2) plaintiffs performance or excuse for nonperformance, (3) defendant's breach, and (4) the resulting damages to the plaintiff. To prove causation, a plaintiff must show the breach was a substantial factor in causing the damages.

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN97[] Contract Interpretation, Good Faith & Fair Dealing

The covenant of good faith and fair dealing, implied by law in every contract, exists merely to prevent one contracting party from unfairly frustrating the other party's right to receive the benefits of the agreement actually made. While a breach of the implied covenant of good faith is a breach of the contract, breach of a specific provision of the contract is not necessary to a claim for breach of the implied covenant of good faith and fair dealing.

Contracts Law > Contract Interpretation > Good Faith & Fair Dealing

HN98[] Contract Interpretation, Good Faith & Fair Dealing

In California, the factual elements necessary to establish a breach of the covenant of good faith and fair dealing are: (1) the parties entered into a contract; (2) the plaintiff fulfilled his obligations under the contract; (3) any conditions precedent to the defendant's performance occurred; (4) the defendant unfairly interfered with the plaintiff's rights to receive the benefits of the contract; and (5) the plaintiff was harmed by the defendant's conduct.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

HN99[] Types of Contracts, Covenants

In essence, the covenant is implied as a supplement to the express contractual covenants, to prevent a contracting party from engaging in conduct which (while not technically transgressing the express covenants) frustrates the other party's rights to the benefits of the contract. It exists to prevent one contracting party from unfairly frustrating the other party's right to receive the benefits of the agreement actually made.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

HN100[] Types of Contracts, Covenants

It cannot impose substantive duties or limits on the contracting parties beyond those incorporated in the specific terms of their agreement. If there exists a contractual relationship between the parties, the implied covenant is limited to assuring compliance with the express terms of the contract, and cannot be extended to create obligations not contemplated in the contract.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

HN101[] Types of Contracts, Quasi Contracts

The elements for a claim of unjust enrichment are 1 receipt of a benefit and 2 unjust retention of the benefit at the expense of another. Under California law, unjust enrichment is an action in quasi-contract, and is not cognizable when there is a valid and enforceable contract between the parties. The doctrine applies where plaintiffs, while having no enforceable contract, nonetheless have conferred a benefit on defendant which defendant has knowingly accepted under circumstances that make it inequitable for the defendant to retain the benefit without paying for its value.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Indemnity Clauses

HN102[] Contract Conditions & Provisions, Indemnity Clauses

Under California law, an indemnity agreement is to be interpreted according to the language and contents of the contract as well as the intention of the parties as indicated by the contract. Such agreements are construed under the same rules that govern the interpretation of other contracts.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Indemnity Clauses

Torts > ... > Multiple Defendants > Indemnity > Contractual Indemnity

Torts > ... > Settlements > Multiple Party Settlements > Indemnity

HN103[] Contract Conditions & Provisions, Indemnity Clauses

Generally, an indemnification provision allows one party to recover costs incurred defending actions by third parties, not attorney fees incurred in an action between the parties to the contract. Courts look to several indicators to distinguish third party indemnification provisions from provisions for the award of attorney fees incurred in litigation between the parties to the contract. The key indicator is an express reference to indemnification. A clause that contains the words indemnify and hold harmless' generally obligates the indemnitor to reimburse the indemnitee for any damages the indemnitee becomes obligated to pay third persons—that is, it relates to third party claims, not attorney fees incurred in a breach of contract action between the parties to the indemnity agreement itself. Courts also examine the context in which the language appears. Generally, if the surrounding provisions describe third party liability, the clause will be construed as a standard third party indemnification provision. The court will not infer that the parties intended an indemnification provision to cover attorney fees between the parties if the provision does not specifically provide for attorney's fees in an action on the contract.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Indemnity Clauses

Torts > ... > Multiple Defendants > Indemnity > Contractual Indemnity

HN104[] **Contract Conditions & Provisions, Indemnity Clauses**

For an indemnification provision to be interpreted as covering attorneys' fees and costs in an action on a contract between the parties, there must be language in the contract that reasonably can be interpreted as addressing the issue of an action between the parties on the contract. For example, attorneys' fees and costs are recoverable in an action between the parties where the indemnity provision includes express language for attorney's fees incurred in enforcing the indemnity agreement.

Civil Procedure > ... > Federal Declaratory Judgments > Discretionary Jurisdiction > Factors

Governments > Courts > Judicial Comity

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

Civil Procedure > ... > Declaratory Judgments > Federal Declaratory Judgments > Scope of Declaratory Judgments

Civil Procedure > ... > Declaratory Judgments > State Declaratory Judgments > Scope of Declaratory Judgments

HN105[] **Discretionary Jurisdiction, Factors**

Courts have substantial discretion in deciding whether to declare the rights of litigants under the Declaratory Judgment Act. This substantial discretion permits the Court to consider equitable, prudential, and policy arguments for or against the declaratory relief sought. A district court should avoid needless determination of state law issues, should discourage litigants from filing declaratory actions as a means of forum shopping, and should avoid duplicative litigation. Courts also consider whether the declaratory action will settle all aspects of the controversy; whether the declaratory action will serve a useful purpose in clarifying the legal relations at issue; whether the declaratory action is being sought merely for the purposes of procedural fencing or to obtain a res judicata advantage; or whether the use of a declaratory action will result in entanglement between the federal and state court systems. Essentially, the district court must balance concerns of judicial administration, comity, and fairness to the litigants.

Judges: YVONNE GONZALEZ ROGERS, UNITED STATES DISTRICT COURT JUDGE.

Opinion by: YVONNE GONZALEZ ROGERS

Opinion

[*921] ***RULE 52*** **ORDER AFTER TRIAL ON THE MERITS**

Plaintiff Epic Games, Inc. sued Apple, Inc. alleging violations of federal and state antitrust laws and California's unfair competition law based upon Apple's operation of its App Store. Broadly speaking, Epic Games claimed that Apple is an antitrust monopolist over (i) Apple's *own system* of distributing apps on Apple's *own devices* in the App Store and (ii) Apple's *own system* of collecting payments and commissions of purchases made on Apple's *own devices* in the App Store. Said differently, plaintiff alleged an antitrust market of one, that is, Apple's "monopolistic" control over its own systems relative to the App Store. Apple obviously disputed the allegations.

Antitrust law protects competition and not competitors. Competition results in innovation and consumer satisfaction and is essential to the effective operation of **[**11]** a free market system. ***HN1***[] Antitrust jurisprudence also evaluates both market structure and behavior to determine whether an actor is using its place in the market to artificially restrain competition.

HN2[] Central to antitrust cases is the appropriate determination of the "relevant market." Epic Games structured its lawsuit to argue that Apple does not compete with anyone; it is a monopoly of one. Apple, by contrast, argues that the effective area of competition is the market for all digital video games in which it and Epic Games compete heavily. In the digital video game market, Apple argues that it does not enjoy monopoly power, and therefore does not violate federal and state law.

The Court disagrees with both parties' definition of the relevant market.

Ultimately, after evaluating the trial evidence, the Court finds that the relevant market here is ***digital mobile gaming transactions***, not gaming generally and not Apple's own internal operating systems related to the App Store. The mobile gaming market itself is a *$100 billion industry*. The size of this market explains Epic Games' motive in bringing this action. Having penetrated all other video game markets, the mobile gaming market was Epic **[**12]** Games' next target and it views Apple as an impediment.

Further, the evidence demonstrates that most App Store revenue is generated by mobile gaming apps, not all apps. Thus, defining the market to focus on gaming apps is appropriate. Generally speaking, on a *revenue basis*, gaming apps account for approximately 70% of all App Store revenues. This 70% of revenue is generated by less than 10% of all App Store consumers. These gaming-app consumers are primarily making in-app purchases which is the focus of Epic Games' claims. By contrast, over 80% of all consumer **[*922]** accounts generate virtually no revenue, as 80% of all apps on the App Store are free.

Having defined the relevant market as digital mobile gaming transactions, the Court next evaluated Apple's conduct in that market. Given the trial record, the Court cannot ultimately conclude that Apple is a monopolist under either federal or state antitrust laws. While the Court finds that Apple enjoys considerable market share of over 55% and extraordinarily high profit margins, these factors alone do not show antitrust conduct. Success is not illegal. The final trial record did not include evidence of other critical factors, such as barriers **[**13]** to entry and conduct decreasing output or decreasing innovation in the relevant market. The Court does not find that it is impossible; only that Epic Games failed in its burden to demonstrate Apple is an illegal monopolist.

Nonetheless, the trial did show that Apple is engaging in anticompetitive conduct under California's competition laws. The Court concludes that Apple's anti-steering provisions hide critical information from consumers and illegally stifle consumer choice. When coupled with Apple's incipient antitrust violations, these anti-steering provisions are anticompetitive and a nationwide remedy to eliminate those provisions is warranted.

The Court provides its findings of facts and conclusions of law below.[1]

PART I

FINDINGS OF FACT

HN3[] To determine the relevant market, the Court must first understand the industry and the markets in that industry. This is a heavily *factual* inquiry. Thus, in this Order, the Court explains in detail, the facts underpinning each parties' theory and other relevant facts uncovered during the trial. These details include the background of the parties, their products, the industry, and the markets in which they compete.[2] To assist the reader, **[**14]** given the length of this Order, an outline is included in an Appendix hereto.

I. THE PARTIES

A. Overview

Some basic background information may be helpful. Epic Games is a multi-billion dollar video game company. It defines the relevant market by way of Apple's own internal operating system. Apple has maintained control of its

[1] The Court notes several pending administrative motions to seal relating to the parties' proposed findings of facts and conclusions of law, pending motions, and submitted and docketed materials. *See* Dkt. Nos. 517, 650, 656, 696, 702, 707, 777, 778, 810. These motions are **GRANTED** to the extent that they remain sealed and are not referenced in this Order. Otherwise, to the extent the information is referenced and included in this Order, the motions are **DENIED**. Previously sealed documents remain sealed unless otherwise noted in this Order.

[2] In considering these issues, the Court conducted a sixteen-day bench trial, admitted over 900 exhibits, and, to expedite the in-court proceedings, considered pre-trial submissions including written testimony of the experts and designations of deposition transcripts. The Court in this Order refers to the findings of facts ("FOF") and conclusions of law ("COL") for the parties' arguments as these documents effectively served as the parties' post-trial briefs. *See* Dkt. Nos. 777-4 (Epic Games' filing), 778-4 (Apple's filing).

own operating system for mobile devices, called iOS, since its inception in 2007. Apple's creation and cultivation of the iOS device (and its ecosystem) has been described as a walled garden. Said differently, it is a closed platform whereby Apple controls and supervises access to any software which accesses the iOS devices (defined as iPhones and iPads; also referred to collectively as iOS devices). Apple justifies this control primarily in the name of consumer privacy, security, **[*923]** as well as monetization of its intellectual property. Evidence supports the argument that consumers value these attributes. Due in part to this business model, Apple has been enormously successful and its devices are now ubiquitous.

Both Apple and third-party developers like Epic Games have symbiotically benefited from the ever-increasing innovation and growth in the iOS ecosystem. There **[**15]** is no dispute in the record that developers like Epic Games have benefited from Apple's development and cultivation of the iOS ecosystem, including its devices and underlying software. Nor is there any dispute that developers like Epic Games have enhanced the experience for iOS devices and their consumers by offering a diverse assortment of applications beyond that which Apple can or has provided.

Until this lawsuit, Epic Games' flagship video game product, *Fortnite*, could be played on iOS devices. The product generated an immensely profitable revenue stream for Epic Games. However, Epic Games was also required by contract to pay Apple a 30% commission on every purchase made through the App Store, whether an initial download or an in-app purchase. Consequently, *Fortnite* generated a profitable revenue stream for Apple as well. Epic Games tried to use *Fortnite* as leverage to force Apple to reduce its commission fee and to open its closed platform. When Apple refused, Epic Games breached its contract, which it concedes, and filed this lawsuit. Apple countersued for breach of contract.

Plaintiff focuses its challenge on Apple's control over the distribution of apps to its users and the requirement **[**16]** that developers of apps use Apple's in-app purchases or in-app payments ("IAP") system[3] if purchases are offered in the app. Under this IAP system and under its agreements with app developers, Apple collects payments made to developers, remits 70% to the developers, and keeps a 30% commission. This rate has largely remained unchanged since the inception. The trial also contained evidence of Apple's use of anti-steering provisions to limit information flow to consumers on the payment structure related to in-app purchases.

Once acceptable, Apple's commission rate is now questioned by some consumers and some developers, like Epic Games, as being overly burdensome and violative of competition laws. Indeed, two related lawsuits were already pending before the Court well before the commencement of this action. The first, *In Re Apple iPhone Antitrust Litigation*, 4:11-cv-6714-YGR (*Pepper*), was filed in 2011 on behalf of a class of iOS device consumers alleging harm from the commission rate. The second, filed in 2019 after *Pepper* returned from the Supreme Court of the United States, *Donald Cameron v. Apple Inc.*, 4:19-cv-3074-YGR (*Cameron*), on behalf of a class of iOS app developers also **[**17]** alleging violations of antitrust and competitions laws.

The Court begins the analysis with Epic Games.

B. Plaintiff Epic Games

Epic Games is a video game developer founded in 1991 by Tim Sweeney.[4] It is headquartered in Cary, North Carolina, **[*924]** has more than 3,200 employees in offices around the world, and was recently valued at $28.7 billion. Mr. Sweeney serves as the controlling shareholder and chairman of the Board of Directors.[5] Other notable

---

[3] The Court notes that it uses the term IAP in this Order to refer exclusively to Apple's IAP systems, as described and discussed later herein. *See supra* Facts § II.C. The Court clarifies, however, that certain witnesses use the term IAP to refer generically to any app purchases or payments made in games and apps. The Court notes that the underlying transcripts and cited materials in which IAP is being referenced clarifies which of the two is being discussed.

[4] Trial Tr. (Sweeney) 89:19, 112:18-25.

shareholders include: (1) Tencent Holdings, Ltd., a Chinese video game company and one of the largest gaming companies in the world, which owns about thirty-seven percent of Epic Games, with two board seats; and (2) Sony Corporation, a major player in the console gaming market, which also owns about 1 to 2 percent of Epic Games.[6]

Epic Games first began publishing games for other developers when the company started.[7] Around 1998, it moved away from publishing other companies' products to developing its own product.[8] During the mid-2000's, the company, which had been focused on personal computers ("PC") games up to that point, shifted to developing for game consoles.[9]

In addition to game development, Epic Games offers software development tools **[**18]** and distributes apps.[10] Epic Games now touts a number of different lines of business, much of which occurred during the pendency of this lawsuit and on the eve of trial, such as distribution of non-game apps.

The Court summarizes each of the three significant areas of its business: (1) gaming software development (*e.g., Unreal Engine*, Epic Online Services); (2) game developer (*e.g., Fortnite* and other video games); and (3) gaming distributor (*e.g.*, the Epic Games Store). The Court thereafter summarizes the prior relationship between Epic Games and Apple.

1. *Gaming Software Developer: Unreal Engine and Epic Online Services*

As a gaming software developer, Epic Games licenses two notable products to other developers: *Unreal Engine* and Epic Online Services.[11]

The first, *Unreal Engine*, is a software suite that allows developers to create three-dimensional and immersive digital content.[12] It is not used by *consumers* and is not an app on the App Store.[13] Developers wishing to use *Unreal Engine* must be licensed by nonparty Epic S.A.R.L. ("Epic International"), an Epic Games Swiss subsidiary.[14] Epic International licenses *Unreal Engine* because it sought to protect their intellectual property rights.[15] Licensed **[**19]** developers are governed by the End User License Agreement.[16]

[16] DX-4022; Trial Tr. (Grant) 667:3-11, 753:19-754:7.

Epic Games profits from *Unreal Engine* by charging fees for paid content.[17] Separately, Epic International charges a royalty **[*925]** on products that use any version of the *Unreal Engine* (typically 5% of gross revenue).[18] In the past, developers were required to pay royalties after a product exceeded $3,000 in revenue per quarter. After a change in policy in 2020, Epic International is now owed royalties after a product earns $1,000,000 through the product's life.[19]

Epic International therefore profits in perpetuity from any success a developer enjoys using the *Unreal Engine*.[20] As Epic Games' former chief financial officer stated, this model ensures that if developers succeed, Epic Games "can participate in that success."[21] For instance, in 2019, *Unreal Engine* generated about $97 million in revenue for Epic International,[22] which enjoys a 100 percent gross margin on its "engine business."[23]

Although *Unreal Engine* itself is not available on the App Store, Epic Games develops apps that work in conjunction with *Unreal Engine*, including *Unreal Remote* and *Live Link Face*, and distributes on iOS. These apps "provide[] a means for people **[**20]** who work in the movie or TV industry to capture performances and view them on *Unreal Engine*."[24] They do not include competitive game play.[25] Separate and apart from the App Store, Epic Games also provides *Unreal Marketplace*, a store for pre-created two-dimensional and three-dimensional assets for purchase by *Unreal* developers.[26]

Second, in addition to *Unreal Engine*, Epic Games offers third-party developers a suite of back-end online gaming services through Epic Online Services. These services include matchmaking, Epic Games' friends system, and voice system.[27]

2. *Game Developer: Fortnite*

With respect to Epic Games' primary business of development and release of its own video games including its flagship video game, *Fortnite*, Epic Games develops and owns through its subsidiary, other apps, such as *Houseparty*, which incorporates some optional gaming elements into its video chat application.[28]

Fortnite is Epic Games' most popular game and app, with over 400 hundred million registered players worldwide.[29] Originally **[*926]** a cooperative shooter game consisting of player-versus-environment ("PVE") mechanics, *Fortnite* now has four main game modes: (i) ***[**21]*** *Save the World*, (ii) *Battle Royale*, (iii) *Creative*, and (iv) *Party Royale*.[30] Of these four game modes, "nearly half of the players coming into [*Fortnite*] on a daily basis," around 15 million users, "are playing Creative and Party Royale Modes."[31]

Save the World launched in July 2017 as the original game mode. It is a cooperative campaign consisting of PVE mechanics. Squads of up to four players team up to build forts and fight non-playable, computer monsters.[32]*Save the World* is *not available* on mobile platforms, including the iOS platform, or on the Nintendo Switch.[33]

Battle Royale is a player-versus-player ("PVP") elimination and survival match involving up to 100 players.[34] It is the most popular *Fortnite* game play mode with storylines and game play that evolve over time, as new chapters and seasons are released.[35] A season typically lasts around ten weeks and is a subset of a larger chapter.[36] This mode also offers a "sit out" feature, permitting players to observe *Battle Royale* matches instead of competing.[37] Importantly, and as discussed below, although the *Battle Royale* game play mode is available to download and play free of charge, **[**22]** [38] players can make in-app purchases for digital content, including digital avatars, costumes, dance moves, and other cosmetic items.[39]

Creative mode allows players to create their own content in *Fortnite*.[40] According to Epic Games' website: "Included free with Battle Royale, Fortnite Creative puts you in charge of your own Island . . . . Creative is also a great place for just creating your own scenery. . . ."[41] Content generated in *Creative* mode can be more broadly shared by other *Fortnite* players.[42] With the aid of avatar Agent Peely, an anthropomorphic banana man,[43] and Mr. Weissinger's testimony, the Court was walked through different gaming and experiences islands within the *Creative* mode hub,

---

[29] Trial Tr. (Sweeney) 99:5-6, 100:5-7. Epic Games also owns and/or develops other games, including *Rocket League, Fall Guys, Battle Breakers, Spyjinx*, and the *Infinity Blade* series. Trial Tr. (Sweeney) 89:22-90:5, 116:8-12; Trial Tr. (Grant) 664:13-14.

[43] With respect to the appropriateness of Peely's "dress," the Court understood Apple merely to be "dressing" Peely in a tuxedo for federal court, as jest to reflect the general solemnity of a federal court proceeding. As Mr. Weissinger later remarked, and with which the Court agrees, Peely is "just a banana man," additional attire was not necessary but informative. Trial Tr. (Weissinger) 1443:17.

including "Prison Breakout," "Rockets vs. Cars," "Cars Now With Snipers," and "Creative Mayhem Regional Qualifier."[44]

The final mode, *Party Royale*, is described as "an experimental and evolving space that focuses on no sweat, all chill fun. Attractions include aerial obstacle **[*927]** courses, boat races, movies, and even live concerts from top artists[.]"[45]

In 2017, *Fortnite* debuted on a number of platforms—including Windows, Mac, Xbox One, and PlayStation 4—with only the *Save the World* game **[**23]** mode. Later that year, Epic Games released *Battle Royale*—a free-to-play game mode with features available for in-app purchase. With *Battle Royale*'s success, *Fortnite* quickly "became more about Battle Royale" and, thus, a primarily "free-to-play game." The success of *Fortnite* has been profitable for both Epic Games and its partners. For instance, the Epic Games-Microsoft partnership generates hundreds of millions of dollars for both parties.[46]

b. Key Features of *Fortnite*

Fortnite has many distinct features. First, most of its game play is multiplayer and requires an Internet connection. Users can play *Fortnite* online with friends and family, with teams, or with other gamers of similar skill levels with whom they are matched.[47] Second, in order to play together online, users must have the same "version" of *Fortnite* software installed on their device or platform.[48] Third, *Fortnite* releases new content and updates, including major changes to the map and game play, on a regular basis. These updates ensure that users can enjoy new and surprising in-game experiences each time they open the app. Having a purely static environment without these updates would materially degrade the player experience. **[**24]** [49]

Fourth, *Fortnite* features cross-play, allowing players on different platforms to play with one another.[50] Since September 2018, cross-platform play for *Fortnite* has been available on Sony's PlayStation, Microsoft's Xbox, the Nintendo Switch, Windows PCs, Mac computers, certain Android devices, and (until recently) certain iOS mobile devices.[51] In fact, Epic Games pioneered cross-platform play for the gaming industry. It persuaded both Sony and Microsoft to erase the artificial barriers between players on their console platforms, making *Fortnite* the first game to achieve full cross-play functionality across those devices, as well as PCs and mobile devices.[52] Epic Games believed so strongly in cross-platform play that it threatened litigation against Sony for using policies and practices to restrict the same.[53]

---

[44] Matthew Weissinger is Vice President of Marketing at Epic Games. Trial Tr. (Weissinger) 1365:16-1366:1, 1367:25-1368:10, 1368:12-1371:20, 1373:22-1374:12, 1374:13-1376:6 (testimony agreeing that *Creative* mode includes game play and game mechanics).

[45] DX-5536.002; *see also* Trial Tr. (Allison) 1246:20-1247:7. The Court viewed a portion of this mode whereby Peely participated in a game called "Skydive Glide Drop," before engaging in dance to celebrate a B rank finish. Trial Tr. (Weissinger) 1363:13-1364:12.

[53] DX-3125.007; Trial Tr. (Sweeney) 107:2-10, 234:3-238:12, 252:22-255:16.

Other cross-platform innovations featured on *Fortnite* include cross-progression and cross-purchase or cross-wallet. Cross-progression allows users to access the same account and maintain their progress, regardless of the platform on which they play. Thus, for users who play *Fortnite* on multiple platforms, cross-progression is an important feature.[54] Nevertheless, **[*928]** most *Fortnite* ***[**25]*** users play on a single platform.[55] Cross-purchases allows *Fortnite* users to buy V-Bucks, or virtual currency, on one platform and spend them on another platform. Cross-purchases are not available on Sony or Nintendo platforms.[56]

Fifth and finally, as evidenced above, *Fortnite* features gaming and non-gaming experiences.[57] For instance, *Party Royale* allows players to watch movies or TV shows, attend concerts, and participate in global cultural events within the app itself.[58]*Fortnite*'s capacity to bring people together has been particularly important during the COVID-19 pandemic.[59] Notable events include:

• Travis Scott's in-game concert in April 2020, viewed by 12.3 million concurrent users, including two million iOS users;[60]

• Three of Christopher Nolan's feature-length films—*The Dark Knight, Inception*, and *The Prestige*—virtually screened in June 2020;[61]

• Exclusive episodes of ESPN's *The Ocho*, viewed by more than two million users, and the Discovery Channel's *Tiger Shark King*, viewed by more than 900,000 users;[62]

• *We the People*, a series of discussions on racial equality and voter suppression in the United States, viewed by 1.5 million users;[63] and

• DJ Kaskade hosted a virtual concert in March 2021. **[**26]** [64]

Based on these in-game experiences, Epic Games considers *Fortnite* to compete not only with gaming companies but also with other social media companies such as Facebook and Netflix.[65]

c. <u>*Fortnite*'s Business Model: In-App Purchases and V-Bucks</u>

Fortnite uses the "freemium" game model, under which a game is largely free to download and play but certain additional in-game features can be purchased.[66] Epic Games primarily generates revenue by selling V-Bucks,

---

[54] Trial Tr. (Sweeney) 108:3-11 ("Cross-progression refers to . . . a user who owns multi devices to connect with *Fortnite* on . . . different platforms, and to have the same . . . state [of] ownership of virtual items on all different platforms . . . .").

which can be used to obtain items in *Fortnite*.[67] V-Bucks can be purchased in-app or directly from Epic Games' website.[68] Players can use VBucks to purchase digital content within the app, including a "Battle Pass" (a feature that provides access to challenges and otherwise locked content) or cosmetic upgrades.[69] Unlike other games employing the freemium model, in-app purchases do not buy game play advantages in *Battle Royale*.[70] Instead, players can make in-app purchases of different items that function as forms of self-expression, including cosmetic **[*929]** enhancements or "skins" (*i.e.*, in-game costumes), dance moves known as "emotes," and more.[71] As of December 2020, players can also subscribe to *Fortnite Group*, which provides users with the Battle **[**27]** Pass for each new *Battle Royale* season, a monthly allotment of 1,000 V-Bucks and exclusive cosmetics.[72]

Epic Games sells V-Bucks to consumers in various bundles and packages at increasing prices: 1,000 V-Bucks for $9.99; 2,800 V-Bucks for $24.99 and so on—all the way to 13,500 V-Bucks for $99.99. After Epic Games implemented its hotfix on iOS (discussed at length below), Epic Games dropped V-Bucks pricing by 20% for purchases made through Epic Games' direct payment option on iOS and Google Play, as well as for purchases on every other platform through which *Fortnite* was offered.[73] Notably, there is "no cost to [Epic Games for] V-Buck . . . V-Bucks themselves don't have a marginal cost."[74]

Although Epic Games claims that it would not have a viable way of monetizing *Fortnite* without being able to sell in-app content,[75] the record shows it monetizes *Fortnite* in nine other ways:[76]

Two are internal to the game. First, since December 2020, users "can subscribe to *Fortnite Crew*, a subscription" service offered by Epic Games.[77] Second, users can pay an up-front fee to gain access to one of *Fortnite*'s game modes, *Save the World*, that also has in-app content for purchase.[78]

The remaining seven **[**28]** are external. One, Epic Games "generates revenue . . . typically in the form of redeemable codes sold through traditional retail and online stores."[79] Two, Epic Games generates revenue through in-game advertising or cross-promotions.[80] Three, it "has received revenue for providing third-parties with promotional codes redeemable for *Fortnite* content."[81] Four, "Epic has in the past entered into hardware bundle agreements with console makers," through which "the console makers offered for sale a bundle containing their game consoles along with exclusive *Fortnite* cosmetics and V-Bucks . . . ."[82] Five, "Epic has provided other

[81] DX-3691.010.

partners with redeemable codes for exclusive *Fortnite* cosmetics and V-Bucks, and Epic was paid by the partner on a per redemption basis."[83] Next, it "has entered into licensing agreements with brands through which it received the revenue from sales of in-game cosmetics featuring the licensed content as well as a small portion of the brand's sales generated from *Fortnite*."[84] Finally, it "licenses *Fortnite* intellectual property to third parties to use in physical merchandise, such as toys, apparel, accessories and home goods. In some circumstances, such physical merchandise **[*930]** also **[**29]** may include a code that can be redeemed for *Fortnite* in-game content."[85]

Based on the freemium model which relies upon in-app purchases, as well as these alternative ways of monetization, *Fortnite* is quite lucrative and integral to Epic Games' overall business operations.[86] Given that *Fortnite* utilizes cross-platform technology to capture a larger audience and appears on several different platforms, Epic Games faces commission rates on its in-app purchases. Generally, plaintiff must pay 30% across most platforms. Indeed, for example, Epic Games has agreed to such a rate on all *Fortnite* transactions via the Microsoft (Xbox) Store, the PlayStation Store, the Nintendo eShop, and Google Play.[87] Epic Games has also agreed to extra payments for certain platform holders above and beyond the standard 30% commission rate. For example, for all *Fortnite* transactions via the PlayStation Store, Epic Games agreed to make additional payments to Sony *above* this commission rate based on the amount of time that PlayStation users play *Fortnite* cross-platform.[88]

d. <u>*Fortnite* on the iOS Platform</u>

In 2018, *Fortnite* debuted on the iOS platform. Epic Games followed its prior business model and distributed **[**30]** *Fortnite* using a "freemium" model, in which a user can download the application for free but has the opportunity to purchase certain in-app content. Mr. Sweeney "attribute[s] a lot of [Epic Games'] success" to this business model. This kind of business model is facilitated by the App Store, including IAP.[89]

Although Epic Games has had disputes and discussions with other platform owners as to cross-play policies (including cross-platform, cross-progression, and cross-wallet), originally it did not encounter any such difficulty with Apple. Prior to *Fortnite*'s launch on iOS devices, Epic Games sought to leverage Apple's significant interest in "the mobile version of [*Fortnite Battle Royale*]" to obtain Apple's support in operationalizing cross-play capabilities and to secure marketing support from Apple. Apple cooperated: before *Fortnite*'s debut on the iPhone, Apple operationalized cross-platform play. This included changing its guidelines to expressly permit cross-platform functionalities that were similar to what Epic Games sought, and Apple continued to permit such cross-functionality on *Fortnite* while the game remained on the App Store.[90] In addition to cross-platform play, Apple also facilitated **[**31]** cross-progression (game progress synced across platforms), and cross-wallet functionality (allowing purchases from one platform to be used on others).[91] Epic Games has acknowledged that Apple's permissive cross-platform policies contributed to *Fortnite*'s success as a cross-platform game and benefited Epic Games' business.[92]

92 Trial Tr. (Sweeney) 196:15-25.

Once *Fortnite* itself was introduced, revenues from in-app purchase on Epic Games apps through the App Store roughly **[*931]** doubled. Indeed, Epic Games saw iOS and other mobile platforms as key to increasing *Fortnite*'s player base, as plaintiff had already reached "a point of basically full penetration on console," making acquisition of mobile customers "hugely important."[93] Before *Fortnite* was removed from the iOS platform, more than 115 million registered players had accessed *Fortnite* on an iOS device.[94] Of this amount, 64% of *Fortnite* for iOS players—approximately 73 million in total—had only ever played *Fortnite* on iOS devices.[95]

That said, despite this staggering number of iOS *Fortnite* players, the vast majority of Epic Games' *Fortnite* revenue (93%) is generated on non-iOS platforms. Of the users who made a purchase between March 2018 and July 2020, *only 13.2% made a purchase* ***[**32]*** *on an iOS device—meaning that Epic Games was able to transact with 86.8% of paying Fortnite users without paying any commissions to Apple*.[96] Still, in only two short years, and with access to the iOS platform and Apple's support, *Fortnite* on iOS earned Epic Games more than $700 million across over 100 million iOS user accounts.[97]

3. *Game Publisher and Distributor: Epic Games Store*

a. Characteristics of the Epic Games Store

As noted above, Epic Games is involved in both game publishing and game distribution through its online store, the Epic Games Store, which launched in December 2018.[98] By way of background, a publisher "typically funds most or all of the expenses associated with [an] entire product, including development and marketing; whereas, a distributor typically only pays the cost associated with direct distribution, such as in the digital . . . bandwidth and payment with processing fees."[99] Where Epic Games serves as a publisher, its agreements provide that it first recovers all of its costs and then splits remaining revenues 60/40 with the 40% share to the developer, or 50/50.[100] In terms of distribution, the Epic Games Store serves as a platform to sell gaming apps which operated on **[**33]** PC and Mac computers.[101] The store carries hundreds of games, including its own and many third-party titles.[102]

Messrs. Sweeney and Steve Allison, Vice President and General Manager of the Epic Games Store, testified that Epic Games always had an original intent to include non-gaming apps within the Epic Games Store citing to the inclusion of *Unreal Engine* on the store page, and conversations with several other non-gaming app companies including Twitch and Discord in 2018.[103] The claim is suspect. First, the Epic Games Store only made significant moves during the pendency of this litigation and on the eve of this bench trial by including non-game apps including: the Spotify music app (December 2020), the **[*932]** Brave web browser, the KenShape creation tool for artists, and Itch.io, a third-party store (April 22, 2021).[104] Indeed, while Epic Games urges in this lawsuit that Apple must allow

third-party app stores in the App Store, the Epic Games Store did not itself distribute any third-party app stores until a few days before trial (approximately April 22, 2021).[105] Second, neither Discord nor Twitch have submitted their own apps for inclusion on the Epic Games Store.[106] Finally, with respect to *Unreal* ***[**34]*** *Engine*, although the Epic Games Store links to it, the *Unreal Engine* has its own website with its own domain name and appears separate and apart from the Epic Games Store.[107]

This conclusion is also supported by the design of the Epic Games Store's website itself which markets "games" specifically. The navigation tabs on the homepage—"games on sale," "free games," "new and trending," "new releases," "top sellers," "[t]op 20," and "coming soon"—lead to compilations consisting entirely of games. The "top news items" tab offers only news about games. The search bar prompts the user to "search all games" (and not to "search all apps"). The "help" tab describes Epic Games Store's consumers as "players." Finally, the Epic Games Store's "FAQ" describes the Epic Games Store as a "curated digital storefront for PC and Mac" that is "designed with both players and creators in mind" and is "focused on providing great games for gamers and a fair deal for game developers."[108]

Like other platforms, the Epic Games Store uses a commission model and markets an 88/12 split of all revenues to developers from the sale of their games. The evidence is also undisputed that this 88/12 commission is **[**35]** a below-cost price and the **[*933]** store is expected to operate at a loss for many years at this rate.[109]

From Epic Games Store's launch to December 2019, Epic Games collected its commission through its own payment mechanism, which it required developers to use for all game purchases and in-game purchases.[110] Epic Games no longer requires any developer to use its payment processing system, called Epic direct payment, for in-app purchases.[111] Developers who do not use Epic direct payment do not pay Epic Games anything for in-app

---

[105] Trial Tr. (Sweeney) 263:22-265:4.

[106] The Court further understands that both Twitch (an app primarily used for game streaming) and Discord (an app primarily used for voice chat in video games) operate apps that are, to use Mr. Allison's words, "game adjacent." Trial Tr. (Allison) 1119:24-25.

[107] *Id.* 1239:8-13.

[108] *Id.* 1236:5-1238:10, 1238:11-19, 1238:21-1239:5, 1239:15-1240:7. The Court is not persuaded that the Epic Games Store is anything but a game store. Indeed, the Court emphasizes that its addition of non-gaming apps during the pendency of this litigation (Spotify) and on the eve of trial (the remaining apps and software) do not demonstrate that Epic Games Store is a general app store, especially for purposes of this litigation.

First, at the time of the filing of the complaint in this action, the Epic Games Store was undisputedly a game store, and the pleadings only confirm that Epic Games sought to open Epic Games Store in its then current iteration on the iOS platform. *See* Compl. (Dkt. No. 1) ¶ 27 ("Epic also built and runs the Epic Games Store, a digital video game storefront through which gamers can download various games, some developed by Epic, and many offered by third-party game developers." (emphasis supplied)), ¶ 81 ("Epic approached Apple to request that Apple allow Epic to offer its Epic Games Store to Apple's iOS users through the App Store and direct installation."), ¶ 90 ("The Epic Games Store offers personalized features such as friends list management and game matchmaking services. Absent Apple's anticompetitive conduct, Epic would also create an app store for iOS.").

Second, the Court heard no specific evidence on these newly added apps, beyond brief descriptions of these apps and software, including on Epic Games' monetization and revenues from such apps, or even user statistics with respect to such apps, including total and relative downloads as compared to other products in the Epic Games Store.

[109] Trial Tr. (Sweeney) 125:9-12, 126:1-3; Trial Tr. (Cragg) 2326:25-2327:5.

[110] Trial Tr. (Allison) 1221:11-1222:16.

purchases.[112] Because of this open policy, several app developers have elected to use their own payment and purchase functionality for in-app purchases, such as Ubisoft and Wizards of the Coast.[113]

Epic Games acknowledges that its commission is not merely a "payment processing" fee. The 12 percent fee is principally for access to Epic Games' customers, but also is intended to cover all of Epic Games' variable operating costs associated with selling incremental games to customers. It covers various services to game developers, including "hosting, player support, marketing of their games, and handling of refunds," "a supporter/creator marketing program," and "social media for **[**36]** game launches, video promotions[,] . . . featuring at physical events, such as E3[,] [a]nd sponsorships of the video games." The commission is thus "tied into these broader ecosystem benefits that [Epic Games] provide[s] to [its] developers," and is intended to cover the full "cost of operating the service," "the actual distribution cost, the internet bandwidth cost, [and] the . . . cost of maintaining it."[114]

Today, Epic Games Store has over 180 million registered accounts and more than 50 million monthly active users.[115] It supports more than 100 third-party app developers and publishes over 400 of their apps.[116] Epic Games Store operates a single storefront across multiple geographies.[117]

Epic Games is a would-be and self-avowed competitor of Apple in the distribution of apps.[118] Absent the restrictions imposed by Apple, Epic Games would operate a mobile version of the Epic Games Store on iOS that would compete with Apple's App Store.[119]

b. Finances of the Epic Games Store

As referenced, the Epic Games Store is not yet profitable due to Epic Games' strategic plan to grow the consumer base at the expense of near-term profits and revenue.

By charging 12% commission, the Epic Games **[**37]** Store will not be profitable for at least several years. Current estimates indicate negative overall earnings in the hundreds of millions of dollars through at least 2027. The anticipated loss is driven by **[*934]** hundreds of millions of minimum guarantees that Epic Games made to developers to entice them to distribute exclusively through Epic Games Store.[120] In short, the Epic Games Store has front-loaded its marketing and user-acquisition costs to gain market share.[121] Whether this gambit will ultimately work remains to be seen; Epic Games is currently outperforming its projected business plan by "about 15 percent," and its first-party and third-party businesses are up 113% and 100%, respectively.[122] While Epic Games

now says it expects the Epic Games Store to become profitable by 2023, the store's projected revenue from prior years has proven overly optimistic.[123]

4. *Prior Relationship Between Apple and Epic Games*

The relationship between Apple and Epic Games dates back to at least 2010.

In 2010, Epic Games agreed to and signed a Developer Product Licensing Agreement ("DPLA") with Apple. Epic International subsequently signed a Developer Agreement and DPLA (for the account associated **[**38]** with *Unreal Engine*). At the time of the signing of these contracts, Mr. Sweeney understood and agreed to key contractual terms including, that Epic Games (i) was required to pay a commission on in-app purchases; (ii) was prohibited from putting a store within the App Store; (iii) was prohibited from sideloading apps on to iOS devices; and (iv) was required to use Apple's commerce technology for any payments. Knowing the terms, Epic Games chose to enter into those contracts. According to Mr. Sweeney, Epic Games did not have a formal business dispute with Apple or raise major objections or have existential-level concerns about the App Store's contract terms at the time. Since 2010, there has been no material change in the terms of Epic Games' agreements with Apple, nor in Apple's business design.[124]

Epic Games released three iOS games before *Fortnite*, and Apple featured each of them at major events allowing Epic Games to make use of Apple's brand.[125] This began with Epic Games' first iOS game, *Infinity Blade*, in 2010, which it released for iOS because of the "amazing 3D capabilities" on mobile platforms and the large number of iOS users.[126]

These collaborations notwithstanding, Epic Games and **[**39]** Mr. Sweeney began voicing discontent around the mid-2010s. In June 2015, Mr. Sweeney emailed Apple **[*935]** chief executive office Tim Cook urging Apple to consider "separating iOS App Store curation from compliance review and app distribution," and noting that "it doesn't seem tenable for Apple to be the sole arbiter of expression and commerce over an app platform approaching a billion users."[127] A few years later, in January 2018, Mr. Sweeney sought a meeting with Apple through Mark Rein, Epic Games' Vice President, "to talk about the potential for iOS and future Apple things to operate as open platforms" and discuss how Epic Games has "a PC and Mac software store and would love to eventually support it on iOS." He added: "If the App Store we[re] merely the premier way for consumers to install software, and not the sole way, then Apple could curate higher quality software overall, without acting as a censor on free expression and commerce on the platform . . . ."[128]

Despite these disagreements, Epic Games proceeded to more closely intertwine itself with the iOS platform. In early 2018, Epic Games and Apple arranged for the release of *Fortnite*. By that time, *Fortnite* was "doing incredible" and was **[**40]** "basically a cultural phenomenon."[129]

5. *Project Liberty*

At the end of 2019 Tim Sweeney conceived of a plan called "Project Liberty"[130] which was a highly choreographed attack on Apple and Google, Inc. The record reveals two primary reasons motivating the action. First and foremost, Epic Games seeks a systematic change which would result in tremendous monetary gain and wealth. Second, Project Liberty is a mechanism to challenge the policies and practices of Apple and Google which are an impediment to Mr. Sweeney's vision of the oncoming metaverse.

The Court understands that, based on the record, the concept of a metaverse is a digital virtual world where individuals can create character avatars and play them through interactive programed and created experiences. In Mr. Sweeney's own words, a metaverse is "a realistic 3D world in which participants have both social experiences, like sitting in a bar and talking, and also game experiences . . . ."[131] In short, a metaverse both mimics the real world by providing virtual social possibilities, while simultaneously incorporating some gaming or simulation type of experiences for players to enjoy. These experiences can be created by developers such as **[**41]** is the case with the *Battle Royale* and *Save the World* modes in *Fortnite*. In other instances, these experiences can be user-created, such as is the case with the *Creative* and *Party Royale* modes in *Fortnite*, or general experiences in the video game *Roblox*.[132] Epic Games' and Mr. **[*936]** Sweeney's plans for *Fortnite* and its metaverse involved shifting the video game from primarily relying on the former modes (*i.e.*, developer designed, traditionally gaming, and competitive modes) to the latter modes (*i.e.*, social and creative modes), where users-becoming-creators would themselves be rewarded and enriched. The Court generally finds Mr. Sweeney's personal beliefs about the future of the metaverse are sincerely held.

To Mr. Sweeney and Epic Games, the metaverse is the future of both gaming and entertainment, and Apple's policies and practices are a hurdle which pose a problem. **[**42]** Indeed, for Mr. Sweeney, "reaching the entire base of Apple is 1 billion iPhone consumers is a paramount goal for our company, as *Fortnite* expands beyond being a game into this larger world of the metaverse."[133] Both Mr. Sweeney and Epic Games' employees and officers generally testified that "iOS is a vital platform for a business" and that it is "the only way we can access a hundred percent of [a platform's] users or at least have the option of accessing a hundred percent of that market."[134]

Project Liberty planning began in earnest in the first quarter of 2020.[135] The plan was to attack Apple's (and Google's) software distribution and payment apparatuses[136] which Epic Games described as "an attempt to provide

---

[130] DX-3774 (board presentation); DX-4419.001 (Mr. Sweeney requested to be "in the loop on this topic 100%"); Trial Tr. (Sweeney) 88:6-7, 170:10-171:9, 280:7-10, 283:6-15 (approving the strategic decisions for Project Liberty); DX-4072 (developing a project "War Room"); DX-4561 (outlining detailed timelines).

[131] Trial Tr. (Sweeney) 325:14-17. Mr. Sweeney acknowledged that the film *Ready Player One* contains a recent portrayal of an imagined and futuristic, albeit dystopian, metaverse. *Id.* 325:10. Mr. Sweeney also cited the book *Snow Crash* as an example of the depicted metaverse, which he remarked "describes this emerging social entertainment medium that transcends gaming." *Id.* 325:24-326:1.

[132] For instance, Mr. Sweeney described an experience in one of these latter modes in *Fortnite*, involving utilizing player character avatars watching a Netflix show:

> All in the virtual 3D world. You can stand there and watch Netflix with your friends, and it's different than watching it in front of the TV. You can talk to your friends and you can emote and throw tomatoes at the screen. And so it is a very different experience than either a game or Netflix.

Id. 326:6-11.

[133] *Id.* 112:13-17.

[134] *Id.* 112:3; Trial Tr. (Grant) 671:13-20.

[135] Trial Tr. (Sweeney) 152:24-153:4. Notably, Epic Games decided to target *only* Apple and Google in its crusade even though it generally faced similar 30% rates on every platform where it sold products, except a computer platform.

developer choices for payment solutions and bring that benefit to the customers in a platform where [that] choice is not available."[137] Said differently, the "platform fees" posed "an existential issue" to both the company's business plans and Mr. Sweeney's personal ambitions for *Fortnite*, its digital gaming and retail store, and the evolving metaverse.[138] Internally, Epic Games also hoped to revive and reinvigorate *Fortnite* by pivoting its business whereby player-developers could create **[**43]** new content and plaintiff could "shar[e] [a] majority of profit with [those] creators."[139]

Key to Project Liberty's deployment, Epic Games engineered a "hotfix" to covertly introduce code that would enable additional payment methods for the iOS and Android versions of *Fortnite*.[140] Hotfixes function by coding an app to check for new content that is available on the developer's server or by introducing new instructions on how to configure settings in the app.[141] In general, a developer can use hotfixes to activate content or features in an app that are in the code but are not initially available to users. The content or feature is accessible only after the app checks the developer's server and is "notified" by the server to display the new content or feature.[142] Across all platforms where *Fortnite* is available, including iOS, Epic Games has used hotfixes to enable hundreds of new features and content elements **[*937]** and to correct configuration issues since *Fortnite* was first added to the App Store.[143] By contrast, the Project Liberty hotfix has no analogue as it clandestinely enabled substantive features in willful violation of the contractual obligations and guidelines.

By May 11, 2020, the key **[**44]** components of Epic Games' strategy were in place: "We submit a build to Google and Apple with the ability to hotfix on our payment method . . . . We flip the switch when we know we can get by without having to update the client for 3 weeks or so. Our messaging is about passing on price savings to players."[144] In parallel, Epic Games developed "Epic Mega Drop," its simultaneous plan to lower the price of *Fortnite* items by an average of 20 percent on certain platforms.[145] " Epic Mega Drop" would reduce pricing on platforms other than Apple's and Google's, even though Epic Games was still paying 30% commissions to the console makers.[146] Epic Games also planned to assure its console partners that the reduction in price for V-Bucks could be recouped through the sales of more expensive bundles or items with "mythic" rarity.[147]

Project Liberty included a public narrative and marketing plan. Epic Games recognized that it was "not sympathetic"[148] and that if Apple and Google blocked consumers from accessing the app, "[s]entiment will trend

negative towards Epic."[149] "[T]he critical dependency on going live with our VBUCKS price reduction efforts is finding the most effective way to get Apple and Google to reconsider **[**45]** without us looking like the baddies."[150]

To these ends, Epic Games wanted to "[g]et players, media, and industry on 'Epic's side,'" by "[c]reat[ing] a narrative that we are benevolent," and at the same time make Apple out to be the "bad guys."[151] Epic Games retained a public relations firm and devised, in effect, a two-phase communications plan.[152] The first phase consisted of actions before the activation of the plan such as creating an affiliated advocacy group, and a second phase that would galvanize public sentiment through social media outreach and videos.[153]

With regard to the first phase, Epic Games implemented its plan throughout the summer of 2020 by creating the Coalition for App Fairness, and "charged [it] with generating continuous media and campaign tactic pressure" on Apple and Google. Epic Games hired a consultant to "help to establish a reason for [the Coalition] to exist (either organic or manufactured)." Epic Games then concealed the **[*938]** Coalition's existence until after the hotfix was triggered on August 13, 2020.[154]

Epic Games assumed its breach would result in the removal of *Fortnite* from the iOS and Android platforms. In fact, Mark Rein, Epic Games' co-founder, predicted "there's a **[**46]** better than 50% chance Apple and Google will immediately remove the games from their stores the minute we do this" and Daniel Vogel, the Chief Operating Officer, predicted Google and Apple will immediately pull the build for new players." "They may also sue us to make an example," he added.[155]

While Epic Games was willing to wage war against Apple and Google, it was not so inclined to crusade against the console platform owners: namely, Nintendo (Switch), Microsoft (Xbox), and Sony (PlayStation). Epic Games therefore planned to warn these console partners in advance about an upcoming pricing change for V-Bucks and to reassure them that they were not "next on [Epic Games'] list." As explained in an email to Microsoft on August 5, 2020, Mr. Sweeney alluded to Project Liberty which he boasted would "highlight the value proposition of consoles and PCs, in contrast to mobile platforms." Two days later he wrote, "you'll enjoy the upcoming fireworks show."[156]

Project Liberty required extensive planning and testing. Specialized engineers and an in-house information security team attempted to hack the code to ensure that Apple could not "reveal the intent" of the hotfix when it was **[**47]** submitted.[157] Epic Games also used analytics to determine the number of players that would receive the hotfix once triggered.[158]

157 Trial Tr. (Grant) 765:11-766:2.

By the end of June 2020, Epic Games had no interest in the parallel litigation which was pursuing similar ends. Nor did it intend to wait for the resolution of the ongoing *Pepper* and *Cameron* cases. Epic Games merely "ignored" them and "went forward on [its] own."[159] In other words, Epic Games decided it would rush to court with its own plan to protect its self-avowed interests in the "metaverse" and had established a rough timeline, to which it generally adhered: first communicating with Apple in June/July and then implementing the hotfix and marketing blitz in August.[160]

Thus, on June 30, 2020, Epic Games renewed the DPLAs for its account, the Epic International account, and a related entity (KA-RA S.a.r.l.) account by the payment of separate consideration.[161] With this backdrop, Epic Games sought a "side letter" or other special deal from Apple that would provide plaintiff with unique, preferable terms.[162] Mr. Sweeney sent an **[*939]** email to Apple executives, including Mr. Cook, requesting the ability to offer iOS consumers with: (i) competing payment processing options, **[**48]** "other than Apple payments, without Apple's fees, in *Fortnite* and other Epic Games software distributed through the iOS App Store"; and (ii) a competing Epic Games Store app "available through the iOS App Store and through direct installation that has equal access to underlying operating system features for software installation and update as the iOS App Store itself has, including the ability to install and update software as seamlessly as the iOS App Store experience."[163] Mr. Sweeney highlights that these two offerings would allow consumers to pay less for digital products and allow developers to earn more money. Although Mr. Sweeney wrote that he "hope[d] that Apple w[ould] also make these options equally available to all iOS developers in order to make software sales and distribution on the iOS platform as open and competitive as it is on personal computers,"[164] Mr. Sweeney admitted while testifying under oath that he "would have" accepted a deal "for [Epic Games] and no other developers."[165] In his email, Mr. Sweeney did not offer to pay Apple any portion of the 30 percent it charges on either app distribution or for in-app purchases.

On July 10, 2020, Apple Vice President and Associate **[**49]** General Counsel Douglas G. Vetter responded to Mr. Sweeney's email with a formal letter communicating, in essence: No. As relevant here, Mr. Vetter wrote:

> Apple has never allowed this. Not when we launched the App Store in 2008. Not now. We understand this might be in Epic's financial interests, but Apple strongly believes these rules are vital to the health of the Apple platform and carry enormous benefits for both consumers and developers. The guiding principle of the App Store is to provide a safe, secure and reliable experience for users and a great opportunity for all developers to be successful but, to be clear, when it comes to striking the balance, Apple errs on the side of the consumer.

Mr. Vetter also reiterated that Epic Games' request to establish a separate payment processor would interfere with Apple's own IAP system, which has been used in the App Store since its inception.[166]

On July 17, 2020, Mr. Sweeney responded to what he described as a "self-righteous and self-serving screed," writing that he hoped "Apple someday chooses to return to its roots building open platforms in which consumers have freedom to install software from sources of their choosing, and developers can **[**50]** reach consumers and do business directly without intermediation." He stated that Epic Games "is in a state of substantial disagreement

with Apple's policy and practices," and promised that it would "continue to pursue this, as [it] ha[s] done in the past to address other injustices in [the] industry." Epic Games did not reveal its plans to enable an alternate payment system through a hotfix.[167]

Next, in fulfilling Mr. Sweeney's promise, Epic Games covertly introduced a "hotfix" into the *Fortnite* version 13.40 update on August 3, 2020. Epic Games did not disclose that this hotfix would enable a significant and substantive feature to *Fortnite* permitting a direct pay option to Epic Games that would be activated when signaled by Epic Games' servers. Until this **[*940]** signal was sent out, this direct pay option would remain dormant. When activated, however, this direct pay option would allow iOS *Fortnite* players to choose a direct pay option that would circumvent Apple's IAP system. Relying on the representations that intentionally omitted the full extent and disclosure of this hotfix, Apple approved *Fortnite* version 13.40 to the App Store.[168]

The hotfix remained inactive until the early morning of August **[**51]** 13, 2020, when Epic Games activated the undisclosed code in *Fortnite*, allowing Epic Games to collect in-app purchases directly.[169] *Fortnite* remained on the App Store until later that morning, when Apple removed *Fortnite* from the App Store and it remains unavailable to this day. Epic Games timed the hotfix to go live two weeks before the launch of *Fortnite*'s Season 14.

Later that same day, the second phase came into full effect. Epic Games had prepared several videos, communications, and other media to blitz Apple. Epic Games filed this action and unleashed a pre-planned, and blistering, marketing campaign against Apple both on Twitter and with the release of a parody video of the iconic Apple 1984 commercial. The video called "*1980 Fortnite*" used the game-mode style of *Fortnite* and presented an in-brand explanation of what Epic Games had done, namely a *Fortnite* character destroying an "Apple overlord." On its website, the Coalition proclaimed that: "For most purchases made within the App Store, Apple takes 30% off the purchase price. No other transaction fee—in any industry—comes close."[170] The Coalition did not announce that Epic Games faced similar 30% rates from console platform owners. **[**52]** Epic Games also announced a *Fortnite* tournament in support of its lawsuit with in-game prizes and it released a limited time skin in *Fortnite* called the Tart Tycoon,[171] among other actions.[172]

The following day, on August 14, 2020, Apple responded sternly. It informed Epic Games that, based on its breaches of the App Store guidelines, and the DPLA, it would be revoking all developer tools, which would preclude updates for its programs and software. Apple gave Epic Games two weeks to cure its breaches and to comply with the App Store guidelines and the agreements. Apple also identified general consequences for any failure to comply, but specifically cited *Unreal Engine* as potentially being subject to its decision should Epic Games fail to comply within the two-week period.[173]

Thereafter, on August 17, 2020, Epic Games filed the request for a temporary restraining order, requesting the reinstatement of *Fortnite* with its activated hotfix onto the App Store, and enjoining Apple from revoking the developer tools belonging to the Epic Games and its affiliates. The Court declined to reinstate *Fortnite* onto the App

Store, but temporarily restrained Apple from taking any action with respect to the plaintiff's **[**53]** affiliates' developer tools and accounts.[174]

[*941] On August 28, 2020, on the expiration of the two-week deadline, Apple terminated Epic Games' developer program account, referenced as Team ID '84.[175] Apple subsequently, and repeatedly, offered to allow Epic Games to return *Fortnite* to the App Store, so long as Epic Games agreed to comply with its contractual commitments. Epic Games has consistently declined.[176]

On October 9, 2020, the Court issued an Order Granting in Part and Denying in Part the motion for preliminary injunction.[177] Given the issuance of the injunction, and that discovery from the other two class action lawsuits could be leveraged in this action, the Court granted Epic Games' request to conduct a bench trial on an expedited basis. Apple objected requesting, at a minimum, three additional months.

C. Apple: Relevant History of the iOS and iOS Devices

1. *The Early Years*

In 2007, Apple developed the iPhone creating a new and innovative ecosystem to break into the cellular device market with established competitors such as Samsung, Nokia, LG, Sony, Blackberry, Motorola, Windows Mobile, and Palm. No one disputes that the iPhone was revolutionary and fundamentally changed **[**54]** the cellular device market. Given the years that have passed, one may forget how fundamentally different the iPhone was to the alternatives. After 30 months of development, Apple offered consumers a new design, with a multi-touch interface powered by advanced hardware and software architecture. The device offered users the ability to access email, browse the web, and perform certain software applications by simply tapping a square-ish icon on the screen called an "app," short for a software application. These apps operate from a foundational layer of software called an operating system which, in the iPhone ecosystem, is called the iOS.

Initially, when the iPhone was first launched, Apple developed and preinstalled the device with a few "native" apps. "Native" apps are those apps which are developed for a particular mobile device as opposed to "web" apps which are Internet-based and allow applications to be accessed and enabled on a mobile device by using a web browser on the device. Initially, Apple prohibited downloads of native apps from any third party.

Shortly after launch, Apple executives hotly debated whether to open development of native apps to third-party developers. As history **[**55]** knows, those in favor succeeded. The gamble literally paid off. Since 2007, the industry has continued to evolve and transform rapidly.

2. *Role of App Developers Generally and Epic Games*

The 2007 iPhone pales in comparison to today's version. With 20-20 hindsight, we can conclude that Apple's gamble to save a languishing company paid off.[178] The lens with which to evaluate those early seminal years matters. Apple was not the monolith it is today. It is easy, but not fair, to twist words today for self-serving reasons and forget the landscape in which they were made.

---

[174] *See generally* Dkt. No. 48 (Order Granting in Part and Denying in Part Motion for Temporary Restraining Order). Meanwhile, discovery in the parallel cases was contentious, yet ongoing.

[175] Trial Tr. (Sweeney) 171:10-172:2; Dkt. 428 ¶ 34.

[176] Trial Tr. (Cook) 3918:18-3919:6.

[177] *See generally* Dkt. No. 118.

[178] Trial Tr. (Schiller) 2715:17-25.

As innovators in the early days, Apple executives were navigating trying to determine what would work and what would not. A few key principles guided decision-making, at least initially. First and foremost, the iPhone was a cellphone. If the **[*942]** cellphone did not work or crashed, the product would not be successful regardless of all the bells and whistles. Second, given the introduction of apps, securing the device from malicious software was paramount.

Many developers responded to the iPhone launch by "jailbreaking phones and writing native applications." Jailbreaking occurs when a developer modifies Apple's iOS to enable the installation **[**56]** of unauthorized software, including applications from other interfaces. Jailbreaking can create severe security risks regarding installation of malicious apps and data exposure. Despite warnings regarding the risks, developers continued the practice which precipitated renewed discussions within Apple to permit authorized native apps to be developed by third-party developers.[179]

As the discussions ensued, the core principles remained: reliability of the device as a cellphone and device security. With these objectives in mind, on October 17, 2007, Apple announced that it would allow third-party developers to create iOS apps by licensing them with the interfaces and technology to do so. Apple then dedicated resources to create, and then release on March 6, 2008, a software development kit or SDK as well as information for a series of application programming interfaces or APIs to allow developers to create apps which would work on Apple's proprietary operating system. The APIs unlocked features such as location awareness functionality, media applications, video playback, and numerous other tools to enhance the developer's ultimate product.

The creation, constant update, and modernization of **[**57]** the SDKs and APIs was not insignificant. To protect its system, Apple built tools, kits, and interfaces that would allow other developers to build native apps. Epic Games did not introduce any evidence to rebut Apple's claim that in those initial years, the engineering work was novel, sophisticated, time-consuming and expensive. These tools simplified and accelerated the development process of native apps. Today, years later, as with many industries, it is not surprising that the more sophisticated, better financed, and larger-scale developers, such as Epic Games, may find less value in today's SDKs and APIs. That does not necessarily apply across the board to all developers, nor does it eliminate value in its entirety.

3. *Apple's Contractual Agreements with Developers*

Apple distributes its basic developer tools for free but charges an annual fee for membership in its developer program to distribute apps and which allows access to, for instance, more advanced APIs (many of which are protected by patents, copyrights, and trademarks) and beta software.[180] Through the DPLA, Apple licenses, wholesale, its intellectual property.

To join the "Developer Program," one must execute the DPLA, pay **[**58]** a fee of $99.00[181] and provide some basic information such as a valid debit/credit card; a valid name, address and telephone number; and sometimes, a government-issued photo identification. In the case of an entity, Apple also requires the entity's legal name, D-U-N-S number, as well as other information.

In the beginning, the App Store's U.S. storefront offered 452 third-party apps (including 131 game apps) by 312 distinct developers. In fiscal year 2019, there were over 300,000 game apps available on the **[*943]** App Store.[182] With over 30 million registered iOS developers,[183] it is not particularly surprising, or necessarily nefarious, that Apple does not negotiate terms generally. With few exceptions, Apple maintains the same relationships with

[179] Ex. Depo. (Forstall) 86:1-5; Ex. Expert 11 (Rubin) ¶ 76; Trial Tr. (Schiller) 2729:11-2730:17.

[180] Trial Tr. (Schiller) 2758:3-8, 2758:17-24.

[181] This fee also includes the ability to consult twice with the Apple technical services team. Each additional incident requires paying a $99 "per incident" payment.

[182] Ex. Expert 6 (Hitt) ¶ 169.

[183] Trial Tr. (Schiller) 2759:9-17.

developers whether big or small. This decision, too, is controversial as the impact varies between small and large developers.

a. Key Terms of the DPLA and App Guidelines

Relevant here, the DPLA details programming requirements, which the Court outlines first, and establishes payment terms, which the Court discusses second. While reduced here to bullet points and footnotes, the DPLA is a portfolio licensing agreement with complex and comprehensive provisions **[**59]** addressing not only intellectual property rights, but those relating to marketing, agency, indemnity, and myriad other considerations. Moreover, the DPLA changed over the last decade. Unless otherwise stated, the Court focuses on the 79-page version (excluding schedules) governing Apple's relationship with Epic Games in August 2020.[184]

Thus, with respect to programing, developers are required to:

- Certify that they will comply with the terms of the agreement (Section 3.1)[185];
- Use the software in a manner consistent with Apple's legal rights (Section 3.2)[186];
- Create apps for Apple products which could only be distributed through the App Store (Section 3.2)[187];
- Submit proposed apps for review to ensure they were properly documented and did not contravene the program requirements (Section 3.3.2[188] and 3.3.3[189]);

[*944] • Configure apps to use IAP when the purchases are subject to the commission (Section 3.2.(f)[190]); and

---

184 *Id.* 2759:22-2760:9, 2761:21-25; PX-2619; Trial Tr. (Malackowski) 3701:1-14, 3642:10-15.

185 Developers "certify to Apple and agree that," among other things, they "will comply with the terms of and fulfill [their] obligations under this Agreement, including obtaining any required consents for [their] Authorized Developers' use of the Apple Software and Services, and [developers] agree to monitor and be fully responsible for all such use by [their] Authorized Developers and their compliance with the terms of this Agreement." PX-2619.015.

186 "Applications for iOS Products, AppleWatch, or Apple TV developed using the Apple Software may be distributed only if selected by Apple (in its sole discretion) for distribution via the App Store, Custom App Distribution, for beta distribution through TestFlight, or through Ad Hoc distribution as contemplated in this Agreement." PX-2619.016.

187 *Id.*

188 "Except as set forth in the next paragraph, an Application may not download or install executable code. Interpreted code may be downloaded to an Application but only so long as such code: (a) does not change the primary purpose of the Application by providing features or functionality that are inconsistent with the intended and advertised purpose of the Application as submitted to the App Store, (b) *does not create a store or storefront for other code or applications*, and (c) does not bypass signing, sandbox, or other security features of the OS.

An Application that is a programming environment intended for use in learning how to program may download and run executable code so long as the following requirements are met: (i) no more than 80 percent of the Application's viewing area or screen may be taken over with executable code, except as otherwise permitted in the Documentation, (ii) the Application must present a reasonably conspicuous indicator to the user within the Application to indicate that the user is in a programming environment, (iii) *the Application must not create a store or storefront for other code or applications*, and (iv) the source code provided by the Application must be completely viewable and editable by the user (e.g., no pre-compiled libraries or frameworks may be included with the code downloaded)." (Emphasis supplied.)

189 "Without Apple's prior written approval or as permitted under Section 3.3.25 (In-App Purchase API), an Application may not provide, unlock or enable additional features or functionality through distribution mechanisms other than the App Store, Custom App Distribution or TestFlight."

190 "You will not, directly or indirectly, commit any act intended to interfere with . . . Apple's business practices including, but not limited to, taking actions that may hinder the performance or intended use of the App Store, ... Further, You will not engage, or encourage others to engage, in any unlawful, unfair, misleading, fraudulent, improper, or dishonest acts or business practices relating to Your Covered Products (e.g., engaging in bait and-switch pricing, consumer misrepresentation, deceptive business practices, or unfair competition against other developers)."

• Agree not to "attempt to hide, misrepresent or obscure any features, content, services or functionality" (Section 6.1)[191].

In 2010, Apple also created the App Guidelines which are more fully discussed below.[192] As a corollary to Section 3.3.3 of the DPLA, Section 3.1.1 of the App Guidelines was the clearest articulation of the anti-steering provision with respect to in-app purchases. It reads:

> If you want to unlock features or functionality within your app, (by way of example: subscriptions, in-game currencies, game levels, access to premium content, or unlocking a full version), you must use in-app purchase. Apps may not use their own mechanisms to unlock content or functionality, such as license keys, augmented reality markers, QR codes, etc. *Apps and their metadata may not include buttons, external links, or other calls to action that direct customers to purchasing mechanisms other than in-app purchase*.[193]

Section 2.3.10 of the Guidelines reads: ". . . don't include names, icons, or imagery of other mobile platforms in your app or metadata, unless there is a specific, approved **[**61]** interactive functionality" and Section 3.1.3 Other Purchase Methods states: "The following apps may use purchase methods **[*945]** other than in-app purchase. Apps in this section cannot, either within the app or through communications sent to points of contact obtained from account registration within the app (like email or text) encourage users to use a purchasing method other than in-app purchase."[194]

In terms of payment, Apple knew from the outset that developers would either distribute their apps for "free" or by selling them. The DPLA contained Schedules 1 and 2 to address each category, respectively.

"Free" as used here specifically means an app for which a consumer does not pay to download, and which does not sell any digital goods or subscriptions. Thus, free apps do not generate any revenue for Apple. However, some developers monetize their free app with advertising.[195] In fiscal year 2019, 83% of apps with at least one download on the App Store were free to consumers, including 76% of game apps of which there are over 300,000.[196]

On the other hand, the "freemium model" (used by *Fortnite*) is one where the initial download is "free", but revenue comes from in-app purchases or payments for upgrades. **[**62]** Apps which do charge for downloads or digital goods bought within an app fall under the purview of Schedule 2.

---

[191] "You may submit Your Application for consideration by Apple for distribution via the App Store or Custom App Distribution once You decide that Your Application has been adequately tested and is complete. By submitting Your Application, You represent and warrant that Your Application complies with the Documentation and Program Requirements then in effect as well as with any additional guidelines that Apple may post on the Program web portal or in App Store Connect. *You further agree* ***[**60]*** *that You will not attempt to hide, misrepresent or obscure any features, content, services or functionality in Your submitted Applications from Apple's review or otherwise hinder Apple from being able to fully review such Applications*. . . . You agree to cooperate with Apple in this submission process and to answer questions and provide information and materials reasonably requested by Apple regarding Your submitted Application, including insurance information You may have relating to Your Application, the operation of Your business, or Your obligations under this Agreement. . . . If You make any changes to an Application (including to any functionality made available through use of the In-App Purchase API) after submission to Apple, You must resubmit the Application to Apple. Similarly all bug fixes, updates, upgrades, modifications, enhancements, supplements to, revisions, new releases and new versions of Your Application must be submitted to Apple for review in order for them to be considered for distribution via the App Store or Custom App Distribution, except as otherwise permitted by Apple. (Emphasis supplied.)

[192] All developers agree to abide by the App Guidelines, among others. PX-2619.070.

[193] PX-2790 (emphasis supplied).

[194] Apple's anti-steering provision as it relates to subscriptions is found in Section 3.11 of the DPLA. However, as shown herein, subscriptions are not part of the action. Other related provisions in the Guidelines include 3.1.3(a) and 3.1.3(b).

[195] Ex. Expert 6 (Hitt) ¶¶ 134, 206.

[196] Trial Tr. (Hitt) 2094:13-23; Ex. Expert 6 (Hitt) ¶¶ 156, 169.

Section 3.4 of Schedule 2 provides the basic 30 percent rate and reads:[197]

> Apple shall be entitled to the following commissions in consideration for its services as Your agent and/or commissionaire under this Schedule 2:
>
> (a) For sales of Licensed Applications to End-Users located in those countries listed in Exhibit B, Section 1 of this Schedule 2 as updated from time to time via the App Store Connect site, Apple shall be entitled to a commission equal to thirty percent (30%) of all prices payable by each End-User.[198]

Under the terms of the DPLA, "the Licensed Applications" cannot be activated until approved by Apple. For all digital purchases, Apple charges a 30% commission and only recently instituted some exceptions. Purchases which are not digitally confirmed, such as those related to physical goods, such as take-out food or Amazon purchases, do not result in a commission to Apple.

Apple does not dictate to developers how or what to price an app or how to monetize their product. However, it did impose certain parameters, namely the prices of apps need to end in $0.99 and must appear **[**63]** within predesignated bands. There is no evidence that this has impacted Epic Games at all or that it has created any widespread problems. Rather, plaintiff cites only to testimony of Matthew Fischer, Apple's Vice President of App Review, that developers have asked "from time to time" for more flexibility. With respect to international pricing, Apple has a single "tier" but evidence was not admitted to show any problems with the tiered system.[199]

[*946] At best, the evidence on this issue is scant and not fully developed. Mr. Fischer testified that developers have at times asked for "more flexibility to charge different prices for in-app purchases," and Apple has consistently declined.[200] Whether this is a significant issue is unknown. Certainly, Epic Games, the plaintiff here, never asked to change the pricing. The Court suspects that it is because of the common marketing view that ending a price in $0.99 conveys a bargain price to the consumer. That said, Apple did little to justify the restriction.[201] On balance, the Court finds nothing anticompetitive with these two requirements based on this record.

b. <u>Apple's App Store as an App Transaction Platform</u>

Having made the decision to allow third-party **[**64]** developers to license the tools to make "apps" for the iPhone, Apple also needed to develop a place or manner in which the developers and the users could connect. Apple wrote a series of applications, combined them all, and called it the App Store. Apple designed the App Store not only to allow third-party developers to reach consumers with their apps, but to notify customers when updates were available: "tap the Update button and [the] app will be replaced by the updated version . . . over the air, all automatically." The App Store functionality and access thereto is at the heart of the action.

Apple's late Chief Executive Order ("CEO"), Mr. Steve Jobs, recognized that the "purpose in the App Store is to add value to the iPhone" and ultimately "sell more iPhones." Apple's current Vice President of Developer Relations, Mr.

---

[197] PX-2621. Section 3.4 is preceded by sections outlining the marketing and hosting agreements between Apple and the developers, albeit Apple did not guarantee any quantifiable services.

[198] PX-2621. Subsection 3.4(a) proscribes a 15% rate for subscriptions which are not part of this case.

[199] Ex. Depo. 9 (Fischer) 266:16-24. Thus, Schedule 2 to the DPLA states that Apple markets third-party apps "at prices identified by [the developer] . . . from the pricing schedule attached . . . as Exhibit C." Any price changes must be "in accordance with the pricing schedule." The tiers generally require the same price across all countries; for example, a $ 0.99 tier requires the equivalent of $ 0.99 in local currency in India. PX-2621 § 3.1, Ex. C; PX-2202; Ex. Depo 12 (Gray) 26:3-5, 195:15-196:14, 206:13-207:18, 208:6-9.

[200] Ex. Depo. 9 (Fischer) 266:12-19.

[201] Apple does not directly respond but argues that currency conversion is a benefit of IAP. *See* Apple FOF ¶ 692. To the extent this true, Apple has not explained why it cannot afford more flexibility in unique circumstances. Mr. Gray testified that Apple selected 99 cent tiers based on its prior experience without apparently consulting developers. Ex. Depo. 12 (Gray) 195:24-196:14.

Ron Okamoto, similarly acknowledged that well-known developers make Apple's platforms more attractive to users and lead them to buy Apple devices.[202] Thus, the symbiotic relationship was created.

Apple's intellectual property as it relates to the iOS ecosystem generally are significant. The record is undisputed that Apple holds approximately 1,237 U.S. patents with 559 patent applications **[**65]** pending. With respect to the App Store itself, Apple holds an additional 165 U.S. patents with 91 more U.S. patent applications pending. Other than these patents, Apple does not identify specifically how the rest of its intellectual property portfolio impacts the technology at issue in this case nor does it specifically justify its 30% commission based on the value of the intellectual property. It only assumes it justifies the rate.[203]

Over recent years, the evidence established that a significant portion of the App Store revenue is built upon long-term relationships between developers and consumers **[*947]** independent of Apple. Indeed, during a 2019-2020 presentation, Apple recognized this transition, noting that the "top monetizing game are services that entertain customers for years." Specifically, "[i]n any given month, 41% of [Apple's] monthly billings are generated from apps that were downloaded more than 180 days prior," as contrasted to 31% for apps downloaded between 30 and 180 days prior and to 28% for apps downloaded less than 30 days prior. "As a result, a significant share of our billings are generated not from apps that were just downloaded, but from apps that customers **[**66]** re-engage with long after the first download." Even Apple concedes that "this engagement is almost completely driven by [App Store] developers, and the App Store does not participate in a meaningful way."[204]

c. <u>Apple's Commissions Rates: 30 percent; 15 percent; recent changes</u>

Apple's establishment of a 30% commission rate has remained static since the onset. Mr. Philip Schiller, who was there at the beginning, testified that the App Store charged the same percentage as other gaming stores, like Steam and Handango. Mr. Eddy Cue, another Apple executive, who made the pricing decision with Mr. Jobs, recognized that "[t]here wasn't really any kind of App Store" when it first launched, so Apple looked at distribution of hard goods and software instead. Because distributing hard versions of software cost 40% to 50%, lowering the commission to 30% was considered a "huge decrease" intended to "get developer really excited about participating in the platform." Importantly, and undisputed, Apple chose the 30% commission without regard to or analysis of the costs to run the App Store.[205]

Prior to 2011, users could read content from subscriptions made outside iOS, but were limited to a one-time subscription, **[**67]** not recurring subscriptions. In 2011, Apple expanded its functionality to allow for the sales of recurring subscriptions when purchased in the app store but required a 30 percent commission.[206] Finally, in late 2020, Apple introduced the Small Business Program. That program reduced Apple's commission to 15% for developers making less than one million dollars.[207]

Apple's implementation of the Small Business Program was spurred, in part, by the COVID-19 pandemic. However, Mr. Cook also admitted that "lawsuits and all the rest of the stuff" was "in the back of [his] head." Mr. Schiller similarly testified that the Small Developer Program began with a lot of "commentary" about "App Store's commission level," but was pushed over the edge by the pandemic. He too expressly acknowledged that the current lawsuit helped "get it done" along with "scrutiny and criticism . . . from around the world."[208]

---

[202] PX-2060.018-.019; Ex. Depo. (Okamoto) 324:04-325:10; Ex. Expert 1 (Evans) ¶ 19; Ex. Expert 8 (Schmalensee) ¶ 44.

[203] *See generally* Ex. Expert 12 (Malackowski) (noting that the intellectual property has value, but not providing any numerical value).

[205] Trial Tr. (Schiller) 2725:23-2726:9, 2740:8-15; Ex. Depo. 8 (Cue) 135:08-136:14, 141:13-142:09.

[206] Trial Tr. (Schiller) 3183:9-3184:25.

[207] *Id.* 2810:16-2811:5.

[208] Trial Tr. (Cook) 3992:4-3993:1; Trial Tr. (Schiller) 2812:1-2813:10, 3070:13-25.

Over time, and given Apple's success, some developers have actively complained about the 30% commission. The Court recognizes that developers have sued Apple on behalf of a class arguing that the rate is too high. Unlike those developers, Epic Games challenges the levy of *any* commission and did not offer **[**68]** a survey showing developers agreed with this position; only the anecdotal evidence of a couple.[209] It is **[*948]** logical that no developer would want to pay prices higher than is competitive or necessary. However, it is also true that, with few exceptions, not every business is entitled to have access to what is effectively shelf space if they cannot afford to pay a commission to the platform host.

While Apple's 30 percent commission began as a corollary to the 30 percent rate being charged in the gaming industry, the evidence is substantial that the economic factors driving that rate do not apply equally to Apple. Other gaming industry participants operate under a distinctly different economic model, facing different levels of competitive pressure. *See infra* Facts § II.D.2-4. For example, unlike those in the computer gaming market, nothing other than legal action seems to motivate Apple to reconsider pricing and reduce rates.[210]

4. *Apple's Management of Apps — App Guidelines*

Initially, Apple envisioned the App Store as a highly curated selection of apps. With only 500, then 25,000, apps in its initial collection, the vision was achievable.[211] As the number of apps skyrockets, Apple strains in its **[**69]** claim that the current version of the App Store promises the same curated product. Though Apple has removed over 2 million outdated apps, and rejected those not meeting the Guidelines, the App Store still another contains 2 million apps of which over 300,000 are games.[212]

Curation in the current era merely means that an app must comply with the App Guidelines, first published in 2010. Some of the Guidelines are not reasonably controversial.[213] For instance, Apple will not authorize certain apps such as porn, malicious apps, 'unforeseen' apps, apps that invaded one's privacy, illegal apps, and even bandwidth hog[s].[214] Epic Games claims that Apple's efforts in this regard are substandard, raising concerns regarding the effectiveness and quality of the current review process. Unfortunately, Epic Games only scratched the surface and did not provide particularly compelling evidence of its perspective.[215]

Missing from the record is any normative measure of what standard guidelines should be. Perfection is not practical nor the business norm. Internal documents show that Apple responded to developers who were complaining of the time for reviewing of apps and updates. Apple promises in its Service Level **[**70]** Agreement to complete a review of an app quickly: 50 percent within 24 hours and 90 percent within 48 hours. Apple claims that it is completing 96 percent of the reviews within 24 hours.[216] Anecdotal evidence from Mr. Benjamin Simon, President and CEO of Down Dog, suggests that those statistics **[*949]** are skewed but there was no further exploration on the topic.

---

[209] The Court also makes a distinction with respect to the testimony of Ms. Wright who explicitly was *not* testifying on behalf of Microsoft. Had Microsoft wanted to weigh in; it could have.

[210] The Court is aware of the additional, and unchallenged, concerns relating to money laundering, fraud, and other risks that Apple debated in terms of changing the commission. Trial Tr. (Schiller) 2813:11-2814:7; PX-2390.200. While valid, at least with respect to money laundering, the reference point was 15% which is half the static 30% commission rate.

[211] PX-0880.020; Trial Tr. (Schiller) 2754:7-8; 2785:15-25.

[212] Trial Tr. (Schiller) 2833:25-2834:2; 2846:11-2847:24.

[213] PX-0056A; Trial Tr. (Schiller) 2833:25-2834:2.

[214] PX-2619, § 3.3.20, 3.3.21, 3.3.26, 3.3.29.

[215] For instance, Epic Games spent considerable time arguing that numerous apps were, in fact, porn. Upon further review, while salacious, the proffer was devoid of merit and merely emphasized the lack of evidence on this point.

[216] Trial Tr. (Kosmynka) 1110:10-1111:2; Trial Tr. (Federighi) 3467:11-24, 3502:23-3504:15.

The App Guidelines address issues of safety, privacy, performance, and reliability. The fact that the Guidelines are not static does not raise per se concerns because the issues are similarly non-static.[217] Evidence exists to show that the Guidelines are used in appropriate ways for appropriate purposes. *See infra* Facts § V.A.2.a.ii. For instance, Apple proactively requires, much to some developers' chagrin, measures to protect data security,[218] privacy, data collection and storage.[219] The **[*950]** data collection and disclosure requirements are not

---

[217] PX-0056A.100 ("This is a living document, and . . . may result in new rules at any time."); PX-0056; PX-2790; Trial Tr. (Fischer) 947:6-14 ("We do change the guidelines."); Trial Tr. (Kosmynka) 984:14-16; Trial Tr. (Schiller) 2833:15-21 ("They are modified at least yearly, sometimes more than once in a year.").

[218] Section 1.6 states that "[a]pps should implement appropriate security measures to ensure proper handling of user information collected pursuant to the Apple [DPLA] and these Guidelines (see Guideline 5.1 for more information) and prevent its unauthorized use, disclosure, or access by third parties." PX-2790.005.

[219] 5.1.1 Data Collection and Storage:

(i) Privacy Policies: All apps must include a link to their privacy policy in the App Store Connect metadata field and within the app in an easily accessible manner. The privacy policy must clearly and explicitly:

- Identify what data, if any, the app/service collects, how it collects that data, and all uses of that data.
- Confirm that any third party with whom an app shares user data (in compliance with these Guidelines) — such as analytics tools, advertising networks and third-party SDKs, as well as any parent, subsidiary or other related entities that will have access to user data — will provide the same or equal protection of user data as stated in the app's privacy policy and required by these Guidelines.
- Explain its data retention/deletion policies and describe how a user can revoke consent and/or request deletion of the user's data.

(ii) Permission Apps that collect user or usage data must secure user consent for the collection, even if such data is considered to be anonymous at the time of or immediately following collection. Paid functionality must not be dependent on or require a user to grant access to this data. Apps must also provide the customer with an easily accessible and understandable way to withdraw consent. Ensure your purpose strings clearly and completely describe your use of the data. Apps that collect data for a legitimate interest without consent by relying on the terms of the European Union's General Data Protection Regulation ("GDPR") or similar statute must comply with all terms of that law. Learn more about Requesting Permission.

(iii) Data Minimization: Apps should only request access to data relevant to the core functionality of the app and should only collect and use data that is required to accomplish the relevant task. Where possible, use the out-of process picker or a share sheet rather than requesting full access to protected resources like Photos or Contacts.

(iv) Access: Apps must respect the user's permission settings and not attempt to manipulate, trick, or force people to consent to unnecessary data access. For example, apps that include the ability to post photos to a social network must not also require microphone access before allowing the user to upload photos. Where possible, provide alternative solutions for users who don't grant consent. For example, if a user declines to share Location, offer the ability to manually enter an address.

(v) Account Sign-In: If your app doesn't include significant account-based features, let people use it without a log-in. Apps may not require users to enter personal information to function, except when directly relevant to the core functionality of the app or required by law. If your core app functionality is not related to a specific social network (e.g. Facebook, via another mechanism. Pulling basic profile information, sharing to the social network, or inviting friends to use the app are not considered core app functionality. The app must also include a mechanism to revoke social network credentials and disable data access between the app and social network from within the app. An app may not store credentials or tokens to social networks off of the device and may only use such credentials or tokens to directly connect to the social network from the app itself while the app is in use.

(vi) Developers that use their apps to surreptitiously discover passwords or other private data will be removed from the Developer Program.

(vii) SafariViewController must be used to visibly present information to users; the controller may not be hidden or obscured by other views or layers. Additionally, an app may not use SafariViewController to track users without their knowledge and consent.

(viii) Apps that compile personal information from any source that is not directly from the user or without the user's explicit consent, even public databases, are not permitted on the App Store.

insignificant. They require user consent, minimization, and affirmative permissions. These specifications place the customer's concerns ahead of the developers and are on the forefront of protecting user data; measures not all developers embrace, especially where they want to monetize that data. Epic Games **[**71]** claims that these restrictions inhibit their ability to service customer needs. Both perspectives contain a measure of truth. However, the latter is less persuasive because the servicing is an option **after** the customer consents, while the alternative would mean that data is collected and used without the customer knowing.

Tangentially related is the App Guidelines' approach to cloud-based game streaming which is discussed below with respect to market definition. *See infra* Facts § II.D.3.d. The evidence on this front post-dated the filing of this lawsuit. Thus: **[**72]** in September 2020, Apple modified the Guidelines to allow for the inclusion of game streaming apps, but only if each streamed app is made available as a separate app on the App Store.[220] Nvidia, Microsoft, and Google sought to launch their game streaming services as native iOS apps before Apple modified its Guidelines, but all three were rejected by Apple.[221] None of these services chose to subsequently launch separate iOS apps—one per streamed game—as required by the new App Guidelines.[222] Craig Federighi, Apple's Senior Vice President of Software Engineering, testified that there are currently **[*951]** no streaming apps for game apps on the App Store.[223] Apple allows entertainment apps such as video and music apps to stream. The restriction only applies to gaming.

Epic Games raises legitimate concerns regarding some of the consequences of Apple's App Guidelines and its refusal to share control of data absent customer agreement.

First, Apple does a poor job of mediating disputes between a developer and its customer. Consumers do not understand that developers have effectively no control over payment issues and or even access to consumers' information. Consequently, it can be frustrating for both sides when **[**73]** issues arise relating to the inability to issue and manage the legitimacy of requests for refunds.[224]

With respect to refunds, the DPLA gives Apple "sole discretion" to refund a full or partial amount of user purchases. When developers want to refund a customer purchase, they must contact Apple or tell the customer to contact

---

(ix) Apps that provide services in highly-regulated fields (such as banking and financial services, healthcare, gambling, and air travel) or that require sensitive user information should be submitted by a legal entity that provides the services, and not by an individual developer.

5.1.2 Data Use and Sharing

(i) Unless otherwise permitted by law, you may not use, transmit, or share someone's personal data without first obtaining their permission. You must provide access to information about how and where the data will be used. Data collected from apps may only be shared with third parties to improve the app or serve advertising (in compliance with the Apple Developer Program License Agreement.). Apps that share user data without user consent or otherwise complying with data privacy laws may be removed from sale and may result in your removal from the Apple Developer Program.

(ii) Data collected for one purpose may not be repurposed without further consent unless otherwise explicitly permitted by law.

(iii) Apps should not attempt to surreptitiously build a user profile based on collected data and may not attempt, facilitate, or encourage others to identify anonymous users or reconstruct user profiles based on data collected from Apple-provided APIs or any data that you say has been collected in an "anonymized," "aggregated," or otherwise non-identifiable way.

[220] PX-0056.180 ("Each streaming game must be submitted to the App Store as an individual app so that it has an App Store product page, appears in charts and search, has user rating and review, can be managed with ScreenTime and other parental control apps, appears on the user's device, etc.").

[221] Trial Tr. (Patel) 438:24-439:15; Trial Tr. (Wright) 534:18-535:8; PX-2048.100 ("Stadia by Google has been rejected by ERB"); PX-2109.100 ("NVIDIA GeForce NOW has been rejected by ERB").

[222] Trial Tr. (Patel) 440:25-441:4; Trial Tr. (Wright) 650:15-651:6.

[223] Trial Tr. (Federighi) 3490:4-6.

[224] Trial Tr. (Simon) 369:23-373:3.

Apple, which independently "evaluate[s] that situation."[225] Thus, developers lack the ability to provide refunds and have worse customer service as the result. For example, Match Group's Operations Vice-President testified that Apple prevents Match Group from implementing its preferred refund policy or tailoring refunds to users' history, which leads to poor experiences with its products and hurts its brand.[226]

Moreover, because Apple lacks visibility into the transaction, it has created overly simplistic rules to issue refunds which can also increase fraud.[227] For example, apps have suffered from return fraud, where the customer enjoys or resells content and then obtains a refund by providing false information. Prior to 2020, Apple did not even provide developers with information that a refund had been issued, and they had no ability to remove the refunded feature to prevent **[**74]** its further use. Mr. Schiller explains that Apple has this requirement because customers "want to reach out to us when they have a problem with the developer and want a refund."[228] That explanation is plausible if the developer caused the issue that requires a refund. However, if the refund arises from a general customer service issue, the developer is likely better suited to address the issue. Although Apple introduced new tools to address this issue in 2020, it did so only after years of complaints.[229]

Apple argues that its policies protect consumers against fraudulent attacks. The data is far from clear. What is certain is Apple's decision prohibits information from flowing directly to the customer so that customers can make these choices themselves.

[*952] Second, Epic Games argues that the lack of direct connection to consumers impacts a developer's ability to obtain key analytics, such as "real-time reporting about its customers' spending behavior." While Epic Games may profit from having "real-time reporting" about an individual spending behavior, ample evidence shows that Epic Games already reaps immense profits from impulse purchasing. Little societal value exists in allowing plaintiff to **[**75]** capitalize on more customer data to exploit customer habits.

Other examples, however, seem more legitimate such as Match Group's desire to obtain the information to run registered sex offender checks and age verification. Mr. Ong attributes this fact to a "one-size-fits-all" approach that prevents it from building safety features "that are relevant to [its] users." In truth, the evidence is more mixed with a split among developers regarding the amount and usefulness of certain information with respect to analytics.[230] As noted, the issue is double-edged as it impacts user privacy.

5. *App Store Operating Margins*

Plaintiff's expert, Ned Barnes, through both reverse engineering and review of documents from Tim Cook's files, calculated operating margins to be over 75% for both fiscal years 2018 and 2019.[231] Mr. Barnes explained:

> Operating margin measures the profitability of a business or business segment by calculating the excess of revenue over costs. It is defined as net revenue (or sales) minus both (i) costs of goods sold ("COGS") and (ii) operating expenses ("OPEX") such as selling, general and administrative expenses, and research and

[225] PX-2621.600; Ex. Depo. 12 (Gray) 126:6-127:5, 128:2-25.

[226] Ex. Depo. (Ong) 34:10-36:23, 48:17-51:06, 162:03-22; Trial Tr. (Sweeney) 91:24-92:7; Trial Tr. (Simon) 372:9-373:3; Ex. Depo. 12 (Gray) 128:8-25. Mr. Simon provides another example: Down Dog has a generally lenient refund policy that provides frequent exceptions, such as for health workers and users who liked a feature that was deprecated. Apple's approach is stricter and more uniform, which prevents Down Dog from implementing its preferred policy. Trial Tr. (Simon) 370:2-373:17.

[227] Apple employees have acknowledged that this "causes some customers to be treated unfairly while also allowing for fraudulent claims to be refunded." PX-2189.100.

[228] Trial Tr. (Schiller) 2798:24-2799:11.

[229] Ex. Depo. 12 (Gray) 146:8-147:20, 150:15-151:05; Trial Tr. (Schiller) 2799:17-2800:11; PX-2062 (complaints in 2018).

[230] Ex. Depo. (Ong) 169:24-173:19; Trial Tr. (Sweeney) 128:22-24; PX-2362.300; Ex. Expert 8 (Schmalensee) ¶ 150; Ex. Expert 11 (Rubin) ¶ 127; DX-3922.106.

[231] Ex. Expert 2 (Barnes) ¶¶ 2, 4, 5.

> development ("R&D") expenses. Operating margin percentage **[**76]** is calculated by dividing the nominal amount of operating margin dollars by the nominal amount of net revenue.[232]

In addition, Mr. Barnes reviewed internal documents reflecting profit and loss ("P&L") statements specific to the App Store and presented to Apple executives. These documents support Mr. Barnes' independent conclusions.[233] Other documents indicate that at least by fiscal year 2013, the margin percentages exceeded 72%.[234]

Apple counters that it does not maintain profit and loss statements for individual divisions and that Mr. Barnes' analysis is inaccurate. The Court disagrees with the latter. Mr. Barnes made appropriate adjustments based on sound economic principles to reach his conclusions. Apple's protestations to the contrary, notwithstanding the evidence, shows that Apple has calculated a fully burdened operating margin for the App Store as part of their normal business operations. Apple's financial planning and analysis team are tracking revenues, fixed and variable operating costs, and allocation of IT, Research & Development, and corporate overheads to an App Store P&L statement. The team's calculation was largely consistent with that of Mr. Barnes. Although there **[**77]** are multiple ways to account for shared costs in a business unit, the consistency between Mr. Barnes' analysis and Apple's own internal documents suggest that Mr. Barnes' analysis is a reasonable assessment of the App Store's operating margin.

However, when Mr. Barnes extended the analysis to compare his findings to other online stores, he chose poorly. Mr. **[*953]** Barnes analyzed the operating margins for the following online stores for the years spanning 2013 to 2019, finding operating margin percentages ranging approximately as follows: eBay (20-30 percent), Etsy (-3.2 to 12 percent), Alibaba (29-50 percent), MercardoLibre (-6.7 to 32 percent), and Rakuten (8-17 percent).[235] All of these pale in comparison to Apple, but none are driven by the same digital transactions as exist here.

While Mr. Barnes' choice is understandable,[236] he did not compare Apple with the Google Play app store, Sony PlayStation Store, Microsoft Store, Samsung Galaxy Store, and Nintendo eShop.[237] Mr. Barnes notes that these entities claim, like Apple, that they do not report sufficiently separate financial results for their app store activities. It is not clear whether sufficient public information exists to reverse engineer **[**78]** for these companies in the same way he reverse-engineered for Apple.

Notwithstanding Mr. Barnes' choice to compare the App Store's operating margins to those other online stores, under any normative measure, the record supports a finding that Apple's operating margins tied to the App Store are extraordinarily high. Apple did nothing to suggest operating margins over 70% would not be viewed as such. As discussed below, the record also shows that the bulk of the revenues generating those margins come from in-app purchases in gaming apps.

6. *App Store Revenues From Mobile Gaming*

As highlighted at the outset of this Order, pivotal evidence in this case reveals that gaming transactions are driving the App Store. Given the critical nature of this evidence, the Court unseals the following evidence from 2017 and

---

[232] *Id.*

[233] *Id.*

[234] *Id.* ¶ 9.

[235] *Id.* ¶ 22.

[236] Mr. Barnes used the following "criteria" to choose the comparators: "online marketplace firms" that "(i) primarily generate online marketplace revenues from commissions and fees earned from transactions involving third-party merchants rather than as a direct seller of goods; (ii) publicly reported financial statements; (iii) at least five years of available financial statements; (iv) marketplace activities sufficiently distinguishable in operating results; and (v) profitable marketplace operations in at least one year of the last five years." *Id.* ¶ 23.

[237] *Id.* ¶ 24.

sufficient evidence from the following years to make key findings. The specifics are referenced in the footnotes below and sealed to the general public. Suffice it to say, the trends increase in an upwards trajectory.

Games have played an integral part of the App Store since at least 2016. In 2016 for instance, despite game apps only accounting for approximately 33% of all app downloads, **[**79] game apps nonetheless accounted for 81% of all app store billings that year**.[238] Further, based on Apple's internal records, 2017 gaming revenues overall accounted for 76% of Apple's App Store revenues. These commissions are substantially higher than average due to the prevalent and lucrative business model employed by most game developers. Specifically, game apps are disproportionately likely to use in-app purchases for monetization.[239]

Importantly, spending on the consumer side is also primarily concentrated on a narrow subset of consumers: namely, exorbitantly high spending gamers.[240] In the **[*954]** third quarter of 2017, high spenders, accounting for less than half a percent of all Apple accounts, spent a "vast majority of their spend[] in games via IAP" and generated 53.7% of all App Store billings for the quarter, paying in excess of $450 each. In that same quarter, medium spenders ($15-$450/quarter) and low spenders (<$15/quarter), constituting 7.4% and 10.8% of all Apple accounts, accounted for 41.5% and 4.9% of all App Store billing, respectively. The remaining 81.4% of all Apple accounts spent nothing and account for zero percent of the App Store billings for the quarter.[241] The trend has largely **[**80]** continued to the present.[242]

This trend is also mirrored within the App Store's games billings. Indeed, Apple has recognized that "[g]ame spend is highly concentrated" among certain gaming consumers. Similar to the above statistics, 6% of App Store gaming customers in 2017 accounted for 88% of all App Store game billings and were gamers who spent in excess of $750 annually. Breaking down this 6% population:

- High spenders, accounting for 1% of iOS gamers, generated 64% of game billings in the App Store, spending on average $2,694 annually;
- Medium-high spenders, accounting for 3% of iOS gamers, generated 20% of game billings in the App Store, spending on average $373 annually; and
- Medium spenders, accounting for 2% of iOS gamers, generated 4% of game billings in the App Store, spending on average $104 annually.

Indeed, in strategizing on the development of the App Store and Apple's gaming business, Apple noted that it "need[s] to primarily consider how [its] service[s] would impact engagement and spend of this 6%."[243] Thus, in most economic ways, and in particular with respect to the challenged conduct, the App Store is primarily a *game* store and secondarily an "every other" app store. **[**81]**

---

[238] DX-4399.008.

[239] Ex. Expert 6 (Hitt) ¶¶ 117, 120-124; DX-4178.006; PX-0059.007; DX-0608.012 (2019); Trial Tr. (Schmid) 3226:8. The actual numbers can be found in the sealed exhibits and need not be repeated in this Order.

[240] From what little evidence there is in the record, these consumers frankly appear to be engaging in impulse purchasing and both parties' profits from this sector are significant. This specific conduct is outside the scope of this antitrust action, but the Court nonetheless notes it as an area worthy of attention.

[241] *See* DX-4399.019-.020. Even within this general spend data, Apple's presentation suggests slides later that the high level of spend derives primarily from gaming apps. Indeed, a few pages later, Apple notes the top grossing apps for 2016, and states: "Not only are these all games, but they're freemium games, meaning they're free to download, and you spend money using In-App Purchases to get more features or levels." DX-4399.024.

[242] *See* PX-2302.046-.047. Coincidentally, the percentage of consumers that pay nothing almost mirrors the same percentage of free apps available in the App Store.

[243] *See* PX-2176.176. The Court notes that the limited evidence in the record as to Google Play show that it too is similarly built on gaming transactions and a narrow subset of high spending gaming consumers and game developers. *See* DX-3913.004-.013.

II. REVIEW OF PARTIES' PROPOSED PRODUCT MARKET AND FINDING

The Court reviews the factual basis for each of the three proffered product markets. Epic Games offers two aftermarkets, namely (i) an aftermarket for the distribution of iOS apps and (ii) an aftermarket for payment processing for iOS apps. The foremarket for each hinges on the existence of a market for operating systems for smartphones.[244] Apple proposes a market for digital games transactions. The Court outlines the evidence for each in turn.

[*955] A. Epic Games: Facts Relevant to Foremarket for Apple's Own iOS

Before reviewing each of the proposed markets, the Court considers whether Apple's operating system should be viewed as a foremarket. The Court finds that it should not.

As a threshold matter, Apple urges the Court to disregard Epic Games' market definition on pleading grounds. Said differently, Epic Games did not explicitly use the terms "foremarket" and "aftermarket" in its complaint to outline its market theories. The Court agrees that Epic Games could have been more clear. Ultimately though, Apple's argument elevates form over substance. Apple was on notice and litigated the matter.[245] ***HN4***[] Courts prefer to rule on the merits **[**82]** of claims rather than disregard on procedural grounds.

In terms of substance, the Court agrees with Dr. Schmalensee that plaintiff's identification of a "foremarket" for Apple's own operating system is "artificial." The proposed foremarket is entirely litigation driven, misconceived, and bears little relationship to the reality of the marketplace.[246] Quite simply, it is illogical to argue that there is a market for something that is not licensed or sold to anyone.[247] Competition exists for smartphones which are more than just the operating system.[248] Features such as battery life, durability, ease of use, cameras, and performance factor into the market.[249] Consumers should be able to choose between the type of ecosystems and ***antitrust law*** should not artificially eliminate them.[250] In essence, Epic Games ignores these marketplace realities because, as it presumably knows, Apple does not have market power in the smartphone market. Rather Apple only has 15 percent of global market share in 2020.[251]

---

[244] A "foremarket" is "a market in which there is competition for a long-lasting product" from which "demand for a second product" derives. An "aftermarket" is the "market for the second product." Ex. Expert 1 (Evans) ¶ 40. As an example, razors are the foremarket for disposable razor blades which is the aftermarket. *Id.*

[245] *See* Compl. ¶¶ 156-183. The Court also addressed this issue in its preliminary injunction opinion, *Epic Games, Inc. v. Apple Inc., 493 F. Supp. 3d 817, 835-38 (N.D. Cal. 2020)*.

[246] Ex. Expert 8 (Schmalensee) ¶¶ 6, 61.

[247] Trial Tr. (Schiller) 2723:18-2725:2.

[248] *Id.* 2725:9-21.

[249] DX-4089.010, .035, .037.

[250] *See, e.g.*, Trial Tr. (Cook) 3932:21-3933:6, 3937:12-20, 3987:18-25; Trial Tr. (Federighi) 3363:17-20, 3392:12-20. Mr. Sweeney, an iPhone user himself, admitted that he found Apple's approach to privacy and customer data security superior to Google's approach to customer privacy and customer data. Trial Tr. (Sweeney) 302:22-303:4. Mr. Sweeney further agreed that "if Apple were to compromise those fundamental differentiators,"—which the Court notes are more than the operating system—Apple may lose a competitive advantage over Android, depending on those changes. *Id.* 303:11-16; Trial Tr. (Athey) 1823:2-9 (agreeing that "privacy and security are competitive differentiators for Apple").

[251] Ex. Expert 8 (Schmalensee) ¶ 64.

B. Epic Games: iOS App Distribution Aftermarket

Given the Court's rejection of the foremarket theory, the aftermarket theory fails as it is tethered to the foremarket. Although the Court rejects **[**83]** plaintiff's foremarket construct, it nonetheless discusses additional factual problems with the aftermarket theory given plaintiff's focus on those issues. In effect, plaintiff really urges a single-brand analysis because Apple's exclusionary conduct impacts Epic Games' ability to compete in that space, both with respect to gaming and non-gaming apps.

Plaintiff claims that an aftermarket exists for four reasons. Each reason is tied to the known legal framework in which antitrust cases are litigated and which is discussed in the legal section below. That said, the four reasons are: One, the foremarket **[*956]** and aftermarket are related but two separate markets. Two, there are restraints in the aftermarket which are not in the foremarket. Three, the source of Apple's market power stems from its walled garden; not because of separate contractual agreements with consumers. Four, competition in the initial market does not discipline Apple's market in the proposed aftermarket.[252]

In terms of the trial record, the factual disputes reside in plaintiff's fourth reason which the Court addresses in this part of the Order. More specifically, the Court addresses Epic Games' evidence of (1) switching costs **[**84]** and alleged lock-in and (2) substitution.[253] The Court also considers Epic Games' argument as to whether the Court should consider all apps or only gaming apps.

1. *Evidence of Switching Costs and Alleged "Lock-in"*

Beginning with the switching costs[254] and alleged "lock-in," the Court considers Epic Games' proffer based on Apple's internal documents, expert testimony, and consumer knowledge, as well as Apple's rebuttal evidence.[255]

a. <u>Apple Documents</u>

Starting with Apple documents, Epic Games cites emails showing that Apple executives were aware of the impact of switching costs from iOS to Android. For instance, a 2013 email from Eddy Cue to Tim Cook and Phil Schiller recommends using iTunes discounts (as opposed to device discounts) because "[g]etting customers using our stores . . . is one of the best things we can do to get people hooked to the ecosystem." The email asks: "Who's going to buy a Samsung phone if they have apps movies, etc. already purchased? They now need to spend hundreds more to get where they are today."[256]

Next, is an email chain from March 2016 illustrating the debate around iMessage.[257] In the email, a customer describes his experience between Google and Apple devices and provides **[**85]** a laundry list to both Google and Apple of the pros and the cons of each device. In advising Google of his decision to remain with Apple, he concluded with the note that "the #1 most difficult [reason] to leave the Apple universe app is iMessage" which led him to use a combination of Facebook, WeChat, WhatsApp and Slack. For him, "iMessage amounts to serious lock-in." In forwarding the email to Apple executives, they were internally advised "FYI — we hear this a lot." Phil Schiller then advised Tim Cook that "moving iMessage to Android will hurt us more than help us . . . ."[258] Later, in October

---

[252] Epic Games COL ¶¶ 84-93.

[253] Epic Games FOF ¶ 218; Trial Tr. (Evans) 1507:10-1510-11, 1512:3-22.

[254] Switching costs are "obstacles of moving from one product to another product." Trial Tr. (Evans) 1494:23-24. In other words, it is the costs born by leaving one platform to go to a different platform.

[255] Apple FOF ¶ 399; *see* Trial Tr. (Schmalensee) 1930:3-14; Ex. Expert 6 (Hitt) ¶ 211.

[256] PX-0404.

[257] iMessage is Apple's text messaging service that shows a blue bubble for texts sent from iOS devices (and allows for additional functionality) while displaying a green bubble for non-iOS devices without the same functionality.

[258] PX-0416.

2016, Mr. Schiller circulated to other Apple executives a Verge article entitled "iMessage is the glue that keeps me stuck to the iPhone."[259] Despite hours on the stand, **[*957]** plaintiff never explored this topic with Mr. Schiller other than to confirm receipt of the third-party emails.[260]

On balance, the Court reads the emails to suggest that Apple sought to compete by distinguishing their product, and in the process, making its platforms "stickier." That, however, is not necessarily nefarious. Every business seeks to decrease switching away from its products. Epic Games' executives, for instance, **[**86]** used the word "lock-in" to refer to price cuts that make it easier for users to play *Fortnite* in a hard economy. Here, the features that create lock-in also make Apple's products more attractive. ***HN5***[] Whether the conduct is procompetitive depends on other factors, including timing and whether the stickiness is at least partly tied to product attractiveness which can then decrease if the products become less attractive (for instance, through higher game prices).[261] This evidence is not persuasive of switching costs on its own.

b. Dr. Susan Athey

Next, Epic Games relies on expert testimony by Dr. Susan Athey who provides high-level, and largely theoretical, testimony about various costs incurred during switching from iOS to Android devices.[262] Unfortunately, Dr. Athey makes no effort to determine from consumers themselves whether they are motivated by loyalty and product satisfaction or because of switching costs. She conducted no original surveys. Nor does she attempt to measure the switching costs and analyze literature about their magnitude. Indeed, Dr. Athey does not cite *any evidence* beyond a news article, a European journal, and a biography of Steve Jobs. Nor did she analyze additional **[**87]** evidence or perform original analysis when forming her opinion. As such, the Court is left entirely in the dark about the *magnitude* of the switching costs and whether they present a meaningful barrier to switching *in practice*. There is simply no independent data to show that switching costs create meaningful lock-in.[263]

---

[259] Again, the statements themselves are hearsay and are considered for a limited purpose of state of mind and not for whether iMessage actually creates lock-in for the customer base as text messages can be shared between iOS devices and Android. *See* PX-0079 (third-party Goldman Sachs Group, Inc. analysis); PX-2356; Trial Tr. (Schiller) 2981:6-2982:25.

Epic Games also cites other documents, but the import of those documents is far less clear. For instance, a 2019 email from Mr. Federighi discusses eliminating user-entered passwords in favor of Sign in with Apple, which would make the platform more "sticky." PX-0842. However, the context of the email concerns protecting users from spam, and it immediately notes factors that undermine that stickiness, such as "heavy" use of Chrome. *Id.*; *see also* Trial Tr. (Schiller) 3169:7-22 (explaining desire to protect users from spam). Another document shows Steve Jobs discussing tying different products together to "lock" customers into the ecosystem. PX-0892. Again, that is indistinguishable from simply making the ecosystem more attractive. *See* Trial Tr. (Schiller) 2864:7-15.

[260] PX-0416; Trial Tr. (Schiller) 3173:11-16, 3174:4-16.

[261] Trial Tr. (Weissinger) 1433:19-1434:16; *see, e.g.*, Trial Tr. (Cook) 3870:16-21; Trial Tr. (Schiller) 2864:16-19. Evidence shows that switching costs have decreased since the early 2010's through increased cross-platform functionality and "middleware," a term which does not exist in economic literature and which Dr. Athey created. Trial Tr. (Athey) 1782:7-1783:1, 1805:5-1806:22, 1809:17-1810:11.

[262] *See generally* Ex. Expert 4 (Athey); Ex. Expert 1 (Evans).

[263] Trial Tr. (Athey) 1777:18-24, 1794:12-1795:3, 1813:22-1814:11, 1815:11-1816:2, 1870:10-15.

Apple moves to strike Dr. Athey's opinions under *Federal Rule of Evidence 702(b)*. Dkt. No. 721. Epic Games responds that Apple waived its objections by stipulating to the admission of expert "written direct testimony" (Dkt. No. 510) and "unadmitted materials within the scope of *Rule 703*" relied on by the experts (Dkt. No. 635). Epic Games further contends that Dr. Athey disclosed her opinions in her report and that she may testify "solely or primarily on experience" if she "explain[s] how that experience leads to the conclusions reached, why that experience is a sufficient basis for the opinion, and how that experience is reliable applied to the facts." *Fed. R. Evid. 702* advisory committee note to 2000 Amendments ("Adv. Committee Note").

[*958] While the Court finds Dr. Athey well-intentioned, the lack of data upon which she bases her opinion leaves the Court with little objective reason to accept her theory.[264] Moreover, the market is responding, *i.e.*, both Google and Apple are creating easier paths to convert customers from the other and deal with the switching costs.[265] The Court can agree that it takes time to find and reinstall apps or find substitute apps; to learn a new operating system; and to reconfigure app settings. It is further apparent that one may need to repurchase phone accessories. That said, by ignoring the issue of customer satisfaction, Epic Games has failed to convince. The Court warned the parties in advance that actual data was an important consideration.

Accordingly, the expert testimony from Dr. Athey is wholly lacking in an evidentiary **[**88]** basis and does not show *substantial* switching costs enough to create user lock-in for iOS devices.

c. Consumer Knowledge and Post Purchase Policy Changes

From a broad perspective, Epic Games did not conduct any analysis of whether consumers know that they are buying into a walled garden. Apple argues that its business is successful precisely because of the reliability and security creating the walled garden on the iOS devices and on which it competes (discussed below). Without a consumer survey, there is no evidence that consumers are *un*aware of walled garden before purchasing the smartphone. Thus, there is no "bait-and-switch."

[*959] Plaintiff strains on the policy-change argument. Here Epic Games argues that Apple has changed its stated policy with respect to the commissions and thereby "lock-in" consumers and developers. The assertion is based upon two comments. The first occurred in 2008 by Steve Jobs when the App Store was launched by stating that the 30% commission was intended to "pay for running the App Store" and that Apple would be "giving all the money to the developers." The second occurred in 2011 when Phil Schiller noted in an internal email that "once we are making over $1B a **[**89]** year in profit from the App Store, is that enough to then think about a model where we ratchet down from 70/30 to 75/25 or even 80/20 if we can maintain a $1B a year run rate?"[266] Plaintiff claims the 30% commission rate constitutes a change in policy as compared against those two comments.

While the Court does not strike the opinion, the Court agrees with Apple that the opinion's basis is weak. Epic Games conflates the requirements of *Rule 703*, *Rule 702*, and discovery. ***HN6***[] *Rule 702(b)* asks "whether the expert considered enough information to make the proffered opinion reliable," while *Rule 703* asks whether the data considered itself is "of a type that is reliable." *See* 29 Charles Alan Wright & Arthur R. Miller, *Federal Practice & Procedure* § 6268 (2d ed.). ***Federal Rule of Civil Procedure 26(a)(2)(B)(ii)*** further requires that an expert set forth "the facts or data considered by the [expert] in forming" the opinions in her report.

Here, Dr. Athey does not explain how her experience provides a *sufficient* basis for her sweeping conclusions. This is not a handwriting case where an expert opines that two writings are the same based on experience. It is a complex antitrust case that requires consideration of economic data. Unexplained academic and industry experience simply does not provide sufficient basis to draw reliable conclusions. Moreover, to the extent that Epic Games asks the Court to rely on Dr. Athey's general research, such research should have been disclosed in the report so that the Court and opposing party could evaluate it.

Nevertheless, the Court recognizes that the procedural posture of this case was unique. The Court ordered that no *Daubert* motions be made in advance of the bench trial given the expedited schedule and the fact that the Court had to read and review the submission in any event. Context was helpful. That said, many issues were litigated during the course of the bench trial and Apple did stipulate to the admission of Dr. Athey's testimony. Dr. Athey apparently relied on additional sources in her expert report (which she did not cite in her written direct testimony). The Court considers her opinions, but as discussed, given the lack of data, the Court does not give those opinions much weight.

[264] Last, Dr. Athey describes "mixing-and-matching" costs that users incur when trying to use devices from different ecosystems together. Dr. Evans reiterates some of this analysis in his testimony, but again, the data is weak. Ex. Expert 4 (Athey) ¶¶ 20-23; Ex. Expert 1 (Evans) ¶¶ 83-88; Trial Tr. (Evans) 1495:5-1497:3; Trial Tr. (Athey) 1755:6-1763:24.

[265] DX-3084A.022; Trial Tr. (Cook) 3867:12-3870:1, 3886:19-3887:5; DX-5573.

[266] PX-0880.021, .027; PX-0417.001.

Plaintiff's argument is not grounded in legal principles. The two noted informal statements do not create a policy, especially in light of a written contract, much less one which shows the 30% is a change. However, the Court does agree that the comments confirm that the 30% is not tied to anything in particular and can be changed. Moreover, it shows that Apple used other provisions to hide information on those commission rates from the consumers, presumably to hide the profitability of the transactions, namely the use of anti-steering provisions. Without information, consumers cannot have a full understanding of costs.[267]

d. Apple's Rebuttal Evidence

Apple introduces rebuttal evidence that low switching stems from satisfaction with Apple devices and services.

First, Apple emphasizes that consumers do switch from iOS to Android. Although the timeline for switching smartphones is longer than a few years, **[**90]** as many as 26% of smartphone users, including 7% of iPhone users, purchase a cellphone with a different operating system each cycle. Industry surveys suggest that iOS users are not per se "closed off" to considering Android when making decisions.[268]

Second, Apple cites consumer surveys that the lack of switching is due to consumer satisfaction with iOS. A Google survey shows that 64% of iOS users would not switch to Android simply because they "prefer iOS," which is the number one reason for not switching. Another survey shows that users who *do* switch from Android to iOS do so because they liked the speed and reliability provided by iPhones. Other surveys show high rates of satisfaction with iOS devices.[269] This evidence is significant not only because it was not litigation driven, but because Epic Games does not provide its own consumers surveys **[*960]** to show that users fail to switch even when they are dissatisfied with app price, quality, or availability. Thus, Apple's evidence strongly suggests that low switching between operating systems stems from overall satisfaction with existing devices, rather any "lock-in."

Comparing and weighing the parties' proffers, the Court finds that Epic **[**91]** Games failed to prove that users are "locked-in" or would not switch to Android devices in response to a significant change in game app prices, availability, or quality.[270]

2. *Substitutes*

In terms of substitutes given the business realities of the market, the parties' arguments hinge on their own respective definitions of the market. Epic Games spends little time on this issue with respect to its definition. For Epic Games, there is an aftermarket for iOS app distribution for which there is no substitute as it occupies the entire field.[271]

Given Apple's proposed market of all digital game transactions, Apple argues that all the other game transaction platforms are substitute platforms for the App Store. Those platforms include ones accessed through all devices: mobile, tablets, consoles, and PCs. Epic Games rebuts this claim. It makes two arguments. One, because developers create apps for more than one platform, they do not view them as substitutes to reach the same

---

[267] Trial. Tr. (Evans) 1509:11-17; Ex. Expert 1 (Evans) ¶ 118.iv. The Court rejects the notion that Apple must affirmatively give consumers an estimate of the "amount of money a consumer spends on apps over the lifecycle of an iPhone," especially given that consumers appear to be in different categories of spending. *See* Epic Games FOF ¶ 221.a. That is different from enforcing silence regarding commission costs.

[268] DX-4310.012; Ex. Expert 6 (Hitt) ¶ 209; DX-3598.027.

[269] DX-3598.027; DX-3441.006-.007. Of course, the Apple survey cuts both ways. Consumers who switched from Android to iOS did so for hardware reasons, such "speed," "quality device construction," and "battery"—not app quality, price, or availability. This reinforces Dr. Evans' point that apps are a secondary consideration when purchasing a smartphone and would not lead to switching by themselves. *See also* DX-4312.043; DX-4495.044.

[270] As a corollary, without proof of customers lock-in, the notion that developers would not switch to maintain that customer base is by definition also not proved.

[271] Epic Games FOF ¶¶ 179-180.

consumers. Two, economic and survey evidence show a lack of substitution. The Court begins with Epic Games' arguments.

a. Single Homing and Fortnite Data

No one disputes that when developers create an app for Android versus iOS, they **[**92]** use a different SDK but much of the code can be ported across platforms. Using technical language, users may "single home" at a single platform while developers "multi home" across platforms. As the result, developers compete for single-homing users in a winner-take-all market and cannot afford to forego particular platforms without losing those other customers. The Court agrees that in the smartphone context, consumers typically "single home."[272]

In terms of user options on smartphones, gaming transactions on Android appear similar if not identical to gaming transactions on iOS. Most popular mobile games are available on both Android and iOS, with similar functionality. Developer support services are also similar.[273] Further, a significant difference in game transaction price or availability does not exist between iOS and Android. The evidence shows that very few consumers own both Android and iOS devices, and that currently, very low switching rates exist, with only about 2% of iPhone users switching to Android each year.[274] These results are not particularly surprising if those devices provide essentially the same experience.

Whether that extends beyond the smartphone context is debatable. **[**93]** Thus, to establish this extension, Epic Games relies on **[*961]** the "natural experiment" provided by *Fortnite*'s removal in the wake of the Project Liberty.

The experts do not appear to disagree that the removal of *Fortnite* is a "degradation in quality" of the App Store and iOS devices in general.[275] Dr. Evans thus opines that *Fortnite's* removal provides an empirical study of user substitution in response to changes in quality in iOS and analyzed the data for ten weeks after its removal. Given the loyal *Fortnite* following, Dr. Evans evaluated iOS-only users. For this group, he found they only shifted 16.7% of game play minutes to other platforms and 30.7% of spending to other platforms. Applying this substitution rate to Epic Games' profit margins, Dr. Evans concludes that similar developers would not find it profitable to abandon the iOS platform because they could not make up the spending on other platforms, even if Apple raised its commission.[276]

First, Dr. Evans' decision to limit his analysis to iOS-only *Fortnite* players is questionable because it ignores other market evidence that iOS players engaged in substitution before and after the hotfix. Dr. Evans cites evidence that **[**94]** 90.9% of iOS *Fortnite* players play only on iOS. This is consistent with general statistics that 82.7% of *Fortnite* players play on a single platform. That said, Dr. Hitt's data shows that 35.9% of iOS *Fortnite* players multi-home. This is consistent with evidence that between 32% and 52% of all *Fortnite* players multi-home. Moreover, Dr.

---

[272] Ex. Expert 1 (Evans) ¶¶ 48, 89.

[273] *Id.* ¶¶ 74; Ex. Expert 6 (Hitt) ¶¶ 28; DX-4759.001; Trial Tr. (Simon) 390:5-19; Trial Tr. (Grant) 669:22-24, 733:7-13; Trial Tr. (Fischer) 873:3-8.

[274] Dr. Hitt testified that up to 26% of iOS users switch to Android at the end of each upgrade cycle. Ex. Expert 6 (Hitt) ¶ 209. He agreed, however, that this creates no more than three to four percent change in the installed base each year. Trial Tr. (Hitt) 2162:12-2163:15.

[275] Ex. Expert 1 (Evans) ¶ 127. As such, Dr. Evans opines that it supports use of a "SSNIP" test commonly used to test monopoly power. *Id.* ¶ 133; Trial Tr. (Evans) 1528:12-1530:1, 1533:1-1534:8. The Court discusses the SSNIP test and its applicability below.

[276] *See* Ex. Expert 1(Evans) ¶¶ 124-134; PX-1080; Trial Tr. (Evans) 1521:2-1535:7. Dr. Evans opines that this is an "upper bound" of substitution because most other mobile games, unlike *Fortnite*, lack cross-wallet, cross-play, and other features that make it easy for *Fortnite* players to switch devices. Dr. Evans further lowers the substitution estimate after accounting for the "natural cross-progression" from iOS to "more serious" gaming on PCs and consoles. However, as Dr. Hitt correctly notes, this constitutes substitution even if it is not directly responsive to the quality decrease. Ex. Expert 1 (Evans) ¶ 129; Trial Tr. (Evans) 1527:10-14; Ex. Expert 6 (Hitt) ¶ 252.

Hitt cites evidence that the iOS *multi-homers* account for 85% of *Fortnite* revenue from iOS in the first half of 2020, which makes them particularly important.

Dr. Evans' focus, however, ignores this important group which reveals important insight: players who access *Fortnite* on iOS still spend the overwhelming majority of their *Fortnite* time and money on non-iOS platforms.[277] By limiting his analysis to players who use iOS as the *primary Fortnite* platform (*i.e.*, the platform where they spend most of their playtime and spending), the Court finds Dr. Evans likely underestimates overall substitution.[278]

Second, and ironically, the *Fortnite* data *does* show substitution. Dr. Hitt, analyzing the same data, found that 22% to 38% of strict iOS-only—users who never accessed **[*962]** *Fortnite* on a non-iOS platform before—shifted their game time and spending to other **[**95]** platforms after the iOS hotfix. Significantly, after accounting for iOS users who already played on other platforms (of whom up to half increased their spending on other platforms), Dr. Hitt shows that Epic Games retained 81% to 88% of its iOS player revenue after Project Liberty. Dr. Evans criticizes this conclusion, arguing that it does not show substitution but rather shows that non-iOS spenders continue to spend outside iOS. The experts agree that Epic Games retained up to half of its iOS-only user revenue.[279]

In conclusion, the *Fortnite* data is basically mixed. Up to a third of iOS *Fortnite* users already play on other devices, which makes their ability to substitute a given. Another 20% undertook at least some substitution after *Fortnite* removal, including by accessing devices on which they previously played *Fortnite*. Although this was not enough to make up Epic Games' losses, the Court finds the time period of substitution significant: Dr. Evans analyzed substitution for only the ten weeks following *Fortnite's* removal. The Court finds it likely that a longer analysis would show greater substitution both because of the typical upgrade cycle for expensive devices (longer than ten weeks) **[**96]** and because of the timing of this Court's preliminary injunction order (immediately after the ten-week period). In particular, users may have waited to see whether this Court would reinstate *Fortnite* to the App Store before making a different purchasing decision or waited for Season 15 for which we have no data. Moreover, because *Fortnite* was removed simultaneously from Google Play and the iOS App Store, the experiment does not account for substitution between iOS and Android.

For all of these reasons, the *Fortnite* data does not reliably show lack of user substitution among game transactions on different devices.

b. <u>Dr. Rossi and Dr. Evans</u>

Last, Epic Games proffers a survey performed by Dr. Rossi and Dr. Evans' use thereof.

Beginning with the survey, Dr. Rossi asked iPhone and iPad users whether they would change their spending if iOS in-app purchases were slightly more expensive. Specifically, Dr. Rossi asked respondents to think about their in-app purchases from the App Store in the last thirty days and imagine that the spending was five percent higher. 81% of the respondents giving definite answers indicated that they would not have changed their purchases. The remainder indicated opposite **[**97]** with only 1.3% switching to non-iOS phones or tablets. Dr. Rossi and Dr. Evans use this data to conclude that consumer demand for iOS app transactions is relatively inelastic.[280]

---

[277] Specifically, *Fortnite* players with iOS accounts spend almost 90% of their play time and 87% of their spending outside of iOS. Ex. Expert 6 (Hitt) ¶ 73. Another explanation for the different conclusions rests on Dr. Evans' use of sampling: Dr. Hitt testified that Dr. Evans' confidence intervals are well in line with his own estimates. Trial Tr. (Hitt) 2145:10-22.

[278] Ex. Expert 1 (Evans) ¶ 126; PX-1054; Ex. Expert 6 (Hitt) ¶¶ 68-75, 94, 249-50; DX-4767. Of course, the existence of iOS-only players who do not substitute may suggest a subset of the market for whom iOS *Fortnite* play is key. Trial Tr. (Evans) 2371:1-14. However, Epic Games did not define a market with respect to these users but for all iOS game transaction users.

[279] Trial Tr. (Hitt) 2142:24-2145:5; Ex. Expert 6 (Hitt) ¶¶ 97, 251; DX-4824; Trial Tr. (Evans) 2371:22-2376:6; Ex. Expert 16 (Evans) ¶¶ 26, 29-31.

[280] "Relatively inelastic" is not formally inelastic (which requires an elasticity less than - 1), but it is less elastic than comparable markets. Trial Tr. (Evans) 1650:8-1651:15; Ex. Expert 3 (Rossi) ¶¶ 4-14; PX-1089; Ex. Expert 1 (Evans) ¶¶ 136-138.

Dr. Rossi's survey suffers from several methodological flaws, including the language and timing of the survey. First, the formulation of the questions was confusing. The questions did not convey that the price changes were intended to be both in future and permanent (or nontransient). Instead, his approach was explicitly backward looking. He failed to use simple phrases like "in the future" which had been considered. He claims his final, and untested language, was intended to be more clear.[281] A comparison of the language **[*963]** demonstrates otherwise. By failing to make the distinction with the future, Dr. Rossi also injected the notion of customer satisfaction into the survey which likely impacted the result.[282] His justification that he conducted "structured pretests" is manufactured and not recognized in the industry.[283]

Further, given that the survey was conducted on January 20, 2021 and asked about spending in the "last 30 days," Dr. Rossi failed to account for holiday spending which is likely to be idiosyncratic. **[**98]** Holiday spending includes sales and price changes before, during, and after the holidays, and Dr. Rossi admitted that the results may vary for "for some products."

Next, the survey concerned all app purchases, not just game transactions, and ignored plaintiff's key demographic. Dr. Evans expressly testified that in-app transactions are not part of his proposed product markets. Yet those are the only purchases which Dr. Rossi tested.[284] Dr. Rossi also claims he did not want to include minors because he would have to obtain parental approval, but that proved not to be a problem for Dr. Hanssens, Apple's expert, who did survey minors.[285] Given the magnitude of the issues before the Court, Dr. Rossi choices did not ultimately assist in determining how a key demographic would make substitution decisions in the relevant market.

Dr. Rossi's trial testimony revealed that he was more interested in a result which would assist his client's case than in providing any objective ground to assist the Court in its decision making. Given Dr. Rossi's lack of credibility, the Court strains to adopt his findings. Although the survey is far from perfect for the reasons stated above, the Court finds it weakly probative, **[**99]** at most, that increases in in-app purchase content prices would not lead to significant substitution to other devices.[286]

Dr. Evans uses Dr. Rossi's survey to conduct a "SSNIP" test to confirm that iOS app distribution is a relevant aftermarket.[287] The Department of Justice developed the test in 1982 to analyze mergers and determine what is the smallest market in which a hypothetical monopolist could impose a "*S*mall but *S*ignificant and *N*on-transitory *I*ncrease in *P*rice," usually 5 percent over the course of 12 months. Not only is this not a merger context, but as noted, the survey did not test anywhere close to an appropriate period.[288] Despite the Court's misgiving of the accuracy of any opinion stemming from this survey, it **[*964]** reviews Dr. Evans' reliance thereon to perform a SSNIP analysis.

---

[281] Compare versions in PX-1920; Trial Tr. (Rossi) 2512:15-2513:13, 2526:5-10, 2532:13-21, 2528:12-2529:2; Ex. Expert 7 (Lafontaine) ¶¶ 76-79; Trial Tr. (Evans) 1649:9-23. Dr. Rossi conducted pre-testing and interviews on the initial survey design, which asked about spending in a "similar 30-day period in the future." It is not clear whether the pre-test adequately asked about the transience issue for either past or future spending. *See* PX-1920.3; Trial Tr. (Rossi) 2521:23-2544:11.

[282] Trial Tr. (Hanssens) 3541:23-3543:3.

[283] Trial Tr. (Rossi) 2523:8-2, 2525:23-2527:16, 2529:20-23; *see also* Trial Tr. (Hanssens) 3539:10-13 (explaining that the terminology of "structured and "unstructured pretests" is not standard).

[284] Of course, these first two issues may cancel each other out: since games are disproportionately likely to use in-app purchases, an increase in in-app purchases is effectively an increase in iOS game (and subscription) prices.

[285] Trial Tr. (Rossi) 2534:24-2536:19, 2545:9-22.

[286] *See id.* 2509:16-2510:25. Apple also faults Dr. Rossi for the low levels of respondent spending on in-app content. However, those rates appear to be in line with the App Store median. *See* Ex. Expert 3 (Rossi) ¶ 49.

[287] Ex. Expert 1 (Evans) ¶ 139.

[288] *Id.* ¶¶ 35, 136, 254.

As an overview, Dr. Evans first calculates an "effective" commission rate of 27.7%, and then determines that a 5% increase to consumers would correspond to a 30% increase in developer commissions. Because even this large increase in commissions would be profitable for Apple due to the lack of consumer switching, Dr. Evans concludes that iOS distribution is its own market.[289] Dr. Evans confirmed that **[**100]** consumer response to long-run price changes may be substantially different than for short-run ones.[290] This feature is important to Dr. Evans' analysis. As discussed above, Dr. Rossi's failure to survey properly and confirm respondents' understanding of a non-transient price increases leaves the adequacy of the survey for a SSNIP analysis in question.

Economists lack consensus about how to design hypothetical monopoly tests properly to account for indirect network effects. While Dr. Evans has proposed one approach, another preeminent economist, Dr. Schmalensee, believes it is conceptually flawed. Even Dr. Evans himself has previously written that "even if it is technically possible to extend the hypothetical monopoly test to two-sided platforms, the challenges of implementing the SSNIP test empirically in two-sided markets are likely to be overwhelming in practice."[291]

Despite this self-acknowledged difficulty, Dr. Evans uses the SSNIP test anyway. The Court finds Dr. Evans' SSNIP analysis fatally flawed by several standards, including his own. Dr. Evans has acknowledged that a double-sided SSNIP test should include simultaneous testing of both sides of the market using at least 14 inputs. **[**101]** He has not followed that methodology here. Nor did Dr. Evans take into account indirect network effects in his SSNIP analysis.[292]

Indeed, Dr. Evans conducts his foremarket and aftermarket SSNIP tests on the consumer side and on the developer side separately. Then, he effectively dismisses indirect network effects by claiming that SSNIP on both developers and consumers would be profitable, because neither side would respond to the one-sided price increases he tested. As Professor Schmalensee explained, this is implausible: a price increase would reduce consumer demand for apps, which in turn would make app sales less profitable for developers, and developers may in turn react by reallocating engineering or marketing resources even if they do not leave the platform entirely. Notably, Dr. Evans does not perform *any* actual SSNIP calculations testing both sides of the market simultaneously, as required by his own research.[293]

Dr. Evans' SSNIP analysis is further based on flawed survey data from Dr. Rossi, which affects the validity of any conclusions derived therefrom. Dr. Rossi's survey and the resulting data suffer from several critical flaws.[294] The Court will not rehash the entirety of these flaws **[**102]** here. **[*965]** Suffice it to say, three errors are particularly notable:

First, the survey focuses entirely on the price of in-app purchases—which, as noted above, are *not* even within the alleged relevant market advanced by Dr. Evans—while ignoring other transactions, like initial downloads and updates, that are in the alleged relevant market advanced by Dr. Evans. As a result, Dr. Evans's analysis is unreliable and provides no insight into substitution in any alleged iOS app distribution market.[295]

Second, the price increases discussed in the survey—when confined to just 30 days—also were far from significant, ranging from less than $0.25 to $1.50. And the significance of the price increases were dampened even further by

---

295 Trial Tr. (Rossi) 2549:13-2550:1; Trial Tr. (Evans) 1646:16-1647:5; Ex. Expert 7 (Lafontaine) ¶ 75.

the survey's discussion of switching costs.[296] This is despite the fact that the App Store is highly dependent on a narrow subset of high earning gaming apps and an equally narrow subset of high and medium consumer spenders. In other words, these consumers and developers were not adequately captured by Dr. Rossi's survey, which reflected only small increases in price.

Finally, the survey was limited to the United States, not the global market that Dr. Evans posits.[297]

Given **[**103]** the flaws in both the underlying survey and Dr. Evans' calculations thereon, the Court finds this evidence wholly unpersuasive of substitution.

c. Mobile Devices (Tablets and the Switch)

As outlined above, Apple's product market is all digital gaming transactions. It therefore focuses on platform substitutes for those transactions. Apple suggests two categories of platforms: (1) mobile devices (tablets and the Switch) and (2) non-mobile devices.

iPads are indisputably part of the Apple ecosystem. Evidence shows that 60% of iPhone users also use an iPad (tablet), so they have access to both devices. Documents also show that Apple seeks to decrease switching costs from iPhones and iPads to "lock customers into [its] ecosystem." Thus, tablet transactions are substitutes for those on smartphones because they are part of the same ecosystem and users have access and easy switching ability between the devices.[298]

[*966] In evaluating Apple's market definition, Dr. Evans excludes tablets on the sole ground that they lack certain hardware features, like a cellular connection. This is not persuasive: as Dr. Hitt notes, tablets possess most of the unique hardware features Dr. Evans assigns to smartphones. **[**104]** Epic Games has not demonstrated that the slight remaining hardware differences are sufficient to prevent substitution for smartphone and tablet game transactions. Accordingly, tablet game transactions are substitutes for smartphone game transactions and part of the same market.[299]

d. Non-Mobile Devices (Consoles and PCs)

Consumers frequently own multiple devices and could in theory substitute across them for game transactions. Surveys conducted by Apple show that gamers are especially likely to use several devices, with 56% playing on both mobile and non-mobile platforms.[300]

---

[296] Trial Tr. (Rossi) 2539:13-2540:16, 2543:12-2544:25. The Court further notes that Dr. Rossi's survey appears have been inappropriately based on an increase in the total cost of the in-app purchases and subscriptions, instead of based on an increase in the amount of Apple's commission rate. The Department of Justice website, which Dr. Evans approvingly cites in his report, notes that in cases involving an analogous transaction in oil pipelines, the appropriate SSNIP analysis is based on the cost of transporting the oil (amount from the commission rate), not on the cost of the oil at the terminal end point (total cost of the in-app-purchases). *See* Ex. Expert 1 (Evans) ¶ 253, n. 113; *see also* U.S. Department of Justice and the Federal Trade Commission, "Horizontal Merger Guidelines," August 19, 2010, at § 4.1.2, https://www.justice.gov/atr/horizontal-merger-guidelines-08192010.

[297] Trial Tr. (Evans) 1653:3-16.

[298] Ex. Expert 1 (Evans) ¶¶ 43-44, 75; Ex. Expert 6 (Hitt) ¶ 189; Trial Tr. (Federighi) 3357:15-18; Trial Tr. (Fischer) 874:24-875:11; PX-0416; DX-3174.003; PX-0892. Moreover, Epic Games' arguments to the contrary contradict its own theory that users and developers select "ecosystems" rather than devices. As Dr. Evans explains, "Apple and Google have created highly differentiated ecosystems around their respective operating systems," and developers and consumers select devices based on the ecosystem.

[299] Ex. Expert 6 (Hitt) ¶¶ 230-233; Ex. Expert 1 (Evans) ¶ 43 n.3.

[300] Ex. Expert 6 (Hitt) ¶¶ 57, 61; DX-3174; Trial Tr. (Wright) 550:3-10, 631:19-22.

However, there are two issues with this data. First, it inappropriately uses statistics about gamers as a whole to draw conclusions about iOS gamers.[301] Apple has not shown that gamers as a whole are representative of iOS gamers. It may well be that 55-60% of U.S. gamers play on more than one device, but that *iOS* gamers switch considerably less often. This outcome is plausible: Apple's evidence shows that large portions of the population—including young children, older adults, and most teenage girls—play predominantly on mobile. Multi-platform play, on the other hand, is driven by different segments. Thus, Apple's own evidence **[**105]** shows that mobile gamers are *not necessarily* like other gamers.[302]

Recognizing this issue, Apple offers evidence by Dr. Hanssens, who conducted two surveys on iOS App Store users and *Fortnite* players, respectively. The first survey shows that 99% of App Store consumers use or could use at least one other non-iOS device. The second survey shows that 99% of iOS *Fortnite* players use or could use non-iOS devices. Moreover, 94% of iOS *Fortnite* players played games on non-iOS devices in the last 12 months.[303]

While Dr. Hanssen is considerably more credible and independent that Dr. Rossi, Dr. Hanssen's survey is also severely flawed and ultimately unreliable.[304] First, he reports that 30-43% of respondents "regularly" use a Microsoft Windows phone even though Microsoft had 0% market share in smartphones in 2018 and no longer sells phones. This data point alone calls into question the reliability of the survey overall.[305] Second, Dr. Hanssen's surveys do not address substitution because **[*967]** he only measures access. Dr. Hanssen acknowledges this: the surveys "did not address substitution at all" because doing so would require questions about willingness and ability to switch, as well as actual **[**106]** behavior in different circumstances. Thus, the ultimate value of Dr. Hanssens's survey is limited.

With respect to actual substitution, Apple relies solely on three "natural experiments" examined by Dr. Hitt.[306]

First, Dr. Hitt considers users who downloaded a console or PC game "companion" app, such as the Xbox companion app as a proxy for those who own or play games on a console or a PC. Dr. Hitt finds that users who download the console or PC companion app increase their iOS game spending at a slightly lower rate—19% as opposed to 24% growth in iOS game spending as compared to a control group who did not have the companion app. Because V-Bucks are the same on both platforms, Dr. Hitt concludes that the use of both devices shows substitution. That said, the group that downloaded the companion app spent *more* on iOS games than the group that did not. This is consistent with complementary gaming if spending increases.[307] Both conclusions are logical.

Second, Dr. Hitt considers the natural experiment provided by the entry of *Fortnite* on the Nintendo Switch. Dr. Hitt finds that when *Fortnite* launched on Switch, iOS *Fortnite* spending and playtime decreased. Dr. Hitt acknowledges that *Fortnite* ***[**107]*** spending across *all* platforms decreased during that time by 33%. Thus, to control for the general decrease, he compares iOS spending for users who played and did not play *Fortnite* on Switch. Dr. Hitt

---

[301] As explained below, Apple also uses statistics about *Fortnite* to draw conclusions about the gaming industry. That suffers from a similar problem: no evidence in the record shows that *Fortnite* is representative of other games.

[302] DX-4170.008, .024.

[303] DX-4663.001; DX-4754.001; Ex. Expert 6 (Hitt) ¶ 58.

[304] Notably, Dr. Hanssens was the only expert to explain that his work was not directed by attorneys; nor was he aware of how his work fit into Apple's strategy thus, demonstrating independence. For this reason, the Court finds Dr. Hanssens quite credible.

[305] To Dr. Hanssens' credit, he readily acknowledges these issues and eventually removed the respondents who reported Windows phone use. However, this amounts to 30-43% of an already small survey pool rendering the exercise unreliable. Trial Tr. (Hanssens) 3580:15-3581:14; 3568:12-17, 3570:3-14, 3574:2-8, 3576:11-3578:17, 3551:18-3552:18; DX-4312.178; Ex. Report 6 (Hitt) ¶ 71.

[306] Trial Tr. (Hanssens) 3551:22-3554:6, 3557:11-13; Ex. Expert 6 (Hitt) ¶¶ 82-99; *see also* Ex. Expert 13 (Cragg) ¶¶ 43-48.

[307] Ex. Expert 6 (Hitt) ¶¶ 69-72, 82-87; DX-4792; Ex. Expert 13 (Cragg) ¶ 56.

then concludes that iOS *Fortnite* players who played on Switch played and spent relatively less time on iOS. Again, the evidence is consistent with substitution but does not establish it.[308]

Next, Dr. Hitt's data also shows that players who used both iOS and Switch increased their *overall* spending and playtime in *Fortnite*. The absolute numbers for iOS *Fortnite* revenue actually increased after the introduction of Switch. Dr. Cragg converts this data to plausibly opine that this shows complementary playing—users who acquired a second device became more engaged in the game—rather than substitution. Using this lens, the evidence is as consistent with complementary playing as with substitution.[309]

Third, Dr. Hitt analyzes *Fortnite* data following its removal from iOS. As described above for Dr. Evans, this evidence is mixed at best: while some iOS-only *Fortnite* players switched, that number was not significant enough to recoup losses and represented only 16% of playtime minutes and at most half of Epic **[**108]** Games' revenue from these users. Thus, the Court does not consider it persuasive either way.[310]

Accordingly, Dr. Hitt's and Dr. Cragg's analyses show evidence of both substitution and complementary playing without a definitive answer either way.[311] Ultimately, **[*968]** the Court proceeds without resolving the issue on this record.

3. *Gaming v. Non-Gaming and Apple's App Store*

As explained above, Epic Games argues that its aftermarket should be defined to include all apps not just gaming apps as the distribution on the App Store is not limited.

The evidence demonstrates that the App Store, in its current form, generates virtually all its revenue upon a business model now rooted in the gaming market: both on game developers and gaming consumers. This is proved by both financial considerations and other notable distinctions between gaming and non-gaming apps. The Court notes eight other significant differences which exist between game apps and non-game apps as the Court considers the relevant product market.

First, in recent years, game app revenues constitute between 60-75 percent of all app transactions for Apple's App Store. Indeed, game app transactions are responsible for a significant majority of the **[**109]** revenue generated in the App Store.[312]

Second, there is industry and public recognition of a distinct market for digital game app transactions as opposed to non-gaming apps. Indeed, many general app stores on mobile and tablet devices, including the App Store, Google Play app store, and the Amazon App Store, distinguish between game transactions and non-game transaction by categorizing game apps into a separate tab of apps entirely. This distinction reflects the recognition by the platforms that consumers distinguish between these types of apps, and that both consumers and platform owners would benefit from having games apps separately gathered in one place.[313]

---

308 Ex. Expert 6 (Hitt) ¶¶ 73-86; DX-4822; DX-4823; Trial Tr. (Schmalensee) 1935:22-1936:4.

309 Ex. Expert 13 (Cragg) ¶¶ 50-64; PX-1023; PX-1022; Trial Tr. (Schmalensee) 1935:22-1936:16; Trial Tr. (Cragg) 2280:15-23.

310 Dr. Hitt also relies on evidence from Spotify and Netflix subscription option removals from iOS apps. As this evidence concerns subscriptions, not games, the Court does not consider it for the reasons stated above.

311 Ex. Expert 6 (Hitt) ¶¶ 94-105.

312 The precise numbers are found in sealed documents. *See* Ex. Expert 6 (Hitt) ¶ 117 (62.9% in 2018); Trial Tr. (Hitt) 2126:16-19 (same); DX-4178.006 (76% in 2017); PX-0059.007 (68% in 2019). As previously discussed, *supra* n.243, the Google Play app store appears to be similarly built and reliant upon revenues generated from gaming apps and transactions. *See also* DX-3913.004-.013.

313 Trial Tr. (Schmid) 3205:4-11; Ex. Expert 6 (Hitt) ¶ 126, Fig. 35; Ex. Expert 7 (Lafontaine) ¶ 26; DX-5552.

Both Apple's App Store and internal business structure support and reflect this division. On the App Store, editors consider a different set of factors when curating games for spotlight marketing (*i.e.* the "Today" page) than they do when curating other non-gaming apps. Moreover, Apple internally tracks the categories differently, as Apple routinely tracked "Games" billings separately from other parts of the App Store business. Further, there are two heads of business development for the division spearheading the App **[**110]** Store: one division head specifically for games and another division head for all non-gaming categories.[314]

Third, game app transactions are a distinct product because they exhibit peculiar characteristics and uses. Game apps and their transactions are not substitutes for non-game apps, which include a diversity of categories and purposes. Indeed, Dr. Evans conceded and confirmed in a lengthy exchange that game transactions are *not* substitutes for non-game transactions on the App Store. Epic Games' other expert witness, Dr. Cragg, contradicted Dr. Evans on this point by asserting the opposite—that non-game transactions are substitutes for game transactions.[315] The **[*969]** Court finds Dr. Evans more credible on this point.[316]

Fourth, game developers often use specialized technology to create their game apps. For example, specialized middleware tools like the Unity engine and Epic Games' *Unreal Engine* are primarily used by game developers. Using these specialized tools and graphics engines, game developers tend to "really push the limits of what graphics processing can do" to the extent that they are "in a different category" from other developers as a result.[317]

Fifth, game apps have **[**111]** distinct consumers and producers: gamers and game developers. Gamers are recognized as a discrete, albeit diverse, subset of app consumers. Moreover, game developers, including Epic Games, tend to specialize in the development of game apps and related gaming software. For instance, among the set of developers who had sold at least one game or item of in-app content in 2019, 88% of their App Store revenue was derived from game apps. Indeed, as Michael Schmid, Head of Game Business Development at Apple, remarked:

> So game developers are quite separate from app developers in many circumstances. There are exceptions like big organizations like Microsoft that, you know, have Microsoft Office as well as, you know, Minecraft and other - other games.
>
> But generally speaking, game developers are focused on just developing games, and app developers are often focused on a single app or a suite of apps.[318]

Sixth, game app transactions differ in pricing structure, including in monetization models and effective prices, from non-gaming app transactions. In general, games monetize in different ways than do non-gaming apps. For example, game apps make nearly all of their revenue from in-app purchases (non-subscriptions). **[**112]** This differs from other major categories of apps, where music, fitness, and other apps make virtually all of their revenue from subscriptions. Indeed, there were no game apps among the top subscription apps for fiscal year 2019.[319]

---

[314] Trial Tr. (Fischer) 933:12-20; Trial Tr. (Schmid) 3205:4-11, 3226:8-12; Ex. Expert 6 (Hitt) ¶ 127; Ex. Expert 7 (Lafontaine) ¶ 26; DX-4178.006; DX-4399.008.

[315] Ex. Expert 6 (Hitt) ¶ 117, Fig. 30; Ex. Expert 7 (Lafontaine) ¶ 26; Trial Tr. (Evans) 1641:7-1642:24; Trial Tr. (Cragg) 2301:19-2302:1.

[316] Apple demonstrated on cross examination that Mr. Cragg was willing to stretch the truth in support of desired outcome for his client. By contrast, Dr. Evans was willing to concede points contrary to the position of his client. The Court finds this difference significant in weighing the credibility of each.

[317] Trial Tr. (Schmid) 3226:23-3227:13; Ex. Expert 6 (Hitt) ¶ 265. The Court notes, however, that, at least with respect to *Unreal Engine*, there is also evidence that it has some application beyond the game creation. *See supra* Facts § I.B.1.

[318] Trial Tr. (Schmid) 3226:13-22, 3350:5-3352:3; Ex. Expert 6 (Hitt) ¶ 125, Fig. 34; DX-3248.019-.020.

[319] Trial Tr. (Lafontaine) 2045:3-9; Trial Tr. (Hitt) 2188:18-2189:8; Trial Tr. (Schmid) 3227:14-24 ("[M]any app developers now are really focused on subscription revenue and growing a subscription business, whereas game developers not as much."), 3230:1-20; Ex. Expert 6 (Hitt) ¶¶ 121-23, Figs. 30-32; PX-0608.016.

Moreover, the pricing and effective commission paid on each transaction differs significantly between game apps and non-game apps. Specifically, there is considerable variation in the average transaction price between app genres, including game apps and other apps. For example, the average transaction price for game apps is $ 9.65, while the averages for other app genres range between $ 7.11 for photo and video apps and $ 14.10 for health and fitness apps. Similar variation between game apps and non-game apps is found in the average download price for apps and the **[*970]** effective commission paid on each transaction.[320]

Seventh, game apps are distributed by specialized vendors. The availability of game apps versus non-game apps in the wider market different significantly. Indeed, game apps have multiple avenues for distribution through various transaction platforms and devices, which differs in both kind and degree from those available to non-gaming apps. Some of these **[**113]** devices and platforms available to gaming apps are specifically designed for such games—and not non-gaming apps. For example, game consoles (PlayStation, Xbox, Switch) are designed with gaming as their primary purpose with other limited related entertainment functionality (*e.g.*, film, music, and television streaming). Similarly, the game transaction platforms available on these devices focus almost exclusively on game transactions, including the PlayStation Store, Xbox Game Store, and Nintendo eShop.[321]

Eighth and finally, platforms providing game app transactions are subject to unique and emerging competitive pressures. The rise of hybrid console platforms along with cross-platform games and cross-platform gaming services (*e.g.*, cloud-based streaming services) reflect the ongoing dynamic nature of the wider gaming market. For instance, Nvidia's GeForce Now game streaming platform (available via web browsers or the GeForce Now client) only became available in February 2020 and has a library of 850 games (including *Fortnite*, though planned to be released in October 2021 on GeForce's iOS game streaming service), with 2,500 games to be added. Microsoft similarly is in development of its own **[**114]** cloud gaming service, internally named xCloud, that will be added to its Game Pass Ultimate Subscription.[322] With these numerous alternative distribution options, developers are having to determine in the initial planning which platforms to utilize in creating game apps. This compares to non-game app developers who generally distribute on more limited devices and platforms. As an example: Mr. Schmid credibly remarked on the state of the market for developers:

> On the game side it's very common. Some of our biggest game developers will have games on many different platforms. Sometimes those games are cross-platformed. Sometimes they are specific to mobile or even exclusive to a console in certain cases.
>
> On the app side, same thing except it's more typical that an app, for instance, like Yelp would be -- the entity itself, the company, and the app would only be, you know, one app as opposed to a game developer that would have many games.[323]

Accordingly, in light of the foregoing, the Court finds that there is a substantial **[*971]** distinction between the transactions for gaming apps and non-gaming apps.

C. Epic Games: Facts Relevant to iOS In-App Payment Processing Aftermarket

---

[320] Ex. Expert 6 (Hitt) ¶¶ 123, 124, Figs. 32-33.

[321] Ex. Expert 6 (Hitt) ¶ 117; Ex. Expert 7 (Lafontaine) ¶ 34; Ex. Expert 8 (Schmalensee) ¶ 104; Trial Tr. (Wright) 555:13-556:5, 583:8-18; Trial Tr. (Grant) 697:14-20.

[322] Ex. Expert 8 (Schmalensee) ¶¶ 104, 107; Trial Tr. (Wright) 565:20-566:1; Trial Tr. (Patel) 422:12-15, 427:4-17, 429:11-14, 461:13-462:5, 477:7-15, 526:15-18; Trial Tr. (Sweeney) 176:22-177:12. *See also infra* Facts § II.D.3.d. Indeed, the Court notes that the only third-party app stores that Epic Games identified during the course of the bench trial as having sought to be offered through the App Store are "gaming app stores," and not "any other kind of store." *See* Trial Tr. (Evans) 1552:22-1553:8. This suggests that there are indeed competitive pressures and consumer demands for games apps that are incentivizing and encouraging game developers to reach consumers through multiple platforms.

[323] Trial Tr. (Schmid) 3207:10-18.

Epic Games' **[**115]** assertion that the iOS in-app payment processing aftermarket is a relevant antitrust market relies on the assumption that Apple maintains a "lawful monopoly in the iOS app distribution market."[324] Because Epic Games cannot show such a market even exists, the argument fails at the outset.

Nevertheless, the Court addresses the argument because another fundamental problem exists. As discussed below, one must define an antitrust market in terms of the relevant product. If there is no product, such as with the mobile operating systems discussed above, there can be no market based thereon. Plaintiff's proposal begs the question of whether IAP is a product.

Apple's IAP or "in-app purchasing" system is a collection of software programs working together to perform several functions at once in the specific context of a transaction on a digital device. Apple uses the system to manage transactions, payments, and commissions within the App Store, but it also uses the system in other "stores" on iOS devices, such as "the iTunes Store on iOS, Apple Music, iCloud or Cloud services" and "physical retail stores".[325] The system is not something that is bought or sold.

IAP is not integrated into the App Store **[**116]** itself, even though it is integrated into an iOS device.[326] By "integrated," the Court only means that the application has been engineered specifically to work seamlessly on the device. Neither side focused on the engineering to find otherwise.

More specifically, Apple's IAP, as used here, is a secured system which tracks and verifies digital purchases, then determines and collects the appropriate commission on those transactions. In this regard, the system records all digital sales by identifying the customer and their payment methods, tracking and accumulating transactions; and conducts fraud-related checks. IAP simultaneously provides information to consumers so that they can view their purchase history, share subscriptions with family members and across devices, manage spending by implementing parental controls, and challenge and restore purchases.

Apple also intends the system to provide the customer with a single interface which can be used, and trusted, with respect to all purchases regardless of the developer. Importantly, the system has become more sophisticated over time, but the record does not detail the various versions.[327] Notably the IAP system requires developers to **[**117]** independently verify delivery of inapp purchasing content; it cannot verify that kind of delivery itself.[328]

With respect to the commission and the transfer of money between a developer and both Apple and the consumer, Apple engages third-party payment processors.[329] **[*972]** Given the volume of transactions at issue, Apple pays those processors somewhere in the range of one to two percent.[330]

The Court agrees that simple payment processing can occur outside of IAP and plaintiff points to examples of this happening in 2009.[331] However, those examples only concern simple payment processing, *not* all the functionality

[329] Trial Tr. (Schiller) 2796:4-2799:11; Ex. Expert 8 (Schmalensee) ¶¶ 136, 161-62; Trial Tr. (Evans) 1565:3-6; 1664:16-18 (Q: ". . . I'm asking you if in your relevant market, Apple is a competing payment processor? A. Largely no.").

[330] Ex. Depo. 12 (Gray) 78:10-79:8.

[331] *See* Ex. Depo. (Forstall) 230:05-231:02; PX-0888; PX-1701.002; PX-1813; PX-1818.001; PX-1703.001-.002; PX-1709.001. Mr. Forstall testified that he generally remembered that developers were trying to collect payment directly through apps prior to 2009, but Epic Games introduced only stray emails to show this took place. Regardless, Epic Games does not claim that Apple had market power in 2009, so this theory of purported price increase has little relevance. Ex. Depo. (Forstall) 230:05, 230:16-

outlined in the preceding paragraph, including the functionality to ensure Apple received its commission. Nor do the examples show that Apple was waiving its commission for those developers. Rather, in December 2008, the product was new, so, by definition, in flux.

Epic Games ignores this other functionality to argue that Apple merely "matches" developers to consumers; a "matching" service.[332] This statement is partially true, but Apple has never argued that it levies a commission merely because it matches the developers with the customers. Apple argues that it uses this model to monetize its **[**118]** intellectual property against the entire suite of functions as well as to pay for the 80% of all apps which are free and generate no direct revenue stream from the developers other than the annual $ 99.00 developer fee.

Creating a seamless system to manage all its e-commerce was not an insignificant feat. Further, expanding it to address the scale of the growth required a substantial investment, not to mention the constant upgrading of the cellphones to allow for more sophisticated apps.[333] Under current e-commerce models, even plaintiff's expert conceded that similar functionalities for other digital companies were not separate products.[334] Under all models, Apple would be entitled to a commission or licensing fee, even if IAP was optional.[335] Payment processors have the ability to provide only one piece of the functionality. There is no evidence that they can provide the balance. Thus, the Court finds Epic Games has not shown that IAP is a separate and distinct product.[336]

D. Apple: Digital Video Game Market

Apple proposes that the wider global digital video gaming market is the relevant product market. Epic Games opposes this product market. The Court summarizes the evidence with respect to **[**119]** global digital **[*973]** video gaming. Given how the cases was litigated, much of the evidence relates to plaintiff specifically.

1. *Defining a Video Game*

The Court begins with a definition of "video game." Unfortunately, no one agrees and neither side introduced evidence of any commonly accepted industry definition. The evidence included one witness, Mr. Weissinger, who acknowledged that, even with his deep background in the gaming industry, he was not familiar with any industry standard definition of a video game.[337] Mr. Sweeney, for instance, defined a game as follows:

> I think game involves some sort of win or loss or a score progression, on whether it is an individual or social group of competitors. With a game you're trying to build up to some outcome that you achieve, as opposed to an open-ended experience like building a *Fortnite Creative* island or writing a Microsoft Word document. There is no score keeping mechanic and you are never done or you never win.[338]

230:18, 230:20-230:22; Trial Tr. (Evans) 1670:24-1671:2; *e.g.*, PX-1709. Moreover, it merely shows that the nascent business was in flux.

[332] As noted above, this aftermarket relies on the distribution market where the "match" is made. Payment is necessarily rendered thereafter. *See* Trial Tr. (Evans) 1596:8-1597:1.

[333] Trial Tr. (Malackowski) 3619:2-14; Trial Tr. (Fischer) 933:20-934:16 (describing Apple's investment in the 2017 redesign); Trial Tr. (Schiller) 2877:2-20.

[334] Trial Tr. (Evans) 1654:17-1655:22, 1657:8-22, 1659:25-1660:16 (agreeing that similar functionalities at Uber, Lyft, Grubhub, Wish, StubHub, DoorDash, Instcart, Postmates, Amazon Shopping, Wal-Mart, and eBay are not separate products).

[335] Ex. Expert 8 (Schmalensee) ¶ 157.

[336] Epic Games also relies on Section II.F. of its Findings of Fact which relates to iOS App Store Profitability. In evaluating IAP, the Court has focused on functionality.

[337] Trial Tr. (Weissinger) 1297:25-1298:2 ("Q. In your view, is there an industry standard definition of what could be called a game? A. I don't think so, no.").

[338] Trial Tr. (Sweeney) 328:13-19.

Mr. Trystan Kosmynka, Apple's current Head of App Review, admittedly "not an expert in gaming,"[339] noted that "games are incredibly dynamic," that "[g]ames have a beginning, [and] an end," and that "[t]here's challenges in place."[340]

At a bare **[**120]** minimum, video games appear to require some level of interactivity or involvement between the player and the medium. In other words, a game requires that a player be able to input some level of a command or choice which is then reflected in the game itself.[341] This gaming definition contrasts to other forms of entertainment, which are often passive forms enjoyed by consumers (*e.g.*, films, television, music). Video games are also generally graphically rendered or animated, as opposed to being recorded live or via motion capture as in films and television.[342]

Beyond this minimum, the video gaming market appears highly eclectic and diverse. Indeed, neither Mr. Sweeney's nor Mr. Kosmynka's descriptions, which focus on linear narratives and competitive modes, captures the diversity of gaming that appears to exist in the gaming industry today. Mr. Allison acknowledges that while some games are competitive, and are appropriately labeled as such on the Epic Games Store's website, other games are not necessarily competitive.[343] Given the **[*974]** genre of simulation games like *The Sims* or *SimCity*, or open-ended sandbox games like *Minecraft*, the Court cannot conclude that any linear **[**121]** narrative is required to qualify as a video game.[344] Thus, the Court concludes that video games include a diverse and eclectic genre of games, that are tied together at minimum through varying degrees of interactivity and involvement from a game player.[345]

Some of Epic Games' fact witnesses suggested in their testimony that *Fortnite* was much more than a video game: it is a metaverse. The Court previously discussed Mr. Sweeney's sincere beliefs as to *Fortnite* and the metaverse. A metaverse is a virtual world in which a user can experience many different things—consume content, transact, interact with friends and family, as well as play.[346] According to Mr. Sweeney, game play need not be a part of a user's metaverse experience, which is more to mimic the reality of life than to present game play.[347]

---

[339] *Id.* 1190:10.

[340] Trial Tr. (Kosmynka) 1015:23-25.

[341] For instance, the Court is generally aware that one of the first commercially successful games, *Pong*, consisted of minimal input from the player of moving a paddle up or down. Of course, modern console, computer, and mobile gaming now permit dynamic inputs beyond just one input. For instance, modern controllers for gaming consoles now include at least two analog sticks, a directional pad (d-pad), and several buttons found on both the front face and side edges of each controller. *See generally* PX-2776 (Nintendo Switch); PX-2777 (Sony PlayStation 5); PX-2778 (Microsoft Xbox Series X).

[342] Though, the Court understands that some games, such as older *Mortal Kombat* games, have utilized motion capture technology in rendering graphics and animations in the game.

[343] Trial Tr. (Allison) 1241:16-1242:18. Although not in the record, the Court generally understands that: (1) *The Oregon Trail* is a game that simulates crossing the United States of America via the historic Oregon Trail in the nineteenth (19th) century; and (2) that *The Sims* is a life simulation game that simulates general modern life (*i.e.*, socializing, employment, romance, family, skills, etc.) through player characters known as sims.

[344] Of course, many games are also narrative driven as recognized by Mr. Kosmynka. Microsoft's internal review of *The Last of Us Part II*, a Sony PlayStation exclusive video game, confirms that at least some games are focused more on the narrative of the game as opposed to the game play itself. *See* PX-2476.002.

[345] Indeed, the genre of gaming seems to include a diversity of genres and styles, with no strict consensus on what a game *must* include in order to be defined as a game.

[346] Trial Tr. (Sweeney) 99:17-22; Trial Tr. (Weissinger) 1295:10-11 (describing a metaverse as a "social place where people can experience events together and hang out together"); Trial Tr. (Kosmynka) 1127:18-23 ("So my own understanding of the Metaverse is a . . . virtual world where you go with your particular character and are with players that you know, players you may not know, and you navigate around that Metaverse, which could include additional worlds in various experiences.").

As discussed, to Messrs. Sweeney and Weissinger "*Fortnite* is a phenomena that transcends gaming."[348] Because of the inclusion of these social and creative experiences, Mr. Weissinger testified that he would not consider the *Party Royale* and *Creative* modes as qualifying as a game.[349]

Plaintiff's characterization of *Fortnite* notwithstanding, the Court **[**122]** need not reach a conclusive definition of a video game or game because by all accounts, *Fortnite* itself is both externally and internally considered a video game.[350] Epic Games markets *Fortnite* to the public as a video game,[351] and further promotes events within *Fortnite* at video game related events.[352] Although *Fortnite* contains creative and social content beyond that of its competitive shooting game modes, there is no evidence or opinion in the record that a video **[*975]** game like *Fortnite* is considered by its parts (*i.e.*, the modes within the game) instead of in its totality. By both Mr. Sweeney and Mr. Weissinger's own descriptions, the metaverse, as an actual product, is very new and remains in its infancy.[353] At this time, the general market does not appear to recognize the metaverse and its corresponding game modes in *Fortnite* as anything separate and apart from the video game market.[354] The Court need not further define the outer boundaries of the definition of video games for purposes of this dispute.[355]

2. *General Video Game Market*

The **[**123]** wider video game market appears dynamic, innovative, and competitive. This wider market includes at least four distinct submarkets for digital game app distribution:

1. online mobile app transaction platforms (*i.e.*, the App Store, the Google Play app store, and the Samsung Galaxy Store);

---

347 Trial Tr. (Sweeney) 99:23-25.

348 *Id.* 98:6-8; Trial Tr. (Weissinger) 1295:8-21.

349 Trial Tr. (Weissinger) 1439:8-11 ("There are experiences beyond that, and there are some experiences that are separate and excluded from that as well. So there are some that I don't think I would qualify it as a game.").

350 Trial Tr. (Sweeney) 93:22-94:17, 111:13-17, 116:6-12, 324:14-23; Trial Tr. (Wright) 647:24-25; DX-5552; Trial Tr. (Allison) 1246:7-1247:18; Trial Tr. (Weissinger) 1354:1-1376:15 (explaining the various game modes within *Fortnite*, all of which are and/or contain games).

351 *See, e.g.*, DX-5536.001; Trial Tr. (Allison) 1245:9-1247:18 (discussing DX-5536.001); DX-5541 (YouTube video demonstrating game play mechanics of *Fortnite*); Trial Tr. (Schmid) 3205:1-3 ("Q. And do you know, for example, what category of app Epic chose for *Fortnite*? A. They chose games.").

352 *See* Trial Tr. (Weissinger) 1336:11-15 (describing then upcoming collaborated events at the "Video Game Awards").

353 *See* Trial Tr. (Weissinger) 1295:9-10; Trial Tr. (Sweeney) 99:14-15; Trial Tr. (Schiller) 2834:24-2835:5.

354 There was also much discussion about a similar metaverse game, *Roblox*, which contains creative experiences that are similar to those offered in the creative and party modes in *Fortnite*, and whether it too qualified as a video game. The discussion was not initially helped by Mr. Kosmynka, whose self-acknowledged unfamiliarity with the video game market and lack of knowledge on *Roblox*'s game classification caused him to use imprecise terminology in his testimony. *See* Trial Tr. (Kosmynka) 1015:18-1016:7, 1190:9-1191:6. Indeed, Mr. Schmid noted that while *Roblox* may have renamed the internal games offered within *Roblox* as "experiences," it is "not saying that *Roblox* has decided they are no longer a game." Trial Tr. (Schmid) 3295:15-17.

355 The Court leaves the thornier further questions of what is properly included and excluded in the definition of a video game to the academics and commentators. For instance, one example that arose beyond the issue of *Roblox* was the recent genre of films and shows on Netflix that allow users to make a choice akin to a "choose your own adventure," including in *Black Mirror: Bandersnatch*, and *Unbreakable Kimmy Schmidt: Kimmy vs the Reverend. See* Trial Tr. (Wright) 576:24-577:2. The Court need not determine whether this interactivity is sufficient to convert these forms of media into a video game. Suffice it to say, these examples as well as the ongoing efforts in the metaverse, appear to be an ongoing trend of converging entertainment mediums where the lines between each medium are beginning to mesh and overlap.

2. online gaming stores found on desktop and personal computers ("PCs"), including online transaction platforms focused on game distribution (*e.g.*, Valve Steam), and developers' own stores that directly distribute their games (*e.g.*, Epic Games Store);

3. digital stores on consoles (*i.e.*, Sony PlayStation, Microsoft Xbox, and Nintendo Switch); and,

4. more recently, streaming game services (*e.g.*, Nvidia GeForce Now, Microsoft Xbox Cloud Gaming, Google Stadia).[356]

The gaming market today is the result of actions taken by competitors in the last two decades. The first successful online platform focused on game distribution was Steam, which launched in 2003. Steam By **[*976]** pioneering digital distribution on the PC, Steam enjoyed "a real boom in both Steam's business and just PC gaming and digital gaming in general." Steam "is a dominant player in the space and was in 2018 with 70 to 85 percent market share depending **[**124]** on how you define the space."[357]

Steam's success resulted in the rise of other PC-focused digital distribution platforms. In addition, the console platform owners created their own digital marketplaces: Microsoft launched Xbox Live Marketplace in 2005 (now Xbox Games Store on Xbox Series X and S), Sony launched the PlayStation Store in 2006, and Nintendo launched the Wii Shop Channel that same year (now the Nintendo eShop on the Switch). Most of these platforms, including Steam, charged a 30% commission.[358]

Since the App Store launched in 2008, the marketplace participants for game app distribution increased.[359] For example, Google announced the Android Market in 2008 (which later became Google Play in 2012), Nokia and Samsung launched their Ovi Store and Galaxy Apps Store in 2009, and Nintendo launched its eShop for its 3DS device in 2011.[360]

Today, "[t]here are many ways to monetize [an] app on the App Store," and Apple, like other industry participants, facilitates a variety of business models for developers. At least with respect to the App Store, there are at least five business models developers can use to make money on their apps: the free, freemium, subscription, paid, **[**125]** and paymium models. The record shows that under the "paid model," (also called the "download and install" model), for instance, a developer may charge a price for the user to download the app. As discussed, a developer may instead choose the "freemium model," allowing users to download an app for free but permitting in-app purchases. Alternatively a developer can offer subscriptions to users (for sale in the app, through a different platform, or online), can sell users digital currencies that can be used in the app (for sale in the app, through a different platform, or online), can sell advertisements in the app, or can charge for in-app promotions and events.[361]

3. *Four Submarkets*

---

[356] Trial Tr. (Sweeney) 95:23-96:1, 135:21-24, 138:23-25, 177:23-178:14; Trial Tr. [361] PX-2790.009; Trial Tr. (Fischer) 925:24-926:1; DX-4614; Trial Tr. (Schiller) 2768:1-8, 2773:23-2774:5, 2779:12-21, 2791:11-18, 2858:11-22, 3094:11-22, 3100:9-22.

The Court summarizes the evidence with respect to each of the four distinct submarkets as it impacts the market definition:

a. Mobile Gaming

With respect to mobile gaming, the two dominant players are Apple (App Store) and Google (Google Play app store), with several other Android OS players including the Samsung (Samsung Galaxy Store). Importantly, both third-party and internal market reports recognize mobile gaming as a distinct market within the wider video gaming market.[362] Indeed, mobile gaming is "a vast part **[**126]** of the overall gaming industry," so market participants, such as Microsoft, **[*977]** look "at mobile as a segment of the game industry as a whole," and "[i]n any industry analysis, mobile would have to be part of the consideration."[363] Subsumed in mobile gaming are related Android and iOS tablets offered by Apple, Google, Amazon, and Samsung.[364] Notably, whereas Apple iOS devices are closed platform or walled garden devices, Google Android devices are open platform devices.

Apple has always viewed Google Play as a significant competitor, including with respect to games transactions. There is further evidence of platform competition with the Samsung Galaxy store, as well.[365] Apple also understood that other Android marketplace platforms were competitive forces. For example, when Amazon launched its Android app marketplace, Mr. Schiller wrote internally: "[T]he 'threat level' is not 'medium', it is 'very high.'" Later, at the Fourth Annual App Store Global Management Team Summit, Apple spent considerable time discussing competition from Google, Samsung, and Amazon.[366]

Several other platform distributors own and maintain apps that offer some functionality and limited game streaming in connection **[**127]** with their original platforms. Steam also offers a variety of iOS applications through the App Store that allow Steam customers to manage their account and even stream games from their Steam library to their iOS device. PlayStation and Xbox have similar apps in the App Store that allow customers of those consoles to stream games from their consoles in order to play on their iOS device.[367]

Although relatively newer than both PC gaming and console gaming, mobile gaming constitutes a significant portion of the video gaming market. Indeed, as of 2017, it was forecasted that mobile gaming would generate *more than half of all game revenue globally*, and that the market would top more than $ 100 billion by 2021.[368] Similarly, Microsoft's internal report reflects that mobile gaming accounted for "more than half of the industry revenue in CY2019."[369]

Notably, the overwhelming majority of gaming revenue in mobile gaming derives from free-to-play games, or freemium model games.[370] As contrasted to other platforms, women gamers of all ages (*e.g.*, millennials, gen-x,

and boomers) and gen-x male gamers are predominately more likely to play and game on mobile devices, with an overwhelming focus and interest on **[**128]** casual games.[371]

The mobile gaming market is slightly more nuanced domestically in the United States than it is globally. At least as of 2017, console gaming accounted for 43% of gaming revenue, whereas smartphone and tablets together accounted for approximately 40% of gaming revenue, with the **[*978]** remaining 17% of gaming revenue in browser and PC gaming.[372] Console gaming still accounted for a larger share in the United States and Western European countries, whereas mobile gaming generally made up a larger share of gaming revenue in the remaining parts of the world, but especially in Asia and in developing countries, where mobile gaming was already by 2017 the majority in gaming revenue.[373]

In general, the rate charged by platform owners such as Apple and Google, and those third-party app stores on Android such as Samsung, remain at 30%, notwithstanding both Apple and Google's recent moves to lower this rate for developers earning less than one million dollars annually to 15%. The Court notes however that some third-party mobile device marketplaces have decreased their rate after negotiations between it and developers.[374]

b. PC Gaming

PC gaming is characterized by an open **[**129]** market which includes several digital gaming marketplaces, such as Valve Corporation's Steam Store and more recently Epic Games' Epic Games Store, and several direct distribution platforms operated by larger game developers. As noted above, Steam retains a significant market share in the PC gaming area.

In the United States, as of 2017 PC gaming only accounted for approximately 15% of all gaming revenue. Globally, PC gaming does not account for a majority of gaming revenue in any country, though it has a significant market around or at least one-third (1/3) share in several Eastern European countries and in both China and South Korea.[375] Of the demographics, "male boomer" aged gamed in the United States are more often playing games on the PC, with an interest in casual games.[376]

Similar to mobile gaming, PC gaming generated a majority of its gaming revenue from free-to-play or freemium games. Though, unlike mobile gaming, there is a sizable portion of PC gaming's revenue that is derived from pay-to-play games (*i.e.*, games purchased up-front).[377]

A platform's commission rate in the PC gaming area, historically 30%, now varies among the competing platforms. Steam's **[**130]** 30% cut, adopted since its inception in the early 2000s, was reduced in 2018 shortly before the launch of the Epic Games Store. Steam currently uses a tiered commission rate, whereby larger game sales and revenues decrease the commission rate, as low as to 20% for the highest tier of sales and revenues.[378] Meanwhile the Epic Games Store charges a 12% commission for app distribution, as well as a 12% commission for in-app

[378] Trial Tr. (Allison) 1209:13-1210:1.

purchases when the app developer chooses to use Epic Games' direct payment for in-app purchases.[379] Given that the 12% commission rate results in an operating loss, the move could be viewed as merely a litigation tactic. However, on the eve of trial, Microsoft recently announced, that it will be reducing its commission from 30% to 12% in the Windows Store.[380] In terms of digital game sales on **[*979]** PCs and Macs, the Epic Games Store is "[a] clear and strong number two" behind Steam.[381]*See supra* Facts § I.B.3. With respect to its expansion to non-gaming apps, the move was likely litigation related. *Id.* In addition, many other developers launched major digital distribution platforms for their own and others' titles: Ubisoft launched Ubisoft Connect in 2012 and Bethesda launched Bethesda.net **[**131]** in 2016.[382]

c. Console Gaming

There are three recognized market participants in the console gaming arena: Microsoft Corporation Xbox Series X and S (formerly Microsoft Xbox One), Sony Corporation PlayStation 5 (formerly PlayStation 4), and Nintendo Co. Ltd. Switch.[383] The evidence reflects that the market is split between two similar products (*i.e.*, the Xbox and the PlayStation) fiercely competing on both power, graphics, processing, and speed, and one product (*i.e.*, the Switch) that has innovated to compete on mobility.[384]

These three devices are generally considered "single purpose" or "special purpose" devices—as compared to mobile and PC devices, which are more general-purpose devices. In other words, these gaming consoles are generally made for the narrower purposes of gaming or entertainment (*e.g.*, video or music streaming).[385] These platforms "are designed to give you a gaming experience. [For example, p]eople buy an Xbox because they want to play games." In contrast, mobile and computer devices are general-purpose devices because there is a "wide, wide variety" of "different ideas and applications that can come through it." As a special purpose device, for **[**132]** instance, Microsoft's Xbox console is designed and marketed "to optimize the game experience," and it cannot perform many of the functions that mobile devices can, such as requesting a rideshare, taking a photo, or obtaining driving directions.[386]

Both the Xbox Series X and S and the PlayStation 5 were released in 2020, with their prior models (the Xbox One and **[*980]** PlayStation 4) released in the 2010s. With respect to these two devices, both have substantially similar hardware that renders cutting edge graphics similar to those on certain PCs and desktops, and can render and run

381 *See* Trial Tr. (Sweeney) 123:15-124:5, 262:19-263:11, 263:22-265:4, 265:7-11; Trial Tr. (Allison) 1199:15-1200:1, 1243:3-11. Among those mentioned was Itchio.io. With respect to this app, Apple's counsel alluded to certain sexually explicit video games (*i.e.*, "Sisterly Lust") offered by Itch.io. Given that the corresponding materials (*e.g.*, storefront game pages) were not submitted to the Court, the Court cannot conclude one way or another whether this particular game, or other games offered on Itch.io, are as problematic as so alluded or suggested by Apple's counsel. Nonetheless, the Court finds that Apple's questioning and Mr. Allison's answers thereto illustrate some problems that may occur when permitting "stores within stores": namely, disparate guidelines and policies, and the difficulty of reviewing materials hosted by third parties. *See* Trial Tr. (Allison) 1257:5-1258:8, 1258:21-1259:22, 1280:20-1281:22.

more realistic simulations than would be possible on mobile or other devices.[387] Indeed, the PlayStation and Xbox have the same reliance on additional peripherals and equipment: namely, a television or screen, speakers, and a controller.[388] Both devices further require a constant connection to a power outlet, as well as, for some games, access to the Internet via WiFi or ethernet cable.[389]

Games developed for the Xbox and PlayStation leverage the competitive advantages inherent in these systems. For example, with respect to Xbox console games, "developers have taken a design choice to build an experience **[**133]** that they want to have rendered . . . with all the compute power, graphic fidelity, that this box provides." This contrasts to mobile games, which are generally designed for a "more casual" gaming experience and the "vast majority are free to play and then have in-app purchase mechanisms as part of them." In some instances, console game titles that are rewritten to run on iOS devices can be "different games" in that "[t]hey feel different," "operate different[ly]," and could be "leveraging the marketing brand of that," while being a "different version of the game that is written to run on [mobile devices]."[390]

The remaining player in the console gaming market, the Nintendo Switch uniquely competes on a separate ground: mobility.[391] Nintendo introduced the Switch, a quasi-mobile device, in 2017, and the eShop became the Switch's online store.[392] Unlike the PlayStation and the Xbox, the distinguishing feature of the Switch is that it can be played in *either* a conventional console manner (*i.e.*, with a separate screen and controller) *or* a mobile handheld fashion (*i.e.*, in a modified tablet form, whereby the separating controllers attach to the sides of the tablet).[393] Because of this mobility, **[**134]** there is substantial overlap in the design, form, and function with mobile devices with respect to gaming.[394] Moreover, Mr. Sweeney twice stated in a matter of minutes that the performance of *Fortnite* on the Switch and smartphones **[*981]** are, in fact, "similar."[395] The only identified difference between the Switch and certain mobile devices is that, like the PlayStation and Xbox, a Switch must also rely on a WiFi connection.[396]

390 *See id.* 539:22-25, 636:11-17.

391 The Court notes a glaring lack of evidence on the Nintendo Switch, and its previously related but distinct products, in the record. Indeed, the Court is aware that both Sony and Nintendo, at one point, sold separate handheld gaming devices (*e.g.*, Nintendo Gameboy, Nintendo DS, Sony PlayStation Vita). No evidence or explanation was provided on what occurred with these products or the handheld device market, though, the Court surmises that the rise of the mobile gaming market likely subsumed the handheld gaming market and perhaps led to Nintendo's decision to switch to mobility as a competitive edge for the Switch. Regardless, the Court notes the lack of evidence on this point, as well, as the Nintendo Switch generally, where evidence is limited to third-party testimony and certain Nintendo documents. Indeed, neither party called a Nintendo affiliated witness in this action to inquire on issues of competition in the general or console gaming market. Instead, the Court is left with a limited record on these matters.

392 *See* Trial Tr. (Grant) 696:8-11; Ex. Expert 6 (Hitt) ¶ 190 & Fig. 1.

393 *See generally* PX-2776 (Nintendo Switch). Although not reflected in the record, the Court notes that one version of the Switch, the Switch Lite, can *only* be played in a mobile and handheld manner.

394 *See* Trial Tr. (Grant) 696:6-11 (describing similarities in screen size, portability, and other features between smartphones and the Switch); Ex. Expert 6 (Hitt) ¶¶ 87-91.

395 *See* Trial Tr. (Sweeney) 139:17-18 ("The performance of *Fortnite* and Nintendo Switch is similar to many smartphones."); *id.* 140:8-9 ("The performance of *Fortnite* on smartphones and Switch is similar.").

396 *See* Trial Tr. (Evans) 1459:5-1461:20; Trial Tr. (Sweeney) 140:9-11.

However, not all tablets, including some iPads, have or permit cellular connection, and must similarly rely on WiFi.[397]

Based on the business models and choices undertaken by the players in the console gaming market, both Microsoft and Sony are in more direct competition with each other, while the Nintendo Switch remains more distantly in the competitive orbit of these two devices. Microsoft considers Sony's PlayStation a "direct competitor" to the Xbox because of the similarities in the hardware of these devices. In contrast, Microsoft considers the Switch as competition to the Xbox but "to a *much* lesser extent."[398] In relation to other devices, Ms. Lori Wright, Microsoft's Vice President of Xbox Business Development, noted that **[**135]** Microsoft does not consider cellular or tablet devices such as the iPhone or iPad as competitors to the Xbox.[399]

Moreover, on the limited record before the Court, Microsoft and Sony appear to have a different business model whereby digital downloads, including games, in-app purchases, and downloadable content, and physical game purchases effectively subsidize the initial cost of the gaming device. There is some evidence that console manufacturers, especially Microsoft and Sony, sell hardware at a loss and recoup those losses through the subsequent sale of software.[400] This is in contrast to the limited documents and testimony that are in the record which reflect that Nintendo makes a profit on the sale of hardware, *i.e.*, the Switch.[401]

[*982] Despite these differences, there are similarities amongst the players in the console gaming market. Like iOS devices, the Switch, PlayStation, and Xbox have also adopted "closed platforms" or "walled gardens" as Nintendo, Sony, and Microsoft do not allow users to install software on their consoles outside of the platform's official store.[402] Moreover, unlike mobile gaming devices, console gaming platforms use similar controllers consisting **[**136]** of analog sticks, dpads, and buttons located on the face and edges of the controller.[403]

---

[397] The Court notes that Epic Games' proposed product market includes both iPhone *and* iPad devices, without regard to whether these iPad devices are limited to those relying on cellular connections or not. Indeed, notwithstanding the distinction raised by some Epic Games witnesses, Epic Games states in its final proposed findings of facts and conclusions of law that "[t]here are no differences between iOS and iPadOS that are relevant to the facts herein." Epic Games FOF ¶ 25 n.1.

[398] Trial Tr. (Wright) 537:14-21 (emphasis supplied). Indeed, Ms. Wright only identified the Switch as a competitor after having been asked the substantively same question for a second time, wherein she identified the Switch as competition but qualified her answer by noting that the Switch competes "much less" than the PlayStation against the Xbox. *Id.* This appears to be in keeping with internal Microsoft documents reviewing its competitors, where numerous PlayStation games are identified over two-thirds of the page, in contrast to Switch games, which are limited primarily to just Nintendo published games and are relegated to the remaining third of the page along with games launched on PC. *See* PX-2476.006.

[399] Trial Tr. (Wright) 537:22-538:2. There is no evidence one way or the other in the record to confirm whether Sony would have a different view than Microsoft on this question of competition.

[400] *See* Trial Tr. (Wright) 551:24-13; Trial Tr. (Weissinger) 1350:18-1351:7; Trial Tr. (Evans) 1476:2-8. Apple contests this assertion where Epic Games did not seek admission of any documents supporting that testimony, and no such documents are otherwise in the record. *See* Trial Tr. (Evans) 1736:3-20. The Court however finds Ms. Wright credible in her statements, especially wherein they are not particularly flattering revelations for her employer, Microsoft (*i.e.*, that Microsoft does not make a profit on the sale of the Xbox hardware).

[401] DX-5322; *see also* Trial Tr. (Evans) 1736:21-24.

[402] *See* Trial Tr. (Sweeney) 180:17-184:9; Trial Tr. (Wright) 554:10-16. The Court notes that Mr. Sweeney testified that he understood that Nintendo permitted "Switch games to be sold by at least one third-party retailer digitally." *See* Trial Tr. (Sweeney) 239:18-240:3. Mr. Sweeney did not identify this third-party retailer, nor is there any further evidence in the record reflecting any arrangement between Nintendo and a third-party with respect to a third-party digital store.

[403] Trial Tr. (Grant) 695:4-9; *see also* PX-2274.001.

The standard commission rate across these console platforms is, like both the App Store and Google Play app store, 30%.[404] Although Epic Games witnesses and other third-party witnesses testified that console makers regularly engage in negotiations with developers and secure terms that factor into the overall value that the app developer receives.[405]

Compared to mobile gaming and PC gaming, the gaming revenue generated by console games in 2019 derived overwhelmingly from pay-to-play or buy-to-play games, as opposed to free-to-play or freemium games.[406] Demographics show that millennial male gamers are most often playing on a gaming console, with an interest in playing action games.[407]

d. Cloud-Based Game Streaming

A newer and ongoing innovation in the gaming industry includes cloud-based game streaming platforms. The companies involved in cloud-based game streaming include: Google Stadia, Nvidia's GeForce Now, Microsoft Xbox Cloud Gaming, and Amazon's Luna. Cloudbased game streaming services provide the experience of playing a game on a device that is being streamed from a **[**137]** remote data or server center. Unlike the other video game submarkets, cloud-based game streaming is not tied to a single device, and is instead a multi-platform service. Indeed, Microsoft has recognized in its 10-K that its Xbox Live services face competition from Amazon, Apple, Facebook, Google, Tencent, and these new "game streaming services."[408]

In light of the unique and innovative nature of cloud-based game streaming, certain issues arise that do not otherwise **[*983]** arise as compared to other gaming submarkets. Game streaming operates similarly to audio and television/film streaming, but further requires the transmission of user input in the game to a remote data center which then processes and renders the user's inputs and choices in the game back to a user's device through an audio and visual stream. The service at minimum requires some wireless or cellular connection to maintain connectivity to these remote data centers. Given this technological framework, the most significant of these issues is the issue of latency. As Mr. Aashish Patel, the Director of Product Management for Nvidia's GeForce Now, describes it, latency "[a]t a high level, [i]s from when you trigger an action to when **[**138]** you see the effect of an action."[409] In other words, latency is the time it takes between when an action is input into a controller or device and when the change is reflected in game. Methods reducing latency ensure there is no lag or delay in displaying the changes on screen or in game. Higher latency can impact game play, especially in certain competitive games.[410]

---

[404] *See* Ex. Expert 6 (Hitt) ¶¶ 161-162, 256; Ex. Expert 8 (Schmalensee) ¶ 41, Ex. 1; DX-3955.003; *see also* DX-3582.004-.005; DX-3464.012, .027, .031; Trial Tr. (Sweeney) 142:19-143:1, 161:13-15; Trial Tr. (Weissinger) 1349:14-23.

[405] Trial Tr. (Sweeney) 310:1-17; Trial Tr. (Schmalensee) 1958:1-3; Trial Tr. (Wright) 586:11-21.

[406] *See* DX-5523.002, .053.

[407] *See generally* DX-4217.

[408] Trial Tr. (Sweeney) 135:21-136:5, 177:18-178:14, 256:16-25; Trial Tr. (Cook) 3866:14-22; Trial Tr. (Hitt) 2119:20-2120:14; Trial Tr. (Patel) 422:1, 442:5-12, 471:10-472:21; Ex. Expert 6 (Hitt) ¶ 144; Ex. Expert 6 (Schmalensee) ¶ 120; Trial Tr. (Wright) 647:5-13. The Court notes that Mr. Patel's allegiances became quite apparent when he reluctantly, and hesitantly, equivocated in answering basic questions on cross examination with respect to cross-platform playing of games. Trial Tr. (Patel) 463:18-464:16. The Court accepts his testimony with some discounting based on his bias for controversial issues.

[409] Trial Tr. (Patel) 433:13-17.

[410] *Id.* 422:2-7, 434:18-23 ("Depending on the user and the game, the user may feel uncomfortable with the latency, doing an action and seeing the action performed later, it could result in if they are in a racing game, turning too late, for example."), 435:5-11 ("Depending on the game, yes, there can be competitive disadvantages for a user with higher latency."); Trial Tr. (Sweeney) 135:18-136:9; Trial Tr. (Grant) 712:17-714:10.

The Court summarizes the game streaming services from the record: Google Stadia is a game streaming service launched in November 2019 and is available on iOS through web streaming. Stadia offers a subscription model that provides access to a library of games.[411]

Nvidia GeForce Now launched in February 2020 and is also accessible through iOS as well as through the GeForce Now client. Nvidia GeForce Now allows users to stream games previously acquired or purchased from digital game distribution platforms (such as Steam or Epic Games Store). The GeForce service played on iOS as a web-based service has received mostly positive reviews and has performed excellently even on older devices, notably for which Apple receives no commission or payment. By the third quarter 2020, GeForce had 5 million users with a goal of doubling that within **[**139]** a year. GeForce also has doubled its price for new users. Mr. Patel also raised the issue of the need for an Internet connection and capacity issues for streaming, but those issues arise regardless of whether GForce is offered as a native app or a web app. With expanding bandwidth over the past five years, the overall streaming experience is now vastly better.[412]

Microsoft Xbox Cloud Gaming with Xbox Game Pass Ultimate (formerly known as Project xCloud) is another subscription-based streaming service that allows users to stream games to their Android devices. Xbox Cloud Gaming became available for selected Android devices and was recently launched on iOS, after some support from Apple engineers, in beta version. Press reviews say that the Xbox Cloud Gaming experience is very strong on **[*984]** PC and iOS. Ms. Wright states that it is a "great sign" for the prospects of Xbox Cloud Gaming that the beta is expanding. Epic Games does not support Xbox Cloud Gaming because it views "Microsoft's efforts with xCloud to be competitive with Epic Games' own PC offerings.[413] The Court understands that Epic Games therefore views certain multiplatform game streaming services as a threat to its currently single **[**140]** platform game store.

The Court notes that with respect to the iOS platform, both Nvidia and Microsoft maintain web apps instead of native apps. This is due to Apple's guidelines and rules prohibiting stores within applications and requiring the submission of each individual game to the App Store. Both companies would prefer to provide their services as native apps instead of web apps due to the ease of both optimizing the experience for game streaming users on devices and reducing latency. Neither company, however, provided evidence or testimony on the relative differences in latency between webs apps and native apps, even as to the iOS platform's Safari web browser. The Court cannot otherwise discern based on the limited record whether being limited to web apps has otherwise affected these services—especially considering the foregoing evidence showing positive reception among consumers and the industry to both services on the iOS platform.[414]

4. *Competition Among Platforms and Findings of Relevant Product Market*

Given the multitude and diversity of platforms available to consumers, it is not surprising that there is, at a base and general level, *some* competition amongst **[**141]** them in the overall video game market. As Mr. Sweeney remarked publicly in 2012:

---

[411] Trial Tr. (Sweeney) 256:16-25; Trial Tr. (Fischer) 901:19-21, 902:8-11; Ex. Expert 6 (Hitt) ¶ 144.

[412] Trial Tr. (Sweeney) 137:12-16; Trial Tr. (Patel) 422:12-15, 425:4-11, 456:15-24, 458:6-18, 459:18-460:5, 460:8-461:3, 464:11-465:1, 466:18-24, 469:18-23, 470:4-15, 471:25-472:21, 473:24-474:13, 475:5-15, 476:12-19 (acknowledging that "Nvidia and GeForce Now are not in the middle of that transaction" and receive no commission and instead all of that revenue goes to the developer).

[413] Trial Tr. (Wright) 565:20-567:19, 609:22-11:7, 611:21-621:1, 613:11-12; Ex. Expert 8 (Schmalensee) ¶ 120; Ex. Depo. (Kreiner) 106:19-107:6.

[414] Trial Tr. (Patel) 427:9-428:6, 429:11-430:2, 433:13-434:17, 438:11-14; 530:24-531:22; Trial Tr. (Wright) 577:3-579:10. Mr. Patel only characterized the additional latency as a result of using web apps as "a bit higher" than native apps, but otherwise provided no relative or quantitative comparison. Trial Tr. (Patel) 434:16-17. Indeed, Mr. Patel's later testimony hedged as to the actual latency problems with web apps, and he further did not identify any specific latency issues with the iOS platform's Safari web browser. *Id.* 530:1-16 (responding that with web apps, "you *could* argue that in some instances, it's worse than native application decoding," and web apps "*could*" increase latency (emphasis supplied)). Mr. Patel later conceded that regardless of whatever app model they used (*e.g.*, web app or native app), "[t]he majority of the process is the same." *Id.* 532:2-9.

> [W]e have a lot of platforms coming together. There are the tablet platforms, there are the smartphone platforms, and computers, you know, PC and Macintosh, and then there are consoles, Xbox 360, PlayStation, Wii, and some new handheld dedicated gaming devices, and God knows what else.
>
> This is too many platforms. And we're seeing now, iPad sales have surpassed the sales of desktop PCs. That's a real revelation to me. This is a product that wasn't invented until a few years ago, and it's basically supplanting the personal computer industry as we know it.
>
> Over time, these platforms will be winnowed down into a much smaller set of competing platforms. You know, there might be one or two or maybe three winners worldwide across everything—computers, game platforms, smartphones.
>
> So we should expect a lot of consolidation here, and winners and losers according to who picks the right directions and executes successfully on them.[415]

[*985] According to Apple, it faces intense pressure as it competes for developers and users across these platforms.

In a general sense, consumers have a choice of devices and transaction platforms **[**142]** through which to acquire, modify, and play games. Apple's mode of competing resorts to its historic model: user-friendly, reliable, safe, private, and secure. Mr. Sweeney does not dispute that "what is on a particular store is part of the competitive landscape among different stores in which customers make decisions between stores based on the quality, selection, and other policies of stores." Similarly, developers also have a choice among the distribution channels, including various transaction platforms, through which to distribute their apps to consumers. In some measure, Apple must likewise make its platform attractive to developers.[416] Given that Apple built and modeled the App Store in part on its gaming competitors (*e.g.*, Nintendo, Sony, and Microsoft), harnessing these competitors' in-app purchasing systems from the gaming context,[417] it is not surprising that Apple now faces competition amongst these very same players.[418]

Of course, the Court must determine where the *actual* competition lies between these platforms based on the current state of play in the overall market. This is a close question where the general video game market appears to be evolving and dynamic. **[**143]** While there is some competition amongst the players in the general video game market, the Court cannot say that this overall competition is sufficient for purposes of defining a relevant product market—at least not at this time.

What makes this determination difficult is that the market appears to be somewhat in flux. With the recent success of truly cross-platform games like Microsoft's *Minecraft* and Epic Games' own *Fortnite*,[419] these disparate platforms, each with their own unique and competitive advantages, are truly competing for consumers who wish to consume these increasingly popular cross-platform games and any transactions made therein. Indeed, video games can and are able to be ported across multiple devices.[420] However, not all games are like *Minecraft* or *Fortnite*; the market still reflects that video games are, for the most part, cabined to certain platforms that take advantage of certain

---

[415] DX-3768 at 26:1-23; Trial Tr. (Sweeney) 243:10-244:9.

[416] Trial Tr. (Schiller) 2748:6-24; *id.* 2867:9-20 (describing the App Store's competition with Steam); Ex. Expert 8 (Schmalensee) ¶¶ 122-126; Trial Tr. (Sweeney) 261:19-23; Trial Tr. (Hitt) 2130:5-7; *see also* Trial Tr. (Schmid) 3240:1-7; DX-4399.046-.054 (Apple has also benchmarked the App Store against Android Market, Google Play, and other competitors in a 2017 presentation, where it listed Google Play in the "Competition" section, along with Facebook Messenger games, publishers, platform marketplaces, and social platforms).

[417] *See generally* PX-0888.

[418] DX-4178.008.

[419] The record demonstrates that the App Store is one of several competing platforms, such as the PlayStation and Xbox, with respect to cross-platform play for *Fortnite*. Trial Tr. (Sweeney) 236:19-237:2; DX-3125.005.

[420] *See generally* Trial Tr. (Grant) 671:2-673:20.

features of that platform, such as graphics and processing, or mobility.[421] The record reflects that the industry players are only slowly and recently reacting to compete against the wider gaming platforms.

With cross-platform games like *Fortnite* available on **[**144]** multiple devices, these platforms are truly competing against one another for these in-app transactions. For instance, an internal Epic Games email from September 2018 notes that "purchase **[*986]** behavior may have changed with the addition of mobile, especially Apple and more recently Android, where users are just logging onto their mobile app to purchase." In other words, "most players are still playing on PC/Epic platform[s] as they did before, but purchasing on other platforms like mobile because it may be easier and more convenient [i.e.] when the store updates."[422] This is despite the fact that iOS *Fortnite* players consisted of only approximately 10% of daily active users, and *Fortnite* players generally prefer playing on alternative platforms.[423]

In response to this exact scenario, where gamers play on one platform but spend on another, some other platform owners have enacted substantive policies regarding cross-wallet and cross-play restrictions. Sony, for instance, enacts a cross-play policy that compensates Sony where players spend on other platforms but primarily game on Sony's PlayStation platform.[424] Meanwhile, Sony and Switch have enacted policies that limit the cross-wallet functionality **[**145]** across platforms.[425] Also unlike certain consoles, Apple does not require price parity; that is, developers are free to price their in-app content on apps downloaded from the App Store higher than the same content sold through other platforms.[426]

While these policies and cross-platform games might evidence some convergence of competition amongst them at some point in the future, the relevant product market does not appear to be so wide as to include all platforms at this time. This is especially so given the distinct submarkets discussed above: namely, mobile gaming, computer gaming, and console gaming.

The question remains however on where (i) the Nintendo Switch, which is distinctly both a hybrid console and mobile gaming device, and (ii) game streaming services, a multiplatform game service also available on iOS platforms, fall in the general market and the above submarkets. Facially, the inclusion of the Switch and game streaming services in a relevant product market defined as mobile gaming transactions has logical appeal. The Switch is essentially a game specific tablet with detachable controllers on its sides. Its inclusion would make logical sense where tablets are also included **[**146]** in the relevant product market. Witnesses also confirmed that games (including *Fortnite*) for both the Switch and mobile devices operate substantially the same on both devices. Moreover, what evidence exists in the record shows that the Switch generally competes significantly differently as compared to the other two console players—the PlayStation and Xbox.

The inclusion of game streaming services has similar logical considerations. Because such services are multiplatform, they can reach the same audience of consumers on the iOS platform as the App Store can by virtue of their design. Specifically, whether by native app or web app, game streaming services are just as available to consumers on the iOS platform as the games are on the App Store. These services essentially compete with the wider market given the lack of a need for any corresponding device. Indeed, due to the multiplatform nature of such services, even players in other submarkets, including Epic Games, have come to view such services **[*987]** as a competitor in their established market spaces.

[422] DX-3867.

[423] *See* Trial Tr. (Weissinger) 1346:18-1347:1; DX-3233.009.

[424] DX-3094.006.

[425] *See* Trial Tr. (Sweeney) 197:1-18, 238:9-239:17; Trial Tr. (Schmid) 3208:8-16; Ex. Depo. (Kreiner) 83:12-16.

[426] *See* Trial Tr. (Schiller) 2819:18-2820:2; DX-3582.003.

Despite the foregoing, neither the Switch nor game streaming services are appropriately part of the mobile gaming market—at least not at this **[**147]** time. First, as previously noted, the record is limited as to both Nintendo and the Switch. Nonetheless, the Court notes that there is in evidence one real world example that shows that the Switch's mobility competes against iOS devices for gaming: the introduction of *Fortnite* on the Switch. As the experts' analyses show, the introduction of the Switch shows both substitution and complementary play without a definitive answer. *See supra* Facts § II.B.2.

Second, both products are too new for a determination of whether they should or should not be included in the relevant product market. The Switch and especially game streaming services are relatively new products in the market. Indeed, Nvidia's GeForce Now service only launched months before the filing of this action, and Microsoft's service remained in beta testing at the time of the bench trial. It is unclear at this time whether consumes will or do consider these products reasonably interchangeable and substitute in sufficient numbers between the competing products already in the mobile gaming market.

In sum, in light of the lack of evidence in the record, and the recent introduction of the Switch and game streaming services to the **[**148]** market, the Court declines to include either device or service in the relevant product market for mobile gaming transactions. While the record does not reflect that these products are appropriately included in the relevant product market at this time, the Court does find that these products evidence, at a minimum, market entrants into this mobile gaming space. Whether these entrants will occupy the same space as Apple and Google remain, however, to be seen by both consumers and developers.

Thus, the Court concludes that the competition lies within the smaller recognized mobile gaming transactions submarket, however, this submarket does not include the Switch or game streaming services.

E. Apple's Market Share

For the reasons set forth above, the Court concludes that the competition lies within the smaller recognized mobile gaming transactions submarket, however, this submarket does not include the Switch or game streaming services. The Court next calculates Apple's market share.

The *only* evidence of market share in the proposed market concerning video gaming comes primarily from Apple's expert witness, Dr. Hitt.[427] As discussed, Apple's proposed definition of the market includes all video **[**149]** game platforms, which the Court rejects as the relevant market. Consistent with Apple's proposal, but inconsistent with the Court's finding that mobile gaming is the relevant product market, Dr. Hitt's analysis relies upon the assumption that the App Store has many competitors, including other game transaction platforms, for mobile, PC, and console, as well as game streaming services, and limits the scope to the United States.[428]

Since data on the number of game transactions is not readily available, Dr. Hitt's analysis uses the dollar value of game transactions facilitated as a proxy for the most appropriate measure for estimating market share. To reach his opinion he analyzes: (i) the total revenue for digital game transactions on the App Store in the United States; and (ii) the total revenue **[*988]** for digital game transactions across all digital game transaction platforms in the United States.[429] Again, Dr. Hitt's analysis does not narrow in on the mobile gaming market and Apple's market position therein. Based on his analysis and his review of the relevant evidence, Dr. Hitt finds and concludes that Apple's video game market share based on total revenue from digital game transactions **[**150]** is 37.5%.[430] Based on his calculations, Dr. Hitt concludes: (i) that this video game market share is inconsistent with Apple's ability to exercise

---

[427] Ex. Expert 6 (Hitt) ¶ 117.

[428] *See supra* Facts § II.D.; Trial Tr. (Schiller) 2867:1-20; Trial Tr. (Cook) 3865:23-3867:5.

[429] *See* Ex. Expert 6 (Hitt) ¶¶ 137-138.

[430] *Id.* ¶¶ 8, 117, 123-128.

market power; and (ii) that this lack of concentration in the video game market suggests Apple does not possess monopoly power in the relevant product market.[431] While Dr. Hitt's report and analysis aids the Court, it is overbroad for purposes of the Court's finding that the market is limited to mobile gaming.

Despite the limitations of Dr. Hitt's analysis, a similar calculation based on evidence in the record reveals a much more significant *mobile* gaming market share. Apple's internal business records[432] show a consistent belief that Apple's market share of the global video gaming market increased over time beginning in 2015 with 18%; 2016 with either 21.8% or 23%; 2017 with either 24% or 27%; 2018 with 23.8%; 2019 with 23.9% or 25%; and 2020 forecasted at a range between 24.7% and 31%.[433]

The Court has the most evidence for the year 2017. Using Apple's internal documents the Court is able to calculate Apple's market share at 57.1% in the global *mobile* gaming industry. The Court reaches that value by taking Apple's own internal records for 2017 **[**151]** which show Apple's internal calculation that it controls 24%[434] of the global video gaming market and dividing the number by 42%[435] which reflects Apple's belief of the portion of the *mobile* gaming market relative to the global video gaming market (24% divided by 42% equals 57.1%).

Using this same methodology, the Court can calculate Apple's market share in the *mobile* industry before 2017, as 52.9% in **[*989]** 2015 and 54.5% in 2016. This computation is consistent with a view that the market share was less than 57.1% in 2017.[436]

Similarly, for 2020, Apple estimates that its own global market share in the wider video gaming industry is 28.2%, and cites on its internal business record to an external Newzoo report that states that mobile gaming (including mobile and tablets) accounted for 49% of global gaming revenue in 2020.[437] Using these figures and the same methodology as above, Apple would have 57.6% market share in the global mobile gaming industry in 2020.[438]

---

[431] *Id.* ¶¶ 138, 140-141.

[432] The Court relies on Apple's business records as admissions.

[433] Compare four internal forecasting documents, namely, DX-4178.008 (2017 Review), PX-0602.027 (2018 Review), PX-0608.014 (2019 Review), and PX-2302.022 (forecasting 2021 and 2020).

[434] *See* PX-2302.022 (reporting 24% market share). The Court notes a discrepancy between two sets of presentations calculating market share from 2015 to 2020 in the wider video gaming industry. The Court notes that the figures found in the most recent Apple presentation, along with figures found in the 2019 review (PX-0608), appear to match and correspond with third-party data found elsewhere in the record. *See* DX-3248. For that reason, the Court concludes that these figures in the most recent presentation are the more correct and updated versions. The market share rates found in the other (generally older) presentations appear to use estimates instead of the actual total revenue in the video game industry for certain years resulting in a lower total annual amount, which appears to inflate Apple's market share in these other presentations. *Compare* DX-4178.007 (2017 presentation, stating 109 billion in total game revenue in the entire industry in 2017) *with* DX-3248.008 (2018 market report, stating 121.7 billion in total game revenue in the entire industry in 2017).

[435] *Compare* DX-4178.007 *with* DX-3248.008. The comparison shows a discrepancy in the portion of the mobile gaming market for the year 2017: namely Apple reports it as 42% in its presentation and third-party Newzoo reports it as 46% in its 2018 Global Games Market Report. The delta between these two figures is a few percentage points: using the third-party Newzoo figure in the Court's methodology, Apple's global market share is computed at 52.1% for 2017.

[436] Relying on the same documents, for 2015, the Court takes Apple's 18% market share divided by 34% of the mobile share of the global market. For 2016, the Court takes Apple's 21.8% market share divided by 40% of the mobile share of the global market.

[437] The Court notes that the 2020 Newzoo report is not in evidence, however, it is found as a "Reference" citation at the bottom of Apple's presentation. *See* PX-2302.022. These third-party references are often noted in presentations but only a few source documents are in evidence. The Court relies upon the reference because Newzoo is a credible third-party report that others in the industry rely upon.

The Court understands that the market share would likely be less if the Switch were included in the relevant product market.[439] However, the record is bare of evidence and, in any event, the new market entry would **[**152]** not have had such a compelling entrance as to discount the market share to under 30%.[440] Nonetheless, even assuming the market were limited to both mobile gaming *and* console gaming (including the Switch, PlayStation, and Xbox), Apple would still have, at a minimum, market power.[441] For the years in the record, the Court's methodology based upon the records shows that Apple would have a market share of such a defined global video gaming market (*e.g.* mobile and console) of 32.9% 2017, and of 31.1% in 2016.[442] For the most recent year 2020, based on estimated and projected revenue and on the cited 2020 Newzoo report, Apple's **[*990]** market share would be 36.6% of such a defined video gaming market.

III. PROPOSED GEOGRAPHIC MARKET AND FINDING

The parties offer differing perspectives on the geographic market. Epic Games argues for a global market, excluding China, and Apple asserts a domestic market.

With respect to its theory, Epic Games argues for a global market because smartphones, and thereby, the smartphones' operating system, are sold globally. Moreover, smartphones generally work regardless of the location with the exception of China where the operating systems are, in fact, different because **[**153]** they are installed by original equipment manufacturers in China.[443] Apple does not challenge the *geographic* market for smartphones, although for the reasons set forth above, it heavily contests the notion that a separate market exists for operating systems.

By contrast, Apple focuses on app gaming transactions arguing that the geographic market is domestic. Apple highlights that consumers access the App Store with country-specific digital storefronts which means that consumers enter into transactions through a digital store-front based on their home country. Generally, Apple customers do not have access to foreign storefronts, and cannot readily switch between storefronts outside of their home country. The same is true for customers in foreign countries.[444] The Court understands that many console and other game transaction platforms similarly organize their stores with geographic overlays.[445] Providers have

---

[438] The same level of precision does not exist for 2018 and 2019 given the trial record. While the Court has evidence of Apple's market share in the wider gaming market and for certain years for the *mobile* gaming market, there is no discrete information or evidence for which it could calculate or find Apple's market share within *mobile* gaming for the years 2018 and 2019.

[439] For instance, the Court lacks any revenue specific information regarding the Switch with which to include in any market share determination. As to game streaming services, given the only recent introduction of such products to market, the Court would expect any inclusion of such services to have a minimal impact, if any, on the overall market share calculations in this section.

[440] *See* Trial Tr. (Bornstein) 4091:4-4092:3. Given the Court did not adopt the parties' market definitions, Epic Games' counsel would not commit to whether tablets would be included in that hypothetical market. Assuming a mobile and handheld device market as the relevant market, there are numerous tablet platforms and at least one mobile gaming console platform (Nintendo Switch) that would have to be included in such a market.

[441] The Court also assumes for purposes of this analysis that the video game revenue cited in the corresponding Newzoo report is all attributable to digital game transactions. The Court notes that this overinclusion of non-digital game transactions *and* of the PlayStation and Xbox would depress Apple's market share if the Court were to only include digital game transactions attributed to the Switch. Nonetheless, the purpose of this analysis is to demonstrate that Apple retains market power above 30% even with the overinclusion of these additional platforms and non-digital transactions.

[442] The Court notes that the Switch was released in March 2017, and thus, the inclusion would only affect the years 2017 and later. The Court discloses that Apple's market share for 2015 would be 27%.

[443] Ex. Expert 1 (Evans) ¶¶ 70-71; Trial Tr. (Cook) 3970:10-16; *see also* Trial Tr. (Cook) 3942:18-19, 22 (agreeing that "in China, the iCloud service is operated by a Chinese company").

[444] Trial Tr. (Schiller) 2754:20-2755:9 ("It's how we've been told we need to structure the stores.").

created impediments to switching geographic registration, such as prohibiting it as part of the terms of service, requiring country specific credit cards, and installing software which may make the app inoperable.[446]

Geographic constraints are less pronounced for developers. Foreign and domestic developers can publish on both foreign and domestic platforms. However, they can only access the consumer on the consumer's own domestic storefront.[447] Apple principally relies on Dr. Lafonatine to argue that the "competitive conditions each platform faces varies from country to country. The set of apps available across the world is not uniform. So one accessing the App Store's U.S. storefront would not have an identical selection of game apps to a consumer accessing a foreign storefront. Moreover, different countries feature different slates of competing platforms, with differing relative market shares. All of the above factors affect demand and substitution, creating different market conditions in each country."[448] However, the factual basis for her opinion is weak.[449]

[*991] The Court finds Apple's factual basis for its assertion to be weak. At least for purposes of this case, Apple's restrictions appear to be imposed by Apple, rather than by market forces. Importantly, the Court finds more persuasive that Apple actually treats app distribution as a global enterprise. Its rules and guidelines apply globally to all **[**155]** storefronts, the business development team engages with developers globally, the DPLA applies globally, and the complexity and justification for the complexity of the IAP system is due in large part because of the global nature of the business.[450] The parties agree that China is different.[451]

Thus, the Court finds the relevant geographic market to be global.

IV. MARKET POWER IN RELEVANT MARKET

In addition to Apple's market share in the relevant market of mobile gaming, the Court examines other evidence of Apple's market power in the mobile game transactions market and considers pricing, nature of restrictions, operating margins, and barriers to entry.

A. Pricing

The experts agree that the ability to set and maintain supracompetitive prices is evidence of market power. Dr. Schmalensee emphasizes, however, that two-sided platforms often have skewed pricing so supracompetitive prices on one side may not be indicative. He also opines that only price changes over time are relevant to determining

---

[445] *Id.* 2754:14-2755:15; Ex. Expert 7 (Lafontaine) ¶ 9; Trial Tr. (Lafontaine) 2066:24-2067:6; *see also* Trial Tr. (Evans) 1565:12-14.

[446] Ex. Expert 7 (Lafontaine) ¶ 91; DX-4931.001; DX-4920.001 (noting for Microsoft that "[i]f you change your country or region in Microsoft Store, *the stuff you got in one region might not work in another **[**154]*** . This includes: Xbox Live Gold, Xbox Game Pass, Apps, games, music purchases, and movie and TV purchases and rentals").

[447] Apple FOF ¶¶ 444-446 (citations omitted); *see* Ex. Expert 7 (Lafontaine) ¶ 91.

[448] Apple FOF ¶¶ 447-450; Ex. Expert 7 (Lafontaine) ¶¶ 90-91, 93.

[449] Further, Dr. Lafontaine acknowledged that, when reaching her geographic market limited to United States consumers, she did not consider developers' ability to directly distribute apps to consumers. Indeed, she did not know whether direct distribution is limited by national boundaries. Trial Tr. (Lafontaine) 2067:7-2068:3.

[450] Ex. Expert 1 (Evans) ¶¶ 145, 266; Trial Tr. (Kosmynka) 985:21-986:24; Trial Tr. (Schmid) 3221:21-3222:2; Trial Tr. (Grant) 723:25-724:4.

[451] Ex. Expert 1 (Evans) ¶¶ 71, 108.

market power.[452] The parties thus dispute whether Apple's commission is (i) supracompetitive and (ii) has increased or decreased over time.

As an initial matter, as detailed above, the 30% commission was not set **[**156]** by competition or the costs of running the App Store, but as a corollary to other gaming commission rates. Next, the evidence showed four pricing considerations after the initial rate. First, in 2009, Apple introduced IAP using the same 30% commission. Second, in 2011, Apple enabled recurring subscriptions purchases on the iPhone. Third, in 2016, Apple introduced paid search ads on the App Store. Finally, in late 2020, Apple introduced the Small Business Program. That program reduced Apple's commission to 15% for developers making less than one million dollars. *See supra* Facts § I.C.3.c.

Both parties cite these pricing changes as evidence that Apple has or lacks market power. Epic Games cites the introduction of IAP, recurring subscription payments, and search ads as evidence of price increases. This evidence is not persuasive because both IAP and recurring subscriptions correspond to new features, not price increases on existing features. With respect to search ads, one would reasonably expect that a fundamental purpose of an app store is to provide search capability or "discoverability." Thus, by offering developers the option to pay for search ads, one could argue that this is not **[**157]** a new feature and therefore more probative of a price increase. On the other hand, developers do not have to use search ads which suggests this is could be viewed as a new feature. The record was undeveloped on this point.

Apple, on the other hand, cites the reduction on second year subscriptions and the Small Business Program as evidence of price decreases. The subscription reduction **[*992]** is highly probative; the evidence shows that Apple's decision coincided with several large developers ending in-app subscriptions through iOS apps (and therefore exercising power to leave Apple's platform). However, as described above, subscription apps face different market conditions than games, and there is no evidence of *game* developers leaving for other platforms to force a price decrease.[453] Further, the Court has explained above why the evidence on Apple's motivations regarding the Small Business Program is mixed. Regardless of whether altruism or regulatory pressure caused Apple to lower its commission, competition does not appear to have played a role.[454] Given the lack of clear evidence about price increases or decreases due to competition, Dr. Hitt focuses on Apple's average commission, which he argued **[**158]** decreased over time from the growing presence of free apps on which Apple receives no commission. He argues this decrease is inconsistent with market power.[455] However, the evidence is less probative because of the unique nature of Apple's business as both the device maker and app store operator.[456] Namely, Apple has repeatedly acknowledged that free apps make its platform more attractive, which helps it sell more devices.[457] As such, under a two-sided transaction platform analysis, the cost to users from purchasing devices to access free apps likely offsets the reduced price offered to developers of those apps.[458] Given Epic Games' theory that no commission should be levied, where the tipping point is in terms of that offset has not been explored.

Thus, ultimately, the pricing evidence does not show either market power or its absence. Apple's initial rate of 30%, although set by historic gamble, has apparently allowed it to reap supracompetitive operating margins. *See infra* Facts § IV.C. The choice to not raise that price further is consistent with market power if that price already reflects

---

452 Ex. Expert 8 (Schmalensee) ¶¶ 108-109.

453 *See* Ex. Expert 6 (Hitt) ¶¶ 102, 105.

454 The Court does note that after Apple introduced the Small Business Program, Google quickly followed suit on Android. However, Mr. Cook was not aware of any other store that did so. This reinforces that Apple and Google compete with one another. Trial Tr. (Cook) 3860:4-10.

455 Ex. Expert 6 (Hitt) ¶¶ 169-176, 184.

456 Notably, the price of game in-app commissions has only grown over time. This again suggests that game developers may be subsidizing the rest of the App Store. Id. ¶¶ 174-175.

457 See, e.g., Trial Tr. (Cook) 3988:14-3989:5; PX-2060.005.

458 Ex. Depo. (Okamoto) 324:04-325:10; PX-2060.018-.019; Trial Tr. (Cook) 3990:18-3991:8.

monopoly levels.[459] Only rarely has Apple reduced its commission in response to competitive pressure, such **[**159]** as with the second-year subscriptions. However, because subscription apps are a separate market from game apps, that does not show lack of market power in the mobile game transaction market.[460]

[*993] B. Nature of Restrictions

Epic Games also cites the nature of the restrictions as evidence of Apple's market power. Apple uses both technical and contractual means to restrict app distribution. Technically, Apple prevents unauthorized apps from downloading on the iPhone. It does so by granting certificates to developers; no certificate means the code will not run.[461] Contractually, Apple imposes the DPLA, which prohibits developers from distributing apps outside the App Store.[462]

These contractual terms are standardized and nonnegotiable—a contract of adhesion. Only a few developers have succeeded in modifying these terms by threatening to go to other platforms. Specifically, Spotify and Netflix have removed in-app purchasing functionality from iOS apps. On the other hand, both Down Dog and Match Group have testified that they have been unable to entice users to other platforms with lower prices. Match Group has employed marketing campaigns and promotions for web purchases, but the app sales have continued **[**160]** to "dominate." Down Dog has had better success at offering cheaper subscriptions on the web, but Apple's anti-steering provision has prevented it from directing users to the cheaper price. Thus, while 90% of Down Dog's Android users make purchases on the web, only 50% of its iOS users do so, even though about half of its total revenues still come from iOS users.

Accordingly, evidence shows Apple's anti-steering restrictions artificially increase Apple's market power by preventing developers from communicating about lower prices on other platforms.[463]

C. Operating Margins

The experts agree that "persistently high economic profit is suggestive of market power." Dr. Schmalensee opines that operating margins and accounting profit are less probative because they fail to take into account intellectual property and similar investments that lower operating costs. Dr. Barnes criticizes this opinion as an accounting matter, and Dr. Evans opines that in this specific case, accounting profits are an appropriate measure of market power. From this issue, we see a classic battle of the experts.[464] See supra Facts §§ II.C.5, II.B.

---

[459] As noted previously, Apple executives initially questioned whether they can maintain a 30% commission in response to competition. PX-0417. Apple still does not track costs or pricing on different platforms to determine its rate. Trial Tr. (Fischer) 904:18-905:6; Ex. Depo. 8 (Cue) 141:13-142:09.

[460] Apple makes two additional arguments for lack of market power. First, it claims that it has not restricted output. Apple FOF ¶¶ 467-468. Again, in light of the unique business model, game output here makes Apple's platform more attractive and increases rather than decreases its profits. Second, it claims that the 30% commission is consistent with other online platforms. Apple FOF ¶¶ 469-478. This argument is discussed above and below in relation to anticompetitive conduct. In short, the use of a 30% commission by other platforms is not dispositive because those platforms have a different business model than Apple and frequently negotiate their headline rates, so their effective rates are below 30%.

[461] Trial Tr. (Kosmynka) 986:9-22; Trial Tr. (Federighi) 3373:17-25, 3388:11-3389:12.

[462] PX-2619 §§ 3.2(g), 7.6. Recall that developers may license and use Apple's tools for free to create iOS apps under the Developer Agreement, but actually distributing them requires signing the DPLA. Trial Tr. (Schiller) 2757:1-2760:9.

[463] Trial Tr. (Schiller) 2760:16-21; Trial Tr. (Simon) 354:83-55:1, 359:3-364:13, 401:5-20; Ex. Expert 6 (Hitt) ¶¶ 102, 105; Ex. Depo. (Ong) 24:17-26:5, 28:9-29:22.

[464] Trial Tr. (Schmalensee) 1899:19-21, 1984:2-12; Trial Tr. (Evans) 1545:3-14, 1723:20-1724:19; Trial Tr. (Barnes) 2456:6-2458:11.

Here, in light of all of the evidence, the circumstances of Apple's P&L statements, **[**161]** and Apple's low apparent investment in App Store-specific intellectual property, the Court finds that operating margins are probative of market power. As described above, the App Store operating margins are "extraordinarily high." Thus, even without comparison to other stores, the operating margins strongly show market power.[465]

[*994] Further, Apple cannot hide behind its lack of clarity on the value of its intellectual property. Not all functionality benefits all developers. Further, as discussed, Apple has actually never correlated the value of its intellectual property to the commission it charges. Apple is responsible for the lack of transparency and whole-cloth arguments untethered to its rates do not ultimately persuade.

D. Barriers to Entry

With respect to barriers to entry, the evidence is mixed. On the one hand, Dr. Athey plausibly opines that entry into the platform business is difficult due to the need to attract both users and developers. Said differently, developers do not develop for new platforms unless they have a healthy user base, but users only go to platforms that already have a developed ecosystem. Thus, indirect network effects often dominate and create a "winner-take-all" **[**162]** system that allows only a few large platforms to survive.[466] See also supra Facts § II.B.1.

On the other hand, the mobile game market is changing, including with the introduction of cross-platform policies, cross-platform services (e.g. cloud-based game streaming), and new hybrid platforms such as the Nintendo Switch. First, the introduction of cross-platform middleware like cross-wallet and cross-play has plausibly decreased barriers to new entrants. The rise of game streaming may allow for competition among platforms on iOS in the near future, even if Apple maintains its app distribution restrictions. The role of game streaming and whether it will constrain market power remains to be seen.[467] See supra Facts § II.D. In light of these uncertainties, the Court finds that barriers to entry are currently relatively high but are plausibly decreasing and may be lower in the future.[468]

V. FACTS REGARDING ALLEGED ANTICOMPETITIVE EFFECT

Epic Games contends that Apple's restrictions on iOS app distribution and in-app payment processing create anticompetitive effects. As explained above, the App Store is a twosided transaction market, which may make competitive effects difficult to evaluate. In two-sided **[**163]** transaction markets, an anticompetitive price or restriction on one side may well reflect a competitive equilibrium on the other side.[469] Thus, the experts agree that competitive effects can only be determined after carefully considering both sides of the transaction (developers and users), including any indirect network effects.[470]

---

[465] See Trial Tr. (Evans) 1545:3-14 (explaining that in a competitive market, high profits decline because companies would reduce prices and invest in quality to stave off competition).

[466] Ex. Expert 4 (Athey) ¶¶ 16-19, 35-46.

[467] Trial Tr. (Athey) 1787:14-18; Trial Tr. (Patel) 424:8-9 (number of games currently on GeForce is small), 449:8-450:2 (strict limitations on usage), 481:16-484:24 (same), 483:25-484:4 (game streaming not profitable).

[468] Of course, game streaming typically requires an up-front subscription fee, which makes it unlikely to replicate the "freemium" model that gains users by an initial free download. Trial Tr. (Patel) 483:13-485:14; Trial Tr. (Sweeney) 187:24-188:3 (attributing "a lot of [Epic Games'] success" to the freemium model).

[469] For instance, Dr. Schmalensee offers the example of OpenTable that suspends a user's account after a certain number of no-shows. Although this may seem like an arbitrary exercise of power to the user—particularly if there are few other reservation apps in that market—the restriction helps keep the platform attractive for restaurants and thus serves a procompetitive end by increasing participation. Ex. Expert 8 (Schmalensee) ¶ 30.

[470] Ex. Expert 1 (Evans) ¶ 216; Ex. Expert 8 (Schmalensee) ¶ 127.

[*995] With this in mind, the Court reviews evidence of the competitive effect of Apple's challenged conduct.

A. Anticompetitive Effects: App Distribution Restrictions

1. *Effects*

With respect to Apple's app distribution restrictions, Epic Games focuses on the following alleged anticompetitive effects: (a) foreclosed competition; (b) increased consumer app prices; (c) decreased output; (d) decreased innovation; and (e) effect on other markets through the restrictions on app stores. Apple, in turn, argues that the restrictions provide a safe and secure place to conduct game transactions and compensate Apple for its procompetitive investments in iOS. The Court first addresses Epic Games' evidence and then Apple's procompetitive justifications in the next section.

a. Foreclosure of Competition

With respect to the issue of foreclosing competition, the contention is not in dispute. **[**164]** Quite simply, Epic Games wanted to open a competing app store and could not. The evidence is mixed as to the demand to do so. Epic Games relies on the experience of Microsoft and Nvidia, which tried to offer native iOS game streaming apps (xCloud and GeForce NOW) but were blocked by Apple's restrictions.[471] Both companies, however, ultimately succeeded in making their apps available through the web. Although neither party was fully satisfied with the results, their experiences do not show complete foreclosure of competition.[472]

Instead, Epic Games relies on comparative evidence with other markets. On devices without app distribution restrictions, many app and game stores exist. For instance, Windows and Mac computers host game publishers like Steam, Electronic Arts, and Activision Blizzard who directly distribute through their own stores. Apple executives have acknowledged that the Mac App Store matters primarily for Apple software and smaller developers, while developers with market power are not on the Mac store "because they don't have to be."[473] According to Dr. Evans, there are at least ten third-party stores on Mac and Windows, and most top apps are distributed directly from the developer **[**165]** website. Indeed, several large game developers, like Google and Facebook, have tried to distribute games on iOS in recent years.[474]

The evidence also shows that smaller developers might choose direct distribution while remaining in the App Store. For instance, the CEO of Down Dog, the fitness app, testified that he would support users installing directly from a website.[475] Notably, however, these developers did not **[*996]** testify that they would leave the App Store altogether. That is because, as Apple shows, the App Store provides many benefits to developers, including developer tools, promotional support, and a ready audience, that enables small developers to compete with large

---

[471] As explained elsewhere, GeForce allows streaming of games users purchased through other platforms, such as Steam. xCloud is limited to Microsoft games. Thus, they are each a type of game store, though idiosyncratic in not needing to access device hardware (which is what allows them to work through the web). Indeed, four of the five stores blocked by Apple's challenged rule concern game streaming. Trial Tr. (Patel) 425:1-11, 432:17-433:12; Ex. Expert 1 (Evans) ¶ 166.

[472] Trial Tr. (Wright) 568:13-571:8, 579:1-10; Trial Tr. (Patel) 429:11-25. Apple has also blocked Big Fish, a "game store within an app," and web stores. PX-0115; PX-0111.

[473] PX-2386.

[474] Ex. Expert 1 (Evans) ¶¶ 163-168; Trial Tr. (Allison) 1200:14-1201:14. Dr. Evans also provides comparison to the over 60 Android app stores in China and numerous third-party stores on early smartphones. However, Epic Games has not shown that those markets are sufficiently comparable to the market here. Ex. Expert 1 (Evans) ¶ 165.

[475] Ex. Depo. (Ong) 33:18-34:07; Trial Tr. (Simon) 392:9-17.

ones. For instance, 72% of small developers lack a marketing budget, and Apple provides significant free advertising and "spotlighting" to help users discover new apps as part of its DPLA.[476]

While plaintiff did not survey developers, taken together, this evidence suggests that Apple's restrictions foreclose competition for large game developers who have well-known games. These developers would likely, and have the resources to, open their own stores to forego Apple's "fees, rules, and review."[477] Smaller developers, on the other **[**166]** hand, would likely stay on the App Store (or a comparable store) for product discovery reasons. Indeed, that is exactly what happened earlier on PCs, which bolsters the likely evaluation and outcome.[478]

b. <u>Increased Consumer App Prices</u>

Next, Epic Games argues that Apple's app distribution restraints increase prices for consumers. Epic Games' argument is plausible. As Dr. Evans testified, "[w]e know from economics, both theory but also practical experience, in situations where there are barriers to competition and they're removed that what typically happens [is] . . . that prices tend to fall [and] quality tends to improve."[479]

In the context of gaming, Dr. Evans's observation has vivid illustration in the PC market. The incumbent Steam store charged a 30% commission for decades before Epic Games' store entered with a 12% commission. Immediately before that time, Steam lowered its commission to 20%, and its average commission rate declined to 10.7%. Microsoft followed suit shortly after, with other stores offering pay-what-you-want. This competition has affected platform margins, which are considerably smaller on PCs than on other devices—5% compared to 45%.[480]

Dr. Evans opines that the same **[**167]** would happen if Apple allowed third-party app stores on iOS. He posits that numerous third-party app stores would enter iOS in the absence of restraints and that these stores would compete for developers. The competition would exert pressure on Apple, which would have to lower prices or improve services. To calculate the resulting prices, Dr. Evans relies on several sources. First, he cites Mr. Schiller's 2011 statement that a 20% or 25% commission is "competitive."[481] Second, he uses Mr. Barnes comparisons of online marketplaces to calculate Apple's commission if its operating margins were only as high as the highest in a competitive market (Alibaba with 45.8% margins). Under that calculation, and assuming that developers would pass on half of the commission, Apple would only charge 15.6% while still being very profitable.[482]

Apple vigorously disputes this evidence. First, it points out that the 30% commission **[*997]** is standard for other stores, including on competitive platforms.[483] For instance, Apple charges 30% on Macs, which Dr. Evans agrees is competitive. However, Apple's argument is suspect. One, Apple relies on "headline" rates that Dr. Evans and Dr. Schmalensee agree are frequently negotiated **[**168]** down. For example, the Amazon App Store has a headline rate of 30%, but its effective commission is only 18.1%. Both Ms. Wright and Mr. Sweeney testified that consoles

---

[476] Ex. Expert 8 (Schmalensee) ¶ 51; Trial Tr. (Fischer) 931:23-933:20, 935:15-936:23; DX-3800.038; Trial Tr. (Schiller) 2737:9-24.

[477] PX-2386.

[478] *See* Trial Tr. (Allison) 1206:1-1209:8; Trial Tr. (Evans) 1510:24-1511:7.

[479] Trial Tr. (Evans) 1551:15-1552:2.

[480] Trial Tr. (Allison) 1209:13-1210:1, 1275:18-1276:5; Ex. Expert 1 Evans ¶¶ 170-173; DX-5523.011.

[481] *See* PX-0417.

[482] Ex. Expert 1 (Evans) ¶¶ 180-184; Ex. Expert 2 (Barnes) ¶ 3.

[483] Apple also argues that it charged 30% from the very beginning when it was not a monopolist. However, there is evidence that Apple did not consider the rate to be sustainable at that time and questioned whether "enough challenge from another platform or web based solutions" will cause it to adjust. PX-0417. Moreover, Apple recognized that the App Store was "brand-new," with no true comparisons in the market, and set the rate set without considering costs. Ex. Depo. 8 (Cue) 135:8-136:14, 137:23-138:14. Thus, the initial rate was at least partly protected by the iPhone's "newness" and may not reflect a competitive rate.

frequently negotiate special deals for large developers. Sealed evidence in this case confirms the same. Two, just because it is the competitive rate for games in the console market, does not mean that the rate translates to the mobile games market. As described above, the App Store has very different operating margins than consoles, so even if the commission is the same, the economics and the nature of the products are very different. Thus, ultimately, these comparisons are not useful because the other stores do not operate in the same market.[484]

Neither party grapples with the overarching issue of Apple's choice of model and how it subsidizes certain developers. Rather, each side manipulates the "zero" commission rates on free or freemium apps to their advantage. Apple relies on analysis by Dr. Hitt who argues that the average commission rate in FY2019 was 8.1% for game apps and 4.7% for all apps while Dr. Evans and Dr. Cragg ignore the category all together. Ultimately, neither analysis is helpful.[485] Developers and Apple **[**169]** have learned that the freemium model is significantly more lucrative than the alternatives given the ability for impulse purchases. For those, the commission rate remains at 30% notwithstanding the choice of other developers.

Last, Apple argues that the 30% rate is commensurate with the value developers get from the App Store. This claim is unjustified. One, as noted in the prior section, developers *could* decide to stay on the App Store to benefit from the services that Apple provides. Absent competition, however, it is impossible to say that Apple's 30% commission reflects the fair market value of its services. Indeed, at least a few developers testified that they considered Apple's rate to be too high for the services provided.[486] Two, Apple has provided no evidence that the rate it charges bears any quantifiable relation to the services provided. To the contrary, Apple started with a proposition, that proposition revealed itself **[*998]** to be incredibly profitable and there appears to be no market forces to test the proposition or motivate a change.

Accordingly, the Court finds that Apple's restrictions on iOS game distribution have increased prices for developers. In light of Apple's high profit **[**170]** margins on the App Store, a third-party store could likely provide game distribution at a lower commission and thereby either drive down prices or increase developer profits. The Court must reserve on whether Apple's restrictions have increased prices for consumers as the evidence is mixed.[487] Here, Epic Games' role as a consumer is not in the traditional sense but only in the sense of a consumer of transactions with traditional consumers. This issue was not the focus of this trial.

c. Decreased Output

The parties dispute impact on output. Apple argues that the amount of iOS game output has increased over time. On this, the Court agrees. The evidence shows that iOS game transactions exploded by 1,200% since 2008,[488] with double that growth in developer game revenue. However, that does not mean that Apple's conduct is procompetitive. As Dr. Evans explained, "high-technology industries [often] grow extraordinarily rapidly" even where

---

[484] Ex. Expert 6 (Hitt) ¶¶ 166-167; Trial Tr. (Evans) 1686:6-12, 2439:1-2441:23; Trial Tr. (Schmalensee) 1958:1-5; Trial Tr. (Wright) 586:11-21; Trial Tr. (Sweeney) 310:1-17; PX-2392.003. Google, of course, operates in the same market.

[485] Ex. Expert 6 (Hitt) ¶ 180; Ex. Expert 13 (Cragg) ¶ 98; Ex. Expert 16 (Evans) ¶ 50; Trial Tr. (Hitt) 2198:24-2200:6. Similarly unhelpful is Dr. Cragg's analysis of average dollar amounts of Apple's commission. Ex. Expert 13 (Cragg) ¶¶ 99-101. These numbers are coextensive with developers charging higher prices; absent some evidence that Apple caused them to do that, the analysis simply reflects broader growth in the industry. Ex. Expert 6 (Hitt) ¶ 174; Trial Tr. (Hitt) 2110:9-2111:21.

[486] Trial Tr. (Simon) 377:3-10; Trial Tr. (Fisher) 911:4-11 (Apple received developer complaints that the rate is too high).

[487] *See, e.g.*, Trial Tr. (Simon) 355:17-356:17; Trial Tr. (Sweeney) 97:7-14; Ex. Depo. (Ong) 74:8-12; *see also* Ex. Depo. 12 (Gray) 176:23-178:2; PX-0533.010 (even within the Apple ecosystem, app prices are higher on platforms where Apple charges 30% rather than 15%).

[488] The growth in iOS game transactions corresponds to both strong growth in the gaming industry and strong growth in iPhone and iPad sales. Ex. Expert (Hitt) ¶¶ 183-189. These factors could cause mobile game transactions to grow even if Apple's restrictions are anticompetitive.

"a dominant firm emerges very quickly," so "tremendous growth" in these markets is "commonplace." Using growth as a competitiveness metric would "be essentially a free pass for high-tech companies."[489]

Unfortunately, what is needed is a comparison of **[**171]** output in a "but-for" world without the challenged restrictions. Such comparison is not in the record. Dr. Hitt provides some evidence that iOS game revenue grew faster than the game market as a whole and, importantly, that game revenue on iOS grew faster than on Android.[490] Growth rates, however, are difficult to compare because of different initial starting points. Moreover, even assuming that iOS gaming revenue grew faster than the market, it is difficult to attribute that growth to the App Store (as opposed to, for instance, superior iPhone hardware or user experience). Thus, the high output may have been even higher without Apple's restrictions.[491]

Dr. Evans, on the other hand, opines that a high commission reduces output because it leads to higher prices that cause consumers to purchase less, which reduces the number of viable games. Some evidence supports that view. For instance, Apple has recognized that some developers have taken the position that they do not have the margin to support the 30% commission, which is "prohibitive [of] many things." The magnitude of the effect, however, is unclear.[492] Thus, there is no **[*999]** evidence that a *substantial* number of developers actually forego making **[**172]** games because of Apple's commission.[493]

Thus, the analysis is insufficient to determine that Apple's restrictions had either a negative or a positive impact on game transaction volume.

d. <u>Decreased Innovation</u>

Next, Epic Games argues that Apple's app distribution restrictions harm innovation. Epic Games makes two arguments. First, it argues that Apple's 30% commission imposes a burden on developers, who either reduce their game investment or forego making games altogether as a result. Part of this argument is related to output and fails for the same reason: Epic Games has not shown that any developer actually stopped making games because of Apple's commission, albeit they may reduce investment.[494] This, however, is a natural corollary of having to pay app store commissions and does not present a separate argument for anticompetitive effects, particularly since third-party stores would likely continue charging commissions.

Second, Epic Games argues that Apple's restrictions have reduced innovation in game distribution itself. The parties agree that the App Store provides features besides distribution, including search and discoverability to help users discover games, in-app payment processing, **[**173]** developer tools, and security.[495] Competition could improve each of these features: a third-party app store could provide better "matchmaking" between users and

[489] Trial Tr. (Evans) 2366:22-2367:8; Ex. Expert (Hitt) ¶ 183.

[490] Game revenue grew by 2,600% between 2010 and 2018 on iOS but only 367% between 2013 and 2018 on Android. Ex. Expert 6 (Hitt) ¶¶ 183-184.

[491] Ex. Expert (Hitt) ¶¶ 183-185; Ex. Expert 7 (Lafontaine) ¶ 100; Trial Tr. (Hitt) 2083:8-18; Trial Tr. (Evans) 1721:11-18; Ex. Expert 16 (Evans) ¶ 75.

[492] Epic Games cites testimony that Apple is aware of "some developers" who said that they would not launch native iOS apps because of Apple's 30% commission. Ex. Depo. 8 (Cue) 150:5-12.

[493] Ex. Expert 1 (Evans) ¶ 275; Trial Tr. (Schiller) 3111:7-14; PX-0438.

[494] Trial Tr. (Sweeney) 92:8-13.

[495] As explained in this Order, in-app payment processing is an integrated part of the App Store. That does not, however, mean that it would not benefit from competition. Thirdparty app stores could provide substantial innovation in payment processing by incorporating more developer-friendly tools (such as, for example, easy refunds). Thus, all of the anticompetitive effects listed in the next section for in-app payment processing apply to Apple's restrictions on distribution.

developers, could have simpler in-app payments, and could impose a higher standard for app review to create more security.[496]

Notably, Apple conducted developer surveys in 2010 and 2017. Comparing the two indicates that Apple is not moving quickly to address developer concerns or dedicating sufficient resources to their issues. Innovators do not rest on laurels. While more developers may be "satisfied" or "very satisfied" than not, a significant portion are not.[497] For example, a top reason for dissatisfaction with the App Store is lack of functions which other platforms have, such as personalized recommendations.[498] An email summarizing 2018 write-in **[*1000]** answers suggests that developers perceive the App Store as lacking features common to other platforms. For instance:

- "Apple store needs to have 'smart search' ability. Having to require customers to spell names exactly correct in this age is ridiculous for a multi-billion dollar company."
- "[T]he search algorithm is terrible. It is a rating based algorithm rather than a name search. **[**174]** I can search for my apps and type their EXACT name and they still won't come up. I may even need to scroll down 100s of pages before my app shows up."
- "Discoverability is still a significant challenge on the App Store (even after last year's update). Our organic downloads for games on Steam are much higher than our games on the App Store, even though the App Store has more active users. This doesn't make sense."
- "The App Store desperately needs A/B testing. On Google Play, I've been able to optimize my store listing and because of that, I've been able to see unbelievable growth. If Apple added A/B testing for App Store listings, everyone would see a lift in downloads and ultimately more revenue for developers as well as Apple."

Indeed, Apple's own former Head of App Review, Philip Shoemaker, has described the App Store as "antiquated," with "no radical innovation, only evolution" for the last ten years.[499]

In addition, developers complain that app review guidelines lack clarity and are inconsistently applied.[500] Part of this issue stems from the sheer number of apps submitted with only 500 human reviewers. Apple has been slow either to adopt automated tools that **[**175]** could improve speed and accuracy or to hire more reviewers.[501] As discussed further below, Apple's in-app payment processing tool also lacks features.

Apple's slow innovation stems in part from its low investment in the App Store. As Mr. Barnes described, "[o]nly a small amount of direct and allocated R&D . . . [flows] . . . to the Apple App Store." Apple argues that Epic Games fails to account for R&D that affects multiple lines of the business, which counts as joint costs. Even Dr. Schmalensee admitted that the estimates, which were put together specifically for Apple's CEO, show very little

---

[496] *See* Trial Tr. (Evans) 1560:12-25 (search and discovery is the "core element of what any store does"); Trial Tr. (Schmalensee) 1954:3-9 (App Store provides "matchmaking"). *But see* Trial Tr. (Evans) 1502:15-1503:18 (excluding in-app payment processing).

[497] The Court acknowledges that the survey data includes five categories (Very Satisfied, Somewhat Satisfied, Neutral, Somewhat Dissatisfied and Very Dissatisfied) and that if combining the two "satisfied" categories, more developer fall within that zone than the two "dissatisfied" categories. That said, by adding in those who are "Neutral," Apple rating is more in the range of 60-40. *See generally* DX-3922.

[498] Ex. Expert 1 (Evans) ¶¶ 191-192, 196; DX-3922.066, .072, .074; DX-3877.019; *see also* DX-3800 (2015 survey). Apple responds by pointing to search ads, which it enabled in 2016 in response to these complaints. Trial Tr. (Cook) 3889:16-3890:2; PX-2284.006. That said, developers must pay for these search ads and competitors may use them to artificially drive traffic, which decreases overall app discoverability. *See* Ex. Depo. (Ong) 59:14-60:14. Thus, the search ads are, at best, a mixed blessing for poor overall matchmaking.

[499] PX-0098.001; *see* Ex. Depo. (Shoemaker) 31:03-05, 64:13-64:20.

[500] *E.g.*, Ex. Depo. (Ong) 62:15-64:16; Ex. Depo. (Shoemaker) 126:20-23; Trial Tr. (Simon) 384:7-385:8.

[501] Trial Tr. (Kosmynka) 1083:12-15, 996:7-12; PX-0137.001 (Google had automated review before Apple). *But see* DX-3642 (describing App Store redesign in response to developer complaints). *See also* Ex. Expert 11 (Rubin) ¶ 57.

R&D allocated to the App Store. Thus, even if the Court accepts that some App Store revenue goes to features that indirectly benefit developers, like hardware, the evidence remains that "core" matchmaking features of the store see little investment.[502]

Ultimately, the point is not that the Apple provides bad services. It does not: most developers are satisfied with the App Store, particularly with its developer tools.[503] Rather, the point is that a third-party app store could put pressure on **[*1001]** Apple to innovate by providing features that Apple has neglected. Because this competition is **[**176]** currently precluded, Apple's restrictions reduce innovation in "core" game distribution services.

e. Other Effects

Epic Games raises two other potential anticompetitive effects. First, Epic Games argues that Apple self-preferences its own apps.[504] Using partial testimony from Mr. Shoemaker, plaintiff claims that Apple used the app review process "as a weapon against competitors" and placed "barriers" between competitor apps, while using the data obtained through app review to create its own apps. For example, Apple Arcade has been allowed on the store, despite being a store within a store. Google Voice, on the other hand, was rejected on "pretextual grounds" because of Apple's concern that the iPhone will "disappear . . . in guise of a Google phone."[505]

Upon review, the proffer is weak. Mr. Shoemaker clearly believes that Apple misuses its app review process. Aside from his limited deposition excerpts, however, there is little objective evidence of self-preferencing. For instance, Apple Arcade apparently complies with App Store requirements that each game be individually downloaded.[506] There is thus at least a factual dispute about whether it accords with the guidelines. As to Google Voice **[**177]** and Rhapsody, even Mr. Shoemaker acknowledges that they were "the first of their kind" and that "Apple just didn't know how to respond" during app review.[507]

Second, Epic Games argues Apple's restrictions reduce "middleware" that could decrease switching costs and increase competition. Dr. Athey testifies broadly to this effect, opining that new platforms face a "chicken-and-egg" problem where they have to attract users through apps but have to attract developers through users. Middleware could help reduce these costs by allowing for app porting from one platform to another.[508] As noted above, Dr. Athey's analysis is plausible but wholly lacking in supporting evidence. She does not show that even her preferred examples of middleware, such as the multi-platform store Steam, have meaningfully increased new entrants,

---

502 Ex. Expert 1 (Evans) ¶¶ 187-189; Ex. Expert 2 (Barnes) ¶¶ 19-22; Trial Tr. (Schmalensee) 1902:2-4, 1981:16-1982:5; PX-2385.024.

503 *E.g.*, DX-3922.063. Apple also cites surveys showing very high *user* satisfaction with the iPhone. DX-4275.205; DX-4089.056. The surveys, however, concern the device as a whole and, if anything, reinforce the lesser role played by third-party apps. Thus, the most important features driving purchasing decisions all relate to hardware—battery life, performance, durability, and ease of use—which also form the top reasons for considering other devices. DX-4089.010, .035, .037. By contrast, only 28% of users consider third-party apps an important "other" aspect of their iPhone purchase decision. DX-4089.012.

504 Epic Games argues that Apple self-preferences its apps in search, but provides little evidence in support. In one email, an Apple employee states that Mr. Fischer, "feels extremely strongly about not featuring our competitors on the App Store," but Mr. Fischer says she was misinformed. PX-0058.001; Trial Tr. (Fischer) 954:12-955:12. Another email describes "boosting" certain apps over Dropbox, but Mr. Fischer immediately reversed the decision. PX-0052. As to search, Mr. Schiller testified that Apple does not use search ads for its own products, and Epic Games has not shown otherwise. Trial Tr. (Schiller) 2819:13-14.

505 Ex. Depo. (Shoemaker) 75:14-77:02, 78:13-78:24, 84:16-85:08, 88:02-88:08; PX-0099.006. Epic Games also cites evidence of developers' complaints that Apple's "apps are permitted to do things they are not." PX-0858.002; Trial Tr. (Kosmynka) 1028:11-1030:4. The proffered evidence has no context so it cannot be evaluated.

506 Trial Tr. (Athey) 1854:6-16.

507 PX-0099.005.

508 Ex. Expert 4 (Athey) ¶¶ 42-47, 53-56.

particularly since each platform still requires its own APIs.[509] Thus, **[*1002]** the evidence does not support anticompetitive effects in this area.

2. *Business Justifications*

Apple asserts two business justifications for its app distribution restrictions.[510] First, it argues that prohibitions on third-party app stores helps ensure a safe and secure ecosystem. This benefits both **[**178]** users, who enjoy stronger security and privacy, and developers, who benefit from a larger audience drawn by these features. It also benefits Apple, which uses privacy and security as a competitive differentiator for its devices and operating system.[511]

Second, Apple claims that the distribution restrictions are part of its intellectual property licensing arrangement for which it is entitled to be paid. As the owner of the devices and operating system, Apple could choose not to license its IP and remain the exclusive developer of iOS apps. Instead, Apple has actively licensed, developed, and improved its IP for others, but only on the condition of iOS remaining a "walled garden." Thus, Apple argues that its contractual restrictions are necessary to protect its IP investments and prevent free riding.[512]

Epic Games responds that each of these justifications is pretextual. Apple's commission is wholly disconnected from—and not motivated by—its intellectual property investments. Epic Games also contends that an exclusive app store is not necessary to maintain security, which can be achieved through less restrictive means, such as notarization.[513]

The Court examines the evidence for each.

a. **[**179]** Security, Privacy, and Reliability

Beginning with the security justification, the Court notes at the outset that the parties adopt different definitions of security. Epic Games takes a narrow view of security as preventing an app from performing unauthorized actions or stealing user data. Thus, Epic Games' security expert, Dr. Mickens, defines a "security property" as one that "make[s] an app easier to subvert" or allows it to "improperly interact with other apps" or "expose sensitive user data to potential theft or corruption."[514]

Apple, on the other hand, takes a broader view of security that includes user privacy, reliability, and "trustworthiness." Its security expert, Dr. Rubin, opines that security concerns arise when an app targeted to children asks for a home address; when a simple Tic-Tac-Toe game requests microphone and camera access; when an app developer falsely represents their application; or when an app is so unreliable that its constant crashing endangers offline safety. Dr. Rubin also includes "objectionable **[*1003]** content," such as pornography

---

509 *See id*. ¶ 67; Ex. Expert 6 (Hitt) ¶¶ 261-262 (while Steam decreases costs to *offer* games across platforms, it does nothing for costs to *develop* them).

510 In its Findings of Fact, Apple focuses heavily on the procompetitive nature of app stores in general. Thus, Apple argues that before it introduced the App Store, distribution was limited to the web, and that the App Store launched a new wave of innovation that benefited consumers and developers alike. Apple FOF ¶¶ 545-548. Since Epic Games does not challenge Apple's right to maintain the App Store but only its restrictions on other distribution—which may provide similar or equivalent benefits—these procompetitive effects are not directly tied to the challenged conduct.

511 Apple FOF ¶¶ 581-595; Trial Tr. (Schiller) 2734.21-2735:2, 2830:25-2831:3; Ex. Expert 11 (Rubin) ¶¶ 23, 56-59; Trial Tr. (Sweeney) 93:8-11; Trial Tr. (Evans) 1689:16-1690:8; Ex. Expert 8 (Schmalensee) ¶¶ 52-54.

512 Apple FOF ¶¶ 596-602; Ex. Expert 12 (Malackowski) ¶¶ 15-19, 26, 42, 51, 54.

513 Epic Games FOF ¶¶ 564-700; *see also* Trial. Tr. (Malackowski) 3662:13-17, 3666:16-3668:10-18, 3669:22-3670:7, 3692:18-3700:10; Trial Tr. (Schiller) 2738:15-24.

514 Ex. Expert 5 (Mickens) ¶ 49.

and pirated apps, in his definition.[515] Because these apps perform no expressly unauthorized actions—and may be affirmatively authorized **[**180]** by the user—they raise different concerns than traditional malware.

The Court finds it useful to disaggregate these forms of security, as well as the two types of challenged restrictions (sideloading and "store-within-a-store").

i. "Narrow" Security: Malware

Under a narrow conception of security, Apple protects from malware on iOS in at least four ways. *First*, Apple uses malware scanning programs to detect whether a piece of software corresponds to known malware. *Second*, it requires developers to register with a certificate and sign their code with that certificate so that malware can be traced back to a developer and code from unknown entities can be excluded. *Third*, it uses "sandboxing" to prevent an app from doing anything that the user has not authorized.[516]*Fourth*, it includes "reliability checks" on the App Store, which include automated app scanning, as well as human review. Together, these techniques create "layered" security that creates multiple barriers to malware.[517]

All but the last of these malware protections are performed by the operating system or middleware independent of app distribution. Dr. Mickens thus opines that restrictions on app distribution are not necessary because **[**181]** the operating system implements all of the key security features. App review, by contrast, provides only secondary checks on sandbox compliance, exploit resistance, and malware exclusion, as well as "non-security" factors like privacy and legal compliance.[518]

Importantly, however, Dr. Mickens focuses only on preventing unauthorized app functions. He opines that his preferred techniques work by removing "decision-making" power from applications and vesting them in the operating system. The OS then resolves the decision by prompting users for consent. Thus, even though the OS is formally making decisions, the user ultimately determines access.[519] The evidence shows, however, that this may not be enough to protect security because users often grant permissions by mistake. Mr. Federighi credibly testified that malware may use "social engineering" techniques to trick the user into granting access and evade operating system defenses. For example, malware may represent itself as a dating app to ask for photo access—which it can then encrypt and hold for ransom against the user. Epic Games did not explain how, if at all, the operating system can protect against this type of behavior.[520]

Moreover, system-level **[**182]** protections do not fully prevent downloading malware in the first place. As Dr. Rubin plausibly **[*1004]** opines, "[i]t is unwise to *first* trust users to download malicious apps, and *then* try to subsequently detect malicious apps and deny giving malicious apps the permissions they might request."[521] The evidence shows that social engineering attacks act as a dominant vector of malware distribution. A 2020 Nokia report indicates that "[i]n the smartphone sector, the main venue for distributing malware is represented by Trojanized applications," which trick users into downloading by posing as a popular app. For example, a malicious

[515] Ex. Expert 11 (Rubin) ¶¶ 18-21. Mr. Federighi testified that security means "protecting users' data and protecting their control over the device, making sure that what happens on their device is what the user intended and isn't being manipulated by a bad actor." Trial Tr. (Federighi) 3358:5-8. This definition encompasses Dr. Rubin's examples.

[516] "Sandboxing" may encompass other techniques, such as memory isolation and address space layout randomization. Trial Tr. (Federighi) 3376:4-3378:14; Ex. Expert 5 (Mickens) ¶¶ 24-37.

[517] Trial Tr. (Federighi) 3372:10-3375:25, 3383:16-3384:14.

[519] Ex. Expert 5 (Mickens) ¶¶ 23, 72.

[520] Trial Tr. (Federighi) 3371:3-3372:1, 3379:10-3380:13; Ex. Expert 11 (Rubin) ¶ 27.

[521] Ex. Expert 11 (Rubin) ¶ 30 (emphasis in original).

app may represent itself as free Microsoft Word to obtain downloads. A 2020 PurpleSec report confirms that "98% of cyberattacks rely on social engineering."[522]

For these types of attacks, human app review plays a meaningful role. During app review, a human reviewer confirms that an app corresponds to its marketing description. This prevents the "trojan" attacks described above, where malware tricks users into download by posing as another popular app. The human reviewer also checks that the app's entitlements are reasonable for the task it purports to accomplish. Thus, a Tic-Tac-Toe **[**183]** game may be rejected if it asks for camera access or health data. Last, although not directly related, app review checks for offline safety issues. Although these tasks are straightforward, they require human review and cannot be implemented by a computer or operating system.[523]

The Court agrees with Epic Games that this process is imperfect. Apple has limited ability to prevent "Jekyll and Hyde" apps that change their behavior after review, and allows some malware to slip through.[524] However, the overall error rate appears to be relatively small, with Apple's former head of app review testifying that it was around 15% in 2015. Mr. Federighi confirmed that the error rate is generally small.[525]

Removing app distribution restrictions could reduce this effectiveness. First, app stores often differ in the quality of app review. On Android, which allows some third-party app stores, the main Google Play app store is secure, but a variety of third-party stores allow blacklisted apps to operate.[526] A Nokia report attributes higher **[*1005]** malware rates on Android to Trojan apps on third-party app stores. This creates a problem because, as Dr. Rubin opined, "security is only as strong as the weakest link."[527] Decentralized **[**184]** distribution thus increases the risk of infection by giving malware more opportunities to break through. Namely, if even one app store permits malware to operate (either accidentally or as a "rogue" app store), a social engineering attack has a chance to work.[528]

Second, with respect to sideloading, app review is likely impossible and thus could not prevent social engineering attacks. Apple currently prevents direct distribution from the web using technical measures. If those measures were

---

[522] DX-4975.008; DX-4956.006; Ex. Expert 11 (Rubin) ¶ 96; Trial Tr. (Federighi) 3370:2-12; Trial Tr. (Rubin) 2763:1-9.

[523] Trial Tr. (Federighi) 3384:22-3388:7; Trial Tr. (Kosmynka) 1087:9-21, 1090:22-1094:1; Ex. Expert (Rubin) ¶¶ 31, 36-37. Human review may also provide some benefit against novel and well-hidden malware attacks. Dr. Rubin explains that automated tools investigate based on past threats to flag content, which makes them less able to detect novel attacks. Mr. Kosmynka acknowledged that his team has found new types of threats not picked up by automated tools. He also testified that his team finds well-hidden features not picked up by automated tools, including bait and switch. Trial Tr. (Kosmynka) 1108:1-1109:11, 1095:23-1103:8; Ex. Expert (Rubin) ¶ 40.

[524] These issues appear to have preceded Apple's use of dynamic analyzers, which may partly address the problem. *See* PX-0465; Trial Tr. (Kosmynka) 996:7-19, 1098:17-25.

[525] PX-0465; PX-0335.006; Ex. Depo. (Shoemaker) 133:20-134:9; Trial Tr. (Federighi) 3486:15-23. Both parties also cite statistics about the overall rejection rate of app review. That says nothing about the error rate. Apps may be approved or rejected for proper and improper reasons. Trial evidence did not focus on this later issue.

[526] The parties debate whether Android is less secure than iOS. Although some industry publications show greater malware on Android, Dr. Mickens testified that they are in the same "rough equivalence class." The Court need not resolve this dispute because Android differs in other ways, such as lack of app certification and weaker sandboxing, that could affect malware rates independent of app distribution. *E.g.*, DX-4975.008; DX-4956.004; DX-4959; *see* Trial Tr. (Mickens) 2558:16-2260:8, 2630:12-2631:11; Trial Tr. (Rubin) 3774:3-2777:16.

[527] Ex. Expert 11 (Rubin) ¶ 87. Of course, third-party app stores could also have increased security than Apple. For example, a Disney app store would plausibly screen apps more rigorously than Apple. Trial Tr. (Mickens) 2697:12-21.

[528] DX-4401.005; DX-4975.008; Ex. Expert 11 (Rubin) ¶¶ 47-49, 87-89. The parties also debate whether centralization of app review increases or decreases its effectiveness. Dr. Mickens opines that having many stores perform app review puts more "eyeballs" on the problem and decreases the burden on any one store. Dr. Rubin opines that it fragments learning and makes each store less knowledge. The Court finds both effects plausible, but lacks evidence on their comparative magnitude. Trial Tr. (Mickens) 2702:7-21; Ex. Expert 11 (Rubin) ¶ 93.

lifted, users could download—and thus could be tricked into downloading—directly from the open web. Although Epic Games presents some alternative methods that could be used to prevent malicious direct distribution (which are discussed below), there is little dispute that completely unrestricted sideloading would increase malware infections.[529]

Thus, the Court finds that centralized distribution through the App Store increases security in the "narrow" sense, primarily by thwarting social engineering attacks.

ii. "Broad" Security: Privacy, Quality, Trustworthiness

With respect to a "broader" definition of security, there is less dispute that app distribution restrictions help ensure privacy, quality, **[**185]** and trustworthiness. This again, stems primarily from human app review.

Privacy: Dr. Mickens agrees that computers "lack a generic way to detect which instances of user-submitted touchscreen data contain private information." While the OS can detect app access to computer-generated private data (camera roll), it lacks the capacity to distinguish private from nonprivate user entries. Dr. Mickens agrees that human app review can aid in this process, but opines that Apple does a poor job in practice. His only evidence for this is a Wall Street Journal that reports user tracking on popular iOS apps; he did not analyze any internal Apple data for this opinion.[530]

Apple, by contrast, proffers some evidence that the App Store imposes heightened privacy requirements. For instance, Apple requires developers to publish "privacy labels" that disclose data collection as a condition of being listed on the App Store. It also adopts the stricter privacy policies required by the European Union worldwide, including user opt-out. Not all **[*1006]** developers like these requirements; presumably because it impacts their own bottom line. Thus, privacy concerns may be more at risk with loosened app distribution restrictions. **[**186]** Under the current model, large developers who rely on advertising for monetization must comply or leave the App Store to avoid these requirements.[531] Accordingly, privacy, more than other issues, likely benefits from some app distribution restrictions.[532]

Quality: A variety of content may be safe but objectionable, including pornography, gambling, and inappropriate marketing to children. Mr. Kosmynka testified that human app review is necessary to detect such content because computers cannot do it alone. Importantly, offensiveness is highly context dependent, which makes it difficult to automate. For example, nudity may be appropriate in a medical app but inappropriate in other contexts.[533]

Epic Games responds that Apple's app review still allows objectionable apps. For example, it points that school shooting games have appeared on the App Store.[534] However, this data is largely anecdotal and fails to provide a

---

[529] Trial Tr. (Federighi) 3388:24-3389:12, 3416:6-16; Trial. Tr. (Cook) 3884:22-3885:11; Ex. Expert 11 (Rubin) ¶ 54; *see also* Trial Tr. (Mickens) 2709:23-2710:2 (describing this model as "absolute mayhem").

[530] Ex. Expert 5 (Mickens) ¶¶ 71-75; Trial Tr. (Mickens) 2631:16-21.

[531] As explained above, the evidence suggests that decentralized distribution benefits primarily large developers, who do not need to rely on a centralized app store to be discovered. While these developers are unlikely to sell outright malware, they are quite likely to monetize user data, which makes privacy a particularly sensitive issue.

[532] DX-5335.015; Trial Tr. (Cook) 3847:15-3848:21; Trial Tr. (Federighi) 3408:2-3410:4, 3422:17-2423:15; Trial Tr. (Schiller) 3166:6-15; Ex. Expert 11 (Rubin) ¶ 84. Apple also cites "app tracking transparency" as a feature that protects user privacy. The record is not clear, however, whether this feature is implemented by the App Store or by the OS. To the extent that it is implemented by the OS, app review may play a more limited role in ensuring that apps do not incentivize relinquishing privacy. Trial Tr. (Schiller) 3166:22-3167:7; Trial Tr. (Federighi) 3407:73-408:1, 3410:5-9.

[533] PX-0131; PX-1938; PX-1939; Trial Tr. (Kosmynka) 1085:19-1087:8, 1108:20-1109:11; Trial Tr. (Schiller) 3154:7-24; *see also* Trial Tr. (Mickens) 3673:16-23 (agreeing that system-level protections do not protect against inappropriate content).

[534] The alleged "BDSM" apps proved hollow and demonstrates the problem with highly provocative and sexual photos as an enticement to download apps geared towards dating that ultimately does not contain pornographic material. This merely

comparison to the "but-for" world where app review did not take place. Thus, app distribution restrictions likely reduce offensive content available on Apple's devices.

Trustworthiness: App review also protects against scams and other fraud, such as pirated or copycat apps. Dr. **[**187]** Mickens did not consider this aspect in his security analysis and admitted that his opinion about the value of human app review may change if these issues are included. He also agreed that system-level protections do not protect users against this type of content, which confirms that human review is necessary.[535]

As with objectionable content, Epic Games responds by showing that scams still slip through app review.[536] For the same reasons, this anecdotal evidence does not show that scams and other fraud would not be higher without app review. Thus, the Court finds that app distribution restrictions increase security in the "broad" sense by allowing Apple to filter fraud, **[*1007]** objectionable content, and piracy during app review while imposing heightened requirements for privacy.

iii. Impact on Market

These protections have an impact on users, developers, and Apple. First, app review provides Apple with a competitive differentiator. When Apple first launched the App Store, it sought to "strike a really good path" between the dependability of a closed device and the ability to run third-party apps of a PC. As Mr. Jobs explained:

> It is a dangerous world out there. There are mobile viruses of **[**188]** all sorts that people have to put up with and so we've tried to strike a really good path here. On one side you've got a closed device like the iPod, which always works. You pick it up, it always works because you don't have to worry about third party apps mucking it up. And on the other side you've got a Windows PC where people spend a lot of time every day just getting it back up to where it's usable and we want to take the best of both. We want to take the reliability and the dependability of that iPod and we want to take the ability to run third party apps from the PC world but without the malicious applications.[537]

Since then, security and privacy have remained a competitive differentiator for Apple. Mr. Cook testified that privacy is "a very key factor, one of the top factors who people choose Apple." The documents bear this out: internal surveys show that security and privacy was an important aspect of an iPhone purchasing decision for 50% to 62% of users in most countries— and over 70% in India and Brazil—and an important part of an iPad purchasing decision for 76% to 89% of users. Indeed, Mr. Sweeney himself owns an iPhone in part because of its better security and privacy than **[**189]** Android.[538]

Second, there is evidence that Apple's restrictions benefit users. As noted above, many users value their iOS devices for their privacy and security. As the result of having a trusted app environment, users make greater use of their devices, including by storing sensitive data and downloading new apps. The witnesses are unanimous that user security and privacy are valid procompetitive justifications.[539]

Third, the evidence on developers is mixed. On the one hand, developers experience delays and mistaken rejections that would not occur with sideloading or distribution through stores without app review. On the other

---

reinforces the subjective and context-dependent nature of "objectionable" content. *See* PX-0131; PX-1938; PX-1939. Trial Tr. (Kosmynka) 1085:19-1087:8, 1108:20-1109:11; Trial Tr. (Schiller) 3154:7-24.

[535] Trial Tr. (Kosmynka)1088:18-1090:16; Trial Tr. (Mickens) 2673:2-7, 2673:24-2675:17, 2679:21-2680:1, 2685:8-18.0

[536] *See, e.g.*, PX-0060; PX-0371.

[537] PX-0880.025.

[538] Trial Tr. (Cook) 3848:22-3849:7; Trial Tr. (Sweeney) 302:19-303:4; DX-4089.012; DX-3465.024.

[539] *See* Trial Tr. (Evans) 1689:22-24 ("[p]rotecting iPhone users from security threats is a procompetitive benefit"), 2415:10-13 (same for protecting users from offensive content); Trial Tr. (Sweeney) 193:3-9 (recognizing importance of privacy and security); Trial Tr. (Federighi) 3421:19-3422:7 (describing importance of security to ecosystem).

hand, developers benefit from the safe environment created by the App Store. Based on a trusted environment, users download apps freely and without care, which benefits small and new developers whose apps might not be downloaded if users felt concern about safety. This is consistent with the indirect network effects identified by Dr. Schmalensee: the small burden on developers maintains a healthy ecosystem that ultimately benefits both sides. Thus, the evidence shows that developers both benefit and suffer from app distribution restrictions.[540]

[*1008] iv. Alternatives

Epic Games **[**190]** argues that the security and privacy benefits described above can be achieved without app distribution restrictions. As explained, most of the benefits derive from app review, which screens for social engineering attacks, filters fraud and offensive content, and impose heightened privacy requirements. Epic Games argues that the same benefits can be achieved in other ways. It focuses on two alternative models.

First, under an "enterprise program" model, Apple could focus on certifying app stores instead of apps. The Enterprise Program is an existing model for distributing apps on iOS where companies apply to distribute apps within its organization. Apple reviews the company and, if conditions are met, gives it a certificate that allows it to sign apps for distribution. Although the program has occasionally been abused, it shows that Apple could shift its review from apps to app stores, while continuing to impose standards for privacy and security.[541]

Second, under a "notarization" model, Apple could continue to review apps without limiting distribution. The notarization model is currently used on macOS. There, Apple scans apps using automatic tools and "notarizes" them as safe before they **[**191]** can be distributed without a warning. Apps can still be distributed through the Mac store (with complete app review) or with a warning if not notarized, but notarization provides a "third path" between full app review and unrestricted distribution. In theory, notarization review could be expanded to include some of the checks Apple currently performs in the App Store, such as human review.[542]

The notarization model is particularly compelling because Apple contemplated a similar model when developing iOS. iOS is based on macOS and share the same kernel. Documents show that Apple initially considered using app signing for security while allowing developers to distribute freely on iOS. As one document explains, "[app] [s]igning does not imply a specific distribution method, and it's left as a policy decision as to whether signed applications are posted to the online store, or we allow developers to distribute on their own." This shows that Apple could continue performing app review even if distribution restrictions were loosened.[543]

Apple responds to Epic Games' proposed alternatives in several ways. First, it disputes that the Enterprise Program provides a comparable model because it is used **[**192]** primarily for employers, who rarely want to hack their own employees. That is factually true, but provides little insight as to why a modified model could not work. **[*1009]** Apple points to unspecified evidence that the Enterprise Program has been used to distribute malware. As with Epic

---

540 Trial Tr. (Simon) 384:7-385:8; Trial Tr. (Grant) 727:22-730:4; Ex. Depo. (Ong) 62:15-65:25; Trial Tr. (Federighi) 3421:16-3422:7; Ex. Expert 8 (Schmalensee) ¶ 52.

541 Ex. Expert 5 (Mickens) ¶¶ 56-58; Trial Tr. (Mickens) 2585:24-2586:19, 2667:12-2670:1; Trial Tr. (Federighi) 3412:23-3415:17; Trial Tr. (Schiller) 3145:22-3146:8. For example, Apple could demand that third-party app stores require "privacy labels" and fraud prevention as a condition of certification. Indeed, Apple already implements this model for social media apps, which can (and do) host objectionable content but which implement their own content moderation. Trial Tr. (Evans) 2418:14-2419:1; Trial Tr. (Federighi) 3469:9-25 (noting that Parler was removed from the App Store based on inadequate content moderation).

542 Ex. Expert 5 (Mickens) ¶¶ 85-87; Trial Tr. (Federighi) 3380:19-3381:11, 3463:9-3467:16; *see* DX-5492.103-.104.

543 PX-2756; Trial Tr. (Federighi) 3358:9-21; Trial Tr. (Mickens) 2593:13-2594:15; Ex. Expert 5 (Mickens) ¶¶ 13, 46, 89-96; PX-0877.100-.300; PX-0875.002. Under the notarization model, Apple also retains the ability to revoke notarization and turn off developer accounts associated with malware. Depending on the scope of the option, this could address Mr. Federighi's concern that decentralized distribution creates a "whack-a-mole" problem. Trial Tr. (Rubin) 3794:14-3795:8; Trial Tr. (Federighi) 3392:4-20, 3451:14-2452:6.

Games' evidence of fraud on the App Store, this does not show that the program is unsecure as a general matter.[544]

Second, it claims that Mac faces a different threat model and has more malware than iOS. Mr. Federighi testified that users download apps more casually on mobile devices than on computers and frequently use them to store more valuable data. The Mac model was also adopted at a time when users expected to freely download from the Internet, which limited Apple's ability to impose greater restrictions given customer expectations. In any case, Mr. Federighi testified that Mac has a "malware problem" compared to iOS. Even with notarization, 110 instances of malware broke through on the Mac in 2020.[545]

While Mr. Federighi's Mac malware opinions may appear plausible, they appear to have emerged for the first time at trial which suggests he is stretching the truth for the sake of the argument. During deposition, **[**193]** he testified that he did not have any data on the relative rates of malware on notarized Mac apps compared to iOS apps. At trial, he acknowledged that Apple only has malware data collection tools for Mac, not for iOS, which raises the question of how he knows the relative rates. Prior to this lawsuit, Apple has consistently represented Mac as secure and safe from malware.[546] Thus, the Court affords Mr. Federighi's testimony on this topic little weight.

In any case, even if notarization is less secure on Mac, that only shows the limits of malware scanning. If Apple implemented a more fulsome review, similar to the type done on the App Store, there is no reason why the results would be different. Apple's only response is that app review may not scale given developers' expectation over timing. Given that app review is already required for all apps in the App Store, the scale itself does not appear to be a problem. The question is the amount of resources Apple allocates to the issue and supply of human reviewers. *See supra* Facts § I.C.4.

Ultimately, the Court finds persuasive that app review can be relatively independent of app distribution. As Mr. Federighi confirmed at trial, **[**194]** once an app has been reviewed, Apple can send it back to the developer to be distributed directly or in another store. Thus, even though unrestricted app distribution likely decreases security, alternative models are readily achievable to attain the same ends even if not currently employed.[547]

b. Intellectual Property

Turning to the intellectual property justification, the Court agrees with the general proposition that Apple is entitled to be paid for its intellectual property. The inquiry though does not end with the bald conclusion. Apple provides evidence that it invests enormous sums into developing new tools and features for iOS. Apple's **[*1010]** R&D spending in FY 2020 was $ 18.8 billion.[548] This spending runs the gamut from hardware features like an Accelerometer developed in 2007, to a gyroscope in 2010, stereo speakers in 2016, to LiDAR in 2020, all of which expand the device functions to software features that improve processing speed to combinations of the two, such as FaceTime. It also includes thousands of developer tools, SDKs, and APIs (150,000 today), many of which are directed specifically at game developers. For example, Metal is a tool that allows developers to create powerful computer **[**195]** graphics. Additionally, Apple has invested in longer battery file, and over the last decade, core

---

[544] For instance, it is difficult to imagine that Microsoft would be a source of malware for iOS users. *See* Trial Tr. (Mickens) 2668:16-2671:15 (explaining that the Enterprise Program is just a "point in the design space"); Trial Tr. (Schiller) 3146:13-25.

[545] Trial Tr. (Federighi) 3362:2-3365:3, 3389:14-3390:8, 3393:4-25, 3394:1-19, 3401:3-24. Mr. Federighi also expressed confusion about how an enterprise model would work, including how a trustworthy store would be determined. Trial Tr. (Federighi) 3416:17-3417:7. These problems appear comparable determining app trustworthiness, which Apple has managed with adequate success, as described above.

[546] *Id.* 3432:19-3434:4, 3394:4-22; *see, e.g.*, PX-0741.100, .500.

[547] Trial Tr. (Federighi) 3510:5-15.

[548] This number, which is taken from Apple's SEC filings, covers Apple's entire business. Internal financial documents suggest that only a small portion of this spending goes to services like the iTunes store. *Compare* DX-4581.026 (total R&D) *with* PX-2385.024 (R&D breakdown).

processing units (CPU) have increased one hundredfold and relative graphic performance, one thousandfold. Mr. Schiller testified that each of these features enables game developers to create new and innovative games.[549]

Epic Games does not venture to argue that Apple is not entitled to be paid for its intellectual property, but rather claims that these investments have nothing to do with the App Store *specifically*. Apple disagrees. As with other issues in this trial, the answer is somewhere in between the two extremes but the evidence was not presented in a way to make a decision with precision. That said, the record is devoid of evidence that Apple set its 30% commission rate as a calculation related to the value of its intellectual property rights. Nor is there any evidence that Apple could not create a tiered licensing scheme which would better correlate the value of its intellectual property to the various levels of use by developers.[550] More specifically, the evidentiary record is silent as to whether the $ 99 fee paid by developers whose entire app is "free," like banks or other **[**196]** commercial entities, is correlated to the intellectual property as compared to the gaming developers who are paying 30% on each IAP transaction and who appear to be subsidizing most of the other app developers.

Thus, the Court finds that with respect to the 30% commission rate specifically, Apple's arguments are pretextual, but not to the exclusion of some measure of compensation.

B. Anticompetitive Effects: In-App Payment Restrictions

1. *Effects*

Turning to the evidence regarding in-app payment restrictions, Epic Games focuses on the effects on price and quality. Although in-app payment processing is an integrated part of the App Store, the Court reviews its effects because third-party app stores could compete on in-app payment processing—and thus rectify some of the effects—if app distribution restrictions were loosened. The Court also considers procompetitive justifications unique to payment restrictions as those relative to app distribution restrictions apply here as well. Lastly, the Court considers the anti-steering provision, which presents a separate subissue.[551]

[*1011] Starting with Epic Games' two arguments, the Court notes that it has already discussed them, which shows both **[**197]** pro- and anti-competitive benefits.[552] *See supra* Facts § V.A. Moreover, the analysis included the tradeoffs within privacy considerations. *Id.*

Apple's experts opine on other benefits, in addition to fraud prevention. With respect to the user side, Dr. Schmalensee opines that "IAP supports the ability of users to redownload apps and in-app purchase on new devices, share subscriptions and in-app features with family members, view their entire purchase history, and manage subscriptions from one place on their phone," all of which benefits users. While true, these benefits are also a reflection of the ecosystem. Dr. Athey counters that multi-platform payment processors would benefit users

---

[549] DX-4581.026; Ex. Expert 12 (Malackowski) ¶¶ 22, 29-33; Trial Tr. (Schiller) 2878:2-2902:10. Other examples included a retina display in 2010, Taptic Engine in 2014, and Neural Engine in 2017. None of these developments are allocated to the App Store but all support games and other applications. Trial Tr. (Schiller) 2878:6-2885:6, 2893:3-2895:15.

[550] *See* Trial Tr. (Malackowski) 3662:13-17.

[551] As with the app distribution restrictions, the Court uses "app" interchangeably with "game" and does not distinguish game and non-game developers here. There is no evidence that gamers experience the effects differently, and they are more likely to be affected by the restrictions because of iOS games' disproportionate use of IAP. *See supra* Facts §§ II.B.3, V.A.

[552] Ex. Depo. (Ong) 169:24-173:06; *see also* Trial Tr. (Sweeney) 128:22-24; PX-2362.300; Ex. Expert 8 (Schmalensee) ¶ 150; Ex. Expert 11 (Rubin) ¶ 127.

more by enabling the same migration, control, and sharing across platforms.[553] On the gaming side, much of this is being done through cross-wallet and cross-platform play.

On the developer side, Apple argues IAP helps streamline in-app payment functions. By providing a consistent and trusted user experience, IAP encourages users to spend freely, which benefits developers through indirect network effects and has resulted in millions of dollars of revenue. Again, as noted above, the ability to profit **[**198]** from impulse purchasing can be viewed as both a sword and a shield in this context. For those developers who rely more heavily on Apple, the benefit is greater than those like Epic Games who would prefer for the revenue stream to be direct.

Beyond this significant feature, it is unclear what else IAP provides to developers. Apple agrees that it is not a payment processor; Apple delegates actual payment processing to thirdparties, such as Visa. Mr. Fischer testified that IAP provides features as part of the "commerce engine," but all of those features relate to users or Apple. Indeed, Dr. Evans shows that IAP does nothing technically aside from returning payment information.[554] Thus, there is no evidence that IAP provides developers with any unique features.[555]

[*1012] Apple cites three additional procompetitive business justifications for its payment processing restrictions. As with app distribution, Apple cites (i) security, including privacy and fraud prevention, (ii) collection of its commission, and (iii) compensation for its intellectual property. The Court addresses each justification only to the extent not already discussed above.

2. *Business Justifications*

a. Security

Dr. Rubin opines **[**199]** that by maintaining all transaction data in one place, *i.e.*, centralization, Apple is better able to detect new patterns in fraudulent transactions using algorithms. Dr. Rubin also claims that Apple benefits from its visibility into the entire transaction, which allows it to verify certain transactions.[556]

As explained above, the Court agrees that decentralization may decrease security in some instances. The other arguments cut both ways. For instance, with respect to scale and fraud mining, Dr. Rubin suggests that having more "data points" will always lead to better fraud detection. Apple admits, however, that IAP is not the largest in-app payment service because it processes at most 3% of in-app purchases.[557] Thus, to the extent that scale allows Apple to better detect fraud, other companies could do it better because they process more transactions. Similarly,

---

[553] Ex. Expert 8 (Schmalensee) ¶ 150; Trial Tr. (Schmalensee) 1894:11-1895:12; Trial Tr. (Schiller) 3187:1-6; Ex. Expert 4 (Athey) ¶¶ 76-78; *cf*. PX-2235.004 (email noting difficulty of multi-platform in-app payments). Epic Games also argues that innovative features are precluded, such as carrier billing, but the evidence on this point is scant. *See* PX-2302.013; Trial Tr. (Evans) 1608:20-1609:12.

[554] In its proposed findings of fact, Apple claims that IAP helps developers with currency conversion and tax collection, but its record citations do not support that claim. *See* Apple FOF ¶ 692 (citing Ex. Expert 8 (Schmalensee) ¶¶ 153-154, which does not discuss these features).

[555] Ex. Depo. (Forstall) 252:21-254:4; Trial Tr. (Schiller) 2798:14-19; Ex. Expert 8 (Schmalensee) ¶¶ 152, 154; Ex. Expert 1 (Evans) ¶ 229. Apple raises three additional arguments for IAP. First, it claims that the introduction of IAP "unlocked" the freemium model of monetization. Ex. Expert 8 (Schmalensee) ¶ 134. The parties dispute whether developers used this model on iOS before IAP. Either way, Apple does not claim that freemium requires IAP at present time (as opposed to some other in-app payment processor), so this does not present a *current* procompetitive benefit. Second, Dr. Schmalensee opines that IAP is "essentially free" to developers, who would need to build their own systems or obtain third-party services for payment processing otherwise. *Id.* ¶ 152. In light of Apple's 30% commission, the Court is not persuaded that developers could not obtain these features more cheaply from other companies. Last, Apple claims that IAP helps prevent fraud and ensure privacy. This feature is addressed in the next section as a procompetitive justification.

[556] Ex. Expert 11 (Rubin) ¶¶ 126-128.

[557] Apple FOF ¶ 669; Ex. Expert 8 (Schmalensee) ¶ 170.

with respect to data breaches, although a breach of a payment handler could expose some user data, a breach of Apple itself could expose all Apple users who use IAP.

One of Apple's strongest arguments for IAP security was that it can verify digital good transactions. Unlike for physical goods, Apple uses IAP after confirming that the **[**200]** developer has actually delivered a digital good to the user and is entitled to the corresponding payment. The evidence shows, however, that Apple itself does not perform the confirmation. Apple's Head of Pricing, Mr. Grey, testified that Apple simply asks the developer to confirm that delivery occurred and then issues a receipt. Apple has not shown how the process is any different than other payment processors, and any potential for fraud prevention is not put into practice.[558]

b. Commission Collection

Next, Apple claims that IAP provides the most efficient method for collecting its commission. Dr. Schmalensee opines that without IAP, Apple would have to rely on sellers to remit its 30% commission, with little recourse other than a lawsuit if the money was withheld. Due to the sheer volume of transactions on the App Store, this process could quickly become unwieldy.[559]

Epic Games does not directly dispute these claims. Instead, Epic Games challenges Apple's entitlement to a 30% commission in the first place.[560] Evidence exists to support both views as discussed above. *See supra* Facts §§ I.C.3., II.C., IV.A. The fact of commission is separate from the actual amount of the collection, which the **[**201]** Court addresses next.

[*1013] A corollary point to this topic concerns Apple's restrictions on developers' ability to provide consumers with information about their transactions. Guideline Section 3.1.1 states that apps "may not include buttons, external links, or other calls to action that direct customers to purchasing mechanism other than in-app purchase."[561] This guideline does not prohibit steering toward purchasing mechanisms outside the App Store or its apps, such as on social media, as long as it does not target iOS users but other provisions imply as much.[562]

The competitive effects and justifications for the anti-steering provision are coextensive with those described for Apple's commission previously. *See supra* Facts § V.A.

c. Value of the Intellectual Property

As described above, Apple has not adequately justified its 30% rate. Merely contending that its commission pays for the developer's use of the App Store platform, license to Apple's intellectual property, and access to Apple's user base only justifies a commission, not the rate itself. Nor is the rate issue addressed when Apple claims that it would be entitled to its commission even for games distributed outside the App **[**202]** Store because it provides the device and OS that brings users and developers together.[563]

As noted, no one credibly disputes that Apple and third-party developers act symbiotically. Apple gives developers an audience and developers make Apple's platform more attractive. Thus, Apple earns revenue each time a developer earns revenue creating a feedback loop. However, as revenues show, the ultimate effect appears to vary within developer groups depending on how a developer chooses to monetize its app.

---

[558] Ex. Expert 11 (Rubin) ¶ 128; Trial Tr. (Fischer) 958:12-959:2; Ex. Depo. 12 (Gray) 112:18-114:10.

[559] Ex. Expert 8 (Schmalensee) ¶¶ 138-139, 145-146.

[560] Trial Tr. (Schiller) 2826:6-7; Ex. Depo. (Ong) 58:20-59:13, 152:4-152:23; *see also* Trial Tr. (Weissinger) 1314:11-22.

[561] PX-2790.010.

[562] *See* PX-0257; PX-2790.011; Trial Tr. (Lafontaine) 2055:12-2056:20; Trial Tr. (Schmalensee) 1911:1-12.

[563] Apple FOF ¶ 572; Trial Tr. (Cook) 3863:6-3864:8.

Further, there is substantial evidence that Epic Games, and perhaps other larger developers, bring their own audience to iOS. Fortnite was already popular when it arrived on iOS and Apple sought exclusive Fortnite content to attract new users. *See supra* Facts §§ I.B.2.d, I.B.4. That said, Epic Games wanted Apple's user base, to which it did not have access, as it had already saturated its other options. Also, Match Group found that the majority of new users from the App Store organically searched for its apps (*e.g.*, by typing in "Tinder"), while Apple contributed only 6% of discovery. For these developers, Apple's role in generating in-app purchases was "nothing" but it continued to receive a **[**203]** 30% commission on in-app purchases.[564]

C. Combined Effects

Because Apple has created an ecosystem with interlocking rules and regulations, it is difficult to evaluate any specific restriction in isolation or in a vacuum. Thus, looking at the combination of the challenged restrictions and Apple's justifications, and lack thereof, the Court finds that common threads run through Apple's practices which unreasonably restrains competition and harm consumers, namely the lack of information and transparency about policies which effect consumers' ability to find cheaper prices, increased customer service, and options regarding their **[*1014]** purchases. Apple employs these policies so that it can extract supracompetitive commissions from this highly lucrative gaming industry. While the evidence remains thin as to other developers, the conclusion can likely be extended.

More specifically, by employing anti-steering provisions, consumers do not know what developers may be offering on their websites, including lower prices. Apple argues that consumers can provide emails to developers. However, there is no indication that consumers know that the developer does not already have the email or what the **[**204]** benefits are if the email was provided. For instance, Apple does not disclose that it serves as the sole source of communication for topics like refunds and other product-related issues and that direct registration through the web would also mean direct communication. Consumers do not know that if they subscribe to their favorite newspaper on the web, all the proceeds go to the newspaper, rather than the reduced amount by subscribing on the iOS device.

While some consumers may want the benefits Apple offers (*e.g.*, one-stop shopping, centralization of and easy access to all purchases, increased security due to centralized billing), Apple actively denies them the choice. These restrictions are also distinctly different from the brick-and-mortar situations. Apple created an innovative platform but it did not disclose its rules to the average consumer. Apple has used this lack of knowledge to exploit its position. Thus, loosening the restrictions will increase competition as it will force Apple to compete on the benefits of its centralized model or it will have to change its monetization model in a way that is actually tied to the value of its intellectual property.

PART II

APPLICATION OF [205] FACTS TO THE LAW AND CONCLUSIONS THEREON**

I. RELEVANT PRODUCT AND GEOGRAPHIC MARKET

A. Legal Framework

HN7[] "A threshold step in any antitrust case is to accurately define the relevant market, which refers to 'the area of effective competition.'" *FTC v. Qualcomm Inc., 969 F.3d 974, 992 (9th Cir. 2020)* ("*Qualcomm*") (quoting *Ohio v.*

---

[564] Ex. Depo. (Ong) 58:20-61:07, 152:04-23; *see also* DX-3922; *supra* Facts §§ I.C.3.b., V.A.1.

Am. Express Co. ("Amex"), 138 S. Ct. 2274, 2285, 201 L. Ed. 2d 678 (2018)); *see also* Image Tech. Servs., Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1202 (9th Cir. 1997) ("*Image Tech Services II*") ("The relevant market is the field in which meaningful competition is said to exist.") (citation omitted). Monopoly power under the first element can be defined as "the power to control prices or exclude competition" and may be inferred from the defendant's predominant market share in the relevant market. United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966). In addition, "courts usually cannot properly apply the rule of reason without an accurate definition of the relevant market." Amex, 138 S. Ct. at 2285. Without a relevant market definition, "there is no way to measure the defendant's ability to lessen or destroy competition." *Id.* (simplified).

HN8[] "The relevant market must include both a geographic market and a product market." Hicks v. PGA Tour, Inc., 897 F.3d 1109, 1120 (9th Cir. 2018) (citation omitted). The latter "must encompass the product at issue as well as all economic substitutes for the product." Newcal Indus., Inc. v. Ikon Office Sol., 513 F.3d 1038, 1045 (9th Cir. 2008); *see also id*. ("The consumers do not define the boundaries **[*1015]** of the market; the products or producers do [and] the market **[**206]** must encompass the product at issue as well as all economic substitutes for the product."); P. Areeda & H. Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* § 530a (4th and 5th eds., 2021 Supp.) ("To define a market is to identify those producers providing customers of a defendant firm (or firms) with alternative sources for the defendant's product or service."). "Economic substitutes have a 'reasonable interchangeability of use' or sufficient 'cross-elasticity of demand' with the relevant product." Hicks, 897 F.3d at 1120 (quoting Newcal, 513 F.3d at 1045); *see also* United States v. E.I. DuPont de Nemours & Co., 351 U.S. 377, 404, 76 S. Ct. 994, 100 L. Ed. 1264 (1956). "Including economic substitutes ensures that the relevant product market encompasses 'the group or groups of sellers or producers who have actual or potential ability to deprive each other of significant levels of business.'" Hicks, 897 F.3d at 1120 (quoting Thurman Indust., Inc. v. Pay 'N Pak Stores, Inc., 875 F.2d 1369, 1374 (9th Cir. 1989)); *see also* DuPont, 351 U.S. at 393 ("Illegal power must be appraised in terms of the competitive market for the product.").[565]

HN10[] A plaintiff cannot ignore economic reality and "arbitrarily choose the product market relevant to its claims"; rather, the plaintiff must "justify any proposed market by defining it with reference to the rule of reasonable interchangeability and cross-elasticity of demand." Buccaneer Energy (USA) v. Gunnison Energy Corp., 846 F.3d 1297, 1313 (10th Cir. 2017) (internal quotation marks **[**207]** and citation omitted). The proper market definition "can be determined only after a factual inquiry into the commercial realities faced by consumers." High Tech. Careers v. San Jose Mercury News, 996 F.2d 987, 990 (9th Cir. 1993) (internal quotation marks and citation omitted).

HN11[] It is the plaintiff's burden to establish the relevant product and geographic markets. *See* Thurman Indus., 875 F.2d at 1373; Fount-Wip, Inc. v. Reddi-Wip, Inc., 568 F.2d 1296, 1302 (9th Cir. 1978) (noting that plaintiffs bear the "burden of proof" to establish a relevant market). To meet that burden, a plaintiff must produce specific evidence supporting the proposed market definition that is "relevant to the particular legal issue being litigated." Areeda & Herbert Hovenkamp § 533c; *see also* Moore v. James H. Matthews & Co., 550 F.2d 1207, 1218-19 (9th Cir. 1977) (plaintiff failed to establish "the relevant product market" where it failed to introduce adequate evidence regarding "the products involved as to price, use, quality, and characteristics"); United States v. H & R Block, Inc., 833 F. Supp. 2d 36, 64 (D.D.C. 2011) ("Courts correctly search for a relevant market—that is a market relevant to the particular legal issue being litigated.") (simplified)).

B. Analysis

1. *Relevant Product Market*

---

[565] ***HN9***[] "Interchangeability implies that one product is roughly equivalent to another for the use to which it is put: while there may be some degree of preference for the one over the other, either would work effectively." Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 437 (3d Cir. 1997) (internal quotation marks and citation omitted). For example, "[a] person needing transportation to work could buy a Ford or Chevrolet automobile, or could elect to ride a horse or bicycle, assuming those options were feasible." *Id.* (internal quotation marks and citation omitted).

Epic Games constructs a framework to argue that there are three separate product markets at issue. In the foremarket, Epic Games identifies the product market as one for "Smartphone Operating Systems." Epic Games contends in turn that **[*1016]** there **[**208]** are *two* derivative and relevant aftermarkets that flow from this initial foremarket, including the "iOS App Distribution" market and "iOS In-App Payment Solutions." Epic Games logic flows as follows: the iOS in-app payment solutions market is an aftermarket of the iOS app distribution market which is further an aftermarket of the smartphone operating systems foremarket.

Apple, on the other hand, contends that there is only one relevant product: digital game transactions. This includes any and all digital gaming transactions made on any gaming platform. The Court has discussed the factual profiles of each of the proffer, *see supra* Facts § II, and turns to the determination here.

The parties agree that the Court must determine which products or services are in "the area of effective competition" to define the product market. *Amex, 138 S. Ct. at 2285*; *Thurman Indus., 875 F.2d at 1374* ("For antitrust purposes, defining the product market involves identification of the field of competition: the group or groups of sellers or producers who have actual or potential ability to deprive each other of significant levels of business." (citation omitted)). The relevant product market "must encompass the product at issue as well as all economic substitutes **[**209]** for the product." *Newcal, 513 F.3d at 1045*. ***HN12***[] "Economic substitutes have a 'reasonable interchangeability of use' or sufficient 'cross-elasticity of demand' with the relevant product." *Hicks, 897 F.3d at 1120* (quoting *Brown Shoe v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*); *DuPont, 351 U.S. at 404*.

The Court begins with Apple's product market definition as it more closely aligns with the Court's conclusion. Then the Court discusses the reasons why Epic Games has not properly defined the relevant product market.

a. Apple's Product Market Theory

As a threshold issue, the Court considers whether the App Store provides two-sided transaction services or as Epic Games argues "distribution services."[566] The Supreme Court has seemingly resolved the question: two-sided transaction platforms sell transactions. In two-sided markets, a seller "offers different products or services to two different groups who both depend on the platform to intermediate between them." *Amex, 138 S. Ct. at 2280*. Here, try as it might, Epic Games cannot avoid the obvious. Plaintiff only sells to iOS users through the App Store on Apple's platform. No other channel exists for the transaction to characterize the market as one involving "distribution services."

Plaintiff's reliance on Dr. Evans' testimony to the contrary does not persuade. First, Dr. Evans' testimony was **[**210]** internally inconsistent. He agrees that the App Store is a "two-sided transaction platform" and includes the features characteristic of two-sided transaction platforms. Although he testified that Apple also provides services to facilitate those transactions, those services are coextensive with "transactions" under his definition.[567] Thus, there is no substantive difference between "transactions" and "services" to facilitate those transactions. The semantic difference does not warrant departure from Supreme Court precedent.[568] Second, distribution **[*1017]** services may improperly imply that only developers consume Apple's products. The evidence is to the contrary. By contrast, all of the experts agree that both users and developers consume App Store transactions.

Accordingly, the Court finds that the relevant App Store product is transactions, not services, but that providing transactions may include facilitating services (matchmaking, developer support, etc.).[569]

---

[566] Trial Tr. (Evans) 1454:11-16, 1457:10-1458:25, 1707:7-17; Trial Tr. (Schmalensee) 1955:3-23.

[567] *See, e.g.*, Trial Tr. (Evans) 1612:7-9, 1634:2-1635:25; Trial Tr. (Schmalensee) 1882:24-1883:2; Trial Tr. (Lafontaine) 2031:25-2032:3, 2037:15-16; Ex. Expert 8 (Schmalensee) ¶ 55.

[568] *See* Trial Tr. (Evans) 1612:7-9, 1634:2-1635:25; *accord* Trial Tr. (Schmalensee) 1954:3-9 (equating transactions with "matchmaking" services), 1940:23-25 (agreeing that Dr. Evans analyzed the App Store as a two-sided platform).

[569] *See, e.g.*, Ex. Expert 8 (Schmalensee) ¶¶ 55-56; Trial Tr. (Evans) 1707:2-17.

i. Apps or Digital Game Transactions?

Next, the Court considers whether to narrow the scope of the transactions in terms of defining the product market. ***HN13***[] "In limited settings . . . the relevant product market may be narrowed **[**211]** beyond the boundaries of physical interchangeability and cross-price elasticity to account for identifiable submarkets or product clusters." *Thurman Indus., 875 F.2d at 1374*. A submarket is "a small part of the general market of substitutable products" and "is economically distinct from the general product market." *Newcal, 513 F.3d at 1045*. Although there are "several 'practical indicia' of an economically distinct submarket," including "industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors," *id.* (quoting *Brown Shoe, 370 U.S. at 325*), they are "practical aids for identifying the areas of actual or potential competition" and "their presence or absence does not decide automatically the submarket issue." *Thurman Indus., 875 F.2d at 1375* (citations omitted). The Court considers these factors in its evaluation.

Having considered and reviewed the evidence, the Court concludes based on its earlier findings of facts that the appropriate submarket to consider is digital game transactions as compared to general non-gaming apps. *See supra* Facts § II.B.3. Indeed, the Court concluded that there were nine indicia indicating **[**212]** a submarket for gaming apps as opposed to non-gaming apps: (i) the App Store's business model is fundamentally built upon lucrative gaming transactions; (ii) gaming apps constitute a significant majority of the App Store's revenues; (iii) both the gaming, mobile, and software industry as well as the general public recognize a distinction between gaming apps and non-gaming apps; (iv) gaming apps and their transactions exhibit peculiar characteristics and users; (v) game app developers often employ specialized technology inherent and unique to that industry in the development of their product; (vi) game apps further have distinct producers—game developers—that generally specialize in the production of *only* gaming apps; (vii) game apps are subject to distinct pricing structures as compared to other categories of apps; (viii) games and gaming transactions are sold by specialized vendors; and (ix) game apps are subject to unique and emerging competitive pressures, that differs in both kind and degree from the competition in the market for non-gaming apps. The Court does not reiterate here the detail except to note the following significant points:[570]

[*1018] The evidence was undisputed that over 80% **[**213]** of apps in the App Store are free. For those apps, the user pays nothing either inside the app or at the initial download. The developer also pays nothing aside from an up-front $99 developer fee. Apple thus does not collect commissions on those transactions. Moreover, many of those apps are subject to special treatment, such as the "reader" rule, that allows them to bypass Apple's restrictions and commissions altogether. These differences create economic distinctions between the two categories. Finally, there is insufficient evidence that most apps are impacted by Apple's alleged anticompetitive conduct.[571]

---

[570] Dr. Lafontaine suggests that combining game and non-game transactions would require a "clustering" analysis to show that they are subject to the same competitive pressures. Ex. Expert 7 (Lafontaine) ¶¶ 33-35. The Court does not address the issue here because clustering is not necessary to determine that game transactions are the proper focus.

[571] Ex. Expert 6 (Hitt) ¶¶ 118, 121; DX-4178.006; PX-0059.007. Besides games, the other category of apps disproportionately affected by Apple's conduct are subscription services. DX-4178.006; DX-4526.021. There are good reasons not to include those apps in the current litigation. First, Epic Games did not sell subscription services when *Fortnite* was on the iOS platform; their representation in the case is limited to third parties. Only one of those third parties testified at trial, so the Court lacks a full picture of the true opinions of these companies. Games and subscription apps in general are distinct, with little overlap among the popular examples. *Compare* PX-0608.015 *with id.* at .016.

Second, many subscription services are subject to special rules, such as the "reader rule" that permits users to access app content purchased outside iOS on their Apple devices. Indeed, several large subscription providers (*e.g.*, Spotify and Netflix) have stopped offering subscriptions through the App Store. Although games are subject to a similar "multiplatform rule," the rule has only been in place since 2018 and the record is mixed whether game developers may be more or less able to similarly steer consumers to web transactions. Ex. Expert 6 (Hitt) ¶¶ 101-105; Trial Tr. (Schiller) 2808:6-2809:3; Trial Tr. (Sweeney) 110:12-111:1.

By contrast, game apps are disproportionately likely to use in-app purchases for monetization. Over 98% of Apple's in-app purchase revenue came from games in 2018 to 2019. Moreover, game transactions overall accounted for 76% of Apple's App Store revenues in 2017, 62.9% in 2018, and 68% in 2020. Game commissions are also substantially higher than average. Thus, in most economic ways, and in particular with respect to the challenged conduct, the App Store is primarily a *game* store and secondarily an "every other" app store.[572]

Game transactions are also widely **[**214]** recognized as belonging to a separate market. The App Store, Google Play, and Amazon Appstore all include separate "tabs" for apps and games which reflects that consumers view them differently. Apple analyzes them separately with different heads of business for games and non-game apps. The developers for game apps also tend to be distinct, specializing in games with little revenue from non-game apps.[573]

[*1019] Finally, the App Store is also built upon specialized consumers—those iOS consumers who play video games on iOS devices. As summarized above, it is iOS consumers who make frequent in-app purchases within gaming apps who account for the large majority of Apple's revenues in the App Store. *See supra* Facts § 1.C.6.[574] In other words, there is a specialized subset of iOS gaming consumers who are generating and accounting for a significantly disproportionate number of App Store billings and revenue.

Accordingly, between digital game transactions and all app transactions, the relevant product is game transactions. Contrary to Epic Games' suggestion, that is not because plaintiff sells games. Rather, it is because game transactions are disproportionately affected by Apple's challenged **[**215]** conduct, overwhelmingly subsidize other apps, and are recognized as a distinct submarket. Obviously, Epic Games and Apple compete in that market space. That Epic Games is in the market was the impetus for the analysis, not the reason for the conclusion.

ii. All Gaming Transactions or Mobile Gaming Transactions?

The last metric the Court considers is whether to limit the product market to all gaming transactions or only mobile gaming transactions. Apple argues for the former; Epic Games argues (as an alternative) for the latter. The Court is again guided by the "practical indicia" framework articulated in *Newcal* and *Brown Shoe*. The Court considers these factors in its evaluation.

Having considered and reviewed the evidence, the Court concludes based on its earlier findings of facts that the appropriate submarket to consider is the mobile gaming transactions market. *See supra* Facts § II.D. This relevant

---

Third, and finally, subscription providers may present different security challenges than game stores. Mr. Kosmynka testified that games are different than passive content because they add to or require the functionality of the smartphone. Mr. Schiller confirmed that Apple allows "stores within a store" that contain purely passive content, such as books and music. Thus, Apple's procompetitive justifications may be significantly different for game and non-game stores and apps. Trial Tr. (Kosmynka) 1073:7-1074:18; Trial Tr. (Schiller) 3115:11-3117:7; Trial Tr. (Federighi) 3429:12-3430:8.

Accordingly, the Court declines to consider subscriptions in this lawsuit because they are a separate submarket for which there is insufficient evidence.

[572] Ex. Expert 6 (Hitt) ¶¶ 117, 120-24; DX-4178.006; PX-0059.007; Trial Tr. (Schmid) 3226:7-12.

[573] Ex. Expert 6 (Hitt) ¶¶ 125-27; DX-5552; Trial Tr. (Schmid) 3205:4-11, 3226:1-22, 3349:24-3352:3. As the Court noted, the limited record also shows that the Google Play app store similarly is constructed upon the same game transactions as the App Store. *See* DX-3913.007. Apple also argues that games are subject to unique competitive pressures, with specialized vendors and emerging dynamic competition. Ex. Expert 8 (Schmalensee) ¶ 104. The Court addresses this evidence below.

[574] That said, the evidence for a single distinct "gamer" demographic is inconclusive. For instance, Michael Schmid, testified that "gamers" as he defined them are a "very large percentage of users" including "all the people you speak with," suggesting a generally diverse gaming consumer base. Trial Tr. (Schmid) 3350:5-3352:3; *see also id.* 3351:15-17 ("The Court: Well, are you saying that all app users are also gamers? The Witness: Certainly not."). But even without distinct customer demographics, the fact that only certain set of iOS consumers (*i.e.*, those users who play games on iOS), as well as the separate set of developers and industry recognition as a distinct submarket make extrapolation from games to the whole market inappropriate.

product market would include mobile game transactions on both mobile phone and tablet devices, which have the competitive advantage of mobility or portability as compared to other platforms and devices. *Id.* Indeed, as the Court summarized and found there, mobile gaming exhibits several of **[**216]** the practical indicia discussed in *Newcal* and *Brown Shoe* including industry and public recognition of the submarket as a separate economic entity, peculiar characteristics and uses, distinct customers and producers, and specialized vendors. The Court again does not repeat the entirety of the findings previously made, but discusses the more significant and relevant findings here:

Substantial evidence was presented showing that mobile gaming is a distinct submarket. As an initial matter, Apple's own documents recognize mobile gaming as a submarket. One industry report describes mobile gaming as a "$100 billion industry *by itself*" that accounts for 59% of global gaming revenue. While PC and console gaming has grown more slowly, mobile gaming has experienced double-digit growth driven by "the free-to-play model" with in-app purchases. "Remarkably," this rapid growth "has not significantly cannibalized revenues from the PC or console gaming markets," which suggests that consumers **[*1020]** are not necessarily substituting among them.[575] Another industry report describes distinct user bases for mobile gaming: young children, teenage girls, and older adults are disproportionally likely to be mobile gamers **[**217]** only. Multiplatform gaming, by contrast, is driven by teenage boys and young adults under 25.[576]

Even without Apple documents, the experts largely agree that mobile and non-mobile platforms provide different types of games. Dr. Hitt—whom Apple commissioned to show that game transactions are substitutable—ended up showing the opposite. In his original written direct testimony (which Apple withdrew after cross-examination), Dr. Hitt showed that only 12% and 16% of the most popular App Store games are available on consoles. Both Dr. Hitt's and Dr. Cragg's trial testimony remain in the record, and each shows that console games are largely separate from mobile games. Moreover, while Dr. Hitt originally opined that mobile games are available on PCs, his work could not be entirely reproduced during trial, as some of the games he listed as available on both platforms (PC and mobile platforms) could not be found. The fact that Apple tried and failed to show cross-availability of mobile games with PC indicates that they are distinct.[577]

This conclusion is bolstered in part by evidence from Dr. Cragg. Dr. Cragg finds that the most popular games on mobile are *only* available on mobile, **[**218]** with a few games also available on PCs. The types of games are also different, with many more casual games on mobile and core games on PC and console platforms. For those games that are available on multiple platforms, such as *Fortnite*, Dr. Cragg finds that the playing and spending on different platforms is complementary, rather than substitution-focused, because playing on another device *increases* the playtime and spending on the previous devices.[578]

Industry participants also support the conclusion. Microsoft documents show that mobile gaming generates more than half of the industry revenue and profits, compared to only a quarter for consoles and PCs each. Moreover, Ms. Wright testified that Microsoft does not view game transactions for cross-platform games on iOS devices as competition to transactions on its Xbox console. Although Ms. Wright also testified that mobile is "a segment of the game industry as a whole," that is consistent with it being a separate submarket. By contrast, Steam is the largest game store on PCs. Mr. Cook's lack of familiarity with it presents strong evidence that the iOS App Store does not compete with PC game stores.[579]

---

[575] Although this might be due to the fact that mobile gaming first cannibalized the handheld and portable gaming market, which it may have supplanted and now surpassed. *See supra* n.391.

[576] DX-3248.005, .008; DX-4170.008; *see also id.* at .024 (showing "segments" of gamers with multiple segments "primarily on mobile").

[577] Ex. Expert 6 (Hitt) ¶ 31 & Fig. 3; Trial Tr. (Hitt) 2200:13-2201:18, 2207:6-2216:11; Ex. Expert 13 (Cragg) ¶¶ 34-39, 43-52.

[578] Ex. Expert 13 Cragg ¶¶ 25-33, 79-81, Figs. 10-12; Trial Tr. (Schmid) 3207:8-18.

[579] DX-5523.008-.009; Trial Tr. (Wright) 547:4-9, 549:14-21, 638:6-19; Trial Tr. (Cook) 3993:2-6.

Finally, as the Court concluded in the findings **[**219]** of facts, the Court would not at this time find that the Switch or game streaming services are part of the mobile game transactions market. This is in part due to the underdeveloped record on these products, and in part on the relative recent introduction of these products to the market. While the record supports a finding that these are new entrants into the same **[*1021]** market space as Apple and Google, whether these products ultimately are substitutable and reasonably interchangeable by consumers remain to be seen.

Accordingly, for the same reasons that game transactions, rather than app transactions in general, are the proper focus in this case, the Court finds that mobile gaming, including mobile devices and tablets,[580] is a separate market from gaming in general. Thus, the relevant product market is mobile gaming transactions.

b. Epic Games' Approach: Foremarket/Aftermarket Market Definition

The Court reaffirms here the fundamental factual flaws with Epic Games' market structure. *See supra* Facts §§ II.A—C. Without a product, there is no market for the non-product, and the requisite analysis cannot occur. Thus, where there is no product or market for smartphone operating systems, there **[**220]** are no derivative markets. The payment solutions aftermarket also fails for the independent reason that IAP is not a product for which there is a market. Further, Epic Games' aftermarket approach to market definition is inconsistent with its recognition that the App Store constitutes a two-sided transaction platform which it fails to properly analyze. *Id.;* *Amex, 138 S. Ct. at 2287*. Nonetheless, the Court addresses the additional problems with Epic Games' attempt to define the market with the confines of a single brand.

HN14[] Determining whether a single-brand market is proper requires "a factual inquiry into the 'commercial realities' faced by consumers." *Eastman Kodak Co. v. Image Tech. Servs., 504 U.S. 451, 482, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* ("*Eastman Kodak*") (quoting, *Grinnell Corp., 384 U.S. at 572*). "Single-brand markets are, at a minimum, extremely rare" and courts have rejected such market definitions "[e]ven where brand loyalty is intense." *Apple, Inc. v. Psystar Corp., 586 F. Supp. 2d 1190, 1198 (N.D. Cal. 2008)* (internal quotation marks and citation omitted). *But see id.* ("Antitrust markets consisting of just a single brand, however, are not per se prohibited . . . . In theory, it may be possible that, in rare and unforeseen circumstances, a relevant market may consist of only one brand of a product."). Indeed, "[a] single brand is *never* a relevant market when the underlying product is fungible." **[**221]** Areeda & Hovenkamp § 563d. "It is an understatement to say that single-brand markets are disfavored. From nearly the inception of modern ***antitrust law***, the Supreme Court has expressed skepticism of single-brand markets[.]" *In re Am. Express Anti-Steering Rules Antitrust Litig., 361 F. Supp. 3d 324, 343 (E.D.N.Y. 2019)*; Herbert J. Hovenkamp, *Markets in IP & Antitrust*, *100 Geo. L.J. 2133, 2137 (2012)* ("[A]ntitrust law has found that a single firm's brand constitutes a relevant market in only a few situations.").

HN15[] Despite the foregoing, "in some instances one brand of a product can constitute a separate market." *See* *Eastman Kodak, 504 U.S. at 482*; *see also* *Newcal, 513 F.3d at 1048* ("[T]he law permits an antitrust claimant to restrict the relevant market to a single brand of the product at issue . . . ."). ***Antitrust law*** has continued to develop since *Eastman Kodak*. Beginning there, the Supreme Court considered whether summary judgment was appropriate for Kodak on a *Sections 1* and *2* claims where the plaintiffs had argued that Kodak possessed monopoly power in the aftermarket of sales of parts and repair services, despite not having **[*1022]** such power in the foremarket of equipment sales. *504 U.S. at 466-471*. In affirming the Ninth Circuit's reversal of summary judgment, the Supreme Court identified two factors that supported the aftermarket framework: the existence of significant (i) "information" **[**222]** costs and (ii) "switching costs." *Id. at 473*.

As to the first, information costs, the Supreme Court noted that "[f]or the service-market price to affect equipment demand, consumers must inform themselves of the total cost of the 'package'—[in *Eastman Kodak*] equipment, service, and parts—at the time of purchase; that is, consumers must engage in accurate lifecycle pricing." *Id.* "Much of this information is difficult—some of it impossible—to acquire at the time of purchasing," and that "even if

---

[580] As discussed in the findings of facts, *see supra* Facts §§ II.D—E., this would include both iOS and Android tablets and mobile phone devices.

consumers were capable of acquiring and processing the complex body of information, they may choose not to do so [as a]cquiring [such] information is expensive." *Id. at 473, 474*. Indeed, "[i]f the costs of service are small relative to the equipment price, or if consumers are more concerned about equipment capabilities than service costs, they may not find it cost efficient to compile the information." *Id. at 474-75*.

As to the second factor, switching costs, the Supreme Court stated that "[i]f the cost of switching is high, consumers who already have purchased the equipment, and are thus 'locked in,' will tolerate some level of service-price increases before changing equipment brands." *Id. at 476*. "Under this scenario, a seller profitably could **[**223]** maintain supracompetitive prices in the aftermarket if the switching costs were high relative to the increase in service prices, and the number of locked-in customers were high relative to the number of new purchasers." *Id.* The Supreme Court further noted that this strategy was "likely to prove profitable" especially where a "seller could simply charge new customers below-marginal cost on the equipment and recoup the charges in service,"[581] or offer specific packages including "lifetime warranties or long-term service agreements that are not available to locked-in customers." *Id. at 476-477*.

In sum, given the presence of these two factors, the Supreme Court found a question of fact "foil[ed] the simple assumption that the equipment and service markets act as pure complements to one another." *Id. at 477*.

Since 1992, five circuit courts and numerous district courts refused to find a *Kodak*-type single-brand aftermarket where customers had knowledge of the alleged restrictive policies and were not subject to a post-purchase policy change. Big tech may ultimately convince the Supreme Court to change the calculus, but for now the state of ***antitrust law*** has that distinct parameter. The Court recounts **[**224]** the history.

Four years after *Eastman Kodak*, the Fifth Circuit in *United Farmers Ass'n, Inc. v. Farmers Insurance Exchange, 89 F.3d 233, 238 (5th Cir. 1996)* rejected a claim that insurance agents were "locked-in" to a particular insurance company because the agents "would clearly have become aware of [the alleged anticompetitive] policy long before they faced **[*1023]** significant switching costs." A year later the Sixth Circuit similarly found that an "antitrust plaintiff *cannot succeed* on a *Kodak*-type [single-brand-aftermarket] theory when the defendant has not changed its policy after locking-in some of its customers, and the defendant has been otherwise forthcoming about its pricing structure and service policies." *PSI Repair Servs., Inc. v. Honeywell, Inc., 104 F.3d 811, 820 (6th Cir. 1997)* (emphasis supplied). Rounding off the decade, the First Circuit found that "the easy availability of information" and "purely prospective nature" of an allegedly anticompetitive policy "helps to take [a] case out of *Kodak*'s precedential orbit." *SMS Sys. Maint. Servs., Inc. v. Digital Equip. Corp., 188 F.3d 11, 19 (1st Cir. 1999)* (citation omitted).

Fast-forward to 2008, the Ninth Circuit in *Newcal* outlined four factors that could indicate whether an alleged market is a properly defined single-brand aftermarket under *Eastman Kodak* at the motion to dismiss stage. *See Newcal, 513 F.3d at 1049-50*. ***HN16***[] The first indicator of an aftermarket is that the market is "wholly derivative from **[**225]** and dependent on the primary market." *Id. at 1049*. The second indicator is that the "illegal restraints of trade and illegal monopolization relate only to the aftermarket, not to the initial market." *Id. at 1050*. The third indicator is that the defendant's market power "flows from its relationship with its consumers" and the defendant did "not achieve market power in the aftermarket through contractual provisions that it obtains in the initial market." *Id.* The fourth indicator is that "[c]ompetition in the initial market . . . does not necessarily suffice to discipline anticompetitive practices in the aftermarket." *Id.*

While not explicitly repeated elsewhere, other circuits have aligned with the contours of *Newcal* and the foregoing cases regarding consumer knowledge and/or post-purchase policy changes. In 2014, the Federal Circuit weighed in concluding that "it is only the customers who learned about the [allegedly anticompetitive policy] after purchasing

[581] The Court notes that this identified problematic business model in *Eastman Kodak*, of selling the initial equipment near marginal cost and recouping profits in later service, appears to mirror more closely the gaming console's business models for their console platforms (selling hardware near or at a loss and recouping through the sale of games and transactions) as opposed to Apple's business model for its iOS platform (profit on both the hardware and transactions). *See supra* Facts §§ II.D.3.c.

their equipment that are relevant to the 'locked-in' analysis." DSM Desotech, Inc. v. 3D Sys. Corp., 749 F.3d 1332, 1346 (Fed. Cir. 2014). Two years later the Third Circuit held that no *Kodak*-type aftermarket existed "when customers were put on clear notice that purchasing [defendant's product] precluded use of [third-party] **[**226]** maintenance." Avaya Inc., RP v. Telecom Labs, Inc., 838 F.3d 354, 405 (3d Cir. 2016).

The breadth of ***antitrust law*** on the issue has counseled that currently "to establish a single-brand aftermarket under *Kodak* and *Newcal*, the restriction in the aftermarket must not have been sufficiently disclosed to consumers in advance to enable them to bind themselves to the restriction knowingly and voluntarily." Datel Holdings Ltd. v. Microsoft Corp., 712 F. Supp. 2d 974, 987 (N.D. Cal. 2010).[582] **HN17**[] Indeed, "[m]arket imperfections" may "prevent consumers from discovering" that purchasing a product in the initial market could restrict their freedom to shop in the aftermarket. Newcal, 513 F.3d at 1048; *see also* Red Lion Med. Safety, Inc. v. Ohmeda, Inc., 63 F. Supp. 2d 1218, 1231 (E.D. Cal. 1999) ("Information costs may be high, and a manufacturer may thus have considerable market power in the aftermarket, even in the absence of a change in **[*1024]** policy."); Ward v. Apple Inc., Case No. 12-cv-05404-YGR, 2017 U.S. Dist. LEXIS 41897, 2017 WL 1075049, at *7 (N.D. Cal. Mar. 22, 2017) (agreeing with Red Lion, 63 F. Supp. 2d at 1231-32, that a policy change is not necessary to find a valid single-brand market under *Newcal*). In other words, a plaintiff must show evidence "to rebut the economic presumption that [defendant's] consumers make a knowing choice to restrict their aftermarket options when they decide in the initial (competitive) market to" purchase in the foremarket. Newcal, 513 F.3d at 1050.

With these principles in mind, the Court analyzes the evidence presented.

As noted, Epic Games created a construct that largely satisfies the Newcal ***[**227]*** test. By definition, distribution of iOS apps and iOS payment processing derive from Apple's operating system (first factor). Next, Epic Games only identified restraints that related to the distribution and payment processing, so again, by design, they do not relate to the "market for Apple's operating system" (second factor). Similarly, given that (i) consumers do not contractually agree to obtain apps only through the App Store when they purchase an iPhone; (ii) developers are contractually restricted in the aftermarket; and (iii) in light of the technical restrictions on iOS devices, Apple's market power flows from its relationship with its consumers and Apple did not achieve market power in the aftermarket through contractual provisions that it obtains in the initial market (third indicator). Thus, three of the four indicators are fulfilled.[583]

It is within the last indicator that problems arise for Epic Games given antitrust jurisprudence. Issues of lock-in or switching costs, and notice or consumer knowledge, fall under the analysis of evaluating whether competition in the initial market suffices to discipline anticompetitive practices in the aftermarkets.

First, the evidence **[**228]** shows no material change in the conditions for accessing the App Store for either side of the platform. In the Sixth Circuit, the absence of a change in policy following the consumers' initial purchase in the alleged foremarket, which locked consumers into the alleged aftermarket (*i.e.*, the concept of lock-in), was fatal. *See* PSI Repair Servs., Inc., 104 F.3d at 820. For consumers, iOS has always been a closed system, and the App Store has been a "walled garden" with respect to native apps from its inception; even prior to any time in which Apple was alleged to have become a monopolist. Indeed, it is undisputed by the parties that a key distinguishing feature of the iOS platform is its closed platform model, as compared to the open Android platform maintained by its main competitor Google. At the very least, previous consumers of iOS devices would have been familiar with the iOS platform and the App Store model when they repurchased a device prior to 2011.

---

[582] *See also* Teradata Corp. v. SAP SE, No. 18-CV-03670, 2018 U.S. Dist. LEXIS 209872, 2018 WL 6528009, at *16 (N.D. Cal. Dec. 12, 2018) (single-brand markets are possible only in situations in which customers face "restrictions that were undisclosed at the time of the purchase of the product from the primary market").

[583] Epic Games did not define the foremarket as the market for sale of mobile cellular phones or mobile devices. That said, even Dr. Evans acknowledges, consumers do not buy smartphone operating systems separately from smartphones. Trial Tr. (Evans) 1621:19-23; Ex. Expert 7 (Lafontaine) ¶¶ 61-63. There is no price charged to consumers for either the iOS or the Android operating systems. *See supra* Facts § II.A.; Trial Tr. (Lafontaine) 2022:11-2023:4; Ex. Expert 1 (Evans) ¶ 139.

Epic Games' reliance on a 2007 statement from Steve Jobs when he announced the 70-30 split that Apple did not intend to make a profit, much less an unpublicized, internal 2011 comment by Phil Schiller regarding a reduction of the 70-30 after a billion dollars in profit, **[**229]** do not change the analysis. As discussed above, these statements do not create a policy shift sufficient to show lock-in. At best, these statements reflect Apple's initial expectation that the **[*1025]** App Store was not projected to be profitable for Apple.[584] Apple's miscalculation, while hugely profitable, does not evidence consumers lock-in with iOS devices. While Apple's calculated risk returned incredible profits, the reality is that Apple has maintained the same general rules with both consumers and developers since the inception of the iOS devices. Epic Games' arguments that Apple has otherwise repeatedly increased prices does not persuade, where Apple's rate has always been 30%.[585]

Second, Epic Games failed to prove lock-in, even absent a policy shift. Given the weak showing, plaintiff either found itself with an unachievable task or insufficient time to address the issue. In short, there is no evidence in the record demonstrating that consumers *are unaware* that the App Store is the sole means of digital distribution on the iOS platform. Specifically, there is no evidence in the form of consumer survey data demonstrating the extent of consumers knowledge when purchasing of an iOS device, **[**230]** much less that they are unaware they are purchasing *into* a closed ecosystem that is tightly controlled by Apple.

Instead of addressing the issue head-on, Epic Games pivots to argue that the market imperfections prevent consumers from discovering the true costs of downloading apps. In other words, even those consumers who know the facts about Apple's practices in the iOS app distribution market typically do not or cannot effectively take those facts into account when choosing a smartphone and operating system because the cost of distributing apps is low compared to the overall cost of a smartphone and because it is difficult to calculate and compare the lifecycle costs of smartphones between smartphone operating systems.[586]

These arguments are not supported by the record. Epic Games fails to quantify the actual cost to consumers on downloading and purchasing apps and in-app purchases. Indeed, if anything, the record reflects that cross-platform functionality and apps have only proliferated since the early 2010s, where middleware like streaming services and cross-platform games have only made switching platforms and devices easier and more convenient. That is, the market is responding and **[**231]** evolving.

Epic Games' sole focus on iOS devices simply ignores the market reality that is available to consumers. The Court's definition of the product as "digital mobile game transactions" takes into account that the App Store competes against other platforms for both consumers and developers. Indeed, as discussed in the findings of facts, several recent entrants into the mobile gaming submarket, from Nintendo, Microsoft, and Nvidia, show that this submarket is presently evolving and is dynamic. Moreover, the continued rise and popularity of cross-platform games like **[*1026]** *Fortnite* and *Minecraft* offered on a variety of platforms, even beyond mobile gaming devices, are making switching between platforms seamless because a consumer can carry over rewards and progress between the diverse platforms. As a result, neither consumers nor developers are "locked-in" to the App Store for digital mobile game transactions—they can and do pursue game transactions on a variety of other mobile platforms and increasingly other game platforms.[587] Although the state of the wider gaming market is not at a level where the

---

[584] Moreover, this 2007 statement is better categorized as a statement concerning price—not about any restriction on iOS app distribution or payment processing that Epic Games mainly challenges. In other words, this statement taken in the best possible light for Epic Games is a misrepresentation as to price—not as to any of the then and still present restrictions on distribution or payment processing.

[585] Indeed, Epic Games' citation to Apple's 2009 action requiring IAP to process payment for in-app digital content does not persuade where no Epic Games expert witness opines that Apple had monopoly power prior to 2010 or 2011. Even considering this action, along with Apple's 2011 and 2016 rules regarding antisteering, subscriptions, and search ads, do not demonstrate any increase in the rate for consumers *or* developers. Indeed, most of these actions enabled increased functionality for consumers and developers, permitting new business models, and relied on increasing innovation on both the iOS device and the App Store.

[586] Trial Tr. (Evans) 1508:15-1509:25.

entirety of these gaming platforms can truly be characterized as competing for purposes of **[**232]** ***antitrust law*** (*e.g.*, substitutes), the continued rise of cross-platform games, technologies, and innovative ways in which to reach consumers only demonstrate that these differing platforms are converging and ever intertwining.[588]

In sum, with seasoned antitrust counsel at the helm, Epic Games created a market definition which theoretically made a strong showing within the *Newcal* and *Eastman Kodak* framework. For the reasons explained above, the market definition was fundamentally flawed, and in any event, does not satisfy all four of the *Newcal* factors. With respect to the Court's ultimate finding that the relevant market is mobile gaming transactions, the Court further finds that, at a minimum, the fourth *Newcal* factor would similarly not be adequately satisfied on the record before the Court.

2. *Geographic Market*

HN18[] "The criteria to be used in determining the appropriate geographic market are essentially similar to those used to determine the relevant product market." *Brown Shoe, 370 U.S. at 336* (citations omitted). "A geographic market is an area of effective competition where buyers can turn for alternate sources of supply." *Morgan, Strand, Wheeler & Biggs v. Radiology, Ltd., 924 F.2d 1484, 1490 (9th Cir. 1991)* (simplified).

"The relevant geographic market for goods sold nationwide **[**233]** is often the entire United States[.]" *Heerwagen v. Clear Channel Commc'ns, 435 F.3d 219, 228 (2d Cir. 2006)*. As compared to others, in antitrust cases, courts regularly recognize global markets. *See, e.g., United States v. **[*1027]** Microsoft Corp., 253 F.3d 34, 52, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (upholding relevant geographic market encompassing "the licensing of all Intel-compatible PC operating systems worldwide"); *United States v. Eastman Kodak Co., 63 F.3d 95, 108 (2d Cir. 1995)* (upholding worldwide geographic market for film). The United States antitrust laws' concern with anticompetitive conduct, includes harm that such American businesses suffer relating to their transactions with foreign consumers. *See 15 U.S.C. § 6a* (Sherman Act generally applies to conduct affecting "export trade"). Importantly here, the question focuses on the area of effective competition, not the reach of United States antitrust laws which is addressed elsewhere.

Having found the relevant product market to be that of mobile gaming transactions, the Court finds the area of effective competition in the geographic market to be global, with the exception of China. As discussed in the findings of facts, *see* supra Facts § III, Apple's engagement in that market does not change based on national borders. Developers globally access the platform based on the same set of rules and agreements. Even here, Epic Games' related entity was bound by the exact **[**234]** same set of rules and agreements. Given the current record, the Court discerns no meaningful difference for digital mobile gaming transactions domestically than globally.

---

[587] On some metrics, Apple is in fact more open than some competitors in the wider digital gaming market. For instance, the record reflects that certain competitors institute restrictions on cross-platform play and cross-platform wallet. Moreover, some platform owners require revenue sharing when game players disproportionately spend on a platform other than their own. Further still, some agreements require that certain goods be charged the same as the cheapest available on other platforms.

[588] The Court has further never been satisfied by Epic Games' explanation as how its aftermarket theory as to Apple would not also apply to other platform holders with similar walled garden models in the wider gaming market, including Nintendo, Microsoft, and Sony. *See Epic Games, Inc. v. Apple Inc., 493 F. Supp. 3d 817, 838-39 (N.D. Cal. 2020)*. The same three *Newcal* factors that readily apply to Apple's iOS devices would also facially apply to Nintendo's, Microsoft's, and Sony's consoles and their digital stores. Epic Games' distinction as to general purpose devices (*e.g.*, iOS devices) versus special purpose devices (*e.g.*, game consoles) has no basis in current ***antitrust law***. Presumably, the factors would be applied in the same fashion.

Instead, and as discussed above, consumers if anything appear to purchase a game console in the same manner they purchase an iOS device: understanding that they must purchase into an ecosystem and are limited in the later transactions for apps and games. Despite the foregoing, Epic Games does not claim that every game console manufacturer has unlawfully created and maintained a monopoly, and in fact, appears content to offer *Fortnite* and other Epic Games on those platforms without complaint. Trial Tr. (Schmalensee) 1904:15-1905:4.

II. SECTIONS 1 AND 2 OF THE SHERMAN ACT (COUNTS 1, 3, 4, 5)

A. General Framework

HN19[] As *Qualcomm* instructs, "[t]he similarity of the burden-shifting tests under §§ 1 and 2 means that courts often review claims under each section simultaneously." Qualcomm, 969 F.3d at 991. Indeed, "[i]f, in reviewing an alleged Sherman Act violation, a court finds that the conduct in question is not anticompetitive under § 1, the court need not separately analyze the conduct under § 2." *Id.* (citing Williams v. I.B. Fischer Nevada, 999 F.2d 445, 448 (9th Cir. 1993)). That result is logical as "proving an antitrust violation under § 2 of the Sherman Act is more exacting than proving a § 1 violation . . . ." Id. at 992 (citing Microsoft Corp., 253 F.3d at 79).

Among the differences in the analysis is the type of evidence used to prove a monopoly. **HN20**[] "[A]lthough the tests are largely similar, a plaintiff may not use indirect evidence to prove unlawful monopoly maintenance via anticompetitive conduct under § 2." *Id.* (citing Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 307-08 (3d Cir. 2007) (distinguishing between proving the existence of monopoly power through indirect evidence and proving anticompetitive conduct itself, the second element of a Section 2 claim)).

Here, in light of **[**235]** Qualcomm, the Court reviews Sections 1 and 2 Sherman Act claims together. Underpinning both Sections 1 and 2 claims is the level of market power, and possibly monopoly power, that Apple exercises in the determined product and geographic market. The Court therefore initially assesses Apple's market and monopoly power in the relevant product and geographic market before addressing Epic Games' claims under Sections 1 and 2 of the Sherman Act.

B. Assessing Apple's Market Power in the Relevant Product and Geographic Market

1. *Legal Framework*

HN21[] Market power and monopoly power are related but distinct concepts. As the Supreme Court has stated: "market power is the ability to raise prices above those that would be charged in a competitive market." NCAA v. Bd. of Regents of **[*1028]** the Univ. of Oklahoma, 468 U.S. 85, 109 n.38, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984).[589] Monopoly power is "the power to control prices or exclude competition." Grinnell Corp., 384 U.S. at 571.

The difference between the two is a matter of degree. **HN22**[] "Monopoly power under § 2 requires, of course, something greater than market power under § 1." Eastman Kodak, 504 U.S. at 481; *see also* Image Tech. Servs. II, 125 F.3d at 1206 (same). Courts have described the distinction as "substantial" market power or an "extreme degree" of market power. *See, e.g.,* Bacchus Indus., Inc. v. Arvin Indus., Inc., 939 F.2d 887, 894 (10th Cir. 1991) (defining monopoly power as **[**236]** "substantial" market power); Deauville Corp. v. Federated Dep't Stores, Inc., 756 F.2d 1183, 1192 n.6 (5th Cir. 1985) (defining monopoly power as an "extreme degree of market power"); Safeway Inc. v. Abbott Lab'ys, 761 F. Supp. 2d 874, 886 n.2 (N.D. Cal. 2011) (defining monopoly power as a substantial degree of market power).[590] Courts have also required that the monopoly power be beyond fleeting or

[589] *See also* Jefferson Par. Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 27 n.46, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984) ("As an economic matter, market power exists whenever prices can be raised above levels that would be charged in a competitive market."), *abrogated on other grounds by* Illinois Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 31, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006); *cf.* Dennis W. Carlton & Jeffrey M. Perloff, *Modern Industrial Organization* 642 (4th ed. 2005) (noting that a firm has market power "if it is profitably able to charge a price above that which would prevail under competition"); William M. Landes & Richard A. Posner, *Market Power in Antitrust Cases*, 94 Harv. L. Rev. 937, 939 (1981) ("A simple economic meaning of the term 'market power' is the ability to set price above marginal cost.").

ephemeral which the Court understands to be durable and sustaining. *See* United States v. Syufy Enters., 903 F.2d 659, 665-66 (9th Cir. 1990) ("In evaluating monopoly power, it is not market share that counts, but the ability to *maintain* market share." (emphasis in original)); Colo. Interstate Gas Co. v. Nat. Gas Pipeline Co. of Am., 885 F.2d 683, 695-96 (10th Cir. 1989) (finding a firm lacked monopoly power because its "ability to charge monopoly prices will necessarily be temporary").[591]

HN23[] "[M]arket share is just the starting point for assessing market power." Hunt-Wesson Foods, Inc. v. Ragu Foods, Inc., 627 F.2d 919, 925 (9th Cir. 1980). It "should not be equated with monopoly power" but instead is "evidence from which the existence of monopoly power may be inferred . . . ." Hunt-Wesson, 627 F.2d at 924. Indeed, as the Ninth Circuit has cautioned, "[b]lind reliance upon market share, divorced from commercial reality, could give a misleading picture of a firm's actual ability to control prices or exclude competition." *Id.* In other words, "market share, while being perhaps the most important factor, does not alone determine the presence or absence of monopoly power." Pac. Coast Agr. Export Ass'n v. Sunkist Growers, Inc., 526 F.2d 1196, 1204 (9th Cir. 1975) (affirming jury finding where **[**237]** defendant controlled anywhere from 45-70% of the market and competitors were fragmented with less than 12 to 18% **[*1029]** of the market).

HN24[] The threshold of market share for finding a *prima facie* case of monopoly power is generally no less than 65% market share. *See* Image Tech. Servs. II, 125 F.3d at 1206 ("Courts generally require a 65% market share to establish a prima facie case of market power."); Hunt-Wesson, 627 F.2d at 924-25 ("market shares on the order of 60 percent to 70 percent have supported findings of monopoly power").[592] A more conservative threshold would require a market share of 70% or higher for monopoly power. *See* Kolon Indus. Inc. v. E.I. DuPont de Nemours & Co., 748 F.3d 160, 174 (4th Cir. 2014) ("Although there is no fixed percentage market share that conclusively resolves whether monopoly power exists, the Supreme Court has never found a party with less than 75% market share to have monopoly power. And we have observed that when monopolization has been found the defendant controlled seventy to one hundred percent of the relevant market." (citations omitted)); Syufy Enters. v. Am. Multicinema, Inc., 793 F.2d 990, 995 (9th Cir. 1986) ("[A]s far as we know, neither the Supreme Court nor any other court has ever decided whether a market share as low as 60-69% is sufficient, standing alone, to sustain such a finding."). **HN25**[] Relatedly, "numerous cases hold that a market share of less than 50 percent is presumptively **[**238]** insufficient to establish" the requisite level of market power under a Section 2 claim. Rebel Oil Co., Inc. v. Atl. Richfield Co., 51 F.3d 1421, 1438 (9th Cir. 1995).[593]

HN26[] By contrast, Section 1 claims can be satisfied with less market power. For instance, the Ninth Circuit affirmed a finding of a Section 1 violation where the market share was as low as 24% but has also found market share above 30% insufficient. *See, e.g.,* Twin City Sportservice, Inc. v. Charles O. Finley & Co., 512 F.2d 1264 (9th Cir. 1982). *But see also* Jefferson Parish, 466 U.S. at 26 & n.43 (30 percent market share insufficient); Pilch v.

---

[590] *See also* Areeda & Hovenkamp § 801 (stating that "the Sherman Act § 2 notion of monopoly power . . . is conventionally understood to mean 'substantial' market power").

[591] *See also* Areeda & Hovenkamp § 801d; Oahu Gas Serv., Inc. v. Pac. Res., Inc., 838 F.2d 360, 366 (9th Cir. 1988) ("A firm with a high market share may be able to exert market power in the *short run*, but [s]ubstantial market power can persist only if there are significant and continuing barriers to entry." (internal quotation marks omitted) (emphasis supplied).

[592] *See also* Grinnell Corp., 384 U.S. at 571 (noting that the Supreme Court previously found "over two-thirds of the entire domestic field of cigarettes, and over 80% of the field of comparable cigarettes' constituted 'a substantial monopoly'" before finding monopoly power where defendant had an 87% market share).

[593] *See also* Twin City Sportservice, Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1274 (9th Cir. 1975) ("We do, however, wish to remind the trial court when considering this case on remand of Judge Learned Hand's famous dictum that while 90% of the market 'is enough to constitute a monopoly; it is doubtful whether sixty or sixty-four per cent would be enough; and certainly thirty-three per cent is not.' It also should be recalled that on several occasions courts have considered a 50% share of the market as inadequate to establish a proscribed monopoly." (quoting United States v. Aluminum Co. of Am., 148 F.2d 416, 424 (2d Cir. 1945)).

French Hosp., No. CV 98-9470 CAS(CWX), 2000 U.S. Dist. LEXIS 23125, 2000 WL 33223382, at *7 (C.D. Cal. Apr. 28, 2000) (33.2 percent market share insufficient).

Here, the Court considers other market factors in the form of direct and indirect evidence. ***HN27***[] First, direct evidence is evidence "of the injurious exercise of market power" such as "evidence of restricted output and supracompetitive prices." *Rebel Oil Co., 51 F.3d at 1434*. This kind of evidence is "direct proof of the injury to competition which a competitor with market power may inflict, and thus, [direct proof] of the actual exercise of market power." *Id.* (citing *FTC v. Indiana Fed'n of Dentists, 476 U.S. 447, 460-61, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*).

HN28[] The second and "more common type of proof is circumstantial evidence pertaining to the structure of the market." *Id.* To demonstrate market power indirectly, a plaintiff must: "(1) define the relevant market, (2) show that the defendant owns **[*1030]** a dominant share of that market, and (3) show that there are significant barriers to entry **[**239]** and show that existing competitors lack the capacity to increase their output in the short run." *Id.* [594]

HN29[] Because "[a] mere showing of substantial or even dominant market share alone cannot establish market power sufficient to carry out a predatory scheme," a plaintiff "must show that new rivals are barred from entering the market and show that existing competitors lack the capacity to expand their output to challenge the predator's high price." *Rebel Oil Co., 51 F.3d at 1438-39, n.10* ("telltale factors" include "market share, entry barriers and the capacity of existing competitors to expand output"). Entry barriers are market characteristics "that prevent new rivals from timely responding to an increase in price above the competitive level." *FTC v. Qualcomm Inc., 411 F. Supp. 3d 658, 684 (N.D. Cal. 2019)* (quotation marks omitted), *rev'd on other grounds*, *969 F.3d 974 (9th Cir. 2020)*. They include "additional long-run costs that were not incurred by incumbent firms but must be incurred by new entrants," or "factors in the market that deter entry while permitting incumbent firms to earn monopoly returns." *L.A. Land Co. v. Brunswick Corp., 6 F.3d 1422, 1427-28 (9th Cir. 1993)* (quotation marks omitted).

2. *Analysis*

As a starting point, the Court has found Apple's market share in mobile gaming transactions appears to fluctuate anywhere from approximately 52% to 57% over the course **[**240]** of the three years in evidence. *See supra* Facts § II.E. While the prior figures suggest that Apple's share in mobile gaming is increasing, the more recent year reflects some stability in the market between Apple and its main competitor, Google. That Apple has more than a majority in a mostly duopolistic, and otherwise highly concentrated, market indicates that Apple has considerable market power.

Apple's market share is below the general ranges of where courts found monopoly power under *Section 2*. Nonetheless, the Court considers additional direct and indirect evidence to determine whether that market share should be sufficient under *Section 2* or, under any event, sufficient under *Section 1*.

In considering *direct* evidence of monopoly power, Epic Games has failed to demonstrate that there is a necessary restriction in the output of the relevant product—here, mobile game transactions. The record contains substantial evidence that output has increased in mobile gaming transactions. *See supra* Facts §§ IV—V. Even though the Court has concerns about the 30% rate and its appearance of being artificially higher (*i.e.*, supracompetitive) than it would be in a more competitive market, there has not been the corollary impact **[**241]** on output. This could be because of the technological nature of the dispute. *Id.; see also supra* Facts § V.A.1.c. Nonetheless, given the

---

[594] *See also* *Microsoft Corp., 253 F.3d at 51* ("Because such direct proof is only rarely available, courts more typically examine market structure in search of circumstantial evidence of monopoly power. Under this structural approach, monopoly power may be inferred from a firm's possession of a dominant share of a relevant market that is protected by entry barriers." (citations omitted)); *Oahu Gas, 838 F.2d at 367* ("A high market share, though it may ordinarily raise an inference of monopoly power . . . will not do so in a market with low entry barriers or other evidence of a defendant's inability to control prices or exclude competitors." (internal citation omitted)).

manner in which this case was litigated, Epic Games failed to produce evidence that this rate has had any impact on the output of mobile gaming transactions.

[*1031] ***HN30***[] "[S]upracompetitive pricing, on its own, is not direct evidence of monopoly power." *Safeway Inc.,761 F. Supp. 2d at 887 (N.D. Cal. 2011)* (*citing* *Forsyth v. Humana, Inc., 114 F.3d 1467, 1476 (9th Cir. 1997)* ("The plaintiffs submitted evidence that [defendant] routinely charged higher prices than other [competitors] while reaping high profits. With no accompanying showing of restricted output, however, the plaintiffs have failed to present direct evidence of market power [under *Section 2*]."), *overruled on other grounds by* *Lacey v. Maricopa County¸693 F.3d 896 (9th Cir. 2012)*; *see also* *Harrison Aire, Inc. v. Aerostar Int'l, Inc., 423 F.3d 374, 381 (3d Cir. 2005)*; *Geneva Pharmas. Tech. Corp. v. Barr Lab'ys Inc., 386 F.3d 485, 500 (2d Cir. 2004)*; *Blue Cross & Blue Shield United of Wisconsin v. Marshfield Clinic, 65 F.3d 1406, 1412 (7th Cir. 1995)*. Indeed, "[t]o prove monopoly power directly, supracompetitive pricing must be accompanied by restricted output." *Safeway Inc., 761 F. Supp. 2d at 887* (*citing* *Rebel Oil Co., 51 F.3d at 1434*). In other words, "[b]oth are required to prove monopoly power directly." *Id.*[595] Given the Court has found the record, at best, incomplete, the lack of evidence of decreased output for mobile gaming transactions and mobile game apps is fatal in demonstrating monopoly power using direct evidence.

With respect to indirect evidence, a more mixed result emerges. A share between 52 and 57 percent is not high enough to sustain a *prima facia* case of a monopoly, but is enough to permit the Court to evaluate the state and durability of the market. ***HN31***[] This evaluation includes whether (i) new rivals are barred from entering the market (*i.e.*, the degree of entry barriers) and (ii) whether existing competitors lack the capacity to expand their output to challenge the predator's high price. In general, entry barriers are "additional long-run costs that were not incurred by incumbent firms but must be incurred by new entrants" or "factors in the market that deter entry while permitting incumbent firms to earn monopoly returns." *L.A. Land Co., 6 F.3d at 1427-28*. Such barriers include "(1) "legal license requirements, (2) control of an essential or superior resource, (3) entrenched buyer preferences for established brands; (4) capital **[**243]** market evaluations imposing higher capital costs on new entrants; and, in some situations, (5) economies of scale." *Rebel Oil Co., 51 F.3d at 1439* (citing *L.A. Land Co., 6 F.3d at 1428 n.4*).

Here, the evidence is both undeveloped and mixed. Given that mobile gaming was not a proposed product market for either party, neither party has adequately presented evidence of these barriers or competitors' ability to challenge monopolistic actions. The Court nonetheless considers the limited evidence in record.

On the one hand, only a small number of platforms, and their attendant licenses on which to distribute mobile games, exist—namely iOS and Android. Moreover, economies of scale in the form of network effects favor these established digital gaming stores and platforms over new entrants. Finally, new entrants may face information barriers to entry, as users may not know that cheaper game distribution may be available on alternative platforms.[596] Although **[*1032]** these factors do not create "lock-in," they are evidence of some entry barriers for new companies providing mobile game transactions.

On the other hand, there are significant changes in both the wider gaming market *and* the mobile gaming market—both appear to be in flux. Indeed, the evidence reflects **[**244]** that the wider gaming market is both dynamic and evolving. Mobile gaming transactions do not appear to be immune to this dynamism. The introduction of the hybrid

---

[595] Indeed, as the *Safeway* court notes and explains in a footnote:

> Plaintiffs nevertheless continue to argue that evidence of restricted **[**242]** output is not required because raising prices necessarily depresses sales. This is incorrect. Take for example a market in which demand outstrips supply. In such a hypothetical market, a firm could raise prices—up to a certain point—without necessarily causing a commensurate reduction in sales.

Safeway Inc., 761 F. Supp. 2d at 887 n.3.

[596] *See* Ex. Expert 4 (Athey) ¶¶ 36-37, 45-46; Ex. Expert 1 (Evans) ¶ 118. Although, the Court notes that some platform owners require price parity among other platforms, such that prices are universal amongst each platform. *See supra* Facts §§ II.D.3-4.

platform the Nintendo Switch in 2017 provides some evidence that the barriers of entry are not so high as to deter competitors in related markets from entering the mobile gaming transactions market.[597] Moreover, Microsoft and Nvidia's efforts into mobile game streaming are further evidence that these entry barriers are not so substantial to prevent new market entrants.[598] Indeed, these competitors are moving into the same lucrative mobile gaming submarket without facing substantial market barriers to entry. In short, these competitors appear to be leveraging either existing intellectual property in the form of hardware and gaming content as well as existing established networks, including its own consumer and developer bases, to break into this market space. Given this recent movement by competitors, it is hard to characterize the entry barriers as oppressive or high on this record.

The evidence is further mixed on whether existing competitors, here Google, could increase output in the short run in order to erode Apple's **[**245]** market share. *See* Pacific Coast, 526 F.2d at 1204 (affirming jury's finding of monopoly power where defendant had a market share of 45 to 70% in the relevant years, and the remaining competitors "were relatively small, with no single competitor controlling over 18% [or] 12%" of the market). Beyond similar market share in this market, neither party explored mobile gaming and the record is inconclusive on Google's *actual* capabilities in disciplining and competing with Apple in this sphere.

In sum, given the totality of the record, and its underdeveloped state, while the Court can conclude that Apple exercises market power in the mobile gaming market, the Court cannot conclude that Apple's market power reaches the status of monopoly power in the mobile gaming market. That said, the evidence does suggest that Apple is near the precipice of substantial market power, or monopoly power, with its considerable market share. Apple is only saved by the fact that its share is not higher, that competitors from related submarkets are making inroads into the mobile gaming submarket, and, perhaps, because plaintiff did not focus on this topic.

[*1033] C. Section 1 of the Sherman Act: Apple's Unlawful Restraint of the iOS App Distribution Market (Count [246] 3) and Unlawful Restraint on the iOS In-App Payment Solutions Market (Count 5)**

Epic Games brings two counts under Section 1 of the Sherman Act for unlawful restraint of trade in the iOS app distribution aftermarket (Count 3) and in the iOS in-app payment solutions aftermarket (Count 5). The legal framework is the same for both.

1. *Legal Framework*

HN32[] Section 1 of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations." 15 U.S.C. § 1. Section 1 is understood "to outlaw only unreasonable restraints." Amex, 138 S. Ct. at 2283 (internal quotation marks and emphasis omitted); State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997); Standard Oil Co. of N.J. v. United States, 221 U.S. 1, 59-60, 31 S. Ct. 502, 55 L. Ed. 619 (1911). "To establish liability under § 1, a plaintiff must prove (1) the existence of an agreement, and (2) that the agreement was in unreasonable restraint of trade." Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1178 (9th Cir. 2016).

HN33[] Despite the broad language of the statute, ***antitrust law*** has developed to find that "[t]he essence of a Section 1 claim is concerted action." E.W. French & Sons v. Gen. Portland, 885 F.2d 1392, 1397 (9th Cir. 1989). "[E]xpress 'agreements'" are "direct evidence of 'concerted activity.'" Paladin Assocs., Inc. v. Montana Power Co., 328 F.3d 1145, 1153 (9th Cir. 2003); *see also* Sun Microsystems Inc. v. Hynix Semiconductor Inc., 608 F. Supp. 2d

[597] Although not in the record, the Court is further aware that Valve, a major player in the computer gaming market as the owner of the Steam platform, has also announced its own mobile and portable gaming platform. The Court does not rely on this fact in reaching its conclusions herein, but only mentions it to further support the Court's ultimate conclusion: that entries into the mobile gaming submarket appear to be possible and achievable from competitors in related gaming submarkets.

[598] Of course, game streaming is still relatively new and currently does not replicate freemium games, the primary driver of App Store revenue, because, with the exception of Nvidia's free access tier, such services generally require an up-front subscription payment. *See supra* Facts § II.D.3.d.

1166, 1192 (N.D. Cal. 2009) ("One way of proving concerted action is by express agreement."). A plaintiff "need not prove intent to control prices or destroy competition to demonstrate the element of an **[**247]** agreement among two or more entities." Paladin Assocs., 328 F.3d at 1153-54 (internal quotation marks and alterations omitted). "Unilateral conduct by a single firm, even if it appears to restrain trade unreasonably, is not unlawful under Section 1 of the Sherman Act." The Jeanery, Inc. v. James Jeans, Inc., 849 F.2d 1148, 1152 (9th Cir. 1988) (internal quotation marks omitted); *see also* Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984) ("Independent action is not proscribed."). Thus, in evaluating the first element, the Sherman Act distinguishes between concerted conduct and unilateral conduct and "treat[s] concerted behavior more strictly than unilateral behavior." Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984).

HN34[] With respect to the second element, some restraints are *per se* unreasonable. Where they are not, they are "judged under the 'rule of reason.'" Amex, 138 S. Ct. at 2284. "The rule of reason requires courts to conduct a fact-specific assessment of 'market power and market structure to assess the restraint's actual effect' on competition." *Id.* (quoting Copperweld Corp., 467 U.S. at 768) (alterations omitted). "Under this rule, the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." Leegin Creative Leather Prods., Inc. v. PSKS, Inc., 551 U.S. 877, 885-86, 127 S. Ct. 2705, 168 L. Ed. 2d 623 (2007) (internal quotation marks and citation omitted). "Appropriate factors to consider include specific information about the relevant business and the **[**248]** restraint's history, nature, and effect." *Id.* (internal quotation **[*1034]** marks and citation omitted). **HN35**[] "Whether the businesses involved have market power is a further, significant consideration." *Id.* (citation omitted). "In its design and function the rule distinguishes between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest." *Id.*

HN36[] As the Supreme Court recently explained:

> To determine whether a restraint violates the rule of reason, . . . a three-step, burden shifting framework applies. Under this framework, the plaintiff has the initial burden to prove that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market. If the plaintiff carries its burden, then the burden shifts to the defendant to show a procompetitive rationale for the restraint. If the defendant makes this showing, then the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means.

Amex, 138 S. Ct. at 2284 (citations omitted); *see also* Qualcomm, 969 F.3d at 989. The three steps "do not represent a rote checklist" and are not "an inflexible **[**249]** substitute for careful analysis." NCAA v. Alston ("NCAA"), 141 S. Ct. 2141, 2160, 210 L. Ed. 2d 314 (2021). Rather, their purpose is "to furnish 'an enquiry meet for the case, looking to the circumstances, details, and logic of a restraint.'" *Id.* (quoting Cal. Dental Ass'n v. FTC, 526 U.S. 756, 781, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)).

2. *Count 3: iOS App Distribution Market Analysis*

a. Existence of an Agreement

Count 3 alleges that Apple "require[s] iOS developers distribute their apps through the App Store." Compl. ¶ 210. Starting with the first element, Epic Games relies on the DPLA to demonstrate an agreement.[599] **HN37**[] As noted, express agreements provide "direct evidence" of concerted activity. Paladin Assocs., 328 F.3d at 1153. Apple argues, however, that the DPLA does not qualify because Apple unilaterally imposes it on developers. *See*

---

[599] In its Section 2 rule of reason analysis, Apple argues that technical design of iOS cannot form the basis of antitrust liability. Apple COL ¶ 249. In response, Epic Games appears to disclaim any challenge to Apple's code signing restrictions. Epic Games COL ¶ 143. The Court here considers only the DPLA restrictions on distribution.

Costco Wholesale Corp. v. Maleng, 522 F.3d 874, 898 (9th Cir. 2008) (no "meeting of the minds" from unilateral rules).[600]

As explained above, the Sherman Act distinguishes between unilateral and concerted activity. *Jeanery, 849 F.3d at 1152*. ***HN38***[] "Concerted activity subject to *§ 1* is judged more sternly than unilateral activity under *§ 2*" because it "deprives the marketplace of the independent centers of decisionmaking that competition assumes and demands." *Copperweld Corp., 467 U.S. [*1035] at 768-69*. It thus "warrant[s] scrutiny even in the absence of incipient monopoly." *Id.* Unilateral conduct, by contrast, may simply represent "robust competition." **[**250]** *Id. at 767-68*; *see Qualcomm, 969 F.3d at 1005* ("hypercompetitive behavior" is not illegal under antitrust laws). Thus, even unreasonable unilateral restraints are not subject to antitrust scrutiny unless "they pose a danger of monopolization." *Copperweld Corp., 467 U.S. at 768*.

HN39[] Given this distinction, a business may set conditions for dealing unilaterally and refuse to deal with anyone who does not meet those conditions. *See Monsanto, 465 U.S. at 761*. However, where the conduct extends beyond announcing a policy and refusing to deal with non-compliant partners to coercing an agreement, the conduct falls under *Section 1*. *See id. at 765*; *see also Dimidowich v. Bell & Howell, 803 F.2d 1473, 1478 (9th Cir. 1986)* (recognizing an exception to the "unilateral refusal to deal" rule where a party "imposes restraints on dealers or customers by coercive conduct and they involuntarily adhered to those restraints").

For example, in *Jeanery*, a jeans manufacturer had set suggested prices for retailers and made clear that those who set prices below the suggested price would be terminated or receive less favorable treatment. *849 F.2d at 1150*. A distributor undercut those prices and was promptly terminated. *Id. at 1151*. The Ninth Circuit found no *Section 1* violation based on insufficient evidence of an agreement. *Id. at 1155*. Specifically, the Ninth Circuit found no evidence that the manufacturer "coerced" the distributors **[**251]** into adherence or that the distributors "communicated acquiescence to such an agreement." *Id. at 1158-60* (reasoning that manufacturer did not nothing more than inform distributors of its policy). Conversely, such evidence was found in *Monsanto*, in which case an agricultural manufacturer threatened to withhold herbicide at a time of short supply and even complained to a distributor's parent company to force compliance, which the distributor expressly communicated in return. *465 U.S. at 764-65 & nn.9-10*.

Here, the DPLA is a unilateral contract which the parties agree that a developer must accept its provisions (including the challenged restrictions) to distribute games on iOS.[601] Thus, under antitrust jurisprudence, element one would not be satisfied. *See Toscano v. Prof. Golfers Ass'n, 258 F.3d 978 (9th Cir. 2001)* (because the sponsors "did not help create anticompetitive rules" but only "agreed to purchase products" under "conditions set by the other party," they were not liable for concerted conduct under *Section 1*). *Id.*

That said, the Court addresses here the potential conflicts with the goals of ***antitrust law*** given this narrow view. The jurisprudence assumes that unilateral conduct may simply be the result of robust competition. That may not always be the case. Ending the analysis on that basis **[**252]** alone does not allow for those assumptions to be tested, especially where, as here, the Court is faced with a highly concentrated market.

Nor is the jurisprudence particularly consistent with tying claims which are allowed under *Section 1*. For example, a tying claim involves a seller exploiting "its control over the tying product to force the buyer into the purchase of a

---

[600] In *Costco*, a retailer challenged Washington state's regulations of alcohol sales under antitrust laws. ***522 F.3d at 883***. Washington had required distributors to sell alcohol at a uniform price and to post those prices publicly, among other restrictions. *Id.* To evaluate the conduct, the Ninth Circuit distinguished "unilateral" restraints—which were not prohibited by the Sherman Act—from "hybrid" restraints, which involve concerted action and implicate *Section 1*. ***Id. at 886-87***. The court found that that the price restrictions were unilateral state conduct, but that the requirement to post and adhere to the prices was "hybrid" because private parties still retained discretion. ***Id. at 894, 899***. It then found that the posting requirement violates *Section 1*. ***Id. at 895***. *Costco* shows that even *government command* can create "concerted activity" under *Section 1*. Apple's conduct here is far less unilateral.

[601] PX-2619; PX-2621.

tied product." *Jefferson Parish, 466 U.S. at 12*. The buyer plays no role beyond purchasing the goods under conditions set by the seller. Similarly, an exclusive dealing **[*1036]** claim involves "agreement between a vendor and a buyer that prevents the buyer from purchasing a given good from any other vendor." *Aerotec, 836 F.3d at 1180*. Again, the buyer passively accepts conditions set by the vendor. More recently, *Amex* involved an anti-steering provision as a vertical restraint imposed by American Express on merchants. *138 S. Ct. at 2277*. The merchants accepted the provision as a condition of dealing with American Express without further involvement. *Id.*[602]

Thus, while the Court does not find the DPLA provides sufficient evidence of an agreement, it nonetheless continues the analysis to inform the issues relating to anticompetitive and incipient antitrust conduct, especially given **[**253]** the anti-steering provision therein.

b. Reasonableness of the Restraint

For the reasons stated, the Court turns to the second element using the rule of reason test. *Amex, 138 S. Ct. at 2284*; *see also* *Copperweld Corp., 467 U.S. at 768* (explaining that vertical agreements "hold the promise of increasing a firm's efficiency and enabling it to compete more effectively" and so "are judged under a rule of reason"). ***HN40***[] As the Court described in *Amex*:

> The rule of reason requires courts to conduct a fact-specific assessment of "market power and market structure . . . to assess the [restraint]'s actual effect" on competition. *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L.Ed.2d 628 (1984)*. The goal is to "distinguis[h] between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest." *Leegin Creative Leather Products, Inc. v. PSKS, Inc., 551 U.S. 877, 886, 127 S. Ct. 2705, 168 L.Ed.2d 623 (2007)*.

Amex, 138 S. Ct. at 2284. Recognizing that the rule of reason is not a "rote checklist," *NCAA, 141 S. Ct. at 2160*, the Court examines the app distribution restrictions and considers their anticompetitive effects, procompetitive rationales, and less restrictive alternatives. *Amex, 138 S. Ct. at 2284*.

i. Anticompetitive Effects

"To demonstrate anticompetitive effects on the two-sided [mobile gaming] market as a whole," plaintiff must prove that Apple's app distribution provisions increased the cost of mobile gaming **[**254]** transactions "above a competitive level, reduced the number of [mobile gaming] transactions, or otherwise stifled competition in the [mobile gaming] market." *See* *Amex, 138 S. Ct. at 2287*. Evidence of this nature is considered direct evidence. *Id. at 2284* (simplified). Indirect evidence is also admissible and would involve "proof of market power plus some evidence that the challenged restraint harms competition." *Amex, 138 S. Ct. at 2284*.

Here, the Court recognizes significant challenges in assessing the anticompetitive effects of the app distribution restrictions. The market in mobile game transactions has grown dramatically over recent years due to growth in gaming generally, smartphone ownership, and digital transactions as a whole. Apple's commission rate has remained static throughout even though Google, Apple's main competitor (and who also charges a 30% commission rate), does not have the same app distribution restrictions. These facts suggest **[*1037]** prices are artificially high given Apple's growing market power and growing demand. Evaluating competitive effects under these circumstances would require isolating the effects of a particular restriction. This is particularly difficult in light of the expansive market growth caused by innovation **[**255]** in the field. ***HN41***[] It is for these reasons that "novel business practices—*especially* in technology markets—should not be 'conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the

---

[602] *See* *Image Tech. Serv., Inc. v. Eastman Kodak Co., 903 F.2d 612, 619 (9th Cir. 1990)* ("*Image Tech Services I*") (rejecting the argument that party "acted unilaterally in tying parts to service" because otherwise, *Monsanto* "without discussing the courts' tying decisions, meant to overturn" tying arrangements); *Eastman Kodak, 504 U.S. at 463 n.8* (conditioning sales is not a "unilateral refusal to deal").

business excuse for their use.'" Qualcomm, 969 F.3d at 990-91 (emphasis in original) (quoting Microsoft Corp., 253 F.3d at 91).

Having carefully considering the evidence, the Court finds that Apple's app distribution restrictions do have *some* anticompetitive effects. The evidence here shows that, unlike the increased merchant fees in Amex, Apple's maintenance of its commission rate stems from market power, *not competition* in changing markets. As explained above, Apple set its 30% commission rate almost by accident when it first launched the App Store without considering operational costs, benefit to users, or value to developers, that is, both sides of the platform.[603] That commission has enabled Apple to collect extraordinary profits as Mr. Barnes credibly shows that the operating margins have exceeded 75% for years. Yet the 30% commission rate has barely budged in over a decade despite developer complaints and regulatory pressure. High commission rates certainly impact developers, and some evidence **[**256]** exists that it impacts consumers when those costs are passed on.[604]

With respect to indirect evidence, the Court discusses these effects in Facts § V.A.1., but summarizes them here. Apple holds considerable market share, 55 percent. Its restrictions harm competition by precluding developers, especially larger ones, from opening competing game stores on iOS and compete for other developers and users on price. Given this but-for-world, increased competition could result in a reduction of Apple's commissions charged to developers, who could then pass on savings to users.[605] Competing game stores could compete on features, including "search and discoverability," in-app payment processing, and security. This could improve the innovation in and perhaps quality of "matchmaking" to increase output.[606] Further, competing game **[*1038]** stores could provide specialized stores tailored to particular groups and otherwise innovate to meet user and developer needs.

Accordingly, Epic Games has put proffered both direct and indirect evidence of anticompetitive effects under Section 1.

ii. Procompetitive Justifications

In response, Apple offers three procompetitive justifications: security, intrabrand competition, **[**257]** and protecting intellectual property investment. ***HN42***[] A procompetitive rationale is a "nonpretextual claim that [defendant's] conduct is indeed a form of competition on the merits because it involves, for example, greater efficiency or enhanced consumer appeal." Qualcomm, 969 F.3d at 991. It is not enough that "conduct 'has the effect of reducing consumers' choices or increasing prices to consumers.'" *Id. at 990* (quoting Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1202 (9th Cir. 2012)). That is because these effects may arise for procompetitive reasons, such as increased interbrand competition. *See* Leegin, 551 U.S. at 891-93. ***HN43***[] In a two-sided transaction market, a court must consider procompetitive effects on both sides of the market. Amex, 138 S. Ct. at 2287.

---

[603] Thus, the facts here differ from Amex. There, American Express raised fees only after a "careful study" of "how much additional value its cardholders offer merchants." 138 S. Ct. at 2288. It used higher merchant fees "to offer its cardholders a more robust rewards program," which created loyalty and "encourage[d] the level of spending that makes Amex valuable to merchants." *Id.* No study or evaluation exists here.

[604] For this reason, the spectacular growth of free apps on the App Store is not dispositive. While Apple may have decided, over time, to use freemium games to subsidize the rest of the App Store, there is no evidence that the commission is calibrated to the costs or value of providing free games, as the merchant fees in Amex were calibrated to providing rewards.

[605] The record is bare as to who would ultimately benefit from a reduction in commissions. With the limited examples in the record, some developers, like Down Dog, pass on the entirety of the reduction in the commission to consumers, whereas Epic Games split the 30% commission by retaining 12% and remitting 18% to consumers. Thus, it is unclear the extent or degree to which developers would pass on any savings to consumers.

[606] Under Amex, services for each of the two sides of the platform are both "inputs" to the single product, which is transactions. 138 S. Ct. at 2286 n.8. Although Apple does not directly restrict game transaction output, it limits the supply of these inputs on iOS, which reduces quality and may reduce output.

Here, the Court finds Apple's security justification to be a valid and nonpretextual business reason for restricting app distribution. As previously discussed, *see supra* Facts § V.A.2., centralized app distribution enables Apple to conduct app review, which includes both technical and human components. Human review in particular helps protect security by preventing social engineering attacks, the main vector of malware distribution. Human review also helps protect against fraud, privacy intrusion, and objectionable content beyond levels achievable by purely technical measures. By **[**258]** providing these protections, Apple provides a safe and trusted user experience on iOS, which encourages both users and developers to transact freely and is mutually beneficial. As a result, Apple's conduct "enhance[s] consumer appeal." *See* *Qualcomm, 969 F.3d at 991*.

As a corollary of the security justification, the app distribution restrictions promote interbrand competition. ***HN44***[] The Supreme Court has recognized that limiting intrabrand competition can promote interbrand competition. *Leegin, 551 U.S. at 890*. For example, restricting price competition among retailers who sell a particular product can help the manufacturer of that product compete against other manufacturers. *Id. at 890-91*. It is this interbrand competition that "the antitrust laws are designed primarily to protect." *Id. at 895*. Here, centralized app distribution and the "walled garden" approach differentiates Apple from Google. That distinction ultimately increases consumer choice by allowing users who value open distribution to purchase Android devices, while those who value security and the protection of a "walled garden" to purchase iOS devices. This, too, is a legitimate procompetitive justification.

Epic Games does not persuasively rebut the security justification nor shows it to be pretextual. **[**259]** Instead, it focuses on the lack of app distribution restrictions (besides code signing) on Mac computers. *See supra* Facts §§ V.A.1.a, V.A.2.a.iv. However, Apple submits some evidence that Mac computers have more malware than iOS and, in any case, provides a compelling explanation for app review's increased effectiveness against certain types of attacks. Epic Games also questions the effectiveness of app review in practice. *See supra* Facts § V.A. That hardly provides a reason against app review. Epic Games' security expert agrees that "mayhem" would result if unfettered app distribution **[*1039]** were allowed.[607] Thus, plaintiff's proffer is really one of the "effectiveness" of Apple's security procedures, not the need for them. Whether the precise restrictions Apple has selected could be replicated through less restrictive means is more properly addressed in the next section. Given the trial record, the Court finds that Apple's security rationale is a valid business justification for the app distribution restrictions.[608]

As for the intellectual property justification, the specific commission rate is pretextual, as the Court previously found. As discussed in Facts § V.A.2.b, there is no evidence **[**260]** that Apple set or maintains its specific commission rate with any consideration of the value or cost of intellectual property in mind.[609] Indeed, the Supreme Court recently rejected a justification without "any direct connection" to the challenged restraint in *NCAA*. *141 S. Ct. at 2162*. There, a sport association argued that restrictions on student athlete compensation were necessary to preserve amateurism and related consumer demand. *Id. at 2152*. The Court rejected this justification based on the district court's findings that the association set those rules without any reference to considerations of consumer demand. *Id. at 2162-63* (quoting *In re NCAA Athletic Grant-in-Aid Antitrust Litig., 375 F. Supp. 3d 1058, 1070, 1075, 1100 (N.D. Cal. 2019)*).

Eastman Kodak is further instructive. There, the photocopier maker argued that companies providing repair services for its machines were "exploiting the investment Kodak has made in product development, manufacturing and equipment sales." *Eastman Kodak, 504 U.S. at 485*. The Supreme Court declined to accept this argument and find in Kodak's favor as a matter of law. *Id. at 486*. Ultimately, on remand, the Ninth Circuit affirmed a jury finding of

---

[607] Trial Tr. (Mickens) 2709:23-2710:2.

[608] Relatedly, Apple has a legitimate business justification in maintaining and improving the quality of its services, here, privacy and security. *See* *Cal. Computs. Prods., Inc. v. Int'l Bus. Machs. Corp., 613 F.2d 727, 744 (9th Cir. 1979)* ("IBM, assuming it was a monopolist, had the right to redesign its products to make them more attractive to buyers whether by reason of lower manufacturing cost and price or improved performance.").

[609] *See, e.g.*, PX-0880.021; Ex. Depo. 8 (Cue) 137:23-138:14, 140:10-141:7; Trial Tr. (Malackowski) 3692:18-21, 3693:13-17.

pretext. The evidence showed that "patents 'did not cross [Kodak's] mind at the time Kodak began its parts policy" and that Kodak did not distinguish patented and unpatented parts **[**261]** in its policy. *Image Tech. Servs. II, 125 F.3d at 1219-20*.

Like the defendants in those cases, Apple did not consider intellectual property in setting its specific commission rate, nor does it list any specific intellectual property in the DPLA. Thus, the justification with respect to the 30% commission rate is pretextual.

That said, while the Court has found the *rate itself* pretextual, the Court cannot conclude that Apple's protection of its intellectual property is pretextual. Courts have found similar justifications based on the protection of intellectual property rights valid, albeit rebuttable, procompetitive justifications. *See, e.g., Tech. Res. Servs., Inc. v. Dornier Med. Sys., Inc., 134 F.3d 1458, 1467 (11th Cir. 1998)* (jury could have credited defendant's "need to protect its trade secrets and proprietary information"). Indeed, as the Court has found, Apple is entitled to license its intellectual property for a fee, and to guard its intellectual property from uncompensated use by others. The restrictions on app distribution on the iOS platform accomplishes that aim, whereas Epic Games' proposed alternatives (discussed in more length below) **[*1040]** would weaken it. In short, Epic Games has failed to show that Apple's proffered intellectual property justification is pretextual as it relates to the restrictions **[**262]** on app distribution.

Accordingly, Apple has shown procompetitive justifications based on security and the corollary interbrand competition, as well as generally with respect to intellectual property rights.

iii. Less Restrictive Alternatives

Turning to the last step, the parties dispute whether these procompetitive justifications could be achieved through less restrictive means. ***HN45***[] Generally, "***antitrust law*** does not require businesses to use anything like the least restrictive means of achieving legitimate business purposes." *NCAA, 141 S. Ct. at 2161*. "To the contrary, courts should not second-guess degrees of reasonable necessity so that the lawfulness of conduct turns upon judgments of degrees of efficiency." *Id.* (simplified).[610]

HN46[] Thus, under the third step, an alternative must be "a significantly (not marginally) less restrictive means for achieving the same procompetitive benefits." *Id. at 2164*. It must be "virtually as effective in serving the procompetitive purposes" as current rules "without significantly increased cost." *In re NCAA Athletic Grant-in-Aid Cap Antitrust Litig., 958 F.3d 1239, 1260 (9th Cir. 2020)* (simplified), *aff'd 141 S. Ct. at 2161*. Where a restraint is "*patently and inexplicably* stricter than is necessary to accomplish" the proffered procompetitive objective, "an antitrust **[**263]** court can and should invalidate it and order it replaced with a viable [less restrictive alternative]." *Id.* (quoting *O'Bannon v. NCAA, 802 F.3d 1049, 1075 (9th Cir. 2015)* (emphasis in original)).

---

[610] The Court notes slightly differing language at the third step between *Section 1* ("plaintiff [must] demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means") and *Section 2* ("the plaintiff must demonstrate that the anticompetitive harm of the conduct outweighs the procompetitive benefit"). *See Qualcomm, 969 F.3d at 991*. Although the Ninth Circuit has recently stated that the rule of reason analysis under both sections is "essentially the same," *id.*, prior case law has explicitly recognized that "there is no least restrictive alternative requirement in the context of a *Section 2* claim." *Image Tech. Servs. I, 903 F.2d at 620*; *accord Apple iPod iTunes Antitrust Litig., No. 05-CV-0037-YGR, 2014 U.S. Dist. LEXIS 165254, 2014 WL 12719194, at *1 (N.D. Cal. Nov. 25, 2014)*; *Allied Orthopedic Appliances, Inc. v. Tyco Health Care Grp. L.P., Nos. 05-CV-6419-MRP-AJW, 2008 U.S. Dist. LEXIS 112002, 2008 WL 7346921, at *16 (C.D. Cal. July 9, 2008)*, *aff'd 592 F.3d 991 (9th Cir. 2010)*. This is, in part, because the Sherman Act "does not give judges *carte blanche* to insist that a monopolist alter its way of doing business whenever some other approach might yield greater competition." *See Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 415-16, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. Regardless, the Court notes this distinction as a potential difference between the two analyses especially where, as recognized, proving a violation of *Section 2* is more exacting than proving a violation of *Section 1*. To the extent appellate courts perceive a practical distinction, clarity is welcomed.

Here, Epic Games argues that the app distribution restrictions can be replaced with the enterprise model or the notarization model. As discussed above, *see supra* Facts § V.A.2.a.iv., Apple already implements both of these models on iOS and Mac, respectively. The enterprise model enables Apple to certify organizations, such as companies, to distribute apps to their own employees. This model could be extended to certify app stores. The notarization model allows Apple to sign apps to verify security while allowing them to be distributed as the developer wishes. Epic Games argues that these models could be implemented on iOS with minimal technical difficulty.

[*1041] However, missing from both the enterprise and notarization models is human app review which provides most of the protection against privacy violations, human fraud, and social engineering. These proposed alternatives would require Apple to either add human review to the notarization model or leave app review to third-party app stores. Apple executives suggested that the first option would not **[**264]** scale well.[611] Under the second option, Apple could in theory set minimum guidelines for app stores to provide a "floor" for privacy, security, and quality. However, security could increase or decrease depending on the quality and diligence of the store. Evidence shows that at least on Android, the experiment shows less security.

HN47[] In evaluating remedies, no court should "impose a duty that it cannot explain or adequately and reasonably supervise." *NCAA, 141 S. Ct. at 2163* (quoting *Verizon, 540 U.S. at 410*). Here, Epic Games has provided requests for its remedy which principally appear to eliminate app review.[612] The requests also leave unclear whether Apple can collect licensing royalties and, if so, how it would do so. At closing argument, Epic Games' counsel suggested that "Apple can charge" for its license, so long as it does not discriminate among developers.[613] However, it has sought to require Apple to give competing app stores access to the same "iOS functionality that the App Store has access to," which is more than the DPLA currently licenses.[614] Thus, the Court need not consider these possibilities because Epic Games has not sufficiently developed them.

In short, Epic Games has not met its burden to show that its proposed alternatives **[**265]** are "virtually as effective" as the current distribution model and can be implemented "without significantly increased cost." *In re NCAA Athletic Grant-in-Aid Cap Antitrust Litig., 958 F.3d at 1260* (quoting *O'Bannon, 802 F.3d at 1074*). Nor has it shown that the restraints are "patently and inexplicably stricter than is necessary." *Id.* (quoting *O'Bannon, 802 F.3d at 1074*). ***HN48***[] "[A]ntitrust courts must give wide berth to business judgments before finding liability." *NCAA, 141 S. Ct. at 2163*. Here, Apple's business choice of ensuring security and protecting its intellectual property rights through centralized app distribution is reasonable, and the Court declines to second-guess that judgment on an underdeveloped record. *See In re Citric Acid Litig., 191 F.3d 1090, 1101 (9th Cir. 1999)* ("Courts have recognized that firms must have broad discretion to make decisions based on their judgments of what is best for them . . . .").

Accordingly, the Court finds that Apple's app distribution restrictions do not violate *Section 1* of the Sherman Act.

3. *Count 5: iOS In-App Payment Solutions Market Analysis*

In Count 5, Epic Games avers that Apple has unreasonably restrained trade in the "iOS In-App Payment Processing **[*1042]** Market" by requiring developers to "use Apple's In-App Purchase for in-app purchases of in-

[611] Trial Tr. (Federighi) 3502:22-3503:15. Professor Mickens even suggested the courts should micro-manage policy decisions.

[612] *See, e.g.*, Dkt. No. 276-1 at 4 (requesting an injunction prohibiting Apple from enforcing its guidelines to "impede" or "disadvantage" app distribution outside of the App store). Although this request purports not to "prohibit Apple from taking steps to prevent the distribution of malware," it is not clear what constitutes "malware" and whether that distinction includes "broad" security (privacy, fraud, offline safety, etc.) or is limited to Dr. Mickens' definition of unauthorized access. Nor is it clear whether Apple can impose standards on other app stores.

[613] Trial Tr. (Closing Arguments) 4156:20.

[614] Dkt. No. 276-1 at 4.

app content to the exclusion of any alternative solution or third-party payment processor."[615] This claim fails for **[**266]** substantially the same reasons that Count 3 fails.

At step one, for the reasons stated, *supra* Facts § V.B.1. and Law § II.C.2.b.i., Epic Games has presented some direct and indirect evidence showing that Apple's IAP functionality has had anticompetitive effects.

At step two, for the reasons stated in both the Count 3 analysis as well as the Court's findings of facts with respect to IAP, *supra* Facts § V.B.2 and Law § II.C.2.b.ii, Apple has proffered more than three procompetitive justifications for the terms of the DPLA relating to IAP. One, IAP is the mechanism by which Apple can easily receive its commission and is further how Apple collects a royalty for the use of its intellectual property. Two, IAP provides consumers with a unitary safe and secure means to execute transactions on the iOS platform. Three, IAP offers consumers a centralized purchasing system, whereby consumes have a convenient way to both execute and track transactions on the iOS platform.

At step three, Epic Games has identified no suitable less restrictive alternative for Apple's use of IAP based on the current record. The only alternative that Epic Games proposes is that Apple be barred from restricting or deterring **[**267]** in any way "the use of in-app payment processors other than IAP."[616] This proposed alternative is deficient for several reasons:

First, and most significant, as discussed in the findings of facts, IAP is the method by which Apple collects its licensing fee from developers for the use of Apple's intellectual property. Even in the absence of IAP, Apple could still charge a commission on developers. It would simply be more difficult for Apple to collect that commission.[617]

Indeed, while the Court finds no basis for the specific rate chosen by Apple (*i.e.*, the 30% rate) based on the record, the Court still concludes that Apple is entitled to *some* compensation for use of its intellectual property. As established in the prior sections, *see supra* Facts §§ II.C., V.A.2.b., V.B.2.c., Apple is entitled to license its intellectual property for a fee, and to further guard against the uncompensated use of its intellectual property. The requirement of usage of IAP accomplishes this goal in the easiest and most direct manner, whereas Epic Games' only proposed alternative would severely undermine it. Indeed, to the extent Epic Games suggests that Apple receive nothing from in-app purchases made on its platform, **[**268]** [618] such a remedy is inconsistent with prevailing intellectual property law.

Second, if Apple could no longer require developers to use IAP for digital transactions, Apple's competitive advantage on security issues, in the broad sense, *see supra* Facts § V.B.2.a., would be undermined and ultimately could decrease consumer choice **[*1043]** in terms of smartphone devices and hardware.

Third, but to a lesser extent, the use of different payment solutions for each app may reduce the quality of the experience for some consumers by denying users the centralized option of managing a single account through IAP. This would harm both consumers and developers by weakening the quality of the App Store to those that value this centralized system. Thus, the Court concludes that Apple's restrictions as to its IAP and separate payment processors do not violate *Section 1* of the Sherman Act.

---

[615] Compl. ¶ 227.

[616] Epic Games COL ¶ 642.

[617] In such a hypothetical world, developers could potentially avoid the commission while benefitting from Apple's innovation and intellectual property free of charge. The Court presumes that in such circumstances that Apple may rely on imposing and utilizing a contractual right to audit developers annual accounting to ensure compliance with its commissions, among other methods. Of course, any alternatives to IAP (including the foregoing) would seemingly impose both increased monetary and time costs to both Apple and the developers.

[618] Epic Games COL ¶ 643.

D. *Section 2* of the Sherman Act: Apple's Monopoly Maintenance of the iOS App Distribution Market (Count 1) and iOS in-App Payment Solutions Market (Count 4)

Epic Games brings two claims under *Section 2* arguing monopoly maintenance: Count 1 is based on its theory of the iOS distribution market and Count 4 is based on the iOS in-app payment solutions market. **[**269]** The legal framework is the same for both.

1. *Legal Framework*

HN49[] *Section 2* of the Sherman Act prohibits persons from "monopoliz[ing], or attempt[ing] to monopolize, or combin[ing] or conspir[ing] with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations." *15 U.S.C. § 2*. A claim for unlawful monopolization under *Section 2* of the Sherman Act requires that a plaintiff show: "(a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal antitrust injury." *Qualcomm Inc., 969 F.3d at 989-90*.

HN50[] To recap: monopoly power is "the power to control prices or exclude competition." *Grinnell Corp., 384 U.S. at 571* (quotation marks omitted). "[A] firm is a monopolist if it can profitably raise prices substantially above the competitive level," *Microsoft Corp., 253 F.3d at 51*, "without inducing so rapid and great an expansion of output from competing firms as to make the supracompetitive price untenable," *Harrison Aire, Inc., 423 F.3d at 380* (internal quotation marks omitted).

HN51[] *Section 2* monopolization claims "must be judged on a market-by-market basis." *Syufy Enters., 903 F.2d at 672 n.22*; *see also* *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)* ("Without a definition of [the] market there is no way to measure [the defendant's] ability to lessen or destroy competition.").

2. *Count 1: iOS App Distribution Market Analysis* ***[**270]***

In Count 1, Epic Games claims that Apple has a monopoly in the "iOS App Distribution Market" and has unlawfully maintained the monopoly by prohibiting iOS app developers from distributing their apps through alternative channels.

In short, this claim fails for two significant reasons: (1) Epic Games fails to prove the first element, that Apple has monopoly power in the relevant product and geographic market; and (2) Epic Games alternatively fails to satisfy the rule of reason analysis under Section 1—an acknowledged less exacting test as compared to *Section 2*.

First, the Court has found that the relevant market is the global mobile gaming transactions. Epic Games did not argue that Apple had monopoly power in this market. Instead, Epic Games focused on its two-tiered aftermarket theory. The Court will not rehash the failed analysis here. Suffice it to say, neither parties' proposed markets ultimately persuaded the Court. Rather, Epic Games' proposed **[*1044]** market ignored greater market pressures, and Apple's proposed market was overbroad in its inclusion of similar products.

As demonstrated with respect to the relevant market, Apple does not have substantial market power equating to monopoly power. While **[**271]** considerable, Epic Games has failed to show that Apple's market power is durable and sustaining given the current state of the relevant market. For that reason, the Court finds that Epic Games failed to prove the first element of a *Section 2* claim: the possession of monopoly power in the relevant market.

Second, and alternatively, Epic Games' *Section 2* claims fail to satisfy the substantively similar rule of reason analysis for similar reasons as *Section 1*. Epic Games' Section 1 and *Section 2* claims are based on the same conduct and restrictions: namely, restrictions on both distribution of apps as well as the use of non-IAP payment processors. As the Court has found above, Epic Games has failed to persuade on this record that these ultimate restrictions are anticompetitive. ***HN52***[] Because "the three-part burden-shifting test under the rule of reason is essentially the same" under *Sections 1* and *2*, and "proving an antitrust violation under *§ 2* of the Sherman Act is more exacting than proving a *§ 1* violation," the analysis here applies to the monopolization claims if required and fails for the same reasons. *Qualcomm, 969 F.3d at 991-92*; *see also* *Williams, 999 F.2d at 448* ("[A] *§ 1* claim insufficient to withstand summary judgment cannot be used as the sole basis for a *§ 2* claim.").

In sum, Epic Games' **[**272]** monopolization claims fail because Epic Games has failed to demonstrate that (i) Apple possesses monopoly power in the relevant market and that (ii) the challenged restrictions are anticompetitive under the rule of reason.

3. *Count 4: iOS In-App Payment Solutions Market Analysis*

In Count 4, Epic Games claims that Apple has a monopoly in the "iOS In-App Payment Processing Market" and has unlawfully maintained the monopoly by requiring "iOS app developers that sell in-app content to exclusively use Apple's In-App Purchase." This claim fails for the same reasons as Count 2.

As with its *Section 2* monopolization claim for the distribution of apps (Count 2), Epic Games' *Section 2* claim fails at the outset because Apple does not have monopoly power in the relevant product market.

III. *SECTION 1* OF THE SHERMAN ACT: TYING CLAIM (COUNT 6)

Epic Games' Count 6 alleges a violation of *Section 1* of the Sherman Act based on the existence of a tie between app distribution, on the one hand, and IAP on the other.

A. Legal Standard

HN53[] Tying involves the linking of two separate products from two separate product markets. *Jefferson Parish, 466 U.S. at 21*. "[T]he essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over **[**273]** the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." *Id. at 12*.

HN54[] Tying arrangements may be evaluated under *Section 1* of the Sherman Act under either *per se* or rule of reason analysis. *See* *id. at 29*. The *per se* rule applies "only after considerable experience with certain business relationships," *Broad. Music, Inc. v. Columbia Broad. Sys., Inc., 441 U.S. 1, 9, 99 S. Ct. 1551, 60* ***[*1045]*** *L. Ed. 2d 1 (1979)* (citation omitted), shows that a restraint "always or almost always tend to restrict competition and decrease output," *Amex, 138 S. Ct. at 2283* (citation omitted).

HN55[] "For a tying claim to suffer per se condemnation, a plaintiff must prove: (1) that the defendant tied together the sale of two distinct products or services; (2) that the defendant possesses enough economic power in the tying product market to coerce its customers into purchasing the tied product; and (3) that the tying arrangement affects a not insubstantial volume of commerce in the tied product market." *Cascade Health Sols. v. PeaceHealth, 515 F.3d 883, 913 (9th Cir. 2008)*; *see also* *Jefferson Parish, 466 U.S. at 12-18*; *Eastman Kodak, 504 U.S. at 461-62*.

HN56[] The first element requires that the plaintiff must prove that the alleged tying product and the alleged tied product are "separate and distinct" products. *Rick-Mik Enters., Inc. v. Equilon Enters. LLC, 532 F.3d 963, 974 (9th Cir. 2008)*. Further, if tied, the tie, would link "two separate product markets." *Jefferson Parish, 466 U.S. at 21*; *see also* ***[**274]*** *Microsoft Corp., 253 F.3d at 85* ("[U]nless products are separate, one cannot be 'tied' to the other.").

HN57[] "[T]he answer to the question whether one or two products are involved turns not on the functional relation between them, but rather on the character of the demand for the two items." *Jefferson Parish, 466 U.S. at 19*; *see also* *Rick-Mik, 532 F.3d at 975*. There must be "sufficient demand for the purchase of [the tied product] separate from [the tying product] to identify a distinct product market in which it is efficient to offer [the tied product] separately from [the tying product]." *Jefferson Parish, 466 U.S. at 21-22*; *see also* *Rick-Mik, 532 F.3d at 975*.

HN58[] "[T]he 'purchaser demand' test of *Jefferson Parish* examine[s] direct and indirect evidence of consumer demand for the tied product separate from the tying product. Direct evidence addresses the question whether, when given a choice, consumers purchase the tied good from the tying good maker, or from other firms. Indirect evidence includes the behavior of firms without market power in the tying good market, presumably on the notion that (competitive) supply follows demand." *Rick-Mik, 532 F.3d at 975* (internal quotation marks and citations omitted); *see also id.* ("If competitive firms always bundle the tying and tied goods, then they are a single product.").

HN59[] With respect to the second element, a tie exists **[**275]** where "sale of the desired ('tying') product is conditioned on purchase of another ('tied') product." *Aerotec, 836 F.3d at 1178*. "[T]he essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." *Jefferson Parish, 466 U.S. at 12*. "A plaintiff must present evidence that the defendant went beyond persuasion and coerced or forced its customer to buy the tied product in order to obtain the tying product." *Paladin Assocs., 328 F.3d at 1159*.

HN60[] Finally, "the Supreme Court has condemned tying arrangements when the seller has the market power to force a purchaser to do something that he would not do in a competitive market." *Cascade Health Sols., 515 F.3d at 915*. "[I]n all cases involving a tying arrangement, the plaintiff must prove that the defendant has market power in the tying product." *Illinois Tool Works Inc., 547 U.S. at 46*; *Rick-Mik, 532 F.3d at 972*.

[*1046] B. Analysis

At the outset, the parties dispute whether the *per se* analysis or the rule of reason analysis should control the Court's analysis. The Court need not decide this dispute. ***HN61***[] Epic Games' claim fails under either framework because a tying claim cannot be sustained where the alleged good is not **[**276]** a "separate and distinct product." *Rick-Mik, 532 F.3d at 974*; *Microsoft Corp., 253 F.3d at 85* ("[U]nless products are separate, one cannot be 'tied' to the other."). Here, Epic Games argues that a tying claim exists because Apple is forcing distributors who use the iOS app distribution platform (the alleged tying product) to also use IAP (the alleged tied product). As discussed above, *supra* Facts § II.C., IAP is not a product. Two core factual issues lead to this conclusion: integration and consumer demand.

With respect to integration, the Court described in detail how IAP functions and the Court does not reiterate it here. Suffice it to say, IAP is not merely a payment processing system, as Epic Games suggests, but a comprehensive system to collect commission and manage in-app payments. This IAP system is not bought or sold but it is integrated into the iOS devices. ***HN62***[] "[I]ntegration [is] common" among technological products and services." *Microsoft Corp., 253 F.3d at 93*.

Rick-Mik supports this conclusion. There, the Ninth Circuit found that Equilon's (also known as Shell Oil Co.) requirement that franchisees process all credit and debit card transactions through Equilon's own system did not involve two separate products. *Rick-Mik, 532 F.3d at 967, 974*. Said differently, the purchase of an oil company's **[**277]** franchise (the tying product) and the requirement that it use Equilon's credit-card processing system (the tied product) were not two distinct products. *Id.* Rather, the Court found that franchises are "almost by definition" a bundle of related products and services. *Id. at 674*. The proper inquiry was whether the allegedly tied products were "integral components of the business method being franchised." *Id.*

Here, as there, IAP is but one component of the full suite of services offered by iOS and the App Store. Moreover, and as discussed above, the App Store is a two-sided transaction platform. *See Amex, 138 S. Ct. at 2286 n.8* (noting that "a two-sided platform" is one that "offers different products or services to two different groups who both depend on the platform to intermediate between them"). By definition, the platform has two sides: the developer on one side providing gaming apps and the consumer on the other, purchasing the apps. This is a single platform which cannot be broken into pieces to create artificially two products.[619] *See, e.g., Serv. & Training, Inc. v. Data Gen. Corp., 737 F. Supp. 334, 343 (D. Md. 1990)* (rejecting tying claim because alleged tied product was "one feature of [defendant's] integrated and unified product"); Areeda & Hovenkamp § 1741a ("a car with tires attached might **[**278]** be deemed a single product because a vehicle that can be driven is the essence of what the customer buys").

[*1047] Moreover, with respect to consumer demand, Epic Games presented no evidence showing that demand exists for IAP as a standalone product. As discussed above, *supra* Facts § II.C., Epic Games' argument mischaracterizes IAP and its functionality. Payment processing is simply an input into the larger bundle of services provided by the IAP system.[620] While there may be a market for payment processing, that fact is irrelevant as IAP is not just payment processing.[621]

In sum, whether analyzed as an integrated functionality or from the perspective of consumer demand, IAP is not a separate product from iOS app distribution. Thus, Epic Games' Count 6 fails to show the existence of an illegal tie under *Section 1*.

IV. CALIFORNIA'S *CARTWRIGHT ACT* (COUNTS 7, 8, AND 9)

Epic Games asserts three claims against Apple under the *Cartwright Act*: (i) Count 7 for unreasonable restraint of trade in the iOS app distribution market; (ii) Count 8 for unreasonable restraint of trade in the iOS in-app payment solutions market; and (iii) Count 9 for tying of app distribution and **[**279]** payment processing. Epic Games argues that its Cartwright Act claims are based on the same conduct as the analogous Sherman Act claims. Specifically, Count 7 is based on the same conduct as Count 3; Count 8 is based on the same conduct as Count 5; and Count 9 is based on the same conduct as Count 6. The basic legal framework is the same for all three claims.

A. Legal Framework

HN63[] The Cartwright Act makes "unlawful, against public policy and void" "every trust," which is defined as "a combination of capital, skill, or acts by two or more persons . . . [t]o create or carry out restrictions in trade or commerce." *Cal. Bus. & Prof. Code §§ 16720(a)*, *16726*. Interpretations of federal ***antitrust law*** are at most

---

[619] This conclusion is further bolstered by comparison to other platforms in the wider gaming market. *See Microsoft Corp., 253 F.3d at 88* (comparing the bundling to competitive firms); *cf. In re: Cox Enters., Inc., 871 F.3d 1093, 1109 (10th Cir. 2017)* (bundling in the premium cable industry found to be "simply more efficient than offering them separately"). As described above, the wider gaming industry routinely use walled gardens, including the PlayStation Store, the Nintendo eShop, and the Xbox Games Store. These game stores are vertically integrated with respect to distribution, content delivery, and payment functionalities. *See supra* Facts § II.D.3.c. The only exception is Epic Games Store. However, as noted, plaintiff's move occurred in the context of litigation planning. *Id.* § I.B.3.a.

[620] In fact, as noted, IAP does not itself even *process payments*—that function is performed by a third-party settlement provider like Chase Bank with which Apple contracts. And unlike the purported alternatives that Epic Games proposes (*e.g.*, PayPal), Apple has never tried to market the technology for use on other digital transaction platforms, and Epic Games does not contend otherwise.

[621] The Court also notes that in the but-for world where developers could use an alternative processor, Apple would still be contractually entitled to its commission on any purchase made within apps distributed on the App Store. Thus, so long as the alternative processor charged a non-zero commission or fee for its services, no economically rational developer would choose to use the alternative processor, because on each transaction, they would *still* have to pay Apple its commission, *and* they would have to pay the alternative processor a commission for its services. For the same reason, the fact that some developers like Facebook and Spotify have tried to avoid Apple's commission by bypassing IAP is not evidence that there is separate demand for IAP, only that developers would prefer not to pay Apple a commission. Epic Games' reliance on this evidence thus "conflates competition on the merits with Epic Games' goal of avoiding Apple's 30%." *Epic Games, Inc., 493 F. Supp. 3d at 843*.

instructive, not conclusive, when construing the Cartwright Act, given that the Cartwright Act was modeled not on federal antitrust statutes but instead on statutes enacted by California's sister states around the turn of the 20th century." *Aryeh v. Canon Bus. Sols., Inc., 55 Cal. 4th 1185, 1195, 151 Cal. Rptr. 3d 827, 292 P.3d 871 (2013)*. "The Ninth Circuit has recognized after *Aryeh* it 'is no longer the law in California' that the Cartwright Act is 'coextensive with the Sherman Act.'" *In re Lithium Ion Batteries Antitrust Litig., No. 13-MD-2420, 2014 U.S. Dist. LEXIS 141358, 2014 WL 4955377, at *10 (N.D. Cal. Oct. 2, 2014)* (quoting *Samsung **[*1048]** Elecs. Co. v. Panasonic Corp., 747 F.3d 1199, 1205 n.4 (9th Cir. 2014)*).

B. Analysis

Epic Games argues that, even if its claims under the Sherman Act fail, it is nevertheless entitled to relief on its **[**280]** Cartwright Act claims because the Cartwright Act is broader in range and deeper in reach than the Sherman Act.[622] Apple disagrees arguing that where, as here, Epic Games has not identified any specific and material differences between the Cartwright Act and the Sherman Act, plaintiff cannot prevail on a Cartwright Act where its claims fail under the Sherman Act.

The Court agrees with Apple. Epic Games has not cited any authority for the contrary position. Plaintiff's authorities contain conclusory statements about the broader "reach" of the Cartwright Act relative to the Sherman Act.[623] Because the context of these statements is inapposite, the statements do not support a finding that the Cartwright Act claims here can survive notwithstanding the failure of Sherman Act claims. *See, e.g., Cianci v. Superior Court, 40 Cal. 3d 903, 917-18, 221 Cal. Rptr. 575, 710 P.2d 375 (1985)* (holding that the "broad" scope of the Cartwright Act covers entities involved in anticompetitive conduct "in every type of business," including in the "medical profession," and noting, in dicta, that the reach of the Cartwright Act includes "threats to competition in their incipiency" similarly to *Section 7* of the Clayton Act, which prohibits mergers that may substantially lessen competition); *In re Capacitors Antitrust Litig., 106 F. Supp. 3d 1051, 1072 (N.D. Cal. 2015)* (declining to **[**281]** apply standard for federal antitrust standing in the context of claims brought under the Cartwright Act in light of the absence of a "definitive decision" by California courts that doing so would be permissible). Because Epic Games has not met its burden to show that it can prevail on its Cartwright Act claims despite the failure of its analogous Sherman Act claims, the Court finds and concludes that Epic Games' Cartwright Act claims fail for the same reasons as its analogous Sherman Act claims.

This conclusion is confirmed by a review of California authorities applying the Cartwright Act in the context of claims asserting an unreasonable restraint of trade, as in Counts 7 and 8, and tying, as in Count 9.

HN64[] As in the context of claims under *Section 1* of the Sherman Act, California courts employ the rule of reason to determine whether a restraint of trade that is not subject to *per se* treatment, such as the DPLA[624] , is unreasonable and, therefore, unlawful under the Cartwright Act. *See In re Cipro Cases I & II, 61 Cal. 4th 116, 146, 187 Cal. Rptr. 3d 632, 348 P.3d 845 (2015)* (holding that "antitrust illegality" under the Cartwright Act where a **[*1049]** "challenged agreement involves a restraint of trade" depends on the "traditional rule of reason" analysis because both "the Cartwright Act and **[**282]** Sherman Act carry forward the common law understanding that 'only

---

[622] *See* Epic Games COL ¶ 426.

[623] *See* Dkt. No. 276 at 84-85; Epic Games COL ¶ 426.

[624] Apple argues that Epic Games' Cartwright Act claims fail for lack of concerted action because the claims challenge "only unilateral conduct," and the Cartwright Act "does not impose liability for 'wrongful conduct on the part of a single entity.'" Apple COL ¶¶ 588-589. The Court disagrees with this interpretation of Epic Games' claims. While Counts 7 and 8, as Counts 3 and 5, are predicated on the theory that the DPLA is an agreement between Apple and Epic Games, it may include particular terms that would constitute unreasonable restraints of trade. *See Kolling v. Dow Jones & Co., 137 Cal. App. 3d 709, 719, 187 Cal. Rptr. 797 (1982)* ("If a 'single trader' pressures customers or dealers into adhering to" restraints of trade, then "an unlawful combination [under the Cartwright Act] is established, irrespective of any monopoly or conspiracy, and despite the recognized right of a producer to determine with whom it will deal" (citations omitted)).

unreasonable restraints of trade are prohibited'" (citation omitted)). The rule of reason inquiry in the context of the Cartwright Act, as in the federal context, looks to "whether the challenged conduct promotes or suppresses competition," based on "the facts peculiar to the business in which the restraint is applied, the nature of the restraint and its effects, and the history of the restraint and the reasons for its adoption." *Id.* (internal quotation marks and citation omitted).

Here, the Court has carefully considered the evidence in the record and has determined, based on the rule of reason, that the DPLA provisions at issue in Counts 3 (app distribution) and 5 (IAP) have procompetitive effects that offset their anticompetitive effects, and that Epic Games has not shown that these procompetitive effects can be achieved with other means that are less restrictive. These findings, which defeat Counts 3 and 5, also defeat Counts 7 and 8. As noted above, Epic Games has cited no authority that compels a different conclusion.

The result is similar with respect to Count 9. ***HN65***[] As is the case with a tying claim in violation **[**283]** of the Sherman Act, a tying claim under the Cartwright Act requires the existence of two separate products. *See Freeman v. San Diego Ass'n of Realtors, 77 Cal. App. 4th 171, 184, 91 Cal. Rptr. 2d 534 (1999)* ("The threshold element for a tying claim is the existence of separate products or services in separate markets. Absent separate products in separate markets, the alleged tying and tied products are in reality a single product." (internal citation omitted)).

Here, as discussed above, the Court has found and concluded Epic Games' tying claim under the Sherman Act (Count 6) fails because plaintiff has not shown that IAP is a separate product from iOS App Distribution. Because the tying claim under the Cartwright Act (Count 9) is based on the same conduct as Count 6, that claim fails for the same reason as Count 6. *See Freeman, 77 Cal. App. 4th at 184* (holding that a tying claim under the Cartwright Act fails in the absence of two separate products in separate markets). Again, Epic Games has cited no authority that warrants a different outcome.

V. *SECTION 2* OF THE SHERMAN ACT: APPLE'S DENIAL OF AN ESSENTIAL FACILITY IN THE IOS APP DISTRIBUTION MARKET (COUNT 2)

The legal elements of an essential facility claim under governing Ninth Circuit precedent are undisputed. ***HN66***[] To establish such a claim, a plaintiff must **[**284]** show that (i) the defendant is "a monopolist in control of an essential facility"; (ii) the plaintiff "is unable reasonably or practically to duplicate the facility"; (iii) the defendant "has refused to provide [the plaintiff] access to the facility"; and (iv) "it is feasible for [the defendant] to provide such access". *Aerotec, 836 F.3d at 1185*; *MetroNet Servs. Corp. v. Qwest Corp., 383 F.3d 1124, 1128-29 (9th Cir. 2004)*; *Alaska Airlines, Inc. v. United Airlines, Inc., 948 F.2d 536, 542-46 (9th Cir. 1991)*.

Epic Games has failed to prove this claim for myriad reasons, but most convincingly for two. First, for the reasons set forth above, Epic Games has failed to prove that Apple is an illegal monopolist in control of the iOS platform. This alone is sufficient to defeat the claim. Second, the claim would still fail because Epic Games failed to prove that the iOS platform is an essential facility. The best evidence of this **[*1050]** is Epic Games' own expert, Dr. Evans, who refused to endorse the argument that the iOS platform is an essential facility.[625] On this issue, he and Professor Schmalensee agree.[626]

---

[625] Not only did Dr. Evans confirm in his live testimony that he would not describe iOS or Android as utilities, Trial Tr. (Evans) 2381:21-2383:18, Dr. Evans twice declined to express any opinion related to an essential facilities claim. Trial Tr. (Evans) 1673:4-11, 2390:16-2391:2; *see also generally* Ex. Expert 1 (Evans) § II.

[626] As a corollary, given that the nature of the "facility" is one solely comprised of intellectual property, as opposed to a physical structure, the question arises whether this claim could ever be recognized under *Section 2* as a matter of law. Citing primarily district court cases, Apple argues it cannot be forced to license its intellectual property and to hold otherwise would chill innovation and investment. While the argument appears meritorious, the Court declines to rule on this issue as it was not fully vetted and is not necessary to the resolution of this claim.

The term "essential facility" is a term of art under the antitrust laws. ***HN67***[] Caselaw describes essential facilities as those that are not capable of being replicated by competitors and serve as a conduit for the distribution of another product. For example, sports **[**285]** stadiums facilitate the display of indoor sports, *see Fishman v. Estate of Wirtz, 807 F.2d 520, 532 (7th Cir. 1986)*, and railroad bridges permit continuation of rail service and delivery of freight, *see United States v. Terminal R.R. Ass'n, 224 U.S. 383, 392-94, 32 S. Ct. 507, 56 L. Ed. 810 (1912)*. While prior cases have focused only on physical infrastructures of a finite availability (such as a bridge or a power network), an "essential facility" can exist even in the absence of such traditional physical attributes. *See MCI Commc'ns Corp. v. Am. Tel. & Tel. Co., 708 F.2d 1081, 1148 (7th Cir. 1983)*.

HN68[] To constitute an essential facility, "access to the facility or resource must be truly 'essential' in the sense that competitors cannot simply duplicate it or find suitable alternatives, and that absent access, competitors' ability to compete will be substantially constricted." 1 William C. Holmes, Intellectual Property and ***Antitrust Law*** § 6:10 (2021)[627] ; *Paladin Assocs., 328 F.3d at 1162-63* (no viable claim under the "essential facilities" doctrine where customers were able to obtain gas from other pipelines and sources and noting that a facility is 'essential' only if control of the facility carries with it the power to eliminate competition in a downstream market").

Obviously, under its theory, given the proprietary nature of iOS, plaintiff could not replicate iOS. However, as defined by the Court, in terms of distribution of mobile apps, multiple **[**286]** avenues *do exist* to **[*1051]** distribute the content to the consumer. Distribution can occur through web apps, by web access, and through other games stores. This doctrine does not require distribution in the manner preferred by the competitor, here native apps. The availability of these other avenues of distribution, even if they are not the preferred or ideal methods, is dispositive of Epic Games' claim. ***HN69***[] The doctrine does not demand an ideal or preferred standard. Based on these reasons, the *Section 2* claim based on an essential facilities theory fails.

VI. CALIFORNIA'S UNFAIR COMPETITION LAW (COUNT 10)

Antitrust law does not end with the Sherman Act. ***HN70***[] "States have regulated against monopolies and unfair competition for longer than federal government, and federal law is intended only 'to supplement, not to displace, state antitrust remedies.'" *In re Cipro Cases I & II, 61 Cal. 4th at 160* (quoting *Cal. v. ARC Am. Corp., 490 U.S. 93, 102, 109 S. Ct. 1661, 104 L. Ed. 2d 86 (1989)*); *see also* Areeda & Hovenkamp §§ 216, 2401 (describing legislative history).

HN71[] California's Unfair Competition Law ("UCL") prohibits business practices that constitute "unfair competition," which is defined, in relevant part, as "any unlawful, unfair or fraudulent business act or practice." *Cal. Bus. & Prof. Code § 17200*. Each of these descriptions provides a separate "variety" of unfair **[**287]** competition. Thus, "a practice may be deemed unfair even if not specially proscribed by some other law" and even if not violating an antitrust statute. *See Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal. 4th 163, 180, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*.

---

[627] Citing circuit cases: *e.g., Pittsburg County Rural Water Dist. No. 7 v. City of McAlester, 358 F.3d 694, 721 (10th Cir. 2004)* (affirming dismissal of an essential facilities claim where the competitor admitted that it had a "suitable available alternative water supply"); *Midwest Gas Services, Inc. v. Indiana Gas Co., Inc., 317 F.3d 703, 713-14 (7th Cir. 2003)* (dismissing an essential facilities claim where a distributor of natural gas had other routes available even if more costly); *Paddock Publ'ns, Inc. v. Chicago Tribune Co., 103 F.3d 42, 44-46 (7th Cir. 1996)* ("Unlike *United States v. Terminal R.R. Ass'n, 224 U.S. 383, 32 S. Ct. 507, 56 L. Ed. 810 (1912)*, the granddaddy of these cases, in which the Court held that a bottleneck facility that could not feasibly be duplicated must be shared among rivals, this case does not involve a single facility that monopolizes one level of production and creates a potential to extend the monopoly to others. We have, instead, competition at each level of production; no one can 'take over' another level of production by withholding access from disfavored rivals."); *Twin Lab'ys, Inc. v. Weider Health & Fitness, 900 F.2d 566, 570 (2d Cir. 1990)* (defendant's resource was not "essential" where alternate resources existed); *Directory Sales Mgmt. Corp. v. Ohio Bell Tel. Co., 833 F.2d 606 (6th Cir. 1987)* (same).

HN72[] The UCL permits claims to be brought by any "person," which includes "natural persons, corporations, firms, partnerships, joint stock companies, associations and other organizations of persons." Cal. Bus. & Prof. Code §§ 17201, 17204. To bring a claim under the UCL, a plaintiff must "(1) establish a loss or deprivation of money or property sufficient to quantify as injury in fact, i.e., *economic injury*, and (2) show that the economic injury was the result of, i.e., *caused by*, the unfair business practice." Kwikset Corp. v. Superior Court, 51 Cal. 4th 310, 322, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011) (emphasis in original); *see also* Cal. Bus. & Prof. Code § 17204.

Epic Games challenges Apple's conduct under the "unlawful" and "unfair" provisions of the UCL. Apple disputes both claims and further argues that Epic Games lacks "customer" standing. The Court addresses standing and then each claim.

A. Standing

HN73[] The injury-in-fact requirement of the UCL incorporates standing under Article III of the United States Constitution. Kwikset, 51 Cal. 4th at 322-23. Accordingly, the injury in fact must be "concrete and particularized . . . and actual or imminent, not conjectural or hypothetical." Lujan v. Defenders of Wildlife, 504 U.S. 555, 560, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992) (simplified). In addition, the UCL requires an economic injury. Kwikset, 51 Cal. 4th at 323. For example, "[a] **[**288]** plaintiff may (1) surrender in a transaction more, or acquire in a transaction less, than he or she otherwise would have; (2) have a present or future property interest diminished; (3) be deprived of money or property to which he or she has a cognizable claim; or (4) be required to enter into a transaction, costing money or property, that would otherwise have been unnecessary." *Id.* Last, a plaintiff must **[*1052]** show "a causal connection" between the defendant's conduct and the alleged injury. Id. at 326 (internal quotation marks and citation omitted).

Here, Apple does not dispute Epic Games' standing as a potential competitor: Epic Games wanted to open a competing iOS game store and could not. Because Epic Games would earn revenues from a competing store, it has suffered an economic injury. However, Apple challenges Epic Games' standing as a consumer. For that interpretation, Epic Games argues that it is a business customer of Apple's App Store and has been economically injured because it could not distribute games directly to consumers at lower cost.

The precise meaning of "consumer" under the UCL is undefined. **HN74**[] Generally, the UCL makes a distinction between "consumer" and "competitor" suits. *See* Cel-Tech, 20 Cal. 4th at 187 & n.12; Barquis v. Merchs. Collection Assn., 7 Cal. 3d 94, 109-10, 101 Cal. Rptr. 745, 496 P.2d 817 (1972) **[**289]** ; Kasky v. Nike, Inc., 27 Cal. 4th 939, 949, 119 Cal. Rptr. 2d 296, 45 P.3d 243 (2002). There is no specific third category for non-competitor business.[628] Here, despite Apple's position, both parties' experts agree that developers like Epic Games jointly consume Apple's game transactions and distribution services together with iOS users.[629] Thus, although the question is close, the Court finds that Epic Games has standing to bring a UCL claim as a quasi-consumer, not merely as a competitor.

B. "Unlawful" Practices

HN75[] Under the "unlawful" prong of the UCL, Epic Games must show that Apple's conduct "can properly be called a business practice and that at the same time is forbidden by law." Korea Supply Co. v. Lockheed Martin

---

[628] The Court recognizes *Levitt v. Yelp! Inc.*, and finds it distinguishable. There, in terms of analyzing the UCL claim, the court found the competitor standard applied even though plaintiffs and *Yelp*! did not compete. There, "the crux of the business owners' complaint [was] that Yelp's conduct unfairly injures their economic interests [relative] to the benefit of other businesses who choose to advertise with Yelp." 765 F.3d 1123, 1136 (9th Cir. 2014). Here, Epic Games is not claiming that it is injured relative to other developers—developers are all subject to the same restrictions. This action, unlike *Levitt*, includes a view that Epic Games is a consumer of Apple's two-sided platform.

[629] Ex. Expert 8 (Schmalensee) ¶¶ 31-34, 42; Ex. Expert 1 (Evans) ¶¶ 14, 22-24.

Corp., 29 Cal. 4th 1134, 1143, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003) (internal quotation marks and citation omitted). "Virtually any law . . . can serve as a predicate for an action under *Business and Professions Code section 17200*." *Durell v. Sharp Healthcare, 183 Cal. App. 4th 1350, 1361, 108 Cal. Rptr. 3d 682 (2010)* (citation omitted).

Here, for the reasons stated above, Epic Games has not shown a violation of any other law. Accordingly, the claim under the "unlawful" standard fails.

C. "Unfair" Practices

HN76[] The "unfair" prong of the UCL may differ for consumer and competitor suits. As a competitor who claims to have suffered injury from Apple's unfair practices, Epic Games must show that Apple's conduct (1) "threatens an incipient violation of an ***antitrust law***," (2) "violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law," or (3) "otherwise significantly threatens or harms competition." *Cel-Tech, 20 Cal. 4th at 187*. These findings must be "tethered to some legislatively **[**290]** declared policy or proof of some actual or threatened impact on competition." *Id.* ***[*1053]*** *at 186-87*; *see also* *Hodsdon v. Mars, Inc., 891 F.3d 857, 866 (9th Cir. 2018)*.

As a quasi-consumer, on the other hand, Epic Games has several tests available for showing unfairness. Although some courts have continued to apply the "tethering" test stated above, others have applied a "balancing" test that requires the challenged business practice to be "immoral, unethical, oppressive, unscrupulous, or substantially injurious to consumers" based on the court's weighing of "the utility of the defendant's conduct against the gravity of the harm to the alleged victim."[630] *Drum v. San Fernando Valley Bar Ass'ndu pon, 182 Cal. App. 4th 247, 257, 106 Cal. Rptr. 3d 46 (2010)* (citations omitted). ***HN77***[] Stated otherwise, the balancing test "involves an examination of that practice's impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer." *Nationwide Biweekly Admin., Inc. v. Superior Court of Alameda Cty., 9 Cal. 5th 279, 303 n.10, 261 Cal. Rptr. 3d 713, 462 P.3d 461 (2020)* (internal quotation marks and citation omitted).

These tests "are not mutually exclusive." *Lozano v. AT&T Wireless Servs., Inc., 504 F.3d 718, 736 (9th Cir. 2007)*; *see also* *Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1169-70 (9th Cir. 2012)* (applying both tests). Accordingly, the Court considers both.

1. *Tethering Test*

HN78[] Under the "tethering" test, "California courts require a close nexus between the challenged act and the legislative policy." *Hodsdon, 891 F.3d at 866* (citation omitted). That is because "courts may not apply purely subjective notions of fairness" **[**291]** or "determine the wisdom of any economic policy," which "rests solely with the legislature." *Cel-Tech, 20 Cal. 4th at 184* (internal quotation marks and citation omitted). However, unfair practices under this test are not limited to violations of existing laws. *Id. at 180*. Instead, California courts distinguish between conduct made lawful (or for which relief is barred) by a statute and conduct not prohibited by any statute. *See* *id. at 183*. The latter may be actionable under the "unfair" prong. *Id.*

Here, Epic Games seeks relief for the same conduct that it challenged under the Sherman and Cartwright Acts. Apple argues that separate consideration under the UCL is inappropriate.[631] The Court disagrees. ***HN79***[] *Cel-*

---

[630] Still others have applied the "*FTC* test," which requires that "(1) the consumer injury must be substantial; (2) the injury must not be outweighed by any countervailing benefits to consumers or competition; and (3) it must be an injury that consumers themselves could not reasonably have avoided." *Drum, 182 Cal. App. 4th at 257* (internal quotation marks and citation omitted). The Court notes the Ninth Circuit has declined to apply the *FTC* test with respect to anti-consumer conduct "in the absence of a clear holding from the California Supreme Court . . . ." *Lozano, 504 F.3d at 736*. The Court does not apply it directly, only as parallel guidance for purposes of the anticompetitive conduct which the Ninth Circuit distinguished. *Id.*

[631] Apple cites *Chavez v. Whirlpool Corp., 93 Cal. App. 4th 363, 375, 113 Cal. Rptr. 2d 175 (2001)*, but that case does not counsel otherwise. *Chavez* expressly rejected the notion that "an 'unfair' business act or practice must violate an ***antitrust law*** to

Tech expressly recognizes that "incipient" violations of antitrust laws and violations of the "policy or spirit" of **[*1054]** those laws with "comparable" effects are prohibited. *20 Cal. 4th at 187*. Under Apple's interpretation, that standard would be rendered meaningless because any conduct that fails under the Sherman Act failed would also fail the UCL. ***HN80***[] The UCL, however, has "broad, sweeping language[] precisely to enable judicial tribunals to deal with the innumerable new schemes which the fertility of [one's] invention would contrive." *Id. at 181* (simplified). Thus, **[**292]** it warrants separate consideration apart from antitrust laws.

On the present record, however, Epic Games' claims based on the app distribution and in-app payment processing restrictions fail for the same reasons as stated for the Sherman Act. As explained, Epic Games has demonstrated real anticompetitive effects, but Apple has proffered mostly valid and non-pretextual procompetitive justifications. To a large extent that makes the conduct more than "not anticompetitive" but potentially beneficial to consumers. However, as the Court demonstrated, the procompetitive justifications were only tethered as to certain restrictions. With respect to *those* restrictions, under the *Cel-Tech* framework, Apple's conduct is protected. *20 Cal. 4th at 183*.

That does not, however, end the matter.[632] ***HN81***[] "A UCL action is equitable in nature." *Korea Supply Co., 29 Cal. 4th at 1144*. Courts have "broad discretion" to fashion equitable remedies to serve the needs of justice. *Zhang v. Superior Court, 57 Cal. 4th 364, 371, 159 Cal. Rptr. 3d 672, 304 P.3d 163 (2013)*; *see also* *Nationwide Biweekly Admin., 9 Cal. 5th at 300*. The statute reinforces that discretion by permitting courts to "make such orders or judgments . . . as may be necessary to prevent the use or employ by any person of any practice which constitutes unfair competition." *Cal. Bus. & Prof. Code § 17203*.

Epic Games did challenge and litigate the anti-steering provisions **[**293]** albeit the record was less fulsome. While its strategy of seeking broad sweeping relief failed, narrow remedies are not precluded.[633] As discussed at length, the evidence presented showed anticompetitive effects and excessive operating margins under any normative measure. The lack of competition has resulted in decrease information which also results in decreased innovation relative to the profits being made. The costs to developer are higher because competition is not driving the commission rate. As described, the commission rate driving the excessive margins has not been justified. Cross-reference to a historic gamble made over a decade ago is insufficient. Nor can Apple hide behind its self-created web of interlocking rules, regulations, and generic intellectual property claims; or the lack of transparency among various businesses to feign innocence.

Apple's own records reveal that two of the top three "most effective marketing activities to keep existing users coming back" in the United States, and therefore increasing revenues, are "push notifications" (no. 2) and "email outreach" (no. **[*1055]** 3).[634] Apple not only controls those avenues but acts anticompetitively by blocking developers from **[**294]** using them to Apple's own unrestrained gain. As explained before, Apple uses anti-steering provisions prohibiting apps from including "buttons, external links, or other calls to action that direct customers to purchasing mechanisms other than in-app purchase," and from "encourag[ing] users to use a purchasing method other than in-app purchase" either "within the app or through communications sent to points of contact obtained from account registrations within the app (like email or text)."[635] Thus, developers cannot

---

be actionable under the unfair competition law," but found that conduct cannot be unfair where it is "deemed reasonable and condoned under the antitrust laws." *Id.* As explained here, there is a difference between conduct "deemed reasonable" and conduct for which a violation has not been shown.

[632] The Court recognizes a contrary unpublished opinion in *LiveUniverse, Inc. v. MySpace, Inc., 304 F. App'x 554, 557 (9th Cir. 2008)* which summarily treated the UCL as rising and falling with the Sherman Act. The Court respectfully disagrees (on this record) for the reasons stated.

[633] The FTC Act, which California courts have used as guidance on the UCL, similarly permits remedies beyond the "specific violations alleged in the complaint" that were "litigated in the manner contemplated by the statute." *Sears, Roebuck & Co. v. FTC, 676 F.2d 385, 390-91 (9th Cir. 1982)*.

[634] DX-3922.057.

[635] PX-2790 §§ 3.1.1, 3.1.3.

communicate lower prices on other platforms either within iOS or to users obtained from the iOS platform. Apple's general policy also prevents developers from informing users of its 30% commission.[636]

These provisions can be severed without any impact on the integrity of the ecosystem and is tethered to legislative policy. ***HN82***[] As an initial matter, courts have long recognized that commercial speech, which includes price advertising, "performs an indispensable role in the allocation of resources in a free enterprise system." *Bates v. State Bar of Arizona, 433 U.S. 350, 364, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977)* (citation omitted). Restrictions on price information "serve to increase the difficulty of discovering the lowest cost seller . . . and [reduce] the incentive **[**295]** to price competitively[.]" *Id. at 377*. Thus, "where consumers have the benefit of price advertising, retail prices often are dramatically lower than they would be without advertising." *Id.* Antitrust scholars have recognized the same: "The less information a consumer has about relative price and quality, the easier it is for market participants to charge supracompetitive prices or provide inferior quality." Areeda & Hovenkamp § 2008c.

In the context of technology markets, the open flow of information becomes even more critical. As explained above, information costs may create "lock-in" for platforms as users lack information about the lifetime costs of an ecosystem. Users may also lack the ability to attribute costs to the platform versus the developer, which further prevents them from making informed choices.[637] In these circumstances, the ability of developers to provide cross-platform information is crucial. While Epic Games did not meet its burden to show actual lock-in on this record, the Supreme Court has recognized that such information costs may create the potential for anticompetitive exploitation of consumers. *Eastman Kodak, 504 U.S. at 473-75*.

Thus, although Epic Games has not proven a present antitrust violation, the **[**296]** anti-steering provisions "threaten[] an incipient violation of an ***antitrust law***" by preventing informed choice among users of the iOS platform. *Cel-Tech, 20 Cal. 4th at 187*; *cf. FTC v. Neovi, Inc., 604 F.3d 1150, 1158 (9th Cir. 2010)* (requiring that "consumers ha[ve] a free and informed choice" under the FTC test for unfairness).[638] Moreover, the anti-steering provisions violate the **[*1056]** "policy [and] spirit" of these laws because anti-steering has the effect of preventing substitution among platforms for transactions. *Id.*

Accordingly, the Court finds that the anti-steering provisions violate the UCL's unfair prong under the tethering test.

2. *Balancing Test*

HN83[] Under the balancing test, the Court must weigh "the utility of the defendant's conduct against the gravity of the harm to the alleged victim." *Drum, 182 Cal. App. 4th at 257*. Under this test the focus is on the injury to consumers. Here, the harm to users and developers who are also quasi-consumers, is considerable.[639] This trial has exposed numerous anticompetitive effects which need not be recounted in detail. The only justification Apple offers is an analogy: just like a store such as Nordstrom does not advertise prices at Macy's on its goods, Apple should not have to advertise prices on the web or on Android.[640] Apple also cites *Amex, 138 S. Ct. at 2280*, which also **[**297]** involved anti-steering,to justify its anti-steering provisions.

---

[636] PX-0257; Trial Tr. (Simon) 365:3-367:5; Ex. Depo. (Shoemaker) 144:10-23.

[637] Ex. Expert 1 (Evans) ¶ 118.

[638] *See Cel-Tech, 20 Cal. 4th at 185* (looking "for guidance to the jurisprudence arising under the 'parallel' *section 5* of the [FTC] Act" to determine "what is unfair" under the UCL); *see also People ex rel. Mosk v. Nat'l Res. Co. of Cal.*, 20 Cal. App. 2d 765, 773 (1962) ("[D]ecisions of the federal court [as to what constitutes "unfair" under the FTC Act] are more than ordinarily persuasive.").

[639] *E.g.*, Trial Tr. (Simon) 365:3-367:5; Trial Tr. (Evans) 1715:11-16.

[640] *See* Trial Tr. (Schiller) 2821:8-20 (explaining that the "key idea" of anti-steering outside the App Store is to prevent "targeting this individual user who really is being acquired from the App Store").

Both are distinguishable. In *Amex*, American Express prohibited merchants from dissuading customers from using Amex cards as a way of avoiding its merchant fees. *Id. at 2283*. It did so because merchants would often advertise Amex acceptance to attract users who used American Express's rewards program, but then would steer them towards cards with lower merchant fees, such as Visa or Mastercard. *Id. at 2289*. The Court found that this was not anticompetitive because there was strong evidence of procompetitive effects (as discussed above) and "[p]erhaps most importantly, antisteering provisions *do not prevent Visa, MasterCard, or Discover from competing against Amex* by offering lower merchant fees or promoting their broader merchant acceptance." *Id. at 2289-90* (emphasis supplied).

Here, the information base is distinctly different. In retail brick-and-mortar stores, consumers do not lack knowledge of options. Technology platforms differ. Apple created a new and innovative platform which was also a black box. It enforced silence to control information and actively impede users from obtaining the knowledge to obtain digital goods on other platforms. Thus, **[**298]** the closer analogy is not American Express' prohibiting steering towards Visa or Mastercard but a prohibition on letting users know that these options exist in the first place. Apple's market power and resultant ability to control how pricing works for digital transactions, and related access to digital products, distinguishes it from the challenged practices in *Amex*. The same would extend to the Nordstrom/Macy's analogy.[641] Apple has **[*1057]** not offered any justification for the actions other than to argue entitlement. Where its actions harm competition and result in supracompetitive pricing and profits, Apple is wrong. Accordingly, the harm from the anti-steering provisions outweighs its benefits, and the provision violates the UCL under the balancing test.

D. Remedies

HN84[] "[T]he primary form of relief available under the UCL to protect consumers from unfair business practices is an injunction." *In re Tobacco II Cases, 46 Cal. 4th 298, 319, 93 Cal. Rptr. 3d 559, 207 P.3d 20 (2009)*. A private party seeking injunctive relief under the UCL may request "public injunctive relief," *McGill v. Citibank, N.A., 2 Cal. 5th 945, 954, 216 Cal. Rptr. 3d 627, 393 P.3d 85 (2017)*, which is "relief that by and large benefits the general public and that benefits the plaintiff, if at all, only incidentally and/or as a member of the general public," *id. at 955* (simplified). "[F]ederal courts **[**299]** must apply equitable principles derived from federal common law to claims for equitable [relief] under California's Unfair Competition Law[.]" *Sonner v. Premier Nutrition Corp., 971 F.3d 834, 837 (9th Cir. 2020)*. This means that, "even if a state authorizes its courts to provide equitable relief when an adequate legal remedy exists, such relief may be unavailable in federal court because equitable remedies are subject to traditional equitable principles unaffected by state law." *Id. at 841* (citation omitted).

HN85[] Accordingly, under *Sonner*, a plaintiff seeking equitable relief under the UCL in federal court must demonstrate: "(1) that it has suffered an irreparable injury; (2) that remedies available at law, such as monetary damages, are inadequate to compensate for that injury; (3) that, considering the balance of hardships between the plaintiff and defendant, a remedy in equity is warranted; and (4) that the public interest would not be disserved by a permanent injunction." *eBay Inc. v. MercExchange, L.L.C., 547 U.S. 388, 391, 126 S. Ct. 1837, 164 L. Ed. 2d 641 (2006)*.

---

[641] Best Buy may not be the traditional "brick-and-mortar" analogy as the Court previously footnoted and Mr. Cook, ironically, referenced. According to news reports, in order for Best Buy to compete with the likes of Amazon, and not just be a place where consumers physically test product but buy them more cheaply elsewhere, the company pivoted. It appears Best Buy actually rents square footage to companies like Apple and Samsung for "branded space" where they sell their own products and provide Best Buy not only with a revenue stream but the foot traffic to compete on other products. *Compare* Trial Tr. (Cook) 3864:24-3865:3 *with* Justin Bariso, Amazon Almost Killed Best Buy. Then, Best Buy Did Something Completely Brilliant, Inc., June 24, 2021, https://www.inc.com/justin-bariso/amazon-almost-killed-best-buy-then-best-buy-did-something-completely-brilliant.htmlhttps://www.inc.com/justin-bariso/amazon-almost-killed-best-buy-then-best-buy-did-something-completely-brilliant.html. Thus, there is no need to put a sign inside Best Buy as Apple's store is already there.

Based on the reasoning discussed above, the Court finds the elements for equitable relief are satisfied. While Apple's conduct does not fall within the confines of traditional ***antitrust law***, the conduct falls within the purview of an incipient antitrust violation with particular anticompetitive **[**300]** practices which have not been justified. Apple contractually enforces silence, in the form of anti-steering provisions, and gains a competitive advantage. Moreover, it hides information for consumer choice which is not easily remedied with money damages. The injury has occurred and continues and can best be remedied by invalidating the offending provisions. In terms of balancing, Apple's business justifications focus on other parts of the Apple ecosystem and will not be significantly impacted by the increase of information to and choice for consumers. Rather, this limited measure balances the justification for maintaining a cohesive ecosystem with the public interest in uncloaking the veil hiding pricing information on mobile devices and bringing transparency to the marketplace.

While the Court has defined the relevant market for antitrust purposes as the market for mobile gaming transactions, UCL jurisprudence does not require that the Court import that market limitation. The Court cannot discern any principled reason for eliminating the anti-steering provisions to mobile gaming only. The lack of information **[*1058]** and transparency extends to all apps, not just gaming apps.

Apple argues that **[**301]** any equitable relief issued "under state law," presumably including under the UCL, must be "limited to California" to avoid a violation of the *Commerce Clause*. The only authority that Apple cites to support this proposition is *Healy v. Beer Inst., Inc., 491 U.S. 324, 336, 109 S. Ct. 2491, 105 L. Ed. 2d 275 (1989)*, which holds that "[t]he *Commerce Clause* precludes the application of a state statute to commerce that takes place wholly outside of the State's borders, whether or not the commerce has effects within the State."[642]

In *Healy*, an association of brewers and importers of beer sought declaratory judgment that a Connecticut statute was unconstitutional because it regulated out-of-state conduct in violation of the *Commerce Clause*. *Healy, 491 U.S. at 326*. The statute in question required out-of-state shippers of beer to affirm that their prices for beer sold to Connecticut wholesalers were no higher than prices at which those products were sold in bordering states. *Id. at 326-27*. The Supreme Court held that the Connecticut statute violated the *Commerce Clause* because the interaction of the Connecticut statute with beer-pricing statutes of bordering states had the "practical effect" of controlling prices "wholly outside" of Connecticut's borders. *Id. at 336-37*.

Healy is inapposite. Here, in contrast to *Healy*, there is no challenge to the constitutionality of the UCL. Rather **[**302]** than seeking to invalidate the UCL on the basis that it violates the *Commerce Clause*, Apple seeks to restrict the geographic scope of any injunction issued under the UCL to California based on the *Commerce Clause*. The proper scope of an injunction issued under state law is not an issue that was addressed in *Healy*. Further, even if *Healy* had any relevance to that issue, *Healy*'s holding that a state statute cannot be applied "to commerce that takes place wholly outside" of that state would nevertheless be inapposite. Here, neither the conduct at issue, nor its effects, are taking place "wholly outside" of California. Apple is headquartered in California; the DPLA is governed by California law; and the commerce affected by the conduct that the Court has found to be unfair takes place at least in part in California. Accordingly, Apple has not shown that *Healy* prevents the Court from enjoining conduct outside of California that undisputedly harms California and its residents. *See* *RLH Indus., Inc. v. SBC Commc'ns, Inc., 133 Cal. App. 4th 1277, 1291-93, 35 Cal. Rptr. 3d 469 (2005)* (holding that "the *commerce clause*, even as construed in *Healy*, does not necessarily prohibit state antitrust and unfair competition law from reaching out-of-state anticompetitive practices injuring state residents").

By the same token, Epic Games provides **[**303]** the Court with no authority that an injunction could issue globally based upon a violation of California's UCL.

Accordingly, a nationwide injunction shall issue enjoining Apple from prohibiting developers to include in their:

> Apps and their metadata buttons, external links, or other calls to action that direct customers to purchasing mechanisms, in addition to IAP.

Nor may Apple prohibit developers from:

---

[642] *See* Apple COL ¶¶ 739-740.

Communicating with customers through points of contact obtained voluntarily from customers through account registration within the app.

[*1059] VII. APPLE'S COUNTERCLAIMS

Apple asserts counterclaims against Epic Games that arise out of Epic Games' breach of the DPLA, including (1) breach of contract; (2) breach of the implied covenant of good faith and fair dealing; (3) unjust enrichment; (4) indemnification; and (5) declaratory judgment.[643] These counterclaims are based on Epic Games' covert implementation of the hotfix in *Fortnite* and its failure to pay Apple its commission on in-app purchases through *Fortnite*. Apple alleges that these acts breached the DPLA provisions requiring developers (i) not to "hide, misrepresent or obscure any features, content, services or functionality" in their apps[644] and **[**304]** not to "provide, unlock or enable additional features or functionality through distribution mechanisms other than the App Store"[645] ; and (ii) to pay Apple "a commission equal to thirty percent (30%) of all prices payable by each end-user" through the App Store.[646]

Plaintiff has admitted that it breached the DPLA in the manner that Apple alleges, and that Apple is entitled to relief on its counterclaim for breach of contract to the extent that the Court finds that the DPLA is enforceable. Epic Games does not admit liability as to any other counterclaim.[647]

Pointing to its affirmative defenses, Epic Games contends that all of Apple's counterclaims are barred notwithstanding its admitted breach of the DPLA because the DPLA provisions it breached are unenforceable (i) under the doctrine of illegality; (ii) because they are void as against public policy; and (iii) because they are unconscionable.[648]

The Court first considers whether any of the DPLA's provisions upon which Apple's counterclaims depend are unenforceable based on Epic Games' affirmative defenses, and if they are not, the Court next considers whether Apple has shown that it is entitled to relief on each **[**305]** of its counterclaims.

A. Epic Games' Affirmative Defenses

1. *Doctrine of Illegality*

HN86[] "[T]he general rule [is] that the courts will deny relief to either party who has entered into an illegal contract or bargain which is against public policy." *Tri-Q, Inc. v. Sta-Hi Corp., 63 Cal. 2d 199, 216, 45 Cal. Rptr. 878, 404 P.2d 486 (1965)*. "Where a contract has several distinct objects, of which one at least is lawful, and one at least is unlawful, in whole or in part, the contract is void as to the latter and valid as to the rest." *Cal. Civ. Code § 1599*. Thus, if the alleged "illegality is collateral to the main purpose of the contract, and the illegal provision can be extirpated from the contract by means of severance or restriction, then such severance and restriction are

[643] Apple asserted other counterclaims in its answer, Docket No. 66. Based on its proposed findings of fact and conclusions of law, the Court finds Apple has abandoned all counterclaims except those addressed herein. *See generally* Apple FOF and COL.

[644] Apple's Answer and Counterclaims ¶ 50 (citing DPLA § 6.1).

[645] *Id.* (citing DPLA §§ 3.2, 3.3.2, 3.3.3, 3.3.25).

[646] *Id.* (citing DPLA, Schedule 2, §§ 1.1(a), 3.4(a)).

[647] *See* Docket No. 474.

[648] Epic Games asserted other affirmative defenses in its answer, Docket No. 106. Based on its proposed findings of fact and conclusions of law, the Court finds Epic Games has abandoned all affirmative defenses except those addressed herein. *See generally* Epic Games FOFs.

appropriate." *Marathon Entm't, Inc. v. Blasi, 42 Cal. 4th 974, 996, 70 Cal. Rptr. 3d 727, 174 P.3d 741 (2008)* (quotation marks omitted). "The burden ordinarily rests upon the party asserting **[*1060]** the invalidity of the contract to show how and why it is unlawful." *Rock River Commc'ns, Inc. v. Universal Music Grp., Inc., 745 F.3d 343, 350 (9th Cir. 2014)* (citation omitted).

Epic Games alleges that Apple's counterclaims are barred because "the contracts on which Apple's counterclaims are based" are "illegal and unenforceable" on the basis that they violate the Sherman Act, the Cartwright Act, and the UCL.[649]

As discussed above, the Court has found and concluded that no provision of the DPLA at issue in this action is unlawful **[**306]** under the Sherman Act or the Cartwright Act and only one unrelated provision under the UCL.

While the Court has found that evidence suggests Apple's 30% rate of commission appears inflated, and is potentially anticompetitive, Epic Games did not challenge the rate. Rather, Epic Games challenged the imposition of any commission whatsoever. Nor did plaintiff show either that the provision of the DPLA which required developers not to "provide, unlock or enable additional features or functionality through distribution mechanisms other than the App Store," was illegal or unenforceable or that it was forced to violate the agreement to bring this lawsuit.[650] Accordingly, the Court finds and concludes that Apple's counterclaims are not barred on the basis that they arise out of an illegal and unenforceable contract.

2. *Void as Against Public Policy*

HN87[] "In general, a contract contrary to public policy will not be enforced." *Kelton v. Stravinski, 138 Cal. App. 4th 941, 949, 41 Cal. Rptr. 3d 877 (2006)*. A contract need not be contrary to a statute for it to be deemed contrary to public policy. *Altschul v. Sayble, 83 Cal. App. 3d 153, 162, 147 Cal. Rptr. 716 (1978)* ("There is no requirement that a contract violate an express mandate of a statute before it may be declared void as contrary to public policy."); *see also* *Cal. Civ. Code § 1667(2)* ("That is not lawful which **[**307]** is . . . contrary to the policy of express law, though not expressly prohibited.").

HN88[] "The authorities all agree that a contract is not void as against public policy unless it is injurious to the interests of the public as a whole or contravenes some established interest of society." *Rosenberg v. Raskin, 80 Cal. App. 2d 335, 338, 181 P.2d 897 (1947)*. "California has a settled public policy in favor of open competition." *Kelton, 138 Cal. App. 4th at 946*. It also has a public policy of protecting consumers of goods and services. *See* *Margolin v. Shemaria, 85 Cal. App. 4th 891, 901, 102 Cal. Rptr. 2d 502 (2000)* ("Both legislative enactments and administrative regulations can be utilized to further this state's public policy of protecting consumers in the marketplace of goods and services."). "Where a contract has several distinct objects, of which one at least is lawful, and one at least is unlawful, in whole or in part, the contract is void as to the latter and valid as to the rest." *Cal. Civ. Code § 1599*.

Plaintiff alleges that Apple's counterclaims are barred in whole or in part because the contracts on which they are based "are void as against public policy pursuant to the antitrust laws and unfair competition laws[.]"[651] Epic Games contends that the DPLA violates "the public policy in favor of competitive markets" **[*1061]** because it forecloses all alternative app stores and non-IAP payment **[**308]** solutions in the iOS app distribution market and iOS in-app payment solutions market, respectively; they facilitate the imposition of Apple's supracompetitive 30% commission; and they were forced upon Epic Games through Apple's exercise of its market power.[652]

[649] *See* Epic Games' Answer to Counterclaims at 17 (affirmative defenses 1 and 2).

[650] *Id.* (citing DPLA §§ 3.2, 3.3.2, 3.3.3, 3.3.25).

[651] *See* Epic Games' Answer to Counterclaims at 17 (affirmative defense 3).

[652] *See* Epic Games FOF ¶ 547.

The Court is not persuaded by Epic Games' broad-brush argument that it should not be bound by certain portions of the agreement. The DPLA provisions related to the breaching conduct arising from Project Liberty were not found to be invalid. For the reasons discussed at length above, the Court has found and concluded that these DPLA provisions are not contrary to the interests of the public as a whole and do not contravene some established interest of society, in the context of competition or otherwise. Accordingly, the remaining DPLA provisions are not unenforceable on the basis that they violate public policy. *Rosenberg, 80 Cal. App. 2d at 338* ("The authorities all agree that a contract is not void as against public policy unless it is injurious to the interests of the public as a whole or contravenes some established interest of society.").

Even though the Court has found the anti-steering provisions to be unfair under the UCL, the result was a measured alternative **[**309]** to plaintiff's overreach. These provisions can be severed while maintaining the provisions that require honesty to control the parties' relations and the coding of apps. Epic Games never adequately explained its rush to the courthouse or the actual need for clandestine tactics. The marketing campaign appears to have resulted in indirect benefits but it does not provide a legal defense.

In light of the foregoing, the Court finds and concludes that Apple's counterclaims are not barred based on Epic Games' public policy affirmative defense.

3. *Unconscionability*

a. Legal Framework

HN89[] "[A] contract or provision, even if consistent with the reasonable expectations of the parties, will be denied enforcement if, considered in its context, it is unduly oppressive or 'unconscionable.'" *Graham v. Scissor-Tail, Inc., 28 Cal. 3d 807, 820, 171 Cal. Rptr. 604, 623 P.2d 165 (1981)*. "Unconscionability has generally been recognized to include an absence of meaningful choice on the part of one of the parties together with contract terms which are unreasonably favorable to the other party. Phrased another way, unconscionability has both a 'procedural' and a 'substantive' element. . . . [B]oth the procedural and substantive elements must be met before a contract or term will be deemed unconscionable. **[**310]** Both, however, need not be present to the same degree. A sliding scale is applied so that the more substantively oppressive the contract term, the less evidence of procedural unconscionability is required to come to the conclusion that the term is unenforceable, and vice versa." *Lhotka v. Geographic Expeditions, 181 Cal. App. 4th 816, 821, 104 Cal. Rptr. 3d 844 (2010)* (internal quotation marks and citations omitted).

HN90[] "Unconscionability analysis begins with an inquiry into whether the contract is one of adhesion. The term contract of adhesion signifies a standardized contract, which, imposed and drafted by the party of superior bargaining strength, relegates to the subscribing party only the opportunity to adhere to the contract or reject it." *Armendariz v. Found. Health Psychcare Servs., Inc., 24 Cal. 4th 83, 113,* ***[*1062]*** *99 Cal. Rptr. 2d 745, 6 P.3d 669 (2000)* (quotation marks and alterations omitted). "The procedural element of the unconscionability analysis concerns the manner in which the contract was negotiated and the circumstances of the parties at that time. The element focuses on oppression or surprise. ***HN91***[] Oppression arises from an inequality of bargaining power that results in no real negotiation and an absence of meaningful choice. Surprise is defined as the extent to which the supposedly agreed-upon terms of the bargain are hidden in the prolix printed form drafted by the party seeking **[**311]** to enforce the disputed terms." *Gatton v. T-Mobile USA, Inc., 152 Cal. App. 4th 571, 581, 61 Cal. Rptr. 3d 344 (2007)* (internal quotation marks and citations omitted)).

HN92[] "The substantive element of the unconscionability analysis focuses on overly harsh or one-sided results," *Gatton, 152 Cal. App. 4th at 586*, or "whether a contractual provision reallocates risks in an objectively unreasonable or unexpected manner," *Lhotka, 181 Cal. App. 4th at 821*. Substantive unconscionability "traditionally involves contract terms that are so one-sided as to 'shock the conscience,' or that impose harsh or oppressive terms." *Wherry v. Award, Inc., 192 Cal. App. 4th 1242, 1248, 123 Cal. Rptr. 3d 1 (2011)*.

HN93[] In California, "where a single contract provision is invalid, but the balance of the contract is lawful, the invalid provision is severed, and the balance of the contract is enforced." *Kec v. Superior Court of Orange Cnty., 51 Cal. App. 5th 972, 974-75, 264 Cal. Rptr. 3d 761 (2020)*. For example, when a contract is held to be unconscionable, "the strong legislative and judicial preference is to sever the offending term and enforce the balance of the agreement." *Lange v. Monster Energy Co., 46 Cal. App. 5th 436, 453, 260 Cal. Rptr. 3d 35 (2020)* (quotation marks omitted); *see also* *Cal. Civ. Code § 1670.5* ("If the court as a matter of law finds the contract or any clause of the contract to have been unconscionable at the time it was made the court may refuse to enforce the contract, or it may enforce the remainder of the contract without the unconscionable clause, or it may so limit the application of any unconscionable clause **[**312]** as to avoid any unconscionable result.").

b. Analysis

Again, Epic Games alleges that Apple's counterclaims are barred because "the contracts on which Apple's counterclaims are based are unconscionable" on the basis that they are "are contrary to the antitrust laws and unfair competition laws[.]"[653] Epic Games contends that the DPLA provisions upon which Apple's counterclaims depend are (i) procedurally unconscionable because they are non-negotiable terms in contracts of adhesion, and (ii) are substantively unconscionable because "they foreclose all alternative app stores and non-IAP payment solutions in the iOS app distribution market and iOS in-app payment solutions market, respectively, and they facilitate the imposition of Apple's supra-competitive 30% commission."[654]

The Court finds and concludes that Epic Games has not shown that the DPLA is unconscionable. ***HN94***[] A contractual term is not unconscionable unless it is found to be *both* procedurally and substantively unconscionable. Here, the absence of substantive unconscionability is dispositive. ***HN95***[] A contractual term is not substantively unconscionable unless it so "one-sided so as to 'shock the conscience,'" *Wherry, 192 Cal. App. 4th at **[*1063]** 1248*. Based on the record before it, **[**313]** the Court cannot conclude that the DPLA meets that standard. Plaintiff's response that the unconscionability stems from the violations of antitrust and unfair competition laws fails.[655] Because the Court has found only one unrelated provision to violate the UCL, the Court cannot conclude that the remaining provisions are substantively unconscionable.

Epic Games points to no other evidence or authority based upon which the Court could find that the provisions at issue "shock the conscience." These are billion and trillion dollar companies with a business dispute. Epic Games itself uses adhesion contracts. Plaintiff points to no authority in which a court has held that contractual provisions similar to the ones at issue, despite their longevity and relative ubiquity, are unenforceable on the ground that they are unconscionable. The Court finds and concludes, therefore, that Apple's counterclaims are not barred on the basis that they arise out of contractual terms that are unconscionable.

The Court now turns to the question of whether Apple is entitled to relief with respect to any counterclaim that is based on breaches to DPLA provisions other than the one stricken.

B. Breach of Contract [**314]

HN96[] Under California law[656] , "the elements of a cause of action for breach of contract are (1) the existence of the contract, (2) plaintiffs performance or excuse for nonperformance, (3) defendant's breach, and (4) the resulting damages to the plaintiff." *Oasis W. Realty, LLC v. Goldman, 51 Cal. 4th 811, 821, 124 Cal. Rptr. 3d 256, 250 P.3d 1115 (2011)*. To prove causation, a plaintiff must show "the breach was a substantial factor in causing the damages." *US Ecology, Inc. v. California, 129 Cal. App. 4th 887, 909, 28 Cal. Rptr. 3d 894 (2005)*.

---

[653] *See* Epic Games' Answer to Counterclaims at 17-18.

[654] Epic Games FOF ¶ 192.

[655] *See* Epic Games FOF ¶¶ 191-192.

[656] The parties agree that the DPLA is governed by California law. *See* Dkt. No. 276 at 99; *see also* PX-2619 (DPLA) § 14.10 (providing that the DPLAis "governed by and construed in accordance with the laws of the United States and the State of California").

Apple asserts a counterclaim against Epic Games for breach of contract arising out Project Liberty. In particular, Epic Games' actions violated the DPLA provisions (1) requiring developers not to "hide, misrepresent or obscure any features, content, services or functionality" in their apps[657] and not to "provide, unlock or enable additional features or functionality through distribution mechanisms other than the App Store,"[658] ; and (2) requiring Epic Games to pay Apple "a commission equal to thirty percent (30%) of all prices payable by each end-user" through the App Store.[659]

As noted, plaintiff has admitted that it breached the DPLA as Apple alleges and has conceded that, if the Court finds that the breached provisions of the DPLA are enforceable against Epic Games, then Apple would be entitled to relief as a result of the **[**315]** breach.[660]

Because Apple's breach of contract claim is also premised on violations of DPLA provisions independent of the anti-steering provisions, the Court finds and concludes, in light of plaintiffs admissions and concessions, that Epic Games has breached these provisions of the DPLA and that **[*1064]** Apple is entitled to relief for these violation.

C. Breach of the Implied Covenant of Good Faith and Fair Dealing

HN97[] "The covenant of good faith and fair dealing, implied by law in every contract, exists merely to prevent one contracting party from unfairly frustrating the other party's right to receive the benefits of the agreement actually made." *Durell, 183 Cal. App. 4th at 1369* (emphasis and citation omitted). While "[a] breach of the implied covenant of good faith is a breach of the contract," "breach of a specific provision of the contract is not . . . necessary to a claim for breach of the implied covenant of good faith and fair dealing." *Thrifty Payless, Inc. v. The Americana at Brand, LLC, 218 Cal. App. 4th 1230, 1244, 160 Cal. Rptr. 3d 718 (2013)* (internal quotation marks and citation omitted).

HN98[] "In California, the factual elements necessary to establish a breach of the covenant of good faith and fair dealing are: (1) the parties entered into a contract; (2) the plaintiff fulfilled his obligations under the contract; (3) any conditions **[**316]** precedent to the defendant's performance occurred; (4) the defendant unfairly interfered with the plaintiff's rights to receive the benefits of the contract; and (5) the plaintiff was harmed by the defendant's conduct." *Rosenfeld v. JPMorgan Chase Bank, N.A., 732 F. Supp. 2d 952, 968 (N.D. Cal. 2010)* (citation omitted).

HN99[] "In essence, the covenant is implied as a supplement to the express contractual covenants, to prevent a contracting party from engaging in conduct which (while not technically transgressing the express covenants) frustrates the other party's rights to the benefits of the contract." *Love v. Fire Ins. Exch., 221 Cal. App. 3d 1136, 1153, 271 Cal. Rptr. 246 (1990)* (emphasis in original). It exists to "prevent one contracting party from unfairly frustrating the other party's right to receive the benefits of the agreement actually made. The covenant thus cannot be endowed with an existence independent of its contractual underpinnings. ***HN100***[] It cannot impose substantive duties or limits on the contracting parties beyond those incorporated in the specific terms of their agreement." *Durell, 183 Cal. App. 4th at 1369* (citations omitted) (emphasis in original). "If there exists a contractual relationship between the parties, . . . the implied covenant is limited to assuring compliance with the express terms of the contract, and cannot be extended to create obligations not **[**317]** contemplated in the contract." *Racine & Laramie, Ltd. v. Dep't of Parks & Recreation, 11 Cal. App. 4th 1026, 1032, 14 Cal. Rptr. 2d 335 (1992)*.

Apple asserts a counterclaim against Epic Games for breach of the implied covenant of good faith and fair dealing. Apple contends that "*[t]o the extent that any of Epic's bad faith actions did not breach the express terms of the*

---

[657] Dkt. No. 66 ¶ 50 (citing DPLA § 6.1).

[658] *Id.* (citing DPLA §§ 3.2, 3.3.2, 3.3.3, 3.3.25).

[659] *Id.* (citing DPLA, Schedule 2, §§ 1.1(a), 3.4(a)).

[660] *See* Stipulation, Dkt. No. 474.

[DPLA], Epic Games frustrated Apple's right to receive the benefits of the agreement actually made, including by publishing an update to *Fortnite* that circumvented payment of commissions to which Apple was contractually entitled, by violating the Guidelines, and by otherwise undermining Apple's operation and maintenance of the App Store."[661] Accordingly, Apple asserts this counterclaim in the alternative to its breach of contract claim.

Because the Court has found and concluded that Apple is entitled to relief on its breach-of-contract claim, the Court denies **[*1065]** relief to Apple as to its alternative claim for breach of the implied covenant of good faith and fair dealing.

D. Unjust Enrichment

HN101[] "[T]he elements for a claim of unjust enrichment" are "[1] receipt of a benefit and [2] unjust retention of the benefit at the expense of another." *Lectrodryer v. SeoulBank, 77 Cal. App. 4th 723, 726, 91 Cal. Rptr. 2d 881 (2000)*. "Under California law, unjust enrichment is an action in quasi-contract, and is not cognizable when **[**318]** there is a valid and enforceable contract between the parties." *Cont'l Cas. Co. v. Enodis Corp., 417 F. App'x 668, 670 (9th Cir. 2011)* (citation omitted). "The doctrine applies where plaintiffs, while having no enforceable contract, nonetheless have conferred a benefit on defendant which defendant has knowingly accepted under circumstances that make it inequitable for the defendant to retain the benefit without paying for its value." *Hernandez v. Lopez, 180 Cal. App. 4th 932, 938, 103 Cal. Rptr. 3d 376 (2009)*.

Apple asserts a counterclaim for unjust enrichment against plaintiff based on its alleged failure to pay Apple the agreed-upon 30% commission under the DPLA, but it asserts this counterclaim only "[i]n the alternative" to its claim for breach of contract. *See* Docket No. 66 ¶ 63.

Because the Court has found and concluded that Apple is entitled to relief on its claim for breach of contract, as discussed above, the Court denies relief to Apple as to its alternative claim for unjust enrichment.

E. Indemnification

HN102[] Under California law, "[a]n indemnity agreement is to be interpreted according to the language and contents of the contract as well as the intention of the parties as indicated by the contract." *Myers Bldg. Indus., Ltd. v. Interface Tech., Inc., 13 Cal. App. 4th 949, 968, 17 Cal. Rptr. 2d 242 (1993)*; *see also* *Herman Christensen & Sons, Inc. v. Paris Plastering Co., 61 Cal. App. 3d 237, 245, 132 Cal. Rptr. 86 (1976)* (where the parties "have expressly contracted with respect to the duty to indemnify, the extent of that duty must **[**319]** be determined from the contract and not by reliance on the independent doctrine of equitable indemnity" (quotation marks omitted)). Such agreements "are construed under the same rules that govern the interpretation of other contracts." *Alki Partners, LP v. DB Fund Servs., LLC, 4 Cal. App. 5th 574, 600, 209 Cal. Rptr. 3d 151 (2016)*.

Apple asserts a counterclaim against Epic Games for indemnification in the form of the recovery of its attorneys' fees and costs of defending this litigation and pursuing its counterclaims. This counterclaim is based on Section 10 of the DPLA, which provides:

> To the extent permitted by applicable law, You agree to indemnify and hold harmless, and upon Apple's request, defend, Apple, its directors, officers, employees, independent contractors and agents (each an "Apple Indemnified Party") from any and all claims, losses, liabilities, damages, taxes, expenses and costs, including without limitation, attorneys' fees and court costs . . . incurred by an Apple Indemnified Party and arising from or related to any of the following . . . : (i) Your breach of any certification, covenant, obligation, representation or warranty in this Agreement, including Schedule 2; . . . or (vi) Your use (including Your Authorized Developers' use) of the Apple Software or services, Your Licensed **[**320]** Application Information, Pass Information,

[661] Dkt. No. 66 ¶ 60 (emphasis supplied).

> metadata, Your Authorized Test Units, Your Registered Devices, Your Covered Products, or **[*1066]** Your development and distribution of any of the foregoing.[662]

Apple contends that it is entitled to indemnification from Epic Games under this indemnification provision because plaintiffs lawsuit involves claims arising from or related to its breaches of its certifications, covenants, obligations, representations, or warranties under the DPLA, and its use of the Apple Software or services, its licensed application information, its covered products, and its development and distribution of the foregoing.

Epic Games counters that Apple is not entitled to indemnification under Section 10 because that section applies only to claims brought by third parties against Apple and not "claims between Epic and Apple," and because the indemnification clause would be unconscionable to the extent that it is interpreted as covering intra-party disputes.[663]

The Court's interpretation of the indemnification provision is guided by the following principles:

> Generally, an indemnification provision allows one party to recover costs incurred defending actions by third parties, not attorney fees **[**321]** incurred in an action between the parties to the contract. ***HN103***[] Courts look to several indicators to distinguish third party indemnification provisions from provisions for the award of attorney fees incurred in litigation between the parties to the contract. The key indicator is an express reference to indemnification. *A clause that contains the words 'indemnify' and 'hold harmless' generally obligates the indemnitor to reimburse the indemnitee for any damages the indemnitee becomes obligated to pay third persons*—that is, it relates to third party claims, not attorney fees incurred in a breach of contract action between the parties to the indemnity agreement itself. Courts also examine the context in which the language appears. Generally, if the surrounding provisions describe third party liability, the clause will be construed as a standard third party indemnification provision. *The court will not infer that the parties intended an indemnification provision to cover attorney fees between the parties if the provision "'does not specifically provide for attorney's fees in an action on the contract*[.]"

Alki Partners, 4 Cal. App. 5th at 600-01 (internal citations omitted) (emphasis supplied).

Here, the indemnification provision at **[**322]** issue contains the words "indemnify" and "hold harmless," and the surrounding provisions describe third-party liability, which, under *Alki Partners*, suggests that any obligation by Epic Games to reimburse Apple would arise only in the context of third-party claims, and not claims between the two. Additionally, the provision does not specifically provide for attorneys' fees and costs in an action on the contract between the parties to the contract, which also weighs against interpreting the provision at issue as covering Apple's attorneys' fees and costs in this action.

Apple argues that the indemnification provision *does* contain language specifically providing "for attorneys' fees in an action on the contract" because the indemnification provision is "triggered" by Epic Games' breach of the DPLA.[664] The Court is not persuaded. ***HN104***[] For an indemnification provision to be interpreted as covering attorneys' fees and costs in an action on a contract *between the parties*, there must be language in the contract that **[*1067]** "reasonably can be interpreted as addressing the issue of an action *between the parties* on the contract." *Alki, 4 Cal. App. 5th at 601* (citation and internal quotation marks omitted) (emphasis supplied). For example, **[**323]** attorneys' fees and costs are recoverable in an action between the parties where the indemnity provision includes "*express language* for attorney's fees incurred *in enforcing [the] indemnity agreement*." *Id. at 602* (citations omitted) (emphasis supplied); *see also* *Baldwin Builders v. Coast Plastering Corp., 125 Cal. App. 4th 1339, 1342, 24 Cal. Rptr. 3d 9 (2005)* (holding that an indemnity provision authorized the recovery of attorneys' fees on an action on the contract between the parties because it included express language that "[s]ubcontractor shall pay all costs, including attorney's fees, *incurred in enforcing this indemnity agreement*'" (emphasis supplied)). No

---

[662] PX-2619 ¶ 10.

[663] Epic Games FOF ¶¶ 573, 578.

[664] Apple FOF ¶ 841.

such express language is included in the indemnification provision at issue. In light of the absence of such express language, and in light of the terms used in the indemnification provision that suggest that it covers only third-party claims, as discussed in more detail above, the Court finds and concludes that Apple has not shown that it is entitled to recover attorneys' fees and costs from Epic Games pursuant to Section 10 of the DPLA.

F. Declaratory Judgment

1. *Legal Framework*

"In a case of actual controversy within its jurisdiction . . . , any court of the United States, upon the filing of an appropriate pleading, may declare the rights and other legal **[**324]** relations of any interested party seeking such declaration, whether or not further relief is or could be sought. Any such declaration shall have the force and effect of a final judgment or decree and shall be reviewable as such." *28 U.S.C. § 2201(a)*.

HN105[] Courts have "substantial discretion in deciding whether to declare the rights of litigants" under the Declaratory Judgment Act. *MedImmune, Inc. v. Genentech, Inc., 549 U.S. 118, 136, 127 S. Ct. 764, 166 L. Ed. 2d 604 (2007)*. This "substantial" discretion permits the Court to consider "equitable, prudential, and policy arguments" for or against the declaratory relief sought. *Id.* A "district court should avoid needless determination of state law issues," "should discourage litigants from filing declaratory actions as a means of forum shopping," and "should avoid duplicative litigation." *Principal Life Ins. Co. v. Robinson, 394 F.3d 665, 672 (9th Cir. 2005)* (quotation marks omitted). Courts also consider "whether the declaratory action will settle all aspects of the controversy; whether the declaratory action will serve a useful purpose in clarifying the legal relations at issue; whether the declaratory action is being sought merely for the purposes of procedural fencing or to obtain a 'res judicata' advantage; or whether the use of a declaratory action will result in entanglement between the federal and state court systems." **[**325]** *Gov't Emps. Ins. Co. v. Dizol, 133 F.3d 1220, 1225 n.5 (9th Cir. 1998)*. Essentially, the district court must "balance concerns of judicial administration, comity, and fairness to the litigants." *Principal Life Ins. Co., 394 F.3d at 672* (quotation marks omitted).

2. *Analysis*

Apple seeks a declaratory judgment that: (a) the DPLA is valid, lawful, and enforceable contracts; (b) Apple's termination of the DPLA with Epic Games was valid, lawful, and enforceable; (c) Apple has the contractual right to terminate the DPLA with any or all of **[*1068]** Epic Games' wholly owned subsidiaries, affiliates, and/or other entities under its control; and (d) Apple has the contractual right to terminate the DPLA with any or all of the Epic Affiliates for any reason or no reason upon 30 days written notice, or effective immediately for any "misleading fraudulent, improper, unlawful or dishonest act relating to" the DPLA Docket No. 66 ¶ 88.

Epic Games contends that Apple is not entitled to the declaratory judgment it seeks on the basis that the challenged provisions of the DPLA are "unlawful" and that Apple's termination of the DPLA as to Epic Games was "unlawful" retaliation.[665] The parties have not litigated every aspect of the DPLA, and the Court has raised concerns about issues lacking a full evidentiary record. Thus, it **[**326]** is not inclined to make a broad pronouncement that the DPLA in its entirety is valid, lawful, and enforceable.

That said, with respect to the sections of the DPLA requiring developers not to "provide, unlock or enable additional features or functionality through distribution mechanisms other than the App Store," DPLA §§ 3.2, 3.3.2, 3.3.3, 3.3.25, those have not been found to be unlawful under federal and state ***antitrust law*** or the UCL.

This case does not involve retaliation. Epic Games never showed why it had to breach its agreements to challenge the conduct litigated. Two parallel antitrust actions prove the contrary. Apple had contractual rights to act as it did. It merely enforced those rights as plaintiff's own internal documents show Epic Games expected. Accordingly, plaintiff's challenges to Apple's claim for declaratory relief fail as to the remaining requests.

---

[665] Epic Games FOF ¶¶ 566-567.

G. Remedies

The relief to which Apple is entitled is that to which Epic Games stipulated in the event that the Court found it liable for breach of contract, namely:

(1) damages in an amount equal to (i) 30% of the $12,167,719 in revenue Epic Games collected from users in the *Fortnite* app on iOS through Epic Direct Payment between August and October **[**327]** 2020, plus (ii) 30% of any such revenue Epic Games collected from November 1, 2020 through the date of judgment; and

(2) a declaration that (i) Apple's termination of the DPLA and the related agreements between Epic Games and Apple was valid, lawful, and enforceable, and (ii) Apple has the contractual right to terminate its DPLA with any or all of Epic Games' wholly owned subsidiaries, affiliates, and/or other entities under Epic Games' control at any time and at Apple's sole discretion.[666]

CONCLUSION

This trial highlighted that "big tech" encompasses many markets, including as relevant here, the submarket for mobile gaming transactions. This lucrative, $100 billion, market has not been fully tapped and is ripe for economic exploitation. As a major player in the wider video gaming industry, Epic Games brought this lawsuit to challenge Apple's control over access to a considerable portion of this submarket for mobile gaming transactions. Ultimately, Epic Games overreached. As a consequence, the trial record was not as fulsome with respect to antitrust conduct in the relevant market as it could have been.

Thus, and in summary, the Court does not find that Apple is an antitrust monopolist **[**328]** in the submarket for mobile gaming transactions. However, it does find that Apple's conduct in enforcing anti-steering restrictions is anticompetitive. A remedy to eliminate those provisions is appropriate. **[*1069]** This measured remedy will increase competition, increase transparency, increase consumer choice and information while preserving Apple's iOS ecosystem which has procompetitive justifications. Moreover, it does not require the Court to micromanage business operations which courts are not well-suited to do as the Supreme Court has appropriately recognized.

A separate judgment shall issue based on the findings of fact and conclusions of law set forth above, the Court will enter a separate permanent injunction barring the noted restraints.

For the reasons set forth herein, the Court finds in favor of Apple on all counts except with respect to violation of California's Unfair Competition law (Count Ten) and only partially with respect to its claim for Declaratory Relief. The preliminary injunction previously ordered is terminated.

Each party shall bear its own costs. No party shall file any post-trial motions based on previously-made arguments.

IT IS SO ORDERED.

PART I

FINDINGS OF FACT

Mears v. Cal. W. Sch. of Law E-File

Superior Court of California, County of San Diego

September 10, 2021, Decided

37-2020-00023126-CU-BC-CTL

Reporter

2021 Cal. Super. LEXIS 56277 *

Mears V. California Western School of Law [E-FILE]

Core Terms

cause of action, conversion, in-person, promise, demurrer, leave to amend, unfair, Policies, tuition, unjust enrichment, contract claim, lectures, online, integration clause, final examination, catalogue, courts, amend

Counsel: **[*1]** Michael Baughman, counsel, present for Defendant(s) via remote video conference.

Cheryl Kenner, counsel, present via remote video appearance for Plaintiffs.

Kevin Crisp, counsel, present via remote video appearance for Defendant.

Judges: John S. Meyer.

Opinion by: John S. Meyer

Opinion

MINUTE ORDER

The Court hears oral argument and the tentative ruling as follows:

Defendant California Western School of Law's demurrer to the consolidated class action complaint is **SUSTAINED**. The demurrer is sustained with leave to amend as to the first (breach of contract) and fourth (unlawful competition) causes of action, and without leave to amend as to the second (unjust enrichment) and third (conversion) causes of action.

Defendant's unopposed request for judicial notice of the specific date classes began and ended is denied as not relevant to the issues presented. (See *People ex rel. Lockyer v. Shamrock Foods Co. (2000) 24 Cal.4th 415, 422, fn. 2*.) Defendant's unopposed request for judicial notice of its Student Financial Responsibility Agreement, Student Handbook, and Statement of Academic Policies (Exs. 1-5) is granted, in part. The Court takes judicial notice of the existence of these documents, but does not resolve conflicting interpretations of those documents. (See *Fremont Indemnity Co. v. Fremont General Corp. (2007) 148 Cal.App.4th 97, 112-118*.)

Breach of Contract (First Cause of **[*2]** Action)

Plaintiffs' breach of contract claim is premised on California Western closing campus and transitioning to online classes due to COVID. California Western's main argument is that Plaintiffs have not adequately alleged the existence of a contract to provide in-person instruction.

Although the relationship between a student and educational institution is contractual, courts have recognized that "contract law should not be strictly applied Universities are entitled to some leeway Mears VS California Western School of 37-2020-00023126-CU-BC-CTL

Law [E-FILE] in modifying their programs from time to time to exercise their educational responsibility properly." (*Kashmiri v. Regents of University of California (2007) 156 Cal.App.4th 809, 823-824*.) Courts have therefore "been reluctant to apply contract law to general promises or expectations. Courts have, however, not been hesitant to apply contract law when the educational institution makes a specific promise to provide an educational service, such as a failure to offer any classes or a failure to deliver a promised number of hours of instruction." (*Id. at p. 826*.) A dispute that "would not require an inquiry into the nuances of educational processes and theories, but rather an objective assessment of the [school's] performance **[*3]** of its promise," is not an impermissible educational malpractice claim. (*Id. at pp. 826-827*.)

"[S]ince a formal contract is rarely prepared between the student and the institution of higher learning, the general nature and terms of the agreement are usually implied, with specific terms to be found in the university bulletin and other publications; custom and usages can also become specific terms by implication." (*Kashmiri, supra, 156 Cal.App.4th at p. 828*.) "Cases involving contractual obligations of colleges based on language in catalogues or handbooks focus on what is reasonable. The reasonableness of the student's expectation is measured by the definiteness, specificity, or explicit nature of the representation at issue." (*Id. at p. 832*.) The existence of an implied agreement "is generally a question of fact." (*Id. at p. 829*.)

Both parties rely heavily on a variety of non-binding federal district court opinions from across the country in similar cases against educational institutions that closed campus due to COVID. Some courts have granted motions to dismiss claims alleging a breach of contract to provide in-person instruction, while others have denied them. Given the varying outcomes, the different pleading standard in federal court, and the fact specific nature **[*4]** of the opinions, they are of limited value. The Court also disregards both parties' improper citations to various superior court orders. The Court instead takes guidance from a prior California Court of Appeal opinion addressing a pleading challenge to a student's breach of contract claim against a university. (*Zumbrun v. University of Southern California (1972) 25 Cal.App.3d 1*.)

In *Zumbrun*, a 63-year-old student enrolled at USC intending to complete his education in Gerontology and Sociology. (*Id.* at p. 6.) He paid tuition and began attending his classes, including a required Sociology 200 course. (*Ibid*.) The student alleged that USC "represented, agreed, promised, and warranted to [him] that said Sociology 200 course would be a full and complete course with a final examination, that said class would be conducted on Tuesdays and Thursdays at 11:00 a.m. until 12:50 p.m. beginning February 3, 1970 and ending with a final examination on or before June 2, 1970, and that [USC] would exercise good faith and judgment concerning said course." (*Id.* at p. 7.) The professor refused to teach the last month of a class due to a faculty strike and simply issued the student a "B" instead of conducting a final examination. (*Ibid*.) The trial court sustained a demurrer without **[*5]** leave to amend, but the court of appeal reversed holding:

"The allegations heretofore summarized spell out a contract obligating defendant USC to give the course 'Sociology 200' consisting of a given number of lectures and a final examination in consideration of the tuition and fees for the course paid by plaintiff. The stated number of lectures and the normal type of final examination were not given. The reason for this deviation from the announced schedule is alleged to have been a faculty strike protesting the United States foreign policy in Cambodia. It is obvious that plaintiff did not receive all that she bargained for when she enrolled in 'Sociology 200.'"

(*Id.* at pp. 10-11.) The court recognized "a minimal departure from a projected course of study does not entitle the student (or his parent who paid for it) to recover the tuition paid to any part of it," but Mears VS California Western School of 37-2020-00023126-CU-BC-CTL

Law [E-FILE] concluded that whether the partial failure "justifie[d] refund of a portion of the tuition and fee allocable to the course is a matter of proof, under the present state of the pleadings, at trial in an appropriate forum." (*Id.* at p. 11.)

Here, Plaintiffs **[*6]** allege that they "registered and paid for in-person law classes for the Spring 2020 term based on Defendants' representations made in a course catalogue." (CAC, ¶ 25.) Plaintiffs also allege that by "the act of matriculation, together with payment of required fees, a contract between Plaintiffs and Class members, on the one hand, and Defendants, on the other hand, was created." (CAC, ¶ 54.) These allegations do not allege a specific promise to provide in-person instruction. As phrased, Plaintiffs allegedly decided to enroll at California Western based on its course catalogue, with a general expectation that courses would be in-person. Plaintiffs do not allege that the course catalogues themselves promised in-person instruction. As in *Zumbrun*, Plaintiffs must at least allege the nature of the representations in the course catalogue or other publications forming the basis of their contract claim.

However, Plaintiffs' opposition demonstrates a reasonable possibility that they can amend the complaint to state a viable claim. For example, Plaintiffs identify provisions in California Western's "Statement of Academic Policies" imposing an "in residence" requirement (§ 1.01.3), a limit on credits **[*7]** for "non-classroom activities" (§ 1.02), and various references to a "classroom." These provisions arguably indicate a promise to provide in-person instruction. Plaintiffs also note that California Western actually offers an online LL.M. program. (See § 14.01-14.03.) It is arguably reasonable for students to interpret a traditional J.D. program that has historically been taught on campus, offered alongside a separate "online" program, as a specific promise to provide in-person instruction.

California Western disputes that the referenced statements in the Statement of Academic Policies constitute promises to provide in-person instruction. For example, it contends that the "in residence" requirement does not mean "on campus," but rather at California Western instead of a different school. However, other portions of the policies appear to equate the term "residence" with physical presence. (See § 14.02 ["The program includes a one-week period of residency in San Diego at the beginning of the program, three trimesters of online study, and a one-week capstone period of residency in San Diego at the end of the program"].) California Western's competing interpretations of the Statement of Academic Policies are **[*8]** not a basis to deny leave to amend. (See *Fremont Indemnity, supra, 148 Cal.App.4th at p. 115*.)

California Western also argues that the preface to the Statement of Academic Policies states they are "subject to change at any time by the faculty and/or Academic Affairs Committee," at which point revised copies would be made "available in the Vice Dean's office and on the school's website." The reservation, standing alone, does not necessarily foreclose a contract claim. (See *Asmus v. Pacific Bell (2000) 23 Cal.4th 1, 15-16*.) Whether the written policies were so amended is beyond the four corners of the complaint. There is also a reasonable possibility that other publications or California Western's website included similar statements without indicating they were subject to change.

Finally, California Western relies on an integration clause in the Plaintiffs'"Student Financial Responsibility Agreement" that states: "This agreement supersedes all prior understandings, representations, negotiations, and correspondence between the student and [California Western], constitutes the entire agreement between the parties with respect to the matters described, and shall not be modified or affected by any course of dealing or course of performance." (CAC, ¶ 29.) Plaintiffs note the integration **[*9]** clause is limited to "the matters described," i.e., students' financial responsibility and their right to a refund upon withdrawal. The Student Financial Responsibility Agreement does not address Mears VS California Western School of 37-2020-00023126-CU-BC-CTL

Law [E-FILE]

the manner in which courses would be taught or the consequences for California Western's failure to provide promised instruction. As such, California Western's interpretation of the integration clause as foreclosing the existence of a separate implied contract for in-person instruction is debatable. (See e.g., *Jenks v. DLA Piper Rudnick Gray Cary US LLP (2015) 243 Cal.App.4th 1, 15-20*.) The existence of the integration clause is not dispositive of whether Plaintiffs will be able to amend. (See *Kanno v. Marwit Capital Partners II, L.P. (2017) 18 Cal.App.5th 987, 1007-1010* [the presence of an integration clause "is not controlling" and the court must look at facts "beyond the four corners of the agreement" in resolving the issue].)

The Court expresses no opinion on the ultimate merits of California Western's arguments. The court only concludes that Plaintiffs should be given a chance to amend. For the reasons set forth above, the demurrer to the first cause of action for breach of contract is sustained with leave to amend.

Unjust Enrichment (Second Cause of Action)

"Although **[*10]** some California courts have suggested the existence of a separate cause of action for unjust enrichment, [the Fourth District Court of Appeal, Division One] has recently held that there is no cause of action in California for unjust enrichment." (*Levine v. Blue Shield of California (2010) 189 Cal.App.4th 1117, 1138*.) Other districts have likewise affirmed orders sustaining demurrers to causes of action labeled "unjust enrichment" without leave to amend. (E.g., *Everett v. Mountains Recreation & Conservation Authority (2015) 239 Cal.App.4th 541, 553*.)

This Court follows *Levine*. Accordingly, the demurrer to the second cause of action for unjust enrichment is sustained without leave to amend.

Conversion (Third Cause of Action)

The "law has been careful to distinguish proper claims for the conversion of money from other types of monetary claims more appropriately dealt with under other theories of recovery. Thus, although our law has dispensed with the old requirement that each coin or bill be earmarked, it remains the case that money cannot be the subject of an action for conversion unless a specific sum capable of identification is involved. Where the money or fund is not identified as a specific thing the action is to be considered as one upon contract or for debt-or perhaps upon some other appropriate theory-but not for conversion." (*Voris v. Lampert (2019) 7 Cal.5th 1141, 1151*.)

"Equally **[*11]** important, the 'specific thing' at issue must be a thing to which the plaintiff has a right of ownership or possession-a right with which the defendant has interfered by virtue of its own disposition of the property. This means that a cause of action for conversion of money can be stated only where a defendant interferes with the plaintiff's possessory interest in a specific, identifiable sum; the simple failure to pay money owed does not constitute conversion. Were it otherwise, the tort of conversion would swallow the significant category of contract claims that are based on the failure to satisfy mere contractual rights of payment [T]o put the matter simply, a plaintiff has no claim for conversion merely because the defendant has a bank account and owes the plaintiff money." (*Id. at pp. 1151-1152*; see *McKell v. Washington Mutual, Inc. (2006) 142 Cal.App.4th 1457, 1492* ["Plaintiffs cite no authority for the proposition that a cause of action for conversion may be based on an overcharge"].)

Plaintiffs' theory is that they are entitled to recover a portion of the tuition they paid because California Western failed to provide in-person instruction as agreed. They do not identify any specific sum of money that the law school allegedly converted. In their opposition, Plaintiffs **[*12]** posit that they can calculate a per-lecture rate by dividing tuition by the total number of lectures, which can then be multiplied by the number of lectures each student took online to identify the specific sum converted. However, this assumes that all in-person lectures had the same value and all online lectures had no value. It is, at best, an estimated measure of the damages that Plaintiffs hope to recover under their breach of contract claim. More fundamentally, Plaintiffs do not allege that California Western interfered with their possessory interest in any such money. At its core, Plaintiffs' attempt to seek a prorated refund of their tuition under these circumstances is simply not a claim for conversion.

Accordingly, the demurrer to the third cause of action for conversion is sustained. As Plaintiffs have not demonstrated a reasonable possibility that they can amend to state a viable claim, the demurrer is sustained without leave to amend.

Unlawful Competition (Fourth Cause of Action)

Unlawful competition includes an "unlawful, unfair or fraudulent business act or practice." (*Bus. & Prof. Code, § 17200*.) The statute is written in the disjunctive and therefore conduct need only meet one of the three criteria **[*13]** to be considered unfair competition. (See *Graham v. Bank of America, N.A. (2014) 226 Cal.App.4th 594, 610*.) UCL claims must "state with reasonable particularity the facts supporting the statutory elements of the violation." (*Khoury v. Maly's of California, Inc. (1993) 14 Cal.App.4th 612, 619*.)

Plaintiffs do not adequately allege a claim under the unlawful prong because they do not identify any particular law that California Western allegedly violated. (CAC 82-96; *Graham, supra, 226 Cal.App.4th at p. 610*.) Nor do Plaintiffs adequately allege a claim under the fraud prong because they have not alleged facts in support of that theory with reasonable particularity (CAC 88, 96; *Khoury, supra, 14 Cal.App.4th at p. 619*.)

Plaintiffs appear to primarily base this claim on the unfair prong, but their allegations under this theory are also insufficient. (CAC 84-86.) There is a split of authority as to the proper definition of "unfair" in actions brought by consumers rather than competitors. Citing one line of cases, Plaintiffs allege that California Western's conduct was unfair because it either "offends an established public policy" or is "immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." (CAC ¶ 84.) However, the Fourth District Court of Appeal, Division One has consistently rejected that definition and has applied a much narrower test, the so-called "Cel-Tech test" **[*14]** for establishing unfairness. (*Graham, supra, 226 Cal.App.4th at p. 613*.) Under that test, a plaintiff must prove that the "defendant's conduct is tethered to an underlying constitutional, statutory or regulatory provision, or that it threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of an ***antitrust law***." (*Ibid*.) Plaintiffs have failed to allege an unfair business act or practice under this definition, which controls in this case.

Accordingly, the demurrer to the fourth cause of action for unfair competition is sustained. The Court will grant leave to amend to allege a claim in accordance with the standards set forth in *Khoury* and *Graham*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(b)(6) permits dismissal of a lawsuit where the defendant establishes the plaintiff's failure to state a claim upon which relief can be granted. Consideration of a Rule 12(b)(6) motion is confined to the pleadings. But courts may also look to exhibits attached to the complaint, public records, items appearing in the record of the case and exhibits attached to defendant's motion to dismiss without altering this standard. In evaluating the motion, courts must construe the complaint, accept all well-pled factual allegations as true and determine whether the plaintiff undoubtedly can prove no set of facts consistent with their allegations that would entitle them to relief.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

Though the Fed. R. Civ. P. 12(b)(6) standard is liberal, it requires a plaintiff to provide more than labels and conclusions, and a formulaic recitation of the elements of a cause of action in support of her grounds for entitlement to relief. Under Ashcroft v. Iqbal, the plaintiff must also plead factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. A plaintiff falls short if she pleads facts merely consistent with a defendant's liability or if the alleged facts do not permit the court to infer more than the mere possibility of misconduct.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN3[] **Remedies, Damages**

In the context of an antitrust suit, antitrust standing and Article III standing are not one and the same, and the court must reject claims under Fed. R. Civ. P. 12(b)(6) when antitrust standing is missing. An antitrust plaintiff must do more than make allegations of consequential harm resulting from a violation of the antitrust laws. Even though a complaint may allege that the defendant had an intent to harm the plaintiff, district courts must still consider other relevant factors—the nature of the claimant's injury, the tenuous and speculative character of the relationship between the alleged antitrust violation and the claimant's alleged injury, the potential for duplicative recovery or complex apportionment of damages, and the existence of more direct victims of the alleged conspiracy—weigh heavily against judicial enforcement.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN4[] **Standing, Requirements**

In short, antitrust standing is a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement, courts must dismiss it as a matter of law. Antitrust standing ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN5[] **Standing, Requirements**

Article III standing and antitrust standing are not one and the same. District courts are required to dismiss claims under Fed. R. Civ. P. 12(b)(6) when a plaintiff fails to satisfy antitrust standing. As the Sixth Circuit explained: Antitrust standing to sue is at the center of all ***antitrust law*** and policy. It is not a mere technicality. The requirement of antitrust standing ensures that antitrust litigants use the laws to prevent anticompetitive action and makes certain that they will not be able to recover under the antitrust laws when the action challenged would tend to promote competition in the economic sense. The antitrust standing requirement makes certain that the laws are used only to deal with the economic problems whose solutions these policies were intended to effect.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN6[] Standing, Requirements

Antitrust standing is a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement, the court must dismiss it as a matter of law—lest the antitrust laws become a treble-damages sword rather than the shield against competition-destroying conduct that Congress meant them to be.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN7[] Standing, Requirements

District courts assessing an antitrust claim for standing consider the following five-factor inquiry: (1) the causal connection between the antitrust violation and harm to the plaintiff and whether that harm was intended to be caused; (2) the nature of the plaintiff's alleged injury including the status of the plaintiff as consumer or competitor in the relevant market; (3) the directness or indirectness of the injury, and the related inquiry of whether the damages are speculative; (4) the potential for duplicative recovery or complex apportionment of damages; and (5) the existence of more direct victims of the alleged antitrust violation.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN8[] Scope, Monopolization Offenses

Congress enacted the Sherman Act as a way of protecting consumers against prices that were too high, not too low. This is achieved, for instance, by prohibiting firms from pricing below incremental cost, otherwise known as predatory pricing. That is because predatory pricing harms competitors, cannot be maintained, and is unlikely to provide consumer benefits.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN9[] Standing, Requirements

The First Circuit has rejected the argument that a dominant insurer commits an antitrust injury when it uses its market power to bargain for low prices. That is because in the particular circumstances of the health insurance market, the roles insurers play on behalf of patients are like those of a buyer. And, ***antitrust law*** rarely stops the buyer of a service from trying to determine the price or characteristic of the product that will be sold.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN10[] Attempts to Monopolize, Elements

In the Sixth Circuit, an antitrust plaintiff who challenges a competitor's pricing practices must do so under a theory of predatory pricing.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN11[] **Anticompetitive & Predatory Practices, Predatory Pricing**

When a private plaintiff complains about a defendant's prices, only predatory pricing has the requisite anticompetitive effect to establish antitrust injury.

Antitrust & Trade Law > Clayton Act > Scope

HN12[] **Antitrust & Trade Law, Clayton Act**

Monopsony is market power on the buy side of the market. The classical theory of monopsony envisions a market with only one buyer that uses its power to reduce the quantity purchased, thereby reducing the price that the monopsonist has to pay.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Public Contracts Law > Dispute Resolution > Bid Protests

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Public Contracts Law > Bids & Formation > Competitive Proposals

HN13[] **Scope, Monopolization Offenses**

Predatory bidding involves the exercise of market power on the market's buy, or input side. A predatory bidder bids up the market price of an input so high that rival buyers cannot survive. Thus, the predatory bidder acquires monopsony power, which is market power on the buy side of the market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN14[] **Actual Monopolization, Monopoly Power**

Dominant buyers in a market are generally free to bargain aggressively when negotiating the prices they will pay for goods and services. However, when a firm exercises monopsony power pursuant to a conspiracy, its conduct is subject to more rigorous scrutiny.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN15[] **Sherman Act, Claims**

Antitrust law protects consumers from anticompetitive conduct that can lead to higher prices. Antitrust standing protects competitors from claims that fail to plausibly allege an antitrust injury.

Judges: TERRENCE G. BERG, UNITED STATES DISTRICT JUDGE.

Opinion by: TERRENCE G. BERG

Opinion

ORDER GRANTING DEFENDANT'S MOTION TO DISMISS WITHOUT PREJUDICE

This case pits Michigan's largest physician-owned anesthesiology practice group, Anesthesia Associates of Ann Arbor (or "A4"), in an anti-trust lawsuit against the state's dominant health insurer, Blue Cross Blue Shield of Michigan ("BCBS-MI"). Plaintiff A4 brings claims under the *Sherman Act*, *Clayton Act*, and state law that Defendant BCBS-MI has used its dominant position as the buyer of healthcare services to pay A4's anesthesiologists artificially depressed reimbursement rates. Plaintiff also asserts that the defendant has used its **[*2]** position to coerce Michigan hospitals to refuse to deal with providers who leave its insurance network, to the detriment of anesthesiology patients. Finally, Plaintiff says that Defendant used its dominant position to coerce hospitals to solicit Plaintiff's own anesthesiologists in violation of private non-compete and non-solicitation agreements. Defendant moves to dismiss for failure to state a claim under *Rule 12(b)(6)*.

As explained below, the motion to dismiss will be **GRANTED WITHOUT PREJUDICE**.

I. Background

The following facts are alleged in Plaintiff's Complaint. *See* ECF No. 1.

A. The parties

This suit is between a healthcare provider group and a health insurer.[1] The Plaintiff is Anesthesia Associates of Ann Arbor ("A4"), a physician-owned anesthesiology practice. ECF No. 1, PageID.21. A4 is one of the largest

---

[1] Two other hospital systems—Trinity Health and Beaumont Health—are not parties to this suit, but play roles in the events giving rise to this action.

anesthesiology groups in Michigan. *Id.* Plaintiff's principal place of business is in Ann Arbor, Michigan. Its anesthesiologists have obtained board certification, introduced new procedures to Michigan hospitals, and lectured as professors at Wayne State University. *Id.* at PageID.5.

The Defendant is Blue Cross Blue Shield of Michigan ("BCBS" or "BCBS-MI"). ECF No. 1, PageID.54-55. Controlling **[*3]** at least 67% of the market in the state, Defendant is the largest commercial health insurer in Michigan. *Id.* at PageID.7. For example, Defendant insures at least 4.5 million people in Michigan and another 1.6 million in other states. *Id.* at PageID.35. Defendant is also the ninth-largest health insurer in the country. The Blue Cross Blue Shield branding is administered by the Blue Cross Blue Shield Administration. *Id.* at PageID.22. One of Defendant BCBS-MI's board of directors, Rob Casalou, also serves as chief executive officer for the Trinity Health hospital system. *Id.*

Trinity Health is a national hospital network with nine hospitals in Michigan. ECF No. 1, PageID.7. Trinity has had a longstanding relationship with Plaintiff A4, so much so that it designates A4 as a "Preferred Provider." *Id.* at PageID.8-9. Beaumont is another hospital group that has shared a longstanding and fruitful partnership with Plaintiff A4 in Michigan. *Id.*

B. The market for anesthesiology services in Michigan

Anesthesiologists keep patients alive, safe, and in comfort while they undergo invasive surgical procedures. ECF No. 1, PageID.24. They "make split-second decisions and adjustments to ensure that the patient's **[*4]** airways, breathing, and circulation are functioning properly." *Id.* In order to provide their services, anesthesiologists must have access to facilities where anesthesia is administered—hospitals and other medical facilities. *Id.* at PageID.7.

Anesthesiology compensation is driven by "compensation factors." *Id.* at PageID.26-27. Unique to anesthesiologists, the compensation factors consider a base factor, modifiers, time spent, and a conversion factor. *Id.* Base factors and modifiers vary depending on the procedure being performed and the characteristics of the patient. *Id.* at PageID.27. The more complicated a procedure is, the higher the base factor will be. *Id.* Patients with greater complicating conditions are associated with higher modifiers. *Id.* Base factors and modifiers are relatively standardized across the United States, as private insurers usually adopt the base factors set by Medicare. *Id.* Time as a compensation factor is also generally standardized, and it is measured in 15-minute increments. Although anesthesiologists receive greater compensation for more complex procedures, base factors and modifiers makeup a smaller part of the overall compensation factors. As a result, they **[*5]** do not substantially influence the differences in compensation among anesthesiologists.

The "conversion factor" is the most significant and most variable of the factors across the country. *Id.* at PageID.28. The conversion factor accounts for geographic differences, differences in cost of care, and the quality of the anesthesiologist. For instance, an anesthesiologist in a higher cost of living area, such as Detroit, will have a higher conversion factor than one in a less populated area of Michigan. An anesthesiologist who delivers a higher quality of care will have a higher conversion factor than an anesthesiologist who delivers a lower quality of care. *Id.* Commercial insurers in a normal market, therefore, compete to sign up anesthesiologists to their networks by offering higher conversion factors than their competitors. An in-network anesthesiologist, in other words, means that he or she has already agreed to financial terms for treating patients with a particular insurer. *Id.* at PageID.32-33.

Anesthesiology groups like Plaintiff receive compensation from three sources: hospital stipends, insurance reimbursement, and the patient's share of that reimbursement. *Id.* at PageID.40, 43. **[*6]** According to Plaintiff, Defendant's reimbursement rate for anesthesiologists in Michigan is in the lowest band nationally out of four bands. *Id.* at PageID.58. It is also lower than surrounding states in the Great Lakes region. This is despite the fact that Medicare's anesthesiology conversion factor for the Detroit area is one of the highest in the country. *Id.* at PageID.16. As a result of the low reimbursement rates, Plaintiff alleges that it has recently lost anesthesiologists who left to practice in neighboring Toledo, Ohio.

C. The relationship between BCBS-MI and A4

In April 2019, Plaintiff attempted to negotiate a higher reimbursement rate with Defendant. ECF No. 1, PageID.7-8. Plaintiff notified Defendant that "it could not continue to accept BCBS-MI's artificially low rate" and that it sought to "bring BCBS-MI's conversion factor more in line with market realities." *Id.* But Defendant refused to engage in negotiations.

As a consequence of Defendant's refusal to engage in negotiations, Plaintiff announced that it would be leaving Defendant's network. *Id.* Plaintiff also announced that even though it was going out of network, it would continue to provide the same medical care and would **[*7]** not charge patients any more than when it was in-network. *Id.* Instead, any conflict over rates would be resolved between Plaintiff and Defendant. *Id.*

On April 22, 2019, Rob Casalou, who serves as both the CEO of Trinity's Michigan operations and as a board member on Defendant's board of directors, reacted to Plaintiff's announcement in an email to Plaintiff. *Id.* at PageID.41-42. Casalou conveyed to Plaintiff that Defendant was concerned about the impact of Plaintiff's decision to go out of network. Defendant was considering a new process that would require anesthesiology services with its insureds to have pre-authorization from surgeons. Casalou also stated that Defendant would look to "steer work away from facilities with A4." *Id.*

A few weeks later, Plaintiff reiterated its intent to leave Defendant's network by July 15, 2019. *Id.* at PageID.42. In its statement, Plaintiff stressed that it could not continue to operate as a business with the same reimbursement rate. Plaintiff noted that it has had the same reimbursement rate for the last six years, during which the cost of providing anesthesiology services has increased. *Id.*

Plaintiff's announcement caused local hospitals—such as Trinity **[*8]** and Beaumont—to terminate their relationship with A4. For instance, on July 5, 2019, Beaumont issued a notice of termination with Plaintiff. *Id.* at PageID.44. After Plaintiff left Defendant's network on July 15, Trinity, which had enjoyed a relationship with Plaintiff for nearly fifty years, sent a termination notice to Plaintiff. Trinity later explained that it could not afford to lose Defendant's business. *Id.* at PageID.44.

At the same time in July, Plaintiff further alleges that Defendant was inducing Plaintiff's anesthesiologists to breach their non-compete provisions. *Id.* at PageID.47-50. This was despite the non-solicitation agreements between Plaintiff and Trinity. Plaintiff has limited non-compete and non-solicitation agreements to protect its efforts in recruiting and retaining its anesthesiologists. Defendant was aware of these provisions because Casalou executed and was aware of such terms through his position as Trinity's CEO. *Id.* at PageID.47.

Despite the restrictive terms, Plaintiff states that in June 2019, Saint Joseph Mercy Health System, a Trinity subsidiary, circulated a document to Plaintiff's anesthesiologists practicing in its facility offering employment. *Id.* at **[*9]** PageID.47-48. This document promised that the subsidiary would indemnify Plaintiff's anesthesiologists against any risk from breaching their non-compete agreements. *Id.* The document also expressed concerns about Defendant's reputation as an aggressive negotiator when a provider group threatens or actually leaves its network. *Id.*

A month later, another Trinity subsidiary, Mercy Health Saint Mary's, circulated a similar document offering to indemnify Plaintiff's anesthesiologists from any breach under their non-compete agreements if they were to leave A4. *Id.* at PageID.49. In order to stop the violations, Plaintiff sought and obtained a temporary restraining order against Trinity, Trinity's subsidiary, and Casalou in Michigan state court. The TRO restrained them from continuing to breach their contract and tortious actions against Plaintiff. *Id.* at PageID.49.

A4's business could not withstand the effects of hospitals terminating their relationships and denying access to their facilities because anesthesiologists require access to hospitals in order to provide their services. Plaintiff therefore acquiesced and went back in network with Defendant. *Id.* at PageID.51. In late October 2020, **[*10]** the parties along with Trinity, attempted to resolve Plaintiff's claims against Defendant. *Id.* at PageID.52. Defendant, however, again refused to engage in negotiations. Plaintiff alleges that on October 27, 2020, Defendant induced and coerced Trinity to ultimately terminate its relationship with Plaintiff, effective in 180 days. *Id.*

D. Plaintiff's Complaint

Plaintiff's Complaint raises ten causes of action: (1) tortious interference with a contract under Michigan law; (2) civil conspiracy to commit tortious interference with a contract under Michigan law; (3) unlawful and malicious threats under Michigan law; (4) duress under Michigan law; (5) violation of *Section 8* of the Clayton Act; (6) conspiracy in violation of *Section 1* of the Sherman Act; (7) monopsonization in violation of *Section 2* of the Sherman Act; (8) attempted monopsonization in violation of *Section 2* of the Sherman Act; (9) a claim for injunctive relief under *Section 16* of the Clayton Act; and (10) claim for injunctive relief under Michigan law. *See* ECF No. 1.

On January 4, 2021, Defendant moved to dismiss Plaintiff's Complaint. *See* ECF No. 13. The Court held oral argument on the pending motion on May 26, 2021.

II. Legal Standard

HN1[] *Rule 12(b)(6) of the Federal Rules of Civil Procedure* permits dismissal of a lawsuit where **[*11]** the defendant establishes the plaintiff's "failure to state a claim upon which relief can be granted." *Jones v. City of Cincinnati, 521 F.3d 555, 562 (6th Cir. 2008)*. Consideration of a *Rule 12(b)(6)* motion is confined to the pleadings. *Id.* But courts may also look to "exhibits attached [to the complaint], public records, items appearing in the record of the case and exhibits attached to defendant's motion to dismiss" without altering this standard. *Rondigo, LLC v. Twp. of Richmond, 641 F.3d 673, 680-81 (6th Cir. 2011)*. In evaluating the motion, courts "must construe the complaint, accept all well-pled factual allegations as true and determine whether the plaintiff undoubtedly can prove no set of facts consistent with their allegations that would entitle them to relief." *League of United Latin Am. Citizens v. Bredesen, 500 F.3d 523, 527 (6th Cir. 2007)* (citing *Kottmyer v. Maas, 436 F.3d 684, 688 (6th Cir. 2006)*).

HN2[] Though this standard is liberal, it requires a plaintiff to provide "more than labels and conclusions, and a formulaic recitation of the elements of a cause of action" in support of her grounds for entitlement to relief. *Albrecht v. Treon, 617 F.3d 890, 893 (6th Cir. 2010)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 554, 555, 127 S. Ct. 1955, 16 L. Ed. 2d 929 (2007)*). Under *Ashcroft v. Iqbal*, the plaintiff must also plead "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citation omitted). A plaintiff falls short if she pleads facts "merely consistent with a defendant's liability" or if the alleged facts **[*12]** do not "permit the court to infer more than the mere possibility of misconduct." *Albrecht, 617 F.3d at 893* (quoting *Iqbal, 556 U.S. at 678-679*).

HN3[] Moreover, in the context of an antitrust suit, "antitrust standing and Article III standing are not one and the same, and we not only may—but we must—reject claims under *Rule 12(b)(6)* when antitrust standing is missing." *NicSand, Inc. v. 3M Co., 507 F.3d 442, 449 (6th Cir. 2007)*. An antitrust plaintiff "must do more than make allegations of consequential harm resulting from a violation of the antitrust laws." *Id.* (citing *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 545, 103 S.Ct. 897, 74 L.Ed.2d 723 (1983)* (quotations omitted)). Even though a complaint may allege that the defendant had an intent to harm the plaintiff, district courts must still consider "[o]ther relevant factors—the nature of the [claimant's] injury, the tenuous and speculative character of the relationship between the alleged antitrust violation and the [claimant's] alleged injury, the potential for duplicative recovery or complex apportionment of damages, and the existence of more direct victims of the alleged conspiracy—weigh heavily against judicial enforcement." *Associated Gen., 459 U.S. at 545*.

HN4[] In short, antitrust standing is a "threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement," courts must dismiss it as a matter of law. *NicSand, 507 F.3d at 450*. "Lest the antitrust laws become a treble-damages **[*13]** sword rather than the shield against competition-destroying conduct that Congress meant them to be." *Id.* Antitrust standing "ensures that a plaintiff can recover only if the loss stems from a competition-*reducing* aspect or effect of the defendant's behavior." *Atl. Richfield. Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (emphasis in original).

III. Discussion

A. Antitrust Standing

Defendant moves to dismiss Plaintiff's case for failure to state a claim under *Rule 12(b)(6)*. *See* ECF No. 13. Although Defendant raises numerous arguments as to why the Complaint should be dismissed, the Court need only focus on the pleading-stage threshold question of antitrust standing.

Defendant argues that Plaintiff lacks antitrust standing because its Complaint fails to plead that Defendant's conduct caused an antitrust injury. Specifically, Defendant contends that Plaintiff has not plausibly pled an illegal price effect, a reduction in output, or reduction in quality. Accordingly, the Court need only address the issue of standing because, as it will further explain below, Plaintiff's Complaint does not plausibly allege any injury "of the type that the antitrust statute was intended to forestall." *Associated Gen., 459 U.S. at 545*.

Plaintiff responds that it has in fact alleged two types of antitrust injuries **[*14]** resulting from Defendant's allegedly anticompetitive conduct. First, Plaintiff alleges abuse of monopoly because Defendant has used its significant market power to impose an "artificially low rate for anesthesiology" in violation of *Section 2* of the Sherman Act. ECF No. 1, PageID.17. This artificially low rate "is itself anticompetitive." *Id.* at PageID.16. Defendant's "state-wide anesthesiology conversion factor is one of the lowest in the country" even though Medicare's anesthesiology conversion factor for the Detroit area "is one of the highest in the country." *Id.*

Plaintiff states that Defendant's depressed reimbursement rates have caused the following anticompetitive violations. ECF No. 1, PageID.16-17. Plaintiff alleges that Defendant's rates are "so low that it reduces output, including by restricting the supply of anesthesiologists in Michigan." *Id.* at PageID.17. Plaintiff notes that "Michigan faces a shortage of anesthesiologists and CRNAs [Clinical registered nurse anesthetists]" and that "anesthesiology groups across Michigan have complained to BCBS that its rates are impeding their ability 'to recruit anesthesiologists to work in Michigan.'" ECF No. 22, PageID.513. Plaintiff adds **[*15]** that "[b]ecause an anesthesiologist cannot be in two places at once, the volume of anesthesiology services in a market is directly tied to the number of anesthesiology providers." *Id.*

Defendant's rates have also reduced the quality of anesthesiology services. Plaintiff cites, for instance, "how Michigan patients are being deprived of the option of working with their surgeon's preferred choice of anesthesiologist." ECF No. 22, PageID.514. Plaintiff also notes how after it left Defendant's network, the replacements for Plaintiff at Beaumont hospital led to "cutbacks in weekend anesthesiology service and delayed provision of anesthesia." *Id.* In another example, consumers are harmed because "patients are restricted to choosing the anesthesiology services that BCBS is willing to pay for 'regardless of whether they are insured by BCBS-MI or some other insurer.'" *Id.*

Despite paying anesthesiologists less, Plaintiff claims that "this "artificially low conversion factor has not resulted in lower premiums for consumers." ECF No. 1, PageID.17. Plaintiff cites, for instance, data from the Kaiser Family Foundation that "shows that Michigan has some of the highest insurance premiums in the country." **[*16]** *Id.* Plaintiff also alleges that prices for anesthesiology services will increase because Defendant's conduct "endanger[s] the practice group model of anesthesiology." ECF No. 1, PageID.59. Anesthesiology practice groups cannot afford to stay in business under the artificially depressed reimbursement rates driven by Defendant. ECF No. 22, PageID.514-15. With the practice group model destroyed, providers "would have to seek employment directly with hospitals." *Id.* And Plaintiff asserts that when anesthesiologists are employed by hospitals, the result is higher prices from the perspective of patients. *See* ECF No. 1, PageID.60.

Plaintiff further alleges as an antitrust injury that Defendant conspired with Trinity and Beaumont to shut out Plaintiff when it threatened to leave Defendant's network. Defendant "exploited its monopoly power over medical facilities and coerced those facilities into conspiring with BCBS-MI to exclude A4 from practicing medicine in Michigan" when Plaintiff threatened and did leave Defendant's network. *Id.* at PageID.13.

Plaintiff's theory is that Defendant acted in concert with hospitals to refuse "to deal with anesthesiologists who are out of BCBS's network." ECF **[*17]** No. 22, PageID.515. This refusal to deal protects Defendant from needing to engage in competition, enabling it "to require anesthesiologists to accept below-competitive rates." *Id.* This concerted refusal to deal, Plaintiff alleges, harms competition because it leaves anesthesiologists with no alternative. But in a competitive market, anesthesiologists would "have the option of going out of network" and still be able to practice at local hospitals. *Id.* Instead, under Defendant's domination of the market, anesthesiologists in Michigan are forced to take Defendant's artificially low reimbursement rates at a loss. This causes "qualified and experienced anesthesiologists" to leave Michigan. *Id.* at PageID.516.

The question presented, therefore, is whether Plaintiff's allegations constitute an injury that the antitrust laws were intended to prevent. ***HN5***[] Article III standing and antitrust standing are not one and the same. District courts are required to dismiss claims under *Rule 12(b)(6)* when a plaintiff fails to satisfy antitrust standing. *NicSand, 507 F.3d at 449-50*. As the Sixth Circuit explained:

> Antitrust standing to sue is at the center of all ***antitrust law*** and policy. It is not a mere technicality. It is the glue that cements each suit with **[*18]** the purposes of the antitrust laws, and prevents abuses of those laws. The requirement of antitrust standing ensures that antitrust litigants use the laws to prevent anticompetitive action and makes certain that they will not be able to recover under the antitrust laws when the action challenged would tend to promote competition in the economic sense. Antitrust laws reflect considered policies regulating economic matters. The antitrust standing requirement makes certain that the laws are used only to deal with the economic problems whose solutions these policies were intended to effect.

HyPoint Tech., Inc. v. Hewlett-Packard Co., 949 F.2d 874, 877 (6th Cir. 1991).

The Sixth Circuit elaborated on antitrust standing in *NicSand, Inc. v. 3M Co.* ***HN6***[] "[A]ntitrust standing is a threshold, pleading-stage inquiry and when a complaint by its terms fails to establish this requirement we must dismiss it as a matter of law—lest the antitrust laws become a treble-damages sword rather than the shield against competition-destroying conduct that Congress meant them to be." *507 F.3d at 450* (noting that "federal courts have been 'reasonably aggressive' in weeding out meritless antitrust claims at the pleading stage."); *see also* *Twombly, 127 S.Ct. at 1966* ("[S]omething beyond the mere possibility of [relief] must be alleged, **[*19]** lest a plaintiff with a largely groundless claim be allowed to take up the time of a number of other people, with the right to do so representing an in terrorem increment of the settlement value.") (internal quotation marks omitted). Notably, the Sixth Circuit "has dismissed numerous lawsuits for lack of antitrust standing under *Rule 12(b)(6)*." *NicSand, 507 F.3d at 450*. (collecting cases).

The Sixth Circuit in *Southaven Land Co., Inc. v. Malone & Hyde, Inc.* summarized the test for antitrust standing as set forth by the Supreme Court. ***HN7***[] District courts assessing an antitrust claim for standing consider the following five-factor inquiry:

> (1) the causal connection between the antitrust violation and harm to the plaintiff and whether that harm was intended to be caused;
> (2) the nature of the plaintiff's alleged injury including the status of the plaintiff as consumer or competitor in the relevant market;
> (3) the directness or indirectness of the injury, and the related inquiry of whether the damages are speculative;
>
> (4) the potential for duplicative recovery or complex apportionment of damages; and
>
> (5) the existence of more direct victims of the alleged antitrust violation.

715 F.2d 1079, 1085 (6th Cir. 1983) (citing Associated Gen., 459 U.S. at 537-44); *see also* Re/Max Int'l Inc., v. Realty One, Inc., 173 F.3d 995, 1022 (6th Cir. 1999).

Having reviewed the controlling authorities **[*20]** on antitrust standing, the Court now turns to the application of its factors to the present case.

i. The nature of Plaintiff's alleged injury

Plaintiff alleges that Defendant's conduct has led to reduced output and quality in the market for anesthesiology services, and has also led to increased prices for consumers. Because Defendant's reimbursement rates drive the market price and because it is relatively low, Plaintiff alleges it has "lost multiple doctors who left to practice in Toledo, Ohio." ECF No. 1, PageID.17. Defendant's low reimbursement rates have also made it more difficult for Plaintiff and other anesthesiology groups "to recruit anesthesiologists to work in Michigan." *Id.* at PageID.38. Furthermore, Defendant's conduct has deprived Michigan patients "of the option of working with their surgeon's preferred choice of anesthesiologist." ECF No. 22, PageID.514.

Defendant, on the other hand, asserts that Plaintiff's Complaint fails to allege anticompetitive harm to the market for anesthesiology services, while alleging harm to its own business instead. ECF No. 13, PageID.255. Defendant characterizes Plaintiff's position as merely alleging that its own reimbursement rates "*did* ***[*21]*** *not go up* as much as A4 wanted." *Id.* at PageID.255-56 (italics in original). But, Defendant stresses, lower payments for anesthesiology services lead to "lower prices for customers and patients (in the form of lower provider payments for self-insured customers and lower premiums)." *Id.* at PageID.256. This, according to Defendant, "is not an 'injury' that the antitrust laws address." *Id.*

Antitrust law in the healthcare setting focuses on protecting patients from prices that are too high. In *Kartell v. Blue Shield of Massachusetts, Inc.*, the First Circuit considered whether defendant Blue Shield's reimbursement practice of banning "balance billing"—where an insurer pays doctors for treating in-network patients in exchange for doctors promising to not make any additional charge to the subscriber—constituted an unlawful restraint of trade in violation of the antitrust laws. *749 F.2d 922 (1st Cir. 1984)*. The First Circuit held that it did not.

In so ruling, the First Circuit opined on when and how practices affecting prices may be deemed unlawful under ***antitrust law***. *Kartell* noted that Congress enacted the Sherman Act "as a way of protecting consumers against prices that were too high, not too low." *Id. at 931*. ***HN8***[] This is achieved, **[*22]** for instance, by prohibiting firms from pricing below incremental cost, otherwise known as predatory pricing. *Id. at 927*. That is because predatory pricing "harms competitors, cannot be maintained, and is unlikely to provide consumer benefits." *Id.*

In *Kartell*, the plaintiffs, a group of physicians, did not raise a claim of predatory pricing. Instead, the plaintiffs stated that the insurer used its market power to impose low reimbursement rates on doctors. *Id. at 927*. Such "low prices discouraged them from introducing new highly desirable medical techniques." *Id.* The physicians maintained that "fully informed patients would have wanted to pay more for those techniques had they been allowed to do so." *Id.*

The First Circuit rejected the argument that a dominant insurer commits an antitrust injury when it uses its market power to bargain for low prices. ***HN9***[] That is because in the particular circumstances of the health insurance market, the roles insurers play on behalf of patients "are *like* those of a buyer." *Id. at 926* (italics in original). And, relevant here, ***antitrust law*** "rarely stops the buyer of a service from trying to determine the price or characteristic of the product that will be sold." *Id. at 925*. The "more closely Blue **[*23]** Shield's activities resemble, in essence, those of a purchaser, the less likely that they are unlawful." *Id.*

HN10[] In the Sixth Circuit, an antitrust plaintiff who challenges a competitor's pricing practices must do so under a theory of predatory pricing. In *N.W.S. Michigan, Inc. v. General Wine Liquor Co., Inc.*, the Sixth Circuit similarly considered when an antitrust plaintiff's challenge to a competitor's pricing practices gives rise to antitrust standing. *58 Fed App'x 127, 129 (6th Cir. 2003)*. The appellate court affirmed the district court's dismissal on the basis that the plaintiff "failed to allege predatory pricing and, as a result, did not have standing." *Id.*

In *General Wine*, the plaintiff was a liquor distributor who brought an antitrust suit against a competitor. The plaintiff alleged that defendant competitor enticed suppliers "to enter into exclusive contracts" by promising kick-backs in the form of advertising. *Id. at 128-29*. The defendant competitor would then "pass on the cost savings associated with being able to store and transport the dual supplier's spirits and wine products together." *Id.* The plaintiff alleged that this arrangement violated "regulations restricting vertical integration within the industry." *Id. at 129*. Characterizing **[*24]** the plaintiff's antitrust claim as an attack on the defendant's pricing practices, the district court "dismissed the case because [the plaintiff] failed to allege predatory pricing and, as a result, did not have standing." *Id.*

On appeal, the plaintiff argued that "it did not need to allege predatory pricing to satisfy the antitrust injury requirement." *Id.* The Sixth Circuit explicitly disagreed, finding that the plaintiff did not "have standing because it failed to allege predatory pricing." *Id.* The court noted that "[f]or antitrust claims based on pricing practices, the Supreme Court has adopted a strict antitrust injury rule requiring plaintiffs to allege predatory pricing." *Id.* (citing *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222-23, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)* and *Atlantic Richfield, 495 U.S. at 339*). ***HN11***[] "When a private plaintiff complains about a defendant's prices, 'only predatory pricing has the requisite anticompetitive effect' to establish antitrust injury." *Id.* (citation omitted). "The economic rationale for emphasizing predatory pricing is clear: Low prices benefit consumers regardless of how those prices are set, and so long as they are above predatory levels, they do not threaten competition." *Id. at 129-30* (internal quotation marks omitted).

Here, Plaintiff's claim hinges on the depressed reimbursement **[*25]** rates as a harm causing anticompetitive injury. Thus, as with *General Wine*, Plaintiff's main antitrust claim is against Defendant's pricing practices. But rather than assert a theory of predatory pricing, Plaintiff's theory is "that BCBS has monopsony power in the market for anesthesiology services." ECF No. 22, PageID.518.[2] Here, Plaintiff alleges that BSBS-MI uses its monopsony power to impose low reimbursement prices for anesthesiologists. It is not altogether clear, however, how insisting on low reimbursement rates results in a cognizable antitrust injury comparable to predatory pricing.

Plaintiff cites *Weyerhaeuser Co. v. Ross-Simmons Hardwood Lumber Co*. for the proposition that Defendant's use of its monopsony power to drive the market price for anesthesia results in an antitrust harm. *See 549 U.S. at 320*. And monopsonization acts as a basis for competitive harm. ECF No. 22, PageID.517-18. In *Weyerhaeuser*, the Supreme Court discussed what kind of monopsonization is unlawful under the antitrust laws. The plaintiff, a sawmill operator, sued a competitor under *Section 2* of the Sherman Act. It alleged that defendant competitor attempted to monopolize the regional input market for sawlogs through predatory **[*26]** bidding. The district court rejected defendant's proposed jury instructions incorporating elements of the *Brooke Group* test. *Id. at 316-17*; *see also Brooke Group, 509 U.S. at 209 (1993)* (establishing that a plaintiff alleging predatory pricing must prove that rival priced its goods below cost and that rival had a dangerous probability of recouping its investment in below-cost prices after driving others out of business.). It instead entered judgment on the jury verdict in favor of plaintiff. The Ninth Circuit Court of Appeals affirmed. On appeal, the Supreme Court considered whether the *Brooke Group* test applies to claims of predatory bidding. *Id. at 315*. The Supreme Court held that it should and reversed the Ninth Circuit.

HN13[] Predatory bidding "involves the exercise of market power on the market's buy, or input side." *Id. at 312*. A predatory bidder "bids up the market price of an input so high that rival buyers cannot survive." *Id.* Thus, the predatory bidder acquires monopsony power, "which is market power on the buy side of the market." *Id.* The Supreme Court opined that "[p]redatory-pricing and predatory bidding are analytically similar" and that "the close theoretical connection between monopoly and monopsony suggests that similar legal standards should **[*27]** apply to both sorts of claims." *Id. at 313*. The Supreme Court further observed that "[b]oth involve the deliberate use of

[2] ***HN12***[] "Monopsony is market power on the buy side of the market." *Weyerhaeuser Co. v. Ross-Simmons Hardwood Lumber Co., 549 U.S. 312, 320, 127 S. Ct. 1069, 166 L. Ed. 2d 911 (2007)* (citation omitted). "The classical theory of monopsony envisions a market with only one buyer that uses its power to reduce the quantity purchased, thereby reducing the price that the monopsonist has to pay." Blair & Harrison, Antitrust Policy and Monopsony, *76 Cornell L. Rev. 297 (1991)*.

unilateral pricing measures for anticompetitive purposes and both require firms to incur certain shortterm losses on the chance that they might later make supracompetitive profits." *Id.*

The anticompetitive injury defined in *Weyerhaeuser* is inapt here. Although the competitor in that case and Defendant here both hold dominant positions as buyers in their respective markets, that is as far as the comparison will go. One key difference is that, unlike the buyer in *Weyerhaeuser*, Defendant here is using its buying power to keep the price of inputs—anesthesia services—*down*. This would have the tendency to benefit Defendant's competitors, because as Plaintiff points out, "reimbursement concerns need to start with BCBS-MI since they are driving the market price for anesthesia." ECF No. 1, PageID.15-16. Other health insurers in the Michigan market function essentially as buyers for their insureds. *See* *Kartell, 749 F.2d at 925*. Buyers, even the competitors of buyers, favor lower prices for their inputs. And lower prices would not have the effect of driving competitors from the market. Thus, there is no risk **[*28]** that the monopsonist predatory buyer would be able to raise output prices to a supracompetitive level.

But a more fundamental flaw is that Plaintiff does not plausibly plead that low reimbursement rates incur short-term losses for Defendant. *See* *Weyerhaeuser, 549 U.S. at 323* ("A predatory-bidding scheme requires a buyer of inputs to suffer losses today on the chance that it will reap supracompetitive profits in the future."). Indeed, Plaintiff states that Defendant has profited from *low* reimbursement rates—not that BCBS-MI has suffered losses now so that they will be able to generate big profits later. Thus, Plaintiff's attempt to characterize Defendant's pricing practices as comparable to the anticompetitive practices outlined in *Weyerhaeuser* fails.

Next, Plaintiff asserts that competition is harmed when Defendant is insulated from competition as a result of paying anesthesiologists a depressed reimbursement rate. ECF No. 22, PageID.516. Plaintiff maintains that Defendant and the other hospitals have formed a conspiracy where anesthesiologists have to join Defendant's network, or else be excluded from practicing in hospitals in the local market. This traps anesthesiologists into accepting low reimbursement rates, **[*29]** which in turn discourages anesthesiologists from practicing in Michigan in the long run.

Plaintiff relies on the Third Circuit's decision in *W. Penn Allegheny Health Sys., Inc. v. UPMC* for the proposition that depressed reimbursement rates may harm competition through "suboptimal output, reduced quality, allocative inefficiencies, and (given the reductions in output) higher prices for consumers in the long run." *See* *UPMC, 627 F.3d 85, 104 (3d Cir. 2010)*. Although *UPMC* and this case both deal with allegations of depressed reimbursement rates, they are distinguishable. Not only are the facts in *UPMC* materially different from the situation before the Court, it is an out-of-circuit case and a review of the Sixth Circuit case law yields no cases with a similar holding.

In *UPMC*, plaintiff West Penn Allegheny Health System was the second-largest hospital system in metropolitan Pittsburgh. It brought an antitrust claim against the University of Pittsburgh Medical Center (UPMC), the area's dominant hospital system, and Highmark, Inc., the area's dominant health insurer. *Id.* West Penn brought claims under both the Sherman Act and state law, asserting that the defendants formed an unlawful conspiracy to protect one another from competition. **[*30]**

Specifically, "the dominant hospital system used its power in the provider market to insulate the health insurer from competition, and in exchange the insurer used its power in the insurance market to strengthen the hospital system and to weaken the plaintiff." *Id. at 91*. The plaintiff also asserted an antitrust theory that UPMC attempted to monopolize the area for specialized hospital services. The defendants moved to dismiss for failure to state a claim, which the district court granted. The alleged conspiracy was as follows. Although once locked in an intense competitive struggle, UPMC and Highmark formed a "truce." *Id. at 93*. They formed an agreement in which UPMC would "use its power in the provider market to prevent Highmark competitors from gaining a foothold in the Allegheny County market for health insurance." *Id.* In exchange, "Highmark agreed to take steps to strengthen [UPMC] and to weaken West Penn." *Id.*

Plaintiff West Penn alleged that pursuant to the defendants' "truce," Highmark paid it artificially low reimbursement rates. *Id.* at 94. Highmark "repeatedly refused to increase them." *Id.* Highmark admitted that it paid West Penn "artificially low reimbursement rates" because it feared that **[*31]** if it raised them, "[UPMC] would retaliate." *Id.* at 94. The plaintiff asserted that "the amount of underpayments—*i.e.*, the difference between the reimbursements it would have received in a competitive market and those it actually received—constitutes an antitrust injury." *Id.* at 103.

The Third Circuit observed that "had Highmark been acting alone, West Penn would have little basis for challenging the reimbursement rates." *Id. at 103*. **HN14**[] That is because dominant buyers in a market are "generally free to bargain aggressively when negotiating the prices [they] will pay for goods and services." *Id.* However, "when a firm exercises monopsony power pursuant to a conspiracy, its conduct is subject to more rigorous scrutiny." *Id.*

The question presented before the Third Circuit was whether the defendant hospital *working together with* defendant health insurer unreasonably restrained trade through their "truce." It determined that the defendants did because West Penn alleged that "Highmark paid West Penn depressed reimbursement rates, not as a result of independent decisionmaking, but pursuant to a conspiracy with UPMC, under which UPMC insulated Highmark from competition in return for Highmark's taking steps **[*32]** to hobble West Penn." *Id. at 104*. In other words, the plaintiff's allegation of antitrust injury hinged on the formation of a conspiracy where a dominant buyer used its position to reduce competition by coercing another entity to impose artificially depressed reimbursement rates on sellers of inputs. In the case of *UPMC*, the inputs were healthcare services.

Plaintiff's Complaint here is not the same. Unlike in *UPMC* where there was a direct allegation of a conspiracy in the form of an agreement requiring each conspirator to "use its market power to protect the other from competition," *id. at 93*, there is no such agreement here. UPMC paid plaintiff West Penn "artificially low reimbursement rates" essentially *at the direction* of defendant Highmark. In other words, plaintiff plausibly alleged that the defendants in *UPMC* conspired to fix prices. *See 627 F.3d at 94*.

In contrast, A4's Complaint suggests that Defendant on its own determined what it would reimburse Plaintiff. Plaintiff's theory of a conspiracy centers not on pricing but on an agreement to refuse to deal with providers that leave Defendant's network. Crucially, Plaintiff has not alleged that Defendant and its hospital affiliates Trinity or Beaumont formed an **[*33]** agreement to fix prices. And under *UPMC* it was the conspiracy to fix prices—and not a unilateral decision on reimbursement rates for anesthesiology services—that could give rise to a plausible antitrust injury. *See UPMC, 627 F.3d at 103* (observing "the general hesitance of courts to condemn unilateral behavior...But when a firm exercises monopsony power pursuant to a conspiracy, its conduct is subject to more rigorous scrutiny."). A monopsonist stating its own willingness to pay a certain price for a particular good or service is not a cognizable antitrust injury under the reasoning of *UPMC*.

Furthermore, Plaintiff alleges that Defendant worked with Trinity and its hospitals "to restrict competition in the market for anesthesiology services by, among other things, denying anesthesiologists access to medical facilities unless they go in-network." ECF No. 1, PageID.82. In an attempt to support this claim, Plaintiff refers to an email from Casalou stating his concern about the effect on Trinity's facilities and patients if Plaintiff left Defendant's network. *Id.* at PageID.42.

But this allegation is insufficient to raise an inference of conspiracy. While Casalou and Defendant were clearly acting out of their **[*34]** own legitimate business interests, in the email Casalou was relaying *potential* unilateral actions by the Defendant. For instance, Casalou wrote that Defendant would "*consider* a new process" and would "*look to* steer work away from facilities with A4." *Id.* (emphasis added). Even in the light most favorable to Plaintiff, these statements only describe *potential* courses of action. It does not even assert that Defendant had already decided on what to do, let alone that it formed an agreement with another entity.

In addition, as explained above in this subsection, Plaintiff's allegations that Defendant's low reimbursement rates tend to decrease quality and output are not sufficient to withstand a motion to dismiss. And, as explained below, it is not clear whether consumers would obtain the benefit of lower prices if Defendant paid a higher anesthesiology reimbursement rate. So, even if there had been a conspiracy between Defendant and Trinity, Plaintiff's claim would still be unavailing.

The court in *UPMC*, for instance, was concerned about combining the power of dominant buyers with the inherent dangers of conspiracies in a marketplace. That is because such restraints create the risk of "suboptimal **[*35]** output, reduced quality, allocative inefficiencies, and (given the reductions in output) higher prices for consumers in the long run." *UPMC, 627 F.3d at 104*. For instance, "UPMC's increased revenue came largely from the 'sweetheart' reimbursements it received from Highmark." *Id. at 95*. In *UPMC* the "sweetheart deal" in combination with the artificially depressed rates for West Penn were to the detriment of the rest of the competitors.

But here, Defendant's low reimbursement rates drive the market for anesthesiology services while also benefiting Defendant's competitors because insurers seek to pay lower reimbursement rates to their providers. Plaintiff thus fails to plead an antitrust injury. For these reasons, Plaintiff's reliance on *UPMC* to assert that it has suffered an antitrust injury is misplaced.

Plaintiff also alleges that but-for Defendant's anticompetitive conduct, the market for healthcare services in Michigan would see an increase in the quality of anesthesiology services because the top anesthesiologists would be incentivized to work and stay in Michigan if their rates were higher. But it is not clear from the Complaint how this would also lead to more competitive prices from the perspective of the consumer. **[*36]** In fact, it is not clear from Plaintiff's Complaint whether it is even asserting that but-for Defendant's conduct, consumers would obtain the benefit of lower premiums.

Plaintiff approaches this argument when it alleges that prices would improve for consumers if the practice group model of anesthesiology is preserved. The theory is that if Defendant is permitted to continue to engage in its allegedly anticompetitive behavior, physician-owned anesthesiology groups would not be able to continue to practice at a loss. This would force such practice groups to close down, and individual anesthesiologists would migrate to working for hospitals. Such a migration, Plaintiff alleges, results in higher prices for consumers. This potential for harm, however, is too speculative to satisfy the pleading-stage inquiry for antitrust standing. It also undercuts the contention that Plaintiff has yet suffered any antitrust injury at this point. Finally, it is not clear how preserving one business model while increasing anesthesiology rates would result in *lower* prices for consumers than would switching to some other costlier alternative, such as working at hospitals. Both would apparently run the risk **[*37]** of increased prices according to Plaintiff.

All Plaintiff alleges is that if Defendant's reimbursement rates were higher for anesthesiologists, Plaintiff would be able to retain and recruit higher quality anesthesiologists. So, it is entirely plausible that consumers would obtain the benefit of better anesthesiology services— but at a higher cost. This is not an antitrust injury because such an outcome does not clearly leave consumers better off—they may well benefit from "better" anesthesiology services, but the cost of those services would be "worse."

More critically, however, the allegations about the benefits of physician-owned provider groups that Plaintiff relies upon are painted in too broad a brush; they do not specifically apply to anesthesiologists practicing in Michigan. For example, Plaintiff claims in general that physician-owned practice groups "are an efficient method of providing quality anesthesiology services" over "the old model whereby anesthesiologists were hospital employees." ECF No. 1, PageID.60. Plaintiff cites several studies suggesting that "hospital ownership of physician practices leads to higher prices and higher levels of hospital spending." *Id.* at PageID.60 **[*38]** (quotations omitted). Another study showed that "between 2009 and 2012, hospital-owned physician organizations in California incurred higher expenditures for commercial HMO enrollees for professional, hospital, laboratory, pharmaceutical, and ancillary services than did physician-owned organizations." *Id.*

Without assessing the merit of these studies, even when viewing them in the light most favorable to Plaintiff, they fail to convince because they are not applicable to the market dynamics of anesthesiologists in Michigan. The first study, for instance, draws conclusions about "higher costs and higher levels of hospital spending" for healthcare services *in general*. It says nothing about whether anesthesiology services in Michigan would increase as a result of hospital-owned practices. The number and kinds of healthcare services offered are vast. An overall increase in healthcare costs for patients says nothing about whether patients would have to pay more for anesthesiology services—which is the issue here.

The second study is unpersuasive for similar reasons. It deals with the healthcare ecosystem in California—not Michigan. General assertions about the potential for rising costs for **[*39]** healthcare services are akin to conclusory allegations, which are inadequate in a motion to dismiss.

At bottom, ***antitrust law*** protects consumers from anticompetitive conduct that can lead to higher prices. ***HN15***[] Antitrust standing, furthermore, protects competitors from claims that fail to plausibly allege an antitrust injury. Here, Plaintiff's Complaint falls short of this threshold inquiry. Plaintiff articulates no predatory pricing theory and its attempt to graft a predatory bidding framework onto Defendant's pricing practices fails as well. Finally, Plaintiff does not make plausible allegations that Defendant's low reimbursement rates for anesthesiologists hurt consumers in the form of higher prices, reduced output, or reduced quality.

Accordingly, Plaintiff does not plausibly allege an antitrust injury.

ii. Whether Defendant's conduct was aimed at harming or actually caused harm to Plaintiff

The alleged causal chain involves Defendant conspiring with Trinity and Beaumont hospitals to pressure them to refuse to deal with providers like Plaintiff who choose to go outside of Defendant's network. This in turn enables Defendant to pay providers like Plaintiff artificially low reimbursement rates **[*40]** because providers need access to the hospital. Artificially low reimbursement rates then make it harder to recruit anesthesiologists, driving down quality of services and reducing output. For instance, Plaintiff alleges that BCBS's "artificially low rate for anesthesiology services has caused A4 to lose multiple anesthesiologists who left to work in Ohio." ECF No. 1, PageID.23.

Plaintiff also states that the low reimbursement rate "has also made it more difficult for A4 to compete nationally to recruit anesthesiologists." *Id.* In describing the nature of the harm, Plaintiff begins in April 2019 when "A4 told BCBS-MI that it could not continue to accept BCBS-MI's artificially low rate." *Id.* at PageID.7. Plaintiff identifies this point as the beginning of the conspiracy between Defendant, Trinity, and other hospitals to refuse, or threaten to refuse, to deal with providers seeking to leave Defendant's network.

Defendant responds that Plaintiff has its causal chain backwards. "A4 must allege that the harm it suffered was *caused by* the conduct it challenges." ECF No. 24, PageID.613. Defendant further argues that "A4 has not alleged facts plausibly explaining how any agreement caused illegally **[*41]** low prices *before* it existed." *Id.* (emphasis in original). Another way of putting this is that the low reimbursement rates were already in effect before BCBS-MI, Trinity, or any other hospital systems allegedly got together to exclude A4.

A review of the Complaint shows that Plaintiff has not adequately pled the causation element to establish antitrust standing. While Plaintiff alleges that Defendant's conduct against it began in April 2019 and culminated in October 2020, its allegations of harm to competition— low reimbursement rates for anesthesiology services leads to reduced output and quality—*precede* the time period when the conspiracy was formed. For instance, Plaintiff's citations for Defendant's artificially low reimbursement rates are from 2018. ECF No. 1, PageID.55. In another instance, Plaintiff relies on a 2010 RAND study as proof that Michigan "has been facing a shortage of both anesthesiologists and CRNAs." *Id.* at PageID.17. Taking this allegation as true does nothing to support the notion that Defendant's conduct harmed Plaintiff starting in April 2019 and onward. In other words, the alleged reduction in output has been occurring long before the events giving rise to **[*42]** this case.

Plaintiff states that "BCBS-MI's acts were calculated to reduce competition among commercial health insurers in Michigan." ECF No. 1, PageID.13-14. This claim is not supported by plausible allegations because the rest of the Complaint details how Defendant's actions led to reduced output and quality among anesthesiologists, as well as increased prices for consumers. However, these allegations, if true, would tend to increase competition among insurance companies because potential entrants would be incentivized to enter the commercial health insurance market by the low cost of inputs (providers) and the ability to charge relatively higher prices to buyers (insureds).

It is also not clear whether Plaintiff has adequately pled that Defendant had the requisite intent to cause the type of antitrust harm that is raised here. Although Plaintiff alleges that Defendant has intended to pay low reimbursement rates, it is not altogether clear from Plaintiff's Complaint whether Defendant also intended to reduce output and quality of services. Plaintiff needs adequate pleadings in this regard to overcome the natural inference that as a buyer of anesthesiology services on behalf of patients, **[*43]** Defendant has incentives to procure the best quality at the lowest price. Defendant is also incentivized to pay for anesthesiology services at an amount it deems fit to meet the demands of its insureds.

As such, the causal factor also weighs against Plaintiff.

iii. The directness or indirectness of Plaintiff's injury, and the related inquiry of whether the damages are speculative

Here, Plaintiff's alleged injury—low reimbursement rates leading to reduced output and quality—is indirect because it is derivative of the harm on healthcare consumers.

In *Park Avenue Radiology Associates, P.C. v. Methodist Health Systems, Inc.*, the Sixth Circuit affirmed a district court's holding that an antitrust plaintiff lacked standing and discussed the test for determining such standing. *198 F.3d 246 (6th Cir. 1999)*. The plaintiffs were providers of "outpatient radiology services for patients referred to them by primary care physicians" in the area. *Id.* They brought an antitrust suit against a group of local hospitals and insurers. *Id.* The plaintiffs challenged defendants' referral policies as anticompetitive. Specifically, they alleged that their referral arrangement steered defendants' insureds, as well as non-enrollees whose plans **[*44]** also included plaintiffs, from choosing plaintiffs' services.

The district court dismissed the case for lack of antitrust standing. The district court stated that "reduced to its essence, plaintiffs' complaint challenges the fundamental structure of the modern PPO, in that requiring in-plan referrals for plan patients is one of the primary means by which a PPO is able to fulfill its promise of increased patient volume for the preferred providers." *Id.* Furthermore, plaintiffs sought relief "to remove the primary bargaining tool by which PPOs are able to reduce health care providers' prices." *Id.* The result being that "consumers would therefore suffer if Plaintiffs were to prevail in this litigation." *Id.*

On appeal, the Sixth Circuit considered whether plaintiffs' complaint adequately pled antitrust standing. In applying the five-factor test, the court held that they did not. It rejected the plaintiff's claim that it suffered an antitrust injury in part because "their claimed lost profits are derivative of the alleged harm inflicted on the third parties—the healthcare consumers and their third-party providers, if any." *Id.* The court found that "the parties directly harmed due to the alleged **[*45]** violations are the healthcare consumers—both Health Choice members and nonmembers—and their third-party providers." *Id.* Thus, "the harm is not sufficiently causally related to the violation, and their damages are speculative in that the number of lost referrals is not easy to measure." *Id.* (citing *Associated Gen., 459 U.S. at 551-52*). The court found that "the injury is directed to the patients, or third-party insurers as the case may be, as opposed to Plaintiffs." *Id.* The district court's dismissal for lack of antitrust standing was affirmed.

Here, the harm accruing to Plaintiff is low reimbursement rates. At the same time, Plaintiff alleges that consumers, *i.e.*, patients, are harmed because the Defendant's conduct results in reduced output and quality of anesthesiology services. These alleged harms, while related, are not in harmony with each other because Plaintiff's interest in seeking higher reimbursement rates is in direct conflict with the patients' interest in keeping insurance premiums and provider payments low. So, as with *Park Avenue*, "the harm is not sufficiently causally related to the violation." *See Park Avenue, 198 F.3d at 246*.

The factor of whether its injury was direct or indirect weighs against Plaintiff's case.

iv. The potential [*46] for duplicative recovery or complex apportionment of damages and the existence of more direct victims of the alleged antitrust violation

If Defendant's conduct is in fact an antitrust violation, the harms of decreased output and quality of anesthesiology services more directly impact Defendant's insureds than they do Plaintiff. The insured patients are the ones who would suffer from reduced output and a lower quality of anesthesiology services. Plaintiff's alleged injury, low reimbursement rates, is not an antitrust injury because while it challenges Defendant's pricing practices, it is neither predatory nor exclusionary. The more direct victims of the reduced output and quality are patients and Defendant's competitors. In other words, other buyers of anesthesiology services—health insurers in the Michigan market.

Indeed, even Plaintiff's allegation that Defendant's low reimbursement rates increase the cost of health insurance premiums in the long run suggests that the more direct victims of high cost of health insurance are Defendant's own insureds. That is because Plaintiff's objective of obtaining higher reimbursement rates for providing anesthesia services is at direct odds with **[*47]** the interests of anesthesia patients, who naturally seek lower prices for those services. The existence of more direct victims of the alleged antitrust injury increases the potential for duplicative recovery.

As such, these two factors for establishing antitrust standing also weigh against Plaintiff. Without a proper basis for standing, the antitrust claims, Counts V-IX, must be dismissed without prejudice. In the absence of any federal question jurisdiction, the Court declines to exercise supplemental jurisdiction over the state law claims, Counts IIV, and X. The Complaint therefore will be dismissed without prejudice.

CONCLUSION

For all the reasons stated above, Defendant's motion to dismiss the Complaint is **GRANTED WITHOUT PREJUDICE**. Should Plaintiff wish to seek leave to amend the Complaint, **it must file a motion for leave to amend within twenty-one (21) days of the date of this Order**, or the case will be dismissed with prejudice.

IT IS SO ORDERED.

Opinion by: Michael P. Shea,

Opinion

RULING ON MOTION TO DISMISS

Plaintiff, Dichello Distributors, Inc. ("Dichello"), is a family-owned wholesale distributor of beer, including the beer brands manufactured by the Defendant, Anheuser-Busch, LLC ("AB"), a company that owns more than forty major brands and operates nineteen breweries within the United States. Dichello has been the exclusive distributor of AB's beer brands in New Haven, Fairfield, and Middlesex counties for many decades. Dichello has brought this action alleging that certain features of its distributor agreement with AB violate federal and state ***antitrust law*** and *Connecticut's Unfair Trade Practices Act ("CUTPA"), Conn. Gen. Stat. §§ 42-110a et seq.*, and that AB is tortiously interfering with Dichello's contract with the employee charged with managing its business. Dichello also seeks **[*2]** a declaration that its distributor agreement with AB is illegal and unenforceable. AB seeks to dismiss Dichello's complaint in its entirety. For the following reasons, I grant in part and deny in part AB's motion to dismiss.

I. FACTUAL BACKGROUND

The following facts are drawn from Dichello's Amended Complaint, ECF No. 17, and are accepted as true for the purposes of this ruling. I also consider the Equity Agreement and the Modified Final Judgment in *United States v. Anheuser-Busch InBev SA/NV, No. 16-1483, 2018 U.S. Dist. LEXIS 216015, 2018 WL 6684721 (D.D.C. Oct. 22, 2018)*, on which the Amended Complaint relies. *Chambers v. Time Warner, Inc., 282 F.3d 147, 152-53 (2d Cir. 2002)* (On a *Rule 12(b)(6)* motion, "the complaint is deemed to include any written instrument attached to it as an exhibit or any statements or documents incorporated in it by reference. Even where a document is not incorporated by reference, the court may nevertheless consider it where the complaint relies heavily upon its terms and effect, which renders the document integral to the complaint." (internal quotation marks and citations omitted)). I may also take judicial notice of the Modified Final Judgment. *Staehr v. Hartford Fin. Servs. Grp., Inc., 547 F.3d 406, 425 (2d Cir. 2008)* (On *Rule 12(b)(6)* motion, "the court may also consider matters of which judicial notice may be taken" (internal quotation marks omitted)); *DiBa Fam. Ltd. P'ship v. Ross, No. 13-06384, 2014 U.S. Dist. LEXIS 152353, 2014 WL 5438068, at *2 (S.D.N.Y. Oct. 27, 2014)* ("Courts may also take judicial notice of matters of public record, including court **[*3]** rulings, when considering motions to dismiss.").

A. State Regulation of the Beer Industry

Connecticut's Liquor Control Act "dictate[s] how alcohol is distributed from manufacturers to consumers." (ECF No. 17 ¶ 11). "The beer industry [in Connecticut] ... is divided into three tiers[:]" "(i) manufacturers; (ii) wholesalers; and (iii) retailers." (*Id.* ¶ 10, 12). "Each tier within the 'Three Tier System' is regulated by state law and any company operating within a given tier must secure a state permit to do so." (*Id.* ¶ 12). "Manufacturers in the first tier are generally prohibited from selling directly to retailers, and instead, must sell to wholesalers—who in turn sell to retailers, who then ultimately sell the beer products to the consumer." (*Id.* ¶ 13). "[A]ny given brand of beer can only be distributed by a single wholesaler within a defined territory." (*Id.* ¶ 14).

Companies operating within a tier are prohibited "from owning, operating[,] or controlling a company in a different tier." (*Id.* ¶ 15). Thus, wholesalers are protected and remain independent, which "serves as an important check on the market power of large manufacturers...." (*Id.* ¶ 19). Wholesaler independence "also facilitates **[*4]** the entry into that market of competing brands of beer, including local 'craft' beers, all of which inures to the benefit of consumers and the public." (*Id.* ¶ 20). Specifically, independent wholesalers are "critical for the marketplace" because they "can invest in relationships with brewers of all sizes to provide them with the opportunity to compete, prosper[,] and grow in the beer marketplace[,]" and, consequently, can meet consumer demand for "choice, variety, access[,] and price." (*Id.* ¶¶ 20-21).

B. The Parties

AB is a beer manufacturer that "owns and operates 19 breweries in the United States and owns more than 40 major beer brands, including Bud Light, Budweiser, Busch, Michelob, Rolling Rock, Natural Light, Stella Artois, LandShark, Shock Top, Goose Island, Blue Point, and Beck's." (*Id.* ¶ 4). AB "uses wholesalers to merchandise, sell[,] and deliver its beer brands to retailers in Connecticut. The retailers include package stores, grocery stores, restaurants[,] and bars." (*Id.* ¶ 28). "[I]ndependent wholesalers distribute the largest volume of AB beer in the United States and AB's beer brands account for a large percentage of the overall business of these independent wholesalers." **[*5]** (*Id.* ¶ 29).

Dichello is one such wholesaler. Dichello is a family-owned Connecticut corporation that distributes "numerous beer brands, including beer brands manufactured by [AB], [to retailers] and has been the exclusive distributor of AB beer brands in New Haven, Fairfield and Middlesex counties for many decades." (*Id.* ¶¶ 1-2). In addition to distributing AB's brands, Dichello also distributes brands that compete with AB, "including high-end beers that constrain AB's ability to raise prices on its premium and sub-premium brands." (*Id.* ¶ 30). The categories of beer brands are explained below.

C. The Beer Market

Beer, typically "made from a malted cereal grain, flavored with hops, and brewed via a fermentation process[,]" has a "taste, alcohol content, image, price, [among other] factors, [that] make it substantially different from other alcoholic beverages." (*Id.* ¶¶ 31, 32). As a result, "[o]ther alcoholic beverages, such as wine and distilled spirits, are not sufficiently substitutable to beer from the consumers' perspective, and ... relatively few consumers would substantially reduce their beer purchases in the event of a small but significant and non-transitory increase in the price **[*6]** of beer." (*Id.* ¶ 33).

"Americans spend nearly $120 [b]illion each year on beer, and [AB, the largest beer brewing company both in the United States and in the world,] accounts for approximately 40% of all beer sales in the U.S." (*Id.* ¶¶ 37, 38). In addition, AB sells a "vast number of brands and those brands account for a large percentage of [each] independent wholesaler's revenues." (*Id.* ¶ 39). "[T]hus, AB has significant power in the relevant market...." (*Id.* ¶ 40). The relevant market is "beer sold within the State of Connecticut and the United States[]" because, although competition between beer manufacturers exists on a national level, and decisions about brewing, marketing, and branding take place on a national level, competition is regulated by the state via the Connecticut Liquor Control Act. (*Id.* ¶¶ 34-36).

The beer market is also "segmented, based on price and quality, into three categories: (1) sub-premium, (2) premium, and (3) high-end." (*Id.* ¶ 23). Only a small portion of the beer sold by AB comes from the high-end category. (*Id.* ¶ 24). Therefore, AB seeks to maintain a "price gap" between each category so that consumers are less willing to trade up from one category to **[*7]** the next. (*Id.* ¶¶ 25-26). The price gaps "minimize competition across segments." (*Id.* ¶ 25).

D. Anheuser-Busch's Anticompetitive Conduct

Dichello alleges that "AB has used its market power in the relevant market to disadvantage rivals, restrict supply, and reduce competition." (*Id.* ¶ 41). Specifically, Dichello asserts that "AB ... has used a variety of practices and contractual provisions that impede and restrain the free and independent promotion and distribution of competing beers, generally, and high-end beers, more specifically." (*Id.* ¶ 42). Dichello alleges that AB "forced" it to enter into the Amended and Restated Wholesaler Equity Agreement ("Equity Agreement") on August 25, 2006. (*Id.* ¶¶ 43-44). These contractual terms "(i) limit the wholesaler's ability to promote, supply[,] and sell beers that compete with AB's beer brands, and (ii) place control of the wholesaler, its operations, and its business, in the hands of AB." (*Id.* ¶ 43). Dichello alleges that AB has "forced all of its independent wholesalers to sign identical or nearly identical agreements." (*Id.* ¶ 45).

The Equity Agreement requires Dichello to "devote greater effort" to AB products than other products and give priority **[*8]** "over all other products" to the efforts and resources devoted to AB products. (*Id.* ¶ 44(a), (b)). Further, "AB must approve the individual employed by Dichello to manage Dichello's entire business (the 'Equity Manager')" and the successor to the Equity Manager ("Successor Manager"). (*Id.* ¶ 44(c), (h)). The AB-approved Equity Manager has sole control of Dichello's day-to-day operations and Dichello must convey to the Equity Manager an ownership interest of at least twenty-five percent. (*Id.* ¶ 44(d), (e)). AB can withdraw its approval of the Equity Manager for good cause. (*Id.* ¶ 44(f) -(h)). Dichello alleges that the ownership interest for the Equity Manager "gives AB the ability to influence and control the individual at the wholesaler who has day-to-day control over the sale of AB's brands[,] as well as the brands of its competitors." (*Id.* ¶ 52 (emphasis omitted)). Thus, Dichello asserts that AB "effectively assumes control over its wholesalers" through its power over the Equity Manager and ability to terminate its relationship with the wholesaler if the wholesaler does not give the Equity Manager control over "the entirety of [the wholesaler's] business." (*Id.* ¶ 53). Dichello alleges **[*9]** that AB's "core qualifications" for approving an Equity Manager "are loyalty to AB and unwavering allegiance to the promotion of AB's interests alone." (*Id.* ¶ 54).

To support its claim that AB holds inappropriate control over the Equity Manager position, Dichello cites one example. In 2013, Dichello alleges that "AB orchestrated and approved the hiring of Sal DiBetta as [the] Equity Manager." (*Id.* ¶ 55). Mr. DiBetta had no experience in managing a beer wholesaler but had worked as an AB salesman for thirty-one years. (*Id.*). AB then conspired with Mr. DiBettta to control Dichello for AB's benefit. (*Id.* ¶ 56). For example, Mr. DiBetta, "under the direction of AB[,] ... changed Dichello's sales force incentives structure" to prohibit higher commissions on any products competing with AB brands. *Id.* Dichello alleges that Mr. DiBetta supplied Dichello's confidential information to AB and that Mr. DiBetta regularly communicated with AB concerning strategies to undermine Dichello's attempts to maintain independence and manage the business for the benefit of all its beer brands. (*Id.* ¶¶ 57-58).

The Equity Agreement also mandates that AB must approve of "any sale, transfer[,] or other disposition **[*10]** of any interest in Dichello, and may attempt to dictate and impose restrictions on trusts and estate planning instruments executed in connection with family ownership transfers." (*Id.* ¶ 44(j)). Dichello cannot transfer or sell an ownership interest to a third party so that Dichello becomes publicly-owned in any way. (*Id.* ¶ 44(k)). AB can terminate Dichello's distribution rights "in a manner inconsistent with Connecticut law." (*Id.* ¶ 44(l)).

Using the terms of the Equity Agreement and its market power, "AB has attempted to wrongfully exert control over its independent wholesalers including Dichello." (*Id.* ¶ 46). Dichello alleges that AB has "historically" used independent wholesalers to ensure AB's market dominance in the following ways:

- AB withheld incentives from wholesalers whose brand portfolios were not adequately aligned with AB brands and pressured wholesalers to dispense with non-aligned brands in exchange for newly acquired AB brands;
- AB "requir[ed] wholesalers to use best efforts to achieve and maintain the highest practicable sales volume and retail placement of AB products to the detriment of competing brands in the geographic area";
- AB "condition[ed] wholesaler incentives **[*11]** on sales volume for AB products, the retail placement of AB products[,] and/or on AB's percentage of beer sales in a geographic area, thereby disincentivizing a wholesaler from promoting competing brands";
- AB required wholesalers to allocate marketing spending for AB products in proportion to the wholesaler's revenues from AB products in the prior year;
- AB prohibited wholesalers from requesting that a retailer replace AB taps or shelf space with competing brands' products;
- AB also required wholesalers to report sales of AB and competitor products on a regular basis; and
- AB also "prohibit[ed] wholesalers from compensating its salespeople for the sale of competing brands unless it provides the same incentive for the sale of (typically less profitable) AB products."

(*Id.* ¶ 47).

Dichello alleges that the anticompetitive effects of the Equity Agreement and AB's conduct are intended to harm consumers of high-end beers as well as small and local brewers that impose "an important constraint on AB's ability to raise prices of premium and subpremium beers." (*Id.* ¶ 48). According to Dichello, the result of AB's conduct deters or prevents independent distributors "from selling more profitable **[*12]** competing brands," and forces them to "spend more on the promotion and distribution of less profitable AB brands than they otherwise would." (*Id.*). Dichello asserts that the anticompetitive effects of the Equity Agreement and AB's conduct "pose more acute harm to competition in states, such as Connecticut, where AB's competitors distribute a beer brand through one wholesaler in a given territory and that one wholesaler is illegally controlled by AB and its Equity Agreements." (*Id.* ¶ 50).

E. Modified Final Judgement

Some of the conduct by AB described in the Complaint has already been "curtailed" by a "Modified Final Judgment" ("MFJ") entered in litigation between AB and the Department of Justice ("DOJ"). (*Id.* ¶ 51). DOJ filed suit against AB's parent company and SABMiller plc. in response to the parent company's proposed acquisition of SABMiller. (*Id.*). As a result, in 2018, AB's parent company agreed to the MFJ, which prohibited certain anticompetitive practices under the Equity Agreement. (*Id.*). Among other things, the MFJ prohibits AB (as a subsidiary of the parent company) from "provid[ing] any reward or penalty to, or in any other way condition[ing] its relationship with an Independent **[*13]** Distributor ... based upon the amount of sales the Independent Distributor makes of a Third-Party Brewer's Beer or the marketing, advertising, promotion, or retail placement of such Beer." *United States v. Anheuser-Busch InBev SA/NV, No. 16-1483, 2018 U.S. Dist. LEXIS 216015, 2018 WL 6684721, at *8 (D.D.C. Oct.*

22, 2018). This prohibition applies to actions such as requiring the distributor to offer incentives to sell AB's beer if the distributor offers incentives to sell a third-party brewer's beer and preventing the distributor from using best efforts to sell or advertise a third-party brewer's beer. 2018 U.S. Dist. LEXIS 216015, [WL] at *8. The MFJ prevents AB from disapproving the Equity Manager or Successor Manager based on the distributor's dealings with a third-party brewer. 2018 U.S. Dist. LEXIS 216015, [WL] at *9. The MFJ also prohibits AB from requesting or requiring a distributor to report any financial information associated with the purchase, sale, or distribution of a third-party brewer's beer. *Id.*

The MFJ expressly allows AB to require distributors to use best efforts to sell, market, advertise, or promote AB's beer. 2018 U.S. Dist. LEXIS 216015, [WL] at *8 (describing best efforts as "achiev[ing] and maintain[ing] the highest practicable sales volume and retail placement of [AB's beers] in a geographic area"). AB is also allowed to condition incentives, programs, or contractual terms based on the distributor's **[*14]** sales volume of AB's beers, retail placement of AB's beers, or AB's percentage of beer industry sales in that geographic area as long as the conditions do not encourage the distributor to provide less than best efforts to third-party brewers. *Id.* AB may require a distributor to allocate to AB's beers a portion of the distributor's annual spending on marketing no greater than the portion of revenues generated by AB's beers. *Id.* The MFJ does not otherwise address AB's approval of the Equity Manager because this practice fell outside the scope of the DOJ's complaint. (ECF No. 17 ¶ 51).

F. Procedural History

Dichello first filed a complaint against AB in the Connecticut Superior Court, Judicial District of New Haven at New Haven on June 16, 2020. Case No. NNH-CV20-6105163-S, ECF No. 1. On July 17, 2020, AB removed the case to federal court on the basis of diversity jurisdiction. (ECF No. 1). AB moved to dismiss the Amended Complaint on September 11, 2020. (ECF Nos. 26, 27).

II. DISCUSSION

AB seeks dismissal under Rule 12(b)(6), arguing that Dichello failed to plead adequately (i) any antitrust claims under the Sherman Act and the Connecticut Antitrust Act, (ii) a violation of the Connecticut Unfair Trade Practices Act ("CUTPA"), (iii) a claim for tortious interference, **[*15]** and (iv) a claim for declaratory relief. (Mot. to Dismiss, ECF No. 27 at 10-13). I will address each in turn.

A. Legal Standard

"To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to 'state a claim for relief that is plausible on its face.'" Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (quoting Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Ray v. Watnick, 688 F. App'x 41, 41 (2d Cir. 2017) (quoting Ashcroft, 556 U.S. at 678 (citations and internal quotation marks omitted)). The Court must accept the well-pleaded factual allegations of the complaint as true and draw all reasonable inferences in the plaintiff's favor. *See* Warren v. Colvin, 744 F.3d 841, 843 (2d Cir. 2014). The Court must then determine whether those allegations "plausibly give rise to an entitlement to relief." Hayden v. Paterson, 594 F.3d 150, 161 (2d Cir. 2010). In deciding a Rule 12(b)(6) motion, the Court may consider documents attached to, integral to, or incorporated by reference in the complaint.[1] Fed. R. Civ. P. 10(c) ("A copy of a written instrument that is an exhibit to a pleading is a part of the pleading for all purposes.").

---

[1] The Equity Agreement and Modified Final Judgment are incorporated into the Amended Complaint by reference. (ECF No. 17 ¶¶ 44, 51). The Court may also take judicial notice of the provisions of the Modified Final Judgment.

B. Antitrust Claims (Counts Two, Three, Four, Five, Six, and Seven)

Dichello brings six claims under the *Sherman Act* and the Connecticut Antitrust Act, seeking **[*16]** damages and injunctive relief. (ECF No. 17). AB moves to dismiss all of Dichello's antitrust claims, arguing that the Amended Complaint: (1) fails to allege antitrust standing; and (2) fails to allege adverse effects on competition. (Mot. to Dismiss, ECF No. 27 at 21-35). AB also moves to dismiss Counts Three and Seven for failure to allege monopoly power and failure to allege anticompetitive conduct, specific intent, or a dangerous probability of achieving monopoly power. (*Id.* at 30-34). AB moves to dismiss Count Four for failure to allege a per se antitrust violation and Count Five for failure to allege a tying agreement. (*Id.* at 34-36).[2] Because I agree that the Amended Complaint fails to allege per se antitrust violations, adverse effects on competition, market power, or an unlawful exclusive dealing relationship, I find that all of the antitrust claims fail, and I do not address AB's other arguments.

1. Counts Two, Four, and Six: *Conn. Gen. Stat. §§ 35-26*, *35-28* and *Section 1* of the Sherman Act

AB argues that Dichello has failed to allege conduct that violates *Section 1* of the Sherman Act and the *Conn. Gen. Stat. §§ 35-26*, *25-28*. I analyze these claims together because Connecticut courts follow "federal precedent" when interpreting the Connecticut Antitrust **[*17]** Act "unless the text of our antitrust statutes or other pertinent state law" requires a different interpretation, which neither party suggests is the case here. *Reserve Realty, LLC v. Windemere Reserve, LLC, 335 Conn. 174, 185, 229 A.3d 708 (2020)*; *see also id.* (noting that *Conn. Gen. Stat. § 35-26* is "the state analogue of [*Section 1* of the Sherman Act]"); *Tremont Pub. Advisors, LLC v. Connecticut Res. Recovery Auth., 333 Conn. 672, 693-94, 217 A.3d 953 (2019)* (noting that *Conn. Gen. Stat. § 35-28* codifies the prohibition against per se violations set forth in *Section 1* of the Sherman Act). For the reasons below, I grant the Motion to Dismiss as to Counts Two, Four, and Six.

Section 1 of the Sherman Act prohibits "[e]very contract ... or conspiracy in restraint of trade." *15 U.S.C. § 1*. Despite its broad wording, however, *Section 1* was "intended to outlaw only unreasonable restraints." *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)*. "To prove a [Section] 1 violation, a plaintiff must demonstrate: (1) a combination or some form of concerted action between at least two legally distinct economic entities that (2) unreasonably restrains trade." *Geneva Pharms. Tech. Corp. v. Barr Laboratories, Inc., 386 F.3d 485, 506 (2d Cir. 2004)*.

Section 1 treats vertical and horizontal restraints differently. Horizontal restraints are agreements between competitors at the same level of the market structure and are sometimes considered per se violations of *Section 1*, which means that they are deemed illegal even without any evidence that they have an adverse effect on competition. *See* *United States v. Topco Assocs., Inc., 405 U.S. 596, 608-11, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)* (explaining that horizontal agreements allocating **[*18]** territories are per se illegal). The per se treatment of certain horizontal restraints reflects the "longstanding judgment that the prohibited practices by their nature have a 'substantial potential for impact on competition.'" *F.T.C. v. Superior Ct. Trial Lawyers Ass'n, 493 U.S. 411, 433, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990)* (quoting *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 16, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*).

Vertical agreements, by contrast, are "combinations of persons at different levels of the market structure, *e.g.*, manufacturers and distributors." *Anderson News, L.L.C. v. American Media, Inc., 680 F.3d 162, 182 (2d Cir. 2012)* (quoting *Topco Assocs., Inc., 405 U.S. at 608*). Typically, vertical agreements are subject to rule of reason analysis, *Anderson News, L.L.C., 680 F.3d at 183*, which involves an assessment of the impact of the agreement on competition. Rule of reason analysis "requires a weighing of the relevant circumstances of a case to decide whether a restrictive practice constitutes an unreasonable restraint on competition." *Id.* (quoting *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*). In particular, under the rule of reason,

[2] AB also argues that the Amended Complaint fails to allege any injury and that it seeks an advisory opinion from the Court about conduct that AB has not actually engaged in. (Mot. to Dismiss, ECF No. 27 at 28-30).

the plaintiff must establish that the defendant's conduct "adversely affected competition in the relevant market." *MacDermid Printing Sols. LLC v. Cortron Corp., 833 F.3d 172, 182 (2d Cir. 2016)*.

a. Horizontal Restraint

Dichello argues that AB, through the Equity Agreements, is "orchestrating a horizontal restraint of trade," which "justifies per se treatment." (Opp'n, ECF No. 27 at 23). AB argues that the Equity Agreement is a "non-price vertical restraint[]" which must be analyzed under **[*19]** the rule of reason. (Reply, ECF No. 48 at 8).

I agree with AB. The Equity Agreement is a vertical restraint, not a horizontal one requiring per se treatment under Section 1. AB is a beer manufacturer (ECF No. 17 ¶ 4), and Dichello is a wholesale distributor of beers (*id.* ¶ 20). Manufacturers and distributors operate at different levels of the market. *See* *Anderson News L.L.C.., 680 F.3d at 182* (noting that agreements between manufacturers and distributors are typically vertical restraints). The Equity Agreement, as alleged, is an agreement between a manufacturer and a distributor, making it a vertical restraint subject to the rule of reason analysis.

Relying on *United States v. Apple, 791 F.3d 290 (2d Cir. 2015)*, Dichello argues that even though the Equity Agreement may be a vertical restraint, "AB's role in orchestrating a horizontal restraint of trade justifies per se treatment." (Opp'n, ECF No. 42 at 23). In *Apple*, the Second Circuit found that Apple "orchestrated a horizontal conspiracy among [publishers] to raise ebook prices." *Apple, 791 F.3d at 297*. Apple facilitated this conspiracy by contracting (vertically) with publishers on terms that "were only attractive ... to the extent [the publishers] acted collectively." *Id. at 320*. There was "strong evidence that Apple consciously orchestrated a conspiracy **[*20]** among [the publishers]" along with evidence of "express collusion among [the publishers]." *Id. at 316*. "Apple consciously played a key role in organizing that collusion" between the publishers. *Id.* The Second Circuit described this arrangement as a "'hub-andspoke' conspirac[y] in which an entity at one level of the market structure, the 'hub,' coordinates an agreement among competitors at a different level, the 'spokes.'" *Id. at 314* (citing *Howard Hess Dental Labs. Inc. v. Dentsply Int'l, Inc., 602 F.3d 237, 255 (3d Cir. 2010)*). To successfully allege a hub-and-spoke conspiracy, "the plaintiff must also prove the existence of a 'rim' to the wheel in the form of an agreement among the horizontal competitors." *Apple, 791 F.3d at 314 n.15*.

Dichello argues that AB, by imposing the Equity Agreement upon all the distributors, has orchestrated a conspiracy similar to the one in *Apple*. (Opp'n, ECF No. 42 at 26). But the facts alleged in the Amended Complaint belie this argument and suggest instead that AB would have little opportunity to orchestrate collusion in the manner Apple did. First, the Amended Complaint alleges that under the Connecticut Liquor Control Act, "any given brand of beer can only be distributed by a single wholesaler within a defined territory" (ECF No. 17 ¶ 14), which means there may be limited competition **[*21]** between distributors to begin with and none between distributors in the same territory over which AB would have any influence (because there can only be one distributor per territory that sells AB brands). Second, the Amended Complaint fails to allege that the Equity Agreement gives AB any direct control over prices or that it creates incentives for distributors to collude with each other as to price. Third, even if the Amended Complaint is construed as alleging that AB imposes uniform practices on all its distributors, there is still a key missing ingredient: the "rim." Nowhere does the Amended Complaint suggest that Dichello is colluding with its fellow distributors as to price, other terms or conditions of sale, or anything else. "At the pleading stage, a complaint claiming conspiracy, to be plausible, must plead 'enough factual matter (taken as true) to suggest that an agreement was made,' *i.e.*, it must provide 'some factual context suggesting [that the parties reached an] agreement,' not facts that would be 'merely consistent' with an agreement." *Anderson News, L.L.C., 680 F.3d at 184* (quoting *Bell Atlantic Corp., 550 U.S. at 556*). None of Dichello's allegations provide any facts suggesting that the distributors agreed or conspired with each other for **[*22]** anticompetitive ends.

Dichello fails to allege a horizontal conspiracy or any other agreement that warrants per se treatment under *Section 1* of the Sherman Act.

b. Vertical Restraint

As noted, the Equity Agreement is a vertical restraint that must be judged under the rule of reason. Under the rule of reason, the plaintiff bears the burden of showing that the defendant's conduct "had an actual adverse effect on competition as a whole in the relevant market." *Geneva Pharms., 386 F.3d at 506-07*. The plaintiff may satisfy the adverse effect requirement in one of two ways: (1) show an actual adverse effect on competition, or (2) establish that defendant had sufficient market power to cause harm to competition. *Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 546 (2d Cir. 1993)*.

Plaintiffs can show actual adverse effects on competition by demonstrating reduced output, increased prices, or decreased quality. *Virgin Atl. Airways Ltd. V. British Airways PLC, 257 F.3d 256, 264 (2d Cir. 2001)*. Dichello fails to plausibly allege that AB's conduct has caused actual adverse effects on the market. In the Amended Complaint, Dichello states that "AB has used its market power in the relevant market to disadvantage rivals, restrict supply, and reduce price competition." (ECF No. 17 ¶ 41). But this statement is conclusory, and Dichello alleges no facts to support it.

Dichello alleges that "AB **[*23]** ... has used a variety of practices and contractual provisions that limit, impede and restrain the free and independent promotion and distribution of competing beers, generally, and high-end beers, more specifically." *Id.* ¶ 42. "AB has forced upon its independent wholesalers contractual terms that (i) limit the wholesaler's ability to promote, supply and sell beers that compete with AB's beer brands, and (ii) place control of the wholesaler, its operations, and its business, in the hands of AB." *Id.* ¶ 43. Taken as true, these statements do not suggest that these restraints on promotion and distribution actually harmed competition by reducing output, increasing prices, or decreasing quality. Nor is there any suggestion that they actually succeeded in foreclosing competition. The Amended Complaint also states that AB's requirement for wholesalers to allocate marketing spending for AB products proportionally to the revenues generated by AB products "limit[s] the marketing spending necessary for new products entering the marketplace from competing manufacturers," (ECF No. 17 ¶ 47(e)), but Dichello has not alleged that any competitors either failed to gain entry to the market because of **[*24]** AB's conduct or that any distributors declined to carry other manufacturers' products because of AB's conduct. At most, the Court can draw an inference that AB makes it more difficult for the wholesalers to spend disproportionately large amounts of their marketing on the promotion and distribution of competing beers. That is insufficient to plead an actual adverse effect on competition.

The indirect method to establish actual adverse effects is to show that the defendant had sufficient market power to cause an adverse effect on competition. "Market power is the ability: '(1) to price substantially above the competitive level *and* (2) to persist in doing so for a significant period without erosion by new entry or expansion.'" *Com. Data Servers, Inc. v. Int'l Bus. Machs. Corp., 262 F.Supp.2d 50, 73 (S.D.N.Y. 2003)* (quoting *AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 227 (2d Cir.1999)*). Plaintiffs may prove market power "directly by evidence of the control of prices or the exclusion of competition, or it may be inferred from one firm's large percentage share of the market." *Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 98-99 (2d Cir. 1998)*.

The Second Circuit has held "that a market share of over 70 percent is usually 'strong evidence' of monopoly power," *Tops Mkts., Inc., 142 F.3d at 98-99*, but "a market share below 50% is rarely evidence of monopoly power," *Broadway Delivery Corp. v. United Parcel Serv. of Am., Inc., 651 F.2d 122, 129 (2d Cir. 1981)*. The higher the market share, the stronger the inference of monopoly power, **[*25]** but there is not a threshold market share to find market power. *Id. at 129-30* (stating that because the evidence presented a "fair jury issue of monopoly power," the jury should not have been instructed to find monopoly power lacking below a specified market share).

Dichello argues that the Amended Complaint plausibly alleges market power through market share, control over prices, and exclusion of competition. (Opp'n, ECF No. 42 at 33-34). Dichello identifies the relevant market as beer sold in Connecticut and the United States, and AB does not contest this market definition for purposes of this motion. (ECF No. 17 ¶ 36). Dichello alleges that AB is the "largest beer brewing company both in the United States and the world" and "accounts for approximately 40% of all beer sales in the United States." (*Id.* ¶¶ 37-38). Further, AB "account[s] for a large percentage of independent wholesaler's [sic] revenues." (*Id.* ¶ 39). These allegations, even when construed in the light most favorable to Dichello, are insufficient to support a reasonable inference of market power. A market share of 40% in the United States, without more, does not support a reasonable inference of market power. *See* *PepsiCo, Inc. v. Coca-Cola Co., 315 F.3d 101, 109 (2d Cir. 2002)* (finding that "a **[*26]** 64 percent market share is insufficient to infer monopoly power" "[a]bsent additional evidence, such as an ability to control prices or exclude competition"); *Tops Mkts., Inc., 142 F.3d at 98-99* (concluding that there was no monopoly power even with 72% market share due to low barriers to entry); *Blue Cross & Blue Shield United of Wisconsin v. Marshfield Clinic, 65 F.3d 1406, 1411 (7th Cir. 1995)* ("Fifty percent is below any accepted benchmark for inferring monopoly power from market share."). Further neither AB's alleged status as the "largest beer brewing company" nor the allegation that it accounts for "a large percentage" of each wholesaler's revenues suggests that it has market power.

Dichello also argues that it has alleged that AB has market power through its control over prices and/or exclusion of competition. (Opp'n, ECF No. 42 at 33). Specifically, "AB (1) withheld incentives against wholesalers/distributors who did not adequately 'align' their portfolios with AB brands; (2) pressured wholesalers to dispense with non-AB brands in favor of AB brands; (3) conditioned incentives on sales volume of AB products; and (4) forbade wholesalers from even requesting that a retailer replace AB taps or shelf space with competing taps or shelf space."[3] (Opp'n, ECF No. 42 at 33); (*see* ECF No. 17 ¶ 47). Dichello also alleges **[*27]** that AB has forced upon distributors contractual terms that limit the wholesaler's ability to promote, supply, and sell competing beers, and place control of the wholesaler in the hands of AB through the approval of the Equity Manager. (*Id.* ¶¶ 43-44). But these allegations do not speak to control over pricing at all. And there are no facts pled anywhere else in the Amended Complaint suggesting that AB can dictate the pricing of its products once they are in the hands of independent distributors, let alone that it can successfully price above competitive levels for significant periods through control over pricing in the market. If anything, Dichello's allegations indicate that AB *lacks* the ability to price independently in the premium and sub-premium beer segments. "[C]ompetition in the high-end beer segment serves as an important constraint on the ability of AB to raise beer prices in the premium and sub-premium segments." (ECF No. 17 ¶ 27). Further, while Dichello's allegations suggest that AB has sought to require independent distributors to favor its brands at the expense of competing brands, they do not suggest this strategy has been successful in actually excluding any competing **[*28]** beer manufacturers from the relevant market. *See* *Tops Markets, Inc., 142 F.3d at 96* (no adverse effect on competition where plaintiff did not allege that other supermarkets were excluded from the market but only that plaintiff was prevented from opening store).

Because Dichello fails to allege actual adverse effects or market power, Dichello fails to plead a violation of *Section 1* under the rule of reason. Therefore, I grant the Motion to Dismiss as to Counts Two, Four, and Six.

2. Counts Three and Seven: *Conn. Gen. Stat. § 35-27* and *Section 2* of the Sherman Act

Dichello also makes claims under *Section 2* of the Sherman Act and *Conn. Gen. Stat. § 35-27*. I analyze these claims together because *Section 35-27* "is patterned after *[Section] 2* of the Sherman Act." *Shea v. First Federal Sav. & Loan Asso., 184 Conn. 285, 304 (Conn. 1981), 439 A.2d 997*; *see also* *Tremont Pub. Advisors, 333 Conn. at 691* (stating that the Connecticut state courts "follow federal precedent" when interpreting the act unless state law indicates otherwise). For the reasons below, I grant the Motion to Dismiss as to Counts Three and Seven. *Section 2* of the Sherman Act prohibits monopolization and attempts to monopolize. *See* *15 U.S.C. § 2*. Dichello alleges two claims under *Section 2*: (1) monopolization and (2) attempted monopolization. (ECF No. 17 ¶ 103).

[3] Although some of these practices are no longer allowed under the Modified Final Judgment which prohibits AB from "condition[ing] its relationship with[] an Independent Distributor ... upon the amount of sales the Independent Distributor makes of a Third-Party Brewer's Beer or the marketing, advertising, promotion, or retail placement of such beer," *MFJ, 2018 U.S. Dist. LEXIS 216015, 2018 WL 668472 at *8*, I consider them to the extent they could support a claim for damages for AB's past practices.

a. Monopolization

To establish a monopolization claim, "plaintiffs must prove that defendants possessed monopoly power, and willfully acquired or maintained **[*29]** that power in the relevant market." *Geneva Pharms., 386 F.3d at 495* (citing *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*). Monopoly power, which is a synonym for market power, is the "power to control prices or exclude competition." *Geneva Pharms., 356 F.3d at 500*; *see* *In re Aluminum Warehousing Antitrust Litig., 95 F.Supp.3d 419, 453 (S.D.N.Y. 2015)* (stating that market power is sometimes referred to as monopoly power). Plaintiffs may prove monopoly power "directly through evidence of control over prices or the exclusion of competition" or indirectly based on market share. *Geneva Pharms., 389 F.3d at 500*. "[W]illful acquisition or maintenance" is shown if the defendant "use[s] monopoly power to foreclose competition, to gain a competitive advantage, or to destroy a competitor." *Eastman Kodak Co. v. Image Tech Servs., Inc., 504 U.S. 451, 482-83, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*. "The willful acquisition or maintenance of monopoly power is to be distinguished from growth or development that is the result of superior product, business acumen or historical accident." *Id. at 495*.

As discussed above in connection with *Section 1* of the Sherman Act, Dichello has failed to allege facts suggesting that AB has monopoly or market power. Therefore, the monopolization claim fails.

b. Attempted Monopolization

Attempted monopolization requires "(1) that the defendant has engaged in predatory or anticompetitive conduct with (2) specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*. "Attempted **[*30]** monopolization requires some degree of market power," but a "lesser degree of market power" than monopolization claims. *Tops Mkts., Inc., 142 F.3d at 100*. "In order to determine whether there is a dangerous probability of monopolization, courts have found it necessary to consider the relevant market and the defendant's ability to lessen or destroy competition in that market." *Spectrum Sports, Inc., 506 U.S. at 456*; *see also* *Tops Mkts., Inc., 142 F.3d at 100* (noting that in determining the likelihood of achieving market power, the Court must look at "the defendant's relevant market share in light of other market characteristics, including barriers to entry").

Dichello argues that it has adequately pled attempted monopolization based on AB's alleged anticompetitive conduct via the Equity Agreement and AB's market share. (Opp'n, ECF No. 42 at 37). As noted, the Amended Complaint alleges that "AB accounts for approximately 40% of all beer sales" in the relevant market. (ECF No. 17 ¶¶ 38, 36). Although an attempted monopolization claim requires a "lesser degree of market power," *Tops Mkts., Inc., 142 F.3d at 100*, Dichello's allegations still fall short. As discussed above, market share of 40% does not support a reasonable inference of market power. Further, Dichello fails to allege market conditions that make the beer market **[*31]** ripe for monopolization, such as high barriers to entry, or that AB has the ability or is near gaining the ability to insulate its prices from competitive pressure. *See* *Apotex Corp. v. Hospira Healthcare Indian Priv. Ltd., No. 18-4903, 2020 U.S. Dist. LEXIS 2343, 2020 WL 58247, at *7 (S.D.N.Y. Jan. 6, 2020)* (finding that the Plaintiff failed to allege a dangerous probability of acquiring market power with market shares of 43.57% and 30.76% and allegations that "make plain that there was never a 'dangerous probability' that [Defendant] could insulate its prices from competition, given that [Defendant] was bound to prices set by" competitors).

Dichello argues that it has pled "high barriers to entry in this business," (Opp'n, ECF No. 42 at 37), but one searches the Amended Complaint in vain for any factual allegations about barriers to entry. Indeed, the Amended Complaint suggests that even local "craft" beers have succeeded in entering the market, thanks in part to the "tiered" market structure and the independence of wholesalers. (ECF No. 17 at ¶¶ 19-21). Although the Amended Complaint alleges that AB has sought to undermine that independence, it has not alleged any facts suggesting that AB has succeeded in erecting barriers to entry. The Amended Complaint alleges no facts about whether it is difficult for new beer manufacturers **[*32]** to enter the market or how long it takes to enter the market. *See* *United States v. Visa U.S.A., Inc., 163 F.Supp.2d 322, 342 (S.D.N.Y. 2001)* (stating that the "longer the lags before new entry, the less likely it is that potential entrants would be able to enter the market in a timely, likely, and sufficient scale to deter or counteract any anticompetitive restraints"). And as noted above, Dichello alleges that the "competition in the high-end beer segment serves as an important constraint on the ability of AB to raise beer prices in the premium and sub-premium segments." (ECF No. 17 ¶ 27). As previously discussed, this allegation undermines any argument that AB can insulate or control prices in those segments.

Dichello has failed to allege a dangerous probability of achieving market power. Because Dichello failed to plead adequately a claim of monopolization or attempt to monopolize under *Section 2* of the Sherman Act, I grant the Motion to Dismiss as to Counts Three and Six.

3. Count Five: *Conn. Gen. Stat. § 35-29*

Dichello also sets forth a claim under *Conn. Gen. Stat. § 35-29*, which provides that "[e]very lease, sale or contract for the furnishing of services or for sale of commodities ... shall be unlawful where the effect of such lease or sale or contract for sale or such condition or understanding may be to **[*33]** substantially lessen competition or tend to create a monopoly in any part of trade or commerce." *Conn. Gen. Stat. § 35-29* is "the Connecticut analogue of [Section] 3 of the Clayton Act." *Reserve Realty, LLC, 335 Conn. at 199*. "Section 3 provides a cause of action for anti-competitive 'product tying' and 'exclusive dealing' arrangements." *Campbell v. Austin Air Systems, Ltd., 423 F.Supp.2d 61, 70 (W.D.N.Y. 2005)*. To prove an illegal tying arrangement, the plaintiff "must demonstrate ... that a defendant tied the sale of two distinct products; in other words, that it sold one product on the condition that another be purchased as well." *Id.*

An exclusive dealing agreement is a contract between a seller and a buyer that prohibits the buyer from purchasing the goods from another seller. *Conn. Ironworkers Employers' Ass'n v. New England Reg'l Council of Carpenters, 324 F.Supp.3d 293, 306 (D. Conn. 2018)*. The agreement does not need to contain an "express exclusivity requirement ... because *de facto* exclusive dealing may be unlawful." *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254, 282 (3d Cir. 2012)*; *see also* *Maxon Hyundai Mazda v. Carfax, Inc., No. 13-2680, 2014 U.S. Dist. LEXIS 139480, 2014 WL 4988268, at *11 (S.D.N.Y. Sept. 29, 2014)* ("The concept of *de facto* exclusivity is based on the premise that some agreements, though they do not require a contracting party not to deal in its counterparty's competitor's goods in so many words, still have the effect of being exclusive."). Section 3 of the Clayton Act only prohibits exclusive dealing agreements that "substantially lessen competition or tend to create a monopoly in a line of commerce." *Anheuser-Busch, Inc. v. G.T. Britts Distrib., Inc., 44 F.Supp.2d 172, 176 (N.D.N.Y. 1999)*; *see* *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)* (stating **[*34]** that there is no violation of the Clayton Act unless the agreement "will foreclose competition in a substantial share of the line of commerce affected"). In determining whether the agreement is illegal, courts examine if competitors can reach the market through other ways and if there are high barriers to entry. *See* *CDC Technologies, Inc. v. IDEXX Laboratories, Inc. 186 F.3d 74, 80-81 (2d Cir. 1999)* (concluding that there was no evidence that the exclusive dealing contract impeded a competitor's ability to reach customers or that there were "significant barriers to entry"). In addition, courts evaluate whether the agreements are imposed on distributors rather than end-users, because the former are "generally less cause of anticompetitive concern [since] there may be other avenues available to competing manufacturers to distribute their product." *Anheuser-Busch, Inc., 44 F.Supp.2d at 176*.

In its opposition brief, Dichello asserts that it did not allege a "tying arrangement," but, instead, an exclusive dealing arrangement in violation of *Conn. Gen. Stat. § 35-29*. (Opp'n, ECF No. 42 at 38-39). Specifically, Dichello argues that it pled an exclusive dealing arrangement based on AB's coercion of distributors to sign the Equity Agreement, which "forced Dichello to devote greater efforts" to AB products. (*Id.* at 39). I disagree. The Amended **[*35]** Complaint does not plead an unlawful exclusive dealing agreement. First, Dichello admits being the "wholesale distributor of numerous beer brands" including AB. (ECF No. 17 ¶ 2). While AB contracts only with Dichello to distribute AB beers in New Haven, Fairfield, and Middlesex—as required by state law—Dichello is free to distribute other beer manufacturers' products. (*Id.* ¶ 2); *see also* (*id.* ¶ 14 (alleging that the Connecticut Liquor Control Act prohibits a single brand from being distributed by more than one distributor in the same territory, but not that distributor may not carry competing brands)). Nor does Dichello allege that the effect of the Equity Agreement is to impose *de facto* exclusivity. The Amended Complaint does not contain allegations suggesting that, as a result of the Equity Agreement and the "best efforts" clause, Dichello cannot distribute other products or that Dichello has, in fact, stopped distributing other brands.

Even if the Equity Agreement were an exclusive dealing arrangement, Dichello has not pled that it forecloses competition in a substantial share of the beer market either in Connecticut or the United States. As discussed above, Dichello has not alleged **[*36]** that the requirements imposed on it under the Equity Agreement have actually succeeded in foreclosing any competition. The allegations that the Equity Agreement requires Dichello to favor AB's brands do not suggest that the Agreement has had the effect of foreclosing competition from other brands. Indeed, competing beer manufacturers may, according to the allegations, sell their brands through other distributors, even in Dichello's territory. (ECF No. 17 ¶ 14); *see* *Anheuser-Busch, Inc., 44 F.Supp.2d at 176* (dismissing the distributor's counterclaim under Section 3 of the Clayton Act because "[t]he Complaint does not allege that [the manufacturer's] competitors are precluded from reaching retailers because of the [manufacturer's handling of its distributor arrangements]").

Dichello fails to plead a claim under *Conn. Gen. Stat. § 35-29*. I grant the Motion to Dismiss as to Count Five.

C. Count One: CUTPA

CUTPA prohibits "unfair methods of competition and unfair or deceptive acts or practices in the conduct of any trade or commerce." *Conn. Gen. Stat. § 42-110b*. A CUTPA claim must allege that "(1) the defendant committed an unfair or deceptive act or practice; (2) the act complained of was performed in the conduct of trade or commerce; and (3) the prohibited act was the proximate cause of **[*37]** harm to the plaintiff." *Pellet v. Keller Williams Realty Corp., 177 Conn.App. 42, 62, 172 A.3d 283 (2017)*. Courts consider three factors to determine whether an act or practice is unfair: 1) whether it is in violation of public policy as established by common law or statute, 2) whether it is otherwise immoral, and 3) whether it causes substantial harm to consumers. *Tillquist v. Ford Motor Credit Co., 714 F. Supp. 607, 616 (D. Conn. 1989)*.

Dichello's CUTPA claim is based on two theories: (1) AB violates the public policy underlying state and federal antitrust laws, and (2) AB's control of Dichello through the Equity Agreement violates the public policy embodied in the Connecticut Liquor Control Act. (Opp'n, ECF No. 42 at 15-23); (ECF No. 17 ¶¶ 60-70). I address only the latter theory and find it sufficient to support the CUTPA claim.

Under the Connecticut Liquor Control Act, the state grants separate permits for beer manufacturers, wholesalers, and retailers. *See e.g.*, *Conn. Gen. Stat. §§ 30-16*, *30-17c*, *30-20*. Regulations issued under the Act prohibit any "person, corporation or group of persons or corporations who, through stock ownership or otherwise, control or have the power to control a permit business of one class" from "control[ing] or hav[ing] the power to control a permit business of another class of permit." *Conn. Agencies Regs. § 30-6-A4(b)*. I find that Dichello has alleged a violation of the **[*38]** public policy underlying this provision and, thus, has alleged a CUTPA violation based on the "public policy" prong.

The Connecticut Liquor Control Act was enacted in part to "eliminate[] the so-called 'tied-house evil.'" *Eder v. Patterson, 132 Conn. 152, 155, 42 A.2d 794 (1945)*. "Tied-house evil" is the "monopolistic control of distributors by manufacturers" of alcohol. *Park Benziger & Co., Inc. v. Southern Wine & Spirits, Inc., 391 So.2d 681, 683 n.3 (Fla. 1980)*. Here, Dichello alleges that AB is violating the public policy of preventing "tied-house evil" because it has approval rights over the Equity Manager, only the Equity Manager can control the daily operations of the wholesaler, Dichello must convey the Equity Manager an ownership interest of at least 25%, AB can withdraw its approval of the Equity Manager, and AB must approve the successor to the Equity Manager. (ECF No. 17 ¶ 44). Regardless of whether these allegations describe an actual violation of the "control" restrictions in the Liquor Control Act, when construed in Dichello's favor, they amount to a violation of the broader policy underlying the Act. From the facts pled, it is reasonable to believe that AB asserts substantial influence over the wholesaler.

AB argues that it does not control Dichello and that Dichello is a family-owned business. (Mot. to Dismiss, ECF **[*39]** No. 27 at 19). AB relies on *Eder v. Patterson, 132 Conn. 152, 42 A.2d 794 (1945)*, which involved the Connecticut Liquor Control Commission's refusal to renew wholesale liquor permits in two cases. Both cases involved an employer and employee who held retail permits and also owned stock in an applicant for a wholesale permit. *132 Conn. at 154-55*. Individually, the employer and employee owned less than 50% of the stock, but together they owned 50% or more. *Id.* The court found that neither employer-employee pair controlled the corporations that sought the permit because neither owned a majority of the stock. *Id. at 155*. The court noted that the decision might have been different had there been evidence about the relationship between the employer and the employee to justify treating their stock ownership as a single bloc. *Id. at 155-56*.

Eder is distinguishable for two reasons. First, *Eder* involved a violation only of the Liquor Control Act, *Id. at 153-54*, not CUTPA, and CUTPA sweeps more broadly. "[W]hile a violation of another statute *can* serve as the basis for a CUTPA claim, the defendant in the present case does not necessarily have to be found to have violated the Liquor Control Act in order to be found to have violated CUTPA for conduct controlled by the Liquor Control Act. [The Connecticut **[*40]** Supreme Court] previously has indicated that a plaintiff may bring a CUTPA claim that is predicated upon the public policy embodied in another statute, irrespective of whether the conduct in question expressly is prohibited by the letter of that statute, so long as the claim is consistent with the regulatory principles established by the underlying statute." *Eder Bros. v. Wine Merchs. of Conn., Inc., 275 Conn. 363, 381 (2005)* (internal quotation marks and citation omitted). Second, as the decision itself notes, *Eder* does not involve facts relating to control outside of stock ownership and does not foreclose a finding of control based on other facts. Because of the breadth of CUTPA, I need not decide whether the facts alleged regarding the influence AB has gained through the Equity Agreement actually amount to a prohibited level of control under the Liquor Control Act. I note only that the *Eder* decision would not foreclose a finding of such control.

Because Dichello has pled a plausible CUTPA claim, I deny the motion to dismiss Count One.

D. Count Eight: Tortious Interference with Contract

Dichello alleges that AB, through the terms of the Equity Agreement and its direct dealings with Dichello's Equity Manager, has interfered with Dichello's contractual **[*41]** relationship with its Equity Manager. (ECF No. 17 ¶¶ 108-10). "A claim for tortious interference with contractual relations requires the plaintiff to establish (1) the existence of a contractual or beneficial relationship, (2) the defendants' knowledge of that relationship, (3) the defendants' intent to interfere with the relationship, (4) the interference was tortious, and (5) a loss suffered by the plaintiff that was caused by the defendants' tortious conduct." *Landmark Inv. Grp., LLC v. CALCO Constr. & Dev. Co., 318 Conn. 847, 864, 124 A.3d 847 (Conn. 2015)* (quoting *Appleton v. Bd. of Ed. of Town of Stonington, 254 Conn. 205, 212-13, 757 A.2d 1059 (2000)*). For a successful tortious interference claim, the plaintiff "must prove that the defendant's conduct was in fact tortious." *Landmark Inv. Grp., LLC, 318 Conn. at 868*. "This element may be satisfied by proof that the defendant was guilty of fraud, misrepresentation, intimidation or molestation ... or that the defendant acted maliciously." *Id.* (quoting *Daley v. Aetna Life & Casualty Co., 249 Conn. 766, 805, 734 A.2d 112 (1999)*). "The plaintiff in a tortious interference claim must demonstrate malice on the part of the defendant, not in the sense of ill will, but intentional interference without justification." *Daley, 249 Conn. at 806*. "[N]ot every act that disturbs a contract or business expectancy is actionable." *Id.* Thus, "an action for intentional interference with business relations ... requires the plaintiff to plead ... at least some improper **[*42]** motive or improper means." *Blake v. Levy, 191 Conn. 257, 262, 464 A.2d 52 (1983)*.

AB argues that Dichello's tortious interference claim is limited to its allegations about the dealings with Sal DiBetta, which is time-barred. (Mot. to Dismiss, ECF No. 27 at 36); *see* *Conn. Gen. Stat. § 52-577* (stating that "[n]o action founded upon a tort shall be brought but within three years from the date of the act or omission"). I disagree that Dichello's allegations are limited to Sal DiBetta. Even if the claims about Mr. DiBetta are time-barred,[4] Dichello

[4] It is not clear if the claims are time-barred. Dichello hired Mr. DiBetta in 2013. (ECF No. 17 ¶ 55). The Amended Complaint does not mention when Mr. DiBetta terminated his employment with Dichello.

alleges an ongoing interference with its current contractual relationship with the Equity Manager. Dichello asserts that AB is aware of the relationship between Dichello and the Equity Manager, that the Equity Manager owes a duty of loyalty to Dichello, but that AB maintains control over the Equity Manager. (*See* ECF No. 17 ¶¶ 52-53, 108-09). There are no allegations suggesting that the Equity Manager position has been terminated or that the Equity Agreement provisions concerning the Equity Manager no longer apply.

AB also argues that Dichello fails to allege that AB had an improper motive or used improper means. (Mot. to Dismiss, ECF No. 27 at 37). I disagree. Dichello alleges that AB seeks to undermine Dichello's relationship **[*43]** with the Equity Manager "to advance its own economic interests to the detriment of Dichello." (ECF No. 17 ¶ 110). Dichello further asserts that AB "has used a variety of practices and contractual provisions that limit, impede and restrain the free and independent promotion and distribution of competing beers, generally, and high-end beers, more specifically." (*Id.* ¶ 42). Dichello supports this assertion by pointing to provisions of the Equity Agreement by which AB seeks to limit the wholesaler's promotion of competing beers. (*See id.* ¶ 47). When these allegations are construed in Dichello's favor, they are adequate to plead improper motive.

Because Dichello has pled a tortious interference claim, I deny the Motion to Dismiss as to Count Seven.

E. Declaratory Relief (Count Nine)

The Declaratory Judgment Act provides that the courts "may declare the rights and other legal relations of any interested party seeking such declaration" in a case of "actual controversy." *28 U.S.C. § 2201(a)*. An actual controversy exists when there is a "substantial controversy, between parties having adverse legal interests, of sufficient immediacy and reality to warrant the issuance of a declaratory judgment." *Duane Reade, Inc. v. St. Paul Fire & Marine Ins. Co., 411 F.3d 384, 388 (2d Cir. 2005)* (quoting *Md.* *Cas. Co. v. Pac. Coal & Oil Co., 312 U.S. 270, 273, 61 S. Ct. 510, 85 L. Ed. 826 (1941)*). **[*44]**

However, the Declaratory Judgment Act "confers a discretion on the courts rather than an absolute right upon the litigant." *Wilton v. Seven Falls Co., 515 U.S. 277, 287, 115 S. Ct. 2137, 132 L. Ed. 2d 214 (1995)*. Courts may exercise their discretion to refuse to hear a "declaratory action that they would otherwise be empowered to hear." *Dow Jones & Co. v. Harrods Ltd., 346 F.3d 357, 359 (2d Cir. 2003)* (per curiam). In deciding whether to exercise their discretion to issue a declaratory judgment, courts consider "(1) whether the judgment will serve a useful purpose in clarifying or settling the legal issues involved; ... (2) whether a judgment would finalize the controversy and offer relief from uncertainty[;] ... [(3)] whether the proposed remedy is being used merely for 'procedural fencing' or a 'race to res judicata'; [(4)] whether the use of a declaratory judgment would increase friction between sovereign legal systems or improperly encroach on the domain of a state or foreign court; and [(5)] whether there is a better or more effective remedy." *Id. at 359-60*. Courts reject declaratory judgment claims "'when other claims in the suit will resolve the same issues,' because under such circumstances, a declaratory judgment will not serve any useful purpose." *Optanix v, Alorica Inc., No. 20-9660, 2021 U.S. Dist. LEXIS 125808, 2021 WL 2810060, at *3 (S.D.N.Y. July 6, 2021)* (quoting *EFG Bank AG, Cayman Branch v. AXA Equitable Life Ins. Co., 309 F. Supp. 3d 89, 99 (S.D.N.Y. 2018)*).

Dichello "seeks a declaration that the AB Equity Agreement and/or its provisions **[*45]** are illegal, invalid and/or unenforceable," (ECF No. 17 ¶ 116), because it violates the Connecticut Liquor Control Act, the Connecticut Antitrust Act, and the Sherman Act, (ECF No. 17 ¶ 114). The request for declaratory judgment is thus duplicative of the relief sought under Counts One through Seven. Dichello also seeks a declaration that the Equity Agreement is invalid because it "lacks consideration." (ECF No. ¶ 115). But Dichello pleads no facts that support this conclusory allegation and provides little explanation for the notion of lack of consideration in its opposition brief. Under these circumstances, I decline to grant the requested declaratory judgment and dismiss Count Nine.

III. CONCLUSION

Defendant's Motion to Dismiss is GRANTED with respect to Counts Two through Seven and Count Nine and DENIED with respect to Counts One and Eight.

IT IS SO ORDERED.

/s/ Michael P. Shea, U.S.D.J.

For Direct Purchaser Plaintiffs: Adam J. Zapala and Elizabeth T. Castillo, COTCHETT PITRE & MCCARTHY LLP, Burlingame, CA; Daniel E. Gustafson, Daniel C. Hedlund & Joshua J. Rissman, GUSTAFSON GLUEK PLLC, Minneapolis, MN; Megan Jones, HAUSFELD LLP, San Francisco, CA; Timothy Kearns, HAUSFELD LLP, Washington, DC; and Jason S. Hartley, HARTLEY LLP, San Diego, CA.

For Commercial-and-Institutional Indirect Purchaser Plaintiffs: Alec Blaine Finley, CUNEO GILBERT & LADUCA LLP, Washington, DC; S. Sterling Aldridge, **[*2]** BARRETT LAW GROUP PA, Lexington, MS; and Shawn M. Raiter, LARSON KING LLP, Saint Paul, MN.

For Cargill Defendants: X. Kevin Zhao, GREENE ESPEL PLLP, Minneapolis, MN; Nicole A. Saharsky and William Stallings, MAYER BROWN LLP, Washington, DC.

For JBS Defendants: Sami H. Rashid, QUINN EMANUEL URQUHART & SULLIVAN LLP, New York, NY; Patrick E. Brookhouser, Jr., MCGRATH NORTH, Omaha, NE; and Donald G. Heeman, SPENCER FANE LLP, Minneapolis, MN

For National Beef Packing Company, LLC, Defendant: Benjamin L. Ellison, JONES DAY, Minneapolis, MN; and Michelle Fischer, JONES DAY, Cleveland, OH.

For Tyson Defendants: Jon B. Jacobs, PERKINS COIE LLP, Washington, DC; and Ulrike Connelly, PERKINS COIE LLP, Seattle WA.

Judges: JOHN R. TUNHEIM, Chief United States District Judge.

Opinion by: JOHN R. TUNHEIM

Opinion

MEMORANDUM OPINION AND ORDER

Plaintiffs, comprising four putative classes across several actions, allege that Defendants, the nation's four largest beef packers, conspired to generate historically unprecedented profit margins in violation of the Sherman Act, the Packers and Stockyards Act, and myriad state laws; and that Defendants manipulated the Live Cattle Futures market in violation of the Commodity Exchange Act. Defendants ask the Court to dismiss **[*3]** Plaintiffs' claims.

Previously, the Court granted Defendants' first joint motions to dismiss because Plaintiffs had not pleaded plausible direct evidence of an unlawful agreement or enough defendant-specific allegations of parallel conduct. The Court also granted Plaintiffs leave to amend. Because Plaintiffs now plausibly plead that Defendants conspired to suppress the price of fed cattle and drive up the price of beef in order to realize sky-high margins, the Court will deny Defendants' Joint Motions to Dismiss except with respect to some of Plaintiffs' state law claims. Additionally, the Court will deny Defendants' Individual Motions to Dismiss and grant Plaintiffs' Motions to Approve Alternative Service on JBS S.A.

BACKGROUND

I. FACTUAL BACKGROUND[1]

Plaintiffs consist of cattle producers, producer organizations, and those who transact in live cattle futures and options (collectively, "Producer Plaintiffs"); direct purchasers of beef ("Direct Purchaser Plaintiffs"); and consumer and commercial-and-institutional indirect purchasers of beef (collectively, "Indirect Purchaser Plaintiffs").[2] Defendants—Cargill, Inc. and a Cargill subsidiary ("Cargill"), JBS S.A. and JBS subsidiaries ("JBS"), **[*4]** Tyson Foods, Inc. and a Tyson subsidiary ("Tyson"), and National Beef Packing Company, LLC ("National Beef")—are packers that purchase fed cattle for slaughter and then sell high-quality beef products to processors, wholesalers, and retail outlets. (ECF 19-1222, Sealed Third Am. Compl. ("TAC") ¶¶ 3, 42-67, Dec. 28, 2020, Docket No. 312.)[3] Defendants purchase and slaughter between 82% and 87% of all fed cattle sold on an annual basis. (*Id.* ¶ 4.)

Fed cattle prices increased steadily from 2009 to 2014 in response to strong beef demand and a shortage of fed cattle following several years of droughts. (*Id.* ¶ 7.) In November 2014, the price for fed cattle peaked at $170 per hundredweight ("cwt"). (*Id.*) The industry expected the price of fed cattle to stabilize in 2015, continue at or around the $150/cwt mark for several years, and then experience a gradual decline. (*Id.*) However, beginning in 2015, the

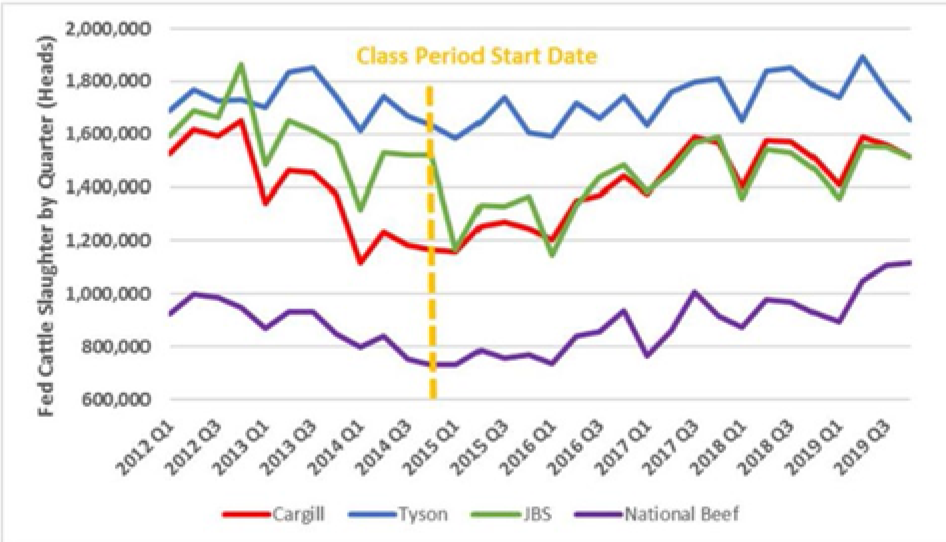
---

[1] The Court will provide a general background of Plaintiffs' allegations here and more specific allegations when discussing Plaintiffs' separate claims below.

[2] The Court will occasionally refer to the consumer and commercial-and-institutional indirect purchasers separately. When doing so, the consumer indirect purchaser plaintiffs will be referred to as "Peterson Plaintiffs" and the commercial-and-institutional indirect purchasers will be referred to as "Erbert & Gerbert's."

[3] As Plaintiffs' complaints are nearly identical, the Court will cite almost exclusively to Producer Plaintiffs' operative complaint.

start of Plaintiffs' proposed class period, the price for fed cattle plummeted while the price for beef soared. (*Id.* ¶¶ 1, 16-17.) The "meat margin," which is the spread between the price packers pay for fed cattle and the price they charge for beef products, grew by historic proportions after **[*5]** hitting a low of $50 in the months leading up to 2015, (*id.* ¶¶ 5, 99), as depicted in the following figure:



(*Id.* ¶ 16, fig. 5.)

Defendants' profitability is driven by the meat margin. (*Id.* ¶ 5.) Plaintiffs allege that Defendants' unprecedented profits from 2015 onward resulted from coordinated conduct to jointly manage fed cattle slaughter volumes; jointly manage cash cattle purchases and enforce anticompetitive procurement practices; import foreign cattle after it became uneconomical to do so; and close and idle plants. (*Id.* ¶¶ 8-9; ECF 20-1414, Sealed Am. Compl. ("DPP Am. Compl.") ¶¶ 9-10, Jan. 28, 2021, Docket No. 125.) Defendants' coordinated conduct allegedly led to a suppression of the price of fed cattle, which meant that producers were paid less than they would have been in a competitive market, (TAC ¶ 2), and an increase in the price of beef, which meant that purchasers paid more than they would have absent such conduct by Defendants, (DPP Am. Compl. ¶ 3.) Plaintiffs also allege that Defendants manipulated the Live Cattle Futures to further increase their profits. (TAC ¶¶ 345, 396.)

II. PROCEDURAL BACKGROUND

Plaintiffs allege that Defendants engaged in a price-fixing conspiracy **[*6]** in violation of § 1 of the Sherman Act. (*E.g.*, TAC ¶¶ 446-53.) Additionally, Producer Plaintiffs bring claims under the Packers and Stockyards Act ("PSA") and the Commodity Exchange Act ("CEA"). (*Id.* ¶¶ 454-83.) Indirect Purchaser Plaintiffs bring claims for damages under various state antitrust and consumer protection laws and for unjust enrichment.[4] (ECF 19-1129, Sealed Third Am. Comp. ("Peterson TAC") ¶¶ 375-743, Jan 27, 2021, Docket No. 256; ECF 20-141, Sealed Am. Compl. ("E&G Am. Compl.") ¶¶ 347-414, Jan. 28, 2021, Docket No. 125.)

Previously, the Court granted Defendants' first joint motions to dismiss after concluding that Plaintiffs had failed to plausibly plead direct evidence of an antitrust conspiracy or parallel conduct by which to infer such a conspiracy. *In re Cattle Antitrust Litig.*, No. 19-1222, 2020 WL 5884676, at *5-6 (D. Minn. Sept. 29, 2020). With respect to the PSA, the Court concluded that Plaintiffs failed to plausibly allege that Defendants could have suppressed or reduced competition. *Id.* at *7. The Court then granted Plaintiffs leave to amend. *Id.* at *8.

---

[4] The District of Columbia is, of course, not a state. However, for the sake of simplicity, the Court will refer to all non-federal claims as state law claims.

Plaintiffs timely amended the operative complaints, and now Defendants, individually and collectively, ask the Court to dismiss Plaintiffs' claims with prejudice. (*E.g.*, ECF 19-1222, Mots. Dismiss, Feb. 18, 2021, Docket Nos. 326, 330, 333, 338, and 342.) Plaintiffs **[*7]** oppose the Motions and ask the Court to approve alternative service on JBS S.A. in Brazil. (*E.g.*, ECF 19-1222, Mot. Approve Alternative Service, Mar. 30, 2021, Docket No. 356.)

DISCUSSION

I. DEFENDANTS' JOINT MOTIONS TO DISMISS

A. Standard of Review

In reviewing a motion to dismiss under Rule 12(b)(6), the Court considers all facts alleged in the complaint as true to determine if the complaint states a "'claim to relief that is plausible on its face.'" *Braden v. Wal-Mart Stores, Inc., 588 F.3d 585, 594 (8th Cir. 2009)* (quoting *Ashcroft v. Iqbal, 556 U.S. 662, 678 (2009)*). The Court construes the complaint in the light most favorable to the plaintiff, drawing all inferences in their favor. *See Ashley Cnty. v. Pfizer, Inc., 552 F.3d 659, 665 (8th Cir. 2009)*. Although the Court accepts the complaint's factual allegations as true, and in the light most favorable to the plaintiff, it is "not bound to accept as true a legal conclusion couched as a factual allegation," *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555 (2007)*, or mere "labels and conclusions or a formulaic recitation of the elements of a cause of action," *Iqbal, 556 U.S. at 678* (quotation omitted). Instead, "[a] claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* At the motion to dismiss stage, the record for review before the Court is generally limited **[*8]** to the complaint and any documents attached as exhibits that are necessarily embraced by the complaint. *Porous Media Corp. v. Pall Corp., 186 F.3d 1077, 1079 (8th Cir. 1999)*.

B. Federal Claims

1. Sherman Act

Section 1 of the Sherman Act provides that "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. To establish a claim under § 1, "a plaintiff must demonstrate (1) that there was a contract, combination, or conspiracy; (2) that the agreement unreasonably restrained trade under either a per se rule of illegality or a rule of reason analysis; and (3) that the restraint affected interstate commerce." *Insignia Sys., Inc. v. News Am. Mktg. In—Store, Inc., 661 F. Supp. 2d 1039, 1062 (D. Minn. 2009)*. Because § 1 of the Sherman Act "does not prohibit [all] unreasonable restraints of trade . . . but only restraints effected by a contract, combination, or conspiracy," *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 775 (1984)*, "'the crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express,'" *Twombly, 550 U.S. at 553* (cleaned up).

"Certain agreements, such as horizontal price fixing and market allocation, are thought so inherently anticompetitive that each is illegal per se without inquiry into the harm it has actually caused." *Copperweld, 467 U.S. at 768*. Thus, where—as here—plaintiffs allege **[*9]** horizontal price fixing or agreements, the only thing that must be alleged at the motion to dismiss stage is that defendants acted in concert.

"'[T]o satisfy the concerted action requirement, the plaintiff must demonstrate that the defendants shared a unity of purpose or a common design and understanding, or a meeting of the minds.'" *Insulate SB, Inc. v. Advanced Finishing Sys., Inc., 797 F.3d 538, 543 (8th Cir. 2015)* (quoting *Impro Prods., Inc. v. Herrick, 715 F.2d 1267, 1273*

(8th Cir. 1983). This showing can be accomplished through either direct or circumstantial evidence. ES Dev., Inc. v. RWM Enters., Inc., 939 F.2d 547, 554 (8th Cir. 1991).

a. Direct Evidence

Plaintiffs rely on two confidential witnesses to provide direct evidence of Defendants' alleged antitrust agreement. The Court previously concluded that, even though a heightened pleading standard was not required, Plaintiffs failed to "adequately explain [the witnesses'] jobs and how their interactions in those jobs would lead to them acquiring the knowledge they allegedly possess," and that the complaints presented "mismatched" allegations of anticompetitive behavior. *In re Cattle Antitrust Litig.*, 2020 WL 5884676, at *5. The question now is whether the amended complaints overcome these pleading deficiencies.

Regarding Witness 1, Jason F., Plaintiffs disclose that he worked as a quality assurance officer at Swift's Cactus, Texas plant—an operating JBS subsidiary—for approximately ten years, up **[*10]** until early 2018. (TAC ¶ 102.) Witness 1 was primarily responsible for the kill floor, and hotboxes and coolers (where carcasses are stored before being broken down), and thus he was well-positioned to know about slaughter volumes. (*Id.* ¶ 103.) In 2015, Witness 1 had a conversation with James Hooker, head of fabrication at the plant, after Hooker had received a phone call from his immediate supervisor. (*Id.* ¶¶ 104, 117.) At that time, Hooker told Witness 1 that each Defendant expressly agreed to periodically reduce its purchase and slaughter volumes to reduce the prices they would pay for fed cattle, stating that the agreement was to cut back on kills when prices were getting too high.[5] (*Id.* ¶¶ 101, 118.) Hooker knew of Defendants' agreement from speaking regularly with higher ups at JBS, including some at JBS's head office in the United States who were in charge of beef production, and with former colleagues working at packing plants owned by the non-JBS Defendants. (*Id.* ¶¶ 107-13, 115.) Witness 1 also recalls Swift management telling staff that kill levels were being reduced in response to fed cattle prices, and he reports that his plant would reduce its slaughter around November **[*11]** and then regularly maintain lower kill volumes through April of the following year. (*Id.* ¶¶ 121, 122.)

Regarding Witness 2, Matt T., Plaintiffs disclose that he was a former manager of a 35,000 head commercial feedlot, Carrizo Feeders, in Texline, Texas, from 2012 until July 1, 2015. (*Id.* ¶ 143.) In this capacity, Witness 2 was responsible for marketing (selling) the cattle fed there, negotiating with Defendants' field buyers on a weekly basis, and managing certain customers' risk positions by trading Live Cattle contracts on their behalf. (*Id.* ¶ 143 n.58.) Witness 2 would market between 600-1,500 head of cattle most weeks, of which the majority were sold on the cash cattle market. (*Id.*) However, in 2015, Witness 2 reports that Defendants worked together to reduce their purchases of cash cattle, predominately offering only top-of-the-market bids instead, after Defendants realized that taking cattle out of the cash market would create an actual or perceived oversupply of slaughter-ready cattle and lower the base cash price. (*Id.* ¶¶ 143-44.) The reduced cash price, together with an interlinked depression of the Live Cattle Futures prices, lowered the price Defendants paid for all the **[*12]** cattle they purchased, with cash or otherwise. (*Id.*)

The Court finds that above allegations adequately explain the confidential witnesses' jobs and how their job interactions would lead them to acquire knowledge of Defendants' alleged agreement to, respectively, reduce slaughter volumes and reduce cash cattle purchases. The Court also finds that, while the allegations involve two different types of reductions, they are not mismatched. Plaintiffs allege that reductions in slaughter volumes and cash cattle purchases were both used by Defendants for the same purpose: to drive down the price for fed cattle while simultaneously driving up the price of beef. (*See, e.g., id.* ¶¶ 9, 18-20; DPP Am. Compl. ¶¶ 6, 10.)

As such, the Court concludes that Plaintiffs have presented sufficiently detailed direct evidence at this stage to plausibly allege that Defendants have violated § 1 of the Sherman Act.[6] Accordingly, the Court will deny Defendants' Joint Motions to Dismiss in this regard.

---

[5] For example, even though the Swift plant had a slaughtering capacity of 5,500-6,000 head per day, it might drop its kill level to around 4,800-5,200 head per day when implementing Defendants' agreement. (TAC ¶ 121.)

b. Circumstantial Evidence

Although "[a]llegations of direct evidence of an agreement, if sufficiently detailed, are independently adequate," *In re Ins. Brokerage Antitrust Litig., 618 F.3d 300, 323 (3d Cir. 2010)*, the Court will also consider the sufficiency of Plaintiffs' circumstantial evidence, as **[*13]** concerted action may also be demonstrated by alleging parallel conduct that "would probably not result from chance, coincidence, independent responses to common stimuli, or mere interdependence unaided by an advance understanding among the parties." *In re Cattle Antitrust Litig.*, 2020 WL 5884676, at * 5 (quoting *Twombly, 550 U.S at 557 n.4* (cleaned up)).

In addition to parallel conduct, Plaintiffs must also plead one or more "plus factors," or additional facts to demonstrate that a parallel price action amounts to an unlawful conspiracy as opposed to producers merely paralleling each other's prices. *Blomkest Fertilizer, Inc. v. Potash Corp. of Sask., 203 F.3d 1028, 1032-33 (8th Cir. 2000)* (en banc). Plus factors might include "(1) a shared motive to conspire; (2) action against self-interest; (3) market concentration; and (4) a substantial amount of interfirm communication in conjunction with the parallel conduct." *In re Pork Antitrust Litig., 495 F. Supp. 3d 753, 768 (D. Minn. 2020)*.

i. Plus Factors

The Court previously concluded that "the plus factors identified and discussed by Plaintiffs are undoubtedly strong and are of the type often used to support an inference of an agreement." *In re Cattle Antitrust Litig.*, 2020 WL 5884676, at * 6. The same factors are alleged by Plaintiffs here, including that the market for fed-cattle processing is highly concentrated, with Defendants making up more than 80 percent of it; demand for fed cattle and beef is inelastic; Defendants can **[*14]** regularly communicate through trade associations and other industry events; Defendants acted against self-interest, as when importing cattle from abroad when domestic prices were low; and that there were market-wide changes in pricing practices from cash sales to formula contracts. (TAC ¶¶ 180-88, 290-313; DPP Am. Compl. ¶¶ 196-239); *see also In re Cattle Antitrust Litig.*, 2020 WL 5884676, at * 6.

Additionally, Plaintiffs now point to how Defendants are being investigated by the U.S. Department of Justice ("DOJ") and the U.S. Department of Agriculture ("USDA") for the same conduct alleged in the operative complaints. (*E.g.*, TAC ¶¶ 314-15.) While some courts have declared that pending investigations carry no weight, *e.g., In re Graphics Processing Units Antitrust Litig. ("GPU"), 527 F. Supp. 2d 1011, 1024 (N.D. Cal. 2007)*, others have concluded that "the plausibility of [an] alleged conspiracy is bolstered, at least to some extent, by [an] ongoing [DOJ] investigation into the same alleged misconduct," *In re GSE Bonds Antitrust Litig., 396 F. Supp. 3d 354, 363 (S.D.N.Y. 2019)*.[7] While a pending government investigation does not serve as a smoking gun or allow for an inference of a conspiracy by itself, the Court agrees that it certainly bolsters such an inference.

In sum, the Court concludes that the plus factors identified by Plaintiffs are even stronger than they were before. The only remaining question **[*15]** is whether Plaintiffs have managed to plausibly allege parallel conduct.

ii. Parallel Conduct

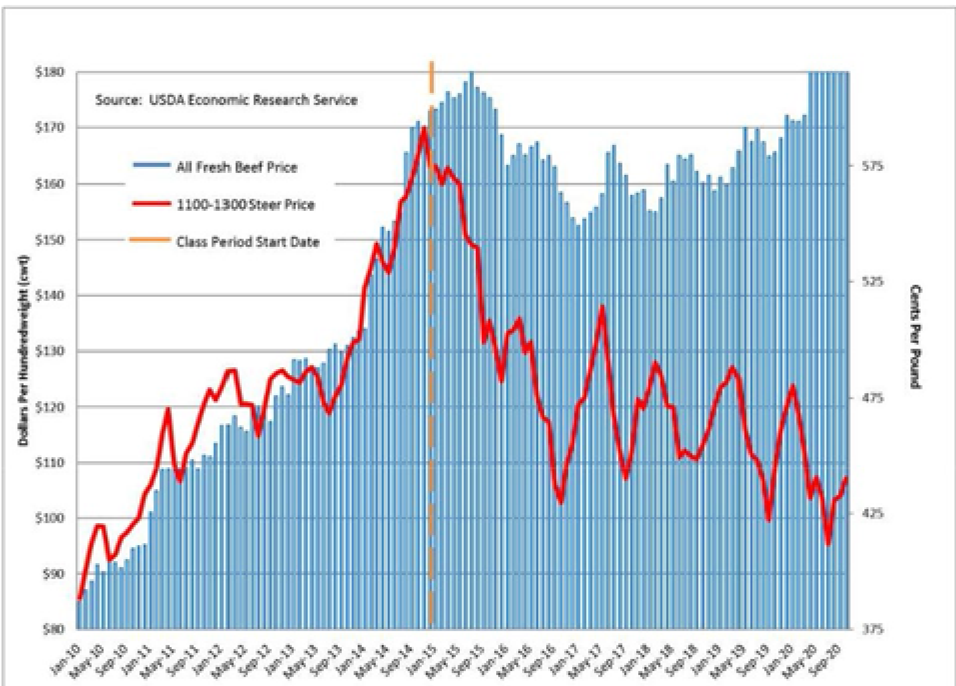
---

[6] Defendants suggest that Plaintiffs' direct evidence is based on hearsay and speculation, so the Court should not credit it. However, at the motion to dismiss stage, all allegations are taken as true and construed in Plaintiffs' favor. To be sure, Plaintiffs will face a higher bar at summary judgment and their claims will likely need more evidentiary support and points of connection to survive a challenge then, but the litigation has not yet reached this point.

[7] *Accord Starr v. Sony BMG Music Enter., 592 F.3d 314, 325 (2d Cir. 2010)* (finding inference of conspiracy plausible in part because the DOJ had launched investigations); *In re Packaged Seafood Prod. Antitrust Litig., No. 15-2670, 2017 WL 35571, at *8 (S.D. Cal. Jan. 3, 2017)* (recognizing *GPU*'s holding but concluding that "it is perfectly permissible to take as true the fact that a government investigation has been instituted").

The Court previously concluded that Plaintiffs' allegations of parallel conduct were sparse and conclusory. *In re Cattle Antitrust Litig.*, 2020 WL 5884676, at *6. More specifically, with respect to coordinated slaughter reductions, the Court found that Plaintiffs failed to provide a basis "to analyze which, how many, or when any of the individual Defendants may have affirmatively acted" and, with respect to coordinated cash cattle reductions, that Plaintiffs "rel[ied] almost exclusively on industry-wide data and ask[ed] the Court to infer that the individual Defendants all contributed to the decrease." *Id.*

Regarding coordinated slaughter reductions, Plaintiffs present a nuanced theory and a bevy of facts and figures to analyze whether each Defendant affirmatively acted to promote the alleged price-fixing conspiracy.[8] Prior to 2015, fed cattle prices typically rose in the late winter/early spring, declined in the summer months, bottomed out in July for a few weeks, and then rose again in the fall. (TAC ¶ 124.). Seasonal slaughter reductions also typically occurred near the beginning of each year. (*Id.*) However, in January 2015 (the start of the class **[*16]** period), Plaintiffs allege that Defendants agreed to deviate from these cyclical patterns and began to moderate their slaughter volumes in lockstep. (*Id.* ¶¶ 123-124.) Doing so served to suppress the price for fed cattle, (*id.*), and drive up the price of beef, (*e.g.*, DPP Am. Compl. ¶¶ 255-57), which allowed Defendants to realize tremendous profits. Plaintiffs provide a new figure to capture Defendants' tandem movements:



(TAC ¶ 127, fig. 2.) Plaintiffs also break down the significance of what this figure depicts, quarter by quarter and year by year.

In 2015, Tyson's, National Beef's, and JBS's year-over-year slaughter volume decreased in the first quarter by -1.8%, -8.6%, and -11.2%, respectively (Cargill's quarterly slaughter volume rose slightly but was still down on its 2014 fourth quarter volume). (*Id.* ¶ 199.) Across quarter two and into quarter three, Tyson, National Beef, and JBS

[8] To arrive at the numbers alleged below, Plaintiffs drew from a variety of materials, including Defendants' actual transaction data, Plaintiffs' records of transactions with Defendants, securities filings from three Defendants (Cargill is privately held), public statements from Tyson's CEO, industry data consisting almost entirely of Defendants' transactions, and contemporaneous reporting on Defendants' actions. Defendants question the reliability of these materials and the accuracy of Plaintiffs' methodology when crunching the data. However, at the motion to dismiss stage, "the Court need not now engage in a *Daubert-like* analysis of Plaintiffs' statistical pleadings. Instead, the Court may, indeed must, accept as true Plaintiffs' factual assertions regarding pricing and other economic data." *City of Philadelphia v. Bank of Am. Corp., 498 F. Supp. 3d 516, 528 (S.D.N.Y. 2020)*.

further reduced their slaughter volumes by approximately -5.4%, -6.2%, and -12.8%, respectively, while Cargill continued to hold steady. (*Id.* ¶ 202.) Then, in the last quarter, each Defendant slaughtered between 5.8% and 17.1% less cattle compared to their 2012-14 average.[9] (*Id.* ¶ 213.) Because **[*17]** of Defendants' reductions, less cattle were sold for slaughter in 2015 than in 2014.[10] (*Id.* ¶ 220.)

All the while, the fed cattle price plummeted. (*Id.* ¶ 212.) As a result, producers' margins were reduced across the second, third, and fourth quarters of 2015, averaging, respectively, -$51, -$1, and - $359 per head. (*Id.* ¶ 224.) Conversely, Defendants posted average per head margins of between approximately $47 and $66 across the three quarters, well above their averages of between -$16 and $25 per head from 1997 to 2014. (*Id.*) Yet, even in this context, no Defendant sought to capture market share to drive its individual margins even higher. (*See id.* ¶ 223.)

In 2016, Defendants again slaughtered less cattle in the first quarter than they did from 2012 to 2014: quarter-over-quarter change, Tyson -0.7%, Cargill -3.3%, National Beef -4.4%, and JBS -16.3%; year-over-year change, Tyson -4.5%, Cargill -9.3%, National Beef -14.9%, and JBS -21.7%. (*Id.* ¶ 226 n.111 & n.112.) Meanwhile, fed cattle prices remained low, around $130/cwt, which allowed Defendants to have one of their best quarters in history, approximately $63 per head compared to the pre-class period average of $0 per head. **[*18]** [11] (*Id.* ¶ 227.)

Across the second and third quarters of 2016, Defendants' kill volumes remained below 2012-2014 averages and created a supply glut, which allowed Defendants to unseasonably increase kill volumes in the fourth quarter—Tyson, Cargill, and National Beef's volumes rose 2.3%, 3.3%, and 10.9%, respectively—and experience their most profitable fourth quarter in modern history, about $153 per head, which was $100 more per head than previously realized. (*Id.* ¶¶ 233-38.) Producers, on the other hand, lost -$67 per head over the year. (*Id.*) Again, however, no Defendant acted to capture individual market share to capitalize on the record margins. (*Id.* ¶ 238.) In fact, even with the increased availability of fed cattle and Defendants' unseasonably large fourth quarter harvest, annual slaughter volumes in 2016 were -6% below 2014 levels (Tyson and JBS) or flat (National Beef).[12] (*Id.* ¶ 237.)

In 2017, Plaintiffs allege that Defendants' coordinated activity was much the same: reductions by Defendants in the first quarter—Cargill -4.6%, Tyson -6.1%, JBS -6.6%, National Beef -17.9%—followed by increases in the second quarter after the price had been driven down—JBS 5.3%, Tyson 7.5%, Cargill **[*19]** 7.7%, National Beef 12.4%. (*Id.* ¶ 239 n.126 & n.127.) Across the year, prices fell steadily to a low of $105/cwt by mid-September, which allowed Defendants to again post slaughter increases during the third quarter: Tyson 8.5%, JBS 9.0%, Cargill 16.0%, and National Beef 17.7%. (*Id.* ¶ 240.) Defendants' average per head margins for the first and fourth quarter in 2017, $42 and $88 per head, respectively, stood second only to the record quarterly profits generated in 2016. (*Id.* ¶ 241.) But Defendants continued to refuse to expand individual market share despite the obvious profit potential. (*Id.*)

In 2018, the same again: the first quarter saw reductions—National Beef -4.7%, Tyson -8.6%, Cargill -10.5%, JBS -14.4%—and prices were driven down to $110/cwt by the end of May, even though they should have allegedly risen because of the record beef demand and the tight supply of slaughter-ready cattle. (*Id.* ¶¶ 242-43.) Capitalizing on the low price, Defendants then increased slaughter volumes by 11.4%-13.6% and held this steady across the third

---

[9] Regarding pre-2015 behavior, Plaintiffs paint a very different picture. In the fourth quarter of 2012, Cargill and JBS both increased their slaughter volumes (3.7% and 12%) while Tyson held steady (0.1% increase) and National Beef cut back (-4%). (TAC ¶ 130.) Then, in the third quarter of 2013, Tyson and National Beef increased their slaughter volumes, while JBS and Cargill reduced theirs. (*Id.*) Further, across the second and fourth quarters of 2014, JBS looked to capture market share from the others, increasing its slaughter volumes by 16.3%. (*Id.*)

[10] Tyson's annual slaughter volumes were down 4%, National Beef's 6%, and JBS's 17% when compared to 2014. (TAC ¶ 214.) Cargill's remained flat; however, its slaughter volumes were still significantly below historic levels. (*Id.*)

[11] In fact, over the class period, Defendants' average per head net margins for the first, second, third, and fourth quarters greatly exceeded pre-class period averages: respectively, $37 v. $0, $127 v. $21, $134 v. $25, and $116 v. -$16. (TAC ¶ 126.)

[12] Cargill's 2016 slaughter volumes rose 10% against 2014, but they were still significantly below Cargill's 2007-2014 average. (TAC ¶ 237.)

quarter so as to not get in front of the available supply. (*Id.* ¶ 244.) When supply decreased in the fourth quarter, Defendant then reduced their slaughter **[*20]** volumes: Tyson -3.7%, Cargill -4.0%, National Beef -4.1%, and JBS -4.2%. (*Id.*)

Over 2018, Defendants experienced record margins across the second, third and fourth quarters ($229, $198, and $175 per head, respectively). (*Id.* ¶ 245.) Conversely, producers suffered $30 and $41 per head losses in the second and third quarters before realizing a modest $27 per head profit in the fourth, though the latter was still well below the pre-class period average of $89 per head. (*Id.*)

In 2019, after a severe winter had decreased slaughter weights, a substantial rally in cattle prices was expected because packers would have to secure a greater number of cattle to make up the weight. (*Id.* ¶ 247.) However, Defendants maintained comparably lighter slaughter volumes across the first three months of 2019 and kept collective demand in check. (*Id.* ¶ 248.) The glut of cattle resulting from Defendants' slaughter restraint drove the price down and, as before, most Defendants then began to increase slaughter volumes. (*Id.* ¶ 250; *see also id.* figs. 28-32.)

Even then, however, no Defendant worked to capture market share. (*Id.* ¶ 253.) Emblematically, after a fire closed a Tyson plant in August 2019 and left a 5,500-6,000 **[*21]** head per day hole for others to fill, the non-Tyson Defendants' slaughter volumes remained steady. (*Id.* ¶¶ 256-57.) Defendants also simultaneously stepped down fed cattle prices and raised beef prices after the fire, which allowed them to reap record high margins. (*Id.* ¶ 261.) By September, the profit margin between packer and producers exceeded $600, with packers making over $400 per head and producers losing $200 per head. (*Id.*)

As a whole, the Court finds that the above allegations plausibly demonstrate that each Defendant, from 2015 on, unlawfully acted in concert with the others to moderate slaughter volumes to fix the price of fed cattle and beef. The Court also finds that Plaintiffs' new defendant-specific dataset, (*id.* ¶¶ 135-36, 139-41; *see also id.* ¶ 137, tbl. 1; *id.* ¶ 138, tbl. 2), plausibly shows that Defendants also unlawfully worked in tandem to reduce their cash cattle purchases to place further downward pressure on fed cattle prices. By coordinating the amount and timing of their cash cattle purchases, their bidding, and the regions and feedlots where they would bid, Defendants ended up paying lower and remarkably similar prices for fed cattle, which would not have been **[*22]** the case, Plaintiffs allege, had any Defendant sought a greater market share to take advantage of the record beef demand. (*Id.* ¶¶ 147-49, 151-53; *see, e.g., id.* ¶¶ 175-78.)

In sum, the Court concludes that Plaintiffs plausibly plead parallel conduct among Defendants to coordinate slaughter volumes and cash cattle purchases in order to suppress the price of fed cattle and drive up the price for beef. When these allegations are considered alongside Plaintiffs' undoubtedly strong plus factors, the Court further concludes that Plaintiffs have raised a reasonable expectation that discovery will reveal evidence of an illegal agreement between Defendants, which is all that is required at the motion to dismiss stage. *Twombly, 550 U.S. at 556-57*. The Court will therefore deny Defendants' Joint Motions to Dismiss in this regard.[13]

2. Packers and Stockyards Act

"[A] practice which is likely to reduce competition and prices paid to farmers for cattle can be found an unfair practice under the [PSA]." *IBP, Inc. v. Glickman, 187 F.3d 974, 977 (8th Cir. 1999)* (quotation omitted). In fact, "the lack of competition between buyers, with the attendant possible depression of producers' prices, was one of the evils at which the [PSA] was directed." *Farrow v. U.S. Dep't of Agric., 760 F.2d 211, 215 (8th Cir. 1985)* (quotation omitted). Based on the above **[*23]** allegations concerning Defendants' anticompetitive conduct to suppress the

---

[13] Regarding some of the Producer Plaintiffs, it is true that the organizational members do not have standing to pursue damages. Accordingly, these Plaintiffs have agreed to drop the organizations' claims for damages and instead pursue injunctive and declaratory relief, which they are entitled to do under *15 U.S.C. § 26*.

price paid to producers for fed cattle, Producer Plaintiffs state a plausible claim to relief with respect to the PSA. Accordingly, the Court will deny Defendants' Joint Motions to Dismiss regarding Producer Plaintiffs' PSA claim.

3. Commodity Exchange Act

To plausibly plead a CEA claim, the plaintiff must show "(1) the defendant possessed an ability to influence market prices; (2) an artificial price existed; (3) the defendant caused the artificial price; and (4) the defendant specifically intended to cause the artificial price." *Anderson v. Dairy Farmers of Am., Inc., No. 08-4726, 2010 WL 1286181, at *5 (D. Minn. Mar. 29, 2010)* (citation omitted). "The specific intent to cause a market distortion, scienter, can be pled by alleging facts (1) showing that the defendants had both motive and opportunity to commit the fraud or (2) constituting strong circumstantial evidence of conscious misbehavior or recklessness." *In re Amaranth Nat. Gas Commodities Litig., 587 F. Supp. 2d 513, 530 (S.D.N.Y. 2008)*, *aff'd*, *730 F.3d 170 (2d Cir. 2013)*.

Producer Plaintiffs sufficiently demonstrate that Defendants possessed the ability and opportunity to influence market prices, as they allegedly participated in the Live Cattle Futures market and controlled nearly 100% of the facilities approved for the slaughter of cattle linked to Live Cattle Futures contracts. **[*24]** (TAC ¶¶ 374-80.) Likewise, Plaintiffs have also demonstrated that Defendants had a motive to manipulate the Live Cattle Futures market, as the prices paid for fed cattle under Defendants' forward contracts were inextricably intertwined with Live Cattle Futures prices. (*Id.* ¶¶ 345, 382.) Moreover, Defendants are alleged to have improperly taken extensive short positions rather than long ones to further increase their profits, even though packers are buyers of cattle and should protect against price increases, not bet on price decreases. (*Id.* ¶¶ 393, 396.) Finally, regarding whether an artificial price existed and whether Defendant caused the artificial price, because a suppression of the price of fed cattle leads to a reduction in the Live Cattle Futures price, (*id.* ¶¶ 390-92), Defendants' alleged antitrust agreement plausibly caused an artificial price.

In sum, the Court concludes that Producer Plaintiffs adequately plead their CEA claims. Accordingly, the Court will dismiss Defendants' Joint Motions to Dismiss in this regard.

4. Statute of Limitations

A statute of limitations is "typically an affirmative defense, which the defendant must plead and prove . . . and therefore the possible **[*25]** existence of a statute of limitations defense is not ordinarily a ground for Rule 12(b)(6) dismissal unless the complaint itself establishes the defense," as when the complaint rules out tolling on its face. *Jessie v. Potter, 516 F.3d 709, 713 n.2 (8th Cir. 2008)* (citations omitted). However, when some or all of a defendant's arguments rely on disputed or insufficiently developed facts, a statute of limitations defense cannot be resolved on a motion to dismiss. *Willis Elec. Co. v. Polygroup Macau Ltd., 437 F. Supp. 3d 693, 707 (D. Minn. 2020)*.

a. Sherman Act and Packers and Stockyards Act

The limitations period for any claims for damages under the Sherman Act and the PSA is four years. *15 U.S.C. § 15b*; *Jackson v. Swift Eckrich, Inc., 53 F.3d 1452, 1460 (8th Cir. 1995)*. The period begins to run when a defendant commits the injurious act. *Zenith Radio Corp. v. Hazeltine Rsch., Inc., 401 U.S. 321, 338 (1971)*.

Defendants' alleged conspiracy is said to have begun on January 1, 2015. Producer Plaintiffs filed their complaint on April 23, 2019[14] and Direct Purchaser Plaintiffs did so on June 6, 2020.[15] As such, unless the limitations period

[14] The docket shows this complaint being filed in early May; however, the action was first filed in Illinois before being refiled here.

[15] Only Producer Plaintiffs may bring a PSA claim and only Producer Plaintiffs and Direct Purchaser Plaintiffs may recover damages under the Sherman Act.

for their claims for damages can be extended, all or some would be time-barred. Plaintiffs argue that two extension doctrines apply: the continuing violation doctrine, which would allow them to recover most but not all the claimed damages, and the fraudulent concealment doctrine, which would allow them to recover all the claimed damages.

A continuing violation restarts **[*26]** the statute of limitations period each time the defendant commits a new and independent act that inflicts new and accumulating injury on the plaintiff. *In re Pre-Filled Propane Tank Antitrust Litig., 860 F.3d 1059, 1063 (8th Cir. 2017)* (en banc). To adequately plead a continuing violation in the context of an alleged price-fixing conspiracy, Producer and Direct Purchaser Plaintiffs must demonstrate: (1) a price-fixing conspiracy; (2) that brings about a series of unlawfully priced sales during the class period; (3) and sales involving Plaintiffs during the class period. *Id. at 1068*.

Plaintiffs have successfully pleaded the first and third elements by demonstrating that Defendants' alleged conspiracy had the effect of decreasing the price for fed cattle and increasing the price paid for beef, and that Plaintiffs either sold fed cattle to or purchased beef from Defendants during the class period. Regarding the second element, Plaintiffs must adequately allege that the conspiracy continued into the non-time-barred class period—for Producer Plaintiffs, April 23, 2015, and for Direct Purchaser Plaintiffs, June 6, 2016. The Court finds that this element is easily met, for Plaintiffs' allegations involve activity occurring throughout 2015 and then continuing from 2016 up until 2020. **[*27]** (*See, e.g.*, TAC ¶¶ 198-262; DPP Am. Compl. ¶¶ 140-72.)

As such, the Court concludes that the Producer and Direct Purchaser Plaintiffs have adequately pleaded continuing violations and therefore at least some of their claims for damages are not time-barred. Having concluded as much, the Court will defer deciding the issue of fraudulent concealment until a more robust record has been developed and a need to determine damages, whether for the entire class period or a portion of it, has arisen.

b. Commodity Exchange Act

The limitations period for CEA claims is two years, *7 U.S.C. § 25(c)*, which begins to run from the discovery of the injury. *Levy v. BASF Metals Ltd., 917 F.3d 106, 108 (2d Cir. 2019)*, *cert. denied*, *140 S. Ct. 536 (2019)*; *see also* *Rotella v. Wood, 528 U.S. 549, 555 (2000)* (noting that federal courts generally apply a discovery accrual rule when a statute is silent on the issue). "The proper standard for determining the commencement of the limitations period is when the plaintiff knew or in the exercise of reasonable diligence should have known of defendant's alleged misconduct." *Anderson, 2010 WL 1286181, at *5*.

Producer Plaintiffs' operative complaint does not disclose whether they knew or should have known through the exercise of reasonable diligence of Defendants' alleged misconduct before April 23, 2017, especially given the confidential nature of Defendants' **[*28]** actual trading on the Live Cattle Futures market. Additionally, the Court notes that material facts—specifically, the full measure of Defendants' trading activity—will not be known until after discovery, and that questions of actual or constructive knowledge are fact-intensive inquiries often left undecided even at summary judgment, *see* *id. at *7*. As such, the Court finds that the question of whether Producer Plaintiffs' CEA claims are time-barred is best left for a later stage of the litigation.

C. State Law Claims

Indirect Purchaser Plaintiffs bring claims for damages under the antitrust laws of 26 jurisdictions,[16] the consumer-protection laws of 25 jurisdictions,[17] and for unjust enrichment in 32 jurisdictions.[18] Defendants argue that these claims should be dismissed for lack of standing and various state-specific reasons.[19]

---

[16] Arizona, California, the District of Columbia, Illinois, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin. (Peterson TAC ¶¶ 377-540; E&G Am. Compl. ¶¶ 355-78.)

1. Standing

Defendants argue that the Indirect Purchaser Plaintiffs lack standing to assert several state law claims because they lack a representative plaintiff from the respective jurisdictions. The Court will exercise its discretion to defer consideration of this issue until after class certification, "which is 'logically antecedent' to the question raised by Defendants[.]" **[*29]** *In re Pork Antitrust Litig., 495 F. Supp. 3d at 776*. However, if "standing issues remain after class certification, Defendants are free to make a motion at that time." *Id.*

2. Antitrust Laws

a. AGC

Defendants challenge Indirect Purchaser Plaintiffs' antitrust standing in several states pursuant to *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters ("AGC"), 459 U.S. 519, 535-45 (1983)*. In the opinion, the Supreme Court states that a plaintiff's right to maintain an antitrust action turns on the nature of the alleged injury, and that being denied the benefits of price competition in the market in which trade was allegedly restrained is an appropriate injury. *See* *id. at 538-39*; *see also* *South Dakota v. Kansas City S. Indus., Inc., 880 F.2d 40, 47 (8th Cir. 1989)* ("[S]tanding has been generally limited to the actual participants in the relevant market: competitors and consumers.").

Here, Indirect Purchaser Plaintiffs claim that Defendants' horizontal price fixing restrained or eliminated beef price competition and deprived everyone down the supply chain in the relevant market of the benefit of price competition. Thus, Indirect Purchaser Plaintiffs allege an appropriate injury. *Accord* *In re Aftermarket Filters Antitrust Litig., No. 08-4883, 2009 WL 3754041, at *7-8 (N.D. Ill. Nov. 5, 2009)*. Additionally, Indirect Purchaser Plaintiffs allege that the cost they paid for beef is traceable through the product distribution chain, which is adequate both to show that the alleged injury was the direct result of Defendants' allegedly **[*30]** anticompetitive conduct, *accord* *In re Broiler Chicken Antitrust Litig., 290 F. Supp. 3d 772, 813-14 (N.D. Ill. 2017)*, and to satisfy the remaining three factors concerning the speculative nature of the harm, the risk of duplicative recovery, and the complexity in apportioning damages, *accord* *In re Flash Memory Antitrust Litig., 643 F. Supp. 2d 1133, 1155-56 (N.D. Cal. 2009)*. The Court therefore concludes that Indirect Purchaser Plaintiffs have standing to assert their antitrust claims.[20]

---

[17] Arkansas, California, the District of Columbia, Florida, Hawaii, Illinois, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Carolina, South Dakota, Utah, Vermont, and Wisconsin. (Peterson TAC ¶¶ 543-740; E&G Am. Compl. ¶¶ 381-96.)

[18] Arizona, Arkansas, California, the District of Columbia, Florida, Hawaii, Illinois, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin. (Peterson TAC ¶¶ 741-43; E&G Am. Compl. ¶¶ 397-414, at 150 n.70.)

[19] Defendants also aver that many claims are time-barred, as the continuing violation doctrine is not recognized in eleven jurisdictions. Yet, Defendants fail to offer any analysis of the relevant case law from these states. Plaintiffs, on the other hand, discuss state case law, but often their citations involve unrelated causes of action. As such, neither party's briefing allows the Court to make an educated *Erie* guess on a per state basis regarding whether Plaintiffs' claims would likely be tolled in these jurisdictions. The Court will therefore defer consideration of this question, which will also allow a fuller factual and legal record to be developed. Regarding the remaining jurisdictions, however, the Court has already found that Plaintiffs have adequately pleaded a continuing violation by Defendants to toll any applicable statute of limitation.

[20] As such, the Court declines to decipher the state of antitrust standing in each jurisdiction referenced by Defendants, as the same result would obtain even if state law dictated that *AGC* governs in a certain jurisdiction.

b. *Illinois Brick*

In *Illinois Brick Co. v. Illinois*, the Supreme Court held that only direct purchasers may sue for damages in Sherman Act price-fixing cases. *431 U.S. 720, 737 (1977)*. Most state courts generally interpret their states' antitrust laws in line with federal case law; however, in *California v. ARC Am. Corp.*, the Supreme Court held that state legislatures could pass laws, so-called "repealers," to provide for damages to indirect purchasers under state antitrust laws. *See 490 U.S. 93, 105-06 (1989)*.

Defendants claim that *Illinois Brick* has not been repealed under Missouri state law, which prevents Indirect Purchaser Plaintiffs from asserting claims pursuant to Missouri's Merchandising Practices Act ("MMPA"). In interpreting state law, the Court is bound by the decisions of the state's highest court or, when there is no state supreme court case directly on point, in predicting how the state supreme court would rule. **[*31]** *N. Oil & Gas, Inc. v. EOG Res., Inc., 970 F.3d 889, 892 (8th Cir. 2020)*. Based on the reasoning within a Missouri Supreme Court decision, *Gibbons v. Nuckolls, Inc.*, the Court predicts that it would rule that indirect suits are allowed under the MMPA. *See 216 S.W.3d 667, 669-70 (Mo. 2007)* (en banc) (declining to read the MMPA as limited to only direct purchaser suits); *see also In re Pool Prod. Distribution Mkt. Antitrust Litig., 946 F. Supp. 2d 554, 571 (E.D. La. 2013)* (making the same prediction). The Court will therefore deny Defendants' Joint Motions in this regard.

Defendants also assert that *Illinois Brick* bars Indirect Purchaser Plaintiffs from pursuing damages under either Montana's or South Carolina's consumer protection laws, as these claims are simply repackaged antitrust claims and these states have not repealed *Illinois Brick*. However, the Court finds the reasoning in *In re Generic Pharms. Pricing Antitrust Litig.* to be persuasive: "Defendants' 'repackaging' argument is not enough to require dismissal of [plaintiffs'] consumer protection law claims . . . so long as their allegations are enough to plead the relevant consumer protection violation."[21] *368 F. Supp. 3d 814, 840 (E.D. Pa. 2019)*. Defendants do not assert any relevant pleading deficiencies with respect to Indirect Purchaser Plaintiffs' Montana or South Carolina consumer protection claims.[22] Thus, the Court will deny Defendants' Joint Motions regarding **[*32]** these claims.

c. Intrastate Activity

A claim made pursuant to the Mississippi's ***antitrust law*** must involve, in part, transactions occurring wholly within the state. *State ex rel. Fitch v. Yazaki N. Am., Inc., 294 So. 3d 1178, 1189 (Miss. 2020)*. Indirect Purchaser Plaintiffs acknowledge that they have not adequately pleaded their Mississippi antitrust claims and thus ask for leave to amend. Given that this pleading deficiency has not been addressed before, and that the actions will survive Defendants' motions to dismiss, the Court will grant Indirect Purchaser Plaintiffs leave to amend their Mississippi antitrust claims.

3. Consumer Protection Laws

Defendants assert state-specific reasons for why several of Indirect Purchaser Plaintiffs' consumer protection claims are not actionable. The Court covered much of this ground in *In re Pork Antitrust Litig. See 495 F. Supp. 3d*

---

[21] While the Eighth Circuit has spoken in favor of precluding attempts to get around *Illinois Brick* by alleging the equitable remedy of disgorgement, it has not addressed whether plaintiffs can pursue damages under state consumer protection laws. *See In re Pre-Filled Propane Tank Antitrust Litig., 893 F.3d 1047, 1059 (8th Cir. 2018)*.

[22] Defendants do ask the Court to reconsider its holding in a similar case that allegations pleading violations of state consumer protection laws based on anticompetitive conduct, not fraud, are not subject to Rule 9(b). *See In re Pork Antitrust Litig., 495 F. Supp. 3d at 779-90*. The Court remains unpersuaded by Defendants' argument and, as a result, will deny Defendants' Joint Motions to Dismiss with respect to Indirect Purchaser Plaintiffs' state consumer protection claims, including their Montana and South Carolina claims.

at 785-90. For the most part, the Court's reasoning and conclusions remain unchanged, and Defendants' Joint Motions to Dismiss will be granted in part and denied in part accordingly.[23] The parties do offer some new arguments, however, which the Court will now address.[24]

a. Massachusetts

The Court previously determined that a claim brought pursuant to § 11 of the Massachusetts consumer protection statute required **[*33]** that the actions or transactions constituting the claim occur primarily and substantially within the state. *Id. at 788*. Now, however, Peterson Plaintiffs assert their claim under § 9, which contains no such wording. *See Mass. Gen. Laws Ann. ch. 93A, § 9*. Thus, Peterson Plaintiffs are no longer required to allege that the acts constituting their claim occurred primarily and substantially in Massachusetts. *Geis v. Nestle Waters N. Am., Inc., 321 F. Supp. 3d 230, 241 (D. Mass. 2018)*. As such, the Court will deny Defendants' Joint Motions to Dismiss in this regard.

b. Michigan

The Court previously held that the Michigan Consumer Protection Act "is narrower than other state consumer-protection statutes because it specifically defines what constitutes unfair or unconscionable conduct." *In re Pork Antitrust Litig., 495 F. Supp. 3d at 785* (citing *Mich. Comp. Laws Ann. § 445.903*). Here, Peterson Plaintiffs point out that § 445.911 specifies that actions for damages involving section 5(a)(1) of the Federal Trade Commission Act are also allowed under Michigan law. This is true, if "a circuit court of appeals or the United State Supreme Court" has declared a "method, act, or practice in trade or commerce . . . to be an unfair or deception act or practice within the meaning of section 5(a)(1[.]" *Mich. Comp. Laws Ann. § 445.911(4)(c)*. But Peterson Plaintiffs do not point the Court's attention to such a declaration by a court of appeals or the Supreme Court. Accordingly, the Court will grant Defendants' **[*34]** Joint Motions in this regard.

c. Minnesota

With respect to Minnesota's Consumer Fraud Act, plaintiffs must plead allegations involving misrepresentations by defendants that affected the market. *In re Pork Antitrust Litig., 495 F. Supp. 3d at 786* (discussing *State v. Minn. Sch. of Bus., Inc., 935 N.W.2d 124, 135 (Minn. 2019)*). This is not the case alleged here, and the Court will therefore grant Defendants' Joint Motions to Dismiss in regard to Peterson Plaintiffs' related claim. Regarding Minnesota's Uniform Deceptive Trade Practices Act ("MUDTPA"), however, the Court will deny Defendants' Joint Motions in so far as Erbert & Gerbert's seek injunctive relief, as a continuing conspiracy has been alleged and, thus, a plausible likelihood of future harm.[25] *Cf. id.*

---

[23] Defendants ask the Court to reconsider its earlier holding that certain state prohibitions against class actions are procedural, not substantive. *In re Pork Antitrust Litig., 495 F. Supp. 3d at 776-78, 790*. The Court comes to the same conclusion here and, accordingly, will deny Defendants' Joint Motions to Dismiss in regard to Indirect Purchaser Plaintiffs' Montana, South Carolina, and Utah consumer protection claims.

[24] Indirect Purchaser Plaintiffs concede that their South Dakota consumer protection claims and Erbert & Gerbert's New York consumer protection claim fail for a lack of alleging, respectively, that Defendants made false promises or misrepresentations to them or materially misled them. Erbert & Gerbert's also states that it will withdraw its Missouri and Rhode Island consumer protection claims. Accordingly, the Court will grant Defendants' Joint Motions to Dismiss with respect to these five claims. Additionally, Defendants withdrew their arguments with respect to Indirect Purchaser Plaintiffs' New Mexico consumer protection claims and Peterson Plaintiffs' Hawaii consumer protection claim. The Court will therefore deny Defendants' Joint Motions as to these claims.

[25] The Court notes that the sole remedy under MUDTPA is injunctive relief. *See Hudock v. LG Elecs. U.S.A., Inc., 16-1220, 2017 WL 1157098, at *7 (D. Minn. Mar. 27, 2017)*.

d. Nebraska

Defendants argue that Nebraska's Consumer Protection Act expressly prohibits Plaintiffs' claims because Defendants are regulated by the USDA. *See* *Neb. Rev. Stat. § 59-1617(1)*. "[T]he relevant question is not whether the defendant is generally regulated, but whether the challenged practice is regulated." *In re ConAgra Foods Inc., 908 F. Supp. 2d 1090, 1103 (C.D. Cal. 2012)* (citation omitted) (collecting Nebraska cases). "[T]he exception to the Nebraska statute is broad[] . . . and applies to all conduct regulated by federal agencies." *Id. at 1104*.

Here, the USDA mandates packers to report the price paid for fed cattle and the price charged **[*35]** for beef, 7 C.F.R. §§ 59.101-104, in order to encourage competition in the marketplace, *7 U.S.C. §§ 1635(3)*. As such, the Court finds that Defendants' alleged anticompetitive conduct falls within the broad sweep of Nebraska's statutory exemption and, accordingly, will grant Defendants' Joint Motions to Dismiss in this regard.

e. New Hampshire

Previously, the Court found that New Hampshire's Consumer Protection Act requires the proscribed conduct to occur within the state after being persuaded by the weight of authority concluding as much. *In re Pork Antitrust Litig., 495 F. Supp. 3d at 789*. The additional case cited by Indirect Purchaser Plaintiffs does not persuade the Court to the contrary. Thus, the Court will grant Defendants' Joint Motions to Dismiss in this regard.

f. North Dakota

In so far as the Peterson Plaintiffs seek injunctive relief, not damages, the Court will deny Defendants' Joint Motions to Dismiss with respect to their Unlawful Trade Practices Law claim. *Id. at 786*. Regarding Erbert & Gerbert's claim made pursuant to Nebraska's Unlawful Sales or Advertising Practices statute, it is true that the statute was amended to include unconscionable acts or practices. *See* *N.D. Cent. Code § 51-15-02*. However, Erbert & Gerbert's points to no state court decisions (or even legislative history) that might **[*36]** provide an appropriate lens to interpret whether its claim falls within the statute's reach. As it "is not the role of a federal court to expand state law in ways not foreshadowed by state precedent," *Ashley Cnty., 552 F.3d at 673*, the Court will grant Defendants' Joint Motions to Dismiss with respect to this claim.

g. Oregon

Oregon's Unlawful Trade Practices Act prohibits "any unconscionable tactic in connection with selling, renting or disposing of real estate, goods or services, or collecting or enforcing an obligation." *Or. Rev. Stat. § 646.607*. "Unconscionable" tactics may include knowingly taking advantage of a customer's physical infirmity, ignorance, illiteracy or inability to understand the language of the agreement, or knowingly permitting a customer to enter into a transaction from which the customer will derive no material benefit. *See Id.* § 646.605(9). Based on these examples, courts have construed "unconscionable" to require allegations involving false and misleading representations made by defendants to plaintiffs. *See, e.g.,* *In re Packaged Seafood Prod. Antitrust Litig., 242 F. Supp. 3d 1033, 1084 (S.D. Cal. 2017)*; *In re Lidoderm Antitrust Litig., 103 F. Supp. 3d 1155, 1170-71 (N.D. Cal. 2015)*. The Court finds these decisions persuasive and will grant Defendants' Joint Motion to Dismiss with respect to this claim, as Peterson Plaintiffs fail to allege such conduct.

h. Utah

Utah's Consumer Sales Practice **[*37]** Act only prohibits deceptive and unconscionable acts, not unfair competition. *In re Pork Antitrust Litig., 495 F. Supp. 3d at 787*. However, as Peterson Plaintiffs rightly point out, the

Act is to be construed liberally. *Utah Code Ann. § 13-11-2*. As such, federal courts have found that an antitrust violation can be unconscionable. *In re Namenda Indirect Purchaser Antitrust Litig., No. 15-6549, 2021 WL 2403727, at *33 (S.D.N.Y. June 11, 2021)* (collecting cases); *see also* *In re Intel Corp. Microprocessor Antitrust Litig., 496 F. Supp. 2d 404, 418 (D. Del. 2007)*. The Court agrees and will therefore deny Defendants' Joint Motions as to this claim.

With respect to Utah's Unfair Practices Act, however, the Utah Supreme Court has signaled that it only protects commercial competitors, not consumers. *See* *Garrard v. Gateway Fin. Servs., Inc., 207 P.3d 1227, 1230 (Utah 2009)*. While Peterson Plaintiffs argue that the court's statement to this effect was mere dicta, it still is an accurate predictor of how Utah's highest court would likely rule on the issue. Thus, the Court will grant Defendants' Joint Motions as to this claim.

4. Unjust Enrichment Claims

The Court has covered much of the same ground before. *See* *In re Pork Antitrust Litig., 495 F. Supp. 3d at 790-99*. As in that case, Indirect Purchaser Plaintiffs lump their state claims together rather than individually pleading each element for every state. However, they have alleged that Defendants unlawfully overcharged them by conducting inequitable, traceable acts that enriched Defendants and that Defendants do not deserve to keep the **[*38]** benefits of this enrichment. This is sufficient at the motion to dismiss stage.[26] *Id. at 790-91*. Additionally, "when it is still unclear whether [plaintiffs'] other legal remedies will prevail, it is unnecessary to dismiss unjust-enrichment claims because they are pleaded in the alternative." *Id. at 799*.

With respect to the parties' state-specific arguments, the Court and the parties are familiar with the Court's earlier holdings regarding many of the same ones made here. *Id. at 791-99*. The Court's reasoning and conclusions remain unchanged with respect to most of Plaintiffs' claims, and Defendants' Joint Motions to Dismiss will be granted in part and denied in part accordingly.[27] There are, however, some new arguments to consider.[28]

a. Arizona

The plaintiffs in *In re Pork Antitrust Litig.* failed to make out a cognizable claim under Arizona law because they did not allege the necessary indirect connection between themselves and defendants. *Id. at 792-93*. The requisite showing is not onerous, nor does the presence of an intermediary between a plaintiff and a defendant defeat a claim. *Id.* In fact, all that is required to survive a motion to dismiss is an allegation that the plaintiff conferred a benefit on a defendant. **[*39]** *Id.*; *see also* *Yee v. Nat'l Gypsum Co., No. 09-8189, 2010 WL 2572976, at *4 (D. Ariz. June 22, 2010)*. Here, Indirect Purchaser Plaintiffs allege that they indirectly conferred a benefit on Defendants, which suffices at this stage. As such, the Court will deny Defendants' Joint Motions to Dismiss in this regard.

b. New Hampshire

---

[26] The Court notes that Defendants are free to bring a motion for summary judgment to ask the Court to consider whether any surviving claims fail to meet the elements required by certain jurisdictions then.

[27] The Court notes that the parties presented a few additional cases to consider. After careful review, they did not alter the Court's thinking.

[28] One argument, that *Illinois Brick* bars certain claims, has already been decided based on the Court's conclusions above: because *Illinois Brick* does not bar Plaintiffs' Missouri, Montana, or South Carolina consumer protection claims, neither does it bar Plaintiffs' Missouri, Montana, or South Carolina unjust enrichment claims. Thus, the Court will deny Defendants' Joint Motions to Dismiss in this regard.

Under New Hampshire law, courts have allowed indirect purchasers to bring parasitic unjust enrichment claims based on defendants' violations of New Hampshire's consumer protection statute. *In re Pork Antitrust Litig., 495 F. Supp. 3d at 792*. However, given that the Court will grant Defendants' Joint Motions to Dismiss with respect to Indirect Purchaser Plaintiffs' New Hampshire consumer protection claims, there is no host for their unjust enrichment claims. Accordingly, the Court will grant Defendants' Joint Motions to Dismiss in this regard.

c. North Dakota

Previously, the Court stated that "North Dakota does not require a direct conferral of a benefit in order to bring a claim for unjust enrichment . . . However, as with the Arizona claim, [plaintiffs] have failed to allege even the bare 'connection' required under North Dakota law." *Id. at 796*. Here, however, as mentioned above with respect to Indirect Purchaser Plaintiffs' Arizona claims, they have alleged the requisite bare connection. Thus, the Court **[*40]** will deny Defendants' Joint Motions to Dismiss in this regard.

d. Rhode Island

To recover for unjust enrichment under Rhode Island law, a plaintiff must allege that a benefit was conferred upon the defendant by the plaintiff, that the defendant appreciated such benefit, and that it is inequitable for the defendant to retain the benefit without paying its value. *Narragansett Elec. Co. v. Carbone, 898 A.2d 87, 99 (R.I. 2006)*.

The parties do not cite to any decisions by the state's highest court requiring that the benefit be conferred directly to a defendant, nor has the Court found any cases specifically addressing this issue.[29] The Rhode Island Supreme Court has stated that the third prong of the analysis is the most important and dispositive. *Emond Plumbing & Heating, Inc. v. BankNewport, 105 A.3d 85, 90-91 (R.I. 2014)*. It has also stated that "it is contrary to equity and good conscience for one to retain a benefit that has come to him at the expense of another." *Merchants Mut. Ins. Co. v. Newport Hosp., 272 A.2d 329, 332 (R.I. 1971)*. Based upon the reasoning contained in these decisions, and in the absence of contrary authority, the Court predicts that the state's highest court would construe "benefit" broadly and not require a direct connection. The Court will therefore deny Defendants' Joint Motions to Dismiss in this regard.

e. Utah

Utah law distinguishes between a direct benefit and an incidental, **[*41]** not indirect, benefit. *In re Packaged Seafood, 242 F. Supp. 3d at 1092* (citing Utah cases). "'Direct' is used to draw a distinction from 'incidental,' as in the realm of a by-product, specifically to explicate that services performed by the plaintiff for his own advantage cannot constitute grounds for unjust enrichment." *In re Processed Egg Prod. Antitrust Litig., 851 F. Supp. 2d 867, 934 (E.D. Pa. 2012)* (cleaned up). "Furthermore, Utah law recognizes that benefits under unjust enrichment are broadly defined." *Id.* As such, courts have found that when plaintiffs allege that defendants have profited directly from an alleged price-fixing conspiracy, then they have sufficiently alleged a direct benefit. *In re Packaged Seafood, 242 F. Supp. 3d at 1092-93*; *see also* *Johnson v. Blendtec, Inc., 500 F. Supp. 3d 1271, 1292 (D. Utah 2020)* (collecting cases) ("The lack of direct contact between indirect purchaser plaintiffs and a distributor does not doom

---

[29] Each party does cite to a lower court decision. The one presented by Defendants cites to New York law for the proposition that a benefit must be direct. *Alessi v. Bowen Court Condominium*, No. 03-0235, 2010 WL 897246, at *4 (R.I. Super. Mar. 10, 2010). The one presented by Indirect Purchaser Plaintiffs cites to another lower court decision that then cites to the Restatement of Restitution for the proposition that "benefit" denotes any form of advantage conferred to a defendant. *State v. Purdue Pharma L.P.*, No. PC-2018-4555, 2019 WL 3991963, at *17 (R.I. Super. Aug. 16, 2019) (citing *State v. Lead Ind. Assn., Inc.*, No. 99-5226, 2001 WL 345830, at *15 (R.I. Super. Apr. 2, 2001). Given that neither holding is grounded in Rhode Island law, the Court finds that both are equally unpersuasive.

an unjust enrichment claim." (cleaned up)). The Court is persuaded by the weight of this authority and will therefore deny Defendants' Joint Motions to Dismiss in this regard.

II. DEFENDANTS' INDIVIDUAL MOTIONS TO DISMISS

National Beef and subsidiaries of the other Defendants each assert that Plaintiffs' allegations fail to demonstrate that it participated in any antitrust agreement. For the reasons discussed above, the Court disagrees, finding that Plaintiffs have sufficiently demonstrated **[*42]** that National Beef and each subsidiary plausibly participated in the conspiracy and will therefore dismiss Defendants' Individual Motions to Dismiss in this regard.

The corporate parents of Cargill, Tyson, and JBS individually assert that Plaintiffs fail to allege that they participated in the conspiracy, simply lumping them in with their subsidiaries instead. However, Producer Plaintiffs make specific allegations against the corporate parents with respect to their CEA claims. Furthermore, with respect to the Sherman Act and the PSA, Plaintiffs demonstrate that the corporate parents undertook specific acts in furtherance of the alleged anticompetitive conspiracy. (*E.g.*, TAC ¶ 45, Sealed App. 1 ¶¶ 1-37, Dec. 28, 2020, Docket No. 312-1.) This is sufficient to plausibly allege that the parents are liable too.[30] *Cf. Reg'l Multiple Listing Serv. of Minn., Inc. v. Am. Home Realty Network, Inc., 9 F. Supp. 3d 1032, 1045 (D. Minn. 2014)*. As such, the Court will deny Defendants' Individual Motions to Dismiss in this regard. However, given that discovery may disclose a different picture, the Court will allow Defendants to reassert this question at summary judgment.

Finally, JBS makes two additional arguments.[31] First, it asserts that the Court cannot exercise personal jurisdiction over JBS S.A. However, given that **[*43]** the Court has concluded that the allegations concerning the conspiracy and the acts attributed to JBS S.A. in furtherance of the conspiracy are plausible, then conspiracy jurisdiction can be had. *See Yellow Brick Rd., LLC v. Childs, 36 F. Supp. 3d 855, 866 (D. Minn. 2014)*. Second, JBS S.A. contends that it was not properly served by Plaintiffs. The Court agrees, as letters rogatory were required at the time Plaintiffs attempted service, but they sent the summons and complaint via certified mail instead. However, as discussed next, because the Court will grant Plaintiffs' Motions to Approve Alternative Service, this point is moot. Thus, the Court will deny JBS's Individual Motion to Dismiss in both regards.

III. PLAINTIFFS' MOTIONS TO APPROVE ALTERNATIVE SERVICE

Plaintiffs ask the Court to approve alternative service with respect to JBS S.A., namely by serving its attorneys here in the United States. *Federal Rule of Civil Procedure 4(f)(3)* allows the Court to order any means of service, so long as it is not prohibited by international agreement. Brazil is now a party to the Hague Convention, which is the only applicable international agreement. Under Article 10 of the Convention, service of process by mail is allowed unless a country objects. Brazil has objected, so service by mail is not **[*44]** an option.

However, courts have concluded that service of process sent to an international defendant via email is not prohibited by Article 10. *See, e.g., Patrick's Rest., LLC v. Singh, No. 18-764, 2018 WL 5307839, at *3 (D. Minn. Oct. 26, 2018)*, *aff'd*, *No. 18-764, 2019 WL 121250 (D. Minn. Jan. 7, 2019)*; *see also Nagravision SA v. Gotech Int'l*

---

[30] The Court notes, without deciding, that Plaintiffs' single-enterprise theory could provide another plausible ground. *See Arandell Corp. v. Centerpoint Energy Servs., Inc., 900 F.3d 623, 631 (9th Cir. 2018)* ("[I]n a single-enterprise situation, it is the affiliated corporations' collective conduct—i.e., the conduct of the enterprise they jointly compose—that matters; it is the enterprise which must be shown to satisfy the elements of a [Sherman Act] claim." (cleaned up)); *see also Copperweld, 467 U.S. at 771* ("[I]n reality a parent and a wholly owned subsidiary always have a unity of purpose or a common design.").

[31] Regarding the misnaming of a JBS Defendant by Direct and Indirect Purchaser Plaintiffs, the Court will allow amendment back for Plaintiffs to rename JBS USA Food Company Holdings as JBS USA Food Company. *See Roberts v. Michaels, 219 F.3d 775, 777-78 (8th Cir. 2000)*.

Tech. Ltd., 882 F.3d 494, 498 (5th Cir. 2018) (holding that serving an international defendant by email does not even constitute service effected pursuant to the Hague Convention).

Additionally, emailing the international defendant's counsel in the United States avoids the dictates of the Hague Convention altogether, as it does not involve transmitting documents abroad. *See Water Splash, Inc. v. Menon, 137 S. Ct. 1504, 1509, (2017)*; *see also In GLG Life Tech Corp. Sec. Litig., 287 F.R.D. 262, 267 (S.D.N.Y. 2012)* (collecting cases). This method also avoids the possible issue of sending an email to an address not actively monitored abroad. *See, e.g., Ehrenfeld v. Salim a Bin Mahfouz, No. 04-9641, 2005 WL 696769, at *3 (S.D.N.Y. Mar. 23, 2005)*. Thus, the Court elects this method. Accordingly, it will grant Plaintiffs' Motions and order service on JBS S.A.'s counsel in the United States via email.[32]

ORDER

Based on the foregoing, and all the files, records, and proceedings herein, **IT IS HEREBY ORDERED** that:

ECF 19-1222

1. Defendants' Joint Motion to Dismiss [Docket No. 326] is **DENIED**;

2. Cargill Defendants' Motion to Dismiss [Docket No. 330] is **DENIED**;

3. Defendant National Beef's Motion to Dismiss [Docket No. 333] is **DENIED**;

4. JBS Defendants' Motion to Dismiss [Docket No. 338] **[*45]** is **DENIED**;

5. Tyson Defendants' Motion to Dismiss [Docket No. 342] is **DENIED**;

6. Plaintiffs' Motion to Approve Alternative Service [Docket No. 356] is **GRANTED**. Plaintiffs are authorized to serve JBS S.A. by serving counsel for JBS S.A., Patrick E. Brookhouser, Jr. and William F. Hargens of McGrath North, with the summons, complaint, and this Memorandum Opinion and Order via email.

ECF 19-1129

1. Defendants' Joint Motion to Dismiss [Docket No. 258] is **DENIED in part and GRANTED in part**, as follows:

a. Plaintiffs' Michigan consumer protection claim is **DISMISSED with prejudice**;

b. Plaintiffs' Nebraska consumer protection claim is **DISMISSED with prejudice**;

c. Plaintiffs' New Hampshire consumer protection claim is **DISMISSED with prejudice**;

d. Plaintiffs' Oregon consumer protection claim is **DISMISSED with prejudice**;

e. Plaintiffs' South Dakota consumer protection claim is **DISMISSED with prejudice**;

f. Plaintiffs' Utah Unfair Practices Act claim is **DISMISSED with prejudice**;

g. Plaintiffs' Florida unjust enrichment claim is **DISMISSED with prejudice**;

h. Plaintiffs' New Hampshire unjust enrichment claim is **DISMISSED with prejudice**;

[32] The Court notes that because it will order service on attorneys who have already appeared on behalf of JBS S.A., no due process concerns are implicated. *See, e.g., Washington State Inv. Bd. v. Odebrecht S.A.*, No. 17-8118, 2018 WL 6253877, at *5 (S.D.N.Y. Sept. 21, 2018).

i. With respect to all other claims and issues, the Motion is **DENIED;**

2. Cargill **[*46]** Defendants' Motion to Dismiss [Docket No. 263] is **DENIED**;

3. Defendant National Beef's Motion to Dismiss [Docket No. 266] is **DENIED**;

4. JBS Defendants' Motion to Dismiss [Docket No. 271] is **DENIED**;

5. Tyson Defendants' Motion to Dismiss [Docket No. 275] is **DENIED**;

6. Plaintiffs' Motion to Approve Alternative Service [Docket No. 289] is **GRANTED**. Plaintiffs are authorized to serve JBS S.A. by serving counsel for JBS S.A., Sami
H. Rashid of Quinn Emanuel Urquhart & Sullivan LLP, with the summons, complaint, and this Memorandum Opinion and Order via email.

ECF 20-1319

1. Defendants' Joint Motion to Dismiss [Docket No. 166] is **DENIED**;

2. Cargill Defendants' Motion to Dismiss [Docket No. 170] is **DENIED**;

3. Defendant National Beef's Motion to Dismiss [Docket No. 173] is **DENIED**;

4. JBS Defendants' Motion to Dismiss [Docket No. 178] is **DENIED**;

5. Tyson Defendants' Motion to Dismiss [Docket No. 182] is **DENIED**;

6. Plaintiffs' Motion to Approve Alternative Service [Docket No. 194] is **GRANTED**. Plaintiffs are authorized to serve JBS S.A. by serving counsel for JBS S.A., Sami
H. Rashid of Quinn Emanuel Urquhart & Sullivan LLP, with the summons, complaint, and this Memorandum Opinion and Order via email.

ECF 20-1414 **[*47]**

1. Defendants' Joint Motion to Dismiss [Docket No. 127] is **DENIED in part and GRANTED in part**, as follows:

a. Plaintiff's Missouri consumer protection claim is **DISMISSED with prejudice**;

b. Plaintiff's Nebraska consumer protection claim is **DISMISSED with prejudice**;

c. Plaintiff's New Hampshire consumer protection claim is **DISMISSED with prejudice**;

d. Plaintiff's New York consumer protection claim is **DISMISSED with prejudice**;

e. Plaintiff's North Dakota consumer protection claim is **DISMISSED with prejudice**;

f. Plaintiff's Rhode Island consumer protection claim is **DISMISSED with prejudice**;

g. Plaintiff's South Dakota consumer protection claim is **DISMISSED with prejudice**;

h. Plaintiff's Florida unjust enrichment claim is **DISMISSED with prejudice**;

i. Plaintiffs' New Hampshire unjust enrichment claim is **DISMISSED with prejudice**;

j. With respect to all other claims and issues, the Motion is **DENIED;**

2. Cargill Defendants' Motion to Dismiss [Docket No. 132] is **DENIED**;

3. Defendant National Beef's Motion to Dismiss [Docket No. 135] is **DENIED**;

4. JBS Defendants' Motion to Dismiss [Docket No. 140] is **DENIED**;

5. Tyson Defendants' Motion to Dismiss [Docket No. 144] is **DENIED**;

6. Plaintiff's Motion to Approve Alternative **[*48]** Service [Docket No. 155] is **GRANTED**. Plaintiff is authorized to serve JBS S.A. by serving counsel for JBS S.A., Sami H. Rashid of Quinn Emanuel Urquhart & Sullivan LLP, with the summons, complaint, and this Memorandum Opinion and Order via email.

IT IS FURTHER ORDERED that the parties show cause on or before ten (10) calendar days from the date of this Order why the Court should not allow the Order to be accessible to the general public and specify any portion of the Order warranting redaction.

DATED: September 14, 2021

at Minneapolis, Minnesota.

Opinion

MEMORANDUM-DECISION and ORDER

INTRODUCTION

On May 28, 2021, plaintiff Twin Bridges Waste and Recycling, LLC ("Twin Bridges" or "plaintiff") filed a 387-paragraph, 79-page amended complaint. It included 57 pages and 334 paragraphs of alleged facts. Plaintiff alleges antitrust violations against defendant waste disposal companies County Waste and Recycling Service, Inc. ("County Waste") and Robert Wright Disposal, Inc. ("Robert Wright"), both of which are allegedly indirect subsidiaries of defendants Waste Connections US, Inc. ("WCUSI") and Waste Connections, Inc. ("WCI" and collectively "defendants").

More specifically, Twin Bridges claims that defendants are trying to freeze it (and everyone else) **[*2]** out of the market for waste disposal services in New York's Capital Region (the "Capital Region Market"). Plaintiff alleges that defendants are attacking that objective through a multifaceted strategy of price-gouging, locking customers into nearly inescapable long-term contracts, impugning competitors' integrity, and consolidating control over landfills to exclude other waste companies.

On June 18, 2021, defendants moved to dismiss Twin Bridges' amended complaint under *Federal Rule of Civil Procedure ("Rule") 12(b)(2)* for lack of personal jurisdiction and *12(b)(6)* for failure to state a claim. Those motions, having been fully briefed, will now be decided on the submissions and without oral argument.

BACKGROUND

In some senses, Twin Bridges' amended complaint (Dkt. 21, "Compl.") can be read as an ongoing feud between two waste disposal companies: plaintiff on the one hand and defendant County Waste on the other. But in other ways, the conflict is more complicated than that, especially considering plaintiff's allegations that the larger corporate defendants are responsible for directing County Waste's efforts. As a result, deciding defendants' present motion involves three steps. First, sorting out each party's role in this litigation and their **[*3]** relationships to each other. Second, deciphering what bad acts plaintiff alleges against each defendant. And third, seeing if those alleged bad acts can support claims under federal ***antitrust law***.

To that end, it makes the most sense to start with Twin Bridges' main alleged rivals, defendants County Waste and Robert Wright. County Waste is a New York limited liability company with a principal place of business in Texas.[1] Dkt. 21 Compl. ¶ 14. But County Waste also does business more locally under a number of other names, including Ace Carting, D.J.'s Roll Off Service, Hardesty and Sons Sanitation, and others. *Id.* ¶ 15.

Robert Wright is also a New York limited liability company, but unlike County Waste its principal place of business is in the County of Albany, New York. Compl. ¶ 16. Robert Wright is a wholly-owned subsidiary of County Waste. *Id.* ¶¶ 22, 30.

One step up from County Waste is WCUSI. Though there are precious few allegations against this defendant, Twin Bridges at least alleges that WCUSI is a Delaware corporation with a principal place of business in Texas. Compl. ¶ 17. Otherwise, plaintiff only alleges that WCUSI "transact[s] substantial business within New York State[.]" **[*4]** *Id.* ¶ 29.

Finally, defendant WCI is a Canadian corporation, although it apparently also operates out of Texas. Compl. ¶ 18. WCI describes itself as "the third-largest waste management company" in North America, at least as far as revenue is concerned. *Id.* ¶ 26. Twin Bridges alleges that WCI prioritizes "exclusive and secondary markets" across the United States and Canada." *Id.* ¶ 25. To that end, plaintiff claims that WCI avoids larger, more competitive urban markets and instead targets "markets where [it] can attain high market share[,] either through exclusive contracts, vertical integration[,] or asset positioning." *Id.* ¶ 74.

---

[1] To the extent defendants' motion comes under *Rule 12(b)(6)*, the facts are taken from plaintiff's amended complaint, as well as any documents attached to it or incorporated by reference, and read in the light most favorable to it. To the extent defendants' motion comes under *Rule 12(b)(2)*, however, some facts may be considered from beyond the four corners of the complaint.

One method of vertical integration that WCI occasionally employs is landfill ownership. WASTE CONNECTIONS, *2019 Annual Report* ("Annual Report"), p. 11[2] (2019) http://online.fliphtml5.com/jvcm/ycal/#p=1 (last visited Sept. 13, 2021). In its own words, WCI "generally own[s] landfills to achieve vertical integration in markets where the economic and regulatory environments make landfill ownership attractive." *Id.* at 14. Plaintiff alleges that defendants own nine landfills in the Capital Region through nine different subsidiaries. Compl. ¶ 33. In its 2019 Annual Report, **[*5]** WCI nevertheless repeatedly refers to the landfills as "our" landfills that "we own[ ] or operate[.]" Annual Report p. 14.

Ultimately, Twin Bridges alleges that defendants collectively "market their services and operate as [a] single integrated business entity known as 'Waste Connections.'" Compl. ¶ 39. According to defendants, though, the relationship between them involves a fair sight more distance than plaintiff suggests. WCI claims that it "owns a subsidiary that owns another subsidiary that owns another subsidiary that owns another subsidiary that owns WCUSI." Dkt. 22-2 ("Pio Aff."), ¶ 8. From there, WCUSI owns yet another subsidiary, that in turn owns County Waste. *Id.* ¶ 9. And of course, County Waste then owns Robert Wright. *Id.* ¶ 22.

WCI describes its management of its subsidiaries as "decentralized." Annual Report p. 47. Under that management strategy, "[l]ocal managers have the authority to make many decisions concerning their operations without obtaining prior approval from executive officers, subject to compliance with general company-wide policies." *Id.*

Defendants were operating along those lines when Twin Bridges burst onto the Capital Region waste disposal scene in 2019. **[*6]** Compl. ¶ 81. Plaintiff describes itself as a "local" disposal and recycling company stationed out of the Town of Halfmoon in the Capital Region of New York. Compl. ¶¶ 1, 7. Fledgling as it is—and as a contrast to defendants' well-oiled corporate machinery—plaintiff alleges that it owns no landfills. *Id.* ¶ 8.

Nevertheless, Twin Bridges set its sights on making a name for itself in the Capital Region Market. In plaintiff's own words, that market is "the provision [of] Waste Services to residential, commercial[,] and governmental customers within the Capital Region counties of Albany, Fulton, Rensselaer, Saratoga, Washington[,] and Warren." Compl. ¶ 101. The market also includes commercial—but not residential—customers in Schenectady County, because plaintiff does not serve residential customers in that county. *Id.* ¶¶ 102-03.

According to Twin Bridges, breaking into the Capital Region Market was daunting from the jump. As plaintiff would have it, County Waste and Robert Wright together enjoyed a market share of "well over fifty percent of the residential subscription-based customers in the Capital Region Market." Compl. ¶ 78. In fact, plaintiff alleges that Robert Wright had a complete **[*7]** monopoly in southern Albany County. *Id.* ¶ 79.

In 2019, Twin Bridges claims that County Waste and Robert Wright's market power was such that plaintiff emerged as the "only alternative" for "most residential customers." Compl. ¶ 80. According to plaintiff's narrative, its arrival in the Capital Region Market immediately led to monopolistic gambits by defendants. *Id.* ¶ 81.

Those alleged gambits come in three flavors. First, under Count I, Twin Bridges alleges that defendants cut their prices below their costs to starve plaintiff out of the market. *See* Compl. ¶ 83. Specifically, plaintiff claims that County Waste slashed its prices from between $41 and $43 per month in 2011 to between $26 and $32 per month once plaintiff and its predecessor attempted to enter the market. *Id.* ¶¶ 112, 114.

That effort would prove to be only the first salvo in a price-cutting war between County Waste on the one side and Twin Bridges and its predecessor on the other. *See* Compl. ¶¶ 115-28. Plaintiff provides a number of alleged examples. Recently, plaintiff alleges that County Waste offered new residential customers twelve months of free service followed by two years of service at $12 per month. *See id.* ¶¶ 127-28. **[*8]** That rate amounts to only $8 per month for the first thirty-six months of service, which, according to plaintiff, is significantly below the $15-27 per month County Waste would need to charge to recoup its average variable costs. *See id.* ¶¶ 128, 131.

[2] Pagination refers to the overall page number, not the page numbers the document gives itself. Because the amended complaint specifically refers to WCI's 2019 annual report, the Court may rely on it in resolving defendants' personal jurisdiction and failure to state a claim arguments.

Twin Bridges alleges similarly drastic pricing offers in other spheres as well. Plaintiff alleges that Robert Wright and County Waste have offered deals equivalent to: (1) $1.67 per month for the first thirty-six months of contracts with homeowners' associations; (2) $8.95 for the Village of Nassau; and (3) $5.03 per month for the City of Gloversville, not to mention several other similarly drastic price cuts. Compl. ¶¶ 147, 162, 164, 173-213. Plaintiff alleges that each of these offers falls below the minimum defendants need to collect to break even on these contracts. *Id.* ¶¶ 148, 162, 166, 180, 189, 196.

Second, under Count II, plaintiff brings a kind of catchall claim of other anticompetitive conduct. *See* Compl. ¶ 83. Specifically, plaintiff points to an ongoing campaign to defame plaintiff's owner, including a County Waste memorandum maligning the relative size of plaintiff and declaring that County Waste will "win the war" against plaintiff **[*9]** and its owner. *Id.* ¶ 96. Plaintiff also alleges that when defendants absorbed Robert Wright, they kept its former owner on board because he claimed that he could "control" plaintiff's owner. *Id.* ¶¶ 224-25.

Twin Bridges further claims that defendants have locked their residential customers into contracts that renew automatically unless the customer provides written notice of his or her intent to end service well in advance of the deadline. Compl. ¶ 226. Those contracts also include rights of first refusal, which allow defendants to match the price offer of any competitor. *Id.*

Effectively, Twin Bridges claims that these policies keep customers trapped in contracts with defendants, because defendants could simply match any competitor's price to prevent an exodus to other disposal companies. *Id.* ¶ 229. Plaintiff also alleges that defendants are engaging in a widespread and ongoing effort to poach any customers plaintiff manages to bring on board by offering them special deals including drastic price cuts. *See id.* ¶¶ 243-249.

As a further example of allegedly anticompetitive conduct, Twin Bridges points to a number of alleged examples of defendants smearing plaintiff's reputation while working **[*10]** to keep their own customers in the dark as to defendants' contractual terms. *See* Compl. ¶¶ 252-85. Of particular weight, plaintiff claims that defendants published a letter on social media falsely accusing plaintiff's owner of being investigated by the Department of Justice for wire fraud. *Id.* ¶¶ 307-323.

Third, under Count III, Twin Bridges claims that defendants denied it access to their landfills to drive up plaintiff's costs. *See* Compl. ¶ 83. According to plaintiff, defendants have a "controlling market share in the ownership and operation of transfer stations and landfills in the Capital Region Market." Compl. ¶ 289. What is more, plaintiff claims that defendants spoke to other waste haulers and landfill owners to discourage them from working with—or even speaking positively of—plaintiff. *Id.* ¶¶ 303-04

Despite Twin Bridges' ranging allegations of misconduct, it was defendants who cast the first stone. Apparently fed up with their ongoing battles for the Capital Region Market, County Waste and Robert Wright brought a lawsuit against plaintiff in New York Supreme Court, Albany County. Compl. ¶ 334. Plaintiff responded by filing antitrust counterclaims not unlike the ones before this **[*11]** Court. *See id.* Upon realizing that federal courts have exclusive jurisdiction of federal ***antitrust law***, plaintiff voluntarily withdrew those claims without prejudice. *Id.*

Twin Bridges promptly refiled its antitrust claims against defendants before this Court on March 8, 2021. Dkt. 1. On May 7, 2021, defendants moved to dismiss plaintiff's complaint under *Rule 12(b)(2)* and *12(b)(6)* for lack of personal jurisdiction and failure to state a claim, respectively. Dkt. 22. This decision now follows.

LEGAL STANDARDS

A. *Rule 12(b)(6)* Failure to State a Claim

To survive a motion to dismiss, "a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. That factual matter may be drawn from "the facts alleged in the complaint, documents attached to the complaint as exhibits, and documents incorporated by reference in the complaint." *DiFolco v. MSNBC Cable L.L.C., 622 F.3d 104, 111 (2d Cir. 2010)*.

Importantly, "the complaint is to be construed liberally, and all reasonable inferences must be drawn in the plaintiff's favor." *Ginsburg v. City of Ithaca, 839 F. Supp. 2d 537, 540 (N.D.N.Y. 2012)* (citing *Chambers v. Time Warner, Inc., 282 F.3d 147, 152 (2d Cir. 2002)*). If the complaint and its additional materials—when viewed through that pro-plaintiff lens—are not enough to raise the plaintiff's right to relief on a claim above the speculative level, that claim **[*12]** must be dismissed. *See* *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

B. *Rule 12(b)(2)* Lack of Personal Jurisdiction

If a defendant calls personal jurisdiction into question under *Rule 12(b)(2)*, the burden of establishing jurisdiction falls to the plaintiff. *Nat'l Elec. Sys., Inc. v. City of Anderson, 601 F. Supp. 2d 495, 497 (N.D.N.Y. 2009)* (citing *Bank Brussels Lambert v. Fiddler Gonzalez & Rodriguez, 171 F.3d 779, 784 (2d Cir. 1999)*). To carry that burden, the plaintiff must "allege facts constituting a prima facie showing of personal jurisdiction." *Nat'l Elec. Sys., 601 F. Supp. 2d at 497* (citing *PDK Labs, Inc. v. Friedlander, 103 F.3d 1105, 1106 (2d Cir.1997)*).

At this early stage, all pleadings and factual ambiguities are construed in the plaintiff's favor. *Nat'l Elec. Sys., 601 F. Supp. 2d at 497* (citing *Robinson v. Overseas Mil. Sales Corp., 21 F.3d 502, 507 (2d Cir.1994)*).

However, the same is not true of argumentative inferences, nor will the court "accept as true a legal conclusion couched as a factual allegation[.]" *In re Terrorist Attacks on September 11, 2001, 714 F.3d 659, 673 (2d Cir. 2013)* (internal citations and quotation marks omitted). Moreover, on a motion to dismiss under *Rule 12(b)(2)*, courts may consider materials outside the pleadings "without converting [the] motion . . . into a motion for summary judgment." *Dorchester Fin. Sec., Inc. v. Banco BRJ, S.A., 722 F.3d 81, 86 (2d Cir. 2013)*.

From that factual footing, a court must determine whether the plaintiff has made "legally sufficient allegations of jurisdiction, including an averment of facts that, if credited, would suffice to establish jurisdiction over the defendant." *Penguin Grp. (USA) Inc. v. Am. Buddha, 609 F.3d 30, 35 (2d Cir. 2010)* (cleaned up).

DISCUSSION

Defendants' arguments for dismissal have three levels of scale. First, defendants raise one case-wide argument for dismissal: that **[*13]** Twin Bridges has failed to sufficiently allege that there is a substantial enough risk of defendants achieving a monopoly. Second, defendants raise three claim-based arguments, each of which would dispose of a claim as to all defendants, but can only dispose of the case altogether if defendants are correct on all three points. Third, defendants argue that this Court lacks personal jurisdiction over WCI and WCUSI, which would only dismiss those defendants from the case. To avoid unnecessary duplication of effort, the Court will consider defendants' arguments from broadest to narrowest, only reaching the jurisdictional arguments if any of plaintiff's claims remain viable.

A. Probability of Achieving a Monopoly

Defendants begin their assault on Twin Bridges' complaint by arguing that plaintiff has failed to adequately allege that they possess monopoly power. "To state an attempted monopolization claim, a plaintiff must allege plausible facts supporting that the defendant has engaged in [(1)] predatory or anticompetitive conduct, [(2)] with a specific intent to monopolize a particular and defined market, and [(3)] a dangerous probability of success." *In re Zinc Antitrust Litig., 155 F. Supp. 3d 337, 381 (S.D.N.Y. 2016)* (citing *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*).

The third element of a dangerous **[*14]** probability of success requires courts to "consider the relevant market and the defendant's ability to lessen or destroy competition in that market." *Spectrum Sports, 506 U.S. at 456*. In other words, "a defendant's market share is the primary indicator of the existence of a dangerous probability of success." *AD/SAT, Div. of Skylight, Inc. v. Associated Press, 181 F.3d 216, 226 (2d Cir. 1999)* (internal citations and quotation marks omitted).

But "primary" does not mean "only." On the contrary, other barriers to entry have their say as well. *See Tops Markets, Inc. v. Quality Markets, Inc., 142 F.3d 90, 99 (2d Cir. 1998)*. For example, even an alleged market share north of 70% does not conclusively establish monopoly power if there is evidence of a lack of barriers to entry. *Id.* (holding that high market share is not dispositive of monopoly power in upholding grant of summary judgment). By contrast, a market share greater than 50% accompanied by evidence of other barriers to entry can establish monopolization. *See id.* And in either case, a claim of attempted monopolization can be supported by a showing of lesser power than is required to establish a claim of completed monopolization. *Id. at 100*.

As the varied factors at play in the monopoly power calculation should make clear, "[t]he existence of monopoly power, or the dangerous probability of acquiring it, is heavily fact-dependent." **[*15]** *In re Payment Card Interchange Fee & Merchant Discount Antitrust Litig., 562 F. Supp. 2d 392, 401 (E.D.N.Y. 2008)*. As a result, "courts rarely grant dismissal of [attempted monopolization claims] on the basis of insufficient market share, unless the plaintiff rests its claims on market share allegations to the exclusion of other evidence." *Id.* (collecting cases).

Upon review, Twin Bridges' showing of defendants' market power is not so feeble or contradicted as to justify dismissal. Remember, plaintiff alleges that defendants held a market share of "well over fifty percent of the residential subscription-based customers in the Capital Region Market." Compl. ¶ 78. Although defendants correctly point out that this figure does not account for commercial or government customers, plaintiffs have nevertheless still alleged that defendants have a "leading market position" in the Capital Region Market as defined by the amended complaint. *Id.* ¶¶ 9, 28, 32, 346.

In addition, Twin Bridges has alleged that defendants have assumed control over landfills in the Capital Region Market to vertically integrate and construct additional barriers to entry. *See* Annual Report p. 11. Between defendants' market power and their other barriers to entry, plaintiff has alleged that customers are frequently faced with no alternatives **[*16]** to defendants. *See* Compl. ¶ 77. At this early stage, these allegations of substantial market power and barriers to entry are enough to carry plaintiff's burden. Defendants' motion to dismiss on this score must be denied.

B. Predatory Pricing

Next, defendants argue that Twin Bridges has failed to properly plead the requisite element of anticompetitive conduct for its Count I predatory pricing claim. To that end, "[p]redatory pricing may be defined as pricing below an appropriate measure of cost for the purpose of eliminating competitors in the short run and reducing competition in the long run." *Cargill, Inc. v. Monfort of Colo., Inc., 479 U.S. 104, 117, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986)*. Ultimately, predatory pricing claims look like this. The seller starts by cutting its prices to levels that its competitors, actual or prospective, cannot match. *Irvin Indus., Inc. v. Goodyear Aerospace Corp., 974 F.2d 241, 244 (2d Cir. 1992)*. Would-be competitors find themselves forced to drop out of the market, which allows the seller to build or maintain a monopoly. *Id.* Then, once the seller has secured its power, it takes advantage of consumers' lack of alternatives by charging high prices to recoup the losses from its earlier, lower prices. *Id.*

Alleging such a long-term scheme is no meager feat. Eventually, a predatory pricing plaintiff "must prove that prices complained **[*17]** of are below an appropriate measure of its rival's costs" and "that the competitor had a . . . dangerous probability [ ] of recouping its investment in below-cost prices." *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 222, 224, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*.

Of course, low prices are more often a sign of healthy competition than of the predatory sort. *See* Id. at 226-227. As a consequence, and to prevent inadvertently chilling appropriate competition, predatory pricing claims are difficult to plead and prove. *Id.*

Even so, Twin Bridges has once again cleared the modest hurdle of plausibility required of a Rule 12(b)(6) motion. Plaintiff has alleged that defendants have cut their prices well below their average variable cost for several groups of customers. *See* Compl. ¶¶ 127-28, 131, 147-48, 162, 164, 166, 173-213. Plaintiff has also alleged that defendants lock their customers into contracts that are nearly impossible to escape. Compl. ¶¶ 226, 229.

Between those two alleged facts, Twin Bridges has plausibly established that defendants are cutting costs below the levels necessary to make a short-term profit, while locking customers into long-term contracts to take advantage of them later. Once again, defendants' motion to dismiss misses the mark, and plaintiff's Count I attempted monopoly claim relying **[*18]** on predatory pricing must survive that motion.

C. Anticompetitive Conduct

Defendants also argue that Twin Bridges' Count II general anticompetitive conduct claim cannot pass muster. "[A]nticompetitive conduct is conduct without a legitimate business purpose that makes sense only because it eliminates competition." *In re Adderall XR Antitrust Litig., 754 F.3d 128, 133 (2d Cir. 2014)* (internal citations and quotation marks omitted). That definition is a narrow one, which works to ensure that exceptions to the general rule that "businesses are free to choose the parties with whom they will deal, as well as the prices, terms, and conditions of that dealing" are "rare." *Pac. Bell Tel. Co. v. linkLine Commc'ns, Inc., 555 U.S. 438, 448, 129 S. Ct. 1109, 172 L. Ed. 2d 836 (2009)*.

As discussed above, Twin Bridges' claims of anticompetitive conduct cash out to claims that defendants improperly lock customers into long-term contracts to prevent them from signing with competitors, all while attacking those competitors with unfounded allegations. To defendants' mind, these facts are not enough to carry water.

As for the first theory, defendants argue that Twin Bridges has failed to adequately allege that defendants' exclusive contracts with their customers have foreclosed competition in a substantial share of the Capital Region Market. *See* *Maxon Hyundai Mazda v. Carfax, Inc., 726 F. App'x 66, 70 (2d Cir. 2018)* (summary order) (affirming grant **[*19]** of summary judgment for failure to prove substantial foreclosure of competition in applicable market in exclusive contracts case).

As Twin Bridges correctly notes, though, defendants are asking for far too much from it at the motion to dismiss stage. Plaintiff has alleged that defendants have substantial control over the Capital Region Market for waste disposal and are using that control to lock customers into exclusive contracts. Compl. ¶¶ 77, 226, 229.

Although plaintiff will likely have to establish substantial foreclosure of the market down the road,[3] at present there is no need to require plaintiff to allege anything more concrete than that. *See, e.g.,* *In re Keurig Green Mountain Single-Serve Coffee Antitrust Litig., 383 F. Supp. 3d 187, 237 (S.D.N.Y. 2019)* ("At the motion to dismiss stage, . . . specific mathematical pleading is unnecessary."). To the extent it relies on exclusive contracts, Count II must survive.[4] *See, e.g.,* *All Star Carts & Vehicles, Inc. v. BFI Canada Income Fund, 596 F. Supp. 2d 630, 642 (E.D.N.Y. 2009)* (allowing claims of overly restrictive contracts in waste disposal to survive motion under Rule 12(b)(6)).

---

[3] Unless plaintiff can establish that defendants' contracts are "so plainly anti-competitive and so lacking in redeeming pro-competitive value that [they are] presumed illegal without further examination," plaintiff will have to clear the rule of reason test. *Geneva Pharm. Tech. Corp. v. Barr Labs. Inc., 386 F.3d 485, 506 (2d Cir. 2004)*. Under that test, plaintiff would be required to establish an "actual adverse effect on competition as a whole in the relevant market." *Id.*

[4] Because Count II survives as a whole, the Court need not delve into whether plaintiff's alternate theories of recovery under this count have merit at this juncture.

D. Refusal of Access

Defendants also set their sights on Count III of Twin Bridges' complaint, alleging anticompetitive refusal of access to defendants' landfills. "As a general rule, businesses are free to choose the parties with whom they will deal[.]" *Pac. Bell, 555 U.S. at 448*. In some "limited **[*20]** circumstances," though, a firm's "unilateral refusal to deal with its rivals can give rise to antitrust liability." *Id.*

But the Supreme Court has been "very cautious" in giving their blessing to circumstances overpowering the freedom to deal. *Verizon Commc'ns Inc. v. Law Offices of Curtis V. Trinko, LLP ("Trinko"), 540 U.S. 398, 408, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. The one exception that the Supreme Court has recognized is "[t]he unilateral termination of a voluntary (*and thus presumably profitable*) course of dealing" with a competitor. *Id. at 409*. If a firm is willing to break a presumably profitable agreement, the logic goes, a jury could reasonably determine that the purpose in breaking that agreement was to forgo profit in the short term to achieve the long-term goal of weakening a competitor. *Id.* Much less certain is Twin Bridges' submitted "essential facility" exception.

The essential facility test as laid out by the Eleventh Circuit states that "a company that has exclusive control over a facility essential to effective competition may not deny potential competitors access to that facility on reasonable terms and conditions if to do so would create or maintain monopoly power in the relevant market." *Morris Commc'ns Corp. v. PGA Tour, Inc., 364 F.3d 1288, 1294 (11th Cir. 2004)*.

There are two grave problems with Twin Bridges' reliance on the essential facility exception. First, neither **[*21]** the Supreme Court nor the Second Circuit have ever accepted that theory. *Trinko, 540 U.S. at 411*; *see* *RxUSA Wholesale Inc. v. Alcon Labs., 391 F. App'x 59, 61 (2d Cir. 2010)* (summary order) (dismissing claim relying on essential facility exception "to the extent that such a claim is viable"). Instead, the only exception recognized by the Second Circuit to the "broad right of a firm to refuse to deal with its competitors" is a monopolist's termination of "a prior (voluntary) course of dealing with a competitor."[5] *In re Adderall, 754 F.3d at 134*.

Second, even if there an authority binding on this Court that recognized the essential facility exception, that exception contains an "indispensable requirement" that there be "unavailability of access to the essential facilities." *Trinko, 540 U.S. at 411* (cleaned up). "[W]here access exists, the doctrine serves no purpose." *Id.* In other words, where the plaintiff alleges only "inconvenience, or even some economic loss," an essential facilities claim must fail. *Twin Labs., Inc. v. Weider Health & Fitness, 900 F.2d 566, 570 (2d Cir. 1990)*. Instead, the plaintiff must allege "that an alternative to the facility is not feasible." *Id.*

Twin Bridges' refusal to deal claim cannot pass muster. Even if the Court were to take the bold step of applying the essential facility doctrine, plaintiff has failed to adequately plead an essential facility claim.

After all, **[*22]** Twin Bridges claims that it "routinely disposes of waste and recyclables collected in the Capital Region Market at disposal facilities located outside of New York State, including at facilities located in Pennsylvania." Compl. ¶ 327. That long haul is an inconvenience, to be sure, and likely involves some economic loss. But it is a feasible alternative nevertheless. *Twin Labs, 900 F.2d at 570*. Accordingly, even if the essential facility doctrine were available to plaintiff, its complaint would not present a claim under that doctrine's auspices. *See id.* (noting that plaintiff must allege absence of feasible alternative to sustain hypothetical essential facility claim).

Twin Bridges also fails to allege that defendants previously permitted it to use their landfills before suddenly reneging on that arrangement. As a result, plaintiff cannot avail themselves of the only fully recognized exception to

[5] To the extent that plaintiff relies on an "intent" theory also recognized by the Eleventh Circuit, the Second Circuit has never acknowledged that theory, either. *Compare* *Morris, 364 F.3d at 1294* (Eleventh Circuit describing "intent theory" of monopolization), *with* *In re Adderall, 754 F.3d at 134* (recognizing termination of prior course of dealing as "sole exception" to right to refuse to deal with competitor).

the general rule of freedom to deal. *In re Adderall, 754 F.3d at 134*. Defendants' motion to dismiss Count III must be granted.

E. Personal Jurisdiction over WCI and WCUSI

At this point, Counts I and II remain active against all defendants. However, defendants argue that this Court lacks personal jurisdiction over WCI and WCUSI. By extension, defendants **[*23]** still urge the Court to at least release those defendants from this case.

To that end, personal jurisdiction for an antitrust claim can be established under federal or state law. But in either case, that jurisdiction must comport with the due process guarantees of the *Fourteenth Amendment*. Under federal law, the venue provision of the Clayton Act ("*§ 22*") provides personal jurisdiction over a defendant in an antitrust case "wherever [the defendant] may be found." *15 U.S.C. § 22*. That provision allows nationwide service of process against a defendant, but only if the provision's venue provision is met. *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 424-25 (2d Cir. 2005)*.

Section 22 establishes venue over an antitrust defendant both: (1) "in the judicial district whereof it is an inhabitant"; and (2) "in any district wherein it may be found or transacts business." *15 U.S.C. § 22*. "Transacting business" is sustained by the "practical, everyday business or commercial concept of doing or carrying on busines of any substantial character." *Daniel, 428 F.3d at 428*. The nature of a corporate defendant's business is ultimately essential to the inquiry. *All Star Carts, 596 F. Supp. 2d at 637*. "A parent-subsidiary relationship may form a basis for the exercise of Clayton Act jurisdiction." *Id.*

Regarding defendant WCI, Twin Bridges has adequately established personal jurisdiction under **[*24]** *§ 22*. In arguing otherwise, defendants make much of the Canadian corporation's observance of corporate formalities and their extremely remote distance from the nitty-gritty conflicts between plaintiff, County Waste, and Robert Wright. And indeed, their arguments are not without merit, particularly to the extent that defendants urge that WCI limits itself to larger issues and allows its subsidiaries to primarily govern themselves through their decentralized organization scheme. Annual Report p. 47.

But WCI's treatment of landfills in this district is what ultimately convinces the Court of its jurisdiction over this defendant. WCI frequently refers to the landfills as "ours." *See, e.g.*, Annual Report pp. 14-18, 23, 27-28, 37, 39, 44, 56-57, 60. That is no mere accident, because WCI specifically describes purchasing those landfills as a strategy to aid in vertical integration in markets where it would be advantageous. *Id.* at 11. What is more, plaintiff has alleged WCI's ownership of nine landfills in the Capital Region Market. Compl. ¶ 33.

Defendants do not dispute any of those facts. Instead, defendants point out that WCI itself does not own the landfills: its subsidiaries do. *See* Compl. ¶ **[*25]** 33. That may be true, but the amended complaint alleges—and defendants do not meaningfully dispute—that WCI guides the overall strategy that dictates that those subsidiaries purchase landfills where it presents a market advantage. *See id.* After all, if WCI claims the landfills as its own and specifically outlines a strategy for when landfills should be purchased, it can hardly contend that it does not have a hand in purchasing them and thereby transacting business. Annual Report pp. 11, 14-18, 23, 27-28, 37, 39, 44, 56-57, 60.

Accordingly, personal jurisdiction under *§ 22* is met for WCI. Yet that does not answer whether the *Due Process Clause* also permits the Court's personal jurisdiction over the Canadian defendant. To that end, there are two types of personal jurisdiction contemplated by the *Due Process Clause*: general and specific.

"For an individual, the paradigm forum for the exercise of general jurisdiction [comporting with due process] is the individual's domicile; for a corporation, it is an equivalent place, one in which the corporation is fairly regarded as at home." *Bristol-Myers Squibb Co. v. Superior Court of California, 137 S. Ct. 1773, 1780, 198 L. Ed. 2d 395 (2017)*. "A corporation that operates in many places can scarcely be deemed at home in all of them." *Sonera Holding B.V.*

v. Cukurova Holding A.S., 750 F.3d 221, 225 (2d Cir. 2014) (citing Daimler AG v. Bauman, 571 U.S. 117, 139 n.20, 134 S. Ct. 746, 187 L. Ed. 2d 624 (2014)).

Instead, the affiliations capable of supporting **[*26]** general jurisdiction "have the virtue of being unique—that is, each ordinarily indicates only one place—as well as easily ascertainable." Sonera, 750 F.3d at 225. Nothing in Twin Bridges' complaint suggests that New York or its Northern District is fairly regarded as WCI's home. On the contrary, this defendant is a Canadian corporation operating out of Texas. Compl. ¶ 18. General personal jurisdiction over WCI can thus safely be ruled out.

But the specific jurisdiction inquiry tells a different story. That inquiry follows three steps. First, the plaintiff must demonstrate that the defendant has sufficient "minimum contacts with [the forum state] such that the maintenance of the suit does not offend traditional notions of fair play and substantial justice." Int'l Shoe Co. v. State of Washington, 326 U.S. 310, 316, 66 S. Ct. 154, 90 L. Ed. 95 (1945) (citations and quotation marks omitted). It is "insufficient to rely on a defendant's random, fortuitous, or attenuated contacts or on the unilateral activity of a plaintiff with the forum to establish specific jurisdiction." U.S. Bank Nat'l Assoc. v. Bank of Am. N.A., 916 F.3d 143, 150 (2d Cir. 2019) (internal citations and quotation marks omitted).

"Nor is it sufficient for a plaintiff to show simply that a defendant's actions caused an 'effect' in the forum state where the defendant has not expressly aimed its conduct at the **[*27]** forum." U.S. Bank, 916 F.3d at 151 (internal citations and quotation marks omitted). In a case involving the flow of commerce into a state, "[t]he defendant's transmission of goods permits the exercise of jurisdiction only where [it] can be said to have targeted the forum[.]" J. McIntyre Mach., Ltd. v. Nicastro, 564 U.S. 873, 882, 131 S. Ct. 2780, 180 L. Ed. 2d 765 (2011).

If a plaintiff makes that showing, the second step tasks it with demonstrating that "the litigation results from alleged injuries that 'arise out of or relate to' those activities." In re Terrorist Attacks, 714 F.3d at 674 (citing Burger King Corp. v. Rudzewicz, 471 U.S. 462, 472, 105 S. Ct. 2174, 85 L. Ed. 2d 528 (1985)).

Finally, for the third step, the Court "considers those contacts in light of other factors to determine whether the assertion of personal jurisdiction would comport with fair play and substantial justice." U.S. Bank, 916 F.3d at 151 (internal citations and quotation marks omitted). For specific jurisdiction, those factors are: (1) the defendant's burden; (2) the interests of the forum State; (3) the plaintiff's interest in obtaining relief; (4) the interstate judicial system's interest in efficient resolution; and (5) public policy. Asahi Metal Indus. Co. v. Superior Ct. of Cal., 480 U.S. 102, 113, 107 S. Ct. 1026, 94 L. Ed. 2d 92 (1987).

The first step of the personal jurisdiction inquiry carries over neatly from the Clayton Act analysis. Twin Bridges has alleged that WCI strategically directed its subsidiaries to consolidate ownership of landfills in the Capital Region Market, **[*28]** which involves a deliberate decision to conduct business in New York. Annual Report pp. 11, 14-18, 23, 27-28, 37, 39, 44, 56-57, 60.

The second step is similarly straightforward. Twin Bridges has alleged that WCI purchased those landfills to advance a competitive advantage through vertical integration. Compl. ¶ 74; Annual Report p. 11. By plaintiff's logic, WCI is trying to consolidate monopoly power for its local offshoots. Accordingly, because WCI's conduct is directly related to an element of plaintiff's claims against defendants, plaintiff's injuries attributable to that monopoly power "arise from" WCI's landfill ownership. In re Terrorist Attacks, 714 F.3d at 674.

As for the third step, the Court is satisfied that New York's interests in preventing monopolies in its back yard and plaintiff's ability to obtain injunctive relief in the district where the alleged harm is taking place outweigh any burden WCI might face. Asahi, 480 U.S. at 113. In fact, WCI's burden is especially minimal because WCI's subsidiaries will need to be defended in any case.

In short, all three steps of specific personal jurisdiction under the Due Process Clause are met. Defendants' motion to dismiss Twin Bridges' complaint under Rule 12(b)(2) must be denied as to WCI, at least at this juncture.

See, ***[*29]*** *e.g.*, *All Star Carts, 596 F. Supp. 2d at 638-39* (denying motion to dismiss on personal jurisdiction grounds for owner of subsidiary garbage companies because of broad scope of personal jurisdiction under *§ 22*).

The outlook is not quite so bright for Twin Bridges' claims against WCUSI, however. Plaintiff offers precious few allegations unique to this defendant. On the contrary, most of the complaint simply lumps WCUSI together with the other defendants. *See, e.g.*, Compl. ¶ 30 (noting that most of complaint will collectively refer to defendants as "Waste Connections"). Otherwise, plaintiff only offers the conclusory allegation that WCUSI "transact[s] substantial business within New York State[.]" *Id.* ¶ 29.

By contrast, defendants have submitted an affidavit that disavows any operational functions by WCUSI relevant to the present complaint. Pio Aff. ¶¶ 15-20. Similarly, that affidavit insists that there are no WCUSI employees in New York State at present. *Id.* ¶ 32.

For its part, Twin Bridges objects that this affidavit is self-serving and should be rejected. But even if the Court were to take plaintiff up on that invitation, the complaint simply provides no allegations tying WCUSI to any conduct it complains of. Even assuming that **[*30]** plaintiff could somehow establish personal jurisdiction through *§ 22* or New York's long-arm statute[6] on these barebones facts, the lack of any link between any conduct in the complaint attributable to WCUSI and the harms plaintiff complains of would prove fatal to the second step of the Due Process analysis. *In re Terrorist Attacks, 714 F.3d at 674* (requiring harm plaintiff complains of to arise from contacts with forum state).

Accordingly, Twin Bridges has failed to satisfy its burden of proving personal jurisdiction over WCUSI. Defendants' motion to dismiss under *Rule 12(b)(2)* must be granted on that score, and WCUSI must be dismissed from this case.

CONCLUSION

Despite defendants' best efforts, Twin Bridges' antitrust claims remain largely intact in the aftermath of their motion to dismiss. Even so, that motion has nevertheless allowed the Court to streamline the issues—and defendants—in this case going forward. Counts I and II against defendants County Waste, Robert Wright, and WCI may proceed.

Therefore, it is

ORDERED that

1. Defendants' motion to dismiss under *Rule 12(b)(2)* and *12(b)(6)* is GRANTED in part and DENIED in part;
2. Count III for attempt to monopolize for a refusal of access to disposal facilities is DISMISSED;
3. Defendant Waste Connections U.S., **[*31]** Inc. (WCUSI) is DISMISSED;
4. Plaintiff Twin Bridges Waste and Recycling, LLC's claims under Counts: (I) attempt to monopolize through predatory pricing; and (II) attempt to monopolize through anticompetitive conduct remain against defendants County Waste and Recycling Service, Inc., Robert Wright Disposal, Inc., and Waste Connections, Inc.; and
5. The remaining defendants are directed to answer Counts I and II of plaintiff Twin Bridges Waste and Recycling, LLC's amended complaint no later than Tuesday, September 28, 2021.

IT IS SO ORDERED.

Dated: September 14, 2021

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Scope

HN1[] **Fundamental Freedoms, Freedom to Petition**

Cal. Code Civ. Proc. § 425.16 was enacted to allow early dismissal of meritless First Amendment cases aimed at chilling expression through costly, time-consuming litigation. These lawsuits are also known as Strategic Lawsuits Against Public Participation, or SLAPPs. Under § 425.16, a party may file an anti-SLAPP motion to strike a cause of action based on an act in furtherance of the right to petition or free speech. In ruling on an anti-SLAPP motion, a court engages in a two-step process. At step one, the court assesses whether the moving party has made a prima facie showing that the lawsuit arises from an act in furtherance of its First Amendment right to free speech. At the first step, the moving defendant bears the burden of identifying all allegations of protected activity, and the claims for relief supported by them. When relief is sought based on allegations of both protected and unprotected activity, the unprotected activity is disregarded at this stage. If the court determines that relief is sought based on allegations arising from activity protected by the statute, the second step is reached.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN2[] Freedom of Speech, Strategic Lawsuits Against Public Participation

With respect to an anti-SLAPP motion, if the moving party can establish step one, the burden shifts to the non-moving party which must then show a reasonable probability that it will prevail on its claim. For a plaintiff to establish a probability of prevailing on a claim, he must satisfy a standard comparable to that used on a motion for judgment as a matter of law. This standard requires that a claim be dismissed if the plaintiff presents an insufficient legal basis, or if no reasonable jury would find in its favor. But when the step-two analysis depends on the defendant's assertion that a privilege applies, the defendant bears the burden of establishing it.

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Scope

HN3[] Fundamental Freedoms, Freedom to Petition

With respect to an anti-SLAPP motion, a defendant satisfies the first step of the analysis by demonstrating that the conduct by which plaintiff claims to have been injured falls within one of the four categories described in Cal. Code Civ. Proc. § 425.16(e) and that the plaintiff's claims in fact arise from that conduct. The four categories in subdivision (e) describe conduct in furtherance of a person's right of petition or free speech under the United States or California Constitution in connection with a public issue. Cal. Code Civ. Proc. § 425.16(e).

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN4[] Freedom of Speech, Strategic Lawsuits Against Public Participation

With respect to an anti-SLAPP motion, there is no bright-line rule to evaluate whether speech or conduct falls within the catch-all category at Cal. Code Civ. Proc. § 425.16(e). The California Court of Appeal has, several times, synthesized large groups of authorities and developed multiple tests to determine whether a defendant's activity is in connection with a public issue. A commonly cited test looks to whether the statements (1) concerned a person or entity in the public eye, (2) could directly affect a large number of people beyond the direct participants, or (3) concerned a topic of widespread, public interest.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

Torts > ... > Defamation > Public Figures > Limited Purpose Public Figure

HN5[] Freedom of Speech, Strategic Lawsuits Against Public Participation

The California Court of Appeal has provided guiding principles on how to evaluate whether speech or conduct falls within the catch-all category at Cal. Code Civ. Proc. § 425.16(e). First, public interest does not equate with mere curiosity. Second, a matter of public interest should be something of concern to a substantial number of people.

Thus, a matter of concern to the speaker and a relatively small, specific audience is not a matter of public interest. Third, there should be some degree of closeness between the challenged statements and the asserted public interest; the assertion of a broad and amorphous public interest is not sufficient. Fourth, the focus of the speaker's conduct should be the public interest rather than a mere effort to gather ammunition for another round of private controversy. Finally, those charged with defamation cannot, by their own conduct, create their own defense by making the claimant a public figure. A person cannot turn otherwise private information into a matter of public interest simply by communicating it to a large number of people.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN6[] **Freedom of Speech, Strategic Lawsuits Against Public Participation**

With respect to an anti-SLAPP motion, once a defendant has demonstrated that the claims against them arise out of protected activity, the burden shifts to the plaintiff to demonstrate that each challenged claim based on protected activity is legally sufficient and factually substantiated. The inquiry is limited to whether the plaintiff has stated a legally sufficient claim and made a prima facie factual showing sufficient to sustain a favorable judgment.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN7[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The essence of the Noerr-Pennington doctrine is that those who petition any department of the government for redress are immune from statutory liability for their petitioning conduct. The doctrine stems from the First Amendment's Petition Clause, which protects the right to petition the Government for a redress of grievances. Petitioning a court via lawsuit is no less protected than any other form of governmental petition. Though the core of the doctrine is statements made in litigation, it also protects certain conduct incidental to a lawsuit. If the conduct is protected, the court then asks whether the lawsuit falls into the sham litigation exception.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

HN8[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

For purposes of the Noerr-Pennington doctrine, conduct incidental to a lawsuit does not mean conduct in any way related to a lawsuit.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN9[] Noerr-Pennington Doctrine, Right to Petition Immunity

A publicity campaign directed at the general public, seeking legislation or executive action, enjoys antitrust immunity even when the campaign employs unethical and deceptive methods. But in less political arenas, unethical and deceptive practices can constitute abuses of administrative or judicial processes that may result in antitrust violations.

Administrative Law > ... > Evidence > Admissibility of Evidence > Privileged Communications

Torts > ... > Defenses > Privileges > Absolute Privileges

Torts > ... > Defenses > Privileges > Statutory Privileges

HN10[] Admissibility of Evidence, Privileged Communications

Cal. Civ. Code § 47(b) renders privileged a publication or broadcast made, among other things in any judicial proceeding. When it applies, the privilege is absolute and, so, prevents a claimant from showing it can prevail on the merits. The usual formulation is that the privilege applies to any communication (1) made in judicial or quasi-judicial proceedings; (2) by litigants or other participants authorized by law; (3) to achieve the objects of the litigation; and (4) that have some connection or logical relation to the action. The privilege exists to afford litigants and witnesses the utmost freedom of access to the courts without fear of being harassed subsequently by derivative tort actions. California law is clear, however, that republications to nonparticipants in the action are generally not privileged under the litigation privilege, and are thus actionable unless privileged on some other basis.

Torts > ... > Defenses > Privileges > Absolute Privileges

HN11[] Privileges, Absolute Privileges

With respect to the privilege that applies to a publication or broadcast made in any judicial proceeding, one requirement is that the publication be to achieve the objects of the litigation. This means that the communicative act must be a necessary or useful step in the litigation process and must serve its purposes. In other words, it is not sufficient that the communication's content need only be related in some way to the subject matter of the litigation.

Evidence > Privileges > Journalist's Privilege > Scope

Torts > ... > Defenses > Privileges > Absolute Privileges

Torts > ... > Defamation > Defenses > Fair Comment & Opinion

Torts > ... > Defenses > Privileges > Statutory Privileges

Torts > ... > Defenses > Privileges > Qualified Privileges

HN12[] Privileges, Journalist's Privilege

Cal. Civ. Code § 47(d) renders privileged a publication or broadcast made, with several exceptions, by a fair and true report in, or a communication to, a public journal, of a judicial proceeding, or of anything said in the course thereof. When it applies, the privilege is absolute. And although the fair report privilege is typically invoked by news media defendants, it also protects those who communicate information to the media.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Torts > ... > Contracts > Intentional Interference > Elements

HN13[] **Complaints, Requirements for Complaint**

The elements which a plaintiff must plead to state the cause of action for intentional interference with contractual relations are (1) a valid contract between plaintiff and a third party; (2) defendant's knowledge of this contract; (3) defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; (4) actual breach or disruption of the contractual relationship; and (5) resulting damage.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN14[] **Intentional Interference, Elements**

The elements of the intentional version of the tort of interference with prospective economic advantage are (1) an economic relationship between the plaintiff and some third party, with the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) intentional acts on the part of the defendant designed to disrupt the relationship; (4) actual disruption of the relationship; and (5) economic harm to the plaintiff proximately caused by the acts of the defendant. The difference between the intentional and negligent torts is that the defendant knew of the existence of the relationship and was aware or should have been aware that if it did not act with due care its actions would interfere with this relationship and cause plaintiff to lose in whole or in part the probable future economic benefit or advantage of the relationship.

Torts > ... > Prospective Advantage > Intentional Interference > Defenses

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN15[] **Intentional Interference, Defenses**

With respect to the intentional version of the tort of interference with prospective economic advantage, California law requires that the defendant's conduct be wrongful by some legal measure other than the fact of interference itself.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Torts > Business Torts > Unfair Business Practices > Elements

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN16[] **State Regulation, Claims**

The Unfair Competition Law (UCL) provides a cause of action against business practices that are (1) unlawful, (2) unfair, or (3) fraudulent. Cal. Bus. & Prof. Code § 17200. Generally, by proscribing any unlawful business practice, § 17200 borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN17[] **Trade Practices & Unfair Competition, State Regulation**

A common law violation such as breach of contract is insufficient to make out an Unfair Competition Law (UCL) claim. But the law is clear that the unlawful practices prohibited by Cal. Bus. & Prof. Code § 17200 are any practices forbidden by law, be it civil or criminal, federal, state, or municipal, statutory, regulatory, or court-made. The Ninth Circuit has held that international interference with contractual relations can be actionable under the UCL.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN18[] **Trade Practices & Unfair Competition, State Regulation**

With respect to unlawful practices prohibited by Cal. Bus. & Prof. Code § 17200, it appears that alleged misrepresentations to third parties about legal issues can constitute an unfair violation.

Opinion

ORDER DENYING MOTION TO STRIKE AND DISMISS [*2]

Re: Dkt. No. 118

INTRODUCTION

Plaintiff Wisk Aero LLC ("Wisk") alleges that defendant Archer Aviation Inc. ("Archer") misappropriated its trade secrets and infringed its patents when developing an all-electric vertical takeoff and landing ("eVTOL") aircraft. Archer countersued, claiming that Wisk's publicity campaign associated with the suit constitutes tortious interference with contractual and economic relations, defamation, and an unfair business practice. The heart of its claims is that Wisk wrote several blog posts and a press release that accused Archer of theft of trade secrets and, in one case, stated that the federal government was conducting a criminal investigation "into" Archer. According to Archer, the trade-secret allegations are false. It is not disputed that Archer was not under criminal investigation—it had been subpoenaed in one related to an investigation into an employee.

Wisk now moves to strike those claims under California's anti-SLAAP law or dismiss them in the alternative. Its motion is denied. Though the challenged statements were about a matter of public interest, Wisk has not shown that they are privileged or otherwise immune from creating liability. Archer **[*3]** has adequately pleaded them. And whether the statements are indeed true or can create tort liability is a matter for the merits.

BACKGROUND

The allegations in the complaint in this case were discussed in detail in a recent denying Archer's partial motion to dismiss. *See* Dkt. No. 133. In brief, Wisk alleges that Archer misappropriated a large group of its trade secrets related to Wisk's eVTOL aircraft when developing its own. *See id.* at 22-26.

On April 6, 2021, when Wisk filed this suit, it published a post on its own online blog. *See* Dkt. No. 90-1 ("Blog Post"). On May 19, 2021, it updated it. *Id.* The original post was entitled "Why We're Taking Legal Action Against Archer Aviation." *Id.* at 2.[1] It first laid out Wisk's history and a summary of eVTOL aircraft. *Id.* at 3-4. Because it is the centerpiece of the current motion, I reproduce the part discussing Archer in full:

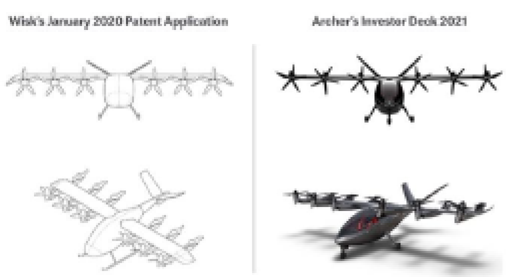
> Unfortunately, and as discussed in the Complaint we filed earlier today, it appears that Archer Aviation, a new entrant in the eVTOL market, is seeking to gain a foothold in this industry without respecting the rules of fair competition. As detailed in the Complaint, we have discovered significant and troubling evidence **[*4]** indicating that Archer has been using Wisk's proprietary intellectual property without our permission. Among other things, we discovered the misappropriation of thousands of highly confidential files containing very valuable trade secrets, as well as the use of significant innovations Wisk has patented. Wisk's confidential, proprietary trade secrets and patented innovations represent the hard work and dedication of hundreds of Wisk's engineers over multiple years. Today we took legal action to ask a federal court to stop Archer from using that stolen Wisk technology and from infringing our patents. This isn't a step we wanted to take, but we must protect our IP and the decade's worth of work and innovation we've put into Wisk. Here's some more context.
>
> **Archer's Actions**
>
> Archer has made a series of recent pronouncements about its technology and business that surprised the industry, including that it would soon release its own eVTOL aircraft. Just a year ago, Archer appeared to have little or no meaningful operations, let alone the years of research, development, and testing required to fly even a prototype of an eVTOL aircraft.
>
> Archer's stated timeline for releasing an aircraft was a fraction **[*5]** of the time taken by its serious competitors, using a fraction of the number of employees of those competitors. The development of an entirely new kind of passenger aircraft requires years of engineering and significant expertise to get right, as demonstrated by Wisk

---

[1] References to exhibits are to their ECF-generated page numbers.

and the other leading players in this space. For example, after 10 years of hard engineering and testing, Wisk is currently developing its sixth-generation aircraft, which it plans to certify with the U.S. Federal Aviation Administration (FAA). We believe it is virtually impossible for Archer to have produced an originally-designed aircraft in this timeframe that has gone through the necessary testing and is ready for certification with the FAA.

The design that Archer released for its eVTOL aircraft was particularly surprising. As detailed in our Complaint, it appears to copy the same design that Wisk developed and submitted in a confidential patent application to the U.S. Patent and Trademark Office in January 2020. The copied design includes six front rotors that each consist of five blades and can tilt to be positioned either horizontally or vertically, as well as six rear rotors that each consist of two blades and remain **[*6]** fixed in a vertical position. The design also includes an unconventional "V" tail. A comparison of Wisk and Archer's designs is shown below: As detailed in our Complaint, the striking similarity in these designs could not have been a



coincidence. The same month that Wisk submitted its patent application, Archer hired ten of Wisk's engineers. Concerned about this targeted recruiting, Wisk hired a third party to conduct a forensic investigation. That investigation yielded troubling information. We discovered that one of those engineers downloaded thousands of Wisk files near midnight, shortly before he announced his resignation and immediately departed to Archer. Those files contain our valuable trade secrets and confidential information about Wisk's aircraft development spanning the history of the company, accumulated over countless hours of incremental progress by scores of engineers. Another engineer downloaded numerous files containing test data just before departing for Archer. Yet another wiped any trace of his computer activities shortly before leaving for Archer.

The stolen files include a multitude of Wisk trade secrets for aircraft designs, component designs, system designs, **[*7]** manufacturing, and test data. They include voluminous confidential presentations reporting on the development, simulation and testing of Wisk aircraft, as well as highly technical confidential documents focused on research, design, development, testing and fabrication of specific systems, which compile years of effort by engineers to develop Wisk's proprietary technology. As our Complaint explains, the design Archer disclosed above reflects its insider knowledge of Wisk's extensive aerodynamic test and evaluation data based on years of experimentation and modeling. The similarity in overall aircraft design further indicates Archer's use of more detailed design features, including features related to aircraft propulsion, power management, avionics, flight control, and manufacturing methodology.
The design of the aircraft submitted in Wisk's patent application is not a result of common knowledge among the industry or basic eVTOL aircraft design. This is a completely new type of aircraft and other companies in the space have come up with their own distinct designs based on their own unique innovation process, as shown below:
[White space appears in exhibit.]

All of this taken together — **[*8]** from the massive downloads and other suspicious activity that occurred just before employee transitions to Archer, the copycat aircraft design, and Archer's startlingly short operational history — have led us to conclude Archer is improperly using Wisk's intellectual property, as further detailed in the Complaint.

Id. at 3-8. It ended the post by saying, "[y]ou can learn more about why we're asking the Court for an injunction to stop Archer from using our IP, among other remedies, in our Complaint and related press release." *Id.* at 8. The words "Complaint" and "related press release" were hyperlinks to those documents. *See id.*

The May 19 update said the following:

> After Wisk filed its Complaint on April 6, Archer publicly disclosed a criminal investigation relating to some of the claims Wisk brought, and Archer's [special purposes acquisition company] sponsor Atlas Crest Investment Corp [("Atlas")] filed an 8-K noting that it was reviewing these matters. Wisk is fully cooperating with the FBI and Department of Justice in their criminal investigation into Archer relating to the theft and use of Wisk's intellectual property.

Id. at 2-3. Archer's public disclosure, however, was that it had **[*9]** been subpoenaed in a criminal investigation into a former Wisk employee that joined Archer. *See* Lauren Hirsch and Niraj Chokshi, Electric Aircraft Start-Up Accuses Rival of Stealing Its Secrets, *New York Times*, April 6, 2021, https://www.nytimes.com/2021/04/06/business/wisk-archer-lawsuit.html ("Archer also said it had placed an employee accused in the suit on paid leave 'in connection with a government investigation and a search warrant issued to the employee, which we believe are focused on conduct prior to the employee joining the company.' Archer said it and three employees who had worked with the individual had been subpoenaed in that investigation and were cooperating with the authorities."). Atlas's SEC disclosure stated much the same. *See* Dkt. No. 115-8. There is no evidence on this record that Archer is the target of a criminal investigation.

Wisk also released that press release on April 6. *See* Dkt. No. 90-2 ("Press Release"). It was entitled "Wisk Aero Sues Archer Aviation for Theft of Trade Secrets and Patent Infringement." Two bullet points beneath the title stated, "[l]awsuit follows discovery of suspicious file downloads and Archer's recent public disclosures," and "[s]eeks **[*10]** injunction halting use of Wisk's IP and other remedies against Archer." *Id.* at 2. The press release stated, "[t]he lawsuit alleges that Archer's business is 'built on intellectual property that is not its own' and brings claims for trade secret misappropriation and patent infringement." *Id.* It gave several descriptions of the allegations in the suit preceded by "[a]s detailed in the filing in federal court in the Northern District of California, this lawsuit follows:" and then said,

> • Wisk's discovery of suspicious file downloads by certain former employees who left Wisk to work for Archer, including thousands of files related to Wisk's confidential aircraft designs, component designs, system designs, manufacturing, and test data.
>
> • Archer's recent disclosure of an aircraft design appears to be a copy of a design Wisk developed and submitted in a confidential patent application to the U.S. Patent and Trademark Office back in January 2020. Archer's aircraft disclosure was made in connection with its plan to merge with Atlas Crest Corporation.
>
> As stated in the Case complaint, "Wisk brings this lawsuit to stop a brazen theft of its intellectual property and confidential information, and **[*11]** protect the substantial investment of resources and years of hard work and effort of its employees and their vision of the future in urban air transportation." Wisk Aero LLC vs. Archer Aviation Inc. (Case No. 5:21-cv-02450).
>
> Additional context for Wisk's legal action can be found in a recent blog post.

Id. at 2-3.

After Wisk filed its First Amended Complaint, Archer filed its First Amended Counterclaims ("CC") [Dkt. No. 90]. As relevant here, the first counterclaim alleges interference with contractual relations, the second alleges interference with prospective economic advantage, and the third alleges defamation, and the fourth alleges violations of California's Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code § 17200*.[2] Wisk now moves to strike or dismiss those claims. *See* Motion to Strike or Dismiss ("Mot.") [Dkt. No. 113].

LEGAL STANDARD

[2] Since briefing closed on this motion, Archer filed its operative Answer and incorporated its counterclaims "so as to avoid any suggestion of waiver." *See* Dkt. No. 142 51 n.2. Because they are unchanged, that filing did not moot the motion and no party has suggested otherwise.

HN1[] California Code of Civil Procedure § 425.16 "was enacted to allow early dismissal of meritless first amendment cases aimed at chilling expression through costly, time-consuming litigation." Metabolife Int'l, Inc. v. Wornick, 264 F.3d 832, 839 (9th Cir. 2001). These lawsuits are also known as "Strategic Lawsuits Against Public Participation," or "SLAPPs." Makaeff v. Trump Univ., LLC, 715 F.3d 254, 261 (9th Cir. 2013). Under Section 425.16, a party may file an "anti-SLAPP motion" to strike "a cause of action based on an act in furtherance **[*12]** of [the] right to petition or free speech." Metabolife, 264 F.3d at 840 (internal quotations omitted).

In ruling on an anti-SLAPP motion, a court engages in a two-step process. Equilon Enterprises v. Consumer Cause, Inc., 29 Cal.4th 53, 67, 124 Cal. Rptr. 2d 507, 52 P.3d 685 (2002). At step one, the court assesses whether the moving party has made "a prima facie showing that the lawsuit arises from an act in furtherance of its First Amendment right to free speech." Nat'l Abortion Federation v. Center for Medical Progress, Case No. 15-cv-03522-WHO, 2015 U.S. Dist. LEXIS 114851, 2015 WL 5071977, at *3 (N.D. Cal. Aug. 27, 2015).

> At the first step, the moving defendant bears the burden of identifying all allegations of protected activity, and the claims for relief supported by them. When relief is sought based on allegations of both protected and unprotected activity, the unprotected activity is disregarded at this stage. If the court determines that relief is sought based on allegations arising from activity protected by the statute, the second step is reached.

Baral v. Schnitt, 1 Cal. 5th 376, 398, 205 Cal. Rptr. 3d 475, 376 P.3d 604 (2016).

HN2[] If the moving party can establish step one, the burden shifts to the non-moving party which must then show a reasonable probability that it will prevail on its claim. Makaeff, 715 F.3d at 261. "For a plaintiff to establish a probability of prevailing on a claim, he must satisfy a standard comparable to that used on a motion for judgment as a matter of law." Price v. Stossel, 620 F.3d 992, 1000 (9th Cir. 2010). This standard requires that a claim be dismissed if the plaintiff presents an insufficient legal basis, **[*13]** or if no reasonable jury would find in its favor. Metabolife, 264 F.3d at 840; *see also* Price, 620 F.3d at 1000 (an anti-SLAPP motion will be granted if the plaintiff "presents an insufficient legal basis for the claims or when no evidence of sufficient substantiality exists to support a judgment for the plaintiff") (internal quotations omitted). But when the step-two analysis depends on the defendant's assertion that a privilege applies, the defendant bears the burden of establishing it. *See* Mandel v. Hafermann, 503 F. Supp. 3d 946, 963-64 (N.D. Cal. 2020) (collecting authorities).

DISCUSSION

I. ANTI-SLAPP STEP ONE

HN3[] A defendant satisfies the first step of the analysis by demonstrating that the "conduct by which plaintiff claims to have been injured falls within one of the four categories described in subdivision (e) [of Section 425.16] . . . and that the plaintiff's claims in fact arise from that conduct." Rand Res., LLC v. City of Carson, 6 Cal.5th 610, 620, 243 Cal. Rptr. 3d 1, 433 P.3d 899 (2019) (internal quotation marks and citations omitted). The four categories in subdivision (e) describe conduct "in furtherance of a person's right of petition or free speech under the United States or California Constitution in connection with a public issue." Cal. Civ. Proc. Code § 425.16(e).

Wisk argues that several of these categories apply. I agree with it that the challenged statements at least qualify as "conduct in furtherance of the exercise of the constitutional right **[*14]** of petition or the constitutional right of free speech in connection with a public issue or an issue of public interest." Cal. Civ. Proc. Code § 425.16(e).

HN4[] There is no bright-line rule to evaluate whether speech or conduct falls within this "catch-all" category. Healthsmart Pac., Inc. v. Kabateck, 7 Cal. App. 5th 416, 427, 212 Cal. Rptr. 3d 589 & n.7 (2016), *as modified* (Jan. 10, 2017). The California Court of Appeal has, several times, synthesized large groups of authorities and "developed multiple tests to determine whether a defendant's activity is in connection with a public issue." *Hilton v. Hallmark Cards, 599 F.3d 894, 906 (9th Cir. 2010)*. A "commonly cited test," *id.*, looks to whether the statements (1) "concerned a person or entity in the public eye," (2) "could directly affect a large number of people beyond the direct participants," or (3) concerned "a topic of widespread, public interest." *Rivero v. Am. Fed'n of State, Cty., & Mun. Emps., AFL-CIO, 105 Cal. App. 4th 913, 924 (2003)*. ***HN5***[] The Court of Appeal has elsewhere provided "guiding principles" on the question:

> First, "public interest" does not equate with mere curiosity. Second, a matter of public interest should be something of concern to a substantial number of people. Thus, a matter of concern to the speaker and a relatively small, specific audience is not a matter of public interest. Third, there should be some degree of closeness between the challenged statements and the asserted public interest; **[*15]** the assertion of a broad and amorphous public interest is not sufficient. Fourth, the focus of the speaker's conduct should be the public interest rather than a mere effort to gather ammunition for another round of private controversy. Finally, those charged with defamation cannot, by their own conduct, create their own defense by making the claimant a public figure. A person cannot turn otherwise private information into a matter of public interest simply by communicating it to a large number of people.

Weinberg v. Feisel, 110 Cal. App. 4th 1122, 1132-33, 2 Cal. Rptr. 3d 385 (2003) (internal quotation marks, citations, and alteration omitted).

The blog post and press release qualify under this section. As evidenced by the existence of many news articles in well-trafficked publications, Wisk and Archer are in an industry that is a "topic of widespread, public interest" to a "substantial number of people"—including coverage specifically of them.[3] In fact, Wisk and Archer's lawsuit alone has attracted significant press coverage.[4] *Cf. Henley v. Jacobs, No. C 18-2244 SBA, 2019 U.S. Dist. LEXIS 229894, 2019 WL 8333524, at *9 (N.D. Cal. Aug. 2, 2019)* (finding a "well-known" company sufficiently "in the public eye"). The content of the posts related to allegations that Archer—a company that was about to go public, inviting investors on the open market—built its business on misappropriated **[*16]** trade secrets. *Cf. id.* ("Given Uber's prominence, statements about the company's illegal and unethical practices, which include accusations of stealing trade secrets and conducting surveillance on competitors and politicians, unquestionably concern an 'entity in the public eye' on a matter of 'widespread, public interest.'"); *Piping Rock Partners, Inc. v. David Lerner Assocs., Inc., 946 F. Supp. 2d 957, 969 (N.D. Cal. 2013)*, *aff'd*, *609 F. App'x 497 (9th Cir. 2015)* (finding allegations of unethical business practices by one company against another to qualify because they amounted to a "warning to consumers not to do business with plaintiffs because of their allegedly faulty business practices"). And the blog post (to which the press release linked) alleged that there was a criminal investigation "relating to some of the claims Wisk brought" and that the FBI and Department of Justice—public agencies charged with protecting the public and enforcing the law in its name—had a "criminal investigation into Archer relating to the theft and use of Wisk's intellectual property." Blog Post at 2-3. *Cf. Healthsmart, 7 Cal. App. 5th at 430* (finding allegations of bribery of a state senator to relate to the public interest). All of this together removes this case from the ambit of a run-of-the-mill private dispute and makes it an issue of public interest.

II. ANTI-SLAPP STEP TWO

HN6[] Once a defendant has demonstrated that the claims against them arise out of protected activity, the burden shifts to the plaintiff to demonstrate that each challenged claim based on protected activity is legally sufficient and factually substantiated. *Baral, 1 Cal.5th at 384*. The inquiry "is limited to whether the plaintiff has stated a legally sufficient claim and made a prima facie factual showing sufficient to sustain a favorable judgment." *Id. at 384-85*. As noted, Wisk bears the burden of establishing that a privilege applies. *See Mandel, 503 F. Supp. 3d at 963-64*. Wisk argues that it is immune from liability for several reasons and that, in any event, Archer has failed to state any of its claims.

A. *Noerr-Pennington* Doctrine

Wisk first contends that its statements are immunized from liability by the *Noerr-Pennington* doctrine. They are not.

HN7[] "The essence of the *Noerr-Pennington* doctrine is that those who petition any department of the government for redress are immune from statutory liability for their petitioning conduct." *Theme Promotions, Inc. v. News Am. Mktg. FSI, 546 F.3d 991, 1006 (9th Cir. 2008)*. The doctrine stems from the First Amendment's Petition Clause, which protects the right to "petition the Government for a redress of grievances." Petitioning a court **[*18]** via lawsuit is no less protected than any other form of governmental petition. *Sosa v. DIRECTV, Inc., 437 F.3d 923, 929 (9th Cir. 2006)*. To analyze whether the doctrine protects Wisk from liability, the court first asks whether the conduct is protected. Though the core of the doctrine is statements made in litigation, it also protects certain "[c]onduct incidental to a lawsuit." *Theme Promotions, 546 F.3d at 1007*. If the conduct is protected, the court then asks whether the lawsuit falls into the "sham litigation" exception. *Id.*

Wisk argues that its blog posts and press release are "conduct incidental to a lawsuit." Mot. 7-9. Although district courts have divided on this issue, most courts within this Circuit to have addressed the question have concluded that a communication like this that simply describes the lawsuit is not protected by the doctrine. I agree.

HN8[] Conduct "incidental" to a lawsuit does not mean conduct "in any way related" to a lawsuit. As one court has put it, Wisk's reading of Ninth Circuit precedent is "overly broad." *Arista Networks, Inc. v. Cisco Sys. Inc., No. 16-CV-00923-BLF, 2018 WL 11230167, at *11 (N.D. Cal. May 21, 2018)*. The doctrine was given its most substantial treatment by the Ninth Circuit in *Sosa*. There, the court, relying on past cases, described the test as whether conduct was "incidental to the *prosecution* of the suit." *Sosa, 437 F.3d at 929* (emphasis added). In that case, **[*19]** the court held that pre-suit demand letters could fall within the reach of the doctrine. *Id. at 936*. As it explained, "preceding the formal filing of litigation with an invitation to engage in negotiations to settle legal claims is a common, if not universal, feature of modern litigation" and "[r]estricting such prelitigation conduct when the same demands asserted in a petition to the court is protected would render the entire litigation process more onerous, imposing a substantial burden on a party's ability to seek redress from the courts." *Id.* Significant, too, is that these communications were often privileged under state law. *Id.* And demand letters also served the same interest as litigation because they can help resolve disputes outside of formal litigation. *Id. at 936-37*.

The cases that *Sosa* relied on in formulating the "incidental to the prosecution of the suit" standard similarly concern extra-judicial communications with a tight connection to furthering the litigation and the values underlying the doctrine. One of those cases held that communications accepting or rejecting settlement offers were "conduct incidental to the prosecution of the suit." *Columbia Pictures Indus., Inc. v. Pro. Real Est. Invs., Inc., 944 F.2d 1525, 1528 (9th Cir. 1991)*, *aff'd*, *508 U.S. 49, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*.[5] Another held that communications in discovery **[*20]** are likewise incidental to the prosecution of the suit. *Freeman v. Lasky, Haas & Cohler, 410 F.3d 1180, 1184 (9th Cir. 2005)*. The "incidental" language came from *Noerr* itself. That case, and the

---

[5] *Columbia Pictures* passingly cited one district court case that cuts against my holding here; that issue is addressed below.

Supreme Court's cases expanding on the doctrine, also show its limited scope. There, railroads carried out a campaign to achieve legislative reform related to truckers; the Court held that the publicity campaign had the "incidental" effect of harming the truckers' perception, which was protected from antitrust liability. *E. R. R. Presidents Conf. v. Noerr Motor Freight, Inc., 365 U.S. 127, 142, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*. ***HN9***[] The Court later explained that holding: "A publicity campaign directed at the general public, seeking legislation or executive action, enjoys antitrust immunity even when the campaign employs unethical and deceptive methods. *Noerr, supra, 365 U.S., at 140-141*. But in less political arenas, unethical and deceptive practices can constitute abuses of administrative or judicial processes that may result in antitrust violations." *Allied Tube & Conduit Corp. v. Indian Head, Inc., 486 U.S. 492, 499-500, 108 S. Ct. 1931, 1936-37, 100 L. Ed. 2d 497 (1988)*. And, as the Ninth Circuit characterized a set of Supreme Court decisions employing the principle: "the Court held that laws restricting the ability of unincorporated associations to employ attorneys for their members, or to advise their members to seek legal advice and to recommend specific lawyers, violated the members' rights of association and petition, **[*21]** notwithstanding that such laws did not directly restrict the members' access to the courts or ability to obtain counsel independently." *Sosa, 437 F.3d at 935* (citations omitted).

Wisk's blog posts and press release were not "incidental to the prosecution of the lawsuit." The blog posts and press release communicated with the public *about* the lawsuit. But they did not, in any manner, affect it or advance Wisk's interests in it. Not giving them *Noerr-Pennington* immunity also does not threaten the values underlying the doctrine: If Wisk were subject to liability for the blog post and press release, it would not hamper its ability to prosecute this case at all. It is not like pre-suit demand letters, discovery communications, or other conduct that is useful or necessary to successfully petition a court for redress, to give Wisk adequate "breathing space" to petition the court, or to achieve the materially same end as litigation.

Other cases have so held. As one judge in this District explained *when examining blog posts about a lawsuit*, the defendant's "communications are in one sense related to the CLI litigation because they discuss the parties' copyright dispute. However, those communications have no relation **[*22]** to the prosecution of the CLI lawsuit as they are merely statements about the status of the parties' litigation and Cisco's intellectual property rights." *Arista, 2018 U.S. Dist. LEXIS 241347, 2018 WL 11230167, at *11*. Another judge in this District has found that a commercial publication that compared companies' products and described one of their litigating positions against the other was not protected. *Riverbed Tech., Inc. v. Silver Peak Sys., Inc., No. C 13-02980 JSW, 2015 U.S. Dist. LEXIS 188737, 2015 WL 12941890, at *3 (N.D. Cal. Apr. 7, 2015)*. It was, the court explained, not incidental to the prosecution of the suit even though it was "about" it. *Id.*

Wisk unpersuasively attempts to distinguish these cases. Wisk tries to distinguish *Arista* on the ground that it "examined the 'issue of how to evaluate a constitutionally protected lawsuit as part of a larger anticompetitive scheme,' and found that 'conduct incidental to [the] litigation [is] not protected by the *Noerr-Pennington* doctrine [where] Cisco used such [anticompetitive] conduct as tools to further the . . . scheme.'" Reply ISO Mot. ("Reply") [Dkt. No. 131] 7 (alterations in Wisk's Reply). It is true that the case *involved* an anti-competitive scheme, but that does not and did not alter the *Noerr-Pennington* analysis. The question there, as in any such analysis, was still whether the statements were protected. Not only is this plain **[*23]** from *Arista*'s reasoning, *Arista* also rejected Wisk's primary cases as inconsistent with *Sosa*. *Arista, 2018 U.S. Dist. LEXIS 241347, 2018 WL 11230167, at *11*. (*Noerr-Pennington* was originally built for ***antitrust law***, so that it cropped up in that context is no surprise and further shows Wisk's attempted distinction is mistaken.) And though it is true that *Riverbed* addressed a commercial comparison document (which is not the situation here), its *reasoning* was still that *Noerr-Pennington* does not extend protection to statements merely describing litigation. *See* *Riverbed, 2015 U.S. Dist. LEXIS 188737, 2015 WL 12941890, at *3*.

Wisk also relies on a group of cases that, as noted above, disagreed with this approach and found that various descriptions of litigation or publicity related to litigation are protected by the doctrine. Mot. 8; Reply 7. I do not find them persuasive. The only case in the Ninth Circuit that Wisk points to largely addressed cease and desist letters, a type of communication not at issue here. *See* *ABC Int'l Traders v. Yamaha Corp. of Am., NO. CV-86-7892-RSWL,* 1993 U.S. Dist. LEXIS 20947, at *11 (C.D. Cal. Jan. 27, 1993).[6] Then, in one sentence it held that "[w]hen publicity is incident to a lawsuit that is not a sham, that publicity is also protected by the Noerr-Pennington doctrine." Id., at *10. It offered no further explanation for that holding. In support, it cited two cases. The first, from the Fifth Circuit, held nothing of the sort: the cited **[*24]** portion held that threats of litigation were protected. Coastal States Mktg., Inc. v. Hunt, 694 F.2d 1358, 1367 (5th Cir. 1983). It only mentioned "publicity" to stay that "*the* publicity" connected to the threats of litigation was protected. *Id.* (emphasis added).

The other case is a decision from the District of Kansas that, as noted below, appears to be the wellspring for all of these cases. That case *did* hold that publicity attendant to a lawsuit was protected by the doctrine. *See* Aircapital Cablevision, Inc. v. Starlink Commc'ns Grp., Inc., 634 F. Supp. 316, 326 (D. Kan. 1986). To start, that court's analysis elided the distinction between general publicity and threats about litigation, and the cases it cited were all about the protection of litigation threats. *See id.* This aside, Aircapital did not engage with the values animating the *Noerr-Pennington* doctrine on this issue; it did not explain how mere description of the suit publicly affected the suit itself, let alone was incidental to its prosecution or necessary to safeguard the right to petition; and it long predated Sosa. It is true that the Ninth Circuit cited Aircapital in passing in Columbia Pictures and its parenthetical characterization was "where underlying litigation is not a sham, attendant publicity is protected by *Noerr-Pennington* doctrine." Columbia Pictures, 944 F.2d at 1529. But Wisk overreads the Ninth Circuit's stray citation as approval. The citation **[*25]** came in the substantive discussion of ***antitrust law***, not in the court's discussion of the doctrine. It was cited for the point that the antitrust claim rose or fell with the copyright action (so it is somewhat puzzling that the court chose that citation). *See id.* And the only *Noerr-Pennington* issue the court examined was the sham exception. In short, one buried and oblique reference with no supporting rationale about an issue not in the case does not transform one decision from the District of Kansas into Ninth Circuit law.

Wisk's next case only relied on cases finding things like warning or threat letters protected, except for Aircapital, and did not provide substantive discussion for why mere descriptions of the suit should be protected. *See* Kemin Foods, L.C. v. Pigmentos Vegetales del Centro S.A. de C.V., 384 F. Supp. 2d 1334 (S.D. Iowa 2005), *aff'd*, 464 F.3d 1339 (Fed. Cir. 2006). And its last case (marked not for citation) did the same thing, citing only Kemin, Aircapital, and *ABC International. See* Cap. Health Sys., Inc. v. Veznedaroglu, No. 15-8288, 2017 U.S. Dist. LEXIS 28390, 2017 WL 751855, at *13 (D.N.J. Feb. 27, 2017).

Finally, Wisk and the cases it relies on often cited cases in which a public relations campaign incident to a *legislative* petition was found protected. *See, e.g.*, Reply 7. If anything, that highlights how inappropriate applying the doctrine here would be. Litigation, unlike legislation, is not influenced by public pressure campaigns, so **[*26]** the idea that publicity is incident to prosecuting a lawsuit makes still less sense.

Accordingly, Wisk's blog posts and press release are not "incidental to the prosecution" of this litigation because they merely described it to the public.[7] They are not entitled to protection under the *Noerr-Pennington* doctrine.

B. Litigation Privilege

Next, Wisk argues that California's statutory litigation privilege shields its statements. Again, it does not.

HN10[] *California Civil Code § 47(b)* renders privileged a "publication or broadcast" made, among other things "[i]n any . . . judicial proceeding." When it applies, the privilege is absolute and, so, prevents a claimant from

[6] Wisk's other case from this Circuit concerned a letter sent to customers of the other party announcing the litigation and putting them on notice that they may be sued for purchasing infringing products, which is a far cry from the situation here. *See* AirHawk Int'l, LLC v. TheRealCraigJ, LLC, No. SACV1600624JVSKESX, 2017 U.S. Dist. LEXIS 147499, 2017 WL 3891214, at *3 (C.D. Cal. Jan. 19, 2017).

[7] The situation described in this Order is materially different from one in which the blog post or press release served some purpose in the litigation. If, for instance, the post were part of a class action notice plan, a search for class members, a search for witnesses, or something similar, the reasoning here would plainly not apply.

showing it can prevail on the merits. *Argentieri v. Zuckerberg, 8 Cal. App. 5th 768, 780, 214 Cal. Rptr. 3d 358 (2017)*. "The usual formulation is that the privilege applies to any communication (1) made in judicial or quasi-judicial proceedings; (2) by litigants or other participants authorized by law; (3) to achieve the objects of the litigation; and (4) that have some connection or logical relation to the action." *Silberg v. Anderson, 50 Cal. 3d 205, 212, 266 Cal. Rptr. 638, 786 P.2d 365 (1990)*, *as modified* (Mar. 12, 1990). The privilege exists "to afford litigants and witnesses the utmost freedom of access to the courts without fear of being harassed subsequently by derivative tort actions." *GetFugu, Inc. v. Patton Boggs LLP, 220 Cal. App. 4th 141, 152, 162 Cal. Rptr. 3d 831 (2013)* (internal quotation marks, **[*27]** alteration, and citations omitted). California law is clear, however, that "republications to nonparticipants in the action are generally not privileged under the litigation privilege, and are thus actionable unless privileged on some other basis." *Id.* (internal quotation marks and emphasis omitted); *accord Silberg, 50 Cal. 3d at 219; Susan A. v. Cty. of Sonoma, 2 Cal. App. 4th 88, 93, 3 Cal. Rptr. 2d 27 (1991)*.

Wisk's blog posts and press release are not shielded by the privilege. ***HN11***[] First, one requirement is that the publication be "to achieve the objects of the litigation." *Silberg, 50 Cal. 3d at 212*. The Court of Appeal has explained that this means that the "communicative act" must be "a necessary or useful step in the litigation process and must serve its purposes." *Rothman v. Jackson, 49 Cal. App. 4th 1134, 1146, 57 Cal. Rptr. 2d 284 (1996)*. In other words, it is not sufficient that the "communication's *content* need only be related in some way to the subject matter of the litigation." *Id.* (emphasis in original). As explained above in the discussion on the *Noerr-Pennington* doctrine, the press release and blog posts were not a useful or necessary step in the litigation and were not for purposes of achieving its objects. The only connection to the litigation is that the communications discussed it: their "content [was] related in some way to the subject matter of the litigation." *Id.* ***[*28]*** As a judge in this District has explained, a "public post on the internet"—essentially on all fours with Wisk's blog posts—cannot be found to further the objects of the litigation. *Canaday v. Peoples-Perry, No. 17-CV-05602-JSC, 2017 U.S. Dist. LEXIS 206804, 2017 WL 6405618, at *6 (N.D. Cal. Dec. 15, 2017)*.

Even setting this aside, Wisk's blog posts and press release were republished to non-participants in the action, so they are not covered by the litigation privilege. *GetFugu, 220 Cal. App. 4th at 152*. The blog post was republished for anyone, not just those in the litigation, to read. The press release was affirmatively sent out to the world at large. That is why, even in one of *Wisk's* leading cases, an emailed statement to the press that "summariz[ed] a pleading on the day it was filed"—essentially on all fours Wisk's press release—was found to not be privileged. *Argentieri, 8 Cal. App. 5th at 784*.

Wisk's counterarguments do not change this reality. In its Motion, Wisk countered that *its complaint and allegations* were made in a judicial proceeding. Mot. 10. That is true and irrelevant, the counterclaims are about the blog posts and press release. In the Reply, Wisk argues that they are "related to this lawsuit." Reply 9. Again, that is true; but that is not the test, as described above.

Wisk invokes an exception for when the republication is to nonparties "with a substantial **[*29]** interest in the proceeding." *GetFugu, 220 Cal. App. 4th at 152*; Mot. 10. That exception does not apply here. Again, Wisk did not send either the blog post or the press release to someone with a substantial interest in the proceeding, it posted the blog entry online and sent the press release out to whomever would read them. Neither of Wisk's cases on this issue are like the facts here. In one, the party *did* post a statement on a website. *FIVE Hotel FZCO v. Viceroy Hotels, LLC, No. B288793, 2019 Cal. App. Unpub. LEXIS 33, 2019 WL 91567, at *7 (Cal. Ct. App. Jan. 3, 2019)* (unpublished). But, in holding that the webpage was aimed at those with a substantial interest in the litigation, the court found that "[t]he Web site statement was not made to an 'unlimited worldwide audience.' Rather, it was placed on the [defendant]-owned webpage that had previously offered reservations to the hotel and now informed travelers why reservations were no longer offered on that page." *Id., at *8*. That was significant in part because a court threatened to impose liability on "any other person who knows of this order and does anything which helps or permits the defendant to breach the terms of this order." *Id.*, at *7 (internal quotation marks omitted). Because liability would extend to those who did business on that website, they had a "substantial interest" in the proceedings. *Id.* Wisk's **[*30]** other case found that a press release sent to buyers or prospective buyers of the company's goods was transmitted to people with a substantial interest in the litigation. *Weiland Sliding Doors & Windows, Inc. v. Panda Windows & Doors, LLC, 814 F. Supp. 2d 1033, 1041 (S.D. Cal. 2011)*. Neither of Wisk's communications was only transmitted to those it or Archer did business with who may have an interest in this litigation. Wisk's Reply attempts to reframe the question as whether it was transmitted to "interested parties who visit the site," but that is quite different than parties with a *substantial* interest *in the litigation*.

C. Fair Reporting Privilege

Wisk's Motion initially argued that "[b]ecause Archer's tortious interference and unfair competition claims are based on the transmittal of Wisk's blog posts and press release to news outlets, they are barred by the California fair and true reporting privilege." Mot. 11. Its Reply narrows that argument to the press release, and only to the extent that it was transmitted via a wire service (not, apparently, posted it on its website). Based on Wisk's Reply, I address only this updated argument.

HN12[] *California Civil Code § 47(d)* renders privileged a "publication or broadcast" made, with several exceptions not relevant here, "[b]y a fair and true report in, or a communication to, a public **[*31]** journal, of . . . a judicial . . . proceeding, or . . . of anything said in the course thereof." When it applies, the privilege is absolute. *Healthsmart, 7 Cal. App. 5th at 431*. And "[a]lthough the fair report privilege is typically invoked by news media defendants, it also protects those who communicate information to the media." *Id.*

There appears, however, to be no real dispute between the parties. The press release apparently was put out both in Wisk's website and via a wire service. Wisk does not defend the post on its website on the basis of this privilege (nor, presumably, could it). Archer's Opposition admits that it only challenges the statement to the extent it was published on its website. *See* Opposition to the Mot. ("Oppo.") [Dkt. No. 123] 18. Both parties will be bound by those representations going forward: Archer cannot impose liability for transmitting the press release to a wire service or the damages that resulted from that transmission; Wisk cannot argue that the posts on its own website are shielded by the fair reporting privilege.

D. Failure to State a Claim

Wisk next argues that Archer cannot make the showing that it will prevail on the merits because it has failed to state a claim on three of the **[*32]** four challenged counts.[8]

i. Interference with Contractual Relations

Archer's first counterclaim alleges interference with contractual relations. ***HN13***[] "The elements which a plaintiff must plead to state the cause of action for intentional interference with contractual relations are (1) a valid contract between plaintiff and a third party; (2) defendant's knowledge of this contract; (3) defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; (4) actual breach or disruption of the contractual relationship; and (5) resulting damage." *Pac. Gas & Elec. Co. v. Bear Stearns & Co., 50 Cal. 3d 1118, 1126, 270 Cal. Rptr. 1, 791 P.2d 587 (1990)*. Archer argues that two such contractual relationships were disrupted: (1) the merger with Atlas, through which Archer will go public and raise $1.1 billion, *see* CC ¶ 38, and (2) causing an employee to withdraw acceptance of a job offer. *Id.* ¶¶ 65-71.

Wisk's Motion argued that Archer had not pleaded that the Atlas contract was actually breached (as opposed to a mere disruption), Mot. 12, but that is unnecessary because "I follow the line of cases that requires actual breach *or disruption* of the contractual relationship because that is how the California Supreme Court has stated the element." **[*33]** *Park Miller, LLC v. Durham Grp., Ltd., No. 19-CV-04185-WHO, 2017 U.S. Dist. LEXIS 206804, 2020 WL 1955652, at *10 (N.D. Cal. Apr. 23, 2020)* (emphasis added, internal quotation marks and citation omitted).

[8] The motion to dismiss is derivative of the arguments made in this part of the motion to strike.

Wisk also contends that Archer does not allege that Wisk knew about the potential employee or had knowledge of the contract with them. Mot. 13. Archer's Opposition cites a case in which the court held that "in order to satisfy the second element of this tort under California law, the Plaintiff does not have to identify the specific contractual relations which have allegedly been disrupted . . . . If a potential defendant was completely unaware of contractual relations with a third party, then it would be impossible to infer any intent to interfere on the defendant's part. However, such intent can certainly be inferred if the defendant knows that contractual relations with a third party exist, but does not know the specific identity of the contractual party." *Sebastian Int'l, Inc. v. Russolillo, 162 F. Supp. 2d 1198, 1203-04 (C.D. Cal. 2001)*. Wisk cited no contrary authority and did not respond to the argument in its Reply. It appears plausible that Wisk had reason to know that Archer was hiring employees at pace—it was a centerpiece of its complaint. *See* Dkt. No. 133 at 24 (summarizing allegations). Wisk's only response is that this argument would impose tort liability whenever **[*34]** a company is hiring, but that is incorrect because a plaintiff will ultimately have to prove the defendant's intent to interfere.

ii. Interference with Prospective Economic Advantage

Archer's second counterclaim alleges interference with prospective economic advantage. ***HN14***[] The elements of the intentional version of the tort are "(1) an economic relationship between the plaintiff and some third party, with the probability of future economic benefit to the plaintiff; (2) the defendant's knowledge of the relationship; (3) intentional acts on the part of the defendant designed to disrupt the relationship; (4) actual disruption of the relationship; and (5) economic harm to the plaintiff proximately caused by the acts of the defendant." *Pac. Gas, 50 Cal. 3d at 1126* & n.2. The difference between the intentional and negligent torts is that "the defendant knew of the existence of the relationship and was aware or should have been aware that if it did not act with due care its actions would interfere with this relationship and cause plaintiff to lose in whole or in part the probable future economic benefit or advantage of the relationship." *N. Am. Chem. Co. v. Superior Ct., 59 Cal. App. 4th 764, 786, 69 Cal. Rptr. 2d 466 (1997)*. Archer alleges that it had economic relationships with "potential investors, lenders, **[*35]** and employees" that were disrupted. CC ¶ 73.

First, Wisk contends that Archer has failed to identify a specific relationship. Archer argues that the same relationships are at issue as with the interference with contract claim. *See* Oppo. 21. The economic advantage claim does incorporate the contractual relations allegations. CC ¶ 72. On the understanding that Archer is limited to Atlas (and its individual investors) and the single withdrawn employee, the claim may proceed. Otherwise, I would agree with Wisk that Archer's pleading is too vague to plausibly state a claim against others. *See, e.g.*, *Buxton v. Eagle Test Sys., Inc., No. C-08-04404 RMW, 2010 U.S. Dist. LEXIS 29190, 2010 WL 1240749, at *1 (N.D. Cal. Mar. 26, 2010)*. The case will proceed on those allegations alone.

Next, Wisk alleges that Archer has not pleaded any wrongful conduct. ***HN15***[] California law requires that "the defendant's conduct be wrongful by some legal measure other than the fact of interference itself." *Name.Space, Inc. v. Internet Corp. for Assigned Names & Numbers, 795 F.3d 1124, 1133 (9th Cir. 2015)* (internal quotation marks and citation omitted). Archer, however, has alleged that Wisk made false representations publicly, which appears to be an independent wrongful act sufficient to support liability. *Rausch v. Blair, No. CV154212DSFAGRX, 2015 U.S. Dist. LEXIS 189082, 2015 WL 13283839, at *2 (C.D. Cal. Oct. 1, 2015)*. Wisk mustered no authority to the contrary and did not address the argument in reply.

Finally, **[*36]** Wisk argues that Archer has not adequately pleaded proximate cause.[9] Yet Archer has pleaded that the blog post and press release directly led to these contractual and economic problems—a fact that would be within its knowledge. *See* CC ¶¶ 70, 77. The loss of an employment contract as a direct result of blog posts and a press release is sufficient to plausibly trace the causal chain to the posts. I agree that those allegations are not as specific as they could possibly be, but they are sufficient to create a reasonable inference of liability, especially as

---

[9] Its Reply attempted to expand this argument to the contractual relations claim as well, but I decline to address that improper argument.

proximate causation is a quintessential jury matter. *Pac. Shores Properties, LLC v. City of Newport Beach, 730 F.3d 1142, 1168 (9th Cir. 2013)*.

iii. UCL

HN16[] The UCL provides a cause of action against business practices that are (1) unlawful, (2) unfair, or (3) fraudulent. *See Cal. Bus. & Prof. Code §17200*.

Wisk first argues that Archer has failed to allege "unlawful" conduct under the UCL. Generally, "[b]y proscribing 'any unlawful' business practice, *section 17200* 'borrows' violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)* (some internal quotation marks omitted). Wisk argues that Archer only alleges common-law violations, which it claims are not actionable. It misunderstands the law. **HN17**[] Its pull-quote **[*37]** comes from the broader holding that "a common law violation s*uch as breach of contract* is insufficient" to make out a UCL claim. *Shroyer v. New Cingular Wireless Servs., Inc., 622 F.3d 1035, 1044 (9th Cir. 2010)* (emphasis added). But the law is clear that "[t]he 'unlawful' practices prohibited by *section 17200* are any practices forbidden by law, be it civil or criminal, federal, state, or municipal, statutory, regulatory, or court-made." *Saunders v. Superior Ct., 27 Cal. App. 4th 832, 838-39, 33 Cal. Rptr. 2d 438 (1994)*. The Ninth Circuit has held that international interference with contractual relations can be actionable under the UCL. *CRST Van Expedited, Inc. v. Werner Enterprises, Inc., 479 F.3d 1099, 1107 (9th Cir. 2007)*. Wisk has presented no principled basis to treat interference with economic advantage any differently—and it too is a "a tortious violation of duties imposed by law," the key reason the Ninth Circuit imposed liability. *Id.*

Wisk asserts that Archer has failed to allege "unfair" conduct under the UCL. **HN18**[] It appears, however, that alleged misrepresentations to third parties about legal issues can constitute an "unfair" violation. *See Luxul Tech. Inc. v. Nectarlux, LLC, 78 F. Supp. 3d 1156, 1174 (N.D. Cal. 2015)*. Without any contrary authority from Wisk (it again does not address the issue in reply), the claim will not be dismissed at this early stage on this basis.

E. Truth Defense

Wisk briefly argues that its statements were substantially true, which is a defense to some types of liability. *See Savage v. Pac. Gas & Elec. Co., 21 Cal. App. 4th 434, 449, 26 Cal. Rptr. 2d 305 (1993)*. Its argument **[*38]** is close to undeveloped but is, in any event, rejected.

Wisk's statements are not mere opinions or puffery; they are capable of being proven true or false. Archer has adequately pleaded that they are false, so to the extent Wisk's attack is facial, it fails. Most of the statements concern whether, as a factual matter, Archer misappropriated Wisk's trade secrets, which Archer alleges to be false. The remaining statement is that there was a federal criminal investigation "into" Archer, which no one disputes is not true, so the question will be whether Wisk has an adequate defense to that. Nor is it enough at this stage that Wisk sometimes described its *complaint* as making these allegations, because a reasonable layperson might well understand Wisk to be asserting that Archer in fact did so (and some of the statements were not couched in that way, so it would not wholly doom the claims). To the extent Wisk's attack is factual, Archer has presented sufficient evidence that it has a reasonable prospect of succeeding on the merits. Among other things, I previously found that Wisk, in an evidentiary showing, had not demonstrated misappropriation of trade secrets, which may mean that its statements **[*39]** were not true. *See* Dkt. No. 133 at 26-46. And again, the claim about the criminal investigation is not accurate in any event, because Archer only admitted it was subpoenaed in the course of the investigation into Xue, not that it itself was under investigation.

CONCLUSION

The motion to strike and dismiss is DENIED.

IT IS SO ORDERED.

Opinion

REPORT AND RECOMMENDATION

This case has been referred to the undersigned by the Hon. John L. Sinatra, Jr. pursuant to *28 U.S.C. §636(b)(1)* for all pre-trial matters and to hear and report upon dispositive motions.[1] Presently before the Court is plaintiff Truck-Lite Co., LLC's motion to dismiss defendant Grote Industries, Inc.'s counterclaims for failure to state a claim under *Federal Rule of Civil Procedure 12(b)(6)*. (Dkt. No. 53). For the following reasons, it is recommended that plaintiff's motion be granted in part and denied in part.

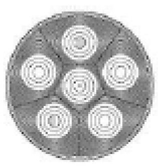
BACKGROUND

Complaint[2]

[1] This case was originally assigned to the Hon. Lawrence J. Vilardo and subsequently reassigned to Judge Sinatra, who maintained the dispositive referral to the undersigned.

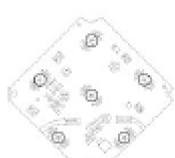
[2] The facts in this section are reiterated from the Court's prior Report and Recommendation. (Dkt. No. 40).

Plaintiff Truck-Lite Co., LLC ("Truck-Lite"), a Delaware limited liability company with its principal place of business in Falconer, New York, is a leading manufacturer and distributor of vehicular lighting **[*2]** products, such as work lamps, strobe lamps, and stop/tail/turn lamps. (SAC ¶¶6, 33). In 1999, plaintiff redesigned its flagship stop/tail/turn lamp (the Model 44) by developing "a unique and visually pleasing arrangement for the LED's"[3] within the lamp. (SAC ¶34). Plaintiff refers to this arrangement of LED's as the "penta-star" pattern. (*Id.*). In 2007, plaintiff applied for a trade dress trademark on the penta-star pattern embodied in the Model 44. (*Id.* ¶36). The United States Patent and Trademark Office ("USPTO" or "PTO") examined the application and issued plaintiff U.S. Trademark Registration 3,483,147 (the "'147 Registration"). (*Id.*). The following image depicts the trade dress at issue in the '147 Registration:



(*Id.*).

In 2008, plaintiff applied for a second trade dress trademark on the penta-star pattern embodied in a variety of its vehicular lighting products. (*Id.* ¶37). The USPTO examined the application (U.S. Trademark Serial No. 77/618,319 (the "'319 Application")) and published it for opposition. (*Id.*). The following image depicts the trade dress at issue in the '319 Application:



(*Id.*).

Defendant Grote Industries, Inc. ("Grote"), an Indiana corporation with its principal place **[*3]** of business in Madison, Indiana, filed with the Trademark Trial and Appeal Board ("TTAB") a Notice of Opposition against the '319 Application and a Petition for Cancellation against the '147 Registration. (*Id.* ¶¶7, 47-48). The TTAB consolidated defendant's Notice of Opposition and Petition for Cancellation into a single proceeding (*id.* ¶49), and in 2018, the TTAB issued a decision sustaining both the Notice and the Petition (*id.* ¶52 & Ex. C (TTAB Decision)).

Plaintiff thereafter commenced the instant action seeking *de novo* judicial review of the TTAB's decision under *15 U.S.C. §1071(b)(1)*. (Dkt. No. 1 (Original Complaint)). Plaintiff then filed an Amended Complaint (Dkt. No. 15) and a Second Amended Complaint (Dkt. No. 29), with the Second Amended Complaint now serving as the operative complaint. Plaintiff's Second Amended Complaint asserts ten causes of action, the first nine of which concern defendant's alleged advertisement, offer for sale, and sale of competing work lamp, strobe lamp, and stop/tail/turn lamp products that make use of the penta-star pattern. (*See id.*). Specifically, plaintiff's first and fourth causes of action assert federal unfair competition and trademark infringement claims concerning **[*4]** defendant's alleged advertisement, offer for sale, and sale of a competing work lamp product. (*Id.* ¶¶55-71, 107-22). The second and fifth causes of action assert federal unfair competition and trademark infringement claims concerning defendant's alleged advertisement, offer for sale, and sale of a competing strobe lamp product. (*Id.* ¶¶72-88, 123-38). Plaintiff's third and sixth causes of action assert federal unfair competition and trademark infringement claims concerning defendant's alleged advertisement and promotion of a competing stop/tail/turn lamp product. (*Id.* ¶¶89-106, 139-54).[4] The seventh, eighth, and ninth causes of action assert New York state law claims for trademark infringement,

[3] "LED" stands for light-emitting diode, a type of light source.

unfair competition, and dilution relating to defendant's advertisement, offer for sale, and sale of its competing work lamp, strobe lamp, and stop/tail/turn lamp products. (*Id.* ¶¶155-96). Plaintiff's tenth cause of action again seeks *de novo* judicial review of the TTAB's decision. (*Id.* ¶¶197-202).

Grote moved to dismiss the Second Amended Complaint for lack of personal jurisdiction under *Rule 12(b)(2)* and for summary judgment under *Rule 56*. (Dkt. No. 30). Following briefing and oral argument on the motion, this Court **[*5]** recommended that the motion be denied based on a finding that the Court has personal jurisdiction over Grote for Truck-Lite's Lanham Act and state law claims and may exercise pendent personal jurisdiction over Grote for Truck-Lite's TTAB review claim. On September 29, 2020, Judge Sinatra issued a Decision and Order adopting this Court's Report and Recommendation over Grote's objections and referring the matter back for further proceedings. (Dkt. No. 46).

Counterclaims

On October 13, 2020, Grote filed an answer to the Second Amended Complaint and also asserted several affirmative defenses and counterclaims against Truck-Lite. (Dkt. No. 48). Grote's first counterclaim alleges fraud in the prosecution of the '147 Registration and seeks damages and upholding cancellation of the trademark registration under the Lanham Act, *15 U.S.C. §§ 1120* and *1064*, respectively. (*Id.* ¶¶ 17-46). Grote's second counterclaim alleges fraud in the prosecution of the '319 Application and seeks damages and upholding of the TTAB decision. (*Id.* ¶¶ 47-75). Grote's third and fourth counterclaims allege antitrust monopolization and restraint of trade, and attempted monopolization, under antitrust laws, including the Sherman Act, *15 U.S.C. §§ 1* and *2*, and the Clayton **[*6]** Act, *15 U.S.C. § 14*. (*Id.* ¶¶ 76-120).

In response, Truck-Lite filed the instant motion to dismiss each of Grote's counterclaims. (Dkt. No. 53). Grote filed a response in opposition, (Dkt. No. 54), to which Truck-Lite replied (Dkt. No. 55). On January 27, 2021, the Court heard oral argument on the motion to dismiss and requested further briefing on the issues. On February 10, 2021, the parties each submitted supplemental memoranda. (Dkt. Nos. 57; 58). At that time, the Court considered the matter submitted.

DISCUSSION

The Court will address plaintiff's numerous arguments in support of dismissal first as they relate to the TTAB decision, and then, as they apply to each of defendant's counterclaims.

I. *Legal Standard*

In order to state a claim on which relief can be granted, a complaint must contain, *inter alia*, "a short and plain statement of the claim showing that the pleader is entitled to relief." *See* *Fed. R. Civ. P. 8(a)(2)*. In reviewing a complaint in the context of a motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)*, the court must accept as true all factual allegations and draw all reasonable inferences from those allegations in favor of the plaintiff. *ATSI Commc'ns, Inc. v. Shaar Fund, Ltd., 493 F.3d 87, 98 (2d Cir. 2007)*. Specifically, a complaint must plead "enough facts to state a claim to relief that is **[*7]** plausible on its face," *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, and must "allow[] the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* ("Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice."). The Supreme Court has further instructed that "[d]etermining whether a complaint states a plausible claim for relief [...] requires the [...] court to draw on its judicial experience and common sense." *Iqbal, 556 U.S. at 679*. "But where the well-pleaded facts do not permit the court to infer more than the mere possibility of

---

[4] Plaintiff's federal unfair competition and trademark infringement claims are brought under the Lanham Act, *15 U.S.C. §1051 et seq.*

misconduct, the complaint has alleged—but it has not 'show[n]'-'that the pleader is entitled to relief.'" *Id.* (citing *Fed. R. Civ. P. 8(a)(2)*).

II. *Effect of the TTAB Decision on Arguments in this Action*

Truck-Lite first argues that Grote's counterclaims alleging fraud in the prosecution of the '147 Registration and the '319 Application are barred based on the TTAB's prior decision. Truck-Lite puts forth the following arguments: (1) because Grote's failed to cross-appeal the TTAB decision on grounds related to fraud and functionality, it cannot now rely upon those grounds; and (2) based on principles of collateral estoppel, or issue preclusion, Grote **[*8]** cannot re-litigate issues of fraud and functionality because they were decided by the TTAB. The Court declines to adopt either theory.

a. Cross-Appeal

In the TTAB proceeding, Grote plead several grounds for opposition and cancellation of the penta-star trade dress. Those grounds were functionality under *Section 2(e)(5)* of the Trademark Act, *15 U.S.C. § 1052(e)(5)* (prohibiting registration of marks that are functional); lack of acquired distinctiveness under *Section 2(f)* of the Act, *15 U.S.C. § 1052(f)*; and fraud. (Dkt. No. 1-3). The TTAB decision was issued on March 30, 2018. (Dkt. No. 1-3). In it, the Board concluded that "Truck-Lite's product configuration is not functional, but Truck-Lite has not established that its configuration has acquired distinctiveness [...]." *Id.*, pg. 39. Because it found that Truck-Lite's product configuration did not have acquired distinctiveness, the Board declined to reach Grote's fraud claim. *Id.* In other words, Grote prevailed in its opposition but the TTAB disagreed with its functionality argument and, instead, based its decision on the product's lack of acquired distinctiveness.

Truck-Lite appealed the TTAB decision by filing this action seeking *de novo* review under *§ 1071(b)(1)*, as well as asserting additional infringement and **[*9]** other claims. Truck-Lite objects that Grote raises fraud and functionality[5] arguments and counterclaims without making a cross-appeal. Grote's first attempt to raise arguments on the issue of functionality, in its answer and counterclaim on October 30, 2020, was made 214 days after the TTAB decision. Truck-Lite argues that because Grote failed to cross-appeal TTAB's finding of non-functionality, it is now precluded from arguing any of its other grounds. Grote counters that it had no standing to appeal the decision, that it is entitled to raise each of these arguments within this action, and that it has properly done so with its answer, affirmative defenses, and counterclaims.

Any applicant for registration of a mark or party to an opposition or cancellation proceeding "who is dissatisfied with the decision of the Director or [TTAB], may appeal [...]." *15 U.S.C. § 1071(a)* and *(b)*. The appeal of a TTAB decision can be pursued in two different manners. An appeal can be made to the United States Court of Appeals for the Federal Circuit by filing a notice with the Director of the TTAB no later than 63 days from the date of the final decision. *See* *15 U.S.C. § 1071(a)(1)*; *37 C.F.R. § 2.145(d)(1)*. Alternately, a civil action can be brought in a district **[*10]** court within 63 days of the date of the final decision. *See* *15 U.S.C. § 1071(b)(1)*; *37 C.F.R. §*

---

[5] Fraud and functionality are interrelated issues here because the statement on which Grote bases one of its allegations of fraud is linked to the TTAB's decision that the product configuration is non-functional. More specifically, Grote alleges that Robert E. Ives, Vice President for Marketing at Truck-Lite, submitted to the USPTO a sworn declaration which fraudulently stated: "[t]he trade dress of the subject application is not the subject of either a pending design or utility patent application or of any issued or expired design or utility patents." (Dkt. No. 48, ¶¶ 21-31). Grote contends that Mr. Ives knew of the existence of a utility patent issued to Truck-Lite (U.S. Patent 6,654,172, "the '172 patent") which disclosed the functional nature of the penta-star mark, or 5-around-1 LED configuration, in stop/tail/turn lamps, but he made a false declaration to prevent rejection by the examiner on the grounds that the trade dress did not function as a mark. (*Id.*) Truck-Lite argued before the TTAB that the penta-star design is ornamental and nonfunctional and was only incidentally disclosed in the '172 patent. The TTAB agreed, concluding that although the '172 patent stated that the penta-star pattern was the "preferred embodiment of the invention," other light configurations could be used, and the pattern was not essential to the use or purpose of the article. (Dkt. No. 1-3, pg. 20). By extension, Truck-Light submits that the TTAB already determined the veracity of the representation that no utility patent disclosed functionality of the subject pattern.

2.145(d)(3). Further, in an *inter partes* case that is appealed by one party, a cross-action, or cross-appeal, may be filed by the other party, if done within 14 days after service of the summons and complaint or 63 days from the date of the decision of the TTAB, whichever is later. *See* 37 C.F.R. § 2.145(d)(3).

Addressing cross-appeals, the Federal Circuit has ruled that a cross-appeal by a party who succeeded in a lower court is not proper. *See* Praxair, Inc. v. ATMI, Inc., 543 F.3d 1306, 1322 (Fed. Cir. 2008) ("A party lacks standing to cross-appeal unless it is adversely affected by the judgment it seeks to challenge."); Bailey v. Dart Container Corp., 292 F.3d 1360 (Fed. Cir. 2002); *see also* Weight Watchers Int'l, Inc. v. Rokeach & Sons, Inc., 546 F. Supp. 841, 842 (2d Cir. 1982) (citations omitted) ("Notwithstanding the ["dissatisfied"] language of the statute, a party satisfied with the result of a Board decision may raise issues before a federal court on an appeal initiated by the dissatisfied party that lost before the Board."); Maremont Corp. v. Air Lift Co., 463 F.2d 1114, 1116, 59 C.C.P.A. 1152 (C.C.P.A. 1972) (finding a winning party's cross-appeal on a ground of opposition which the Board ruled against to be "pure surplusage"); *but see* Jean Alexander Cosmetics, Inc. v. L'Oreal USA, Inc., 458 F.3d 244 (3d Cir. 2006) (holding that the prevailing party in a TTAB cancellation proceeding could have appealed the Board's finding on a specific issue and, because it did not appeal, issue preclusion applied). In *Bailey v. Dart* **[*11]** *Container Corp.*, a party who prevailed on the merits of a patent infringement case in district court filed a "conditional" cross-appeal so that it could raise arguments regarding noninfringement and claim construction in the event the reviewing court reversed the noninfringement decision. The Court held that such a cross-appeal was not permitted, explaining "[i]t is only necessarily and appropriate to file a cross-appeal when a party seeks to enlarge its own right under the judgment or lessen the rights of an adversary under the judgment." Id., at 1362. "Thus, a party must file a cross-appeal when acceptance of the argument it wishes to advance would result in a reversal or modification of the judgment rather than an affirmance." *Id.*

Further, a non-appealing party is entitled to argue all grounds on appeal. RLS Assocs., LLC v. United Bank of Kuwait PLC, 380 F.3d 704, 712 (2d Cir. 2004) (*quoting* Mass Mut. Life Ins. Co. v. Ludwig, 426 U.S. 479, 481, 96 S. Ct. 2158, 48 L. Ed. 2d 784 (1976) ("The appellee may, without taking a cross-appeal, urge in support of a decree any matter appearing in the record, although his argument may involve an attack upon the reasoning of the lower court or an insistence upon matter overlooked or ignored by it."); Bailey, 292 F.3d at 1362 ("an appellee can present in this court all arguments supported by the record and advanced in the trial court in support of **[*12]** the judgment as an appellee, even if those particular arguments were rejected or ignored by the trial court"); Maremont, 463 F.2d at 1116 ("Appellees in trademark oppositions are entitled to reargue issues which they raised below but on which either they lost or the board did not rely.").[6]

Truck-Lite urges the Court to find that Grote could, and should, have cross-appealed the TTAB's holding on non-functionality. However, Grote prevailed in its opposition to the '147 Registration and the '319 Application before the TTAB. The Board denied the Grote's arguments that the penta-star trade dress was functional, and therefore not entitled to trade dress protection. The Board chose not to consider Grote's arguments alleging fraud in the prosecution of the trademarks. Instead, the Board grounded its decision in the penta-star's lack of acquired distinctiveness. Truck-Lite brought this appeal seeking review and other relief. Based upon Truck-Lite's appeal, Grote is entitled to re-argue its prior claims and ask this Court to reconsider any of the TTAB's findings. Grote is not bound by the regulatory deadline for timeliness of a cross-appeal. Indeed, a cross-appeal would be improper because, if successful, Grote's arguments **[*13]** will not expand the scope of the TTAB judgment in its favor. *See* Aventis Pharma S.A. v. Hospira, Inc., 637 F.3d 1341, 1344 (Fed. Cir. 2011).

b. Collateral Estoppel

---

[6] To this point, in an appeal to the Federal Circuit, a case proceeds on a closed administrative record and no new evidence is permitted. CAE, Inc. v. Clean Air Engineering, Inc., 267 F.3d 660, 673 (7th Cir. 2001). In contrast, an appeal to the district court is both an appeal and a new action, which allows the parties to request additional relief and to submit new evidence. *Id.*

Truck-Lite also seeks preclusion of Grote's fraud and functionality arguments based on the Supreme Court holding in *B&B Hardware, Inc. v. Hargis Indus., 575 U.S. 138, 135 S. Ct. 1293, 191 L. Ed. 2d 222 (2015)*. It is Grote's position that the TTAB decision is not final because an appeal has been filed in this Court, and therefore collateral estoppel does not apply.

B&B Hardware addressed the question of whether issue preclusion could apply to situations where the same issue was raised before an administrative agency and then a court. Answering in the affirmative, the Supreme Court held that a court deciding a Lanham Act claim should give preclusive effect to a TTAB decision if the ordinary elements of issue preclusion are met.[7] *Id., at 141*. In *B&B Hardware*, respondent Hargis lost its attempt to register a trademark. The TTAB ruled that the subject trademark should not be registered because of the likelihood of confusion between the subject trademark and the trademark of B&B Hardware, who stood in opposition. Hargis did not seek judicial review of that decision. In a subsequent civil action for infringement of the trademark, B&B Hardware sought, and received, a ruling that Hargis was now precluded from **[*14]** re-litigating the likelihood of confusion issue that was determined by the TTAB.

B&B Hardware is readily distinguishable from the case at bar. There, the petitioner urged application of issue preclusion from an *unchallenged* TTAB decision. Here, the TTAB decision is placed before this court for review by a party who did not prevail in the administrative proceeding. Had Truck-Lite declined to appeal the decision and the matter came before this Court only on infringement or other claims of Grote, Truck-Lite might be estopped from re-litigating certain issues. But that is not the case.

In fact, the Supreme Court noted that its reasoning would not be applicable to an instance where a party urged a district court reviewing a TTAB registration to give preclusive effect to the very TTAB decision under review. *575 U.S. at 152*. The Supreme Court contrasted the posture of *B&B Hardware* to that of *Astoria Fed. Sav. & Loan Ass'n v. Solimino, 501 U.S. 104, 111 S. Ct. 2166, 115 L. Ed. 2d 96 (1991)*. In *Astoria*, the respondent was not precluded from relitigating his claims under the Age Discrimination in Employment Act of 1967. The Court explained that, as the Age Discrimination law required respondent to exhaust an administrative process as prerequisite to bringing suit in court, giving a preclusive effect to the agency's prior determination could **[*15]** render the judicial suit "strictly pro forma." *575 U.S. at 152*. Here, although the Lanham Act does not require exhaustion of administrative remedies, allowing Truck-Lite to seek preclusion on the TTAB findings it agrees with while asking for *de novo* review of the ones its objects to would risk just such a *pro forma* review as was feared in *Astoria*.[8]

III. *Fraud in the Prosecution of the '147 Registration*

Truck-Lite next argues that, to the extent Grote's first counterclaim can be construed as a claim for damages under Section 38 of the Lanham Act, *15 U.S.C. § 1120*, it is barred by the applicable the statute of limitations. Truck-Lite asserts that Grote is time-barred from alleging fraud in its answer, affirmative defenses and counterclaim. For the following reasons, the Court concludes that Grote's fraud counterclaim is not time-barred.

a. Statute of Limitations

---

[7] Issue preclusion is the well-recognized doctrine that "the determination of a question directly involved in one action is conclusive as to that question in a second suit." *B&B Hardware, 575 U.S. at 147* (quoting *Cromwell v. County of Sec, 94 U.S. 351, 354 (1877)*). The ordinary elements necessary for issue preclusion to apply are as follows: (1) the issues in both proceedings must be identical, (2) the issue in the prior proceeding must have been actually litigated and actually decided, (3) there must have been a full and fair opportunity for litigation in the prior proceedings, and (4) the issue previously litigated must have been necessary to support a valid and final judgment on the merits. *See, e.g., Gelb v. Royal Globe Ins. Co., 798 F.2d 38, 44 (2d Cir. 1986)*.

[8] It is also noted that because the TTAB did not reach the fraud arguments, no findings related to fraud were essential to the judgment. Thus, it would be untenable for Truck-Lite to argue that Grote is estopped from litigating the fraud allegations which are unrelated to functionality of the design.

Because the Lanham Act establishes no limitations period for claims arising under it, and because there is no corresponding federal statute of limitations, courts must look to state law for the "most appropriate" or "most analogous" statute of limitations. *See* *Conopco, Inc. v. Campbell Soup Co., 95 F.3d 187, 191 (2d Cir. 1996)*. This timeliness inquiry is also viewed within the equitable defense of laches. If a plaintiff fails to bring a **[*16]** Lanham Act suit within the applicable limitations period, the presumption of laches will apply. *See id.*, at 10-11; *see also* *Belmora LLC v. Bayer Consumer Care AG, 987 F.3d 284, 293-94 (4th Cir. 2021)* (opining that the doctrine of laches is a more appropriate standard than analogous state statute of limitations to determine timeliness of Lanham Act claims). The Second Circuit has held that, as fraud and intent play an important role in all Lanham Act claims, the most appropriate analogous statute of limitations for such claims is to a state law cause of action sounding in fraud. *See* *Conopco, 95 F.3d at 191-92* (in the context of a false advertising claim).

For example, in *Lurzer GMBH v. American Showcase, Inc., 73 F. Supp. 2d 327, 330 (S.D.N.Y. 1998)*, the district court applied New York's six-year statute of limitations for fraud to a Section 38 fraudulent trademark registration claim. *See* N.Y. C.P.L.R. § 231(b). There, the court found that the limitations period commenced at the time American registered its mark because it was then that Lurzer had constructive notice of the allegedly fraudulently procured registration. *See* *id., at 330, n.4*. Accordingly, the court ruled that Lurzer's claim of fraudulent procurement was time-barred insofar as it was premised on the 1987 registration, which occurred more than six years prior to the claim. *Id.*

Here, Grote alleges two instances of fraud during prosecution of the **[*17]** '147 Registration. First, the statement made by Mr. Ives in a declaration dated February 22, 2008 which disclaimed that the trade dress was the subject of a design or utility patent; and second, Truck-Lite's claim of exclusive and continuous use of the trade dress made on March 20, 2008. Each occurred prior to the issuance of the '147 Registration in 2008. Applying the rule of *Lurzer*, Truck-Lite calculates that the time for filing a Section 38 Lanham Act claim premised on fraud occurring during the '147 registration expired on August 12, 2014. Thus, Truck-Lite argues that Grote's claims with respect to these two instances are time-barred. Truck-Lite also submits that Grote's third allegation of fraud, with respect to the filing of an unaccepted declaration of incontestability on May 29, 2014, is time-barred because Grote's counterclaim was brought after the six-year statute of limitations expired on May 29, 2020.

Grote does not contest the applicability of New York's six-year statute of limitations but argues that its fraud claims are timely, nonetheless. Grote contends that this is a compulsory counterclaim under *Fed. R. Civ. P. 13(a)* for which the statute of limitation is tolled by the filing of the initial action **[*18]** before the TTAB. *See* *Rubin v. Valicenti Advisory Servs., 471 F. Supp. 2d 329, 335 n.4 (W.D.N.Y. 2007)* ("[C]ourts generally hold that the filing of an action tolls the limitations period for compulsory counterclaims."); *see also* *Silva Run Worldwide Ltd. v. Gaming Lottery Corp., 96-CV-3231, 2003 U.S. Dist. LEXIS 18354 (S.D.N.Y. Oct. 15, 2003)*.

Principles of equity counsel against dismissal here. There is no indication that Grote has slept on its fraud claims, which were first raised in its notice of opposition filed with the TTAB on October 6, 2010. Indeed, "[n]umerous courts have recognized that pursuing an opposition in the USPTO excused delay in filing suit on a Lanham Act claim." *Gaudreau v. Am. Promotional Events, Inc., 511 F. Supp. 2d 152, 159 (D.D.C. 2007)* (collecting cases); *see* *Floralife, Inc. v. Floraline International, Inc., 633 F. Supp. 108, 113 (N.D. Ill. 1985)* (explaining that while a notice of opposition to registration is not the same as a trademark infringement claim, the assertion of opposition "sufficiently informs the registrant of the trademark holder's objections and renders unreasonable any detriment the registrant may suffer in reliance on the plaintiff's delay in filing suit."). Grote filed an amended petition on January 21, 2011 which included allegations of Truck-Lite's fraudulent behavior during the prosecution of the '147 Registration. The instances of fraud of which Grote had notice in 2008 were brought to the TTAB within three years and Truck-Lite was informed of Grote's claims without unreasonable delay.

Further, **[*19]** the claim based on Truck-Lite's allegedly fraudulent statement regarding incontestability in 2014 is not time-barred. That claim, and Grote's pre-registration fraud claims, constitute compulsory counterclaims to this federal action, filed by Truck-Lite on May 23, 2018. A pleading must state as a counterclaim any claim which "arises out of the transaction or occurrence that is the subject matter of the opposing party's claim." *Fed. R. Civ. P. 13(a)(1)(A)*. A claim is compulsory under *Rule 13(a)* if "a logical relationship exists between the claim and the counterclaim and [if] the essential facts of the claims are so logically connected that consideration of judicial economy and fairness dictate that all the issues be resolved in one lawsuit." *Critical-Vac Filtration Corp. v. Minuteman Int'l Inc., 233 F.3d 697, 699 (2d Cir. 2000)*. Truck-Lite's current claims against Grote include unfair competition, infringement of the '147 Registration, and reversal of the TTAB decision. Grote's allegations of fraudulent misrepresentations in obtaining the registration and attempting to seek incontestable status share an obvious logical connection and are based on the same essential facts as those claims. Grote's claim is timely because the statute of limitations was tolled upon Truck-Lite's initiation of this action.[9]

The Court **[*20]** rejects Truck-Lite's contention that the fraud counterclaims should be dismissed because the TTAB has no authority to hear or award damages for *§ 1120* claims. This argument goes to the remedies that were or were not available within the administrative proceeding and does not change that Grote's fraud claims were asserted without undue delay. Truck-Lite relies on *Johnson v. Railway Express, Inc., 421 U.S. 454, 95 S. Ct. 1716, 44 L. Ed. 2d 295 (1975)*, for the holding that the statute of limitations for an employee's claim of racial discrimination under *42 U.S.C. § 1981* was not tolled during the pendency of his Title VII action before the Equal Employment Opportunity Commission. There, the Supreme Court held that "the remedies available under Title VII and under *§ 1981*, although related, and although directed to most of the same ends are separate, distinct, and independent." *Id., at 461*. Thus, it held that the petitioner could not be excused from his failure to bring a *§ 1981* action within the relevant limitations period. *Id., at 466*. This Court is not persuaded that the relationship between Title VII and *§ 1981* is analogous to a TTAB trademark registration proceeding and a Lanham Act civil suit. Unlike *§ 1981*, the Lanham Act itself provides the administrative mechanisms for registering, and opposing, a trademark within the USPTO. *See 15 U.S.C. § 1051, et seq.* Indeed, Truck-Lite **[*21]** provides no caselaw supporting its theory in the context of trademark law.[10]

In sum, Truck-Lite was on notice as early as 2010 that Grote was raising claims of fraud relative to the '147 Registration, and Grote's counterclaims should not be time-barred as a result. Moreover, Grote's fraud claims are timely as compulsory counterclaims to the instant action.

b. *Elements of a Fraud Claim*

Truck-Lite next argues that Grote's claim of fraud in the prosecution of the '147 Registration must be dismissed for failure to plead the necessary elements and failure to plead with particularity as required by *Fed. R. Civ. P. 9(b)*.

Fraud in procuring a trademark registration occurs when an applicant knowingly makes false, material representations of fact in connection with his application. *In re Bose Corp., 580 F.3d 1240, 1243 (D.D.C. 2009)*; *see 15 U.S.C. § 1120*. A trademark is obtained fraudulently under the Lanham Act only if the applicant or registrant knowingly makes a false, material representation with the intent to deceive the PTO. *580 F.3d at 1245*. A party seeking cancellation of a trademark registration for fraudulent procurement bears a heavy burden of proof. *Id. at 1243*. As delineated by the Second Circuit, a party alleging that a registration was fraudulently obtained must prove the following elements by **[*22]** clear and convincing evidence:

> (1) A false representation regarding a material fact; (2) the person making the representation knew [...] that the representation was false;[11] (3) an intention to induce the listener to act or refrain from acting in reliance on the

[9] Grote's Answer and Counterclaim against Truck-Lite was timely under *Fed. R. Civ. P. 12(a)(4)(A)*, having been filed within 14 days after Judge Sinatra's Decision and Order denying Grote's motion to dismiss for lack of personal jurisdiction. (Dkt. Nos. 46; 48).

[10] *American Cyanamid v. Campagna Per La Farmacie in Italia S.P.A., 678 F. Supp. 1049 (S.D.N.Y. 1987)* is inapposite as it addressed questions of primary jurisdiction, not timeliness. That Court concluded that a trademark infringement action did not need to be stayed pending a USPTO determination of the registrability of the allegedly infringing marks. Such a holding does not dictate that a USPTO proceeding cannot toll the statute of limitations for a later Lanham Act claim.

[11] *See MPC Franchise, LLC v. Tarntino, 826 F.3d 653, 659 (2d Cir. 2016)* for clarification of this element. The distinction is not of issue here.

> misrepresentation; (4) reasonable reliance on the misrepresentation; and (5) damage proximately resulting from such reliance.

Patsy's Italian Rest., Inc. v. Banas, 658 F.3d 254, 270-71 (2d Cir. 2011).

Any fraud pleading is also subject to the heightened pleading standards of Rule 9(b), which states, "[i]n alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud." Fed. R. Civ. P. 9(b). "That ordinarily requires a complaint alleging fraud to (1) specify the statements [or omissions] that the plaintiff contends were fraudulent, (2) identify the speaker, (3) state where and when the statements [or omissions] were made, (4) explain why the statements [or omissions] were fraudulent." United States ex rel. Chorches for Bankr. Estate of Fabula v. Am. Med. Response, Inc., 865 F. 3d 71, 81 (2d Cir. 2017) (citations and internal quotations omitted). Rule 9(b) further provides that "[m]alice, intent, knowledge, and other conditions of the person's mind may be alleged generally." Fed. R. Civ. P. 9(b). Though, this leeway is not a "license to base claims of fraud on speculation and conclusory allegations." Eternity Global Master Fund Ltd. v. Morgan Guar. Trust Co., 375 F.3d 168, 187 (2d Cir. 2004) (citation omitted). "Plaintiffs **[*23]** must allege facts that give rise to a strong inference of fraudulent intent," which may be established "either (a) by alleging facts to show that defendants had both motive and opportunity to commit fraud, or (b) by alleging facts that constitute strong circumstantial evidence of conscious misbehavior or recklessness." Id., 375 F.3d at 187 (quoting Shields v. Citytrust Bancorp, Inc., 25 F.3d 1124, 1128 (2d Cir. 1994)). "'[T]he adequacy of particularized allegations under Rule 9(b) is...case-and context-specific.'" Chorches, 865 F.3d at 81-82 (quoting Espinoza ex rel. JPMorgan Chase & Co. v. Dimon, 797 F.3d 229, 236 (2d Cir. 2015)).

A review of Grote's first counterclaim shows that it has met these standards and alleged the necessary elements for this cause of action. The pleadings specify the speakers of the alleged fraudulent statements (naming the affidavits and declarations submitted), the exact dates the statements were made, the contents of those statements, and why those statements were allegedly fraudulent. Although Truck-Lite objects to Grote having based some of its factual allegations "upon information and belief," the Court finds that these allegations are sufficiently plead. "'Despite the generally rigid requirement [of Rule 9(b)], allegations may be based on information and belief when facts are peculiarly within the opposing party's knowledge." Chorches, 865 F.3d at 81-82. Where a fraud pleading is permitted **[*24]** on information and belief," courts require that the complaint "adduce specific facts supporting a strong inference of fraud." Id. at 82. Here, Grote has adduced such detailed facts supporting its inferences. Further, the few allegations based upon information and belief are those that can be described as within the particular knowledge of Truck-Lite or the USPTO.

Truck-Lite also challenges the element of reliance in this case. It submits that Truck-Lite's Section 15 declaration made to secure incontestable status of the '147 Registration was not relied upon because it was rejected by the PTO Examiner. In that affidavit, filed on May 29, 2014, Carl Hjort, Esq., attorney for Truck-Lite, declared that no proceedings affecting the subject trademark rights were pending in Trademark Office, when, in actuality, the TTAB proceeding was pending. Truck-Lite admits such a statement was made, but states that it was "an honest mistake." On June 14, 2014, the PTO found that the Section 15 affidavit could not be acknowledged because there was a pending proceeding before the TTAB involving ownership of the subject registered mark. As such, the registration was not granted incontestable status.

The Court rejects the lack of reliance **[*25]** argument because the affidavit was submitted to the PTO for its reliance in reviewing incontestable status. The submission of a false declaration is presumed to be material and to be relied upon. *See* Southco, Inc. v. Penn Eng'g & Mfg. Corp., 768 F. Supp. 2d 715, 725-26 (D. Del. 2011); citing Refac Int'l, Ltd., v. Lotus Dev. Corp., 81 F.3d 1576, 1583 (Fed. Cir. 1996) ("The affirmative act of submitting an affidavit must be construed as being intended to be relied upon.").[12] This sub-part of the claim is actionable as plead.

---

[12] In the non-precedential TTAB opinion cited by Truck-Lite on this point, the facts are distinguishable and, although the court saw no reliance by the examiner on respondent's claims about exclusive right to use a certain term, the finding of no fraud in

Truck-Like further challenges whether Grote can establish quantifiable damages from the alleged fraudulent conduct. It is unknown at this juncture whether Grote can, in fact, prove such damages. However, it is inarguable that Grote has alleged that it was damaged as a result of Truck-Lite's fraudulently procured trademark registration. Thus, the required element is plead.

For the above reasons, the Court recommends that Truck-Lite's motion to dismiss Grote's counterclaim (Count I) alleging fraud in prosecution of the '147 Registration be denied.

IV. *Fraud in Prosecution of '319 Application*

Truck-Lite argues that to the extent Grote's second counterclaim can be construed as a claim for damages under *Section 1120*, it is subject to dismissal because the Lanham Act does not support a cause of action where there was a trademark application, **[*26]** but no registration was issued. The Court agrees.

Section 38 of the Lanham Act provides:

> Any person who shall procure registration in the Patent and Trademark Office of a mark by a false or fraudulent declaration or representation, oral or in writing, or by any false means, shall be liable in a civil action by any person injured thereby for any damages sustained in consequence thereof.

15 U.S.C. § 1120.

It is well-settled that preregistration damages are not cognizable under *§ 1120*. *See* *Country Mut. Ins. Co. v. Am. Farm Bureau Fedn., 876 F.2d 599, 600-01 (7th Cir. 1989)* (holding that unless the PTO grants the trademark application, the consequences of registration, as opposed to use, do not come to pass, and no damages are sustained as a consequence); *GMA Accessories, Inc. v. Idea Nuova, Inc., 157 F. Supp. 2d 234, 242 (S.D.N.Y. 2000)* (finding that a claim based on a suspended trademark application must fail because "by its terms[,] Section 38 [...] does not apply to trademark applications that have not been registered"); *Bernard v. Commerce Drug Co., 774 F. Supp. 103, 109 (E.D.N.Y. 1991)*, *aff'd by* *964 F.2d 1338 (2d Cir. 1992)* ("plaintiff's claim for a fraudulent trademark registration cannot be maintained at a point in time prior to procurement of registration"). *Gaudreau, supra*, is further instructive on this point. There, the Court dismissed a Section 38 fraud claim where defendants were yet to procure registration of the contested mark. *See* *511 F. Supp. 2d at 160*. "[W]hile it may be true that allegations of fraud on the USPTO **[*27]** may be raised at the TTAB level prior to the registration of a mark, it is nonetheless clear that trademark owner must have actually procured a federal trademark registration in order for its deeds to be actionable in federal court under Section 38." *Id.*

Here, Truck-Lite's '319 application never matured into registration of the trademark. Grote opposed the registration and its opposition to the application was sustained by the TTAB. (Dkt. No. 1-3, pg. 39). Grote alleges that Truck-Lite engaged in fraudulent behavior in prosecuting the application, but it has not asserted a valid claim under *§ 1120* because Truck-Lite has neither procured registration of the mark, nor has Grote suffered a qualifying injury. *See* *Dunn Computer Corp. v. Loudcloud, Inc., 133 F. Supp. 2d 823, 831-33, 259 B.R. 472 (E.D. Va. 2001)*. In *Dunn*, the Court explained that there was limited effect of filing an intent-to-use trademark application and another party, even if left waiting for the PTO's registration decision, was not injured within the meaning of Section 38. *Id.*

It is Grote's position that Truck-Lite did "procure" registration within the meaning of the statute because it did more than file an application; it allowed its application to be published for opposition. Grote asks the Court to construe the term "procure" broadly to include **[*28]** liability for fraudulent conduct in efforts to obtain registration. Grote cites *Nationstar Mortg., LLC v. Ahmad, 155 F. Supp. 3d 585 (E.D. Va. 2015)* for a holding in which fraud was found based on an application, not a registration. However, this argument has been declined by the Seventh Circuit and the meaning of the statutory term has been decided. In *Country Mutual*, the Court reasoned that "Section 38 makes sense when 'procure' is taken to mean 'obtain' and little sense when taken to mean 'apply for[.]'" *876 F.2d at 601*. The Court went on to explain that "the law has consistently forbidden procuring registration by fraud and neglected

---

prosecution of the application was based on lack of evidence of respondent's intent to deceive the Trademark Office. *See* *Eddy Packing Co., Inc. v. HEB Grocery Co., 2010 TTAB LEXIS 108, at *52-55 (TTAB Apr. 15, 2010)* (unpublished opinion).

the possibility of penalizing those who seek but not get registration via fraud." *Id.* That holding is squarely applicable here and Grote's argument is rejected.[13]

Further, any claim for cancellation of the '319 Application must also be dismissed. There is no cognizable claim to cancel an application that has not matured into a registration. *See* *GMA Accessories, 157 F. Supp. 2d at 241* (finding no authority for the proposition that the Lanham Act permits a district court to cancel an unregistered trademark). The Court does not find it necessary to reach Truck-Lite's additional arguments in support of dismissal.

For the above reasons, the Court recommends that Grote's **[*29]** counterclaim (Count II) alleging fraud in prosecution of the '319 Application be dismissed.

V. *Antitrust Monopolization and Restraint of Trade Claims*

Grote's third and fourth counterclaims allege that Truck-Lite has engaged, or has attempted to engage, in wrongful and anti-competitive activity regarding the '147 Registration and the '319 Application to willfully acquire and maintain market and monopoly power in the relevant market, including by (1) filing for such registration and applying for product configuration exclusivity; (2) committing fraud in the prosecution of said registration; (3) engaging in, and maintaining, sham litigation and a "cease and desist letter campaign" against Grote and third-parties; (4) seeking to have a third-party vendor not supply Grote or others with 5-around-1 appearance circuit board used to make stop/tail/turn lights; and (5) making an agreement with said vendor to deal exclusively with Truck-Light on said product. (Dkt. No. 48, ¶¶ 76-120).

Truck-Lite moves to dismiss these counterclaims on two bases: first, because the claims are blocked by the Noerr-Pennington doctrine, and second, because the Supreme Court decision in *Walker-Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)* has not been applied to trademark **[*30]** cases.

a. Noerr-Pennington Doctrine

The Noerr-Pennington doctrine derives from the Supreme Court cases of *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*, and *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*. This basic principle of antitrust immunity holds that "joint efforts to influence public officials do not violate the antitrust laws even though intended to eliminate competition. Such conduct is not illegal, either standing alone or as part of a broader scheme itself violative of the Sherman Act." *Pennington, 381 U.S. at 670*. Originally, the doctrine developed to allow business interests to combine and lobby various governmental branches or agencies without worry of violating ***antitrust law***, and the doctrine has expanded to provide immunity from liability for bringing suits in contexts beyond antitrust. *See* *Matsushita Elecs. Corp. v. Loral Corp., 974 F. Supp. 345, 355 n.17 (S.D.N.Y. 1997)*. The doctrine holds that, by virtue of the right to petition guaranteed by the *First Amendment*, attempts to influence legislative, executive, administrative, or judicial action are immune from antitrust liability. *Twin City Bakery Workers & Welfare Fund v. Astra Aktiebolag, 207 F. Supp. 2d 221, 223 (S.D.N.Y. 2002)*. Under the doctrine, the owner of a trademark is entitled to protect its registered rights through litigation without exposing itself to Sherman Act liability. *Scooter Store, Inc. v. SpinLife.com LLC, 777 F. Supp. 2d 1102, 1114 (S.D. Ohio 2011)*.

Noerr-Pennington immunity is not absolute and does not protect all actions. Conduct that might otherwise be immune under this doctrine may **[*31]** form the basis for Sherman Act liability when the alleged conspiracy "is a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business

[13] Grote also maintains that the cases relied on above are distinguishable in their application progression. Grote identifies that in *GMA Accessories* and *Bernard*, the subject applications were "suspended" but not "allowed" for publication. The Court does not find the factual differences of those cases and the case at bar to be meaningful, as none of the applications proceeded to registration.

relationships of a competitor." *California Motor Transport Co., v. Trucking Unlimited, 404 U.S. 508, 511, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)* (quoting *Noerr, 365 U.S. at 144*). To establish "sham" administrative or judicial proceedings, a plaintiff must show that the litigation in question is: (i) "objectively baseless," and (ii) "an attempt to interfere directly with the business relationships of a competitor through the use of the governmental process -- as opposed to the outcome of that process -- as an anticompetitive weapon." *Primetime 24 Joint Venture v. NBC, 219 F.3d 92, 100-01 (2d Cir. 2000)* (citing *Prof'l Real Estate Investors, Inc., v. Columbia Pictures Indus., 508 U.S. 49, 60, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*).

Courts have recognized two specific kinds of conduct that can trigger the sham exception: (1) sham lawsuits; and (2) fraudulent misrepresentations. *See* *Mercatus Grp., LLC v. Lake Forest Hosp., 641 F.3d 834, 842 (7th Cir. 2011)*. The fraud exception to the doctrine is based on the Supreme Court's desire to protect the integrity of non-political governmental proceedings. *Id., at 844-45*. False statements can be accommodated in the political sphere more than they can be in the adjudicatory sphere — where information is relied on as accurate for decision making and dispute resolving. *Id.* "As a result, fraudulent statements in the adjudicative context 'threaten[ ] the fair and impartial functioning **[*32]** of these agencies and do[ ] not deserve immunity from the antitrust laws." *Id.* (internal quotation omitted).

Truck-Lite submits that to the extent any of its actions may be considered anticompetitive or in restraint of trade, they are afforded immunity from antitrust liability under Noerr-Pennington. Truck-Lite believes that its actions in seeking, obtaining, and enforcing its intellectual property rights, including trade dress rights, are fully immunized, and the conduct or communications alleged by Grote were incidental to effective litigation. *See* *Matsushita Electronics, 974 F. Supp. at 359* ("[A]cts incidental to protected litigation --acts that are 'reasonably and normally attendant upon protected litigation,' such as sending letters threatening court action -- are entitled to immunity to the same extent as the related litigation.") (quoting *Coastal States Marketing, Inc. v. Hunt, 694 F.2d 1358, 1367 (5th Cir. 1983)*). Grote contends that the Noerr-Pennington doctrine does not apply here.

The Court concludes that the Noerr-Pennington doctrine would apply in this context, but that Grote has plead adequate facts to support the sham exception to its immunity. Indeed, Grote has alleged that Truck-Lite engaged in fraudulent conduct and made misrepresentations in filing for and prosecuting the '147 Registration **[*33]** and '319 Application.[14] "There is little doubt that fraudulent misrepresentations may render purported petitioning activity a sham not protected from antitrust liability." *Mercatus Group, 641 F.3d at 842-43* (collecting cases). Here, unlike in *Twin City Bakery Workers*, Grote has plead with particularity the alleged frauds on the USPTO. *See* *207 F. Supp. 2d at 224* (holding that no exception to Noerr-Pennington applied where plaintiff's complaint lacked the "who, what, when, where, and how" of the alleged frauds on the Patent Office). Grote has further alleged that Truck-Lite engaged in sham litigation and a letter campaign against Grote and third-parties, with some or all of its claims being objectively baseless and with a subjective intent to maintain market power and monopoly power. Determinations of whether a party's conduct is a genuine attempt to avail itself of the judicial process or is merely a sham is a question of fact that is inappropriate for a motion to dismiss. *Scooter Store, 777 F. Supp. 2d at 1115* (citing *Clipper Exxpress v. Rocky Mountain Motor Tariff Bureau, 690 F.2d 1240, 1253 (9th Cir. 1982)*).

"Of course, even a plaintiff who defeats the defendant's claim to Noerr immunity by demonstrating both the objective and the subjective components of a sham must still prove a substantive antitrust violation. Proof of a sham merely deprives the defendant of immunity; **[*34]** it does not relieve the plaintiff of the obligation to establish all other elements of his claim." *Prof'l Real Estate Investors, 508 U.S. at 61*. Whether Grote can prove such claims remains to be seen. However, at the pleading stage, Grote has made allegations sufficient to support a finding that Truck-Lite's alleged conduct is not immune from liability.[15]

---

[14] Although the Court recommends dismissal of Grote's Section 38 claim for damages arising from the '319 Application, it does not believe that precludes Grote from relying on the alleged fraudulent statements to support its antitrust claims.

[15] The Court acknowledges but does not find persuasive Truck-Lite's reliance on *Virgin Enters. v. Virginic LLC*, wherein the district court characterized the "antitrust defense" to trademark infringement as "more theoretical than actual." *See* *19-CV-0220-F, 2020 U.S. Dist. LEXIS 63580, at *8-9 (D. Wyo. Apr. 10, 2020)*. There, the court granted a motion to strike the affirmative

b. Antitrust Claims Stemming from Trademark Activity

Truck-Lite further disputes that a cause of action for violation of *§ 2* of the Sherman Act can be sustained based on fraud in obtaining or enforcing a trademark. The Court finds no authority to support categorical dismissal of this claim.

The Supreme Court has ruled that enforcement of a patent procured by fraud upon the Patent Office may be a basis for an action under *§ 2* of the Sherman Act, provided that the other elements necessary for such a claim were present. *See Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. In *Walker Process*, Food Machinery filed a suit for infringement on its patent covering a type of aeration equipment for sewage treatment systems. *Id., at 173-74*. After discovery, Walker Process brought a counterclaim alleging that Food Machinery had illegally monopolized interstate and foreign **[*35]** commerce by fraudulently, and in bad faith, obtaining and maintaining its patent while knowing that it had no basis for such patent. *Id.* It further alleged that Food Machinery had sworn before the Patent Officer that it neither knew nor believed that its invention had been in public use when, in fact, Food Machinery was a party to prior use during the relevant time. *Id.* Ruling that proof of intentional fraud in procurement of the patent would be sufficient to strip Food Machinery of its exemption from antitrust laws, the Court remanded to afford Walker Process opportunity to establish the necessary elements of the alleged *§ 2* violation. *Id., at 177-78*.

The viability of Grote's antitrust and attempted antitrust claims are supported by the *Walker Process* precedent. Lending further support to the availability of a Sherman Act claim based on fraudulent procurement or enforcement of a trademark is the earlier Supreme Court holding in *Timken Roller Bearing Co. v. United States, 341 U.S. 593, 71 S. Ct. 971, 95 L. Ed. 1199 (1951)*. There, the Court explained that "while a trademark merely affords protection to a name, the [anti-competitive] agreement in the case went far beyond the protection of the name 'Timken' and provided for control of the manufacture and sale of antifriction bearings whether carrying **[*36]** the mark or not." *Id., at 598-99*. Accordingly, the Court held that a trademark cannot be legally used as a device for a Sherman Act violation. *Id., at 599*. *See also Scooter Store, 777 F. Supp. 2d 1102* (denying motion to dismiss defendant's antitrust counterclaim based on allegations that plaintiff filed a baseless trademark infringement action). Additionally, the Lanham Act itself explicitly provides that a defense to the right to use an incontestable registered mark exists where "the mark has been or is being used to violate antitrust laws of the United States." *15 U.S.C. § 1115(b)(7)*.

Here, Grote argues that "the product configuration trade dress at issue is in the nature of a patent, covering the product itself rather than a classic trademark that is a work/symbol separate from the associated with the product." It further submits that such product configuration rights can, and have, given rise to market and monopoly power. It is clear that exclusionary rights granted by the USPTO, whether for a patent or trademark, are exclusionary rights which cannot be used in violation of antitrust laws. Accordingly, there is no reason that this claim should be barred.

c. Elements of Sherman Act and Clayton Act Violations

Finally, Truck-Lite seeks dismissal of these counterclaims **[*37]** for failure to state a claim under the pleading standards. It submits that Grote's antitrust counterclaims lack particularity to enable it to present a defense. The Court disagrees.

The elements of a Sherman Act, *§ 2* offense of monopolization are:

---

defense because defendant did not provide a basis for its antitrust claims, apart from plaintiff's civil litigation and trademark proceedings. Id., at *10-11. Based on defendant's failure to dispute its own infringing conduct, the Court found that plaintiff's actions were not objectively baseless under a sham exception. *Id.*, at *13-14. By comparison, Grote has not conceded infringement on its own part and it has alleged objectively baseless litigation. The Court also finds *In re Humira (Adalimumab) Antitrust Litigation* inapplicable. *See 19-CV-1873, 465 F. Supp. 3d 811 (N.D. Ill. Jun 8, 2020)*. *Humira* held that a party cannot aggregate immunized and non-immunized conduct without nullifying the immunity. *Id., at 834*. In this case, the Court does not view any of the alleged anticompetitive conduct as immune.

> The offense of monopolization under § 2 of the Sherman Act consists of two elements: (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power, as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Volvo North America Corp. v. Men's International Professional Tennis Council, 857 F.2d 55, 73 (2d Cir. 1998); *see* 15 U.S.C. § 2.

The elements of the offense of attempted monopolization are:

> The offense of attempted monopolization under § 2 of the Sherman Act requires proof of three elements: (1) anti-competitive or exclusionary conduct; (2) specific intent to monopolize; and (3) a dangerous probability that the attempt will succeed.

Id. Grote's counterclaims plead facts adequate to meet these essential elements. Grote alleges that Truck-Lite holds monopoly power in the relevant markets. It defines the relevant market in terms of geographic market in the United States and the product market and submarket ("(a) OEMs (e.g. manufacturers of new trucks **[*38]** and trailers) [...], and (b) aftermarket, for replacement STTs".) It also alleges specific acts by Truck-Lite demonstrating willful acquisition or maintenance of that market power by reference to the fraud allegations, detailed in its prior counterclaims, and the allegations that Truck-Lite entered into a refusal to deal agreement or agreements. Grote further pleads that the monopolization has caused it injury. Thus, the elements of a § 2 offense are plausibly alleged. The elements of attempted monopolization are also sufficiently plead, in the alternative.

The elements of a Sherman Act, § 1 offense of illegal restraint of trade are: (1) concerted action by two or more persons, (2) that unreasonably restrains interstate or foreign trade or commerce. *Primetime 24 Joint Venture v. NBC, 21 F. Supp. 2d 350, 355 (S.D.N.Y. 1998)*, *rev'd on other grounds*, *219 F.3d 92 (2d Cir. 2000)*; *see* 15 U.S.C. § 1. This proscription is directed only at joint action and does not prohibit independent business actions and decisions. *See Modern Home Inst., Inc. v. Hartford Acci. & Indem. Co., 513 F.2d 102, 108-09 (2d Cir. 1975)*. "While normally only those agreements which impose an unreasonable restraint upon interstate commerce are condemned, [...] certain agreements, including concerted refusals to deal and group boycotts of the type alleged here, have long been held to be *per se* unreasonable and always illegal[.]" **[*39]** *Id.* (citations omitted).

Truck-Lite argues that Grote's allegation of exclusive dealing between Truck-Lite and a third-party supplier of LED circuit boards, even if true, does not constitute anticompetitive behavior. It maintains that the claim is insufficient because Grote does not state that it cannot obtain such circuit boards from other vendors, or that if it cannot, that the cause is Truck-Lite's anti-competitive actions. *See A.V.E.L.A., Inc. v. Estate of Marilyn Monroe, LLC, 241 F. Supp. 3d 461, 488 (S.D.N.Y. 2017)* ("[E]xclusive dealing is not uniformly anticompetitive[;] ... in order to plead exclusionary conduct through an exclusive dealing policy, [a plaintiff] 'must allege as a threshold matter ... a substantial foreclosure of competition' in the relevant market."). However, the Court finds that Grote has plausibly alleged a concerted refusal to deal, *i.e.* an agreement with the vendor (Phillips/LumiLEDS) not to sell 5-around-1 premade LED circuit boards to Grote and others. It further finds that the allegation that Truck-Lite holds monopoly power over the relevant market for stop/tail/turn lights and has foreclosed competition in that market is sufficient to allege unreasonable restraint on commerce as a threshold matter. Allegations of a vertical competitor-vendor **[*40]** agreement may support a claim such as this. *See Tunis Bros. Co. v. Ford Motor Co., 763 F.2d 1482, 1497 (3d Cir. 1985)*, *vacated for further consideration*, *475 U.S. 1105 (1986)* (recognizing that an illegal restraint on trade occurs where one distributor seeks to suppress its competition by utilizing the power of a common supplier).

Truck-Lite next argues that, to the extent Grote's counterclaim can be understood as a claim under Section 3 of the Clayton Act, it fails to state a claim because it does not allege an agreement among competitors. The statute provides:

> It shall be unlawful for any person engaged in commerce, in the course of such commerce, to lease or make a sale or contract for sale of goods, wares, merchandise, machinery, supplies or other commodities, whether patented or unpatented, for use, consumption or resale within the United States or any Territory thereof or the

> District of Columbia or any insular possession or other place under the jurisdiction of the United States, or fix a price charged therefor, or discount from, or rebate upon, such price, on the condition, agreement or understanding that the lessee or purchaser thereof shall not use or deal in the goods, wares, merchandise, machinery, supplies or other commodities of a competitor or competitors of the lessor **[*41]** or seller, where the effect of such lease, sale, or contract for sale or such condition, agreement or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

15 U.S.C. § 14. The language of the statute defines liability in terms of a person who makes a sale or contracts for sale and nowhere provides for liability of the buyer. *See* *McGuire v. Columbia Broadcasting System, Inc., 399 F.2d 902, 906 (9th Cir. 1968)*. In general, the Clayton Act has not been applied to situations, such as here, where a buyer (Truck-Lite) is alleged to have required a seller (Phillips) to refrain from selling to other buyers (e.g., Grote). *See* *Genetic Systems Corp., v. Abbott Laboratories, 691 F. Supp. 407, 414 (D.D.C. 1988)* ("Though few courts have ever addressed the issue, plaintiff has not pointed to any case where a court found a purchaser liable for an exclusive dealing contract, and it appears from the plain language of the statute, the relevant legislative history, and the observations of commentators that *Section 3* does not impose liability on purchasers for exclusive dealing contracts."). Truck-Lite is not the seller and consequently no cause of action is available against it under this statute. *See* *McGuire, 399 F.2d at 906*.

For the above reasons, the Court recommends that Grote's counterclaims (Counts III and IV) alleging anti-trust monopolization and **[*42]** restraint of trade, and attempted antitrust monopolization, under the Sherman Act survive, and that Grote's counterclaims alleging anti-competitive agreement under the Clayton Act be dismissed.

CONCLUSION

For the foregoing reasons, it is recommended that plaintiff Truck-Lite's motion to dismiss Grote's counterclaims (Dkt. No. 53) be granted in part and denied in part.

Pursuant to *28 U.S.C. §636(b)(1)*, it is hereby ORDERED that this Report and Recommendation be filed with the Clerk of Court.

Unless otherwise ordered by Judge Sinatra, any objections to this Report and Recommendation must be filed with the Clerk of Court within fourteen days of service of this Report and Recommendation in accordance with the above statute, *Rules 72(b)*, *6(a)*, and *6(d) of the Federal Rules of Civil Procedure*, and Local Rule of Civil Procedure 72. Any requests for an extension of this deadline must be made to Judge Sinatra.

Failure to file objections, or to request an extension of time to file objections, within fourteen days of service of this Report and Recommendation WAIVES THE RIGHT TO APPEAL THE DISTRICT COURT'S ORDER. *See* *Small v. Sec'y of Health & Human Servs., 892 F.2d 15 (2d Cir. 1989)*.

The District Court will ordinarily refuse to consider *de novo* arguments, case law, and/or evidentiary material which could have been, but were not, presented to the Magistrate Judge in the first **[*43]** instance. *See* *Paterson-Leitch Co. v. Mass. Mun. Wholesale Elec. Co., 840 F.2d 985, 990-91 (1st Cir. 1988)*.

Pursuant to Local Rule of Civil Procedure 72(b), written objections "shall specifically identify the portions of the proposed findings and recommendations to which objection is made and the basis for each objection, and shall be supported by legal authority." ***Failure to comply with these provisions may result in the District Court's refusal to consider the objection***.

SO ORDERED.

Opinion

MEMORANDUM OPINION AND ORDER

This case arises from alleged sham patent litigation involving automatic card shufflers. Plaintiffs claim Defendants committed fraud on the Patent Office and pursued sham litigation to maintain their monopoly on the market, thereby violating *§ 2* of the Sherman Act. *See* [32]. Defendants moved to dismiss, arguing that Plaintiffs' claim fell outside the statute of limitations and that Plaintiffs lacked standing to bring an antitrust claim. *See* [35]. The Court denied the motion, finding that Plaintiffs had standing and finding that the record failed to conclusively demonstrate that Plaintiffs filed their claim too late. *See* [43]. Following discovery, Defendants now move for summary judgment, arguing again that Plaintiffs' claim falls outside the four-year statute of limitations. [100]. For the reasons set forth below, the Court finds that genuine issues of material fact remain **[*3]** concerning timeliness and, accordingly, denies the motion.

I. Background[1]

Plaintiff Taiwan Fulgent (TF) is a Taiwanese corporation which manufactures a card shuffling device known as the A-Plus Shuffler. [102] at ¶¶ 4, 5. Plaintiffs TCS John Huxley Europe Limited, Asia Limited, and America, Inc. are subsidiaries of the TCS John Huxley Group (TCS), the exclusive worldwide distributor for the A-Plus Shuffler. *Id.* at ¶¶ 7-9. Defendants Scientific Games[2] and SG Gaming, Inc. are Nevada corporations that invent, design, manufacture, and sell casino products, including automatic card shufflers. *Id.* at ¶¶ 11-13. SG Gaming, Inc. was formerly known as Bally Gaming, Inc. *Id.* at ¶ 12. In 2013, Bally Technologies acquired SHFL Entertainment, Inc., formerly known as Shuffle Master, the original entity engaged in the invention, design, manufacture, and sale of automatic card shufflers. *Id.* at ¶¶ 14, 15.

In November 2009, Shuffle Master sued TF for patent infringement based upon the A-Plus Shuffler. *Id.* at ¶¶ 6, 18. TF retained Alston & Bird LLP, an international law firm, to represent it in the litigation. *Id.* at ¶ 20. David Ho, the owner and primary decision maker at TF, advised the attorneys he wanted **[*4]** the case resolved "expeditiously and efficiently." [108] at ¶ II.A.1. In December, TF's counsel sent a letter[3] raising possible issues with the pre-filing investigation of Shuffle Master's patents, claiming that Shuffle Master lacked a *Rule 11* basis for claiming infringement and also suggesting the case could be settled outside of litigation as TF was not yet selling the shuffler. *Id.* at ¶¶ II.A.2,1. Counsel raised *Rule 11* concerns on the mistaken belief that Shuffle Master had not accessed the inner workings of the accused shuffler to conduct a proper pre-filing investigation. *Id.* ¶ II.A.4. The litigation continued, however, and TF filed an answer and counterclaim, which included what Plaintiffs characterize as standard language regarding §§ 102, 103, and 112 defenses and counterclaims, as well as a standard request for a finding that the case was "exceptional" under § 285, to preserve the option of seeking attorney fees. *Id.* at ¶¶ 27, II.A.16. Plaintiffs represent that none of the claims or defenses they asserted in that prior litigation reflected allegations of inequitable conduct or fraud. *Id.* at ¶ II.A.16. The parties settled the 2009 litigation in February of 2010. [102] at ¶ 32. As part of the settlement agreement, **[*5]** both parties agreed to "release[] the other for all claims, liabilities and damages of any kind that either has or may have against the other, as of the date of this Agreement, whether known or unknown, asserted or unasserted, or accrued or unaccrued." *Id.* at ¶ 35.

After the litigation was settled, TF challenged the patentability of two of the asserted patents (the '344 patent and the '751 patent) at the U.S. Patent Office. [108] at ¶ II.B.19. As of the filing of the reexaminations in August 2010, TF believed both these patents were invalid. [102] at ¶ 43. Plaintiffs claim the challenge was based solely on prior art patents, rather than any other publications. [108] at II.B.20. They claim the prior art that Defendants withheld was hidden on CDs and DVDs that were submitted as "other publications." *Id.*

In late 2009 or early 2010, TF and TCS began negotiations for a distributorship agreement for TF's A-Plus Shuffler. [102] at ¶ 57. During its diligence for the arrangement, TCS expressed some concerns about Shuffle Master, asked TF for indemnity if Shuffle Master sued, and suggested that Shuffle Master would act aggressively, even illegally, to keep its monopoly advantage in the shuffler market. *Id.* at ¶¶ 59-63, **[*6]** 65. In fact, in September 2012, Shuffle Master sued TCS John Huxley based upon its distribution and display of the A-Plus Shuffler. *Id.* at ¶¶ 10, 66. Notably, in the suit against TCS (in contrast to the 2009 suit against TF), Shuffle Master did not allege infringement

---

[1] This Court takes the following facts from Defendants' Rule 56.1 Statement of Material Facts, Plaintiffs' Statement of Material Facts, and Defendants' Response to Plaintiff's Statement of Material Facts [102], [108], [119].

[2] Scientific Games formerly operated a technology campus in Chicago, Illinois. [102] at ¶ 12.

[3] Plaintiffs characterize this letter as a settlement letter, Defendants characterize it as a *Rule 11* letter.

of either the '344 patent or the '576 patent. [108] at ¶ II.C.23. Plaintiffs believed this was because the PTO had by that time rejected the claims of the '344 patent as unpatentable, and the '576 patent was closely related and similar in scope. *Id.* TCS' primary patent litigation counsel was in the middle of his prior art review when the litigation settled. *Id.* at ¶ II.C.24.

On March 20, 2015, a TCS employee, Jonathon Pettemerides, learned that two TCS investors had uncovered patent fraud by Shuffle Master and planned to take legal action in the coming weeks. *Id.* at ¶ II.C.27. Mr. Pettemerides emailed three other TCS employees, including the then-Managing Director of Asia, to tell them about the patent fraud. *Id.* at ¶ II.C.28.

TF and TCS filed this antitrust complaint on March 15, 2019. *Id.* at ¶ II.C.30.

II. Legal Standard

A Court may properly enter summary judgment when there remains "no dispute as to any material fact and the movant is entitled to judgment as a matter **[*7]** of law." *Fed. R. Civ. P. 56(a)*. A genuine dispute as to any material fact exists if "the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. When ruling on a motion for summary judgment, the Court "views the record in the light most favorable to the non-moving party and draws all inferences in its favor." *Shuffle Tech Int'l LLC v. Sci. Games Corp., No. 15 C 3702, 2017 U.S. Dist. LEXIS 141445, 2017 WL 3838096, at *5 (N.D. Ill. Sept. 1, 2017)* (citing *Estate of Simpson v. Gorbett, 863 F.3d 740, 745 (7th Cir. 2017)*).

III. Analysis

Defendants argue that they are entitled to summary judgment for two reasons: (1) the four-year statute of limitations bars Plaintiff's claims; and (2) TF released its claims as part of a settlement agreement in 2010. *15 U.S.C. § 15b*; [100]. When Defendants raised these arguments in their motion to dismiss, the Court determined that the record did not definitively set forth when Plaintiffs' claim accrued. On this issue, the Court held as follows:

> Although Plaintiffs contend that their cause of action accrued on March 8, 2019, their complaint includes allegations suggesting that they may have known something was amiss long before this date. For example, Plaintiffs allege that, in 2009, after reviewing SHFL's complaint, TF's counsel advised SHFL's counsel (on December 12, 2009), that he believed SHFL had failed to conduct a proper pre-filing investigation to **[*8]** confirm that the infringement allegations were valid. [32] at ¶ 120. Although SHFL responded that, in its view, its pre-filing investigation satisfied *Rule 11*, *id.* at ¶ 121, the fact remains that, as early as December 2009, TF may have had a factual and legal basis to conclude that the asserted patents were invalid and unenforceable, and thus TF knew or should have known that the infringement suit was groundless. The complaint, however, fails to explain the basis for counsel's assertion that SHFL failed to conduct a proper pre-filing investigation. Did counsel have reason to know when he challenged the complaint that the patents were procured by fraud or that the patents were invalid as anticipated by prior art, which SHFL had withheld? If so, Plaintiffs' cause of action may have accrued by that date. If, on the other hand, counsel's assertion stemmed from simple adversarial posturing, which would only seem prescient in hindsight, it may not have triggered the running of the statute of limitations.
>
> TF's initiation of reexamination proceedings on the asserted '751 patent may also be significant to the timeliness analysis. For example, if TF initiated reexamination because it knew or had reason to know **[*9]** at that time that the patentee had fraudulently withheld prior art, its discovery rule arguments would fail. But the complaint's allegations do not explain why TF requested reexamination. As such, the allegations do not definitively show that Plaintiffs' claim had expired when they filed this case on March 15, 2019.
> Having said that, the current record also undermines Plaintiffs' claim that its cause of action accrued on March 8, 2019. Given DigiDeal's antitrust lawsuit, in the exercise of due diligence, Plaintiffs should have been

> wondering about their antitrust injury long before they had a post-verdict conversation with DigiDeal's lawyers. Plaintiff's assertion of a March 8, 2019 accrual date appears to be as unreasonable as Defendants' assertion that the cause of action necessarily accrued when SHFL filed the underlying patent infringement lawsuits.

[43] at 12-13. Now, with the benefit of discovery and evidence, Defendants attempt to prove the points they argued at the motion to dismiss stage. But, as discussed below, genuine issues of material fact remain as to when Plaintiffs knew (or reasonably should have known) they had a *Walker Process* claim, and thus the record even at this **[*10]** stage precludes the requested ruling on timeliness and the validity of TF's release of any claim.

A key question in this case remains: when did Plaintiffs know or have reason to know that they had suffered an antitrust injury? Defendants argue that Plaintiffs knew as early as 2009, and thus their claim is barred both under the applicable four-year statute of limitations and under the release executed in 2010. *15 U.S.C. § 15b*; [100]. Plaintiffs claim the earliest date they could have known was March 20, 2015, just inside the four-year statute of limitations; they also claim that the release cannot be enforced as to the current claim. [107] at 13.

A. Statute of Limitations

The Sherman Act's four-year statute of limitations applies to Plaintiffs' antitrust claim. *15 U.S.C. §15b*. This statute of limitations generally begins to run "when a defendant commits an act that injures a plaintiff's business," but, as here, it can be "qualified by the discovery rule," which tolls the beginning of the period until the date when the Plaintiff discovers the injury. *Cada v. Baxter Healthcare Corp., 920 F.2d 446, 450 (7th Cir. 1990)*; *Saunders v. Nat'l Basketball Ass'n, 348 F. Supp. 649, 652 (N.D. Ill. 1972)*. Accrual occurs "when the plaintiff discovers that 'he has been *injured* and who *caused* the injury.'" *In re Copper Antitrust Litig., 436 F.3d 782, 789 (7th Cir. 2006)* (quoting *Barry Aviation, Inc. v. Land O'Lakes Mun. Airport Comm'n, 377 F.3d 682, 688 (7th Cir. 2004)*). Here, Plaintiffs' injury—exclusion from the market—occurred **[*11]** when Shuffle Master sued them in 2009 and 2012. But when they knew or should have known that this exclusion amounted to an antitrust injury is a separate question.

A patent infringement suit is not necessarily an antitrust injury. In fact, the *Noerr-Pennington* doctrine provides immunity from antitrust claims to patent holders. *Nobelpharma AB v. Implant Innovations, Inc., 141 F.3d 1059, 1067-68 (Fed. Cir. 1998)*. To overcome such immunity, a plaintiff must show the patent holder obtained the patent through *intentional* fraud or brought the case in bad faith, with *knowledge* that the asserted patent was invalid, unenforceable, or not infringed. *See* *Professional Real Estate Inv'rs, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993)*; *Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. Thus, to know they had suffered an antitrust injury, Plaintiffs needed to know, or have reason to know, Defendants had intentionally engaged in fraud to obtain the asserted patent or brought sham litigation to keep TF from competing in the market.

Defendants argue that TF's litigation strategy and preparation, the initiation of reexamination proceedings challenging the validity of two of Shuffle Master's patents, and the discussions with TCS prior to the TF/TCS distributor agreement, all show Plaintiffs knew or had reason to know they had been injured. And, indeed, the Court flagged this issue when it noted that TF may have **[*12]** had a factual and legal basis to conclude that the asserted patents were invalid and unenforceable in December 2009, when it challenged Shuffle Master's pre-suit investigation. But discovery has now revealed that TF's *Rule 11* challenge stemmed not from any knowledge or belief about the validity or enforceability of the asserted patents, but from the belief that Shuffle Master sued without accessing the inner workings of the accused shufflers. *See* [108] at II.A.3.

TF's counsel at the time, Helen Su, testified that, after reviewing the 2009 complaint, she reviewed the asserted patents' claims and looked at the client's product to see whether they could develop noninfringement defenses. [111] at 18. She testified that, although she sometimes reviews the documents and other publications cited in the patent, she did not do so here because she knew the client wanted to settle the case quickly, without incurring unnecessary expenses. *Id.* at 18-19. She also testified that she understood that Shuffle Master "failed to conduct a very preliminary test of investigating our client's product" before filing suit. *Id.* at 22-23. She testified that the whole point of the letter described above was not to disclose **[*13]** any knowledge of fraud or invalidity, but to lay the groundwork for a quick settlement. *Id.* at 23, 46. She testified that TF wanted to settle quickly because "the cost of defense is so expensive, that [TF] simply could not afford [it]." *Id.* at 34. Su also explained that she commonly included invalidity and noninfringement defenses based upon a cursory review of the patents to preserve such claims for trial, *id.* at 27-28; and may have used boilerplate language because the client just wanted to settle as soon as possible without incurring legal fees, *id.* at 49. This testimony undermines Defendants' claim that TF's answer and counterclaim in the 2009 litigation necessarily reflected knowledge of invalidity, unenforceability, or fraud. Su also testified that she typically also preserved the right to seek attorneys' fees later in the case by claiming at the outset that the case was "exceptional," *id.* at 30, undermining any claim that the exceptional case allegation in TF's responsive pleading similarly reflected knowledge of antitrust injury.

Elizabeth Rader, who represented TF along with Helen Su in the Shuffle Master lawsuit, testified that she challenged Shuffle Master's pre-suit investigation **[*14]** because TF was not "doing anything that would constitute infringement," [110] at 46; TF was not even selling the accused product in the United States, *id.*, and, additionally, Rader had reviewed the claims of the asserted patents and knew that TF's product did not "work like that," *id.* at 47. She testified that TF believed that filing the lawsuit without really understanding the nature of the accused product violated *Rule 11*. *Id.* at 50. She also testified that, although the asserted patents may have identified prior art sources, she did not request any of those sources because her client elected to settle the case a month after the complaint was filed. *Id.* at 55. Rader testified that her client instructed her that it "was not interested in engaging in U.S. patent litigation" and "wanted the lawsuit to be resolved expeditiously and efficiently." *Id.* at 72.

Based upon this evidence, a reasonable jury could find that TF challenged Shuffle Master's lawsuit not because it knew the asserted patents were invalid, but because it wanted to settle the matter quickly, without incurring the significant expense involved in litigating the matter. A jury could also reasonably find that, given the mandate **[*15]** from her client to settle quickly, Rader acted reasonably by not ordering all of the prior art CDs referenced in the asserted patents.

Defendants also argue that TF's initiation of reexamination proceedings reflected knowledge of its antitrust injury. But Andrew Spence, the attorney who initiated the reexamination proceedings on behalf of TF, testified that he never reviewed Shuffle Master's litigation history and did not consider any litigation of the asserted patents, [114] at 39; he testified that he would not have investigated in connection with the reexamination whether Shuffle Master had previously been accused of inequitable conduct; that information would serve no purpose in the reexamination proceeding, as it was irrelevant to the PTO, *id.* at 45. Spence testified that, in August of 2011, about a year into the reexamination proceeding, he was continuing to assess potential prior art to be used in the reexam; and he admitted that, in February of 2011, he considered ordering, at some point in the future, the file history of art proposed for rejection of claims. *Id.* at 51. He also admitted that his billing records reflect that, on May 2, 2011, he spoke with the patent examiner **[*16]** regarding obtaining a copy of the file history of Roblejo, one of the prior art references cited in Defendants' patent; he testified that this likely reflected his effort to obtain non-patent literature relating to this reference. *Id.* at 51-52.

But Spence also testified that issues like inequitable conduct, fraud, and *Walker Process* fraud simply are not issues raised in a reexamination proceeding. *Id.* at 55. He testified that TF hired him to address whether the claims in the asserted patents could be canceled over the prior art on obviousness or anticipation grounds. *Id.* To the extent Defendants argue that Spence should have uncovered any hidden references or exposed secreted prior art, Spence's testimony undermines that argument: he testified that he would not have "thought much of" "other publications" cited in the patents because they would not have been available as prior art. *Id.* at 56. He testified that he has never submitted DVDs to the PTO, has never ordered DVDs from the PTO, and has never seen a DVD under the "other publications" section in a patent. *Id.* In other words, he did not discover any fraud related to references hidden on DVDs, and would not, in the exercise of reasonable **[*17]** diligence, have discovered such fraud. He also testified that, if the patentee submitted a CD with a bunch of shuffler prior art on it, it would be impossible to tell which of the references on that CD had been considered by the patent examiner. As a result, he testified, it would be highly unusual for a patentee to submit prior art in this manner. *Id.* at 57. Spence testified, in short, that proceedings on reexamination are limited, and as a result, he reasonably limited his investigation and efforts to prior art references relied upon by the examiner, rather than hunting down lawsuits and reviewing docket sheets. *Id.* at 58, 71.

Beyond undermining Defendants' arguments about when they knew about their antitrust injury, Plaintiffs offer evidence to show that they first learned of Shuffle Master's patent fraud when TCS' Jonathan Pettemerides spoke to investors on March 20, 2015 and then emailed other TCS employees to pass along the information. [117] at 7-8. Pettemerides testified that, prior to March 20, 2015, he had no knowledge of any patent fraud or improper litigation by Shuffle Master; nor did he have any awareness of any such knowledge across the company (TCS). *Id.* at 11. If this **[*18]** were the case (and a reasonable jury could find that it is), this lawsuit, filed March 15, 2019, is timely.

Ultimately, the statute of limitations question turns on the same factual issues as Plaintiffs' *Walker Process* claim; the latter asks whether Defendants knew, when they sued Plaintiffs in 2009 and 2012, the asserted patents were invalid or otherwise unenforceable, *see e.g., C.R. Bard, Inc. v. M3 Sys., Inc., 157 F.3d 1340, 1371 (Fed. Cir. 1998)* ("to violate the ***antitrust law*** there must be an improper use of the patent right, 'coupled with violations of *§ 2*.'") (emphasis added) (quoting *Walker Process, 382 U.S. at 177-78*); the former asks whether (and when) Plaintiffs knew as much. The Court simply cannot resolve these issues on the current, disputed record. Certainly, the record does not allow the Court to definitively rule that Plaintiffs knew they had suffered an antitrust injury before March 15, 2015, which is what Defendants need to prove to obtain a summary judgment based upon the statute of limitations. Accordingly, the Court denies Defendants' motion for summary judgment based upon timeliness under the Sherman Act's statute of limitations.

B. The 2010 Release

Defendants also argue that TF's current claim is barred by the release included in the settlement agreement the parties **[*19]** executed to resolve the 2009 litigation. The parties' agreement provided "except for each party's undertakings and obligations under [the Settlement] Agreement, each party hereby generally releases the other for all claims, liabilities and damages of any kind that either has or may have against the other, as of the date of this Agreement, whether known or unknown, asserted or unasserted, or accrued or unaccrued." [103] at 441. Initially, consistent with the Court's findings above, the record fails to establish, as a matter of law, that TF had a *Walker Process* claim "as of the date of" the Settlement Agreement. And if it did not, then the current claim falls outside the scope of the release.

Additionally, such a broad release is valid only if it is entered into knowingly and voluntarily. *See Wagner v. NutraSweet Co., 95 F.3d 527, 533 (7th Cir. 1996)*. A waiver signed under the "advice of independent counsel" is presumed knowing and voluntary "absent claims of fraud." *Riley v. Am. Fam. Mut. Ins. Co., 881 F.2d 368, 373 (7th Cir. 1989)*. But "[e]ven where the parties intend to release a specific claim, the release of that claim will not be enforced if there has been fraud, duress, mutual mistake, or, at least in some cases, unconscionability." *Fed. Deposit Ins. Corp. v. FBOP Corp., No. 14 CV 4307, 2017 U.S. Dist. LEXIS 194133, 2017 WL 5891033, at *12 (N.D. Ill. Nov. 27, 2017)* (quoting *Carlile v. Snap-on Tools, 271 Ill. App. 3d 833, 648 N.E.2d 317, 322, 207 Ill. Dec. 861 (Ill. Ct. App. 1995)*). Further, "[a]n exculpatory clause cannot protect persons **[*20]** from the results of their willful and wanton misconduct. Such a contractual shield is illegal." *Time Warner Sports Merch. v. Chicagoland Processing Corp., 974 F.Supp. 1163, 1175 (N.D. Ill. 1997)* (quoting *Zimmerman v. Northfield Real Estate. Inc., 156 Ill. App. 3d 154, 510 N.E.2d 409, 415, 109 Ill. Dec. 541 (Ill. App. Ct. 1986)*).

Here, Defendants emphasize that sophisticated counsel represented TF during settlement, suggesting that TF made a knowing and voluntary waiver.[4] But TF's counsel testified that, when she represented TF during those settlement negotiations, she had no knowledge that TF might have a claim against Defendants for inequitable conduct, fraud, or sham litigation. [110] at 98. She testified that, although she had worked on cases where

[4] Defendants also repeat their arguments that TF knew about the potential antitrust claims when it released its claims. But, as explained above, issues of material fact remain as to whether Plaintiffs were aware of these claims.

inequitable conduct allegations were a huge deal and the subject of discovery, this was not such a case. On the contrary, this case settled before it really even got started and before she spent any time considering invalidity. *Id.*

Additionally, TF argues that Defendants' attorney misled TF during those negotiations, thereby preventing TF from realizing it incurred an antitrust injury. Kimball Anderson, the attorney representing Shuffle Master in the 2009 litigation, represented to Elizabeth Rader (TF's counsel) that he had reviewed Shuffle Master's documentation of its pre-filing investigation and was "completely satisfied that your client's A-Plus Shuffler **[*21]** infringes Shuffle Master's patents and that your client has violated the United States Patent Act by, among other things, making an offer to sell the infringing product at the Global Gaming Expo." [109] at 177. And Attorney Rader testified that she did not believe TF had a basis at the time of the settlement to allege inequitable conduct. [109] at 34. Similarly, she testified that, at the time of the settlement, TF had no reason to believe Shuffle Master had committed any kind of fraud on the patent office; she testified that TF was reviewing validity and analyzing prior art and just never discussed anything about Shuffle Master withholding material prior art from the PTO at that time. *Id.* at 42; [110] at 94-95.

Based upon this evidence, a jury could reasonably find that Shuffle Master fraudulently induced TF to settle the 2009 lawsuit and sign the broad release by doubling down on its infringement claim, knowing that the asserted patents were invalid or procured by fraud. Fraudulent inducement is a "classic example of an issue of fact," generally not appropriate for summary judgment. *Dopke v. Stavriotis, No. 87 C 1069, 1987 U.S. Dist. LEXIS 11411, 1987 WL 30979, at *4 (N.D. Ill. Dec. 10, 1987)*. Given the existence of questions of fact concerning whether TF's *Walker Process* claim existed in **[*22]** 2010 when the parties executed the settlement agreement, the Court declines to enter summary judgment in Defendants' favor based upon the release.

IV. Conclusion

For the reasons explained above, the Court finds that issues of fact remain as to whether Plaintiffs knew, or in the exercise of reasonable diligence should have known, before March 15, 2015, that they suffered an antitrust injury. As a result, summary judgment based upon the statute of limitations or the parties' 2010 settlement agreement is inappropriate, and the Court, accordingly, denies Defendants' motion for summary judgment [100].

Opinion

MEMORANDUM

KENNEY, J.

This case concerns QVC's alleged monopolization of the direct response television programming market and exercise of control over the sale of nutritional supplements in that market in breach of QVC's obligations to Plaintiffs, Suzanne Somers and SLC Sweet, Inc. ("Plaintiffs"). Presently before the Court is Defendant's Motion for Partial Summary Judgment on Counts V and IX. ECF No. 63.

Plaintiffs have sued QVC for allegedly intentionally removing Plaintiffs as sellers of nutritional supplements in the direct response television programming market (the "T.V. Market"), so that QVC could protect sales of HSN's preferred provider of nutritional supplements, Andrew **[*2]** Lessman. Plaintiffs claim QVC acted to monopolize the television programming nutritional supplement market and engaged in anticompetitive, exclusionary, and predatory conduct. In addition to their antitrust claims, Plaintiffs assert claims against QVC for unfair competition, fraud, promissory estoppel, violations of the UCC, and breach of the parties' Agreement. Plaintiffs intend to establish that QVC's actions caused Plaintiffs over $20 million in damages.

Defendant responds that this case is a straightforward commercial contract dispute that Plaintiffs have twisted into a business tort and antitrust lawsuit. QVC claims that there is no genuine dispute of material fact and Plaintiffs' antitrust and business tort claims fail as a matter of law. QVC also argues it expended significant efforts in its performance under the terms of its Agreement with Plaintiffs, did not breach any provisions of the Agreement, appropriately terminated the Agreement, and that Plaintiffs are not entitled to any damages.

I. BACKGROUND

Plaintiffs in this case are actress and entrepreneur Suzanne Somers and her affiliated company, SLC Sweet, Inc, which sells products such as clothing, jewelry, and books. ECF No. **[*3]** 65 ¶¶ 1 & 3. Defendant is QVC, Inc., a multi-platform retailer that sells products through direct response television programming, online retail, and other channels. ECF No. 63-2 ¶ 6. Plaintiffs allege that Defendant QVC and the Home Shopping Network ("HSN") acted in tandem to control the sale of nutritional supplements in the T.V. Market and eliminate competitor vendors in that market, including Plaintiffs. *See generally* ECF No. 7. The claimed monopoly began in July 2017, when QVC's parent, Qurate, acquired HSN. *Id.* at ¶ 26. Plaintiffs estimate that HSN and QVC together control ninety-five percent of the T.V. Market. *Id.* Plaintiffs claim that after Qurate acquired HSN, QVC suppressed the sale of Plaintiffs' products to protect this illegal monopoly and advance the career of HSN's provider of nutritional supplements, Andrew Lessman. *Id.*

Prior to 2017, Ms. Somers sold nutritional supplements on Evine, another home shopping television network. Pl. Statement of Undisputed Facts ¶ 9; Def. Statement ¶¶ 9-19. In December 2016, a QVC vendor contacted Rich Yoegel, QVC's Vice President of Merchandising, to see whether QVC would be interested in doing business with SLC. Def. Statement ¶ 20. In **[*4]** early 2017, the parties negotiated a merchandising agreement over several weeks. Def. Statement ¶ 25. On March 17, 2017, SLC notified Evine it was terminating their relationship. Def. Statement ¶ 29. On March 21, 2017, SLC and QVC signed a Merchandising Agreement (the "Agreement") for SLC to sell nutritional supplements on QVC. Joint Undisputed Fact No. 7. Caroline Somers, Suzanne's daughter-in-law and the President of SLC, signed the Agreement on behalf of SLC. Joint Undisputed Fact No. 8. In March 2017, QVC placed its first purchase orders with SLC, totaling approximately $1.3 million. Joint Undisputed Fact No. 9.

Andrew Lessman sells nutritional supplements on QVC and HSN. Joint Undisputed Fact No. 2. His company ProCaps was one of HSN's largest vendors before the Liberty/HSN acquisition, and still is one of HSN's largest vendors today. Joint Undisputed Fact No. 10. Andrew Lessman has an agreement with HSN which provides that the parties to the agreement intend him to be the sole provider of nutritional supplements on HSN. ECF No. 69 at 8; ECF No. 83 at 4.

In July 2017, Liberty Interactive announced the HSN acquisition. Joint Undisputed Fact No. 4. In December 2017, Liberty Interactive **[*5]** formally completed the HSN acquisition and comes to own 100% of QVC and 100% of HSN. Joint Undisputed Fact No. 5.

II. PROCEDURAL HISTORY

SLC and Suzanne Somers initiated this action against QVC on October 15, 2019, alleging breach of contract, wrongful rejection of goods, failure to use best efforts, anticipatory repudiation, unfair competition, fraud, promissory estoppel, intentional interference with contractual relations, unfair business practices, and violation of the Sherman Act. ECF No. 1. Plaintiffs then filed an Amended Complaint on December 20, 2019. ECF No. 7. Defendant filed a Motion to Dismiss for Failure to State a Claim on January 24, 2021 (ECF No. 8), which the Court denied. ECF No. 18. Defendant filed its Answer on March 18, 2020 (ECF No. 19), and the case proceeded through discovery.

On May 7, 2021, Plaintiffs filed a Partial Summary Judgment Motion, seeking summary judgment on Count I (Breach of Contract) and Count II (Violation of the UCC). ECF No. 65. Defendant also brought a Partial Summary Judgment Motion seeking judgment in its favor on Counts I, III, IV, V, VI, VII, VIII and IX. ECF No. 63. On August 24, 2021, the Court denied Plaintiffs' Motion (ECF No. 65) in **[*6]** its entirety and denied Defendant's Motion (ECF No. 63) as to Counts I, III, IV, VI, VII, and VIII.[1] Presently before the Court is Defendant's Motion for Partial Summary Judgment as to Counts V (Violation of *CA Business and Professions Code § 17200*) and IX (Violation of *§ 2* of the Sherman Act). ECF No. 65.

III. JURISDICTION AND LEGAL STANDARD

The Court has jurisdiction over this matter under *28 U.S.C. § 1331* as it arises under the laws of the United States. This Court also has subject matter jurisdiction under *28 U.S.C. § 1332* because the matter in controversy exceeds the sum of $75,000 and is between citizens of different states.

Summary judgment will be granted "against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*. The party moving for summary judgment bears the burden of demonstrating that "there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*; *see* *Celotex, 477 U.S. at 322-23*. If the movant sustains its burden, the nonmovant must set forth facts demonstrating the existence of a genuine dispute. *See* *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 255, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. A dispute as to a material fact is genuine if "the evidence is such that a reasonable jury **[*7]** could return a verdict for the nonmoving party." *Id.* A fact is "material" if it might affect the outcome of the case under governing law. *Id.* To establish "that a fact cannot be or is genuinely disputed," a party must:

> (A) cit[e] to particular parts of materials in the record, including depositions, documents, electronically stored information, affidavits or declarations, stipulations (including those made for purposes of the motion only), admissions, interrogatory answers, or other materials; or
> (B) show[ ] that the materials cited do not establish the absence or presence of a genuine dispute, or that an adverse party cannot produce admissible evidence to support the fact.

Fed. R. Civ. P. 56(c)(1). The adverse party must raise "more than a mere scintilla of evidence in its favor" in order to overcome a summary judgment motion and cannot survive by relying on unsupported assertions, conclusory allegations, or mere suspicions. *Williams v. Borough of W. Chester, 891 F.2d 458, 460 (3d Cir. 1989)*. The "existence of disputed issues of material fact should be ascertained by resolving all inferences, doubts and issues of credibility against" the movant. *Ely v. Hall's Motor Transit Co., 590 F.2d 62, 66 (3d Cir. 1978)* (citations and quotation marks omitted).

IV. DISCUSSION

A. Count IX — Violation of the Sherman Act

In Count IX of the Amended Complaint, **[*8]** Plaintiffs allege that Defendant violated the Sherman Act, *15 U.S.C. § 2*, through its monopolization or attempted monopolization of the trade or commerce of nutritional supplements in the T.V. Market. ECF No. 7 ¶¶ 222-31.

---

[1] The Court noted in ruling on the Defendant's Partial Summary Judgment Motion as to Counts I, III, IV, VI, VII, and VIII that the Court would revisit the sufficiency of the evidence pursuant to *F.R.C.P. 50*.

Section 2 makes it unlawful to "monopolize, or attempt to monopolize," interstate or international commerce. 15 U.S.C. § 2. It is "the provision of the antitrust laws designed to curb the excesses of monopolists and near-monopolists." Broadcom Corp. v. Qualcomm Inc., 501 F.3d 297, 306 (3d Cir. 2007). "[Section] 2 makes the conduct of a single firm unlawful only when it actually monopolizes or dangerously threatens to do so." Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993).

A plaintiff bringing an attempted monopolization claim must allege that: (1) the defendant has engaged in predatory or anticompetitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power. Race Tires Am., Inc. v. Hoosier Racing Tire Corp., 614 F.3d 57, 75 (3d Cir. 2010) (internal quotations omitted). "Liability hinges on whether valid business reasons, as part of the ordinary competitive process, can explain [QVC]'s actions that resulted in a dangerous probability of achieving monopoly power." Phila. Taxi Ass'n, Inc v. Uber Techs., Inc., 886 F.3d 332, 339 (3d Cir.), cert. denied, *139 S. Ct. 211, 202 L. Ed. 2d 126 (2018)* (citing Avaya Inc., RP v. Telecom Labs, Inc., 838 F.3d 354, 393 (3d Cir. 2016)). The Court must "carefully scrutinize[] enforcement efforts by competitors because their interests are not necessarily congruent with the consumer's stake in competition." **[*9]** Barr Lab'ys, Inc. v. Abbott Lab'ys, 978 F.2d 98, 109 (3d Cir.1992). As an essential part of their case, Plaintiffs must articulate the relevant product and geographic market, show a cognizable antitrust injury, and explain QVC's power within the market. *See* Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997).

Plaintiffs claim that Defendant QVC has an illegal monopoly over the sale of nutritional supplements in the T.V. Market. ECF No. 7 ¶¶ 222-31. Per Plaintiffs, QVC evidenced its specific intent to monopolize the T.V. Market by falsely luring and inducing Plaintiffs into the "sham" Agreement and purchase orders so it could eliminate competition from Plaintiffs in the T.V. Market. *Id.* ¶ 227. Plaintiffs further claim QVC possesses and controls nearly all of the T.V. Market and that Plaintiffs have suffered antitrust injury in the form of, among other things, lost profits from a reduced ability to compete, which was proximately caused by QVC's monopolization or attempted monopolization of the television programming nutritional supplement market. *Id.* ¶ 227-30.

Defendant claims Plaintiffs' antitrust allegations fail as a matter of law for four reasons: the lack of (1) antitrust injury; (2) support for Plaintiffs' claimed relevant market; (3) market power by QVC and HSN; and, (4) evidence for QVC's specific **[*10]** monopolistic intent. ECF No. 63-1 at 4. Defendant states that Plaintiffs failed to create genuine issues of fact on these key points during fact discovery and exacerbated that problem by failing to engage an antitrust expert. *Id.*

1. Product Market

A product market's "outer boundaries" are defined by looking to the "reasonable interchangeability of use" between the product itself and substitutes for it. Queen City Pizza, 124 F.3d at 436 (quoting Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)). Interchangeability of use means that one product is "roughly equivalent" to another product for its intended use. 124 F.3d at 437. "In most cases, proper market definition can be determined only after a factual inquiry into the commercial realities faced by consumers." Id. at 436. Factors to be considered include price, use, and qualities. Tunis Bros. Co. v. Ford Motor Co., 952 F.2d 715, 722 (3d Cir. 1991) (citing United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 404, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)). The products in a relevant product market would be characterized by a cross-elasticity of demand, meaning that a rise in the price of a good within a relevant product market would tend to create a greater demand for other like goods in that market. 952 F.2d at 722. Put differently, if a consumer were looking to purchase a product in a particular market, are "reasonable substitutes" available if a preferred product is unavailable. *See* Novak v. Somerset Hosp., No. 3:07CV304, 2014 U.S. Dist. LEXIS 138028, 2014 WL 4925200, at *13 (W.D. Pa. Sept. 30, 2014), aff'd, 625 F. App'x 65 (3d Cir. 2015).

Plaintiffs claim that **[*11]** "the television programming nutritional supplement market" is a relevant market for antitrust purposes and that the T.V. Market is a distinct and recognized market. ECF No. 7 ¶ 226; ECF No. 84-2 at 3-4. Plaintiffs argue that summary judgment should be denied here because "special characteristics" of the relevant industry can influence the market definition and "a discrete channel of distribution" can be a relevant market for antitrust purposes. *See* ECF No. 84-2 at 4-5 (citing *Columbia Metal Culvert Co. v. Kaiser Aluminum & Chemical Corp., 579 F.2d 20, 28 (3d Cir. 1978)*, cert. denied, *439 U.S. 876, 99 S. Ct. 214, 58 L. Ed. 2d 190 (1978)* and *GN Netcom, Inc. v. Plantronics, Inc., 967 F. Supp. 2d 1082, 1087 (D. Del. 2013)*).

However, Plaintiffs have not presented any evidence sufficient to raise a genuine dispute of material fact as to whether the T.V. Market has the "special characteristics" necessary to render it a relevant market for antitrust purposes, nor have they shown "that enough customers do not view other methods of distribution as viable substitutes to the distribution method in question." *GN Netcom, Inc., 967 F. Supp. 2d at 1087*. Plaintiffs' only factual citations for their propositions come from the Agreement between QVC and SLC and statements from Qurate's CEO and advertising materials. ECF No. 84-2 at 5-7. Nowhere in the record do Plaintiffs make any kind of showing that consumers who purchase nutrition supplements on the T.V. Market **[*12]** view other channels of distribution, such as e-commerce or brick-and-mortar stores, as nonviable substitutes if their preferred product is not offered on the T.V. Market. Nor have Plaintiffs shown what other nutritional supplements are reasonable substitutes for their products, even if certain consumers would prefer to purchase Plaintiffs' products. In fact, nowhere in the record have Plaintiffs clearly proposed a product market that contains all products that consumers consider reasonably interchangeable, nor have they presented any evidence or analysis on cross-elasticity of demand.

Plaintiffs cite to *Brown Shoe Co. v. U.S* for their proposition that the T.V. Market is a valid submarket for antitrust purposes, but have not attempted to make the showing outlined in that case. *370 U.S. 294, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. In *Brown Shoe Co.*, the Court stated that well-defined submarkets can constitute product markets for antitrust purposes where such a submarket can be determined by "examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price **[*13]** changes, and specialized vendors." *Id. at 325*. However, Plaintiffs have not brought forward any evidence on any of these factors to show that the T.V. Market meets this standard for a recognizable submarket. Plaintiffs cite only to QVC's Agreement with SLC—which contains several provisions limiting SLC's ability to promote and sell its products only on other "Direct Response Television Programs"—and statements made by Qurate which show that the company sought to differentiate itself from e-commerce platforms and brick-and-mortar companies. ECF No. 84-2 at 5-7. Plaintiffs cite no evidence showing industry or public recognition of the T.V. Market as a separate economic entity, the product's peculiar characteristics and uses, any unique production facilities, that there are distinct T.V. Market customers, distinct prices, sensitivity to price changes, and specialized vendors.

Therefore, Plaintiffs have not articulated a coherent product market. *See, e.g., Multiple Energy Techs. v. Under Armour, No. 2:20-CV-664-NR, 2021 U.S. Dist. LEXIS 120744 (W.D. Pa. June 29, 2021)*.

2. Geographic Market

As with the product market, the Plaintiffs bear the evidentiary burden of proving the relevant geographic market. *Tunis Bros. Co., 952 F.2d at 726*. "[T]he relevant geographic **[*14]** market is the area in which a potential buyer may rationally look for the goods or services he or she seeks." *Hanover 3201 Realty, LLC v. Vill. Supermarkets, Inc., 806 F.3d 162, 183-84 (3d Cir. 2015)* (citation omitted). The geographic market "may be local, regional, national or international in origin." *In re Mushroom Direct Purchaser Antitrust Litig., 514 F. Supp. 2d 683, 697 (E.D. Pa. 2007)*. The geographic market is defined with reference to both "the market area in which the seller operates" and where "the purchaser can practicably turn for supplies." *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 331-32, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*; *see also Tunis Bros. Co., 952 F.2d at 726* ("the geographic market is not comprised of the region in which the seller attempts to sell its product, but rather is comprised of the area where his customers would look to buy such a product").[2]

---

[2] While *Tunis* and several other cases relied on by the Court involved alleged violations of *Section 1 of the Sherman Act*, the Court finds the cited analysis instructive here. The Third Circuit has made it clear that, while "'inquiries into the scope of

Plaintiffs assert that the relevant geographic market is defined in the Agreement. ECF No. 84-2 at 7-8. However, the geographic market must be defined by buyer behavior, i.e. where consumers wanting to purchase nutritional supplements would look to purchase such supplements. *See* *Novak v. Somerset Hosp., 2014 U.S. Dist. LEXIS 138028, 2014 WL 4925200, at *16*. Plaintiffs reject Defendant's argument that Plaintiffs' competitors include brick-and-mortar and online sellers of supplements, but they have not even argued that consumers, when shopping for supplements, limit themselves to certain distribution channels, such as the T.V. Market. *See, e.g.,* *Tunis Bros. Co., 952 F.2d at 726* (finding that plaintiff's evidence **[*15]** failed to establish a geographic market in part because "customers testified [ ] that they did not limit themselves to such a restricted geographic region"). Because Plaintiffs cite no evidence on buyer behavior, they have not established a relevant geographic market. *Id. at 727* (a geographic market delineated "without reference to a market as perceived by consumers and suppliers, fails to meet the legal standard necessary for the relevant geographic market").

Though Plaintiffs dispute Defendant's claim that Plaintiffs are required to introduce expert testimony to define a relevant market, the Court need not address that issue because the Plaintiffs have clearly not met their burden. The Court will not opine on whether Plaintiffs could have proposed a viable relevant market or what evidentiary showing could have met the standards under these circumstances.

The Plaintiffs' failure to define a legally sufficient relevant market is fatal to their *Section 2* claim (*see* *Queen City Pizza, Inc., 124 F.3d at 436*) and thus the Court will not address the remaining elements (whether QVC has the requisite market power or anticompetitive intent). *Novak v. Somerset Hosp., 2014 U.S. Dist. LEXIS 138028, 2014 WL 4925200, at *16*.

Nonetheless, the Court will discuss Plaintiffs' failure to state an antitrust injury, which is equally fatal **[*16]** to Plaintiffs' antitrust claim.

3. Injury to Competition

"Competition is at the heart of the antitrust laws." *Phila. Taxi Ass'n, Inc., 886 F.3d at 338*. The Sherman Act does not "proscribe all unseemly business practices," *Sitkin Smelting & Ref. Co. v. FMC Corp., 575 F.2d 440, 448 (3d Cir. 1978)*; rather, the antitrust laws aim only to curtail anticompetitive conduct, "or a competition-reducing aspect or effect of the defendant's behavior," *Phila. Taxi Ass'n, Inc., 886 F.3d at 338*. If consumers can purchase comparable goods at competitive prices, there can be no antitrust violation. *Tunis Bros. Co., 952 F.2d at 728*. Thus, Plaintiffs "must prove that the challenged conduct affected the prices, quantity or quality of goods and services, not just [their] own welfare." *Mathews v. Lancaster Gen. Hosp., 87 F.3d 624, 641 (3d Cir. 1996)* (quotations omitted). This requirement reflects the fundamental purpose of ***antitrust law***: "to protect competition, not competitors." *Id.*

The Court finds that Plaintiffs have failed to show that QVC caused any injury to competition. *See* *Tunis Bros. Co., 952 F.2d at 727-28*. The record does not raise any genuine dispute of material fact or support a reasonable finding that Plaintiffs were forced out of a relevant market or that consumers were harmed.

Plaintiffs claim that by removing Plaintiffs and their products from the T.V. Market, QVC reduced competition, consumer choice, and the quantity of goods. ECF No. 84-2 at 8-9; *see also id.* at 10 ("[b]y **[*17]** eliminating Plaintiffs from the Direct Response Television Programming Market, QVC has eliminated product choice and the quantity of goods for the consumer"). However, Plaintiffs have not brought forward any evidence showing that a single customer paid a higher price for a supplement because of QVC's alleged conduct or that consumers were deprived of the option to purchase Plaintiffs' supplements. In fact, Plaintiffs have stated that consumers had access to Plaintiffs' products through their website and on other platforms, including SuzanneSomers.com and Facebook Live. ECF No. 7 ¶ 10. Plaintiffs have also not cited any evidence showing that the quality or quantity of supplements for sale in any relevant market has declined. Moreover, Plaintiffs' claimed lost profits from a reduced ability to

competition under *§ 1* and *§ 2* are not precisely the same,'" where the Plaintiffs have failed to "present a sufficiently close factual issue," it is not necessary for the Court to confine itself to case law only dealing with claims brought under the same section. *Tunis Bros. Co., 952 F.2d at 724 n.3* (citing *Columbia Metal Culvert Co., 579 F.2d at 27 n.11*).

compete (ECF No. 7 ¶ 229-30) are not a cognizable antitrust injury. *See* *Huhta v. Children's Hosp. of Phila., No. CIV. A. 93-2765, 1994 U.S. Dist. LEXIS 7327, 1994 WL 245454, *2 (E.D. Pa. May 31, 2004)* (harm to doctor from lost referrals was not harm to competition). Therefore, the Court agrees with Defendant that Plaintiffs have not met their burden to put forward evidence to create a genuine issue of fact as to whether Defendant's conduct caused the type of injury that is redressable under the Sherman Act.

Because Plaintiffs **[*18]** are unable to demonstrate antitrust injury or define a legally sufficient relevant market, Count IX fails as a matter of law.

B. Count V — Violation of CA Business and Professions Code 17200

The California Unfair Competition Law ("UCL") creates a cause of action for business practices that are unlawful, unfair, or fraudulent. *Cal. Bus. & Prof. Code § 17200* (West). Where a UCL action is based on contracts not involving either the public in general or individual consumers who are parties to the contract, a corporate plaintiff may not rely on the UCL for the relief it seeks. *Dollar Tree Stores Inc. v. Toyama Partners LLC, 875 F. Supp. 2d 1058, 1083 (N.D. Cal. 2012)* (citing *Linear Tech. Corp. v. Applied Materials, Inc., 152 Cal. App. 4th 115, 135, 61 Cal. Rptr. 3d 221 (Cal. Ct. App. 2007)*); *see also* *Capella Photonics, Inc. v. Cisco Sys., Inc., 77 F. Supp. 3d 850, 866 (N.D. Cal. 2014)* (a corporate competitor is not entitled to the protection of the fraudulent prong of the UCL).

Plaintiffs claim that QVC's business practices were both "unfair" and "unlawful" under *§ 17200*. ECF No. 7 ¶ 153; ECF No. 84 at 25.[3] Because the Court has found that Defendant did not violate the Sherman Act, the only remaining predicate acts that could be the basis for the UCL claim are based on the parties' Agreement and do not include allegations of harm to the general public or individual consumers. A UCL action based on a contract is not appropriate where the public in general or consumers are not harmed by the defendant's alleged unlawful **[*19]** practices. *Rosenbluth Int'l, Inc. v. Superior Ct., 101 Cal. App. 4th 1073, 1077, 124 Cal. Rptr. 2d 844 (Cal. Ct. App. 2002)*; *see also* *Linear Tech. Corp. v. Applied Materials, Inc., 152 Cal. App. 4th 115, 61 Cal. Rptr. 3d 221 (Cal. Ct. App. 2007)* ("Where a UCL action is based on contracts not involving either the public in general or individual consumers who are parties to the contract, a corporate plaintiff may not rely on the UCL for the relief it seeks."). Plaintiffs have not put forward evidence that QVC's alleged conduct caused harm to the public or consumers, as Plaintiffs have not claimed that the public was deceived in any way or forced to pay higher prices for nutrition supplements. Rather, this is a dispute between commercial parties over their economic relationship. *In re ConocoPhillips Co. Serv. Station Rent Contract Litig., No. M:09-CV-02040 RMW, 2011 U.S. Dist. LEXIS 40471, 2011 WL 1399783, at *3 (N.D. Cal. Apr. 13, 2011)*. Therefore, Plaintiffs' UCL claim fails and the Defendant is entitled to judgment as a matter of law on Count V.

V. CONCLUSION

For the foregoing reasons, the Court will **GRANT** Defendant's Partial Motion for Summary Judgment (ECF No. 63) as to Counts V and IX of the Amended Complaint, as outlined above. An appropriate order follows.

DATE: 09/23/2021

BY THE COURT:

/s/ Chad F. Kenney

CHAD F. KENNEY, JUDGE

---

[3] In their Amended Complaint, Plaintiffs also allege that that QVC's conduct was fraudulent under the UCL. ECF No. 7 ¶ 156. However, Plaintiffs do not address this claim in their Response to the Motion (ECF No. 84), and it is clear that corporate competitors cannot bring claims under the fraudulent prong of the UCL. *See* *77 F. Supp. 3d at 866*.

ORDER

AND NOW, this **23** rd day of **September, 2021**, upon consideration of Defendant's Motion for Partial Summary Judgment (ECF No. 63), Plaintiffs' Response in Opposition (ECF No. 84), Defendant's Reply (ECF No. 90) and Plaintiffs' Surreply **[*20]** (ECF Nos. 93), it is hereby **ORDERED** that Defendant's Motion (ECF No. 63) is **GRANTED as to Counts V and IX of the Amended Complaint**.

The Clerk of the Court is directed to enter judgment in the Defendant's favor on Counts V and IX only of the Amended Complaint.

BY THE COURT:

/s/ Chad F. Kenney

CHAD F. KENNEY, JUDGE

Opinion

ORDER GRANTING IN PART AND DENYING IN PART MOTION TO DISMISS

Re: Dkt. No. 19

Plaintiffs Best Carpet Values, Inc. and Thomas D. Rutledge (collectively "Plaintiffs") initiated this putative class action suit, asserting claims against Defendant Google LLC ("Google") for implied-in-law contract and unjust enrichment; trespass to chattels; and unfair and unlawful conduct in violation of *California Business and Profession Code § 17200*. Pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure*, Google moves to dismiss the complaint without leave to amend. Dkt. No. 19. Plaintiffs **[*2]** filed an opposition (Dkt. No. 22) and Google filed a reply (Dkt. No. 28). For the reasons discussed below, the Court will grant in part and deny in part Google's motion.

I. BACKGROUND[1]

Plaintiffs are owners of active U.S.-based websites. Compl. ¶ 1. Plaintiff Best Carpet Values, Inc. ("Best Carpet") owns bestcarpetvalue.com and Plaintiff Thomas D. Rutledge ("Rutledge") owns thomasrutledgelaw.com. *Id.* ¶ 9. A website is a digital document built with software and housed on a computer called a "web server." *Id.* ¶ 34. A webserver is owned or controlled in part by the website's owner. *Id.* Commercial websites typically have a unique "domain name" or "URL" (Uniform Resource Locator) address which enables an internet user to find the webserver on which the website resides. *Id.* ¶ 35. All websites have at least one page, called a homepage. *Id.* ¶ 36. Plaintiffs allege that "[b]y rights of ownership—and under the *First Amendment*—website owners are entitled to control the content and information displayed on their websites' web pages, including any advertisements, without interference." *Id.* ¶ 51. Once a website is "published" and becomes "active," Internet users can reach a website by entering the website's domain **[*3]** name into an internet "browser" program such as Google Chrome, Mozilla Firefox or Microsoft Edge. *Id.* ¶ 37.

Internet users do not necessarily need a URL to reach a website. Internet users can find the website by entering "search terms" into the "search bar" of an internet search engine such as Google.com, Yahoo.com or Bing.com. *Id.* ¶ 38. Performing searches on search engines yields "search results" typically in the form of a list of websites or documents that are potentially responsive to the user's search terms. *Id.* When the internet user clicks on a link to a website, the user's internet browser will connect the user to, and upload a page from, the website. *Id.* "The browser does this by finding and connecting to the web server hosting the website. The browser then obtains a copy of the requested website page from the host web server and delivers the copy to the user by translating the website's codes and recreating the website page on the user's computer monitor or mobile device screen." *Id.* ¶ 39.

Google operates several internet related businesses that provide a variety of internet related products and services. *Id.* ¶ 54. Among other things, Google (1) makes and controls Android mobile **[*4]** phone software, including the Android operating system, which allows users to wirelessly access the internet; (2) owns and operates the world's most used internet browser, Google Chrome, and the world's most-used internet search engine, google.com; and (3) owns the world's largest internet advertising network, offering products serving every aspect of that industry, including Google Ads (for clients advertising on Google's search results pages), AdSense (matching buyers and sellers of display advertising on websites), and AdX (for buyers and sellers of premium, high-end website display ads). *Id.* ¶¶ 55-58.

Android phone users can search the internet by either (1) opening a browser, such as Chrome, by clicking the Chrome icon on one of their Android home screens; or (2) using Google's Search App, which is incorporated into nearly every Android phone. *Id.* ¶¶ 59-60. Android users searching the internet are able to retrieve virtually the same search results, whether they use Search App or Chrome. *Id.* ¶¶ 63-64.

Before March of 2018, the Search App icon " " appeared in the suite of Google apps that Google installs on Android phones, and many Android users had to click on the Search App icon **[*5]** to use the App. *Id.* ¶ 62. In late March of 2018, Google updated its Search App software by placing the Search App's search bar at the top of the first page of most Android home screens. *Id.* ¶¶ 65, 66. This software update eliminated the need for Android users to click an icon before conducting an internet search using Google's Search App. *Id.* ¶ 60. The Search App search bar bears Google's " " logo. *Id.* ¶ 67. Between March of 2018 and April of 2020 (the "Class Period"), virtually all of the approximately 50 million Android phone users in America have used the Search App's search bar to search the internet. *Id.* ¶ 68.

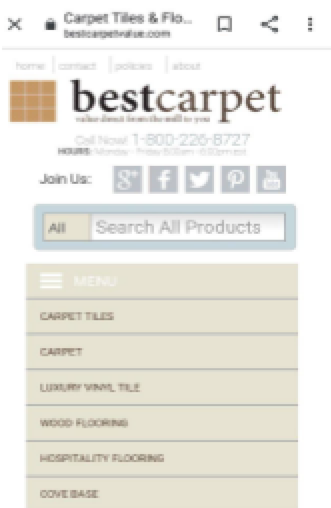
When Android users input internet search terms in the Search App's search bar, the Search App provides the user with search results, which appear on the Android user's screen as a list of websites and other documents available on the internet. *Id.* ¶ 69. The names of the websites on this search results list contain hyperlinks to those websites.

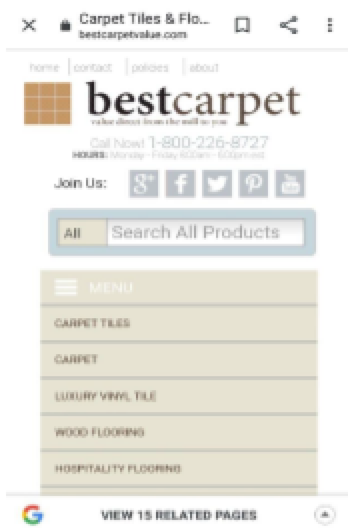
---

[1] The Background is a summary of the allegations in the Complaint.

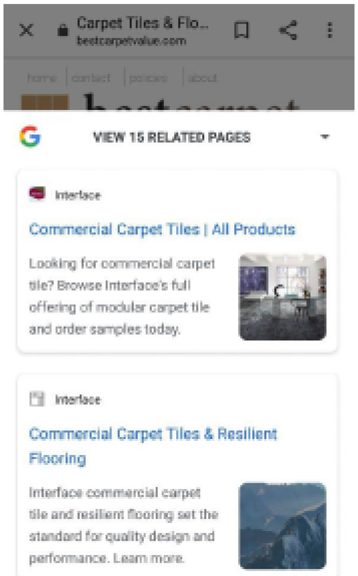
Id. ¶ 70. When users click on a website name, Google's search result page disappears from their screen and is replaced by the website's homepage. *Id.*

During the Class Period, "most websites retrieved via Search App, when activated by **[*6]** an Android user's touching and toggling of their phone's screen, had Google's unlawful ads superimposed on their homepages or other 'landing' pages.'" *Id.* ¶ 64. More specifically, Google superimposed a leaderboard ad at the bottom of homepages that consisted of Google's logo, the phrase "VIEW 15 RELATED PAGES," and a pop-up button. *Id.* ¶¶ 73-74. To illustrate, when a Search App user clicked Best Carpet's homepage link from the search results list, the website appeared as depicted in the image below on the left. *Id.* ¶ 73.





Id. ¶ 73. Once a user engaged Best Carpet's website by toggling its homepage, however, Google's Search App activated and superimposed Google's leaderboard ad on top of Best Carpet's website as depicted above in the image to the right. *Id.* The result was that Google's leaderboard, "VIEW 15 RELATED PAGES," covered Best Carpet's invitation to users to view its "Cove Base" products. *Id.* If a user were to click on the pop-up button (encircled triangle) in the leaderboard, the Search App superimposed two half-page "banner" ads that blocked 80% of what was previously viewable, and shadowed the remaining 20%. *Id.* ¶ 74. The two half-page banner ads were for Best Carpet's direct **[*7]** competitors. *Id.* ¶ 74, 79. Technically, the superimposed "banner" ads appeared on the copy of Best Carpet's website that was reproduced on the user's screen. *Id.* ¶ 75. Best Carpet considers that copy its property. *Id.* Each banner ad contained a link that, if clicked, redirected the users from Best Carpet's homepage to its competitor's web page. *Id.* ¶¶ 76, 79-80. The image below illustrates the superimposed "banner" ads.



Google's ads intruded on website owners' limited space and created distractions that undermined every web page's central purpose. *Id.* ¶ 88. They also "compelled" business owners in nearly every conceivable industry to advertise for others, including competitors. *Id.* ¶¶ 89, 91. Google's ad could also be misperceived by Android users as endorsements of unaffiliated businesses and people. *Id.* ¶ 91. The Related Pages banner ads often included ads for the host website's competitors (*id.* ¶ 77) and links to news stories about the host website's owner, including negative news articles (*id.* ¶¶ 78, 85).

The purpose of the March 2018 software update was to generate profit and Google succeeded in doing so. *Id.* ¶¶ 100-148. Google updated its Search App on or about April 22, 2020 to **[*8]** discontinue (at least temporarily) the conduct alleged in the Complaint. *Id.* ¶ 8, n.1. Plaintiffs estimate that for those two years, Google obtained over $2 billion of non-consensual free advertising. *Id.* ¶ 146.

II. STANDARDS

Federal Rule of Civil Procedure 8(a) requires a plaintiff to plead each claim with sufficient specificity "to give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (internal quotations omitted). A complaint which falls short of the *Rule 8(a)* standard may, therefore, be dismissed if it fails to state a claim upon which relief can be granted. *Fed. R. Civ. P. 12(b)(6)*.

To survive a *Rule 12(b)(6)* motion to dismiss, the complaint "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp., 550 U.S. at 570*). A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. *Id.* In evaluating the complaint, the court must generally accept as true all "well-pleaded factual allegations." *Id. at 664*. The court must also construe the alleged facts in the light most favorable to the plaintiff. *See Retail Prop. Trust v. United Bhd. Of Carpenters & Joiners of Am., 768 F.3d 938, 945 (9th Cir. 2014)* (the court must "draw all reasonable inferences in favor **[*9]** of the nonmoving party" for a *Rule 12(b)(6)* motion). The court, however, "does not have to accept as true conclusory allegations in a complaint or legal claims asserted in the form of factual allegations." *In re Tracht Gut, LLC, 836 F.3d 1146, 1150-51 (9th Cir. 2016)* (citing *Bell Atl. Corp., 550 U.S. at 555-56*). Dismissal "is proper only where there is no cognizable legal theory or an absence of sufficient facts alleged to support a cognizable legal theory." *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*.

III. DISCUSSION

Plaintiffs assert three claims on behalf of themselves, a Class, a Georgia Subclass, and a California Subclass.[2] Each claim is addressed separately below.

A. Trespass to Chattels Claim

Trespass to chattels lies where an intentional interference with the possession of personal property has caused injury. *Intel Corp. v. Hamidi, 30 Cal. 4th 1342, 1350-51, 1 Cal. Rptr. 3d 32, 71 P.3d 296 (2003)*; *see also* *Brodsky v. Apple Inc., 2019 U.S. Dist. LEXIS 148808, at *8 (N.D. Cal. Aug. 30, 2019)*. "Dubbed by Prosser the 'little brother of conversion,' the tort of trespass to chattels allows recovery for interferences with possession of personal property 'not sufficiently important to be classed as conversion, and so to compel the defendant to pay the full value of the thing with which he has interfered.'" *Hamidi, 30 Cal. 4th at 1350* (quoting Prosser & Keeton, Torts (5th ed. 1984) § 14, pp. 85-86). Under California law, "[i]n cases of interference with possession of personal property not amounting to conversion, 'the owner has **[*10]** a cause of action for trespass or case [sic], and may recover only the actual damages suffered by reason of the impairment of the property or the loss of its use.'" *In re iPhone Application Litig., 844 F. Supp. 2d 1040, 1069 (N.D. Cal. 2012)* (quoting *Hamidi, 30 Cal. 4th at 1351*).

Here, there are two potential chattels: the computers hosting Plaintiffs' websites and the copies of Plaintiffs' websites appearing on users' screens. Google contends the trespass to chattels claim fails as a matter of law as to both potential types of chattel because its Search App does not cause physical injury (*i.e.*, intrusion, interference or harm) to any tangible property. Mot. at 6. In making this argument, Google implicitly acknowledges that the computers hosting Plaintiffs' websites are tangible property, but contends that the Search App does not interact with those computers, much less damage them. As for the copies of Plaintiffs' websites appearing on users' screens, Google contends that they are not tangible property, and therefore cannot be the subject of a trespass claim.

In response, Plaintiffs contend that tangible and intangible property alike can be the subject of a trespass to chattels claim, and that they are alleging an injury to their intangible property, namely their websites.[3] Google allegedly **[*11]** injured their websites because the superimposed ads impaired the website's "condition, quality, or value." Opp'n at 18.

Consistent with *Kremen v. Cohen, 337 F.3d 1024, 1029-31, 1034-35 (9th Cir. 2003)*, and subsequently issued cases, the Court agrees with Plaintiffs that a website can be the subject of a trespass to chattels claim. In *Kremen*, the Ninth Circuit held that a registrant has property rights in a domain name, and further that a domain name is intangible property[4] that is protected by California conversion law. *Id. at 1035*. In doing so, the *Kremen* court recognized that conversion was originally a remedy for the wrongful taking of another's goods, so it applied only to

---

[2] The "Class" is: "All persons or entities residing in the United States that owned websites that were active between March 2018 and April 2020 (the 'Class Period') on which Google's logo and Related Pages banner ads appeared when their websites were viewed by Android mobile phone owners using the Search App." Compl. ¶ 156.

The "Georgia Subclass" is: "All persons or entities residing in Georgia that owned websites that were active between March 2018 and April 2020 on which Google's logo and Related Pages banner ads appeared when their websites were viewed by Android mobile phone owners using the Search App." *Id.* ¶ 157.

The "California Subclass" is: "All persons or entities residing in California that owned websites that were active between March 2018 and April 2020 on which Google's logo and Related Pages banner ads appeared when their websites were viewed by Android mobile phone owners using the Search App." *Id.* ¶ 158.

[3] None of Plaintiffs' websites, files, or data were physically altered in any way. Nor were Plaintiffs' servers disrupted.

[4] A property right exists in a domain name because (1) it is an interest capable of precise definition; (2) it is capable of exclusive possession or control; and (3) registrants of the domain name have a legitimate claim to exclusivity. *Id. at 1030*.

tangible property. *Id. at 1030*. The *Kremen* court, however, observed that virtually every jurisdiction has discarded this limitation to some degree and cited to the *Restatement* as one example of an alternative test:

> (1) Where there is conversion of a document in which intangible rights are merged, the damages include the value of such rights. (2) One who effectively prevents the exercise of intangible rights of
>
> (2) One who effectively prevents the exercise of intangible rights of the kind customarily *merged in a document* is subject to a liability similar to that for conversion, even though the document **[*12]** is not itself converted.

Restatement (Second) of Torts § 242 (1965) (emphasis added). The *Kremen* court surveyed California cases, determined that California does not follow the *Restatement*'s merger requirement quoted above,[5] and opined that conversion is a remedy for conversion of "every species of personal property," whether tangible or intangible. *Id. at 1033* (quoting *Payne v. Elliot 54 Cal. 339, 341 (1880)*). Nevertheless, the *Kremen* court found it unnecessary to resolve whether or not California applies the merger requirement because Kremen's domain name had a "connection to a document or tangible object," namely the Domain Name System ("DNS")—the distributed electronic database that associates domain names with particular computers connected to the internet. *Id. at 1033-34*. The DNS was, in the Ninth Circuit's view, akin to an electronic document. *Id. at 1034*. The Ninth Circuit explained:

> We need not delve too far into the mechanics of the Internet to resolve this case. It is sufficient to observe that information correlating Kremen's domain name with a particular computer on the Internet must exist somewhere in some form in the DNS; if it did not, the database would not serve its intended purpose. Change the information in the DNS, and you change the website people see when they type "www.sex.com." **[*13]**

Id. at 1034. After *Kremen*, several courts have held that domain names are subject to conversion in California. *See e.g.*, *CRS Recovery, Inc. v. Laxton, 600 F.3d 1138, 1142 (9th Cir. 2010)* ("Domain names are thus subject to conversion under California law, notwithstanding the common law tort law distinction between tangible and intangible property for conversion claims."); *United States Marine Surveyors, Inc. v. Reiner, 2016 U.S. Dist. LEXIS 189026, 2016 WL 9131961, at *4 (C.D. Cal. Aug. 4, 2016)* ("A website domain is property which may be converted."); *Salonclick LLC v. SuperEgo Mgmt. LLC, 2017 U.S. Dist. LEXIS 6871, 2017 WL 239379, at *4 (S.D.N.Y. Jan. 18, 2017)* (holding that plaintiff had stated a claim for conversion of domain name and social media accounts under New York law).

Plaintiffs have property rights to their websites for the same reasons a registrant has property rights to a domain name. The owner of an Internet website "has the right to establish the extent to (and the conditions under) which members of the public will be allowed access to information, services and/or applications which are available on the website." *U.S. v. Drew, 259 F.R.D. 449, 461 (C.D. Cal. 2009)* (citing *U.S. v. Phillips, 477 F.3d 215, 219-21 (5th Cir. 2007)*; *EF Cultural Travel BV v.Zefer Corp., 318 F.3d 58, 62 (1st Cir. 2003)*; *Register.com, Inc. v. Verio, Inc., 126 F. Supp. 2d 238, 245-46 (S.D.N.Y. 2000)*; and *CompuServe Inc. v. Cyber Promotions, Inc., 962 F. Supp. 1015, 1023-24 (S.D. Ohio 1997)*). Plaintiffs contend that website ownership grants them a right to be paid for the advertising space occupied by Google on their websites. And like a domain name, a website is a form of intangible property that has a connection to an electronic document. "A website is a digital document built with software and housed on a computer called **[*14]** a 'web server,' which is owned or controlled in part by the website's owner. A website occupies physical space on the web server, which can host many other documents as well." Compl. ¶ 34. Plaintiffs' website is also connected to the DNS through its domain name, bestcarpetvalue.com, just as Kremen's domain name was connected to the DNS. Under the *Kremen* court's reasoning, Plaintiffs' website has a connection to a tangible object, which satisfies the *Restatement*'s merger requirement.[6] Therefore, consistent with *Kremen*,

---

[5] The *Kremen* court observed that "courts routinely apply the tort to intangibles without inquiring whether they are merged in a document and, while it's often possible to dream up *some* document the intangible is connected to in some fashion, it's seldom one that represents the owner's property interest." *Kremen, 337 F.3d at 1033*.

[6] After *Kremen*, the California Court of Appeal, Sixth Appellate District, noted that conversion traditionally required a taking of *tangible* property and that "this restriction has been greatly eroded," but not "destroyed." *Silvaco Data Sys. v. Intel Corp., 184*

trespass to chattels ought to apply to a website, and several courts have so found. *See YLD Ltd. v. Node Firm, 2016 U.S. Dist. LEXIS 182756, 2016 WL 7851414, at *2 (N.D. Cal. Aug. 17, 2016)* (applying New York and federal law and denying motion to dismiss claims for trespass to chattels and conversion that were based, in part, on an alleged disruption to the use of a website); *Combs v. Doe, 2011 U.S. Dist. LEXIS 17599, 2011 WL 738052, at *1 (N.D. Cal. Feb. 23, 2011)* (magistrate's report and recommendation granting default judgment on conversion claim based on allegations that defendant stole website and domain names by hacking into plaintiff's email); *Astroworks, Inc. v. Astroexhibit, Inc., 257 F. Supp. 2d 609, 618 (S.D.N.Y. 2003)* (sustaining claim for conversion of copyrighted website); *Ground Zero Museum Workshop v. Wilson, 813 F. Supp. 2d 678, 698 (D. Md. 2011)* (finding allegations that defendant deprived plaintiff of possession of website and damaged the chattel by inserting a redirect command support a legally **[*15]** cognizable trespass to chattels claim); *State Analysis, Inc. v. Am. Fin. Servs. Assoc., 621 F. Supp. 2d 309, 320 (E.D. Va. 2009)* (sustaining trespass to chattels claim where defendant accessed a password protect portion of plaintiff's website and thereby diminished the value of plaintiff's "possessory interest in its computer network"). Google points to only one case in the Ninth Circuit where the court rejected a claim for trespass to chattels involving intangible property. *See e.g., GNI Waterman LLC v. A/M Valve Co. LLC, 2007 U.S. Dist. LEXIS 68715, 2007 WL 2669503, at *11 (E.D. Cal. Sept. 7, 2007)* (dismissing trespass to chattels claim that was based on intangible ownership rights of forms, designs and patterns). The *Waterman* case, however, is not helpful because it lacks any analysis.[7]

Having concluded that a website is a form of intangible property subject to the tort of trespass to chattels, the next issue is whether Plaintiffs have alleged an injury. *Hamidi, 30 Cal. 4th at 1348* ("the trespass to chattels tort . . . may not, in California, be proved without evidence of an injury to the plaintiff's personal property or legal interest therein"). "In modern American law generally, '[t]respass remains as an occasional remedy for minor interferences, resulting in some damage, but not sufficiently serious or sufficiently important to amount to the greater **[*16]** tort' of conversion." *Id. at 1351* (quoting Prosser & Keeton, Torts, supra, § 15, p. 90, italics added.). "Therefore, one who intentionally intermeddles with another's chattel is subject to liability only if his intermeddling is harmful to the possessor's materially valuable interest in the physical condition, quality, or value of the chattel, or if the possessor is deprived of the use of the chattel for a substantial time, or some other legally protected interest of the possessor is affected." *Id.*; *see also Grace v. Apple, Inc., 2019 U.S. Dist. LEXIS 143899, 2019 WL 3944988, at *7 (N.D. Cal. Aug. 21, 2019)* (same). In *Hamidi*, Intel filed suit again a former employee, claiming that by communicating with employees over the company's e-mail system, Hamidi committed trespass to chattels. *Id. at 1346-47*. The California Supreme Court concluded that Intel was not entitled to summary judgment on its trespass to chattels claim because Intel had not presented undisputed facts demonstrating that the emails caused any "physical *or* functional harm *or* disruption" to the company's computer system. *Id. at 1360* (emphasis added).

Cal. App. 4th 210, 239 n.21, 109 Cal. Rptr. 3d 27 (2010) (emphasis in original). The *Silvaco* court also cautioned that "the expansion of conversion law to reach intangible property should not be permitted to 'displace other, more suitable law.'" *Id.* As discussed above, however, Plaintiffs' websites have a connection to a tangible object.

[7] In ***Gary Friedrich Enters., LLC v. Marvel Enters., 713 F. Supp. 2d 215 (S.D.N.Y. 2010)***, the court held that the claim for trespass to chattels under Illinois and New York law failed because (1) defendant never assumed "physical control" over plaintiff's story idea and characters and (2) the claim was preempted by federal copyright law. Other cases cited by Google do not discuss the distinction between tangible and intangible property and offer little guidance. *See e.g., Level 3 Commc'ns, Inc. v. Lidco Imperial Valley, Inc., 2012 U.S. Dist. LEXIS 146887, 2012 WL 4848929, at *4 (S.D. Cal. Oct. 11, 2012)* (explaining that trespass to chattels requires "intentionally bringing about a physical contact with the chattel"); *In re L.T., 103 Cal. App. 4th 262, 265, 126 Cal. Rptr. 2d 778 (2002)* (explaining that for arson, "chattels" are things that are "visible, tangible, movable"); *Italiani v. Metro-Goldwyn-Mayer Corp., 45 Cal. App. 2d 464, 467, 114 P.2d 370 (1941)* (explaining that trover, detinue and replevin require "interference with possession of, or damage to, some specific tangible property, and are not concerned with intangible or incorporeal rights which may exist in connection with, or entirely apart from any particular piece of physical property"); *In re iPhone Application Litig., 844 F. Supp. 2d 1040, 1069 (N.D. Cal. 2012)* (dismissing trespass claim because although placement of data on Iphones may have caused "harm" by taking up bandwidth, storage space, or shortening the battery life of a device, plaintiffs did not plausibly establish a significant reduction in service constituting an "interference with the intended functioning of the system, as by *significantly reducing* its available memory and processing power") (citation omitted); *Angelica Textile Servs., Inc. v. Park, 220 Cal. App. 4th 495, 508, 163 Cal. Rptr. 3d 192 (2013)* (conversion claim asserted against an employee who retained plaintiff's documents was not displaced by California's Uniform Trade Secrets Act).

Here, although Plaintiffs are not alleging physical harm to their websites, they do allege functional harm or disruption. Specifically, Plaintiffs allege that "[b]y obscuring and blocking the contents of [Plaintiffs'] **[*17]** website homepages when viewed on Android's Search App, Google's ads substantially interfered with and impaired the websites' published output and exposed the website owners to unwanted risks of lost advertising revenues and lost sales to competitors, thereby materially reducing the websites' value and utility to the website owners. Defendant's unauthorized interferences proximately caused Plaintiffs . . . actual damage by impairing the condition, quality and value of their websites." *Id.* ¶ 186. Plaintiffs seek damages equal to the diminished market value of their websites and a permanent injunction requiring Google to disable the ad-generating feature of its Search App on every Android phone on which it is installed and preventing Google from installing any similar feature in the future. *Id.* ¶¶ 187-90.

Google argues that there is no cognizable injury because its Search App does not affect how Plaintiffs' websites function or how they are displayed by other programs. Mot. at 2. Google explains that its Search App does not alter Plaintiffs' websites at all, but rather "displays additional content in a separate, user-controlled frame that overlays and coexists on phone screens with Plaintiffs' **[*18]** sites." Mot. at 7 (citing Compl. ¶¶ 73-74). But at the pleading stage, Plaintiffs' factual allegations must be taken as true. *Ashcroft, 556 U.S. at 678*. Plaintiffs allege that the ads obscured and blocked their websites, which if true, would interfere with and impair their websites' published output. Google's ad allegedly obscured the "Cove Base" product link on Best Carpet's home page. Compl. ¶ 73. Although Google's ad may not have disabled or deactivated the "Cove Base" product link, it nevertheless allegedly impaired the functionality of the website: an Android phone user cannot engage a link that cannot be seen. At the pleading stage, the alleged decrease in functionality of Plaintiffs' website is sufficient to plausibly state a cognizable injury for a trespass to chattels claim. *See Compuserve Inc. v. Cyber Promotions, 962 F. Supp. 1015, 1026 (S.D. Ohio 1997)* (plaintiff asserting injury aside from physical impact on computer equipment stated cognizable trespass to chattels claim based on decreased utility of plaintiff's e-mail service and resulting customer complaints); *eBay, Inc. v. Bidder's Edge, Inc., 100 F. Supp. 2d 1058, 1070 (N.D. Cal. 2000)* (granting injunction based on likelihood of success on merits of trespass to chattels claim based, in part, on showing that web crawlers diminished the quality or value of eBay's computer system, even though eBay **[*19]** did not claim physical damage).

B. Implied Contract/Unjust Enrichment Claim

Plaintiffs also assert a claim labeled "Implied Contract/Unjust Enrichment." Compl. ¶¶ 176-182. Google contends that the Implied Contract/Unjust Enrichment claim should be dismissed because it is preempted by *section 301* of the Copyright Act. Google reasons that Plaintiffs' demand to be paid inevitably depends on their ability to control how copies of their websites are displayed on different users' devices, and any right to control the way the websites appear must be grounded in the principles of copyright law.

Copyright preemption applies to claims that are "asserted to prevent nothing more than the reproduction, performance, distribution, or display of" the plaintiff's copyrightable property. *Butler v. Target Corp., 323 F. Supp. 2d 1052, 1056 (C.D. Cal. 2004)* (citation and internal quotation marks omitted). *Section 301* of the Copyright Act preempts a state law claim when two conditions are satisfied: (1) the work involved falls within the general subject matter of the *Copyright Act* as specified by *sections 102* and *103*; and (2) the rights that the plaintiff asserts under state law are equivalent to those protected by the Act in *section 106* in works of authorship that are fixed in a tangible medium of expression. *Kodadek v. MTV Networks, Inc., 152 F.3d 1209, 1213 (9th Cir. 1998)*. Here, **[*20]** the first condition is satisfied because websites and the manner in which they are displayed fall within the subject matter of copyright. *See Ticketmaster LLC v. Prestige Entm't W., Inc., 315 F. Supp. 3d 1147, 1160-61 (C.D. Cal. 2018)* ("the typical commercial website readily qualifies for copyright protection."); *Bangkok Broad. & TV Co. v. IPTV Corp., 742 F. Supp. 2d 1101, 1110 (C.D. Cal. 2010)* (copyright protects website owners'"exclusive rights to copy, distribute or display the copyrighted work publicly").

Plaintiffs rely on *Downing v. Abercrombie & Fitch, 265 F.3d 994, 1004 (9th Cir. 2001)*, which sets forth a slightly different formulation of the test for preemption. Plaintiffs argue that Google's ads (and not the websites) are the subject matter of their claim, and because they do not assert any copyright in Google's ads, their claim is not preempted. In *Downey*, the Ninth Circuit stated that the two conditions that must be satisfied for copyright preemption are: (1) "the content of the protected right must fall within the subject matter of copyright" and (2) "the right asserted under state law must be equivalent to the exclusive rights contained in *section 106* of the Copyright Act." *Id.* The plaintiffs in *Downing* brought suit against defendant because it published a photograph of them without their authorization. The Ninth Circuit held that the first condition was not satisfied because "the subject matter of [plaintiffs'] statutory **[*21]** and common law right of publicity claims [was] their names and likenesses," which were not copyrightable, even though their names and likeness were embodied in a copyrightable photograph. *Id. at 1005*. Here, the "subject matter" of Plaintiffs' claim necessarily concerns both Plaintiffs' websites and the advertisements. Plaintiffs allege that it is the placement of the ads "on top" of their websites that give rise to their right to damages. Compl. ¶¶ 17, 73. As stated previously, websites fall within the subject matter of copyright. Therefore, the first part of the preemption test is satisfied.

Turning to the second condition, the Second Circuit has instructed that *section 301* preemption "only applies to those state law rights that 'may be abridged by an act which, in and of itself, would infringe one of the exclusive rights' provided by federal copyright law.'" *Comput. Assocs. Int'l, Inc v. Altai, Inc., 982 F.2d 693, 716 (2d Cir. 1992)* (citing *Harper & Row, Publishers, Inc. v. Nation Enters., 723 F.2d 195, 200 (2d Cir. 1983)*, *rev'd on other grounds*, *471 U.S. 539, 105 S. Ct. 2218, 85 L. Ed. 2d 588 (1985)*). In other words, copyright preemption applies to claims that are "asserted to prevent nothing more than the reproduction, performance, distribution, or display of" a plaintiff's copyrightable property. *Butler v. Target Corp., 323 F. Supp. 2d 1052, 1056 (C.D. Cal. 2004)* (citation and internal quotation marks omitted). If the state law claim requires an extra element "instead of **[*22]** or in addition to the acts of reproduction, performance, distribution or display . . . , then the right does not lie 'within the general scope of copyright' and there is no preemption." *Nat'l Car Rental Sys. v. Comput. Assocs. Int'l, 991 F.2d 426, 431 (8th Cir. 1993)* (quoting 1 Nimmer on Copyright § 1.01[B], at 1-13)). To avoid preemption, the state law claim must include "an 'extra element' that makes the right asserted *qualitatively different* from those protected under the Copyright Act" and "must effectively change the nature of the action so that it is qualitatively different from a copyright infringement claim." *Media.net Adver. FZ-LLC v. NetSeer, Inc., 156 F. Supp. 3d 1052, 1069-70 (N.D. Cal. 2016)* (state law claims predicated on alleged copying of "source code, design and look and feel" of search results page were preempted).

Here, Plaintiffs are not asserting infringement of any right to the reproduction, performance, distribution, or display of their websites.[8] Plaintiffs want and expect Google to copy and display their websites in Chrome browser and Search App, and acknowledge that Google has license to do so. Opp'n at 6. Rather, Plaintiffs' implied-in-law contract/unjust enrichment claim is a state claim with extra elements "instead of or in addition to" the acts giving rise to a copyright infringement claim. *Nat'l Car Rental Sys., 991 F.2d at 431*. An implied-in-law contract **[*23]** claim "is a common law obligation implied by law based on the equities of a particular case." *Fed. Deposit Ins. Corp. v. Dintino, 167 Cal. App. 4th 333, 346-47, 84 Cal. Rptr. 3d 38 (2008)*; *see also* *Parino v. Bidrack, Inc., 838 F. Supp. 2d 900, 908 (N.D. Cal. 2011)* ("a claim for unjust enrichment/restitution is properly pled as a claim for a contract implied-in-law"). A party may be required to make restitution under an implied-in-law contract if that party is unjustly enriched at the expense of another. *Id. at 346*. "Unjust enrichment claims are not categorically preempted by the Copyright Act." *Martin v. Walt Disney Internet Grp., 2010 U.S. Dist. LEXIS 65036, 2010 WL 2634695, at *7 (S.D. Cal. 2010)*.

Plaintiffs allege that Google "unjustly enriched itself by saving substantial advertising costs and earning undue profits at Plaintiffs' expense . . ., and it did so through the coercive act of superimposing advertisements on their websites' homepages and other landing pages without obtaining their consent or paying them compensation." Compl. ¶ 178. Plaintiffs allege that this unjust enrichment "gives rise to an implied-in-law obligation and contract with Plaintiffs . . . requiring Defendant (i) to restore them to their original positions by making restitution to them

---

[8] As such, this case is distinguishable from the cases cited by Google in which the plaintiff asserted claims of copyright infringement. *See* *1-800 Contacts, Inc. v. WhenU.com, 309 F. Supp. 2d 467, 479 (S.D.N.Y. 2003)*; *Wells Fargo & Co. v. WhenU.com, Inc., 293 F. Supp. 2d 734, 738 (E.D. Mich. 2003)*; and *U-Haul Int'l, Inc. v. WhenU.com, Inc., 279 F. Supp. 2d 723, 724 (E.D. Va. 2003)* (rejecting copyright infringement claim, but dismissing unjust enrichment claim without prejudice).

equal to the full value of the cost savings benefits that Defendant unjustly obtained, and (ii) to disgorge and pay to them Defendant's undue profits gained from its ads." *Id.* Plaintiffs **[*24]** do not rely on copyright protection for their websites in pleading their claim; Plaintiffs do not allege that Google "improperly benefited from using a certain work." *Firoozye v. Earthlink Network, 153 F. Supp. 2d 1115, 1123-24 (N.D. Cal. 2001)*.[9] Instead, Google allegedly covered up or obscured a portion of Plaintiffs' websites from Android phone users for financial benefit, which makes their claim "qualitatively different" from a copyright claim.

Indeed, the content of Plaintiffs' websites and whether that content enjoys copyright protection are irrelevant to Plaintiffs' claim. Plaintiffs analogize their claim to that of a store owner, asserting:

> Google could not in the brick-and-mortar marketplace lawfully plant its logo on Plaintiffs' storefront windows without Plaintiffs' consent, even if Google owned their buildings. Nor could Google place ads in Plaintiffs' marketing brochures or superimpose ads on top of Plaintiffs' print advertisements without Plaintiffs' permission and without paying Plaintiffs' price. Likewise, Google cannot in the online marketplace unilaterally superimpose ads on Plaintiffs' website without Plaintiffs' consent and without compensation just because Google makes the software through which Android users view that website on their **[*25]** mobile screens.

Compl. ¶ 17. According to Plaintiffs, a storefront business owner is injured when its window is obscured, regardless of whether that window is clear or covered with advertisements. By analogy, a website owner is injured when its website is obscured by unwanted ads, regardless of the content displayed in the website.

From Google's perspective, the subject matter of Plaintiffs' websites is surely significant. The leaderboard pop-up button Google superimposed on the Best Carpet website homepage led to ads for alternative products of potential interest to the Android phone user: "Commercial Carpet Tiles" and "Commercial Carpet Tiles & Resilient Flooring." Compl. ¶ 74. Google no doubt placed carpet ads on Best Carpet's website to lure business and make profit. But from Plaintiffs' perspective, the content of their websites is not germane to their claims. What matters for purposes of Plaintiffs' claim is that their websites are potential revenue-generating advertising space, and not that they display copyrightable content.

Under Plaintiffs' theory, a Google ad obscuring a website with trivial or no content at all could support a claim for implied contract/unjust enrichment. **[*26]** Hypothetically, a website could consist of nothing more than a single line of noncopyrightable text such as "Pat and Jo's Wedding."[10] If this hypothetical noncopyrightable website was overlaid with ads for wedding attire and tableware, an argument could be made that the advertiser was unjustly enriched at the expense of the wedding planners. "California law recognizes a right to disgorgement of profits resulting from unjust enrichment, even where an individual has not suffered a corresponding loss." *In re Facebook, Inc. Internet Tracking Litig., 956 F.3d 589, 599 (9th Cir. 2020)*. Plaintiffs' claim to recover advertising fees is not preempted. *See* *In re De Laurentiis Entm't Grp., Inc., 963 F.2d 1269, 1271-72 (9th Cir. 1992)* (copyright preemption not implicated as defense against implied-in-law contract claim to recover "the reasonable value of the advertising [plaintiff] had provided for [defendant's] benefit and for which it had not been paid").

C. *Section 17200* Claim

---

[9] As such, this suit is distinguishable from cases relied on by Google. *See* *Identity Arts v. Best Buy Enter. Servs., Inc., 2007 U.S. Dist. LEXIS 32060, 2007 WL 1149155, at *20 (N.D. Cal. Apr. 18, 2007)* (preemption applied to unjust enrichment claim that was based on wrongful creation and use of derivative works of a movie trailer); *Design Data Corp. v. Unigate Enter., 2013 U.S. Dist. LEXIS 12060, 2013 WL360542, at *7 (N.D. Cal. Jan. 29, 2013)* (preemption applied to implied contract claim that was based on unauthorized use of copyrighted structural steel detailing software); *Santos v. Telmundo Commc'ns Grp. LLC, 2012 U.S. Dist. LEXIS 189524, 2012 WL 9503003, at *8 (C.D. Cal. Dec. 19, 2012)* (unjust enrichment claim based on same facts and same rights as copyright claim, i.e. alleged broadcasting of songs without permission, was preempted).

[10] Copyrights extend to "original works of authorship fixed in any tangible medium of expression," such as literary, musical, graphic, architectural works and sound recordings. *17 U.S.C. § 102(a)*.

Plaintiffs allege the Android Search App violates *Section 17200* of California's Unfair Competition Law ("UCL"), which prohibits business practices that are "unlawful, unfair, or fraudulent." *Cal. Bus & Prof Code § 17200*. Plaintiffs bring their claim under only the first two prongs: unlawful and unfair. Compl. ¶ 194. As to the unlawful business practices prong, Plaintiffs allege that "Defendant plac[ed] nonconsensual advertisements **[*27]** on Plaintiffs' . . . websites without compensation in violation of the common law doctrines of implied-in-law contract and unjust enrichment, and by trespassing on Plaintiffs' . . . websites in violation of the common law prohibition against trespass to chattels." Compl. ¶ 195. As to the unfair business practices prong, Plaintiffs allege that Google's conduct is "immoral, unethical, oppressive, unscrupulous, unconscionable and substantially injurious to Plaintiffs." *Id.* ¶ 196. Plaintiffs also allege that Google's conduct is contrary to public policy as well as the common law, and the harm it caused (and threatens to continue to cause) outweighs its utility, if any. *Id.*

1. Unlawful Prong

The unlawful prong of the UCL prohibits "anything that can properly be called a business practice and that at the same time is forbidden by law." *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal.4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)* (quotation markets and citations omitted). Plaintiffs' UCL claim, as pled under the unlawful prong, survives because the trespass to chattels and the breach of implied contract/unjust enrichment may serve as the predicate for the claim.

2. Unfair Prong

There are two standards for determining what "unfair competition" is under the UCL, and the parties disagree **[*28]** on the applicable standard. Defendants argue that Plaintiffs' claim is essentially one "between competitors," and therefore the applicable standard is whether the conduct complained of threatens "an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech, 20 Cal.4th at 187*. Plaintiffs rely on the second standard, which is applicable to claims brought by a consumer and "involves balancing the harm to the consumer against the utility of the defendant's practice." *Lozano v. AT & T Wireless Servs., Inc., 504 F.3d 718, 735 (9th Cir. 2007)*. Plaintiffs characterize themselves as "consumers of Google's services giving the public access to their websites (which they did not have to pay for because the service is free)." Opp'n at 19.

Google has the better argument. Plaintiffs are not consumers of the product that has caused the alleged injury, the Google Search App.[11] In the context of this case, the consumers are Android phone users who search the Internet for content. Therefore, the *Cel-Tech* standard applies. Because Plaintiffs effectively concede they cannot meet the *Cel-Tech* standard, the UCL claim, as pled **[*29]** under the unfair prong, is dismissed.

D. *First Amendment* Defense

Finally, Google argues that the *First Amendment* prohibits Plaintiffs' attempts to control what information is displayed to users when they access Plaintiffs' websites. Mot. at 12. In response, Plaintiffs contend that their *First Amendment* rights as website publishers are paramount and that Google has no right to force its own messages onto Plaintiffs' websites.

The *First Amendment* states that "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press." *U.S. Const. amend. I*.

---

[11] California's Consumer Legal Remedies Act defines a consumer as "an individual who seeks or acquires, by purchase or lease, any goods or services for personal, family, or household purposes." *Cal. Civ. Code § 1761*; *see also* *Cal. Civ. Code § 1791* ("consumer goods" are products "used, bought, or leased for use primarily for personal, family, or household purposes").

"[T]he *First Amendment* guarantees 'freedom of speech,' a term necessarily comprising the decision of both what to say and what not to say." *Riley v. National Federation of Blind, Inc., 487 U.S. 781, 796-97, 108 S. Ct. 2667, 101 L. Ed. 2d 669 (1988)*. The *Free Speech Clause of the First Amendment* "can serve as a defense in state tort suits." *Snyder v. Phelps, 562 U.S. 443, 451, 131 S. Ct. 1207, 179 L. Ed. 2d 172 (2011)* (citing *Hustler Magazine, Inc. v. Falwell, 485 U.S. 46, 50-51, 108 S. Ct. 876, 99 L. Ed. 2d 41 (1988)*). In the context of the Internet, courts have recognized that search-engine results may constitute speech protected by the *First Amendment*. *See* *E-Ventures Worldwide, LLC v. Google, Inc., 188 F. Supp. 3d, 1265, 1274 (2016)* (search engine output results are protected by the *First Amendment*); *Zhang v. Baidu.Com, Inc., 10 F. Supp. 3d 433, 439 (S.D.N.Y. 2014)* ("When search engines select and arrange others' materials, and add the all-important ordering that causes some materials to be displayed first and others last, they are engaging in fully protected *First Amendment* expression."); *Search King, Inc. v. Google Tech., Inc., 2003 U.S. Dist. LEXIS 27193, 2003 WL 21464568, at *4 (W.D. Okla. May 27, 2003)* (Google's PageRank system was "entitled **[*30]** to full constitutional protection"). Thus, a company such as Google cannot be compelled to place ads in "prominent places" on its search engine results. *Langdon v. Google, Inc., 474 F. Supp. 2d 622, 629 (D. Del. 2007)* ("Defendants are correct in their position that the injunctive relief sought by Plaintiff contravenes Defendants' *First Amendment* rights.").

Here, Plaintiffs are not challenging Google's search engine results. Rather, Plaintiffs complain that after users see Google's search results and then choose to link to their proprietary websites, the users see unpaid-for Google ads on their webpages that entice and redirect those users to Best Carpet's competitors' or naysayers' websites in order to generate profits for Google. Compl. ¶¶ 71-88. Therefore, the cases cited above are inapposite.

Furthermore, the *First Amendment* defense is not absolute. *Downing, 265 F.3d at 1001*. For example, the *First Amendment* does not immunize deceptive advertising. *Id. at 1002* (holding that defendant's commercial use of photographs to promote clothing "does not contribute significantly to a matter of the public interest and that Abercrombie cannot avail itself of the *First Amendment*"). Here, Plaintiffs allege that Google's leaderboard and banner ads are commercial speech that misleadingly imply that they endorse Google's ads or were compensated by Google **[*31]** for placing the ads. Compl. ¶¶ 75, 85. Therefore, if Plaintiffs prevail in this suit, Google can be enjoined from tethering similar ads to Plaintiffs' websites in the future. *See* *Zauderer v. Office of Disciplinary Counsel of Supreme Court, 471 U.S. 626, 637-38, 105 S. Ct. 2265, 85 L. Ed. 2d 652, 17 Ohio B. 315 (1985)* (advertising is a form of commercial speech and can be enjoined if false, deceptive or misleading); *Compuserve Inc. v. Cyber Promotions, 962 F. Supp. 1015, 1026 (S.D. Ohio 1997)* (holding that the *First Amendment* provides no defense for intentional bulk emailing to plaintiff's subscribers).

Relatedly, Google argues that Android users' have a "right to hear"—the right to receive information—that is "no less protected by the *First Amendment* than [Google's] right to speak. *Conant v. Walters, 309 F.3d 629, 643 (9th Cir. 2002)*. However, this right is "a necessary predicate to the *recipient's* meaningful exercise of his own rights of speech, press, and political freedom." *Bd. of Educ., Island Tress Union Free School Dist. v. Pico, 457 U.S. 853, 867, 102 S. Ct. 2799, 73 L. Ed. 2d 435 (1982)*. Here, it is the Android users who are the recipients of the advertising, not Google. The "right to hear" does not provide Google a defense against Plaintiffs' claims.[12]

IV. CONCLUSION

For the reasons stated above, Google's motion to dismiss is GRANTED as to the UCL claim under the unfair prong and DENIED in all other respects. The UCL claim under the unfair prong is dismissed without leave to amend.

IT IS SO ORDERED.

---

[12] The other cases relied upon by Google are inapplicable here. *See* *Stanley v. Georgia, 394 U.S. 557, 564, 89 S. Ct. 1243, 22 L. Ed. 2d 542 (1969)* (holding that *First* and *Fourteenth Amendments* prohibit making private possession of obscene material a crime); *Citizens United v. FEC, 558 U.S. 310, 339, 130 S. Ct. 876, 175 L. Ed. 2d 753 (2010)* (federal statute barring independent corporate expenditures for electioneering communications violated *First Amendment*).

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 8 requires a short and plain statement of the claim showing the pleader is entitled to relief. A complaint is not required to contain detailed factual allegations, however, a plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action. To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. Plausibility does not equate to possibility or probability; it lies somewhere in between. This plausibility requirement asks for more than a sheer possibility that a defendant has acted unlawfully. However, the complaint cannot be simply unadorned, the-defendant-unlawfully-harmed-me accusations. Plausibility simply calls for enough factual allegations to raise a reasonable expectation that discovery will reveal evidence to support the elements of the claim.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Inferences & Presumptions > Inferences

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

In order to survive a *Fed. R. Civ. P. 12(b)(6)* motion, the complaint must contain either direct allegations on every material point necessary to sustain a recovery or contain allegations from which an inference fairly may be drawn that evidence on these material points will be introduced at trial. Moreover, a statement of facts that merely creates a suspicion that the pleader might have a right of action is insufficient. Dismissal is proper if the complaint lacks an allegation regarding a required element necessary to obtain relief. The court is not required to conjure up unpled allegations or construe elaborately arcane scripts to save a complaint. Further, conclusory allegations or legal conclusions masquerading as factual conclusions will not suffice to prevent a motion to dismiss.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Motions to Dismiss, Failure to State Claim**

Although courts generally are not permitted to review materials outside of the pleadings when determining whether a plaintiff has stated a claim for which relief may be granted, there are limited exceptions to this rule. Specifically, a court may consider documents attached to a *Fed. R. Civ. P. 12(b)(6)* motion to be part of the pleadings if the plaintiff refers to those documents and they are central to the claim. Additionally, pleadings filed in state or other federal district courts are matters of public record and the Court may take judicial notice of those documents in connection with a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN4[] **Sherman Act, Claims**

Antitrust injury is necessary for a plaintiff to pursue either a *15 U.S.C.S. § 1* or *15 U.S.C.S. § 2* claim under the Sherman Act. Antitrust injury is a component of antitrust standing. Antitrust standing, in turn, is a judicially-created set of threshold requirements that a private plaintiff must show before a court can entertain its antitrust claims. The three antitrust standing requirements are 1) injury-in-fact, i.e., an injury to the plaintiff proximately caused by the defendants' conduct; 2) antitrust injury; and 3) proper plaintiff status, which assures that other parties are not better situated to bring suit. These requirements, which supplement U.S. Const. art. III standing requirements, ensure that successful antitrust claims only redress the types of harm that ***antitrust law*** was designed to prevent, rather than create a fortuitous windfall for all parties proximate to the defendant, regardless of whether they were injured by anticompetitive conduct.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN5[] **Sherman Act, Claims**

The second component of antitrust standing, antitrust injury, requires that a plaintiff's injury is of the type the antitrust laws were intended to prevent and flows from that which makes defendants' acts unlawful. This means that in an antitrust suit, but-for causation is insufficient. Instead, a plaintiff must be able to trace its injury to the anticompetitive effects of the defendant's antitrust violation. Thus, an inquiry into antitrust injury always asks whether there is a causal connection between the alleged injury of the plaintiff and the anticipated anticompetitive effect of the specific practice that allegedly violates ***antitrust law***. A court can ascertain antitrust injury only by identifying the anticipated anticompetitive effect of the specific practice at issue and comparing it to the actual injury the plaintiff alleges.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN6[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

15 U.S.C.S. § 1 prohibits any contract, combination, or conspiracy that unreasonably restrains trade. Over a century of Supreme Court interpretation of *§ 1* has distilled its expansive definition into a number of well-recognized causes of action, such as vertical and horizontal price fixing, tying agreements, and exclusive dealing agreements.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN7[] **Sherman Act, Claims**

There are three elements of a *15 U.S.C.S. § 1* claim: (1) a conspiracy; (2) that restrained trade; (3) in the relevant market. Antitrust claims do not necessitate a higher pleading standard and a plaintiff need only plead enough facts to state a claim to relief that is plausible on its face.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN8[] **Sherman Act, Claims**

In the context of a *15 U.S.C.S. § 1* claim, the rule of reason analysis also requires that the plaintiff show that the defendants' activities injured competition. The rule of reason is designed to help courts differentiate between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest. Regardless of which rule applies, the court's inquiry should ultimately focus upon forming a judgment about the competitive significance of the restraint.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN9[] Sherman Act, Claims

Section 1 of the Sherman Act, 15 U.S.C.S. § 1, does not proscribe independent conduct. Thus, a *§ 1* violation requires concerted action. To be sure, the crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, tacit or express. To satisfy this inquiry, plaintiff must show that defendant engaged in concerted action, defined as having a conscious commitment to a common scheme designed to achieve an unlawful objective. Under Twombly, to successfully plead a *§ 1* claim, the complaint must assert sufficient facts to suggest an agreement was made; that is, enough factual matter to raise a reasonable expectation that discovery will reveal evidence of illegal agreement. Parallel business behavior, i.e., parallelism, does not constitute a conspiracy, nor does a conclusory allegation of agreement at some unidentified point supply facts adequate to show illegality. A plaintiff's allegations must plausibly suggest the unlawful agreement, not simply be consistent with an agreement. Without context showing a meeting of the minds, the defendant's conduct remains in neutral territory.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN10[] Complaints, Requirements for Complaint

The court must disregard a complaint's conclusory and formulaic assertions, as those are not entitled to a presumption of truth. The remaining allegations must then be examined to determine whether they plausibly suggest entitlement to relief.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN11[] Sherman Act, Claims

In the context of a *15 U.S.C.S. § 1* claim, a bare allegation of conspiracy and a conclusory allegation of agreement at some unidentified point are insufficient to plead illegal antitrust activity. Not only does the naked allegation of a conspiracy, without additional facts, not state a plausible antitrust claim, such conclusory allegations are not entitled to be accepted as true for the purposes of a motion to dismiss.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN12[] Complaints, Requirements for Complaint

A complaint can be long-winded, even prolix, without pleading with particularity.

Antitrust & Trade Law > Sherman Act > Claims

HN13[] Sherman Act, Claims

Resisting competition is routine market conduct. When examining a 15 U.S.C.S. § 1 claim, circumstances must reveal a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement. Thus, the court must determine whether there is concerted action, and if so, whether that concerted action was the result of a meeting of the minds to agree to restrain competition. The pivotal question is whether the concerted action was a result of an agreement to unreasonably restrain trade.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN14[] Private Actions, Sherman Act

In the context of conspiracy allegations in a 15 U.S.C.S. § 1 claim, plaintiff is required to allege the general contours of when an agreement was made, supporting those allegations with a context that tends to make said agreement plausible. There must be an agreement to a scheme and an agreement to work together to further a common goal.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN15[] Civil Conspiracy, Elements

An overt act is an act taken in furtherance of a conspiracy only so long as there is, in fact, a conspiracy in existence; otherwise, the act is just an act. Broad brushes and generalized theories of long-standing coercion cannot withstand Fed. R. Civ. P. 12(b)(6) scrutiny.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN16[] Private Actions, Sherman Act

In the context of conspiracy allegations in a 15 U.S.C.S. § 1 claim, there must be a meeting of the minds. The U.S. Supreme Court has defined that as something more than mere acquiescence. The downstream entity is free to acquiesce in the demand in order to avoid termination. A conspiracy requires more than a showing that the distributor conformed. It means as well that evidence must be presented both that the distributor communicated its acquiescence or agreement, and that this was sought by the manufacturer.

Antitrust & Trade Law > Sherman Act > Claims

HN17[] Sherman Act, Claims

In the context of conspiracy allegations in a 15 U.S.C.S. § 1 claim, plaintiff is required to sufficiently plead an agreement, a meeting of the minds. Absent any agreement, there is no § 1 claim, because an anticompetitive agreement is the sine qua non of a § 1 violation.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Evidence > Inferences & Presumptions > Inferences

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN18[] **Private Actions, Sherman Act**

In the context of conspiracy allegations in a *15 U.S.C.S. § 1* claim, a plaintiff must first allege a fact from which the inferential leap can be made. An inference cannot exist without the underlying premise. In the law, these premises must take the form of nonspeculative allegations of fact. Without those, no reasonable inferences may be drawn at all. When the complaint presents various conclusory allegations that support one of many inferential possibilities, it falls short of Twombly's pleading standards.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN19[] **Actual Monopolization, Claims**

Section 2 of the Sherman Act, 15 U.S.C.S. § 2, prohibits the monopolization or attempted monopolization of any trade or commerce. *15 U.S.C.S. § 2*. In contrast to *15 U.S.C.S. § 1*, *15 U.S.C.S. § 2* covers both concerted and independent action, but only if that action monopolizes or threatens actual monopolization, a category that is narrower than restraint of trade. A defendant is liable for monopolization under *§ 2* when it (1) possesses monopoly power and (2) achieves or maintains its monopoly power through anticompetitive conduct. *15 U.S.C.S. § 2*. The monopolist must have acquired or maintained that power willfully, as distinguished from the power having arisen and continued by growth produced by the development of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN20[] **Attempts to Monopolize, Elements**

To establish *15 U.S.C.S. § 2* violations asserting monopolization, a plaintiff must define the relevant market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

HN21[] Attempts to Monopolize, Elements

For purposes of a 15 U.S.C.S. § 2 claim, the necessity of proving anticompetitive conduct, in addition to monopoly power, reflects federal courts' judgment that in the short term, the monopolist's ability to charge above-market prices invites more, rather than less, competition. The opportunity to charge monopoly prices induces risk taking that produces innovation and economic growth. Thus, while the definition of anticompetitive conduct has many accepted permutations, the essence of the conduct that it makes actionable is the achievement or maintenance of monopoly power by means other than competition on the merits. If a firm has been attempting to exclude rivals on some basis other than efficiency, it is fair to characterize its behavior as anticompetitive. To be condemned as anticompetitive under § 2, the conduct must harm the competitive process and thereby harm consumers. Proving anticompetitive conduct also generally requires some sign that the monopolist engaged in behavior that—examined without reference to its effects on competitors—is economically irrational.

Antitrust & Trade Law > Sherman Act > Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN22[] Sherman Act, Claims

For purposes of a 15 U.S.C.S. § 2 claim, under Twombly, plaintiff's complaint must plead facts that, when viewed together, make anticompetitive conduct plausible.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

HN23[] Actual Monopolization, Anticompetitive & Predatory Practices

Courts also label anticompetitive conduct exclusionary conduct, predatory conduct, and improper conduct. They use the terms predatory and exclusionary interchangeably.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN24[] Attempts to Monopolize, Elements

For purposes of a 15 U.S.C.S. § 2 claim, the key factor in the inquiry is the proffered business justification for the anticompetitive conduct. If the conduct has no rational business purpose other than its adverse effects on competitors, an inference that it is exclusionary is supported. Nonetheless, not all unfair conduct—even by a monopolist and a fortiori by one who is not—fits within the prohibition of § 2. Conduct must not only be inconsistent with competition on the merits, it must also have the potential for making a significant contribution to monopoly power. The rationality of the defendant's business decision is a significant, yet not dispositive, factor in ascertaining whether conduct is exclusionary. Courts are also to consider whether the exclusionary conduct required the active approval of the consumer or whether there was the potential existence of bribery or threats that tainted an otherwise independent business decision.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN25[] Scope, Monopolization Offenses

There is a great distinction between antitrust activity and victorious, if unrelenting, business practices. Indeed, competition, even the maintenance of monopoly, through superior business acumen is allowed under 15 U.S.C.S. § 2.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Anticompetitive & Predatory Practices

HN26[] Actual Monopolization, Anticompetitive & Predatory Practices

The distinction between unfair conduct and anticompetitive conduct is critical to maintain because the antitrust laws do not create a federal law of unfair competition or purport to afford remedies for all torts committed by or against persons engaged in interstate commerce. Even an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws.

Opinion

[*582] **MEMORANDUM RULING**

Before the Court is a motion to dismiss filed by the Defendant, Willis-Knighton Medical Center ("Willis-Knighton"). Record Document 20. Willis-Knighton seeks to dismiss the complaint filed by the Plaintiff, BRFHH Shreveport, LLC, which alleges, in broad terms, that Willis-Knighton committed antitrust violations by coercing LSU Health Shreveport to refuse to cooperate with BRFHH in the operations of its Shreveport hospital. As the Court concludes that the Plaintiff has failed to sufficiently **[*583]** allege antitrust violations in more **[**2]** than a nonspeculative manner, Willis-Knighton's motion to dismiss [Record Document 20] is **GRANTED**.

Background

The Court begins by noting that this is the second antitrust civil action filed by the Plaintiff against this Defendant, the alleged violations stemming from the same acrimonious relationship that has heretofore existed between these two parties. See BRFHH Shreveport, LLC v. Willis-Knighton Med. Ctr., 05:15-cv-2057 (W.D. La.) (the "2015 case"). The allegations in the instant case concern a more recent time period than those in the 2015 case and set forth contentions regarding different antitrust activity; nonetheless, the cases generally involve the same players competing in the same relevant market.

I. The Relevant Entities

LSU is a State university with a medical school component which employs physician faculty members throughout the State. Record Document 1 at 5. The faculty physicians treat patients, teach students, and train residents and fellows in their respective fields. Id. LSU Health Shreveport is the medical school in Shreveport, Louisiana. Id.

Plaintiff BRFHH, doing business as University Health Shreveport ("UHS"), operated University Health Hospital in Shreveport. Once **[**3]** a state-owned and -operated charity facility, the hospital was operated by BRFHH starting in September of 2013, when LSU, whose neighboring medical school traditionally supplied physicians for UHS, and the parent entities of BRFHH signed a Cooperative Endeavor Agreement transferring hospital management authority from the State of Louisiana to BRFHH's parent entity. See generally BRFHH Shreveport v. Willis-Knighton, 15-cv-2057, Record Document 121. To be discussed in more detail below, the hospital run by UHS is now run by Ochsner (named Ochsner LSU), the result of UHS's sale of its hospital business to Ochsner. Thus, the Plaintiff in this suit is no longer involved in the operations of the current hospital. But, the alleged antitrust conduct in this case preceded that sale and ceased when Ochsner acquired the hospital.

As a result of the 2013 privatization of the hospital, UHS treated a substantial portion of the Shreveport area's indigent population and was dependent upon hospital admissions from LSU physicians. See id. One of the underlying issues in the 2015 case stems from the notion that in order for UHS to remain financially viable, a critical, if minority, mass of the patients **[**4]** treated at UHS needed to have private, commercial insurance; the higher reimbursement rates associated with commercial insurance would help offset the relatively low profitability of treating the indigent. See id.

Defendant Willis-Knighton is a competing healthcare provider that operates four hospitals and several free-standing clinics in Shreveport and Bossier City. See id. Besides Willis-Knighton and UHS, a third entity, CHRISTUS Health Northern Louisiana ("Christus") also operates hospitals in the Shreveport and Bossier City area. See id. The allegations in the prior suit regard Willis-Knighton's predominate share of the commercially-insured healthcare market, as opposed to the much smaller shares held by UHS and Christus. See id. Suffice it to say that UHS and Willis-Knighton were competing healthcare providers, each trying to reduce costs while increasing efficiency and profitability.

II. Post-Privatization

From the commencement of the privatization agreement in 2013 until October of **[*584]** 2018, UHS was LSU Health Shreveport's clinical partner and its teaching hospital. Record Document 1 at 6. The UHS medical staff was limited to LSU Health Shreveport-approved physicians. Id. UHS depended **[**5]** upon admissions from those faculty physicians. Id.

When UHS took over the hospital from LSU, it took on the lease of the hospital facilities from the State, which owned the buildings on campus and the assets of the hospital. Id. at 8. UHS alleges that when it assumed those operations, the hospital was inefficient, experiencing "extraordinarily high overtime use, an absence of productivity standards and management dashboards, and lengthy wait times at clinics." Id. UHS submits that once it took over the hospital, it created a much more "effective, efficient and patient-friendly hospital." Id. UHS articulates several successful measures it experienced, which can be summarized as an increase in admissions, an increase in clinic and emergency room visits, improved earnings, and decreased expenses to the State of Louisiana. Id. at 9. According to UHS, these improvements attracted more patients to the hospital, which resulted in UHS becoming a significant competitor to Willis-Knighton. Id. at 9-10. During this period, UHS and LSU Health Shreveport worked closely together, engaging in weekly meetings, cooperating to improve operations, and enjoying open communications between the department **[**6]** chairs and UHS executives. Id. at 15. Taking UHS's allegations as true, in response to UHS's success,

> Willis-Knighton attempted to prevent UHS' competition by implementing a plan to divert LSU Health Shreveport's commercial patients from UHS to Willis-Knighton. Accordingly, UHS filed the 2015 Case. Because of the 2015 Case, Willis-Knighton put its efforts to fully implement this plan on hold. However, . . . in spring of 2016, it commenced a new scheme intended to cause harm to UHS and to keep it from improving its operations and competitiveness, by coercing LSU Health Shreveport into refusing to cooperate with UHS' new initiatives to further improve the hospital and its competitiveness. Willis-Knighton also coerced LSU into an effort to terminate the contract whereby UHS owned and operated the hospital.

Id. at 10. That contention—that Willis-Knighton unlawfully and in violation of ***antitrust law***, coerced LSU Health Shreveport into refusing to cooperate with UHS in the improved operations of the hospital—is the crux of the instant suit.

A. The Financial Crisis

Historically, Willis-Knighton was a major donor to LSU Health Shreveport; these donations predated the alleged antitrust conduct **[**7]** at the heart of this suit. The parties agree that during the relevant timeframe, LSU Health Shreveport perceived it was facing a significant financial crisis, with a "heightened need for additional funds." Id. at 14. Quite simply, LSU Health Shreveport needed an influx of a large amount of money, and it required support from outside sources, lest its school accreditation, amongst other things, be placed at risk. Id. at 22 & 26. Willis-Knighton was aware of LSU Health Shreveport's ongoing need for money, shortfalls historically caused by State budget deficits and then more recently related to the privatization of the hospital. The budget crisis allegedly made LSU Health Shreveport susceptible to the whims and demands of Willis-Knighton, the deep-pocket power player in the local healthcare market.

By 2015 and 2016, LSU Health Shreveport desperately needed millions of dollars. It was LSU Health Shreveport's need for continued funding that fueled the alleged **[*585]** antitrust conduct here. The medical school's Vice-Chancellor Victor Yick ("Yick") authored a document conceding that LSU Health Shreveport was in a financial crisis, that it experienced an "operating loss of $40-$50M per year since **[**8]** privatization of the hospital," and that the "cash reserve can run out in [fiscal year] 2016-17." Id. at 27. Consequently, LSU Health Shreveport first approached UHS and requested $100 million in "mission support." Id. UHS declined. Id. LSU Health Shreveport then turned to Willis-Knighton, asking for a $50 million "mission support" grant. Id. Yick later reported that Willis-Knighton "conceptually agreed to provide working capital" to the medical school. Id. UHS asserts this statement is evidence that "LSU Health Shreveport believed that it was acting in Willis-Knighton's interest by refusing to cooperate with . . . UHS." Id. The alleged lack of cooperation, as well as the inferences UHS draws from LSU Health Shreveport's actions, are discussed in greater detail below.

B. Dr. Ghali

In early 2016, Dr. Ghali Ghali ("Dr. Ghali") was named as interim Chancellor of LSU Health Shreveport and subsequently named the permanent Chancellor. Id. at 14 & 21. UHS insists that Willis-Knighton was instrumental in Dr. Ghali's promotion, as Dr. Ghali was otherwise unqualified for such a prominent administrative position. Id. at 21. Dr. Ghali was a senior partner in the Willis-Knighton Oral and Maxillofacial **[**9]** Surgery Institute, a member of the Willis-Knighton Physician Network, his primary clinic practice for many years was at Willis-Knighton and his income was determined in significant part by his collections, and Willis-Knighton provided Dr. Ghali's department at LSU Health Shreveport—presumably the Department of Oral and Maxillofacial Surgery—with $1 million or more annually. Id. at 20. Dr. Ghali also allegedly used Willis-Knighton's private plane on occasion. Id. Thus, UHS asserts that Dr. Ghali "received substantial benefit from working for Willis-Knighton, and at its direction." Id. "Dr. Ghali's appointment as permanent Chancellor cemented Willis-Knighton's control over LSU Health's direction." Id. at 22.

According to UHS, after Dr. Ghali assumed his new role, he acted essentially as Willis-Knighton's agent. With Dr. Ghali at the helm, LSU Health Shreveport's administration ceased its cooperation with UHS. Id. at 15. Bruce Solomon of LSU Health Shreveport required all UHS communications to go through him and also restricted LSU Health Shreveport department chairs from directly communicating with UHS. Id. The weekly meetings were cancelled. Id. And, when UHS proposed cooperative initiatives, **[**10]** LSU Health Shreveport refused to participate. Id. Its refusal, it is alleged, was entirely against its own self-interest and must, therefore, have resulted from Willis-Knighton's coercion. Id.

C. Means of Coercion

1. Allegedly Contingent Funding

UHS contends that Willis-Knighton linked its funding to LSU Health Shreveport's agreement not to cooperate with UHS. That is, Willis-Knighton "would continue to fund LSU Health Shreveport only if LSU Health Shreveport did not support its competitors." Id. at 23. According to UHS, Willis-Knighton wanted to eliminate UHS as the hospital operator, or at the very least, ensure UHS could not be competitive. Id.

As evidence, UHS cites to a time in 2012 when James Elrod ("Elrod"), the President and CEO of Willis-Knighton, told the Willis-Knighton Board that it would only continue its current level of funding to LSU Health Shreveport if the two entities **[*586]** "remain[ed] partners, not competitors." Id. at 23. Also in 2012, there was some indication that Willis-Knighton was aware that if another hospital corporation managed LSU Health Shreveport, Willis-Knighton may encounter an adversarial relationship with LSU Health Shreveport with respect to its market share. **[**11]** Id. In 2013, at a Willis-Knighton Board meeting, Elrod said that Willis-Knighton's continued support of the medical school would continue only so long as LSU Health Shreveport did not directly compete with Willis-Knighton and if Willis-Knighton could have some level of oversight. Id. In 2014, Willis-Knighton drafted a letter to its employees that said that UHS would begin "seeking to draw private patients from Willis-Knighton and Christus Highland. So the LSU hospital that once was an ally is now a competitor." Id. at 24. All of the comments above were made prior to the antitrust activity alleged in this case.

Aside from Elrod's and Willis-Knighton's direct statements about UHS and/or the medical school, UHS also contends that Willis-Knighton had a pattern of stymying LSU Health Shreveport's efforts to work with Willis-Knighton's competitors. Id. at 25. In 2015, LSU Health Shreveport's department chairs were invited to meet with UHS and Ochsner on a possible joint venture. Id. In testimony in the 2015 case, the LSU Health Shreveport Dean, Dr. Marymont, stated that Willis-Knighton told him that if he went forward with the meeting, Willis-Knighton would cease funding the medical school. **[**12]** Id. Dr. Marymont testified that "on other occasions," Willis-Knighton threatened to pull its funding from LSU Health Shreveport "if it was unhappy with LSU actions." Id. The 2015 meeting predates the antitrust activity in this case, as well; and, UHS provides no temporal context for the "other occasions" mentioned by Dr. Marymont.

In 2016, Willis-Knighton gave a PowerPoint presentation to Yick that represented it was aware of the critical funding issues faced by LSU Health Shreveport and that it was willing to increase its funding of programs and services to LSU Health Shreveport if there was "increased cooperation from leadership and the faculty." Id. at 26. Willis-Knighton also proposed a consolidation of programs and services with LSU Health Shreveport, though this never occurred. Id.

In July of 2016, Yick authored an email to the LSU President and CFO stating that LSU Health Shreveport still needed to raise $50 million in mission support. Id. at 29. He stated that Willis-Knighton "is our mother lode" and that the medical school "still [has] work to do with WK." Id. Yick's email further opined that LSU Health Shreveport's energy needed to be spent on rebuilding rather than collaborating **[**13]** with UHS and that the medical school needed to "form a sustainable long term partnership" with Willis-Knighton. Id. Yick also stated that letters of intent LSU had entered into with other hospitals, aside from Willis-Knighton, were "initially just for cover." Id. That Yick felt the need for cover is, according to UHS, proof of LSU Health Shreveport's complicity in an unlawful scheme. Id. Nonetheless, because of the 2015 case, Willis-Knighton never provided the anticipated funding to LSU Health Shreveport. Id. at 28.

Lastly, in a 2017 deposition, Elrod agreed that without Willis-Knighton, LSU Health Shreveport would have a difficult time surviving. Id. at 22.

2. Noncompliant Physicians

UHS contends that Willis-Knighton engaged in a pattern of threatening non cooperative physicians. Id. at 24. In essence, the allegation seems to be that Willis-Knighton would punish physicians who made referrals to non-Willis-Knighton facilities **[*587]** by hiring new Willis-Knighton physicians to compete with those physicians. The new physicians would receive all of the Willis-Knighton referrals, thus creating a "starvation of referrals" to the non-compliant physicians. Id. UHS claims that Elrod communicated this **[**14]** threat through the publication of his book, and as such, the entire Shreveport-Bossier healthcare community was made aware of the consequences of competing against Willis-Knighton. Id. at 25.

UHS also asserts that Dr. Ghali fired Dr. Anil Nanda ("Dr. Nanda"), the "most renowned physician at LSU Health Shreveport" because Dr. Nanda "did not admit sufficient numbers of patients at Willis-Knighton to satisfy James Elrod, and because he had always cooperated with UHS." Id. at 43-44. Elrod allegedly told Dr. Ghali that "the best thing Dr. Ghali ever did was to fire Dr. Nanda as head of the Neurosurgery Department." Id. at 45. The firing of Dr. Nanda is allegedly evidence of one form of retaliation Willis-Knighton had in its arsenal to use against non-compliant physicians.

D. Lack of Cooperation

There are myriad ways in which LSU Health Shreveport allegedly refused to cooperate with or acted to undermine UHS, including: (1) its refusal to combine fixed overhead activities to reduce costs; (2) its refusal to participate in a narrow network product with Blue Cross; (3) its refusal to improve productivity, efficiency, and quality of care in various departments; (4) its refusal to cooperate in **[**15]** recruitment of new physicians; (5) Dr. Ghali's dismissal of Dr. Jay Marion as Chair of the Department of Medicine and Dr. Nanda as the Chair of the Neurosurgery Department of LSU Health Shreveport; (6) Dr. Ghali's miscellaneous defamatory statements; and (7) LSU Health Shreveport's attempts in 2016 and 2017 to terminate UHS as the owner and operator of the hospital, which caused damage to UHS's reputation. Id. at 16-19.[1] UHS contends that LSU Health Shreveport's "conduct was inconsistent with unilateral, self-interested behavior, and can only be explained by [its] acquiescence in and agreement to Willis-Knighton's demands" because "no rational medical school would have undertaken" the actions LSU Health Shreveport did absent "coercion by Willis-Knighton." Id. at 19.

In 2018, Ochsner bought an interest in both the Shreveport and Monroe[2] hospitals and created Ochsner LSU. Id. at 48. As a result, LSU Health Shreveport received an additional $40 million annually, plus a fifty percent stake in the hospital. Id. Allegedly, LSU Health Shreveport now cooperates in initiatives with Ochsner in ways it refused to cooperate with UHS. Id. at 49. This is so, UHS asserts, because LSU Health Shreveport **[**16]** is no longer susceptible to Willis-Knighton's coercion. Id.

III. The Instant Suit

In 2020, UHS brought this suit, alleging that between 2016 and 2018, Willis-Knighton violated both *Section 1 of the Sherman Act*, which prohibits concerted activity relating to unreasonable restraints of trade, *15 U.S.C. § 1*; and *Section 2* of the Sherman Act, which prohibits monopolization and attempted monopolization, *15 U.S.C. § 2*. UHS did not name LSU Health Shreveport as a defendant in this matter.

[*588] Willis-Knighton has filed the instant motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*. It argues that there are five principal reasons to dismiss UHS's claims. First, UHS has not established antitrust injury, a threshold requirement for a plaintiff in any antitrust claim. Record Document 20-1 at 11. Second, UHS has not sufficiently alleged an agreement or conspiracy between LSU Health Shreveport and Willis-Knighton, for purposes of *Section 1* of the Sherman Act. Id. at 14. Third, UHS has not alleged the requisite anticompetitive conduct, that is exclusionary conduct, to sustain its claim under *Section 2* of the Sherman Act. Id. at 17. Fourth, the *First*

---

[1] Not all of these issues are given equal attention in UHS's complaint. Some are mentioned in passing and never discussed again. As such, the Court's analysis will follow suit and focus on the issues to which UHS has given its attention.

[2] University Hospital Conway was located in Monroe, Louisiana.

Amendment shields Willis-Knighton's actions from antitrust liability under the Noerr-Pennington Doctrine.[3] Id. at 21. And fifth, Willis-Knighton is shielded from **[**17]** liability by the State Action Doctrine. Id. at 28. Following extensive briefing by the parties, the matter is now ripe for review.

Law and Analysis

I. *Federal Rule of Civil Procedure 12(b)(6)* Standard

HN1[] *Federal Rule of Civil Procedure 8* requires a short and plain statement of the claim showing the pleader is entitled to relief. A complaint is not required to contain detailed factual allegations, however, "a plaintiff's obligation to provide the grounds of his entitle[ment] to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (internal marks and citations omitted). "To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2008)* (internal marks omitted). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Id. Plausibility does not equate to possibility or probability; it lies somewhere in between. See id. This plausibility requirement "asks for more than a sheer possibility that a defendant has acted unlawfully." Id. However, the complaint cannot be simply "unadorned, **[**18]** the-defendant-unlawfully-harmed-me accusation[s]." Id. Plausibility simply calls for enough factual allegations to raise a reasonable expectation that discovery will reveal evidence to support the elements of the claim. See *Twombly, 550 U.S. at 555-56*.

HN2[] As the Fifth Circuit has explained, in order to survive a 12(b)(6) motion, "the complaint must contain either direct allegations on every material point necessary to sustain a recovery or contain allegations from which an inference fairly may be drawn that evidence on these material points will be introduced at trial." *Rios v. City of Del Rio, Tex., 444 F.3d 417, 420-21 (5th Cir. 2006)* (internal marks and citation omitted). Moreover,

> a statement of facts that merely creates a suspicion that the pleader might have a right of action is insufficient. Dismissal is proper if the complaint lacks an allegation regarding a required element necessary to obtain relief. The court is not required to conjure up unpled allegations or construe elaborately arcane scripts to save a complaint. Further, conclusory allegations or legal conclusions masquerading as factual conclusions **[*589]** will not suffice to prevent a motion to dismiss.

Id. at 421 (internal marks and citations omitted).

HN3[] Although courts generally are not permitted to review materials outside of the **[**19]** pleadings when determining whether a plaintiff has stated a claim for which relief may be granted, there are limited exceptions to this rule. Specifically, a court may consider documents attached to a *Rule 12(b)(6)* motion to be part of the pleadings if the plaintiff refers to those documents and they are central to the claim. See *Collins v. Morgan Stanley Dean Witter, 224 F.3d 496, 498-99 (5th Cir. 2000)*; *Causey v. Sewell Cadillac-Chevrolet, Inc., 394 F.3d 285, 288 (5th Cir. 2004)*. Additionally, pleadings filed in state or other federal district courts are matters of public record and the Court may take judicial notice of those documents in connection with a *Rule 12(b)(6)* motion to dismiss. See *Cinel v. Connick, 15 F.3d 1338, 1343 (5th Cir. 1994)*.

II. Antitrust Injury

---

[3] E. *R.R. Presidents Conf. v. Noerr Motor Freight, 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers of Am. v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*.

Willis-Knighton argues that UHS has not sufficiently alleged antitrust injury. ***HN4***[] Antitrust injury is necessary for a plaintiff to pursue either a *Section 1* or *Section 2* claim under the Sherman Act. *Jebaco, Inc. v. Harrah's Operating Co., 587 F.3d 314, 319 (5th Cir. 2009)*. Antitrust injury is a component of antitrust standing. Antitrust standing, in turn, is a judicially-created set of threshold requirements that a private plaintiff must show before a court can entertain its antitrust claims. See *Assoc. Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters ("AGC"), 459 U.S. 519, 535, 103 S. Ct. 897, 74 L. Ed. 2d 723 & n.31 (1983)*. The three antitrust standing requirements are "1) injury-in-fact, [i.e.,] an injury to the plaintiff proximately caused by the defendants' conduct; 2) antitrust injury; and 3) proper plaintiff status, which assures that other parties are not **[**20]** better situated to bring suit." *Sanger Ins. Agency v. HUB Int'l, Ltd., 802 F.3d 732, 737 (5th Cir. 2015)* (citing *Jebaco, 587 F.3d at 318*). These requirements, which supplement Article III standing requirements, ensure that successful antitrust claims only redress the types of harm that ***antitrust law*** was designed to prevent, rather than create a fortuitous windfall for all parties proximate to the defendant, regardless of whether they were injured by anticompetitive conduct. See *AGC, 459 U.S. at 535*.

HN5[] The second component of antitrust standing, antitrust injury, requires that a plaintiff's injury is "of the type the antitrust laws were intended to prevent and . . . flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. This means that in an antitrust suit, but-for causation is insufficient. Instead, a plaintiff must be able to trace its injury to the anticompetitive effects of the defendant's antitrust violation. See id. Thus, an inquiry into antitrust injury always asks whether there is a causal connection between the alleged injury of the plaintiff and the anticipated anticompetitive effect of the specific practice that allegedly violates ***antitrust law***. See *Port Dock & Stone Corp. v. Oldcastle Ne., Inc., 507 F.3d 117, 122 (2d Cir. 2007)* ("We can ascertain antitrust injury only by identifying the anticipated anticompetitive effect of the specific practice at issue and comparing it to **[**21]** the actual injury the plaintiff alleges.").

UHS contends that Willis-Knighton's unlawful conspiracy targeted UHS's business in order to stymie competition and increase its monopoly power in the relevant market. Taking UHS's allegations **[*590]** as true, as a result of Willis-Knighton's anticompetitive scheme, UHS was not prevented from working with LSU Health Shreveport on pre-established initiatives and programs, but rather it was restrained from improving and becoming more competitive in other areas and on other healthcare measures. Stated another way, Willis-Knighton's anticompetitive intention was to restrict UHS's ability to compete with it, which could have resulted in diminishing Willis-Knighton's predominance in the local healthcare market. Consequently, UHS alleges, Willis-Knighton restrained competition by hindering UHS's ability to work with its physicians on measures which ultimately would have decreased costs, improved quality of care, or ensured and/or increased access to care.[4] So viewed, UHS's competitive disadvantage "fall[s] within the conceptual bounds of antitrust injury, whatever the ultimate merits of its case." *Doctor's Hosp. v. Southeast Medical Alliance, 123 F.3d 301, 305 (5th Cir. 1997)* (finding antitrust injury, for purposes of standing, was aptly **[**22]** demonstrated by plaintiff, a direct competitor of the alleged monopolist who colluded with a third party to remove plaintiff from the relevant market and weaken its competitive state). Therefore, the Court finds that UHS has sufficiently alleged antitrust injury for standing purposes.

---

[4] Many of the areas in which UHS claims LSU Health Shreveport refused to cooperate are insufficient for purposes of establishing antitrust injury. For example, the litany of ways in which the two entities could have shared costs, coordinated on a drug formulary, or established an outpatient imaging center, allegedly would have decreased costs or increased profitability. For these, there is no suggestion that they would have harmed, or in the converse, helped patients or the consumer market. The Court will not consider those allegations for purposes of assessing whether UHS has alleged an antitrust injury, as the antitrust laws protect competition, not the competitor. *Brooke Grp. Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 225, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*. The Court is concerned with harm to UHS only insofar as that harm resulted in a concomitant effect upon consumer costs, the quality of care, access to care, and patient choice. With that in mind, the Court deems sufficient the allegations regarding the narrow insurance network, co-management of certain departments, improvements upon physician productivity, recruitment of or privileges to new physicians, staffing of clinics, Dr. Nanda's termination, and improved clinical documentation.

III. Section 1 of the Sherman Act

HN6[] Title *15, United States Code, Section 1* prohibits any contract, combination, or conspiracy that unreasonably restrains trade. Over a century of Supreme Court interpretation of *Section 1* has distilled its expansive definition into a number of well-recognized causes of action, such as vertical and horizontal price fixing, tying agreements, and exclusive dealing agreements. Holmes and Mangiaracina, ***Antitrust Law*** Handbook § 2.2. Here, UHS's complaint does not coherently describe one of the more familiar antitrust allegations, however, its opposition to the motion to dismiss clarifies that it has alleged an unlawful vertical integration.

HN7[] There are three elements of a *Section 1* claim: (1) a conspiracy; (2) that restrained trade; (3) in the relevant market. *Golden Bridge Tech., Inc. v. Motorola, Inc., 547 F.3d 266, 271 (5th Cir. 2008)*. "Antitrust claims do not necessitate a higher pleading standard and a plaintiff need only plead enough facts to state a claim to relief that is plausible on its face." *Marucci Sports, L.L.C. v. Nat'l Collegiate Athletic Ass'n, 751 F.3d 368, 373 (5th Cir. 2014)* (internal **[**23]** marks omitted). Only the sufficiency of the first element—conspiracy—was challenged by Willis-Knighton's **[*591]** motion to dismiss.[5]

A. Conspiracy

Willis-Knighton submits that UHS has failed to sufficiently plead a conspiracy between it and LSU Health Shreveport under *Section 1* of the Sherman Act. In response, UHS argues that it has adequately alleged that Willis-Knighton threatened LSU Health Shreveport into unlawfully restraining UHS's ability to compete by making Willis-Knighton's monetary contributions contingent upon LSU Health Shreveport's accession to its demands. The Court disagrees.

"*Section 1* **HN9**[] of the Sherman Act does not proscribe independent conduct." *Viazis v. Am. Ass'n of Orthodontists, 314 F.3d 758, 761 (5th Cir. 2002)* (citing *Monsanto Co. v. Spray-Rite Serv. Corp., 465 U.S. 752, 761, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984)*). Thus, a *Section 1* violation requires concerted action. To be sure, "[t]he crucial question is whether the challenged anticompetitive conduct stems from independent decision or from an agreement, **[**25]** tacit or express." *Twombly, 550 U.S. at 553* (internal marks omitted).

To satisfy this inquiry in the present case, UHS must show that Willis-Knighton "engaged in concerted action, defined as having a 'conscious commitment to a common scheme designed to achieve an unlawful objective.' " *Golden Bridge Tech., 547 F.3d at 271* (quoting *Monsanto, 465 U.S. at 764*). Under Twombly, to successfully plead a *Section 1* claim, the complaint must assert sufficient facts to suggest an agreement was made; that is, enough factual matter "to raise a reasonable expectation that discovery will reveal evidence of illegal agreement." *Twombly,*

---

[5] Although they are not at issue in this opinion, the Fifth Circuit has set forth the analysis for the other elements:

> Once a plaintiff establishes that a conspiracy occurred, whether it violates *§ 1* is determined by the application of either the *per se* rule or the rule of reason. The *per se* rule is appropriate only after courts have had considerable experience with the type of restraint at issue and only if courts can predict with confidence that it would be invalidated in all or almost all instances under the rule of reason. Moreover, the *per se* rule should only be applied when conduct is so pernicious and devoid of redeeming virtue that it is condemned without inquiry into the effect on the market in the particular case at hand.
>
> Under a rule of reason analysis, the factfinder considers all of the circumstances to determine whether a restrictive practice imposes an unreasonable restraint on competition. The court's considerations should include the restrictive practice's history, nature, and effect and whether the businesses involved have market power. Market power has been defined as the ability to raise prices above those that would be charged in a competitive market. The rule **[**24]** of reason analysis also requires that the plaintiff show that the defendants' activities injured competition. **HN8**[] The rule of reason is designed to help courts differentiate between restraints with anticompetitive effect that are harmful to the consumer and restraints stimulating competition that are in the consumer's best interest. Regardless of which rule applies, the court's inquiry should ultimately focus upon forming a judgment about the competitive significance of the restraint.

Marucci Sports, 751 F.3d at 374 (cleaned up).

550 U.S. at 556. Parallel business behavior, i.e., parallelism, does not constitute a conspiracy, nor does a "conclusory allegation of agreement at some unidentified point . . . supply facts adequate to show illegality." Id. at 556-57. A plaintiff's allegations must plausibly suggest the unlawful agreement, not simply be consistent with an agreement. Id. at 557. Without context showing "a meeting of the minds," the defendant's conduct remains "in neutral territory." Id.

[*592] As a preliminary matter, per the instructions of Iqbal and Twombly, this**HN10**[] Court must disregard the complaint's conclusory and formulaic assertions, as those are not entitled to a presumption of truth. The remaining allegations must then be examined **[**26]** to determine whether they plausibly suggest entitlement to relief. **HN11**[] As the district court explained in Dowdy & Dowdy Partnership v. Arbitron, Inc.,:

> A "bare allegation of conspiracy" and "a conclusory allegation of agreement at some unidentified point" are insufficient to plead illegal antitrust activity. Not only does the naked allegation of a conspiracy, without additional facts, not state a plausible antitrust claim, such conclusory allegations are not entitled to be accepted as true for the purposes of this motion.

Dowdy & Dowdy P'ship v. Arbitron Inc., No. 2:09CV253 KS-MTP, 2010 U.S. Dist. LEXIS 108798, 2010 WL 3942755, at *3 (S.D. Miss. Oct. 6, 2010) (internal citations omitted).

Here, although the complaint repeatedly uses the term "threat," what actually constitutes a threat seems to be a more complicated question than UHS has recognized. Within the context of the case and in light of the way in which the complaint was drafted, the Court finds the use of the term "threat" is a legal conclusion masquerading as a fact. Other problematic areas within the complaint include UHS's allegation that Willis-Knighton threatened to pull its existing financial support if LSU Health Shreveport refused to participate in Willis-Knighton's "scheme" to harm UHS. Record Document 1 at 14. Disregarding the use of the term threat, the **[**27]** allegation is still in peril, as it relies broadly on the existence of a scheme, when one is never sufficiently alleged. UHS also generally alleges that Willis-Knighton made "promises to provide [and] threats to withhold funds based on LSU's acquiescence in its demands . . . ." Id. at 22. Again, however, the so- called "demands" are never described in terms that are nonconclusory or nonspeculative. These allegations will not be given the presumption of truth.

The Court has examined UHS's actual factual allegations to determine whether they plausibly state a claim under Section 1 of the Sherman Act. Despite spanning seventy-six pages, the complaint is lacking in detail. **HN12**[] "A complaint can be long-winded, even prolix, without pleading with particularity. Indeed, such a garrulous style is not an uncommon mask for an absence of detail." Southland Sec. Corp. v. INSpire Ins. Sols., Inc., 365 F.3d 353, 362 (5th Cir. 2004) (quoting Williams v. WMX Techs., Inc., 112 F.3d 175, 178 (5th Cir. 1997)). UHS's claims of antitrust conspiracy rest on four bases:

> (1) Elrod's involvement: (a) his 2012 statement to the Willis-Knighton Board that it would continue to fund LSU Health Shreveport so long as the two entities remained partners, not competitors; (b) his 2013 comment at a Willis-Knighton Board meeting that Willis-Knighton would continue to support the **[**28]** medical school so long as LSU Health Shreveport's business model was not in direct competition with Willis-Knighton and Willis-Knighton could have some oversight; and (c) his 2017 deposition testimony in which he agreed that the medical school would have a difficult time surviving without Willis-Knighton;
>
> (2) Yick's involvement: (a) Willis-Knighton's 2016 PowerPoint presentation to Yick that represented it was willing to increase its funding of programs and services to LSU Health Shreveport if there was "increased cooperation from leadership and the faculty"; (b) Yick's 2016 email stating that LSU Health Shreveport still needed to raise $50 million in mission support, that Willis-Knighton **[*593]** "is our mother lode," and his opinion that LSU Health Shreveport's energy needed to be spent on rebuilding rather than collaborating with UHS; (c) his report that Willis-Knighton had "conceptually agreed to provide working capital" to the medical school; and (d) his statement that letters of intent into which LSU had entered with other hospitals, aside from Willis-Knighton, were "initially just for cover";
> (3) Willis-Knighton's referral shortage; and

(4) LSU Health Shreveport's refusals to cooperate **[**29]** with UHS, including Dr. Ghali's statement that he did not enter into a narrow insurance network with Blue Cross because it would have angered Elrod.

As these bases are interdependent, the Court's analysis must view them jointly to determine whether UHS has alleged a plausible *Section 1* claim.[6] The Court finds that all of UHS's factual allegations suffer from the same deficit: UHS has not pleaded sufficient facts to suggest a prior agreement existed between Willis-Knighton and LSU Health Shreveport to unreasonably restrain trade of medical services. ***HN13***[] "[R]esisting competition is routine market conduct." *Twombly, 550 U.S. at 566*. As the Supreme Court has explained, when examining a *Section 1* claim, "[c]ircumstances must reveal 'a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement.' " *Monsanto, 465 U.S. at 764* (quoting *Am. Tobacco Co. v. United States, 328 U.S. 781, 810, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*). Thus, the Court must determine whether there is concerted action, and if so, whether that concerted action was the result of a meeting of the minds to agree to restrain competition. See *Marucci Sports, 751 F.3d at 375* (instructing that the "pivotal question is whether the concerted action was a result of an agreement . . . to unreasonably restrain trade.").

Here, the complaint does not allege **[**30]** facts demonstrating an intention on the part of LSU Health Shreveport to engage in a conspiracy. See *id. at 378-79* (complaint dismissed because plaintiff failed to set forth facts showing a meeting of the minds or any actual agreement among the conspirators). As to the statements made by Elrod to the Willis-Knighton Board in 2012 and 2013, these two statements were made three and four years prior to the alleged antitrust activity in this case. Further, Elrod's comments were made to his own Board, not to LSU Health Shreveport. UHS has not alleged that the statements were ever communicated to LSU Health Shreveport or that LSU Health Shreveport ever learned of them. There is no suggestion that these statements were repeated at a time more contemporaneous with the alleged conspiracy. These statements **[*594]** do not plausibly suggest a conspiracy.

Nonetheless, using the 2016 PowerPoint presentation to Yick, UHS makes inferential leaps to connect Elrod's historical statements to Yick's more contemporaneous comments, thereby deducing a conspiratorial link exists. However, Yick's statements, even when viewed against the backdrop colorfully painted by UHS, still do not plausibly suggest a conspiracy to restrain **[**31]** competition.

UHS argues LSU Health Shreveport was desperate for money and that, in exchange for the money it so badly needed, Willis-Knighton required LSU Health Shreveport to accede to its unlawful, anticompetitive whims by halting UHS's competitive momentum. UHS, however, cannot survive *Rule 12(b)(6)* scrutiny simply by supplanting its subjective beliefs for facts. There is a paucity of facts to entitle UHS to the inferences upon which its claims are premised. The complaint is silent as to (1) when, where, or how the conspiracy was formed; (2) whether Willis-Knighton communicated with LSU Health Shreveport about the conspiracy; (3) whether LSU Health Shreveport communicated with Willis-Knighton about the conspiracy; and (4) whether they shared a common intent or meeting of the minds to restrain trade.

UHS points out that it is not required to set forth a "specific time, place, or person" for its conspiracy allegations. See *In re Pool Prod. Distrib. Mkt. Antitrust Litig., 988 F. Supp. 2d 696, 715 (E.D. La. 2013)*. ***HN14***[] It is, however, required to "allege the general contours of when an agreement was made, supporting those allegations with a context that tends to make said agreement plausible." Id. Like the district court in Pool Products, the Court here is

---

[6] While the Court has not tightly compartmentalized each set of allegations, analyzed them independently, and wiped the slate clean after each examination, it does note that the Fifth Circuit has expressed doubt as to whether instances of alleged conduct, which individually are not anticompetitive, can be aggregated to be considered cumulatively anticompetitive. *Retractable Techs., Inc. v. Becton Dickinson & Co., 842 F.3d 883, 892 (5th Cir. 2016)* (citing with approval *City of Groton v. Conn. Light & Power, 662 F.2d 921, 928 (2d Cir. 1981)* (holding alleged instances of misconduct, none of which is anticompetitive, cannot be cumulatively anticompetitive.)). The Retractable Technologies opinion explained that there has been no case since its 1980 decision in *Associated Radio Service Co. v. Page Airways, Inc., 624 F.2d 1342, 1356 (5th Cir. 1980)*, in which "a congeries of business torts was found so egregious as to constitute actionable predatory or exclusionary conduct." Id. Nonetheless, in the instant case, the Court's antitrust analysis has been as coterminous as UHS's complaint and the law allow.

unable to infer the "general contours **[**32]** of when the alleged agreement was made or even what, precisely, the agreement was." *Id. at 719*. That is, the Court cannot discern what the agreement was or when it was confected; there is no description of how or under what terms the agreement was reached, nor is there a mention of the extent of the agreement. See *id. at 721* (noting that "[s]uch vague conspiracy claims rarely pass muster under *Rule 8* and Twombly") (collecting cases). UHS also argues that it does not need to establish that LSU Health Shreveport communicated with Willis-Knighton on each of its decisions, as LSU Health Shreveport was aware of the overall threat. While it is true that an express agreement on every detail is not required, it is equally true that the law demands more than what is alleged here. There still must be an agreement to a scheme and an agreement to work together to further a common goal. UHS's complaint has failed to satisfy that standard.

As to the alleged starvation of referrals used by Willis-Knighton to threaten non compliant physicians, UHS claims this "threat" was contained within Elrod's book, which was generally available to those in the relevant healthcare market who wanted to read it.[7] The allegation itself lacks **[**33]** context and contour. Even if the book was generally available in the marketplace, UHS alleges no fact from which to infer that LSU Health Shreveport, as an entity, knew of Elrod's statements, knew of the practice generally, felt threatened by it, and felt threatened **[*595]** enough to engage in a conspiracy. Without additional factual context, this allegation is too specious to withstand scrutiny.

As to Elrod's 2017 deposition testimony, his statement does not demonstrate any conspiracy or agreement between Willis-Knighton and LSU Health Shreveport. It is a factual statement, not wholly untrue, provided in a vacuum without any surrounding context. Even when viewed in light of UHS's other allegations, it fails to demonstrate any meeting of the minds or agreement to coerce LSU Health Shreveport into refusing cooperation with UHS.

Finally, UHS argues that LSU Health Shreveport's refusals to cooperate are each discrete overt acts taken in furtherance of the conspiracy. UHS contends that Dr. Ghali's statement—that entering into a narrow insurance network with Blue Cross would have angered Elrod—is evidence of an overt act taken in furtherance of the conspiracy. ***HN15***[] An overt act is an act taken in furtherance **[**34]** of a conspiracy only so long as there is, in fact, a conspiracy in existence; otherwise, the act is just an act. Again, UHS has used a broad brush to paint all unfavorable decisions as ones caused by a conspiracy against it. To the contrary, broad brushes and generalized theories of long-standing coercion cannot withstand *Rule 12(b)(6)* scrutiny.

UHS insists the only reason LSU Health Shreveport would decline its opportunities is if it was coerced by Willis-Knighton because, according to UHS, the decisions were against LSU Health Shreveport's best interests. UHS's case can be summed up thusly there must have been an unlawful agreement to conspire against and harm UHS because UHS cannot otherwise understand why LSU Health Shreveport would not have jumped at the chance to implement all of UHS's good ideas. Yet, LSU Health Shreveport was entitled to decline business endeavors that would jeopardize its relationship with a donor without running afoul of antitrust laws. Indeed, "one might refrain from taking an otherwise profitable step because someone else has the power to make it unacceptably costly . . . such inaction serves the decisionmaker's long-run interest, taking the third party's power into **[**35]** account." *In re Pool Prod. Distrib. Mkt. Antitrust Litig., 988 F. Supp. 2d at 718* (quoting 6 Phillip Areeda & Herbert Hovencamp, ***Antitrust Law*** ? 1415c (3d ed. 2010)). These allegations, without more, fall short of establishing a conspiracy between Willis-Knighton and LSU Health Shreveport, in which both entities agreed to work together to restrain UHS's ability to compete in the marketplace.

The gravamen of UHS's case is that Willis-Knighton threatened LSU Health Shreveport, LSU Health Shreveport felt threatened and thus agreed to Willis-Knighton's demands, and LSU Health Shreveport refused to cooperate with UHS. Unfortunately, UHS has committed a logical fallacy by (1) observing past behavior by Willis-Knighton, (2)

---

[7] The Court notes that in the 2015 case, it concluded that Willis-Knighton's control of physician referrals was not anticompetitive under *Section 2* of the Sherman Act because it did not lack competition on the merits. *BRFHH Shreveport, LLC v. Willis Knighton Med. Ctr., 176 F. Supp. 3d 606, 625-26 (W.D. La. 2016)*. That is, the practice had a rational business purpose (treatment of more patients) and Willis-Knighton could not have accomplished the acts without the consent and participation of consumers. *Id. at 625*.

observing a current unfavorable situation with LSU Health Shreveport, and (3) deducing that LSU Health Shreveport's behavior must have been caused by Willis-Knighton. Put in the familiar A + B = C equation, with "A" being Willis-Knighton's "ruthless" competition and "C" being LSU Health Shreveport's rejection of additional joint endeavors, UHS's complaint is missing "B"—that is, the other element that plausibly supports the inference that Willis-Knighton *caused* LSU Health Shreveport's behavior. Under Monsanto, there must be a meeting of the **[**36]** minds. ***HN16***[] The Supreme Court has defined that as something more than mere acquiescence. "A manufacturer of course generally has a right to deal, or refuse to deal, with whomever it likes, as long as it does so independently." **[*596]** *Monsanto, 465 U.S. at 761*. The manufacturer can announce its decision in advance and "refuse to deal with those who fail to comply." Id. The downstream entity "is free to acquiesce" in the demand "in order to avoid termination." Id. A conspiracy requires "more than a showing that the distributor conformed . . . . It means as well that evidence must be presented both that the distributor communicated its acquiescence or agreement, and that this was sought by the manufacturer." *Monsanto, 465 U.S. at 764 n.9*.

UHS is required to sufficiently plead an agreement, a meeting of the minds. ***HN17***[] "Absent any agreement, there is no *Section 1* claim, because an anticompetitive agreement is the *sine qua non* of a *Section 1* violation." *In re Pool Prod. Distrib. Mkt. Antitrust Litig., 988 F. Supp. 2d at 708*. Here, what led to LSU Health Shreveport's decision not to engage in additional joint endeavors is sheer speculation. There are insufficient allegations to plausibly suggest that Willis-Knighton actually threatened LSU Health Shreveport and, there is even less to suggest that LSU Health Shreveport entered into an unlawful conspiracy **[**37]** with Willis-Knighton to comply with its demands.

In sum, notably absent from UHS's complaint is the critical linkage between Willis-Knighton and LSU Health Shreveport, in terms of communications, timing, intent, and conduct. Like Twombly, UHS's complaint is rife with "legal conclusions resting on the prior allegations." *Twombly, 550 U.S. at 564*. UHS argues that it is entitled to reasonable inferences, which ostensibly should result in a plausible showing of a conspiracy to restrain competition. ***HN18***[] However, a plaintiff must first allege a fact from which the inferential leap can be made. An inference cannot exist without the underlying premise. In the law, these premises must take the form of nonspeculative allegations of fact. Without those, no reasonable inferences may be drawn at all. See *Marucci Sports, 751 F.3d at 375* (explaining that when the complaint "presents various conclusory allegations that support one of many inferential possibilities," it falls short of Twombly's pleading standards.). The Court finds that UHS has failed to sufficiently plead a claim under *Section 1* of the Sherman Act, and therefore this claim shall be dismissed with prejudice.

IV. *Section 2* of the Sherman Act

HN19[] *Section 2* of the Sherman Act prohibits the monopolization or attempted monopolization **[**38]** of any trade or commerce.[8] *15 U.S.C. § 2*. In contrast to *Section 1*, *Section 2* of the Sherman Act "covers both concerted and independent action, but only if that action monopolizes or threatens actual monopolization, a category that is narrower than restraint of trade." *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 190, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)* (internal citations and quotations omitted). A defendant is liable for monopolization under *Section 2* when it (1) possesses monopoly power[9] and (2) achieves **[*597]** or maintains its monopoly power through anticompetitive conduct. See *15 U.S.C. § 2*; *Verizon Commc'ns, Inc. v. Law Offs. of Curtis V. Trinko, 540*

---

[8] UHS has alleged both monopolization and attempted monopolization in violation of *Section 2*. These claims are indistinguishable for the purposes of evaluating Willis-Knighton's dismissal arguments. Because anticompetitive conduct is an element of both, *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993)*, the viability of either claim is dependent upon UHS's ability to sufficiently plead anticompetitive conduct.

[9] ***HN20***[] To establish *Section 2* violations asserting monopolization, a plaintiff must define the relevant market. *Doctor's Hosp., 123 F.3d at 311*. The Court assumes for present purposes that the healthcare market in the Shreveport-Bossier City area is a relevant antitrust market.

U.S. 398, 407-08, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004); Stearns Airport Equip. Co. v. FMC Corp., 170 F.3d 518, 522 (5th Cir. 1999) (the monopolist must have "acquired or maintained that power wilfully, as distinguished from the power having arisen and continued by growth produced by the development of a superior product, business acumen, or historic accident.") (citing United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)).

A. Anticompetitive Conduct

As to the first element, Willis-Knighton's pleadings do not address, and thus do not challenge, whether it possesses monopoly power. As such, this Court will assume arguendo that UHS has successfully alleged facts demonstrating that Willis-Knighton possesses monopoly power.

Willis-Knighton instead focuses on the second element, arguing that UHS's complaint has failed to sufficiently plead anticompetitive conduct. ***HN21***[] The necessity of proving anticompetitive conduct, in addition **[**39]** to monopoly power, reflects federal courts' judgment that in the short term, the monopolist's ability to charge above-market prices invites more, rather than less, competition. *Trinko, 540 U.S. at 407* ("The opportunity to charge monopoly prices . . . induces risk taking that produces innovation and economic growth."). Thus, while the definition of anticompetitive conduct[10] has many accepted permutations, the essence of the conduct that it makes actionable is the achievement or maintenance of monopoly power by means other than competition on the merits. See *Stearns Airport Equip., 170 F.3d at 522* (citing *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 605, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)* ("If a firm has been attempting to exclude rivals on some basis other than efficiency, it is fair to characterize its behavior as [anticompetitive].")); see also *United States v. Microsoft Corp., 253 F.3d 34, 58-59, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (to be condemned as anticompetitive under *Section 2*, the conduct "must harm the competitive process and thereby harm consumers."). In the Fifth Circuit, proving anticompetitive conduct also "[g]enerally" requires "some sign that the monopolist engaged in behavior that—examined without reference to its effects on competitors—is economically irrational." *Stearns Airport Equip. Co., 170 F.3d at 523*. Hence, UHS must allege exclusionary conduct to survive the instant motion. ***HN22***[] Under Twombly, UHS's complaint must plead facts that, when viewed **[**40]** together, make anticompetitive conduct plausible. See *Twombly, 550 U.S. at 555*; *Assoc. Radio Serv. Co., 624 F.2d at 1356*.

HN24[] The key factor in the inquiry is "the proffered business justification for the act. If the conduct has no rational business purpose other than its adverse effects on competitors, an inference that it is exclusionary is supported." *Clean Water Opportunities, Inc. v. Willamette Valley Co., 759 F. App'x 244, 248 (5th Cir. 2019)* (quoting *Stearns Airport Equip. Co., 170 F.3d at 522*). Nonetheless, as the Fifth Circuit has cautioned, "not all unfair conduct—even by a monopolist and a fortiori by one who is not—fits **[*598]** within the prohibition of *§ 2*. Conduct must not only be inconsistent with competition on the merits, it must also have the potential for making a significant contribution to monopoly power." *Taylor Pub. Co., 216 F.3d at 475-76* (quoting 3A Areeda & Hovencamp ¶806d, at 331). The rationality of the defendant's business decision is a significant, yet not dispositive, factor in ascertaining whether conduct is exclusionary. *Clean Water Opportunities, 759 F. App'x 248*. Under Stearns, courts are also to consider whether the exclusionary conduct required the active approval of the consumer or whether there was the potential existence of bribery or threats that tainted an otherwise independent business decision. See *Stearns Airport Equip., 170 F.3d at 524-27*.

In the instant case, UHS's efforts to allege anticompetitive conduct under *Section 2* fall short for the same reason its *Section 1* claim failed. In **[**41]** short, its claim hinges on speculation and subjective beliefs, not facts and the reasonable inferences to be drawn therefrom. Setting aside UHS's bare allegations, legal conclusions, and speculation, the lack of actual facts in the complaint makes it nearly impossible to define what Willis-Knighton even did that is deemed exclusionary. Several years before the antitrust violations allegedly occurred, Willis-Knighton told its Board members that it would not fund a competitor. Three to four years later, Yick stated that Willis-Knighton

---

[10] ***HN23***[] Courts also label anticompetitive conduct exclusionary conduct, predatory conduct, and improper conduct. See *Taylor Pub. Co. v. Jostens, Inc., 216 F.3d 465, 475 n.2 (5th Cir. 2000)* ("We use the terms 'predatory' and 'exclusionary' interchangeably . . . .").

conceptually agreed to provide the hospital with funding. Prior to and during this time was the pervasive, long-term threat of a referral starvation. Despite these allegations, the complaint fails to enunciate or describe any acts taken by Willis-Knighton that this Court could use to dissect whether Willis-Knighton acted anticompetitively, or rather, whether this was just business—unfair, tortious, or otherwise. ***HN25***[] There is, in fact, a great distinction between antitrust activity and victorious, if unrelenting, business practices.[11] Indeed, "[c]ompetition, even the maintenance of monopoly, through superior business acumen is allowed under *section 2*." *Stearns Airport Equip., 170 F.3d at 527*.

UHS argues that **[**42]** Willis-Knighton's insistence or demand that LSU Health Shreveport's "medical staff not cooperate with the hospital with which it primarily works" cannot be deemed competition on the merits for antitrust purposes. In doing so, it repeats its familiar refrain that Willis-Knighton's actions were designed to limit UHS's competitive abilities. Nonetheless, reurging a conclusory allegation, without more, does not make the allegation plausible. The pleading woes that plagued UHS's *Section 1* claim similarly doom its *Section 2* claim. UHS's theories are dependent upon a sufficient showing of a threat, or coercion, or even an insistence, all of which lack a plausible showing in the complaint.

Even assuming UHS had sufficiently pleaded a threat or demand regarding Willis-Knighton's donations, Willis-Knighton contends that its business decisions are not anticompetitive. That is, any business would refrain from donating to another if the donee intended to help a competitor harm the donor. UHS counters that "when **[*599]** that 'harm' is simple competition, an action taken to preclude it is classic exclusionary conduct." Record Document 27 at 26. The distinction UHS fails to account for is that an action *taken* to *prevent* competition **[**43]** is different than an action *not taken* because it would *assist* or subsidize the competition. Despite many statements implying the contrary, UHS eventually concedes that the antitrust laws do not require Willis-Knighton to subsidize its own competition. Id. at 29. Nonetheless, UHS avers that an "antitrust violation arose when Willis-Knighton indicated that it would only provide funds *contingent* on *anticompetitive* actions." Id. (emphasis in original). But here again, the complaint lacks sufficient allegations to plausibly suggest both the contingent nature of the funding, as well as the anticompetitive actions Willis-Knighton allegedly took. The complaint fails to contain the requisite material to nudge UHS's claim over the line from conceivable to plausible as demanded by Twombly. For these reasons, the Court concludes that UHS's complaint has failed to sufficiently allege anticompetitive conduct, and thus its claim under *Section 2* of the Sherman Act must fail. This claim shall be dismissed with prejudice.

V. Immunity Arguments

Willis-Knighton has also challenged UHS's complaint on immunity grounds, arguing the shield of both the Noerr-Pennington Doctrine as well as the State Action Doctrine. Because **[**44]** the Court finds both *Section 1* and *Section 2* claims were insufficiently pleaded and cannot survive the motion to dismiss, it need not address Willis-Knighton's remaining contentions.

Conclusion

The Court does not render its decision today based on a disbelief or skepticism of UHS's allegations. Indeed, *Rule 12(b)(6)* does not countenance such a dismissal on those grounds. Rather, taking the factual allegations as true and making all reasonable inferences in favor of UHS, the Court is nonetheless constrained to find that the complaint has failed to plausibly state a claim for relief. For these reasons, Willis-Knighton's motion to dismiss

[11] ***HN26***[] As the Fifth Circuit instructed, the "distinction between unfair conduct and anticompetitive conduct is critical to maintain because the antitrust laws 'do not create a federal law of unfair competition or purport to afford remedies for all torts committed by or against persons engaged in interstate commerce.' " *Retractable Techs., 842 F.3d at 892-93* (quoting *Brooke Grp. Ltd., 509 U.S. at 225*) (internal marks omitted). The Supreme Court has stressed that "[e]ven an act of pure malice by one business competitor against another does not, without more, state a claim under the federal antitrust laws." *Brooke Grp., 509 U.S. at 225*.

[Record Document 20] is hereby **GRANTED**. UHS's antitrust violations against Willis-Knighton are **dismissed with prejudice**.

A judgment consistent with the terms of this Memorandum Ruling shall issue herewith.

THUS DONE AND SIGNED this 27th day of September, 2021.

/s/ Elizabeth Erny Foote

ELIZABETH ERNY FOOTE

LexisNexis® Headnotes

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN1[] **Class Actions, Certification of Classes**

Fed. R. Civ. P. 23 sets forth a two-step process for certification as a class action. First, the plaintiff must satisfy the four prerequisites set forth in *Rule 23(a)*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Evidence > Burdens of Proof > Preponderance of Evidence

HN2[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23 does not set forth a mere pleading standard. The party seeking class certification bears the burden of demonstrating compliance with Rule 23's prerequisites by a preponderance of the evidence. The Second Circuit has emphasized that Rule 23 should be given liberal rather than restrictive construction, and it seems beyond peradventure that the Second Circuit's general preference is for granting rather than denying class certification.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Notice of Class Action > Content of Notice > Opt Out Provisions

HN3[] Class Actions, Certification of Classes

The Second Circuit has stated that the expansion of a class after a judgment on liability raises the specter of one-way intervention. The one-way intervention problem arises when a decision on certification of an opt-out class is deferred until after a decision on the merits, which enables potential class members to "wait on the sidelines" for a merits determination and then choose to remain in or opt out of the class once certified in a way that benefits them.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN4[] Class Actions, Certification of Classes

In general, issues relating to class certification should be decided before a decision on the merits is rendered.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN5[] Class Actions, Certification of Classes

A defendant can waive any objection to a decision on the merits prior to, or simultaneous with, a decision on class certification. This waiver can be express or implied through the defendant's motion for summary judgment before class certification.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN6[] Prerequisites for Class Action, Numerosity

In order to proceed as a class action, the class must be so numerous that joinder of all members is impracticable. Fed. R. Civ. P. 23(a)(1). Numerosity is presumed at a level of forty members. Although there is no magic number of class members needed to satisfy numerosity, numerosity is generally presumed at a level of 40 or more members.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN7[] Prerequisites for Class Action, Commonality

Under *Fed. R. Civ. P. 23(a)(2)*, there must be questions of law or fact common to the class. *Fed. R. Civ. P. 23(a)(2)*. A question is common if it is capable of classwide resolution — which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke. It is not enough to raise questions at such a high level of generality that they become common to the class. Instead, plaintiffs must demonstrate the capacity of a class-wide proceeding to generate common answers apt to drive the resolution of the case.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN8[] **Prerequisites for Class Action, Commonality**

The claims for relief need not be identical for them to be common; instead, *Fed. R. Civ. P. 23(a)(2)* simply requires that there be issues whose resolution will affect all or a significant number of the putative class members. Where the same conduct or practice by the same defendant gives rise to the same kind of claims from all class members, there is a common question. Even a single common question will suffice to prove commonality.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN9[] **Class Actions, Certification of Classes**

Courts both within and outside of this Circuit have routinely certified classes including future class members when any equitable relief to which the class would be entitled would be of the sort that would affect present and future claimants in the same way.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN10[] **Conspiracy to Monopolize, Elements**

The commonality inquiry focuses on whether questions exist that would need to be determined on a classwide basis, regardless of how each merchant was individually affected and whether the answers to these questions would drive the resolution of this litigation. Courts have found that commonality exists when the plaintiffs' injuries derive from a unitary course of conduct by a single system, even when there are differing individual circumstances of class members. Courts in this Circuit have noted that numerous courts have held that allegations concerning the existence, scope, and efficacy of an alleged antitrust conspiracy present important common questions sufficient to satisfy the commonality requirement of *Fed. R. Civ. P. 23(a)(2)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN11[] **Prerequisites for Class Action, Commonality**

The typicality prong of *Fed. R. Civ. P. 23(a)(3)* requires that the claims or defenses of the representative parties be typical of the claims or defenses of the class. *Fed. R. Civ. P. 23(a)(3)*. The typicality requirement is satisfied when each class member's claim arises from the same course of events and each class member makes similar legal arguments to prove the defendant's liability. The commonality and typicality requirements often tend to merge into one another, so that similar considerations animate analysis of both.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN12[] Prerequisites for Class Action, Adequacy of Representation

Fed. R. Civ. P. 23(a)(4) provides that a class action is only appropriate if the representative parties will fairly and adequately protect the interests of the class. *Fed. R. Civ. P. 23(a)(4)*. The purpose is to uncover conflicts of interest between named parties and the class they seek to represent. Determination of adequacy typically entails inquiry as to whether: (1) plaintiff's interests are antagonistic to the interest of other members of the class, and (2) plaintiff's attorneys are qualified, experienced and able to conduct the litigation.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN13[] Prerequisites for Class Action, Adequacy of Representation

The analysis of whether a class representative is adequate is twofold: the proposed class representative must have an interest in vigorously pursuing the claims of the class, and must have no interests antagonistic to the interests of other class members.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN14[] Prerequisites for Class Action, Adequacy of Representation

Courts assessing the adequacy of class representatives generally find adequacy when the class representatives allege restraint of trade and monopolization and when, despite factual differences in how the class members are situated, the class representatives are similarly incentivized to prove the defendants' liability under ***antitrust law***.

Civil Procedure > ... > Class Actions > Class Members > Absent Members

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

HN15[] Class Members, Absent Members

Fed. R. Civ. P. 23 has procedural safeguards that will allow class members to object to the injunctive relief provided in any settlement. *Fed. R. Civ. P. 23(e)(5)*.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN16[] Preclusion of Judgments, Res Judicata

The doctrine of res judicata, or claim preclusion, holds that a final judgment on the merits of an action precludes the parties or their privies from relitigating issues that were or could have been raised in that action.

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

HN17[] Preclusion of Judgments, Res Judicata

While the exception developed in Cooper applies to claim preclusion, issues actually litigated in an earlier class action may still preclude litigation of the same issues in a subsequent individual action.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN18[] Class Actions, Certification of Classes

The Supreme Court held that *Fed. R. Civ. P. 23(b)(2)* does not authorize class certification when each class member would be entitled to an individualized award of monetary damages and noted that combining individualized and classwide relief is inconsistent with *Rule 23(b)(2)*.

Civil Procedure > ... > Class Actions > Class Members > Absent Members

Civil Procedure > ... > Notice of Class Action > Content of Notice > Opt Out Provisions

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN19[] Class Members, Absent Members

Claims for monetary relief cannot be certified as part of a mandatory *Fed. R. Civ. P. 23(b)(2)* class because class members could be precluded from asserting their compensatory damages claims without having had notice and an opportunity to opt out.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN20[] Prerequisites for Class Action, Adequacy of Representation

Absent parties are bound by a decree so long as the named parties adequately represented the absent class and the prosecution of the litigation was within the common interest.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

Civil Procedure > ... > Notice of Class Action > Content of Notice > Opt Out Provisions

HN21[] Prerequisites for Class Action, Adequacy of Representation

The Second Circuit has similarly stated that the lack of the ability to opt out in a *Rule 23(b)(2)* class does not violate due process as long as the other *Fed. R. Civ. P. 23* requirements including adequacy of representation are satisfied.

Civil Procedure > Parties > Intervention > Conditional Right to Intervene

HN22 [] **Intervention, Conditional Right to Intervene**

In mandatory *Fed. R. Civ. P. 23(b)(2)* classes, class members are entitled to voice their concerns with the court prior to final approval and voice replaces exit as the operable means of class member involvement.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Class Attorneys > Fees

HN23 [] **Prerequisites for Class Action, Adequacy of Representation**

Whether a close relationship with class counsel renders a named plaintiff inadequate is a fact-intensive inquiry. Courts have long found that a familial (or any other) relationship creates a conflict if it gives the class representative an interest in the fees class counsel might recover. To determine whether the relationship between the class representative and class counsel is inappropriate, courts consider: (1) the closeness and extent of the relationship, (2) whether the related attorney's relationship and role in the litigation have been disclosed, (3) whether attorneys' fees will greatly exceed the class representative's recovery, and (4) the extent of the related attorney's involvement in the litigation.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN24 [] **Prerequisites for Class Action, Adequacy of Representation**

To satisfy the adequacy of representation requirement as to class counsel, a court must determine whether they are qualified, experienced and generally able to conduct the litigation.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN25 [] **Class Actions, Certification of Classes**

Fed. R. Civ. P. 23(a) contains an implied requirement of ascertainability. The ascertainability requirement asks district courts to consider whether a proposed class is defined using objective criteria that establish a membership with definite boundaries.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN26 [] **Class Actions, Certification of Classes**

The class definition, including the class period, must be consistent with the alleged liability theory.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN27[] Class Actions, Certification of Classes

Fed. R. Civ. P. 23(b)(2) provides for certification of a class seeking equitable relief if the party opposing the class has acted or refused to act on grounds that apply generally to the class, so that final injunctive relief is appropriate respecting the class as a whole.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN28[] Prerequisites for Class Action, Adequacy of Representation

Where class-wide injunctive or declaratory relief is sought in a (b)(2) class action for an alleged group harm, there is a presumption of cohesion and unity between absent class members and the class representatives such that adequate representation will generally safeguard absent class members' interests and thereby satisfy the strictures of due process. This presumption of cohesion and unity continues where incidental damages are also sought because entitlement to such damages does not vary based on the subjective considerations of each class member's claim, but flows directly from a finding of liability on the claims for class-wide injunctive and declaratory relief.

Civil Procedure > Remedies > Injunctions > Permanent Injunctions

HN29[] Injunctions, Permanent Injunctions

The cohesiveness element merely requires that plaintiffs' legal injuries be similar enough that they all can be remedied with a single indivisible injunction.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN30[] Class Actions, Certification of Classes

Courts certifying antitrust-focused putative equitable relief classes have found that they meet the Fed. R. Civ. P. 23(b)(2) requirements.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN31[] Class Actions, Certification of Classes

Differences between the extent of harm suffered by each class member do not make Fed. R. Civ. P. 23(b)(2) certification inappropriate.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Notice of Class Action > Content of Notice > Opt Out Provisions

Civil Procedure > Special Proceedings > Class Actions > Voluntary Dismissals

HN32[] **Class Actions, Certification of Classes**

Under *Fed. R. Civ. P. 23* neither notice nor an opportunity to opt out is required for classes certified pursuant to *Rule 23(b)(2)*. *Fed. R. Civ. P. 23(c)*.

Opinion by: MARGO K. BRODIE

Opinion

MEMORANDUM & ORDER

MARGO K. BRODIE, United States District Judge:

A putative *Rule 23(b)(2)* class of millions of merchants commenced this antitrust action under the Clayton Act, *15 U.S.C. § 16*, to prevent and restrain violations of the *Sherman Act, 15 U.S.C. §§ 1* and *2*, and the *California Cartwright Act, Cal. Bus. & Prof. Code § 16700 et seq.*, seeking equitable relief against Defendants Visa, Inc. ("Visa") and Mastercard[1] networks (together, the "Network Defendants"), as well as various issuing and acquiring banks ("Bank Defendants").[2] *See In re Payment Card Interchange Fee & Merch. Disc. Antitrust Litig., 986 F. Supp. 2d 207, 213, 223 (E.D.N.Y. 2013)* (*Interchange Fees I*), *rev'd and vacated*, *827 F.3d 223 (2d Cir. 2016)* (*Interchange Fees II*); (Equitable Relief Class Action Compl ("Compl.")., Docket **[*122]** Entry No. 6892.) Plaintiffs seek to represent a class of merchants that accept Visa-and Mastercard-branded cards as forms of payment, and they allege that Defendants engage in anticompetitive conduct that harms competition and imposes supracompetitive and collectively fixed fees on the merchants. (Compl. ¶ 4.)

Currently before the Court is the putative *Rule 23(b)(2)* equitable relief class plaintiffs' ("Plaintiffs" or "*Rule 23(b)(2)* Class Plaintiffs")[3] motion for class certification, seeking to certify a class under *Rule 23(a)* and *Rule 23(b)(2) of the Federal Rules of Civil Procedure*. (*See* Pls.' Mot. for Class Certification ("Pls.' Mot."), Docket Entry No. 8444; Pls.' Mem. in Supp. of Pls.' Mot. ("Pls.' Mem."), Docket Entry No. 8447.) Direct Action Plaintiffs,[4] Grubhub Plaintiffs,[5] and Intervenors the Merchant Trade Groups and Walmart, Inc.[6] oppose certification of a mandatory class.[7] Defendants do not oppose class certification but argue that the class should be certified without opt-out rights. (*See* Defs.' Reply to Class Certification Opp'n ("Defs.' Reply"), Docket Entry No. 8460.)

---

[1] Defendants Mastercard Incorporated and Mastercard International Incorporated are collectively referred to as "Mastercard."

[2] Defendants Bank of America, N.A.; BA Merchant Services LLC (f/k/a Defendant National Processing, Inc.); Bank of America Corporation; Barclays Bank plc; Barclays Bank Delaware; Barclays Financial Corp.; Capital One Bank, (USA), N.A.; Capital One F.S.B.; Capital One Financial Corporation; Chase Bank USA, N.A.; Chase Manhattan Bank USA, N.A.; ChasePaymentech Solutions, LLC; JP Morgan Chase Bank, N.A.; JPMorgan Chase & Co.; Citibank (South Dakota), N.A.; Citibank N.A.; Citigroup, Inc.; Citicorp; and Wells Fargo & Company are collectively referred to as the "Bank Defendants."

[3] Documents and filings refer to the *Rule 23(b)(2)* action in a variety of ways. In the multidistrict litigation ("MDL"), the *Rule 23(b)(2)* action has proceeded as *Barry's Cut Rate Stores Inc. v. Visa, Inc.*, No. 05-MD-1720. In addition, the action has sometimes been referred to as "*Barry's*" and the class referred to as the "equitable relief class" or the "injunctive relief class." Because the *Rule 23(b)(2)* Plaintiffs seek both declaratory and injunctive relief, and because Barry's Cut Rate Stores Inc. is no longer a party to this action, the Court uses the terms "*Rule 23(b)(2)*" and "equitable relief" to refer to the action, as opposed to "*Barry's*" and "injunctive relief" action.

[4] For purposes of this Memorandum and Order, "Direct Action Plaintiffs" collectively refers to the Target Plaintiffs, the 7-Eleven Plaintiffs, and Home Depot. The Target Plaintiffs and 7-Eleven Plaintiffs in turn are comprised of many other merchants, as described in their respective complaints. (*See* Target Pls.' Second Am. Compl., Docket Entry No. 7117); Sixth Am. Compl., *7-Eleven, Inc. v. Visa Inc.*, No. 13-CV-5746 (E.D.N.Y. Apr. 30, 2020), Docket Entry No. 180; (*see also* Decl. of Jeffrey I. Shinder in Supp. of Direct Action Pls.' Class Certification Opp'n ("Shinder Decl.") ¶ 3, Docket Entry No. 8451 (listing the Direct Action Plaintiffs)).

[5] "Grubhub Plaintiffs" refers to the seven companies described in the Grubhub Plaintiffs' operative Complaint. (*See* Grubhub Pls.' Am. Compl. ¶ 1, Docket Entry No. 7906.)

[6] On June 28, 2021, the Court granted Intervenors' motion for permissive intervention pursuant to *Rule 24 of the Federal Rules of Civil Procedure* for the limited purpose of opposing the *Rule 23(b)(2)* Class Plaintiffs' motion for class certification. (*See* Mem. and Order dated June 28, 2021, Docket Entry No. 8605.) "Merchant Trade Groups" refers to the National Retail Federation (the "NRF") and the Retail Industry Leaders Association (the "RILA"). (*See id.* at 2.)

[7] (*See* Direct Action Pls.' Mem. in Opp'n to Pls.' Mot. ("Direct Action Pls.' Opp'n"), Docket Entry No. 8450; Grubhub Pls.' Mem. in Opp'n to Pls.' Mot. ("Grubhub Pls.' Opp'n"), Docket Entry No. 8454; Walmart's Mem. in Opp'n to Pls.' Mot. ("Walmart's Opp'n"), Docket Entry No. 8465; Merchant Trade Groups Mem. in Opp'n to Pls.' Mot. ("Merchant Trade Groups' Opp'n"), Docket Entry No. 8468-1.) The CenturyLink Plaintiffs, as described in their respective complaint, (*see* CenturyLink Pls.' Second Am. Compl., Docket Entry No. 7874), join in the Direct Action Plaintiffs' opposition to Plaintiffs' motion, (*see* CenturyLink Pls.' Notice of Joinder, Docket Entry No. 8475).

For the reasons set forth below, the Court grants Plaintiffs' motion for class certification **[*123]** in part and denies it in part.

I. Background

The Court assumes familiarity with the facts and extensive procedural history as set forth in prior decisions. *See* *Interchange Fees II, 827 F.3d at 223*; *In re Payment Card Interchange Fee & Merch. Disc. Antitrust Litig. (Interchange Fees IV), No. 05-MD-1720, 2019 U.S. Dist. LEXIS 217583, 2019 WL 6875472 (E.D.N.Y. Dec. 16, 2019)*; *Barry's Cut Rate Stores Inc. v. Visa, Inc., No. 05-MD-1720, 2019 U.S. Dist. LEXIS 205335, 2019 WL 7584728 (E.D.N.Y. Nov. 20, 2019)*; *In re Payment Card Interchange Fee & Merch. Disc. Antitrust Litig. (Interchange Fees III), 330 F.R.D. 11 (E.D.N.Y. 2019)*; *Interchange Fees I, 986 F. Supp. 2d at 213*; (*see also* Compl.). The Court therefore provides only a summary of the relevant facts and procedural history.

a. Prior settlement approval and class certification

On November 27, 2012, Judge John Gleeson granted preliminary approval of a jointly submitted class settlement agreement (the "2013 Settlement Agreement"). *In re Payment Card Interchange Fee & Merch. Disc. Antitrust Litig.*, No. 05-MD-1720, 2012 WL 12929536, at *1 (E.D.N.Y. Nov. 27, 2012). Judge Gleeson also provisionally certified two separate classes for settlement purposes only: (1) a mandatory *Rule 23(b)(2)* settlement class seeking equitable relief, from which class members could not opt out, and (2) a *Rule 23(b)(3)* class seeking damages, from which class members could opt out.[8] *See id.* at *1-2. After issuance of notice to the class and an allotted period for putative class members to object to or opt out of the settlement, on April 11, 2013, the parties moved for final approval of the settlement. (Notice of Mot. and Mot. for Class Pls.' Final Approval of Settlement, Docket Entry No. 2111.)

After holding a fairness hearing on September 12, 2013, Judge Gleeson granted final approval of the 2013 Settlement Agreement **[*124]** on December 13, 2013.[9] *See* *Interchange Fees I, 986 F. Supp. 2d at 213, 240*. Under the terms of the 2013 Settlement Agreement, the Defendants agreed to pay a cash award of $7.25 billion, before reductions for opt-outs and other expenses, to the *Rule 23(b)(3)* class members, and to implement reforms of the Defendants' rules and practices to settle the claims of the *Rule 23(b)(2)* class members.[10] *Id. at 213, 217*.

---

[8] Under *Rule 23*, members of a class certified under *Rule 23(b)(3)* are afforded "opt-out" rights, or the right to exclude themselves from the class. *Fed. R. Civ. P. 23(c)(2)(B)(v)*.

[9] To assist with his determination, Judge Gleeson appointed an economic and legal expert, Dr. Alan O. Sykes of New York University School of Law, to aid the court in weighing the settlement agreement and accompanying expert reports because "[t]he proponents of the settlement disagree[d] strongly with the objectors over the economic value of the proposed settlement to the class members, and specifically over the benefits of the proposed rules changes to the merchant class." *See* *Interchange Fees I, 986 F. Supp. 2d at 218*. Dr. Sykes filed his written analysis with the court on August 28, 2013. (Report from Ct. Appointed Expert Professor Alan O. Sykes, Docket Entry No. 5965.)

[10] The reforms included, among other things, "Visa and MasterCard rule modifications to permit merchants to surcharge on Visa- or MasterCard-branded credit card transactions at both the brand and product levels"; "[a]n obligation on the part of Visa and MasterCard to negotiate interchange fees in good faith with merchant buying groups"; "[a]uthorization for merchants that operate multiple businesses under different 'trade names' or 'banners' to accept Visa and/or MasterCard at fewer than all of its businesses"; and "[t]he locking-in of the reforms in the Durbin Amendment [of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010] and the [United States Department of Justice ("DOJ")] consent decree with Visa and MasterCard, even if those reforms are repealed or otherwise undone." *Interchange Fees I, 986 F. Supp. 2d at 217*. The Durbin Amendment "limited the interchange fee that issuing banks could charge for debit card purchases, and allowed merchants to discount debit card purchases relative to credit card purchases." *Interchange Fees II, 827 F.3d at 229*. In the DOJ consent decree, "after an investigation assisted by the information developed by the [P]laintiffs," and following lawsuits that the DOJ initiated against Visa, Mastercard, and American Express in 2010, *Interchange Fees I, 986 F. Supp. 2d at 215*, "Visa and

b. The Second Circuit's reversal

On June 30, 2016, the Second Circuit vacated the settlement and remanded for further proceedings. *Interchange Fees II, 827 F.3d at 240*. Objectors to the settlement and plaintiffs that chose to opt out of the class prior to final approval argued on appeal that the "class action was improperly certified and that the settlement was unreasonable and inadequate." *Id. at 227*. The Second Circuit agreed that the class was improperly certified and held that the class certification requirement of adequate representation under *Rule 23(a)(4)* had not been satisfied.[11] *Id.* The Court found that an inherent conflict of interest existed because a single set of counsel represented both the (b)(2) and (b)(3) class interests. *See id. at 233-35*.

Because of the conflict, the Court concluded that "members of the (b)(2) class were inadequately represented." *Id. at 231*. Relying on Supreme Court precedent, the Second Circuit held **[*125]** that settlement classes that consist of holders of present claims, such as the (b)(3) class seeking monetary relief for *past* harm, and holders of future claims, such as the (b)(2) class seeking injunctive relief to reform current and *future* rules and policies of the Defendants, must be divided "into homogenous subclasses . . . with separate representation." *Id. at 234* (quoting *Ortiz v. Fibreboard Corp., 527 U.S. 815, 856, 119 S. Ct. 2295, 144 L. Ed. 2d 715 (1999)*).

The Second Circuit also found that the issues stemming from unitary representation were exacerbated by the inability of members of the (b)(2) class to opt out of the settlement or from their release of claims against Defendants. *See id. at 231, 234*; *id. at 241* (Leval, J., concurring). The Court expressed further concern that the injunctive relief secured for the (b)(2) class would not apply uniformly to benefit all (b)(2) class members. *See id. at 238*. For example, the Court noted that (b)(2) merchants that operated in certain states would be prohibited from surcharging costs to customers at the point of sale, as permitted under the 2013 Settlement Agreement, while merchants that operated in other states would not be prohibited from doing so. *See id. at 230-31* (noting that "[t]he incremental value and utility of [surcharging] relief is limited, however, because many **[*126]** states, including New York, California, and Texas, prohibit surcharging as a matter of state law"); *id. at 238-39* ("A significant proportion of merchants in the (b)(2) class are either legally or commercially unable to obtain incremental benefit from the primary relief . . . and class counsel knew at the time the Settlement Agreement was entered into that this relief was virtually worthless to vast numbers of class members.").[12] Despite these significant concerns, the Second Circuit did not abrogate Judge Gleeson's analysis in its entirety, and the majority of its concerns were circumscribed to representation and relief afforded to the (b)(2) injunctive class.

c. Relevant subsequent proceedings

MasterCard agreed to remove their rules prohibiting merchants from product-level discounting of credit and debit cards," *id.; see also Interchange Fees II, 827 F.3d at 229* ("[P]ursuant to a consent decree with the Department of Justice in 2011, Visa and Mastercard agreed to permit merchants to discount transactions to steer consumers away from credit cards use. None of these developments affected the honor-all-cards or no-surcharging rules, or the existence of a default interchange fee.").

[11] In particular, the Second Circuit found that unitary representation of the classes violated *Rule 23(a)(4)* — the class certification requirement that representative parties adequately protect the interests of the class — and the Due Process Clause, which requires that named plaintiffs in a class action adequately protect the interests of absent class members. *Interchange Fees II, 827 F.3d at 228, 231*.

[12] The Court notes that the landscape of state no-surcharging laws is changing. For example, in 2017, the Supreme Court held that a New York state statute that prohibited merchants from imposing a surcharge on customers using credit cards regulated speech, and the court remanded the matter to the Second Circuit to determine whether such speech regulation violates the *First Amendment*. *See Expressions Hair Design v. Schneiderman, 581 U.S. ---, 137 S. Ct. 1144, 1146 (Mar. 29, 2017)*. In addressing a similar California statute, in 2018, the Ninth Circuit held that the statute violated *First Amendment* commercial free speech rights. *Italian Colors Rest. v. Becerra, 878 F.3d 1165, 1179 (9th Cir. 2018)*. Also in 2018, a federal district court in Texas relied on *Expressions Hair Design* to hold that the state's anti-surcharge statute was unconstitutional as applied to the merchants in the case. *See Rowell v. Paxton, 336 F. Supp. 3d 724, 732 (W.D. Tex. 2018)*.

After remand, on August 11, 2016, the Court held a case management conference to discuss, among other items, the Second Circuit's decision.[13] (*See* Min. Entry dated Aug. 11, 2016, Docket Entry No. 6654.) In order to address the Second Circuit's concerns regarding unitary representation of the classes, on November 30, 2016, pursuant to *Rule 23(g)(3)*, the Court appointed two separate groups of interim co-lead counsel to represent (1) merchants seeking certification under *Rule 23(b)(2)* for equitable relief, and (2) merchants seeking **[*127]** certification under *Rule 23(b)(3)* for monetary damages.[14] Interim Class Counsel Order 1; *see also In re Payment Card Interchange Fee & Merch. Disc. Antitrust Litig., No. 05-MD-1720, 2017 U.S. Dist. LEXIS 160045, 2017 WL 4325812, at *4 (E.D.N.Y. Sept. 27, 2017)* (discussing Interim Class Counsel Order). The Court appointed the Nussbaum Law Group, P.C., Hilliard & Shadowen LLP, Freed Kanner London & Millen LLC, and Grant & Eisenhofer P.A. ("Class Counsel") to serve as interim *Rule 23(b)(2)* Class Counsel for the merchants seeking equitable relief, and appointed Robins Kaplan LLP, Berger & Montague P.C., and Robbins Geller Rudman & Dowd LLP (the "Robins Group") to serve as interim *Rule 23(b)(3)* class counsel for the merchants seeking damages relief — the same three firms that represented the entire consolidated class in the proceedings before Judge Gleeson.[15] (*See* Interim Class Counsel Order 1.)

d. Class Plaintiffs' allegations

On March 31, 2017, *Rule 23(b)(2)* Class Counsel filed a complaint on behalf of the *Rule 23(b)(2)* representative class plaintiffs and a putative *Rule 23(b)(2)* class. (Compl.) The *Rule 23(b)(2)* Plaintiffs challenge "Defendants' collusive and anticompetitive practices . . . [that] harm[] competition and impose[] upon Plaintiffs and Class Members supracompetitive, exorbitant, and collectively-fixed prices" in violation of *Sections 1* and *2* of the Sherman Act, and the California Cartwright Act. (*Id.* ¶¶ 4-5.) Plaintiffs bring their **[*128]** claims under *Section 16* of the Clayton Act, seeking equitable relief "to prevent and restrain violations" of the Sherman Act and California Cartwright Act. (*Id.* ¶ 6.)

The seven named Plaintiffs are merchants that accept payment by Visa-and Mastercard-branded cards.[16] (*See id.* ¶¶ 10-18.) The named Plaintiffs are comprised of two "combination bar and videogame arcade[s]" with their principal places of business in Chicago, Illinois; "a family dental practice that also engages in the retail selling of dental supplies" with its principal place of business in Corpus Christi, Texas; a "business internet service provider" with its principal place of business in Coral Gables, Florida; a "business information technology support provider" with its principal place of business in Miami, Florida; a pharmacy with its principal place of business in Tamarac, Florida; and a beauty salon with its principal place of business in Flowery Branch, Georgia. (*Id.* ¶¶ 11-15, 17-18.)

Plaintiffs allege that Defendants (1) impose supracompetitive interchange fees on Visa and Mastercard transactions and (2) facilitate these anticompetitive practices by forcing merchants to abide by anti-steering and other restraints.[17] (*See id.*) Plaintiffs **[*129]** also allege that this anticompetitive behavior causes antitrust injury common

[13] On December 14, 2014, the litigation was reassigned from Judge Gleeson to the undersigned. (Judicial Panel on Multidistrict Litigation Order Reassigning Case, Docket Entry No. 6359.)

[14] Magistrate Judge James Orenstein, who managed discovery and other matters in this litigation for many years, decided the Class Counsel motions. (Mem. and Order dated Nov. 30, 2016 ("Interim Class Counsel Order") 1, Docket Entry No. 6754.)

[15] In September of 2018, the (b)(3) class jointly filed for preliminary approval of a proposed settlement, and in January of 2019, the Court preliminarily approved the proposed settlement. *See Interchange Fees III, 330 F.R.D. 11, 11 (E.D.N.Y. 2019)*. In June of 2019, the (b)(3) class plaintiffs filed a motion for final approval of the settlement, and in December of 2019, the Court granted the motion for final approval. *See Interchange Fees IV, 2019 U.S. Dist. LEXIS 217583, 2019 WL 6875472, at *36*. The final approval order is currently on appeal to the Second Circuit.

[16] Barry's Cut Rate Stores, Inc. and Town Kitchen, LLC d/b/a Town Kitchen & Bar were initially part of the original nine proposed class representatives, (*see* Compl.), but they dismissed their claims in March of 2018, (*see* Stipulation and Order of Dismissal, Docket Entry No. 7171).

to Plaintiffs and putative class members and will continue to cause harm unless enjoined. (*See id.* ¶ 19.) Plaintiffs contend that "[e]ven after litigation, legislation, and regulation forced needed reforms on the Defendants and technology threatened to disrupt Visa and MasterCard's dominant position in the marketplace, the Defendants used their market power to continue to restrain competition." (*Id.* ¶ 1.) In addition, although the rule changes resulting from the Durbin Amendment, the DOJ consent decree, and the 2013 Settlement Agreement "were steps in the right direction for [m]erchants," Plaintiffs continue to suffer antitrust injury due to current anti-steering restraints, "and as a result of the continuing effects of decades of enforcement of the [n]o-[s]urcharge [r]ule and the prior versions of the restraints." (*Id.* ¶ 165.)

Plaintiffs seek declaratory and injunctive relief against all Defendants. They request a declaratory judgment, pursuant to *Rule 57 of the Federal Rules of Civil Procedure* and *28 U.S.C. § 2201(a)*, declaring that Defendants' conduct is unlawful as alleged in the Complaint, (*id.* ¶ 426), and further request that the Court enjoin and restrain the **[*130]** wrongful conduct alleged in the Complaint, pursuant to *Section 16* of the Clayton Act, (*id.* ¶ 428).

As to all Defendants, including Bank Defendants, Plaintiffs request, among other things, that the Court: "[d]eclare, adjudge, and decree that Defendants have committed the violations of the federal and state antitrust laws" alleged in the Complaint; "[o]rder that Defendants, their directors, officers, employees, agents, successors, members, and all persons in active concert and participation with them be enjoined and restrained from, in any manner, directly or indirectly, committing the violations of the Cartwright and Sherman Acts"; and "[g]rant further relief as is necessary to correct for the anticompetitive market effects caused by Defendants' unlawful conduct." (*Id.* at 106-07.)

In April of 2019, the Bank Defendants moved to dismiss the *Rule 23(b)(2)* Plaintiffs' Complaint. (*See* Bank Defs.' Mot. to Dismiss, Docket Entry No. 7399.) In November of 2019, the Court denied the motion, finding that Plaintiffs had Article III standing and that they alleged an ongoing antitrust conspiracy. *See Barry's Cut Rate Stores Inc., 2019 U.S. Dist. LEXIS 205335, 2019 WL 7584728, at *34*.

e. *Rule 23(b)(2)* Plaintiffs' motion for class certification

On May 4, 2021, Plaintiffs filed their fully briefed motion for certification of a *Rule 23(b)(2)* class. **[*131]** [18] (Pls.' Mot.) In their motion for class certification, Plaintiffs seek to certify the following equitable relief class under *Rule 23(a)* and *Rule 23(b)(2)*:

> All persons, businesses, and other entities (referred to herein as "Merchants") that accept Visa and/or Mastercard Credit and/or Debit cards in the United States at any time during the period between December 18, 2020 and 8 years after the date of entry of Final Judgment in this case.

(Pls.' Mem. 5.) Plaintiffs argue that they satisfy the requirements of *Rule 23(a)* because the proposed class is sufficiently numerous, legal and factual issues are common to all class members, the named Plaintiffs' claims are typical of class members' claims, and Plaintiffs and co-counsel will fairly and adequately represent the class. (*See Id.* at 23-32.) Plaintiffs also argue that they satisfy the requirements of *Rule 23(b)(2)* because Defendants'

---

[17] The challenged network rules and restraints include the default interchange fees, no-surcharge rules, honor-all-cards rules, no-discount rules, no-bypass rule, and Visa and Mastercard's discrimination rules, (*see* Pls.' Mem. 2 n.5), are sometimes referred to as the "Restraints" or "Anti-Steering Restraints" for purposes of this Memorandum and Order. The Restraints have been described at length in previous decisions. *See Barry's Cut Rate Stores Inc., 2019 U.S. Dist. LEXIS 205335, 2019 WL 7584728, at *2-12*; *Interchange Fees II, 827 F.3d at 228-29*; *Interchange Fees I, 986 F. Supp. 2d at 213-15*.

[18] In December of 2020, *Rule 23(b)(2)* Plaintiffs, Direct Action Plaintiffs, and Defendants filed several fully briefed motions for summary judgment, as well as several *Daubert* motions. (*See* Defs.' Notice of Mot. for Summ. J., Docket Entry No. 8067; Target Pls.' Notice of Mot. for Partial Summ. J., Docket Entry No. 8097; Pls.' Notice of Mot. for Partial Summ. J., Docket Entry No. 8150; Elgin Pl.'s Notice of Mot. for Partial Summ. J., Docket Entry No. 8178; 7-Eleven Pls.' and Home Depot Pls.' Notice of Mot. for Partial Summ. J., Docket Entry No. 8184.) The Court addresses the order in which the motions will be decided in Section II.b *infra*.

imposition and enforcement of the interchange fee, honor-all-cards rules, and no-surcharge rules apply to each member of the class, market definitions and market power can be evaluated on a classwide basis and would apply to all members of the class, and Plaintiffs seek classwide relief. (*See id.* at 32-45.) Finally, Plaintiffs argue that the class should **[*132]** be certified as a mandatory class because non-opt-out classes are the default in *Rule 23(b)(2)* classes. (*See id.* at 46-50.)

f. Opposition to Plaintiffs' motion for class certification

i. Direct Action Plaintiffs' opposition

Direct Action Plaintiffs oppose Plaintiffs' motion for class certification and argue that the class should not be certified as proposed. (*See* Direct Action Pls.' Opp'n.) Direct Action Plaintiffs argue that certification of a class without opt-out rights violates due process by risking the preclusion of individualized damages claims and violates due process and *Rule 23* by extinguishing valuable injunctive relief claims. (*See id.* at 6-16.) They further argue that the proposed class lacks cohesion and is not adequately represented. (*See id.* at 16-23.) In addition, they contend that the constitutional and *Rule 23* issues with the proposed class can be cured by allowing members of the putative *Rule 23(b)(2)* class to opt out or by redefining the proposed class to "exclude the Direct Action Plaintiffs and other entities who opted out of the *Rule 23(b)(3)* settlement." (*See id.* at 23-25.)

ii. Grubhub Plaintiffs' opposition

Like Direct Action Plaintiffs, Grubhub Plaintiffs also oppose certification of a mandatory class. **[*133]** (*See* Grubhub Pls.' Opp'n.) Grubhub Plaintiffs argue that the (b)(2) class, as proposed, is not cohesive because the Grubub Plaintiffs are "distinct from the vast majority of putative class members" and that the putative class would not adequately represent them because there are "conflicts of interest between named parties and the class they seek to represent." (*Id.* at 9-13.) Grubhub Plaintiffs further argue that certification of the class as defined would violate due process and that "[t]he due process, cohesion, and adequacy of representation issues" can be solved by affording opt-out rights to the Grubhub Plaintiffs "and other entities that opted out of the *Rule 23(b)(3)* settlement." (*Id.* at 13-18.)

iii. Intervenors' opposition

Intervenors Walmart and the Merchant Trade Groups also oppose Plaintiffs' class certification motion. (*See* Walmart Opp'n; Merchant Trade Groups' Opp'n.) Walmart argues that the proposed class lacks adequacy of representation because the *Rule 23(b)(2)* Plaintiffs will "undermine the interests of many absent class members" including Walmart and lacks cohesion because Plaintiffs "will not seek an injunction that benefits the entire class." (Walmart Opp'n 9-20.) Walmart further argues that **[*134]** the Court should either deny class certification, grant Walmart an opt-out right, or exclude Walmart from the class. (*Id.* at 20-22.)

Merchant Trade Groups argue that the class certified should not include future class member merchants because their claims are too hypothetical and speculative, and because including future class members would raise due process concerns as well as invite litigation for years to come since future class members will need to ask a court whether they were adequately represented by this litigation. (Merchant Trade Groups' Opp'n 18-26.) In addition, Merchant Trade Groups contend that Plaintiffs fail to satisfy the commonality and ascertainability requirements as to future merchants because the credit-and debit-card industry is rapidly changing and Plaintiffs have not justified an eight-year temporal limitation. (*See id.* at 18-22, 24-26; Merchant Trade Groups' Resp. to Defs.' Reply and Pls.' Reply ("Merchant Trade Groups' Sur-Reply") 5-9, Docket Entry No. 8479.) Like the other parties who oppose certification of a mandatory class, Merchant Trade Groups argue that the Court should allow merchants to opt out of the (b)(2) class because not all Plaintiffs seek the **[*135]** same injunctive relief, merchants encompassed by the broad proposed class are different from the named class representatives in size and structure, and opt-out rights are the traditional "escape valve" for intra-class disputes. (Merchant Trade Groups' Opp'n 7-18.)

iv. Defendants' position

Defendants do not oppose class certification as Plaintiffs define it but argue that the Court "should not certify the *Rule 23(b)(2)* class and allow opt-outs or carve outs from the class, or exclude the future merchants from the class as the opponents of class certification . . . suggest." (Defs.' Reply 1.) Defendants contend that opt-outs should not be permitted because *Rule 23* does not provide for opt-outs from a *Rule 23(b)(2)* class, neither due process nor the potential for collateral estoppel require that opt-out rights be provided, and none of the cases cited by the class certification opponents support the exercise of the Court's discretion to provide opt-out rights. (*See id.* at 9-17.) In addition, Defendants argue that the Court should not redefine the class to carve out any class members from the proposed class definition for the same reason. (*See id.* at 17-18.) Finally, Defendants argue that the Court should not exclude future **[*136]** class members from the proposed class because the challenged network rules and equitable relief sought would apply generally to future merchants and because there is "no legitimate basis" to exclude them. (*See id.* at 18-23.)

II. Discussion

a. Standard of review

HN1[] *Rule 23 of the Federal Rules of Civil Procedure* sets forth a two-step process for certification as a class action. First, the plaintiff must satisfy the four prerequisites set forth in *Rule 23(a)*:

> (1) the class is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class; (3) the claims or defenses of the representative parties are typical of the claims or defenses of the class; and (4) the representative parties will fairly and adequately protect the interests of the class.

Fed. R. Civ. P. 23(a); *Kurtz v. Costco Wholesale Corp., 818 F. App'x 57, 60 (2d Cir. 2020)* ("To proceed with a class action, a plaintiff must satisfy four prerequisites under *Rule 23*: numerosity, commonality, typicality, and adequacy." (citing *Fed. R. Civ. P. 23(a)*)). The class must also satisfy the implied requirement of ascertainability under *Rule 23(a)*. *See* *In re Petrobras Sec., 862 F.3d 250, 266 (2d Cir. 2017)*; *de* *Lacour v. Colgate-Palmolive Co., 338 F.R.D. 324, 334 (S.D.N.Y. Apr. 23, 2021)* ("[T]he Second Circuit has recognized that *Rule 23* contains 'an implied requirement' that a class be "ascertainable." (quoting *In re Petrobras Sec., 862 F.3d at 260*)). In addition to satisfying the *Rule 23(a)* requirements, the proposed class must also qualify "under one of **[*137]** three subsection *Rule 23(b)* categories." *Bruce E. Katz, M.D., P.C. v. Pro. Billing Collections, LLC, No. 20-CV-3043, 2021 U.S. Dist. LEXIS 111188, 2021 WL 2418387, at *2 (S.D.N.Y. June 14, 2021)*; *see also* *Fed. R. Civ. P. 23(b)*; *Sykes v. Mel S. Harris & Assocs. LLC, 780 F.3d 70, 80 (2d Cir. 2015)* ("Beyond these prerequisites, *Rule 23(b)* provides additional considerations for a district court to consider prior to the certification of a class.").

"*Rule 23* ***HN2***[] does not set forth a mere pleading standard." *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*. "The party seeking class certification bears the burden of demonstrating compliance with *Rule 23*'s prerequisites by a preponderance of the evidence." *Kurtz, 818 F. App'x at 60* (citing *Miami Grp. v. Vivendi, S.A. (In re Vivendi, S.A. Sec. Litig.), 838 F.3d 223, 264 (2d Cir. 2016)*); *Batalla Vidal v. Wolf, 501 F. Supp. 3d 117, 134 (E.D.N.Y. 2020)* (same). "The Second Circuit has emphasized that *Rule 23* should be given liberal rather than restrictive construction, and it seems beyond peradventure that the Second Circuit's general preference is for granting rather than denying class certification." *Espinoza v. 953 Assocs. LLC, 280 F.R.D. 113, 124 (S.D.N.Y. 2011)* (quoting *Gortat v. Capala Bros., Inc., 257 F.R.D. 353, 361 (E.D.N.Y. 2009)*, *aff'd*, *568 F. App'x 78 (2d Cir. 2014)*); *see also* *Newkirk v. Pierre, No. 19-CV-4283, 2020 U.S. Dist. LEXIS 155539, 2020 WL 5035930, at *5 (E.D.N.Y. Aug. 26, 2020)* ("[T]he Second Circuit has emphasized that *Rule 23* should be given a 'liberal rather than restrictive construction.'" (quoting *Marisol A. v. Giuliani, 126 F.3d 372, 375 (2d Cir. 1997)*)). "The district court is afforded broad discretion in class certification questions because it is often in the best position to assess the propriety of the class action." *Zivkovic v. Laura Christy LLC, 329 F.R.D. 61, 68 (S.D.N.Y. 2018)* (citing *Sumitomo Copper Litig. v. Credit Lyonnais Rouse, Ltd., 262 F.3d 134, 139 (2d Cir. 2001)*).

b. Sequence of deciding the pending motions

Because there are several pending motions in this MDL, the Court first addresses the sequence in which it intends to decide the instant motions.

Defendants argue that the Court should **[*138]** decide Plaintiffs' motion for class certification and the issue of whether opt-outs and exclusions will be permitted before it decides the pending motions for summary judgment and *Daubert* motions. (*See* Defs.' Letter Mot. for Hearing on Case Mgmt. ("Defs.' Case Mgmt. Letter"), Docket Entry No. 8425.) In support, Defendants argue that deciding the motions for summary judgment will raise an issue the Second Circuit has referred to as the "one-way intervention" problem. (*Id.* at 2 (citing *Brecher v. Republic of Argentina, 806 F.3d 22, 26 (2d Cir. 2015)*).) Defendants contend that if a decision on certification of an opt-out class is deferred until after summary judgment, potential class members could wait "for a merits determination, and then, depending on the Court's judgment, choose to remain in or opt out of the class (once certified) in the way that benefits them." (*Id.*) To prevent this problem, Defendants argue that the "'ordinary' rule in this Circuit is that a 'court's decision on the merits' should 'not occur before or simultaneous with a decision on class certification.'" (*Id.* (quoting *Cuzco v. Orion Builders, Inc., 262 F.R.D. 325, 335-36 (S.D.N.Y. 2009)*).) Defendants assert that while the one-way intervention issue does not usually arise "in the context of a typical mandatory *Rule 23(b)(2)* class from which exclusions are **[*139]** not permitted," the objectors' proposal to allow opt-outs from the class raises the risk of a one-way intervention issue. (*Id.*) In addition, Defendants contend that resolving the class certification motions first would "facilitate the efficient and fair resolution of the remaining actions in the MDL" because it would "clarify for the parties in the remaining actions . . . the range of remedies available" and because it would resolve the "relatively discrete legal issues" presented at the class certification stage before addressing the complex summary judgment motions and motions in limine. (*Id.* at 2-3.)

Direct Action Plaintiffs argue that the Court should not delay resolving the summary judgment motions until resolution of Plaintiffs' motion for class certification. (*See* Pls.' Resp. to Defs.' Case Mgmt. Letter, Docket Entry No. 8427.) In support, Direct Action Plaintiffs argue that (1) there is no risk of the one-way intervention problem and (2) in any event, Defendants waived any one-way intervention argument. (*See id.* at 2.) Direct Action Plaintiffs argue that there is no one-way intervention problem because they have done the opposite of sitting on the sidelines to wait for a merits **[*140]** determination and instead have proactively litigated their cases by opting out of the *Rule 23(b)(3)* settlement and fully briefing their own summary judgment and *Daubert* motions. (*Id.* at 1.) As to the majority of other merchants, Direct Action Plaintiffs contend that there is no meaningful risk of one-way intervention because all merchants that remained in the (b)(3) settlement released "any and all manner of claims," including claims for damages and for injunctive, declaratory, or other equitable relief except as sought through the proposed (b)(2) class, except for the 675 merchants who opted out. (*Id.* at 2 (quoting Final Approval Order ¶ 16, Docket Entry No. 7818).) Therefore, Direct Action Plaintiffs argue that only the limited set of merchants who opted out and have not settled their claims could pursue individual claims for equitable relief should an opt-out right in any certified (b)(2) class be provided. (*See id.*) In addition, Direct Action Plaintiffs argue that Defendants waived their one-way intervention argument because they (1) agreed that a summary judgment motion by the Plaintiffs could be submitted in advance of their class certification motion, (2) moved for summary judgment against **[*141]** all Plaintiffs including Direct Action Plaintiffs and the *Rule 23(b)(2)* Plaintiffs before class certification was briefed, and (3) decided not to oppose the motion for certification of the (b)(2) class. (*See id.* at 2-3.) Direct Action Plaintiffs argue that Defendants' conduct reinforces waiver because they agreed to twelve extensions of the class certification motions, and, as a result of these extensions, the class certification motion was served after the parties moved for summary judgment. (*See id.* at 3.) Direct Action Plaintiffs state that with each extension request, they repeatedly expressed concern that the Defendants would use repeated delays of the (b)(2) class certification motion to delay the decision on summary judgment. (*See id.* at 4.)

HN3[] The Second Circuit has stated that "[t]he expansion of [a] class after a judgment on liability . . . raises the specter of one-way intervention." Brecher, 806 F.3d at 26. The one-way intervention problem arises when a decision on certification of an opt-out class is deferred until after a decision on the merits, which enables potential class members to "wait[] on the sidelines" for a merits determination and then choose to remain in or opt out of the class once certified in **[*142]** a way that benefits them. *See id.* (quoting Amati v. City of Woodstock, 176 F.3d 952, 957 (7th Cir. 1999)). As the Second Circuit has observed, "Rule 23 was substantially amended in 1966, in part to prevent prejudice to defendants that can arise when a determination of class certification is postponed until after trial." Philip Morris Inc. v. Nat'l Asbestos Workers Med. Fund, 214 F.3d 132, 134 (2d Cir. 2000) (per curiam). The advisory committee note to Rule 23(c)(3) highlights this concern:

> Hitherto, in a few actions conducted as "spurious" class actions and thus nominally designed to extend only to parties and others intervening *before* the determination of liability, courts have held or intimated that class members might be permitted to intervene *after* a decision on the merits favorable to their interests, in order to secure the benefits of the decision for themselves, although they would presumably be unaffected by an unfavorable decision. . . . Under proposed subdivision (c)(3), one-way intervention is excluded; the action will have been early determined to be a class or nonclass action, and in the former case the judgment, whether or not favorable, will include the class, as above stated.

Fed. R. Civ. P. 23 advisory committee's note to 1966 amendment; *see also* Weissman v. Collecto, Inc., No. 17-CV-4402, 2019 U.S. Dist. LEXIS 8600, 2019 WL 254035, at *9 (E.D.N.Y. Jan. 17, 2019) ("The prejudice that Congress sought to address through the 1966 amendments arose from a practice called 'one-way intervention,' **[*143]** in which 'absent class members in a spurious action were permitted [to] intervene after a favorable judgment, while at the same time they were not bound by an unfavorable decision.'" (alteration in original) (quoting Eisen v. Carlisle & Jacquelin, 391 F.2d 555, 560 n.2 (2d Cir. 1968)). HN4[] Accordingly, courts within the Second Circuit and other circuit courts have held that "in general, issues relating to class certification should be decided before a decision on the merits is rendered." Mendez v. Radec Corp., 260 F.R.D. 38, 44 (W.D.N.Y. 2009); *see also* Bertrand v. Maram, 495 F.3d 452, 455 (7th Cir. 2007) ("Class-action status must be [decided] . . . early to clarify who will be bound by the decision."); Weissman, 2019 U.S. Dist. LEXIS 8600, 2019 WL 254035, at *9 ("Given concerns about one-way intervention, 'issues relating to class certification should' generally 'be decided before a decision on the merits is rendered.'" (quoting Mendez, 260 F.R.D. at 44)); Kurtz v. Kimberly-Clark Corp., 321 F.R.D. 482, 507 (E.D.N.Y. 2017) (describing "deciding class certification prior to deciding summary judgment" as the "traditional route" and holding motion for summary judgment in abeyance because the parties had not conducted "sufficient discovery" to decide the summary judgment motions); In re Cablevision Consumer Litig., No. 10-CV-4992, 2014 U.S. Dist. LEXIS 44983, 2014 WL 1330546, at *16 (E.D.N.Y. Mar. 31, 2014) (deciding class certification before deciding the plaintiffs' motion for summary judgment and granting the plaintiffs "leave to re-file the motion after the class has received notice consistent with Rule 23 and has been provided with an **[*144]** opportunity to opt out of the suit"); Cuzco, 262 F.R.D. at 335 (declining to decide both the plaintiffs' and the defendants' cross-motions for summary judgment at the same time as certifying a Rule 23(b)(3) class and stating that "[a] court's decision on the merits, however, should ordinarily not occur before or simultaneous with a decision on class certification" (citing Philip Morris Inc., 214 F.3d at 135)).

HN5[] However, courts in the Second Circuit have recognized that there is "authority that a defendant can waive any objection to a decision on the merits prior to, or simultaneous with, a decision on class certification." Mendez, 260 F.R.D. at 45; *see also* Curtin v. United Airlines, Inc., 275 F.3d 88, 93, 348 U.S. App. D.C. 309 (D.C. Cir. 2001) ("[W]here the merits of the plaintiffs' claims can be readily resolved on summary judgment, where the defendant seeks an early disposition of those claims, and where the plaintiffs are not prejudiced thereby, a district court does not abuse its discretion by resolving the merits before considering the question of class certification."); Schweizer v. Trans Union Corp., 136 F.3d 233, 239 (2d Cir. 1998) ("The decision to award summary judgment before acting on class certification [is] well within the discretion of the trial court."); Cowen v. Bank United of Texas, FSB, 70 F.3d 937, 941 (7th Cir. 1995) (finding that the defendant may elect to seek summary judgment prior to decision on class certification as a "way to try to knock . . . off [the action] at low **[*145]** cost," by disqualifying the named plaintiffs as proper class representatives, in order to moot the question whether to certify the suit as a class action); Weissman, 2019 U.S. Dist. LEXIS 8600, 2019 WL 254035, at *9 (quoting Mendez, 260 F.R.D. at 45); Bitzko v. Weltman, Weinberg & Reis Co., LPA, No. 17-CV-458, 2019 U.S. Dist. LEXIS 161495, 2019 WL 4602329, at *11 (N.D.N.Y. Sept. 23, 2019) ("Courts in the Second Circuit and elsewhere have recognized that 'a defendant can waive any objection to a decision on the merits prior to, or simultaneous with, a decision on class certification.' This waiver can be express or implied through the defendant's motion for summary [judgment] before class certification." (citation omitted) (quoting Mendez, 260 F.R.D. at 45));[19] Reynolds v. Barrett, 741 F. Supp. 2d 416, 424-25 (W.D.N.Y. 2010), *aff'd*, 685 F.3d 193 (2d Cir. 2012) (quoting Mendez, 260 F.R.D. at 45); Vega v. Credit Bureau Enters., No. 02-CV-1550, 2005 U.S. Dist. LEXIS 4927, 2005 WL 711657, at *10 (E.D.N.Y. 2005) (granting simultaneous motions for class certification and summary judgment). Courts that have decided summary judgment either before or simultaneously with class action motions have generally done so when the defendants moved for summary judgment as opposed to the plaintiffs. *See, e.g.,* Weissman, 2019 U.S. Dist. LEXIS 8600, 2019 WL 254035, at *9 (finding that when the defendant moved for summary judgment and "[i]n light of [the] [d]efendant's unambiguous decision to not oppose [the] [p]laintiff's motion for class certification, . . . [the] [d]efendant has waived any objection to the [c]ourt's disposition of its motion for summary judgment simultaneously with [the] [p]laintiff's motion for class certification"); **[*146]** Mendez, 260 F.R.D. at 48 ("[D]efendants have the right — should they choose to exercise it — to have class certification issues decided first, before any decision on the merits of the plaintiffs' claims. Defendants here never invoked that right, however. As stated, they thereby implicitly waived that right."); Reynolds, 741 F. Supp. 2d at 425 (finding that the defendants "implicitly waived any right they may have had to have class certification issues decided first" when the defendants moved for summary judgment).

Rule 23(b)(2) Plaintiffs, Direct Action Plaintiffs, and Defendants all moved for summary judgment before the class certification motion was fully briefed. (*See* Pls.' Notice of Mot. for Partial Summ. J.; Target Pls.' Notice of Mot. for Partial Summ. J.; Elgin Pl.'s Notice of Mot. for Partial Summ. J.; 7-Eleven Pls.' and Home Depot Pls.' Notice of Mot. for Partial Summ. J.; Defs.' Notice of Mot. for Summ. J.) However, a central issue briefed in the class certification papers concerns whether parties will be permitted to opt out from the Rule 23(b)(2) class. While Plaintiffs seek certification of a mandatory class pursuant to Rule 23(b)(2), (*see* Pls.' Mem. 6), Direct Action Plaintiffs seek opt-out rights and argue that a mandatory class would threaten the individualized **[*147]** monetary claims of class members who are pursuing damages claims, (*see* Direct Action Pls.' Opp'n). Defendants do not oppose certification of the Rule 23(b)(2) class but argue that the Court should not permit opt-outs from the proposed class. (*See* Defs.' Reply.) Both Intervenors oppose certification of a mandatory class and seek opt-out rights. (*See* Merchant Trade Groups' Sur-Reply,; Letter Joining Direct Action Pls.' and Merchant Trade Group's Sur-Replies, Docket Entry No. 8480.) In view of the arguments concerning opt-out rights and the potential for an ensuing one-way intervention problem, the Court decides the class certification motion before considering the summary judgment motions.[20]

---

[19] The defendants in Bitzko v. Weltman, Weinberg & Reis Co., LPA, requested that the court decide the class certification motion before deciding the pending summary judgment motions. No. 17-CV-458, 2019 U.S. Dist. LEXIS 161495, 2019 WL 4602329, at *11 (N.D.N.Y. Sept. 23, 2019).

[20] The Court acknowledges that there are also several pending *Daubert* motions filed by the parties. "Although '[t]he Supreme Court has not definitively ruled on the extent to which a district court must undertake a *Daubert* analysis at the class certification stage,' it has 'offered limited dicta suggesting that a *Daubert* analysis may be required at least in some circumstances.'" In re Foreign Exch. Benchmark Rates Antitrust Litig., 407 F. Supp. 3d 422, 429 (S.D.N.Y. Sept. 3, 2019) (alteration in original) (quoting In re U.S. Foodservice Inc. Pricing Litig., 729 F.3d 108, 129 (2d Cir. 2013)). Similarly, "the Second Circuit has not resolved whether and to what extent *Daubert* applies at the class certification stage." Royal Park Invs. SA/NV v. U.S. Bank Nat'l Ass'n, 324 F. Supp. 3d 387, 393 (S.D.N.Y. 2018) (citing In re LIBOR-Based Fin. Instruments Antitrust Litig., 299 F. Supp. 3d 430, 470 (S.D.N.Y. 2018) (collecting cases)). "Despite this lack of clarity, courts in the Second Circuit regularly 'subject expert testimony to *Daubert*'s rigorous standards insofar as that testimony is relevant to the Rule 23 class certification analysis.'" Bowling v. Johnson & Johnson, No. 17-CV-3982, 2019 U.S. Dist. LEXIS 67795, 2019 WL 1760162, at *7 (S.D.N.Y. Apr. 22, 2019) (quoting Scott v. Chipotle Mexican Grill, Inc., 315 F.R.D. 33, 55 (S.D.N.Y. 2016)); *see also* In re Restasis (Cyclosporine Ophthalmic Emulsion) Antitrust Litig., No. 18-MD-2819, 2020 U.S. Dist. LEXIS 82723, 2020 WL 2280144, at *2 (E.D.N.Y. May 5, 2020) (same). "In these instances, the 'scope of the *Daubert* analysis is cabined by its purpose at this stage: the inquiry is limited to whether or not the expert reports are admissible to establish the requirements of Rule 23.'" Bowling, 2019 U.S. Dist. LEXIS 67795, 2019 WL 1760162, at *7 (quoting Chen-Oster v. Goldman, Sachs & Co., 114 F. Supp. 3d 110, 115 (S.D.N.Y. 2015)). "In other words, '[t]he question is not . . . whether a jury at trial should be permitted to rely on [the expert's] report to find facts as to

c. *Rule 23(a)* requirements

The Court first addresses the explicit *Rule 23(a)* requirements of numerosity, commonality, typicality, and adequacy, and then addresses the implied factor of ascertainability.

i. Numerosity

Plaintiffs argue that the numerosity requirement is met because the proposed class is "comprised of millions of [m]erchants throughout the United **[*148]** States who accept Defendants' [p]ayment [c]ards" and the numerosity requirement is "generally . . . satisfied when a proposed class includes over [forty] members." (Pls.' Mem. 25 (first citing *Consol. Raid Corp. v. Town of Hyde Park, 47 F.3d 473, 483 (2d Cir. 1995)*; and then citing *B & R Supermarket, Inc. v. Mastercard Int'l, Inc. (B & R Supermarket I), No. 17-CV-2738, 2018 U.S. Dist. LEXIS 42547, 2018 WL 1335355, at *36 (E.D.N.Y. 2018)*).)

No party argues that Plaintiffs do not satisfy the numerosity requirement.

HN6[] In order to proceed as a class action, the class must be "so numerous that joinder of all members is impracticable." *Fed. R. Civ. P. 23(a)(1)*. "[N]umerosity is presumed at a level of [forty] members." *Consol. Rail Corp., 47 F.3d at 483*; *see also* *Jin v. Shanghai Original, Inc., 990 F.3d 251, 263 n.20 (2d Cir. 2021)* (stating that "[a]lthough there is no magic number of class members needed to satisfy numerosity, . . . numerosity is generally 'presumed at a level of 40 [or more] members'" (second alteration in original) (quoting *Consol. Rail Corp., 47 F.3d at 483*)).

Plaintiffs satisfy the numerosity requirement because the putative class consists of "millions of [m]erchants." (Pls.' Mem. 25; Compl. ¶ 4.); *Interchange Fees III, 330 F.R.D. at 51* (finding that class met numerosity requirement when the proposed class consisted of "millions of merchants").

ii. Commonality

Plaintiffs argue that they satisfy the commonality requirement because they "allege a conspiracy that affects the entire class." (Pls.' Mem. 26.) Plaintiffs identify several questions that they argue are common questions to the entire class: **[*149]** (1) whether Defendants conspired to impose the Restraints on class members, (2) whether Defendants conspired to possess or exercise market power or monopoly power, (3) whether the Restraints imposed by Defendants facilitated their alleged price-fixing arrangements, (4) whether the alleged conspiracies continued after the networks' reorganizations and IPOs, (5) whether Network Defendants exercise market power or monopoly

liability, but rather whether [the court] may utilize it in deciding whether the requisites of *Rule 23* have been met.'" *Ge Dandong v. Pinnacle Performance Ltd., No. 10-CV-8086, 2013 U.S. Dist. LEXIS 150259, 2013 WL 5658790, at *13 (S.D.N.Y. Oct. 17, 2013)* (alterations in original) (quoting *In re Visa Check/Mastermoney Antitrust Litig., 192 F.R.D. 68, 77 (E.D.N.Y. 2000)*, *aff'd sub nom.* *In re Visa Check/MasterMoney Antitrust Litig., 280 F.3d 124 (2d Cir. 2001)*, *abrogated on other grounds by* *In re Initial Pub. Offerings Sec. Litig., 471 F.3d 24 (2d Cir. 2006)*). Defendants have filed *Daubert* motions to challenge the expert opinions of Professor

Defendants have filed *Daubert* motions to challenge the expert opinions of Professor Dennis W. Carlton and Dr. Joseph E. Stiglitz, the reports of whom Plaintiffs reference in support of their motion for class certification. (*See* Defs.' Mot. to Exclude Pls.' Expert Dennis W. Carlton, Docket Entry No. 8086; Defs.' Mot. to Exclude Pls.' Expert Joseph E. Stiglitz, Docket Entry No. 8075.) However, Defendants did not oppose Plaintiffs' motion for class certification, and the Court therefore infers that Defendants seek exclusion of Professor Carlton's and Dr. Stiglitz's opinions as to liability on summary judgment only and not for class certification purposes. Accordingly, the Court declines to assess whether the opinions of Professor Carlton and Dr. Stiglitz are admissible to establish the requirements of *Rule 23* before deciding the class certification motions. *See* *In re Foreign Exch. Benchmark Rates Antitrust Litig., 407 F. Supp. 3d at 429* (applying "a *Daubert* analysis *to the extent that [the] [d]efendant seeks to exclude* testimony relevant to class certification" (emphasis added)).

power that was willfully acquired and/or maintained, (6) whether class members are threatened with further injury by overcharges as a result of the Restraints, and (7) what the appropriate relief should be to remedy the conduct alleged. (*Id.* at 26-27.)

Merchant Trade Groups argue that Plaintiffs do not satisfy the commonality prong because Plaintiffs seek to certify a class including merchants "that accept Visa and/or Mastercard [c]redit and/or [d]ebit cards . . . [eight] years after the date of entry of [f]inal [j]udgment in this case." (Merchant Trade Groups' Opp'n 18.) Merchant Trade Groups argue that future merchants do not have common questions of law or fact as current merchants because Plaintiffs are not challenging a specific policy or practice that will affect **[*150]** future class members in a predictable and identical manner; instead, Merchant Trade Groups contend that Plaintiffs challenge "a range of anti-competitive policies and practices" that affect merchants differently and future merchants are not a narrow, clearly defined, predictable group. (*Id.* at 20-21.) In addition, Merchant Trade Groups argue that future merchants "should have the right to decide for themselves whether to challenge [Defendants'] rules as they are applied to new forms of payment and new technologies" amid an ever-changing payment industry that has seen the rise of new payment systems such as Venmo and its competitors. (*Id.* at 21.) Accordingly, Merchant Trade Groups argue that the commonality prong is not satisfied if future merchants are included in the class definition because "post-judgment changes in the governing law or factual circumstances surrounding the dispute may cause the interests of present and future class members to diverge." (*Id.* at 22 (quoting Elizabeth R. Kaczynski, Note, *The Inclusion of Future Class Members in Rule 23(b)(2) Class Actions*, *85 Colum. L. Rev. 397, 412 (1985)*).)

Defendants do not oppose certification but argue that Merchant Trade Groups' argument as to future merchants is unavailing **[*151]** because "the Visa and Mastercard network rules would apply generally to all merchants that accept Visa or Mastercard credit or debit cards, including future merchants, . . . regardless of changes in how consumers may make other types of payment in the future." (Defs.' Reply 22-23.) Defendants contend that courts routinely certify classes including future merchants, including in antitrust actions, and including future merchants would allow for "definitive resolution of the [D]efendants' challenged conduct going forward." (*Id.* at 20.)

HN7[] Under *Rule 23(a)(2)*, there must be "questions of law or fact common to the class." *Fed. R. Civ. P. 23(a)(2)*; *see also* *Brown v. Kelly, 609 F.3d 467, 475 (2d Cir. 2010)* ("The commonality requirement is met if there is a common question of law or fact shared by the class."). A question is common if it is "capable of classwide resolution — which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke." *Dukes, 564 U.S. at 350*. It is not enough to raise questions at such a high level of generality that they become common to the class. *Id.* Instead, plaintiffs must demonstrate "the capacity of a class-wide proceeding to generate common *answers* apt to drive the resolution" of the case. **[*152]** *Id.* (quoting Richard A. Nagareda, *Class Certification in the Age of Aggregate Proof*, *84 N.Y.U. L. Rev. 97, 132 (2009)*); *Bruce E. Katz, M.D., P.C., 2021 U.S. Dist. LEXIS 111188, 2021 WL 2418387, at *3* (same). ***HN8***[] "The claims for relief need not be identical for them to be common"; instead, "*Rule 23(a)(2)* simply requires that there be issues whose resolution will affect all or a significant number of the putative class members. 'Where the same conduct or practice by the same defendant gives rise to the same kind of claims from all class members, there is a common question.'" *Johnson v. Nextel Commc'ns Inc., 780 F.3d 128, 137 (2d Cir. 2015)* (citations omitted) (quoting *Suchanek v. Sturm Foods, Inc., 764 F.3d 750 756 (7th Cir. 2014)*). "[E]ven a single [common] question will" suffice to prove commonality. *Dukes, 564 U.S. at 359* (second alteration in original); *de Lacour, 338 F.R.D. at 336* (quoting *Dukes, 564 U.S. at 359*).

Plaintiffs satisfy the commonality requirement. Plaintiffs' overarching claims are that Defendants conspired to fix prices and impose supracompetitive interchange fees on merchants that accept Visa and Mastercard debit and credit cards, and that they facilitated these anticompetitive practices by forcing merchants to abide by the Restraints therefore preventing merchants from protecting themselves. (*See* Compl. ¶¶ 4-5, 364-428.) Unlike other cases in which the parties failed to demonstrate commonality because the challenged practices consisted of context-specific decisions rather than a uniform **[*153]** policy, *see, e.g.,* *Dukes, 564 U.S. at 355* ("The only corporate policy that the plaintiffs' evidence convincingly establishes is Wal-Mart's 'policy' of *allowing discretion* by local supervisors over employment matters. On its face, of course, that is just the opposite of a uniform employment practice that would provide the commonality needed for a class action . . . ."); *Dobson v. Hartford Fin. Servs. Grp. Inc., 342 F. App'x*

706, 709 (2d Cir. 2009) (denying class certification on commonality grounds when the claims of each of the 24,000 putative class members would "invariably turn on whether [the benefits provider's] delay was 'reasonable' in each set of particular circumstances"); Callari v. Blackman Plumbing Supply, Inc., 307 F.R.D. 67, 76 (E.D.N.Y. 2015) (finding no commonality when there was no evidence that the challenged employment policy applied to all class members), Class Plaintiffs point to specific policies and rules that they allege cause uniform harm to the putative class, such as the setting of default interchange fees, honor-all-card rules, and anti-steering restraints, (Compl. ¶¶ 320-322).

Although a single common question is sufficient, Plaintiffs identify several questions that are common to the putative class and that would generate common answers, such as whether Defendants conspired to impose the Restraints, whether Network Defendants **[*154]** exercise market power or monopoly power that was willfully acquired and/or maintained, and whether the Restraints imposed by Defendants facilitated their alleged price-fixing arrangements. (*See* Pls.' Mem. 26-27); *see also* Dial Corp. v. News Corp., 314 F.R.D. 108, 113 (S.D.N.Y. 2015) ("[T]here are several questions common to the class and capable of resolution through common proof, including: (1) [the defendant's] liability under the Sherman Act and the Clayton Act; (2) the definitions of the relevant geographic and product markets; and (3) [the defendant's] market power in the relevant market. And the majority of [the defendant's] alleged predatory conduct involves its dealings with competitors and retailers, not the putative class members. This suggests that resolution is capable through common proof for the class."), *amended*, No. 13-CV-6802, 2016 U.S. Dist. LEXIS 22831, 2016 WL 690895 (S.D.N.Y. Feb. 9, 2016); Meredith Corp. v. SESAC, LLC, 87 F. Supp. 3d 650, 659 (S.D.N.Y. 2015) ("[T]here are a number of questions of fact and law in this case, relevant to either plaintiffs' [section] 1 or [section] 2 [Sherman Act] claims or both, that are common to the proposed class. These include: whether [the defendant] and its key affiliates engaged in an unlawful agreement to fix prices; how the relevant product market is to be defined; whether [the defendant] has monopoly power in that market; whether [the defendant's] licensing practices **[*155]** constitute exclusionary conduct; whether [the defendant's] conduct, if found unlawful, caused cognizable injury to class members; whether plaintiffs and members of the class are entitled to injunctive relief; and the appropriate measures of damages sustained."); In re Vitamin C Antitrust Litig., 279 F.R.D. 90, 110-11 (E.D.N.Y. 2012) ("The most significant question posed by the [i]njunction [c]lass is the same question posed by the [d]amages [c]lass: did the defendants' price-fixing agreement cause an artificial increase in the market price of vitamin C? The answer to this question will be generally applicable to all members of the [i]njunction [c]lass."); Leider v. Ralfe, No. 01-CV-3137, 2003 U.S. Dist. LEXIS 21159, 2003 WL 24571746, at *9 (S.D.N.Y. Mar. 4, 2003) ("[W]hether there was a conspiracy between [the defendants] and its sightholders to harm [the defendants'] competitors plainly presents a question common to the class."), *report and recommendation adopted in part*, 2003 U.S. Dist. LEXIS 18270, 2003 WL 22339305 (S.D.N.Y. Oct. 10, 2003). These questions are the same as or similar to questions posed to the (b)(3) damages class, which this Court certified, are common to all members of the putative class, and, at trial, would require resolution on a classwide basis despite any differences in how each individual merchant was affected. *See* Interchange Fees III, 330 F.R.D. at 52-53 (finding commonality as to the (b)(3) class in this MDL because questions of whether Defendants **[*156]** "collectively fixed and set interchange fees in violation of ***antitrust law***, . . . collectively imposed anti-steering rules that disincentivized merchants from steering paying customers to other payment methods, thereby protecting Defendants from competitive pressure to lower interchange fees[,] and . . . continued the alleged behavior after becoming publicly[] owned corporations" needed to be determined on a classwide basis).

Merchant Trade Groups' argument that future merchants do not have common questions of law or fact with the current merchants is unavailing at the class certification stage of this litigation. ***HN9***[] Courts both within and outside of this Circuit have routinely certified classes including future class members when "any equitable relief to which the class would be entitled would be of the sort that would affect present and future claimants in the same way."[21] Latino Officers Ass'n City of N.Y. v. City of New York, 209 F.R.D. 79, 90 n.87 (S.D.N.Y. 2002); Duprey v.

[21] The two cases cited by the Merchant Trade Groups to support excluding future merchants from the proposed class concern standing and numerosity, and do not defeat commonality. In *In re Currency Conversion Fee Antitrust Litigation*, a case concerning an alleged price-fixing conspiracy of foreign currency conversion fees, the court declined to include "cardholders whose first foreign exchange transaction occurred after the addition of the arbitration clause to their cardholder agreement"

Conn. Dep't of Motor Vehicles, 191 F.R.D. 329, 338 (D. Conn. 2000) ("It is not at all uncommon for a class to include future members, who may generally avail themselves of the same relief available to class members who have already sustained damages."); Sykes, 780 F.3d at 75 (affirming certification of injunctive relief class pursuant to Rule 23(b)(2) comprised of "all persons who have been or will be sued by the **[*157]** . . . defendants . . . assert[ing] claims under [RICO]" (first alteration in original)); Marisol A., 126 F.3d at 375 (affirming certification of "[a]ll children who are or will be in the custody of the New York City Administration for Children's Services ('ACS'), and those children who, while not in the custody of ACS, are or will be at risk of neglect or abuse and whose status is or should be known to ACS"); Robinson v. N.Y.C. Transit Auth., No. 19-CV-1404, 2020 U.S. Dist. LEXIS 159927, 2020 WL 5884055, at *1 (S.D.N.Y. Aug. 31, 2020) (recommending certification of a Rule 23(b)(2) class including "all persons against whom [the defendant] has obtained or will obtain a default judgment in a New York State court"), *report and recommendation adopted*, 2020 U.S. Dist. LEXIS 180623, 2020 WL 5814189 (S.D.N.Y. Sept. 30, 2020); Butler v. Suffolk County, 289 F.R.D. 80, 103 (E.D.N.Y. 2013) (certifying equitable relief class "comprised of all persons who, now or at any time in the future, are or will be detainees or prisoners in the custody of the Suffolk County Sheriff's Department"); *see also* Roy v. County of Los Angeles, No. 12-CV-9012, 2016 U.S. Dist. LEXIS 186634, 2016 WL 5219468, at *14 (C.D. Cal. Sept. 9, 2016) (rejecting argument that there was no commonality or typicality because the proposed class included both "current and future individuals" who are or will be in the defendants' custody on the basis of an immigration hold and their claims were "too broad and not yet ripe" and stating that "including 'future class members in a class is not itself unusual or objectionable'" and that "[w]hen the future **[*158]** persons referenced become members of the class, their claims will necessarily be ripe" (quoting *Rodriguez v. Hayes, 591 F.3d 1105, 1118 (9th Cir. 2010)*), *aff'd sub nom.* Gonzalez v. U.S. Immigr. & Customs Enf't, 975 F.3d 788 (9th Cir. 2020); Roshandel v. Chertoff, 554 F. Supp. 2d 1194, 1203 (W.D. Wash. 2008), *amended in part*, 2008 U.S. Dist. LEXIS 124708, 2008 WL 2275558 (W.D. Wash. June 3, 2008) ("Because all [the] [p]laintiffs, whether present or future members of the class, challenge the legality of the same government program, they inherently share common issues.").

HN10[] As this Court has recognized, the commonality inquiry focuses on whether questions exist that "would need to be determined on a classwide basis, regardless of how each merchant was individually affected" and whether the answers to these questions would drive the resolution of this litigation. Interchange Fees III, 330 F.R.D. at 53. Courts have found that commonality exists when the plaintiffs' "injuries derive from a unitary course of conduct by a single system," even when there are "differing 'individual circumstances of class members.'" Kurtz, 321 F.R.D. at 530 (quoting *Ebin v. Kangadis Food Inc., 297 F.R.D. 561, 571-72 (S.D.N.Y. 2014)*). Courts in this Circuit have noted that "[n]umerous courts have held that allegations concerning the existence, scope, and efficacy of an alleged antitrust conspiracy present important common questions sufficient to satisfy the **[*159]** commonality requirement of Rule 23(a)(2)." In re Platinum & Palladium Commodities Litig., No. 10-CV-3617, 2014 U.S. Dist. LEXIS 96457, 2014 WL 3500655, at *9 (S.D.N.Y. July 15, 2014) (quoting In re NASDAQ Mkt.-Makers Antitrust Litig., 169 F.R.D. 493, 509 (S.D.N.Y. 1996) (collecting cases)); *see also* Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d 91, 107 (2d Cir. 2007) (finding that the commonality prong was satisfied when the injury alleged in the complaint concerned "overcharges paid to a horizontal price-fixing conspiracy" and stating that "[b]ecause each class member allegedly suffered the same type of injury, the legal question of whether such an injury is 'of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful' is a common one" (quoting Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct.

---

because "there was no cognizable injury when this action commenced." 229 F.R.D. 57, 63 (S.D.N.Y. 2005), *appeal granted, order amended*, 2005 U.S. Dist. LEXIS 16130, 2005 WL 1871012 (S.D.N.Y. Aug. 9, 2005). In *Scott v. University of Delaware*, a class action discrimination suit, the Third Circuit held that the class should have been decertified because future faculty members could not satisfy the numerosity requirement. 601 F.2d 76, 89 (3d Cir. 1979), *abrogated on other grounds by* EF Operating Corp. v. Am. Bldgs., 993 F.2d 1046 (3d Cir. 1993). The Third Circuit held that the "class of future faculty members is simply ephemeral on the facts of this case" because it was "constructed on the hypothesis that the [u]niversity will hire black[] [faculty members] . . . and then discriminate against them by refusing to renew employment contracts or by denying promotion or tenure solely on the basis of race." *Id.* Unlike the class members in those cases, the putative class member merchants face "imminent threat of injury," In re Currency Conversion Fee Antitrust Litig., 229 F.R.D. at 63, arising from the Defendants' alleged anticompetitive conduct as long as they accept Visa and Mastercard credit and debit cards should they not be included in the injunctive relief class.

690, 50 L. Ed. 2d 701 (1977))); Meredith Corp., 87 F. Supp. 3d at 659-60 ("In general, 'monopolization claims are contingent upon a showing of monopoly power and an examination of the manner in which such power was acquired or maintained. These issues, along with others, are questions that are undoubtedly common to all the members of the putative class.'" (quoting In re Buspirone Patent & Antitrust Litig., 210 F.R.D. 43, 57 (S.D.N.Y. 2002))).

Many of the questions identified by Plaintiffs focus on Defendants' conduct in implementing the Restraints which have caused or will cause the same general antitrust injury to both present and future merchants — despite any differences in how future merchants are specifically impacted amid any changes in the credit or debit card industry. *See* Batalla Vidal, 501 F. Supp. 3d at 133 (certifying a Rule 23(b)(2) class challenging the **[*160]** Wolf Memorandum and consisting of individuals "who are or will be *prima facie* eligible for deferred action under the terms of the [Deferred Action] program" because "[a]s long as the Wolf Memorandum remains in effect, [c]lass members who are otherwise eligible for [Deferred Action] but have not yet applied share the same kind of 'distinct and palpable' injury with the named plaintiffs who happen to have already applied for [Deferred Action] and had their applications stalled or rejected"); Newkirk, 2020 U.S. Dist. LEXIS 155539, 2020 WL 5035930, at *8, *12 (certifying a class of individuals with disabilities who "have applied for or will apply for" benefits through the Suffolk County Department of Social Services and stating that "'the disparate impact of a challenged policy or regulation does not defeat class certification,' particularly 'where . . . plaintiffs request declaratory and injunctive relief against a defendant engaging in a common course of conduct toward them, and there is therefore no need for individualized determinations of the propriety of injunctive relief'" (quoting R. A-G ex rel. R.B. v. Buffalo City Sch. Dist. Bd. of Educ., No. 12-CV-960, 2013 U.S. Dist. LEXIS 93924, 2013 WL 3354424, at *10 (W.D.N.Y. July 3, 2013), *aff'd*, 569 F. App'x 41 (2d Cir. 2014))); *see also* Floyd v. City of New York, 283 F.R.D. 153, 160, 173 (S.D.N.Y. 2012) (certifying class of individuals who "have been, or in the future **[*161]** will be" unlawfully stopped in violation of the Fourth and Fourteenth Amendment and stating that "even after *Wal—Mart*, Rule 23(b)(2) suits remain appropriate mechanisms for obtaining injunctive relief in cases where a centralized policy is alleged to impact a large class of plaintiffs, even when the magnitude (and existence) of the impact may vary by class member").

The questions that Plaintiffs raise are fundamental to both the outcome of the case, and would generate common answers that would assist in determining the resolution of Plaintiffs' claims. Accordingly, Plaintiffs satisfy the Rule 23(a)(2) commonality requirement.

iii. Typicality

Plaintiffs argue that the typicality requirement is satisfied because their claims "stem from the same course of conduct (Defendants' conspiracy to impose the Restraints on all Merchants)," are based on the same legal theories of violations of the Sherman, Clayton, and Cartwright Acts, and "will be proven by the same evidence (documents and testimony reflecting Defendants' agreement and its anticompetitive impact on the Class)." (Pls.' Mem. 28.) Plaintiffs contend that the proposed class representatives will "seek to prove that Defendants' conduct resulted in all Class members being injured or threatened **[*162]** with injury in violation of the antitrust laws and will seek equitable relief for that conduct." (*See id.*)

Merchant Trade Groups argue that typicality is not satisfied as to future merchants because Plaintiffs fail to explain how the class representatives' claims are typical of future merchants' claims. (Merchant Trade Groups' Opp'n 18-19.) In support, Merchant Trade Groups contend that "market conditions and merchant relationships with Defendants will only continue to evolve in unknown ways," which will make determining typicality as to future merchants difficult. (*Id.* at 19.) Neither Merchant Trade Groups nor any other party object to typicality as to non-future-merchant class members.

HN11[] The typicality prong of Rule 23(a)(3) requires that "the claims or defenses of the representative parties [be] typical of the claims or defenses of the class." Fed. R. Civ. P. 23(a)(3). The typicality requirement "is satisfied when each class member's claim arises from the same course of events and each class member makes similar legal arguments to prove the defendant's liability." Shahriar v. Smith & Wollensky Rest. Grp., Inc., 659 F.3d 234, 252 (2d Cir. 2011) (quoting Robidoux v. Celani, 987 F.2d 931, 936 (2d Cir. 1993)); In re Flag Telecom Holdings, Ltd. Sec. Litig., 574 F.3d 29, 35 (2d Cir. 2009). "The commonality and typicality requirements often 'tend to merge into one another, so that similar considerations animate analysis' of both." **[*163]** Brown, 609 F.3d at 475 (quoting Marisol A., 126 F.3d at 376); *see also* Sykes, 780 F.3d at 84 n.2 ("[I]n certain 'context[s] . . . "[t]he commonality and typicality requirements of Rule 23(a) tend to merge."'" (second and third alterations in original) (quoting Dukes, 564 U.S. at 349 n.5)). "The purpose of typicality is to ensure that class representatives 'have the incentive to prove all the elements of the cause of action which would be presented by the individual members of the class were they initiating individualized actions.'" Floyd, 283 F.R.D. at175 (quoting In re NASDAQ Mkt.-Makers Antitrust Litig., 169 F.R.D. at 510). "Since the claims only need to share the same essential characteristics, and need not be identical, the typicality requirement is not highly demanding." In re Platinum & Palladium Commodities Litig., 2014 U.S. Dist. LEXIS 96457, 2014 WL 3500655, at *9 (quoting *Bolanos v. Norwegian Cruise Lines Ltd., 212 F.R.D. 144, 155 (S.D.N.Y. 2002)*).

Plaintiffs allege, on behalf of the putative class, that they were harmed by the same course of events — Defendants' unlawful price fixing of interchange fees and implementation of the Restraints which have restricted trade. *See* In re Air Cargo Shipping Servs. Antitrust Litig., No. 06-MD-1175, 2014 U.S. Dist. LEXIS 180914, 2014 WL 7882100, at *31 (E.D.N.Y. Oct. 15, 2014) ("Here, the plaintiffs allege that the defendants engaged in a global conspiracy to fix prices, so it is nearly tautological that the class representatives will rely on the same factual and legal arguments to establish the defendants' liability."), *report and recommendation adopted*, 2015 U.S. Dist. LEXIS 90402, 2015 WL 5093503 (E.D.N.Y. July 10, 2015); In re NASDAQ Mkt.-Makers Antitrust Litig., 169 F.R.D. at 511 ("In antitrust disputes, [s]ince the representative parties need [to] prove a **[*164]** conspiracy, its effectuation, and damages therefrom — precisely what the absentees must prove to recover — the representative claims can hardly be considered atypical." (alteration in original) (quoting In re Sugar Indus. Antitrust Litig., 73 F.R.D. 322, 336 (E.D. Pa. 1976))). Plaintiffs all currently operate businesses that continue to accept payment by Visa and Mastercard credit and debit cards. (*See* Compl. ¶¶ 10-18.) Although the Class Plaintiffs represent an array of different interests, they seek redress for the same type of harms due to the same course of conduct.[22]

For the same reasons as those discussed regarding commonality, the Court finds that the inclusion of future merchants in the class does not destroy typicality. *See* Dukes, 564 U.S. at 350 n.5 ("We have previously stated in this context that '[t]he commonality and typicality requirements of Rule 23(a) tend to merge. Both serve as guideposts for determining whether under the particular circumstances maintenance of a class action is economical and whether the named plaintiff's claim and the class claims are so interrelated that the interests of the class members will be fairly and adequately protected in their absence.'" (quoting Gen. Tel. Co. of Sw. v. Falcon, 457 U.S. 147, 157-58 n.13, 102 S. Ct. 2364, 72 L. Ed. 2d 740 (1982))); Sykes, 780 F.3d at 80 (same). Future merchants would face the same harm from the same course of events **[*165]** as those challenged by Plaintiffs by virtue of accepting Visa and Mastercard credit and debit cards. That there might be some differences surrounding the credit- and debit-card market does not defeat typicality. *See* Robidoux, 987 F.2d at 936-37 ("When it is alleged that the

[22] To the extent that any party challenges typicality on the grounds that Plaintiffs, as mostly small, single-location retailers, differ in size and structure from other class members, (*see* Direct Action Pls.' Opp'n 20-21 (describing the factual differences between the class representatives and the class members); Merchant Trade Groups' Opp'n 5-6, 13-14 (same)), the Court notes that such an argument is not sufficient to defeat typicality, which focuses on the factual and legal arguments that would be made to prove liability. *See* Meredith Corp. v. SESAC, LLC, 87 F. Supp. 3d 650, 660 (S.D.N.Y. 2015) (finding typicality requirement satisfied although "conceivably not all class members may be similarly situated as to damages," because "as to liability, the claims of the named plaintiffs here are typical of those of the class" and "[t]o prevail, each would be required to show that [the defendant's] practices with respect to the blanket licenses violated § 1 or § 2 of the Sherman Act, and effectively forced class members to accept a . . . blanket license with an artificially high price"); Dial Corp. v. News Corp., 314 F.R.D. 108, 114 (S.D.N.Y. 2015) (rejecting the defendant's argument that the class representatives' claims are not typical of the rest of the class because the class representatives differed in when they purchased in-store promotion services and their geographic range of marketing), *amended*, No. 13-CV-6802, 2016 U.S. Dist. LEXIS 22831, 2016 WL 690895 (S.D.N.Y. Feb. 9, 2016); In re Vitamin C Antitrust Litig., 279 F.R.D. 90, 111 (E.D.N.Y. 2012) ("A putative class representative need not be a heavy-weight in its industry to satisfy the typicality prong; the relevant inquiry is simply whether absent class members' interests are advanced by the prosecution of the representative's claim.").

same unlawful conduct was directed at or affected both the named plaintiff and the class sought to be represented, the typicality requirement is usually met irrespective of minor variations in the fact patterns underlying individual claims."); *Latino Officers Ass'n City of N.Y., 209 F.R.D. at 89* (finding typicality satisfied as to future claimants because typicality "does not require that the factual background of each named plaintiff's claim be identical to that of all class members; rather, it requires that the disputed issue of law or fact 'occupy essentially the same degree of centrality to the named plaintiff's claims as to that of other members of the proposed class'" (quoting *Caridad v. Metro-N. Commuter R.R., 191 F.3d 283, 293 (2d Cir. 1999)*)); *Messier v. Southbury Training Sch., 183 F.R.D. 350, 356 (D. Conn. 1998)* ("[A] (b)(2) class may include future members who stand to benefit from a favorable outcome in the case.").

Accordingly, Plaintiffs satisfy the *Rule 23(a)(3)* typicality requirement.

iv. Adequate representation

HN12[] *Rule 23(a)(4)* provides that a class action is only appropriate if "the representative parties will fairly and adequately protect **[*166]** the interests of the class." *Fed. R. Civ. P. 23(a)(4)*. The purpose is to "uncover conflicts of interest between named parties and the class they seek to represent." *Amchem Prod., Inc. v. Windsor, 521 U.S. 591, 625 (1997)*; *In re Patriot Nat'l, Inc. Sec. Litig., 828 F. App'x 760, 764 (2d Cir. 2020)* (quoting *Amchem, 521 U.S. at 625*). "Determination of adequacy typically 'entails inquiry as to whether: (1) plaintiff's interests are antagonistic to the interest of other members of the class and (2) plaintiff's attorneys are qualified, experienced and able to conduct the litigation.'" *Cordes & Co. Fin. Servs., Inc., 502 F.3d at 99* (quoting *Baffa v. Donaldson, Lufkin & Jenrette Sec. Corp., 222 F.3d 52, 60 (2d Cir. 2000)*); *see also* *Irvin v. Harris, 944 F.3d 63, 70 (2d Cir. 2019)* ("[A] class representative must be part of the class and possess the same interest and suffer the same injury as the class members." (quoting *Dukes, 564 U.S. at 348-49*)). "[C]onflicts which are merely 'speculative . . . should be disregarded at the class certification stage.'" *In re Vitamin C Antitrust Litig., 279 F.R.D. at 102* (quoting *In re Visa Check/MasterMoney Antitrust Litig., 280 F.3d 124, 145 (2d Cir. 2001)*, *abrogated on other grounds by* *In re Initial Pub. Offerings Sec. Litig., 471 F.3d 24 (2d Cir. 2006)*); *see also* *Kurtz, 818 F. App'x at 60* ("While a conflict of interest between the named plaintiff and absent class members can render the former an inadequate representative under certain circumstances, the 'conflict must be "fundamental" to violate *Rule 23(a)(4)*.'" (quoting *In re Literary Works in Elec. Databases Copyright Litig., 654 F.3d 242, 249 (2d Cir. 2011)*)). The Court separately discusses the adequacy of the class representatives and class counsel.

In its review of the prior unitary settlement approval, the Second Circuit concluded "that class members of the (b)(2) class were inadequately **[*167]** represented in violation of both *Rule 23(a)(4)* and the Due Process Clause." *Interchange Fees II, 827 F.3d at 231*. The Second Circuit held that the "class representatives had interests antagonistic to those of some of the class members they were representing," because the (b)(3) damages class "would want to maximize cash compensation for past harm," while the (b)(2) injunctive class "would want to maximize restraints on network rules to prevent harm in the future," and thus, "[t]he class counsel and class representatives who negotiated and entered into the Settlement Agreement were in the position to trade diminution of (b)(2) relief for increase of (b)(3) relief." *Id. at 233-34* (holding that the Supreme Court's decisions in *Amchem, 521 U.S. at 591* and *Ortiz, 527 U.S. 815*, which manifested tension on essential allocation decisions between present and future claimants, require separate representation when a class can be divided between members that hold present claims, and members that hold future claims). In addition, the Second Circuit noted that the issue of unitary representation was exacerbated "because the members of the worse-off (b)(2) class could not opt out." *Id. at 234*. The Second Circuit declined to decide "whether providing these class members with opt out rights would be a sufficient 'structural assurance **[*168]** of fair and adequate representation,' to overcome the lack of separate class counsel and representative." *Id.* (quoting *Amchem, 521 U.S. at 627*).

The Second Circuit further held that the "bargain that was struck between relief and release on behalf of absent class members" did not comport with due process because the bargain was "so unreasonable that it evidence[d] inadequate representation." *Id. at 236*. The Second Circuit held that the relief provided to the (b)(2) class in the unitary settlement was insufficient because "[t]he most consequential relief afforded the (b)(2) class was the ability to surcharge Visa-and MasterCard-branded credit cards at both the brand and product levels," which did not provide meaningful relief to merchants that "accept American Express or operate in states that prohibit surcharging . . . and merchants that begin business after July 20, 2021," the date that injunctive relief expired under the settlement, "gain no benefit at all." *Id. at 230, 238*. The Second Circuit stated that more beneficial relief might consist of "remedies that affected the default interchange fee or honor-all-cards rule." *Id.* In addition, the Second Circuit held that the release was "exceptionally broad" when it "permanently immunize[d] **[*169]** the defendants from any claims that any plaintiff may have now, or will have in the future, that arise out of, *e.g.*, the honor-all-cards and default interchange rules." *Id. at 239*.

In his concurrence, Judge Leval raised the issue of "one class of [p]laintiffs accept[ing] substantial payments from the Defendants" and in return "compel[ling] Plaintiffs in another class . . . to give up forever their potentially valid claims, without ever having an opportunity to reject the settlement by opting out of the class." *Id. at 240* (Leval, J., concurring). Relying on the Supreme Court's decisions in *Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 105 S. Ct. 2965, 86 L. Ed. 2d 628 (1985)* and *Dukes, 564 U.S. at 338*, Judge Leval stated that due process was violated because all future merchants' that will accept Defendants' cards are precluded from bringing claims "for relief from allegedly illegal conduct" while having no ability to opt out of the settlement. *Id. at 241-42* (Leval, J., concurring).

The structural defect of unitary representation no longer exists — the (b)(2) and (b)(3) classes now have separate class counsel, with the Robins Group serving as *Rule 23(b)(3)* Class Counsel and Hilliard & Shadowen LLP, Grant & Eisenhofer, P.A., Freed Kanner London & Millen, LLP, and the Nussbaum Law Group, P.C. serving as interim Class Counsel for the putative **[*170]** *Rule 23(b)(2)* Class. (*See* Interim Class Counsel Order.) The (b)(2) and *(b)(3)* classes also now have separate class representatives. (*See* Compl. ¶ 2; *Rule 23(b)(3)* Third Consolidated Am. Class Action Compl. ¶ 2, Docket Entry No. 7123.)

For these and the following reasons, the Court finds that the bifurcation of the (b)(2) and (b)(3) classes and their Class Counsel sufficiently addresses the Second Circuit's concerns.[23] The Court finds that the class representatives — with the exception of DDMB and DDMB2 and Class Counsel adequately represent the class.

1. Adequacy of class representatives

Plaintiffs argue that the class representatives adequately represent the class because their interests and injuries are the same as those of the class. (*See* Pls.' Mem. 29.) In support, Plaintiffs argue that they have the same interests in prosecuting their claims because all Plaintiffs "are subject to the same Restraints," "are challenging the same underlying conduct," and "are asserting the same legal claims . . . and . . . seek to enjoin the same conduct." (*Id.*) Plaintiffs contend that "[t]he prospect that Plaintiffs' preferences as to injunctive relief may differ from those of other class members[] has no bearing" at the class certification **[*171]** stage of the litigation because it is speculative and premature. (*Id.* at 30.) Plaintiffs also argue that any equitable relief secured via verdict or settlement "will serve only as a baseline for all [m]erchants going forward" because "[e]very [m]erchant will remain free to seek to negotiate additional relief specific to themselves and their own business needs." (*Id.* at 30-31.)

Direct Action Plaintiffs, Grubhub Plaintiffs, Merchant Trade Groups, and Walmart (collectively, "Opponents") oppose class certification on adequacy of representation grounds. They contend that Plaintiffs do not adequately represent the proposed class because (1) they want to prioritize different forms of injunctive relief than some of the merchants in the putative class, (2) a mandatory *Rule 23(b)(2)* class would impermissibly alter the rights of merchants seeking money damages via claim and issue preclusion, (3) class representatives are incentivized to trade away the claims of class members pursuing individual damages claims in exchange for relief that benefits the rest of the equitable relief class, and (4) future merchants may be differently situated in the future and would have no opportunity to be heard before being bound **[*172]** to a judgment. (*See* Direct Action Pls.' Opp'n; Grubhub Pls.' Opp'n; Merchant Trade Groups' Opp'n; Walmart Opp'n.) Direct Action Plaintiffs also imply that there is an adequacy issue because of

[23] For the reasons stated in Section II.c.iv.1.E, the Court declines to reach the issue of whether future merchants are adequately represented in this class.

relationships between Class Counsel and class representatives. (*See* Direct Action Pls.' Opp'n 20 n.15.) The Court addresses each category of arguments in turn below.

HN13[] The analysis of whether a class representative is adequate "is twofold: the proposed class representative must have an interest in vigorously pursuing the claims of the class, and must have no interests antagonistic to the interests of other class members." *Denney v. Deutsche Bank AG, 443 F.3d 253, 268 (2d Cir. 2006)*; *see also In re Patriot Nat'l, Inc. Sec. Litig., 828 F. App'x at 764* ("In considering *Rule 23(a)(4)*'s adequacy requirement, the primary factors are whether the class representatives have any 'interests antagonistic to the interests of other class members' and whether the representatives 'have an interest in vigorously pursuing the claims of the class.'" (quoting *Denney, 443 F.3d at 268*)). "To assure vigorous prosecution, courts consider whether the class representative has adequate incentive to pursue the class's claim, and whether some difference between the class representative and some class members might undermine that incentive." *Interchange Fees II, 827 F.3d at 231* (citing *Robinson v. Metro-N. Commuter R.R., 267 F.3d 147, 170 (2d Cir. 2001)*, *abrogated on other grounds* ***[*173]*** *by Wal-Mart Stores, Inc. v. Duke, 564 U.S. 338 (2011)*). In addition to the adequate representation requirement of *Rule 23(a)(4)*, "[t]he Due Process Clause . . . requires that the named plaintiff at all times adequately represent the interests of the absent class members."[24] *Id.* (quoting *Shutts, 472 U.S. at 812*); *see also Irvin, 944 F.3d at 71* (quoting *Shutts, 472 U.S. at 812*).

A. The named *Rule 23(b)(2)* Class Plaintiffs suffer the same injury as the putative class members and have an interest in vigorous pursuit of the claims

HN14[] Courts assessing the adequacy of class representatives generally find adequacy when the class representatives allege restraint of trade and monopolization and when, despite factual differences in how the class members are situated, the class representatives are similarly incentivized to prove the defendants' liability under ***antitrust law***. *See In re Auction Houses Antitrust Litig., 193 F.R.D. 162, 165 (S.D.N.Y. 2000)* (rejecting argument that the class was inadequately represented because it consisted of both buyers and sellers of auction items when "[b]oth buyers and sellers who have used defendants' services allegedly have been impacted by the artificial inflation of both buyers' and sellers' commissions pursuant to the conspiracy"); *In re Playmobil Antitrust Litig., 35 F. Supp. 2d 231, 243 (E.D.N.Y. 1998)* ("Where **[*174]** the plaintiffs have alleged a single conspiracy to artificially inflate prices, a representative plaintiff may satisfy the adequacy requirement without having purchased products from all of the defendants, having bought all of the affected products or having made purchases throughout the entire class period. The crucial inquiry is . . . whether each plaintiff has sufficient incentive to present evidence that will establish the existence of the alleged conspiracy and its effect on the prices of the products purchased by the putative class member." (quoting *In re Industrial Diamonds Antitrust Litig., 167 F.R.D. 374, 381 (S.D.N.Y. 1996)*));

[24] The Court is not aware of any case discussing whether the adequacy of representation requirement under the Due Process Clause is coextensive with *Rule 23(a)(4)*. *See* 1 Newberg on Class Actions § 3:51 (5th ed.) ("[N]o court has ever considered the specific question of whether the constitutional requirement of adequate representation for preclusion purposes is less exacting than *Rule 23*'s requirement of adequate representation for certification purposes."); William B. Rubenstein, *Finality in Class Action Litigation: Lessons from Habeas*, *82 N.Y.U. L. Rev. 790, 810 & n.79 (2007)* ("[A]re all of the aspects of *Rule 23* — including *(a)(4)* and *(g)* and all of their subparts, interpretations, and subsequent fairness hearing assessments — necessarily a part of the Constitution's demand for adequacy? Remarkably, the answer is that there is no answer. No court or commentator has ever scrutinized the question; all just assume an equivalence."); Samuel Issacharoff, *Governance and Legitimacy in the Law of Class Actions*, *1999 Sup. Ct. Rev. 337, 373* ("There is no reason to believe . . . the concept of adequate representation present in the rules is anything other than the level of constitutional protection of absent class member interests necessary to deem their virtual participation in litigation fundamentally fair."). Because the parties address adequacy of representation under *Rule 23(a)(4)* and under the Due Process Clause interchangeably and there is no authority to the contrary, and because Second Circuit jurisprudence does not appear to draw any distinction between adequacy under the Due Process Clause and *Rule 23*, *see, e.g.*, *Interchange Fees II, 827 F.3d at 236* ("Part of the due process inquiry (and part of the *Rule 23(a)* class certification requirements) involves assessing adequacy of representation and intra-class conflicts." (quoting *Stephenson v. Dow Chem. Co., 273 F.3d 249, 260 (2d Cir. 2001)*, *aff'd in part and vacated in part*, *539 U.S. 111, 123 S. Ct. 2161, 156 L. Ed. 2d 106 (2003)*)), the Court assumes the two requirements are equivalent and addresses them together.

see also [In re Vitamins Antitrust Litig., 209 F.R.D. 251, 262 (D.D.C. 2002)] ("[A]s to the vitamin products class, plaintiffs have alleged that defendants have participated in a unitary overarching conspiracy which encompassed a number of identified vitamins. . . . It is irrelevant to this prerequisite that the representatives have not purchased all products because their incentive to produce evidence as to the entire conspiracy will be the same." (citing *In re Linerboard Antitrust Litig., 203 F.R.D. 197, 208 n.8 (E.D. Pa. 2001)*)).

The proposed *Rule 23(b)(2)* putative class consists of a group of merchants that accept Visa-and/or Mastercard-branded cards from December 18, 2020, until eight years after the date of entry of final judgment. (*See* Pls.' Mem. 5.) The *Rule 23(b)(2)* Class Plaintiffs **[*175]** seek to challenge the same allegedly unlawful conduct that they claim has harmed them — Defendants' (1) imposition of supracompetitive interchange fees on Visa and Mastercard transactions, and (2) facilitation of these anticompetitive practices by forcing merchants to abide by the Restraints. (*Id.* ¶¶ 11-15, 17-18.) This alleged harm applies to all members of the putative class, making Plaintiffs similarly incentivized as class members to vigorously litigate and prove Defendants' liability. *See In re Patriot Nat'l, Inc. Sec. Litig., 828 F. App'x at 764* (finding that the lead plaintiffs had an interest in vigorously pursuing Exchange Act and Delaware state law claims when "[a]ll of the lead plaintiffs and every shareholder had an Exchange Act claim" and therefore were "sufficiently motivated to recover as much as possible for each class member"); *Lawrence v. NYC Med. Prac., P.C., No. 18-CV-8649,2021 U.S. Dist. LEXIS 96763, 2021 WL 2026229, at *10 (S.D.N.Y. May 20, 2021)* (finding the adequacy requirement satisfied when the class representatives "have substantially the same claims against [the] [d]efendants" and stating that "[b]ecause they share their claims with absent class members, the [c]ourt concludes that these representatives are capable of vigorously pursuing the claims of the class"); *Rosenfeld v. Lenich, No. 18-CV-6720, 2021 U.S. Dist. LEXIS 26950, 2021 WL 508339, at *4 (E.D.N.Y. Feb. 11, 2021)* (finding the adequacy requirement satisfied when "[e]ach class member **[*176]** . . . suffered the same type of alleged injury" and there were no conflicts that "conflict with those of the putative class members").

B. The type of relief sought by Plaintiffs is not antagonistic to the putative class members

Direct Action Plaintiffs argue that Plaintiffs' interests in injunctive relief "differ in size and scope from those of the five remaining proposed class representatives, who are owned and operated by just a handful of individuals." (Direct Action Pls.' Opp'n 20.) In support, Direct Action Plaintiffs contend that Plaintiffs are all "very small businesses . . . with limited payment capabilities" whereas Direct Action Plaintiffs "include some of the largest merchants in the United States" who operate "thousands of locations in multiple states, have substantial e-commerce operations, with sophisticated digital and contactless payment capabilities that include EMV chip terminals." (*Id.* at 20-21.) Direct Action Plaintiffs argue that Plaintiffs' expert reports demonstrate that they are prioritizing surcharging relief as opposed to relief from rules like the honor-all-cards rules because Plaintiffs "did not retain experts in mobile payments or EMV technology," and Plaintiffs' **[*177]** class certification expert Dr. Keith Leffler conceded merchants "who are directly affected by restraints relating to PIN debit, EMV, and [h]onor [a]ll [w]allets have a greater interest in obtaining equitable relief with respect to those restraints than do merchants that are not affected by them at all." (*Id.* (citing Report of Keith Leffler ("Leffler Report"), Docket Entry No. 8474-3).) In addition, Direct Action Plaintiffs contend that Plaintiffs seek injunctive relief that would actively harm them by "prevent[ing] bilateral negotiations[] [and] placing them instead under ongoing Court control." (Direct Action Pls.' Sur-Reply 10.) In support, Direct Action Plaintiffs argue that the injunctive relief sought by Plaintiffs will reopen prior settlements entered into by other merchants and will place the Court "in the role of supplanting individual merchant competition with central control." (Direct Action Pls.' Opp'n 14.)

Grubhub Plaintiffs argue that the remedy proposed by Plaintiffs' expert Dr. Joseph E. Stiglitz creates a conflict of interest because Plaintiffs want to "restrain the ability of 'premium merchants' like the Grubhub Plaintiffs [from] us[ing] their negotiating leverage to **[*178]** reach agreements" with Defendants and would "invite other class members to challenge any contracts the Grubhub Plaintiffs might negotiate." (Grubhub Pls.' Opp'n 12.) Grubhub Plaintiffs also highlight the differences between themselves and Plaintiffs, stating that the class representatives are "differently situated than large merchants that have different business models[] and that the [Defendants'] rules and practices affect them differently as a result." (*Id.* at 5.) In support, Grubhub Plaintiffs rely on deposition testimony by class representatives stating that Visa's "all-outlets practice[25] . . . is not important to RunCentral[] which has no other brands or locations," and from the owner of two bars operated by DDMB Inc. and DDMB2 LLC who stated that "those businesses have no complaint about the Visa and Mastercard [h]onor [a]ll [c]ards rules." (*Id.*)

Walmart argues that Plaintiffs will "undermine merchants' interests in eliminating anticompetitive conduct, and in particular Defendants' [honor-all-cards] rules" because Plaintiffs "have little actual interest in rolling[] back these rules." (Walmart Opp'n 10-11.) In support, Walmart cites to a 2016 filing in which class counsel "informed **[*179]** the Court that they only sought to eliminate [honor-all-cards] rules in just a few states (ones that prohibit surcharging)." (*Id.* at 11 (citing Resp. in Supp. of Appl. for Appointment as Co-Lead Counsel for Equitable Relief Class 6, Docket Entry No. 6695).) Walmart contends that Plaintiffs will "put insufficient energy into challenging Defendants' [honor-all-cards] rules once their class is certified." (*Id.*) Walmart contends that the submissions of Plaintiffs' experts confirm their view of Plaintiffs' relief priorities because (1) Plaintiffs' expert Professor Dennis W. Carlton "proposed leaving the [honor-all-cards] rules in place generally, so long as no-surcharge rules are struck down," (Walmart Suppl. Opp'n 3 (citing Dep. of Professor Dennis W. Carlton ("Carlton Dep.") 141:9-18, annexed to Decl. of Paul H. Schoeman in Supp. of Walmart's Suppl. Opp'n ("Schoeman Suppl. Opp'n Decl.") as Ex. B, Docket Entry No. 8621)), (2) Dr. Leffler acknowledged during his deposition that different merchants prioritize different relief, (*id.* at 3-4 (citing Dep. of Dr. Keith Leffler ("Leffler Dep.") 90:23-91:4, annexed to Schoeman Suppl. Opp'n Decl. as Ex. C, Docket Entry No. 8621-1)), and (3) several **[*180]** experts including Dr. Stiglitz "argue[d] that the Court should monitor commercial agreements reached by 'leading' or 'premium' merchants . . . [to] assess whether these 'special deals' would be detrimental to the interests of other class members," (*id.* 4 (first citing Stiglitz Report ¶¶ 166, 177, annexed to Schoeman Suppl. Opp'n Decl. as Ex. D, Docket Entry No. 8621-2; and then citing Leffler Dep. 74:7-13)). Finally, Walmart contends that Plaintiffs will seek relief that will hamper large merchants' ability to negotiate their own deals directly with Defendants. (*Id.* at 6-7.)

Merchant Trade Groups argue that "[t]here is troubling indicia" that Plaintiffs' value injunctive relief focused on surcharging whereas many other merchants within the class "have already made clear in their objection to the 2013 (b)(2) [s]ettlement and subsequent appeal" that "Defendants' antitrust violations cannot be remediated for Merchant Trade Groups or the merchant community more broadly unless the [h]onor-all-[c]ards and default interchange rules are eliminated." (Merchant Trade Groups' Opp'n 11.) In response to Plaintiffs' argument that Merchant Trade Groups' are speculating about relief priorities, Merchant **[*181]** Trade Groups argue that (1) Plaintiffs' class certification brief "cites no evidence about" the honor-all-cards and default interchange rules, (2) one class representative "revealed that it is not personally interested" in relief from the honor-all-cards rule at all, and (3) all three of Plaintiffs' expert reports "focus on Defendants' no-surcharging rules — both in their analyses of Defendants' liability and in their injunctive relief — and give short shrift to Defendants' [h]onor-all-[c]ards and default interchange rules." (Merchant Trade Groups' Suppl. Opp'n 5-6.)

In response, Plaintiffs argue that (1) there is no conflict as to the injunctive relief sought because Plaintiffs seek relief "as to all of the Restraints, including the [h]onor [a]ll [c]ards and [d]efault [i]nterchange rules, with the objective of creating a more competitive market for all merchants," (2) there is no authority suggesting that all class members must have suffered "the same exact injury in the exact same way," and (3) the potential need for court monitoring does not create a conflict within the class because "[i]t is common for courts to retain jurisdiction to ensure compliance with their decrees" and such **[*182]** monitoring is needed because Network Defendants' market power will not be immediately eliminated as a result of any injunctive relief obtained. (Pls.' Reply Mem. in Supp. Pls.' Mot. ("Pls.' Reply") 10-11, 15-18, Docket Entry No. 8457); *see also* Pls.' Reply to Merchant Trade Groups' and Walmart's Suppl. Opp'n ("Pls.' Suppl. Reply") 2-6, Docket Entry No. 8631 ("[T]he 'honor-all-wallets' rule . . . is an application of the [honor-all-cards] rule to mobile devices.").) First, Plaintiffs argue that there is no conflict as to the type of relief sought because they are seeking relief as to all Restraints. (*See* Pls.' Reply 15-16; Pls.' Suppl. Reply 3.) Plaintiffs contend that while they did not retain a separate expert to "address the mobile-wallets issue, there was no need to" as Dr. Stiglitz had already "dissected the [h]onor [a]ll [c]ards rule in details, including its application to not only mobile wallets but also all new emerging technologies." (Pls.' Reply 16 (citing Expert Report of Joseph E. Stiglitz

---

[25] Visa's all-outlets practice requires that "an entity that accepts Visa at one location to accept the cards at all locations in order to qualify for a better interchange tier." (Grubhub Pls.' Opp'n 5.)

("Stiglitz Report") ¶ 121, annexed to Pls.' Notice of Service as Ex. 2, Docket Entry No. 8474-2).) Next, Plaintiffs argue that "a disagreement about the proper scope of relief is not **[*183]** a basis for denying certification." (*Id.* at 16.) Finally, Plaintiffs contend that Direct Action Plaintiffs distort Dr. Leffler's deposition testimony who "innocuously testified that selective agreements *could* be inconsistent with relief ordered by the Court" and other parties will necessarily be impacted by the outcome of the (b)(2) class because of the nature of how injunctive relief operates. (*Id.* at 12-13.) In addition, Plaintiffs argue that any discussion of remedies is premature as "the Court will determine the scope of the equitable relief based on its liability findings and further remedy proceedings" and the class will have an opportunity to "object to relief that they deem adverse to their interests." (*Id.* at 13.)

Opponents' arguments that Plaintiffs seek a different type of injunctive relief are not sufficient to establish a conflict between the class representatives and the class members that defeats adequacy of representation. Despite Opponents' contentions that Plaintiffs are primarily focused on obtaining surcharging relief, Plaintiffs' complaint challenges several of the Restraints that Opponents claim they are not seeking to eliminate, including the honor-all-cards rules **[*184]** and the default interchange fees, as violations of ***antitrust law***. (*See* Pls.' Mem 2 n.5; Compl. ¶¶ 94, 113, 139-40, 144, 155-56, 216, 288-99, 364-428.) Opponents point to quotes from Plaintiffs' expert reports to support their arguments, but in other parts of their reports the experts also opine that the honor-all-cards and default interchange rules are anticompetitive and suggest eliminating them to some extent. For example, in his recommendations as to potential injunctive relief, Dr. Stiglitz recommended "[e]liminating all restraints on non-price steering," "[e]liminating Visa and Mastercard default interchange fees for large banks," and "[e]liminating the [h]onor-[a]ll-[c]ards rule for large banks," and included the honor-all-cards rules and default interchange rates in his list of "current significant Visa and Mastercard" restraints. (*See* Stiglitz Report ¶¶ 7, 37.) While Opponents correctly state that Dr. Stiglitz suggests in his report that the honor-all-cards rule be eliminated in states where surcharging is not permitted, he also states that "[t]he [h]onor-[a]ll-[c]ards [r]ule has anticompetitive impact beyond the states not allowing merchants to charge for high-cost credit **[*185]** card use" and that eliminating the rule would result in driving down issuing banks' profits. (*Id.* ¶¶ 134-135.) Professor Carlton's reports offer a less strict perspective toward the honor-all-cards rules, though he also suggests eliminating the honor-all-cards rules in certain states. At one point in his report, he states that the honor-all-cards rules should be eliminated "[i]n states that prohibit surcharging," (Report of Prof. Dennis W. Carlton ("Carlton Report") ¶ 8, annexed to Pls.' Notice of Service as Ex. 1, Docket Entry No. 8474-1), and in the remedies section of the report, he states that "[i]n states where surcharging is restricted by law, competition would be improved if the [h]onor [a]ll [c]ards rules were relaxed," (*id.* ¶ 111). In addition, both experts suggest that applications of the honor-all-cards rules such as the honor-all-wallets rule[26] should not be permitted in order to allow more competition. (*See* Carlton Report ¶ 115 ("As an example of potential future behavior that the Court may wish to address, tying of credit and debit was disallowed as part of the *Visa/MasterMoney* litigation. Competition would be protected if similar tying related to new payment methods or **[*186]** technologies were disallowed, lest Visa and Mastercard again use their market power in credit (and now debit) to gain market power over a new payment method." (footnote omitted)).)

While Plaintiffs' Complaint and expert reports thus far demonstrate a desire to eliminate the honor-all-cards and default interchange rules in some capacity, the Court declines to make any judgments at this stage of the litigation as to Plaintiffs' injunctive relief priorities based on the existing expert reports. As Plaintiffs contend, on April 18, 2019, the Court directed that:

> The parties' expert reports are not required at this time, or until further order of the Court, to include expert recitations and opinions directed at the scope and form of any appropriate injunctive relief. In the event of a subsequent finding of liability, the parties shall confer regarding a schedule for the serving of expert reports directed at the scope and form of any proposed injunctive relief and report to the Court within twenty-eight days following any such liability determination.

---

[26] The honor-all-wallets rules are an application of the honor-all-cards rules to payments made via mobile devices. (*See* Pls.' Suppl. Reply 4 ("[T]he 'honor-all-wallets' rule . . . is an application of the [honor-all-cards] rule to mobile devices."); Compl. ¶ 295 ("Visa and MasterCard have also construed and applied their [h]onor [a]ll [c]ards rules to become '[h]onor [a]ll [d]evices' rules. Specifically, Visa and MasterCard rules require Merchants to accept all devices set up to transact through a Visa or MasterCard network to the extent the Merchant accepts payments using communications technology employed by the device. This results in a Merchant having limited ability to refuse or condition acceptance of payments from digital wallets.").)

(Order dated Apr. 18, 2019.) Accordingly, expert reports at this stage of the litigation do not conclusively address "the scope and form of **[*187]** any appropriate injunctive relief" and any conflicts as to the form of injunctive relief are speculative.[27] *See* Denney, 443 F.3d at 268 ("A conflict or potential conflict alone will not, however, necessarily defeat class certification — the conflict must be 'fundamental.'" (quoting In re Visa Check/MasterMoney Antitrust Litig., 280 F.3d at 145)); Zhang v. Ichiban Grp., LLC, No. 17-CV-148, 2021 U.S. Dist. LEXIS 136308, 2021 WL 3030052, at *5 (N.D.N.Y. May 21, 2021), *reconsideration denied*, 2021 U.S. Dist. LEXIS 117446, 2021 WL 3030038 (N.D.N.Y. June 23, 2021) ("A conflict of interest between the parties and the class they seek to represent 'must be fundamental, and speculative conflict should be disregarded at the class certification stage.'" (quoting Sykes, 285 F.R.D. at 287)); In re Vitamin C Antitrust Litig., 279 F.R.D. at 102 ("[C]onflicts which are merely speculative . . . should be disregarded at the class certification stage.").

Moreover, even if Plaintiffs' do have a different perspective on the specific form of injunctive relief, courts considering the issue routinely hold that different perspectives as to the appropriate form of injunctive relief or as to litigation strategy do not constitute a conflict sufficient to defeat adequacy of representation. *See* In re Yahoo Mail Litig., 308 F.R.D. 577, 596 (N.D. Cal. 2015) (finding that "the relief that [the] [p]laintiffs seek does not conflict with the interests of proposed class members" when the plaintiffs sought to shut down email scanning and the defendant contended that such actions would result in a less secure email experience, **[*188]** and holding that "[a] difference of opinion about the propriety of the specific relief sought in a class action among potential class members is not sufficient to defeat certification" (quoting Californians for Disability Rts., Inc. v. California Dep't of Transp., 249 F.R.D. 334, 348 (N.D. Cal. 2008))); Keepseagle v. Vilsack, 102 F. Supp. 3d 205, 214 (D.D.C. 2015) (denying motion to modify class settlement and stating that "class representatives do not become inadequate merely because other class members disagree with their strategic decisions"); Californians for Disability Rts., Inc., 249 F.R.D. at 348 ("A difference of opinion about the propriety of the specific relief sought in a class action among potential class members is not sufficient to defeat certification."); In re J.P. Morgan Chase Cash Balance Litig., 242 F.R.D. 265, 275 (S.D.N.Y. 2007) (finding that the alleged ERISA violation "affects former and current employees equally" and stating that "[w]hile current employees may prefer the cash balance formula for various reasons . . . [the] preference for a different remedy does not preclude class certification"), *amended*, 255 F.R.D. 130 (S.D.N.Y. 2009); Richards v. FleetBoston Fin. Corp., 235 F.R.D. 165, 172 (D. Conn. 2006) ("Even if the court could assume at this stage in the litigation that class members do prefer a lump-sum distribution, a question it does not decide, this conclusion would go only toward the question of which remedy class members would seek, which does not affect the viability of the class at this stage in the litigation. . . . The question of remedies **[*189]** is not appropriate for resolution at this stage in the litigation, and the court is not required to impose the particular remedy requested by [the plaintiff] even if she prevails on the merits of her claims."); *see also* In re Motor Fuel Temperature Sales Pracs. Litig., 271 F.R.D. 221, 233 (D. Kan. 2010) (finding the class representatives adequate in a Rule 23(b)(2) class action despite the fact that some class members might oppose the requested injunctive relief because the injunction need only benefit the class as a whole and because "[c]lass actions are not forbidden in every case in which class members may disagree"). For example, in *In re Visa Check/MasterMoney Antitrust Litigation*, the Second Circuit rejected the defendants' arguments that class representatives were inadequate because they advanced an alternative theory for calculating the plaintiffs' damages. 280 F.3d at 144.[28] The Second Circuit stated that the

---

[27] Direct Action Plaintiffs contend that Plaintiffs propose a plan to have the Court monitor agreements reached between a merchant and Defendants argue that this plan violates the Rules Enabling Act because it "seeks to abridge the Direct Action Plaintiffs' substantive rights and prohibit[s] them from continuing to litigate their own claims for past and future damages[] or reach[ing] individual settlements resolving those claims." (Direct Action Pls.' Opp'n 14.) Walmart contends that Plaintiffs will "likely seek an injunction that effectively prevent[] merchants from trying to use what bargaining power they have to secure lower interchange rates for themselves." (Walmart's Opp'n 8; Walmart's Suppl. Opp'n 4-5.) For the same reasons discussed above, the Court finds these arguments regarding the propriety of any proposed injunctive relief premature.

[28] The Second Circuit later abrogated Visa Check/MasterMoney on other grounds. *See* In re Initial Pub. Offerings Sec. Litig., 471 F.3d 24, 32, 42 (2d Cir. 2006), *decision clarified on denial of reh'g sub nom.* In re Initial Pub. Offering Sec. Litig., 483 F.3d 70 (2d Cir. 2007). The abrogation concerned the proper standard for demonstrating compliance with Rule 23's requirements on a motion for class certification and "disavowed the suggestion . . . that an expert's testimony may establish a component of a Rule 23 requirement simply by being not fatally flawed." *Id.*

different theories did not create a fundamental conflict because "[a]ll class members, regardless of their debt/credit proportion, wish to prove that the debit card fees would be significantly lower" without the challenged practice, and because "[e]very member also has an interest in establishing the hypothetical, 'untied' price as low as possible in order to maximize recovery of **[*190]** damages. *Id. at 144*. In addition, the *Visa Check/MasterMoney* court noted that speculative conflict "should be disregarded at the class certification stage." *Id. at 146*. Had the class representatives sought a different form of relief entirely — that is, monetary damages versus equitable relief, it may have raised an issue of inadequate representation. *See, e.g.*, *Dickens v. GC Servs. Ltd. P'ship, 706 F. App'x 529, 535-36 (11th Cir. 2017)* (noting that in a past Eleventh Circuit case the court found inadequate representation when a class sought primarily injunctive relief when damages were a more appropriate form of relief, stating that "there is a conflict between the named plaintiff and absent class members where the class representative seeks only a form of relief that might not be of the utmost importance to absent class members," and holding that there is no reason to deem the plaintiff an inadequate representative when the plaintiff sought injunctive relief and there was only a "remote possibility that some class members may have suffered actual damages"); *see also* 1 Newberg on Class Actions § 3:59 ("[W]hen a class includes members whose claims are for a different type of relief than the claims of the putative class representatives, it is possible that the differences create a conflict of interest **[*191]** disabling the representative from adequately representing the entire class."). ***HN15***[] Moreover, *Rule 23* has procedural safeguards that will allow class members to object to the injunctive relief provided in any settlement. *See* *Fed. R. Civ. P. 23(e)(5)* ("Any class member may object to the [settlement] proposal . . . .").

The cases Opponents cite to the contrary are inapposite. Several of the cases are cited in support of Opponents' speculative arguments regarding the form of the injunctive relief sought by Plaintiffs. For example, Walmart cites *Wexler v. AT&T Corp.* for the proposition that "[a] proposed representative may be . . . inadequate if, for example, they . . . would otherwise permit a settlement on terms less favorable to absent class members." (Walmart Opp'n 10 n.12 (citing *Wexler v. AT&T Corp., No. 15-CV-686, 2019 U.S. Dist. LEXIS 172108, 2019 WL 4874746, at *2 (E.D.N.Y. Sept. 30, 2019)*).) However, for the reasons discussed above, the Court finds discussion of the specific type of injunctive relief Plaintiffs intend to seek premature at this stage of the litigation. Walmart also suggests that the Court should broadly apply *Interchange Fees II* and hold that adequacy is lacking when groups within a class seek conflicting forms of relief, (*see* Walmart Opp'n 10 ("The Second Circuit has already **[*192]** warned, in this very MDL, that adequacy is lacking where different groups seek conflicting forms of relief, incentivizing class counsel to trade away one group's interests for the other's and settle on terms that disfavor certain class members.")), however, the Second Circuit did not reach such a conclusion in *Interchange Fees II*. The Second Circuit found that adequacy was lacking due to the unitary representation of the damages and equitable relief class by the same class counsel. *See* *Interchange Fees II, 827 F.3d at 234* ("Unitary representation of separate classes that claim distinct, competing, and conflicting relief create unacceptable incentives for *counsel* to trade benefits to one class for benefits to the other in order somehow to reach a settlement." (emphasis added)). While the Second Circuit emphasized the importance of obtaining greater injunctive relief than just primarily the ability to surcharge, the Court addressed this issue in the context of inadequate class counsel and an "unreasonable tradeoff between relief and release that demonstrates their representation did not comply with due process." *Id. at 238-40* ("This is not a matter of certain merchants (e.g., those based in New York and those that accept American Express) **[*193]** arguing that class counsel did not bargain for their preferred form of relief, did not press certain claims more forcefully, or did not seek certain changes to the network rule books more zealously. This is a matter of class counsel trading the claims of many merchants for relief they cannot use: they actually received nothing.").

Accordingly, the Court finds that Opponents' arguments regarding their preferred injunctive relief are premature and speculative and do not create a fundamental conflict that precludes a finding of adequacy of representation.

C. The risk of claim and issue preclusion does not create a fundamental conflict between class representatives and putative class members

Direct Action Plaintiffs argue that the proposed class violates due process because their claims for damages are property interests protected by the Due Process Clause and certifying a mandatory class would "put class members at risk of having [their] individual damages claims precluded" because an "adverse judgment against a mandatory class could collaterally estop class members from pursuing their individual damages claims." (Direct Action Pls.' Opp'n 6-8 (first citing Shutts, 472 U.S. at 812; and then citing Dukes, 564 U.S. at 363).) Direct Action Plaintiffs contend **[*194]** that the Second Circuit's decision in *Interchange Fees II* prevents certification of a mandatory equitable relief class when doing so would "jeopardize the compensatory damages claims of individual class members, including because of the risk of collateral estoppel." (*Id.* at 7 (citing Interchange Fees II, 827 F.3d at 364).) In response to Plaintiffs' argument that due process only protects their property right in their claim "when a mandatory (b)(2) class seeks both injunctive *and* monetary relief," Direct Action Plaintiffs contend that nothing in Dukes supports that argument, (Direct Action Pls.' Sur-Reply 2-3), and their individual damages claims are nevertheless at risk because Plaintiffs' claims for equitable relief raise the same issues and "require[] proof of Defendants' *liability* for engaging in anticompetitive restraints," (Direct Action Pls.' Opp'n 8-9).

Grubhub Plaintiffs raise a similar argument. (*See* Grubhub Pls.' Opp'n 13.) Grubhub Plaintiffs contend that their claims are protected by the Due Process Clause and will be precluded should they be collaterally estopped by an adverse judgment against the class. (*Id.*)

In response, Plaintiffs argue that the collateral estoppel argument is meritless as it is speculative and premature. (Pls.' **[*195]** Reply.) In support, Plaintiffs argue that the "'potential preclusion' argument would prevent any court from certifying a mandatory (b)(2) class if any class member had a related claim for damages" and courts have "continued to certify and endorse the certification of (b)(2) classes including members that also maintain damages claims." (*Id.* at 7.) Plaintiffs distinguish the cases cited by Opponents and argue that those cases were decided in other contexts that have no bearing on the instant motion. (*See id.* at 8 (noting that the cases were decided in the context of class certification for a class predominantly for money damages or had damages claims compromised by the terms of a release).)

Defendants argue that due process is not implicated by certification of a mandatory class because Plaintiffs seek certification of a Rule 23(b)(2) class that seeks neither "monetary relief" nor even "'incidental' monetary relief" because the Rule 23(b)(3) settlement "separately addressed all other claims for relief, and notice and opt-out rights were provided to members of that class." (Defs.' Reply 11.) In response to Opponents' arguments regarding Dukes, Defendants contend that Dukes is inapposite because it concerned certification **[*196]** of a Rule 23(b)(2) class that sought injunctive relief and backpay and "the monetary relief [was] not incidental to" the injunctive relief sought. (*Id.* (quoting Dukes, 564 U.S. at 360).) In addition, Defendants argue that the potential for collateral estoppel does not violate due process because if that were the case, "courts typically would be required to provide opt-out rights to a Rule 23(b)(2) class." (*Id.* at 12.)

Opponents' claim preclusion argument is unpersuasive. ***HN16***[] "The doctrine of res judicata, or claim preclusion, holds that 'a final judgment on the merits of an action precludes the parties or their privies from relitigating issues that were or could have been raised in that action.'" In re Motors Liquidation Co., 943 F.3d 125, 130 (2d Cir. 2019) (quoting Monahan v. N.Y.C. Dep't of Corr., 214 F.3d 275, 284 (2d Cir. 2000)); In re Vitamin C Antitrust Litig., 279 F.R.D. at 114 ("[A] final judgment on the merits generally precludes a plaintiff from bringing a new lawsuit raising issues that could have been litigated in the first suit, but were not." (citing *Schwab v. Philip Morris USA, Inc., 449 F. Supp. 2d 992, 1076 (E.D.N.Y. 2006)*)). However, class action judgments are an exception to the general rule: "[P]articipation in a Rule 23(b)(2) class seeking injunctive relief does not ordinarily preclude absent class members from bringing their non-litigated claims in subsequent lawsuits." In re Vitamin C Antitrust Litig., 279 F.R.D. at 114. The United States Supreme Court's decision in *Cooper v. Federal Reserve Bank of Richmond* is widely cited **[*197]** as the source of this principle. *See* id. at 114-15 ("This exception to the general claim-splitting rule has its origin in a puzzling Supreme Court decision from 1984." (citing Cooper v. Fed. Reserve Bank, 467 U.S. 867, 880, 104 S. Ct. 2794, 81 L. Ed. 2d 718 (1984))); *see also* Hernandez v. J.P. Morgan Chase Bank N.A., No. 14-CV-24254, 2016 U.S. Dist. LEXIS 95966, 2016 WL 3982496, at *13 (S.D. Fla. July 22, 2016) (quoting Cooper, 467 U.S. at 880); Gonzalez v. City of New York, 396 F. Supp. 2d 411, 420 (S.D.N.Y. 2005) (finding that the plaintiffs' failure to promote claim was not barred by a previous class action judgment (quoting Cooper, 467 U.S. at 880)); *see also* 6 Newberg on Class Actions § 18:17 ("The Supreme Court's 1984 decision . . . is the leading case in which a court refused to bar individual claims that arose out of the same factual predicate as claims that had been resolved by a prior class suit, though the specific facts of that case are somewhat unique and beguiling."). Cooper involved an individual suit which alleged racial discrimination following an earlier class action in which the court found no pattern and practice of discrimination. *Cooper, 467 U.S. at 867*. While the earlier class action resulted in a judgment for the defendant and the plaintiff had not opted out of the class, the Supreme Court held that the plaintiff's subsequent discrimination claim was not barred by the prior class action because there might be individual discrimination despite the lack of a "pattern and practice of discrimination" as concluded in the class action. *Id. at 880*. The **[*198]** *Cooper* court stated that the class action judgment:

> *(1)* bars the class members from bringing another class action against the [defendant] alleging a pattern or practice of discrimination for the relevant time period and (2) precludes the class members in any other litigation with the [defendant] from relitigating the question whether the [defendant] engaged in a pattern and practice of discrimination against black employees during the relevant time period. The judgment is not, however, dispositive of the individual claims the . . . petitioners have alleged in their separate action. . . . The class-action device was intended to establish a procedure for the adjudication of common questions of law or fact. If the [defendant's] theory were adopted, it would be tantamount to requiring that every member of the class be permitted to intervene to litigate the merits of his individual claim.

Id. at 880.

Courts have since relied on *Cooper* as an exception to the general rules of preclusion in the class-action context. *See* *In re Vitamin C Antitrust Litig., 279 F.R.D. at 114* ("Although *Cooper* did not announce any bright-line rules, some courts have cited this case for the sweeping proposition that 'a class action judgment . . . binds the class members as to matters actually litigated **[*199]** but does not resolve any claim based on individual circumstances that was not addressed in the class action.'" (quoting *Cameron v. Tomes, 990 F.2d 14, 17 (1st Cir. 1993)*)); *see also* *In re AXA Equitable Life Ins. Co. COI Litig., No. 16-CV-740, 2020 U.S. Dist. LEXIS 145948, 2020 WL 4694172, at *4 n.2 (S.D.N.Y. Aug. 13, 2020)* ("[S]ome courts have held that inclusion in a mandatory class does not bar a class member from later asserting a claim for money damages arising out of the same transaction."); *Adkins v. Morgan Stanley, 307 F.R.D. 119, 141 (S.D.N.Y. 2015)* (citing *Cooper* and stating that "while absent class members risk losing on the merits and being precluded from separately asserting, for example, a claim that [the defendant] is culpable for their loans, if the class were to win on the merits they would be able to pursue separate claims for damages"), *aff'd*, *656 F. App'x 555 (2d Cir. 2016)*; *In re TFT-LCD (Flat Panel) Antitrust Litig., No. 07-MD-1827, 2012 U.S. Dist. LEXIS 11369, 2012 WL 273883, at *1-2 (N.D. Cal. Jan. 30, 2012)* ("'In the Ninth Circuit, 'the general rule is that a class action suit seeking only declaratory and injunctive relief does not bar subsequent individual damages claims by class members, even if based on the same events.' . . . The rationale for this rule — which has typically been applied in the Title VII context — is that claims for monetary damages typically rely upon different facts than claims for injunctive relief." (first quoting *Hiser v. Franklin, 94 F.3d 1287, 1291 (9th Cir. 1996)*; and then citing *Cooper, 467 U.S. at 891*)); *see also* *Akootchook v. United States, 271 F.3d 1160, 1165 (9th Cir. 2001)* ("If all class members had to bring their own individual claims in addition to the common class claims, it would **[*200]** destroy the efficiency of having class actions and reduce the benefit of joining such a suit."). In *Hiser v. Franklin*, for example, the Ninth Circuit rejected the argument that a state-court class-action judgment precluded a second suit seeking individual damages. *94 F.3d at 1291*. The Ninth Circuit stated that "the general rule is that a class action suit seeking only declaratory and injunctive relief does not bar subsequent individual damage claims by class members, even if based on the same events" and noted that "every federal court of appeals that has considered the question" has reached the same conclusion. *Hiser, 94 F.3d at 1291* (citing *Cooper, 467 U.S. at 880* and collecting cases). Circuit courts that have considered the issue have reached the same conclusion, although some of their holdings are arguably limited to the prisoners' conditions of confinement context. *See* *Frank v. United Airlines, Inc., 216 F.3d 845, 851-52 (2000)* (limiting the preclusive effect of a *Rule 23(b)(2)* sex-discrimination class-action by holding that the absence of a right to opt out in the earlier case made preclusion unavailable); *Fortner v. Thomas, 983 F.2d 1024, 1031 (11th Cir. 1993)* ("It is clear that a prisoner's claim for monetary damages or other particularized relief is not barred if the class representative sought only declaratory and injunctive relief, even if the prisoner is a member of a **[*201]** pending class action."); *Norris v. Slothouber, 718 F.2d 1116, 1117, 231 U.S. App. D.C. 78 (D.C. Cir. 1983)* (per curiam) ("A suit for damages is not precluded by reason of the plaintiff's membership in a class for which no monetary relief is sought."); *Crowder v. Lash, 687 F.2d 996, 1011 (7th Cir. 1982)* ("Contrary to defendant's apprehensions, application of collateral estoppel to bar relitigation of issues determined in [the previous class action] will not automatically establish defendant's liability for damages here. Even if the conditions under which [the plaintiff] was confined are held to constitute cruel and unusual punishment as a matter of law, issues of personal responsibility and good faith on the part of these defendants remain to be litigated.").

Although the Second Circuit has not addressed the issue, the Court agrees with the courts that have found that membership in an equitable relief class does not bar subsequent individual suits for damages and finds that Opponents are not inadequately represented on this basis. The class certification decision in *In re Vitamin C Antitrust Litigation* is instructive.[29] *279 F.R.D. at 90*. In that case, which involved alleged violations of ***antitrust law***, the court certified a mandatory injunctive relief class of direct and indirect purchasers of vitamin C. *Id. at 116*. The defendants argued that **[*202]** the class was not adequately represented because the class only sought injunctive relief as to the indirect purchasers and failed to pursue damages, and "principles of res judicata [would] bar the indirect purchasers from bringing [their damages] claims in the future." *Id. at 114*. The court rejected the defendants' arguments, holding that "membership in th[e] *Rule 23(b)(2)* class does not bar the indirect purchasers' subsequent claims for damages." *Id. at 115*. The court disagreed with other courts that "refuse to certify a class which [seeks] injunctive relief but exclude[s] some class members' damages claims." *Id. at 115* (citing *In re Methyl Tertiary Butyl Ether ("MTBE") Prods. Liab. Litig., 209 F.R.D. 323, 340 (S.D.N.Y. 2002)*). The court noted that *Rule 23(b)(3)* requires notice and an opportunity to opt out whereas *Rule 23(b)(2)* does not require that a district court afford the same protections to class members because *Rule 23(b)(2)* class actions are only certified if "broad, class-wide injunctive or declaratory relief is necessary to redress a group-wide injury." *Id. at 115* (quoting *Robinson, 267 F.3d at 162*). Damages claims, which "usually require individualized analyses of class members' circumstances," therefore "tend to destroy class certification under *Rule 23(b)(2)*." *Id.* While the court stated that only a subsequent court could determine the res judicata effect of the judgment, it also explicitly reserved **[*203]** "the right of the indirect purchasers to maintain their damages claims in subsequent proceedings notwithstanding their participation in the [i]njunction [c]lass" and found this approach "sufficient to extinguish [the] defendants' claim-splitting concerns for the purpose of class certification." *Id. at 116*.

Similarly, the Court finds that the class representatives do not inadequately represent Opponents because Opponents' membership in the (b)(2) class will not preclude any individual damages claims. *See J.B. v. Onondaga County, 401 F. Supp. 3d 320, 333 n.4 (N.D.N.Y. 2019)* (following *In re Vitamin C Antitrust Litigation* and rejecting the argument that the class representative was inadequately representing the class because he sought only injunctive relief when other class members had potential claims for damages); *Ackerman v. Coca-Cola Co., No. 09-CV-395, 2013 U.S. Dist. LEXIS 184232, 2013 WL 7044866, at *17 n.29 (E.D.N.Y. July 18, 2013)* (certifying *Rule 23(b)(2)* class and stating that "participation in a *Rule 23(b)(2)* class seeking injunctive relief does not preclude absent class members from bringing their non-litigated damages claims in subsequent lawsuits" (citing *In re Vitamin C Antitrust Litig., 279 F.R.D. at 114*)); *In re Paulsboro Derailment Cases, No. 12-CV-7586, 2014 U.S. Dist. LEXIS 115542, 2014 WL 4162790, at *15 (D.N.J. Aug. 20, 2014)* ("It is clear that 'participation in a *Rule 23(b)(2)* class seeking injunctive relief does not ordinarily preclude absent class members from bringing their non-litigated claims in subsequent lawsuits.'" (quoting *In re Vitamin C Antitrust Litig., 279 F.R.D. at 114*)). **[*204]** To find otherwise would essentially render *Rule 23(b)(2)* classes impossible to certify when there are also monetary damages at stake. *See In re Vitamin C Antitrust Litig., 279 F.R.D. at 116* ("[T]he *In re MTBE* court's approach has been criticized as saying, in effect, 'I know that you have proposed a class action that may be properly maintainable, but I won't allow you to proceed because I must protect the absentees from the possibility that a subsequent court might misapply my judgment.' This is an unacceptable result." (citation omitted) (quoting Tobias Barrington Wolff, *Preclusion in Class Action Litigation*, *105 Colum. L. Rev. 717, 745 (2005)*)); 6 Newberg on Class Actions § 18:18 ("Relying on the claim splitting concern alone would be an overbroad approach as it would tend to render the injunctive class action somewhat impossible to pursue. In any case in which the class seeks only declaratory and

---

[29] The Court notes that while the antitrust claims in *In re Vitamin C Antitrust Litigation* were later dismissed by the Second Circuit on international comity grounds, the court's class certification decision was not before the Second Circuit on appeal. *See In re Vitamin C Antitrust Litig., 8 F.4th 136, 143 (2d Cir. 2021)* ("[W]e hold that principles of international comity required the district court to dismiss this action.").

injunctive relief, there may always be a possibility of monetary damages, but that possibility alone should not foreclose the injunctive class action.").

In addition to the claim preclusion argument, Opponents attempt to advance a slightly different but related theory — that they are inadequately represented because their rights as to their monetary claims will be impermissibly altered **[*205]** or circumscribed by their membership in a *Rule 23(b)(2)* mandatory class via issue preclusion. ***HN17***[] While the exception developed in *Cooper* applies to claim preclusion, issues actually litigated in an earlier class action may still preclude litigation of the same issues in a subsequent individual action. *See Cholakyan v. Mercedes-Benz, USA, LLC, 281 F.R.D. 534, 565 (C.D. Cal. 2012)* ("While *Cooper* indicates that under some circumstances individual damages claims remain available to class members even after an adverse judgment in a *Rule 23(b)(2)* class action, the [Supreme] Court clearly stated that a plaintiff could not relitigate the exact question that was adjudicated in the prior litigation."); *Van Gorder v. Lira, No. 08-CV-281, 2010 U.S. Dist. LEXIS 30587, 2010 WL 1235328, at *7-8 (N.D.N.Y. Mar. 15, 2010)* (finding certain issues precluded by a previous *23(b)(3)* class action when the requirements for issue preclusion were satisfied and the plaintiff received notice and an opportunity to opt out but failed to do so), *report and recommendation adopted*, *2010 U.S. Dist. LEXIS 30584, 2010 WL 1235283 (N.D.N.Y. Mar. 30, 2010)*. Although the Court acknowledges that issue preclusion may impact litigation of particular issues in their individual damages claims, the Court does not find that this effect would render Opponents inadequately represented by the *Rule 23(b)(2)* class.

Direct Action Plaintiffs and Grubhub Plaintiffs imply that the Court should read *Dukes* broadly for the proposition that certifying equitable **[*206]** relief classes could interfere with money damages claims. (*See* Direct Action Pls.' Opp'n 7-8; Grubhub Pls.' Opp'n 13-14.) The Court declines to do so. In *Dukes*, the Supreme Court held that a *Rule 23(b)(2)* class could not be certified for lack of commonality under *Rule 23(a)(2)* and the equitable relief test under *Rule 23(b)(2)*. *See Dukes, 564 U.S. at 342*. The plaintiffs sought both individual monetary claims for backpay and injunctive relief under *Rule 23(b)(2)*. *Id. at 360-63*. ***HN18***[] The Supreme Court held that *Rule 23(b)(2)* "does not authorize class certification when each class member would be entitled to an individualized award of monetary damages" and noted that combining individualized and classwide relief is inconsistent with *Rule 23(b)(2)*. *Id. at 360-61*. In rejecting the respondents' arguments that their backpay claims were properly certified under *Rule 23(b)(2)*, the Supreme Court found that those claims did "not 'predominate' over [the respondents'] requests for injunctive and declaratory relief." *Id. at 363*. The *Dukes* court stated that adopting a predominance test under *Rule 23(b)(2)* would incentivize class representatives to intentionally not include monetary claims so that those claims do not predominate over the claims for injunctive relief. *Id. at 364*. In *Dukes*, for example, the named plaintiffs "declined to include employees' claims for compensatory damages in **[*207]** their complaint" in addition to the backpay claims — a strategy that "made it more likely that monetary relief would not 'predominate.'" *Id.* In doing so, the Supreme Court noted that including the backpay claims created the possibility "that individual class members' compensatory-damages claims would be *precluded* by litigation they had no power to hold themselves apart from." *Id.* The Court went on to state that:

> If it were determined, for example, that a particular class member is not entitled to backpay because her denial of increased pay or a promotion was *not* the product of discrimination, that employee might be collaterally estopped from independently seeking compensatory damages based on that same denial. That possibility underscores the need for plaintiffs with individual monetary claims to decide *for themselves* whether to tie their fates to the class representatives' or go it alone — a choice *Rule 23(b)(2)* does not ensure that they have.

Id.

Direct Action Plaintiffs and Grubhub Plaintiffs cite this language in their briefs to suggest that the Supreme Court took issue with certification of a *Rule 23(b)(2)* class because of the potential collateral estoppel effects generally. (*See* Direct Action Pls.' Opp'n **[*208]** 7-8 (stating that the Supreme Court "held that certifying a mandatory equitable relief class would violate due process if doing so could jeopardize the compensatory damages claims of individual class members, including because of the risk of collateral estoppel"); Grubhub Opp'n 13-14.) However, the Supreme Court was concerned with the preclusive effects that could arise as a result of splitting individual claims for monetary damages by including only some of the individual claims *within* the *Rule 23(b)(2)* class. *See*

Cholakyan, 281 F.R.D. at 565 ("While defendant would have the court read Dukes broadly, as another court recognized, there 'the Supreme Court focused on the problems that would arise if individualized relief were allowed in a (b)(2) class. This focus confirms what common sense suggests: a Rule 23(b)(2) judgment, with its one-size-fits-all approach and its limited procedural protections, will not preclude later claims for individualized relief.'" (quoting In re TFT-LCD (Flat Panel) Antitrust Litig., 2012 U.S. Dist. LEXIS 11369, 2012 WL 273883, at *2)). **HN19**[] The Court therefore reads Dukes to hold that claims for monetary relief cannot be certified *as part of* a mandatory Rule 23(b)(2) class because class members could be precluded from asserting their compensatory damages claims without having had notice and an opportunity to opt out — not that (b)(2) **[*209]** classes generally create a collateral estoppel risk as to damages claims as Opponents suggest.

Direct Action Plaintiffs also attempt to find support for their argument in Judge Leval's concurrence in *Interchange Fees II*. (*See* Direct Action Pls.' Opp'n 7-8 (stating that Judge Leval's concurrence in *Interchange Fees II* contended that "Dukes stands for the principle that 'a class may not even be certified because of the risk that adjudication of its rights might violate the due process rights of its members by forcibly depriving them of claims'" (quoting Interchange Fees II, 827 F.3d at 241 (Leval, J., concurring)).) However, this argument reads Judge Leval's concurrence more broadly than the Court does. In *Interchange Fees II*, Judge Leval found "the broad release of the Defendants" "particularly troublesome" because it "binds in perpetuity . . . all merchants who in the future will accept Visa and Mastercard, including those not yet in existence, who will never receive any part of the money." *Id.* Judge Leval found it impermissible that "[o]ne class of Plaintiffs receives money as compensation for the Defendants' arguable past violations, and in return gives up the future rights of *others*." *Id.* In support, Judge Leval stated **[*210]** that Dukes held that "claims for monetary relief cannot be certified under Rule 23(b)(2) . . . because of the possibility that 'individual class members' compensatory-damages claims would be *precluded* by litigation they had no power to hold themselves apart from.'" *Id.* (quoting Dukes, 564 U.S. at 364). Judge Leval went on to state:

> If a class may not even be certified because of the risk that adjudication of its rights might violate the due process rights of its members by forcibly depriving them of claims, then necessarily an adjudication of a class's rights that in fact forcibly deprives the members of their claims is also unacceptable. Because the terms of this settlement preclude all future merchants that will accept the Defendants' cards (the (b)(2) class) from bringing claims without their having had an opportunity to opt out (or even object), the Supreme Court's rulings in Shutts and Dukes make clear that a court cannot accept it.

Id. at 241-42. The Court understands Judge Leval's concurrence to find that a class or settlement class may not be certified if it confiscates money damages claims without notice and the opportunity to opt out. The issue for Judge Leval was the broad *release* contained in the settlement, and he relied on Shutts and Dukes, both **[*211]** cases involving impermissible confiscation of money damages claims without notice and an opportunity to opt out. The Court does not understand Judge Leval to imply that mere membership in a mandatory (b)(2) class risks confiscating damages claims and violates due process.

While the cases cited by Direct Action Plaintiffs indicate that some courts have expressed hesitation in certifying an equitable relief class when individual damages claims are at stake for fear that issue preclusion may hinder or burden litigation of individual damages claims in a subsequent suit, the Court finds these cases distinguishable because they involved claims for money or money-adjacent claims within a (b)(2) class. In Cholakyan, the court noted its concern as to "whether individual claims for money damages [would] be compromised if a mandatory Rule 23(b)(2) class is certified and plaintiffs lose on the merits" and concluded that "the state of the law on this subject is at best unsettled." 281 F.R.D. at 564-65. However, the court ultimately "stop[ped] short of a finding that [plaintiff] and counsel are inadequate," stating that there were "other grounds . . . more than sufficient to support the denial of class certification" as the plaintiff failed **[*212]** to satisfy the Rule 23(a) requirements of commonality and typicality and the Rule 23(b)(2) requirement. Id. at 565. In addition, the Cholakyan court found that the plaintiff improperly sought injunctive relief to create a reimbursement program "to avoid the need to comply with Rule 23(b)(3) while preserving the possibility that some class members will be able to obtain monetary relief" and that none of the remedies sought by plaintiff would "result in classwide relief." Id. at 559-60. Similarly, in Rouse v. Caruso, the court noted that "while a class action would not preclude any member from pursuing an individual damages claim, it could have the effect of precluding him from establishing certain issues upon which the success of the claim depends" and therefore would "create[] the possibility . . . that individual class members' compensatory-damages claims would be *precluded* by litigation they had no power to hold themselves apart from." No. 06-CV-10961, 2013 U.S. Dist. LEXIS 19946, 2013 WL 588916, at *6 n.3 (E.D. Mich. Jan. 7, 2013) (alteration in original) (quoting Dukes, 564 U.S. at 364), *report and recommendation adopted*, 2013 U.S. Dist. LEXIS 19209, 2013 WL 569638 (E.D. Mich. Feb. 13, 2013). The *Rouse* court found that the plaintiffs' claims "are the type that are ordinarily resolved through actions seeking damages, and rulings in the case contrary to plaintiffs' positions could have the effect of precluding a subsequent damages **[*213]** action by an individual plaintiff." 2013 U.S. Dist. LEXIS 19946, [WL] at *6. However, the court decided the case on other grounds, finding that a Rule 23(b)(2) class was not proper because the plaintiffs' claims challenged the adequacy of medical care and "include[d] individualized claims for monetary relief," which "belong in Rule 23(b)(3)."[30] *Id.* (quoting Dukes, 564 U.S. at 362).

In re Skelaxin (Metaxalone) Antitrust Litigation presents a closer call. 299 F.R.D. 555 (E.D. Tenn. 2014). In that case, the court denied certification of an injunctive relief class comprised of end payors for a type of drug on several grounds. Id. at 577-79. First, the court found that it was "unclear whether an injunction class of [e]nd [p]ayors [was] necessary or appropriate in this case" because the primary relief sought was monetary, and that the proposed class was unascertainable. Id. at 577-78. In addition to these concerns, the court was troubled by the possible "preclusive effect of an injunction-only class action on class members' ability to bring subsequent damages claims." Id. at 578. While the court noted that some courts, including the Sixth Circuit, "have held that claim-splitting does not apply to class actions and that 'the general rule is that a class action suit seeking only declaratory **[*214]** and injunctive relief does not bar subsequent individual damage[s] claims by class members, even if based on the same events,'" *id.* (quoting Hiser, 94 F.3d at 1287), the court went on to note that "even if such a judgment did not have a claim preclusive effect, it might still prevent relitigation of a number of issues in subsequent actions," *id.* (first citing In re MTBE Prods. Liab. Litig., 209 F.R.D. at 339-40 n.25; and then citing Dukes, 564 U.S. at 363). In articulating its "reservations about the possible preclusive effect" of an injunctive relief class such that "absent class members may be collaterally estopped from relitigating some [of the] issues in a damages action," the court relied on Dukes as demonstrating a "concern regarding the preclusive effect of a primarily injunction-based class." Id. at 579. However, for the reasons discussed above, the Court declines to adopt such a broad reading of Dukes and ultimately disagrees with the reasoning set forth in *Skelaxin*.

All of the cases cited by Direct Action Plaintiffs and Grubhub Plaintiffs involved class certification motions that failed for multiple reasons — no court relied solely on their concerns about issue preclusion to find the class representatives inadequate. *See* Cholakyan, 281 F.R.D. at 559-65; In re Skelaxin (Metaxalone) Antitrust Litig., 299 F.R.D. at 577-79; Rouse, 2013 U.S. Dist. LEXIS 19946, 2013 WL 588916, at *6; Slamon, 2020 U.S. Dist. LEXIS 87149, 2020 WL 2525961, at *16-17; *see also* 6 Newberg on Class Actions § 18:18 ("Most of the courts **[*215]** denying class certification outright have coupled their claim splitting concerns with other concerns about the proposed class action."). In addition, the decisions suggesting inadequacy of representation involved class representatives who were attempting to shoehorn damages claims into Rule 23(b)(2) class actions — an approach clearly prohibited by Shutts and *Dukes. See* Cholakyan, 281 F.R.D. at 559-65 (noting that the plaintiff improperly sought injunctive relief to create a reimbursement program "to avoid the need to comply with Rule 23(b)(3) while preserving the possibility that some class members will be able to obtain monetary relief"); Rouse, 2013 U.S. Dist. LEXIS 19946, 2013 WL 588916, at *6 (finding that a Rule 23(b)(2) class was not proper because the plaintiffs' claims challenged the adequacy of medical care and "include[d] individualized claims for monetary relief," which "belong in Rule 23(b)(3)"); Slamon, 2020 U.S. Dist. LEXIS 87149, 2020 WL 2525961, at *16-17 (finding that the

---

[30] The other cases cited by Direct Action Plaintiffs are similarly distinguishable. In *Slamon v. Carrizo (Marcellus) LLC*, while the court stated that "the individual lease holders must have the right to opt-out, and the absence of the ability to do so severely prejudice[d] their rights and also risk[ed] subjecting them, without their consent, to the doctrines of issue preclusion and collateral estoppel," the court also found that the injunctive relief sought "relate[d] predominantly to money damages" and failed the test set forth in Rule 23(b)(2). No. 16-CV-2187, 2020 U.S. Dist. LEXIS 87149, 2020 WL 2525961, at *16 (M.D. Pa. May 18, 2020). *Richardson v. L'Oreal USA, Inc.* is inapposite because that case involved certification of a (b)(2) settlement class in which the settlement released "class-wide damages claims, but not individual damages claims," which the court found was improper under Rule 23(b)(2) under Shutts and Dukes. 991 F. Supp. 2d 181, 198-99 (D.D.C. 2013).

injunctive relief sought predominantly involved damages claims). The Court does not find that any such improprieties exist in the context of the instant *Rule 23(b)(2)* class that would raise adequacy of representation concerns. To the contrary, the Court finds that class representatives' interests are aligned with absent class members' interests to maximize the equitable relief sought. *See* *Adkins, 307 F.R.D. at 141* ("[W]hile absent class members **[*216]** risk losing on the merits and being precluded from separately asserting, for example, a claim that [the defendant] is culpable for their loans, if the class were to win on the merits they would be able to pursue separate claims for damages. Because the putative class representatives have not needlessly compromised the ability of the class to secure its relief, [the defendants'] argument that they are inadequate class representatives on that basis is unpersuasive."). Moreover, to find that a *Rule 23(b)(2)* class cannot be certified when it might collaterally estop litigation of issues in damages claims would essentially render *Rule 23(b)(2)* classes impossible to pursue. *See* 6 Newberg on Class Actions § 18:18 ("Relying on the claim splitting concern alone would be an overbroad approach as it would tend to render the injunctive class action somewhat impossible to pursue. In any case in which the class seeks only declaratory and injunctive relief, there may always be a possibility of monetary damages, but that possibility alone should not foreclose the injunctive class action."). As Plaintiffs accurately note, courts in the Second Circuit continue to certify equitable relief classes including members that are simultaneously **[*217]** pursuing damages claims. *See* *Sykes v. Mel Harris & Assocs., LLC, 285 F.R.D. 279, 293 (S.D.N.Y. 2012)* ("That plaintiffs are seeking substantial monetary damages is of no concern given the [c]ourt's certification of separate *Rule 23(b)(2)* and *(b)(3)* classes addressing equitable relief and damages, respectively."), *aff'd sub nom.* *Sykes v. Mel S. Harris & Assocs. LLC, 780 F.3d 70 (2d Cir. 2015)*.

Because the Court is not aware of a case mandating such a result and to imply such a requirement would render (b)(2) classes nearly impossible to pursue, the Court finds that the potential for issue preclusion against absent class members pursuing damages claims does not preclude class certification on adequate representation grounds.

D. Class representatives do not improperly confiscate Opponents' injunctive relief claims or jeopardize any individual damages claims

Direct Action Plaintiffs' arguments fall into two groups: (1) that *Rule 23(b)(2)* Plaintiffs improperly confiscate their equitable relief claims and (2) that their damages claims are compromised because *Rule 23(b)(2)* Plaintiffs are members of the settlement class. (*See* Direct Action Pls.' Opp'n 11-18.) First, Direct Action Plaintiffs argue that the proposed class violates due process because a mandatory class would "confiscate [their] claims for injunctive *remedies*," "turn[] them over to putative class counsel who **[*218]** have adverse interests," and diminish their damages claims' value in order to "'monetize' injunctive claims that belong to the Direct Action Plaintiffs for the benefit of the remainder of the class." (*Id.* at 11 (citing Pls.' Mem. 48-49).) In support, Direct Action Plaintiffs argue that Plaintiffs intend to "exploit" their claims "for the benefit of other merchants," (Direct Action Pls.' Sur-Reply 8 & n.7), and could conceivably "allow class counsel to agree to a release that sacrifices some part of [their] claims to induce Defendants to settle with the class," which would create "perverse incentives for class representatives to place at risk potentially valid claims for monetary relief," (Direct Action Pls.' Opp'n 18 (quoting *Dukes, 564 U.S. at 364*)). Next, Direct Action Plaintiffs contend that there is a conflict of representation because class representatives have "no incentive to protect [Direct Action Plaintiffs'] damages and equitable relief claims." (*Id.* at 18.) In support of this argument, Direct Action Plaintiffs contend that as members of the (b)(3) settlement class, the class representatives have "no further interest in obtaining monetary relief" which creates a "dichotomy in interests." (*Id.* **[*219]**) In further support, Direct Action Plaintiffs assert that equitable relief class counsel has already justified "trading of claims in the name of a purported 'duty to maximize the claim's value on behalf of *all* Merchants'" by stating in their brief that "[a]llowing opt-outs would permit an individual Merchant to gain financially based on the benefit that a legal claim would provide to other Merchants." (*Id.* (quoting Pls.' Mem. 49).)

Similarly, Grubhub Plaintiffs argue that there is a conflict of interest because (1) Plaintiffs are attempting to use Grubhub Plaintiffs' "*individual* injunctive claims that were preserved when [they] opted out of the *Rule 23(b)(3)* class" as a "collective asset" and (2) Plaintiffs are incentivized to trade benefits from one set of class members for benefits for the other class members because Plaintiffs want to use Grubhub Plaintiffs' claims to "maximize the claim's value on behalf of *all* Merchants who have the claim." (Grubhub Pls.' Opp'n 12-13 (quoting Pls.' Mem. 49).)

Walmart argues that Plaintiffs may trade away other merchants' interests in exchange for obtaining relief from the no-surcharging rule. (Walmart Opp'n 11.) In support, Walmart argues that Prof. Carlton's and Dr. Leffler's testimonies "highlight[] the [Plaintiffs'] incentives to trade away the injunctive relief many other merchants need." (Walmart Suppl. Opp'n 4.)

In response, Plaintiffs argue that **[*220]** there is no conflict between (b)(3) class opt outs and the (b)(2) class. (*See* Pls.' Reply.) Plaintiffs argue that there is no internal class conflict with merchants that opted out of the damages settlement because Plaintiffs "have no ability to compromise or impair *any* merchants' damages claims." (*Id.* at 15.)

Opponents' arguments implicate adequacy of both the class representatives and class counsel, and the Court finds that there is no fundamental conflict as to either.[31] The gravamen of Opponents' trading-of-claims arguments are twofold: (1) that their claims for equitable relief are confiscated by virtue of their membership in a mandatory class, and (2) that their individual damages claims will be compromised because class counsel and class representatives will leverage those claims to receive their desired form of injunctive relief.

The Court does not find that mere membership in a mandatory class violates due process or improperly confiscates Opponents' claims. Direct Action Plaintiffs argue that "forcing an entity into a mandatory class action shatters the bundle of property rights represented by a legal claim [which] obliterate[es] an individual's constitutional 'right not **[*221]** to have someone else assert that claim without the claimholder's consent.'" (*See* Direct Action Pls.' Opp'n 11 n.6 (quoting Ryan C. Williams, *Due Process, Class Action Opt Outs & the Right Not to Sue*, *115 Colum. L. Rev. 599, 630 (2015)*).) While the Supreme Court in *Shutts* stated that "a chose in action is a constitutionally recognized property interest possessed by each of the plaintiffs," and held that due process requires notice and an opportunity to opt out, the court explicitly stated that its holding does not apply to *Rule 23(b)(1)* and *23(b)(2)* class actions. *See* *Shutts, 472 U.S. at 807, 811 n.3* ("Our holding today is limited to those class actions which seek to bind known plaintiffs concerning claims wholly or predominately for money judgments. We intimate no view concerning other types of class actions, such as those seeking equitable relief."). ***HN20***[] In addition, in *Shutts*, the Supreme Court endorsed its view articulated in *Hansberry v. Lee* that "absent parties [are] bound by [a] decree so long as the named parties adequately represented the absent class and the prosecution of the litigation was within the common interest." *Id. at 808* (citing *Hansberry v. Lee, 311 U.S. 32, 41, 61 S. Ct. 115, 85 L. Ed. 22 (1940)*). The Supreme Court has since reiterated the limited nature of its holding in *Shutts*. *See* *Dukes, 564 U.S. at 362-63* ("The procedural protections attending the (b)(3) class — predominance, superiority, **[*222]** mandatory notice, and the right to opt out — are missing from (b)(2) not because the Rule considers them unnecessary, but because it considers them unnecessary *to a (b)(2) class*. . . . In the context of a class action predominantly for money damages we have held that absence of notice and opt out violates due process." (citing *Shutts, 472 U.S. at 812*)); *Ortiz, 527 U.S. at 848 n.24* ("In *Shutts*, as an important caveat to our holding, we made clear that we were only examining the procedural protections attendant on binding out-of-state class members whose claims were 'wholly or predominately for money judgments.'" (quoting *Shutts, 472 U.S. at 811 n.3*)); 1 McLaughlin on Class Actions § 2:42 (17th ed.) ("While some litigants in the decade after *Shutts* sought to argue that its holding also extended to actions primarily seeking equitable relief, the Supreme Court's guidance has been limited and carefully worded."). ***HN21***[] The Second Circuit has similarly stated that the lack of the ability to opt out in a *Rule 23(b)(2)* class does not violate due process as long as the other *Rule 23* requirements including adequacy of representation are satisfied. *See* *Robinson, 267 F.3d at 165* ("Where class-wide injunctive or declaratory relief is sought in a (b)(2) class action for an alleged group harm, there is a presumption of cohesion and unity **[*223]** between absent class members and the class representatives such that adequate representation will generally safeguard absent class members' interests and thereby satisfy the strictures of due process."). In view of the existing precedent which suggests that mandatory *Rule 23(b)(2)* classes do not violate due process, and in the absence of compelling case law to the contrary, the Court declines to reach an opposite conclusion.

---

[31] The parties' arguments regarding whether there is a risk that class representatives and counsel will trade claims also address whether the Court should permit opt-out rights. The Court addresses the opt-out arguments in Section II.e *infra*.

The Court also finds that the inclusion of class members pursuing individual damages claims does not create a fundamental conflict. In support of their argument that class representatives and Class Counsel will be incentivized to trade away their claims, Direct Action Plaintiffs and Grubhub Plaintiffs cite to *Dukes* and *Interchange Fees II*, arguing that those cases concerned similar circumstances. (*See* Direct Action Pls.' Opp'n 18-19; Grubhub Pls.' Opp'n 13.) However, *Dukes* and *Interchange Fees II* are inapposite. Direct Action Plaintiffs cite to *Dukes* for the proposition that "the vast majority of the putative *Rule 23(b)(2)* class . . . have no further interest in obtaining monetary relief because they did not opt out of the *Rule 23(b)(3)* class settlement of monetary claims" and "[t]his dichotomy in interests create **[*224]** the same 'perverse incentives for class representatives to place at risk potentially valid claims for monetary relief' that so troubled the Supreme Court in *Dukes*." (*See* Direct Action Pls.' Opp'n 18 (quoting *Dukes, 564 U.S. at 364*).) However, as discussed above, the *Dukes* court was concerned that adopting a predominance test under *Rule 23(b)(2)* would incentivize class representatives to not include monetary claims in their complaint so that those claims do not predominate over the claims for injunctive relief, not that class members separately pursuing damages claims outside of the class would create a conflict to defeat adequacy of representation. *See* *Dukes, 564 U.S. at 364* ("Respondents' predominance test, moreover, creates perverse incentives for class representatives to place at risk potentially valid claims for monetary relief."). Similarly, in *Interchange Fees II*, the Second Circuit was concerned with "[u]nitary representation of separate classes that claim distinct, competing, and conflicting relief" which would "create unacceptable incentives for counsel to trade benefits to one class for benefits to the other in order somehow to reach a settlement." *Interchange Fees II, 827 F.3d at 234*. However, the fundamental conflict identified by the Second Circuit no longer exists. Each **[*225]** class — the *Rule 23(b)(2)* class and the *Rule 23(b)(3)* class — are represented by separate counsel and are no longer "in the position to trade diminution of (b)(2) relief for increase of (b)(3) relief." *Id.* Moreover, the *Rule 23(b)(2)* representatives and class counsel are only seeking equitable relief and they have no authority to trade away Direct Action Plaintiffs' or Grubhub Plaintiffs' damages claims as they are represented by their own counsel. Because the classes have been separated and there is no overlap between the named representative Class Plaintiffs in the (b)(2) classes and the plaintiffs seeking their own damages claims, the issue of unitary representation is not present here.[32]

Direct Action Plaintiffs, Grubhub Plaintiffs, and Walmart argue that Plaintiffs' desire to include them in the class is equal to Plaintiffs seeking to monetize Opponents' claims and gain "financially based on the benefit that a legal claim would provide to other Merchants." (Direct Action Pls.' Opp'n 18; *see also* Grubhub Pls.' Opp'n 15 ("[T]he putative class wants to 'monetize' the injunctive claims of the Grubhub Plaintiffs *for itself*."); Walmart **[*226]** Opp'n 11 ("The [Plaintiffs'] motion betrays how they see absent class members' claims as bargaining chips they can use to strengthen their negotiating leverage.").) However, to the extent that Direct Action Plaintiffs, Grubhub Plaintiffs, and Walmart contend that Plaintiffs improperly seek to include their claims to maximize the equitable relief award, the Court does not find that a strategic attempt to certify the broadest equitable relief class possible to maximize the potential success of settlement negotiations constitutes a fundamental class conflict. *See* *Bayshore Ford Truck Sales, Inc. v. Ford Motor Co., No. 99-CV-741, 2006 U.S. Dist. LEXIS 64264, 2006 WL 3371690, at *4 (D.N.J. Nov. 17, 2006)* ("[T]here [is] strength in numbers, and the [c]ourt can not [sic] find error with [the] [p]laintiffs' strategic

---

[32] The other cases cited by Opponents are similarly inapposite. For example, in *In re Literary Works in Electronic Databases Copyright Litigation*, the Second Circuit held that there was a fundamental conflict sufficient to preclude adequacy of representation when there were three subclasses and each subclass's "interests diverge[d] as to the distribution of that recovery because each category of claim [was] of different strength and therefore command[ed] a different settlement value. Named plaintiffs who hold other combinations of claims had no incentive to maximize the recovery for Category C-only plaintiffs, whose claims were lowest in settlement value but eclipsed all others in quantity." *654 F.3d 242, 254 (2d Cir. 2011)*. Like *Dukes* and *Interchange Fees II*, the court found that the "interests of Category C-only plaintiffs could be protected only by the formation of a subclass and the advocacy of independent counsel." *Id.* Accordingly, *Literary Works* did not address whether class counsel might be incentivized or empowered to trade away claims that are not included within the class's suit. Similarly, Opponents take the language in *Cholakyan* out of context. (*See* Direct Action Plaintiffs' Opp'n 19; Grubhub Pls.' Opp'n 13.) In that case, while the court spoke of concerns that the class representative and his counsel were "willing potentially to sacrifice individual class members' right to pursue the recovery of monetary damages," the court addressed such conflicts in the context of claim splitting and preclusion, not as to whether class representatives and counsel would make improper tradeoffs with claims pursued by parties outside of the class. *See* *Cholakyan, 281 F.R.D. at 565*.

attempt to maximize their bargaining power against [the defendant], by pursuing their claims as a unified group, so long as the requirements of *Fed. R. Civ. P. 23(a)(1)* are satisfied, which the [c]ourt finds that they are."), *aff'd*, *541 F. App'x 181 (3d Cir. 2013)*.

Accordingly, the Court finds that permitting a mandatory class under *Rule 23(b)(2)* does not violate due process and that Opponents' individual damages claims will not be compromised by class counsel and class representatives leveraging those claims to receive the most comprehensive equitable relief to the entire class's benefit. **[*227]**

E. The Court declines to reach the issue of whether future merchants are adequately represented by the class representatives

Direct Action Plaintiffs argue that the inclusion of future merchants also violates adequacy of representation because "it is impossible to conclude that future merchants, who may not exist for years to come, share those interests," and further argue that the proposed class "contains the same tension between current and future merchants as the prior settlement that was invalidated." (Direct Action Pls.' Opp'n 22.)

Merchant Trade Groups argue that the inclusion of future merchants violates due process because future merchants would be unable to opt out and would have "no opportunity to be heard before entry of a final judgment that could bind them in perpetuity." (Merchant Trade Groups' Opp'n 23-24; Merchant Trade Groups Sur-Reply 5-6.) In addition, Merchant Trade Groups contend that including future merchants will create more litigation in years to come because future merchants will challenge whether they were adequately represented in this litigation such that they should be precluded from bringing future claims. (Merchant Trade Groups' Opp'n 24-25.) Merchant Trade **[*228]** Groups state that they "have no objection to future class members receiving whatever injunctive relief this case ultimately provides," but "including them in the certified class in order to preclude or release their post-judgment claims would be improper and raise due process concerns." (*Id.* at 19.)

Plaintiffs argue that they adequately represent future merchants because "Defendants' Restraints *apply generally* to the class" and to exclude them from the class would mean they "face the risk of having to litigate their entitlement to relief ordered in this case." (Pls.' Suppl. Reply 9.) Plaintiffs contend that there is no conflict between present and future merchants because "[i]t is well settled that 'a (b)(2) class may include future members who stand to benefit from a favorable outcome in the case" and arguments concerning "release of claims by future merchants as part of any settlement in this litigation is premature." (*See* Pls.' Reply 18-19; Pls.' Suppl. Reply 8-9.)

Defendants argue that the Court should not exclude future class members from the proposed class because there is "no legitimate basis" to exclude them. (*See* Defs.' Reply 18-23.) Defendants contend that the Second Circuit's **[*229]** concerns in *Interchange Fees II* are inapplicable because "the Second Circuit's decision did not take issue with the inclusion of future merchants in the *Rule 23(b)(2)* settlement class, as long as the future merchants could avail themselves of the injunctive relief obtained in the settlement." (*Id.* at 21.) Defendants also assert that Judge Leval's concerns in his concurrence regarding the ability of future merchants to opt out are inapplicable at this stage of the litigation because "[t]he Court can address whether any settlement with the proposed *Rule 23(b)(2)* class . . . raises a similar release concern if and when the parties settle and the Court decides whether to approve the settlement." (*Id.*)

Because the Court declines to include future merchants in the class on ascertainability grounds, *see infra* Section II.c.v, the Court need not decide whether such merchants are adequately represented. However, the Court notes that the issue of whether future merchants should be included in the class is far from clear.

As discussed in Section II.c.ii *supra*, courts routinely certify equitable relief classes including future class members. As Plaintiffs contend, the challenged Restraints have been in effect for the duration **[*230]** of this nearly two-decade litigation and there is no indication that voluntary changes are on the horizon. Accordingly, future merchants suffer a threat of imminent injury if the Restraints are found to violate ***antitrust law***. *See* *R.F.M. v. Nielsen, 365 F. Supp. 3d 350, 369 (S.D.N.Y. 2019)* ("Courts regularly approve classes involving future members when those members face a threat of imminent injury." (first citing *Abdi v. Duke, 323 F.R.D. 131, 137-38 (W.D.N.Y. 2017)*; and then citing *Butler, 289 F.R.D. at 99*)). The class representatives are incentivized to prove Defendants' liability under ***antitrust law*** and should they prevail or reach a settlement, as Merchant Trade Groups concede, future merchants stand to benefit from any ensuing equitable relief. (*See* Merchant Trade Groups' Opp'n 19 (clarifying that they do not object to future merchants receiving any injunctive relief obtained by the class).)

In addition, the Court does not believe the inclusion of future merchants in the *Rule 23(b)(2)* class suffers from the same deficiencies that plagued the classes in *Interchange Fees II* or *Amchem*. In *Interchange Fees II*, the Second Circuit held that the substance of the bargain struck evidenced inadequate representation because the merchants who came into being after the equitable relief ended were "bound to an exceptionally broad [indefinite] **[*231]** release . . . but [were] guaranteed nothing." *827 F.3d at 238-39*. The Second Circuit did not express concern over future merchants' inclusion in the class generally. *See* *id. at 239* ("As in *Literary Works*, we conclude that such arbitrary harsher treatment of class members is indicative of inadequate representation."). Similarly, Judge Leval in his concurrence expressed concern over the broad release which subjected members of the (b)(2) class, including future merchants, to "give up forever their potentially valid claims, without ever having an opportunity to reject the settlement by opting out of the class." *Id. at 240* (Leval, J., concurring). However, for the reasons discussed above, the class is no longer subject to unitary representation and therefore future merchants are not at risk that their claims will be traded away for relief that does not serve their interests. *See* Section II.c.iv.1.D *supra*.

In addition, the Supreme Court's decision in *Amchem* is factually inapposite to this case. In *Amchem*, the Supreme Court held that there was a conflict between class members presently suffering asbestos-related injuries and members who had not yet manifested an injury. *Amchem, 521 U.S. at 626*. The Supreme Court held that a single class representative could not adequately represent **[*232]** both groups of class members because presently injured members were incentivized to seek "generous immediate payments" and those who might suffer an injury in the future were incentivized to seek "an ample, inflation-protected fund for the future." *Id.* These allocation-related tensions are not present in the instant case — both present and future merchants will benefit from injunctive relief curbing or eliminating the Restraints. *See* *L.V.M. v. Lloyd, 318 F. Supp. 3d 601, 616 n.9 (S.D.N.Y. 2018)* ("Notwithstanding the limited size of the hypothetical class, the class action would be superior to joinder . . . because all plaintiffs challenge a policy that affects them uniformly; the putative class members do not have sufficient means to bring lawsuits; and the requested injunctive relief would impact all future class members.").

However, the court's decision in *Meachem v. Wing, 227 F.R.D. 232 (S.D.N.Y. 2005)* gives the Court pause. In that case, the plaintiffs sought to certify a settlement class of current and future recipients of public assistance benefits. *Id. at 234*. The court relied on *Amchem* and refused to include class members who "may become benefit-eligible" in the future in the *Rule 23(b)(2)* class because "[f]uture eligible persons would be subject to the claim preclusive effects of the settlement but would not **[*233]** have received meaningful notice or the opportunity to be heard prior to the approval of th[e] settlement." *Id.* While the facts of *Meachem* are distinct because it involved a settlement that "'release[d]' and 'forever discharge[d]' equitable claims . . . that could have been asserted in this action," *id. at 237*, the Court is concerned about binding future merchants who cannot receive notice of any potential settlement. ***HN22***[] Indeed, in mandatory *Rule 23(b)(2)* classes, class members are "entitled to voice their concerns with the court prior to final approval" and "'voice' replaces 'exit' as the operable means of class member involvement." 2 Newberg on Class Actions § 4:26.

In addition, the Court is not persuaded that the inclusion of future merchants is necessary to provide relief to those merchants. If warranted, the Court could order prospective relief that benefits future class members regardless of whether they are included in the instant class. *See* Kaczynski, *85 Colum. L. Rev., at 410* ("If the plaintiff class prevails, an award of injunctive or declaratory relief can be shaped so as to inure to the benefit of the future members whether or not they are certified."). *But see* 2 Newberg on Class Actions § 4:26 ("[T]here is some relationship between **[*234]** the scope of the class and the scale of the remedy.").

Accordingly, while the Court need not reach the issue of whether future merchants are adequately represented by class representatives, the Court notes that should Plaintiffs move to modify the class definition to include future merchants, they should also address the issues raised in this Memorandum and Order regarding the adequacy of their representation.

F. Class representatives DDMB and DDMB2 are conflicted due to their relationship with class counsel

Although not explicitly raised as an adequacy of representation issue, Direct Action Plaintiffs allude to close relationships between class counsel and class representatives. (*See* Direct Action Pls.' Opp'n 20 n.15.) Accordingly, the Court addresses whether there is an adequacy of representation issue arising from these relationships.

Direct Action Plaintiffs state that "[a]ll five [representative businesses] have pre-existing personal, family, or business relationships with Class Counsel, who asked them to join this litigation." (*Id.*) In support, Direct Action Plaintiffs contend that Arthur Boss, Jr. of Boss Dental "plays tennis with class counsel Mr. Hilliard"; Douglas Marks of DDMB, **[*235]** Inc. d/b/a/ Emporium Arcade Bar and DDMB 2, LLC d/b/a Emporium Logan Square is a "co-investor in [a] cannabis dispensary with class counsel Mr. Kanner"; Pure One's manager "is related to class co-counsel Mr. Love"; RunCentral/CMP has a "long-term business relationship with Mr. Love's firm, which pays them $1500 [a] month"; and Generic Depot's owner "has a personal relationship with Mr. Love." (*Id.*)

Plaintiffs do not address the relationships between class representatives and Class Counsel. (*See* Pls.' Mem.; Pls.' Reply; Pls.' Suppl. Reply.)

HN23[] "[W]hether a close relationship with class counsel renders a named plaintiff inadequate is a fact-intensive inquiry." *In re LIBOR-Based Fin. Instruments Antitrust Litig., 299 F. Supp. 3d 430, 565 (S.D.N.Y. 2018)* (citing *Malchman v. Davis, 761 F.2d 893, 900 n.2 (2d Cir. 1985)*). "[C]ourts have long found that a familial (or any other) relationship creates a conflict if it gives the class representative an interest in the fees class counsel might recover." *Wexler v. AT & T Corp., 323 F.R.D. 128, 130 (E.D.N.Y. 2018)*. To determine whether the relationship between the class representative and class counsel is inappropriate, courts consider (1) "the closeness and extent of the relationship," (2) "whether the related attorney's relationship and role in the litigation have been disclosed," (3) "whether attorneys' fees will greatly exceed the class representative's **[*236]** recovery," and (4) "the extent of the related attorney's involvement in the litigation." *In re LIBOR-Based Fin. Instruments Antitrust Litig., 299 F. Supp. 3d at 565*; *see also* *Aliano v. CVS Pharmacy, Inc., No. 16-CV-2624, 2018 U.S. Dist. LEXIS 85986, 2018 WL 3625336, at *5 (E.D.N.Y. May 21, 2018)* ("Before disqualifying a representative plaintiff, though, courts consider factors such as the closeness of the relationship and the degree to which it has been disclosed. . . . Most significantly, a [c]ourt will consider whether the value a class member may recover is eclipsed by the benefit that plaintiff expects from an ongoing relationship with class counsel.").

First, the Court finds that Direct Action Plaintiffs overstate the role of counsel Kevin Love. Love was not included in the Interim Class Counsel Order, (*see* Interim Class Counsel Order), and only later appeared in this litigation as counsel of record for RunCentral LLC — one of the putative (b)(2) class representatives, (*see* Kevin Love Notice of Appearance, Docket Entry No. 6870 ("Kevin B. Love of Criden & Love, P.A. hereby appears as counsel of record for Plaintiff RunCentral LLC.")). Neither Love nor his firm is included as class counsel seeking appointment as co-lead class counsel in the instant class certification motion. (*See* Pls.' Mem. 31-32.) Accordingly, the Court need not assess the propriety of Love's contacts **[*237]** with the class representatives.

Next, the Court examines the relationships between class representatives and Hilliard and Kanner, who are seeking to be appointed as co-lead class counsel. (*See id.*) First, the Court finds that Hilliard's casual relationship with Arthur Boss, Jr. of Boss Dental, one of the class representatives, does not render class counsel inadequate. In his deposition, Boss testified that he knows Hilliard "from tennis" and that he plays tennis approximately three times a week. (*See* Dep. of Arthur Boss, Jr. 205:18-19, 206:2-5, annexed to Shinder Decl. as Ex. I, Docket Entry No. 8452.) This relationship does not rise to the level of inadequate representation because the relationship is casual and does not indicate that Boss Dental will stand to benefit from any attorneys' fees awarded to Hilliard. *Compare* *Langan v. Johnson & Johnson Cons. Cos., Nos. 13-CV-1470, 13-CV-1471, 2017 U.S. Dist. LEXIS 35703, 2017 WL 985640, at *13 (D. Conn. Mar. 13, 2017)* (finding that a pre-existing non-intimate, nonfinancial relationship between the named plaintiff and class counsel did not create a "fundamental conflict" with the other class members and stating that the "plaintiff and class counsel are not intimate friends and have no apparent financial relationship outside of this case"), *vacated and remanded on other grounds*, **[*238]** *897 F.3d 88 (2d Cir. 2018)*, *and* *In re Currency Conversion Fee Antitrust Litig., 230 F.R.D. 303, 309 (S.D.N.Y. 2004)* (finding the adequacy requirement met even where class representative was "close personal friend of his attorney"), *with* *In re LIBOR-Based Fin. Instruments Antitrust Litig., 299 F. Supp. 3d at 566* (finding corporate class representative to be inadequate when its CEO's son was receiving fifteen percent of interim class counsel's fee award). *See also* *Foley v. Student Assistance Corp., 336 F.R.D. 445, 449 & n.6 (E.D. Wis. 2020)* ("Courts have found a conflict of interest that defeats adequate representation is present where familial ties exist between class counsel and the named representative or long-standing, non-familial relationships are intermingled with financial, business, or professional interests. District courts outside of this circuit have found that friendship alone is not enough to create a disqualifying conflict of interest." (collecting cases)); *Holt v. Noble House Hotels & Resort, LTD, No. 17-CV-2246, 2018 U.S. Dist. LEXIS 177940, 2018 WL 5004996, at *7 (S.D. Cal. Oct. 16, 2018)* (finding that the plaintiff and class counsel's "friendship does not have the same potential for conflicts of interest" when no "financial, familial, or other potentially conflicting relationship beyond friendship" was identified).

However, Kanner's relationship with Douglas Marks of DDMB, Inc. d/b/a/ Emporium Arcade Bar and DDMB 2, LLC d/b/a Emporium Logan Square presents a conflict. The court's decision in *In re Discovery Zone Securities Litigation, 169 F.R.D. 104 (N.D. Ill. 1996)*, is instructive. In that case, the court found that proposed class **[*239]** representatives who served as their counsel's stockbrokers inadequately represented the class because they constituted "sufficiently close business relationships . . . [and] create a possible conflict of interest." *Id. at 109*. The court found that because there was a "*possibility* of receiving more investment business from class counsel," the plaintiffs had "more incentive to maximize fees for the attorneys than to ensure adequate recovery for the class." *Id.* (emphasis added). The court noted that the "appearance of impropriety" was the "primary 'factor mandating judicial inquiry,'" *id.* (quoting *Susman v. Lincoln Am. Corp., 561 F.2d 86, 93 (2d Cir. 1977)*), and that while it was not suggesting that "the representatives and class counsel would turn appearance into reality," the court deemed it "proper to eliminate any possible conflict of interest," *id.* In his deposition, Marks stated that Kanner is "a small investor in one of [his] companies" called Modern Cannabis. (*See* Dep. of Douglas Marks 271:18-272:4, annexed to Shinder Decl. as Ex. J, Docket Entry No. 8452.) Although Marks could not recall specifically when Kanner invested, he testified that he believes "[t]he investment was made in . . . .2015," after he joined this litigation, and that the investment **[*240]** was "in no way related" to his participation in the instant suit. (*See id.* 272:13-23.) Because Kanner has invested in Mark's company, Mark stands to potentially benefit from any attorneys' fees secured by Kanner and could act in his own interest instead of the interest of the class as a whole. *See* *In re IMAX Sec. Litig., 272 F.R.D. 138, 156-57 & n.86 (S.D.N.Y. 2010)* (finding that "the close business and personal relationship between [the class representative] and [class counsel], and the incentives for [class counsel] to receive additional investments from [the class representative], as well as goodwill, are sufficient to warrant a finding of inadequacy under the circumstances of this case"); *see also* *6A Fed. Proc. § 12:145* ("[I]t is inappropriate for counsel to represent a class where there is a relationship between counsel and a potential class member who is heavily involved in the litigation and would directly benefit from any counsel fees as a result of the litigation.").

Because there is a wealth of other merchants who can serve as class representatives and five other class representatives in this litigation, the Court dismisses DDMB and DDMB2 as class representatives and allows Kanner to remain as Class Counsel. *See* *In re Discovery Zone Sec. Litig., 169 F.R.D. at 109* ("Under these circumstances, the [c]ourt deems it **[*241]** proper to eliminate any possible conflict of interest between the named plaintiffs and the class by dismissing [the conflicted plaintiffs] as class representatives.").

2. Adequacy of counsel

Plaintiffs argue that Hilliard & Shadowen LLP, Grant & Eisenhofer, P.A., Freed Kanner London & Millen LLP, and Nussbaum Law Group, P.C. are adequate to represent the *Rule 23(b)(2)* class because they are "experienced in prosecuting antitrust cases and complex class actions to successful resolutions," and have "vigorously pursued the litigation on behalf of the Class [and] engaged in extensive investigation, fact discovery, motion practice, engagement with experts[,] and complex settlement discussions." (Pls.' Mem. 31-32.) Specifically, Plaintiffs argue that three of the attorneys who currently represent them "spent several years representing other plaintiffs in this proceeding prior to their appointment in this case" as interim class counsel. (*See id.* at 31.)

No party opposes appointment of these four firms as counsel for the Rule 23(b)(2) class.

HN24[] To satisfy the adequacy of representation requirement as to class counsel, a court must "determin[e] whether they are 'qualified, experienced and generally able to conduct the litigation.'" **[*242]** Vargas v. Cap. One Fin. Advisors, 559 F. App'x 22, 26 (2d Cir. 2014) (quoting In re Joint E. & S. Dist. Asbestos Litig., 78 F.3d 764, 778 (2d Cir. 1996)); Sharpe v. A.W. Concentrate Co. & Keurig Dr. Pepper, Inc., No. 19-CV-768, 2021 U.S. Dist. LEXIS 160177, 2021 WL 3721392, at *5 (E.D.N.Y. July 23, 2021) (stating that "class counsel must be 'qualified, experienced, and generally able to conduct the litigation'" (quoting In re Kind LLC "Healthy & All Nat." Litig., 337 F.R.D. 581, 596 (S.D.N.Y. 2021))); Xiao Ling Chen v. XpresSpa at Terminal 4 JFK LLC, No. 15-CV-1347, 2019 U.S. Dist. LEXIS 195988, 2019 WL 5792315, at *7 (E.D.N.Y. Aug. 20, 2019) (same).

The Court finds class counsel adequate to represent the Rule (23)(b)(2) class. Proposed class counsel are experienced and competent lawyers who will be able to conduct this litigation. Hilliard & Shadowen LLP, Grant & Eisenhofer, P.A., Freed Kanner London & Millen LLP, and Nussbaum Law Group, P.C. have extensive experience litigating antitrust actions and class actions in federal courts. (*See* Appl. of Steve Shadowen, Michael Freed, and Robert Eisler for Appointment as Class Counsel, Docket Entry No. 6673 (detailing counsel's experience with previous antitrust class actions); Nussbaum's Mem. in Supp. of Nussbaum's Mot. to Appoint Counsel 7-14, Docket Entry No. 6669-1 (detailing Nussbaum's experience in antitrust litigation and collecting cases in which Nussbaum has served as co-lead class counsel); Decl. of Linda P. Nussbaum in Supp. of Nussbaum's Mot. to Appoint Counsel, Docket Entry No. 6669-2); *see also* In re Lidoderm Antitrust Litig., No. 14-MD-2521, 2017 U.S. Dist. LEXIS 24097, 2017 WL 679367, at *9 n.4 (N.D. Cal. Feb. 21, 2017) (appointing Hilliard & Shadowen LLP as class counsel in antitrust suit and stating that Hilliard & Shadowen LLP and other firms "have ably and vigorously **[*243]** litigated this case, and nothing has occurred to undermine [the court's] initial determination of their experience and adequacy"); In re Solodyn (Minocycline Hydrochloride) Antitrust Litig., No. 14-MD-2503, 2017 U.S. Dist. LEXIS 170676, 2017 WL 4621777, at *12 n.13 (D. Mass. Oct. 16, 2017) (appointing Hilliard & Shadowen LLP as class counsel in antitrust suit and stating that they "have adequately prosecuted the interests of the class since the Court ordered them as interim co-lead counsel"); *In re Auto. Parts Antitrust Litig.*, No. 12-MD-02311, 2017 WL 469734, at *2 (E.D. Mich. Jan. 4, 2017) (appointing Freed Kanner London & Millen LLP as class counsel in antitrust class action); *Allan v. Realcomp II, Ltd.*, No. 10-CV-14046, 2013 WL 12333444, at *11 (E.D. Mich. Mar. 30, 2013) (same); In re Pfizer Inc. Sec. Litig., 282 F.R.D. 38, 47 (S.D.N.Y. 2012) (appointing Grant & Eisenhofer, P.A. as class counsel and stating that it is "an experienced class action law firm").

As Judge Orenstein noted in the Interim Class Counsel Order, these firms "have been steeped in this litigation since its inception, and have demonstrated their ability to work cooperatively with each other, with the court, and with numerous non-lead counsel representing plaintiffs with very significant interests in this litigation." (Interim Class Counsel Order 6.) Since the Court appointed them interim Class Counsel, they have filed the operative Rule 23(b)(2) class Complaint, successfully defended against the Bank Defendants' motion to dismiss, conducted extensive discovery, briefed opposition to Intervenors' motions to intervene, pursued the instant **[*244]** motion for class certification, and briefed summary judgment and *Daubert* motions in addition to defending against Defendants' summary judgment and *Daubert* motions. *See* In re Pfizer Inc. Sec. Litig., 282 F.R.D. at 47 (finding class counsel adequate when it "devoted considerable resources to this case since it was first filed, and has effectively protected the interests of [the] [p]laintiffs and the putative class" including successfully "oppos[ing] [the] [d]efendants' motion to dismiss . . . , prevail[ing] on a motion for leave to amend the complaint, appear[ing] before the [c]ourt in a five-day *Daubert* hearing, and conduct[ing] extensive discovery"); In re Sadia, S.A. Sec. Litig., 269 F.R.D. 298, 310 (S.D.N.Y. 2010) (finding the adequacy prong satisfied when lead counsel had "been intimately involved in prosecuting [the] action from its beginning stages, including investigating the claims, filing an amended complaint, successfully defending a motion to dismiss [and] pursuing the current class action certification").

No other objections have been raised to the adequacy of the proposed class counsel aside from the arguments concerning whether counsel will trade away the claims of parties pursuing their individual damages claims. These arguments were already addressed in Section II.c.iv.1.D *supra* ***[*245]*** . Accordingly, the Court finds representation by Hilliard & Shadowen LLP, Grant & Eisenhofer, P.A., Freed Kanner London & Millen LLP, and Nussbaum Law Group, P.C. to be adequate under Rule 23(a)(4).

v. Ascertainability

Plaintiffs argue that they satisfy the ascertainability requirement because the proposed class "is defined using the objective and readily verifiable criterion of whether [m]erchants have accepted Visa-and/or Mastercard-branded cards during a definite period of time." (Pls.' Mem. 32.) In support of their request for an eight-year period to include future merchants, Plaintiffs argue that "the eight-year period is not random, but reflects the anticipated length of any decree ordered in the case." (Pls.' Suppl. Reply 6-7.) Plaintiffs state that the injunctive relief obtained in the 2013 Settlement Agreement "was to last between eight and nine years" and that settlement was invalidated because it "released certain claims *in perpetuity* notwithstanding that the injunction terminated after eight to nine years." (*Id.* at 7 (citing *Interchange Fees II, 827 F.3d at 239*).) In addition, Plaintiffs argue that the "*same* Restraints *will continue* to generally apply *to every future* merchant unless they are enjoined as a result of this **[*246]** litigation." (*Id.* at 6-7.)

Merchant Trade Groups argue that Plaintiffs do not satisfy the ascertainability requirement as to the future merchants because they "fail to offer a single reason, much less any argument, for why future merchants should be included at all," (Merchant Trade Groups' Opp'n 21), and have not justified the eight-year temporal limitation on the class definition or "attempted to 'substantiate[]' the relationship between their proposed liability theory and their proposed class end date," (Merchant Trade Groups' Sur-Reply 8-9 (citing *B & R Supermarket, Inc. v. Mastercard Int'l, Inc. (B & R Supermarket II), No. 17-CV-2738, 2020 U.S. Dist. LEXIS 248650, 2021 WL 234550, at *15 (E.D.N.Y. Jan. 19, 2021)*).) In support, Merchant Trade Groups note that the *Rule 23(b)(3)* settlement in this MDL only released claims that accrued within five years of the settlement date and argue that Plaintiffs have not "explained why they now propose to bind merchants with a mandatory class period *longer* than the release period for the *non-mandatory* class approved in 2019." (*Id.* at 8 n.7.)

HN25[] *Rule 23(a)* contains an implied requirement of ascertainability. *In re Petrobras Sec., 862 F.3d at 266* ("'Most . . . circuit courts of appeals have recognized that *Rule 23* contains an implicit threshold requirement that the members of a proposed class be readily identifiable,' often characterized as 'an "ascertainability" requirement.'" **[*247]** (quoting *Sandusky Wellness Ctr., LLC v. Medtox Sci., Inc., 821 F.3d 992, 995 (8th Cir. 2016)*)). Unlike other circuits, the Second Circuit does not have a "heightened" requirement of ascertainability — it requires only that a "class be defined using objective criteria that establish a membership with definite boundaries," and does not require "administrative feasibility" of identifying each class member based on that objective criteria. *Id.* (distinguishing the Second Circuit's approach to ascertainability from the circuits with a heightened ascertainability requirement); *see also* *Langan v. Johnson & Johnson Cons. Cos., 897 F.3d 88, 91 n.2 (2d Cir. 2018)* (stating that *In re Petrobras Securities* rejected "the argument that proposed classes must be 'administratively feasible' and [held] that the class was 'clearly objective' and 'sufficiently definite'" where it identified the class by "'subject matter, timing, and location,' which made it 'objectively possible' to ascertain members" (quoting *In re Petrobras Sec., 862 F.3d at 267-70*)); *Porter v. MooreGroup Corp., No. 17-CV-7405, 2021 U.S. Dist. LEXIS 151187, 2021 WL 3524159, at *3 (E.D.N.Y Aug. 11, 2021)* ("To be ascertainable, the class must be 'readily identifiable, such that the court can determine who is in the class and, thus, bound by the ruling.'" (quoting *Charron v. Pinnacle Grp. N.Y. LLC, 269 F.R.D. 221, 229 (S.D.N.Y. 2010)*)); *Wang v. Tesla, Inc., 338 F.R.D. 428, 2021 WL 3160795, at *7 (E.D.N.Y. July 26, 2021)* ("A class is ascertainable when defined by objective criteria that are administratively feasible and when identifying its members would not require a mini-hearing on the merits of each **[*248]** case." (quoting *Brecher, 806 F.3d at 24-25*)); *Scott v. Quay, 338 F.R.D. 178, 186 (E.D.N.Y. 2021)* (stating that meeting the ascertainability requirement is "not a heavy burden because the requirement is 'designed only to prevent the certification of a class whose membership is truly indeterminable'" (quoting *Ebin, 297 F.R.D. at 567*)). "The ascertainability requirement, as defined in this Circuit, asks district courts to consider whether a proposed class is defined using objective criteria that establish a membership with definite boundaries." *In re Petrobras Sec., 862 F.3d at 269*; *Wang, 338 F.R.D. 428, 2021 WL 3160795, at *7* ("[A] class must be 'defined by objective criteria' so that it will not be necessary to hold 'a mini-hearing on the merits of each case.'" (quoting *Brecher, 806 F.3d at 24*)).

As a threshold matter, the Court notes that it is unclear whether the implied requirement of ascertainability applies to class actions under *Rule 23(b)(2)*. *See* *Plaintiffs #1-21 v. County of Suffolk, No. 15-CV-2431, 2021 U.S. Dist. LEXIS 48462, 2021 WL 1255011, at *16 (E.D.N.Y. Mar. 12, 2021)* (stating that "[i]t is not even clear 'that the implied requirement of definiteness should apply to Rule 23(b)(2) class actions at all'" (quoting Davis v. City of New York, 296 F.R.D. 158, 166 n.50 (S.D.N.Y. 2013))), *report and recommendation adopted*, 2021 U.S. Dist. LEXIS 66273, 2021 WL 1254408 (E.D.N.Y. Apr. 5, 2021); Westchester Indep. Living Ctr., Inc. v. State Univ. of N.Y., Purchase Coll., 331 F.R.D. 279, 299 (S.D.N.Y. 2019) ("As a threshold matter, '[i]t is not clear that the ascertainability requirement applies to Rule 23(b)(2) class actions . . . as notice is not obligatory and the relief sought is injunctive rather than compensatory.'" (quoting Brooklyn Ctr. for Indep. of the Diasbled v. Bloomberg, 290 F.R.D. 409, 418 (S.D.N.Y. 2012))); **[*249]** *see also* 1 Newberg on Class Actions § 3:7 (describing the ambiguity as to whether there is a definiteness requirement under Rule 23(b)(2) and stating that the First, Third, Sixth, and Tenth Circuits have declined to imply such a requirement as it pertains to equitable relief classes). Some courts applying the standard to Rule 23(b)(2) classes apply a relaxed version of the ascertainability test. *See, e.g.,* Newkirk, 2020 U.S. Dist. LEXIS 155539, 2020 WL 5035930, at *11 ("In the context of a motion to certify a Rule 23(b)(2) class, the ascertainability requirement is less critical because 'a chief objective of this rule is to provide broad injunctive relief to "large and amorphous" classes not capable of certification under Rule 23(b)(3).'" (quoting In re Vitamin C Antitrust Litig., 279 F.R.D. at 116)); 1 Newberg on Class Actions § 3:7 (stating that "[r]ather than strictly apply, or simply ignore, the definiteness requirement, some courts have taken a more flexible approach" and collecting cases).

However, Second Circuit decisions in the Rule 23(b)(3) context that address ascertainability do not make any distinctions on the applicability of the ascertainability requirement based on the type of class being certified. *See* In re Petrobras Sec., 862 F.3d at 264-65 (referring only to the "Rule 23" requirement of ascertainability); Brecher, 806 F.3d at 24 ("Like our sister Circuits, we have recognized an 'implied requirement of ascertainability' **[*250]** in Rule 23 of the Federal Rules of Civil Procedure." (quoting In re Pub. Offerings Secs. Litig., 471 F.3d 24, 32 (2d Cir. 2006))). In addition, district courts within the Second Circuit have applied the ascertainability requirement to Rule 23(b)(2) classes. *See* Wang, 338 F.R.D. 428, 2021 WL 3160795, at *7 (finding that putative Rule 23(b)(2) and 23(b)(3) classes were not ascertainable as "[d]etermining whether a particular individual fit within the class definition would require a hearing"); Plaintiffs #1-21, 2021 U.S. Dist. LEXIS 48462, 2021 WL 1255011, at *10 (applying the ascertainability requirement to a Rule 23(b)(2) class and concluding that the class is ascertainable because the proposed class is "defined using objective criteria" and has "definite boundaries" (quoting Petrobras, 862 F.3d at 266)); Newkirk, 2020 U.S. Dist. LEXIS 155539, 2020 WL 5035930, at *11 (concluding that the ascertainability requirement was satisfied as to a Rule 23(b)(2) class); Batalla Vidal, 501 F. Supp. 3d at 136 (same); Westchester Indep. Living Ctr., Inc., 331 F.R.D. at 299 (finding that "[e]ven if ascertainability is required," the class met the requirement). Accordingly, the Court assesses ascertainability as to the Rule 23(b)(2) class.

The Court finds that the proposed class is sufficiently defined as to current merchants but is insufficiently defined as to future merchants. The Court's recent decisions in *B & R Supermarket v. Mastercard Int'l Inc.* are instructive. *See* B & R Supermarket I, 2018 U.S. Dist. LEXIS 42547, 2018 WL 1335355, at *13; B & R Supermarket II, 2020 U.S. Dist. LEXIS 248650, 2021 WL 234550, at *4. **HN26**[] In B & R Supermarket I, the Court held that the class definition, including the class period, must be consistent with the alleged liability theory. *See* B & R Supermarket I, 2018 U.S. Dist. LEXIS 42547, 2018 WL 1335355, at *12; *see also* Comcast Corp. v. Behrend, 569 U.S. 27, 38, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)[33] (requiring alignment of the proposed liability theory **[*251]** and the proposed methodology for damages); In re Petrobras Sec., 862 F.3d at 259[34] (discussing temporal limitation and its

---

[33] In *Comcast*, the plaintiffs presented four theories of antitrust liability, with a damages model that calculated damages for the entire class based on all four theories. *Comcast Corp. v. Behrend*, 569 U.S. 27, 32, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013). The district court accepted only one of the liability theories, rejecting the other three. *Id.* However, the plaintiffs' calculation method for damages did not isolate damages for each of the four theories, and the district court refused to review the inconsistency between the sole liability theory and the damages methodology, which was based on all four liability theories, on the grounds that doing so would require reaching the merits of the claims. *Id.* The Supreme Court held that because the court approved only one of the four antitrust liability theories, the plaintiffs could not rely on a model that included damages for all four antitrust theories. *Id.* at 37. Thus, the Court understands *Comcast* to require courts to ensure consistency between the liability theory and damages proposed by the putative class. Although *Comcast* did not focus on class definition, it is relevant to the question of class boundaries because the Supreme Court reasoned that only damages that can be attributed to the defendant's misconduct should be considered. *Id.* at 38 ("Prices whose level above what an expert deems 'competitive' has been caused by factors unrelated to an accepted theory of antitrust harm are not 'anticompetitive' in any sense relevant here.").

relationship to the plaintiffs' reliance on the defendants' statements, in the context of a securities action, where reliance is one of the liability elements); *Pinnacle Grp. N.Y. LLC, 269 F.R.D. at 228* (modifying class definition in *Rule 23(b)(2)* class to ensure sufficient relationship between the definition and the claims alleged). The Court found that the plaintiffs' original class end date of "until the anticompetitive conduct ceases" and four proposed alternative end dates were unascertainable because the plaintiffs failed to "propose a class period that bears a relationship to [their] proposed liability theory" and "some of [the alternatives] appear[ed] completely arbitrary." *B & R Supermarket I, 2018 U.S. Dist. LEXIS 42547, 2018 WL 1335355, at *11, *13*. In a later decision in the case deciding the plaintiffs' renewed motion for class certification, the Court found the plaintiffs' proposed class with an end date two years after the challenged policy went into effect ascertainable because the end date for the proposed class period "align[ed] with their theory of liability" of when merchants would have been able to avoid chargebacks for two years but for the defendants' conduct, and because the proposed class definition was **[*252]** sufficiently substantiated. *See B & R Supermarket II, 2020 U.S. Dist. LEXIS 248650, 2021 WL 234550 at *16-17*.

In this case, Plaintiffs use the objective criteria of merchants that have accepted Visa-and/or Mastercard-branded cards to identify class members. (*See* Pls.' Mem. 5); *see also Interchange Fees III, 330 F.R.D. at 54* (finding that the proposed class was ascertainable because it used objective criteria of merchants' acceptance of Visa- and/or Mastercard-branded cards). However, Plaintiffs have failed to demonstrate why a class period running through eight years "after the date of entry of [f]inal [j]udgment in this case" is sufficiently objective or substantiated. (*See* Pls.' Mem. 5.) As Merchant Trade Groups correctly argue, (*see* Merchant Trade Groups' Sur-Reply 8-9), Plaintiffs offer no basis for including future merchants specifically for up to eight years after the entry of final judgment in the class other than that the period represents the length of time they expect the anticipated relief to last and that the Department of Justice's Antitrust Division generally limits "any behavioral relief stemming from consent decrees to ten years," (*see generally* Pls.' Mem.; Pls.' Suppl. Reply 6-9 & n.24). In contrast to Plaintiffs' proposed definition as to the *Rule 23(b)(2)* class, **[*253]** the Court notes that the settlement class certified as to the *Rule 23(b)(3)* class in this MDL only releases claims that accrue "no later than five years after the [s]ettlement [f]inal [d]ate." *Interchange Fees IV, 2019 U.S. Dist. LEXIS 217583, 2019 WL 6875472, at *23*. While Plaintiffs need not align the dates for released claims as to both classes, Plaintiffs must ensure that the date for inclusion of future class members is not arbitrary as "[t]he party seeking class certification bears the burden of demonstrating compliance with *Rule 23*'s prerequisites by a preponderance of the evidence." *Kurtz, 818 F. App'x at 60* (citing *In re Vivendi, S.A. Sec. Litig., 838 F.3d at 264*); *Batalla Vidal, 501 F. Supp. 3d at 134*; *see also B & R Supermarket I, 2018 U.S. Dist. LEXIS 42547, 2018 WL 1335355, at *13*. Accordingly, the Court finds that the proposed class is ascertainable as to current merchants but not ascertainable as to future merchants.

The Court recognizes that it has authority to modify a proposed class definition or consider a renewed motion for certification pursuant to *Rule 23(c)(1)(C)*, and exercises its discretion to carve out an appropriate class from the overbroad class proposed by Plaintiffs. *In re Initial Pub. Offering Sec. Litig., 483 F.3d 70, 73 (2d Cir. 2007)* ("District courts have ample discretion to consider (or to decline to consider) a revised class certification motion after an initial denial. . . . Some district courts have explicitly reserved authority to revise a class certification ruling by denying certification 'without **[*254]** prejudice.'" (collecting cases)); *see Sicav v. James Jun Wang, No. 12-CV-6682, 2015 U.S. Dist. LEXIS 6815, 2015 WL 268855, at *7 (S.D.N.Y. Jan. 21, 2015)* (inviting plaintiffs to renew their motion for certification for the second time after denial); *Charron, 269 F.R.D. at 229* ("A 'district court "is not bound by the class definition proposed in the complaint,"' and is empowered to carve out an appropriate class." (quoting *Lundquist v. Sec. Pac. Auto. Fin. Servs. Corp., 993 F.2d 11, 14 (2d Cir. 1993)*)).

---

[34] *In re Petrobras Securities* was a securities class action brought by Petrobras shareholders alleging that Petrobras made misleading statements that impacted the price of shares. 862 F.3d 250 (2d Cir. 2017). The Second Circuit noted that the class definition was temporally limited to securities purchases made "before Petrobras made generally available to its security holders an earnings statement covering a period of at least twelve months beginning after the effective date of the offerings," and that such limitation was appropriate "given the absence of any allegation that Plaintiffs relied on any such earnings statement." *Id.* at 259-60.

The Court redefines the *Rule 23(b)(2)* class to adopt the class definition set forth in Plaintiffs moving papers excluding merchants eight years after the date of entry of final judgment in this case. The Court therefore certifies a class consisting of "[a]ll persons, businesses, and other entities (referred to herein as 'Merchants') that accept Visa and/or Mastercard [c]redit and/or [d]ebit cards in the United States at any time during the period between December 18, 2020" and "the date of entry of Final Judgment in this case." (Pls.' Mem. 5.) Plaintiffs may seek to modify the proposed definition of the class to include future merchants at any time, so long as they substantiate the time period that applies to future merchants.

d. *Rule 23(b)(2)* requirements

Plaintiffs argue that they satisfy the *Rule 23(b)(2)* requirements because the class would "generally benefit from equitable relief prohibiting Defendants' conduct." (*See* Pls.' Mem. 32-46.) **[*255]** Plaintiffs contend that (1) by imposing and enforcing the Restraints — including the default interchange fees, the honor-all-cards rules, and the no-surcharge rules — Defendants have acted on grounds that apply generally to the class, (2) market definitions and market power can be evaluated on a classwide basis and would apply to all members of the class, (3) the merchants have "no viable business alternative to transacting with Defendants due to Defendants' market power," and (4) they seek classwide relief that will benefit all class members. (*Id.* at 33.) In support, Plaintiffs rely on Dr. Leffler's class certification report, in which he explains that "Defendants' anticompetitive conduct affects all Plaintiffs and [c]lass members, and that Defendants' conspiracy injured virtually all [m]erchants." (*Id.*) As to the interchange fees, Plaintiffs argue that "individually negotiated [i]nterchange [f]ees are extremely rare due to the Restraints, and because there is little or no incentive for an issuing bank to implement a fee lower than the default for the overwhelming majority of [m]erchants," and even if a merchant does negotiate their own fees, "it could only marginally raise the usage **[*256]** of that issuer's cards, as it would still be precluded from refusing other issuers' cards or using other steering mechanisms precluded by the Restraints." (*Id.* at 35.) As to the honor-all-cards rules, Plaintiffs argue that these rules "disincentivize[] the [i]ssuing [b]anks from negotiating [i]nterchange [f]ees lower than the default interchange rate" which results in the default interchange fee "becom[ing] a fixed rate that applies to almost every transaction." (*Id.* at 36.) As to the no-surcharge rules, Plaintiffs argue that Defendants "insulate themselves from any competitive threat because when cardholders select which card to use in making a purchase, the [n]o [s]urcharge rules guarantee[] that the consumer makes this selection without regard to the card's [t]otal [p]rice," which results in merchants "bear[ing] the costs of the transaction, robbed of the ability to steer the cardholder to a lower cost of payment." (*Id.* at 38.) Finally, Plaintiffs argue that they seek classwide relief that will be "effective market-wide," and the fact that "members may differ in their willingness and/or ability to take full advantage of such relief does not negate the value of that relief." (*Id.* ***[*257]*** at 45.) In addition, Plaintiffs contend that "all prior reforms to the Defendants' Restraints" including the Durbin Amendment and the Department of Justice consent decree "have applied market-wide, without variation based on the identity of the [m]erchant or any other individual basis." (*Id.* at 46.)

Opponents argue that "[c]ohesion is a prerequisite for a mandatory (b)(2) class," that Plaintiffs fail to meet the "required unity of interests, called 'cohesion,'" under *Rule 23(b)(2)*, and that *Rule 23(b)(2)* requires "greater cohesiveness" than that required under *Rule 23(b)(3)*. (*See* Direct Action Pls.' Opp'n 16 (citing *In re St. Jude Med., 425 F.3d 1116, 1121 (8th Cir. 2005)*); Direct Action Pls.' Sur-Reply 8-10; *see also* Grubhub Pls.' Opp'n 9-10; Walmart's Opp'n 14-15.)

Opponents' arguments that Plaintiffs do not meet *Rule 23(b)(2)*'s requirements repeat their arguments in the adequacy of representation context that Plaintiffs seek a different type of injunctive relief and that this relief is not in their interests. (*See* Direct Action Pls.' Opp'n 16-17, 19-22; Direct Action Pls.' Sur-Reply 8-10; Grubhub Pls.' Opp'n 9-11; Walmart's Opp'n 14-20; Merchant Trade Groups' Opp'n 10-15.) They argue that "Plaintiffs seek injunctive relief that is adverse" to their interests and that "these cases do not **[*258]** challenge one central practice or rule that harms all class members in the same way." (Direct Action Pls.' Opp'n 19-20; *see also* Grubhub Pls.' Opp'n (stating that they opted out of the *Rule 23(b)(3)* class and are pursuing relief "shaped to their own, individual interests and business models").) Direct Action Plaintiffs and Grubhub Plaintiffs contend that "these cases challenge a mix of complex rules and practices that affect merchants differently[] and are perceived and valued differently by different class members." (Direct Action Pls.' Opp'n 20; Grubhub Pls.' Opp'n 9-10 (arguing that the Grubhub Plaintiffs are "larger merchants that have different interests, and different capabilities, than small merchants").) In addition, Direct Action Plaintiffs argue that because they "seek to bar enforcement" of the honor-all-cards and default interchange fee rules, while Plaintiffs will prioritize surcharging relief, the *Rule 23(b)(2)* requirement is not satisfied. (Direct Action Pls.' Opp'n 21; Direct Action Pls.' Sur-Reply 9-10.)

In addition to reiterating the same arguments as Direct Action Plaintiffs and Grubhub Plaintiffs regarding the form of relief, Walmart argues that (1) "not all of Visa and Mastercard's network **[*259]** rules apply to every merchant," (2) Plaintiffs failed to "articulate how a specific injunction will benefit every class member," and (3) Plaintiffs have not shown that "a single injunction can offer meaningful 'classwide relief' to every merchant that uses Visa and Mastercard payment cards" and the Court should "infer that there is no such uniform remedy and deny class certification accordingly." (Walmart's Opp'n 16-18.)

Merchant Trade Groups contend that all merchants would not necessarily want the same injunctive relief.[35] (*See* Merchant Trade Groups' Opp'n 9-10.) In support, Merchant Trade Groups argue that "Visa's and Mastercard's rulebooks span thousands of pages" and "[a] plaintiff could well resolve this case through other injunctive changes" because "there are multiple potential injunctive resolutions of this case." (*Id.* at 10.)

In response to Opponents' arguments that *Rule 23(b)(2)* imposes an additional requirement of cohesion, Plaintiffs argue that (1) cohesion, as formulated by Opponents, is not expressly required by the text of *Rule 23(b)(2)* and if it were, "it is shorthand for the need for generally applicable class-wide injunctive relief," and (2) any cohesiveness element "merely requires that plaintiffs' **[*260]** legal injuries be similar enough that they all can be remedied with a single 'indivisible' injunction." (Pls.' Reply 14-16 (quoting *Houser v. Pritzker, 28 F. Supp. 3d 222, 250 (S.D.N.Y. 2014)*).) Plaintiffs contend that because the "entire market is subject to substantially the same 'mix of complex rules'" a class under *Rule 23(b)(2)* is a "practical and legal necessity, regardless of each class member's individual circumstance." (*Id.* at 17-18.)

HN27[] *Rule 23(b)(2)* provides for certification of a class seeking equitable relief "if 'the party opposing the class has acted or refused to act on grounds that apply generally to the class, so that final injunctive relief . . . is appropriate respecting the class as a whole.'" *Sykes, 780 F.3d at 80* (quoting *Fed. R. Civ. P. 23(b)(2)*); *In re Kind LLC "Healthy & All Nat." Litig., 337 F.R.D. 581, 609 (S.D.N.Y. 2021)* ("*Rule 23(b)(2)* provides for class certification when 'the party opposing the class has refused to act on grounds generally applicable to the class, thereby making appropriate final injunctive relief.'" (quoting *Fed R. Civ. P. 23(b)(2)*)). "The Supreme Court has clarified that certification of a class for injunctive relief is only appropriate where 'a single injunction . . . would provide relief to each member of the class.'" *Sykes, 780 F.3d at 97* (quoting *Dukes, 564 U.S. at 360*); *see also* *Berni v. Barilla S.p.A., 964 F.3d 141, 146 (2d Cir. 2020)* ("[T]he Supreme Court has counseled that '*Rule 23(b)(2)* applies only when a single injunction or declaratory judgment would provide relief to each member **[*261]** of the class.' Put another way, a class may not be certified under *Rule 23(b)(2)* if any class member's injury is not remediable by the injunctive or declaratory relief sought." (quoting *Dukes, 564 U.S. at 360*)). However, the Second Circuit has explained the Supreme Court's holding in *Dukes* as "simply emphasiz[ing] that in a class action certified under *Rule 23(b)(2)*, 'each individual class member' is not 'entitled to a *different* injunction.'" *Amara v. CIGNA Corp., 775 F.3d 510, 522 (2d Cir. 2014)* (quoting *Dukes, 564 U.S. at 360-61*); *see also* *Sykes, 780 F.3d at 97* (quoting *Amara, 775 F.3d at 522*); *Plaintiffs #1-21, 2021 U.S. Dist. LEXIS 48462, 2021 WL 1255011, at *17* (same).

The Court first assesses whether there is a cohesiveness requirement under *Rule 23(b)(2)* and then addresses whether the class meets the requirements of *Rule 23(b)(2)*.

i. The Court declines to impose a cohesiveness requirement

---

[35] Although Merchant Trade Groups make their arguments in the context of requesting opt-out rights and not arguing that Plaintiffs do not satisfy *Rule 23(b)(2)*, (*see* Merchant Trade Groups' Opp'n 9-10), the Court finds their arguments relevant for the *Rule 23(b)(2)* inquiry.

The Court declines to read an additional "cohesiveness" requirement into Rule 23(b)(2). The Court acknowledges that existing jurisprudence on this issue is mixed, with some courts imposing cohesiveness as an additional requirement and others declining to do so. *See* Westchester Indep. Living Ctr., Inc., 331 F.R.D. at 301 ("Some courts require that plaintiffs seeking to certify a Rule 23(b)(2) class 'must demonstrate that the class is "cohesive,"' but it is not entirely clear how this differs from the commonality requirement found in Rule 23(a) . . . ." (quoting Laumann v. Nat'l Hockey League, 105 F. Supp. 3d 384, 395 (S.D.N.Y. 2015))). *Compare* Brooks v. Roberts, 251 F. Supp. 3d 401, 420 (N.D.N.Y. 2017) (stating that Rule 23(b)(2) class plaintiffs "must demonstrate the class is 'cohesive'"), **[*262]** *and* Barnes v. Am. Tobacco Co., 161 F.3d 127, 143 (3d Cir. 1998) ("While 23(b)(2) class actions have no predominance or superiority requirements, it is well established that the class claims must be cohesive. Discussing the requirements for 23(b)(2) classes in Wetzel v. Liberty Mutual Insurance Company, 508 F.2d 239 (3d Cir.1975), we noted, '[b]y its very nature, a (b)(2) class must be cohesive as to those claims tried in the class action. . . . Because of the cohesive nature of the class, Rule 23(c)(3) contemplates that all members of the class will be bound."), *with* Senne v. Kansas City Royals Baseball Corp., 934 F.3d 918, 938-39 (9th Cir. 2019) ("[T]he district court erred in imposing a 'cohesiveness' requirement for the proposed Rule 23(b)(2) class. Although we have never explicitly addressed whether 'cohesiveness' is required under Rule 23(b)(2), courts that have imposed such a test treat it similarly to Rule 23(b)(3)'s predominance inquiry — something we have previously rejected in no uncertain terms." (citing Newberg on Class Actions)), *and* Kurtz, 321 F.R.D. at 540 (stating that the "additional case law interpretive requirements" of cohesion and necessity "are unjustified in light of the detailed legislative attention to Rule 23, which does not contain them," but finding that they were nevertheless satisfied "because the defendants, through their labeling practices, 'acted or refused to act on grounds that apply generally to the class, so that final injunctive relief or corresponding **[*263]** declaratory relief is appropriate respecting the class as a whole'" (quoting Fed. R. Civ. P. 23(b)(2))).

The Second Circuit has not addressed whether there is a cohesiveness requirement under Rule 23(b)(2). However, in the few decisions using the word "cohesion" when discussing a Rule 23(b)(2) class, the Second Circuit has suggested that "cohesion" is merely a descriptor for classes meeting Rule 23(b)(2)'s requirements. For example, in *Handschu v. Special Services Division*, the Second Circuit stated that "[b]ecause of the common interests of all its members, a Rule 23(b)(2) class seeking declaratory and injunctive relief is cohesive by nature." 787 F.2d 828, 833 (2d Cir. 1986). Similarly, in *Robinson v. Metro-North Commuter Railroad Co.*, the Second Circuit stated:

> ***HN28***[] Where class-wide injunctive or declaratory relief is sought in a (b)(2) class action for an alleged group harm, there is a presumption of cohesion and unity between absent class members and the class representatives such that adequate representation will generally safeguard absent class members' interests and thereby satisfy the strictures of due process. This presumption of cohesion and unity continues where incidental damages are also sought because entitlement to such damages does not vary based on the subjective considerations **[*264]** of each class member's claim, but "flow[s] directly from a finding of liability on the . . . claims for class-wide injunctive and declaratory relief."

267 F.3d at 165 (alteration in original) (citation omitted) (quoting Allison v. Citgo Petroleum Corp., 151 F.3d 402, 415 (5th Cir. 1998)). The language in Robinson suggests that cohesion is inherent in a properly certified Rule 23(b)(2) class action because class members' claims are inherently intertwined and relief to anyone in the group would be relief to the group as a whole. *See* Berry v. Schulman, 807 F.3d 600, 608 (4th Cir. 2015) ("[B]ecause of the group nature of the harm alleged and the broad character of the relief sought, the (b)(2) class is, by its very nature, assumed to be a homogenous and cohesive group." (alteration in original) (quoting Allison, 151 F.3d at 413)); *see also* 2 Newberg on Class Actions § 4:33 ("Courts that adopt a cohesiveness requirement are essentially using it as a means of measuring whether the class's interests are in fact so intertwined."). This view is consistent with the Supreme Court's holding in Dukes in which it reiterated that the additional procedural protections afforded to Rule 23(b)(3) classes do not apply to Rule 23(b)(2) classes because of the nature of equitable relief classes:

> The procedural protections attending the (b)(3) class — predominance, superiority, mandatory notice, and the right to **[*265]** opt out — are missing from (b)(2) not because the Rule considers them unnecessary, but because it considers them unnecessary *to a (b)(2) class*. When a class seeks an indivisible injunction benefiting all its members at once, there is no reason to undertake a case-specific inquiry into whether class

> issues predominate or whether class action is a superior method of adjudicating the dispute. Predominance and superiority are self-evident.

Dukes, 564 U.S. at 362-63. The Supreme Court also stated that "[t]he key to the (b)(2) class is 'the indivisible nature of the injunctive or declaratory remedy warranted — the notion that the conduct is such that it can be enjoined or declared unlawful only as to all of the class members or as to none of them." Id. at 360 (quoting Nagareda, 84 N.Y.U. L. Rev., at 132). In addition, courts imposing a cohesion requirement appear to undertake the same analysis as courts that look only to the text of Rule 23(b)(2). *See, e.g.*, T.R. v. Sch. Dist. of Phila., No. 15-CV-4782, 2019 U.S. Dist. LEXIS 66002, 2019 WL 1745737, at *21 (E.D. Pa. Apr. 18, 2019) ("For a court to find a class cohesive, it must find that the 'class's claims are common ones and that adjudication of the case will not devolve into consideration of myriad individual issues.' 'In other words, Rule 23(b)(2) applies only when a single injunction or declaratory judgment would provide relief to each member **[*266]** of the class. It does not authorize class certification when each individual class member would be entitled to a *different* injunction or declaratory judgment against the defendant.'" (citation omitted) (first quoting Newberg on Class Actions § 4:34; and then quoting Dukes, 564 U.S. at 360)), *aff'd*, 4 F.4th 179 (3d Cir. 2021); In re St. Jude Med., Inc., 425 F.3d 1116, 1122 (8th Cir. 2005) ("At base, the (b)(2) class is distinguished from the (b)(3) class by class cohesiveness . . . . Injuries remedied through (b)(2) actions are really group, as opposed to individual injuries.").

HN29[] Accordingly, to the extent "cohesion" is required in Rule 23(b)(2) class actions, the Court understands it to refer to the requirements of Rule 23(b)(2) itself, rather than an additional requirement beyond the rule's text.[36] *See Houser, 28 F. Supp. 3d at 250* ("The cohesiveness element merely requires that plaintiffs' legal injuries be similar enough that they all can be remedied with a single 'indivisible' injunction." (citing Barnes, 161 F.3d at 143 n.18)).

ii. The class meets the requirements of Rule 23(b)(2)

The Court finds that the class meets the requirements of Rule 23(b)(2). Plaintiffs have met their burden to demonstrate that the challenged Restraints apply to all merchants and therefore relief would be effected on a classwide basis.

First, the Court finds that equitable relief under Rule 23(b)(2) is appropriate because Defendants **[*267]** have acted on grounds generally applicable to the class. Defendants' alleged anticompetitive conduct via the Restraints affects all Plaintiffs and class members and the class would generally benefit from equitable relief prohibiting Defendants' challenged conduct. For example, Plaintiffs allege that Visa has "established complex 'default' [i]nterchange [f]ee schedules" which "apply on every transaction, except for where they have been 'customized where Member [Banks] have set their own financial terms for the [i]nterchange of a Visa [t]ransaction or Visa has entered into business agreements to promote acceptance and [c]ard usage." (Compl. ¶¶ 86, 90 (third alteration in original).) Plaintiffs allege that Mastercard's interchange fees operate in a similar manner. (*See id.* ¶ 87.) In his report, Dr. Leffler notes that the default interchange fees "become[] the de facto price charged by all issuing banks" (Leffler Report ¶ 29 (quoting Stiglitz Report ¶ 136)), because "there is no benefit to an issuer setting a merchant price lower than the maximum allowed price which is the default interchange." (*id.*; Pls.' Mem. 35). Dr. Leffler states that same is true of the honor-all-cards rule which **[*268]** impairs merchant competition by preventing merchants from "selectively accept[ing] an issuer's payment cards." (Leffler Report ¶ 28.) Dr. Leffler stated that the Restraints "work together to reinforce Visa and Mastercard's control over the pricing to merchants and make it virtually impossible for merchants to exert any leverage to obtain substantially more favorable prices or terms." (*Id.* ¶ 38.) These effects do not occur on an individual merchant basis — they apply generally to all merchants in the class.

---

[36] The Court notes that in approving the 2013 Settlement Agreement, Judge Gleeson held that "the class is sufficiently cohesive to warrant Rule 23(b)(2) relief in this case." *See* Interchange Fees I, 986 F. Supp. 2d at 239. However, Judge Gleeson appeared to use the word "cohesive" in the same manner that this Court interprets it — to describe a class that meets the requirements of Rule 23(b)(2) because "the party opposing the class has acted or refused to act on grounds that apply generally to the class, so that final injunctive relief . . . is appropriate respecting the class as a whole." *Id.* (quoting Fed. R. Civ. P. 23(b)(2)).

Second, the Court finds that equitable relief is appropriate because such relief would apply to and benefit the class as a whole. Courts contemplating equitable relief for similar alleged anticompetitive rules have held that such relief is appropriate to be effected classwide. The district court's decision in *In re Visa Check/Mastermoney Antitrust Litigation* is instructive. 192 F.R.D. 68, 78 (E.D.N.Y. 2000), *aff'd sub nom.* In re Visa Check/MasterMoney Antitrust Litig., 280 F.3d 124 (2d Cir. 2001). In that case, the plaintiffs sought to challenge alleged tying arrangement "rules issued by defendants Visa and MasterCard that require[d] stores accepting [the] defendants' credit cards to also accept their debit cards." Id. at 71. Although the court ultimately certified the class under Rule 23(b)(3), the court also **[*269]** concluded that "the action may be maintained under Rule 23(b)(2)" because "[t]he 'honor all cards' rule is 'generally applicable' to all members of the class, and the request for an injunction ending it is central to the plaintiffs suit." Id. at 88; *see also* In re Visa Check/MasterMoney Antitrust Litig., 280 F.3d at 146-47 (declining to discuss certification under Rule 23(b)(2) because the class was certified under Rule 23(b)(3)).

Similarly, in *Interchange Fees I*, Judge Gleeson held that certification of a Rule 23(b)(2) settlement class was warranted because "[t]he network rules regimes that gave rise to this case applied generally to every merchant accepting Visa or MasterCard credit cards, and the injunctive relief in the proposed settlement" did as well. 986 F. Supp. 2d at 239. Judge Gleeson noted that "all merchants have the same interest in being able to inform cardholders at the point of sale of the acceptance costs of their credit cards and to either steer them to lower-cost alternatives or recoup the cost of acceptance." *Id.* While the Second Circuit vacated and remanded that decision on other grounds regarding adequacy of representation and due process, it did not hold that meaningful equitable relief was not possible for the entire class. Interchange Fees II, 827 F.3d at 238-40. Instead, the Second Circuit identified two schisms in the 2013 Rule 23(b)(2) settlement class **[*270]** — merchants that accept American Express or operate in states that prohibit surcharging and merchants that began business after the expiration of the provided injunctive relief — and found that the relief provided for in the settlement did not go far enough. *Id.* The Second Circuit noted that "[a]lternative forms of relief might have conferred a real and palpable benefit, such as remedies that affected the default interchange fee or honor-all-cards rule." Id. at 238. Plaintiffs' example of the 2011 Department of Justice settlement as a form of classwide relief is similarly persuasive. In that settlement, Visa and Mastercard were prevented from "offering discounts or expressing a preference for particular forms of payment" and required to "modify their rules in specific ways that applied to all [m]erchants." (*See* Pls.' Mem. 33); Final Judgment, *United States v. Am. Express*, No. 10-CV-4496 (E.D.N.Y. July 20, 2011), Docket Entry No. 143.

Moreover, the advisory committee notes to Rule 23 contemplate the use of equitable relief classes in antitrust cases. *See* Fed. R. Civ. P. 23 advisory committee notes to the 1966 Amendments ("Thus an action looking to specific or declaratory relief could be brought by a numerous class of **[*271]** purchasers, say retailers of a given description, against a seller alleged to have undertaken to sell to that class at prices higher than those set for other purchasers, say retailers of another description, when the applicable law forbids such a pricing differential."). ***HN30***[] Courts certifying antitrust-focused putative equitable relief classes have found that they meet the Rule 23(b)(2) requirements. *See* In re Universal Serv. Fund Tel. Billing Pracs. Litig., 219 F.R.D. 661, 679-81 (D. Kan. 2004) (certifying a (b)(2) class in addition to a (b)(3) damages class in an antitrust class action where defendants were allegedly engaged in horizontal price-fixing, and continued anti-competitive behavior, in the absence of an injunction, could possibly dwarf plaintiffs' damages claims); In re NASDAQ Mkt.-Makers Antitrust Litig., 169 F.R.D. at 516 (certifying a (b)(2) class despite the availability of treble damages under the antitrust statute because of the possibility that the defendants' alleged conspiracy would continue to inflate the spreads on securities in the absence of appropriate equitable relief).

The Court recognizes that merchants are likely impacted in a variety of ways by the Restraints. As Opponents argue, the class consists of merchants large and small, with multiple locations or single locations, and with different business plans and perspectives. **[*272]** However, Plaintiffs seek to challenge the total anticompetitive effect resulting from the Restraints, including how the Restraints interact with each other to create an overall anticompetitive environment, which Plaintiffs allege has the total effect of "limit[ing] merchants' ability to incentivize their customers to choose payment means that result in lower costs to the merchants and lower total prices for the transactions." (Leffler Report ¶ 4.) ***HN31***[] Differences in how each individual merchant is affected do not negate the fact that Defendants have acted on grounds generally applicable to the class and that each merchant in the class stands to benefit from equitable relief from the Restraints. *See* In re Vitamin C Antitrust Litig., 279 F.R.D. at

117 (stating that "[d]ifferences between the extent of harm suffered by each class member do not make Rule 23(b)(2) certification inappropriate" and finding that the defendants' "price-fixing conduct [was] alleged to have caused every class member to purchased vitamin C at an artificially increased price" which was "sufficient 'common impact' to warrant certification under Rule 23(b)(2)"); Latino Officers Ass'n City of N.Y., 209 F.R.D. at 92 (certifying a 23(b)(2) class where "the actions complained of allegedly were taken on grounds generally applicable to the proposed class, even **[*273]** if not every member actually felt the brunt of the actions"); *see also* DG ex rel. Stricklin v. Devaughn, 594 F.3d 1188, 1201 (10th Cir. 2010) ("Rule 23(b)(2) does not require [n]amed [p]laintiffs to prove [the] controverted policies or practices actually harm or impose a risk of harm upon every class member at the class certification stage. . . . [C]ertification is appropriate even if the defendant's action or inaction 'has taken effect or is threatened only as to one or a few members of the class, provided it is based on *grounds* which have general application to the class.' That a class possibly or even likely includes persons unharmed by a defendant's conduct should not preclude certification." (quoting Fed. R. Civ. P. 23(b)(2) advisory committee note to 1966 amendment)); Lyon v. U.S. Immigr. & Customs Enf't, 171 F. Supp. 3d 961, 983-85 (N.D. Cal. 2016) (holding that immigration detainees who claimed violation of procedural due process and sought class certification under Rule 23(b)(2) presented "substantial undisputed evidence of prejudice suffered by the class as a whole based on conduct which applies generally to the class," even if the plaintiffs did "not demonstrate every member of the class ha[d] suffered from an adverse effect on the outcome of their renewal hearing"); In re J.P. Morgan Chase Cash Balance Litig., 242 F.R.D. at 276 (certifying a Rule 23(b)(2) class because "[i]f [p]laintiffs prevail on the merits and [the defendant's] [p]lan is **[*274]** found to violate ERISA[], any injunctive or declaratory relief ordered would be applicable to the entire class"), *amended*, 255 F.R.D. 130 (S.D.N.Y. 2009); Richards, 235 F.R.D. at 174 ("The defendants argue that some putative class members would not want the injunctive relief that [the plaintiff] seeks because it would disadvantage them financially to revert to coverage under the [t]raditional [p]lan terms. However, the court may infer from the complaint and plan documents that all of the putative class members would benefit from at least some injunctive relief if the plaintiff prevails."); 2 Newberg on Class Actions § 4:28 ("While the Rule looks for grounds that 'apply generally' to the class, it is well-settled that the defendant's conduct described in the complaint need not be directed or damaging to every member of the class."). In addition, as Plaintiffs contend, merchants may continue to "negotiate additional relief specific to themselves and their own business needs" as the relief provided will serve as a baseline, but not a ceiling for relief to merchants. (*See* Pls.' Mem. 30-31.)

The cases cited by Opponents do not persuade the Court that Rule 23(b)(2) is not satisfied. For example, in *M.D. ex rel. Stukenberg v. Perry*, the Fifth Circuit held that **[*275]** the proposed class did not satisfy Rule 23(b)(2) because the class included "claims for individualized injunctive relief." *675 F.3d 832 (5th Cir. 2012)*. However, the requested injunctive relief in that case was to formulate "'special expert panels to review the cases' of all individual class members in certain subgroups of the class to determine whether their 'services' or 'permanency' needs were 'being adequately addressed and, if not, to implement appropriate remedial steps to seek and secure permanency." *Id. at 846-47*. This relief was essentially crafting individualized injunctive-type relief, which is distinct from ordering changes, modifications, or the repeal altogether of the Restraints as to the entire merchant class. *Id.* Similarly, in *In re Managerial, Professional & Technical Employees*, a multidistrict antitrust action challenging the defendants' alleged exchange of detailed salary information, the plaintiffs sought to "stop [d]efendants from sharing compensation information concerning all members of the [p]roposed [c]lass." No. 02-CV-2924, 2006 U.S. Dist. LEXIS 249, 2006 WL 38937, at *9 (D.N.J. Jan. 5, 2006). The court held that "enjoining that conduct would not provide relief generally applicable to the class because it would have potentially conflicting effects on different members" and could potentially **[*276]** benefit employees in a job market where the defendants do not exercise market power. 2006 U.S. Dist. LEXIS 249, [WL] at *9. The Court does not find that the relief proposed by Plaintiffs — eliminating the Restraints — has the potential to harm the class. Opponents cite no cases, and this Court is aware of none, that indicate that perpetuating the Restraints could be beneficial to any merchant.

Accordingly, the Court finds that the requirements of Rule 23(b)(2) are satisfied.

e. The Court declines to grant opt-out rights

Plaintiffs argue that the Court should certify a mandatory *Rule 23(b)(2)* class. (Pls.' Mem. 46-50.) They contend that the Supreme Court's decision in *Dukes* "reaffirmed the default rule" that *Rule 23(b)(2)* classes are mandatory classes because the rule "provides no opportunity for . . . (b)(2) class members to opt out." (*Id.* at 46 (quoting *Dukes, 564 U.S. at 361-62*).) Plaintiffs argue that "Second Circuit courts deviate from the Supreme Court's proscription against opt-outs under *Rule 23(b)(2)* only when the class seeks 'injunctive relief *and* significant monetary damages." (*Id.* at 47 (quoting *Madden v. Midland Funding, LLC, 237 F. Supp. 3d 130, 159 (S.D.N.Y. 2017)*).) In support, Plaintiffs rely on Dr. Leffler's report, which states that "disallowing opt-outs prevents free-riding by individual [m]erchants, thereby ensuring fairness and increasing the value of **[*277]** the injunctive-relief claim to *all* [m]erchants." (*Id.* at 48.) Plaintiffs contend that if merchants are allowed to opt out, they may "*threaten* to seek to obtain additional/different equitable relief from the Defendants" and would "monetize the value of that claim *solely for [themselves]* in a settlement," which would result in Defendants paying "substantially less to the class in the form of effective injunctive relief." (*Id.* at 48-49.) Because "[a]llowing opt-outs would permit an individual [m]erchant to gain financially based on the benefit that a legal claim would provide to other [m]erchants," and "that individual monetization of a collective asset significantly diminishes its overall value," Plaintiffs contend that the Court should not grant opt-out rights to the class. (*Id.* at 49.) In addition, Plaintiffs argue that *Rule 23*'s settlement approval process guarantees that class members will be heard as to whether any relief is insufficient. (*Id.*) Finally, Plaintiffs contend that a mandatory class "is a practical and legal necessity to bring market-wide equitable relief to this litigation." (Pls.' Reply 20.)

Direct Action Plaintiffs and Grubhub Plaintiffs argue that the Court should allow **[*278]** opt-out rights or redefine the class to exclude them because they are pursuing their own damages claims and excluding them from the class would cure inadequate representation and due process violations. (Direct Action Pls.' Opp'n 23-25; Grubhub Pls.' Opp'n 16-18.) First, Direct Action Plaintiffs and Grubhub Plaintiffs contend that the Court has the discretion under *Rule 23(b)(2)* to permit opt-outs from the *Rule 23(b)(2)* class when doing so would create a "just result." (Direct Action Pls.' Opp'n 23-24; Grubhub Pls.' Opp'n 16-17.) In support, Direct Action Plaintiffs point to *In re Visa Check/MasterMoney Antitrust Litigation*, in which the Second Circuit "avoided the question of whether certification was proper under *Rule 23(b)(2)* by affirming only under *Rule 23(b)(3)* to guarantee mandatory notice and opt-out rights." (Direct Action Pls.' Opp'n 24.) Direct Action Plaintiffs contend that "none of the dire predictions . . . about what would happen if opt-out rights are provided . . . [were] borne out in that case" because "there were a limited number of opt-outs, their claims were resolved individually, and the class achieved complete injunctive relief in a negotiated settlement." (*Id.*) Grubhub Plaintiffs similarly argue that granting opt-out **[*279]** rights "would provide them with that required right to decide" if they want to "'tie their fates to the class representatives' or go it alone." (Grubhub Pls.' Opp'n 16.) In the alternative, Direct Action Plaintiffs and Grubhub Plaintiffs argue that the Court should "exercise its authority to redefine the class to exclude" them from the class. (Direct Action Pls.' Opp'n 24-25; Grubhub Pls.' 17-18.)

Merchant Trade Groups argue that the Court should not certify a mandatory class because (1) all class members do not seek the same injunctive relief, (2) the merchants encompassed by the proposed class are different, will not be affected by injunctive relief in the same manner, and "should be permitted to make their own business decisions about what's best for them, their employees, and their customers without being bound by the judgments of *other* businesses about what is best for *them*," and (3) opt-out rights are the traditional escape valve for intra-class disputes. (Merchant Trade Groups' Opp'n 7-17.) Walmart argues that the Court should permit it to opt out of the class because "cohesion is lacking" and also argues that any such opt-out right should not be limited to merchants pursuing **[*280]** individual damages claims. (Walmart Opp'n 20-22.)

In response to Opponents' arguments, Defendants argue that the Court should certify a mandatory class. (*See* Defs' Reply 9-17.) Defendants argue that (1) *Rule 23* does not provide for opt-outs from a *Rule 23(b)(2)* class, (2) Opponents do not provide a legitimate basis for the Court to permit opt outs because due process and adequacy of representation are satisfied, and (3) the Court should not permit opt-out rights as a matter of discretion because the *Rule 23(b)(2)* class seeks only equitable relief and diversity of opinion as to the proper injunctive relief does not warrant granting opt out rights. (*Id.*) In addition, Defendants contend that the Court should not permit opt-out rights because to do so would "undermine the Rule's purpose of providing 'final injunctive relief.'" (*Id.* at 17-18.)

HN32[] Under Rule 23 of the Federal Rules of Civil Procedure, neither notice nor an opportunity to opt out is required for classes certified pursuant to Rule 23(b)(2).[37] *See* Fed. R. Civ. P. 23(c) ("For any class certified under Rule 23(b)(1) or (b)(2), the court may direct appropriate notice to the class."); *see also* Dukes, 564 U.S. at 361-62 (stating that Rule 23 "provides no opportunity for (b)(1) or (b)(2) class members to opt out, and does not even oblige the [d]istrict [c]ourt to afford them notice of the action."); Batalla Vidal, 501 F. Supp. 3d at 137 ("[T]he [g]overnment **[*281]** is correct that Rule 23(b)(2) does not require district courts to give notice or the opportunity for class members to opt out . . . ."). While "the right of a class member to opt-out in Rule 23(b)(1) and (b)(2) actions is not obvious on the face of the rule . . ., 'the language of Rule 23 is sufficiently flexible to afford district courts discretion to grant opt-out rights in (b)(1) and (b)(2) class actions.'" McReynolds v. Richards-Cantave, 588 F.3d 790, 800 (2d Cir. 2009) (quoting Eubanks v. Billington, 110 F.3d 87, 94, 324 U.S. App. D.C. 41 (D.C. Cir. 1997)); Batalla Vidal, 501 F. Supp. 3d at 137 (quoting McReynolds, 588 F.3d at 800); Biediger v. Quinnipiac Univ., No. 09-CV-621, 2010 U.S. Dist. LEXIS 50044, 2010 WL 2017773, at *7 (D. Conn. May 20, 2010) ("[A]ny members who do not want to be represented in the [Rule 23(b)(2)] class, or who believe they are erroneously included in the class, may opt out if they so choose." (citing McReynolds, 588 F.3d at 800)).

The Court declines to grant an opt-out right from the Rule 23(b)(2) class. For the reasons stated in Sections II.c.iv and II.d *supra*, the Court finds that the proposed class satisfies the adequacy of representation requirement of Rule 23(a)(4) and the Due Process Clause, as well as the equitable relief requirement of Rule 23(b)(2). As Defendants correctly argue, the "adequate representation that a court finds in certifying a Rule 23(b)(2) class obviates the need for permitting opt-outs from the class; in the absence of adequate representation, certification is simply denied." (Defs.' Reply 10.) Indeed, the Court is not aware of a case, and Opponents cite none, that suggest that a court can cure inadequate **[*282]** representation by providing opt-out rights. The Court is left with Opponents' arguments that it should use its discretion to permit opt-out rights.

The cases cited by Opponents in support of their arguments for an opt-out right demonstrate that many courts that have granted the ability to opt out in Rule 23(b)(2) classes have generally done so when monetary damages are being pursued in the same class.[38] *See, e.g.,* Lemon v. Int'l Union of Operating Eng'rs, Loc. No. 139, 216 F.3d 577, 580-81 (7th Cir. 2000) (remanding certification of Rule 23(b)(2) class for the court to consider its options, including providing opt-out rights, when the plaintiffs "sued for both equitable relief and monetary damages to remedy alleged violations of Title VII" and "each class member in actions for money damages is entitled as a matter of due process to personal notice and an opportunity to opt out of the class action"); In re Monumental Life Ins. Co., 365 F.3d 408, 417 (5th Cir. 2004) ("[T]here is no absolute right of opt-out in a rule 23(b)(2) class, 'even where monetary relief is sought and made available.' Under our precedent, should the class be certified on remand, class members must be provided adequate notice, and the district court should consider the possibility of opt-out rights." (first citing Penson v. Terminal Transp. Co., 634 F.2d 989, 994 (5th Cir. 1979; and then citing Kincade v. Gen. Tire & Rubber Co., 635 F.2d 501, 505-07 (5th Cir. 1981))); Eubanks, 110 F.3d at 96 ("[W]hen a (b)(2) class seeks monetary as well as injunctive or declaratory **[*283]** relief the district court may exercise discretion in at least two ways. The court may conclude that the assumption of cohesiveness for purposes of injunctive relief that justifies certification as a (b)(2) class is unjustified as to claims that individual class members may have for monetary damages. . . . Alternatively, the court may conclude that the claims of particular class members are unique or sufficiently distinct from the claims of the class as a whole, and that opt-outs should be permitted on a selective basis."); In re Universal Serv. Fund Tel. Billing Pracs. Litig., 219 F.R.D. at 681 (certifying a Rule 23(b)(2) class but noting that the court will "exercise its discretionary authority pursuant to Rule 23(d)(2) and 23(d)(5) and provide the conspiracy class members with

---

[37] The Court notes that Rule 23(e) requires that (b)(2) class members receive notice of any proposed settlement and Rule 23(h) requires that (b)(2) class members receive notice of any claim for an attorneys' fees award. *See* Fed. R. Civ. P. 23(e), (h).

[38] Another case cited by Merchant Trade Groups is similarly unpersuasive. In *Friedman v. California State Employees Association*, the court provided opt-out rights to a Rule 23(b)(2) class for members who "object[ed] to the portion of the action pertaining to the challenge to the constitutionality" of a statute because "some fair share fee payers [were] happy to pay their fair share of union dues to cover the benefits of collective bargaining and [did] not want the statute to be overturned." No. CV-S000101, 2000 U.S. Dist. LEXIS 7049, 2000 WL 288468, at *8 (E.D. Cal. Mar. 15, 2000). The Court finds the facts of this case inapposite because in the instant litigation, no merchant is seeking opt-out rights to uphold the Restraints.

notice and opt-out rights equally insofar as that class is certified under *Rule 23(b)(2)* and *Rule 23(b)(3)*" when "the monetary damages aspect of the conspiracy claim [was] certainly significant, but the injunctive relief aspect [was] also potentially significant"); *see also* *Charron, 269 F.R.D. at 237* ("Where, as here, a class seeks injunctive relief and significant monetary damages, due process concerns militate strongly against maintaining a mandatory (b)(2) class action without the procedural safeguards of notice and the opportunity to opt-out that are provided **[*284]** to members of a(b)(3) damages class.").

Due to the nature of the relief being sought, all merchants — regardless of whether they would choose to opt out of the class or not — would benefit from the equitable relief provided. *See* *J.D. v. Azar, 925 F.3d 1291, 1319, 441 U.S. App. D.C. 224 (D.C. Cir. 2019)* ("[I]n a (b)(2) case, an 'injunction prohibiting a defendant's action against "the class as a whole" would halt the action *regardless* [of] *whether some of those affected might have withdrawn from the suit if given the option*.'" (quoting *Richards v. Delta Air Lines, Inc., 453 F.3d 525, 530, 372 U.S. App. D.C. 53 (D.C. Cir. 2006)*)); *Messier, 183 F.R.D. at 356* ("[O]pting out of a (b)(2) action for injunctive relief has little practical value or effect. Even class members who opted out could not avoid the effects of the judgment." (collecting cases)). In *Dukes*, the Supreme Court emphasized the "indivisible nature" of the relief provided in *Rule 23(b)(2)* actions, stating that "[t]he key to the (b)(2) class is 'the indivisible nature of the injunctive or declaratory remedy warranted — the notion that the conduct is such that it can be enjoined or declared unlawful only as to all of the class members or as to none of them.'" *Dukes, 564 U.S. at 360* (quoting Nagareda, *84 N.Y.U. L. Rev., at 132*). In addition, although the court in *In re Visa Check/Mastermoney Litigation* ultimately only certified the **[*285]** class under *Rule 23(b)(3)*, in holding that the class could also be certified under *Rule 23(b)(2)*, the district court noted that it was inclined to "provide opt-out rights only as to the damages section." *192 F.R.D. at 89*. The circumstances contemplated by the Supreme Court in *Dukes* are present in the case at hand — Plaintiffs seek equitable relief from the bundle of Restraints that together result in the supracompetitive interchange fees. Accordingly, equitable relief — should Plaintiffs prevail or reach a settlement — that tackles these Restraints is proper as to all merchants, not just those who are represented by class counsel.

Concerns about opt-outs resulting in contradictory equitable relief and disincentivizing settlement[39] weigh in favor of denying opt-out rights. *See* *Berry, 807 F.3d at 613* ("What is being sought is a blanket right to opt out of a *Rule 23(b)(2)* settlement that provides purely injunctive relief . . . . That such a rule would discourage settlement seems undeniable; defendants . . . surely will not agree to settlements like this one if they cannot buy something approaching global peace."); *Van Gemert v. Boeing Co., 590 F.2d 433, 439 n.14 (2d Cir. 1978)* ("[C]lass actions certified under *Rule 23(b)(2)* . . . do not contain an opt-out privilege. This reflects the conclusion of those who drafted the Rules that individual choice **[*286]** should be subordinated to the interests of the class as a whole to avoid inconsistent judgments or prejudice to absent class members. Because class certification represents a judicial determination that the absentees are adequately represented, it would frustrate the Rule if we were to require an investigation into each plaintiff's willingness to accept the benefits of the litigation."), *aff'd*, *444 U.S. 472, 100 S. Ct. 745, 62 L. Ed. 2d 676 (1980)*. In addition, as Dr. Leffler noted in his report, permitting opt-outs can decrease the efficiency of the class action:

> if the class wins, the opt-out wins; if the class loses, the opt-out does not lose. Therefore, because a merchant would get the benefit from a class win at trial but retain the right to re-address liability if the class loses, there is necessarily a positive expected net value from opting out. Hence, if the case is expected to go to trial, merchants will perceive a positive value of opting out as compared to remaining in the class. In effect, by opting out[,] a merchant can free ride on the benefits of a trial win but avoid the cost of a trial loss. Class action cases lower the costs of litigation reducing the dissipation of society's resources. If merchants are incented to **[*287]** opt out of the Class to free ride on the Class result and filing their own case, the benefits of a class action are undermined.

---

[39] While the Court is mindful of the Second Circuit's warning that litigation peace does not warrant certification of an unlawful class, *see* *Interchange Fees II, 827 F.3d at 240* ("[T]he benefits of litigation peace do not outweigh class members' due process right to adequate representation."), the Court considers potential obstacles to settlement because it is satisfied that the representation is adequate under *Rule 23(a)(4)* and the Due Process Clause.

(Leffler Report ¶ 67.) The Court is persuaded by Dr. Leffler's warning and does not wish to incentivize free riding on the class action while detracting from the benefits of the class mechanism.

Accordingly, the Court declines to grant opt-out rights to members of the Rule 23(b)(2) class.[40]

f. Appointment of class counsel

When a district court certifies a class, it must appoint class counsel. In doing so, a court must consider:

> (i) the work counsel has done in identifying or investigating potential claims in the action; (ii) counsel's experience in handling class actions, other complex litigation, and the types of claims asserted in the action; (iii) counsel's knowledge of the applicable law; and (iv) the resources that counsel will commit to representing the class.

Fed. R. Civ. P. 23(g)(1)(A)(i)-(iv).

For the reasons set forth in Section II.c.iv.2 *supra*, the Court finds that to date, Class Counsel have fairly and adequately represented the putative class in accordance with *Rule 23(g)*. Accordingly, the Court appoints Hilliard & Shadowen LLP, Grant & Eisenhofer, P.A., Freed Kanner London & Millen LLP, **[*288]** and Nussbaum Law Group, P.C. to serve as co-lead *Rule 23(b)(2)* Class Counsel.

III. Conclusion

---

[40] Direct Action Plaintiffs' remaining arguments that their inclusion in a mandatory class violates their constitutional rights are similarly meritless. Direct Action Plaintiffs argue that (1) "[c]ertification of mandatory classes implicates *Seventh Amendment* jury trial rights" because "[w]hen cases involve legal and equitable claims that share common factual issues, the *Seventh Amendment* requires a jury trial on the legal claims first," and (2) forcing them to participate in a mandatory class "would violate their due process right to choose their own counsel, and their *First Amendment* rights to free speech and freedom of association by requiring them to be represented by counsel they did not choose." (Direct Action Pls.' Opp'n 10.)

In response, Plaintiffs argue that "[i]t is black-letter law that the application of collateral estoppel does not implicate the *Seventh Amendment*" and the *First Amendment* arguments are "overblown at best" with Direct Action Plaintiffs citing "no case holding that such rights are impaired by certifying a mandatory (b)(2) class." (Pls.' Reply 9-10 & n.15.) Defendants similarly contend that any resulting collateral estoppel as a result of the Court's determination does not violate the *Seventh Amendment* because the *Seventh Amendment* only requires a jury trial when claims for damages and injunctive relief are tried in the same action. (Defs.' Reply 13-14.)

The Court agrees with *Rule 23(b)(2)* Plaintiffs and Defendants that certification of a mandatory class does not violate the right to a jury trial for parties pursuing individual damages claims. The Supreme Court has held that "an equitable determination can have collateral estoppel effect in a subsequent legal action and . . . this estoppel does not violate the *Seventh Amendment*." *Parklane Hosiery Co. v. Shore, 439 U.S. 322, 335, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979)*; *Falbaum v. Pomerantz, 19 F. App'x 10, 12-13 (2d Cir. 2001)* (stating that in *Parklane Hoisery*, "the Supreme Court held that the *Seventh Amendment* did not prevent the application of collateral estoppel to a second action even though the first action was determined by a judge" when there were "two separate actions as is the case here").

Direct Action Plaintiffs' *First Amendment* argument is similarly unavailing. Direct Action Plaintiffs cite no case, and this Court is aware of none, concluding that mandatory actions under *Rule 23(b)(2)* implicate free speech and freedom of association. *See Ayers v. Thompson, 358 F.3d 356, 376 (5th Cir. 2004)* (rejecting the appellants' argument that denying them opt-out rights raises a *First Amendment* issue and stating that they "provide no authority for the proposition that denying them the right to opt out of a *Rule 23(b)(2)* class violates the *First Amendment*"). However, should Direct Action Plaintiffs wish to litigate this issue, they should address it in a more comprehensive manner than just providing a single sentence and footnote in their motion papers.

For the foregoing reasons, the Court grants Plaintiffs' motion for class certification in part and denies it in part. The Court certifies a *Rule 23(b)(2)* class consisting of all persons, businesses, and other entities that accept Visa and/or Mastercard credit and/or debit cards in the United States at any time during the period between December 18, 2020 and the date of entry of Final Judgment in this case. The Court dismisses DDMB and DDMB2 as class representatives. The Court appoints Hilliard & Shadowen LLP, Grant & Eisenhofer, P.A., Freed Kanner London & Millen LLP, and Nussbaum Law Group, P.C. to serve as co-lead *Rule 23(b)(2)* Class Counsel.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 8(a)(2) requires a complaint to include a short and plain statement of the claim showing that the pleader is entitled to relief. A complaint that fails to meet this standard may be dismissed pursuant to Fed. R. Civ. P. 12(b)(6). To overcome a Rule 12(b)(6) motion to dismiss, a plaintiff's factual allegations in the complaint must suggest that the claim has at least a plausible chance of success. The court accepts factual allegations in the complaint as true and construes the pleadings in the light most favorable to the nonmoving party. But allegations in a complaint may not simply recite the elements of a cause of action and must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively. A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN2[] **Relevant Market, Product Market Definition**

A product market is generally about substitutes, not complements. For example, the Ninth Circuit has stated that a product market encompasses the product at issue as well as all economic substitutes for the product. The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN3[] **Attempts to Monopolize, Elements**

Anticompetitive effects can be shown through either direct evidence or indirect evidence. Direct evidence of anticompetitive effects would be actual detrimental effects, such as reduced output, increased prices, or decreased quality in the relevant market. For indirect evidence, a plaintiff would need to show the defendant's market power, plus some evidence that the defendant's conduct harms competition.

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN4[] **Fundamental Freedoms, Freedom to Petition**

"SLAPP" stands for strategic lawsuit against public participation. California has an anti-SLAPP statute designed to allow early dismissal of meritless cases aimed at chilling expression or the right to petition through costly, time-consuming litigation.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN5[] **Freedom of Speech, Strategic Lawsuits Against Public Participation**

The analysis of an anti-SLAPP motion under Cal. Code Civ. Proc. § 425.16(b)(1) proceeds in two steps. At step one, the court decides whether the defendant has made a threshold showing that the challenged cause of action is one arising from protected activity. When a claim is mixed, meaning that it is based on allegations of both protected and unprotected activity, the unprotected activity is disregarded at the first step. Only if the court determines that relief is sought based on protected activity does it reach the second step. At step two, the burden shifts to the plaintiff to demonstrate that each challenged claim based on protected activity is legally sufficient and factually substantiated.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN6[] **Motions to Dismiss, Failure to State Claim**

Federal district courts review anti-SLAPP motions to strike under different standards depending on the motion's basis. When an anti-SLAPP motion to strike challenges only the legal sufficiency of a claim, a district court should apply the Fed. R. Civ. P. 12(b)(6) standard and consider whether a claim is properly stated. When an anti-SLAPP motion to strike challenges the factual sufficiency of a claim, then the Fed. R. Civ. P. 56 standard applies. If the plaintiff ultimately fails to meet its burden at the second step, the claim based on protected activity is stricken and allegations of protected activity supporting the stricken claim are eliminated from the complaint, unless they also support a distinct claim on which the plaintiff has shown a probability of prevailing.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Strategic Lawsuits Against Public Participation

HN7[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

The first part of the anti-SLAPP inquiry under California law is substantially the same as the inquiry into whether the Noerr-Pennington doctrine applies; in the anti-SLAPP context, the critical point is whether the plaintiff's cause of action itself was based on an act in furtherance of the defendant's right of petition or free speech.

Opinion

[*457] **PUBLIC/REFILING**

ORDER GRANTING IN PART [2] AND DENYING IN PART DEFENDANTS' JOINT MOTION TO DISMISS AND TO STRIKE PLAINTIFFS' SECOND AMENDED COMPLAINT**

Docket No. 244

The above-referenced case is an antitrust case. The current operative complaint is the second amended complaint ("SAC"). The plaintiffs named in the caption of the SAC are Intel Corporation and Apple Inc. The defendants named in the caption are:

(1) Fortress Investment Group LLC and Fortress Credit Co. LLC ("Fortress");
(2) Uniloc 2017 LLC, Uniloc USA, Inc., and Uniloc Luxembourg S.A.R.L. ("Uniloc");
(3) VLSI Technology LLC ("VLSI");
(4) INVT SPE LLC and Inventergy Global, Inc. ("INVT"); and
(5) IXI IP, LLC ("IXI").

The parameters of the SAC, however have shifted because, on June 21, 2021, Apple dismissed its claims against all of the defendants.[1] *See* Docket No. 263 (notice of voluntary dismissal). The Court asked the remaining parties to meet and confer to determine how Apple's dismissal impacted the instant case. The remaining parties agreed that, in light of Apple's dismissal, "Intel currently only has claims" against Fortress and VLSI.[2] Docket No. 273 (St. at 1). Thus, at present, the Court now has an antitrust case brought by Intel only against Fortress and VLSI only. **[**3]**

Currently pending before the Court is (1) a joint motion to dismiss and strike the SAC and (2) INVT's supplemental brief. Having considered the parties' briefs and the oral argument of counsel, as well as the amicus briefs that were filed, the Court hereby **GRANTS** the motion to dismiss but **DENIES** the anti-SLAPP motion.

I. IMPACT OF APPLE'S DISMISSAL

As indicated above, the Court asked the parties (other than Apple) to meet and confer to discuss how Apple's dismissal impacted the instant case. The parties agreed that, because of the dismissal, the only plaintiff remaining was Intel and that the only defendants remaining were Fortress **[*458]** and VLSI. The parties also agreed that, because of the dismissal, five of the nine product markets identified in the SAC were no longer at issue. *See generally* Docket No. 273 (St. at 1).

The parties, however, do have a few disputes in need of judicial resolution.

- **Product markets**. For the five product markets that are no longer at issue, Intel asks that claims based on these product markets be dismissed without prejudice; all of the defendants ask for a dismissal with prejudice. Both parties assert that their respective position is supported by the Court's prior **[**4]** order of January 6, 2021. *See* Docket No. 229 (Order at 15). In that order, the Court noted that, for several product markets, Plaintiffs admitted that Defendants had not yet asserted patents in those markets and further failed to explain why there was a threat that Defendants would assert such patents — and against Plaintiffs specifically. The Court thus found that Plaintiffs lacked standing to assert antitrust claims based on the product markets. The dismissal of the claims based on the product markets was *with* prejudice because Plaintiffs did not provide any indication that they were capable of curing the deficiency on standing. However, the Court's ruling did not "bar Plaintiffs from initiating a new suit (including but not limited to a suit for declaratory relief) should circumstances change." Docket No. 229 (Order at 15). Consistent with the Court's January 6 order, the dismissal of the claims based on the five product markets shall be with prejudice; however, that does not bar Intel from initiating a new action should circumstances change.

---

[1] All of the defendants, except one, were dismissed with prejudice. VLSI was dismissed without prejudice.

[2] This is because only VLSI has sued Intel for patent infringement. .

• **Defendants**. Similar to above, Intel asks that the defendants who will be dismissed from the case (namely, Uniloc, INVT, and IXI) be dismissed **[**5]** without prejudice. Those defendants ask for a dismissal with prejudice. Consistent with the above, the Court dismisses with prejudice, but this does not bar Intel from initiating a new action should circumstances change.

II. FACTUAL & PROCEDURAL BACKGROUND

In the SAC, Intel alleges as follows.

"PAE" stands for patent assertion entity. PAEs are companies that "aggressively pursue meritless [patent infringement] litigation." SAC ¶ 2. Over the years, "PAEs have evolved," most notably, "partnering with investment firms to fuel their litigation." SAC ¶ 6.

> Having deep-pocketed investment firms standing behind them has made PAEs only more aggressive. Indeed, to meet the expectations of their new investors for high returns, PAEs must act ever more aggressively. These new investors are content to incur loss after loss so long as they have the chance to hit a windfall reward that will justify their investment. Patent assertion thus becomes simply a numbers game disassociated from the merits of the underlying patents, with PAEs and their investors betting that serial assertions with aggressive demands will strike a jackpot eventually making up for many other losses.

SAC ¶ 7.

Fortress is an investment **[**6]** firm that has partnered with PAEs. *See* SAC ¶ 8. Fortress has a "web of PAEs that [it either] owns or controls." SAC ¶ 9. "Fortress has used its stable of PAEs to aggregate a massive . . . portfolio of patents." SAC ¶ 9. **[*459]** That portfolio includes patents that are substitutes for each other (as well as complements). SAC ¶¶ 9, 41. "When patents are aggregated as Fortress has done, the dynamics for determining whether to assert a patent change and the options available to the target of the assertion also change." SAC ¶ 40.

For example:

> When the patents were held by their original owners, there was competition and a prospective licensee could choose between competing options (or forgo those options and design its product in a different way), which had the effect of promoting competition and restraining royalties. But now, with the patents under the control of Fortress, the prospect of competition or redesigning products is improperly diminished or disappears. Fortress and its PAEs can thus threaten a target with the serial risk that the only or next best alternative design to an asserted patent is also subject to a patent claim by one of Fortress's PAEs.

SAC ¶ 41; *see also* SAC ¶ 12 (noting that, **[**7]** before aggregation, the patents were owned by sophisticated companies that were willing to assert patents and had experience with asserting patents, but the owners did not assert the patents because the patents "had insufficient expected value to make the assertions worth the costs"); SAC ¶ 44 (alleging that the aggregation of substitute patents harms "competition in the same way as any merger or combination of competitors that lessens competition").

As another example:

> Before aggregation, there would be no incentive to assert [weak] patents because there would be no expectation of a positive return from asserting a weak patent because the patent could be expected to be proven invalid, not infringed, or unenforceable in litigation, or would be easily designed around, including because there were alternatives available in the market. But, after aggregation and the elimination of competitive alternatives, assertion of weak patents as part of a wave of assertions against a target generates economic value even if many of those assertions are defeated in litigation. By increasing the volume of assertions a target faces, Fortress and its PAEs cause targets to deploy licensing and litigation **[**8]** resources less efficiently and thereby increase the value of litigation to Fortress and its PAEs. In particular, Fortress and its PAEs increase the likelihood that a weak patent will slip through litigation and be found infringed, valid, and enforceable when it should not be. Further, this strategy creates incentives for targets to settle with Fortress-backed PAEs for amounts that exceed the value (if any) of their patents to put an end to this risk. In this

> manner, Fortress's patent aggregation enables the use of weak patents to force targets to pay undeserved and inflated royalties.

SAC ¶ 42.

Intel acknowledges that "[t]here is nothing inherently illegal with owning many patents or obtaining those patents through acquisition" but maintains that there is illegality where, *e.g.*, licensing is not "based on the intrinsic value of those patents." SAC ¶ 52; *see also* SAC ¶ 53 (alleging that Defendants "extort supracompetitive royalties unrelated to the value (if any) of the Fortress-controlled patents").

There are four markets at issue in this case where Defendants have aggregated patents. Those "patent markets" are as follows.

- The market for patents for preventing stalls for cache misses. **[**9]** *See* SAC ¶ 248.

[*460] • The market for patents for arbitrating multiple requests to access a memory bus. *See* SAC ¶ 283.

- The market for patents for third-party device authorization through limitation of information exchanged. *See* SAC ¶ 303.

- The market for patents for MOSFET channel fabrication. *See* SAC ¶ 390.

Based on, *inter alia*, the above allegations, Intel has asserted the following causes of action against Fortress and/or VLSI[3] :

(1) An agreement to restrain competition in patent licensing, in violation of *§ 1* of the *Sherman Act (against Fortress only, not VLSI)*.

(2) Unlawful asset acquisitions, in violation of *§ 7* of the *Clayton Act*.

(3) Unfair competition, in violation of *California Business & Professions Code § 17200*.[4]

III. DISCUSSION

A. Legal Standard

HN1[] *Federal Rule of Civil Procedure 8(a)(2)* requires a complaint to include "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. A complaint that fails to meet this standard may be dismissed pursuant to *Federal Rule of Civil Procedure 12(b)(6)*. *See* *Fed. R. Civ. P. 12(b)(6)*. To overcome a *Rule 12(b)(6)* motion to dismiss after the Supreme Court's decisions in *Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*, and *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*, a plaintiff's "factual allegations [in the complaint] 'must . . . suggest that the claim has at least a plausible chance of success.'" *Levitt v. Yelp! Inc., 765 F.3d 1123, 1135 (9th Cir. 2014)*. The court "accept[s] factual allegations in the complaint as true and construe[s] the pleadings in the light most favorable **[**10]** to the nonmoving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. But "allegations in a complaint . . . may not simply recite the elements of a cause of action [and] must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively." *Levitt, 765 F.3d at 1135* (internal quotation marks omitted). "A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct

---

[3] Per the SAC, Fortress formed VLSI in 2016 and caused the transfer of patents to the company. *See* SAC ¶ 74. VLSI obtained some of its patents from a third party, NXP/Freescale, via a Patent Purchase and Cooperation Agreement. *See* SAC ¶ 76.

[4] This claim is derivative of the federal antitrust claims. *See* SAC ¶ 465 (alleging that Defendants engaged in unfair competition "by violating the Sherman and Clayton Acts").

alleged." *Iqbal, 556 U.S. at 678*. "The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully." *Id.* (internal quotation marks omitted).

In the pending motion, Defendants make arguments that are similar to those made in their prior 12(b)(6) motions - *e.g.*, failure to allege product market, market power, and antitrust injury as well as failure to allege a *§ 1* claim specifically and a *§ 7* claim specifically.

B. Product Markets

In its prior order, the Court noted that,

> [a]lthough "market definition is a deeply fact-intensive inquiry, [and] courts hesitate **[*461]** to grant motions to dismiss for failure to plead a relevant product market," a product market must **[**11]** still be plausible. Here, the Court concludes that many, although not all, of the markets claimed by Plaintiffs are not plausibly stated because, facially, they are still overbroad.

Docket No. 229 (Order at 16). The markets as then pled by Plaintiffs were overbroad because they covered a general technical field rather than just a specific function within that field. *See* Docket No. 229 (Order at 17-19).

In the pending motion, Defendants assert that the four patents markets at issue, even as re-pled, are still not plausible.

For example, Defendants contend that "the new markets contain the exact same patents as the markets that the Court dismissed." Mot. at 9. But the fact that the new markets contain the exact same patents as before is not, in and of itself, problematic per se. It is possible that the exact same patents do not cover a general technical field but rather a specific function within that field. As now more narrowly defined, the posited markets appear to be defined with sufficient specificity to be plausible.

The bigger problem with the new markets is that Intel claims that the markets are made up of both substitute patents *and* complementary patents. *See, e.g.*, SAC ¶ 255. ***HN2***[] But **[**12]** a product market is generally about substitutes, not complements. For example, the Ninth Circuit has stated that a product market "encompass[es] the product at issue as well as all economic substitutes for the product." *Newcal Indus., Inc. v. Ikon Office Soln., 513 F.3d 1038, 1045 (9th Cir. 2008)*. The court has also noted: "'The outer boundaries of a product market are determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it.'" *Id.*; *see also* *Eastman Kodak Co. v. Image Tech. Servs., 504 U.S. 451, 469, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* (indicating that cross-elasticity of demand refers to "the extent to which consumers will change their consumption of one product in response to a price change in another"). The Areeda & Hovenkamp antitrust treatise similarly underscores that a product market is made up of substitute goods, not complements, even going so far as to say that "[g]rouping complementary goods into the same market" is "economic nonsense" and would

> undermin[e] the rationale for the policy against monopolization or collusion in the first place. One "monopolizes" a market by reducing output, and once certain output is removed from the market, the remaining output experiences increased demand and a rise in prices. Thus a monopolist might monopolize the market for gasoline **[**13]** by reducing output from the competitive level of, say, 1,000,000 barrels, to a monopoly level of 700,000, with the result that demand intensifies for that which remains and the market clearing price rises. No such result obtains when one aggregates complementary goods into the same market. For example, grouping gasoline and tires into a "market" suggests that an output decrease in gasoline would permit an increase in tire prices. In fact, it will do just the opposite.

2B Areeda & Hovenkamp, ***Antitrust Law*** ¶ 565a.

Admittedly, there are cases in which courts have held that commercial realities weigh in favor of putting what might appear to be different products or services into a single market. *See* *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2285-86, 201 L. Ed. 2d 678 (2018)* (stating that "courts should 'combin[e]' different products or services into 'a single **[*462]** market' when 'that combination reflects commercial realities'"; thus, holding that "courts must include both sides of the platform — merchants and cardholders — when defining the credit-card market"); *Image Tech. Servs. v. Eastman Kodak Co., 125 F.3d 1195, 1203-04 (9th Cir. 1997)* (rejecting Kodak's argument that, "because no two parts are interchangeable, the relevant markets for parts consist of the market for each individual part for Kodak photocopiers and each single part for Kodak **[**14]** micrographics equipment"; "[c]onsideration of the 'commercial realities' in the markets for Kodak parts compels the use of an 'all parts' market theory" - "[a]s the relevant market for service 'from the Kodak equipment owner's perspective is composed of only those companies that service Kodak machines,' the relevant market for parts from the equipment owners' and service providers' perspective is composed of 'all parts' that are designed to meet Kodak photocopier and micrographics equipment specifications"). And arguably, there could be commercial realities such that complementary patents should be considered part of the same market as substitute patents - *e.g.*, where a complementary patent is essential to a combination with a subject patent to make the product and there are no substitutes for that complementary patent. But here, Intel has not shown with any specificity that commercial realities require that any of the markets at issue should be made up of both substitute patents and complementary ones identified in the SAC — this in spite of the fact that patents and their utility are publicly available information and nothing suggests Intel does not have information to make such **[**15]** allegations. *See also* Areeda & Hovenkamp, ***Antitrust Law*** ¶ 565a (asserting that "many 'commercial realities' describe a particular market situation, and their invocation should not become an after-the-fact rationalization for a conclusion that is *completely inconsistent with the economic rationale for defining markets*") (emphasis added). Instead, Intel has simply included certain complementary patents without any specific explanation of their essentiality or substitutability in the market.

Perhaps in the attempt to get around this problem, Intel claims that the complementary patents are "possibly substitutes." *E.g.*, SAC ¶ 255 (addressing market for patents for preventing stalls for cache misses). But that the patents are *possibly* substitute patents is not the same thing as saying that the patents are *plausibly* substitutes. At the 12(b)(6) phase, possibility is not good enough; plausibility is required. In addition, Defendants are correct in arguing that *Staley v. Gilead Sciences, Inc., No. 19-cv-02573-EMC, 2020 U.S. Dist. LEXIS 167071 (N.D. Cal. July 29, 2020)*, is of no help to Intel because that case presented a different situation. In *Staley*, the plaintiffs pled *facts* demonstrating that "cART drugs sometimes may be complements for one another but other times may be substitutes. *See* FACC ¶ 402 **[**16]** (alleging that the HHS Guidelines have recommended regimens that include NRTIs and third agents together, as well as regimens that include third agents and no NRTIs - *i.e.*, NRTIs and third agents sometimes are complements but other times may be substitutes)." *Id.* at *28. Here, Intel has not pled any specific facts to suggest that the complementary patents could plausibly be substitutes as well. *Compare* Areeda & Hovenkamp ¶ 565b (noting that "[a] few things capable of being used in variable proportions may function as both complements and substitutes" - *e.g.*, "[w]hile aftermarket parts and the labors of a service technician are complementary goods, they may act as substitutes when the technician has **[*463]** a choice between using more labor or a new part").

Because the Court considers only substitute patents count for the markets, and not complementary patents (or patents that are "possibly substitutes"), Intel's claim of unlawful patent aggregation is more limited in nature that what is suggested on the face of the pleading. Quite simply, there are few patents that Defendants have allegedly aggregated.

• **Market for patents for preventing stalls for cache misses**. Intel has identified only two **[**17]** substitute patents: the '437 patent (held by Uniloc) and the '009 patent (held by VLSI). The five complementary patents identified by Intel — including the '331 patent and the '014 patent — are not part of the market. *See* SAC ¶ 255.

• **Market for patents for arbitrating multiple requests to access a memory bus**. Intel has identified only two substitute patents: the '687 patent (held by Uniloc) and the '983 patent (held by VLSI). The one complementary patent identified by Intel is not part of the market. *See* SAC ¶ 290.

• **Market for patents for third-party device authorization through limitation of information exchanged**. Intel has identified seven substitute patents: the '242, and '620 patents (held by INVT); the '395 patent (held by Seven); the '633 patent (held by VLSI); and the '976, '907 patent, and '616 patents (held by Uniloc). The ten complementary patents identified by Intel are not part of the market. *See* SAC ¶ 320.

- **Market for patents for MOSFET channel fabrication**. Intel has identified five substitute patents: the '452, '319, '232, and '149 patents (held by Uniloc); and the '303 patent (held by VLSI). There are no complementary patents identified.

Moreover, for the first patent market (preventing stalls for cache misses), Intel has not been sued for infringement of either of the substitute patents. Although Intel has been sued for infringement **[**18]** of the '014 patent (No. C17-5671 BLF (N.D. Cal.)) and the '331 patent (No. C-18-0966 (D. Del.)), those patents are complementary patents only. Intel thus lacks standing to bring any antitrust claim with respect to the first market. The Court dismisses all claims against Defendants based on the first patent market.

Finally, the Court notes that, for some of the markets, Defendants have argued that the alleged patent substitutes are not, in fact, substitutes. Also, Defendants have argued that, even if there is functional substitutability, Intel must still show economic substitutability. For purposes of this order, the Court need not address these arguments but assumes in Intel's favor that Defendants have simply raised factual disputes that cannot be resolved at the *12(b)(6)* phase. As discussed below, the problem for Intel is that, even with these assumptions, its antitrust claims fail.

C. Market Power

In its prior orders, the Court indicated that Plaintiffs' antitrust claims, as pled, turned on anticompetitive effects resulting from the alleged patent aggregation. *See, e.g.*, *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018)* (noting that, in a *§ 1* claim, under the rule of reason, a plaintiff "has the initial burden to prove that the challenged restraint has a substantial **[**19]** anticompetitive effect that harms consumers in the relevant market"); *15 U.S.C. § 18* (providing that, in a *§ 7* claim, "no person . . . shall acquire the whole or any part of the **[*464]** assets of another person . . . , where in any line of commerce or in any activity affecting commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly"). ***HN3***[] Anticompetitive effects can be shown through either direct evidence or indirect evidence. Direct evidence of anticompetitive effects would be "'*actual* detrimental effects, such as reduced output, increased prices, or decreased quality in the relevant market.'" Docket No. 229 (Order at 5) (emphasis in original). For indirect evidence, a plaintiff would need to show the defendant's market power, plus some evidence that the defendant's conduct harms competition. *See* Docket No. 229 (Order at 20); *see also* Docket No. 229 (Order at 19) (noting that market power is simply a way to assess whether a defendant's conduct has anticompetitive effects).

The Court previously held that Plaintiffs had failed to adequately allege anticompetitive effects. It noted that, even if supracompetitive pricing by **[**20]** itself, would be sufficient to show anticompetitive effects (*i.e.*, without an additional showing of restricted output), "Plaintiffs [did] not plausibly show[] that Defendants extracted supracompetitive royalties as a result of their aggregation [of patents]." Docket No. 22 (Order at 24).

In the pending motion, Defendants contend that Intel has stilled failed to show supracompetitive pricing, let alone supracompetitive pricing resulting from patent aggregation. Defendants also argue that, for Intel to rely on direct evidence anticompetitive effects, it must demonstrate not only supracompetitive pricing but also restricted output. The Court agrees with Defendants that Intel has, in the SAC, failed to allege supracompetitive pricing tied to patent aggregation.

In so holding, the Court does not take issue with the general theory being put forward by Intel - *i.e.*, that aggregation of substitute patents could, in theory, harm "competition in the same way as any merger or combination of competitors that lessens competition." SAC ¶ 44. The narrative told by the operative complaint, in principle, is compelling. It is not hard to imagine that a person or entity could accrue market power by obtaining **[**21]** a dominant share of substitute patents and threaten a barrage approach to litigation wherein an imperfect civil justice system may yield an erroneous outcome, thus allowing legally unjustified leverage over licensees, a result which could well constitute an unreasonable restraint of trade. The Court also acknowledges that this case is still at the early stages of proceeding *- 12(b)(6)* - and not summary judgment. *Cf.* *Starr v. Baca, 652 F.3d 1202, 1217 (9th Cir. 2011)* (stating that, "[i]f there are two alternative explanations, one advanced by defendant and the other advanced by plaintiff, both of which are plausible, plaintiff's complaint survives a motion to dismiss under *Rule 12(b)(6)*[;] [p]laintiff's complaint may be dismissed only when defendant's plausible alternative explanation is so convincing that plaintiff's explanation is implausible"). The problem for Intel is that the SAC lacks sufficient facts to demonstrate the narrative has been carried out against the company, at least at this juncture.

The Court acknowledges, as Intel argues, that the allegations in the SAC should be considered holistically. The holistic pictured painted by Intel includes the following:

• In spite of any competitive constraints (such as those identified in ¶ 49 of the prior **[**22]** first amended complaint), the prior owners of the patents at issue were willing to bring patent infringement suits — including against companies comparable to Intel **[*465]** (or Apple). However, the prior owners declined to bring infringement suits based on the patents at issue because it was not economically worthwhile (*i.e.*, comparing costs to benefits).

• When the patents at issue were transferred to the PAEs and then Fortress aggregated the patents by virtue of its control over the PAEs, the situation changed. Now the PAEs brought infringement suits based on the patents at issue. Moreover, the PAEs made astronomical demands for the alleged infringement, asking for billions in damages even though the cost of acquiring the patents paled by comparison. Even if the comparisons might not be a *precise* match (*e.g.*, Intel would compare a litigation demand made for one group of patents with the acquisition price of another group of patents, and the only overlap between the two groups would be one of the patents at issue), it can still be inferred from the large differential in price that there was significant price inflation for any given patent. And Intel *was* able to do a more specific price comparison **[**23]** for one patent — the '331 patent. [TEXT REDACTED BY THE COURT].[5] *See* SAC ¶ 274.

If the Court credits the allegations above,[6] the allegations may tend to show that supracompetitive prices were being charged for the patents at issue. Notably, that inference requires a number of inferential leaps not free of alternative explanations; thus, even if a reasonable inference of supracompetitive pricing could be drawn, Intel's showing is not compelling. But even if Intel may be deemed to have made a sufficient showing of plausibility under *Rule 12(b)(6)*, the critical question is whether Intel has plausibly shown that the supracompetitive prices were the *result of patent aggregation*. Here, the Court finds Intel has not made such a showing. There are several reasons.

As an example, for the '331 patent (which the Court notes is actually a complementary patent in the first market), VLSI's damages expert opined that a reasonable royalty for that patent alone would be approximately [TEXT REDACTED BY THE COURT]; however, there is no allegation in the SAC that the expert reached that valuation *taking into account the fact that VLSI had aggregated substitutes for the '331 patent*. *See* SAC ¶ 274 [TEXT REDACTED BY THE COURT] (emphasis added). The increase **[**24]** in value could have been based on development in technology and the market independent of any aggregation.

More generally, although it is *possible* that the supracompetitive prices for the patents were due, if only in part, to patent aggregation, Intel must show plausibility, not mere possibility under *Iqbal*/*Twombly*. The problem for Intel is that the holistic picture painted in the SAC weighs against this plausibility. For example, for the second market (for arbitrating multiple requests to access a memory bus), Intel has identified only two substitute patents that were aggregated: one held by Uniloc and the other held by VLSI. Given that Fortress and the *two* PAEs aggregated only *two* substitute patents, it is implausible **[*466]** that it was the aggregation that enabled them to charge supracompetitive prices — at least, where no other information is alleged about how many substitute patents are in the market or that these two patents are key to products in the market - *i.e.*, they constitute the "crown jewels" in the field. The Court has no idea how critical these two substitute patents are and what alternative substitutes exist. Although the third and fourth markets involve aggregation of more patents — **[**25]** seven and five, respectively —

---

[5] Intel has argued (and alleged) that it could have brought more (and better) comparisons if Defendants had agreed to let Intel use confidential information it obtained from the patent infringement lawsuits brought by the PAEs. Although the Court is not without some sympathy for Intel, it also notes that Intel could have brought antitrust counterclaims in those suits — where it could have used that confidential information without issue.

[6] The Court acknowledges Defendants' argument that the comparison involving the '331 patent is not apt because *See* Mot. at 20-21 [TEXT REDACTED BY THE COURT]

the aggregation is still quite limited in scope,[7] and, again, there is a complete absence of any allegations about mere essentiality and their functional and economic importance. Notably, Intel was not without ability to make those allegations. Although Intel has asserted that Defendants have obscured from the public what patents they own or have control over, Intel should still be able to explain why the patents that it knows Defendants have aggregated are, *e.g.*, the "crown jewels" of the field. In the prior order dismissing the first complaint, the Court specifically invited Intel (and Apple) to include such allegations. *See* Docket No. 229 (Order at 25) (stating that "[t]he ability to extract a supracompetitive royalty is easier to infer if Defendants held the crown jewels, but no such allegation is made in the FAC"). At the hearing on the instant motion, despite the repeated invitation of the Court to elaborate on the qualitative allegations that would support an inference of supracompetitive prices *being the result* of aggregation, Intel stated that it would stand on its current complaint. Such qualitative information, while not necessarily the *sine* ***[**26]*** *qua non* of market power, is material here where the showing of supracompetive pricing is itself less than compelling.

Furthermore, to the extent Intel's patent aggregation theory involves Defendants' assertion of those patents against others - *e.g.*, in serial patent infringement litigation — here, Intel's claim of serial litigation with respect to the markets at issue is premature:

• For the second patent market (arbitrating multiple requests to access a memory bus), Intel has been sued for infringement of the '983 patent in two cases (No. C-19-0426 (D. Del.) and No. C-19-0256 (W.D. Tex.). The two cases, however, are not true "serial" cases because VLSI dismissed the Delaware suit approximately a month after initiating it and chose to bring three suits (including No. C-19-0256) in Texas instead. Intel has not yet been sued for the other substitute patent in the market (*i.e.*, the '687 patent).
• For the third patent market (third-party device authorization through limitation of information exchanged), Intel has been sued for infringement of the '633 patent (No. C-18-0966 (D. Del.). Intel has not been sued for any of the other six substitute patents.

• For the fourth patent market (for MOSFET channel fabrication), Intel **[**27]** has been sued for infringement of the '303 patent (No. C-17-5671 (N.D. Cal.). Intel has not been sued for any of the other four substitute patents.

In short, Intel has not alleged sufficient facts establishing it has been subject to the unreasonable restraint of trade in the form of serial suits strategically brought to extract **[*467]** compensation not reflective of the merits or that it has been faced with the dilemma of being confronted with an aggregated portfolio of patents leaving it with no viable alternatives in a particular market.

Because the Court concludes that Intel has failed to allege that supracompetitive pricing was a result of the patent aggregation, Intel's antitrust claims are hereby dismissed. As Intel also made clear at the hearing that it would stand on the allegations made in the SAC, the dismissal is with prejudice. The Court need not address Defendants' remaining arguments, including but not limited to whether Intel must show restricted output in addition to supracompetitive pricing to establish direct evidence of anticompetitive effects.

D. Anti-SLAPP Motion

Previously, the Court declined to address arguments specific to Plaintiffs' UCL claim because the claim was derivative of **[**28]** the federal antitrust claims. *See* Docket No. 187 (Order at 34). However, Defendants make clear in the pending motion that, if the Court rules against Intel, then it must address their anti-SLAPP motion with respect to the UCL claim because, if that motion is successful, they can be awarded their fees.

HN4[] "SLAPP" stands for strategic lawsuit against public participation. California has an "anti-SLAPP" statute designed "'to allow early dismissal of meritless . . . cases aimed at chilling expression [or the right to petition] through costly, time-consuming litigation." *Verizon Del., Inc. v. Covad Comms. Co., 3i77 F.3d 1081, 1090 (9th Cir. 2004)*. The statute provides in relevant part as follows: "A cause of action against a person arising from any act of

---

[7] The third market involves alleged aggregation by just four PAEs: INVT, Seven, VLSI, and Uniloc. The fourth market involves alleged aggregation by two PAEs only: Uniloc and VLSI.

that person in furtherance of the person's right of petition or free speech under the United States Constitution or the California Constitution in connection with a public issue shall be subject to a special motion to strike, unless the court determines that the plaintiff has established that there is a probability that the plaintiff will prevail on the claim." *Cal. Code Civ. Proc. § 425.16(b)(1)*.

> ***HN5***[] "The analysis of an anti-SLAPP motion proceeds in two steps." At step one, "the court decides whether the defendant has made a threshold showing that the **[**29]** challenged cause of action is one arising from protected activity." When a claim is mixed, meaning that it is based on allegations of both protected and unprotected activity, the unprotected activity is disregarded at the first step. Only if the Court determines that relief is sought based on protected activity [**14] does it reach the second step.
>
> At step two, "the burden shifts to the plaintiff to demonstrate that each challenged claim based on protected activity is legally sufficient and factually substantiated." ***HN6***[] The Court "will review anti-SLAPP motions to strike under different standards depending on the motion's basis." "[W]hen an anti-SLAPP motion to strike challenges only the legal sufficiency of a claim, a district court should apply the *Federal Rule of Civil Procedure 12(b)(6)* standard and consider whether a claim is properly stated." . . .
>
> "[W]hen an anti-SLAPP motion to strike challenges the factual sufficiency of a claim, then the *Federal Rule of Civil Procedure 56* standard will apply." . . .
>
> If the plaintiff ultimately fails to meet its burden at the second step, the claim based on protected activity is stricken and "[a]llegations of protected activity supporting the stricken claim are eliminated from the complaint, unless they also support a **[**30]** distinct claim on which the plaintiff has shown a probability of prevailing."

[*468] *Ramachandran v. City of Los Altos, 359 F. Supp. 3d 801, 810-11 (N.D. Cal. 2019)*.

The critical threshold issue in the instant case is whether Defendants have shown that the UCL/antitrust claim arises from protected activity (*i.e.*, the filing of patent infringement lawsuits). Defendants acknowledge that the Court previously held that Plaintiffs' lawsuit was "not covered by the *Noerr-Pennington* doctrine," Reply at 24 - *i.e.*, because the heart of the suit was about the aggregation of patents, and the patent infringement suits were, in effect, secondary. *See* Docket No. 187 (Order at 26) (stating that, under *Noerr-Pennington*, "liability cannot be predicated on petitioning activity but if a defendant engages in anticompetitive conduct which does not constitute petitioning activity, it cannot immunize itself from liability for litigation-related damages if it asserts or tries to assert its unwarranted accumulation of market power through litigation"). But Defendants argue that

> the question of whether Intel's suit is covered by California's Anti-SLAPP statute presents a separate and distinct legal question. Moreover, "the protections afforded by the Anti-SLAPP statute are not coextensive with the **[**31]** categories of conduct or speech protected by the *First Amendment*." Thus, "courts determining whether conduct is protected under the anti-SLAPP statute look not to *First Amendment* law," but to the text of the statute.

Reply at 24.

Defendants' argument, however, is without merit. The text of the anti-SLAPP statute is as follows: "A cause of action against a person arising from any act of that person *in furtherance of the person's right of petition or free speech* under the United States Constitution or the California Constitution in connection with a public issue shall be subject to a special motion to strike . . . ." *Cal. Code Civ. Proc. § 425.16(b)(1)* (emphasis added). *Section 425.16(e)* provides:

> As used in this section, "act in furtherance of a person's right of petition or free speech under the United States or California Constitution in connection with a public issue" includes: (1) any written or oral statement or writing made before a legislative, executive, or judicial proceeding, or any other official proceeding authorized by law, (2) any written or oral statement or writing made in connection with an issue under consideration or review by a legislative, executive, or judicial body, or any other official proceeding authorized by law, (3) any written or oral statement **[**32]** or writing made in a place open to the public or a public forum in connection with an issue of

> public interest, or (4) any other conduct in furtherance of the exercise of the constitutional right of petition or the constitutional right of free speech in connection with a public issue or an issue of public interest.

Id. § 425.16(e).

In light of the text above, the Court's *Noerr-Pennington* analysis equally applies here. ***HN7***[] There is no basis, in this context, to apply a different interpretation of what constitutes protected activity.[8] *See* Select Portfolio Servicing v. Valentino, 875 F. Supp. 2d 975, 988 (N.D. Cal. 2012) (stating that "[t]he first part of the anti-SLAPP inquiry is substantially the same as the inquiry into whether the *Noerr-Pennington* doctrine applies"; "'[i]n the anti-SLAPP context, the critical point is whether **[*469]** the plaintiff's cause of action itself was based on an act in furtherance of the defendant's right of petition or free speech'"). The "true" conduct that Intel claims is anticompetitive is the aggregation of patents; that is not an act in furtherance of the right of petition or free speech, as defined in § 425.16(e). *See* Equilon Enters. v. Consumer Cause, Inc., 29 Cal. 4th 53, 66, 124 Cal. Rptr. 2d 507, 52 P.3d 685 (2002) (stating that "the act underlying the plaintiff's cause or the act which forms the basis for the plaintiff's cause of action must *itself* have been an **[**33]** act in furtherance of the right of petition or free speech") (internal quotation marks omitted).

Implicitly recognizing this problem, Defendants contend that there is an independent reason why the "'arising from' prong is . . . satisfied": "Intel is seeking to enjoin Defendants' protected infringement suits, which amounts to a prior restraint on Defendants' protected activity." Reply at 24. *See, e.g.*, Equilon, 29 Cal. 4th at 67 n.4 (noting that Equilon sought "injunctive relief that expressly would restrict Consumer Cause's exercise of petition rights"). But it is not clear from the SAC that Intel is seeking to enjoin any patent infringement suits per se. Certainly, the prayer for relief in the SAC does not refer to such relief. *See* SAC, Prayer ¶¶ (a), (c) (asking *in general terms* that "Defendants' unlawful conduct be declared [an antitrust] violation" and that an order be issued "directing the termination of the anticompetitive conduct and injunctive relief that restores competition to the markets at issue"). Defendants suggest that Intel must be seeking such relief because, in its opposition, it refers to "Defendants' patent aggregation *and assertion* scheme." Opp'n at 40 (emphasis added). But this **[**34]** mere reference to patent assertion does not clearly establish that Intel is seeking an injunction that would bar Defendants from filing patent **infringement lawsuits**.

IV. CONCLUSION

For the foregoing reasons, the Court grants Defendants' motion to dismiss (with prejudice) but denies its anti-SLAPP motion to strike.

The Clerk of the Court is ordered to enter a final judgment in accordance with the above and close the file in the case.

The Clerk of the Court is also instructed to file under seal Part III of this order - at least on a temporary basis. The parties are ordered to meet and confer to determine which portions of Part III need to be filed under seal. The request to seal should be narrowly tailored and should be supported by a declaration. The sealing request shall be filed within a week of the date of this order.

This order disposes of Docket No. 244.

IT IS SO ORDERED.

Dated: September 28, 2021

/s/ Edward M. Chen

---

[8] Defendants do not contend that the California constitution applies a standard different from *Noerr-Pennington*.

Reporter

2021 Cal. Super. LEXIS 41886 *

JORDAN SIMONS, et al. v. SIGNATURE ESTATE & INVESTMENT ADVISORS, LLC., A DELAWARE LIMITED LIABILITY PARTNERSHIP, et al.

Core Terms

cause of action, demurrer, unauthorized practice of law, grounds, leave to amend, demur, tortious interference, probate, inheritance, sustain a demurrer, motion to strike, disruption, appears, unfair, unfair business practice, business practice, allegations, purported, prospective economic advantage, lack standing, sustaining, defects, confer, reasonable possibility, grant leave to amend, third party, benefits, damages, notice, fails

Counsel: **[*1]** For Plaintiff(s): Joshua Furman.

For Defendant(s): David Samani; Wendy May Thomas.

Judges: Honorable Dennis J. Landin, Judge.

Opinion by: Dennis J. Landin

Opinion

Judge: Honorable Dennis J. Landin

Judicial Assistant: J. Clavero

Courtroom Assistant: A. Alba

CSR: None

ERM: None

Deputy Sheriff: None

APPEARANCES:

For Plaintiff(s): Joshua Furman (by Video Appearance)

For Defendant(s): David Samani (by Video Appearance); Wendy May Thomas (by Video Appearance)

NATURE OF PROCEEDINGS: Hearing on Demurrer - without Motion to Strike (Defendant Citadel Law Corporation and Daniel Hayes) (1676); Hearing on Demurrer - with Motion to Strike (CCP 430.10) re First Amended Complaint (Defendants Signature Estate & Investment Advisors, LLC and Jennifer Kim)

The Court issues a tentative ruling this morning which is posted on the Court's website.

The matter is called for hearing.

The Court hears oral argument on the above-captioned demurrers.

After hearing oral argument, the Court adopts the tentative ruling of the Court as the Order of the Court as follows:

Background

On October 8, 2020, Plaintiffs Jordan Simons ("Jordan") and Benjamin Simons ("Benjamin")[1] (collectively, "Plaintiffs") commenced this action against Defendants Signature Estate & Investment **[*2]** Advisors LLC ("Signature"), Jennifer Kim ("Kim"), Citadel Law Corporation ("Citadel"), and Daniel C. Hales ("Hales") (collectively, "Defendants") for:

(1) Legal Malpractice;

(2) Breach of Fiduciary Duty;

(3) Negligence;

(4) Unfair Business Practice; and

(5) Unauthorized Practice of Law.

On April 29, 2021, the Court sustained Defendants' demurrers and denied the motions to strike as moot. The Court also granted Plaintiffs leave to amend.

On May 21, 2021, Plaintiffs filed their First Amended Complaint ("FAC") against Defendants for:

(1) Unfair Business Practice;

(2) Unauthorized Practice of Law;

(3) Tortious Interference with Contract; and

(4) Tortious Interference with Prospective Economic Advantage.
